UTILIZING JOC FOR CITY CONSTRUCTION PROJECTS

For the proposed projects please complete items 1 and 2 below. As appropriate, complete items 3, 4 and 5

(Attach to the MOA)

1. Please describe the major features of the project:

The existing concrete roof of the vaulted areas under Benton Place and Holden Place are in poor and unsafe condition. Vehicular traffic has been restricted from Benton Place due to safety concerns. Emergency shoring must be install under the roof slabs of both vaulted areas in order to allow vehicular traffic to re-use Benton Place. The work consists of installing a temporary screw jack shoring system under the two vaulted levels of Benton Place and installing screw jack shoring system under Holden Place. These items could not be performed by City Forces and were not covered by an existing term agreement.

2. Please explain why this project could not be bid using the City's traditional bid process and the need to use the JOC procurement system:

The project requires special equipment and entails a relatively small scope of work. It would not be time or cost effective for us to perform the work through The City's traditional bid process.

3. If this project is a one trade project, please provide additional explanation of why it would be in the City's best interest to do the project under JOC:

Not applicable -various trades will participate

4. If it is anticipated that over 25% of the project well be non-prepriced, please provide an explanation on why JOC should be used:

Not applicable

5. If some elements of the proposed JOC project scope of work are covered by City Term Agreements, these elements should be removed from the JOC project scope of work. If it is not desirable to do so, please explain:

Not applicable
