Attachment A

Utilizing JOC For City Construction Projects

Project Number: 08-84-10-008

Department: Transportation

Project Manager: John Cecchin

Telephone #: (312) 744-2255

For all Proposed JOC Projects, Please complete Items 1 and 2 below. As appropriate, Complete items 3,4 and 5. Attach to MOA (JOC Approval Letter)

1. Please describe the major features of this project.

The scope of work to be performed under this sub-order includes but is not limited to; sidewalk and curb and gutter removal and replacement, grinding and replacement of existing asphalt and striping and new catch basin installation.

2. Please explain why this project could not be bid using the city's traditional bid process and the need to use JOC Procurement system.

CDOT has constructed one intersection on Lincoln Park West at Belden by use of the JOC procurement system in 2007. Pacific Construction is aware of the proposal line items, local area traffic and detours as well as the short construction time frame. CDOT has been working with the local alderman and community regarding intersection improvements since the pedestrian fatality in the area in 2006. The alderman has requested construction for the Dickens intersection this year. CDOT's construction schedule calls for intersection improvements to be completed in Fall 2008. In the interest of pedestrian safety, time, and in order to meet the construction schedule for Fall 2008, CDOT must use the JOC procurement system.

3. If the project is a one trade project, please provide additional explanation of why it would be in the city's best interest to do the project under JOC:

Multiple trades: paving, concrete, striping and sewer

4. If it is anticipated that over 25% of the project will consist of Non-prepriced items, please provide an explanation on why JOC should be used.

N/A

5. If some elements of the proposed JOC project scope of work are covered by city term agreements, explain why they are included in this JOC project instead of being procured through the term agreements.

Due to the limited scope and use of specialty items (brick work), CDOT must use the JOC procurement system. Also, the JOC procurement system was used for the construction of the Lincoln Park West intersection at Belden in 2007, it makes sense to use the JOC procurement system again.
