UTILIZING JOC FOR CITY CONSTRUCTION PROJECTS

For all proposed projects please complete items 1 and 2 below. As appropriate, complete items 3, 4 and 5.

(Attach to the MOA)

1. Please describe the major features of the project:

This project generally consists of power-washing the roadway and re-stripping pavement markings. This work will improve traffic safety by increasing roadway skid-resistance and prohibiting vehicular movement between lanes.

2. Please explain why this project could not be bid using the City's traditional bid process and the need to use the JOC procurement system:

JOC procurement is necessary for timely improvements given traffic safety concerns. Given the minimal total estimated cost of this projects (estimate attached) JOC procurement is appropriate.

3. If this project is a one trade project, please provide additional explanation of why it would be in the City's best interest to do the project under JOC:

4. If it is anticipated that over 25% of the project will be non-prepriced, please provide an explanation on why JOC should be used:

JOC allows for the timely removal and replacement of this traffic safety device and is an efficient procurement method given the minimal project cost.

5. If some elements of the proposed JOC project scope of work are covered by City Term Agreements, these elements should be removed from the JOC project scope of work. If it is not desirable to do so, please explain:
