

The **Chicago Health Atlas** is a free website and resource to review, compare and explore health-related data over time and across Chicago community areas.

TURN DATA INTO INFORMATION— PUT YOUR INFORMATION TO WORK

Community members and **organizations** use Atlas data to identify challenges, build solutions, apply for grants and advocate for other resources.

Researchers, university faculty, educators and students use Atlas data in research, articles and classrooms.

Policy makers and **communities** use the Atlas to inform decisions that affect community health and to track progress towards health and racial equity in Chicago.
