Subject: Re: Travel synopsis

Good evening Steve,

Livia Verklan-McInnes, Madeleine Saldon, Shirley Tankersley and I returned from the Centers for Disease Control and Prevention conference last Friday June 9th.

Attendance at the Overdose Data to Action (OD2A) 2023 Recipient meeting in Atlanta, GA on June 7-9, 2023 is one of the requirements for the Centers for Disease Control and Prevention (CDC) Overdose Data to Action cooperative agreement. This cooperative agreement funds the majority of activities and programming for CDPH's Substance Use Program.

In this meeting, the CDPH staff named above discussed the impact of the surveillance and prevention projects, initiatives, and technical assistance opportunity that were developed as a result of receiving this funding. All CDPH staff named above attended as a representative of the Chicago Department of Public Health.

Thanks again.

Wilnise Jasmin MD, MBA, MPH
Medical Director of Behavioral Health
Chicago Department of Public Health
