Small Loans to Farms

Refer to Table T for the facts and data used to evaluate the borrower distribution of the bank's origination/purchase of small loans to businesses.

The distribution of small loans to farms with gross annual revenues of $1 million or less is adequate. The distribution is adequate in the Buffalo-Cheektowaga-Niagara Falls, NY MSA and Kingston, NY MSA and poor in the Syracuse, NY MSA. The bank did not collect or consider the gross annual revenues in the underwriting of approximately 46 percent of its small loans to farms.

Buffalo-Cheektowaga-Niagara Falls, NY MSA

The distribution in the Buffalo-Cheektowaga-Niagara Falls, NY MSA is adequate. Based on farms with known revenues, the proportion of the bank's small loans to farms at 45.2 percent is lower than the 95.8 percent of farms with gross annual revenues of $1 million or less. However, the distribution exceeds the 37.4 percent performance for aggregate lenders.

Kingston, NY MSA

The distribution in the Kingston, NY MSA is adequate. Based on farms with known revenues, the proportion of the bank's small loans to farms at 47.6 percent is lower than the 97.1 percent of farms with gross annual revenues of $1 million or less. However, the distribution exceeds the 32.3 percent performance for aggregate lenders.

Syracuse, NY MSA

The distribution in the Syracuse, NY MSA is poor. Based on farms with known revenues, the proportion of the bank's small loans to farms at 44.7 percent is lower than the 96.4 percent of farms with gross annual revenues of $1 million or less. The distribution is also lower than the 57.3 percent performance for aggregate lenders.

Community Development Lending

CD lending has a significantly positive effect overall on the bank's Lending Test performance in the state of New York.

Buffalo-Cheektowaga-Niagara Falls, NY MSA

In the Buffalo-Cheektowaga-Niagara Falls, NY MSA, CD lending has a significantly positive effect on the lending performance in the assessment area. The bank originated 12 CD loans totaling $36 million that primarily support affordable housing, community services and revitalization/ stabilization. CD loans helped to finance the development of 293 units of affordable housing. CD lending represents 13.2 percent of the allocated Tier 1 Capital.

Examples of CD loans include:

- The bank provided $10.2 million in construction financing to build the Waterfront, Phase I, a 48-unit affordable housing multi-family development in a low-income census tract. All units are restricted to incomes at or below 60 percent of the area median income.

- The bank renewed its $2.4 million construction loan for AD Price II, a 95-unit affordable housing development in Buffalo, NY targeted to seniors aged 55 or older. The original construction financing dates back to 2009. The development is now 98 percent occupied. All units are restricted to incomes at or below 60 percent of the area median income.

- The bank provided $3.5 million in financing to the Lockport City School District, through a Qualified Zone Academy Bond (QZAB), which strengthens schools serving a large concentration of low-income families. The School District used these funds to finance energy efficient equipment installed at schools within the district.

Kingston, NY MSA

In the Kingston, NY MSA, CD lending has a neutral effect on the lending performance in the assessment area. The bank originated 10 CD loans totaling $2.9 million that primarily support affordable housing and community services. The funds for affordable housing purposes were provided to a nationally recognized certified CDFI. The CDFI used the funds to refinance its existing non-performing loan portfolio, in which 51 percent of units in each development are affordable. The CD loans did not help to finance the development of any new units of affordable housing. CD lending represents 5.8 percent of the allocated Tier 1 Capital. The bank met the community's credit needs primarily through retail lending.

Syracuse, NY MSA

In the Syracuse, NY MSA, CD lending has a significantly positive effect on the lending performance in the assessment area. The bank originated four CD loans totaling $71.8 million that primarily support affordable housing and community services. The bank provided similar funding to the same national CDFI described in the Kingston, NY MSA. The CD loans did not help to finance the development of any new units of affordable housing. CD lending represents 31.5 percent of the allocated Tier 1 Capital.

An example of CD loans includes:

- The bank provided $68.4 million for cash flow gap funding for the Syracuse City School District. Approximately 74 percent of the students in the district are eligible for reduced or free lunch.

Other Lending

Bank of America issued two standby letters of credit totaling $41.7 million dollars to support construction financing for multifamily affordable housing projects in Rochester and Syracuse, New York. While letters of credit are not reportable as CD loans, they sometimes support community development and thus receive positive consideration in the bank's CD lending performance.

Product Innovation and Flexibility

Bank of America offers various national and local flexible lending programs that have benefitted borrowers during the evaluation period. These include programs such as America's Home Grant, Affordable Loan Solutions, and Business Advantage Credit Line. The bank also participates with multiple organizations that provide flexible lending through NACA and other affordable housing programs. Unlike in other rating areas, lending under the MHA and HARP programs accounted for only 17 percent of the dollar volume of all loans under flexible lending programs. In the state of New York, FHA loans account for 69 percent of the flexible lending programs.

Conclusions for Areas Receiving Limited-Scope Reviews

Lending Test performance in the Albany-Schenectady-Troy, NY MSA, Ithaca, NY MSA, Rochester, NY MSA, Utica, NY MSA, and New York Non-MSA is consistent with the Outstanding Lending Test performance in the state of New York.

INVESTMENT TEST

Conclusions for Areas Receiving Full-Scope Reviews

Refer to Table 14 for the facts and data used to evaluate the bank's level of qualified investments.

Bank of America's performance under the Investment Test in the state of New York is rated Outstanding. Investment performance is good in the Buffalo-Cheektowaga-Niagara Falls, NY MSA, adequate in the Kingston, NY MSA, and excellent in the Syracuse, NY MSA. Performance in limited-scope assessment areas has a positive effect on the state rating.

Buffalo-Cheektowaga-Niagara Falls, NY MSA

In the Buffalo-Cheektowaga-Niagara Falls, NY MSA, Bank of America has a good level of CD investments. The bank made 102 investments during the current evaluation period totaling $19.4 million. Approximately $18.7 million or 96.4 percent of the current period investment dollars in the MSA supported nearly 336 units of affordable housing. In addition, the bank has 42 CD investments totaling $7.4 million it made during a prior evaluation period that are still outstanding and continue to benefit the community. Outstanding prior period and current period investments total $26.7 million or 9.8 percent of the bank's Tier 1 Capital allocated to the assessment area. The majority of current period investments are neither innovative nor complex with mortgage-backed securities representing approximately $17.9 million or 92 percent of the investment dollars.

Examples of community development investments include:

- The bank invested $644,000 in a fund that invests directly and indirectly in partnerships that own affordable housing projects across the U.S. The partnerships use LIHTCs to help fund the projects. This transaction represents the amount allocated to Foxwood Place, a 164-unit affordable housing development within the MSA.

- The bank invested more than $182,000 in Resident Ownership Capital, a certified CDFI with a mission to make quality resident ownership possible by preserving and improving affordable communities, building assets for low- and moderate-income families and individuals, and supporting mutually supportive communities and leaders. As part of a larger $2 million commitment to the CDFI, this transaction is responsive to the affordable housing needs within the MSA.

- The bank made grants to United Way of Buffalo and Erie County during the evaluation period totaling $261,000. The investments helped to fund the organization's local programs that provide low- and moderate-income individuals with crisis assistance benefit screening, free tax preparation, financial education, asset-building opportunities, and employment preparation.

Kingston, NY MSA

In the Kingston, NY MSA, Bank of America has an adequate level of CD investments. The bank made 22 investments during the current evaluation period totaling $2.7 million. Approximately $2.7 million or 99.9 percent of the current period investment dollars in the MSA supported nearly 18 units of affordable housing. In addition, the bank has 10 CD investments totaling $481,000 it made during a prior evaluation period that are still outstanding and continue to benefit the community. Outstanding prior period and current period investments total $3.2 million or 6.3 percent of the bank's Tier 1 Capital allocated to the assessment area. None of the current period investments are innovative or complex with mortgage-backed securities representing $2.7 million or 100 percent of the investment dollars

Syracuse, NY MSA

In the Syracuse, NY MSA, Bank of America has an excellent level of CD investments. The bank made 92 investments during the current evaluation period totaling $20.3 million. Approximately $18.1 million or 89 percent of the current period investment dollars in the MSA supported over 300 units of affordable housing. In addition, the bank has 21 CD investments totaling $2.5 million it made during a prior evaluation period that are still outstanding and continue to benefit the community. Outstanding prior period and current period investments total $22.8 million or 10 percent of the bank's Tier 1 Capital allocated to the assessment area. The majority of current period investments are neither innovative nor complex with mortgage-backed securities representing approximately $17.1 million or 84 percent of the investment dollars.

Examples of community development investments include:

- The bank invested $2 million in two separate transactions to Home Headquarters, a CDFI committed to creating housing and revitalization opportunities in the assessment area. Approximately 76 percent of the CDFI's lending benefitted low- and moderate-income families.

- The bank invested nearly $408,000 in a fund that makes direct and indirect investments in partnerships that own affordable housing projects around the U.S. LIHTCs support many of the projects. This transaction amount represents Bolivar Landing, which provides 24 units of affordable housing in Syracuse, NY.

- The bank invested more than $430,000 in a similar fund that makes direct and indirect investments in partnerships that own affordable housing projects throughout the U.S. LIHTCs support many of those projects. This transaction represents the Cedar Street Apartments, which provides 24 units of affordable housing in Syracuse, NY.

(*) 'Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
(**) 'Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the bank's financial reporting system.

Conclusions for Areas Receiving Limited-Scope Reviews

Investment Test performance in the in the Albany-Schenectady-Troy, NY MSA, Ithaca, NY MSA, Rochester, NY MSA, Utica, NY MSA, and New York Non-MSA is consistent with the Outstanding Investment Test performance in the state of New York.

SERVICE TEST

Conclusions for Areas Receiving Full-Scope Reviews

Bank of America's performance under the Service Test in the state of New York is rated High Satisfactory. Service Test performance is good in the Buffalo-Cheektowaga-Niagara Falls, NY MSA, excellent in the Kingston, NY MSA, and good in the Syracuse, NY MSA. Performance in limited-scope assessment areas has a neutral effect on the state rating.

Retail Banking Services

Refer to Table C for the facts and data used to evaluate the accessibility of the bank's retail banking services.

Buffalo-Cheektowaga-Niagara Falls, NY MSA

In the Buffalo-Cheektowaga-Niagara Falls, NY MSA, the bank's delivery systems are accessible to geographies and individuals of different income levels. Examiners based this conclusion on a comparison of the distribution of the bank's 24 financial centers with the distribution of the population. The bank has four financial centers in low-income geographies representing 16.7 percent of its financial centers. Low-income geographies have 9.6 percent of the assessment area's population. In moderate-income geographies, the bank has three or 12.5 percent of its financial centers compared with 17 percent of the population.

Examiners also considered the bank's alternative delivery systems including cash dispensing and full-service ATMs, telephone, online, mobile and text banking in evaluating accessibility to the bank's products and services. Alternative delivery systems have a positive effect on the accessibility of the bank's service delivery systems to low- and moderate-income individuals and geographies. The bank demonstrated customer usage of ADS through income proxies based on customer's residency. In four of six ADS platforms, the percentage of customers in low- and moderate-income geographies using the platform was near to or exceeded the percentage of the population in low- and moderate-income geographies.

The bank has six financial centers located in middle- and upper-income geographies that are adjacent to or in very close proximity to low- and moderate-income geographies. Two of those financial centers are adjacent to low-income geographies and the remaining four financial centers are adjacent to moderate-income geographies. The adjacent financial centers help improve accessibility of retail banking services in low-and moderate-income geographies.

Financial center openings and closings generally did not adversely affect the accessibility of retail banking services, particularly in low- and moderate-income geographies and to low- and moderate-income individuals. During the evaluation period, the bank closed 10 financial centers and opened none. The bank closed one financial center in a low-income geography, one in a moderate-income geography, and the remaining eight in middle- and upper-income geographies. Despite the closures, financial centers remain accessible to individuals and geographies of different income levels.

Banking products, services, and hours of operation do not vary in a way that inconveniences the assessment area, particularly in low- and moderate-income geographies, and to low- and moderate-income individuals. The bank offers a full range of products and services. Banking hours are consistent throughout the assessment area. Financial centers are open 9:00 am to 4:00 pm Monday through Thursday, 9:00 am to 5:00 pm on Friday, and 10:00 am to 1:00 pm on Saturday.

Kingston, NY MSA

In the Kingston, NY MSA, the bank's delivery systems are readily accessible to geographies and individuals of different income levels. Examiners based this conclusion on a comparison of the distribution of the bank's five financial centers with the distribution of the population. There are no low-income census tracts in the MSA. The bank has two financial centers in moderate-income geographies representing 40 percent of its financial centers. Moderate-income geographies have 12.3 percent of the assessment area's population.

Examiners also considered the bank's alternative delivery systems including cash dispensing and full-service ATMs, telephone, online, mobile and text banking in evaluating accessibility to the bank's products and services. Alternative delivery systems have a significantly positive effect on the accessibility of the bank's service delivery systems to low- and moderate-income individuals and geographies. The bank demonstrated customer usage of ADS through income proxies based on customer's residency. In four of six ADS platforms, the percentage of customers in low- and moderate-income geographies using the platform exceeded the percentage of the population in low- and moderate-income geographies.

Financial center openings and closings did not adversely affect the accessibility of retail banking services, particularly in low- and moderate-income geographies and to low- and moderate-income individuals. During the evaluation period, the bank closed two financial centers in middle-income geographies.

Banking products, services, and hours of operation do not vary in a way that inconveniences the assessment area, particularly in low- and moderate-income geographies, and to low- and moderate-income individuals. The bank offers a full range of products and services. Banking hours are consistent throughout the assessment area. Financial centers are open 9:00 am to 4:00 pm Monday through Thursday, 9:00 am to 5:00 pm on Friday, and 9:00 am to 12:00 pm on Saturday.

Syracuse, NY MSA

In the Syracuse, NY MSA, the bank's delivery systems are accessible to geographies and individuals of different income levels. Examiners based this conclusion on a comparison of the distribution of the bank's 11 financial centers with the distribution of the population. The bank has one financial center in a low-income geography representing 9.1 percent of its financial centers. Low-income geographies have 10.3 percent of the assessment area's population. In moderate-income geographies, the bank has one financial center, representing 9.1 percent of its financial centers compared with 16.2 percent of the population.

Examiners also considered the bank's alternative delivery systems including cash dispensing and full-service ATMs, telephone, online, mobile and text banking in evaluating accessibility to the bank's products and services. Alternative delivery systems have no effect on the retail banking services conclusion.

The bank has five financial centers located in middle- and upper-income geographies that are adjacent to or in very close proximity to low- and moderate-income geographies. One of the financial centers is adjacent to a low-income geography and the remaining four financial centers are adjacent to moderate-income geographies. The adjacent financial centers help improve accessibility of retail banking services in low-and moderate-income geographies.

Financial center openings and closings did not adversely affect the accessibility of retail banking services, particularly in low- and moderate-income geographies and to low- and moderate-income individuals. During the evaluation period, the bank closed five financial centers and opened none. The bank closed three financial centers in low-income geographies and two in middle-income geographies. The primary reason for the closures was poor financial performance. The closest financial center to two of three of the closures is lower than 0.4 miles.

Banking products, services, and hours of operation do not vary in a way that inconveniences the assessment area, particularly in low- and moderate-income geographies, and to low- and moderate-income individuals. The bank offers a full range of products and services. Banking hours are generally consistent throughout the assessment area. Financial centers are generally open 9:00 am to 4:00 pm Monday through Thursday, 9:00 am to 5:00 pm Friday, and 9:00 am to 12:00 pm Saturday.

Community Development Services

Buffalo-Cheektowaga-Niagara Falls, NY MSA

The bank provides a relatively high level of community development services. During the evaluation period, the bank participated with community development organizations to provide 66 community development services targeted to low- and moderate-income individuals. Employees provided five financial education workshops and one foreclosure prevention workshop for 307 individuals. Attendees to the financial education workshops were primarily students from low- and moderate-income families. Employees also participated in 35 tax preparation workshops. Employees participated in 14 webinars and workshops with non-profit organizations to help the organizations with capacity building. In addition, 10 employees served on the boards or committees of community organizations. The types of CD services provided are responsive to the needs identified in the community.

Kingston, NY MSA

The bank provides a limited level of community development services. During the evaluation period, the bank participated with community development organizations to provide nine community development services targeted to low- and moderate-income individuals. Employees provided six financial education workshops for 162 individuals. Attendees to the financial education workshops were primarily students from low- and moderate-income families. Employees participated in three webinars and workshops with non-profit organizations to help the organizations with capacity building. No employees served on the boards or committees of community organizations. The types of CD services provided are responsive to the needs identified in the community.

Syracuse, NY MSA

The bank provides a relatively high level of community development services. During the evaluation period, the bank participated with community development organizations to provide 37 community development services targeted to low- and moderate-income individuals. Employees provided three financial education workshops and one foreclosure prevention workshop for 57 individuals. Employees participated in 17 webinars and workshops with non-profit organizations to help the organizations with capacity building. In addition, 16 employees served on the boards or committees of community organizations. The types of CD services provided are responsive to the needs identified in the community.

Conclusions for Areas Receiving Limited-Scope Reviews

Service Test performance in the Albany-Schenectady-Troy, NY MSA is consistent with the High Satisfactory Service Test performance in the state of New York. Performance in the Rochester, NY MSA is stronger than the overall High Satisfactory Service Test performance in the state of New York due to the stronger distribution of financial centers. Performance in the Ithaca, NY MSA, Utica, NY MSA, and New York Non-MSA is weaker than the overall High Satisfactory Service Test performance in the state of New York due to the weaker distribution of financial centers.

State of North Carolina

CRA Rating for North Carolina[37]: Satisfactory
The Lending Test is rated: High Satisfactory
The Investment Test is rated: Outstanding
The Service Test is rated: High Satisfactory

The major factors that support this rating include:

- Excellent volume of loans originated or purchased within the assessment areas;
- Good distribution of loans by geography and good distribution of loans by borrower income or business/farm revenue size;
- Relatively low level of CD lending that has a neutral effect on overall lending performance;
- Excellent level and responsiveness of qualified investments; and
- Accessible service delivery systems to low- and moderate-income geographies and individuals.

Description of Institution's Operations in North Carolina

The state of North Carolina is Bank of America's 21st largest rating area based on its total deposits in the state when excluding the Charlotte-Concord-Gastonia, NC-SC Multistate MSA and Myrtle Beach-Conway-North Myrtle Beach, SC-NC Multistate MSA. Examiners excluded the multistate MSAs from the analysis of the state of North Carolina because examiners evaluated the multistate MSAs as separate rating areas. As of June 30, 2016, the bank maintained approximately $9.4 billion or 0.8 percent of its total domestic deposits in financial centers in areas of the state of North Carolina that do not include the multistate MSAs. Of the 86 depository financial institutions operating in the areas of the state of North Carolina that exclude the multistate MSAs, Bank of America, with a deposit market share of 6.4 percent, is the fourth largest. The bank's primary competitors for deposits in North Carolina with deposit shares greater than 5 percent include Branch Banking and Trust Company (32.3 percent), Wells Fargo Bank (15.6 percent), and First Citizens Bank & Trust Company (8.7 percent). As of December 31, 2016, BANA operated 95 financial centers and 218 full service ATMs in the areas of the state of North Carolina that exclude the multistate MSAs.

Refer to the community profiles for the state of North Carolina in appendix C for detailed demographics and other performance context information for assessment areas that received full-scope reviews.

[37] For institutions with branches in two or more states in a multistate metropolitan area, this statewide evaluation does not reflect performance in the parts of this state contained within the multistate metropolitan area. Refer to the multistate metropolitan area rating and discussion for the rating and evaluation of the institution's performance in that area.

Scope of Evaluation in North Carolina

Examiners selected three assessment areas for full-scope reviews and the remaining ten assessment areas for limited-scope reviews. The full-scope assessment areas selected included the Greensboro-High Point, NC MSA, Jacksonville, NC MSA, and Raleigh, NC MSA. The full-scope assessment areas together comprise 49 percent of the bank's deposits and 45 percent of the bank's lending in the state of North Carolina. Examiners based conclusions and ratings on the activities within all assessment areas. During the evaluation period, Bank of America originated or purchased 31,822 home mortgage loans totaling $5.7 billion, 33,052 small loans to businesses totaling $811.7 million, 358 small loans to farms totaling $6 million, and 19 CD loans totaling $77.2 million. Lending volumes include loans originated or purchased in the Goldsboro, NC MSA, which the bank no longer designates as an assessment area due to the closure or sale of all financial centers and deposit-taking ATMs in the community. Based on loan volume, examiners weighted small loans to businesses the most, representing 51 percent of the volume, followed by home mortgage loans at 49 percent, and small loans to farms at less than 1 percent.

Examiners conducted telephone interviews with three local community service agencies representing neighborhood housing, employment, and community service needs. The community contacts noted that affordable housing, land banks, financial literacy, and financing programs for applicants with weak credit as a concern across the state.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN NORTH CAROLINA

LENDING TEST

Conclusions in Areas receiving Full-Scope Reviews

Bank of America's performance under the Lending Test in the state of North Carolina is rated High Satisfactory, based on excellent lending activity, good geographic distribution, and good income distribution. Performance in limited-scope assessment areas has a neutral effect on the state rating.

Lending Activity

Based on total lending volume in Table 1, peer deposit and loan data for 2016, and relevant performance context considerations, the bank's lending activity in the state of North Carolina is excellent. Lending activity is excellent in the Greensboro-High Point, NC MSA, Jacksonville, NC MSA, and Raleigh, NC MSA.

Greensboro-High Point, NC MSA

Lending activity in the Greensboro-High Point, NC MSA is excellent. Based on FDIC deposit data as of June 30, 2016, Bank of America has a deposit market share of 10.7 percent. The bank ranks fourth among 22 depository financial institutions in the assessment area, which places it in the top 19 percent of institutions. According to peer mortgage data for 2016, the bank has a market share of 2.8 percent based on the number of home mortgage loans originated or purchased. The bank ranks fifth among 403 home mortgage lenders, which places it in the top 2 percent of lenders competing for loans. According to peer small business data for 2016, the bank has a 5.7 percent market share of small loans to businesses based on the number of small loans to businesses originated or purchased. The bank ranks sixth among 93 small business lenders, which places it in the top 7 percent of lenders in the MSA. According to peer farm data for 2016, the bank has a market share of 3 percent based on the number of small loans to farms originated or purchased. The bank ranks third among 21 farm lenders, which places it in the top 15 percent of lenders. Considering the bank's higher ranking among all lenders for home mortgage loans and small loans to businesses, overall lending activity is excellent.

Jacksonville, NC MSA

Lending activity in the Jacksonville, NC MSA is excellent. Based on FDIC deposit data as of June 30, 2016, Bank of America has a deposit market share of 15.3 percent. The bank ranks second among 11 depository financial institutions, which places it in the top 19 percent of institutions. According to peer mortgage data for 2016, the bank has a market share of 1.2 percent based on the number of home mortgage loans originated or purchased. The bank ranks 17th among 230 home mortgage lenders, which places it in the top 8 percent of lenders competing for loans. According to peer small business data for 2016, the bank has a 6.8 percent market share of small loans to businesses based on the number of small loans to businesses originated or purchased. The bank ranks seventh among 58 small business lenders, which places it in the top 13 percent of lenders in the MSA. The bank originated or purchased too few small loans to farms for any meaningful analysis. Considering the bank's higher ranking among all lenders for home mortgage loans and small loans to businesses, overall lending activity is excellent.

Raleigh, NC MSA

Lending activity in the Raleigh, NC MSA is excellent. Based on FDIC deposit data as of June 30, 2016, Bank of America has a deposit market share of 11.6 percent. The bank ranks third among 33 depository financial institutions, which places it in the top 10 percent of institutions. According to peer mortgage data for 2016, the bank has a market share of 2.1 percent based on the number of home mortgage loans originated or purchased. The bank ranks 11th among 572 home mortgage lenders, which places it in the top 2 percent of lenders competing for loans. According to peer small business data for 2016, the bank has a 7.5 percent market share of small loans to businesses based on the number of small loans to businesses originated or purchased. The bank ranks fifth among 116 small business lenders, which places it in the top 5 percent of lenders in the MSA. According to peer small farm data for 2016, the bank has a 3 percent market share of small loans to farms based on the number of small loans to farms originated or purchased. The bank ranks seventh among 20 farm lenders, which places it in the top 35 percent of lenders. Considering the bank's higher ranking among all lenders for home mortgage loans and small loans to businesses, overall lending activity is excellent.

Distribution of Loans by Income Level of the Geography

The bank's geographic distribution of loans reflects good penetration in low- and moderate-income geographies. For this analysis, examiners compared the bank's HMDA-reportable loan originations and purchases, small business, and small farm lending with available demographic information. Examiners also considered any relevant performance context information and aggregate lending data.

Home Mortgage Loans

Refer to Table O for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations/purchases.

The overall geographic distribution of home mortgage loans is adequate. The distribution is good in the Greensboro-High Point, NC MSA and adequate in the Jacksonville and Raleigh, NC MSAs.

Greensboro-High Point, NC MSA

The geographic distribution of home mortgage loans in the Greensboro-High Point, NC MSA is good. Performance is good in both low- and moderate-income geographies. The distribution of the bank's home mortgage loans in low-income geographies at 1.8 percent is lower than the 2.4 percent of owner-occupied housing units in low-income geographies and it is slightly higher than the 1.2 percent performance of aggregate lenders. The distribution in moderate-income geographies at 14 percent is also lower than the 18.7 percent of owner-occupied housing units in moderate-income geographies, but is higher than the 13.9 percent performance for aggregate lenders.

Jacksonville, NC MSA

The geographic distribution of home mortgage loans in the Jacksonville, NC MSA is adequate. Because there are no low-income census tracts in the MSA, examiners based the overall conclusion on performance in moderate-income geographies. Performance is adequate in moderate-income geographies. The distribution in moderate-income geographies at 1.5 percent is lower than the 3.8 percent of owner-occupied housing units in moderate-income geographies and it is lower than the 1.9 percent performance for aggregate lenders.

Raleigh, NC MSA

The geographic distribution of home mortgage loans in the Raleigh, NC MSA is adequate. Performance is adequate in both low- and moderate-income geographies. The distribution of the bank's home mortgage loans in low-income geographies at 1.6 percent is lower than the 2.5 percent of owner-occupied housing units in low-income geographies and it is slightly lower than the 1.8 percent performance for aggregate lenders. The distribution in moderate-income geographies at 15.9 percent is lower than the 25.8 percent of owner-occupied housing units in moderate-income geographies and it is lower than the 19.6 percent performance for aggregate lenders.

Small Loans to Businesses

Refer to Table Q for the facts and data used to evaluate the geographic distribution of the bank's origination/purchase of small loans to businesses.

The overall geographic distribution of small loans to businesses is good. The distribution is excellent in the Greensboro-High Point, NC MSA and Jacksonville, NC MSA and good in the Raleigh, NC MSA.

Greensboro-High Point, NC MSA

The geographic distribution of small loans to businesses in the Greensboro-High Point, NC MSA is excellent. Performance is excellent in low-income geographies and good in moderate-income geographies. The distribution in low-income geographies at 6.7 percent is higher than the 6.2 percent of businesses in low-income geographies and it is higher than the 6.2 percent performance for aggregate lenders. The distribution in moderate-income geographies at 18.2 percent is lower than the 19.9 percent of businesses in moderate-income geographies and it is slightly lower than the 18.8 percent performance for aggregate lenders.

Jacksonville, NC MSA

The geographic distribution of small loans to businesses in the Jacksonville, NC MSA is excellent. Because there are no low-income census tracts, examiners based the overall conclusion on performance in moderate-income geographies. Performance is excellent in moderate-income geographies. The distribution in moderate-income geographies at 12.5 percent is higher than the 9.6 percent of businesses in moderate-income geographies and higher than the 7.4 percent performance for aggregate lenders.

Raleigh, NC MSA

The geographic distribution of small loans to businesses in the Raleigh, NC MSA is good. Performance is good in low-income geographies and adequate moderate-income geographies. The distribution in low-income geographies at 4.1 percent is slightly lower than the 4.6 percent of businesses in low-income geographies and it is higher than the 3.7 percent performance for aggregate lenders. The distribution in moderate-income geographies at 17.9 percent is lower than the 23.2 percent of businesses in moderate-income geographies and it is lower than the 20.7 percent performance for aggregate lenders.

Small Loans to Farms

Refer to Table S for the facts and data used to evaluate the geographic distribution of the bank's origination/purchase of small loans to farms.

The overall geographic distribution of small loans to farms is good. The distribution is good in the Greensboro-High Point, NC MSA and good in the Raleigh, NC MSA.

Greensboro-High Point, NC MSA

The geographic distribution of small loans to farms in the Greensboro-High Point, NC MSA is good. Performance is poor in low-income geographies and excellent in moderate-income geographies. The distribution in low-income geographies at 0 percent is lower than the 1.8 percent of farms in low-income geographies and it is lower than the 1.2 percent performance for aggregate lenders. The distribution in moderate-income geographies at 16.7 percent is higher than the 14.7 percent of farms in moderate-income geographies and it is higher than the 11.1 percent performance for aggregate lenders.

Jacksonville, NC MSA

The bank originated or purchased too few small loans to farms for any meaningful analysis.

Raleigh, NC MSA

The geographic distribution of small loans to farms in the Raleigh, NC MSA is good. Performance is excellent in low-income geographies and poor in moderate-income geographies. The distribution in low-income geographies at 12.5 percent is significantly higher than the 3.7 percent of farms in low-income geographies and it is significantly higher than the 4.7 percent performance for aggregate lenders. The distribution in moderate-income geographies at 16.7 percent is lower than the 30.2 percent of farms in moderate-income geographies and it is lower than the 52.2 percent performance for aggregate lenders.

Lending Gap Analysis

For areas receiving full-scope reviews, examiners noted no conspicuous or unexplained gaps in lending in low- and moderate-income geographies.

Inside/Outside Ratio

See the "Inside/Outside Ratio" section within the overall Scope of Evaluation.

Distribution of Loans by Income Level of the Borrower

The bank's distribution of loans by borrower income and revenue size is good. For this analysis, examiners compared the bank's HMDA-reportable loan originations and purchases, small business, and small farm lending with available demographic information. Examiners also considered any relevant performance context information and aggregate lending data.

Home Mortgage Loans

Refer to Table P for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases.

The overall distribution of home mortgage loans by borrower income is good. The distribution is good in the Greensboro-High Point, NC MSA, Jacksonville, NC MSA, and Raleigh, NC MSA.

Greensboro High Point MSA

The distribution of home mortgage loans by borrower income in the Greensboro-High Point, NC MSA is good. The distribution is adequate for low-income borrowers and good for moderate-income borrowers. The proportion of the bank's home mortgage loans to low-income borrowers at 7.9 percent is lower than the 21.8 percent of low-income families, but higher than the 5.6 percent performance for aggregate lenders. The proportion of loans to moderate-income borrowers at 15.8 percent is lower than the 18.1 percent of moderate-income families and it is higher than the 15.2 percent performance for aggregate lenders.

Jacksonville, NC MSA

The distribution of home mortgage loans by borrower income in the Jacksonville, NC MSA is good. The distribution is adequate for low-income borrowers and good for moderate-income borrowers. The proportion of the bank's home mortgage loans to low-income borrowers at 5.9 percent is lower than the 17.2 percent of low-income families, but higher than the 1.7 percent performance for aggregate lenders. The proportion of loans to moderate-income borrowers at 13.6 percent is lower than the 19.8 percent of moderate-income families and it is higher than the 9.5 percent performance for aggregate lenders.

Raleigh, NC MSA

The distribution of home mortgage loans by borrower income in the Raleigh, NC MSA is good. The distribution is adequate for low-income borrowers and good for moderate-income borrowers. The proportion of the bank's home mortgage loans to low-income borrowers at 9.4 percent is lower than the 22.2 percent of low-income families, but higher than the 6.1 percent performance for aggregate lenders. The proportion of loans to moderate-income borrowers at 14.5 percent is lower than the 17.1 percent of moderate-income families and it is lower than the 16 percent performance for aggregate lenders.

Small Loans to Businesses

Refer to Table R for the facts and data used to evaluate the borrower distribution of the bank's originations/purchases of small loans to businesses.

The distribution of small loans to businesses with gross annual revenues of $1 million or less is good. The distribution is good in the Greensboro-High Point, NC MSA, Jacksonville, NC MSA, and Raleigh, NC MSA. The bank did not collect or consider the gross annual revenues in the underwriting of approximately 33 percent of its small loans to businesses.

Greensboro-High Point, NC MSA

The distribution in the Greensboro-High Point, NC MSA is good. Based on businesses with known revenues, the proportion of the bank's small loans to businesses at 57.9 percent is lower than the 77.5 percent of businesses with gross annual revenues of $1 million or less. Considering the bank's distribution is stronger than the 49.4 percent for aggregate lenders, overall performance is good.

Jacksonville, NC MSA

The distribution in the Jacksonville, NC MSA is good. Based on businesses with known revenues, the proportion of the bank's small loans to businesses at 60.5 percent is lower than the 78.7 percent of businesses with gross annual revenues of $1 million or less. Considering the bank's distribution is stronger than the 50.8 percent for aggregate lenders, overall performance is good.

Raleigh, NC MSA

The distribution in the Raleigh, NC MSA is good. Based on businesses with known revenues, the proportion of the bank's small loans to businesses at 60 percent is lower than the 78.8 percent of businesses with gross annual revenues of $1 million or less. Considering the bank's distribution is stronger than the 50 percent for aggregate lenders, overall performance is good.

Small Loans to Farms

Refer to Table T for the facts and data used to evaluate the borrower distribution of the bank's originations/purchases of small loans to farms.

The distribution of small loans to farms with gross annual revenues of $1 million or less is adequate. The distribution is poor in the Greensboro-High Point, NC MSA and adequate in the Raleigh, NC MSA. The bank did not collect or consider the gross annual revenues in the underwriting of approximately 34 percent of its small loans to businesses.

Greensboro-High Point, NC MSA

The distribution in the Greensboro-High Point, NC MSA is poor. Based on farms with known revenues, the proportion of the bank's small loans to farms at 41.2 percent is lower than the 97.7 percent of farms with gross annual revenues of $1 million or less. The distribution is also lower than the 47.5 percent performance for aggregate lenders.

Jacksonville, NC MSA

The bank originated or purchased too few small loans to farms for any meaningful analysis.

Raleigh, NC MSA

The distribution in the Raleigh, NC MSA is adequate. Based on farms with known revenues, the proportion of the bank's small loans to farms at 53.3 percent is lower than the 94.8 percent of farms with gross annual revenues of $1 million or less. The distribution is also lower than the 54.9 percent performance for aggregate lenders.

Community Development Lending

CD lending has a neutral effect on the lending performance in the state of North Carolina. The met the communities' credit needs primarily through retail lending.

Greensboro-High Point, NC MSA

In the Greensboro-High Point, NC MSA, CD lending has a neutral effect on the bank's lending performance in the assessment area. During the evaluation period, the bank originated two CD loans totaling $5.3 million that helped to provide 200 units of affordable housing. CD lending represents 3.4 percent of the allocated Tier 1 Capital.

Jacksonville, NC MSA

In the Jacksonville, NC MSA, CD lending has a negative effect on the lending performance in the assessment area. The bank did not originate or purchase any CD loans during the evaluation period.

Raleigh, NC MSA

In the Raleigh, NC MSA, CD lending has a neutral effect on the lending performance in the assessment area. The bank originated 1 CD loan totaling $8.3 million that provided 88 units of affordable housing. CD lending represents 2.1 percent of the allocated Tier 1 Capital.

Product Innovation and Flexibility

Bank of America offers various national and local flexible lending programs that have benefitted borrowers during the evaluation period. These include programs such as America's Home Grant, Affordable Loan Solutions, and Business Advantage Credit Line. The bank also participates with multiple organizations that provide flexible lending through NACA and other affordable housing programs. Within the state of North Carolina, lending under the MHA and HARP programs accounted for 77 percent of the dollar volume of all loans under flexible lending programs.

Conclusions for Areas Receiving Limited-Scope Reviews

Lending Test performance in the Burlington, NC MSA, Wilmington, NC MSA, Winston-Salem, NC MSA, and North Carolina Non-MSA is consistent with the High Satisfactory Lending Test performance in the state of North Carolina. Lending performance in the Asheville, NC MSA, Fayetteville, NC MSA, Greenville, NC MSA, Hickory-Lenoir-Morganton, NC MSA, and New Bern, NC MSA is stronger than the overall High Satisfactory Lending Test performance in the state of North Carolina. Performance is stronger primarily due to higher relative levels of CD lending that positively affected lending performance. Lending performance in the Durham-Chapel Hill, NC MSA is weaker than the overall High Satisfactory Lending Test performance in the state of North Carolina due to weaker geographic distributions of loans.

INVESTMENT TEST

Conclusions for Areas Receiving Full-Scope Reviews

Refer to Table 14 for the facts and data used to evaluate the bank's level of qualified investments.

Bank of America's performance under the Investment Test in the state of North Carolina is rated Outstanding. Investment performance is excellent in the Greensboro-High Point, NC MSA, good in the Jacksonville, NC MSA, and excellent in the Raleigh, NC MSA. Performance in limited-scope assessment areas has a neutral effect on the state rating.

Greensboro-High Point, NC MSA

In the Greensboro-High Point, NC MSA, Bank of America has an excellent level of CD investments. The bank made 78 investments during the evaluation period totaling $13.2 million. Approximately $12.8 million or 97 percent of the current period investment dollars in the MSA supported 222 units of affordable housing. In addition, the bank has 40 community development investments totaling $2.6 million it made during a prior evaluation period still outstanding that continue to benefit the community. Outstanding prior period and current period investments total $15.8 million or 10.1 percent of the bank's Tier 1 Capital allocated to the assessment area. The majority of current period investments are neither innovative nor complex with mortgage-backed securities representing approximately $10.3 million or 78 percent of the investment dollars.

Examples of community development investments include:

- The bank invested nearly $720,000 in a fund that invests directly and indirectly in partnerships that own affordable housing developments across the United States. LIHTCs (LIHTC) support many of the projects. This investment represents Sherwood Glen, which provides 56 units of affordable housing in the MSA.

- The bank invested $1.7 million in a LIHTC that helped finance the development of Asheboro Mill Loft Apartments, a 70-unit multifamily housing development in Asheboro, NC. All units are restricted to incomes at or below 60 percent of the area median income.

- The bank has provided annual grants to Greensboro Urban Ministry totaling $36,000. The organization used the funds to help the organization provide nutritious meals to homeless and low- and moderate-income individuals and families. The organization feeds up to 110 families daily.

Jacksonville, NC MSA

In the Jacksonville, NC MSA, Bank of America has a good level of CD investments. The bank made 15 investments during the evaluation period totaling $648,000. Approximately $631,000 or 97 percent of the current period investment dollars in the MSA supported 48 units of affordable housing. In addition, the bank has six CD investments totaling $1.1 million it made during a prior evaluation period that are still outstanding and continue to benefit the community. Outstanding prior period and current period investments total $1.8 million or 8.6 percent of the bank's Tier 1 Capital allocated to the assessment area. The majority of current period investments are neither innovative nor complex with mortgage-backed securities representing approximately $575,000 or 89 percent of the investment dollars.

Raleigh, NC MSA

In the Raleigh, NC MSA, Bank of America has an excellent level of CD investments. The bank made 118 investments during the evaluation period totaling $36.6 million. Approximately $35.4 million or 97 percent of the current period investment dollars in the MSA supported 274 units of affordable housing. In addition, the bank has 31 CD investments totaling $5 million it made during a prior evaluation period that are still outstanding and continue to benefit the community. Outstanding prior period and current period investments total $41.6 million or 10.4 percent of the bank's Tier 1 Capital allocated to the assessment area. The majority of current period investments are neither innovative nor complex with mortgage-backed securities representing approximately $28.2 million or 77 percent of the investment dollars.

An example of community development investments includes:

- The bank made a $6.6 million investment in a LIHTC to help finance the construction of Brighton Pointe II, an 88-unit multifamily housing development restricted to seniors aged 55 and older. All units are restricted to incomes at or below 60 percent of the area median income.

Conclusions for Areas Receiving Limited-Scope Reviews

Based on limited-scope review, Investment Test performance in the Asheville, NC MSA, Durham-Chapel Hill, NC MSA, Wilmington, NC MSA, Winston-Salem, NC MSA, and North Carolina Non-MSA is excellent and consistent with the Outstanding Investment Test performance in the state of North Carolina. Investment performance in the Burlington, NC MSA, Fayetteville, NC MSA, Greenville, NC MSA, Hickory-Lenoir-Morganton, NC MSA, and New Bern, NC MSA is weaker than the overall Outstanding Investment Test performance in the state of North Carolina. Investment performance is weaker due to lower levels of CD investments relative to the bank's size and resources in those assessment areas.

(*) 'Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.

(**) 'Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the bank's financial reporting system.

SERVICE TEST

Conclusions for Areas Receiving Full-Scope Reviews

Bank of America's performance under the Service Test in the state of North Carolina is rated High Satisfactory. Service Test performance is good in the Greensboro-High Point, NC MSA, adequate in the Jacksonville, NC MSA, and good in the Raleigh, NC MSA. Performance in limited-scope assessment areas has a neutral effect on the state rating.

Retail Banking Services

Refer to Table C for the facts and data used to evaluate the accessibility of the bank's retail banking services.

Greensboro-High Point, NC MSA

In the Greensboro-High Point, NC MSA, the bank's delivery systems are accessible to geographies and individuals of different income levels. Examiners based this conclusion on a comparison of the distribution of the bank's 14 financial centers with the distribution of the population. The bank has four financial centers in low-income geographies representing 28.6 percent of its financial centers. Low-income geographies have 6.2 percent of the assessment area's population. In moderate-income geographies, the bank has one financial center or 7.1 percent of its financial centers compared with 23.1 percent of the population.

Examiners also considered the bank's alternative delivery systems including cash dispensing and full-service ATMs, telephone, online, mobile and text banking in evaluating accessibility to the bank's products and services. Alternative delivery systems have a positive effect on the accessibility of the bank's service delivery systems to low- and moderate-income individuals and geographies. The bank demonstrated customer usage of ADS through income proxies based on customers' residency. In four of six ADS platforms, the percentage of customers in low- and moderate-income geographies using the platform exceeded the percentage of the population in low- and moderate-income geographies.

The bank has two financial centers located in middle- and upper-income geographies that are adjacent to or in very close proximity to low- and moderate-income geographies. One financial center is adjacent to low-income geographies and the other financial center is adjacent to moderate-income geographies. The adjacent financial centers help improve accessibility of retail banking services in low-and moderate-income geographies.

Financial center openings and closings did not adversely affect the accessibility of retail banking services, particularly in low- and moderate-income geographies and to low- and moderate-income individuals. During the evaluation period, the bank opened one financial center and closed four. The bank closed two financial centers in moderate-income geographies and two in middle-income geographies.

Banking products, services, and hours of operation do not vary in a way that inconveniences the assessment area, particularly in low- and moderate-income geographies and to low- and moderate-income individuals. The bank offers a full range of products and services. Banking hours are generally consistent throughout the assessment area. Financial centers are generally open 9:00 am to 5:00 pm Monday through Thursday, 9:00 am to 6:00 pm on Friday, and 9:00 am to 1:00 pm on Saturday.

Jacksonville, NC MSA

In the Jacksonville, NC MSA, the bank's delivery systems are reasonably accessible to geographies and individuals of different income levels. Examiners based this conclusion on a comparison of the distribution of the bank's three financial centers with the distribution of the population. The assessment area has no low-income census tracts. The bank has no financial centers in moderate-income geographies. Moderate-income geographies have 8.4 percent of the population. Due to the limited number of financial centers and the fact that they are located in middle- and upper-income geographies representing 85 percent of the population, financial centers are reasonably accessible.

Examiners also considered the bank's alternative delivery systems including cash dispensing and full-service ATMs, telephone, online, mobile and text banking in evaluating accessibility to the bank's products and services. Based on customer usage, alternative delivery systems have no effect on the accessibility of the bank's service delivery systems to low- and moderate-income individuals and geographies.

The bank has one financial center located in a middle-income geography that is adjacent to or in very close proximity to moderate-income geographies. The adjacent financial center helps improve accessibility of retail banking services in moderate-income geographies.

Financial center openings and closings did not adversely affect the accessibility of retail banking services, particularly in low- and moderate-income geographies and to low- and moderate-income individuals. The bank closed one financial center in a middle-income geography during the evaluation period.

Banking products, services, and hours of operation do not vary in a way that inconveniences the assessment area, particularly in low- and moderate-income geographies and to low- and moderate-income individuals. The bank offers a full range of products and services. Banking hours are consistent throughout the assessment area. Financial centers are open 9:00 am to 5:00 pm Monday through Thursday and 9:00 am to 6:00 pm on Friday. Only the financial center located in an upper-income geography is open Saturday from 9:00 am to 1:00 pm.

Raleigh, NC MSA

In the Raleigh, NC MSA, the bank's delivery systems are accessible to geographies and individuals of different income levels. Examiners based this conclusion on a comparison of the distribution of the bank's 22 financial centers with the distribution of the population. The bank has one financial center in a low-income geography representing 4.5 percent of its financial centers. Low-income geographies have 6.1 percent of the assessment area's population. In moderate-income geographies, the bank has three financial centers or 13.6 percent of its financial centers compared with 27.0 percent of the population.

Examiners also considered the bank's alternative delivery systems including cash dispensing and full-service ATMs, telephone, online, mobile and text banking in evaluating accessibility to the bank's products and services. Based on customer usage, alternative delivery systems have no effect on the accessibility of the bank's service delivery systems to low- and moderate-income individuals and geographies.

The bank has four financial centers located in middle- and upper-income geographies that are adjacent to or in very close proximity to low- and moderate-income geographies. The bank has one financial center adjacent to a low-income geography and three financial centers adjacent to moderate-income geographies. The adjacent financial centers help improve accessibility of retail banking services in low-and moderate-income geographies

Financial center openings and closings did not adversely affect the accessibility of retail banking services, particularly in low- and moderate-income geographies and to low- and moderate-income individuals. During the evaluation period, the bank opened three financial centers in middle- and upper-income geographies and closed one financial center in an upper-income geography.

Banking products, services, and hours of operation do not vary in a way that inconveniences the assessment area, particularly in low- and moderate-income geographies, and to low- and moderate-income individuals. The bank offers a full range of products and services. Banking hours are consistent throughout the assessment area. All financial centers are open 9:00 am to 5:00 pm Monday through Thursday, 9:00 am to 6:00 pm Friday, and most financial centers are open for Saturday banking 9:00 am to 1:00 pm.

Community Development Services

Greensboro-High Point, NC MSA

In the Greensboro-High Point, NC MSA, the bank provides a relatively high level of community development services. During the evaluation period, the bank participated with community development organizations to provide 63 community development services targeted to low- and moderate-income individuals. Employees provided homebuyer education workshops to 4 low- and moderate-income individuals, and provided 17 financial education workshops for 1,139 individuals. Attendees to the financial education workshops were primarily students from low- and moderate-income families. Employees participated in 15 webinars and workshops with non-profit organizations to help the organizations with capacity building. In addition, 27 employees served on the boards or committees of community organizations. The types of CD services provided are responsive to the needs identified in the community.

Jacksonville, NC MSA

In the Jacksonville, NC MSA, the bank provides a limited level of community development services. During the evaluation period, the bank participated with community development organizations to provide six community development services targeted to low- and moderate-income individuals. Employees provided five financial education workshops for 58 individuals. Employees also participated in one webinar with a non-profit organization to help the organization with capacity building. No employees served on the boards or committees of community organizations. The types of CD services provided are responsive to the needs identified in the community.

Raleigh, NC MSA

In the Raleigh, NC MSA, the bank is a leader in providing community development services. During the evaluation period, the bank participated with community development organizations to provide 219 community development services targeted to low- and moderate-income individuals. Employees provided homebuyer education workshops to 144 low- and moderate-income individuals, and provided 7 financial education workshops and 30 foreclosure prevention workshops for 293 individuals. Attendees to the financial education workshops were primarily students from low- and moderate-income families. Employees participated in 24 webinars and workshops with non-profit organizations to help the organizations with capacity building. In addition, 12 employees served on the boards or committees of community organizations. The types of CD services provided are responsive to the needs identified in the community.

Conclusions for Areas Receiving Limited-Scope Reviews

Service Test performance in the Asheville, NC MSA, Fayetteville, NC MSA, Greenville, NC MSA, and Winston-Salem, NC MSA is consistent with the High Satisfactory performance under the Service Test in the state of North Carolina. Service Test performance in the Hickory-Lenoir-Morganton, NC MSA and Wilmington, NC MSA is stronger than the overall High Satisfactory Service Test performance in the state of North Carolina. Performance is stronger due to stronger accessibility of service delivery systems. Service Test performance in the Burlington, NC MSA, Durham-Chapel Hill, NC MSA, New Bern, NC MSA, and North Carolina Non-MSA is weaker than the overall High Satisfactory Service Test performance in the state of North Carolina. Performance is weaker due to weaker accessibility of service delivery systems.

State of Ohio

CRA Rating for Ohio[38]: **Outstanding**
The Lending Test is rated: Outstanding
The investment test is rated: Outstanding
The service test is rated: Low Satisfactory

The major factors that support this rating include:

- Excellent volume of loans originated or purchased within the assessment areas;
- Good distribution of loans by geography and good distribution of loans by borrower income or business/farm revenue size;
- Relatively high level of CD lending that has a significantly positive effect on overall lending performance;
- Excellent level and responsiveness of qualified investments; and
- Reasonably accessible service delivery systems to low- and moderate-income geographies and individuals.

Description of Institution's Operations in the State of Ohio

Bank of America does not have any financial centers in the state of Ohio. As of June 30, 2016, the bank held no deposits in the state. The primary depository financial institutions in Ohio with deposit shares greater than 5 percent include U.S. Bank (17.9 percent), Fifth Third Bank (14.1 percent), The Huntington National Bank (11.8 percent), PNC Bank (9.1 percent), JP Morgan Chase Bank (8.8 percent), and KeyBank (6.8 percent). Of the bank's 47 rating areas, the state of Ohio ranks 45th and accounts for 0 percent of the bank's total deposits. As of December 31, 2016, BANA operated two full-service ATMs in Ohio.

Refer to the community profiles for the state of Ohio in appendix C for detailed demographics and other performance context information for assessment areas that received full-scope reviews.

Scope of Evaluation in Ohio

Examiners selected the Cleveland-Elyria, OH MSA for a full-scope review and the Cincinnati, OH MSA for a limited-scope review. During the evaluation period, Bank of America originated or purchased 7,868 home mortgage loans totaling $1.2 billion, 6,577 small loans to businesses

[38] For institutions with branches in two or more states in a multistate metropolitan area, this statewide evaluation does not reflect performance in the parts of this state contained within the multistate metropolitan area. Refer to the multistate metropolitan area rating and discussion for the rating and evaluation of the institution's performance in that area.

totaling $155.4 million, 61 small loans to farms totaling $1.6 million, and 4 CD loans totaling $4.2 million. Based on loan volume originated or purchased, examiners weighted home mortgage lending, representing 54 percent of the overall volume, the most followed by small loans to businesses at 45 percent, and small loans to farms at less than 1 percent.

Examiners conducted telephone interviews with two local community service organizations representing neighborhood housing, employment, and community service needs. The community contacts noted the following needs across the state:

- Workforce development
- Education
- Affordable housing
- Health and human services (safe environment, medical care, transportation)
- Lines of credit
- Capacity building for small business, women, or minority owned businesses
- Second mortgages due to appraisal gaps

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN OHIO

LENDING TEST

Conclusions for Areas Receiving Full-Scope Reviews

Bank of America's performance under the Lending Test in the state of Ohio is rated Outstanding based on excellent lending activity, excellent geographic distribution, good borrower income distribution, and a relatively high level of CD lending that has a significantly positive effect on the Lending Test rating. Performance in the limited-scope assessment area has a positive effect on the state rating.

Lending Activity

Based on total lending volume in Table 1, peer loan data for 2016, and relevant performance context considerations, the bank's lending activity in the state of Ohio is excellent. Lending activity is excellent in the Cleveland-Elyria, OH MSA.

Cleveland-Elyria, OH MSA

Lending activity in the Cleveland-Elyria, OH MSA is excellent. According to peer mortgage data for 2016, the bank has a market share of 0.7 percent based on the number of home mortgage loans originated or purchased. The bank ranks 26th among 478 home mortgage lenders, which places it in the top 6 percent of lenders. According to peer small business data for 2016, the bank has a 2.1 percent market share of small loans to businesses based on the number of small loans to businesses originated or purchased. The bank ranks 10th among 120 small business lenders, which places it in the top 9 percent of lenders in the MSA. The bank originated too few small loans to farms in the MSA for any meaningful analysis. Considering the bank has no financial centers in the assessment area, lending activity is excellent.

(*) Loan data as of December 31, 2016. Rated area refers to either the state or multi-state MSA rating area.
(**) The evaluation period for Community Development Loans is January 1, 2012 to December 31, 2016.
(***) Deposit data as of June 30, 2016. Rated area refers to either the state or multi-state MSA as appropriate.

Distribution of Loans by Income Level of the Geography

The bank's geographic distribution of loans reflects good penetration in low- and moderate-income geographies. For this analysis, examiners compared the bank's HMDA-reportable loan originations and purchases, small loans to businesses, and small loans to farms with available demographic information. Examiners also considered any relevant performance context information and aggregate lending data.

Home Mortgage Loans

Refer to Table O for the facts and data used to evaluate the geographic distribution of the bank's originations/purchases of home mortgage loans.

The overall geographic distribution of home mortgage loans is excellent. The distribution is good in the Cleveland-Elyria, OH MSA. Excellent performance in the limited-scope assessment area has a positive effect on the overall geographic distribution conclusion.

Cleveland-Elyria, OH MSA

The geographic distribution of home mortgage loans in the Cleveland-Elyria, OH MSA is good. Performance is adequate in low-income geographies and good in moderate-income geographies, respectively. The distribution of the bank's home mortgage loans in low-income geographies at 2.7 percent is lower than the 5.7 percent of owner-occupied units in low-income geographies, but it is higher than the 1.9 percent performance of aggregate lenders. The distribution of the bank's home mortgage loans in moderate-income geographies at 11.5 percent is lower than the 13.8 percent of owner-occupied units in moderate-income geographies, but it is higher than the 9.3 percent performance of aggregate lenders.

Table O : Assessment Area Distribution of Home Mortgage Loans by Income Category of the Geography **2014-16**

Lending Gap Analysis

For areas receiving full-scope reviews, examiners noted no conspicuous or unexplained gaps in lending in low- and moderate-income geographies.

Inside/Outside Ratio

See the “Inside/Outside Ratio” section within the overall Scope of Evaluation.

Distribution of Loans by Income Level of the Borrower

The bank’s distribution of loans by borrower income and revenue size is excellent. For this analysis, examiners compared the bank’s HMDA-reportable loan originations and purchases, small business, and small farm lending with available demographic information. Examiners also considered any relevant performance context information and aggregate lending data.

Home Mortgage Loans

Refer to Table P for the facts and data used to evaluate the borrower distribution of the bank’s home mortgage loan originations and purchases.

The overall distribution of home mortgage loans by borrower income is good. The distribution is good in the Cleveland-Elyria, OH MSA.

Cleveland-Elyria, OH MSA

The distribution of home mortgage loans by borrower income in the Cleveland-Elyria, OH MSA is good. The distribution is adequate for low-income borrowers and excellent for moderate-income borrowers. The proportion of the bank’s home mortgage loans to low-income borrowers at 10.5 percent is lower than the 21.7 percent of low-income families, but higher than the 7.6 percent performance for aggregate lenders. The proportion of loans to moderate-income borrowers at 17.7 percent is higher than the 17.3 percent of moderate-income families and it is slightly lower than the 18 percent performance for aggregate lenders.

Small Loans to Businesses

Refer to Table R for the facts and data used to evaluate the borrower distribution of the bank's small loans to businesses originations and purchases.

The distribution of small loans to businesses with gross annual revenues of $1 million or less is good. Performance in the Cleveland-Elyria, OH MSA is good. The bank did not collect or consider the gross annual revenues in the underwriting of approximately 38 percent of its small loans to businesses.

Cleveland-Elyria, OH MSA

The distribution of small loans to businesses with gross annual revenues of $1 million or less in the Cleveland-Elyria, OH MSA is good. Based on businesses with known revenues, the proportion of the bank's small loans to businesses at 46.4 percent is lower than the 76.3 percent of businesses with gross annual revenues of $1 million or less. Considering the bank's distribution is slightly stronger than the 45.1 percent for aggregate lenders, overall performance is good.

Community Development Lending

CD lending has a significantly positive effect on the lending performance in the state of Ohio.

Cleveland-Elyria, OH MSA

In the Cleveland-Elyria, OH MSA, CD lending has a significantly positive effect on the lending performance in the assessment area. The bank originated two CD loans totaling $444,000 that primarily support community services. Considering the bank has no customer deposits in the assessment area, the bank originated a relatively high dollar volume of CD loans.

Product Innovation and Flexibility

Bank of America offers various national and local flexible lending programs that have benefitted borrowers during the evaluation period. These include programs such as America's Home Grant, Affordable Loan Solutions, and Business Advantage Credit Line. The bank also participates with multiple organizations that provide flexible lending through NACA and other affordable housing programs. Lending under the MHA and HARP programs accounted for 83 percent of the dollar volume of all loans under flexible lending programs.

Conclusions for Areas Receiving Limited-Scope Reviews

Lending test performance in the Cincinnati, OH MSA is consistent with the Outstanding Lending Test performance in the state of Ohio. Excellent lending test performance in the Cincinnati, OH MSA positively affected the overall Lending Test performance in the state of Ohio.

INVESTMENT TEST

Conclusions for Areas Receiving Full-Scope Reviews

Refer to Table 14 for the facts and data used to evaluate the bank's level of qualified investments.

The bank's performance under the Investment Test in the state of Ohio is rated Outstanding. Based on a full-scope review, the bank's performance in the Cleveland-Elyria, OH MSA is excellent. Performance in the limited-scope assessment area has a neutral effect on the state rating.

Cleveland- Elyria, OH MSA

In the Cleveland-Elyria, OH MSA, Bank of America has an excellent level of community development investments. The bank made 30 investments during the current evaluation period totaling $2.5 million. In addition, the bank has 14 CD investments totaling $480,000 it made during a prior evaluation period that are still outstanding and continue to benefit the community. Outstanding prior period and current period investments total $2.9 million. Approximately $2 million or 83 percent of the current period investment dollars in the MSA supported community services. Approximately $417,000 or 17 percent of the investment dollars in the MSA also supported 12 units of affordable housing. The majority of current period investments are neither innovative nor complex. Approximately $1.6 million or 65 percent of the investment dollars were investments in CDFIs.

Examples of community development investments include:

- The bank invested $1.3 million in Finance Fund Capital Corporation, a certified CDFI based in Columbus, OH that provides financing to small businesses in low-income communities throughout the state of Ohio. The CDFI used the investment for its small business loan programs and its healthy food and affordable housing financing initiatives.

- The bank invested $3 million in the National Federation of Community Development Credit Unions (the Federation) of which the bank allocated $250,000 to the Cleveland-Elyria, OH MSA. The Federation is a certified CDFI with a mission to help low- and moderate-income individuals and communities achieve financial independence through Community Development Credit Unions (CDCUs). CDCUs are required to have a majority of their members earn at or below 80 percent of the median family income.

- The bank made a $100,000 grant to the Edwins Second Chance Life Skills Center. The organization focuses on offering comprehensive educational and life-skills support services for people with criminal records. Their goal is to provide educational services that will cause students to seek and find success in the workplace. This grant is the first payment of a two-year $200,000 commitment. According to the organization, all of the individuals served are recently incarcerated and are wards of the state.

(*) 'Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
(**) 'Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the bank's financial reporting system.

Conclusions for Areas Receiving Limited-Scope Reviews

Investment Test performance in the Cincinnati, OH MSA is excellent and consistent with the Outstanding Investment Test performance in the state of Ohio.

SERVICE TEST

Conclusions for Areas Receiving Full-Scope Reviews

Bank of America’s performance under the Service Test in the state of Ohio is rated Low Satisfactory. Service Test performance is adequate in the Cleveland-Elyria, OH MSA. Performance in the limited-scope assessment area has a neutral effect on the state rating.

Retail Banking Services

Refer to Table C for the facts and data used to evaluate the accessibility of the bank’s retail banking services.

Cleveland-Elyria, OH MSA

In the Cleveland-Elyria, OH MSA, the bank’s delivery systems are reasonably accessible to geographies and individuals of different income levels. The bank’s retail presence in the assessment area is limited to one full-service ATM located in a moderate-income geography. Given the bank’s limited presence in the assessment area, augmented by alternative delivery systems, overall accessibility is reasonable.

The bank’s alternative delivery systems including the full-service ATM, telephone, online, mobile, and text banking have a significantly positive effect on the accessibility of the bank’s service delivery systems to low- and moderate-income individuals and geographies. The bank demonstrated customer usage of ADS through income proxies based on customer’s residency. In three of six ADS platforms, the percentage of customers in low- and moderate-income geographies using the platform exceeded the overall percentage of the population in low- and moderate-income geographies.

Community Development Services

Cleveland-Elyria, OH MSA

In the Cleveland-Elyria, OH MSA, the bank provides a relatively high level of community development services. During the evaluation period, the bank participated with community development organizations to provide 34 community development services targeted to low- and moderate-income individuals. Employees provided one financial education workshop and one foreclosure prevention workshop for 85 individuals. Employees participated in 25 webinars and workshops with non-profit organizations to help the organizations with capacity building. One employee served on the board of a community organization. The types of CD services provided are responsive to the needs identified in the community.

Conclusions for Areas Receiving Limited-Scope Reviews

Service Test performance in the Cincinnati, OH MSA is consistent with the Low Satisfactory Service Test performance in the state of Ohio due to the bank's limited retail presence in the assessment area.

State of Oklahoma

CRA Rating for Oklahoma[39]: **Outstanding**
The Lending Test is rated: High Satisfactory
The Investment Test is rated: Outstanding
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Good volume of loans originated or purchased within the assessment areas;
- Excellent distribution of loans by geography and good distribution of loans by borrower income or business/farm revenue size;
- Relatively low level of CD lending that has a neutral effect on overall lending performance;
- Excellent level and responsiveness of qualified investments; and
- Readily accessible service delivery systems to low- and moderate-income geographies and individuals.

Description of Institution's Operations in the State of Oklahoma

The state of Oklahoma is Bank of America's 27th largest rating area based on its total deposits in the state. As of June 30, 2016, the bank maintained approximately $4.3 billion or 0.4 percent of its total domestic deposits in financial centers within the state of Oklahoma. Of the 227 depository financial institutions operating in the state of Oklahoma, Bank of America, with a deposit market share of 5.2 percent, is the sixth largest. The bank's primary competitors for deposits in Oklahoma with deposit shares greater than 5 percent include BOKF (13.9 percent), BancFirst (7.2 percent), Arvest Bank (6 percent), JP Morgan Chase Bank (5.8 percent), and MidFirst Bank (5.7 percent). As of December 31, 2016, BANA operated 31 financial centers and 57 full service ATMs in Oklahoma.

Examiners use the bank's deposit volume as an indicator of its capacity to lend and invest in its assessment areas. In some cases, not all deposits originated from the local community. In the Tulsa, OK MSA, Bank of America reported an additional $400 million in deposits of national corporations, in which the funds originated from communities across the nation and deposited in financial centers near the headquarters of these large corporations. Adjusting the bank's total deposits in the MSA by excluding these external deposits from the local deposit base gives a more accurate indicator of the bank's capacity in the assessment area.

[39] For institutions with branches in two or more states in a multistate metropolitan area, this statewide evaluation does not reflect performance in the parts of this state contained within the multistate metropolitan area. Refer to the multistate metropolitan area rating and discussion for the rating and evaluation of the institution's performance in that area.

Refer to the community profiles for the state of Oklahoma in appendix C for detailed demographics and other performance context information for assessment areas that received full-scope reviews.

Scope of Evaluation in Oklahoma

Examiners selected two assessment areas for full-scope reviews and the remaining two assessment areas for limited-scope reviews. The full-scope assessment areas selected were the Oklahoma City, OK MSA and Tulsa, OK MSA. Examiners based the conclusions and ratings on the activities within all assessment areas. During the evaluation period, Bank of America originated or purchased 8,633 home mortgage loans totaling $1.3 billion, 10,328 small loans to businesses totaling $211.6 million, 153 small loans to farms totaling $1.6 million, and 10 CD loans totaling $29 million. Based on loan volume, examiners weighted small loans to businesses, representing 54 percent of the volume, the most followed by home mortgage lending at 45 percent, and small loans to farms at less than 1 percent.

Examiners conducted telephone interviews with two community services agencies representing neighborhood housing, employment, and community service needs. The community contacts noted that affordable housing and affordable credit products, skilled labor in carpentry and maintenance professions, and community development services continue to be a concern across the state. A review of the bank’s investments noted the bank is active in the state in providing affordable housing assistance.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN OKLAHOMA

LENDING TEST

Conclusions for Areas Receiving Full-Scope Reviews

Bank of America’s performance under the Lending Test in the state of Oklahoma is rated High Satisfactory, based on good lending activity, excellent geographic distribution, and good borrower income distribution. Performance in limited-scope assessment areas has a neutral effect on the state rating.

Lending Activity

Based on total lending volume in Table 1, peer deposit and loan data for 2016, and relevant performance context considerations, the bank’s lending activity in the state of Oklahoma is good. Lending activity is excellent in the Oklahoma City, OK MSA and adequate in the Tulsa, OK MSA. Performance in the Tulsa, OK MSA carried more weight in arriving at the adequate performance overall.

Oklahoma City, OK MSA

Lending activity in the Oklahoma City, OK MSA is excellent. Based on FDIC deposit data as of June 30, 2016, Bank of America has a deposit market share of 6.2 percent. The bank ranks fifth among 68 depository financial institutions, which places it in the top 8 percent of institutions. According to peer mortgage data for 2016, the bank has a market share of 1.3 percent based on the number of home mortgage loans originated or purchased. The bank ranks 20th among 453 home mortgage lenders, which places it in the top 5 percent of lenders competing for loans. According to peer small business data for 2016, the bank has a 5.2 percent market share of small loans to businesses based on the number of small loans to businesses originated or purchased. The bank ranks eighth among 125 small business lenders, which places it in the top 7 percent of lenders in the MSA. For small loans to farms, the bank has a market share of 1.7 percent based on the number of small loans to farms originated or purchased. The bank ranks eighth among 25 farm lenders, which places it in the top 32 percent of lenders. Considering the bank's higher ranking among all lenders for home mortgage loans and small loans to businesses relative to its ranking for deposits, overall lending activity is excellent.

Tulsa, OK MSA

Lending activity in the Tulsa, OK MSA is good. Based on FDIC deposit data as of June 30, 2016, Bank of America has a deposit market share of 10.1 percent. The bank ranks second among 55 depository financial institutions in the assessment area, which places it in the top 4 percent of 55 institutions. According to peer mortgage data for 2016, the bank has a market share of 1.4 percent based on the number of home mortgage loans originated or purchased. The bank ranks 17th among 422 home mortgage lenders, which places it in the top 5 percent of lenders competing for loans. According to peer small business data for 2016, the bank has a 5 percent market share of small loans to businesses based on the number of small loans to businesses originated or purchased. The bank ranks eighth among 107 small business lenders, which places it in the top 8 percent of lenders in the MSA. According to peer farm data for 2016, the bank has a market share of 1.1 percent based on the number of small loans to farms originated or purchased. The bank ranks 10th among 15 farm lenders, which places it in the bottom 33 percent of lenders. Considering the bank's lower ranking among all lenders for home mortgage loans and small loans to businesses relative to its ranking for deposits, overall lending activity is good.

(***) Deposit data as of June 30, 2016. Rated area refers to either the state or multi-state MSA as appropriate.

Distribution of Loans by Income Level of the Geography

The bank's geographic distribution of loans reflects excellent penetration in low- and moderate-income geographies. For this analysis, examiners compared the bank's HMDA-reportable loan originations and purchases, small loans to businesses, and small loans to farms with available demographic information. Examiners also considered any relevant performance context information and aggregate lending data.

Home Mortgage Loans

Refer to Table O for the facts and data used to evaluate the geographic distribution of the bank's originations/purchases of home mortgage loans.

The overall geographic distribution of home mortgage loans is adequate. The distribution is adequate in the Oklahoma City, OK MSA and good in the Tulsa, OK MSA.

Oklahoma City, OK MSA

The geographic distribution of home mortgage loans in the Oklahoma City, OK MSA is adequate. Performance is adequate in low-income geographies and adequate in moderate-income geographies. The distribution of the bank's home mortgage loans in low-income geographies at 1.3 percent is lower than the 3.2 percent of owner-occupied housing units in low-income geographies, but it is slightly higher than the 1.2 percent performance of aggregate lenders. The distribution in moderate-income geographies at 12.7 percent is also lower than the 18.7 percent of owner-occupied housing units in moderate-income geographies and it is slightly lower than the 13 percent performance for aggregate lenders.

Tulsa, OK MSA

The geographic distribution of home mortgage loans in the Tulsa, OK MSA is good. Performance is adequate in low-income geographies and good in moderate-income geographies. The distribution of the bank's home mortgage loans in low-income geographies at 1.7 percent is lower than the 3.4 percent of owner-occupied housing units in low-income geographies; however, it is slightly higher than the 1.4 percent performance of aggregate lenders. The distribution in moderate-income geographies at 14.6 percent is also lower than the 20.9 percent of owner-occupied housing units in moderate-income geographies; however, it is higher than the 13 percent performance for aggregate lenders.

Small Loans to Businesses

Refer to Table Q for the facts and data used to evaluate the geographic distribution of the bank's originations/purchases of small loans to businesses.

The overall geographic distribution of small loans to businesses is excellent. The distribution is excellent in the Oklahoma City, OK MSA and Tulsa, OK MSA.

Oklahoma City, OK MSA

The geographic distribution of small loans to businesses in the Oklahoma City, OK MSA is excellent. Performance is excellent in both low- and moderate-income geographies. The distribution in low-income geographies at 5.9 percent is higher than the 5.4 percent of businesses in low-income geographies and it is consistent with the 5.9 percent performance for aggregate lenders. The distribution in moderate-income geographies at 20.4 percent is slightly higher than the 20 percent of businesses in moderate-income geographies and it is higher than the 18.3 percent performance for aggregate lenders.

Tulsa, OK MSA

The geographic distribution of small loans to businesses in the *Tulsa, OK MSA* MSA is excellent. Performance is excellent in both low- and moderate-income geographies. The distribution in low-income geographies at 5.7 percent is higher than the 5.3 percent of businesses in low-income geographies and it is slightly higher than the 5.5 percent performance for aggregate lenders. The distribution in moderate-income geographies at 22.2 percent is slightly lower than the 23.7 percent of businesses in moderate-income geographies and exceeds the 21.2 percent performance for aggregate lenders.

Small Loans to Farms

Refer to Table S for the facts and data used to evaluate the geographic distribution of the bank's originations/purchases of small loans to farms.

The overall geographic distribution of small loans to farms is adequate. The distribution is poor in the Oklahoma City, OK MSA and good in the Tulsa, OK MSA.

Oklahoma City, OK MSA

The geographic distribution of small loans to farms in the Oklahoma City, OK MSA is poor. Performance is poor in low-income geographies and very poor in moderate-income geographies. The distribution in low-income geographies at 0 percent is lower than the 1.9 percent of farms in low-income geographies and it is lower than the 1.3 percent performance for aggregate lenders. The distribution in moderate-income geographies at 0 percent is lower than the 15.2 percent of farms in moderate-income geographies and it is lower than the 12.7 percent performance for aggregate lenders.

Tulsa, OK MSA

The geographic distribution of small loans to farms in the Tulsa, OK MSA is good. Performance is poor in low-income geographies and excellent in moderate-income geographies. The distribution in low-income geographies at 0 percent is lower than the 2.2 percent of farms in low-income geographies and it is lower than the 0.3 percent performance for aggregate lenders. The distribution in moderate-income geographies at 43.8 is significantly higher than the 18.8 percent of farms in moderate-income geographies and it is significantly higher than the 22.7 percent performance for aggregate lenders.

Lending Gap Analysis

For areas receiving full-scope reviews, examiners noted no conspicuous or unexplained gaps in lending in low- and moderate-income geographies.

Inside/Outside Ratio

See the “Inside/Outside Ratio” section within the overall Scope of Evaluation.

Distribution of Loans by Income Level of the Borrower

The bank’s distribution of loans by borrower income and revenue size is good. For this analysis, examiners compared the bank’s HMDA-reportable loan originations and purchases, small business, and small farm lending with available demographic information. Examiners also considered any relevant performance context information and aggregate lending data.

Home Mortgage Loans

Refer to Table P for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases.

The overall distribution of home mortgage loans by borrower income is good. The distribution is good in the Oklahoma City, OK MSA and Tulsa, OK MSA.

Oklahoma City, OK MSA

The distribution of home mortgage loans by borrower income in the Oklahoma City, OK MSA is good. The distribution is adequate for low-income borrowers and excellent for moderate-income borrowers. The proportion of the bank's home mortgage loans to low-income borrowers at 9.6 percent is lower than the 21.3 percent of low-income families, but higher than the 5.2 percent performance for aggregate lenders. The proportion of loans to moderate-income borrowers at 19.5 percent is higher than the 17.8 percent of moderate-income families and it is higher than the 15.4 percent performance for aggregate lenders.

Tulsa, OK MSA

The distribution of home mortgage loans by borrower income in the Tulsa, OK MSA is good. The distribution is adequate for low-income borrowers and excellent for moderate-income borrowers. The proportion of the bank's home mortgage loans to low-income borrowers at 8.1 percent is lower than the 21.1 percent of low-income families, but is higher than the 5.1 percent performance for aggregate lenders. The proportion of loans to moderate-income borrowers at 18.7 percent is higher than the 17.9 percent of moderate-income families and it is higher than the 16.8 percent performance for aggregate lenders.

Small Loans to Businesses

Refer to Table R for the facts and data used to evaluate the borrower distribution of the bank's originations/purchases of small loans to businesses.

The distribution of small loans to businesses with gross annual revenues of $1 million or less is good. The distribution is good in the Oklahoma City, OK MSA and good in the Tulsa, OK MSA.

The bank did not collect or consider the gross annual revenues in the underwriting of approximately 35 percent of its small loans to businesses.

Oklahoma City, OK MSA

The distribution in Oklahoma City, OK MSA is good. Based on businesses with known revenues, the proportion of the bank's small loans to businesses at 54.8 percent is lower than the 77.6 percent of businesses with gross annual revenues of $1 million or less. Considering the bank's distribution is stronger than the 45.1 percent for aggregate lenders, overall performance is good.

Tulsa, OK MSA

The distribution in the Tulsa, OK MSA is good. Based on businesses with known revenues, the proportion of the bank's small loans to businesses at 52.4 percent is lower than the 75 percent of businesses with gross annual revenues of $1 million or less. Considering the bank's distribution is stronger than the 46.3 percent for aggregate lenders, overall performance is good.

Small Loans to Farms

Refer to Table T for the facts and data used to evaluate the borrower distribution of the bank's originations/purchases of small loans to farms.

The distribution of small loans to farms with gross annual revenues of $1 million or less is poor. The distribution is poor in the Oklahoma City, OK MSA and Tulsa, OK MSA. The bank did not collect or consider the gross annual revenues in the underwriting of approximately 48 percent of its small loans to farms.

Oklahoma City, OK MSA

The distribution in the Oklahoma City, OK MSA is poor. Based on farms with known revenues, the proportion of the bank's small loans to farms at 54.5 percent is lower than the 97.2 percent of farms with gross annual revenues of $1 million or less. Considering the bank's distribution is also lower than the 83.6 percent for aggregate lenders, overall performance is poor.

Tulsa, OK MSA

The distribution in the Tulsa, OK MSA is poor. Based on farms with known revenues, the proportion of the bank's small loans to farms at 50 percent is lower than the 97.2 percent of farms with gross annual revenues of $1 million or less. Considering the bank's distribution is also lower than the 78.1 percent for aggregate lenders, overall performance is poor.

Community Development Lending

CD lending has a neutral effect on the lending performance in the state of Oklahoma. The bank met the communities' credit needs primarily through retail lending.

Oklahoma City, OK MSA

In the Oklahoma City, OK MSA, CD lending has a neutral effect on the lending performance in the assessment area. The bank originated two CD loans totaling $11.9 million that primarily support affordable housing. One loan is an extension of the other loan, so the benefit to the community is actually only about $6 million. CD lending helped to finance the development of 48 units of affordable housing and it represents 5.2 percent of the allocated Tier 1 Capital.

Tulsa, OK MSA

In the Tulsa, OK MSA, CD lending has a neutral effect on the lending performance in the assessment area. The bank originated six CD loans totaling $14 million that primarily support affordable housing. CD loans helped to finance the development of 272 units of affordable housing. CD lending represents 5.4 percent of the allocated Tier 1 Capital after adjusting for $400 million in corporate deposits that did not derive from the assessment area.

Product Innovation and Flexibility

Bank of America offers various national and local flexible lending programs that have benefitted borrowers during the evaluation period. These include programs such as America's Home Grant, Affordable Loan Solutions, and Business Advantage Credit Line. The bank also participates with multiple organizations that provide flexible lending through NACA and other affordable housing programs. Within the state of Oklahoma, lending under the MHA and HARP programs accounted for 71 percent of the dollar volume of all loans under flexible lending programs.

Conclusions for Areas Receiving Limited-Scope Reviews

Lending Test performance in the Lawton, OK MSA is consistent with the High Satisfactory Lending Test performance in the state of Oklahoma. Lending Test performance in the Oklahoma Non-MSA is stronger than the overall High Satisfactory Lending Test performance in the state of Oklahoma. Performance is stronger primarily due to the significantly positive effect CD lending has on the lending performance in the Oklahoma Non-MSA.

INVESTMENT TEST

Conclusions for Areas Receiving Full-Scope Reviews

Refer to Table 14 for the facts and data used to evaluate the bank's level of qualified investments.

The bank's performance under the Investment Test in the state of Oklahoma is rated Outstanding. Investment performance is excellent in the Oklahoma City, OK MSA and Tulsa, OK MSA. Performance in limited-scope assessment areas has a neutral effect on the state rating.

Oklahoma City, OK MSA

In the Oklahoma City, OK MSA, Bank of America has an excellent level of CD investments. The bank made 87 investments during the current evaluation period totaling $22.8 million. Approximately $22.4 million or 98 percent of the current period investment dollars in the MSA supported 215 units of affordable housing. In addition, the bank has 47 CD investments totaling $3.3 million it made during a prior evaluation period that are still outstanding and continue to benefit the community. Outstanding prior period and current period investments total $26.1 million or 11.4 percent of the bank's Tier 1 Capital allocated to the assessment area. The majority of current period investments are neither innovative nor complex with mortgage-backed securities representing approximately $15.2 million or 67 percent of the investment dollars.

Examples of community development investments include:

- The bank invested $6.9 million in a LIHTC for new construction of Bocage senior apartments, a 58-unit housing development in Norman, OK for seniors aged 62 and older. The development has 48 units restricted to incomes at or below 60 percent of the area median income. The remaining 10 units are available at market rates.

- The bank invested nearly $116,000 in a fund that makes direct and indirect investments in partnerships that own affordable housing projects throughout the United States. LIHTCs support these projects. This transaction represents funds used toward the Landings at Pebble Creek, which provides 48 units of affordable housing.

- The bank made $55,000 in multiple smaller grants to the Oklahoma City Public Schools Foundation (the Foundation). The Foundation's mission is to advance excellence, create champions, and build strong community support for lasting change in their schools. Partners of the Foundation provide valuable and unrestricted support for numerous programs and initiatives. The various grants helped to finance those programs and initiatives. According to the National Center for Education Statistics, 86 of the 93 schools in the Oklahoma City Public School District have free or reduced price lunch rates at or above 54 percent.

Tulsa, OK MSA

In the Tulsa, OK MSA, Bank of America has an excellent level of CD investments. The bank made 108 investments during the evaluation period totaling $27.7 million. Approximately $27.2 million or 98 percent of the current period investment dollars in the MSA supported 591 units of affordable housing. In addition, the bank has 28 CD investments totaling $8.1 million it made during a prior evaluation period that are still outstanding and continue to benefit the community. Outstanding prior period and current period investments total $35.8 million or 13.9 percent of the bank's Tier 1 Capital allocated to the assessment area after adjusting for approximately $400 million in corporate deposits that did not derive from the assessment area. The majority of current period investments are neither innovative nor complex with mortgage-backed securities representing approximately $18.2 million or 66 percent of the investment dollars.

Examples of community development investments include:

- The bank invested $8.6 million into a Section 42 LIHTC fund that supported a housing project, which provided 58 units of affordable housing in the MSA.

- The bank invested more than $80,000 in a fund that makes direct and indirect investments in partnerships that own affordable housing projects throughout the U.S. The partnerships use LIHTCs to help fund those projects. This transaction represents funds used toward the Bradford Apartments, which provides 192 units of affordable housing in the MSA.

- The bank provided nearly $61,000 in grants to City Year, an education-focused nonprofit organization that partners with public schools to provide full-time targeted intervention for students at risk of dropping out of school. This funding is part of a 2-year $1 million commitment the bank made to support the national Diplomas Now program that addresses the dropout crisis in high poverty neighborhoods. In schools the program serves, a majority of the students are eligible for free or reduced lunches.

OKLAHOMA	98	19,365	237	52,665	335	72,030	100.00	1	4,876	

(*) 'Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.

(**) 'Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the bank's financial reporting system.

Conclusions for Areas Receiving Limited-Scope Reviews

Investment Test performance in the Oklahoma Non-MSA is excellent and consistent with the Outstanding Investment Test performance in the state of Oklahoma. Investment performance in the Lawton, OK MSA is weaker than the overall Outstanding Investment Test performance in the state of Oklahoma. Performance is weaker due to lower levels of CD investments relative to the bank's size and resources in the assessment area.

SERVICE TEST

Conclusions for Areas Receiving Full-Scope Reviews

Bank of America's performance under the Service Test in the state of Oklahoma is rated Outstanding. Service Test performance is excellent in the Oklahoma City, OK MSA and Tulsa, OK MSA. Performance in limited-scope assessment areas has a neutral effect on the state rating.

Retail Banking Services

Refer to Table C for the facts and data used to evaluate the accessibility of the bank's retail banking services.

Oklahoma City, OK MSA

In the Oklahoma City, OK MSA, the bank's delivery systems are readily accessible to geographies and individuals of different income levels. Examiners based this conclusion on a comparison of the distribution of the bank's 15 financial centers with the distribution of the population. The bank has two financial centers in low-income geographies representing 13.3 percent of its financial centers. Low-income geographies have 5.5 percent of the assessment area's population. In moderate-income geographies, the bank has three financial centers or 20 percent of its financial centers compared with 24 percent of the population.

Examiners also considered the bank's alternative delivery systems including cash dispensing and full-service ATMs, telephone, online, mobile, and text banking in evaluating accessibility to the bank's products and services. Alternative delivery systems have a positive effect on the accessibility of the bank's service delivery systems to low- and moderate-income individuals and geographies. The bank demonstrated customer usage of ADS through income proxies based on customer's residency. In two of six ADS platforms, the percentage of customers in low- and moderate-income geographies using the platform exceeded the percentage of the population in low- and moderate-income geographies.

The bank has seven financial centers located in middle- and upper-income geographies that are adjacent to or in very close proximity to low- and moderate-income geographies. Six financial centers are adjacent to moderate-income geographies and one financial center is adjacent to low-income geographies. The adjacent financial centers help improve accessibility of retail banking services in low-and moderate-income geographies.

Financial center openings and closings did not adversely affect the accessibility of retail banking services, particularly in low- and moderate-income geographies and to low- and moderate-income individuals. During the evaluation period, the bank closed three financial centers; two in upper-income geographies and one in a census tract not defined.

Banking products, services, and hours of operation do not vary in a way that inconveniences the assessment area, particularly in low- and moderate-income geographies and to low- and moderate-income individuals. The bank offers a full range of products and services. Banking hours are consistent throughout the assessment area. All financial centers are open 9:00 am to 4:00 pm Monday through Thursday and 9:00 am to 5:00 pm on Friday. Financial centers that are open for Saturday banking are open 9:00 am to 12:00 pm.

Tulsa, OK MSA

In the Tulsa, OK MSA, the bank's delivery systems are readily accessible to geographies and individuals of different income levels. Examiners based this conclusion on a comparison of the distribution of the bank's 15 financial centers with the distribution of the population. The bank has one financial center in a low-income geography representing 6.7 percent of its financial centers. Low-income geographies have 6.1 percent of the assessment area's population. In moderate-income geographies, the bank has six or 40 percent of its financial centers compared with 25.3 percent of the population.

Examiners also considered the bank's alternative delivery systems including cash dispensing and full-service ATMs, telephone, online, mobile and text banking in evaluating accessibility to the bank's products and services. Alternative delivery systems have a positive effect on the accessibility of the bank's service delivery systems to low- and moderate-income individuals and geographies. The bank demonstrated customer usage of ADS through income proxies based on customer's residency. In two of six ADS platforms, the percentage of customers in low- and moderate-income geographies using the platform exceeded the percentage of the population in low- and moderate-income geographies.

The bank has two financial centers located in middle- and upper-income geographies that are adjacent to or in very close proximity to moderate-income geographies. The adjacent financial centers help improve accessibility of retail banking services in moderate-income geographies.

Financial center openings and closings generally did not adversely affect the accessibility of retail banking services, particularly in low- and moderate-income geographies and to low- and moderate-income individuals. During the evaluation period, the bank closed one financial center in a moderate-income geography. Despite the closure, financial centers remain readily accessible to individuals and geographies of different income levels.

Banking products, services, and hours of operation do not vary in a way that inconveniences the assessment area, particularly in low- and moderate-income geographies and to low- and moderate-income individuals. The bank offers a full range of products and services. Banking hours are consistent throughout the assessment area. All financial centers are open 9:00 am to 4:00 pm Monday through Thursday and 9:00 am to 5:00 pm on Friday. All financial centers except one are open for Saturday banking 9:00 am to 12:00 pm.

Community Development Services

Oklahoma City, OK MSA

The bank provides a relatively high level of community development services. During the evaluation period, the bank participated with community development organizations to provide 34 community development services targeted to low- and moderate-income individuals. Employees provided homebuyer education workshops to two low- and moderate-income individuals, and provided four financial education workshops and one foreclosure prevention workshop for 179 individuals. Attendees to the financial education workshops were primarily students from low- and moderate-income families. Employees participated in five webinars and workshops with non-profit organizations to help the organizations with capacity building. In addition, 20 employees served on the boards or committees of community organizations. The types of CD services provided are responsive to the needs identified in the community.

Tulsa, OK MSA

The bank provides a relatively high level of community development services. During the evaluation period, the bank participated with community development organizations to provide 37 community development services targeted to low- and moderate-income individuals. Employees provided a homebuyer education workshop to one low- or moderate-income individual, and provided 11 financial education workshops for 181 individuals. Attendees to the financial education workshops were primarily students from low- and moderate-income families. Employees participated in nine webinars and workshops with non-profit organizations to help the organizations with capacity building. In addition, 16 employees served on the boards or committees of community organizations. The types of CD services provided are responsive to the needs identified in the community.

Conclusions for Areas Receiving Limited-Scope Reviews

Service Test performance in the Lawton, OK MSA and Oklahoma Non-MSA is weaker than the overall Outstanding Service Test performance in the state of Oklahoma primarily due to the bank’s limited retail banking presence in those assessment areas.

State of Oregon

CRA Rating for Oregon[40]: Outstanding
The Lending Test is rated: Outstanding
The Investment Test is rated: Outstanding
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Excellent volume of loans originated or purchased within the assessment areas;
- Excellent distribution of loans among geographies and good distribution to borrowers of different income levels throughout the state;
- Relatively high level of CD lending that has a positive effect on overall lending performance;
- Investment volume that reflects an excellent level of responsiveness to the needs in the state; and
- Readily accessible service delivery systems to low- and moderate-income geographies and individuals.

Description of Institution's Operations in Oregon

The state of Oregon is Bank of America's 37th largest rating area based on its total deposits in the state when excluding deposits in the Portland-Vancouver-Hillsboro, OR-WA Multistate MSA. Examiners excluded the multistate MSA from the analysis of the state of Oregon because examiners evaluated the multistate MSA as a separate rating area. As of June 30, 2016, the bank maintained approximately $999 million or 0.1 percent of its total domestic deposits in financial centers in areas of the state of Oregon that do not include the multistate MSA. Of the 31 depository financial institutions operating in the areas of the state that do not include the multistate MSA, Bank of America, with a deposit market share of 3.3 percent, is the 10th largest. BANA's primary banking competitors for deposits in Oregon with deposit market shares greater than 5 percent include Umpqua Bank (19.1 percent), U.S. Bank (17.2 percent), Wells Fargo Bank (14 percent), JPMorgan Chase Bank (7.7 percent), Bank of the Cascades (5.8 percent), and Columbia State Bank (5.5 percent). As of December 31, 2016, the bank operated 10 financial centers and 27 full-service ATMs in the areas of the state of Oregon that exclude the multistate MSA.

[40] For institutions with branches in two or more states in a multistate metropolitan area, this statewide evaluation does not reflect performance in the parts of this state contained within the multistate metropolitan area. Refer to the multistate metropolitan area rating and discussion for the rating and evaluation of the institution's performance in that area.

Refer to the community profiles for the state of Oregon in appendix C for detailed demographics and other performance context information for assessment areas that received full-scope reviews.

Scope of Evaluation in Oregon

The bank has defined five assessment areas in the state of Oregon. Examiners selected the Bend-Redmond, OR MSA and Eugene, OR MSA for full-scope reviews. The remaining three assessment areas, Albany, OR MSA, Corvallis, OR MSA, and Salem, OR MSA, received limited-scope reviews. During the evaluation period, Bank of America originated or purchased 6,858 home mortgage loans totaling $1.3 billion, 9,229 small loans to businesses totaling $206.6 million, 407 small loans to farms totaling $8.4 million, and 19 CD loans totaling $14.6 million. Lending volumes include loans originated or purchased in the Eugene, OR MSA and Medford, OR MSA, which the bank no longer designates as assessment areas due to the closure or sale of all financial centers and deposit-taking ATMs in those communities. Based on loan volume, examiners weighted small loans to businesses, representing 56 percent of the volume, the heaviest, followed by home mortgage lending at 42 percent, and small loans to farms at 2 percent.

Examiners conducted telephone interviews with two community development organizations. The community contacts identified affordable housing, funding for the expansion of existing businesses, and funding for training programs to equip the workforce with knowledge and skills necessary to meet the demands of the growing and evolving job market in the state as primary credit needs in the communities.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN OREGON

LENDING TEST

Conclusions for Areas Receiving Full-Scope Reviews

Bank of America’s performance under the Lending Test in the state of Oregon is rated Outstanding, based on excellent lending activity, excellent geographic distribution, good borrower income distribution, and a high level of CD lending that positively affected overall performance under the Lending Test. Performance in limited-scope assessment areas has a neutral effect on the state rating.

Lending Activity

Based on total lending volume in Table 1, peer deposit and loan data for 2016, and relevant performance context considerations, the bank’s lending activity in the state of Oregon is excellent. Lending activity is excellent in the Bend-Redmond, OR MSA and Eugene, OR MSA.

Bend-Redmond, OR MSA

Lending activity in the Bend-Redmond, OR MSA is excellent. Based on FDIC deposit data as of June 30, 2016, Bank of America has a deposit market share of 8 percent. The bank ranks fifth among 10 depository financial institutions in the assessment area, which places it in the 50th percentile of institutions. According to peer mortgage data for 2016, the bank has a market share of 1.9 percent based on the number of home mortgage loans originated or purchased. The bank ranks 18th among 326 home mortgage lenders, which places it in the top 6 percent of mortgage lenders. Based on peer small business data for 2016, the bank has a market share of 7.5 percent of small loans to businesses based on the number of small loans to businesses originated or purchased. The bank ranks fourth among 74 small business lenders, which places it in the top 6 percent of lenders. According to peer farm data for 2016, the bank has a market share of 11.8 percent based on the number of small loans to farms originated or purchased. The bank ranks third among nine farm lenders, which places the bank in the top 34 percent of lenders. Considering the bank's higher ranking among all lenders for home mortgage loans, small loans to businesses, and small loans to farms relative to its ranking for deposits, overall lending activity is excellent.

Eugene, OR MSA

Lending activity in the Eugene, OR MSA is excellent. Based on FDIC deposit data as of June 30, 2016, Bank of America has a deposit market share of 3.7 percent. The bank ranks ninth among 10 depository financial institutions, which places it in the bottom 10 percent of institutions. According to peer mortgage data for 2016, the bank has a market share of 1.8 percent based on the number of home mortgage loans originated or purchased. The bank ranks 22nd among 231 mortgage lenders, which places it in the top 10 percent of mortgage lenders. Based on peer small business data for 2016, the bank has a market share of 3.2 percent of small loans to businesses based on the number of small loans to businesses originated or purchased. The bank ranks eighth among 47 small business lenders, which places it in the top 18 percent of lenders. According to peer farm data for 2016, the bank has a market share of 10.6 percent of small loans to farms based on the number of small loans to farms originated or purchased. The bank ranks third among 12 farm lenders, which places it in the top 25 percent of lenders. Considering the bank's higher ranking among all lenders for home mortgage loans, small loans to businesses, and small loans to farms relative to its ranking for deposits, overall lending activity is excellent.

(**) The evaluation period for Community Development Loans is January 1, 2012 to December 31, 2016.

(***) Deposit data as of June 30, 2016. Rated area refers to either the state or multi-state MSA as appropriate.

Distribution of Loans by Income Level of the Geography

The bank's geographic distribution of loans reflects excellent penetration in low- and moderate-income geographies. For this analysis, examiners compared the bank's HMDA-reportable loan originations and purchases, small loans to businesses, and small loans to farms with available demographic information. Examiners also considered any relevant performance context information and aggregate lending data.

Home Mortgage Loans

Refer to Table O for the facts and data used to evaluate the geographic distribution of the bank's originations/purchases of home mortgage loans.

The overall geographic distribution of home mortgage loans is good. The distribution is good in the Bend-Redmond MSA and adequate in the Eugene, OR MSA.

Bend-Redmond, OR MSA

The geographic distribution of home mortgage loans within the Bend-Redmond, OR MSA is good. There are no low-income tracts in this assessment area. Examiners based the overall good conclusion on the good performance in moderate-income geographies. The distribution of home mortgage loans in moderate-income tracts at 9.7 percent is below the 11.8 percent of owner-occupied housing units in moderate-income geographies; however, the bank's performance is similar to aggregate lenders.

Eugene, OR MSA

The geographic distribution of home mortgage loans within the Eugene, OR MSA is adequate. Performance is poor in low-income geographies and good in moderate-income geographies. The distribution of home mortgage loans in low-income tracts at 0.9 percent is below the 1.4 percent of owner-occupied housing units in low-income geographies and below the 1.3 percent performance for aggregate lenders. The distribution of home mortgage loans in moderate-income geographies at 15.4 percent is below the 16.5 percent of owner-occupied housing units in moderate-income geographies, yet performance is similar to aggregate lenders.

Small Loans to Businesses

The overall geographic distribution of small loans to businesses is excellent. The distribution is excellent in the Bend-Redmond, OR MSA and Eugene, OR MSA.

Bend-Redmond, OR MSA

The geographic distribution of small loans to businesses in the Bend-Redmond, OR MSA is excellent. The assessment area has no low-income geographies. Examiners based the overall conclusion on the excellent performance in moderate-income geographies. The distribution in moderate-income geographies at 18.7 percent is slightly below the 19.3 percent of businesses in moderate-income geographies; however, the bank’s performance exceeds the 16.2 percent for aggregate lenders.

Eugene, OR MSA

The geographic distribution of small loans to businesses in the Eugene, OR MSA is excellent. Performance is excellent in low- and moderate-income geographies. The distribution in low-income geographies at 5.9 percent exceeds the 3.5 percent of businesses in low-income geographies. The bank’s performance also exceeds the 3.1 percent for aggregate lenders. The distribution in moderate-income geographies at 26.9 percent is equal to the 26.9 percent of businesses in moderate-income geographies. In addition, the bank’s performance exceeds the 20.1 percent for aggregate lenders.

Small Loans to Farms

The overall geographic distribution of small loans to farms is adequate. Poor performance in limited-scope assessment areas negatively affected overall performance. The distribution is good in the Bend-Redmond, OR MSA and Eugene, OR MSA.

Bend-Redmond, OR MSA

The geographic distribution of small loans to farms in the Bend-Redmond, OR MSA is good. The assessment area has no low-income geographies. Examiners based the overall conclusion on the good performance in moderate-income geographies. The distribution in moderate-income geographies at 9.1 percent is below the 12.3 percent of farms in moderate-income geographies; however, the bank's performance exceeds the 3.7 percent for aggregate lenders.

Eugene, OR MSA

The geographic distribution of small loans to businesses in the Eugene, OR MSA is good. Performance is adequate in low-income geographies and excellent in moderate-income geographies. Although the bank did not originate or purchase any small loans to farms in low-income geographies, the bank's performance is consistent with aggregate performance. The distribution in moderate-income geographies at 18.4 percent exceeds the 14.5 percent of farms located in moderate-income geographies. In addition, the bank's performance exceeds the 10.6 percent for aggregate lenders.

Lending Gap Analysis

For areas receiving full-scope reviews, examiners noted no conspicuous or unexplained gaps in lending in low- and moderate-income geographies.

Inside/Outside Ratio

See the “Inside/Outside Ratio” section within the overall Scope of Evaluation.

Distribution of Loans by Income Level of the Borrower

The bank’s distribution of loans by borrower income and revenue size is good. For this analysis, examiners compared the bank’s HMDA-reportable loan originations and purchases, small business, and small farm lending with available demographic information. Examiners also considered any relevant performance context information and aggregate lending data.

Home Mortgage Loans

Refer to Table P for the facts and data used to evaluate the borrower distribution of the bank’s home mortgage loan originations and purchases.

The overall distribution of home mortgage loans by borrower income is good. The distribution is good in the Bend-Redmond, OR MSA and Eugene, OR MSA.

Bend-Redmond, OR MSA

The distribution of home mortgage loans by borrower income in the Bend-Redmond, OR MSA is good. The distribution is adequate to low-income borrowers and it is good to moderate-income borrowers. The proportion of the bank’s home mortgage loans to low-income borrowers at 8.1 percent is well below the 19.7 percent of low-income families in the MSA; however, the bank’s distribution exceeds the 2.1 percent for aggregate lenders. The proportion of the bank’s home mortgage loans to moderate-income borrowers at 13.2 percent is below the 17.3 percent of moderate-income families. Bank performance exceeds the 10.5 percent for aggregate lenders.

Eugene, OR MSA

The distribution of home mortgage loans by borrower income in the Eugene, OR MSA is good. The distribution is adequate to low-income borrowers and it is good to moderate-income borrowers. The proportion of the bank’s home mortgage loans to low-income borrowers at 7.7 percent is lower than the 21.3 percent of low-income families in the MSA; however, the bank’s distribution exceeds the 3.1 percent for aggregate lenders. The proportion of the bank’s home mortgage loans to moderate-income borrowers at 15.4 percent is lower than the 18.1 percent of moderate-income families. Bank performance exceeds the 13.3 percent for aggregate lenders.

Small Loans to Businesses

Refer to Table R for the facts and data used to evaluate the borrower distribution of the bank's originations and purchases of small loans to farms.

The distribution of small loans to businesses with gross annual revenues of $1 million or less is good. The distribution is good in the Bend-Redmond, OR MSA and Eugene, OR MSA. The bank did not collect or consider the gross annual revenues in the underwriting of approximately 32 percent of its small loans to businesses.

Bend-Redmond, OR MSA

The distribution of small loans to businesses with gross annual revenues of $1 million or less in the Bend-Redmond, OR MSA is good. Based on businesses with known revenues, the proportion of the bank's small loans to businesses at 54.6 percent is lower than the 81.6 percent of businesses with gross annual revenues of $1 million or less. However, the bank's distribution is higher than the 39.8 percent for aggregate lenders.

Eugene, OR MSA

The distribution of small loans to businesses with gross annual revenues of $1 million or less in the Eugene, OR MSA is good. Based on businesses with known revenues, the proportion of the bank's small loans to businesses at 48.7 percent is lower than the 79.6 percent of businesses with gross annual revenues of $1 million or less. However, the bank's distribution is higher than the 36.8 percent for aggregate lenders.

Small Loans to Farms

Refer to Table T for the facts and data used to evaluate the borrower distribution of the bank's originations and purchases of small loans to farms.

The distribution of small loans to farms with gross annual revenues of $1 million or less is good. The distribution is good in the Bend-Redmond, OR MSA and Eugene, OR MSA. The bank did not collect or consider the gross annual revenues in the underwriting of approximately 35 percent of its small loans to farms.

Bend-Redmond, OR MSA

The distribution of small loans to farms with gross annual revenues of $1 million or less in the Bend-Redmond, OR MSA is good. Based on farms with known revenues, the proportion of the bank's small loans to farms at 60 percent is lower than the 97.7 percent of farms with gross annual revenues of $1 million or less. However, the bank's distribution is stronger than the 54.9 percent for aggregate lenders.

Eugene, OR MSA

The distribution of small loans to farms with gross annual revenues of $1 million or less in the Eugene, OR MSA is good. Based on farms with known revenues, the proportion of the bank's small loans to farms at 73.7 percent is lower than the 96.5 percent of farms with gross annual revenues of $1 million or less. However, the bank's distribution is stronger than the 56.6 percent for aggregate lenders.

Community Development Lending

CD lending, primarily resulting from strong performance in limited-scope assessment areas, has a positive effect overall on the bank's Lending Test performance in the state of Oregon.

Bend-Redmond, OR MSA

In the Bend-Redmond, OR MSA, CD lending has a neutral effect on the lending performance in the assessment area. During the evaluation period, the bank refinanced two CD loans totaling $280,166. Both loans were responsive to the identified needs in the MSA by funding seven units of affordable housing in the MSA. CD lending represents 0.9 percent of the allocated Tier 1 Capital.

Eugene, OR MSA

In the Eugene, OR MSA, CD lending has a neutral effect on the lending performance in the assessment area. During the evaluation period, the bank refinanced four CD loans totaling $584,000. All loans were responsive to the identified needs in the MSA by funding the development of 26 units of affordable housing in the MSA. CD lending represents 1.4 percent of the allocated Tier 1 Capital.

Product Innovation and Flexibility

Bank of America offers various national and local flexible lending programs that have benefitted borrowers during the evaluation period. These include programs such as America's Home Grant, Affordable Loan Solutions, and Business Advantage Credit Line. The bank also participates with multiple organizations that provide flexible lending through NACA and other affordable housing programs. Within the state of Oregon, lending under the MHA and HARP programs accounted for 90 percent of the dollar volume of all loans under flexible lending programs

Conclusions for Areas Receiving Limited-Scope Reviews

Lending Test performance varied across the limited-scope assessment areas. Performance in the Albany, OR MSA and Salem, OR MSA is consistent with the Outstanding Lending Test performance. Performance in the Corvallis, OR MSA is good and weaker than the overall Outstanding Lending Test performance due to weaker geographic distributions and relatively lower levels of CD lending.

INVESTMENT TEST

Conclusions for Areas Receiving Full-Scope Reviews

Refer to Table 14 for the facts and data used to evaluate the bank's level of qualified investments.

Bank of America's performance under the Investment Test in the state of Oregon is rated Outstanding. Investment performance is good in the Bend-Redmond OR MSA and excellent in the Eugene, OR MSA. Performance in limited-scope assessment areas has a neutral effect on the state rating.

Bend-Redmond, OR MSA

Investment performance in the Bend-Redmond, OR MSA is good. During the current evaluation period, the bank made 20 CD investments in the assessment area totaling $2.9 million. All of the bank's current period investments supported 18 units of affordable housing. In addition, the bank has nine CD investments totaling $268,000 it made during a prior evaluation period that are still outstanding and continue to provide benefit to the community. Prior period and current period investments total $3.2 million or 9.9 percent of allocated Tier 1 Capital. None of the current period investments are innovative or complex with mortgage-backed securities representing $2.9 million or 100 percent of the investment dollars.

Eugene, OR MSA

Investment performance in the Eugene, OR MSA is excellent. During the current evaluation period, the bank made 37 CD investments in the assessment area totaling $4.1 million. Approximately $4 million or 98 percent of the current period investment dollars supported 27 units of affordable housing. In addition, the bank has five CD investments totaling $169,000 it made during a prior evaluation period that are still outstanding and continue to provide benefit to the community. Prior period and current period investments total $4.3 million or 10.3 percent of allocated Tier 1 Capital. The majority of current period investments are neither innovative nor complex with mortgage-backed securities representing approximately $4 million or 98 percent of the investment dollars.

(*) 'Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
(**) 'Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the bank's financial reporting system.

Conclusions for Areas Receiving Limited-Scope Reviews

Investment Test performance in the limited-scope assessment areas is consistent with the Outstanding Lending Test performance in the state of Oregon.

SERVICE TEST

Conclusions for Areas Receiving Full-Scope Reviews

Bank of America’s performance under the Service Test in the state of Oregon is rated Outstanding. Service Test performance is excellent in the Bend-Redmond, OR MSA and Eugene, OR MSA. Performance in limited-scope assessment areas has a neutral effect on the state rating.

Retail Banking Services

Refer to Table C for the facts and data used to evaluate the accessibility of the bank’s retail banking services.

Bend-Redmond, OR MSA

In the Bend-Redmond, OR MSA, the bank’s service delivery systems are readily accessible to geographies and individuals of different income levels. Examiners based this conclusion on a comparison of the distribution of the bank’s three financial centers with the distribution of the population. The Bend-Redmond, OR MSA has no low-income census tracts. The bank has 2 financial centers or 66.7 percent of its financial centers in moderate-income geographies. Considering 15.7 percent of the population lives in moderate-income geographies, the distribution is excellent.

Examiners also considered the bank's alternative delivery systems, including ATMs, telephone, online, mobile, and text banking in evaluating accessibility to the bank's products and services. Based on customer usage, alternative delivery systems have a significantly positive effect on the accessibility of the bank's service delivery systems to individuals in moderate-income geographies.

During the evaluation period, the bank did not open or close any financial centers in the MSA.

Banking products and services do not vary in a way that inconveniences the assessment area, particularly in moderate-income geographies or to low- and moderate-income individuals. The bank offers a full range of products and services. Financial centers are open 9:30 am to 5:30 pm Monday through Thursday, 9:30 am to 6:00 pm on Friday, and 10:00 am to 1:00 pm on Saturday.

Eugene, OR MSA

In the Eugene, OR MSA, the bank's service delivery systems are readily accessible to geographies and individuals of different income levels. Examiners based this conclusion on a comparison of the distribution of the bank's three financial centers with the distribution of the population. The bank has no financial centers in low-income geographies where 2.9 percent of the population resides. The bank has 1 financial center or 33.3 percent of its financial centers in moderate-income geographies where 21.4 percent of the population lives. Considering the bank only has three financial centers and those financial centers are located in geographies where most of the population resides, the distribution is excellent.

Examiners also considered the bank's alternative delivery systems, including ATMs, telephone, online, mobile, and text banking in evaluating accessibility to the bank's products and services. Based on customer usage, alternative delivery systems have a positive effect on the accessibility of the bank's service delivery systems to individuals in low- and moderate-income geographies.

Financial center openings and closings did not adversely affect the accessibility of retail banking services, particularly in low- and moderate-income geographies and to low- and moderate-income individuals. During the evaluation period, the bank closed one financial center in a middle-income geography.

Banking products and services do not vary in a way that inconveniences the assessment area, particularly in moderate-income geographies or to low- and moderate-income individuals. The bank offers a full range of products and services. Operating hours vary across the three financial centers. Operating hours for the financial center located in the moderate-income geography are more restrictive than the other financial centers by opening 30 minutes later and closing 30 minutes earlier.

Community Development Services

Bend-Redmond, OR MSA

The bank provides a limited level of community development services in the Bend-Redmond, OR MSA, considering its capacity and opportunities available for participation. Bank employees worked with one local community development organization to provide 11 community development services targeted to low- and moderate-income individuals. Employee involvement was limited to providing financial literacy training. Sixty-eight low- and moderate-income individuals participated in the trainings over the course of the evaluation period. While the community development services addressed one of the needs identified in the assessment area, the community development services did not address many other needs despite available opportunities.

Eugene, OR MSA

The bank provides a relatively high level of community development services in the Eugene, OR MSA, considering its capacity and opportunities available for participation. Bank employees worked with four local community development organizations and five elementary schools to provide 36 community development services targeted to low- and moderate-income individuals. The bank hired third-party contractors to provide fund raising training to local community development organizations. Employee involvement was limited to providing financial literacy training to 774 elementary school students. While the community development services provided were responsive to the needs identified in the assessment area, the activities served a limited demographic.

Conclusions for Areas Receiving Limited-Scope Reviews

Based on limited-scope reviews, the bank's performance under the Service Test in the Corvallis, OR MSA and Salem, OR MSA is consistent with the bank's overall Outstanding Service Test performance in the state of Oregon. Performance in the Albany, OR MSA is adequate and weaker due to the limited retail banking accessibility in moderate-income geographies.

State of Pennsylvania

CRA Rating for Pennsylvania[41]: Satisfactory
The Lending Test is rated: High Satisfactory
The Investment Test is rated: Outstanding
The Service Test is rated: Low Satisfactory

The major factors that support this rating include:

- Good volume of loans originated or purchased within the assessment areas;
- Good distribution of loans by geography and adequate distribution of loans by borrower income or business revenue size;
- Relatively high level of CD lending that has a positive effect on overall lending performance;
- Excellent level and responsiveness of qualified investments; and
- Reasonably accessible service delivery systems to low- and moderate-income geographies and individuals.

Description of Institution's Operations in Pennsylvania

Bank of America does not have financial centers in the state of Pennsylvania that are not included in the Allentown-Bethlehem-Easton, PA-NJ Multistate MSA or Philadelphia-Camden-Wilmington, PA-NJ-DE Multistate MSA. These multistate MSAs are separate rating areas; therefore, examiners excluded them from the evaluation of the state of Pennsylvania. As of June 30, 2016, the bank held no deposits in the state. The primary depository financial institutions in Pennsylvania with deposit shares greater than 5 percent include PNC Bank (30.4 percent), First National Bank of Pennsylvania (5.7 percent), and Citizens Bank of Pennsylvania (5.7 percent). As of December 31, 2016, the bank operated two full-service ATMs in Pennsylvania.

Refer to the community profiles for the state of Pennsylvania in appendix C for detailed demographics and other performance context information for assessment areas that received full-scope reviews.

[41] For institutions with branches in two or more states in a multistate metropolitan area, this statewide evaluation does not reflect performance in the parts of this state contained within the multistate metropolitan area. Refer to the multistate metropolitan area rating and discussion for the rating and evaluation of the institution's performance in that area.

Scope of Evaluation in Pennsylvania

The bank has defined two assessment areas. Examiners selected the Pittsburgh, PA MSA for a full-scope review and the Scranton-Wilkes-Barre-Hazleton, PA MSA for a limited-scope review. Because the bank has no depository presence in either assessment area, examiners based the overall conclusion on an equal weighting of performance in each assessment area. During the evaluation period, Bank of America originated or purchased 7,099 home mortgage loans totaling $1.1 billion, 8,596 small loans to businesses totaling $165 million, 96 small loans to farms totaling $704,000, and 5 CD loans totaling $5.4 million. Lending volumes include loans originated or purchased in the Lancaster, PA MSA, Reading, PA MSA, and Pennsylvania Non-MSA (Schuylkill County), which the bank no longer designates as assessment areas due to the bank’s closure or sale of all financial centers and deposit-taking ATMs in those communities. Based on loan volume, examiner weighted small loans to businesses, representing 54 percent of the volume, the heaviest, followed by home mortgage loans at 45 percent, and small loans to farms at less than 1 percent.

Examiners conducted telephone interviews with two local community services agencies representing neighborhood housing. The community contacts noted that affordable housing for first-time homebuyers along with older housing stock, particularly in rural areas, are concerns within the region.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN PENNSYLVANIA

LENDING TEST

Conclusions for Areas Receiving Full-Scope Reviews

Bank of America’s performance under the Lending Test in the state of Pennsylvania is rated High Satisfactory, based on good lending activity, good geographic distribution, adequate borrower income distribution, and a relatively high level of CD lending that has a positive effect on the Lending Test. Performance in the limited-scope assessment area has a neutral effect on the state rating.

Lending Activity

Based on total lending volume in Table 1, peer deposit and loan data for 2016, and relevant performance context considerations, the bank’s lending activity in the state of Pennsylvania is good. Lending activity is good in the Pittsburgh, PA MSA.

Pittsburgh, PA MSA

Lending activity in the Pittsburgh, PA MSA is good. Bank of America has no deposits in the assessment area. According to peer mortgage data for 2016, the bank has a market share of 0.6 percent based on the number of home mortgage loan originated or purchased. The bank ranks 34th among 536 home mortgage lenders, which places it in the top 7 percent of lenders competing for loans. According to peer small business data for 2016, the bank has a 2.2

percent market share of small loans to businesses based on the number of small loans to businesses originated or purchased. The bank ranks ninth among 128 small business lenders, which places it in the top 8 percent of lenders in the MSA. For small loans to farms, the bank has a market share of 7.5 percent based on the number of small loans to farms originated or purchased. The bank ranks fourth among 22 farm lenders, which places it in the top 19 percent of lenders. Considering the bank has no retail banking presence or deposits in the assessment area and its relative ranking among all lenders for home mortgage loans and small loans to businesses, overall lending activity is good.

(*) Loan data as of December 31, 2016. Rated area refers to either the state or multi-state MSA rating area.
(**) The evaluation period for Community Development Loans is January 1, 2012 to December 31, 2016.
(***) Deposit data as of June 30, 2016. Rated area refers to either the state or multi-state MSA as appropriate.

Distribution of Loans by Income Level of the Geography

The bank's geographic distribution of loans reflects good penetration in low- and moderate-income geographies. For this analysis, examiners compared the bank's HMDA-reportable loan originations and purchases, small loans to businesses, and small loans to farms with available demographic information. Examiners also considered any relevant performance context information and aggregate lending data.

Home Mortgage Loans

Refer to Table O for the facts and data used to evaluate the geographic distribution of the bank's originations/purchases of home mortgage loans.

The overall geographic distribution of home mortgage loans is good. The distribution is adequate in the Pittsburgh, PA MSA. Good performance in the limited-scope assessment area has a positive effect on the overall conclusion.

Pittsburgh, PA MSA

The geographic distribution of home mortgage loans in the Pittsburgh, PA MSA is adequate. Performance is adequate in low-income geographies and poor in moderate-income geographies. The distribution of home mortgage loans in low-income geographies at 1.1 percent is lower than the 2.1 percent of owner-occupied housing units in low-income geographies, but is consistent with the 1.1 percent for aggregate lenders. Although the percentage of owner-occupied housing units is low at 2.1 percent, it represents approximately

15,000 housing units. The distribution in moderate-income geographies at 11.3 percent is lower than the 19.2 percent of owner-occupied housing units of approximately 135,000 housing units in moderate-income geographies and lower than the 13.3 percent for aggregate lenders.

Small Loans to Businesses

Refer to Table Q for the facts and data used to evaluate the geographic distribution of the bank's originations/purchases of small loans to businesses.

The overall geographic distribution of small loans to businesses is good. The distribution is good in the Pittsburgh, PA MSA.

Pittsburgh, PA MSA

The geographic distribution of small loans to businesses in the Pittsburgh, PA MSA is good. Performance is good in low-income geographies and good in moderate-income geographies. The distribution in low-income geographies at 3.1 percent is lower than the 4.1 percent of businesses in low-income geographies and it is slightly lower than the 3.4 percent performance for aggregate lenders. The distribution in moderate-income geographies at 14.4 percent is lower than the 16.7 percent of businesses in moderate-income geographies and it is lower than the 15.6 percent performance for aggregate lenders.

Small Loans to Farms

Refer to Table S for the facts and data used to evaluate the geographic distribution of the bank's originations/purchases of small loans to farms.

The overall geographic distribution of small loans to farms is good. The distribution is good in the Pittsburgh, PA MSA.

Pittsburgh, PA MSA

The geographic distribution of small loans to farms in the Pittsburgh, PA MSA is good, based on excellent performance in low-income geographies and adequate performance in moderate-income geographies. The geographic distribution of small loans to farms in low-income geographies at 9.1 percent is significantly higher than the 1.2 percent of farms in low-income geographies and it is significantly higher than the 0 percent for aggregate lenders. The geographic distribution in moderate-income geographies at 12.1 percent is lower than the 14.1 percent of farms in moderate-income geographies and it is lower than the 29.5 percent for aggregate lenders. During the 2012-2013 period, the bank performed more consistently with aggregate lenders. Although not shown in the table below, the bank's distribution at 17.6 percent exceeded the 14.9 percent of farms in moderate-income geographies and its performance was slightly below the 18.3 percent for aggregate lenders.

Lending Gap Analysis

For areas receiving full-scope reviews, examiners noted no conspicuous or unexplained gaps in lending in low- and moderate-income geographies.

Inside/Outside Ratio

See the "Inside/Outside Ratio" section within the overall Scope of Evaluation.

Distribution of Loans by Income Level of the Borrower

The bank's distribution of loans by borrower income and revenue size is adequate. For this analysis, examiners compared the bank's HMDA-reportable loan originations and purchases, small business, and small farm lending with available demographic information. Examiners also considered any relevant performance context information and aggregate lending data.

Home Mortgage Loans

Refer to Table P for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases.

The overall distribution of home mortgage loans by borrower income is good. The distribution is good in the Pittsburgh, PA MSA.

Pittsburgh, PA MSA

The distribution of home mortgage loans by borrower income in the Pittsburgh, PA MSA is good. The distribution is good to low-income borrowers and good to moderate-income borrowers. The proportion of the bank's home mortgage loans to low-income borrowers at 11.6 percent is lower than the 20.4 percent of low-income families in the MSA; however, the bank's performance exceeds the 8 percent for aggregate lenders. The proportion of home mortgage loans to moderate-income borrowers at 17.0 percent is lower than the 18.1 percent of moderate-income families and it is lower than the 18.1 percent performance for aggregate lenders.

Small Loans to Businesses

Refer to Table R for the facts and data used to evaluate the borrower distribution of the bank's originations and purchases of small loans to businesses.

The distribution of small loans to businesses with gross annual revenues of $1 million or less is adequate overall. The distribution is adequate in the Pittsburgh, PA MSA. The bank did not collect or consider the gross annual revenues in the underwriting of approximately 38 percent of its small loans to businesses.

Pittsburgh, PA MSA

The distribution of small loans to businesses with gross annual revenues of $1 million or less in the Pittsburgh, PA MSA is adequate. Based on businesses with known revenues, the proportion of the bank's small loans to businesses at 45.7 percent is lower than the 76.5

percent of businesses with gross annual revenues of $1 million or less and it is slightly lower than the 46.7 percent for aggregate lenders.

Small Loans to Farms

Refer to Table T for the facts and data used to evaluate the borrower distribution of the bank's originations and purchases of small loans to farms.

The distribution of small loans to farms with gross annual revenues of $1 million or less is adequate. The distribution is adequate in the Pittsburgh, PA MSA. The bank did not collect or consider the gross annual revenues in the underwriting of approximately 46 percent of its small loans to farms.

Pittsburgh, PA MSA

The distribution of small loans to farms with gross annual revenues of $1 million or less in the Pittsburgh, PA MSA is adequate. Based on farms with known revenues, the proportion of the bank's small loans to farms at 51.5 percent is lower than the 96.9 percent of farms with gross annual revenues of $1 million or less. The bank's distribution is also lower than the 54.8 percent for aggregate lenders.

Community Development Lending

Considering the bank's very limited retail banking presence and resources in the assessment area, CD lending has a positive effect overall on the bank's Lending Test performance in the state of Pennsylvania.

Pittsburgh, PA MSA

In the Pittsburgh, PA MSA, CD lending has a significantly positive effect on the lending performance in the assessment area. During the evaluation period, the bank originated three CD loans totaling $4.6 million that primarily helped provide 39 units of affordable housing.

Product Innovation and Flexibility

Bank of America offers various national and local flexible lending programs that have benefitted borrowers during the evaluation period. These include programs such as America's Home Grant, Affordable Loan Solutions, and Business Advantage Credit Line. The bank also participates with multiple organizations that provide flexible lending through NACA and other affordable housing programs. Within the state of Pennsylvania, lending under the MHA and HARP programs accounted for 89 percent of the dollar volume of all loans under flexible lending programs.

Conclusions for Areas Receiving Limited-Scope Reviews

Lending Test performance in the Scranton-Wilkes-Barre-Hazleton, PA MSA is weaker than the overall High Satisfactory Lending Test performance in the state of Pennsylvania. Performance is weaker due to absence of any CD lending that may have otherwise positively affected the lending performance.

INVESTMENT TEST

Conclusions for Areas Receiving Full-Scope Reviews

Refer to Table 14 for the facts and data used to evaluate the bank's level of qualified investments.

Bank of America's performance under the Investment Test in the state of Pennsylvania is rated Outstanding. Investment performance is excellent in the Pittsburgh, PA MSA. Performance in the limited-scope assessment area has a neutral effect on the state rating.

Pittsburgh, PA MSA

In the Pittsburgh, PA MSA, Bank of America has an excellent level of CD investments, considering the bank's very limited retail banking presence and resources in the assessment area. The bank made 14 CD investments during the current evaluation period totaling $1.1 million. All of the current period investment dollars supported community development organizations providing services targeted to low- and moderate-income individuals and families. In addition, the bank has seven CD investments totaling $1.2 million it made during a prior evaluation period that are still outstanding and continue to provide benefit to the community. Prior period and current period investments total $2.2 million. The majority of current period investments are neither innovative nor complex with investments in CDFIs representing approximately $1 million or 95 percent of the investment dollars.

Examples of community development investments include:

- The bank invested $689,000 in the Enterprise Community Loan Fund (ECLF), a CDFI and Community Development Entity (CDE). The ECLF provides community developers with access to interim financing otherwise unavailable for affordable housing development and community facility projects, such as charter schools and health facilities.

- The bank invested $250,000 in the National Federation of Community Development Credit Unions (the Federation). The Federation is a certified CDFI with a mission to help low- and moderate-income people and communities achieve financial independence through Community Development Credit Unions.

Table 14. Qualified Investments **2012-2016**

(*) 'Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
(**) 'Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the bank's financial reporting system.

Conclusions for Areas Receiving Limited-Scope Reviews

Investment Test performance in the Scranton-Wilkes-Barre-Hazleton, PA MSA is consistent with the Outstanding Investment Test performance in the state of Pennsylvania.

SERVICE TEST

Conclusions for Areas Receiving Full-Scope Reviews

Bank of America's performance under the Service Test in the state of Pennsylvania is rated Low Satisfactory. Service Test performance is adequate in the Pittsburgh, PA MSA. Performance in the limited-scope assessment area has a neutral effect on the state rating.

Retail Banking Services

Refer to Table C for the facts and data used to evaluate the accessibility of the bank's retail banking services.

Pittsburgh, PA MSA

In the Pittsburgh, PA MSA, the bank's delivery systems are reasonably accessible to geographies and individuals of different income levels. The bank's retail presence in the assessment area is limited to two full-service ATMs. Considering the very limited presence, accessibility to the ATMs along with additional accessibility provided through other alternative delivery systems, overall accessibility is reasonable.

The bank's alternative delivery systems including the full-service ATM, telephone, online, mobile, and text banking have a positive effect on the accessibility of the bank's service delivery systems to low- and moderate-income individuals and geographies. The bank demonstrated customer usage of ADS through income proxies based on customer's residency. For ATM usage and text banking, the percentage of customers in low- and moderate-income geographies using the platform exceeded the overall percentage of the population in low- and moderate-income geographies.

Community Development Services

Pittsburgh, PA MSA

The bank provides a relatively high level of community development services in the MSA. During the evaluation period, the bank participated with community development organizations to provide 28 community development services targeted to low- and moderate-income individuals. Employees provided three financial education workshops for 58 individuals. Attendees to the financial education workshops were primarily students from low- and moderate-income families. Employees participated in eight webinars and workshops with non-profit organizations to help the organizations with capacity building. In addition, four employees served on the boards or committees of community organizations. The types of CD services provided are responsive to the needs identified in the community.

Conclusions for Areas Receiving Limited-Scope Reviews

Service Test performance in the Scranton-Wilkes-Barre-Hazleton, PA MSA is consistent with the Low Satisfactory Service Test performance in the state of Pennsylvania.

State of South Carolina

CRA Rating for South Carolina[42]: Satisfactory
The Lending Test is rated: High Satisfactory
The Investment Test is rated: Outstanding
The Service Test is rated: Low Satisfactory

The major factors that support this rating include:

- Excellent volume of loans originated or purchased within the assessment areas;
- Adequate distribution of loans by geography and good distribution of loans by borrower income or business revenue size;
- Relatively low level of CD lending that has a neutral effect on overall lending performance;
- Excellent level and responsiveness of qualified investments; and
- Accessible service delivery systems to low- and moderate-income geographies and individuals.

Description of Institution's Operations in South Carolina

The state of South Carolina is Bank of America's 20th largest rating area based on its total deposits in the state when excluding deposits in the Augusta-Richmond County, GA-SC Multistate MSA, Charlotte-Concord-Gastonia, NC-SC Multistate MSA, and Myrtle Beach-Conway-North Myrtle Beach, SC-NC Multistate MSA. Examiners excluded the multistate MSAs from the analysis of the state of South Carolina because examiners evaluated the multistate MSAs as separate rating areas. As of June 30, 2016, the bank maintained approximately $10.6 billion or 0.9 percent of its total domestic deposits in financial centers in areas of the state of South Carolina that do not include the multistate MSAs. Of the 80 depository financial institutions operating in the areas of the state that do not include the multistate MSAs, Bank of America, with a deposit market share of 15.6 percent, is the second largest. Competitors with deposit market shares greater than 5 percent include Wells Fargo Bank (21.3 percent), Branch Banking and Trust Company (9.8 percent), First Citizens Bank & Trust Company (8.1 percent), and South State Bank (7.1 percent). As of December 31, 2016, the bank operated 65 financial centers and 186 ATMs in the areas of the state of South Carolina that exclude the multistate MSAs.

Examiners used the bank's deposit volume as an indicator of its capacity to lend and invest in its assessment areas. In some cases, not all deposits originated from the local community. In

[42] For institutions with branches in two or more states in a multistate metropolitan area, this statewide evaluation does not reflect performance in the parts of this state contained within the multistate metropolitan area. Refer to the multistate metropolitan area rating and discussion for the rating and evaluation of the institution's performance in that area.

the Columbia, SC MSA, Bank of America reported an additional $182 million in deposits of national corporations, in which the funds originated from communities across the nation and deposited in financial centers near the headquarters of these large corporations. Adjusting the bank's total deposits in the MSA by excluding these external deposits from the local deposit base gives a more accurate indicator of the bank's capacity in the assessment area.

Refer to the community profiles for the state of South Carolina in appendix C for detailed demographics and other performance context information for assessment areas that received full-scope reviews.

Scope of Evaluation in South Carolina

The bank has defined eight assessment areas. For purposes of this evaluation, examiners combined the three non-MSA assessment areas. Examiners selected the Charleston-North Charleston, SC MSA and Columbia, SC MSA for full-scope reviews and the Greenville-Anderson-Mauldin, SC MSA, Hilton Head Island-Bluffton-Beaufort, SC MSA, Spartanburg, SC MSA, and South Carolina Non-MSA for limited-scope reviews. While the Columbia, SC MSA carries approximately 50 percent weight of the overall conclusions based on the bank's presence there relative to all assessment areas in South Carolina, the conclusions and ratings for the state are based on the activities within all assessment areas. During the evaluation period, Bank of America originated or purchased 22,042 home mortgage loans totaling nearly $4.3 billion, 21,922 small loans to businesses totaling $612.7 million, 207 small loans to farms totaling $2.6 million, and 18 CD loans totaling $81.8 million. Lending volumes include loans originated or purchased in the Anderson, SC MSA prior to the Office of Management and Budget (OMB) including the MSA in the Greenville-Anderson-Mauldin, SC MSA during 2014. The volumes include lending activity in the Florence, SC MSA and Sumter, SC MSA, which the bank no longer designates as assessment areas due to the bank's closure or sale of all financial centers and deposit-taking ATMs. The loan volumes also include loans originated or purchased in the Myrtle Beach-North Myrtle Beach-Conway, SC MSA prior to the assessment area's designation as a multistate MSA. Based on loan volume, examiners weighted small loans to businesses, representing 49.6 percent of the volume, equally with home mortgage loans at 49.9 percent, followed by small loans to farms at less than 1 percent.

Examiners conducted telephone interviews with two local community services agencies representing neighborhood housing, economic development, and community development financial institutions. The community contacts noted high transportation costs commuting to available jobs, start-up funding, affordable health care, childhood education success, lack of resources to afford food, industry expansion, and affordable housing continue to be concerns across the state. The agencies request that financial institutions assist by providing small business lending, community development investments in small business development centers, and other community development services to groups. A review of the bank's investments noted the bank is active in the state in providing affordable housing assistance.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN SOUTH CAROLINA

LENDING TEST

Conclusions for Areas Receiving Full-Scope Reviews

Bank of America's performance under the Lending Test in the state of South Carolina is rated High Satisfactory, based on excellent lending activity, adequate geographic distribution, and good borrower income distribution. Performance in limited-scope assessment areas has a neutral effect on the state rating.

Lending Activity

Based on total lending volume in Table 1, peer deposit and loan data for 2016, and relevant performance context considerations, the bank's lending activity in the state of South Carolina is excellent. Lending activity is excellent in the Charleston-North Charleston, SC MSA and excellent in the Columbia, SC MSA.

Charleston-North Charleston, SC MSA

Lending activity in the Charleston-North Charleston, SC MSA is excellent. Based on FDIC deposit data as of June 30, 2016, Bank of America has a deposit market share of 14.8 percent. The bank ranks second among 30 depository financial institutions in the assessment area, which places it in the top 7 percent of institutions. According to peer mortgage data for 2016, the bank has a market share of 2.6 percent based on the number of home mortgage loans originated or purchased. The bank ranks seventh among 520 home mortgage lenders, which places it in the top 2 percent of lenders competing for loans. According to peer small business data for 2016, the bank has a 9 percent market share of small loans to businesses based on the number of small loans to businesses originated or purchased. The bank ranks third among 114 small business lenders, which places it in the top 3 percent of lenders in the MSA. For small loans to farms, the bank has a market share of 9.1 percent based on the number of small loans to farms originated or purchased. The bank ranks sixth among 13 farm lenders, which places it in the top 47 percent of lenders. Considering the bank's higher ranking among all lenders for home mortgage loans and small loans to businesses relative to its ranking for deposits, overall lending activity is excellent.

Columbia, SC MSA

Lending activity in the Columbia, SC MSA is excellent. Based on FDIC deposit data as of June 30, 2016, the bank has a deposit market share of 28.9 percent. The bank ranks second among 26 depository financial institutions in the assessment area, which places it in the top 8 percent of 26 institutions. Excluding the $182 million in corporate deposits derived from outside the assessment area, the bank's deposit market share would only marginally decline to 28.2 percent. According to peer mortgage data for 2016, the bank has a market share of 2.2 percent based on the number of home mortgage loans originated or purchased. The bank ranks 10th among 413 home mortgage lenders, which places it in the top 2 percent of lenders.

According to peer small business data for 2016, the bank has a 7.4 percent market share of small loans to businesses based on the number of small loans to businesses originated or purchased. The bank ranks fifth among 94 small business lenders, which places it in the top 6 percent of lenders. For small loans to farms, the bank has a market share of 4.8 percent based on the number of small loans to farms originated or purchased. The bank ranks seventh among 16 farm lenders, which places it in the top 44 percent of lenders. Considering the bank's higher ranking among all lenders for home mortgage loans and small loans to businesses relative to its ranking for deposits, overall lending activity is excellent.

(**) The evaluation period for Community Development Loans is January 1, 2012 to December 31, 2016.
(***) Deposit data as of June 30, 2016. Rated area refers to either the state or multi-state MSA as appropriate.

Distribution of Loans by Income Level of the Geography

The bank's geographic distribution of loans reflects adequate penetration in low- and moderate-income geographies. For this analysis, examiners compared the bank's HMDA-reportable loan originations and purchases, small loans to businesses, and small loans to farms with available demographic information. Examiners also considered any relevant performance context information and aggregate lending data.

Home Mortgage Loans

Refer to Table O for the facts and data used to evaluate the geographic distribution of the bank's originations/purchases of home mortgage loans.

The overall geographic distribution of home mortgage loans is adequate. The distribution is adequate in the Charleston-North Charleston, SC MSA and adequate in the Columbia, SC MSA.

Charleston-North Charleston, SC MSA

The geographic distribution of home mortgage loans in the Charleston-North Charleston, SC MSA is adequate. Performance is good in low-income geographies and poor in moderate-income geographies. The distribution of home mortgage loans in low-income geographies at

1.1 percent is slightly lower than the 1.7 percent of owner-occupied housing units and it is equal to the 1.1 percent for aggregate lenders. The distribution in moderate-income geographies at 10.9 percent is lower than the 18.3 percent of owner-occupied housing units and lower than the 14.7 percent for aggregate lenders.

Columbia, SC MSA

The geographic distribution of home mortgage loans in the Columbia, SC MSA is adequate. Performance is good in low-income geographies and adequate in moderate-income geographies. The distribution of home mortgage loans in low-income geographies at 0.8 percent is lower than the 1 percent of owner-occupied housing unit, but it is higher than the 0.5 percent performance for aggregate lenders. The distribution in moderate-income geographies at 12.9 percent is lower than the 26.1 percent of owner-occupied housing units, but it exceeds the 12.1 percent performance for aggregate lenders.

Small Loans to Farms

Refer to Table S for the facts and data used to evaluate the geographic distribution of the bank's originations/purchases of small loans to farms.

The overall geographic distribution of small loans to farms is adequate. The distribution is good in the Charleston-North Charleston, SC MSA and adequate in the Columbia, SC MSA.

Charleston-North Charleston, SC MSA

The geographic distribution of small loans to farms in the Charleston-North Charleston MSA is good, based on adequate performance in low-income geographies and good performance in moderate-income geographies. The geographic distribution of small loans to farms in low-income geographies at 0 percent is lower than the 2.7 percent of farms in low-income geographies, but it is consistent with the 0 percent for aggregate lenders. The low percentage of small farms in low-income geographies coupled with the low lending performance for the bank and aggregate lenders are indicators of the low demand for small loans to farms in low-income geographies. The geographic distribution in moderate-income geographies at 14.3 percent is lower than the 18.2 percent of farms in moderate-income geographies; however, it exceeds the 9.8 percent for aggregate lenders.

Columbia, SC MSA

The geographic distribution of small loans to farms in the Columbia, SC MSA is adequate, based on adequate performance in low-income geographies and poor performance in moderate-income geographies. The geographic distribution of small loans to farms in low-income geographies at 0 percent is lower than the 0.8 percent of farms in low-income geographies and it is consistent with the 0 percent for aggregate lenders. The low percentage of small farms in low-income geographies coupled with the low lending performance for the bank and aggregate lenders are indicators of the low demand for small loans to farms in low-income geographies. The geographic distribution in moderate-income geographies at 29.7 percent is lower than the 34.5 percent of farms in moderate-income geographies and lower than the 58.3 percent for aggregate lenders.

Lending Gap Analysis

For areas receiving full-scope reviews, examiners noted no conspicuous or unexplained gaps in lending in low- and moderate-income geographies.

Inside/Outside Ratio

See the “Inside/Outside Ratio” section within the overall Scope of Evaluation.

Distribution of Loans by Income Level of the Borrower

The bank’s distribution of loans by borrower income and revenue size is good. For this analysis, examiners compared the bank’s HMDA-reportable loan originations and purchases, small business, and small farm lending with available demographic information. Examiners also considered any relevant performance context information and aggregate lending data.

Home Mortgage Loans

Refer to Table P for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases.

The overall distribution of home mortgage loans by borrower income is good. The distribution is good in the Charleston-North Charleston, SC MSA and excellent in the Columbia, SC MSA.

Charleston-North Charleston, SC MSA

The distribution of home mortgage loans by borrower income in the Charleston-North Charleston, SC MSA is good. The distribution is adequate to low-income borrowers and it is good to moderate-income borrowers. The proportion of the bank's home mortgage loans to low-income borrowers at 6.8 percent is lower than the 21.7 percent of low-income families in the MSA; however, the bank's performance is higher than the 4.8 percent for aggregate lenders. The proportion of home mortgage loans to moderate-income borrowers at 14.6 percent is lower than the 17.1 percent of moderate-income families and it is lower than the 15.7 percent performance for aggregate lenders.

Columbia, SC MSA

The distribution of home mortgage loans by borrower income in the Columbia, SC MSA is excellent. The distribution is good to low-income borrowers and it is excellent to moderate-income borrowers. The proportion of the bank's home mortgage loans to low-income borrowers at 11.4 percent is lower than the 21.8 percent of low-income families in the MSA; however, it is significantly higher than the 6.2 percent performance for aggregate lenders. The proportion of loans to moderate-income borrowers at 19.2 percent exceeds the 17.5 percent of moderate-income families in the MSA and it exceeds the 16.9 percent performance for aggregate lenders.

Community Development Lending

CD lending has a neutral effect overall on the bank's Lending Test performance in the state of South Carolina. The bank met the credit needs of its communities primarily through retail lending.

Charleston-North Charleston, SC MSA

In the Charleston-North Charleston, SC MSA, CD lending has a neutral effect on lending performance in the assessment area. During the evaluation period, the bank originated one CD loan totaling $1.1 million that helped to provide 44 units of affordable housing. CD lending represents 0.5 percent of the allocated Tier 1 Capital.

Columbia, SC MSA

In the Columbia, SC MSA, CD lending has a neutral effect on the lending performance in the assessment area. During the evaluation period, the bank originated eight CD loans totaling $31 million that primarily helped to provide 308 units of affordable housing. CD lending represents 4.8 percent of the allocated Tier 1 Capital, after considering $182 million in deposits from national corporations in which the deposits did not derive from the local community.

Examples of CD loans include:

- The bank purchased $11 million in tax-exempt bonds used to construct a 124-unit affordable housing development.

- The bank provided $7.5 million in construction financing for Abernathy Place, a 64-unit affordable housing project located in Columbia, SC. Income restrictions include 13 units at 50 percent of the area median income (AMI) and 51 units at 60 percent of AMI. The bank also provided a LIHTC equity investment for this project.

Product Innovation and Flexibility

Bank of America offers various national and local flexible lending programs that have benefitted borrowers during the evaluation period. These include programs such as America's Home Grant, Affordable Loan Solutions, and Business Advantage Credit Line. The bank also participates with multiple organizations that provide flexible lending through NACA and other affordable housing programs. Within the state of South Carolina, lending under the MHA and HARP programs accounted for 77 percent of the dollar volume of all loans under flexible lending programs.

Conclusions for Areas Receiving Limited-Scope Reviews

Lending Test performance in the Greenville-Anderson-Mauldin, SC MSA is consistent with the High Satisfactory Lending Test performance in the state of South Carolina. Performance in the Hilton Head Island-Bluffton-Beaufort, SC MSA, Spartanburg, SC MSA, and South Carolina Non-MSA is stronger than the overall High Satisfactory Lending Test performance in the state. Performance is stronger primarily due to the higher levels of CD lending that have a positive or significantly positive effect on lending performance in those assessment areas.

INVESTMENT TEST

Conclusions for Areas Receiving Full-Scope Reviews

Refer to Table 14 for the facts and data used to evaluate the bank's level of qualified investments.

Bank of America's performance under the Investment Test in the state of South Carolina is rated Outstanding. Investment performance is good in the Charleston-North Charleston, SC MSA and excellent in the Columbia, SC MSA. Performance in limited-scope assessment areas has a neutral effect on the state rating.

Charleston-North Charleston, SC MSA

In the Charleston-North Charleston, SC MSA, Bank of America has a good level of CD investments. The bank made 91 CD investments during the evaluation period totaling $19.2 million. Approximately $18.9 million or 98 percent of the current period investment dollars supported 165 units of affordable housing and approximately $17.9 million of those investments are mortgage-backed securities. In addition, the bank has 20 CD investments totaling $2.7 million it made during a prior evaluation period that are still outstanding and continuing to provide benefit to the community. Prior period and current period investments total $21.9 million or 9.7 percent of allocated Tier 1 Capital. The majority of current period investments are neither innovative nor complex with mortgage-backed securities representing approximately $11.7 million or 93 percent of the investment dollars.

Columbia, SC MSA

In the Columbia, SC MSA, the bank has an excellent level of CD investments. The bank made 132 CD investments during the evaluation period totaling $62.6 million. Approximately $61.7 million or 99 percent of the current period investment dollars supported 583 units of affordable housing. In addition, the bank has 40 CD investments totaling $6.9 million it made during a prior evaluation period that are still outstanding and continuing to provide benefit to the community. Prior period and current period investments total $69.5 million or 10.8 percent of allocated Tier 1 Capital, after considering the $182 million in deposits not originated from the assessment area. The majority of current period investments are innovative or complex with LIHTCs representing approximately $40.2 million or 64 percent of the investment dollars.

Examples of community development investments include:

- The bank made annual contributions to Midlands Housing Trust Fund (MHTF) totaling $91,000. MHTF works to create and preserve quality affordable housing for low- and moderate-income households in the Midlands region of South Carolina. Older dilapidated and vacant housing stock characterizes the region. The MHTF operates a revolving loan fund that lends to housing developers for the creation of affordable housing in the region.

- The bank invested nearly $9.8 million in a Section 42 LIHTC Fund that indirectly invests in qualifying LIHTC properties located throughout the U.S. This investment provides construction financing for Arcadia Park, a 60-unit affordable housing development in Columbia, SC. All units are restricted to incomes at or below 60 percent of the area median income.

- The bank provided $8.2 million in LIHTC funding for the construction of Village at River's Edge, a 124-unit affordable housing development in Columbia, SC. The developer has restricted all units to renters with incomes at or below 60 percent of the area median income and Section 8 project-based Housing Assistance Payment contracts will cover the units.

(*) 'Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.

(**) 'Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the bank's financial reporting system.

Conclusions for Areas Receiving Limited-Scope Reviews

Investment Test performance in the Greenville-Anderson-Mauldin, SC MSA, Spartanburg, SC MSA, and South Carolina Non-MSA is consistent with the Outstanding Investment Test performance in the state of South Carolina. Investment Test performance in the Hilton Head Island-Bluffton-Beaufort, SC MSA is weaker than the overall Outstanding Investment Test performance in the state of South Carolina primarily due to lower levels of CD investments relative to the bank's size and resources in the assessment area.

SERVICE TEST

Conclusions for Areas Receiving Full-Scope Reviews

Bank of America's performance under the Service Test in the state of South Carolina is rated Low Satisfactory. Service Test performance is adequate in the Charleston-North Charleston, SC MSA and adequate in the Columbia, SC MSA. Performance in limited-scope assessment areas has a neutral effect on the state rating.

Retail Banking Services

Refer to Table C for the facts and data used to evaluate the accessibility of the bank's retail banking services.

Charleston-North Charleston, SC MSA

In the Charleston-North Charleston, SC MSA, the bank's service delivery systems are accessible to geographies and individuals of different income levels. Examiners based this conclusion on a comparison of the distribution of the bank's 16 financial centers with the distribution of the population. The bank has no financial centers in low-income geographies where 4 percent of the population lives. The bank has six financial centers or 37.5 percent of its financial centers located in moderate-income geographies where 22.8 percent of the population lives.

Examiners also considered the bank's alternative delivery systems, including ATMs, and telephone, online, mobile, and text banking in evaluating accessibility to the bank's products and services. The bank demonstrated customer usage of ADS through income proxies based on customers' residency. With cash-dispensing ATMs, full-service ATMs, and text banking, the percentage of customers in low- and moderate-income geographies using the platform exceeded the overall percentage of the population in low- and moderate-income geographies. Based on customer usage, alternative delivery systems have a significantly positive effect on the accessibility of the bank's service delivery systems to low- and moderate-income individuals and geographies.

The bank has two financial centers in middle- and upper-income census tracts that are adjacent to or in very close proximity to moderate-income census tracts. The adjacent financial centers help improve access to retail banking services to individuals in moderate-income geographies.

Financial center openings and closings did adversely affect the accessibility of retail banking services, particularly in low-income geographies and to low- and moderate-income individuals. During the evaluation period, the bank closed two financial centers, which included its only financial center in a low-income geography and one in a moderate-income geography.

Banking products and services do not vary in a way that inconveniences the assessment area, particularly in low- and moderate-income geographies or to low- and moderate-income individuals. The bank offers a full range of products and services. Hours of operation are consistent throughout the assessment areas. Financial centers are open 9:00 am to 5:00 pm Monday through Thursday, 9:00 am to 6:00 pm Friday, and six of the financial centers are open 9:00 am to 1:00 pm Saturday.

Columbia, SC MSA

In the Columbia, SC MSA, the bank's service delivery systems are accessible to geographies and individuals of different income levels. Examiners based this conclusion on a comparison of the distribution of the bank's 17 financial centers with the distribution of the population. The bank has no financial centers in low-income geographies where 3.6 percent of the population lives. The bank has three financial centers or 17.6 percent of its financial centers located in moderate-income geographies where 27.8 percent of the population lives.

Examiners also considered the bank's alternative delivery systems, including ATMs, and telephone, online, mobile, and text banking in evaluating accessibility to the bank's products and services. Based on customer usage, alternative delivery systems have no material effect on the accessibility of the bank's service delivery systems to low- and moderate-income individuals and geographies.

The bank has seven financial centers in middle- and upper-income census tracts that are adjacent to or in very close proximity to low- and moderate-income census tracts. Two of the financial centers provide additional access to retail banking services in low-income geographies and five financial centers provide additional access in moderate-income geographies.

Financial center openings and closings did not adversely affect the accessibility of retail banking services, particularly in low- and moderate-income geographies or to low- and moderate-income individuals. During the evaluation period, the bank closed four financial centers. The closures were in middle- and upper-income geographies.

Banking products and services do not vary in a way that inconvenience the assessment area, particularly in low- and moderate-income geographies or to low- and moderate-income individuals. The bank offers a full range of products and services. Hours of operation are generally consistent throughout the assessment area. Financial centers are open 9:00 am to 5:00 pm Monday through Friday and 9:00 am to 6:00 pm Friday. All financial centers, except four, are open 9:00 am to 1:00 pm Saturday.

Community Development Services

Charleston-North Charleston, SC MSA

The bank is a leader in providing community development services in the MSA. During the evaluation period, the bank participated with community development organizations to provide 115 community development services targeted to low- and moderate-income individuals. Employees provided homebuyer education workshops to 71 low- and moderate-income individuals, and provided 4 financial education workshops and 20 foreclosure prevention workshops for 161 individuals. Attendees to the financial education workshops were primarily students from low- and moderate-income families. Employees participated in 16 webinars and workshops with non-profit organizations to help the organizations with capacity building. In addition, four employees served on the boards or committees of community organizations. The types of CD services provided are responsive to the needs identified in the community.

Columbia, SC MSA

The bank is a leader in providing community development services in the MSA. During the evaluation period, the bank participated with community development organizations to provide 38 community development services targeted to low- and moderate-income individuals. Employees provided homebuyer education workshops to 31 low- and moderate-income individuals, and provided 4 financial education workshops for 105 individuals. Attendees to the financial education workshops were primarily students from low- and moderate-income families. Employees participated in 28 webinars and workshops with non-profit organizations to help the organizations with capacity building. In addition, 25 employees served on the boards or committees of community organizations. The types of CD services provided are responsive to the needs identified in the community.

Conclusions for Areas Receiving Limited-Scope Reviews

Service Test performance in the Greenville-Anderson-Mauldin, SC MSA and Spartanburg, SC MSA is stronger than the overall Low Satisfactory Service Test performance in the state of South Carolina. Performance is stronger primarily due to retail banking services that are more accessible, particularly in low-income geographies. Service Test performance in the Hilton Head Island-Bluffton-Beaufort, SC MSA and South Carolina Non-MSA is weaker than the overall Low Satisfactory Service Test performance in the state of South Carolina. Performance is weaker primarily due to limited access to retail banking services in low-income geographies.

State of Tennessee

CRA Rating for Tennessee[43]: **Outstanding**
The Lending Test is rated: Outstanding
The Investment Test is rated: High Satisfactory
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Excellent volume of loans originated or purchased within the assessment areas;
- Good distribution of loans by geography and excellent distribution of loans by borrower income or business revenue size;
- Relatively low level of CD lending that has a neutral effect on overall lending performance;
- Good level and responsiveness of qualified investments; and
- Readily accessible service delivery systems to low- and moderate-income geographies and individuals.

Description of Institution's Operations in Tennessee

The state of Tennessee is Bank of America's 19th largest rating area based on its deposits in the state. As of June 30, 2016, the bank maintained approximately $10.9 billion or 0.9 percent of its total domestic deposits in financial centers within the state of Tennessee. Of the 207 depository financial institutions operating in the state of Tennessee, Bank of America, with a deposit market share of 7.9 percent, is the fourth largest. Competitors with deposit market shares greater than 5 percent include First Tennessee Bank (14.3 percent), Regions Bank (12.9 percent), SunTrust Bank (9.7 percent), and Pinnacle Bank (5.3 percent). As of December 31, 2016, Bank of America operated 58 financial centers and 182 deposit-taking ATMs in Tennessee.

Examiners use the bank's deposit volume as an indicator of its capacity to lend and invest in its assessment areas. In some cases, not all deposits originated from the local community. In the Nashville-Davidson-Murfreesboro-Franklin, TN MSA, Bank of America reported an additional $2.3 billion in deposits of national corporations, in which the funds originated from communities across the nation and deposited in financial centers near the headquarters of these large corporations. Adjusting the bank's total deposits in the MSA by excluding these external deposits from the local deposit base gives a more accurate indicator of the bank's capacity in the assessment area.

---

[43] For institutions with branches in two or more states in a multistate metropolitan area, this statewide evaluation does not reflect performance in the parts of this state contained within the multistate metropolitan area. Refer to the multistate metropolitan area rating and discussion for the rating and evaluation of the institution's performance in that area.

Refer to the community profiles for the state of Tennessee in appendix C for detailed demographics and other performance context information for assessment areas that received full-scope reviews.

Scope of Evaluation in Tennessee

Examiners selected two assessment areas for full-scope reviews and the remaining three assessment areas for limited-scope reviews. The full-scope assessment areas were the Memphis, TN MSA and Nashville-Davidson-Murfreesboro-Franklin, TN MSA. While the Nashville-Davidson-Murfreesboro-Franklin, TN MSA carries approximately 77 percent weight of the overall conclusions based on the bank's presence there relative to all assessment areas in Tennessee, examiners based the conclusions and ratings for the state on the activities within all assessment areas. During the evaluation period, Bank of America originated or purchased 19,992 home mortgage loans totaling $3.4 billion, 18,176 small loans to businesses totaling $520.4 million, 122 small loans to farms totaling $871,000, and 14 CD loans totaling $29.8 million. Lending volumes include loans originated or purchased in the Johnson City, TN MSA and the counties of Greene, Humphreys, Lawrence, Marshall, and White, which the bank no longer designates as assessment areas due to the bank's closure or sale of all financial centers and deposit-taking ATMs in those communities. Based on loan volume, examiners weighted home mortgage loans, representing 52.2 percent of the volume, the most followed by small loans to businesses at 47.5 percent, and small loans to farms at less than 1 percent.

Only in the Nashville-Davidson-Murfreesboro-Franklin, TN MSA did the bank originate or purchase a sufficient volume of small loans to farms to provide any meaningful analysis.

The OCC interviewed four community based organizations and local government agencies. The interviewees identified affordable housing, employment, and community services as the most pressing needs of the communities.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN TENNESSEE

LENDING TEST

Conclusions for Areas Receiving Full-Scope Reviews

Bank of America's performance under the Lending Test in the state of Tennessee is rated Outstanding, based on excellent lending activity, good geographic distribution, and excellent borrower income distribution. Performance in limited-scope assessment areas has a neutral effect on the state rating.

Lending Activity

Based on total lending volume in Table 1, peer deposit and loan data for 2016, and relevant performance context considerations, the bank's lending activity in the state of Tennessee is excellent. Lending activity is excellent in each of the assessment areas, including the limited-scope assessment areas.

Memphis, TN MSA

Lending activity in the Memphis, TN MSA is excellent. Based on FDIC deposit data as of June 30, 2016, Bank of America has a deposit market share of 5.1 percent. The bank ranks fourth among 37 depository financial institutions, which places it in the top 11 percent of institutions. According to peer mortgage data for 2016, the bank has a market share of 1.5 percent based on the number of home mortgage loans originated or purchased. The bank ranks 17th among 457 home mortgage lenders, which places it in the top 4 percent of lenders competing for loans. According to peer small business data for 2016, the bank has a 5 percent market share of small loans to businesses based on the number of small loans to businesses originated or purchased. The bank ranks fourth among 120 small business lenders, which places it in the top 4 percent of lenders in the MSA. According to peer farm data for 2016, the bank has a market share of 3 percent based on the number of small loans to farms originated or purchased. The bank ranks eighth among 17 farm lenders, which places it in the top 48 percent of lenders. Considering the bank's higher ranking among all lenders for home mortgage loans and small loans to businesses relative to its ranking for deposits, overall lending activity is excellent.

Nashville-Davidson-Murfreesboro-Franklin, TN MSA

Lending activity in the Nashville-Davidson-Murfreesboro-Franklin, TN MSA is excellent. Based on FDIC deposit data as of June 30, 2016, the bank has a deposit market share of 16.2 percent. The bank ranks first among 65 depository financial institutions, which places it in the top 2 percent of institutions in the MSA. Excluding the $2.3 billion in corporate deposits derived from outside the assessment area, the bank's deposit market share declines to 12.4 percent, placing it in the top 3 percent of depository financial institutions. According to peer mortgage data for 2016, the bank has a market share of 1.7 percent based on the number of home mortgage loans originated or purchased. The bank ranks 17th among 719 home mortgage lenders, which places it in the top 3 percent of lenders. According to peer small business data for 2016, the bank has a 7 percent market share of small loans to businesses based on the number of small loans to businesses originated or purchased. The bank ranks fifth among 151 small business lenders, which places it in the top 4 percent of lenders. For small loans to farms, the bank has a market share of 2.2 percent based on the number of small loans to farms originated or purchased. The bank ranks 10th among 29 farm lenders, which places it in the top 35 percent of lenders. Considering the bank's deposits and deposit market share include $2.3 billion in deposits not derived from the MSA along with the higher ranking for home mortgage loans and small loans to businesses relative to its deposit ranking, overall lending activity is excellent.

(*) Loan data as of December 31, 2016. Rated area refers to either the state or multi-state MSA rating area.
(**) The evaluation period for Community Development Loans is January 1, 2012 to December 31, 2016.
(***) Deposit data as of June 30, 2016. Rated area refers to either the state or multi-state MSA as appropriate.

Distribution of Loans by Income Level of the Geography

The bank's geographic distribution of loans reflects good penetration in low- and moderate-income geographies. For this analysis, examiners compared the bank's HMDA-reportable loan originations and purchases, small loans to businesses, and small loans to farms with available demographic information. Examiners also considered any relevant performance context information and aggregate lending data.

Home Mortgage Loans

Refer to Table O for the facts and data used to evaluate the geographic distribution of the bank's originations/purchases of home mortgage loans.

The overall geographic distribution of home mortgage loans is good. The distribution is good in the Memphis, TN MSA and Nashville-Davidson-Murfreesboro-Franklin, TN MSA.

Memphis, TN MSA

The geographic distribution of home mortgage loans in the Memphis, TN MSA is good. Performance is adequate in low-income geographies and good in moderate-income geographies. The distribution of home mortgage loans in low-income geographies at 4 percent is lower than the 9.4 percent of owner-occupied housing units in low-income geographies, but is higher than the 2.6 percent performance for aggregate lenders. The distribution in moderate-income geographies at 13 percent is lower than the 18.2 percent of owner-occupied housing units in moderate-income geographies, but is higher than the 7.7 percent for aggregate lenders.

Nashville-Davidson-Murfreesboro-Franklin, TN MSA

The geographic distribution of home mortgage loans in the Nashville-Davidson-Murfreesboro-Franklin, TN MSA is good. Performance is good in low-income geographies and adequate in moderate-income geographies. The distribution of home mortgage loans in low-income geographies at 3 percent is lower than the 3.3 percent of owner-occupied housing units in low-income geographies and it is lower than the 3.4 percent performance for aggregate lenders. The distribution in moderate-income geographies at 10.4 percent is lower than the 17.3 percent of owner-occupied housing units in moderate-income geographies and it is lower than the 13.5 percent performance for aggregate lenders.

Small Loans to Businesses

Refer to Table Q for the facts and data used to evaluate the geographic distribution of the bank's originations/purchases of small loans to businesses.

The overall geographic distribution of small loans to businesses is excellent. The distribution is excellent in the Memphis, TN MSA and Nashville-Davidson-Murfreesboro-Franklin, TN MSA.

Memphis, TN MSA

The geographic distribution of small loans to businesses in the Memphis, TN MSA is excellent. Performance is good in low-income geographies and excellent in moderate-income geographies. The distribution in low-income geographies at 8.2 percent is lower than the 10.7 percent of businesses in low-income geographies, but it is higher than the 7.9 percent performance for aggregate lenders. The distribution in moderate-income geographies at 17 percent is lower than the 18.8 percent of businesses in moderate-income geographies, but it is higher than the 15.8 percent performance for aggregate lenders.

Nashville-Davidson-Murfreesboro-Franklin, TN MSA

The geographic distribution of small loans to businesses in the Nashville-Davidson-Murfreesboro-Franklin, TN MSA is excellent. The distribution is good in low-income geographies and excellent in moderate-income geographies. The geographic distribution in low-income geographies at 7.1 percent is slightly higher than the 6.9 percent of businesses in low-income geographies and it is slightly higher than the 6.9 percent performance for aggregate lenders. The geographic distribution in moderate-income geographies at 20 percent is slightly lower than the 20.2 percent of businesses in moderate-income geographies, but is higher than the 18.5 percent performance of aggregate lenders.

Small Loans to Farms

Refer to Table S for the facts and data used to evaluate the geographic distribution of the bank's originations/purchases of small loans to farms.

The overall geographic distribution of small loans to farms is good. The distribution is good in the Memphis, TN MSA and Nashville-Davidson-Murfreesboro-Franklin, TN MSA.

Memphis, TN MSA

The geographic distribution of small loans to farms in the Memphis, TN MSA is good, based on poor performance in low-income geographies and excellent performance in moderate-income geographies. The geographic distribution in low-income geographies at 0 percent is lower than the 5.9 percent of farms in low-income geographies and it is lower than the 3 percent for aggregate lenders. The geographic distribution in moderate-income geographies at 14.3 percent is comparable to the 14.4 percent of farms in moderate-income geographies and it is higher than the 10.2 percent for aggregate lenders.

Nashville-Davidson-Murfreesboro-Franklin, TN MSA

The geographic distribution of small loans to farms in the Nashville-Davidson-Murfreesboro-Franklin, TN MSA is good, based on excellent performance in low-income geographies and poor performance in moderate-income geographies. The geographic distribution in low-income geographies at 10 percent is higher than the 2.2 percent of farms in low-income geographies and it is higher than the 0.7 percent for aggregate lenders. The geographic distribution in moderate-income geographies at 12.1 percent is lower than the 19.7 percent of farms in moderate-income geographies and it is significantly lower than the 37.1 percent for aggregate lenders.

Lending Gap Analysis

For areas receiving full-scope reviews, examiners noted no conspicuous or unexplained gaps in lending in low- and moderate-income geographies.

Inside/Outside Ratio

See the “Inside/Outside Ratio” section within the overall Scope of Evaluation.

Distribution of Loans by Income Level of the Borrower

The bank’s distribution of loans by borrower income and revenue size is excellent. For this analysis, examiners compared the bank’s HMDA-reportable loan originations and purchases, small business, and small farm lending with available demographic information. Examiners also considered any relevant performance context information and aggregate lending data.

Home Mortgage Loans

Refer to Table P for the facts and data used to evaluate the borrower distribution of the bank’s home mortgage loan originations and purchases.

The overall distribution of home mortgage loans by borrower income is excellent. The distribution is good in the Memphis, TN MSA and excellent in the Nashville-Davidson-Murfreesboro-Franklin, TN MSA.

Memphis, TN MSA

The distribution of home mortgage loans by borrower income in the Memphis, TN MSA is good. The distribution is adequate to low-income borrowers and it is excellent to moderate-income borrowers. The proportion of the bank’s home mortgage loans to low-income borrowers at 9.1 percent is lower than the 24.7 percent of low-income families in the MSA; however, the bank’s performance is significantly higher than the 3.1 percent for aggregate lenders. The proportion of home mortgage loans to moderate-income borrowers at 17.6

percent is higher than the 16 percent of moderate-income families and it is higher than the 10.7 percent performance for aggregate lenders.

Nashville-Davidson-Murfreesboro-Franklin, TN MSA

The distribution of home mortgage loans by borrower income in the Nashville-Davidson-Murfreesboro-Franklin, TN MSA is excellent. The distribution is good to low-income borrowers and it is excellent to moderate-income borrowers. The proportion of the bank's home mortgage loans to low-income borrowers at 11.2 percent is lower than the 20.5 percent of low-income families in the MSA; however, it is significantly higher than the 5.5 percent performance for aggregate lenders. The proportion of loans to moderate-income borrowers at 18.5 percent slightly exceeds the 18 percent of moderate-income families in the MSA and it exceeds the 16.2 percent performance for aggregate lenders.

Small Loans to Businesses

Refer to Table R for the facts and data used to evaluate the borrower distribution of the bank's originations and purchases of small loans to businesses.

The distribution of small loans to businesses with gross annual revenues of $1 million or less is good overall. The distribution is good in the Memphis, TN MSA and good in the Nashville-Davidson-Murfreesboro-Franklin, TN MSA. The bank did not collect or consider the gross annual revenues in the underwriting of approximately 31 percent of its small loans to businesses.

Memphis, TN MSA

The distribution of small loans to businesses with gross annual revenues of $1 million or less in the Memphis, TN MSA is good. Based on businesses with known revenues, the proportion of the bank's small loans to businesses at 56.2 percent is lower than the 73.9 percent of businesses with gross annual revenues of $1 million or less. Considering the bank's distribution is stronger than the 43.7 percent for aggregate lenders, overall performance is good.

Nashville-Davidson-Murfreesboro-Franklin, TN MSA

The distribution of small loans to businesses with gross annual revenues of $1 million or less in the Nashville-Davidson-Murfreesboro-Franklin, TN MSA is good. Based on businesses with known revenues, the proportion of the bank's small loans to businesses at 59.7 percent is lower than the 76.4 percent of businesses with gross annual revenues of $1 million or less. Considering the bank's distribution is stronger than the 46.3 percent for aggregate lenders, overall performance is good.

Small Loans to Farms

Refer to Table T for the facts and data used to evaluate the borrower distribution of the bank's originations and purchases of small loans to farms.

The distribution of small loans to farms with gross annual revenues of $1 million or less is adequate. The distribution is adequate in the Memphis, TN MSA and adequate in the Nashville-Davidson-Murfreesboro-Franklin, TN MSA. The bank did not collect or consider the gross annual revenues in the underwriting of approximately 39 percent of its small loans to farms.

Memphis, TN MSA

The distribution of small loans to farms with gross annual revenues of $1 million or less in the Memphis, TN MSA is adequate. Based on farms with known revenues, the proportion of the bank's small loans to farms at 50 percent is lower than the 94.6 percent of farms with gross annual revenues of $1 million or less. The bank's distribution is also lower than the 51.5 percent for aggregate lenders.

Nashville-Davidson-Murfreesboro-Franklin, TN MSA

The distribution of small loans to farms with gross annual revenues of $1 million or less in the Nashville-Davidson-Murfreesboro-Franklin, TN MSA is adequate. Based on farms with known revenues, the proportion of the bank's small loans to farms at 57.6 percent is lower than the 96.8 percent of farms with gross annual revenues of $1 million or less. The bank's distribution is also lower than the 62.7 percent for aggregate lenders.

Community Development Lending

CD lending has a neutral effect overall on the bank's Lending Test performance in the state of Tennessee.

Memphis, TN MSA

In the Memphis, TN MSA, CD lending has a negative effect on lending performance in the assessment area. During the five-year evaluation period, Bank of America did not originate any CD loans.

Nashville-Davidson-Murfreesboro-Franklin, TN MSA

In the Nashville-Davidson-Murfreesboro-Franklin, TN MSA, CD lending has a neutral effect on lending performance in the assessment area. During the evaluation period, the bank originated eight CD loans totaling $13.1 million that mostly helped provide 96 units of affordable housing. CD lending represents 1.7 percent of the allocated Tier 1 Capital, after considering $2.3 billion in deposits from national corporations in which the deposits did not derive from the local community.

Examples of significant CD loans include:

- The bank provided $3.5 million in construction financing to develop Dickson Gardens Apartments, a 48-unit affordable multifamily housing project in Dickson, TN for seniors. All units are restricted to incomes at or below 60 percent of the area median income. The bank also provided a $1.7 million loan to extend the construction loan by six months.

- The bank provided two three-month extensions of a $1.7 million construction loan to develop the Gallatin Park Apartments, a 48-unit LIHTC development for families located in Gallatin, TN. All units are restricted to incomes at or below 60 percent of the area median income.

Product Innovation and Flexibility

Bank of America offers various national and local flexible lending programs that have benefitted borrowers during the evaluation period. These include programs such as America's Home Grant, Affordable Loan Solutions, and Business Advantage Credit Line. The bank also participates with multiple organizations that provide flexible lending through NACA and other affordable housing programs. Within the state of Tennessee, lending under the MHA and HARP programs accounted for 74 percent of the dollar volume of all loans under flexible lending programs.

Conclusions for Areas Receiving Limited-Scope Reviews

Lending Test performance in the Chattanooga, TN MSA, Clarksville, TN MSA, and Knoxville, TN MSA is weaker than the overall Outstanding Lending Test performance in the state of Tennessee primarily due to weaker geographic distributions.

INVESTMENT TEST

Conclusions for Areas Receiving Full-Scope Reviews

Refer to Table 14 for the facts and data used to evaluate the bank's level of qualified investments.

Bank of America's performance under the Investment Test in the state of Tennessee is rated High Satisfactory. Investment performance is poor in the Memphis, TN MSA and excellent in the Nashville-Davidson-Murfreesboro-Franklin, TN MSA. Performance in limited-scope assessment areas has a positive effect on the state rating.

Memphis, TN MSA

In the Memphis, TN MSA, Bank of America has a poor level of CD investments. The bank made 27 CD investments during the evaluation period totaling $6.7 million. Approximately $3.7 million or 55 percent of the current period investment dollars supported 313 units of affordable housing and approximately $3 million or 45 percent supported community development services. In addition, the bank has 11 CD investments totaling $2.3 million it made during a prior evaluation period that are still outstanding and continuing to provide benefit to the community. Prior period and current period investments total $9.1 million or 5.6 percent of allocated Tier 1 Capital. Current period investments are generally neither innovative nor complex, which consisted mostly of investments in CDFIs and mortgage-backed securities. Investments in more complex LIHTCs represented approximately $2.7 million or 40 percent of the investment dollars.

Examples of community development investments include:

- The bank invested $2.5 million in a national LIHTC fund, which owns a portfolio of 11 LIHTC properties. The investment amount represents the funding allocated to Southwind Lakes, a newly constructed 200-unit multifamily affordable housing development located in Memphis, TN. Units are restricted to families with incomes at or below 60 percent of the area median income.

- The bank made a $2.5 million deposit in Citizens Savings Bank and Trust (CSBT), a certified CDFI and minority depository institution. CSBT is one of the nation’s oldest minority-owned banking institutions serving economically distressed communities. This amount represents CSBT’s program that supports new lending and investment opportunities within CSBT’s Memphis market.

- The bank invested nearly $200,000 in the National Federation of Community Development Credit Unions (the Federation). The Federation is a CDFI with a mission to help low- and moderate-income individuals and communities achieve financial independence through Community Development Credit Unions (CDCUs). This investment represents the allocated portion of a larger $1.5 million commitment to the Federation. All CDCUs have a National Credit Union Association (NCUA) low-income designation, where a majority of members earns at or below 80 percent of the median family income.

Nashville-Davidson-Murfreesboro-Franklin, TN MSA

In the Nashville-Davidson-Murfreesboro-Franklin, TN MSA, the bank has an excellent level of CD investments. The bank made 206 CD investments during the evaluation period totaling $103.5 million. Approximately $77.6 million or 75 percent of the current period investment dollars supported 650 units of affordable housing. In addition, the bank has 87 CD investments totaling $8.5 million it made during a prior evaluation period that are still outstanding and continuing to provide benefit to the community. Prior period and current period investments total $112 million or 14.6 percent of allocated Tier 1 Capital, after considering the $2.3 billion in deposits that did not originate from the assessment area. The majority of current period investments are neither innovative nor complex with mortgage-backed securities representing approximately $76.8 million or 74 percent of the investment dollars.

Examples of community development investments include:

- The bank provided $200,000 in grants to Project Return, an organization with a mission to provide services to and connect former inmates with resources needed to successfully return to work and the community after incarceration.

- The bank recorded $22.5 million in investments representing an annual renewal of a $5 million deposit in CSBT. CSBT is one of the nation’s oldest minority-owned banking institutions serving economically distressed communities. The funds support CSBT’s program for lending and investing opportunities within Nashville, TN. In 2014, the bank allocated $2.5 million of the renewal amount to the Memphis, TN MSA.

TENNESSEE	158	17,926	355	121,405	513	139,331	100.00		2	1,354

(*) 'Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
(**) 'Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the bank's financial reporting system.

Conclusions for Areas Receiving Limited-Scope Reviews

Investment Test performance varied across the limited-scope assessment areas. Performance in the Chattanooga, TN MSA, Clarksville, TN MSA, and Knoxville, TN MSA is weaker than the overall High Satisfactory Investment Test performance in the state of Tennessee. Performance is weaker primarily due to lower levels of investments relative to the bank's capacity in those assessment areas.

SERVICE TEST

Conclusions for Areas Receiving Full-Scope Reviews

Bank of America's performance under the Service Test in the state of Tennessee is rated Outstanding. Service Test performance in the Memphis, TN MSA is adequate. However, the excellent Service Test performance in the Nashville-Davidson-Murfreesboro-Franklin, TN MSA primarily drives the overall conclusion. Performance in limited-scope assessment areas has a neutral effect on the state rating.

Retail Banking Services

Refer to Table C for the facts and data used to evaluate the accessibility of the bank's retail banking services.

Memphis, TN MSA

In the Memphis, TN MSA, the bank's service delivery systems are reasonably accessible to geographies and individuals of different income levels. Examiners based this conclusion on a comparison of the distribution of the bank's 14 financial centers with the distribution of the population. The bank has no financial centers in low-income geographies where 15.3 percent of the population lives. The bank has six financial centers or 43 percent of its financial centers located in moderate-income geographies where 22.1 percent of the population lives.

Examiners also considered the bank's alternative delivery systems, including ATMs, and telephone, online, mobile, and text banking in evaluating accessibility to the bank's products and services. Based on customer usage, alternative delivery systems have no effect on the retail banking services conclusion.

The bank has four financial centers in middle- and upper-income census tracts that are adjacent to or in very close proximity to low- and moderate-income census tracts. Two of the financial centers are adjacent to low-income geographies where no financial centers are located. The adjacent financial centers help improve access to retail banking services to individuals in low- and moderate-income geographies.

Financial center openings and closings did not adversely affect the accessibility of retail banking services, particularly in low- and moderate-income geographies or to low- and moderate-income individuals. During the evaluation period, the bank closed three financial centers: two in middle-income geographies and one in an upper-income geography.

Banking products and services do not vary in a way that inconveniences the assessment area, particularly in low- and moderate-income geographies or to low- and moderate-income individuals. The bank offers a full range of products and services. Hours of operation are more restrictive in moderate-income geographies. Financial centers are generally open 9:00 am to 4:00 pm Monday through Thursday, 9:00 am to 5:00 pm Friday, and 9:00 am to 12:00 pm Saturday. Three of the five financial centers (60 percent), closed for Saturday banking, are located in moderate-income geographies, representing 50 percent of the financial centers in moderate-income geographies.

Nashville-Davidson-Murfreesboro-Franklin, TN MSA

In the Nashville-Davidson-Murfreesboro-Franklin, TN MSA, the bank's service delivery systems are readily accessible to geographies and individuals of different income levels. Examiners based this conclusion on a comparison of the distribution of the bank's 32 financial centers with the distribution of the population. The bank has 5 financial centers or 15.6 percent of all financial centers in low-income geographies where 6.8 percent of the population lives. The bank also has five financial centers or 15.6 percent of its financial centers located in moderate-income geographies where 20.9 percent of the population lives.

Examiners also considered the bank's alternative delivery systems, including ATMs, and telephone, online, mobile, and text banking in evaluating accessibility to the bank's products and services. Based on customer usage, alternative delivery systems have a significantly positive effect on the accessibility of the bank's service delivery systems to low- and moderate-income individuals and geographies. The proportions of customers in low- and moderate-income geographies using online, telephone, mobile, and text banking are near the proportion of the population in low- and moderate-income geographies. Cash dispensing and full-service ATM usage by customers in low- and moderate-income geographies exceeds the proportion of the population in low- and moderate-income geographies.

The bank has 10 financial centers in middle- and upper-income census tracts that are adjacent to or in very close proximity to low- and moderate-income census tracts. Three of the financial centers provide additional access to retail banking services in low-income geographies and seven financial centers provide additional access in moderate-income geographies.

Financial center openings and closings did not adversely affect the accessibility of retail banking services, particularly in low- and moderate-income geographies or to low- and moderate-income individuals. During the evaluation period, the bank opened one financial center and closed six. The bank closed one financial center in a low-income geography, two in moderate-income geographies, and the remaining three in middle- and upper-income geographies. Despite the closures, financial centers remain readily accessible to individuals and geographies of different income levels.

Banking products and services do not vary in a way that inconvenience the assessment area, particularly in low- and moderate-income geographies or to low- and moderate-income individuals. The bank offers a full range of products and services. Hours of operation are more restrictive in moderate-income geographies. Financial centers are generally open 9:00 am to 4:00 pm Monday through Thursday, 9:00 am to 5:00 pm Friday, and 9:00 am to 1:00 pm Saturday. All financial centers except four are open for Saturday banking, including one financial center in a low-income census tract and one financial center in a moderate-income census tract.

Community Development Services

Memphis, TN MSA

The bank provides a limited level of community development services in the MSA. During the evaluation period, the bank participated with community development organizations to provide 83 community development services targeted to low- and moderate-income individuals. Employees provided homebuyer education workshops to 69 low- and moderate-income individuals, and provided one foreclosure prevention workshop for 246 individuals. Employees participated in 13 webinars and workshops with non-profit organizations to help the organizations with capacity building. No employees served on the boards or committees of community organizations. The types of CD services provided are responsive to the needs identified in the community.

Nashville-Davidson-Murfreesboro-Franklin, TN MSA

The bank provides a high level of community development services in the MSA. During the evaluation period, the bank participated with community development organizations to provide 69 community development services targeted to low- and moderate-income individuals. Employees provided homebuyer education workshops to 2 low- and moderate-income individuals, and provided 13 financial education workshops and 10 foreclosure prevention workshops for 365 individuals. Attendees to the financial education workshops were primarily students from low- and moderate-income families. Employees participated in 23 webinars and workshops with non-profit organizations to help the organizations with capacity building. In addition, 21 employees served on the boards or committees of community organizations. The types of CD services provided are responsive to the needs identified in the community.

Conclusions for Areas Receiving Limited-Scope Reviews

Service Test performance in the Chattanooga, TN MSA is consistent with the Outstanding Service Test performance in the state of Tennessee. Performance in the Clarksville, TN MSA and Knoxville, TN MSA is weaker than the overall Outstanding Service Test performance in the state of Tennessee primarily due to weaker financial center distributions. Each of these two assessment areas has only four financial centers.

State of Texas

CRA Rating for Texas[44]: **Outstanding**
The Lending Test is rated: Outstanding
The Investment Test is rated: Outstanding
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Excellent volume of loans originated or purchased within the assessment areas;
- Excellent distribution of loans by geography and good distribution of loans by borrower income or business/farm revenue size;
- Relatively high level of CD lending that has a neutral effect on overall lending performance;
- Excellent level and responsiveness of qualified investments; and
- Readily accessible service delivery systems to low- and moderate-income geographies and individuals.

Description of Institution's Operations in Texas

The state of Texas is Bank of America's fourth largest rating area based on its total deposits in the state. As of June 30, 2016, the bank maintained approximately $113.4 billion or 9.4 percent of its total domestic deposits in financial centers within the state of Texas. Of the 533 depository financial institutions operating in the state of Texas, Bank of America, with a deposit market share of 14.8 percent, is the second largest. The largest banking institution in the state is JPMorgan Chase with $151.4 billion in deposits or 19.7 percent market share. Other large depository financial institutions include third ranked Well Fargo Bank ($71.9 billion of 9.3 percent market share) and fourth ranked USAA Federal Savings Bank ($67.6 billion or 8.8 percent market share). The remaining depository financial institutions each have less than 5 percent market share. As of December 31, 2016, Bank of America operated 385 full-service financial centers and 1,372 deposit-taking ATMs in the state.

Examiners use the bank's deposit volume as an indicator of its capacity to lend and invest in its assessment areas. In some cases, not all deposits originated from the local community. In the Dallas-Fort Worth-Arlington, TX MSA, Bank of America reported an additional $9.8 billion in deposits of national corporations, in which the funds originated from communities across the nation and deposited in financial centers near the headquarters of these large corporations. Adjusting the bank's total deposits in the MSA by excluding these external deposits from the

[44] For institutions with branches in two or more states in a multistate metropolitan area, this statewide evaluation does not reflect performance in the parts of this state contained within the multistate metropolitan area. Refer to the multistate metropolitan area rating and discussion for the rating and evaluation of the institution's performance in that area.

local deposit base gives a more accurate indicator of the bank's capacity in the assessment area.

Refer to the community profiles for the state of Texas in appendix C for detailed demographics and other performance context information for assessment areas that received full-scope reviews.

Scope of Evaluation in Texas

Examiners selected four assessment areas for full-scope reviews and the remaining 19 assessment areas for limited-scope reviews. The full-scope assessment areas selected included the Austin-Round Rock, TX MSA, Dallas-Fort Worth-Arlington, TX MSA, Houston-The Woodlands-Sugar Land, TX MSA, and San Antonio-New Braunfels, TX MSA. Examiners based the conclusions and ratings on the activities within all assessment areas. During the evaluation period, Bank of America originated or purchased 97,400 home mortgage loans totaling $18.7 billion, 149,027 small loans to businesses totaling $4.2 billion, 1,174 small loans to farms totaling $20.4 million, and 120 CD loans totaling $881 million. Lending volumes include loans originated or purchased in the Longview, TX MSA, Sherman-Denison, TX MSA, and Texas Non-MSA (counties of Angelina, Brown, Dallam, Franklin, Moore, Navarro, Titus, Uvalde, and Walker). The bank no longer designates these communities as assessment areas due to the bank's closure or sale of all financial centers and deposit-taking ATMs in those communities. Based on loan volume, examiners weighted small loans to businesses, representing 60 percent of the volume, the heaviest, followed by home mortgage lending (39 percent of volume), and small loans to farms (0.5 percent).

The OCC interviewed 14 community based organizations and local government agencies serving various housing, employment, and community service needs. The organizations identified affordable owner-occupied and rental housing, funding to acquire land to construct new home developments, down-payment and closing cost assistance, financial literacy, and economic development as some of the most pressing needs.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN TEXAS

LENDING TEST

Conclusions in the state of Texas

Bank of America's performance under the Lending Test in the state of Texas is rated Outstanding, based on excellent lending activity, excellent geographic distribution, and good borrower income distribution. CD lending has no effect on the overall Lending Test performance. Performance in limited-scope assessment areas has a neutral effect on the state rating.

Lending Activity

Based on total lending volume in Table 1, peer deposit and loan data for 2016, and relevant performance context considerations, the bank's lending activity in the state of Texas is excellent. Lending activity is excellent in the Austin-Round Rock, TX MSA, Dallas-Fort Worth-Arlington, TX MSA, Houston-The Woodlands-Sugar Land, TX MSA, and San Antonio-New Braunfels, TX MSA, and good in the. Although the Lending activity varied across the limited-scope assessment areas, the bank's Lending activity was generally consistent with the performance in the full-scope assessment areas.

Austin-Round Rock, TX MSA

Lending activity in the Austin-Round Rock, TX MSA is excellent. Based on FDIC deposit data as of June 30, 2016, Bank of America has a deposit market share of 19.1 percent. The bank ranks second among 67 depository financial institutions within the assessment area, which places it in the top 3 percent of institutions. According to peer mortgage data for 2016, the bank has a market share of 1.6 percent based on the number of home mortgage loans originated or purchased. The bank ranks 14th among 788 home mortgage lenders, which places it in the top 2 percent of lenders. Based on peer small business data for 2016, the bank has a 7 percent market share of small loans to businesses based on the number of small loans to businesses originated or purchased. The bank ranks fifth among 177 small business lenders in the assessment area, which places it in the top 3 percent of lenders. For small loans to farms, the bank has a market share of 5.7 percent based on the number of small loans to farms originated or purchased. The bank ranks seventh among 28 farm lenders, which places it in the top 25 percent of lenders. Considering the bank's higher ranking among all lenders for home mortgage loans and similar ranking for small loans to businesses relative to its ranking for deposits, overall lending activity is excellent.

Dallas-Fort Worth-Arlington, TX MSA

Lending activity in the Dallas-Fort Worth-Arlington, TX MSA is excellent. Based on FDIC deposit data as of June 30, 2016, Bank of America has a deposit market share of 29.2 percent. The bank ranks first among 147 depository financial institutions within the assessment area, which places it in the top 1 percent of institutions. According to peer mortgage data for 2016, the bank has a market share of 2.3 percent based on the number of home mortgage loans originated or purchased. The bank ranks sixth among 1,021 home mortgage lenders, which places it in the top 1 percent of lenders. Based on peer small business data for 2016, the bank has an 8.1 percent market share of small loans to businesses based on the number of small loans to businesses originated or purchased. The bank ranks fourth among 238 small business lenders in the assessment area, which places it in the top 2 percent of lenders. For small loans to farms, the bank has a market share of 5.7 percent based on the number of small loans to farms originated or purchased. The bank ranks eighth among 54 farm lenders, which places it in the top 15 percent of lenders. Considering the bank's similar ranking among all lenders for home mortgage loans and high ranking for small loans to businesses relative to its ranking for deposits, overall lending activity is excellent.

Houston-The Woodlands-Sugar Land, TX MSA

Lending activity in the Houston-The Woodlands-Sugar Land, TX MSA is excellent. Based on FDIC deposit data as of June 30, 2016, Bank of America has a deposit market share of 9.5 percent. The bank ranks third among 95 depository financial institutions within the assessment area, which places it in the top 4 percent of institutions. According to peer mortgage data for

2016, the bank has a market share of 2.5 percent based on the number of home mortgage loans originated or purchased. The bank ranks fourth among 905 home mortgage lenders, which places it in the top 1 percent of lenders. Based on peer small business data for 2016, the bank has a 7.4 percent market share of small loans to businesses based on the number of small loans to businesses originated or purchased. The bank ranks sixth among 211 small business lenders in the assessment area, which places it in the top 3 percent of lenders. For small loans to farms, the bank has a market share of 6.7 percent based on the number of small loans to farms originated or purchased. The bank ranks sixth among 41 farm lenders, which places it in the top 15 percent of lenders. Considering the bank's higher ranking among all lenders for home mortgage loans and small loans to businesses relative to its ranking for deposits, overall lending activity is excellent.

San Antonio-New Braunfels, TX MSA

Lending activity in the San Antonio-New Braunfels, TX MSA is excellent. Based on FDIC deposit data as of June 30, 2016, Bank of America has a deposit market share of 3.7 percent. The bank ranks fourth among 61 depository financial institutions within the assessment area, which places it in the top 7 percent of institutions. According to peer mortgage data for 2016, the bank has a market share of 1.3 percent based on the number of home mortgage loans originated or purchased. The bank ranks 18th among 694 home mortgage lenders, which places it in the top 3 percent of lenders. Based on peer small business data for 2016, the bank has a 5.7 percent market share of small loans to businesses based on the number of small loans to businesses originated or purchased. The bank ranks sixth among 157 small business lenders in the assessment area, which places it in the top 4 percent of lenders. For small loans to farms, the bank has a market share of 6.4 percent based on the number of small loans to farms originated or purchased. The bank ranks fifth among 27 farm lenders, which places it in the top 19 percent of lenders. Considering the bank's higher ranking among all lenders for home mortgage loans and small loans to businesses relative to its ranking for deposits, overall lending activity is excellent.

Distribution of Loans by Income Level of the Geography

The bank's geographic distribution of loans reflects excellent penetration in low- and moderate-income geographies. For this analysis, examiners compared the bank's HMDA-reportable loan originations and purchases, small loans to businesses, and small loans to farms with available demographic information. Examiners also considered any relevant performance context information and aggregate lending data.

Home Mortgage Loans

Refer to Table O for the facts and data used to evaluate the geographic distribution of the bank's originations/purchases of home mortgage loans.

The overall geographic distribution of home mortgage loans is good. The distribution is good in the Austin-Round Rock, TX MSA, Dallas-Fort Worth-Arlington, TX MSA, Houston-The Woodlands-Sugar Land, TX MSA, and adequate in the San Antonio-New Braunfels, TX MSA.

Austin-Round Rock, TX MSA

The geographic distribution of home mortgage loans in the Austin-Round Rock, TX MSA is good. Performance is good in both low- and moderate-income geographies. The distribution of the bank's home mortgage loans in low-income geographies at 3.1 percent is lower than the 4.3 percent of owner-occupied housing units in low-income geographies, but it is consistent with the performance of aggregate lenders. The distribution in moderate-income geographies at 16.1 percent is also lower than the 18.4 percent of owner-occupied housing units in moderate-income geographies, but is higher than the 15.9 percent performance for aggregate lenders.

Dallas-Fort Worth-Arlington, TX MSA

The geographic distribution of home mortgage loans in the Dallas-Fort Worth-Arlington, TX MSA is good. Performance is adequate in low-income geographies and good in moderate-income geographies. The distribution in low-income geographies at 2.3 percent is lower than the 4.6 percent of owner-occupied housing units in low-income geographies and it is slightly higher than the 1.9 percent performance for aggregate lenders. The distribution in moderate-income geographies at 11.7 percent is lower than the 19.3 percent of owner-occupied housing units in moderate-income geographies, but is higher than the 10.1 percent for aggregate lenders.

Houston-The Woodlands-Sugar Land, TX MSA

The geographic distribution of home mortgage loans in the Houston-The Woodlands-Sugar Land, TX MSA is good. Performance is adequate in low-income geographies and good in moderate-income geographies. The distribution in low-income geographies at 1.9 percent is lower than the 4 percent of owner-occupied housing units in low-income geographies and it is higher than the 1.6 percent performance for aggregate lenders. The distribution in moderate-income geographies at 14 percent is lower than the 21.2 percent of owner-occupied housing units in moderate-income geographies, but is higher than the 10.9 percent performance for aggregate lenders.

San Antonio-New Braunfels, TX MSA

The geographic distribution of home mortgage loans in the San Antonio-New Braunfels, TX MSA is adequate. Performance is adequate in both low- and moderate-income geographies. The distribution in low-income geographies at 2 percent is lower than the 4.2 percent of owner-occupied housing units in low-income geographies, but it is higher than the 1.4 percent performance for aggregate lenders. The distribution in moderate-income geographies at 12.6 percent is lower than the 22.8 percent of owner-occupied housing units in moderate-income geographies, but is higher than the 10.5 percent performance for aggregate lenders.

Small Loans to Businesses

Refer to Table Q for the facts and data used to evaluate the geographic distribution of the bank's originations/purchases of small loans to businesses.

The overall geographic distribution of small loans to businesses is excellent. The distribution is excellent in the Austin-Round Rock, TX MSA, Dallas-Fort Worth-Arlington, TX MSA, Houston-The Woodlands-Sugar Land, TX MSA, and San Antonio-New Braunfels, TX MSA.

Austin-Round Rock, TX MSA

The geographic distribution of small loans to businesses in the Austin-Round Rock, TX MSA is excellent. Performance is good in low-income geographies and excellent in moderate-income geographies. The distribution in low-income geographies at 5.7 percent is lower than the 6.2 percent of businesses in low-income geographies and it is lower than the 6.2 percent performance for aggregate lenders. The distribution in moderate-income geographies at 16.8 percent is lower than the 17.8 percent of businesses in moderate-income geographies, but is consistent with the 16.8 percent performance for aggregate lenders.

Dallas-Fort Worth-Arlington, TX MSA

The geographic distribution of small loans to businesses in the Dallas-Fort Worth-Arlington, TX MSA is excellent. Performance is good in low-income geographies and excellent in moderate-income geographies. The distribution in low-income geographies at 6.6 percent is slightly lower than the 6.9 percent of businesses in low-income geographies and it is slightly lower than the 6.9 percent performance for aggregate lenders. The distribution in moderate-income geographies at 17.9 percent is slightly lower than the 18.6 percent of businesses in moderate-income geographies, but is slightly higher than the 17.6 percent performance for aggregate lenders.

Houston-The Woodlands-Sugar Land, TX MSA

The geographic distribution of small loans to businesses in the Houston-The Woodlands-Sugar Land, TX MSA is excellent. Performance is excellent in both low- and moderate-income geographies. The distribution in low-income geographies at 7.6 percent is slightly lower than the 8 percent of businesses in low-income geographies, but is slightly higher than the 7.5 percent performance for aggregate lenders. The distribution in moderate-income geographies at 18.9 percent is slightly lower than the 19.6 percent of businesses in moderate-income geographies, but is slightly higher than the 18.2 percent performance for aggregate lenders.

San Antonio-New Braunfels, TX MSA

The geographic distribution of small loans to businesses in the San Antonio-New Braunfels, TX MSA is excellent. Performance is good in low-income geographies and excellent in moderate-income geographies. The distribution in low-income geographies at 4.2 percent is slightly lower than the 4.6 percent of businesses in low-income geographies and it is slightly lower than the 4.6 percent performance for aggregate lenders. The distribution in moderate-income geographies at 20 percent is slightly lower than the 20.6 percent of businesses in moderate-income geographies, but is slightly higher than the 18.2 percent performance for aggregate lenders.

Small Loans to Farms

Refer to Table S for the facts and data used to evaluate the geographic distribution of the bank's originations/purchases of small loans to farms.

The overall geographic distribution of small loans to farms is adequate. The distribution is poor in the Austin-Round Rock, TX MSA, adequate in the Dallas-Fort Worth-Arlington, TX MSA, good in the Houston-The Woodlands-Sugar Land, TX MSA, and excellent in the San Antonio-New Braunfels, TX MSA.

Austin-Round Rock, TX MSA

The geographic distribution of small loans to farms in the Austin-Round Rock, TX MSA is poor. Performance is very poor in low-income geographies and good in moderate-income geographies. The distribution in low-income geographies at 0 percent is lower than the 3.7 percent of farms in low-income geographies and it is lower than the 0.9 percent performance for aggregate lenders. The distribution in moderate-income geographies at 15.1 percent is lower than the 20.9 percent of farms in moderate-income geographies and it is lower than the 28.4 percent performance for aggregate lenders.

Dallas-Fort Worth-Arlington, TX MSA

The geographic distribution of small loans to farms in the Dallas-Fort Worth-Arlington, TX MSA is adequate. Performance is very poor in low-income geographies and good in moderate-income geographies. The distribution in low-income geographies at 0 percent is lower than the 4.5 percent of farms in low-income geographies and it is lower than the 3.1 percent performance for aggregate lenders. The distribution in moderate-income geographies at 12.6 percent is lower than the 17.1 percent of farms in moderate-income geographies and it is slightly lower than the 13.2 percent performance for aggregate lenders.

Houston-The Woodlands-Sugar Land, TX MSA

The geographic distribution of small loans to farms in the Houston-The Woodlands-Sugar Land, TX MSA is good. Performance is excellent in low-income geographies and adequate in moderate-income geographies. The distribution in low-income geographies at 4.1 percent is slightly lower than the 4.4 percent of farms in low-income geographies, but is higher than the 1.6 percent performance for aggregate lenders. The distribution in moderate-income geographies at 13.4 percent is lower than the 18.1 percent of farms in moderate-income geographies and it is lower than the 16.6 percent performance for aggregate lenders.

San Antonio-New Braunfels, TX MSA

The geographic distribution of small loans to businesses in the San Antonio-New Braunfels, TX MSA is excellent. Performance is excellent in low-income geographies and good in moderate-income geographies. The distribution in low-income geographies at 4.8 percent is higher than the 2.6 percent of farms in low-income geographies and it is higher than the 1 percent performance for aggregate lenders. The distribution in moderate-income geographies at 13.8 percent is lower than the 14.3 percent of farms in moderate-income geographies and it is lower than the 15.9 percent performance for aggregate lenders.

Lending Gap Analysis

For areas receiving full-scope reviews, examiners noted no conspicuous or unexplained gaps in lending in low- and moderate-income geographies.

Inside/Outside Ratio

See the “Inside/Outside Ratio” section within the overall Scope of Evaluation.

Distribution of Loans by Income Level of the Borrower

The bank’s distribution of loans by borrower income and revenue size is good. For this analysis, examiners compared the bank’s HMDA-reportable loan originations and purchases, small business, and small farm lending with available demographic information. Examiners also considered any relevant performance context information and aggregate lending data.

Home Mortgage Loans

Refer to Table P for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases.

The overall distribution of home mortgage loans by borrower income is good. The distribution is good in the Austin-Round Rock, TX MSA, Dallas-Fort Worth-Arlington, TX MSA, Houston-The Woodlands-Sugar Land, TX MSA, and San Antonio-New Braunfels, TX MSA.

Austin-Round Rock, TX MSA

The distribution of home mortgage loans by borrower income in the Austin-Round Rock, TX MSA is good. The distribution is adequate for low-income borrowers and excellent for moderate-income borrowers. The proportion of the bank's home mortgage loans to low-income borrowers at 8.4 percent is lower than the 21.6 percent of low-income families, but is higher than the 3 percent performance for aggregate lenders. The proportion of loans to moderate-income borrowers at 18.2 percent is higher than the 17.4 percent of moderate-income families and it is higher than the 13.2 percent performance for aggregate lenders.

Dallas-Fort Worth-Arlington, TX MSA

The distribution of home mortgage loans by borrower income in the Dallas-Fort Worth-Arlington, TX MSA is good. The distribution is adequate for low-income borrowers and excellent for moderate-income borrowers. The proportion of the bank's home mortgage loans to low-income borrowers at 7.4 percent is lower than the 22.4 percent of low-income families, but is higher than the 3.1 percent performance for aggregate lenders. The proportion of loans to moderate-income borrowers at 15.9 percent is lower than the 16.9 percent of moderate-income families, but is higher than the 11.3 percent performance for aggregate lenders.

Houston-The Woodlands-Sugar Land, TX MSA

The distribution of home mortgage loans by borrower income in the Houston-The Woodlands-Sugar Land, TX MSA is good. The distribution is adequate for low-income borrowers and excellent for moderate-income borrowers. The proportion of the bank's home mortgage loans to low-income borrowers at 6.9 percent is lower than the 23.7 percent of low-income families, but higher than the 2.4 percent performance for aggregate lenders. The proportion of loans to moderate-income borrowers at 16.9 percent is slightly higher than the 16.5 percent of moderate-income families and it is higher than the 10.6 percent performance for aggregate lenders.

San Antonio-New Braunfels, TX MSA

The distribution of home mortgage loans by borrower income in the San Antonio-New Braunfels, TX MSA is good. The distribution is adequate for low-income borrowers and excellent for moderate-income borrowers. The proportion of the bank's home mortgage loans to low-income borrowers at 7.7 percent is lower than the 22.5 percent of low-income families, but is higher than the 2.8 percent performance for aggregate lenders. The proportion of loans to moderate-income borrowers at 17.6 percent is slightly higher than the 16.9 percent of moderate-income families and it is higher than the 9.2 percent performance for aggregate lenders.

Small Loans to Businesses

Refer to Table R for the facts and data used to evaluate the borrower distribution of the bank's originations/purchases of small loans to businesses.

The distribution of small loans to businesses with gross annual revenues of $1 million or less is good. The distribution is good in the Austin-Round Rock, TX MSA, Dallas-Fort Worth-Arlington, TX MSA, Houston-The Woodlands-Sugar Land, TX MSA, and San Antonio-New Braunfels, TX MSA. The bank did not collect or consider the gross annual revenues in the underwriting of approximately 29 percent of its small loans to businesses.

Austin-Round Rock, TX MSA

The distribution in the Austin-Round Rock, TX MSA is good. Based on businesses with known revenues, the proportion of the bank's small loans to businesses at 59.1 percent is lower than the 77.9 percent of businesses with gross annual revenues of $1 million or less. Considering the bank's distribution is stronger than the 41.3 percent for aggregate lenders, overall performance is good.

Dallas-Fort Worth-Arlington, TX MSA

The distribution in the Dallas-Fort Worth-Arlington, TX MSA is good. Based on businesses with known revenues, the proportion of the bank's small loans to businesses at 59.9 percent is lower than the 78.2 percent of businesses with gross annual revenues of $1 million or less. Considering the bank's distribution is stronger than the 42.4 percent for aggregate lenders, overall performance is good.

Houston-The Woodlands-Sugar Land, TX MSA

The distribution in the Houston-The Woodlands-Sugar Land, TX MSA is good. Based on businesses with known revenues, the proportion of the bank's small loans to businesses at 62.8 percent is lower than the 78.4 percent of businesses with gross annual revenues of $1 million or less. Considering the bank's distribution is stronger than the 40.7 percent for aggregate lenders, overall performance is good.

San Antonio-New Braunfels, TX MSA

The distribution in the San Antonio-New Braunfels, TX MSA is good. Based on businesses with known revenues, the proportion of the bank's small loans to businesses at 56.9 percent is lower than the 77.9 percent of businesses with gross annual revenues of $1 million or less. Considering the bank's distribution is stronger than the 40.4 percent for aggregate lenders, overall performance is good.

Small Loans to Farms

Refer to Table T for the facts and data used to evaluate the borrower distribution of the bank's originations/purchases of small loans to farms.

The distribution of small loans to farms with gross annual revenues of $1 million or less is good. The distribution is good in the Austin-Round Rock, TX MSA, in the Dallas-Fort Worth-Arlington, TX MSA, Houston-The Woodlands-Sugar Land, TX MSA, and in the San Antonio-New Braunfels, TX MSA The bank did not collect or consider the gross annual revenues in the underwriting of approximately 39 percent of its small loans to farms.

Austin-Round Rock, TX MSA

The distribution in the Austin-Round Rock, TX MSA is good. Based on farms with known revenues, the proportion of the bank's small loans to farms at 56.6 percent is lower than the 96.7 percent of farms with gross annual revenues of $1 million or less. The distribution was also less than the 61.9 percent performance for aggregate lenders.

Dallas-Fort Worth-Arlington, TX MSA

The distribution in the Dallas-Fort Worth-Arlington, TX MSA is good. Based on farms with known revenues, the proportion of the bank's small loans to farms at 59.1 percent is lower than the 96 percent of farms with gross annual revenues of $1 million or less. Considering the bank's distribution is stronger than the 51.4 percent for aggregate lenders, overall performance is good.

Houston-The Woodlands-Sugar Land, TX MSA

The distribution in the Houston-The Woodlands-Sugar Land, TX MSA is good. Based on farms with known revenues, the proportion of the bank's small loans to farms at 67.8 percent is lower than the 96.1 percent of farms with gross annual revenues of $1 million or less. Considering the bank's distribution is stronger than the 54.2 percent for aggregate lenders, overall performance is good.

San Antonio-New Braunfels, TX MSA

The distribution in the San Antonio-New Braunfels, TX MSA is good. Based on farms with known revenues, the proportion of the bank's small loans to farms at 51.7 percent is lower than the 96.8 percent of farms with gross annual revenues of $1 million or less. The distribution was also lower than the 54.4 percent performance for aggregate lenders.

Community Development Lending

CD lending has a neutral effect overall on the bank's Lending Test performance in the state of Texas.

Austin-Round Rock, TX MSA

In the Austin-Round Rock, TX MSA, CD lending has a significantly positive effect on the lending performance in the assessment area. During the evaluation period, the bank originated 17 CD loans totaling $112 million that helped provide over 1,900 units of affordable housing. CD lending represents 11.6 percent of the allocated Tier 1 Capital.

Examples of CD loans include:

- The bank purchased a $21.9 million tax-exempt bond, secured by a certificate of deposit held at the bank, to finance the construction of The Pointe at Ben White, a 250-unit affordable multifamily housing project complex in Austin, TX. All units are restricted to incomes at or below 60 percent of the area median income.

- The bank provided $8 million in construction financing to develop Lakeline Station, a 128-unit affordable apartment complex in Austin, TX. All units are restricted to incomes at or below 60 percent of the area median income.

- The bank provided $30.2 million construction financing to develop Terrace at Walnut Creek Apartments, a 324-unit affordable multifamily housing complex in Austin, TX. All units are restricted to incomes at or below 60 percent of the area median income.

Dallas-Fort Worth-Arlington, TX MSA

In the Dallas-Fort Worth-Arlington, TX MSA, CD lending has a neutral effect on the lending performance in the assessment area. The bank originated 35 CD loans totaling $344.5 million that primarily support affordable housing, economic development, and community services. CD loans helped to finance the development of more than 2,800 units of affordable housing. CD lending represents 4.5 percent of the allocated Tier 1 Capital, after considering the effect of $9.8 billion in non-local deposits. The bank met the community's credit needs primarily through retail lending.

Examples of CD loans include:

- The bank provided $15.9 million in construction financing to develop 1400 Belleview Apartments, a 164-unit LIHTC multifamily housing project in Dallas, TX. All units are restricted to incomes at or below 60 percent of the area median income.

- The bank provided $8.5 million in construction financing to develop Bishop Gardens Apartments, a 72-unit multifamily mixed-income housing project in Justin, TX with 60 units restricted to incomes at or below 60 percent of the area median income.

- The bank provided $8 million in construction financing to develop Bruton Apartments, a 264-unit affordable housing project. All units are restricted to incomes at or below 60 percent of the area median income.

Houston-The Woodlands-Sugar Land, TX MSA

In the Houston-The Woodlands-Sugar Land, TX MSA, CD lending has a positive effect on the lending performance in the assessment area. The bank originated 37 CD loans totaling $234.2 million that primarily supported affordable housing and economic development. CD loans helped to finance the development of nearly 3,000 units of affordable housing. CD lending represents 9.1 percent of the allocated Tier 1 Capital.

Examples of CD loans include:

- The bank provided $16 million in construction financing to develop AT Villages at Cypress, a 162-unit mixed income housing development in Houston, TX. The project will include 142 units restricted to incomes at or below 60 percent of the area median income. In addition, the project has set aside eight units for tenants with special needs, such as drug addictions, persons with disabilities, victims of domestic violence, persons living with HIV/AIDS, or migrant farm workers.

- The bank provided $9.6 million in acquisition and reposition financing for Cleme Manor Apartments, an existing 284-unit multifamily housing complex in Houston, TX. All units are restricted to incomes at or below 80 percent of the area median income.

- The bank provided $6.5 million in refinancing for Tall Timbers Apartments, an existing 148-unit affordable housing complex in Conroe, TX. All units are restricted to incomes at or below 60 percent of the area median income.

San Antonio-New Braunfels, TX MSA

In the San Antonio-New Braunfels, TX MSA, CD lending has a significantly positive effect on the lending performance in the assessment area. The bank originated 9 CD loans totaling $60.7 million that primarily supported affordable housing and community services. CD loans helped to finance the development of nearly 500 units of affordable housing. CD lending represents 12.8 percent of the allocated Tier 1 Capital.

Examples of CD loans include:

- The bank provided $10.2 million in construction financing to develop Phase II of Sutton Homes, a 208-unit LIHTC affordable multifamily development in San Antonio, TX. The project includes 162 units that are restricted to incomes at or below 60 percent of the area median income.

- The bank provided $20.7 million in financing to construct the new 160,000 square foot Cevallos Campus of a KIPP San Antonio public charter school in San Antonio, TX. The school provides an academically challenging education to low-income children in San

Antonio. The campus will serve approximately 1,350 students from three nearby schools. During the 2013-2014 school year, approximately 85 percent of the students from the three schools were qualified to receive free and reduced lunches.

- The bank provided $18.6 million in construction financing to develop Palo Alto Apartments, a 322-unit affordable multifamily housing project in San Antonio, TX. All units are restricted to incomes at or below 60 percent of the area median income.

Product Innovation and Flexibility

Bank of America offers various national and local flexible lending programs that have benefitted borrowers during the evaluation period. These include programs such as America's Home Grant, Affordable Loan Solutions, and Business Advantage Credit Line. The bank also participates with multiple organizations that provide flexible lending through NACA and other affordable housing programs. Within the state of Texas, lending under the MHA and HARP programs accounted for 77 percent of the dollar volume of all loans under flexible lending programs.

Conclusions for Areas Receiving Limited-Scope Reviews

Lending Test performance varied across the limited-scope assessment areas. Performance in the Beaumont-Port Arthur, TX MSA, El Paso, TX MSA, Laredo, TX MSA, Midland, TX MSA, and Odessa, TX MSA is consistent with the Outstanding Lending Test performance in the state of Texas. Performance in the Abilene, TX MSA, Amarillo, TX MSA, Brownsville-Port Arthur, TX MSA, College Station-Bryan, TX MSA, Corpus Christi, TX, MSA, Killeen-Temple, TX MSA, Lubbock, TX MSA, McAllen-Edinburg-Mission, TX MSA, San Angelo, TX MSA, Victoria, TX MSA, Waco, TX MSA, Wichita Falls, TX MSA, and Texas Non-MSA is weaker than the overall Outstanding Lending Test performance in the state of Texas primarily due to weaker lending activity or limited levels of CD lending.

INVESTMENT TEST

Conclusions for Areas Receiving Full-Scope Reviews

Refer to Table 14 for the facts and data used to evaluate the bank's level of qualified investments.

Bank of America's performance under the Investment Test in the state of Texas is rated Outstanding. The performance is excellent in the Austin-Round Rock, TX MSA, Dallas-Fort Worth-Arlington, TX MSA, Houston-The Woodlands-Sugarland MSA, and San Antonio-New Braunfels, TX MSA. Performance in limited-scope assessment areas has a neutral effect on the state rating.

Austin-Round Rock, TX MSA

In the Austin-Round Rock, TX MSA, the bank has an excellent level of community development investments. The bank made 109 community development investments during the current evaluation period totaling $89.8 million. Approximately $88.5 million or 99 percent of the investment dollars supported more than 2,000 units of affordable housing. In addition, the bank has 28 CD investments totaling $19.8 million it made during a prior evaluation period that are still outstanding and continue to provide benefit to the community. Prior and current period investments total $109.6 million or 11.4 percent of the bank's Tier 1 Capital allocated to the assessment area. The majority of current period investments are innovative or complex with LIHTCs representing approximately $75 million or 84 percent of the investment dollars.

Examples of community development investments include:

- The bank invested $13.3 million in LIHTCs to finance the construction of Homestead Apartments, a 140-unit mixed income multifamily housing development in Austin, TX. The project will have 126 units restricted to incomes at or below 60 percent of the area median income.

- The bank invested $7.8 million in LIHTCs to finance the construction of Liberty Manor Apartments, a 68-unit development for seniors, in Liberty Hill, TX. The project will have 65 units restricted to incomes at or below 60 percent of the area median income.

- The bank invested $21.8 million in LIHTCs to finance the construction of Manor Apartments, a 324-unit affordable housing project in Austin, TX. All units are restricted to incomes at or below 60 percent of the area median income.

Dallas-Fort Worth-Arlington, TX MSA

In the Dallas-Fort Worth-Arlington, TX MSA, the bank has an excellent level of community development investments. The bank made 673 community development investments during the current evaluation period totaling $683.9 million. Approximately $674 million or 99 percent of the investment dollars supported nearly 10,000 units of affordable housing. In addition, the bank has 432 CD investments totaling $130 million it made during a prior evaluation period that are still outstanding and continue to provide benefit to the community. Prior and current period investments total $813.9 million or 10.5 percent of the bank's adjusted Tier 1 Capital allocated to the assessment area. Examiners adjusted the allocated Tier 1 Capital to minimize the effect of $9.8 billion in deposits received from outside of the assessment area. The majority of current period investments are neither innovative nor complex with mortgage-backed securities representing approximately $422.3 million or 62 percent of the investment dollars.

Examples of community development investments include:

- The bank invested $16.3 million in LIHTCs to finance the construction of 1400 Belleview, a 164-unit multifamily housing project located in Dallas, TX. All units are restricted to incomes at or below 60 percent of the area median income.

- The bank invested $8.2 million in LIHTCs to finance the construction of Bishop Gardens, a 72-unit mixed-income housing development located in Justin, TX. The project will include 60 units that are restricted to incomes at or below 60 percent of the area median income.

- The bank invested $15.5 million in LIHTCs to finance the construction of Bruton Apartments, a 264-unit multifamily housing development in Dallas, TX. All units are restricted to incomes at or below 60 percent of the area median income.

Houston-The Woodlands-Sugar Land, TX MSA

In the Houston-The Woodlands-Sugar Land, TX MSA, the bank has an excellent level of community development investments. The bank made 346 community development investments during the current evaluation period totaling $269.5 million. Approximately $262.6 million or 97 percent of the investment dollars supported more than 6,700 units of affordable housing. In addition, the bank has 81 CD investments totaling $50 million it made during a prior evaluation period that are still outstanding and continue to provide benefit to the community. Prior and current period investments total $319.5 million or 12.4 percent of the bank's Tier 1 Capital allocated to the assessment area. The majority of current period investments are innovative or complex with LIHTCs representing approximately $156.7 million or 58 percent of the investment dollars.

Examples of community development investments include:

- The bank invested $15.6 million in LIHTCs to finance the construction of AT Villages at Cypress, a 162-unit mixed-income housing development in Houston, TX. The project will have 146 units that are restricted to incomes at or below 60 percent of the area median income.

- The bank invested $9.6 million in LIHTCs to finance the construction of Campanile at Jones Creek, a 77-unit affordable housing complex located in Richmond, TX. The project has 72 units that are restricted to incomes at or below 60 percent of the area median income.

- The bank invested $14.7 million in LIHTCs to finance the construction of El Dorado Green Apartments, a 108-unit mixed income housing development for seniors. The housing development, located in Houston, TX, has 88 units that are restricted to incomes at or below 60 percent of the area median income.

San Antonio-New Braunfels, TX MSA

In the San Antonio-New Braunfels, TX MSA, the bank has an excellent level of community development investments. The bank made 100 community development investments during the current evaluation period totaling $45.7 million. Approximately $41.1 million or 90 percent of the investment dollars supported nearly 1,500 units of affordable housing. In addition, the bank has 25 CD investments totaling $10.7 million it made during a prior evaluation period that are still outstanding and continue to provide benefit to the community. Prior and current period investments total $56.4 million or 11.9 percent of the bank's Tier 1 Capital allocated to the assessment area. The majority of current period investments are innovative or complex with LIHTCs representing approximately $39.5 million or 86 percent of the investment dollars.

Examples of community development investments include:

- The bank invested $1.2 million in LIHTCs as part of a joint venture's direct and indirect investments in partnerships that own affordable rental housing projects across multiple states. The $1.2 million represents the portion of financing for projects located within the San Antonio-New Braunfels, TX MSA. The investment financed 252 units of affordable rental housing.

- The bank made a $2 million LIHTC equity investment in a Section 42 LIHTC Fund, which invests indirectly in a portfolio of 11 LIHTC properties. This investment represents the portion of financing for the Artisan at Willow Springs, a newly constructed 248-unit rental property in San Antonio. All units are restricted to incomes at or below 60 percent of the area median income.

- The bank invested $15.6 million in LIHTCs for the development of Palo Alto Apartments, a 322-unit multifamily affordable housing project in San Antonio. All units are restricted to incomes at or below 60 percent of the area median income.

(*) 'Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.

(**) 'Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the bank's financial reporting system.

Conclusions for Areas Receiving Limited-Scope Reviews

Investment Test performance varied across the limited-scope assessment areas. Performance in Beaumont-Port Arthur, TX MSA, El Paso, TX MSA, Laredo, TX MSA, Midland, TX MSA, Odessa, TX MSA, Waco, TX MSA, and Texas Non-MSA is consistent with the Outstanding Investment Test performance in the state of Texas. Performance in the Abilene, TX MSA, Amarillo, TX MSA, Brownsville-Harlingen, TX MSA, College Station-Bryan, TX MSA, Corpus Christi, TX MSA, Killeen-Temple, TX MSA, Lubbock, TX MSA, McAllen-Edinburg-Mission, TX MSA, San Angelo, TX MSA, Tyler, TX MSA, Victoria, TX MSA, and Wichita Falls, TX MSA is weaker than the Outstanding Investment Test performance in the state of Texas due to lower levels of investments relative to the bank’s capacity in those assessment areas.

SERVICE TEST

Conclusions for Areas Receiving Full-Scope Reviews

Bank of America’s performance under the Service Test in the state of Texas is rated High Satisfactory. Service Test performance is good in the Austin-Round Rock, TX MSA, excellent in the Dallas-Fort Worth-Arlington, TX MSA, excellent in the Houston-The Woodlands-Sugar Land, TX MSA, and good in the San Antonio-New Braunfels, TX MSA. Performance in limited-scope assessment areas has a neutral effect on the state rating.

Retail Banking Services

Refer to Table C for the facts and data used to evaluate the accessibility of the bank’s retail banking services.

Austin-Round Rock, TX MSA

In the Austin-Round Rock, TX MSA, the bank’s service delivery systems are accessible to geographies and individuals of different income levels. Examiners based this conclusion on a comparison of the distribution of the bank’s 36 financial centers with the distribution of the population along with accessibility provided through alternative delivery systems. The bank has two financial centers in low-income geographies representing 5.6 percent of its financial centers. Low-income geographies have 10.7 percent of the assessment area’s population. In middle-income geographies, the bank has five or 13.9 percent of its financial centers compared with 23.9 percent of the population.

Examiners considered the bank’s alternative delivery systems, including cash dispensing and full-service ATMs, telephone, online, mobile, and text banking in evaluating accessibility to the bank’s products and services. Alternative delivery systems have a significantly positive effect on the accessibility of the bank’s service delivery systems to low- and moderate-income individuals and geographies. The bank demonstrated customer usage of ADS through income proxies based on customers’ residency. In five of the six ADS platforms, the percentage of customers in low- and moderate-income geographies using those platforms exceed 70 percent of the proportion of individuals residing in low- and moderate-income geographies.

The bank has six financial centers located in middle- and upper-income geographies that are adjacent to or in very close proximity to moderate-income geographies. These adjacent financial centers help improve accessibility of retail banking services in moderate-income geographies.

Financial center openings and closings did not adversely affect the accessibility of retail banking services, particularly in low- and moderate-income geographies and to low- and moderate-income individuals. During the evaluation period, the bank opened one financial center in a middle-income geography and closed five financial centers. The bank closed one financial center in a low-income geography, one in a moderate-income geography, and the remaining three in upper-income geographies. Despite the closures, financial centers remain accessible to individuals and geographies of different income levels.

Banking products, services, and hours of operation do not vary in a way that inconveniences the assessment area, particularly in low- and moderate-income geographies, and to low- and moderate-income individuals. The bank offers a full range of products and services. Banking hours are generally consistent throughout the assessment area. Financial centers are open 9:00 am to 4:00 pm Monday through Thursday, 9:00 am to 6:00 pm on Friday, and 9:00 am to 1:00 pm on Saturday.

Dallas-Fort Worth-Arlington, TX MSA

In the Dallas-Fort Worth-Arlington, TX MSA, the bank's service delivery systems are readily accessible to geographies and individuals of different income levels. Examiners based this conclusion on a comparison of the distribution of the bank's 145 financial centers with the distribution of the population along with accessibility provided through alternative delivery systems. The bank has 16 financial centers in low-income geographies representing 11 percent of its financial centers. Low-income geographies have 9.6 percent of the assessment area's population. In middle-income geographies, the bank has 24 or 16.6 percent of its financial centers compared with 24.7 percent of the population.

Examiners considered the bank's alternative delivery systems, including cash dispensing and full-service ATMs, telephone, online, mobile, and text banking in evaluating accessibility to the bank's products and services. Alternative delivery systems have a significantly positive effect on the accessibility of the bank's service delivery systems to low- and moderate-income individuals and geographies. The bank demonstrated customer usage of ADS through income proxies based on customers' residency. In all six ADS platforms, the percentages of customers in low- and moderate-income geographies using those platforms exceed 70 percent of the proportion of individuals residing in low- and moderate-income geographies.

The bank has 30 financial centers located in middle- and upper-income geographies that are adjacent to or in very close proximity to low- and moderate-income geographies. These adjacent financial centers help improve accessibility of retail banking services in low- and moderate-income geographies.

Financial center openings and closings did adversely affect the accessibility of retail banking services, particularly in low- and moderate-income geographies and to low- and moderate-income individuals. During the evaluation period, the bank opened eight financial centers and closed nineteen. The bank closed two financial centers in low-income geographies, eight in moderate-income geographies, and the remaining nine in middle- and upper-income geographies.

Banking products, services, and hours of operation do not vary in a way that inconveniences the assessment area, particularly in low- and moderate-income geographies, and to low- and moderate-income individuals. The bank offers a full range of products and services. Banking hours are generally consistent throughout the assessment area. Financial centers are open 9:00 am to 4:00 pm Monday through Thursday, 9:00 am to 6:00 pm on Friday, and 9:00 am to 1:00 pm on Saturday.

Houston-The Woodlands-Sugar Land, TX MSA

In the Houston-The Woodlands-Sugar Land, TX MSA, the bank's service delivery systems are readily accessible to geographies and individuals of different income levels. Examiners based this conclusion on a comparison of the distribution of the bank's 113 financial centers with the distribution of the population along with accessibility provided through alternative delivery systems. The bank has 11 financial centers in low-income geographies representing 9.7 percent of its financial centers. Low-income geographies have 9.3 percent of the assessment area's population. In middle-income geographies, the bank has 24 or 21.2 percent of its financial centers compared with 26 percent of the population.

Examiners considered alternative delivery systems, including ATMs, telephone banking, online banking, and mobile banking in evaluating accessibility to the bank's products and services. The effect of ADS based on customer usage was neutral.

The bank has 13 financial centers located in middle- and upper-income geographies that are adjacent to or in very close proximity to low- and moderate-income geographies. These adjacent financial centers help improve accessibility of retail banking services in low- and moderate-income geographies.

Financial center openings and closings generally did not adversely affect the accessibility of retail banking services, particularly in low- and moderate-income geographies and to low- and moderate-income individuals. During the evaluation period, the bank opened 11 financial centers and closed 15. The bank closed two financial centers in low-income geographies, six in moderate-income geographies, and the remaining seven in middle- and upper-income geographies. Despite the closures, financial centers remain readily accessible to individuals and geographies of different income levels.

Banking products, services, and hours of operation do not vary in a way that inconveniences the assessment area, particularly in low- and moderate-income geographies, and to low- and moderate-income individuals. The bank offers a full range of products and services. Banking hours are generally consistent throughout the assessment area. Financial centers are open 9:00 am to 4:00 pm Monday through Thursday, 9:00 am to 6:00 pm on Friday, and 9:00 am to 1:00 pm on Saturday.

San Antonio-New Braunfels, TX MSA

In the San Antonio-New Braunfels, TX MSA, the bank's service delivery systems are readily accessible to geographies and individuals of different income levels. Examiners based this conclusion on a comparison of the distribution of the bank's 31 financial centers with the distribution of the population along with accessibility provided through alternative delivery systems. The bank has one financial center in a low-income geography representing 3.2 percent of its financial centers. Low-income geographies have 6.4 percent of the assessment area's population. In middle-income geographies, the bank has seven or 22.6 percent of its financial centers compared with 28.1 percent of the population.

Examiners considered the bank's alternative delivery systems, including cash dispensing and full-service ATMs, telephone, online, mobile, and text banking in evaluating accessibility to the bank's products and services. Alternative delivery systems have a significantly positive effect on the accessibility of the bank's service delivery systems to low- and moderate-income individuals and geographies. The bank demonstrated customer usage of ADS through income proxies based on customers' residency. In all six ADS platforms, the percentages of customers in low- and moderate-income geographies using those platforms exceed 70 percent of the proportion of individuals residing in low- and moderate-income geographies.

The bank has 10 financial centers located in middle- and upper-income geographies that are adjacent to or in very close proximity to low- and moderate-income geographies. These adjacent financial centers help improve accessibility of retail banking services in low- and moderate-income geographies.

Financial center openings and closings did adversely affect the accessibility of retail banking services, particularly in low- and moderate-income geographies and to low- and moderate-income individuals. During the evaluation period, the bank opened two financial centers and closed eleven. The bank closed two financial centers in low-income geographies, three in moderate-income geographies, four in middle-income geographies, and two in upper-income geographies.

Banking products, services, and hours of operation do not vary in a way that inconveniences the assessment area, particularly in low- and moderate-income geographies, and to low- and moderate-income individuals. The bank offers a full range of products and services. Banking hours are generally consistent throughout the assessment area. Financial centers are open 9:00 am to 4:00 pm Monday through Thursday, 9:00 am to 6:00 pm on Friday, and 9:00 am to 1:00 pm on Saturday.

Community Development Services

Austin-Round Rock, TX MSA

In the Austin-Round Rock, TX MSA, the bank is a leader in providing community development services. During the evaluation period, the bank participated with community development organizations to provide 106 community development services targeted to low- and moderate-income individuals. Employees provided homebuyer education workshops to 21 low- and moderate-income individuals, and provided 15 financial education workshops and 1 foreclosure prevention workshop for 254 individuals. Fifteen employees served as financial coaches to work one-on-one with low- and moderate-income individuals to provide financial counseling. Employees participated in 21 webinars and workshops with non-profit organizations to help the organizations with capacity building. In addition, 24 employees served on the boards or committees of community organizations. The types of CD services provided are responsive to the needs identified in the community.

Dallas-Fort Worth-Arlington, TX MSA

In the Dallas-Fort Worth-Arlington, TX MSA, the bank is a leader in providing community development services. During the evaluation period, the bank participated with community development organizations to provide 81 community development services targeted to low- and moderate-income individuals. Employees provided homebuyer education workshops to 138 low- and moderate-income individuals, and provided 54 financial education workshops and 2 foreclosure prevention workshops for 1,331 individuals. Attendees to the financial education workshops were primarily students from low- and moderate-income families. Employees participated in 58 webinars and workshops with non-profit organizations to help the organizations with capacity building. In addition, 18 employees served on the boards or committees of community organizations. The types of CD services provided are responsive to the needs identified in the community.

Houston-The Woodlands-Sugar Land, TX MSA

In the Houston-The Woodlands-Sugar Land, TX MSA, the bank is a leader in providing community development services. During the evaluation period, the bank participated with community development organizations to provide 233 community development services targeted to low- and moderate-income individuals. Employees provided homebuyer education workshops to 130 low- and moderate-income individuals, and provided 15 financial education workshops and 9 foreclosure prevention workshops for 716 individuals. Attendees to the financial education workshops were primarily students from low- and moderate-income families. Employees participated in 49 webinars and workshops with non-profit organizations to help the organizations with capacity building. In addition, 22 employees served on the boards or committees of community organizations. The types of CD services provided are responsive to the needs identified in the community.

San Antonio-New Braunfels, TX MSA

In the San Antonio-New Braunfels, TX MSA, the bank provides a high level of community development services. During the evaluation period, the bank participated with community development organizations to provide 108 community development services targeted to low- and moderate-income individuals. Employees provided homebuyer education workshops to 76 low- and moderate-income individuals, and provided 14 financial education workshops for 233 individuals. Attendees to the financial education workshops were primarily students from low- and moderate-income families. Employees participated in 18 webinars and workshops with non-profit organizations to help the organizations with capacity building. No employees served on the boards or committees of community organizations. The types of CD services provided are responsive to the needs identified in the community.

Conclusions for Areas Receiving Limited-Scope Reviews

Service Test performance varied across the limited-scope assessment areas. Performance in the Abilene, TX MSA, Amarillo, TX MSA, Beaumont-Port Arthur, TX MSA, Brownsville-Harlingen, TX MSA, College Station-Bryan, TX MSA, Lubbock, TX MSA, McAllen-Edinburg-Mission, TX MSA, Midland, TX MSA, Wichita Falls, TX MSA, and Texas Non-MSA is consistent with the Outstanding Service Test performance in the state of Texas. Performance in the Corpus Christi, TX MSA, El Paso, TX MSA, Killeen-Temple, TX MSA, Laredo, TX MSA, Odessa, TX MSA, San Angelo, TX MSA, Tyler, TX MSA, Victoria, TX MSA, and Waco, TX MSA is weaker than the overall Outstanding Service Test performance in the state of Texas primarily due to weaker distribution of financial centers. Although the bank’s presence in many of the limited-scope assessment areas was very limited and often comprised just one or two financial centers, at least one of those financial centers was generally located in a low- or moderate-income geography.

State of Virginia

CRA Rating for Virginia[45]: **Outstanding**
The Lending Test is rated: Outstanding
The Investment Test is rated: Outstanding
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Excellent volume of loans originated or purchased within the assessment areas;
- Good distribution of loans by geography and excellent distribution of loans by borrower income or business revenue size;
- High level of CD lending that has a significantly positive effect on overall lending performance;
- Excellent level and responsiveness of qualified investments; and
- Readily accessible service delivery systems to low- and moderate-income geographies and individuals.

Description of Institution's Operations in Virginia

The state of Virginia is Bank of America's 14th largest rating area based on its total deposits in the state when excluding deposits in the Washington-Arlington-Alexandria, DC-VA-MD Multistate MSA. Examiners excluded the multistate MSA from the analysis of the state of Virginia because examiners evaluated the multistate MSA as a separate rating area. As of June 30, 2016, the bank maintained approximately $16.7 billion or 1.4 percent of its total domestic deposits in financial centers in areas of the state of Virginia that do not include the multistate MSA. Of the 106 depository financial institutions operating in the areas of the state that do not include the multistate MSA, Bank of America, with a deposit market share of 10.2 percent, is the third largest. The largest depository financial institution in the state is Capital One Bank with 1 branch and $62.2 billion in deposits or 21.7 percent market share. Wells Fargo is the state's second largest depository financial institution with 290 branches and $38.6 billion in deposits or 13.5 percent market share. E*Trade Bank is the third largest depository financial institution with two branches and $33.2 billion in deposits or 11.6 percent market share. As of December 31, 2016, the bank operated 72 financial centers and 171 deposit-taking ATMs in the areas of the state that do not include the multistate MSA.

Examiners use the bank's deposit volume as an indicator of its capacity to lend and invest in its assessment areas. In some cases, not all deposits originated from the local community. In

[45] For institutions with branches in two or more states in a multistate metropolitan area, this statewide evaluation does not reflect performance in the parts of this state contained within the multistate metropolitan area. Refer to the multistate metropolitan area rating and discussion for the rating and evaluation of the institution's performance in that area.

the Richmond, VA MSA, Bank of America reported $2 billion in deposits of national corporations, in which the funds originated from communities across the nation and deposited in financial centers near the headquarters of these large corporations. Adjusting the bank's total deposits in the MSA by excluding these external deposits from the local deposit base gives a more accurate indicator of the bank's capacity in the assessment area.

Refer to the community profiles for the state of Virginia in appendix C for detailed demographics and other performance context information for assessment areas that received full-scope reviews.

Scope of Evaluation in Virginia

Examiners selected two assessment areas for full-scope reviews and the remaining five assessment areas for limited-scope reviews. The full-scope assessment areas selected are the Charlottesville, VA MSA and Richmond, VA MSA. While the Richmond, VA MSA carries approximately 74 percent weight of the overall conclusions based on the bank's presence in the assessment area relative to all assessment areas in Virginia, the conclusions and ratings for the state are based on the activities within all assessment areas. During the evaluation period, Bank of America originated or purchased 23,617 home mortgage loans totaling $4.8 billion, 20,906 small loans to businesses totaling $605.6 million, 262 small loans to farms totaling $4 million, and 42 CD loans totaling $264 million. Lending volumes include loans originated or purchased in the Danville, VA MSA and Roanoke, VA MSA, which the bank no longer designates as assessment areas due to the bank's closure or sale of all financial centers and deposit-taking ATMs in those communities. Based on loan volume, examiners weighted home mortgage loans, representing 52.7 percent of the volume, the heaviest, followed by small loans to businesses (46.7 percent) and small loans to farms (0.6 percent).

The bank did not originate or purchase sufficient volumes of small loans to farms in the Blacksburg, VA MSA, Harrisonburg, VA MSA, and Lynchburg, VA MSA to provide any meaningful analyses.

The OCC interviewed two local housing based organizations. The organizations identified affordable housing, as the most pressing community development need.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN VIRGINIA

LENDING TEST

Conclusions for Areas Receiving Full-Scope Reviews

Bank of America's performance under the Lending Test in the state of Virginia is rated Outstanding, based on excellent lending activity, good geographic distribution, excellent borrower income distribution, and high levels of CD lending that have a significantly positive effect on overall Lending Test performance. Performance in limited-scope assessment areas has a neutral effect on the state rating.

Lending Activity

Based on total lending volume in Table 1, peer deposit and loan data for 2016, and relevant performance context considerations, the bank's lending activity in the state of Virginia is excellent. Lending activity is excellent in each of the full-scope assessment areas and it is generally consistent across the limited-scope assessment areas.

Charlottesville, VA MSA

Lending activity in the Charlottesville, VA MSA is excellent. Based on FDIC deposit data as of June 30, 2016, Bank of America has a deposit market share of 21.3 percent. The bank ranks first among 18 depository financial institutions in the assessment area, which places it in the top 6 percent of institutions. According to peer mortgage data for 2016, the bank has a market share of 3 percent based on the number of home mortgage loans originated or purchased. The bank ranks eighth among 351 home mortgage lenders, which places it in the top 3 percent of lenders competing for loans. According to peer small business data for 2016, the bank has an 8.8 percent market share of small loans to businesses based on the number of small loans to businesses originated or purchased. The bank ranks fifth among 83 small business lenders, which places it in the top 7 percent of lenders in the MSA. According to peer farm data for 2016, the bank has a market share of 10.8 percent based on the number of small loans to farms originated or purchased. The bank ranks fifth among 13 farm lenders, which places it in the top 39 percent of lenders. Considering the bank's higher ranking among all lenders for home mortgage loans relative to its ranking for deposits and the greater weight placed on home mortgage lending, overall lending activity is excellent.

Richmond, VA MSA

Lending activity in the Richmond, VA MSA is excellent. Based on FDIC deposit data as of June 30, 2016, the bank has a deposit market share of 12.7 percent. The bank ranks second among 36 depository financial institutions in the assessment area, which places it in the top 6 percent of institutions in the MSA. According to peer mortgage data for 2016, the bank has a market share of 1.7 percent based on the number of home mortgage loans originated or purchased. The bank ranks 16th among 546 home mortgage lenders, which places it in the top 3 percent of lenders. According to peer small business data for 2016, the bank has a 5.6 percent market share of small loans to businesses based on the number of small loans to businesses originated or purchased. The bank ranks sixth among 117 small business lenders, which places it in the top 6 percent of lenders. For small loans to farms, the bank has a market share of 4.6 percent based on the number of small loans to farms originated or purchased. The bank ranks seventh among 16 farm lenders, which places it in the top 44 percent of lenders. Considering the bank's deposits and deposit market share include $2 billion in deposits not derived from the MSA along with the higher ranking for home mortgage loans and similar ranking for small loans to businesses relative to its ranking for deposits, overall lending activity is excellent.

(**) The evaluation period for Community Development Loans is January 1, 2012 to December 31, 2016.
(***) Deposit data as of June 30, 2016. Rated area refers to either the state or multi-state MSA as appropriate.

Distribution of Loans by Income Level of the Geography

The bank's geographic distribution of loans reflects excellent penetration in low- and moderate-income geographies. For this analysis, examiners compared the bank's HMDA-reportable loan originations and purchases, small loans to businesses, and small loans to farms with available demographic information. Examiners also considered any relevant performance context information and aggregate lending data.

Home Mortgage Loans

Refer to Table O for the facts and data used to evaluate the geographic distribution of the bank's originations/purchases of home mortgage loans.

The overall geographic distribution of home mortgage loans is good. The distribution is good in the Charlottesville, VA MSA and Richmond, VA MSA.

Charlottesville, VA MSA

The geographic distribution of home mortgage loans in the Charlottesville, VA MSA is good. Performance is excellent in low-income geographies, but poor in moderate-income geographies. The distribution of home mortgage loans in low-income geographies at 2.6 percent is higher than the 2.2 percent of owner-occupied housing units in low-income geographies and it is higher than the 1.7 percent for aggregate lenders. However, the distribution in moderate-income geographies at 8.5 percent is lower than the 18.6 percent of owner-occupied housing units in moderate-income geographies and it is lower than the 13.1 percent for aggregate lenders.

Richmond, VA MSA

The geographic distribution of home mortgage loans in the Richmond, VA MSA is good. Performance is good in low-income geographies and it is good in moderate-income geographies. The distribution of home mortgage loans in low-income geographies at 3.1 percent is slightly lower than the 3.6 percent of owner-occupied housing units in low-income geographies, but it is higher than the 2.2 percent performance for aggregate lenders. The distribution in moderate-income geographies at 13.7 percent is lower than the 17.3 percent of owner-occupied housing units in moderate-income geographies, but it is higher than the 13.5 percent performance for aggregate lenders.

Small Loans to Farms

Refer to Table S for the facts and data used to evaluate the geographic distribution of the bank's originations/purchases of small loans to farms.

The overall geographic distribution of small loans to farms is adequate. The distribution is adequate in the Charlottesville, VA MSA and Richmond, VA MSA.

Charlottesville, VA MSA

The geographic distribution of small loans to farms in the Charlottesville, VA MSA is adequate, based on poor performance in low-income geographies and adequate performance in moderate-income geographies. The geographic distribution in low-income geographies at 0 percent is lower than the 2.3 percent of farms in low-income geographies and it is lower than the 6.9 percent for aggregate lenders. The geographic distribution in moderate-income geographies at 21.7 percent is lower than the 23.8 percent of farms in moderate-income geographies and it is lower than the 27.8 percent for aggregate lenders.

Richmond, VA MSA

The geographic distribution of small loans to farms in the Richmond, VA MSA is adequate, based on poor performance in low-income geographies and adequate performance in moderate-income geographies. The geographic distribution in low-income geographies at 0 percent is lower than the 1.9 percent of farms in low-income geographies and it is lower than the 0.5 percent for aggregate lenders. The geographic distribution in moderate-income geographies at 30 percent is higher than the 19.5 percent of farms in moderate-income geographies and it is lower than the 32.9 percent for aggregate lenders.

Lending Gap Analysis

For areas receiving full-scope reviews, examiners noted no conspicuous or unexplained gaps in lending in low- and moderate-income geographies.

Inside/Outside Ratio

See the “Inside/Outside Ratio” section within the overall Scope of Evaluation.

Distribution of Loans by Income Level of the Borrower

The bank’s distribution of loans by borrower income and revenue size is excellent. For this analysis, examiners compared the bank’s HMDA-reportable loan originations and purchases, small business, and small farm lending with available demographic information. Examiners also considered any relevant performance context information and aggregate lending data.

Home Mortgage Loans

Refer to Table P for the facts and data used to evaluate the borrower distribution of the bank’s home mortgage loan originations and purchases.

The overall distribution of home mortgage loans by borrower income is excellent. The distribution is good in the Charlottesville, VA MSA and excellent in the Richmond, VA MSA.

Charlottesville, VA MSA

The distribution of home mortgage loans by borrower income in the Charlottesville, VA MSA is good. The distribution is good to low-income borrowers and it is good to moderate-income borrowers. The proportion of the bank's home mortgage loans to low-income borrowers at 9.1 percent is lower than the 21.1 percent of low-income families in the MSA; however, the bank's performance is higher than the 6.8 percent for aggregate lenders. The proportion of home mortgage loans to moderate-income borrowers at 13.8 percent is lower than the 17.1 percent of moderate-income families and it is slightly lower than the 15.3 percent performance for aggregate lenders.

Richmond, VA MSA

The distribution of home mortgage loans by borrower income in the Richmond, VA MSA is excellent. The distribution is excellent to low-income borrowers and it is excellent to moderate-income borrowers. The proportion of the bank's home mortgage loans to low-income borrowers at 12 percent is lower than the 20.4 percent of low-income families in the assessment area; however, it is significantly higher than the 6.6 percent performance for aggregate lenders. The proportion of loans to moderate-income borrowers at 17.2 percent is slightly lower than the 18 percent of moderate-income families in the MSA; however, it exceeds the 16.3 percent performance for aggregate lenders.

Small Loans to Businesses

Refer to Table R for the facts and data used to evaluate the borrower distribution of the bank's originations and purchases of small loans to businesses.

The distribution of small loans to businesses with gross annual revenues of $1 million or less is good overall. The distribution is good in the Charlottesville, VA MSA and Richmond, VA MSA. The bank did not collect or consider the gross annual revenues in the underwriting of approximately 34 percent of its small loans to businesses.

Charlottesville, VA MSA

The distribution of small loans to businesses with gross annual revenues of $1 million or less in the Charlottesville, VA MSA is good. Based on businesses with known revenues, the proportion of the bank's small loans to businesses at 54.5 percent is lower than the 78.9 percent of businesses with gross annual revenues of $1 million or less. Considering the bank's distribution is stronger than the 46.9 percent for aggregate lenders, overall performance is good.

Richmond, VA MSA

The distribution of small loans to businesses with gross annual revenues of $1 million or less in the Richmond, VA MSA is good. Based on businesses with known revenues, the proportion of the bank's small loans to businesses at 53.6 percent is lower than the 78 percent of businesses with gross annual revenues of $1 million or less. Considering the bank's distribution is stronger than the 47.7 percent for aggregate lenders, overall performance is good.

Small Loans to Farms

Refer to Table T for the facts and data used to evaluate the borrower distribution of the bank's originations and purchases of small loans to farms.

The distribution of small loans to farms with gross annual revenues of $1 million or less is adequate. The distribution is good in the Charlottesville, VA MSA and adequate in the Richmond, VA MSA. The bank did not collect or consider the gross annual revenues in the underwriting of approximately 34 percent of its small loans to farms.

Charlottesville, VA MSA

The distribution of small loans to farms with gross annual revenues of $1 million or less in the Charlottesville, VA MSA is good. Based on farms with known revenues, the proportion of the bank's small loans to farms at 78.3 percent is lower than the 97.8 percent of farms with gross annual revenues of $1 million or less. However, the bank's distribution exceeds the 54.2 percent for aggregate lenders.

Richmond, VA MSA

The distribution of small loans to farms with gross annual revenues of $1 million or less in the Richmond, VA MSA is adequate. Based on farms with known revenues, the proportion of the bank's small loans to farms at 50 percent is lower than the 97.2 percent of farms with gross annual revenues of $1 million or less. The bank's distribution exceeds the 45.1 percent for aggregate lenders.

Community Development Lending

CD lending has a significantly positive effect overall on the bank's Lending Test performance in the state of Virginia. To help assess the bank's capacity to lend, examiners compared the dollar volume of CD loans with the dollar volume of the bank's net Tier 1 Capital allocated to the assessment area according to the assessment area's proportion of deposits.

Charlottesville, VA MSA

In the Charlottesville, VA MSA, CD lending has a neutral effect on the lending performance in the assessment area. During the evaluation period, the bank originated one CD loan totaling $6.5 million that helped provide 54 units of affordable housing. CD lending represents 5.4 percent of the allocated Tier 1 Capital. The bank met the community's credit needs primarily through retail lending.

Richmond, VA MSA

In the Richmond, VA MSA, CD lending has a significantly positive effect on the lending performance in the assessment area. During the evaluation period, the bank originated 17 CD loans totaling $139.6 million that primarily helped provide 760 units of affordable housing. CD lending represents 10.8 percent of the allocated Tier 1 Capital, after considering approximately $2 billion in deposits from national corporations in which the deposits did not derive from the local community.

Examples of CD loans include:

- The bank provided $38 million in construction financing to develop 28th Street Senior, a 39-unit affordable multifamily housing project for seniors in Richmond, VA. All units are restricted to incomes at or below 50 percent of the area median income.

- The bank provided $8.1 million in construction financing to develop Cavalier II Apartments in Petersburg, VA. The development provides 66 units of affordable housing with all units restricted to incomes at or below 60 percent of the area median income. Bank of America also provided the LIHTC equity investment for this project.

- The bank provided $3.3 million in construction financing to construct Dove Street II Apartments, a new 48-unit affordable housing development in Richmond, VA. Of the 48 units, 10 are market rate with the remaining 38 units restricted to incomes at or below 50 percent of the area median income.

Product Innovation and Flexibility

Bank of America offers various national and local flexible lending programs that have benefitted borrowers during the evaluation period. These include programs such as America's Home Grant, Affordable Loan Solutions, and Business Advantage Credit Line. The bank also participates with multiple organizations that provide flexible lending through NACA and other affordable housing programs. Within the state of Virginia, lending under the MHA and HARP programs accounted for 79 percent of the dollar volume of all loans under flexible lending programs.

Conclusions for Areas Receiving Limited-Scope Reviews

Lending Test performance varied across the limited-scope assessment areas. Performance in the Blacksburg, VA MSA, Lynchburg, VA MSA, and Virginia-Beach-Norfolk-Newport News, VA MSA is consistent with the Outstanding Lending Test performance in the state of Virginia. Performance in the Harrisonburg, VA MSA and Virginia Non-MSA is weaker than the overall Outstanding Lending Test performance in the state of Virginia primarily due to weaker geographic and borrower income distributions.

INVESTMENT TEST

Conclusions for Areas Receiving Full-Scope Reviews

Refer to Table 14 for the facts and data used to evaluate the bank's level of qualified investments.

Bank of America's performance under the Investment Test in the state of Virginia is rated Outstanding. Investment performance is excellent in the Charlottesville, VA MSA and Richmond, VA MSA. Performance in limited-scope assessment areas has a neutral effect on the state rating.

Charlottesville, VA MSA

In the Charlottesville, VA MSA, Bank of America has an excellent level of CD investments. The bank made 53 CD investments during the current evaluation period totaling $13.1 million. Approximately $13 million or 99 percent of the investment dollars supported 177 units of affordable housing. In addition, the bank has 15 CD investments totaling $705,000 it made during a prior evaluation period that are still outstanding and continue to provide benefit to the community. Prior period and current period investments total $13.9 million or 11.5 percent of allocated Tier 1 Capital. An example of a significant investment is the bank's purchase of $7.5 million in LIHTCs to finance the construction of Carlton View Apartments, a 54-unit affordable housing development in Charlottesville, VA. The majority of current period investments are innovative or complex with LIHTCs representing approximately $7.7 million or 59 percent of the investment dollars.

Richmond, VA MSA

In the Richmond, VA MSA, the bank has an excellent level of CD investments. The bank made 218 CD investments during the current evaluation period totaling $174.5 million. Approximately $162.4 million or 93 percent of the investment dollars supported 2,071 units of affordable housing. In addition, the bank has 127 CD investments totaling $27.8 million it made during a prior evaluation period that are still outstanding and continue to provide benefit to the community. Prior period and current period investments total $202 million or 15.6 percent of allocated Tier 1 Capital, after considering the $2 billion in deposits that did not originate from the assessment area. The majority of current period investments are neither innovative nor complex with mortgage-backed securities representing approximately $110.7 million or 63 percent of the investment dollars.

Examples of community development investments include:

- The bank purchased $3.8 million in LIHTCs to help fund the construction of 28th Street Senior, a 39-unit affordable housing development for seniors over the age of 55. All units are restricted to incomes at or below 50 percent of the area median income. The bank also provided a construction loan.

- The bank purchased $6.2 million in LIHTCs to support the construction of Cavalier Apartments, a 66-unit affordable housing development in Petersburg, VA. All units are restricted to incomes at or below 50 percent of the area median income. The bank also provided a construction loan for this project.

- The bank purchased $8.8 million in LIHTCs to support the construction of Cavalier Senior Apartments, an 80-unit affordable housing development for seniors over the age of 55. All units are restricted to incomes at or below 50 percent of the area median income. The bank also provided the construction loan for this project.

(*) 'Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
(**) 'Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the bank's financial reporting system.

Conclusions for Areas Receiving Limited-Scope Reviews

Investment Test performance varied across the limited-scope assessment areas. Investment performance in the Blacksburg, VA MSA and Virginia Beach-Norfolk-Newport News, VA MSA is consistent with the Outstanding Investment Test performance in the state of Virginia. Performance in the Harrisonburg, VA MSA, Lynchburg, VA MSA, and Virginia Non-MSA is weaker than the overall Outstanding Investment Test performance in the state of Virginia. Performance is weaker primarily due to lower levels of investments relative to the bank's capacity in those assessment areas.

SERVICE TEST

Conclusions for Areas Receiving Full-Scope Reviews

Bank of America's performance under the Service Test in the state of Virginia is rated Outstanding. Service Test performance is adequate in the Charlottesville, VA MSA and excellent in the Richmond, VA MSA. Performance in limited-scope assessment areas has a neutral effect on the state rating.

Retail Banking Services

Refer to Table C for the facts and data used to evaluate the accessibility of the bank's retail banking services.

Charlottesville, VA MSA

In the Charlottesville, VA MSA, the bank's service delivery systems are reasonably accessible to geographies and individuals of different income levels. Examiners based this conclusion on a comparison of the distribution of the bank's nine financial centers with the distribution of the population. The bank has one financial center in a low-income geography representing 11.1 percent of its financial centers. Considering 7.1 percent of the population lives in low-income geographies, the distribution in low-income geographies is excellent. The bank has no financial centers located in moderate-income geographies. Considering that 19.2 percent of the population lives in moderate-income geographies along with the accessibility provided by adjacent financial centers described below, the distribution performance is poor.

Examiners also considered the bank's alternative delivery systems, including ATMs, and telephone, online, mobile, and text banking in evaluating accessibility to the bank's products and services. Based on customer usage, alternative delivery systems have a positive effect on the accessibility of the bank's service delivery systems to low- and moderate-income individuals and geographies.

The bank has two financial centers in middle- and upper-income census tracts that are adjacent to or in very close proximity to moderate-income census tracts. The adjacent financial centers help fill the void left from the closure of the only financial center in moderate-income geographies.

Financial center openings and closings did adversely affect the accessibility of retail banking services, particularly in moderate-income geographies and to low- and moderate-income individuals. During the evaluation period, the bank opened one financial center in an upper-income geography and closed one financial center in a moderate-income geography. Considering the closure left no financial centers remaining in moderate-income geographies, the closure adversely affected the accessibility of retail banking services.

Banking products and services do not vary in a way that inconveniences the assessment area, particularly in low- and moderate-income geographies or to low- and moderate-income individuals. The bank offers a full range of products and services. Financial centers are generally open 9:00 am to 5:00 pm Monday through Thursday and 9:00 am to 6:00 pm on Friday. Three financial centers in middle- and upper-income geographies provide Saturday banking 9:00 am to 12:00 pm.

Richmond, VA MSA

In the Richmond, VA MSA, the bank's service delivery systems are readily accessible to geographies and individuals of different income levels. Examiners based this conclusion on a comparison of the distribution of the bank's 24 financial centers with the distribution of the population. The bank has one financial center in a low-income geography representing 4.2 percent of its financial centers. Considering 7.5 percent of the population lives in low-income geographies along with additional access provided by adjacent financial centers, financial center distribution is adequate. The bank has seven financial centers in moderate-income geographies representing 29.2 percent of its financial centers. Considering 22.3 percent of the population resides in moderate-income geographies, financial center distribution is excellent.

Examiners also considered the bank's alternative delivery systems, including ATMs, and telephone, online, mobile, and text banking in evaluating accessibility to the bank's products and services. Based on customer usage, alternative delivery systems have a significantly positive effect on the accessibility of the bank's service delivery systems to low- and moderate-income individuals and geographies. The proportions of customers in low- and moderate-income geographies using online, telephone, mobile, and text banking either are near the proportion of the population in low- and moderate-income geographies or exceeds it. For example, cash dispensing ATM usage, full-service ATM usage, and text banking usage by customers in low- and moderate-income geographies exceed the proportion of the population in low- and moderate-income geographies.

The bank has six financial centers in middle- and upper-income census tracts that are adjacent to or in very close proximity to low- and moderate-income census tracts. One of the financial centers provide additional access to retail banking services in low-income geographies and five financial centers provide additional access in moderate-income geographies.

Financial center openings and closings generally did not adversely affect the accessibility of retail banking services, particularly in low- and moderate-income geographies or to low- and moderate-income individuals. During the evaluation period, the bank closed five financial centers, with two closures in low-income geographies, one closure in a moderate-income geography, and two closures in middle-income geographies. Despite the closures, financial centers remain readily accessible to individuals and geographies of different income levels.

Banking products and services do not vary in a way that inconvenience the assessment area, particularly in low- and moderate-income geographies or to low- and moderate-income individuals. The bank offers a full range of products and services. Financial centers are generally open 9:00 am to 5:00 pm Monday through Friday. Two financial centers in moderate-income geographies close at 4:00 pm. Saturday banking is available 9:00 am to 12:00 pm for 11 of the 24 financial centers.

Community Development Services

Charlottesville, VA MSA

The bank provides few community development services in the MSA. During the evaluation period, the bank participated with community development organizations to provide 13 community development services targeted to low- and moderate-income individuals. Employees provided five financial education workshops for 57 individuals. Attendees to the financial education workshops were primarily students from low- and moderate-income families. Employees participated in eight webinars and workshops with non-profit organizations to help the organizations with capacity building. No employees served on the boards or committees of community organizations. The types of CD services provided are responsive to the needs identified in the community.

Richmond, VA MSA

The bank provides a relatively high level of community development services in the MSA. During the evaluation period, the bank participated with community development organizations to provide 75 community development services targeted to low- and moderate-income individuals. Employees provided homebuyer education workshops to 14 low- and moderate-income individuals, and provided 22 financial education workshops and 2 foreclosure prevention workshops for 1,024 individuals. Attendees to the financial education workshops were primarily students from low- and moderate-income families. Employees participated in 24 webinars and workshops with non-profit organizations to help the organizations with capacity building. In addition, 13 employees served on the boards or committees of community organizations. The types of CD services provided are responsive to the needs identified in the community.

Conclusions for Areas Receiving Limited-Scope Reviews

Service Test performance varied across the limited-scope assessment areas. Performance in the Lynchburg, VA MSA and Virginia Beach-Norfolk-Newport News, VA MSA is consistent with the Outstanding Service Test performance in the state of Virginia. Performance in the Blacksburg, VA MSA, Harrisonburg, VA MSA, and Virginia Non-MSA is weaker than the overall Outstanding Service Test performance in the state of Virginia. Performance is weaker primarily due to weaker financial center distribution.

State of Washington

CRA Rating for Washington[46]: **Outstanding**
The Lending Test is rated: Outstanding
The Investment Test is rated: High Satisfactory
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Excellent volume of loans originated or purchased within the assessment areas;
- Excellent distribution of loans by geography and good distribution of loans by borrower income or business revenue size;
- High level of CD lending that has a significantly positive effect on overall lending performance;
- Good level and responsiveness of qualified investments; and
- Readily accessible service delivery systems to low- and moderate-income geographies and individuals.

Description of Institution's Operations in Washington

The state of Washington is Bank of America's 11th largest rating area based on its total deposits in the state when excluding deposits in the Portland-Vancouver-Hillsboro, OR-WA Multistate MSA. Examiners excluded the multistate MSA in the analysis of the state of Washington because examiners evaluated the multistate MSA as a separate rating area. As of June 30, 2016, the bank maintained approximately $29.7 billion or 2.5 percent of its total domestic deposits in financial centers in areas of the state of Washington that do not include the multistate MSA. Of the 85 depository financial institutions operating in the areas of the state that exclude the multistate MSA, Bank of America, with a deposit market share of 21.6 percent, is the largest. Wells Fargo is the state's second largest depository financial institution with 160 branches and $17.6 billion in deposits or 12.3 percent market share. JPMorgan Chase is the third largest depository financial institution with 204 branches and $15.2 billion in deposits or 10.6 percent market share. US Bank is the fourth largest depository financial institution with 186 branches and $15 billion in deposits or 10.5 percent market share. As of December 31, 2016, Bank of America operated 164 financial centers and 395 deposit-taking ATMs in the areas of the state that exclude the multistate MSA.

Examiners use the bank's deposit volume as an indicator of its capacity to lend and invest in its assessment areas. In some cases, not all deposits originated from the local community. In

46 For institutions with branches in two or more states in a multistate metropolitan area, this statewide evaluation does not reflect performance in the parts of this state contained within the multistate metropolitan area. Refer to the multistate metropolitan area rating and discussion for the rating and evaluation of the institution's performance in that area.

the Seattle-Tacoma-Bellevue, WA MSA, Bank of America reported $2 billion in deposits of national corporations, in which the funds originated from communities across the nation and deposited in financial centers near the headquarters of these large corporations. Adjusting the bank's total deposits in the MSA by excluding these external deposits from the local deposit base gives a more accurate indicator of the bank's capacity in the assessment area.

Refer to the community profiles for the state of Washington in appendix C for detailed demographics and other performance context information for assessment areas that received full-scope reviews.

Scope of Evaluation in Washington

Examiners selected two assessment areas for full-scope reviews and the remaining eight assessment areas for limited-scope reviews. The full-scope assessment areas included the Bremerton-Silverdale, WA MSA and Seattle-Tacoma-Bellevue, WA MSA. While the Seattle-Tacoma-Bellevue, WA MSA carries approximately 88 percent weight of the overall conclusions based on the bank's presence there relative to all assessment areas in Washington, examiners based the conclusions and ratings for the state on the activities within all assessment areas. During the evaluation period, Bank of America originated or purchased 47,793 home mortgage loans totaling nearly $13.6 billion, 89,483 small loans to businesses totaling $2.1 billion, 1,334 small loans to farms totaling nearly $28 million, and 114 CD loans totaling $548 million. Based on loan volume, examiners weighted small loans to businesses, representing 65 percent of the overall volume, the most followed by home mortgage loans, representing 34 percent of the volume, and small loans to farms, representing less than 1 percent of the volume.

The bank did not originate or purchase a sufficient volume of small loans to farms in the Longview MSA to provide any meaningful analyses.

The OCC interviewed three local housing and community services based organizations, which identified affordable housing, as the most pressing community development need.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN WASHINGTON

LENDING TEST

Conclusions for Areas Receiving Full-Scope Reviews

Bank of America's performance under the Lending Test in the state of Washington is rated Outstanding, based on excellent lending activity, excellent geographic distribution, good borrower income distribution, and high levels of CD lending that have a significantly positive effect on overall Lending Test performance. Performance in limited-scope assessment areas has a neutral effect on the state rating.

Lending Activity

Based on total lending volume in Table 1, peer deposit and loan data for 2016, and relevant performance context considerations, the bank's lending activity in the state of Washington is excellent. Lending activity is excellent in the Bremerton-Silverdale, WA MSA and Seattle-Tacoma-Bellevue, WA MSA and excellent in all of the remaining assessment areas.

Bremerton-Silverdale, WA MSA

Lending activity in the Bremerton-Silverdale, WA MSA is excellent. Based on FDIC deposit data as of June 30, 2016, Bank of America has a deposit market share of 22.2 percent. The bank ranks first among 16 depository financial institutions in the assessment area, which places it in the top 7 percent of institutions. According to peer mortgage data for 2016, the bank has a market share of 2 percent based on the number of home mortgage loans originated or purchased. The bank ranks 15th among 346 home mortgage lenders, which places it in the top 5 percent of lenders competing for loans. According to peer small business data for 2016, the bank has an 8.6 percent market share of small loans to businesses based on the number of small loans to businesses originated or purchased. The bank ranks third among 53 small business lenders, which places it in the top 6 percent of lenders in the MSA. According to peer farm data for 2016, the bank has a market share of 36.7 percent based on the number of small loans to farms originated or purchased. The bank ranks first among nine farm lenders, which places it in the top 12 percent of lenders. Considering the bank's higher ranking among all lenders for home mortgage loans and small loans to farms relative to its ranking for deposits, overall lending activity is excellent.

Seattle-Tacoma-Bellevue, WA MSA

Lending activity in the Seattle-Tacoma-Bellevue, WA MSA is excellent. Based on FDIC deposit data as of June 30, 2016, the bank has a deposit market share of 26.7 percent. The bank ranks first among 52 depository financial institutions in the assessment area, which places it in the top 2 percent of institutions. According to peer mortgage data for 2016, the bank has a market share of 2.9 percent based on the number of home mortgage loans originated or purchased. The bank ranks eighth among 633 home mortgage lenders, which places it in the top 2 percent of lenders. According to peer small business data for 2016, the bank has a 13.1 percent market share of small loans to businesses based on the number of small loans to businesses originated or purchased. The bank ranks third among 128 small business lenders, which places it in the top 3 percent of lenders. For small loans to farms, the bank has a market share of 31.8 percent based on the number of small loans to farms originated or purchased. The bank ranks first among 20 farm lenders, which places it in the top 5 percent of lenders. Considering the bank's deposits and deposit market share include $2 billion in deposits not derived from the MSA along with a similar ranking for home mortgage loans and a slightly lower ranking for small loans to businesses relative to its ranking for deposits, overall lending activity is excellent.

(**) The evaluation period for Community Development Loans is January 1, 2012 to December 31, 2016.
(***) Deposit data as of June 30, 2016. Rated area refers to either the state or multi-state MSA as appropriate.

Distribution of Loans by Income Level of the Geography

The bank's geographic distribution of loans reflects good penetration in low- and moderate-income geographies. For this analysis, examiners compared the bank's HMDA-reportable loan originations and purchases, small loans to businesses, and small loans to farms with available demographic information. Examiners also considered any relevant performance context information and aggregate lending data.

Home Mortgage Loans

Refer to Table O for the facts and data used to evaluate the geographic distribution of the bank's originations/purchases of home mortgage loans.

The overall geographic distribution of home mortgage loans is good. The distribution is excellent in the Bremerton-Silverdale, WA MSA and good in the Seattle-Tacoma-Bellevue, WA MSA.

Bremerton-Silverdale, WA MSA

The geographic distribution of home mortgage loans in the Bremerton-Silverdale, WA MSA is excellent. Because there are no low-income geographies, examiners based the overall conclusion on the excellent distribution in moderate-income geographies. The distribution in moderate-income geographies at 14.1 percent is higher than the 13.2 percent of owner-occupied housing units in moderate-income geographies and it is slightly higher than the 14 percent for aggregate lenders.

Seattle-Tacoma-Bellevue, WA MSA

The geographic distribution of home mortgage loans in the Seattle-Tacoma-Bellevue, WA MSA is good. Performance is excellent in low-income geographies and adequate in moderate-income geographies. The distribution of home mortgage loans in low-income geographies at

1.6 percent is consistent with the 1.6 percent of owner-occupied housing units in low-income geographies and it is slightly lower than the 1.7 percent performance for aggregate lenders. The distribution in moderate-income geographies at 11.9 percent is lower than the 15.6 percent of owner-occupied housing units in moderate-income geographies and it is lower than the 14.6 percent performance for aggregate lenders.

Small Loans to Businesses

Refer to Table Q for the facts and data used to evaluate the geographic distribution of the bank's originations/purchases of small loans to businesses.

The overall geographic distribution of small loans to businesses is excellent. The distribution is good in the Bremerton-Silverdale, WA MSA and excellent in the Seattle-Tacoma-Bellevue, WA MSA.

Bremerton-Silverdale, WA MSA

The geographic distribution of small loans to businesses in the Bremerton-Silverdale, WA MSA is good. Because there are on low-income geographies, examiners based the overall conclusion on the good distribution in moderate-income geographies. The distribution in moderate-income geographies at 12.6 percent is lower than the 14.8 percent of businesses in moderate-income geographies; however, it is higher than the 11.7 percent performance for aggregate lenders.

Seattle-Tacoma-Bellevue, WA MSA

The geographic distribution of small loans to businesses in the Seattle-Tacoma-Bellevue, WA MSA is excellent. The distribution is excellent in low-income geographies and good in moderate-income geographies. The geographic distribution in low-income geographies at 4.9 percent is higher than the 4.7 percent of businesses in low-income geographies and it is higher than the 4 percent performance for aggregate lenders. The geographic distribution in moderate-income geographies at 16.1 percent is lower than the 17.6 percent of businesses in moderate-income geographies; however, it is higher than the 15.8 percent performance of aggregate lenders.

Small Loans to Farms

Refer to Table S for the facts and data used to evaluate the geographic distribution of the bank's originations/purchases of small loans to farms.

The overall geographic distribution of small loans to farms is poor. The geographic distribution is excellent in the Bremerton-Silverdale, WA MSA and poor in the Seattle-Tacoma-Bellevue, WA MSA.

Bremerton-Silverdale, WA MSA

The geographic distribution of small loans to farms in the Bremerton-Silverdale, WA MSA is excellent. Because there are no low-income geographies in the MSA, examiners based the overall conclusion on the excellent distribution in moderate-income geographies. The geographic distribution in moderate-income geographies at 13.6 percent is higher than the 7.1

percent of farms in moderate-income geographies and it exceeds the 6.7 percent for aggregate lenders.

Seattle-Tacoma-Bellevue, WA MSA

The geographic distribution of small loans to farms in the Seattle-Tacoma-Bellevue, WA MSA is poor, based on poor performance in low-income geographies and poor performance in moderate-income geographies. The bank did not originate or purchase any small loans to farms in low-income geographies compared to 0.3 percent for aggregate lenders. Approximately 2.2 percent of the farms are located in low-income geographies. The geographic distribution in moderate-income geographies at 6.3 percent is lower than the 15.4 percent of farms in moderate-income geographies and it is lower than the 10.1 percent for aggregate lenders.

Lending Gap Analysis

For areas receiving full-scope reviews, examiners noted no conspicuous or unexplained gaps in lending in low- and moderate-income geographies.

Inside/Outside Ratio

See the "Inside/Outside Ratio" section within the overall Scope of Evaluation.

Distribution of Loans by Income Level of the Borrower

The bank's distribution of loans by borrower income and revenue size is good. For this analysis, examiners compared the bank's HMDA-reportable loan originations and purchases, small business, and small farm lending with available demographic information. Examiners also considered any relevant performance context information and aggregate lending data.

Home Mortgage Loans

Refer to Table P for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases.

The overall distribution of home mortgage loans by borrower income is good. The distribution is excellent in the Bremerton-Silverdale, WA MSA and good in the Seattle-Tacoma-Bellevue, WA MSA.

Bremerton-Silverdale, WA MSA

The distribution of home mortgage loans by borrower income in the Bremerton-Silverdale, WA MSA is excellent. The distribution is excellent to low-income borrowers and it is excellent to moderate-income borrowers. The proportion of the bank's home mortgage loans to low-income borrowers at 10.2 percent is lower than the 17.9 percent of low-income families in the MSA; however, the bank's performance significantly exceeds the 4.2 percent for aggregate lenders. The proportion of home mortgage loans to moderate-income borrowers at 19.4 percent is higher than the 19 percent of moderate-income families and it is higher than the 17.1 percent performance for aggregate lenders.

Seattle-Tacoma-Bellevue, WA MSA

The distribution of home mortgage loans by borrower income in the Seattle-Tacoma-Bellevue, WA MSA is good. The distribution is good to low-income borrowers and it is good to moderate-income borrowers. The proportion of the bank's home mortgage loans to low-income borrowers at 7 percent is lower than the 20.2 percent of low-income families in the assessment area; however, it is higher than the 3.7 percent performance for aggregate lenders. The proportion of loans to moderate-income borrowers at 15 percent is lower than the 17.9 percent of moderate-income families in the MSA; however, it exceeds the 14.4 percent performance for aggregate lenders.

Small Loans to Businesses

Refer to Table R for the facts and data used to evaluate the borrower distribution of the bank’s originations and purchases of small loans to businesses.

The distribution of small loans to businesses with gross annual revenues of $1 million or less is good overall. The distribution is adequate in the Bremerton-Silverdale, WA MSA and good in the Seattle-Tacoma-Bellevue, WA MSA. The bank did not collect or consider the gross annual revenues in the underwriting of approximately 36 percent of its small loans to businesses.

Bremerton-Silverdale, WA MSA

The distribution of small loans to businesses with gross annual revenues of $1 million or less in the Bremerton-Silverdale, WA MSA is adequate. Based on businesses with known revenues, the proportion of the bank’s small loans to businesses at 49.1 percent is lower than the 82.1 percent of businesses with gross annual revenues of $1 million or less. Considering the bank’s distribution is stronger than the 39 percent for aggregate lenders, overall performance is adequate.

Seattle-Tacoma-Bellevue, WA MSA

The distribution of small loans to businesses with gross annual revenues of $1 million or less in the Seattle-Tacoma-Bellevue, WA MSA is good. Based on businesses with known revenues, the proportion of the bank's small loans to businesses at 51.8 percent is lower than the 78.8 percent of businesses with gross annual revenues of $1 million or less. Considering the bank's distribution is stronger than the 38.9 percent for aggregate lenders, overall performance is good.

Small Loans to Farms

Refer to Table T for the facts and data used to evaluate the borrower distribution of the bank's originations and purchases of small loans to farms.

The distribution of small loans to farms with gross annual revenues of $1 million or less is adequate. The distribution is adequate in the Bremerton-Silverdale, WA MSA and Seattle-Tacoma-Bellevue, WA MSA. The bank did not collect or consider the gross annual revenues in the underwriting of approximately 42 percent of its small loans to farms.

Bremerton-Silverdale, WA MSA

The distribution of small loans to farms with gross annual revenues of $1 million or less in the Bremerton-Silverdale, WA MSA is adequate. Based on farms with known revenues, the proportion of the bank's small loans to farms at 45.5 percent is lower than the 97.5 percent of farms with gross annual revenues of $1 million or less; however, the bank's distribution exceeds the 40 percent for aggregate lenders.

Seattle-Tacoma-Bellevue, WA MSA

The distribution of small loans to farms with gross annual revenues of $1 million or less in the Seattle-Tacoma-Bellevue, WA MSA is adequate. Based on farms with known revenues, the proportion of the bank's small loans to farms at 47.7 percent is lower than the 95.5 percent of farms with gross annual revenues of $1 million or less and it is lower than the 54.1 percent for aggregate lenders.

Community Development Lending

CD lending has a significantly positive effect overall on the bank's Lending Test performance in the state of Washington. To help assess the bank's capacity to lend, examiners compared the dollar volume of CD loans with the dollar volume of the bank's net Tier 1 Capital allocated to the assessment area according to the assessment area's proportion of deposits.

Bremerton-Silverdale, WA MSA

In the Bremerton-Silverdale, WA MSA, CD lending has a neutral effect on the lending performance in the assessment area. During the evaluation period, the bank originated four CD loans totaling $444,000 that helped provide eight units of affordable housing. CD lending represents 0.6 percent of the allocated Tier 1 Capital. The bank met the community's credit needs primarily through retail lending.

Seattle-Tacoma-Bellevue, WA MSA

In the Seattle-Tacoma-Bellevue, WA MSA, CD lending has a significantly positive effect on the lending performance in the assessment area. During the evaluation period, the bank originated 73 CD loans totaling $419.3 million that primarily helped provide more than 3,200 units of affordable housing. CD lending represents 13.9 percent of the adjusted allocated Tier 1 Capital, after considering approximately $2 billion in deposits from national corporations in which the deposits did not derive from the local community. Examples of significant CD loans include:

- The bank provided $11.4 million in construction financing for the Plymouth Housing Group's 65-unit affordable housing development. The developer set aside one unit for the onsite property manager. The remaining 64 studio apartment units are restricted to incomes at or below 60 percent of the area median income.

- The bank provided $2.4 million in funding to acquire and predevelop City Center Apartments, a 347-unit multifamily housing project in Lynnwood, WA. Because Bank of

America funded approximately 75 percent of the construction loans, examiners allocated 260 of the units to Bank of America. All units are restricted to incomes at or below 60 percent of the area median income.

- In partnership with Alliant Capital, the bank provided $3.9 million in acquisition and predevelopment financing to develop Villas at Auburn in Auburn, WA. The development is a 295-unit multifamily housing project. Examiners allocated 236 units to the bank based on its 80 percent participation in the partnership. All units are restricted to incomes at or below 60 percent of the area median income.

Product Innovation and Flexibility

Bank of America offers various national and local flexible lending programs that have benefitted borrowers during the evaluation period. These include programs such as America's Home Grant, Affordable Loan Solutions, and Business Advantage Credit Line. The bank also participates with multiple organizations that provide flexible lending through NACA and other affordable housing programs. Within the state of Washington, lending under the MHA and HARP programs accounted for 84 percent of the dollar volume of all loans under flexible lending programs.

Conclusions for Areas Receiving Limited-Scope Reviews

Lending Test performance varied across the limited-scope assessment areas. Performance in the Kennewick-Richland, WA MSA, Longview, WA MSA, Olympia-Tumwater, WA MSA, Spokane-Spokane Valley, WA MSA, Yakima, WA MSA, and Washington Non-MSA is consistent with the Outstanding Lending Test performance in the state of Washington. Performance in the Bellingham, WA MSA and Mount Vernon-Anacortes, WA MSA is weaker than the Outstanding Lending Test performance in the state of Washington primarily due to weaker distributions of loans by borrower income and lower levels of CD lending.

INVESTMENT TEST

Conclusions for Areas Receiving Full-Scope Reviews

Refer to Table 14 for the facts and data used to evaluate the bank's level of qualified investments.

Bank of America's performance under the Investment Test in the state of Washington is rated High Satisfactory. Investment Test performance is poor in the Bremerton-Silverdale, WA MSA and it is excellent in the Seattle-Tacoma-Bellevue, WA MSA. Poor performance in limited-scope assessment areas has a negative effect on the state rating.

Bremerton-Silverdale, WA MSA

In the Bremerton-Silverdale, WA MSA, Bank of America has a poor level of CD investments. The bank made 21 CD investments during the current evaluation period totaling $2.6 million. In addition, the bank has six CD investments totaling $278,000 it made during a prior evaluation period that are still outstanding and continue to provide benefit to the community. Approximately $2.6 million or 98 percent of the investment dollars supported 15 units of affordable housing. Prior period and current period investments total $2.9 million or 3.6 percent of allocated Tier 1 Capital. The majority of current period investments are neither innovative nor complex with mortgage-backed securities representing $2.6 million or 97 percent of the investment dollars.

Seattle-Tacoma-Bellevue, WA MSA

In the Seattle-Tacoma-Bellevue, WA MSA, the bank has an excellent level of CD investments. The bank made 330 CD investments during the evaluation period totaling $258.1 million. In addition, the bank has 158 CD investments totaling $85.4 million it made during a prior evaluation period that are still outstanding and continuing to provide benefit to the community. Prior period and current period investments total $343.5 million or 11.4 percent of the adjusted allocated Tier 1 Capital, after considering the $2 billion in deposits that did not originate from the assessment area. Approximately $249.9 million or 97 percent of the investment dollars supported 3,258 units of affordable housing. The majority of current period investments are innovative or complex with LIHTCs representing approximately $131.4 million or 51 percent of the investment dollars.

Examples of community development investments include:

- The bank purchased $7.8 million in LIHTCs to help fund the construction of Aurora Apartments, a 71-unit affordable housing development in Seattle, WA. Tenants targeted are homeless single adults or couples without children and homeless disabled veterans. Five units are not income restricted and three units are reserved for resident managers. The remaining 63 units are restricted to incomes at or below 30 percent of the area median income.

- The bank purchased $13.6 million in LIHTCs to support the construction of Compass at Ronald Commons, an affordable housing development in Seattle, WA. The project is a mixed-use building consisting of two condominium developments. The first condominium development includes 60 units that are restricted to incomes at or below 50 percent of the area median income. Half of those units are restricted to incomes at 30 percent of the area median income, which are further restricted to homeless families and veterans, and households with individuals with developmental disabilities. The bank also provided a construction loan for this project. The second condominium development houses Hopelink’s Shoreline Integrated Service Center. The service center features a full, grocery store-style food bank and provides emergency financial help for eviction prevention and energy assistance. The organization also offers adult education and financial coaching and assistance for those seeking employment.

- The bank purchased $10.6 million in LIHTCs to support the construction of Delridge Supportive Housing, a new four-story 66-unit affordable housing development in Seattle. This housing development will provide permanent supportive housing for chronically homeless single adults. All units are restricted to incomes at or below 30 percent of the area median income. The bank also provided the construction loan for this project.

(*) 'Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
(**) 'Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the bank's financial reporting system.

Conclusions for Areas Receiving Limited-Scope Reviews

Investment Test performance varied across the limited-scope assessment areas. Performance in the Mount Vernon-Anacortes, WA MSA is consistent with the High Satisfactory Investment Test performance in the state of Washington. Performance in the Spokane-Spokane Valley, WA MSA is stronger than the High Satisfactory Investment Test performance in the state of Washington primarily due to a higher level of CD investments relative to the bank's financial capacity in the assessment area. Performance in the Bellingham, WA MSA, Kennewick-Richland, WA MSA, Longview, WA MSA, Olympia-Tumwater, WA MSA, Yakima, WA MSA, and Washington Non-MSA is weaker than the High Satisfactory Investment Test performance in the state of Washington primarily due to the limited community development investment activity. The poor performance in a majority of the limited-scope assessment areas has a negative effect on the overall Investment Test rating.

SERVICE TEST

Conclusions for Areas Receiving Full-Scope Reviews

Bank of America's performance under the Service Test in the state of Washington is rated Outstanding. Service Test performance is excellent in the Bremerton-Silverdale, WA MSA and Seattle-Tacoma-Bellevue, WA MSA. Performance in limited-scope assessment areas has a neutral effect on the state rating.

Retail Banking Services

Refer to Table C for the facts and data used to evaluate the accessibility of the bank's retail banking services.

Bremerton-Silverdale, WA MSA

In the Bremerton-Silverdale, WA MSA, the bank's service delivery systems are readily accessible to geographies and individuals of different income levels. Examiners based this conclusion on a comparison of the distribution of the bank's seven financial centers with the distribution of the population. Because there are no low-income geographies, examiners based the conclusion on the distribution performance in moderate-income geographies. The bank has two or 28.6 percent of its financial centers located in moderate-income geographies. Considering 19.5 percent of the population lives in moderate-income geographies, the distribution performance is excellent.

Examiners also considered the bank's alternative delivery systems, including ATMs, and telephone, online, mobile, and text banking in evaluating accessibility to the bank's products and services. Based on customer usage, alternative delivery systems have no effect on the retail banking services conclusion.

The bank has one financial center in a middle-income census tract that is adjacent to or in very close proximity to a moderate-income census tract. The adjacent financial center provides individuals in moderate-income geographies additional accessibility to retail banking services.

Financial center openings and closings did not adversely affect the accessibility of retail banking services, particularly in low- and moderate-income geographies and to low- and moderate-income individuals. During the evaluation period, the bank closed one financial center in an upper-income geography.

Banking products and services do not vary in a way that inconveniences the assessment area, particularly in low- and moderate-income geographies or to low- and moderate-income individuals. The bank offers a full range of products and services. All financial centers are open 10:00 am to 5:00 pm Monday through Thursday and 10:00 am to 6:00 pm on Friday. All financial centers, except one located in a moderate-income geography, are open for Saturday banking between the hours of 10:00 am and 1:00 pm.

Table C - Branch and ATM Distribution by Geography Income Level

Assessment Area: FS Bremerton-Silverdale WA MSA

Due to rounding, totals may not equal 100.0

Seattle-Tacoma-Bellevue, WA MSA

In the Seattle-Tacoma-Bellevue, WA MSA, the bank's service delivery systems are readily accessible to geographies and individuals of different income levels. Examiners based this conclusion on a comparison of the distribution of the bank's 128 financial centers with the distribution of the population. The bank has 11 or 8.6 percent of its financial centers in low-income geographies. The bank also has 27 or 8.9 percent of its ATMs in low-income geographies. Considering 4 percent of the population lives in low-income geographies along with additional access provided by adjacent financial centers, financial center distribution is excellent. The bank 32 or 25 percent of its financial centers and 73 or 23.9 percent of its ATMs in moderate-income geographies. Considering 20.8 percent of the population resides in moderate-income geographies, financial center distribution is excellent.

Examiners also considered the bank's alternative delivery systems, including ATMs, and telephone, online, mobile, and text banking in evaluating accessibility to the bank's products and services. Based on customer usage, alternative delivery systems have a significantly positive effect on the accessibility of the bank's service delivery systems to low- and moderate-income individuals and geographies. The proportions of customers in low- and moderate-income geographies using the five ADS platforms are near to or exceeds the proportion of the population in low- and moderate-income geographies. For example, cash dispensing ATM usage, full-service ATM usage, and text banking usage by customers in low- and moderate-income geographies exceed the proportion of the population in low- and moderate-income geographies. Considering the additional accessibility provided through alternative delivery systems, Alternative delivery systems have a significantly positive effect on the retail banking services conclusion.

The bank has 18 financial centers in middle- and upper-income census tracts that are adjacent to or in very close proximity to low- and moderate-income census tracts. Six of the adjacent financial centers provide additional access to retail banking services in low-income geographies and twelve financial centers provide additional access in moderate-income geographies.

Financial center openings and closings generally did not adversely affect the accessibility of retail banking services, particularly in low- and moderate-income geographies or to low- and moderate-income individuals. During the evaluation period, the bank closed 13 financial centers and opened five. The bank closed one financial center in a low-income geography, one in a moderate-income geography, and the remaining eleven in middle- and upper-income geographies. Despite the closures, financial centers remain readily accessible to individuals and geographies of different income levels.

Banking products and services do not vary in a way that inconvenience the assessment area, particularly in low- and moderate-income geographies or to low- and moderate-income individuals. The bank offers a full range of products and services. Financial centers are generally open 10:00 am to 6:00 pm Monday through Friday. Saturday banking is generally available 10:00 am to 1:00 pm.

Community Development Services

Bremerton-Silverdale, WA MSA

The bank provides few community development services in the MSA. During the evaluation period, the bank participated with community development organizations to provide 12 community development services targeted to low- and moderate-income individuals. Employees provided five financial education for 131 elementary school students that are primarily from low- and moderate-income families. Employees participated in seven webinars and workshops with non-profit organizations to help the organizations with capacity building. No employees served on the boards or committees of community organizations. The types of CD services provided are responsive to the needs identified in the community.

Seattle-Tacoma-Bellevue, WA MSA

The bank provides a relatively high level of community development services in the MSA. During the evaluation period, the bank participated with community development organizations to provide 168 community development services targeted to low- and moderate-income individuals. Employees provided 42 financial education workshops and 70 foreclosure prevention workshops for 1,200 individuals. Attendees to the financial education workshops were primarily students from low- and moderate-income families. Employees participated in 47 webinars and workshops with non-profit organizations to help the organizations with capacity building. In addition, nine employees served on the boards or committees of community organizations. The types of CD services provided are responsive to the needs identified in the community.

Conclusions for Areas Receiving Limited-Scope Reviews

Service Test performance varied across the limited-scope assessment areas. Performance in the Bellingham, WA MSA, Longview, WA MSA, and Yakima, WA MSA is consistent with the Outstanding Service Test performance in the state of Washington. Performance in the Kennewick-Richland, WA MSA, Mount Vernon-Anacortes, WA MSA, Olympia-Tumwater, WA MSA, Spokane-Spokane Valley, WA MSA, and Washington Non-MSA is weaker than the Outstanding Service Test performance in the state of Washington. Performance is weaker primarily due to the weaker distribution of financial centers.

Appendix A: Scope of Examination

The following table identifies the time period covered in this evaluation, affiliate activities that examiners reviewed, and loan products examiners considered. The table also reflects the metropolitan and nonmetropolitan areas that received comprehensive examination review (designated by the term "full-scope") and those that received a less comprehensive review (designated by the term "limited-scope").

The Allentown-Bethlehem-Easton, PA-NJ MSA comprises Carbon, Lehigh, and Northampton counties in Pennsylvania and Warren County in New Jersey. As of June 30, 2016, BANA deposits in the MSA comprised approximately 0.1 percent of the total deposits of the bank.

Employment and Economic Factors

The Allentown-Bethlehem-Easton, PA-NJ MSA has a well-diversified economy. Key sectors of the economy include trade, transportation, and utilities; professional and business services; and government. Three of the top employers in the assessment area including their number of employees are Lehigh Valley Health Network (13,191), St. Luke's University Health Network (8,652), and Air Products and Chemicals (3,000).

Based on data from the Bureau of Labor Statistics, the January 2012 unemployment rate in the Allentown-Bethlehem-Easton, PA-NJ MSA was 8.5 percent. The unemployment rate in December 2016 fell to 4.6 percent.

Housing

The Census Bureau's American Community Survey (ACS) 5-year estimate for 2012-2016 reports the median housing value at $200,000. According to the 2016 National Association of

Realtors Housing Affordability Index (HAI)[47] of 218, a family earning the median income has twice the income necessary to qualify for a conventional loan to purchase a median priced home. Based on the HAI index, housing affordability is not a primary issue for the assessment area.

Community Contacts

A review of community contacts indicated that the following are identified needs within the community:

- Affordable rental housing
- Affordable for-sale housing
- Financial literacy/education
- Credit counseling

Opportunities for participation by financial institutions include the following:

- Lending and investment in affordable housing
- Lending and investment in economic development and workforce development
- Supporting community development services such as financial literacy
- Supporting non-profit health providers and prevention
- Working with the area's community development corporation network
- Various state and local government partnership opportunities

The Augusta-Richmond County, GA-SC MSA comprises Burke, Columbia, Lincoln, McDuffie, and Richmond counties in Georgia and Aiken and Edgefield counties in South Carolina. As of June 30, 2016, BANA deposits in the MSA comprised less than 0.1 percent of the total deposits of the bank. The Augusta-Richmond County, GA-SC MSA is the second largest MSA in the state of Georgia after Atlanta and it is the 93rd largest in the U.S.

<u>Employment and Economic Factors</u>

The Augusta-Richmond County, GA-SC MSA has a well-diversified economy. The MSA, best known for hosting The Masters golf tournament each spring, brings in over 200,000 visitors from around the world. Membership in the Augusta National Golf Club is widely considered the most exclusive in the golf sport worldwide. The MSA is also home to Fort Gordon, a major army military base. The Augusta-Richmond County, GA-SC MSA is a regional center of medicine, biotechnology, and cyber security. In 2016, Fort Gordon announced plans to base the new National Cyber Security Headquarters in Augusta and bring up to 10,000-cyber security specialist to the area. Key sectors of the economy include government; trade, transportation, and utilities; and professional and business services. Major employers in the MSA include Fort Gordon (20,000 employees), Augusta University (4,700 employees), Richmond County School System (4,400 employees), Augusta-Richmond County (4,400 employees) and University Hospital (3,200 employees).

Based on data from the Bureau of Labor Statistics, the January 2012 unemployment rate in the Augusta-Richmond County, GA-SC MSA was 9.2 percent. The unemployment rate in December 2016 fell to 5.2 percent.

Housing

The Census Bureau's American Community Survey (ACS) 5-year estimate for 2012-2016 reports the median housing value at $130,700. According to the 2010 U.S. Census, 60 percent of the housing units in the assessment area are owner-occupied, 27 percent are rentals, and 13 percent are vacant. Low-income census tracts have a greater proportion of rental housing than in moderate-, middle-, or upper-income geographies. Only 3.4 percent of the area's owner-occupied housing units are located in low-income census tracts.

Community Contacts

A review of community contacts indicated that the following are identified needs within the community:

- Affordable rental housing
- Affordable for-sale housing
- Financial literacy/education
- Credit counseling

Opportunities for participation by financial institutions include the following:

- Lending and investment in affordable housing
- Lending and investment in economic development and workforce development
- Supporting community development services such as financial literacy
- Supporting non-profit health providers and prevention
- Working with the area's community development corporation network
- Various state and local government partnership opportunities

The Boston-Cambridge-Newton, MA-NH MSA comprises Norfolk, Plymouth, Suffolk, Middlesex, and Essex counties in Massachusetts and Rockingham and Strafford in New Hampshire. As of June 30, 2016, BANA deposits in the MSA comprised approximately 5 percent of the total deposits of the bank.

Employment and Economic Factors

The Boston-Cambridge-Newton, MA-NH MSA has a well-diversified economy. Key sectors of the economy include Education and Health Services, Government, Professional and Business Services and Finance. Major employers in the assessment area include Partners Healthcare, University of Massachusetts, Steward Health Care System, Beth Israel Deaconess Medical Center, and Sate Street Corp.

Based on data from the Bureau of Labor Statistics, the January 2012 unemployment rate in the Boston-Cambridge-Newton, MA-NH MSA was 6.6 percent. The unemployment rate in January 2016 fell to 2.5 percent.

Housing

The National Association of Realtors reports that the median price of a home in the Boston-Cambridge-Newton, MA-NH MSA at the end of 2015 was $400,890, an increase from $346,200 at the end of 2011. This increase reflects a continued rise in median home prices, indicating housing affordability remains a significant issue in the assessment area. The 2016 Housing Affordability Index (HAI)[48] composite score for the MSA was 133.8. The index measures affordability of housing for a single family earning the median family income necessary to qualify for a mortgage loan to purchase a median priced home. The higher the score, the more affordable the home. The HAI score for the MSA reflects a higher cost of housing in comparison to the national average of 167.1.

Community Contacts

A review of community contacts indicated that the following are identified needs within the community:

- Affordable rental housing
- Affordable for-sale housing
- Health literacy as evidenced by rise in obesity and chronic disease
- Living wage employment
- Financial literacy/education
- Credit counseling
- Checking accounts
- Crime prevention and youth activities

Opportunities for participation by financial institutions include the following:

- Lending and investment in affordable housing
- Lending and investment in economic development and workforce development
- Supporting community development services such as financial literacy
- Supporting non-profit health providers and prevention
- Working with the area's community development corporation network
- Various state and local government partnership opportunities

The Charlotte-Concord-Gastonia, NC-SC MSA is a multistate MSA comprising Cabarrus, Gaston, Iredell, Lincoln, Mecklenburg, Rowan, and Union counties in North Carolina and Chester, Lancaster, and York Counties in South Carolina. Mecklenburg County, with a 2016-estimated population of 1,054,835, is the most populous county in the MSA. The largest municipality in the MSA is the City of Charlotte, with an estimated population of 842,051. As of June 30, 2017, BANA deposits in the MSA fell slightly from 2011 to approximately 12.8 percent of the total deposits of the bank.

<u>Employment and Economic Factors</u>

Historically perceived as textile center, today the region is an acknowledged banking center. Today, the region is growing rapidly and adding jobs in insurance, IT, banking, and manufacturing. Construction jobs and retail service jobs have also expanded during the evaluation period. The area is home to a number of Fortune 500 corporations, including Bank of America, Family Dollar, Goodrich, Nucor, Sonic Automotive, and SPX. Smaller companies are just as important to the local economy. Entrepreneur and Fortune magazines have named the City of Charlotte as one of the nation’s best large cities for entrepreneurs to start and operate a business.

Some of the largest employers in the region include American Tire Distributors Holdings, Bank of America, Carlisle Companies, Chiquita Brands, CommScope Holding Co., Curtiss-Wright Controls Corp., Domtar Corporation, Duke Energy Corporation, Family Dollar Stores, Lowe’s Companies, SPX Corporation, and The Babcock & Wilcox Company, among others. The

Charlotte Douglas International Airport is also a major employer, with nearly 18,634 employees. The airport is the fifth busiest airport in the U.S. It also serves as the second largest hub for American Airlines. According to the Bureau of Labor Statistics, the unemployment rate in the MSA showed a marginal decreasing trend during the evaluation period. Unemployment fell from 10.4 percent in December 2011 to 3.8 percent in September 2017.

Housing

The National Association of Realtors details the increase in the median sales price of homes during the evaluation period. For 2017, the median sales price of a home in the MSA has increased to $233,200 from $211,100 during the second quarter of 2011. Luxury housing is on the rise, but affordable housing is becoming scarcer due to rising construction costs, rising land costs and elimination of local tax credits. The 2016 Housing Affordability Index (HAI)[49] composite score for the MSA was 183.1. The index measures affordability of housing for a single family earning the median family income necessary to qualify for a mortgage loan to purchase a median priced home. The higher the score, the more affordable the home. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1.

Community Contacts

A review of community contacts indicated that the following are identified needs within the community:

- Affordable housing financing and fund investment
- Financial education
- Workforce development funding
- Small business financing
- Multi-family affordable housing
- Financial Support of housing programs targeting low- and moderate-income persons
- Opportunities for participation by financial institutions include the following:
    - Working with local, statewide and regional CDFIs to offer community development
    - investments, loans and services
- Working with non-profits focused on community development activities
- Working with state government agencies focused on affordable housing for lending and investment opportunities

The Kansas City, MO-KS MSA comprises Johnson, Leavenworth, Linn, Miami, and Wyandotte counties in Kansas and Bates, Caldwell, Cass, Clay, Clinton, Jackson, Lafayette, Platte and Ray counties in Missouri.

Employment and Economic Factors

The Kansas City, MO-KS MSA has a well-diversified economy. Key sectors of the economy include trade, transportation, utilities, professional and business services, and government. Three of the top employers in the assessment area including their number of employees are Cerner Corporation (14,444), Ford Motor Company Assembly Plant (7,320), and Hallmark Cards, Inc. (5,166).

Based on data from the Bureau of Labor Statistics, the August 2018 unemployment rate in the Kansas City, MO-KS MSA was 3.6 percent.

Housing

The Census Bureau's American Community Survey (ACS) 5-year estimate for 2012-2016 reports the median housing value at $135,900. However, the National Association of Realtors (NAR) reported the median much higher at $215,000. The 2016 Housing Affordability Index (HAI)[50] composite score for the MSA was 235.9. The index measures affordability of housing

[50] Copyright 2017 "Affordability Index of Existing Single-Family Homes for Metropolitan Areas" National Association of Realtors.

for a single family earning the median family income necessary to qualify for a mortgage loan to purchase a median priced home. The higher the score, the more affordable the home. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1. The 2012-2016 Kansas City Consolidated plan reported there was a housing need for low-income families, as 70.5 percent of the housing stock was built between 1940-1979. The plan also indicated a high rate of abandoned and vacant housing stock.

Community Contacts

A review of community contacts indicated that the following are identified needs within the community:

- Affordable rental housing
- Affordable for-sale housing
- Affordable construction loans
- Financial literacy/education
- Credit counseling
- Small business lending

Opportunities for participation by financial institutions include the following:

- Lending and investment in affordable housing
- Lending and investment in economic development and workforce development
- Supporting community development services such as financial literacy
- Supporting non-profit health providers and prevention
- Working with the area’s community development corporation network. The 2012-2016 Kansas City Consolidated Plan listed this need. The Consolidated Plan specifically listed the following two CD corporations: Neighborhood Stabilization Program and the new Partnership Purchase Rehab Program
- Various state and local government partnership opportunities

The Myrtle Beach-Conway-North Myrtle Beach, SC-NC-MSA comprises Horry and Georgetown counties in South Carolina and Brunswick County in North Carolina.

Employment and Economic Factors

The Myrtle Beach-Conway-North Myrtle Beach, SC-NC-MSA has a well-diversified economy. Key sectors of the economy include government, education, medical, accommodation and food service, entertainment, recreation and real estate rental and leasing. Seven of the top employers in the assessment area including their number of employees are Horry County School District (5,650), Walmart (2,800), Horry County Government (2,200), Coastal Carolina University (2,125), Conway Hospital (1,400), Grand Strand Regional Medical Center (1,350), and Food Lion (1,150).

Based on data from the Bureau of Labor Statistics, the August 2018 unemployment rate in the Myrtle Beach-Conway-North Myrtle Beach, SC-NC-MSA was 4.1 percent.

Housing

The Census Bureau's American Community Survey (ACS) 5-year estimate for 2012-2016 reports the median housing value at $173,600. However, the National Association of Realtors (NAR) reported the median much higher at $222,600. The 2016 Housing Affordability Index

(HAI)[51] composite score for the MSA was 167.8. The index measures affordability of housing for a single family earning the median family income necessary to qualify for a mortgage loan to purchase a median priced home. The higher the score, the more affordable the home. The HAI score for the MSA reflects a cost of housing that is similar in comparison to the national average of 167.1.

The 2016-2020 Horry County Consolidated plan reported there was a housing need for owner-occupied rehabilitation for low-income families. Housing costs are highest in the central business districts of Myrtle Beach and North Myrtle Beach. The area relies heavily on seasonal tourism.

<u>Community Contacts</u>

A review of community contacts indicated that the following are identified needs within the community:

- Small business lending
- Job creation

Opportunities for participation by financial institutions include the following:

- Lending and investment in affordable housing
- Lending and investment in economic development and workforce development
- Supporting community development services such as financial literacy
- Supporting non-profit health providers and prevention
- Working with the area's community development corporation network
- Various state and local government partnership opportunities

The New York-Newark-Jersey City, NY-NJ-PA multistate MSA comprises multiple geographies in the states of New York, New Jersey, and Pennsylvania. There are four metropolitan divisions (MDs) within this MSA, including: New York-Jersey City-White Plains, NY-NJ; Newark, NJ-PA; NY; Nassau County-Suffolk County, NY; and Duchess County-Putnam County. The New York-Jersey City-White Plains assessment area consists of the following counties: Bergen, NJ, Hudson, NJ, Middlesex, NJ, Monmouth, NJ, Ocean, NJ, Passaic, NJ, Bronx, NY, Kings, NY, New York, NY, Orange, NY, Queens, NY, Richmond, NY, Rockland, NY, and Westchester, NY. The Newark, NJ assessment area consists of Rockland NY, Westchester NY. The Nassau County-Suffolk County, NY assessment area consists of Nassau and Suffolk counties. The Newark, NJ assessment area consists of the following counties: Essex NJ, Hunterdon NJ, Morris NJ, Somerset, NJ, Sussex NJ, and Union NJ.

The MSA contains the principal cities of New York and White Plains in New York and Newark, Jersey City, and New Brunswick in New Jersey.

<u>Employment and Economic Factors</u>

New York City, the principal city in the MSA is the single largest regional urban economy in the country. NYC is home to a diversified mix of businesses including the headquarters of many national and international corporations. Historically, the downtown area of Manhattan (lower Manhattan) dominated the financial services industry, while midtown Manhattan has been home to advertising, publishing, and garment production. The retail sector is a major employer along with health and social care, and finance and insurance. New York is also a major manufacturing center and shipping port, and it has a thriving technological sector. Among the largest employers are Northwell Health, JP Morgan Chase, Mount Sinai Hospital, Macy's, Citibank, New York-Presbyterian Healthcare System, Bank of America, Continuum Health Partners Inc., Verizon Communications, Montefiore Medical Center, NYU Langone Medical Center, New York University, and Columbia University. The unemployment rate is at an all-time low of 4.3 percent, although pockets of depressed employment remain.

Housing

The cost of living in the area is high and it affects borrowing ability. Housing affordability is a significant issue, along with a very low rental vacancy rate and crowding for large or doubled-up households. According to the National Association of Realtors as of December 2016, the median sales price of a single family home in the MSA was $382,300. Based on information from the U.S. Census Bureau as of 2016, the median rent in the MSA was $1,150. Housing costs in many communities are unaffordable for low and moderate-income households. Other significant issues across the MSA include homelessness and support services.

The 2016 Housing Affordability Index (HAI)[52] composite score for the MSA was 119.6. The index measures affordability of housing for a single family earning the median family income necessary to qualify for a mortgage loan to purchase a median priced home. The higher the score, the more affordable the home. The HAI score for the MSA reflects a higher cost of housing in comparison to the national average of 167.1.

Community Contacts

There are numerous opportunities in the area to participate in community development activities. Various well-established community development entities serve the area, including community development corporations, community development financial institutions (CDFIs), nonprofit entities, and governmental and quasi-governmental organizations focused on areas such as affordable housing, economic development, asset development and financial education, community services, and youth programs.

Community contacts identified the following credit and community development needs within this MSA:

- Affordable housing, particularly for the chronically homeless
- Higher paying jobs
- Foreclosure prevention assistance
- Affordable banking products
- Grants for operating, development, or programmatic support

Good opportunities exist to make community development investments and loans in the MSA. At least 39 CDFIs are actively operating in NYC. Most are large CDFIs and offer various community development opportunities.

[52] Copyright 2017 "Affordability Index of Existing Single-Family Homes for Metropolitan Areas" National Association of Realtors.

Opportunities for participation by financial institutions include the following:

- Working with various non-profits on affordable housing financing
- Grants to community development non-profit organizations
- Working with local government to assist low- and moderate-income individuals with affordable housing
- Small business lending
- Volunteer support for financial literacy

The Philadelphia-Camden-Wilmington, PA-NJ-DE-MD MSA comprises New Castle County in Delaware; Cecil County in Maryland; Burlington, Camden, and Gloucester counties in New Jersey; and Bucks, Chester, Delaware, Montgomery, and Philadelphia counties in Pennsylvania. The bank has delineated its assessment area to include all of the MSA, except Cecil County, MD and Salem County, NJ.

<u>Employment and Economic Factors</u>

The Philadelphia-Camden-Wilmington, PA-NJ-DE-MD MSA has a well-diversified economy. Key sectors of the economy include medical colleges, technology, health related businesses, trade, professional and business services, and government. Three of the top employers in the assessment area including their number of employees are University of Pennsylvania and Health System (33,000), Comcast Corporation (22,000), and Thomas Jefferson University and Jefferson Health (20,000).

Based on data from the Bureau of Labor Statistics, the August 2018 unemployment rate in the Philadelphia-Camden-Wilmington, PA-NJ-DE-MD MSA was 6 percent.

Housing

The Census Bureau's American Community Survey (ACS) 5-year estimate for 2012-2016 reports the median housing value at $147,300. However, Realtor.com reports the median much higher at $219,000. The 2016 National Association of Realtors' Housing Affordability Index (HAI)[53] composite score for the MSA was 207.6. The index measures affordability of housing for a single family earning the median family income necessary to qualify for a mortgage loan to purchase a median priced home. The higher the score, the more affordable the home. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1. The 2017-2021 City of Philadelphia Consolidated Plan reported there was a housing need for low-income families. There is also a need for affordable rental units in the city.

Community Contacts

A review of community contacts indicated that the following are identified needs within the community:

- Affordable rental housing
- Affordable for-sale housing
- Affordable construction loans
- Financial literacy/education
- Credit counseling
- Small business lending

Opportunities for participation by financial institutions include the following:

- Lending and investment in affordable housing
- Lending and investment in economic development and workforce development
- Supporting community development services such as financial literacy
- Supporting non-profit health providers and prevention
- Working with the area's community development corporation network
- Various state and local government partnership opportunities

The Portland-Vancouver-Hillsboro, OR-WA MSA comprises Clackamas, Columbia, Multnomah, Washington, and Yamhill counties in Oregon and Clark and Skamania counties in Washington. The portion of the MSA in the state of Oregon is the state's largest urban center while the portion in the state of Washington is its state's second largest urban center after Seattle. The 2017 American Community Survey estimates the population at 2.4 million, a 10 percent increase from the population estimate from the 2010 census.

<u>Employment and Economic Factors</u>

The Portland-Vancouver-Hillsboro, OR-WA MSA has a well-diversified economy. Key sectors of the economy include trade, scientific, tech services, manufacturing, healthcare and social assistance, professional and business services, and government. Five of the top employers in the assessment area including their number of employees are Intel (20,000), Providence Health & Services (18,286), Oregon Health & Science University (16,658), Kaiser Permanente (12,400), and Nike, Inc. (12,000).

Based on data from the Bureau of Labor Statistics, the August 2018 unemployment rate in the Portland-Vancouver-Hillsboro, OR-WA MSA was 3.8 percent.

Housing

The Census Bureau's American Community Survey (ACS) 5-year estimate for 2012-2016 reports the median housing value at $319,400. However, the National Association of Realtors (NAR) reported the median housing value much higher at $407,100. The 2016 Housing Affordability Index (HAI)[54] composite score for the MSA was 124. The index measures affordability of housing for a single family earning the median family income necessary to qualify for a mortgage loan to purchase a median priced home. The higher the score, the more affordable the home. The HAI score for the MSA reflects a higher cost of housing in comparison to the national average of 167.1. The 2016-2020 City of Portland Consolidated Plan reported there was a need for affordable rental homes. Rental unit costs have increased an average of 8-9 percent over the past four years.

Community Contacts

A review of community contacts indicated that the following are identified needs within the community:

- Affordable rental housing
- Affordable for-sale housing
- Low-income mortgage assistance
- Down-payment assistance
- Financial literacy/education
- Credit counseling

Opportunities for participation by financial institutions include the following:

- Lending and investment in affordable housing
- Lending and investment in economic development and workforce development
- Supporting community development services such as financial literacy
- Supporting non-profit health providers and prevention
- Working with the area's community development corporation network
- Various state and local government partnership opportunities

<u>Employment and Economic Factors</u>

The St. Louis, MO-IL-MSA has a well-diversified economy. Key sectors of the economy include management of companies, manufacturing, healthcare, social assistance, trade, transportation, utilities, professional and business services, and government. Three of the top employers in the assessment area including their number of employees are BJC Health Systems (21,468), Boeing International Defense Systems (15,500), and Scott Air Force Base (12,600). St Louis is the headquarters for many Fortune 1000 and Fortune 500 companies. These include Anheuser-Busch Companies, Inc., Emerson Electric, May Department Stores, Monsanto Company, TALX, and Panera bread. Three of the major American automakers operate assembly plants in the area – General Motors, Chrysler, and Ford.

Based on data from the Bureau of Labor Statistics, the December 2016 unemployment rate in the St Louis, MO-IL MSA was 3.9 percent.

Housing

The Census Bureau's American Community Survey (ACS) 5-year estimate for 2012-2016 reports the median housing value at $167,400. The 2016 Housing Affordability Index (HAI)[56] composite score for the MSA was 250.2. The index measures affordability of housing for a single family earning the median family income necessary to qualify for a mortgage loan to purchase a median priced home. The higher the score, the more affordable the home. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1.

There is a need for loans to rehabilitate the housing stock. According to the 2015-2019 St Louis City Consolidated Plan, development of 73 percent of the housing stock occurred prior to 1950. There is also a need for code enforcement on these projects.

Community Contacts

A review of community contacts indicated that the following are identified needs within the community:

- Affordable rental housing
- Affordable for-sale housing
- Financial literacy/education
- Credit counseling
- Small business lending
- Work force development

Opportunities for participation by financial institutions include the following:

- Lending and investment in affordable housing
- Lending and investment in economic development and workforce development
- Supporting community development services such as financial literacy
- Supporting non-profit health providers and prevention
- Working with the area's community development corporation network
- Various state and local government partnership opportunities

The Washington-Arlington-Alexandria, DC-VA-MD-WV MSA comprises the principal cities of Washington, DC; Arlington, VA; Alexandria, VA; Silver Spring, MD; Frederick, MD; Rockville, MD; Bethesda, MD; Gaithersburg, MD; and Reston, VA. BANA excludes Jefferson County, West Virginia from the bank's assessment area.

<u>Employment and Economic Factors</u>

The Washington-Arlington-Alexandria, DC-VA-MD-WV MSA has a well-diversified economy. Key sectors of the economy include biotechnology, defense contracting, and tourism. Major employers in the assessment area include MedStar Health, Inova Health System, Marriott International Inc., University of Maryland, College Park, Washington Metropolitan Area Transit Authority, Booz Allen Hamilton Inc., and Giant Food LLC.

Based on data from the Bureau of Labor Statistics, in January 2012, the unemployment rate in the Washington-Arlington-Alexandria, DC-VA-MD-WV MSA was 6.3 percent. In December 2016, the unemployment rate decreased to 3.6 percent.

<u>Housing</u>

The National Association of Realtors reports that the median price of a single-family home at December 31, 2014 was $381,800 for the Washington-Arlington-Alexandria, DC-VA-MD-WV MSA. As of December 31, 2016, this value rose to $390,600. Given the overall high median home price, housing affordability continues to be a significant issue in the assessment area.

The 2016 Housing Affordability Index (HAI)[57] composite score for the MSA was 159.3. The index measures affordability of housing for a single family earning the median family income necessary to qualify for a mortgage loan to purchase a median priced home. The higher the score, the more affordable the home. The HAI score for the MSA reflects a higher cost of housing in comparison to the national average of 167.1.

Community Contacts

A review of community contacts indicated that the following are identified needs within the community:

- Affordable housing is a top priority
- Access to capital for entrepreneurs through traditional banks and training resources
- Economic development and workforce development
- Need equity capital for CDFIs and loan pools
- Gentrification is one of the biggest issues affecting DC causing homeowners on fixed income and older businesses to be priced out

Opportunities for participation by financial institutions include the following:

- Lending and investment to expand the number of HUD housing counselors
- Lending and investment to provide access to credit and to help transition from renting to owning
- Supporting community development services such as financial literacy and technical assistance to small business owners
- Supporting CDFI network to help revamp small businesses and expand minority and women-owned small businesses

The Worcester, MA-CT MSA comprises Windham County in Connecticut and Worcester County in Massachusetts.

Employment and Economic Factors

The Worcester, MA-CT MSA has a well-diversified economy. Key sectors of the economy include educational, health services, manufacturing, trade, transportation, utilities, professional and business services, and government. Four of the top employers in the assessment area including their number of employees are EMC Corporation (now part of Dell) (9,400), UMass-Memorial Health Care (12,906), UMass Medical school (4,400), and Hanover Insurance Group (4,900).

Based on data from the Bureau of Labor Statistics, the December 2016 unemployment rate in the Worcester, MA-CT MSA was 3.7 percent.

Housing

The Census Bureau's American Community Survey (ACS) 5-year estimate for 2012-2016 reports the median housing value at $245,200. The 2016 Housing Affordability Index (HAI)[58] composite score for the MSA was 194.2. The index measures affordability of housing for a single family earning the median family income necessary to qualify for a mortgage loan to

[58] Copyright 2017 "Affordability Index of Existing Single-Family Homes for Metropolitan Areas" National Association of Realtors.

purchase a median priced home. The higher the score, the more affordable the home. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1

The 2015-2020 City of Worcester Consolidated plan reported there was a need for rehabilitation of many two and three family housing units, due to greater than 80 percent of this housing stock was built before 1940. Emerging industries require workforce training. There are plans for public and private investment in the downtown area, in the City of Worcester.

Community Contacts

A review of community contacts indicated that the following are identified needs within the community:

- Affordable rental housing
- Affordable for-sale housing
- Affordable construction loans
- Affordable housing for low-income families
- Rehabilitation of older homes for rental housing
- Financial literacy/education
- Credit counseling
- Small business lending
- Work force development

Opportunities for participation by financial institutions include the following:

- Lending and investment in affordable housing
- Lending and investment in economic development and workforce development
- Supporting community development services such as financial literacy
- Supporting non-profit health providers and prevention
- Working with the area’s community development corporation network
- Various state and local government partnership opportunities

The Lake Havasu City-Kingman, AZ MSA comprises Mohave County. As of the 2010 census, the population of the MSA was 200,186, with a 2016-estimated population of 205,249. Between 2010 and 2015, the MSA averaged minimal growth of 0.4 percent, much lower than the state average of 1.4 percent. This limited growth makes the MSA one of the slower growing MSAs in the state.

<u>Employment and Economic Factors</u>

Employment rates in this area have seen improvement during the rating period. According to the Moody's Analytics report, this improvement is due to the increase in tourism in the MSA, which leads to more employment opportunities in the leisure/hospitality market. In addition, the MSA is experiencing growth among the retiree community leading to an increase in healthcare jobs. Top employers in the MSA according to Moody's include Kingman Regional Medical Center, Wal-Mart, Havasu Regional Medical Center, and Freeport-McMoRan Mine. As of December 31, 2016, the median family income in this MSA was $47,530. Based on the Bureau of Labor statistics, the unemployment rate as of the same period was 6 percent. This percentage remains well above the state unemployment rate of 5 percent as of December 31, 2016.

Housing

The Census Bureau's American Community Survey (ACS) 5-year estimate for 2012-2016 reports the median housing value at $208,800, which is slightly higher than the national average of $205,000. According to the 2010 U.S. Census, 53 percent of the housing units in the assessment area are owner-occupied, 21 percent are rentals, and 26 percent are vacant.

Community Contacts

A review of the community contacts indicated that the following are identified needs within the community:

- Affordable Housing programs focusing on low-income and the senior population
- Financial Literacy Education for youth and young adults
- Leadership Development program for new young talent
- Workforce Development
- Neighborhood Revitalization program that will help invest in areas to keep young workers in the community

Opportunities for participation by financial institutions include the following:

- Lending and investing in affordable housing and neighborhood revitalization/stabilization projects
- Supporting community development by providing educational programs such as financial literacy, leadership development, and drug/alcohol addiction

The Phoenix-Mesa-Scottsdale, AZ MSA comprises Maricopa and Pinal counties. As of the 2010 census, the population of the MSA was 4.2 million, making it the 12th largest MSA in the nation by population. According to the U.S. Census Bureau, the 2016 population for the MSA was 4.6 million, making it one of the fasting growing metro areas in the country.

Employment and Economic Factors

Employment rates in this area have seen improvement during the rating period. As outlined on the Bureau Labor of Statistics website, the unemployment rate in the MSA declined from 8 percent in January 2012 to 4.1 percent in December 2016. The unemployment rate in the MSA as of December 2016 remains slightly lower than the state and national rates, which are 5 percent and 4.5 percent, respectfully. Top employers in the MSA, according to the Moody's report, include Banner Health System, Fry's Food Stores, Wells Faro, Arizona State University, Intel Corp, JPMorgan Chase, and American Airlines Group.

Housing

The 2016 Housing Affordability Index (HAI)[59] composite score for the MSA was 159. The index measures affordability of housing for a single family earning the median family income necessary to qualify for a mortgage loan to purchase a median priced home. The higher the

[59] Copyright 2017 "Affordability Index of Existing Single-Family Homes for Metropolitan Areas" National Association of Realtors.

score, the more affordable the home. The HAI score for the MSA reflects a higher cost of housing in comparison to the national average of 167.1.

Community Contacts

A review of the community contacts indicated that the following are identified needs within the community:

- Affordable Housing programs focusing on developing and sustaining affordable housing programs
- Affordable Rental Programs for low wage, full time workers
- Education programs with emphasis on reading at grade level
- Financial Literacy Education for youth and adults
- Hunger Relief Programs
- Workforce Development Programs
- Neighborhood stabilization and revitalization programs

Opportunities for participation by financial institutions include the following:

- Lending and investing in affordable housing, affordable rental housing for low-wage earners and neighborhood revitalization/stabilization projects in low- and moderate-income and distressed areas
- Supporting community development by providing educational programs such as financial literacy, reading and comprehension literacy, leadership and workforce development, and homebuyer education and counseling programs
- Provide opportunities for food security to assist with hunger relief, as Arizona is one of the worst states in the U.S. for childhood hunger

The Fayetteville-Springdale-Rogers, AR-MO MSA comprises Benton, Madison, and Washington counties in Arkansas and McDonald County in Missouri. BANA's assessment area delineation excludes McDonald County. The demographics and statistics reflect the MSA as a whole, unless otherwise noted. As of the 2010 census, the population in the MSA was 465,802, making it the 108th largest MSA in the nation by population. The population grew approximately 10 percent between 2010 and 2016 to 525,176 in 2016. The Census projects the population in the MSA to increase to 537,847 by 2020.

<u>Employment and Economic Factors</u>

Employment rates in this MSA have seen improvement during the evaluation period. According to the Bureau of Labor Statistics, the unemployment rate in the MSA declined from 6.5 percent in January 2012 to 2.7 percent in December 2016. The unemployment rate in December 2016 remains well below the state and national averages of 4.3 percent and 4.5 percent, respectfully. According to the Moody's Analytical report, this improvement is due to the stability of the largest employer in the MSA, Wal-Mart. Other top employers in the area, according to Moody's, include University of Arkansas, Tyson Foods, Inc., J.B. Hunt Transport Services, Inc., and Washington Regional Medical Center.

Housing

The Census Bureau's American Community Survey (ACS) 5-year estimate for 2012-2016 reports the median housing value at $151,800. Based on the ACS, total housing units have increased from 182,052 units in 2010 to 205,416 units in 2016. Approximately 91 percent of the housing units are occupied, 61 percent being owner-occupied and 39 percent being renter-occupied. Of the approximately 114,305 units that are owner-occupied, 66 percent of the units having existing mortgages.

Community Contacts

A review of the community needs assessment indicated that the following are identified needs within the community:

- Affordable Housing programs for low-income families and those living just above the poverty line
- Community Service programs that offer basic needs such as food, public transportation, clothing, etc.
- Childcare programs that offer affordable childcare costs
- Financial Literacy programs for youth and adults
- Hunger Relief and Food Insecurity programs that support childhood hunger
- Veterans Support programs
- Workforce Development programs that are tailored to the diverse abilities within the community

Opportunities for participation by financial institutions include the following:

- Lending and investing in affordable housing and affordable rental housing for low wage earners
- Supporting community development by providing educational programs such as financial literacy and workforce development
- Provide opportunities for food security to assist with hunger relief, especially for childhood hunger
- Supporting the community providing workers access to affordable childcare

The Little Rock-North Little Rock-Conway, AR MSA comprises Faulkner, Grant, Lonoke, Perry, Pulaski, and Saline counties. According to the U.S. Census Bureau, the 2016 population increased to 730,107.

Employment and Economic Factors

Employment rates in this MSA have improved dramatically during the rating period. According to the Bureau of Labor Statistics, the unemployment rate in the MSA declined from 7.4 percent in January 2012 to 3.3 percent in December 2016. The unemployment rate in the MSA remains below the national and state average of 4.7 percent and 3.9 percent, respectfully. The professional services, healthcare, and governmental services are the most prominent industries in the MSA and expected to continue to boost growth. Some of the largest employers include University of Arkansas for Medical Sciences, Baptist Health, Little Rock Air Force Base, and Arkansas Children's Hospital.

Housing

According to the National Association of Realtors (NAR), the average Housing Affordability Index (HAI)[60] for the MSA in 2016 was 256.2, which is higher than the national average HAI of

[60] Copyright 2017 "Affordability Index of Existing Single-Family Homes for Metropolitan Areas" National Association of Realtors

167.1. This difference indicates that homes in this MSA are more affordable for the typical family. According the NAR, the HAI measures whether or not a family earning the median family income could qualify for a mortgage loan on median priced home. As such, the higher the index, the more affordable the homes are in the area.

Community Contacts

A review of the community needs assessment indicated that the following are identified needs within the community:

- Affordable housing for the low- and moderate-income population
- Financial Literacy Education for youth and adults
- Hunger Relief and Food Insecurity services
- Workforce Development programs
- Neighborhood Revitalization/Stabilization

Opportunities for participation by financial institutions include the following:

- Lending and investing in affordable housing and neighborhood revitalization and stabilization projects
- Supporting community development by providing educational programs such as financial literacy and workforce development
- Provide opportunities for food security to assist with hunger relief, especially for elderly and childhood hunger

(*) The NA category consists of geographies that have not been assigned an income classification.

The Fresno, CA MSA comprises Fresno County. According to the Census Bureau Fact Finder website, the total population in 2010 was 930,450 in the MSA. According to the U.S. Census Bureau, the 2016 population was 979,534.

Employment and Economic Factors

During the rating period, unemployment rates have fluctuated, but are declining. According to the Bureau of Labor Statistics (BLS), the unemployment rate in the MSA declined from 17.2 in January 2012 to 9.4 in December 2016. As of December 2016, the unemployment rates remain higher than the state and national rates, which are 5.2 percent and 4.5 percent, respectively. Per the BLS, major occupations in the MSA included Office and Administrative Support; Sales; Food Preparation and Serving; Farming, Fishing, and Forestry; and Education, Training, and Library. Some of the largest employers in the assessment area are Community Medical Center, Saint Agnes Medical Center, Ruiz Food Products, Inc., California State University – Fresno, and Kaiser Permanente.

Housing

According to the 2010 U.S. Census, 50 percent of the total housing units in the assessment area were owner occupied, and 41 percent were rental occupied units. The composition of housing units in low-income census tracts is 5 percent owner-occupied, 15.2 percent renter-occupied, and 11.1 percent are vacant units. For units in moderate-income census tracts, 20.8 percent are owner-occupied, 34.9 percent are renter-occupied, and 26.5 percent are vacant units. Low- and moderate-income census tracts have the lowest levels of owner-occupied units and the highest level of rental and vacant units in the MSA. The median home price in the assessment area is $249,443, according to data from the 2010 Census.

Community Contacts

A review of the community needs assessment indicated that the following are identified needs within the community:

- Affordable housing financing and affordable mortgage lending
- Financial Literacy Education for youth and adults
- Homebuyer Education and Counseling programs for low- and moderate-income homebuyers
- Workforce Development programs
- Downtown and Neighborhood Revitalization/Stabilization

Opportunities for participation by financial institutions include the following:

- Lending and investing in affordable housing given the need for high density, transit oriented, and affordable mixed use housing
- Supporting community development by providing educational programs such as financial literacy, homebuyer education, and workforce development
- Provide opportunities for the revitalization of the downtown areas as well as other neighborhoods in the MSA, specifically in the older and low- to moderate-income areas.

The Los Angeles-Long Beach-Anaheim, CA MSA comprises two metropolitan divisions (MDs): Los Angeles-Long Beach-Glendale, CA and Anaheim-Santa Ana-Irvine, CA. These MDs are comprised of two counties in CA, which are Orange and Los Angeles. According to U.S. Census Bureau, the 2016 total population of this MSA was 13.3 million. The MSA is projected to have a population of 14.2 million by 2020.

Employment and Economic Factors

Unemployment rates in the MSA have seen a significant drop during the rating period. According to the Bureau of Labor Statistics (BLS), the unemployment rate in the MSA declined from 11.1 in January 2012 to 4.4 in December 2016. As of December 2016, the MSA reported unemployment rates below that of the state and nation; reported as 5.2 percent and 4.5 percent, respectively. The BLS further shows that as of May 2016, major occupations in the MSA included Office and Administrative Support; Sales; Food Preparation and Serving; Transportation and Material Moving; Business and Financial Operations; and Education, Training, and Library. Some of the largest employers in the MSA include University of California (Los Angeles, Irvine, and Santa Barbara), Kaiser Permanente, Disneyland Resort, The Walt Disney Co., University of Southern California, and Northrop Grumman Corp.

Housing

According to the National Association of Realtors (NAR), the average Housing Affordability Index (HAI)[61] for the Los Angeles-Long Beach-Glendale MD in 2016 was 73.2. The HAI for the Anaheim-Santa Ana-Irvine MD was 67.1. The HAI for both MDs are significantly lower than the national average of 167.1. This difference indicates that homes in the area are much less affordable for the typical family. According the NAR, the HAI measures whether or not a family earning the median family income could qualify for a mortgage loan on a typical home at the national and regional levels based on the most recent monthly price and income data. As such, the higher the index, the more affordable the homes are in the area.

Community Contacts

Needs assessments for both MDs indicated the following identified needs within the community:

- Affordable housing and affordable rental housing
- Financial Literacy Education for adults
- Disability Support Services, including transportation services
- Homebuyer Education and Counseling programs for first time homebuyers
- Workforce Development programs
- Hunger Relief programs
- Neighborhood and environmental revitalization programs

Opportunities for participation by financial institutions include the following:

- Lending and investing in affordable housing, to include rental housing
- Supporting community development by providing educational programs such as financial literacy, homebuyer education, and workforce development
- Supporting the community by providing services to the elderly and disabled, to include transportation
- Provide opportunities for the revitalization of the neighborhood and environment

The Riverside-San Bernardino-Ontario, CA MSA comprises Riverside and San Bernardino counties. According to the U.S. Census Bureau, the 2016 population had grown to 4.5 million. The projected population for the area by 2020 is a total population of 4.7 million.

<u>Employment and Economic Factors</u>

According to Moody's, this MSA is one of the fastest growing areas in the economy, which is consistent with the decline in the unemployment rate. Per the Bureau of Labor Statistics (BLS), the unemployment rate in the MSA declined from 12.2 percent in January 2012 to 5.1 percent in December 2016. While the MSA's unemployment rate for December 2016 is in line with the 5.2 percent unemployment rate for the state, the MSA's rate remains slightly higher than the national average of 4.5 percent. The BLS further shows that as of May 2016, major occupations in the MSA included Office and Administrative Support; Transportation and Material Moving; Sales; Food Preparation and Serving; Education, Training, and Library; Production; and Healthcare. Some of the largest employers in the assessment area are Starter Brothers Markets, Arrowhead Regional Medical Center, U.S. Marine Corps Air Ground Combat Center, Fort Irwin, Wal-Mart Stores, Inc., and Loma Linda University.

Housing

According to the National Association of Realtors (NAR), the average Housing Affordability Index (HAI)[62] for the MSA in 2016 was 112.3, which is lower than the national average of 167.1. This difference indicates that homes in this MSA are less affordable for the typical family. According the NAR, the HAI measures whether or not a family earning the median family income could qualify for a mortgage loan on a typical home at the national and regional levels based on the most recent monthly price and income data. As such, the higher the index, the more affordable the homes are in the area.

Community Contacts

A review of the community needs assessment indicated that the following are identified needs within the community:

- Affordable housing and affordable rental housing
- Financial Literacy Education for adults
- Homebuyer Education and Counseling programs for first time homebuyers
- Workforce Development programs
- Hunger Relief programs
- Neighborhood stabilization programs

Opportunities for participation by financial institutions include the following:

- Lending and investing in affordable housing, to include rental housing
- Supporting community development by providing educational programs such as financial literacy, homebuyer education, and workforce development
- Provide opportunities for the stabilization of the neighborhoods to achieve preservation

The San Francisco-Oakland-Hayward, CA MSA comprises two metropolitan divisions (MDs): San Francisco-Redwood City-South San Francisco, CA and Oakland-Hayward-Berkeley, CA. These MDs are comprised of four counties in CA, which are San Mateo, San Francisco, Alameda, and Contra Costa. According to the U.S. Census Bureau, the 2016 population in the MSA was 4.7 million.

Employment and Economic Factors

Unemployment rates in the MSA have dropped during the rating period. According to the Bureau of Labor Statistics (BLS), the unemployment rate in the MSA declined from 8.5 in January 2012 to 3.5 in December 2016. As of December 2016, the MSA reported unemployment rates below that of the state and nation, reported at 5.2 percent and 4.5 percent, respectively. The BLS further shows that as of May 2016, major occupations in the MSA included Office and Administrative Support; Sales; Food Preparation and Serving; Business and Financial Operations; Management Operations; and Computer and Mathematical. Some of the largest employers in the MSA include University of California (Santa Cruz and Berkeley), Safeway Inc., Kaiser Permanente, Stanford University, University of San Francisco, and Genentech Inc.

Housing

According to the National Association of Realtors (NAR), the average Housing Affordability Index (HAI)[63] for the MSA in 2016 was 69.5, which is significantly lower than the national average of 167.1. This difference indicates that homes in the area are significantly less affordable for the typical family. According the NAR, the HAI measures whether or not a family earning the median family income could qualify for a mortgage loan on a typical home at the national and regional levels based on the most recent monthly price and income data. As such, the higher the index, the more affordable the homes are in the area.

Community Contacts

Needs assessments for both MDs indicated the following identified needs within the community:

- Affordable housing, affordable rental housing, and end gentrification
- Financial Literacy Education programs that support stability
- Workforce Development programs
- Neighborhood and environmental revitalization programs
- Crime Prevention Programs

Opportunities for participation by financial institutions include the following:

- Lending and investing in affordable housing, to include rental housing
- Supporting community development by providing educational programs such as financial literacy and workforce development
- Supporting the community by providing services to support crime prevention
- Provide opportunities for the revitalization of the neighborhood

The Denver-Aurora-Lakewood, CO MSA comprises the following 10 counties: Adams, Arapahoe, Broomfield, Clear Creek, Elbert, Denver, Douglas, Gilpin, Jefferson, and Park. BANA has defined its assessment area to include all of the MSA, except the cities of Denver and Broomfield. Unless otherwise indicated, the demographics and statistics discussed reflect the MSA as a whole. According to the U.S. Census Bureau, the population of the MSA increased from 2.5 million in 2010 to 2.9 million in 2016.

<u>Employment and Economic Factors</u>

Employment rates in this MSA improved during the rating period. According to the Bureau of Labor Statistics, the unemployment rate in the MSA declined from 8.5 percent in January 2012 to 2.6 percent in December 2016. As of December 2016, the unemployment rate in the MSA is in line with the state average of 2.7 percent, but is significantly below the national average of 4.5 percent. Per the Bureau of Labor Statistics, as of May 2016, Office and Administrative Support, Sales, Food Preparation and Serving, Business and Financial Operations, and Transportation, Material Moving, and Healthcare occupations are the major occupations in the MSA. Some of the largest employers HealthONE, University of Colorado Hospital, Lockheed Martin Corp., Centura Health, and United Airlines.

Housing

According to the National Association of Realtors (NAR), the average Housing Affordability Index (HAI)[64] for the MSA in 2016 was 125.3, a decline of 5 percent from the previous year. The MSA's 2016 HAI is below the national average of 167.1, which indicates homes are less affordable for families earning the median income. According the NAR, the HAI measures whether or not a family earning the median family income could qualify for a mortgage loan on a typical home at the national and regional levels based on the most recent monthly price and income data. As such, the higher the index, the more affordable the homes are in the area.

Community Contacts

A review of the community needs assessment indicated that the following are identified needs within the community:

- Affordable housing for all population
- Financial Literacy Education for youth, adults, and veterans
- Hunger Relief and Food Insecurity services
- Workforce Development programs
- Neighborhood Revitalization/Stabilization and Transportation

Opportunities for participation by financial institutions include the following:

- Lending and investing in affordable housing, including the construction of affordable housing, and neighborhood revitalization and stabilization projects
- Supporting community development by providing educational programs such as financial literacy and workforce development
- Provide opportunities for food security to assist with hunger relief, especially for elderly, children, and veterans.

(*) The NA category consists of geographies that have not been assigned an income classification.

The bank has designated its assessment area as the Bridgeport-Stamford-Norwalk, CT MSA. The MSA comprises Fairfield County. The assessment area meets the requirements of the CRA and does not arbitrarily exclude any low- or moderate-income geographies.

<u>Employment and Economic Factors</u>

Economic conditions, as reflected by the rate of unemployment, were strong during the evaluation period. According to the Bureau of Labor Statistics, the unemployment rate is declining in the MSA. As of December 2016, the unemployment rate for the Bridgeport-Stamford-Norwalk, CT MSA was 3.9 percent, reflecting a decrease from the 8.2 percent unemployment rate at the beginning of the 2012 evaluation period.

According to Moody’s Analytics in the Bridgeport-Stamford-Norwalk, CT MSA, the persistent job losses and rising unemployment threaten to derail Bridgeport-Stamford-Norwalk’s recovery. The Bridgeport area is the only metro area in Connecticut that has lost jobs over the past year. The MSA is a global financial center and has core professional services headquarters; above average exposures to high tech and has a highly educated workforce. Statistics also show a high cost of living, skewed income distribution in the Stamford area, and weak migration trends.

The top employment sectors in the Bridgeport-Stamford-Norwalk, CT MSA are manufacturing and trade, service producing industries, personal, business, and health services. Wholesale and retail trade continue to thrive in the area, due to its deep-sea port, interstate highways, and railroad hubs. Bridgeport is one of the largest financial centers in the New England area. Fairfield County is home to a dozen Fortune 500 Companies, which include General Electric, Pitney Bowes Inc., and Xerox Corporation. Top employers in the area are Peoples Bank, N.A., Deloitte, Charter Communications, Stamford Health, St. Vincent Medical Center, and Bridgeport Hospital.

Housing

According to the 2010 U.S. Census, 41.4 percent of the total housing units in the assessment area were owner occupied, and 32.6 percent were rental occupied units. The composition of housing units in low-income census tracts is 5.2 percent owner-occupied, 31.3 percent renter-occupied, and 25.9 percent are vacant units. For units in moderate-income census tracts, 15.9 percent are owner-occupied, 33.6 percent are renter-occupied, and 22.7 percent are vacant units. Low- and moderate-income census tracts have the lowest levels of owner-occupied units and the highest level of rental and vacant units in the MSA. The median home price in the assessment area is $503,921, according to data from the 2010 Census Data.

The 2016 Housing Affordability Index (HAI)[65] composite score for the MSA was 159.4. The index measures affordability of housing for a single family earning the median family income necessary to qualify for a mortgage loan to purchase a median priced home. The higher the score, the more affordable the home. The HAI score for the MSA reflects a higher cost of housing in comparison to the national average of 167.1.

Community Contacts

A review of the community needs assessment indicated that the following are identified needs within the community:

- Affordable housing for homeowners and renters
- Down payment assistance for first-time homebuyers
- Assistance with lead remediation and energy efficiency upgrades for aging housing
- Rehabilitation loans for homeowners
- Direct loans and grants for small businesses to support general operating needs

Opportunities for participation by financial institutions include the following:

- Lending and investing in affordable housing, including the construction of affordable housing, and neighborhood revitalization and stabilization projects
- Supporting community development by providing educational programs such as financial literacy and workforce development

Source: 2010 U.S. Census and 2016 D&B Data
Due to rounding, totals may not equal 100.0
(*) The NA category consists of geographies that have not been assigned an income classification.

The bank has designated its assessment area as the Hartford-West Hartford-East Hartford, CT MSA. The MSA comprises Hartford, Middlesex, and Tolland counties. The assessment area meets the requirements of the CRA and does not arbitrarily exclude any low- and moderate-income geographies.

According to the U.S. Census data for 2016, the MSA population has remained relatively unchanged from 1.2 million in 2010. Low-income families represent 21.4 percent of families in the assessment area and moderate-income families represent 17 percent of the assessment area population. The percentage of households in the assessment area living below the federal poverty income level of $24,250 was 6.7 percent for 2016, according to the Census Bureau's American Community Survey, the most recent data available. The household poverty rate for the assessment area was lower than the 9.8 percent for the state of Connecticut. The 2016 adjusted median family income of $82,299 for the assessment area was greater than the median family income of $71,346 for the state of Connecticut.

<u>Employment and Economic Factors</u>

Economic conditions, as reflected by the rate of unemployment, were strong during the evaluation period. According to the Bureau of Labor Statistics, the unemployment rate for the Hartford-West Hartford-East Hartford, CT MSA was 3.9 percent, reflecting a decrease from the 8.7 percent unemployment rate at the beginning of the 2012 evaluation period. The state of Connecticut's unemployment rate is higher than the Hartford MSA, at 4.4 percent.

According to Moody's Analytics, the Hartford-West Hartford-East Hartford, CT MSA economy is gaining steam, but the ongoing state budget impasse adds fragility to the area's recovery. Hartford has a well-educated workforce with above average wages. The workforce has high exposure to the state government.

Hartford is the capital city for the state of Connecticut. The top employment sectors in the Hartford-West Hartford-East Hartford, CT MSA are manufacturing, insurance services, education, supermarkets, gaming and resorts. The top employers are United Technologies, Lockheed Martin, Stop and Shop, Inc., Hartford Financial Services Group Inc., Yale University, and Foxwoods Resort Casino.

Housing

According to the 2010 U.S. Census, 23.7 percent of the total housing units in the assessment area were owner occupied, and 33.5 percent were rental occupied units. The composition of housing units in low-income CTs is 3.60 percent owner-occupied, 29.6 percent renter-occupied, and 30.2 percent vacant units. For units in moderate-income census tracts, 11.1 percent are owner-occupied, 22.4 percent renter-occupied, and 15.7 percent vacant units. The median home price in the assessment area is $257,503, according to data from 2010 Census Data.

The 2016 Housing Affordability Index (HAI)[66] composite score for the MSA was 224. The index measures affordability of housing for a single family earning the median family income necessary to qualify for a mortgage loan to purchase a median priced home. The higher the score, the more affordable the home. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1.

Community Contacts

A review of the community needs assessment indicated that the following are identified needs within the community:

- Affordable and better quality housing
- Funding to help eliminate blight and crime
- Funding to renovate parks
- Financial literacy
- Job training and job placement

Opportunities for participation by financial institutions include the following:

- Lending and investing in affordable housing, including the construction of affordable housing, and neighborhood revitalization and stabilization projects
- Supporting community development by providing educational programs such as financial literacy and workforce development
- Expand access to retail banking services by establishing more branches in low-income neighborhoods

(*) The NA category consists of geographies that have not been assigned an income classification.

The bank has designated its assessment area as the Dover, DE MSA. The MSA comprises Kent County. The assessment area meets the requirements of the CRA and does not arbitrarily exclude any low- and moderate-income geographies.

As detailed in the table above, the population in the assessment area was 162,310 according to the 2010 U.S. Census. Low-income families represent 18.7 percent of families in the assessment area. Moderate-income families represent 18.4 percent of the assessment area population. The percentage of households in the assessment area living below the federal poverty income level of $24,250 was 9.3 percent for 2016, according to the Census Bureau's American Community Survey, the most recent data available. The household poverty rate for the assessment area was lower than the 11.7 percent for the state of Delaware. The 2016 adjusted median family income of $60,949 for the assessment area was less than the median family income of $73,831 for the state of Delaware.

<u>Employment and Economic Factors</u>

Dover is the capital city and the second largest city in the state of Delaware. Economic conditions, as reflected by the rate of unemployment, were strong during the evaluation period. According to the Bureau of Labor Statistics, the unemployment rate is declining in the MSA. As of December 2016, the unemployment rate for the Dover, DE MSA was 4 percent, reflecting a decrease from the 8.3 percent unemployment rate at the beginning of the 2012 evaluation period.

According to Moody's Analytics, the economy has lost some of its luster. Payroll employment has fallen just over 3 percent in the last three months, compared with a more than 1 percent increase nationally. There are large swings in employment in the retail and leisure/hospitality segments. The area boasts an available and trainable labor force and a pool of skilled labor. The presence of Dover Airforce base offers stability for the area. Population growth is above average. There are low business and labor costs in an area with no general sales tax, no unitary tax, no fixtures tax, and no personal property or inventory tax.

The top employment sectors in the Dover, DE MSA are state and federal government, service producing industries, education, and health services. Dover is home to the Dover Air Force base, which offers the largest and busiest airfreight terminal in the Department of Defense. Top employers in the area are the State of Delaware, Dover Air Force Base, Christiana Care Health System, DuPont Company, Bank of America, N.A., Delaware State University, and University of Delaware.

Housing

According to the 2010 U.S. Census, 49.8 percent of the total housing units in the assessment area were owner-occupied and 32.3 percent were renter-occupied units. For units in moderate-income census tracts, 9.2 percent are owner-occupied, 20 percent are renter-occupied, and 16.1 percent are vacant units. The median home price in the assessment area is $204,861, according to data from the 2010 Census Data.

The 2016 Housing Affordability Index (HAI)[67] composite score for the MSA was 190. The index measures affordability of housing for a single family earning the median family income necessary to qualify for a mortgage loan to purchase a median priced home. The higher the score, the more affordable the home. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1

Community Contacts

A review of the community needs assessment indicated that the following are identified needs within the community:

- Affordable housing
- Supportive services for low- and moderate-income families
- Healthcare for the rising senior population
- Revitalization of older homes
- Support for homeless veterans

[67] Copyright 2017 "Affordability Index of Existing Single-Family Homes for Metropolitan Areas" National Association of Realtors.

Opportunities for participation by financial institutions include the following:

- Lending and investing in affordable housing, including the construction of affordable housing, and neighborhood revitalization and stabilization projects
- Supporting community development by providing educational programs such as financial literacy and workforce development
- Investing in Downtown Development District Projects and the Strong Neighborhoods Housing Fund

The Jacksonville, FL MSA comprises the following five counties: Baker, Clay, Duval, Nassau, and St. John. All five counties in this MSA are contiguous and located in northeastern Florida, bordering the state of Georgia and the Atlantic Ocean. According to the 2010 census, the population in the MSA totaled 1.3 million. The largest geographic subdivision within the MSA at the time of the 2010 census was the city of Jacksonville with a population of 822,000. Other large cities include St. Augustine, Fernandina Beach, Jacksonville Beach, Orange Park, Middleburg, Green Cove Springs, Macclenny, and St. Marys, GA. As of July 1, 2016, the population of the Jacksonville, FL MSA increased to an estimated 1.5 million.

<u>Employment and Economic Factors</u>

According to Moody's Analytics, the Jacksonville, FL MSA economy is stable, driven by defense, logistics, and financial centers. Employment in the MSA has steadily improved. Unemployment dipped to 3.7 percent, the lowest rate in more than a decade, and hourly wages topped the U.S. average for the first time since 2007, leading all other metropolitan areas in Florida. Defense payrolls remain an economic driver. Growth has been strong in high-income jobs in professional services, as well as retail and construction; however, leisure and hospitality performance declined due to reductions in hospitality-related jobs, compounded by historic flooding caused by Hurricane Irma in 2017.

Housing

The housing market in the assessment area is improving. House price appreciation is steadily increasing. House price appreciation exceeded the national averages since late 2014, and the gap continued to grow as of late 2017. House price appreciation, however, continues to lag state averages. In the Jacksonville, FL MSA, housing is more affordable than state averages, and it is comparable to national averages.

The 2016 Housing Affordability Index (HAI)[68] composite score for the MSA was 177.4. The index measures affordability of housing for a single family earning the median family income necessary to qualify for a mortgage loan to purchase a median priced home. The higher the score, the more affordable the home. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1.

Community Contacts

A review of community contacts and local community development plans identified the following needs and/or challenges within the market:

- Rental assistance for the homeless, previously incarcerated individuals and low- and moderate-income individuals with low credit scores and/or a history of eviction
- “Second Chance” banking and credit opportunities
- Availability of affordable housing units
- Investor effect on housing availability

Opportunities for participation by financial institutions include the following:

- Funding for reserves to maintain affordable housing quality
- Grants for housing development and to fund supportive (wrap-around) services to low- and moderate-income families
- Grants for ongoing operational expenses of the nonprofit
- Construction financing for development projects
- Grants to fund emergency assistance programs for low- and moderate-income families
- Access to low cost checking accounts

Due to rounding, totals may not equal 100.0
(*) The NA category consists of geographies that have not been assigned an income classification.

The Miami-Fort Lauderdale-West Palm Beach, FL MSA comprises three metropolitan divisions (MDs), including the Fort Lauderdale-Pompano Beach-Deerfield Beach, FL MD, which consists of Broward County; the Miami-Miami Beach-Kendall, FL MD, which consists of Miami-Dade County; and the West Palm Beach-Boca Raton-Delray Beach, FL MD, which consists of Palm Beach County. All three counties in this MSA are contiguous and located in the south of Florida.

Principal cities in this MSA include Miami, Fort Lauderdale, West Palm Beach, Pompano Beach, Miami Beach, Boca Raton, Kendall, Deerfield Beach, Delray Beach, and Jupiter.

Overall, the MSA has a total population of approximately 5.5 million people. The Miami-Miami Beach-Kendall, FL MD is the largest of the MDs within the MSA, with an estimated 2016 population of 2.5 million, compared to an estimated population of 1.7 million for the Fort Lauderdale-Pompano Beach-Deerfield Beach, FL MD and an estimated population of 1.4 million for the West Palm Beach-Boca Raton-Delray Beach, FL MD.

The Miami, FL MD is a diverse and densely populated urban center. The greatest concentration of low-and moderate-income geographies in the MSA are located in the city of Miami. The cost of living in the Miami-Dade, FL MD remains high, even though there are indications of improvements in unemployment, real estate foreclosures, and other economic conditions during the evaluation period. Nearly 60 percent of the population growth in the

Miami-Dade County since 2010 has been from net in-migration, which has averaged 19,350 people annually.

Employment and Economic Factors

Following three years of decline, employment in the Miami area began to rebound in 2011 and continued to increase during the next several years. During the 12 months ending March 2016, nonfarm payrolls increased by 29,600 jobs, or 2.7 percent, from the previous 12 months to 1.13 million jobs. The unemployment rate decreased to 6 percent during this period, down from 6.7 percent during the previous 12 months. However, the unemployment rate in Miami-Dade remained higher than both the state of Florida and the national unemployment rate of 4.9 percent and 4.7 percent, respectively.

Major industries include real estate development, trade business with Latin America, and tourism. The largest employers include Miami-Dade County, Florida State Government, the University of Miami, Baptist Health System South Florida, and American Airlines.

According to Dun and Bradstreet, there were 354,431 non-farm businesses in the Miami-Dade, FL MD for 2015, of which 79.5 percent are small businesses, defined as having revenues of $1 million or less. The majority (73.2 percent) of all non-farm businesses are concentrated in the county's middle-and upper-income geographies.

Housing

The housing crisis severely affected Miami-Dade County when home prices fell 50 percent or more from the highs of 2006 and condominium values declined 60 percent. Foreclosure rates have declined, but remain high. According to a report compiled by real estate research company ATTOM Data Solutions, one of every 786 housing units in South Florida was in some stage of foreclosure in November 2016. While that rate is still relatively high, it has fallen nearly 18 percent compared to November 2015. Miami-Dade County had the largest share of distressed properties with 1,479 homes in the foreclosure pipeline. Broward County came in second with 1,012 housing units and Palm Beach County had 657. While home values continue to recover, Zillow.com reports that, as of the second quarter of 2016, 11.8 percent of homes with mortgages were in a negative equity position, which limits the owners' opportunity for mortgage refinancing.

The high sales prices make it difficult for low- and moderate-income individuals to own a home in the assessment area without the help of loan subsidies. According to the National Association of Realtors, the median sales price for a single-family home in the Miami-Fort Lauderdale-West Palm Beach, FL MSA was $260,000 in 2012 compared to $305,000 thousand in 2016. Affordable housing inventory of units under $250,000 have significantly declined during recent years due in part to a massive influx of foreign buyers. In addition, the high property taxes and the high cost of hazard and flood insurance in Florida add significant cost to owning a home. The decline in housing affordability is not limited to home buyers. A 2016 study from the Federal Reserve Bank of Atlanta found that Miami was one of several large Southern metropolitan areas that experienced a significant decline in the availability of low-cost rental housing from 2010 to 2014. These factors contribute to Miami-Dade County having some of the highest levels of housing cost burdens for families in the nation, spending greater than 30 percent of income on housing. The National Low Income Housing Coalition found that 26 percent of moderate-income families and 71 percent of low-income families in the Miami MSA are severely housing cost burdened.

The 2016 Housing Affordability Index (HAI)[69] composite score for the MSA was 108.3. The index measures affordability of housing for a single family earning the median family income to qualify for a mortgage loan to purchase a median priced home. The higher the score, the more affordable the home. The HAI score for the MSA reflects a higher cost of housing in comparison to the national average of 167.1.

Low-and moderate-income families have other challenges accessing homeownership, as private investors contribute to the overall decline in housing inventory, including affordable housing. These investors often buy homes with cash, making it difficult for low- and moderate-income individuals to take advantage of lower cost homes on the market. In 2014, as high as 58 percent of home sales in the Miami-Dade, FL MD were cash transactions. By mid-2016, this level declined, though still high at 48 percent of home sales.

Community Contacts

A review of community contacts and local community development plans indicated that the following are identified needs within the market:

- Affordable housing for renters and owners
- Homebuyer counseling
- Availability of affordable mortgage financing for low- and moderate-income individuals
- Job creation and career development
- Access to capital and credit for development activities that promote long-term economic and social viability of the community
- Establishment, stabilization and expansion of small businesses, including micro-enterprises
- Neighborhood revitalization
    - improving safety and livability of neighborhoods
    - increasing access to quality public and private facilities and services
    - reducing isolation of income groups through the spatial de-concentration of housing opportunities for persons of lower income
    - revitalizing deteriorating or deteriorated neighborhoods
    - restoring and preserving properties of significant historical, architectural, or aesthetic value
    - conserving energy resources

Opportunities for participation by financial institutions include the following:

- Grants to NFPs to support down payment assistance
- Partnering with NFPs to provide homebuyer education and financial counseling
- Affordable mortgage products

The North Port-Sarasota-Bradenton, FL MSA comprises Manatee County and Sarasota County. Both counties in this MSA are contiguous and located in southwestern Florida, bordering the Gulf of Mexico. According to the 2010 census, the population in the MSA totaled 702,281. The largest geographic subdivision within the MSA at the time of the 2010 census was the city of North Port with a population of 57,000. The largest cities include North Port, Sarasota, and Bradenton. As of July 1, 2016, the population of the North Port, FL MSA increased to an estimated 788,000. North Port remains the largest geographic subdivision with an estimated population of 64,000.

Employment and Economic Factors

According to Moody's Analytics, the North Port-Sarasota-Bradenton, FL MSA economy is improving, driven by tourism and retirees relocating to the area. U.S. wage growth will lead to increased discretionary spending and more households will travel on their vacations to coastal locales. Hotel construction will help satisfy increasing demand for leisure/hospitality and facilitate well above-average job growth in tourism-related industries in 2018. Baby boomers will feel the southward pull as more of them retire. Retiree spending will support consumer industries and housing, as well as healthcare. Senior citizens account for about half of all spending on medical services, and over the next decade, their share of the population will swell to 40 percent in the area, compared with 20 percent, nationwide. As a result, healthcare demand will soar, driving rising payrolls within the healthcare industry.

The North Port-Sarasota-Bradenton, FL MSA was one of the Florida metro areas hardest hit by hurricane Irma and the region is currently in a rebuilding stage. More than 62,000 individual applicants received approximately $20 million in federal aid grants within Sarasota and Manatee counties, with more funding expected from federal, state, and local governments to help with recovery costs. As such, construction payroll growth could accelerate over the coming year. Economists expect industry payroll growth to continue post-recovery, with the continuation of large-scale development projects within the area.

At 4.6 percent, unemployment continues its five-year declining trend. Payroll employment is increasing with year-over-year growth that is twice the rest of Florida. The retail and hospitality industries, comprising nearly one-third of workers in the metro area, are expanding again following Hurricane Irma. While the education and healthcare industries lost momentum, job growth over the past year continues to exceed the statewide and U.S. averages.

Housing

The housing market in the assessment area is improving. House price appreciation is steadily increasing. House prices appreciated above national averages beginning in 2013 and the gap continues to grow to date. House prices are comparable to average in the state of Florida. In North Port-Sarasota-Bradenton, FL MSA, housing affordability is comparable to state average and it is lower than national average.

The 2016 Housing Affordability Index (HAI)[70] composite score for the MSA was 146. The index measures affordability of housing for a single family earning the median family income to qualify for a mortgage loan to purchase a median priced home. The higher the score, the more affordable the home. The HAI score for the MSA reflects a higher cost of housing in comparison to the national average of 167.1

Community Contacts

A review of community contacts and local community development plans identified the following needs and/or challenges within the market:

- Low wages that are incommensurate with the high housing/rental costs
- Community development
- Financing programs

Opportunities for participation by financial institutions include the following:

- Purchasing packages of loans for Habitat for Humanity houses
- Financial literacy and education opportunities, such as budgeting, home ownership, wills, tips on being a good neighbor
- Volunteers for finance committees and event committees for local community service boards.

The Athens-Clarke County, GA MSA comprises the following four counties: Clarke, Madison, Oconee, and Oglethorpe. The principal city is Athens. The MSA is home to the University of Georgia, the nation's oldest state-chartered university and the MSA's largest employer. The MSA is located in the northeastern area of Georgia, approximately 71 miles east of metropolitan Atlanta.

<u>Employment and Economic Factors</u>

According to Moody's Analytics, the area's expansion is robust, with nearly all signals flashing green. At nearly 5 percent, annual job growth is second in the region. According to the Moody's Analytics Business Cycle Tracker, the MSA has advanced at the fifth fastest rate among southern metropolitan areas over the past year. Job gains are relatively broad-based, but the core drivers are doing the heavy lifting. The public sector, led by faculty additions at the University of Georgia (UGA) and healthcare have contributed nearly two-thirds of net new jobs over the past year. A strong labor market is quickly absorbing labor force entrants, and the jobless rate has fallen below 4 percent for the first time in over a decade. Income growth is just ahead of the state average. As a result, the housing market is healthy, with house price appreciation more than a full percentage point above the strong Georgia average.

The area's cornerstone UGA remains the primary growth driver, creating jobs directly as rising enrollment necessitates faculty additions and indirectly as rising endowment funds more research and development opportunities. Though UGA's endowment is small compared with that of many similar universities, it is growing. Enrollment has grown by 9 percent in the past four years, setting another record in 2017. Rapidly rising enrollment has necessitated more staffing and state government payrolls are surging to record levels. The public sector, which accounts for nearly one-third of jobs, will remain a significant source of strength.

Buoyed by sound finances and solid demographics, hospitals will extend their recent run. Healthcare reasserted itself in 2017 after a few years marred by weak net hiring and uncertainty. Since early 2017, healthcare has contributed more than half of the net new jobs. The merger between Athens Regional Medical Center (ARMC) and Atlanta-based Piedmont Hospital inspired renewed confidence in ARMC and greatly improved ARMC's finances. As a result, ARMC is expanding (two new locations) and hiring staff. Robust population dynamics ensure that healthcare will expand more quickly in the metro area than the national average.

Notwithstanding the strength of the labor market, the MSA faces onerous structural problems. The huge presence of UGA leaves the economy vulnerable should funding or enrollment decline, and industrial diversity ranks near the bottom third of southern metro areas. Furthermore, while local business costs are low and educational attainment is high, few well-paying jobs await recent UGA graduates and most opt to relocate to Atlanta. Out-migration will hinder Athens's ability to attract new firms in high-value-added industries; therefore, the Athens MSA will only go as far as UGA will take it. The MSA will not be able to maintain its rapid growth for long but will maintain its momentum through 2018. Longer-term, an expanding UGA will provide stability, but the Athens MSA will be relegated to a below-average performer because of a dearth of dynamic economic drivers.

In addition to UGA, the metropolitan area's employers include ARMC-Piedmont Athens (Healthcare), St. Mary's (Healthcare), Clarke County School District, Pilgrim's Pride (Food Processing), Athens-Clarke County Government, Caterpillar, Dial America (Telemarketing), Power Partners, Baldor (Industrial Motors), Carrier Transicold, and Merial Animal Health Products.

Housing

According to the American Community Survey 2012-2016, the median housing value has declined to $152,600 from $170,828 reported at the 2010 Census. Approximately 38 percent of the area's housing units are owner-occupied and the median rent for renter-occupied units is $799.

Community Contacts

A review of a community contact and local community development plans indicated that there is a high demand for access to credit by small businesses and permanent workforce residents. Opportunities for participation by financial institutions include the following:

- SBA and small business lending within the market
- Affordable mortgage programs for workforce housing for community residents

The Atlanta-Sandy Springs-Roswell, GA MSA includes all twenty-nine counties within the entire MSA. The assessment area is located in the northwestern area of Georgia. Principal cities within the MSA include Alpharetta, Atlanta, Marietta, and Roswell.

<u>Employment and Economic Factors</u>

According to Moody's Analytics, the Atlanta-Sandy Springs-Roswell, GA MSA has experienced strong economic growth in the past 5 years, fueled by gains in health, professional and financial services, as well as construction. Nonfarm payrolls averaged 2.6 million jobs, an increase of 80,100 jobs, or 3.1 percent, compared with the number of jobs during the same 3-month period in 2015, resulting from growth in 10 of 11 sectors. That rate of job growth in the metropolitan area was much greater than the rate of 1.9 percent for the nation, and exceeded the increases in in other fast growing regions, including Houston, Miami, and Charlotte. Construction job growth has been particularly strong due to elevated demands for residential and office space. The MSA has also favorable business tax incentives, which have helped to attract multiple companies to the area over the years, including the entertainment industry.

In addition to being an important international transportation hub, the metropolitan area is home to the headquarters of corporations such as The Coca-Cola Company, Delta Air Lines, Inc., The Home Depot, and UPS (United Parcel Service, Inc.) and several notable colleges, including Emory University, the Georgia Institute of Technology, and Georgia State University.

Housing

During the 12 months ending March 2016, new home sales increased 20 percent to 16,400, continuing a trend that began in mid-2012. The number of existing homes sold has increased each year since 2012 to 101,000, despite a rapid decline in real estate owned (REO) sales. The percentage of home loans in the Atlanta metropolitan area that were seriously delinquent (90 or more days delinquent or in foreclosure) or had transitioned into REO status declined from 3.6 percent in March 2015 to 2.9 percent in March 2016. The current rate is slightly below the 3 percent rate for both Georgia and the nation.

Improving economic conditions and a declining number of REO properties have contributed to increased home prices in the Atlanta area since 2013. According to the National Association of Realtors, as of December 2016, the median sales price of a single family home in the MSA was $184,000 compared to $159,500 in 2014.

The 2016 Housing Affordability Index (HAI)[71] composite score for the MSA was 215.9. The index measures affordability of housing for a single family earning the median family income to qualify for a mortgage loan to purchase a median priced home. The higher the score, the more affordable the home. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1.

Rental housing market conditions in the Atlanta metropolitan area currently are balanced, with relatively slow multifamily construction allowing for significant absorption of excess units in the early 2010s.

Community Contacts

A review of community contacts and local community development plans indicated that there is a high demand for access to credit for small businesses and homeowners.

Opportunities for participation by financial institutions include the following:

- SBA and small business lending within the market
- Affordable mortgage programs

The Coeur d'Alene, ID MSA comprises the city of Coeur d'Alene, ID and the county of Kootenai. The MSA is located in the northwestern area of Idaho, approximately 30 miles due east from Spokane, Washington. The city of Coeur D'Alene is a satellite city of Spokane. The two cities are the key components of the Spokane-CDA Combined Statistical Area of which Coeur D'Alene is the third-largest city followed by Spokane and Spokane Valley. The city of Coeur D'Alene is situated on the north shore of Lake Coeur d'Alene, 25 miles in length.

<u>Employment and Economic Factors</u>

According to Moody's Analytics, economic progress has slowed, but job growth over the last year (2016) outpaces the national average and the expansion is firmly entrenched. Robust retiree in-migration is the metro area's principal economic catalyst, creating demand for consumer-oriented services such as hospitality and healthcare, which have contributed strongly to net job creation since the start of 2017. The labor market has tightened and average hourly earnings are growing more than twice as fast as they are statewide. The housing market is thriving. House price appreciation is outpacing both the state and the national averages.

Healthcare will lead the next leg of the MSA's expansion. The low cost of living and scenic environment are driving retiree in-migration, ensuring a large patient base for medical providers. Job growth in healthcare is forecast to more than double the U.S. average through the end of the decade. Kootenai Health is developing into a regional health-care hub. Nearly one-third of its patients come from outside the county, and increasing patient counts are fueling expansion plans. The hospital is building a lodging center for adult and pediatric patients receiving medical treatment from outside the county.

The outlook for leisure/hospitality is promising. First, there is good reason to believe that the industry is in even better shape than currently reported. Second, wage growth in the U.S. is set to accelerate as the economy approaches full employment, and with more cash in their pockets, consumers will spend more on recreation.

Top employers include Kootenai Health (3,000 employees), Hagadone Hospitality Company (1,850 employees), Qualfon, Inc. (1,253 employees), Willamette Dental Group (1,100 employees), CDA Tribal Casino (1,060 employees), and Northern Quest Resort & Casino (1,012 employees).

The area will kick into higher gear in 2018 and stay a step ahead of Idaho and the U.S. An influx of seniors will fuel healthcare job growth, while strong demographics support consumer industries and construction. Longer term, job gains will outpace the U.S. average thanks to big population additions, but low educational attainment will limit higher-value-added investment and per capita income.

Housing

The housing market will benefit as more people relocate to the area. Household formation is outpacing the rapid state average, consistent with several years of robust in-migration. Household formation will advance at a rate more than twice the national average through the medium term, driving the demand for residential construction. Home sales are steadily increasing and home prices are near their post-recession highs. Residential building rose faster than in the West and the U.S. in 2018. Housing has a larger effect on the local economy than it does nationally, accounting for more than 13 percent of employment versus just 9 percent in the U.S.

Community Contacts

A review of the community needs assessment indicated that the following are identified needs within the community:

- Affordable housing
- Access to credit

Opportunities for participation by financial institutions include the following:

- Lending and investing in affordable housing, including the construction of affordable housing, and neighborhood revitalization and stabilization projects

State of Illinois

Chicago-Naperville-Elgin, IL MSA

The Chicago-Naperville-Elgin, IL MSA comprises Cook, DeKalb, DuPage, Grundy, Kane, Kendall, Lake, McHenry, and Will counties in Illinois. The bank's delineation of the Chicago-Naperville-Elgin, IL MSA excludes Jasper, Lake, Newton, and Porter counties in Indiana (Gary, IN Metropolitan Division) and Kenosha County, Wisconsin. The principal city is Chicago. With an estimated population of 9.5 million, the MSA has the third largest population in the United States.

Employment and Economic Factors

The assessment area has one of the largest and most diverse economies in the United States. There are more than four million employees and an annual gross regional product of over $561 billion. The region is home to more than 400 major corporate headquarters, including 31 of the Fortune 500. Key economic sectors include auto manufacturing, biotech, business services, energy, fintech, food manufacturing, freight, fabricated metals, health services, information technology, manufacturing, medical technology, plastics, and chemicals. The area's largest employers include the U.S. Government, Chicago Public Schools, The City of Chicago, Jewel-Osco, and Cook County. The unemployment rate has improved from 10.3 percent in January 2011 to 6.0 percent in June 2016. The rate of employment growth was below the national average over this same period.

Housing

The National Association of Realtors reports an increase in housing prices in the assessment area. In 2014, the median sales price of existing single-family homes in the MSA was $205,900 and increased to $246,400 in June 2016. The 2016 Housing Affordability Index (HAI)[72] composite score for the MSA was 188.2. The index measures affordability of housing for a single family to qualify for a mortgage loan using average price and income data. The higher the score, the more affordable the home. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1.

Community Contacts

A review of community contacts indicated that the following are identified needs within the community:

- Additional banking branches in LMIs, particularly the south and east sides of Chicago, and Gary and Hammond, Indiana
- Small loans to businesses of less than $100K
- Flexible and low dollar mortgage options
- Second change and credit building retail products
- Cash, in-kind, and volunteer support for housing and lending counselors, and community planning/organizing operations
- Home rehabilitation lending

Opportunities for participation by financial institutions include the following:

- Partner with community development organizations
- Provide credit counseling
- Invest in loan pools developed by non-profit CDFIs
- Establish an advisory board for regular communication between the financial institutions and community organizations servicing low- and moderate-income communities

The Des Moines-West Des Moines, IA MSA is located in central Iowa. The MSA comprises Dallas, Guthrie, Madison, Polk, and Warren counties. As of the 2010 census, the estimated population is 569,633. The principal cities are Des Moines and West Des Moines. Des Moines is Iowa’s capital, county seat, and the most populous city in Iowa.

<u>Employment and Economic Factors</u>

Des Moines is a major center of the insurance industry and has a sizable financial services and publishing business base. Other major corporations headquartered outside of Iowa have established a presence in the Des Moines metro area including Wells Fargo, Voya Financial, and Electronic Data Systems. As a center of financial and insurance services, other significant corporations have established a presence such as health care, delivery services, tire manufacturers and nutrition food technology.

Some of the major companies in the area are Mercy Medical Center, UnityPoint Health, Principal Financial Group, Nationwide/Allied Insurance, and United Parcel Service. The largest employer in the local area is Wells Fargo with 13,500 employees. Kemin Industries has opened a state-of-the-art headquarters for a global nutritional ingredient company. According to the Bureau of Labor Statistics, year over year trending of unemployment decreased within the MSA. The highest unemployment rate over the evaluation period occurred in December 2012 at 4.9 percent and dropped to 3.2 percent as of December 2016.

Housing

According to the 2017 American Community Survey, the median housing value increased to $187,500 from $155,367 reported during the 2010 Census. The 2016 Housing Affordability Index (HAI)[73] composite score for the metropolitan area is 230.1. The index measures affordability of housing for a single family to qualify for a mortgage loan using average price and income data. The higher the score the more affordable the home. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1. The median gross rent for the assessment area is $723.

Community Contacts

According to community contacts, the economic conditions of Des Moines are improving for some, but not for everyone. Certain neighborhoods suffer from years of disinvestment. Community contacts indicated that local credit unions are doing a better job working with low- and moderate-income individuals than banks in Iowa. In addition, rural markets need affordable housing and access to alternative energies. Community contacts have identified the following needs for the MSA:

- Affordable housing
- Small dollar loans to consumers
- Affordable banking services
- More larger banks located in low- and moderate-income neighborhoods and throughout the state

Opportunities for participation by financial institutions include the following:

- Affordable housing – access to affordable housing both for low- and moderate-income homebuyers and renters
- Homebuyer Education and Counseling
- Nonprofit Capacity building – training for nonprofit leaders; webinars
- Financial Literacy Education – for youth and adults (budgeting, goal-setting)
- Board Service volunteers – board and committee members needed
- Education – K-12; mentoring - improvement of high school graduation rates
- Hunger Relief & food insecurity – basic needs, healthy food, comprehensive services/counseling
- Workforce development – providing job skills training, employment placement with a particular focus on immigrants

The bank has designated its assessment area as the Topeka, KS MSA. The MSA comprises the following counties: Jackson, Jefferson, Osage, Shawnee, and Wabaunsee. The assessment area meets the requirements of the CRA and does not arbitrarily exclude any low- and moderate-income geographies. According to the 2010 Census, the population in the MSA was 233,870.

Topeka is the capital city in the state of Kansas. As detailed in the table above, the population in the assessment area was 233,870 according to the 2010 U.S. Census. The population had declined slightly to 233,149 based on the 2017 American Community Survey. Low-income families represent 20.8 percent of families in the assessment area. Moderate-income families represent 17.3 percent of the assessment area population. The percentage of households in the assessment area living below the federal poverty income level of $24,250 was 10 percent for 2016, according to the Census Bureau's American Community Survey, the most recent data available. The household poverty rate for the assessment area was lower than the 12.1 percent for the state of Kansas. The 2016 adjusted median family income of $61,110 for the assessment area was greater than the median family income of $53,909 for the state of Kansas.

Employment and Economic Factors

Economic conditions, as reflected by the rate of unemployment, were strong during the evaluation period. According to the Bureau of Labor Statistics, the unemployment rate is declining in the MSA. As of December 2016, the unemployment rate for the Topeka, KS MSA was 3.8 percent, reflecting a decrease from the 6.9 percent unemployment rate at the beginning of the 2012 evaluation period.

According to Moody's Analytics, the economy expansion is strengthening, as a revamp of tax policies has finally halted the slide in state government payrolls and a variety of services. Healthcare and professional/businesses services power the private economy.

The top employment sectors in the Topeka, KS MSA are state, federal, county and city government, health care, education, service producing industries, and wholesale and retail trade. The construction and manufacturing industries made modest gains statewide amidst increasing demand for housing and aircraft production. Fortune 500 companies that have established manufacturing or distribution facilities in Topeka include: Burlington Northern Santa Fe Railway, Frito-Lay, Inc., Goodyear Tire & Rubber, Hill's Pet Nutrition, Payless Shoe Source, and Hallmark Cards, Inc. Top employers in the area are the State of Kansas, Stormont-Vail Health Care, Topeka Unified School District 501, federal government, and Goodyear Tire.

Housing

According to the 2010 U.S. Census, 56.4 percent of the total housing units in the assessment area were owner-occupied and 33.1 percent were renter-occupied units. The composition of housing units in low-income census tracts is 3.9 percent owner-occupied, 16.8 percent renter-occupied, and 18 percent vacant units. For units in moderate-income census tracts, 14.4 percent are owner-occupied, 26.2 percent are renter-occupied, and 23.4 percent are vacant units.

According to the 2017 American Community Survey, the median housing value increased to $132,600 from $111,812 reported during the 2010 Census. The 2016 Housing Affordability Index (HAI)[74] composite score for the metropolitan area is 296. The index measures affordability of housing for a single family to qualify for a mortgage loan using average price and income data. The higher the score the more affordable the home. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1. The median gross rent for the assessment area is $724.

Community Contacts

Examiners obtained information on the credit needs of the assessment area from a community contact conducted during the evaluation period. The contact represented an organization focused on providing small business consulting services and training seminars to northeast Kansas entrepreneurs. The contact identified working capital funding for businesses as a need.

The bank has designated its assessment area as the Wichita, KS MSA. The MSA comprises the following counties: Butler, Harvey, Kingman, Sedgwick, and Sumner. The assessment area meets the requirements of the CRA and does not arbitrarily exclude any low- and moderate-income geographies.

According to the 2017 American Community Survey, the population increased to 646,542 from 630,919 during the 2010 Census. Low-income families represent 20.2 percent of families in the assessment area. Moderate-income families represent 18.5 percent of the assessment area population. The percentage of households in the assessment area living below the federal poverty income level of $24,250 was 9.5 percent for 2016, according to the Census Bureau's American Community Survey, the most recent data available. The household poverty rate for the assessment area was lower than the 12.1 percent for the state of Kansas. The 2016 adjusted median family income of $61,110 for the assessment area was greater than the median family income of $53,906 for the state of Kansas.

Employment and Economic Factors

Economic conditions, as reflected by the rate of unemployment, were strong during the evaluation period. According to the Bureau of Labor Statistics, the unemployment rate is declining in the MSA. As of December 2016, the unemployment rate for the Wichita, KS MSA was 4.4 percent, reflecting a decrease from the 7.5 percent unemployment rate at the beginning of the 2012 evaluation period.

According to Moody's Analytics, the economy is slowly improving despite a stall in the labor market. Payroll employment has changed little since early 2016 and remains below its prerecession peak. Impressive job growth in healthcare and leisure/hospitality is being offset by losses in the public sector. Wichita is largest city and the economic hub of the region. The area offers the low cost of doing business and relatively affordable housing.

The top employment sectors in the Wichita, KS MSA are manufacturing, related to the aircraft industry, healthcare, education, and agriculture. Top employers in the area are the Cessna Aircraft Company, Spirit Aero Systems, Hawker Beechcraft, Unified School District 529, Via Christi Health System, Cargill Meat Solutions, and the State of Kansas.

Housing

According to the 2010 U.S. Census, 59.9 percent of the total housing units in the assessment area were owner-occupied, and 34.7 percent were renter-occupied units. The composition of housing units in low-income census tracts were 2.9 percent owner-occupied, 12.2 percent renter-occupied, and 15.6 percent vacant units. For units in moderate-income census tracts, 22.2 percent were owner-occupied, 40.7 percent renter-occupied, and 38.5 percent vacant units.

According to the 2017 American Community Survey, the median housing value increased to $138,500 from $114,039 reported during the 2010 Census. The 2016 Housing Affordability Index (HAI)[75] composite score for the metropolitan area is 287.4. The index measures affordability of housing for a single family to qualify for a mortgage loan using average price and income data. The higher the score the more affordable the home. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1. The median gross rent for the assessment area is $724.

Community Contacts

We obtained information on the credit needs of the assessment area from a community contact conducted during the evaluation period. The contact represented an organization focused on revitalizing, stabilizing, and reinvesting in assessment area neighborhoods through property development, property management, homebuyer education, and home repair. Banks in the MSA can assist low- and moderate-income families by providing down payment assistance, mortgage and home improvement lending, investments and LIHTCs.

The Portland-South Portland, ME MSA is located in southern Maine. The MSA comprises Cumberland, Sagadahoc, and York counties. As of the 2017 American Community Survey, the population had increased to 532,083 from 514,098 at the 2010 Census. The principal cities are Portland, South Portland, and Biddeford. Portland is Maine's largest port, set on a peninsula extending into Casco Bay.

<u>Employment and Economic Factors</u>

Over the years, the local economy has shifted from fishing, manufacturing, and agriculture towards a more service-based economy. The top five industries in the state are healthcare, retail, tourism, education services, and construction. Approximately one third of Portland companies are in service industries and about 20 percent of the businesses are in retail. The city also includes a manufacturing sector and it is a leading distribution center for Northern New England. Accessible manufacture jobs produce items such as leather goods, stainless steel, plastic components, food products, metals, paper products, machinery, lumber and wood.

Some of the major companies in the area are UnumProvident Life Insurance, Anthem/ Blue Cross & Blue Shield, Fairchild Semiconductor, WEX, and Southern Maine Community College. According to the city of South Portland, the largest employer in the local area is

UnumProvident Life Insurance, with 3,500 employees. In addition, L.L. Bean Inc. is located nearby and it is a major employer in the region. According to the Bureau of Labor Statistics, the year-over-year trending of unemployment decreased within the MSA. The highest unemployment rate over the evaluation period occurred in December 2012 at 6.1 percent and dropped to 3 percent as of December 2016.

Housing

The median sales price of a home in the metropolitan area is $254,924. The 2016 Housing Affordability Index (HAI)[76] composite score for the metropolitan area is 175.8. The index measures affordability of housing for a single family to qualify for a mortgage loan using average price and income data. The higher the score the more affordable the home. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1. The median gross rent for the assessment area is $858.

Community Contacts

Portland's aging population is expanding at a faster pace than nationally. Labor force contraction may translate to higher concentration of low-paying jobs (i.e., leisure and hospitality) and above-average costs of living. Community contacts have identified the following credit and community development needs within the MSA:

- Affordable housing

Opportunities for participation by financial institutions include the following:

- Funding for small business projects
- Funding for financial literacy, homeownership counseling, budget counseling and on-going case management
- Funds to expand workforce development funds for hunger relief

The Baltimore-Columbia-Towson, MD MSA is centrally located in Maryland. The MSA comprises the following seven counties: Anne Arundel, Baltimore, Carroll, Harford, Howard, Queen Anne's, and Baltimore City. As of the 2010 census, the estimated population was 2.7 million and was ranked the 21st most populous metropolitan statistical area of the United States. According to the 2017 American Community Survey, the population has increased to 2.8 million. The principal cities are Baltimore, Columbia, and Towson. The capital of Maryland and the agencies of the Maryland state government are located mainly in Annapolis and Baltimore City.

Employment and Economic Factors

Baltimore and surrounding suburbs are home to four Fortune 1000 companies: Grace Chemicals, Legg Mason, T. Rowe Price, and McCormick & Company. Other companies in the area include AAI Corporation, Adams Express Company, Brown Advisory, Alex Brown, First Home Mortgage Corporation, FTI Consulting, Petroleum & Resources Corporation, Vertis, Prometric, Sylvan Learning, Laureate Education, Under Armour, Polk Audio, DAP, 180s, DeBaufre Bakeries, Wm T. Burnett & Co., Old Mutual Financial Network, Firaxis Games, Sinclair Broadcast Group, Fila, and JoS A. Bank Clothiers. The area is also home to the National Security Agency, Social Security Administration, and the Centers for Medicare & Medicaid Services. According to the Bureau of Labor Statistics, year over year trending of unemployment decreased within the MSA. The unemployment rate was 4 percent as of December 2016.

Housing

The median housing value is $296,066. The 2016 Housing Affordability Index (HAI)[77] composite score for the metropolitan area is 200.7. The index measures affordability of housing for a single family to qualify for a mortgage loan using average price and income data. The higher the score the more affordable the home. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1. The median gross rent for the assessment area is $1,034.

Community Contacts

According to a community contact, almost 40 percent of Baltimore households are identified as unbanked or underbanked. The high number of vacant and abandoned properties in Baltimore continues to be a significant issue. There is an ongoing need for support of programs that will help increase housing diversity in every neighborhood throughout the region. Workforce and job training programs that will allow people to obtain better paying jobs is another ongoing need. The contact also stated programs that will allow capacity building among local non-profit organizations are also needed.

Community contacts have identified the needs for the MSA as:

- Community development
- Other credit related projects or financing programs
- Opportunity for more bank involvement.
  -

Opportunities for participation by financial institutions include the following:

- Affordable housing:
  - Affordable housing; quantity is low, more affordable units are needed
  - Affordable housing financing; there is a need for more LIHTCs and collaborative funding; small developers are not able to get bank financing to rehabilitate vacant housing stock into affordable housing
  - Affordable housing CDFI financing; process can be almost as complex and stringent as banks in the application, underwriting and collateral evaluation

- Community service:
  - Cost of living is high for lower income families; includes the cost of ancillary needs; utilities, groceries, laundry, toiletries, transportation, etc.
  - Financial literacy; education for youth and adults. New employees need to learn about what to do with their first paycheck. Lack of budgeting contributes to workforce turnover.
  - Foreclosure prevention education and counseling
  - Hunger relief and food insecurity; there has been a significant increase in need

[77] Copyright 2017 “Affordability Index of Existing Single-Family Homes for Metropolitan Areas” National Association of Realtors.

- Nonprofit capacity building; webinars continue to be helpful
- Workforce development; jobs for ex-offenders continues to be a challenge. There continues to be a gap between job skills and employer needs.

- Economic development:
  - Small business; access to capital, financial acumen around banking

- Revitalization/stabilization:
  - Crime prevention and safety; there is concern around security
  - Neighborhood revitalization; ongoing investment in the city
  - Neighborhood stabilization; vacant housing continues to impede efforts

The Springfield, MA MSA is located in western Massachusetts and it comprises Hampden County and Hampshire County. Springfield is the seat of Hampden County. As of the 2017 American Community Survey, the MSA population had increased to 631,652 from 621,570 reported during the 2010 Census.

Springfield is best known as the birthplace for the sport of basketball and it is home to the Basketball Hall of Fame since 2003. The Springfield area has played an important role throughout American history. There are numerous sites of historic and general interest. Springfield is also several years into an economic and cultural resurgence that began during the new millennium forming the Knowledge Corridor metropolitan region. The Knowledge Corridor hosts over 160,000 university students and over 32 universities and liberal arts colleges in the area.

<u>Employment and Economic Factors</u>

Area industries include trade and transportation, education and health services, manufacturing, tourism and hospitality, and government. Springfield is home to a Fortune 100 company, Mass Mutual Financial Group. It is also home to Smith & Wesson handguns, Merriam Webster, American Hockey League, and Baystate Health.

Housing

The median housing value is $216,460. The 2016 Housing Affordability Index (HAI)[78] composite score for the metropolitan area is 200.5. The index measures affordability of housing for a single family to qualify for a mortgage loan using average price and income data. The higher the score the more affordable the home. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1. The median gross rent for the assessment area is $756.

Community Contacts

According to community contacts, the Springfield, MO MSA continues to struggle economically with high poverty and unemployment rates. The contacts stated that Springfield is predominately a low-income city with all neighborhoods in the city qualifying for community development block grants. Local financial institutions were perceived positively for their involvement in meeting the needs of the community.

Community contacts have identified the needs for the MSA as:

- Banks assist with providing flexible lending terms and interest rates for local small businesses
- Providing grants to small business to help support local revitalization projects
- Financial education seminars and workshops for small business financing
- Serving on the board of directors for the local non-profits bringing financial expertise
- Purchasing tax credits promoting affordable housing and revitalization of the region

Opportunities for participation by financial institutions include the following:

- Affordable Housing
  - Support for development, preservation and management

- Community Service
  - Board Service volunteers – nonprofit boards and committees
  - Education – K-12, youth development
  - Financial literacy education and stability – for youth, adults and seniors; prevent foreclosures through asset building
  - Financial products and services – for Latinos; Spanish language
  - Healthcare – affordable healthcare options for those whose employers don't provide healthcare, or earn too much to qualify for some sort of support, or those with little cash to pay the high deductible premiums
  - Homeless/supportive and transitional housing
  - Hunger relief and food insecurity and basic needs
  - Nonprofit capacity building – leadership development and BAC webinars
  - Workforce development – including manufacturing, job creation and retention

[78] Copyright 2017 "Affordability Index of Existing Single-Family Homes for Metropolitan Areas" National Association of Realtors.

- Economic Development
  - Small business – lending, investing and program support including programs focusing on the Latino population
  - Neighborhood stabilization – repairs for low income senior citizens, those with disabilities and veterans

The Detroit-Warren-Dearborn, MI MSA is located in southeast Michigan. It is the largest metropolitan area in the state of Michigan and it is often referred to as the “Metro Detroit”. The MSA comprises the following seven counties: Lapeer, Livingston, Macomb, Oakland, St. Clair, and Wayne. According to the 2017 American Community Survey, the population is 4.3 million. The urban area ranks as the 11th most populous metropolitan area in the United States. The principal cities are Detroit, Warren, and Dearborn.

Employment and Economic Factors

Detroit is a prominent business center, known for its automotive heritage, arts, entertainment, popular music, and sports. The area includes a variety of natural landscapes, parks, and beaches, with a recreational coastline linking the Great Lakes. It is one of the nation's largest metropolitan economies, with 17 Fortune 500 companies. Detroit and the surrounding region constitute a major center of commerce and global trade, most notably as home to America's 'Big Three' automobile companies: General Motors, Ford, and Chrysler. There are a number of firms in the region pursuing emerging technologies including biotechnology, nanotechnology, information technology, and hydrogen fuel cell development.

Among the major companies based in the area, aside from the auto industry, are the University of Michigan, Beaumont Health, U.S. Government, Henry Ford Health System, and Ilitch

Companies. According to the Detroit Chamber of Commerce, the largest employer in the local area is Ford Motor Company, with 44,598 employees. According to the Bureau of Labor Statistics, the year-over-year trending of unemployment decreased within the MSA. The highest unemployment rate over the evaluation period occurred in December 2012 at 10.1 percent and dropped to 5.4 percent as of December 2016.

Housing

The median sales price of a home in the metropolitan area is $161,068. The 2016 Housing Affordability Index (HAI)[79] composite score for the metropolitan area is 171.7. The index measures affordability of housing for a single family to qualify for a mortgage loan using average price and income data. The higher the score the more affordable the home. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1. The median gross rent for the assessment area is $805.

Community Contacts

Community contacts have identified the following credit and community development needs within the MSA:

- Food assistance
- Quality employment
- Affordable rental units
- Rental assistance (homelessness prevention)
- Lack of credit/ Credit repair

Opportunities for participation by financial institutions include the following:

- Funding for financial literacy, homeownership counseling, budget counseling and on-going case management
- Funds to expand workforce development
- Funds for IDA matching
- Funds for Head Start
- Construction financing

The Minneapolis-St. Paul-Bloomington, MN-WI MSA spans across Minnesota and Wisconsin. The MSA comprises Anoka, Carver, Chisago, Dakota, Hennepin, Isanti, Le Sueur, Millie Lacs, Pierce, Ramsey, Scott, Sherburne, Sibley, St. Croix, Washington, and Wright counties. The bank has defined its assessment area to include the whole MSA, except Pierce and St. Croix counties in Wisconsin. As of the 2017 American Community Survey, the estimated population is 3.6 million. The MSA is ranked 14th in the nation by population. The principal cities are Minneapolis and St. Paul. The area is commonly known as the “Twin Cities”. St. Paul is the state capital. The metropolitan area is built around the Mississippi, Minnesota, and St. Croix rivers. Minneapolis has modern skyscrapers and St. Paul has been likened to an East coast city with quaint neighborhoods and Victorian architecture. There are numerous lakes in the region, and the cities offer extensive park systems for recreation.

<u>Employment and Economic Factors</u>

The composition of industry within the Minneapolis-St. Paul-Bloomington area includes government, education, healthcare, manufacturing, and retail trade. The metropolitan area is home to 16 Fortune 500 headquarters - UnitedHealth Group, Target, Best Buy, CHS, 3M, US Bancorp, Supervalu, General Mills, Land O'Lakes, Ecolab, CH Robinson Worldwide, Ameriprise Financial, Xcel Energy, Thrivent Financial, Mosaic, and Patterson. According to the Department of Employment and Economic Development, the top five employers are the State of Minnesota (41,200), Alina Health System (27,635), University of Minnesota (26,436), Target (26,271), and Fairview Health Services (24,000). The Minneapolis-St. Paul area also ranks as the second largest medical device manufacture center in North America and the fourth-biggest U.S. banking center, based on total assets, ranking behind New York, San Francisco, and Charlotte. According to the Bureau of Labor Statistics, the year-over-year trending of unemployment decreased. The highest unemployment rate over the evaluation period occurred in December 2012 at 5.5 percent and dropped to 3.6 percent as of December 2016.

Housing

The median sales price of a home in the metropolitan area is $253,682. The 2016 Housing Affordability Index (HAI)[80] composite score for the metropolitan area is 211.4. The index measures affordability of housing for a single family to qualify for a mortgage loan using average price and income data. The higher the score the more affordable the home. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1. The median gross rent for the assessment area is $858.

Community Contacts

Community contacts have identified the following credit and community development needs within the MSA:

- Affordable housing and placement

Opportunities for participation by financial institutions include the following:

- Funding for small business projects
- Funding for financial literacy, homeownership counseling, budget counseling and on-going case management
- Funds to expand workforce development
- Funding for commercial loans and other banking products

The Springfield, MO MSA comprises Christian, Dallas, Greene, Polk, Stone, Taney, and Webster counties. The bank has defined its assessment area to include all of the counties except Stone and Taney counties. Unless otherwise indicated, the statistics discussed reflect the MSA as a whole. According to the 2017 American Community Survey, the 2016-estimated population of the MSA is 458,930, a 5.1 percent population growth since the 2010 census population of 436,711. As of June 30, 2016, BANA deposits in the assessment area comprised less than 1 percent of the bank's total deposits.

Employment and Economic Factors

According to the Bureau of Labor Statistics, the unemployment rate in the MSA declined from 6.6 percent in January 2012 to 3.5 percent in December 2016. The unemployment rate in the MSA is below the average national and state of Missouri unemployment rates, which declined to 4.7 and 3.9 percent in December 2016, respectively. The education and health industry, government, and retail trade industry are most prominent in the area. Some of the largest employers include Mercy Health Springfield Community, Cox Health Systems, Wal-Mart Stores, Inc., Bass Pro Shops, and Missouri State University.

Housing

The 2016 Housing Affordability Index (HAI)[81] composite score for the MSA was 244.5. The index measures affordability of housing for a single family earning the median family income to qualify for a mortgage loan to purchase a median priced home. The higher the score, the more affordable the home. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1.

Community Contacts

A review of community contacts indicated that the following are identified needs within the community:

- Affordable housing and neighborhood revitalization/stabilization efforts due to poor quality of existing affordable housing
- Financial literacy/education
- Access to small dollar loans for low- and moderate-income families with reasonable terms

Opportunities for participation by financial institutions include the following:

- Lending and investment in affordable housing and neighborhood revitalization/stabilization projects
- Supporting community development services, such as financial literacy/education
- Working with area's non-profit organizations, foundations, state and local government, and workforce development organizations and providing grant money

The Las Vegas-Henderson-Paradise, NV MSA comprises Clark County. As of the 2010 census, the population of the MSA was just under 2 million with a 2016-estimated population of 2.2 million. With an estimated population growth of 10.5 percent since the most recent census, population growth in this MSA is among the most rapid in the United States and more than double the national average. As of June 30, 2016, BANA deposits in the MSA represented approximately 1.1 percent of the bank's total deposits.

Employment and Economic Factors

Employment is relatively volatile in the area. This MSA is one of the world's largest tourist destinations and the leisure and hospitality services industry, food service, and retail trade industry are prominent in the area. Some of the largest employers include Station Casinos Inc., Boyd Gaming Corp., Las Vegas Sands Corp., and various other large casinos on the Las Vegas Strip, such as the MGM Grand, Bellagio, and the Wynn. According to the Bureau of Labor Statistics, the unemployment rate in the MSA declined from 13.1 percent in January 2012 to 5.1 percent in December 2016. From 2012 through 2016, the MSA was among the MSAs with highest unemployment rates in the county, but also experienced some of largest unemployment rate declines in the nation and the state of Nevada during the period. As of December 2016, the unemployment rate in the MSA remains slightly above the national average unemployment rate of 4.7 percent and the state of Nevada average unemployment rate of 4.9 percent.

Housing

The MSA was one of the hardest hit areas during the housing collapse. Housing supply is tight as population growth increases housing demands. According to the National Association of Realtors, the average Housing Affordability Index (HAI)[82] for the MSA in 2016 was 145.8, which is lower than the national average HAI of 167.1. The HAI has declined by 10 points since 2014, which indicates that homes became less affordable for the typical family during that time. The HAI measures whether or not a family earning the median family income could qualify for a mortgage loan on an existing single-family median priced home. The higher the index, the more affordable the homes are in the area for a typical family. According to Housing and Urban Development (HUD), the fair market rent as of December 2016 for a two-bedroom unit was $968 in the MSA, which remained relatively stable since 2015.

Community Contacts

A review of community contacts indicated that the following are identified needs within the community:

- Financial literacy/education
- Affordable housing, including homeownership and rental housing
- Neighborhood revitalization/stabilization efforts due to poor quality of existing properties
- Access to capital for small businesses and short-term emergency loans to military personnel until they receive reimbursement for relocation costs

Opportunities for participation by financial institutions include the following:

- Supporting community development services, such as financial literacy/education
- Lending and investment in affordable housing and neighborhood revitalization/stabilization projects
- Working with area’s non-profit organizations, foundations, state and local government, and workforce development organizations

The Reno, NV MSA comprises Storey and Washoe counties. Reno and Sparks are the principal cities in the MSA. According to the 2017 American Community Survey, the 2016-estimated population of the MSA is 457,667, which indicates 7.6 percent population growth since the 2010 census reported a population of 425,437. As of June 30, 2016, BANA deposits in the MSA represented approximately 0.1 percent of the bank's total deposits.

<u>Employment and Economic Factors</u>

According to the Bureau of Labor Statistics, the unemployment rate in the MSA declined from 13 percent in January 2012 to 4.2 percent in December 2016. As of December 2016, the unemployment rate has fallen below the national average unemployment rate of 4.7 percent and the state of Nevada average unemployment rate of 4.9 percent. The leisure and hospitality services industry, retail trade industry, and health and education services industry are prominent in the area. Some of the largest employers include the University of Nevada-Reno, Renown Health, and various casino/gaming companies, such as Peppermill Hotel casino, Grand Sierra Hotel and Casino, International Game Technology, Silver Legacy Resort Casino, and Atlantis Casino Resort. Recently, the construction industry, professional and business services industry, and transportation and utilities industry have been growing at a rapid rate as major high-tech firms continue to arrive in the area.

Housing

The 2016 Housing Affordability Index (HAI)[83] composite score for the MSA was 128.6. The index measures affordability of housing for a single family earning the median family income to qualify for a mortgage loan to purchase a median priced home. The higher the score, the more affordable the home. The HAI score for the MSA reflects a higher cost of housing in comparison to the national average of 167.1.

Community Contacts

A review of community contacts indicated that the following are identified needs within the community:

- Access to capital for small businesses
- Affordable housing
- Homelessness

Opportunities for participation by financial institutions include the following:

- Support small businesses through loans and investments
- Lending and investment in affordable housing
- Working with area's non-profit organizations, foundations, and state and local government

The Manchester-Nashua, NH MSA comprises Hillsborough County, which is the most populous county in the state. Population growth is slow relative to the national average. According to the 2017 American Community Survey, the 2016-estimated population of the MSA is 407,761, which indicates 1.8 percent population growth since the 2010 census reported a population of 400,720. As of June 30, 2016, BANA deposits in the MSA represented less than 1 percent of the bank's total deposits.

<u>Employment and Economic Factors</u>

According to the Bureau of Labor Statistics, the unemployment rate declined from 6.2 percent in January 2012 to 2.6 percent in December 2016. The unemployment rate is below the average national unemployment rate and kept pace with the decline in the state of New Hampshire average unemployment rate, which declined from 6.0 percent in January 2012 to 2.5 percent in December 2016. The healthcare services industry and the financial and banking industries are most prominent in the area. Some of the largest employers include Elliott Hospital, Southern NH Medical Center, Catholic Medical Center, St. Joseph Hospital and Trauma Center, Fidelity Investments, TD Bank, and Citizens Bank. The utility and education sectors are also leading employers for the county.

Housing

According to the New Hampshire Realtors organization, the increase in the median housing price for the county kept pace with the state median housing price. The county median housing price remained below the national average at $213,000 and $260,000 in 2012 and 2016, respectively. According to the National Association of Realtors, the average Housing Affordability Index (HAI)[84] for the MSA decreased by 9.1 points to 192.3 between 2013 and 2016, but remains higher than the national average HAI of 167.1. This indicates that homes became less affordable for the typical family during that time. The HAI measures whether or not a family earning the median family income could qualify for a mortgage loan on an existing single-family median priced home. The higher the index, the more affordable the homes are in the area for a typical family.

Community Contacts

A review of community contacts indicated that the following are identified needs within the community:

- Access to capital for small businesses
- Affordable housing and neighborhood revitalization/stabilization

Opportunities for participation by financial institutions include the following:

- Support small businesses and CDFIs through loans and investments
- Lending and investment in affordable housing and neighborhood revitalization/stabilization projects
- Working with area's non-profit organizations, foundations, and state and local government

The Atlantic City-Hammonton, NJ MSA comprises Atlantic County. According to the 2010 census, the population totaled 274,549 in the MSA. The largest geographic subdivision within the MSA at the time of the 2010 census was Egg Harbor Township with a population of 43,323 followed by Atlantic City and Galloway Township with 39,558 and 37,349, respectively. The population is estimated to have declined to 270,991 as July 1, 2016.

Employment and Economic Factors

According to Moody's Analytics, the Atlantic City-Hammonton, NJ MSA economy is stabilizing as gaming improves and Atlantic City shores up its finances. After dipping to a more than 25-year low in 2016, payroll employment in the assessment area has increased by 3 percent and in 2017, growth has outpaced the New Jersey and U.S. averages. Despite these improvements, the metro area continues to struggle as outsized gains in low-wage leisure/hospitality have contributed to a weaker employment mix and lower average hourly earnings. The assessment area's 4 percent year-over-year decline in average pay is the worst in the state. Additionally, at 7.3 percent, the jobless rate is the second highest in New Jersey and among the lowest in the Northeast, despite the improving trend in payroll employment.

The casino industry is the primary employer in the assessment area and the closure of five casinos in the area since 2014 led to the loss of almost 8,000 jobs in leisure/hospitality, or about 20 percent of the industry total. While gaming revenue increased by 9 percent during the first nine months of 2017, increased regional competition from new casinos and the potential for legalized gambling in northern New Jersey threaten industry jobs in the medium and long term.

The state takeover of financially struggling Atlantic City in November 2016 has staved off a bankruptcy filing and begun to shore up the municipality's finances, but at a cost of fewer jobs in government. A declining population, weakness in housing, and the state's plans to remedy a dire fiscal position will weigh heavily on Atlantic City-Hammonton in the short run, but improvement in gaming and support from leisure/hospitality will keep the metro area among recession. In the long run, weak demographics and low industrial diversity will ensure that the assessment area significantly underperforms the state and nation.

Housing

The housing market in the assessment area remains weak. The inventory of foreclosures in the assessment area are down from their late-2016 peak, but at 43 per 1,000 households they are the highest in the U.S. and eight times more prevalent than they are nationally. The glut of distressed properties is due in part to the soft labor market and the state's lengthy judicial foreclosure process. The excess stock of foreclosures is dragging down house prices. House price appreciation has lagged the state and national averages since late 2014, but the gap is narrowing as demand among land speculators and developers strengthens and the supply of distressed properties declines. Despite the positive indicators, the large backlog of foreclosure will take time to clear, suppressing prices and residential building for the time being.

According to the National Association of Realtors, the average Housing Affordability Index (HAI)[85] for the MSA increased by 45.9 points to 204.6 between 2013 and 2016, and it remains higher than the national average HAI of 167.1. This indicates that homes became more affordable for the typical family during that time. The HAI measures whether or not a family earning the median family income could qualify for a mortgage loan on an existing single-family median priced home. The higher the index, the more affordable the homes are in the area for a typical family.

Community Contacts

A review of community contacts and local community development plans indicated that the following are identified needs within the market:

- Disaster recovery assistance remains a need as the area continues to be affected by storms
- Rental assistance is needed for the low- and moderate-income and homeless
- Assistance in the form of grants, small loans, and training is needed for small businesses
- First-time buyer programs
- Economic development

[85] Copyright 2017 "Affordability Index of Existing Single-Family Homes for Metropolitan Areas" National Association of Realtors.

Opportunities for participation by financial institutions include the following:

- Banks can get involved by supporting the growth of business ownership and development, creating programs to increase employment and job creation, and funding home ownership initiatives
- Training instructors to teach financial literacy classes is an available opportunity for the banks to support non-profits and the low- and moderate-income who need to be educated
- Fund a mix of housing types to support the demands of the changing population
- Transportation oriented development lending

The Trenton, NJ MSA is centrally located in New Jersey and comprises Mercer County. According to the 2017 American Community Survey, the population is estimated to have increased to 371,023 as of July 1, 2016, from 366,513 at the time of the 2010 census. The largest geographic subdivision within the MSA is Hamilton Township with a population of 88,464, followed by Trenton City, and Ewing Township with populations of 84,913 and 35,790, respectively.

Employment and Economic Factors

According to Moody's Analytics, the Trenton, New Jersey assessment area is in the late expansion phase of the business cycle. Employment rates in this MSA have improved significantly during the rating period. According to the Bureau of Labor Statistics, the unemployment rate in the MSA declined from 8.4 percent in January 2012 to 3.6 percent in December 2016. The unemployment rate in the MSA was below the state average of 4.2 percent. Banking, education, pharmaceutical, and healthcare are the most prominent industries in the MSA. Some of the largest employers include Bank of America, Princeton University, Bristol-Myers Squibb, and Capital Health System.

Housing

According to the National Association of Realtors, the average Housing Affordability Index (HAI)[86] for the MSA increased by 15.5 points to 209.3 between 2013 and 2016, which is higher than the national average HAI of 167.1. This indicates that homes became more affordable for the typical family during that time. The HAI measures whether or not a family earning the median family income could qualify for a mortgage loan on an existing single-family median priced home. The higher the index, the more affordable the homes are in the area for a typical family.

Community Contacts

A review of community contacts and local community development plans indicated that the following are identified needs within the market:

- Starter and rental homes

Opportunities for participation by financial institutions include the following:

- Funding multifamily housing development
- Providing assistance to homeowners in foreclosure
- Home improvement loans for the aging housing stock
- Development of partnerships with community development organizations to address needs in the assessment area

The Albuquerque, NM MSA comprises Bernalillo, Sandoval, Torrance, and Valencia counties. According to the 2010 census, the population totaled 887,077 in the MSA. The largest counties within the MSA at the time of the 2010 census were Bernalillo and Sandoval with populations of 662,564 and 131,561, respectively. The 2017 American Community Survey estimates the population increased to 910,726 as July 1, 2017.

Employment and Economic Factors

According to Moody's Analytics, the assessment area is in the recovery phase of the business cycle. Employment levels are expected to reach its prerecession peak as job gains have outpaced labor force growth. The unemployment rate was 5.5 percent as of December 2016, a decline from 7.7 percent as of January 2012 and the 9 percent peak as of June 2010. The main weak point for the MSA continues to be construction. The retail industry shows signs of recovery, while residential, office, and industrial construction remains at cyclical lows. The housing market has not fully recovered since the recession. Slow demand is reflected in the house price indexes, which have been stuck at 3 to 4 percent growth since 2015. The ratio of inventory to pending home sales is lower than at any point since 2006. The commercial real estate vacancy rate is slightly higher than 10 percent. The market for industrial space has lower vacancy, but very slow absorption and has had no new construction in years. Despite recent growth in office-using employment, the office vacancy rate is still at more than 20 percent, a hangover from the 2007-2008 construction boom that left the MSA with high levels of excess office space.

Housing

According to the National Association of Realtors, the average Housing Affordability Index (HAI)[87] for the MSA increased by 8 points to 183.2 between 2013 and 2016 and remained higher than the national average HAI of 167.1. This indicates that homes became more affordable for the typical family during that time. The HAI measures whether or not a family earning the median family income could qualify for a mortgage loan on an existing single-family median priced home. The higher the index, the more affordable the homes are in the area for a typical family.

Community Contacts

A review of the community needs assessment indicated that the following are identified needs within the community:

- Loans for small businesses who are unable to access traditional lending channels

Opportunities for participation by financial institutions include the following:

- Offering and/or investing in financial literacy training for teens and adults
- Providing first time homebuyer counseling
- Offering Individual Development Accounts (IDA)
- Offering/promoting micro-lending programs

The New Mexico Non-MSA comprises McKinley County. The county is located in the northwestern section of New Mexico. According to the 2010 census, the population totaled 71,492 in the assessment area. The largest geographic subdivision within the MSA at the time of the 2010 census was Gallup city with a population of 21,678. The 2017 American Community Survey estimates the population to have increased to 72,564 as July 1, 2017. McKinley County is one of only three counties in the U.S. where the most spoken language is neither English nor Spanish. Approximately 46 percent of the population speaks Navajo.

<u>Employment and Economic Factors</u>

Major employers in McKinley County include Gallup McKinley County Schools, Gallup Indian Medical Center, Walmart, and Rehoboth McKinley Christian Hospital. The local labor force is in excess of 25,000 workers. In 2013, the per capita personal income in McKinley County was $24,383, which was the lowest per capita in the state of New Mexico. During that period, approximately 64 percent of the workers were employed in the private sector, with government employment accounting for 27 percent and farm employment accounting for the remaining 9 percent.

Community Contacts

A review of the community needs assessment indicated that the following are identified needs within the community:

- Offering specialized loan products for low and moderate income people

Opportunities for participation by financial institutions include the following:

- Assisting a local organization with its down-payment escrow program that was established for low and moderate income resident

The Buffalo-Cheektowaga-Niagara Falls, NY MSA comprises Erie and Niagara counties. According to the 2017 American Community Survey, the estimated population is 1.1 million. The MSA is the second largest metropolitan area in the state of New York, centered on its largest city – Buffalo.

Employment and Economic Factors

The Buffalo-Cheektowaga-Niagara Falls, NY MSA has a well-diversified economy. Key economic sectors include health care, financial services, retail, and entertainment. The area's largest employer is Kaleida Health with approximately 10,000 thousand employees. Other large employers include Catholic health System, Manufacturers and Trade Trust Company, and Seneca Gaming Corporation. The assessment area has shown a decreasing unemployment level during the evaluation period. In January 2012, the unemployment rate in the MSA was 9.3 percent. By December 2016, the rate decreased to 5.1 percent compared to the statewide rate of 4.8 percent.

Housing

The National Association of Realtors reports a moderate increase in housing prices in the Buffalo-Cheektowaga-Niagara Falls, NY MSA, increasing from a median sales price of existing single-family homes of $129,000 in 2014 to $133,000 in 2016. The 2016 Housing Affordability Index (HAI)[88] composite score for the MSA was 301.8. The index measures affordability of housing for a single family to qualify for a mortgage loan on a median priced home. The higher the score above 100, the more affordable the homes. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1.

Community Contacts

A review of community contacts indicated the following identified needs within the community:

- Commercial office space
- Affordable decent housing for low- and moderate-income
- Development in city neighborhoods outside of downtown due to zombie foreclosures properties

Opportunities for participation by financial institutions include the following:

- 1-4 family home construction on vacant lots
- Rehabilitation/home improvement loans for individuals
- Loans to smaller and new developers to develop mixed used properties

The Kingston, NY MSA comprises the Ulster County. According to the 2012-2016 American Community Survey, the total population is estimated at 180,505, a decline from 182,493 reported at the 2010 Census.

Employment and Economic Factors

The Kingston, NY MSA has a well-diversified economy. Key economic sectors include health care, government, and retail trade. The area’s major employers include Home Depot, IBM, Marist College, Orange Regional Medical Center, ShopRite, Stop & Shop Supermarkets, Target, Vassar Brothers Medical Center, Walmart, and White Plains Hospital Association. Thirteen companies with corporate headquarters in the region include Archie Comics (Pelham), IBM (Armonk), ITT Corporation (White Plains), MasterCard (Purchase), and PepsiCo (Purchase).

The MSA unemployment rate decreased during the evaluation period. In January 2012, the unemployment rate in the Kingston, NY MSA was 9 percent. By December 2016, the rate decreased to 4.3 percent. The statewide unemployment rate was 4.8 percent.

Housing

The National Association of Realtors reports a moderate increase in housing prices in the Kingston, NY MSA, increasing from a median sales price of existing single-family homes of

$200,000 in 2014 to $203,000 in 2016. The 2016 Housing Affordability Index (HAI)[89] composite score for the MSA was 209.3. The index measures affordability of housing for a single family earning the median income to qualify for a mortgage loan on a median priced home. The higher the score correlates to a higher affordability level to purchase a home. The HAI score for the MSA also reflects a lower cost of housing in comparison to the national average of 167.1.

Community Contacts

A review of community contacts indicated the following identified needs within the community:

- Higher income jobs
- Affordable housing

Opportunities for participation by financial institutions include the following:

- Non-profit donations
- Micro-lending/credit building
- Restoration project for the Ulster County Performance Arts Center

The Raleigh, NC MSA comprises Franklin, Johnston, and Wake counties. The 2017 American Community Survey estimates the population at 1.3 million, an increase from 1.1 million during the 2010 Census.

<u>Employment and Economic Factors</u>

The Raleigh, NC MSA has a well-diversified economy. Key economic sectors include education, government, technology, and healthcare. Raleigh, NC is home to North Carolina State University and it is part of the Research Triangle Park area, which includes Durham (home of Duke University) and Chapel Hill (home of the University of North Carolina at Chapel Hill). The largest employers in the MSA include State of North Carolina (24,739 employees), Wake County Public School System (17,572 employees), and Red Hat (9,800 employees). Other major employers include North Carolina State University and WakeMed. The assessment area unemployment rated decreased during the evaluation period. In January 2012, the unemployment rate was 7.9 percent. By December 2016, the unemployment rate decreased to 4.2 percent. The statewide unemployment rate was 5.2 percent.

<u>Housing</u>

The National Association of Realtors reports a significant increase in housing prices in the Raleigh, NC MSA, increasing from a median sales price of existing single-family homes of

$209,000 in 2014 to $248,000 in 2016. The 2016 Housing Affordability Index (HAI)[92] composite score for the MSA was 182.1. The index measures affordability of housing for a single family earning the median family income to qualify for a mortgage loan to purchase a median priced home. A higher score correlates to a higher affordability level to purchase the home. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1.

Community Contacts

A review of community contacts indicated the following identified needs within the community:

- Affordable housing, gentrification is occurring in affordable housing markets and expiring use HUD properties

Opportunities for participation by financial institutions include the following:

- Unsecured lines of credit for pre-development work of construction projects
- CDFI investments
- Revolving line of credits for non-profits to obtain land or rental properties
- Refinancing product for LIHTC with longer terms

The Cleveland-Elyria, OH MSA comprises Cuyahoga, Geauga, Lake, Lorain, and Medina counties. The Cleveland-Elyria, OH MSA is the 33rd most populous metropolitan area in the United States and the largest in the state of Ohio. The 2017 American Community Survey estimates the population at 2,058,844, a slight decrease from the 2010 Census.

Employment and Economic Factors

The Cleveland-Elyria, OH MSA has a well-diversified economy. Key economic sectors include healthcare, government, and education. The area's largest employer is the Cleveland Clinic with approximately 32,000 employees. Other large employers include University Hospital, U.S. Office of Personnel Management, and Lorain County Community College. The assessment area unemployment rate decreased during the evaluation period. In January 2012, the unemployment rate in the Cleveland-Elyria, OH MSA was 7.3 percent. By December 2016, the rate decreased to 5.3 percent. The statewide unemployment rate was 5.0 percent.

Housing

The National Association of Realtors reports a modest increase in housing prices in the Cleveland-Elyria, OH MSA, increasing from a median sales price of existing single-family homes of $123,000 in 2014 to $132,000 in 2016. The 2016 Housing Affordability Index (HAI)[93] composite score for the MSA was 286.5. The index measures affordability of housing for a single family earning the median family income to qualify for a mortgage loan to purchase a median priced home. A higher score correlates to a higher affordability level to purchase the home. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1.

Community Contacts

A review of community contacts indicated the following identified needs within the community:

- Workforce development
- Education
- Affordable housing
- Health and human services (safe environment, medical care, transportation)
- Lines of credit
- Capacity building for small business, women, or minority owned businesses
- Second mortgages due to appraisal gaps

Opportunities for participation by financial institutions include the following:

- General operating support
- Volunteers (board/ committee, leadership roles)

The Oklahoma City, OK MSA comprises the counties of Canadian, Cleveland, Grady, Lincoln, Logan, McClain, and Oklahoma. The Oklahoma City, OK MSA is located in Central Oklahoma. It is the largest metropolitan area in the state of Oklahoma. The 2017 American Community Survey estimates the population at 1.4 million, an increase from 1.3 million at the 2010 Census.

<u>Employment and Economic Factors</u>

The Oklahoma City, OK MSA has a well-diversified economy. Key economic sectors include government, military, education, and healthcare. The area’s largest employer is the State of Oklahoma with approximately 46,000 employees. Other large employers include Tinker Air Force Base, University of Oklahoma-Norman, FAA Mike Maroney Aeronautical Center, and INTEGRIS Health. The assessment area unemployment rated decreased during the evaluation period. In January 2012, the unemployment rate in the Oklahoma City, OK MSA was 5.0 percent. In December 2016, the rate decreased to 3.9 percent. The statewide unemployment rate was 4.8 percent.

Housing

The National Association of Realtors reports a slight increase in housing prices in the Oklahoma City, OK MSA, increasing from a median sales price of existing single-family homes of $150,000 in 2014 to $151,000 in 2016. The 2016 Housing Affordability Index (HAI)[94] composite score for the MSA was 245.9. The index measures affordability of housing for a single family earning the median family income to qualify for a mortgage loan to purchase a median priced home. A higher score correlates to a higher affordability level to purchase the home. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1.

Community Contacts

A review of community contacts indicated the following identified needs within the community:

- Affordable housing and affordable credit products
- Skilled labor in carpentry and maintenance professions

Opportunities for participation by financial institutions include the following:

- Affordable housing down payment assistance and loans
- Financial literacy seminars

The Tulsa, OK MSA comprises the counties of Creek, Okmulgee, Osage, Pawnee, Rogers, Tulsa, and Wagoner. The metropolitan area is located in northeastern Oklahoma. The city of Tulsa is the principal city. The 2017 American Community Survey estimates the population at 990,773, an increase from 937,478 reported during the 2010 Census.

Employment and Economic Factors

The Tulsa, OK MSA has a well-diversified economy. Key economic sectors include energy, aerospace, telecommunications, and manufacturing. Tulsa is the base for American Airlines' global maintenance hub, which is the city's top employer. Other large employers include ONEOK, Williams Companies, and Dollar Thrifty Automotive Group. The Tulsa, OK MSA gross domestic product (GDP) represents about 30 percent of the state of Oklahoma's economy. The assessment area unemployment rate decreased during the evaluation period. In January 2012, the unemployment rate in the Tulsa, OK MSA was 6.1 percent. By December 2016, the rate decreased to 4.8 percent. The state unemployment rate was 4.8 percent.

Housing

The National Association of Realtors reports moderate increases in housing prices in the Tulsa, OK MSA. The median sales price of existing single-family homes increased from $146,000 in 2014 to $151,000 in 2016. The 2016 Housing Affordability Index (HAI)[95] composite

[95] Copyright 2017 "Affordability Index of Existing Single-Family Homes for Metropolitan Areas" National Association of Realtors

score for the MSA was 233.2. The index measures affordability of housing for a single family earning the median family income to qualify for a mortgage loan to purchase a median priced house. A higher score correlates to a higher affordability level to purchase the home. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1.

Community Contacts

A review of community contacts indicated the following identified needs within the community:

- Community development services

Opportunities for participation by financial institutions include the following:

- Community development investments to sponsor events
- Financial literacy training

The Bend-Redmond, OR MSA comprises Deschutes County. According to the 2010 census, the population totaled 157,733 in the MSA. The largest cities within the MSA at the time of the 2010 census were Bend and Redmond with populations of 76,565 and 26,215, respectively. The Census estimates the population to have increased to 181,307 as of July 1, 2016.

<u>Employment and Economic Factors</u>

According to Moody's Analytics, the assessment area is in the expansion phase of the business cycle. The unemployment rate was 4.5 percent as of December 2016, which reflects a significant decline from 13.1 percent as of January 2012. The unemployment rate continues to decrease given the tight labor market, which is slowing job growth. The upside of the tight labor market is higher wages. Average hourly earnings still lag those in the rest of Oregon and the U.S., but in both cases, the gap is closing. Additionally, job creation is superior, and wage and salary income is rising far faster in the assessment area than in the state and the nation. People are flocking to the metro area at the fastest pace in a decade thanks to the vigorous expansion of technology firms.

Housing

Strong population and income trends along with the presence of Oregon State University-Cascades expect to cause large gains in new residential construction and housing-related employment. Permitting has risen only modestly despite prices rising faster than prices in the state and in rest of the nation. Developers are building single-family homes at about half of their prerecession rate in the assessment area. Multifamily building has increased, but it is not enough to satiate demand. The housing supply crunch is in part due to regulations. Additionally, state conservation land borders the city of Bend, which limits new development.

Community Contacts

A review of the community needs assessment indicated that the following are identified needs within the community:

- Affordable housing both for rent and purchase
- Training programs to equip the existing workforce with the knowledge and skills necessary to meet the demands of the growing and evolving job market

Opportunities for participation by financial institutions include the following:

- Supporting community development organizations serving in the assessment area by volunteering to teach financial literacy classes as well as to serve on loan and other committees
- Providing grants to nonprofit organizations and community development organizations
- Investing in Low-Income Housing Tax Credit certified projects or funding on other affordable housing projects
- Developing affordable deposit accounts, individual development accounts, and responsible alternatives to payday loans
- Participating in the state tax credit program that promotes activities that benefit low- and moderate-income individuals such as the funding of Individual Development Accounts
- Providing support to “ID clinics” which help individuals obtain the necessary legal identification so that they can open bank accounts and obtain other important services
- Implementing programs and products to reach the minority community such as credit building classes and second chance checking accounts

The Eugene, OR MSA comprises Lane County. According to the 2010 census, the population totaled 351,715 in the MSA. The largest cities within the MSA at the time of the 2010 census were Eugene and Springfield with populations of 156,185 and 59,403, respectively. The Census estimated that the population increased to 369,519 as of July 1, 2016.

<u>Employment and Economic Factors</u>

According to Moody's Analytics, the assessment area is in the expansion phase of the business cycle. Job growth in the assessment area is exceeding the U.S. average. Job gains are primarily in healthcare and construction and these additions have helped push the unemployment rate to a historically low level of about 4.4 percent in December 2016. The tight labor market is giving workers more bargaining power, which, along with job creation that is faster than average, is helping push up average hourly earnings.

<u>Housing</u>

House prices and construction employment are growing well over the national pace as the assessment area has experienced an influx of residents thanks to the statewide tech boom. Although job seekers have primarily flooded areas around Portland, Oregon, the assessment area is an attractive, cheaper alternative. Population growth has exploded over the past three years, accelerating from about 0.2 percent in 2013 to 1.9 percent in 2016, the largest annual gain since 1990. Rapid household formation will bolster housing demand, encouraging more homebuilding and hiring in construction. Housing supply has been slow to accommodate the surge in demand. Single-family housing permits remain well below their prerecession peak. As demand outpaces supply, house price growth will remain elevated. According to the Federal Housing Finance Agency, house prices are climbing at their fastest rate since 2006. The 10 percent year-over-year increase is almost twice the increase nationally.

The National Association of Realtors' 2016 Housing Affordability Index (HAI)[96] composite score for the MSA was 143.1. The index measures affordability of housing for a single family earning the median family income to qualify for a mortgage loan to purchase a median priced house. A higher score correlates to a higher affordability level to purchase the home. The HAI score for the MSA reflects a higher cost of housing in comparison to the national average of 167.1.

Community Contacts

A review of the community needs assessment indicated that the following are identified needs within the community:

- Funding for start-up wineries and breweries
- Funding for the expansion of existing businesses for example, loans to purchase equipment

Opportunities for participation by financial institutions include the following:

- Financial literacy training programs

The Pittsburgh, PA MSA comprises Allegheny, Armstrong, Beaver, Butler, Fayette, Washington, and Westmoreland counties in Pennsylvania.

<u>Employment and Economic Factors</u>

The assessment area has a well-diversified economy. Key economic sectors include healthcare, education, technology, bioscience, and financial services. Pittsburgh is known as “The Steel City” for its history in the steel industry and several steel companies such as US Steel, Ampco Pittsburgh, and Allegheny Technologies who operate steel mills in the MSA. The area is home to The University of Pittsburgh, Duquesne University, and Carnegie Mellon University. The area’s largest employers include UPMC Health System, Highmark Inc. (health insurance), The PNC Financial Services Group, Inc., University of Pittsburgh, and Giant Eagle, Inc. (grocery store). According to the Bureau of Labor Statistics, the unemployment rate in Pittsburgh has improved from a high of 9.5 percent in early 2010 to 5.1 percent in December 2016.

<u>Housing</u>

The U.S. Department of Housing and Urban Development (HUD) divides the assessment area into three submarkets when assessing the housing sales market: Allegheny County, North, and South. As of April 2016, according to HUD, the average sales price of new and existing homes in the Allegheny submarket was $179,900, up 6 percent over the previous 12 months. In the North submarket, the average sales price of new and existing homes was $173,000, up 1 percent over the previous 12 months. In the South submarket, the average price of new and existing home sales was $149,400, up 5 percent over the previous 12 months. According to a July 2016 Bloomberg article, in an assessment of 100 metro markets, Pittsburgh is the second most affordable market to purchase your first home.

Community Contacts

A review of community contacts indicated that the following are identified needs within the community:

- Affordable housing
- Improved infrastructure
- Housing rehabilitation
- Improved public transportation

Opportunities for participation by financial institutions include the following:

- Participation in housing projects
- Flexible mortgage products

The Charleston-North Charleston, SC MSA comprises Berkeley, Charleston, and Dorchester counties in South Carolina. Principal cities include Charleston, North Charleston, and Summerville commonly known as the Tri-County Area. According to a community contact, Charleston County is generally more affluent and urban, while Berkeley County is more rural with more low- and moderate-income individuals. Dorchester County represents more middle-income with both rural and urban areas.

<u>Employment and Economic Factors</u>

The assessment area has a diversified economy. Key economic sectors include tourism, higher education, shipping, the military, and a growing technology industry. According to a recent article in the Huffington Post, Charleston's technology industry is growing 26 percent faster than the national average. The MSA is home to several schools of higher education including the Medical University of South Carolina, the College of Charleston, Charleston School of Law, The Citadel, and The Military College of South Carolina. It is also home to Joint Base Charleston, which is a joint military base for the US Navy and Air Force. The area's largest employers include the Joint Base Charleston, Medical University of South Carolina, Boeing South Carolina, Charleston County Public Schools, and Roper St. Francis Healthcare. The unemployment rate has improved from a high of 10.1 percent in 2010 to 4.6 percent in

June 2016. This is slightly better, but trending similarly to the rest of South Carolina, which improved from a high of 11.7 percent in 2010 to 4.9 percent in June 2016.

Housing

The National Association of Realtors reports an increase in housing prices in the assessment area. In 2014, the median sales price of existing single-family homes in the MSA was $228,200 and increased to $260,100 in June 2016. The 2016 Housing Affordability Index (HAI)[97] composite score for the MSA was 158.2. The index measures affordability of housing for a single family earning a median family income necessary to qualify for a mortgage loan to purchase a median priced house. The higher the score, the more affordable the home. The HAI score for the MSA reflects a higher cost of housing in comparison to the national average of 167.1.

Community Contacts

A review of community contacts indicated that the following are identified needs within the community:

- Mortgage lending

Opportunities for participation by financial institutions include the following:

- Partner with non-profit organization to help small businesses with business advice and funding
- Provide funding to non-profit organization that help small businesses, especially in the more rural areas of the assessment area
- Provide more variety of mortgage products

The Columbia, SC MSA comprises Calhoun, Fairfield, Kershaw, Lexington, Richland, and Saluda counties in South Carolina. The Columbia, SC MSA is located centrally within the state of South Carolina. The city of Columbia is the principal city and it is the state’s capital. The Columbia, SC MSA became the state’s second largest metropolitan area when OMB combined the Anderson and Greenville metropolitan areas during the 2010 census.

<u>Employment and Economic Factors</u>

The assessment area has a diversified economy. Key economic sectors include manufacturing, professional and business services, finance, insurance, and real estate. The assessment area is also home to the University of South Carolina. Additionally, Fort Jackson in Columbia is the largest and most active Initial Entry Training Center, training 54 percent of the US Army’s Basic Combat Training load. The largest employers in the MSA include the State of South Carolina, Palmetto Health Alliance, University of South Carolina, Fort Jackson, and Blue Cross Blue Shield of SC. The unemployment rate has improved from a high of 10 percent in 2010 to 5 percent in June 2016. This is similar to the rest of South Carolina, which improved from a high of 11.7 percent in 2010 to 4.9 percent in June 2016.

<u>Housing</u>

The National Association of Realtors reports an increase in housing prices in the assessment area. In 2014, the median sales price of existing single-family homes in the MSA was

$150,400 and increased to $165,500 in June 2016. The 2016 Housing Affordability Index (HAI)[98] composite score for the MSA was 227.6. The index measures affordability of housing for a single family earning the median family income necessary to qualify for a mortgage loan to purchase a median priced house. The higher the score, the more affordable the home. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1.

Community Contacts

A review of community contacts indicated that the following are identified needs within the community:

- Affordable housing
- Education attainment
- Food attainment
- Higher wage jobs

Opportunities for participation by financial institutions include the following:

- Simplify processes for programs such as the FHLB money available to local flood victims through local banks
- Additional financial support to local groups supporting the community

The Memphis, TN-MS-AR MSA comprises Fayette, Shelby, and Tipton counties in Tennessee. The bank defined it assessment area to exclude DeSoto and Marshall Counties in Mississippi and Crittenden County in Arkansas. The city of Memphis is located within Shelby County in Tennessee.

<u>Employment and Economic Factors</u>

The assessment area's primary economic sector is shipping and transportation. The assessment area is located along the Mississippi River and it is home to the second largest cargo airport in the world and the third largest rail center. Headquartered in the MSA, FedEx is the area's largest employer. In addition to FedEx, two other Fortune 500 companies have headquarters in the assessment area: AutoZone and International Paper. Other key economic sectors include manufacturing, banking and finance, and real estate. Tourism is also strong with Elvis Presley's Graceland located in the assessment area. The assessment area is also home to several colleges and universities, including the University of Memphis. According the Memphis Business Journal as of July 2017, the area's largest employers were FedEx Corp., Tennessee State Government, United States Government, Methodist Le Bonheur Healthcare, and Shelby County Schools. Unemployment is improving in the assessment area from a high of 10.1 percent in June 2011 to 5.9 percent in June 2016. This varies from the rest of

Tennessee, which saw peak unemployment of 11 percent in 2009 fall to 4.7 percent in June 2016.

Housing

The National Association of Realtors reports an increase in housing prices in the assessment area. In 2014, the median sales price of existing single-family homes in the MSA was $138,600 and increased to $160,800 in June 2016. The 2016 Housing Affordability Index (HAI)[99] composite score for the MSA was 218.7. The index measures affordability of housing for a single family earning the median family income necessary to qualify for a mortgage loan to purchase a median priced house. The higher the score, the more affordable the home. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1.

Community Contacts

A review of community contacts and other sources indicated that the following are needs within the community:

- Small business lending
- Reaching the unbanked
- Affordable housing

Opportunities for participation by financial institutions include the following:

- Partner with non-profits
- Financial literacy education and outreach for the unbanked

The Nashville-Davidson-Murfreesboro-Franklin, TN MSA comprises Cannon, Cheatham, Davidson, Dickson, Hickman, Macon, Maury, Robertson, Rutherford, Smith, Sumner, Trousdale, Williamson, and Wilson counties in Tennessee. The MSA is largest in the state of Tennessee and the 36th largest MSA in the U.S.

Employment and Economic Factors

The assessment area has a diversified economy. Key economic sectors include health care, music and entertainment, manufacturing, and tourism. The assessment area is home to the Vanderbilt University and Middle Tennessee University. It also has the highest concentration of musicians and music businesses in the nation with more than 190 recording studios and over 5,000 working musicians from all genres. The largest employers in the MSA include Vanderbilt University Medical Center, HCA Holdings, Nissan North America, Saint Thomas Health, and Vanderbilt University. The unemployment rate has improved from a high of 10.4 percent in 2009 to 4.2 percent in June 2016. This is similar to the rest of Tennessee, which improved from a high of 11 percent in 2009 to 4.7 percent in June 2016.

Housing

The National Association of Realtors reports an increase in housing prices in the assessment area. In 2014, the median sales price of existing single-family homes in the MSA was $183,000 and increased to $227,000 in June 2016. The 2016 Housing Affordability Index

(HAI)[100] composite score for the MSA was 174.6. The index measures affordability of housing for a single family earning the median family income necessary to qualify for a mortgage loan to purchase a median priced home. The higher the score, the more affordable the home. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1.

A review of community contacts indicated that the following are identified needs within the community:

- Affordable housing
- Small business lending
- Small dollar consumer lending

Opportunities for participation by financial institutions include the following:

- Involvement in community development projects
- Support to nonprofits organizations

The Austin-Round Rock, TX MSA comprises Bastrop, Caldwell, Hays, Travis, and Williamson counties. Principal cities include Austin, Round Rock, Cedar Park, Georgetown, San Marcos, Pflugerville, Leander, Kyle, and Hutto. The Austin Round Rock, TX MSA, commonly referred to as Greater Austin, is located in central Texas. Austin is the principal city in the MSA, the fourth largest city in Texas and 11th largest in the U.S. The Austin-Round Rock, TX MSA is the 35th largest metropolitan area in the U.S.

Employment and Economic Factors

Greater Austin has a diverse economy heavily anchored by the business and services sector led by high-tech and Internet-based companies, government activities, and education. Most of the area's largest employers are all within the city of Austin. These include Advanced Micro Devices, Apple, Inc., Austin ISD, The City of Austin, Freescale Semiconductor, IBM, Seton Healthcare Network, Texas state government, the United States government, and the University of Texas at Austin. Major employers outside of the city of Austin include Dell, MD Totco, Southwestern University, and Texas State University.

Based on data from the Bureau of Labor Statistics for January 2012, the unemployment rates in the Austin-Round Rock, TX MSA was 6.2 percent. In December 2016, the unemployment rate in the MSA decreased to 3.2 percent. In 2016, new hires contributed 23,000 jobs to staffing levels. High-tech and Internet-based companies plan to add over 1,500 new jobs to the metro area by 2020. Other growing employment sectors in Austin are information and financial activities and education and health services. Austin employment continues to expand with an additional 36,000 new positions expected in 2017, representing a 3.6 percent growth.

Housing

In the Austin-Round Rock, TX MSA, the cost of living is greatly affected by the price of housing. The National Association of Realtors reports that the median price of a single-family home at December 31, 2014, was $240,700 for the Austin-Round Rock TX MSA. As of December 31, 2016, this value rose to $284,000, while the national median price was $235,500. A strong technology sector and an influx of young talent is creating a stronger-than anticipated housing demand in Austin. According to Freddie Mac, the housing demand outpaced supply in 2016, keeping vacancy rates below the historical average. With the high-demand and increased home prices, owner-occupied sales are softening, pricing first-time buyers among the market.

According to the Department of Numbers, the median monthly gross residential rent in the Austin-Round Rock, TX MSA in 2012 was $981, increasing to $1,131 in 2015. In 2016, single-family rents jumped 3.9 percent. The City of Austin reported in their 2014 Comprehensive Housing Market Analysis, that the growing market and increased rent prices has increased competition among low- and moderate-income renters for non-luxury rental units, pushing vacancy rates down to record low levels. Given the overall high monthly gross residential rent, housing affordability continues to be a significant issue in the assessment area.

The 2016 Housing Affordability Index (HAI)[101] composite score for the MSA was 162.2. The index measures affordability of housing for a single family earning the median family income necessary to qualify for a mortgage loan to purchase a median priced home. The higher the score, the more affordable the home. The HAI score for the MSA reflects a higher cost of housing in comparison to the national average of 167.1.

Community Contacts

There are numerous opportunities in the area to participate in community development activities. Multiple well-established community development entities, including community development corporations, community development financial institutions (CDFIs), nonprofit entities, and governmental and quasi-governmental organizations serve the community focusing on areas such as affordable housing, economic development, asset development and financial education, community services, and youth programs.

[101] Copyright 2017 “Affordability Index of Existing Single-Family Homes for Metropolitan Areas” National Association of Realtors.

Community contacts have identified the following credit and community development needs within this MSA:

- Financial literacy is the highest need
- Create affordable mortgage lending products that provide long-term affordability options for low- to moderate-income borrowers
- Good opportunities exist to make community development investments and loans in the MSA. At least four CDFIs are actively operating in Austin. Most are large CDFIs and offer various community development opportunities

Opportunities for participation by financial institutions include the following:

- Support to provide financial literacy programs to low- and moderate-income individuals and loans to small businesses
- Support the City of Austin’s community land trust
- Small business lending

Dallas-Fort Worth-Arlington, TX MSA

The Dallas-Fort Worth-Arlington, TX MSA comprises the following fourteen counties: Collin, Dallas, Delta, Denton, Ellis, Hood, Hunt, Johnson, Kaufman, Parker, Rockwall, Somervell, Tarrant, and Wise. Primary cities include Dallas, Fort Worth, Arlington, Plano, Garland, Irving, Grand Prairie, McKinney, Frisco, Mesquite, Carrollton, Denton, Richardson, and Lewisville. The Dallas-Fort Worth-Arlington, TX MSA is the economic and central hub of north central Texas and it is the largest inland metropolitan area in the U.S. According to the 2017 American Community Survey, the population is 7.4 million, a 15 percent increase since the 2010 census.

<u>Employment and Economic Factors</u>

The Dallas-Fort Worth-Arlington, TX MSA economy continues to be a key driver of business activity in Texas. The area’s business complex is diverse, primarily based on banking, commerce, telecommunications, technology, energy, healthcare and medical research, major defense manufacturers, and transportation and logistics. The MSA has been a magnet for corporate headquarters and major company organizations. According to the Dallas Regional Chamber of Commerce and the Fort Worth Chamber of Commerce, the MSA had the fourth highest concentration of Fortune 500 headquarters in the United States in 2016. The companies included ExxonMobil, Texas Instruments, AT&T, American Airlines, Energy Transfer Equity, Tenet Healthcare, Southwest Airlines, HollyFrontier, Kimberly-Clark, Fluor, J. C. Penny, Dean Foods, Alliance Data Systems Corporation, Dr. Pepper Snapple Group, Commercial Metals, Celanese, and Energy Future Holdings. In 2016, major corporate headquarters relocations to the MSA included Toyota USA and Jacobs Engineering.

Agriculture is also a primary driver of the Dallas-Fort Worth-Arlington, TX MSA economy. The Texas farming and ranching industry exists in Fort Worth. Collin, Dallas, Ellis, Hunt, Kaufman, and Rockwall counties, known for their fertile black soil, temperate weather, and available irrigation water are also well suited to a variety of agricultural enterprises, including a variety of livestock operations and more than twenty-five commercial crops. Agriculture in the area ranges from wine grape and cherry production to elk and organic beef.

Based on data from the Bureau of Labor Statistics, in January 2012, the unemployment rate in the Dallas-Fort Worth-Arlington, TX MSA was 7.1 percent. In December 2016, the unemployment rate decreased to 3.7 percent.

Housing

The cost of living in the area is high and it affects borrowing ability. According to HUD, the sales housing market in the Dallas-Fort Worth-Arlington, TX MSA is tight. Recent strong employment and population growth in the MSA contributed to increased sales demand. The shortage of existing homes in the MSA has increased rapidly since 2012. New home sales in the MSA have steadily increased as the economy has improved, but are constrained by a limited number of developable lots.

The National Association of Realtors reports that the median price of a single-family home at December 31, 2014, was $188,300 for the Dallas-Fort Worth-Arlington, TX MSA. As of December 31, 2016, this value rose to $227,100. Given the overall high median home price and due to a shortage of existing homes available for sale, housing affordability continues to be a significant issue in the assessment area.

According to HUD, in 2016, the average price of a new single-family home in the city of Dallas was $541,200, an increase of $87,300, or more than 19 percent from the previous 12 months. In Fort Worth-Arlington, the average price for new homes increased by $21,000 or 8 percent to $281,300 during the 12 months ending April 2016. While compared with the average price a year earlier, existing homes sold for an average price of $229,800, up by $16,850, or 8 percent. HUD also reported during the third quarter of 2015 that the average rent for an apartment in the MSA was $998, an increase of $72, or nearly 8 percent, from third quarter of 2014. Average year-over-year rent growth in the MSA has exceeded 4 percent since 2012.

The 2016 Housing Affordability Index (HAI)[102] composite score for the MSA was 179.7. The index measures affordability of housing for a single family earning the median family income necessary to qualify for a mortgage loan to purchase a median priced home. The higher the score, the more affordable the home. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1.

Community Contacts

The MSA includes numerous opportunities for banks to participate in community development activities. Multiple well-established community development entities serve the area, including community development corporations, community development financial institutions (CDFIs),

[102] Copyright 2017 "Affordability Index of Existing Single-Family Homes for Metropolitan Areas" National Association of Realtors.

nonprofit entities, and governmental and quasi-governmental organizations focused on areas such as affordable housing, economic development, asset development and financial education, community services, and youth programs.

Community contacts have identified the following credit and community development needs within this MSA:

- Affordable housing stock is not readily available, less than 500 units are “move-in” ready
- Affordable mortgage products that combines home improvements and purchase in one loan closing, such as the 203K
- Funding to acquire land along with construction lines of credit

Opportunities for participation by financial institutions include the following:

- Financing to provide affordable housing (e.g., First Time Home Buyer programs)
- Gap funding, or grants and donations for the purpose of funding operating costs and program costs associated with financial literacy programs and Home Buyer Training seminars
- Real estate opportunities throughout Dallas
- Serve as presenters during the homebuyer training
- Build relationships with nonprofits and provide support for homeownership fairs and financial education
- Train bank loan officers at their respective banks, on nonprofit products and services to help increase the bank’s knowledge of available loan alternatives, instead of saying no to a loan applicant

The Houston-The Woodlands-Sugar Land, TX MSA comprises the following nine counties: Austin, Brazoria, Chambers, Fort Bend, Galveston, Harris, Liberty, Montgomery, and Waller. The MSA is located in southeastern Texas and contains four principal cities and one community: Houston, Sugar Land, Conroe, Baytown, and The Woodlands (community). Harris County, which contains the city of Houston, is the third-most populous county in the nation. The Houston-The Woodlands-Sugar Land, TX MSA is the largest economic and cultural center of the South. The 2017 American Community Survey estimates the MSA population at 6.9 million, a 16 percent increase from the 2010 census.

<u>Employment and Economic Factors</u>

The Houston-The Woodlands-Sugar Land, TX MSA economy has a broad industrial base in energy, manufacturing, aeronautics, healthcare, and transportation. Houston, known as the Energy Capital, leads in building oilfield equipment, and it is home to more than 5,000 related firms. From December 2014 to December 2016, Houston’s upstream energy sector shed 81,100 jobs, equivalent to one in every four jobs in the sector. Two-thirds of those losses occurred in 2015, with the remainder in 2016. Oil prices have somewhat stabilized allowing the energy industry to settle into a slow recovery. The Port of Houston is the 10th largest port in the world. Houston has the largest medical center in the world. The Texas Medical Center and the Harris County Independent School Districts employ a significant number of persons. Other major employers in the Houston MSA include Walmart, H-E-B, Memorial Hermann Health System, The University of Texas MD Anderson Cancer Center, McDonald’s Corp, Kroger, Shell Oil, Exxon Oil, CenterPoint Energy, United Airlines, and local and government offices.

Based on January 2012 data from the Bureau of Labor Statistics, the unemployment rate in the Houston-The Woodlands-Sugar Land, TX MSA was 7.2 percent. In December 2016, the unemployment rate decreased to 5.3 percent. Homelessness and middle-skill level job training are big issues for the city and organizations are collaborating their efforts. While Houston's unemployment rate is low when compared to the rest of the country, many people are underemployed and need additional skills to make a livable wage.

Housing

In the Houston-The Woodlands-Sugar Land, TX MSA, the price of housing greatly affects the cost of living. Recent strong employment and population growth in the MSA contributed to increased sales demand for single-family homes. The National Association of Realtors reports that the median price of a single-family home at December 31, 2014, was $198,400. As of December 31, 2016, this value rose to $222,500. Given the overall high median home price and high demand, housing affordability continues to be a significant issue in the assessment area.

The 2016 Housing Affordability Index (HAI)[103] composite score for the MSA was 186.2. The index measures affordability of housing for a single family earning the median family income necessary to qualify for a mortgage loan to purchase a median priced home. The higher the score, the more affordable the home. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1.

Housing inventory has dropped by 74 percent in the last four years, according to data from Trulia. In the greater Houston region, single-family housing stock available under $200,000 has largely disappeared, squeezing out many first-time homebuyers and other members of the middle-class who in previous years might have found Houston well stocked with affordable homes. According to the Federal Reserve Bank of Dallas, more than 10 percent of Harris County homeowners put more than 50 percent of their income toward housing costs. The drop in homeownership rates is pushing more people to renting, driving up rent prices. CBRE, a Los Angeles-based real estate brokerage firm with offices in Houston, reported that at a 4.9 percent rate, rents are growing at the fastest pace on record. In June of 2017, the annual report from Harvard University's Joint Center on Housing Studies reported that more than 80 percent of households making less than $15,000 per year and 77 percent of households that make between $15,000 and $30,000 a year pay more than 30 percent of their income in rent, meeting the definition of "cost burdened."

Community Contacts

Numerous opportunities exist in the area to participate in community development activities. Multiple well-established community development entities serve the area, including community development corporations, community development financial institutions (CDFIs), nonprofit entities, governmental and quasi-governmental organizations focused on areas such as affordable housing, economic development, asset development and financial education, community services, and youth programs.

[103] Copyright 2017 "Affordability Index of Existing Single-Family Homes for Metropolitan Areas" National Association of Realtors.

Community contacts have identified the following credit and community development needs within this MSA:

- Agriculture program for community gardens to help make the cost of transporting produce to the cities more affordable
- Affordable owner-occupied and rental units
- Funding for small builders to construct affordable new home developments
- Construction/rehab funding to help rebuild housing in major designated disaster areas
- Financial education that includes greater bank involvement and user friendly materials
- Foreclosure assistance
- Funding to support healthy food choices and community gardens
- Down payment and closing cost assistance such as funding for IDA programs

Opportunities for participation by financial institutions include the following:

- Provide assistance through the Homestead Exemption Filing Program
- Scholarship programs to help increase graduation rates and higher education
- Provide assistance to help create land bank program
- Expand bank relationships beyond tellers by creating exposure to other bank personnel and products

The San Antonio-New Braunfels, TX MSA comprises the following eight counties: Atascosa, Bandera, Bexar, Comal, Guadalupe, Kendall, Medina, and Wilson counties. Commonly known as Greater San Antonio, the metropolitan area straddles South Texas and Central Texas and it is on the southwestern corner of the Texas Triangle. The San Antonio-New Braunfels, TX MSA is the third-largest metropolitan area in Texas after the Dallas-Fort Worth-Arlington, TX MSA and the Houston-The Woodlands-Sugar Land, TX MSA. It is also the second fastest-growing large metropolitan area in the state after the Austin-Round Rock, TX MSA. Principal cities are San Antonio, New Braunfels, Schertz, and Seguin. The 2017 American Community Survey estimates the population at 2.4 million, a 15 percent increase in the population since the 2010 census.

<u>Employment and Economic Factors</u>

The San Antonio-New Braunfels, TX MSA has numerous major companies and industries. The most common job groups, by number of people living in the MSA, are management, business, science and arts, sales and office, and service. San Antonio’s employers support a healthy and diverse economy with a blend of well-established financial services, rapidly growing biomedical and biotech sectors, IT and cybersecurity field, and a robust manufacturing sector that produces everything from aircrafts to Toyota trucks. San Antonio’s central location has made it the hub for economies in the South Central Texas region and Mexico. Based on data from the Bureau of Labor Statistics, in January 2012, the unemployment rates in the San Antonio-New Braunfels, TX MSA was 6.6 percent. In December 2016, the unemployment rate decreased to 3.6 percent.

Major employers in the San Antonio-New Braunfels, TX MSA are Joint Base San Antonio (JBSA), HEB Grocery Company, LP, United Services Automobile Association (USAA), City of San Antonio, Methodist Healthcare System, Baptist Health System, JPMorgan Chase, Wells Fargo, AT&T, and Cullen/Frost Bankers. Often referred to as Military City, USA, the San Antonio-New Braunfels, TX MSA has had a strong military presence for centuries. With three major military bases as part of JBSA, the city is home to one of the largest active and retired military populations in the nation. The three military bases include Fort Sam Houston, Lackland Air Force Base, and Randolph Air Force Base. The MSA is also home to seven Fortune 1000 companies: Valero Energy Corp, Tesoro Petroleum Corp, Clear Channel Communications, USAA, NuStar Energy, and CST Brands Inc.

Housing

The National Association of Realtors reports that the median price of a single-family home at December 31, 2014, was $182,100 for the San Antonio-New Braunfels, TX MSA. As of December 31, 2016, this value rose to $206,900. In an MSA with rising incomes and declining unemployment, housing affordability continues to be a significant issue. In 2016, the CoreLogic Case-Shiller Home Price Index for San Antonio reported a 7.8 percent year-over-year gain in single-family home sale prices, compared to 3.7 percent gain nationally. As a result, San Antonio homes are overvalued by 18.6 percent, the most of any market in America, according to Fitch Ratings. Owner occupied rates continue to increase in higher priced properties in newer neighborhoods. In addition, renter demand remains strong in mid-tier neighborhoods. In 2016, the U.S. Census Bureau reported that San Antonio's monthly housing rents are rising at a sharper rate than the state or national average and the city's housing market is attracting a bigger share of renters than in years past. The median monthly rent for occupied housing inside San Antonio's city limits rose to $856, according to the 2011-2015 American Community Survey 5-Year Estimates. This represents a 14 percent increase from the median rent of $748 reported for 2006-2010.

The 2016 Housing Affordability Index (HAI)[104] composite score for the MSA was 174.5. The index measures affordability of housing for a single family earning the median family income to necessary to qualify for a mortgage loan to purchase a median priced home. The higher the score, the more affordable the home. The HAI score for the MSA reflects a slightly lower cost of housing in comparison to the national average of 167.1.

Community Contacts

A review of community contacts indicted that the following are identified needs within this MSA:

- Affordable housing
- Community services, such as financial education and job training
- Economic development

[104] Copyright 2017 "Affordability Index of Existing Single-Family Homes for Metropolitan Areas" National Association of Realtors.

Opportunities for participation by financial institutions include the following:

- Working with various nonprofits on affordable housing development and mortgage financing
- Fund job training needs for the medical field which is an industry in San Antonio that is growing rapidly, and it is experiencing a shortage of trained staff
- Working with area economic development agencies to promote initiatives that create opportunities for a diverse and strong economy

The Charlottesville, VA MSA comprises the following five counties: Albemarle, Buckingham, Fluvanna, Greene, and Nelson. The principal city is Charlottesville. The MSA is located 71 miles west of Richmond, VA; 110 miles southwest of Washington, D.C.; and, 162 miles northwest of Norfolk, VA. The University of Virginia is located in Charlottesville.

<u>Employment and Economic Factors</u>

According to Moody's Analytics, the Charlottesville, VA MSA is Virginia's strongest performing metropolitan area. Key economic indicators are faring far better than statewide and nationally, and prior year (2016) growth in payroll employment near 2 percent exceeds that in every other Virginia metropolitan area or division. According to the Moody's Analytics business cycle tracker, the Charlottesville, VA MSA is in late-cycle expansion because of supply constraints that have contributed to slower job growth over the last six months. The labor market is tight with a limited supply of qualified candidates. The unemployment rate is low at 3.3 percent in December 2016. Leisure/hospitality and business/professional services are responsible for about two-thirds of the job gains that occurred in 2017. Unlike in most of the state, the Charlottesville, VA MSA enjoys positive and increasing net migration, which not only allows for strong labor force growth, but also supports housing and consumer industries.

The University of Virginia (UVA) and Shenandoah National Park will have to overcome cuts in government funding that occurred in 2017. UVA managed to balance reduced state appropriations through higher private endowments and by raising tuition. UVA's excellent reputation makes it unlikely that the increased tuition will affect enrollment rates. In contrast, cuts to federal funding for Shenandoah National Park are cause for concern. The park administration significantly hiked entrance fees, but the funding cut, together with a dip in visits, suggests that positive momentum in leisure/hospitality will fade, and the industry will add jobs at a below-average rate in 2018.

A segment of the population that remains woefully underused by businesses are those residents holding a graduate degree, causing a long-term brain drain and loss of upside potential in the Charlottesville, VA MSA. The supply of high-skilled jobs is not keeping pace with the availability of UVA's post-graduate population. There is more job availability for workers with at least a high school diploma.

Top employers (defined as employees of 1,000 or more) include the UVA, UVA Medical Center, Sentara Healthcare, UVA Health Services Foundation, and State Farm Insurance.

<u>Housing</u>

Steady population gains among baby boomers and Generation X, which have higher rates of homeownership than younger cohorts, are lifting up a housing market that has lagged in recent years. Households in the Charlottesville, VA MSA are forming more quickly than elsewhere, and with inventories of unsold homes depressed, prices are rising, and new single-family housing starts are up 30 percent year over year, three times the national average. While housing is less affordable than average, it is also about 5 percent undervalued, leaving more room for growth in the residential market. Construction, along with education/healthcare and business/professional services, will be the top job creators in 2018.

<u>Community Contacts</u>

A review of community contacts indicted that the following are identified needs within this MSA:

- Expanded funding for housing counseling
- Down payment assistance
- Overall first-time homebuyer support

Opportunities for participation by financial institutions include the following:

- Down payment assistance
- Affordable housing construction.

Richmond, VA MSA

Table A – Demographic Information of the Assessment Area

The Richmond, VA MSA comprises the following 13 counties and 4 independent cities: Amelia, Caroline, Charles City, Chesterfield, Dinwiddie, Goochland, Hanover, Henrico, King William, New Kent, Powhatan, Prince George, Sussex, Colonial Heights City, Hopewell City, Petersburg City, and Richmond City. The MSA is located equidistant from Northern Virginia, Hampton Roads, and Lynchburg. The area is home to approximately 1.3 million residents or 15.1 percent of the state's current population.

Employment and Economic Factors

According to Moody's Analytics, the Richmond, VA MSA's economy is strong and besting the U.S. and other major population centers in Virginia, such as Northern Virginia and Virginia Beach. Professional/business services lead job creation, followed by government, healthcare, and construction. Moreover, in the Richmond, VA MSA, the statewide recent malaise in retail is less pronounced. The allure of the area's job market is drawing participants into the labor force at an above-average pace. The job growth is a windfall for single-family housing as permits are rising faster than in the U.S.

Moody's Analytics stress-tested Virginia's state budget and found that a garden-variety recession would lead to revenue losses and increased Medicaid spending that amount to 11 percent of fiscal 2017 revenues. Virginia's reserves make up less than 4 percent of fiscal 2017 revenues. Local governments have similar fiscal issues. In the core counties of Henrico, Hanover, and Chesterfield, operating funds as a share of revenues are below the median for U.S. counties.

Proliferating data centers, which have largely benefitted Northern Virginia, will spread to the Richmond, VA MSA thanks to state tax incentives for computer equipment spending, low industrial electricity rates in Virginia, proximity to the federal government, and rising cloud computing demand. Facebook is opening a data center in Henrico County's White Oak Technology Park. In addition, the Henrico Planning Commission has approved a plan of development for another data center in the technology park.

Moody's Analytics projects that the Richmond, VA MSA will best the U.S. this year and next (2018). A large talent pool along with high standards of living will propel further growth in professional/business services. An expanding population will nurture continued investments in healthcare capacity. The Richmond, VA MSA's status as a distribution hub will enable the area to reap the full upside from e-commerce. Longer term, the metropolitan area will match the U.S. rate of growth.

Top employers in the Richmond, VA MSA include Capital One Financial, Fort Lee, VCU Health System, HCA Inc., Bon Secours Richmond Health System, Wal-Mart Stores Inc., and Dominion Resources, Inc. BANA employed 1,921 in the metropolitan area.

Housing

A buoyant job market, favorable demographics, and house price gains exceeding the state average will galvanize hiring by homebuilders. HHHunt Homes is building 81 courtyard houses at Wyndham Forest, a neighborhood in western Henrico County. There are plans to demolish a one-story warehouse in downtown Richmond to make way for a 12-story apartment building, named the Locks Tower, to rise in its place. Monument Companies, a residential developer, is also converting two other spaces north of the James River into 80- and 59-unit apartment buildings. The Richmond, VA MSA's rental vacancy rate is below average, pushing rents up. Increased multi-family development is key to easing rental inflation and enabling potential homebuyers to save enough for a down payment.

The 2016 Housing Affordability Index (HAI)[105] composite score for the MSA was 189.3. The index measures affordability of housing for a single family earning the median family income necessary to qualify for a mortgage loan to purchase a median priced home. The higher the score, the more affordable the home. The HAI score for the MSA reflects a lower cost of housing in comparison to the national average of 167.1.

Community Contacts

A review of community contacts indicted that the following are identified needs within this MSA:

- Affordable housing. There needs to be an additional 20,000 affordable housing units built by 2030 to meet the future demand of this sector of the population. There is a need for more affordable housing choices for lower-income individuals.
- Increase the salaries of the low-income wage earner.

State of Washington

The Bremerton-Silverdale, WA MSA comprises Kitsap County and includes the cities of Bremerton, Bainbridge Island, Port Orchard, and Poulson. The MSA is connected to the eastern shore of Puget Sound by Washington State Ferry routes. The U.S. Navy is the largest employer, with installations at Puget Sound Naval Shipyard (PSNS), Naval Underseas Warfare Center Keyport, and Naval Base Kitsap. The MSA is a part of the Seattle-Tacoma, WA Combined Statistical Area.

<u>Employment and Economic Factors</u>

According to Moody’s Analytics, the Bremerton-Silverdale, WA MSA’s economy is falling behind the state and the nation. Progress is slow across industries, including in the outsize public sector, and prior year growth in payroll employment ranks among the worst in Washington. Employment in private services is largely unchanged since January 2017 with gains in professional/business and financial services offset by cutbacks in retail and healthcare. However, the signal from the household survey of employment is more upbeat. The labor force is expanding rapidly. The jobless rate fell to a post-recession low of 4.6 percent in October 2017. Wage and salary income growth exceeds the state and national rates by the most since 2010, and recent acceleration is lending support to the housing market.

According to Moody’s Analytics, Naval Base Kitsap and the PSNS will be a pillar of strength in the MSA economy. Expanding work obligations at the shipyard will support federal hiring over the next several years. PSNS has announced it is hiring again, its sixth large recruitment effort in the past three years. The Navy’s four shipyards, including PSNS, are in poor condition, according to a report by the U.S. General Accounting Office (GAO). PSNS has only completed 29 percent of maintenance work on time since 2000 because of a backlog of work and aging infrastructure. With the number of ships set to rise from 275 to 355, the demands on the shipyards will only grow. The Navy plans to spend up to $4 billion to upgrade its shipyards over the next 30 years. Expansion of the workforce will boost incomes because these jobs generally pay well.

Moody Analytics predicts the Bremerton-Silverdale, WA MSA will struggle to reduce its reliance on the public sector. Industrial diversity ranks in the bottom quartile among West metropolitan areas. A favorable cost structure, average educational attainment, and proximity to Seattle have the potential to attract new businesses and broaden the industrial base. Office space is inexpensive and tax burdens and labor costs are below average. However, the MSA has not attracted substantial investment to date and private industries are expanding at a below-average rate. Employment in private industries is up only 3 percent since 2010 compared with 16 percent nationally.

Moody's Analytics projects that the Bremerton-Silverdale, WA MSA will gain enough momentum to keep pace with the regional average in 2018. Stronger hiring and positive net migration will support rising incomes and consumption. However, an overreliance on federal government and a lack of dynamic drivers will keep gains below the state average in the long term.

Top employers in the Bremerton-Silverdale, WA MSA include Naval Base Kitsap, Harrison Medical Center, Naval Undersea Warfare Center, Naval Hospital Bremerton, and Olympic College.

Housing

According to Moody's Analytics, the housing market will contribute more to output and employment growth thanks to strong fundamentals. Rising incomes and an above-average rate of household formation will support housing demand in the coming year. More federal government jobs and stronger hiring in private industries will support solid gains in average household incomes. In addition, the Bremerton-Silverdale, WA MSA will benefit from Seattle's robust labor market as more workers take advantage of a lower cost of living in the Bremerton-Silverdale, WA MSA than across the Puget Sound. Stronger net migration will support above-average household formation and boost demand for housing. Home sales are strong, with sales of existing homes outpacing the state and national averages. Residential building is picking up as inventories draw down and house price appreciation slowly accelerates.

Community Contacts

A review of community contacts indicted that the following are needs within the MSA:

- Affordable workforce housing and housing for low-income families
- More affordable deposit product choices for low-income individuals, including a “second chance” checking account

Seattle-Tacoma-Bellevue, WA MSA

Due to rounding, totals may not equal 100.0
(*) The NA category consists of geographies that have not been assigned an income classification.

The Seattle-Tacoma-Bellevue, WA MSA comprises King, Pierce, and Snohomish counties, which are the three most populous counties in the state. Principal cities include Seattle, Tacoma, Bellevue, Everett, Kent, Renton, Auburn, Lakewood, and Redmond. The 2017 American Community Survey estimates the population at 3.8 million, a 12 percent increase since the 2010 census. The Seattle-Tacoma-Bellevue, WA MSA is the 14th largest metropolitan area in the U.S. Almost half of the state's population lives in the Seattle-Tacoma-Bellevue, WA MSA.

<u>Employment and Economic Factors</u>

According to Moody's Analytics, the Seattle-Tacoma-Bellevue, WA MSA's economy is in a league of its own. Although job growth has eased from the pace of the past five years, a swell of in-migration has enabled the economy to grow faster for longer. Large expansions by Amazon, Microsoft, and Google have cemented the MSA's status as the cradle of the global cloud-computing revolution and secured its status at the forefront of large U.S. metro areas in terms of job, income, and output growth. While Boeing continues to pare workers and it has reduced its workforce in the MSA by a fifth in the past 18 months, gains in informatics, software publishing, and data analytics has more than made up for the aerospace giant's layoffs. The continuing erosion in housing affordability and the still-restrained pace of single-family homebuilding are blemishes on an otherwise sparkling report card. Despite rising home sales, new residential construction badly lags demand.

Tech titan Amazon's push to establish a second corporate headquarters beyond its Seattle-Tacoma-Bellevue, WA MSA base is not a rebuke to the area's tech-charged economy, but it does cast light on labor, housing, and commercial real estate constraints that will place a speed limit on growth over the next few quarters. Although large labor force gains have created more room for employers to run, the pool of idle workers is rapidly thinning, and the synchronous U.S. expansion will create better-paying opportunities throughout the country, reducing the incentive to migrate to the Seattle-Tacoma-Bellevue, WA MSA. Salaries for tech workers remain well below those in the San Francisco Bay Area, but they have risen by more than a third in the past four years. Still, with large tech firms getting first pick of engineering graduates at top-ranked University of Washington, the Seattle-Tacoma-Bellevue, WA MSA will maintain its allure. Amazon will still add close to 10,000 workers at its local headquarters in the next few years, and Microsoft, Google, and F5 Networks all harbor plans for expansion in Seattle. Although rising wages and office rents will encourage smaller tech firms to look elsewhere, proximity to top talent and the agglomeration economies, Seattle, Portland, and the Bay Area will entice larger firms to remain.

According to Moody's Analytics, the two-year contraction in aerospace manufacturing jobs will soon bottom, but the industry will no longer be a source of long-run job and income gains. Despite large workforce reductions, top employer Boeing will be a source of stability and payrolls will remain roughly even as the company adapts to airlines' demand for smaller planes. The start of production at the firm's new carbon-fiber wing facility in Everett will create up to 1,000 manufacturing jobs over the next few years, but net gains will be slim as automation takes hold elsewhere on the assembly line.

Moody's Analytics predicts that the Seattle-Tacoma-Bellevue, WA MSA's ascent as a global cloud competing hub will set it apart from other large U.S. metropolitan areas in job and income growth even as labor and housing constraints become more binding. Despite a contracting manufacturing base, rapid growth in software and IT services will secure the economy's status as one of the most vibrant in the West and in the U.S.

Top employers in the Seattle-Tacoma-Bellevue, WA MSA include Boeing Company, Microsoft Corporation, University of Washington, Amazon, Providence Health, Wal-Mart, Fred Meyer Stores, Costco, Swedish Health, Starbucks, and Nordstrom.

Housing

Soaring house prices will cause housing affordability to worsen over the next two years, putting home purchases increasingly among reach for workers in non-tech industries. If house prices continue to outpace income gains, the outlook for home sales and residential construction is negative.

The 2016 Housing Affordability Index (HAI)[106] composite score for the MSA was 124. The index measures affordability of housing for a single family earning the median family income necessary to qualify for a mortgage loan to purchase a median priced home. The higher the score, the more affordable the home. The HAI score for the MSA reflects a higher cost of housing in comparison to the national average of 167.1.

Community Contacts

A review of community contacts indicted that the following are identified needs within this MSA:

- Affordable workforce housing and housing for low-income families

State of Illinois

CRA Rating for Illinois[24]: Outstanding
The Lending Test is rated: Outstanding
The Investment Test is rated: Outstanding
The Service Test is rated: High Satisfactory

The major factors that support this rating include:

- Good volume of loans originated or purchased within the assessment areas;
- Excellent distribution of loans by geography and good distribution of loans by borrower income or business revenue size;
- Relatively high level of CD lending that has a positive effect on overall lending performance;
- Excellent level and responsiveness of qualified investments; and
- Accessible service delivery systems to low- and moderate-income geographies and individuals.

Description of Institution's Operations in Illinois

The state of Illinois is Bank of America's seventh largest rating area based on its total deposits in the state when excluding the St. Louis, MO-IL Multistate MSA. Examiners excluded the St. Louis, MO-IL Multistate MSA from the analysis of the state of Illinois because examiners evaluated the multistate MSA as a separate rating area. As of June 30, 2016, the bank maintained approximately $41.5 billion or 3.4 percent of its total domestic deposits in financial centers in areas of the state of Illinois that do not include the multistate MSA. Of the 508 depository financial institutions operating in the portion of the state of Illinois that excludes the multistate MSA, Bank of America, with a deposit market share of 9 percent, is the third largest. Competitors with deposit market shares greater than 5 percent include JP Morgan Chase Bank (18.3 percent), BMO Harris Bank (11.4 percent), and the Northern Trust Company (6.3 percent). The state of Illinois is the bank's seventh largest rating area for the bank's total domestic deposits. As of December 31, 2016, the bank operated 158 financial centers and 398 ATMs in the portion of Illinois that excludes the multistate MSA.

Examiners use the bank's deposit volume as an indicator of its capacity to lend and invest in its assessment areas. In some cases, not all deposits originated from the local community. In the Chicago-Naperville-Elgin, IL MSA, Bank of America reported an additional $12.3 billion in deposits of national corporations, in which the funds originated from communities across the

[24] For institutions with branches in two or more states in a multistate metropolitan area, this statewide evaluation does not reflect performance in the parts of this state contained within the multistate metropolitan area. Refer to the multistate metropolitan area rating and discussion for the rating and evaluation of the institution's performance in that area.

nation and deposited in financial centers near the headquarters of these large corporations. Adjusting the bank's total deposits in the MSA by excluding these external deposits from the local deposit base gives a more accurate indicator of the bank's capacity in the assessment area.

Refer to the community profiles for the state of Illinois in appendix C for detailed demographics and other performance context information for assessment areas that received full-scope reviews.

Scope of Evaluation in Illinois

The bank has defined two assessment areas in the state of Illinois. Examiners selected the Chicago-Naperville-Elgin, IL MSA for a full-scope review and the Rockford, IL MSA for a limited-scope review. The Chicago-Naperville-Elgin, IL MSA accounts for 99.8 percent of the bank's deposits within the state of Illinois. During the evaluation period, Bank of America originated or purchased 41,110 home mortgage loans totaling $10.1 billion, 45,842 small loans to businesses totaling $1.5 billion, 122 small loans to farms totaling $1.5 million, and 55 CD loans totaling $343.4 million. Lending volumes include loans originated or purchased in the Illinois Non-MSA assessment area (Adams County), which the bank no longer designates as an assessment area due to the bank's closure or sale of all financial centers and deposit-taking ATMs in the county. Based on loan volume, examiners weighted small loans to businesses, representing 53 percent of the volume, the most followed by home mortgage loans at 47 percent, and small loans to farms at less than 1 percent.

Examiners conducted interviews with two local community organizations representing housing and policy research. The community contacts identified the following as some of the most pressing needs in their communities: mortgage loans, small loans to businesses, and bank branches in low- and moderate-income neighborhoods in Chicago. The perception is that banks have avoided low- and moderate-income neighborhoods in favor of neighborhoods where banks can originate larger loan amounts that are more profitable. A nonprofit CDFI with a 43 percent market share in a community further illustrates the absence of banks in the community.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN ILLINOIS

LENDING TEST

Conclusions for Areas Receiving Full-Scope Reviews

Bank of America's performance under the Lending Test in the state of Illinois is rated Outstanding, based on good lending activity, excellent geographic distribution, good borrower income distribution, and relatively high levels of CD lending that have a positive effect on the Lending Test rating. Performance in limited-scope assessment areas has a neutral effect on the state rating.

Lending Activity

Based on total lending volume in Table 1, peer deposit and loan data for 2016, and relevant performance context considerations, the bank's lending activity in the state of Illinois is good. Lending activity is good in the Chicago-Naperville-Elgin, IL MSA and excellent in the limited-scope assessment area.

Chicago-Naperville-Elgin, IL MSA

Lending activity in the Chicago-Naperville-Elgin, IL MSA is good. Based on FDIC deposit data as of June 30, 2016, Bank of America has a deposit market share of 11 percent. The bank ranks third among 181 depository financial institutions in the assessment area, which places it in the top 2 percent of institutions. Adjusting for the $12.3 billion in corporate deposits, the bank's deposit market share would decline to 8 percent, but its ranking would remain unchanged. According to peer mortgage data for 2016, the bank has a market share of 1.7 percent based on the number of home mortgage loans originated or purchased. The bank ranks 10th among 906 home mortgage lenders, which places it in the top 2 percent of lenders. According to peer small business data for 2016, the bank has a 5.2 percent market share of small loans to businesses based on the number of small loans to businesses originated or purchased. The bank ranks sixth among 217 small business lenders, which places it in the top 3 percent of lenders. For small loans to farms, the bank has a market share of 1.9 percent based on the number of small loans to farms originated or purchased. The bank ranks 13th among 43 farm lenders, which places it in the top 31 percent of lenders. Considering the bank's ranking among all lenders for home mortgage loans and small loans to businesses relative to its ranking for deposits, overall lending activity is good.

Distribution of Loans by Income Level of the Geography

The bank's geographic distribution of loans reflects excellent penetration in low- and moderate-income geographies. For this analysis, examiners compared the bank's HMDA-reportable loan originations and purchases, small loans to businesses, and small loans to farms with available demographic information. Examiners also considered any relevant performance context information and aggregate lending data.

Home Mortgage Loans

Refer to Table O for the facts and data used to evaluate the geographic distribution of the bank's originations/purchases of home mortgage loans.

The overall geographic distribution of home mortgage loans is good. The distribution is good in the Chicago-Naperville-Elgin, IL MSA.

Chicago-Naperville-Elgin, IL MSA

The geographic distribution of home mortgage loans in the Chicago-Naperville-Elgin, IL MSA is good. Performance is good in low-income geographies and good in moderate-income geographies. The distribution of home mortgage loans in low-income geographies at 2.8 percent is lower than the 3.8 percent of owner-occupied housing units in low-income geographies; however, it exceeds the 2.5 percent for aggregate lenders. The distribution in moderate-income geographies at 12.6 percent is lower than the 17.4 percent of owner-occupied housing units in moderate-income geographies; however, it exceeds the 12.3 percent for aggregate lenders.

Small Loans to Businesses

Refer to Table Q for the facts and data used to evaluate the geographic distribution of the bank's originations/purchases of small loans to businesses.

The overall geographic distribution of small loans to businesses is excellent. The distribution is excellent in the Chicago-Naperville-Elgin, IL MSA.

Chicago-Naperville-Elgin, IL MSA

The geographic distribution of small loans to businesses in the Chicago-Naperville-Elgin, IL MSA is excellent. The distribution is good in low-income geographies and excellent in moderate-income geographies. The geographic distribution in low-income geographies at 3.1 percent is lower than the 4.3 percent of businesses in low-income geographies and it is slightly lower than the 3.3 percent performance for aggregate lenders. The geographic distribution in moderate-income geographies at 17.2 percent is higher than the 15.2 percent of businesses in moderate-income geographies and it exceeds the 14.4 percent performance for aggregate lenders.

Small Loans to Farms

Refer to Table S for the facts and data used to evaluate the geographic distribution of the bank's originations/purchases of small loans to farms.

The overall geographic distribution of small loans to farms is adequate. The distribution is adequate in the Chicago-Naperville-Elgin, IL MSA.

Chicago-Naperville-Elgin, IL MSA

The geographic distribution of small loans to farms in the Chicago-Naperville-Elgin, IL MSA is adequate, based on poor performance in low-income geographies and adequate performance in moderate-income geographies. The bank did not originate or purchase small loans to farms in low-income geographies where 2.4 percent of the farms are located. The performance for aggregate lenders was 0.7 percent. The geographic distribution in moderate-income geographies at 6.3 percent is lower than the 12.3 percent of farms in moderate-income geographies; however, it exceeds the 5.3 percent for aggregate lenders.

Lending Gap Analysis

For areas receiving full-scope reviews, examiners noted no conspicuous or unexplained gaps in lending in low- and moderate-income geographies.

Inside/Outside Ratio

See the "Inside/Outside Ratio" section within the overall Scope of Evaluation.

Distribution of Loans by Income Level of the Borrower

The bank's distribution of loans by borrower income and revenue size is good. For this analysis, examiners compared the bank's HMDA-reportable loan originations and purchases, small business, and small farm lending with available demographic information. Examiners also considered any relevant performance context information and aggregate lending data.

Home Mortgage Loans

Refer to Table P for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases.

The overall distribution of home mortgage loans by borrower income is good. The distribution is good in the Chicago-Naperville-Elgin, IL MSA.

Chicago-Naperville-Elgin, IL MSA

The distribution of home mortgage loans by borrower income in the Chicago-Naperville-Elgin, IL MSA is good. The distribution is adequate to low-income borrowers and good to moderate-income borrowers. The proportion of the bank's home mortgage loans to low-income borrowers at 7.8 percent is lower than the 22.1 percent of low-income families in the MSA; however, it exceeds the 5.2 percent performance for aggregate lenders. The proportion of loans to moderate-income borrowers at 13.6 percent is lower than the 16.8 percent of moderate-income families in the MSA and it is slightly higher than the 13.5 percent performance for aggregate lenders.

Small Loans to Businesses

Refer to Table R for the facts and data used to evaluate the borrower distribution of the bank's originations and purchases of small loans to businesses.

The distribution of small loans to businesses with gross annual revenues of $1 million or less is good overall. The distribution is good in the Chicago-Naperville-Elgin, IL MSA. The bank did not collect or consider the gross annual revenues in the underwriting of approximately 28 percent of its small loans to businesses.

Chicago-Naperville-Elgin, IL MSA

The distribution of small loans to businesses with gross annual revenues of $1 million or less in the Chicago-Naperville-Elgin, IL MSA is good. Based on businesses with known revenues, the proportion of the bank's small loans to businesses at 58.9 percent is lower than the 75.7 percent of businesses with gross annual revenues of $1 million or less. Considering the bank's distribution is higher than the 39.6 percent for aggregate lenders, overall performance is good.

Community Development Lending

CD lending has a positive effect overall on the bank's Lending Test performance in the state of Illinois.

Chicago-Naperville-Elgin, IL MSA

In the Chicago-Naperville-Elgin, IL MSA, CD lending has a positive effect on the lending performance in the assessment area. During the evaluation period, the bank originated 54 CD loans totaling $333.8 million that primarily helped provide 1,820 units of affordable housing. CD lending represents 9.1 percent of the allocated Tier 1 Capital, after considering $12.3 billion in deposits from national corporations in which the deposits did not derive from the local community.

Examples of CD loans include:

- The bank provided its annual commitment of $18 million in funding to the Community Investment Corporation (CIC), which is a certified CDFI. The consortium provides funding for permanent loans on revitalized low- and moderate-income housing throughout Chicago. Bank of America's $72 million total commitment is the largest total dollar commitment in the CIC.

- The bank provided $11.8 million in construction financing for the rehabilitation of 201 units of public housing under the HUD Rental Assistance Demonstration Conversion Program to Project-Based Section 8 housing in Evanston, IL. The project consists of two separate public housing developments. All units except two reserved for the onsite property managers are restricted to incomes at or below 60 percent of the area median income.

- The bank provided $16.1 million in acquisition and construction financing for the complete gut rehabilitation of a 20-story former public housing building named "Fannie Emanuel Apartments" in Chicago, IL. The completed 181-unit building will have 180 units restricted to seniors aged 62 and over with incomes up to 60 percent of the area median income. One unit is reserved for the onsite property manager.

Product Innovation and Flexibility

Bank of America offers various national and local flexible lending programs that have benefitted borrowers during the evaluation period. These include programs such as America's

Home Grant, Affordable Loan Solutions, and Business Advantage Credit Line. The bank also participates with multiple organizations that provide flexible lending through NACA and other affordable housing programs. Within the state of Illinois, lending under the MHA and HARP programs accounted for 84 percent of the dollar volume of all loans under flexible lending programs.

Conclusions for Areas Receiving Limited-Scope Reviews

Lending Test performance in the Rockford, IL MSA is consistent with the Outstanding Lending Test performance in the state of Illinois.

INVESTMENT TEST

Conclusions for Areas Receiving Full-Scope Reviews

Refer to Table 14 for the facts and data used to evaluate the bank's level of qualified investments.

Bank of America's performance under the Investment Test in the state of Illinois is rated Outstanding. Investment performance is excellent in the Chicago-Naperville-Elgin, IL MSA. Performance in limited-scope assessment areas has a neutral effect on the state rating.

Chicago-Naperville-Elgin, IL MSA

In the Chicago-Naperville-Elgin, IL MSA, the bank has an excellent level of CD investments. The bank made 651 CD investments during the current evaluation period totaling $457.3 million. Approximately $419.2 million or 92 percent of the current period investment dollars supported nearly 3,900 units of affordable housing. In addition, the bank has 148 CD investments totaling $118 million it made during a prior evaluation period that are still outstanding and continue to provide benefit to the community. Prior period and current period investments total $575.4 million or 15.7 percent of allocated Tier 1 Capital, after considering the $12.3 billion in deposits that did not originate from the assessment area. The majority of current period investments are innovative or complex with LIHTCs and New Markets Tax Credits representing approximately $243.8 million or 53 percent of the investment dollars.

Examples of community development investments include:

- The bank invested $9.6 million in a LIHTC to fund the substantial rehabilitation and historic preservation of the 1704 N. Humboldt project located in the Humboldt Park neighborhood of Chicago, IL. The 1920's courtyard building has 29 units of affordable housing. The development has all units occupied and under Section 8 contracts.

- The bank invested $12 million in a LIHTC for the construction of 65th Infantry Regiment Veterans Housing, a new 49-unit multifamily housing project in Chicago, IL. All units, except one reserved for the onsite property manager, are restricted to veterans and families with incomes at or below 60 percent of the area median income.

- The bank invested $3.2 million in a joint venture to acquire investments in partnerships that own affordable housing projects financed with LIHTCs. This $3.2 million represents the portion of funding applied toward the Amberton Apartments LIHTC project, located in Bolingbrook, IL.

ILLINOIS	187	124,418	722	461,097	909	585,515	100.00	15	77,527

(*) 'Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
(**) 'Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the bank's financial reporting system.

Conclusions for Areas Receiving Limited-Scope Reviews

Investment Test performance in the Rockford, IL MSA is weaker than the overall Outstanding Investment Test performance in the state of Illinois primarily due to lower levels of CD investments relative to the bank's size and resources in the assessment area.

SERVICE TEST

Conclusions for Areas Receiving Full-Scope Reviews

Bank of America's performance under the Service Test in the state of Illinois is rated High Satisfactory. Service Test performance is good in the Chicago-Naperville-Elgin, IL MSA. Performance in limited-scope assessment areas has a neutral effect on the state rating.

Retail Banking Services

Refer to Table C for the facts and data used to evaluate the accessibility of the bank's retail banking services.

Chicago-Naperville-Elgin, IL MSA

In the Chicago-Naperville-Elgin, IL MSA, the bank's service delivery systems are accessible to geographies and individuals of different income levels. Examiners based this conclusion on a comparison of the distribution of the bank's 157 financial centers with the distribution of the population. The bank has 9 financial centers or 5.7 percent of its financial centers in low-income geographies where 8.7 percent of the population lives. The bank has 27 financial centers or 17.2 percent of its financial centers located in moderate-income geographies where 23 percent of the population lives.

Examiners also considered the bank's alternative delivery systems, including ATMs, and telephone, online, mobile, and text banking in evaluating accessibility to the bank's products and services. Based on customer usage, alternative delivery systems have a positive effect on the accessibility of the bank's service delivery systems to low- and moderate-income individuals and geographies. The proportions of customers in low- and moderate-income geographies using ATM, telephone, mobile, and text banking exceed the proportion of the population in low- and moderate-income geographies.

The bank has 20 financial centers in middle- and upper-income census tracts that are adjacent to or in very close proximity to moderate-income census tracts. These financial centers provide additional access to individuals and businesses in moderate-income geographies.

Financial center openings and closings did not adversely affect the accessibility of service delivery systems, particularly in low- and moderate-income geographies or to low- and moderate-income individuals. During the evaluation period, the bank opened five financial centers and closed twenty-five. The bank closed four financial centers in moderate-income geographies and the remaining twenty-one in middle- and upper-income geographies.

Banking products and services do not vary in a way that inconveniences the assessment area, particularly in low- and moderate-income geographies or to low- and moderate-income individuals. The bank offers a full range of products and services. Hours of operation are more restrictive in moderate-income geographies. Financial centers are generally open 9:00 am to 5:00 pm Monday through Thursday, 9:00 am to 6:00 pm on Friday, and 9:00 am to 1:00 pm on Saturday.

Community Development Services

Chicago-Naperville-Elgin, IL MSA

The bank provides a relatively high level of community development services in the MSA. During the evaluation period, the bank participated with community development organizations to provide 288 community development services targeted to low- and moderate-income individuals. Employees provided homebuyer education workshops to 4 low- and moderate-income individuals and provided 16 financial education and foreclosure prevention workshops for 1,042 individuals. Employees provided 216 income tax preparation services and participated in 47 webinars and workshops with non-profit organizations to help the organizations with capacity building. In addition, five employees served on the boards or committees of community organizations. The types of CD services provided are responsive to the needs identified in the community.

Conclusions for Areas Receiving Limited-Scope Reviews

Service Test performance in the Rockford, IL MSA is weaker than the overall High Satisfactory Service Test performance in the state of Illinois. Performance is weaker primarily due to the weaker distribution of financial centers. The bank has only one financial center in the assessment area, which is located in an upper-income census tract.

Part I. Financial Information

Part II. Other Information

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Bank of America Corporation (the "Corporation") and its management may make certain statements that constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. These statements can be identified by the fact that they do not relate strictly to historical or current facts. Forward-looking statements often use words such as "anticipates," "targets," "expects," "hopes," "estimates," "intends," "plans," "goals," "believes," "continue" and other similar expressions or future or conditional verbs such as "will," "may," "might," "should," "would" and "could." Forward-looking statements represent the Corporation's current expectations, plans or forecasts of its future results, revenues, provision for credit losses, expenses, efficiency ratio, capital measures, strategy, and future business and economic conditions more generally, and other future matters. These statements are not guarantees of future results or performance and involve certain known and unknown risks, uncertainties and assumptions that are difficult to predict and are often beyond the Corporation's control. Actual outcomes and results may differ materially from those expressed in, or implied by, any of these forward-looking statements.

You should not place undue reliance on any forward-looking statement and should consider the following uncertainties and risks, as well as the risks and uncertainties more fully discussed under Item 1A. Risk Factors of the Corporation's 2020 Annual Report on Form 10-K and in any of the Corporation's subsequent Securities and Exchange Commission filings: the Corporation's potential judgments, damages, penalties, fines and reputational damage resulting from pending or future litigation and regulatory investigations, proceedings and enforcement actions, including as a result of our participation in and execution of government programs related to the Coronavirus Disease 2019 (COVID-19) pandemic; the possibility that the Corporation's future liabilities may be in excess of its recorded liability and estimated range of possible loss for litigation, and regulatory and government actions; the possibility that the Corporation could face increased claims from one or more parties involved in mortgage securitizations; the Corporation's ability to resolve representations and warranties repurchase and related claims; the risks related to the discontinuation of the London Interbank Offered Rate and other reference rates, including increased expenses and litigation and the effectiveness of hedging strategies; uncertainties about the financial stability and growth rates of non-U.S. jurisdictions, the risk that those jurisdictions may face difficulties servicing their sovereign debt, and related stresses on financial markets, currencies and trade, and the Corporation's exposures to such risks, including direct, indirect and operational; the impact of U.S. and global interest rates, inflation, currency exchange rates, economic conditions, trade policies and tensions, including tariffs, and potential geopolitical instability; the impact of the interest rate environment on the Corporation's business, financial condition and results of operations; the possibility that future credit losses may be higher than currently expected due to changes in economic assumptions, customer behavior, adverse developments with respect to U.S. or global economic conditions and other uncertainties; the Corporation's concentration of credit risk; the Corporation's ability to achieve its expense targets and expectations regarding revenue, net interest income, provision for credit losses, net charge-offs, effective tax rate, loan growth or other projections; adverse changes to the Corporation's credit ratings from the major credit rating agencies; an inability to access capital markets or maintain deposits or borrowing costs; estimates of the fair value and other accounting values, subject to impairment assessments, of certain of the Corporation's assets and liabilities; the estimated or actual impact of changes in accounting standards or assumptions in applying those standards; uncertainty regarding the content, timing and impact of regulatory capital and liquidity requirements; the impact of adverse changes to total loss-absorbing capacity requirements, stress capital buffer requirements and/or global systemically important bank surcharges; the potential impact of actions of the Board of Governors of the Federal Reserve System on the Corporation's capital plans; the effect of changes in or interpretations of income tax laws and regulations; the impact of implementation and compliance with U.S. and international laws, regulations and regulatory interpretations, including, but not limited to, recovery and resolution planning requirements, Federal Deposit Insurance Corporation assessments, the Volcker Rule, fiduciary standards, derivatives regulations and the Coronavirus Aid, Relief, and Economic Security Act and any similar or related rules and regulations; a failure or disruption in or breach of the Corporation's operational or security systems or infrastructure, or those of third parties, including as a result of cyber-attacks or campaigns; the impact on the Corporation's business, financial condition and results of operations from the United Kingdom's exit from the European Union; the impact of climate change; the impact of any future federal government shutdown and uncertainty regarding the federal government's debt limit or changes in fiscal, monetary or regulatory policy; the emergence of widespread health emergencies or pandemics, including the magnitude and duration of the COVID-19 pandemic and its impact on the U.S. and/or global financial market conditions and our business, results of operations, financial condition and prospects; the impact of natural disasters, extreme weather events, military conflict, terrorism or other geopolitical events; and other matters.

Forward-looking statements speak only as of the date they are made, and the Corporation undertakes no obligation to update any forward-looking statement to reflect the impact of circumstances or events that arise after the date the forward-looking statement was made.

Notes to the Consolidated Financial Statements referred to in Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) are incorporated by reference into the MD&A. Certain prior-period amounts have been reclassified to conform to current-period presentation. Throughout the MD&A, the Corporation uses certain acronyms and abbreviations which are defined in the Glossary.

Executive Summary

Business Overview

The Corporation is a Delaware corporation, a bank holding company (BHC) and a financial holding company. When used in this report, "the Corporation," "we," "us" and "our" may refer to Bank of America Corporation individually, Bank of America Corporation and its subsidiaries, or certain of Bank of America Corporation's subsidiaries or affiliates. Our principal executive offices are located in Charlotte, North Carolina. Through our various bank and nonbank subsidiaries throughout the U.S. and in international markets, we provide a diversified range of banking and nonbank financial services and products through four business segments: *Consumer Banking*, *Global Wealth & Investment Management (GWIM)*, *Global Banking* and *Global Markets*, with the remaining operations recorded in *All Other*. We operate our banking activities primarily under the Bank of America, National Association (Bank of America, N.A. or BANA) charter. At June 30, 2021, the Corporation had $3.0 trillion in assets and a headcount of approximately 212,000 employees.

As of June 30, 2021, we served clients through operations across the U.S., its territories and approximately 35 countries. Our retail banking footprint covers all major markets in the U.S., and we serve approximately 66 million consumer and small business clients with approximately 4,300 retail financial centers, approximately 17,000 ATMs, and leading digital banking platforms (www.bankofamerica.com) with approximately 41 million active users, including approximately 32 million active mobile users. We offer industry-leading support to approximately three million small business households. Our *GWIM* businesses, with client balances of $3.7 trillion, provide tailored solutions to meet client needs through a full set of investment management, brokerage, banking, trust and retirement products. We are a global leader in corporate and investment banking and trading across a broad range of asset classes serving corporations, governments, institutions and individuals around the world.

The Corporation's website is www.bankofamerica.com, and the Investor Relations portion of our website is https://investor.bankofamerica.com. We use our website to distribute company information, including as a means of disclosing material, non-public information and for complying with our disclosure obligations under Regulation FD. We routinely post and make accessible financial and other information, including environmental, social and governance (ESG) information, regarding the Corporation on our website. Investors should monitor the Investor Relations portion of our website, in addition to our press releases, U.S. Securities and Exchange Commission (SEC) filings, public conference calls and webcasts.

Recent Developments

Capital Management

On June 24, 2021, the Board of Governors of the Federal Reserve System (Federal Reserve) announced the results of our 2021 Comprehensive Capital Analysis and Review (CCAR) capital plan and related supervisory stress tests. Based on our results, we will be subject to a preliminary 2.5 percent stress capital buffer (SCB) beginning October 1, 2021, unchanged from the current level, and our minimum Basel 3 Common equity tier 1 (CET1) capital ratio requirement will also remain unchanged at 9.5 percent.

On July 21, 2021, the Corporation's Board of Directors (the Board) declared a quarterly common stock dividend of $0.21 per share, an increase of 17 percent compared to the prior dividend rate, payable on September 24, 2021 to shareholders of record as of September 3, 2021.

For more information on our capital resources and regulatory developments, see Capital Management on page 22.

U.K. Tax Law Change

On June 10, 2021, the U.K. enacted the 2021 Finance Act, which increases the U.K. corporation income tax rate to 25 percent from 19 percent, effective April 1, 2023. As a result, during the second quarter of 2021, the Corporation recorded a write-up of U.K. net deferred tax assets of approximately $2.0 billion with a corresponding positive income tax adjustment. For more information, see Financial Highlights – Income Tax Expense on page 6.

COVID-19 Pandemic

The Corporation has been, and may continue to be, impacted by the Coronavirus Disease 2019 (COVID-19) pandemic (the pandemic). During the first half of 2021, the macroeconomic outlook improved in the U.S. and several regions of the world, as COVID-19 cases decreased and vaccinations became more widely available. However, uncertainty still remains about the duration of the pandemic and the timing and strength of the global economic recovery. As the pandemic evolves, we continue to review protocols and processes in place to execute our business continuity plans. In conjunction with our efforts to support clients affected by the pandemic, we have cumulatively originated $35.4 billion in loans under the Paycheck Protection Program (PPP) with amounts outstanding of $15.7 billion and $21.1 billion at June 30, 2021 and March 31, 2021. For more information on PPP loans, see Commercial Portfolio Credit Risk Management on page 35.

Although the macroeconomic and public health outlooks improved in the U.S. and globally during the first half of 2021, the future direct and indirect impact of the pandemic on our businesses, results of operations and financial condition remains uncertain. Should current economic conditions deteriorate or if the pandemic worsens, including as the result of the spread of COVID-19 variants that are more easily communicable or resistant to currently available vaccines, such conditions could have an adverse effect on our businesses and results of operations and could adversely affect our financial condition.

For more information on the pandemic, see Executive Summary – Recent Developments – COVID-19 Pandemic in the MD&A and Item 1A. Risk Factors – Coronavirus Disease of the Corporation's 2020 Annual Report on Form 10-K.

LIBOR and Other Benchmark Rates

Following the 2017 announcement by the U.K.'s Financial Conduct Authority (FCA) that it would no longer compel participating banks to submit rates for the London Interbank Offered Rate (LIBOR) after 2021, regulators, trade associations and financial industry working groups have identified recommended replacement rates for LIBOR, as well as other Interbank Offered Rates (IBORs), and have published recommended conventions to allow new and existing products to incorporate fallbacks or that reference these alternative reference rates (ARRs). Additionally, as previously disclosed, the FCA announced the dates for the cessation of all LIBOR benchmark settings currently published by the ICE Benchmark Administration. In connection with the transition, in April 2021, the State of New York approved legislation for contracts that are governed by New York law by providing a statutory framework to replace LIBOR with a benchmark rate based on the Secured

Overnight Financing Rate (SOFR), which is anticipated to help the Corporation reduce legal and economic uncertainty with regard to certain LIBOR-based products and contracts that are governed by New York law and have no fallback provisions or have fallback provisions that are based on LIBOR.

The Corporation continues to execute its enterprise-wide IBOR transition program. As part of this transition program, the Corporation continues to decrease initiation of new U.S. dollar LIBOR-linked commercial loans that mature after June 30, 2023, subject to certain exceptions, and continues to increase the usage of ARRs in its U.S. dollar commercial lending products and contracts. Additionally, the Corporation has ceased initiation of most GBP LIBOR-linked derivatives, subject to certain exceptions, and is prioritizing interdealer trading in SOFR rather than LIBOR for certain U.S. dollar interest rate swaps in accordance with recommendations by the Commodity Futures Trading Commission (CFTC). The Corporation continues to update its operational models, systems, processes and internal infrastructure.

While the Corporation continues to work towards meeting the regulatory and industry-wide recommended milestones on cessation of LIBOR, the market and client replacement of IBORs and adoption of ARRs continue to evolve and, as a result, could impact the ability of market participants and the Corporation to transition activity across or within categories of contracts, products, services and markets. Accordingly, the Corporation continues to monitor a variety of market scenarios as part of its transition efforts, including risks associated with insufficient preparation by individual market participants or the overall market ecosystem, ability of market participants to meet regulatory and industry-wide recommended milestones, development and adoption of SOFR, credit-sensitive and other rates, access and demand by clients and market participants to liquidity in certain products, including LIBOR products, and IBOR continuity. Furthermore, banking regulators in the U.S. and globally have increased regulatory scrutiny and intensified supervisory focus of financial institution LIBOR transition plans, preparations and readiness.

For more information on the expected replacement of LIBOR and other benchmark rates, see Executive Summary – Recent Developments – LIBOR and Other Benchmark Rates in the MD&A and Item 1A. Risk Factors – Other of the Corporation's 2020 Annual Report on Form 10-K.

Total shareholders' equity			**277,119**	272,924

(1) For definitions, see Key Metrics on page 101.

(2) Return on average tangible common shareholders' equity is a non-GAAP financial measure. For more information and a corresponding reconciliation to the most closely related financial measures defined by accounting principles generally accepted in the United States of America (GAAP), see Non-GAAP Reconciliations on page 47.

Net income was $9.2 billion and $17.3 billion, or $1.03 and $1.90 per diluted share, for the three and six months ended June 30, 2021 compared to $3.5 billion and $7.5 billion, or $0.37 and $0.77 per diluted share, for the same periods in 2020. The increase in net income was primarily due to improvement in the provision for credit losses and a positive income tax adjustment related to the revaluation of U.K. net deferred tax assets, partially offset by higher noninterest expense.

Total assets increased $210.3 billion from December 31, 2020 to $3.0 trillion primarily due to the deployment of cash from continued deposit inflows into debt securities, as well as higher trading account assets due to an increase in inventory in *Global Markets.*

Total liabilities increased $206.1 billion from December 31, 2020 to $2.8 trillion primarily driven by an increase in deposits due to additional government stimulus measures as well as seasonally higher deposits, higher federal funds purchased and securities loaned or sold under agreements to repurchase due to client activity in *Global Markets* and an increase in trading account liabilities resulting from higher levels of short positions in *Global Markets.*

Shareholders' equity increased $4.2 billion from December 31, 2020 primarily due to net income, partially offset by returns of capital to shareholders through common stock repurchases and common and preferred stock dividends, as well as market value decreases on debt securities and derivatives.

Net Interest Income

Net interest income decreased $615 million to $10.2 billion, and $2.5 billion to $20.4 billion for the three and six months ended June 30, 2021 compared to the same periods in 2020. Net interest yield on a fully taxable-equivalent (FTE) basis decreased 26 basis points (bps) to 1.61 percent, and 45 bps to 1.64 percent for the same periods. The decrease in net interest income was primarily driven by lower interest rates and loan balances, partially offset by higher balances of debt securities. For more information on net interest yield and the FTE basis, see Supplemental Financial Data on page 7, and for more information on interest rate risk management, see Interest Rate Risk Management for the Banking Book on page 45.

Noninterest Income

Table 2 Noninterest Income

(Dollars in millions)	Three Months Ended June 30 2021	Three Months Ended June 30 2020	Six Months Ended June 30 2021	Six Months Ended June 30 2020
Fees and commissions:				
Card income	**$ 1,586**	$ 1,249	**$ 3,021**	$ 2,521
Service charges	**1,874**	1,562	**3,666**	3,465
Investment and brokerage services	**4,123**	3,422	**8,186**	7,180
Investment banking fees	**2,122**	2,159	**4,368**	3,547
Total fees and commissions	**9,705**	8,392	**19,241**	16,713
Market making and similar activities	**1,826**	2,487	**5,355**	5,294
Other income	**(298)**	599	**(739)**	108
Total noninterest income	**$ 11,233**	$ 11,478	**$ 23,857**	$ 22,115

Noninterest income decreased $245 million to $11.2 billion and increased $1.7 billion to $23.9 billion for the three and six months ended June 30, 2021 compared to the same periods in 2020. The following highlights the significant changes.

- Card income increased $337 million and $500 million primarily driven by increased client activity and merchant services revenue.
- Service charges increased $312 million and $201 million primarily due to higher treasury fees and increased client activity in the three-month period.
- Investment and brokerage services income increased $701 million and $1.0 billion primarily driven by higher market valuations and assets under management (AUM) flows, partially offset by declines in AUM pricing.
- Investment banking fees increased $821 million for the six-month period primarily driven by higher equity issuance fees as well as advisory and debt issuance fees.
- Market making and similar activities decreased $661 million for the three-month period primarily driven by higher market-related gains in the prior-year period due to a more robust trading environment for macro products and market recoveries from the end of the first quarter of 2020.
- Other income decreased $897 million and $847 million primarily due to a $704 million gain on sales of certain mortgage loans in the prior year as well as higher partnership losses on tax credit investments.

Provision for Credit Losses

The provision for credit losses improved $6.7 billion to a benefit of $1.6 billion and $13.4 billion to a benefit of $3.5 billion for the three and six months ended June 30, 2021 compared to the same periods in 2020, primarily driven by improvement in the macroeconomic outlook. For more information on the provision for credit losses, see Allowance for Credit Losses on page 41.

Noninterest Expense

Table 3 Noninterest Expense

(Dollars in millions)	Three Months Ended June 30		Six Months Ended June 30	
	2021	2020	**2021**	2020
Compensation and benefits	**$ 8,653**	$ 7,994	**$ 18,389**	$ 16,335
Occupancy and equipment	**1,759**	1,802	**3,589**	3,504
Information processing and communications	**1,448**	1,265	**2,873**	2,474
Product delivery and transaction related	**976**	811	**1,953**	1,588
Marketing	**810**	492	**1,181**	930
Professional fees	**426**	381	**829**	756
Other general operating	**973**	665	**1,746**	1,298
Total noninterest expense	**$ 15,045**	$ 13,410	**$ 30,560**	$ 26,885

Noninterest expense increased $1.6 billion to $15.0 billion, and $3.7 billion to $30.6 billion for the three and six months ended June 30, 2021 compared to the same periods in 2020. The increase in the three-month period was primarily due to higher compensation and benefits expense, a $500 million contribution to the Bank of America Foundation and approximately $300 million associated with processing transactional card claims related to state unemployment benefits. The increase in the six-month period was primarily driven by the same factors as the three-month period as well as elevated net COVID-19 related costs, acceleration of expenses due to incentive compensation award changes, an impairment charge for real estate rationalization, higher revenue-related expenses and higher severance costs.

Income Tax Expense

Table 4 Income Tax Expense

(Dollars in millions)	Three Months Ended June 30		Six Months Ended June 30	
	2021	2020	**2021**	2020
Income before income taxes	**$ 8,042**	$ 3,799	**$ 17,208**	$ 8,330
Income tax expense	**(1,182)**	266	**(66)**	787
Effective tax rate	**(14.7)%**	7.0 %	**(0.4)%**	9.4 %

Changes in the effective tax rates for the three and six months ended June 30, 2021 compared to the same periods a year ago were driven by the impact of our recurring tax preference benefits on higher levels of pretax income and the impact of the U.K. tax law change further discussed in this section. Our recurring tax preference benefits primarily consist of tax credits from investments in affordable housing and renewable energy, aligning with our responsible growth strategy to address global sustainability challenges. Absent these tax credits and the impact of the U.K. tax law change, the effective tax rate would have been approximately 25 percent.

On June 10, 2021, the U.K. enacted the 2021 Finance Act, which increases the U.K. corporation income tax rate to 25 percent from 19 percent. This change is effective April 1, 2023 and unfavorably affects income tax expense on future U.K. earnings. As a result, the Corporation recorded a write-up of U.K. net deferred tax assets of approximately $2.0 billion, with a corresponding positive income tax adjustment. This write-up is a reversal of previously recorded write-downs of net deferred tax assets for prior changes in the U.K. corporation income tax rate.

Supplemental Financial Data

Non-GAAP Financial Measures

In this Form 10-Q, we present certain non-GAAP financial measures. Non-GAAP financial measures exclude certain items or otherwise include components that differ from the most directly comparable measures calculated in accordance with GAAP. Non-GAAP financial measures are provided as additional useful information to assess our financial condition, results of operations (including period-to-period operating performance) or compliance with prospective regulatory requirements. These non-GAAP financial measures are not intended as a substitute for GAAP financial measures and may not be defined or calculated the same way as non-GAAP financial measures used by other companies.

We view net interest income and related ratios and analyses on an FTE basis, which when presented on a consolidated basis are non-GAAP financial measures. To derive the FTE basis, net interest income is adjusted to reflect tax-exempt income on an equivalent before-tax basis with a corresponding increase in income tax expense. For purposes of this calculation, we use the federal statutory tax rate of 21 percent and a representative state tax rate. Net interest yield, which measures the basis points we earn over the cost of funds, utilizes net interest income on an FTE basis. We believe that presentation of these items on an FTE basis allows for comparison of amounts from both taxable and tax-exempt sources and is consistent with industry practices.

We may present certain key performance indicators and ratios excluding certain items (e.g., debit valuation adjustment (DVA) gains (losses)) which result in non-GAAP financial measures. We believe that the presentation of measures that exclude these items is useful because such measures provide additional information to assess the underlying operational performance and trends of our businesses and to allow better comparison of period-to-period operating performance.

We also evaluate our business based on certain ratios that utilize tangible equity, a non-GAAP financial measure. Tangible equity represents shareholders' equity or common shareholders' equity reduced by goodwill and intangible assets (excluding mortgage servicing rights (MSRs)), net of related deferred tax liabilities ("adjusted" shareholders' equity or common shareholders' equity). These measures are used to evaluate our use of equity. In addition, profitability, relationship and investment models use both return on average tangible common shareholders' equity and return on average tangible shareholders' equity as key measures to support our overall growth objectives. These ratios are as follows:

- Return on average tangible common shareholders' equity measures our net income applicable to common shareholders as a percentage of adjusted average common shareholders' equity. The tangible common equity ratio represents adjusted ending common shareholders' equity divided by total tangible assets.
- Return on average tangible shareholders' equity measures our net income as a percentage of adjusted average total shareholders' equity. The tangible equity ratio represents adjusted ending shareholders' equity divided by total tangible assets.
- Tangible book value per common share represents adjusted ending common shareholders' equity divided by ending common shares outstanding.

We believe ratios utilizing tangible equity provide additional useful information because they present measures of those assets that can generate income. Tangible book value per common share provides additional useful information about the level of tangible assets in relation to outstanding shares of common stock.

The aforementioned supplemental data and performance measures are presented in Table 5.

For more information on the reconciliation of these non-GAAP financial measures to the corresponding GAAP financial measures, see Non-GAAP Reconciliations on page 47.

Key Performance Indicators

We present certain key financial and nonfinancial performance indicators (key performance indicators) that management uses when assessing our consolidated and/or segment results. We believe they are useful to investors because they provide additional information about our underlying operational performance and trends. These key performance indicators (KPIs) may not be defined or calculated in the same way as similar KPIs used by other companies. For information on how these metrics are defined, see Key Metrics on page 101.

Our consolidated key performance indicators, which include various equity and credit metrics, are presented in Table 1 on page 4 and Table 5 on page 8.

For information on key segment performance metrics, see Business Segment Operations on page 11.

(1) For definitions, see Key Metrics on page 101.
(2) Calculated as total net income for four consecutive quarters divided by annualized average assets for four consecutive quarters.
(3) Tangible equity ratios and tangible book value per share of common stock are non-GAAP financial measures. For more information on these ratios and corresponding reconciliations to GAAP financial measures, see Supplemental Financial Data on page 7 and Non-GAAP Reconciliations on page 47.
(4) Includes the allowance for loan and lease losses and the reserve for unfunded lending commitments.
(5) Balances and ratios do not include loans accounted for under the fair value option. For additional exclusions from nonperforming loans, leases and foreclosed properties, see Consumer Portfolio Credit Risk Management – Nonperforming Consumer Loans, Leases and Foreclosed Properties Activity on page 34 and corresponding Table 25 and Commercial Portfolio Credit Risk Management – Nonperforming Commercial Loans, Leases and Foreclosed Properties Activity on page 38 and corresponding Table 32.
(6) For more information, including which approach is used to assess capital adequacy, see Capital Management on page 22.

(1) Includes the impact of interest rate risk management contracts. For more information, see Interest Rate Risk Management for the Banking Book on page 45.
(2) Nonperforming loans are included in the respective average loan balances. Income on these nonperforming loans is generally recognized on a cost recovery basis.
(3) Includes non-U.S. consumer loans of $3.0 billion and $2.8 billion for the second quarter of 2021 and 2020.
(4) Certain prior-period amounts have been reclassified to conform to current-period presentation.
(5) Includes U.S. commercial real estate loans of $56.0 billion and $61.8 billion, and non-U.S. commercial real estate loans of $3.3 billion and $3.7 billion for the second quarter of 2021 and 2020.
(6) Includes $30.5 billion and $35.5 billion of structured notes and liabilities for the second quarter of 2021 and 2020.
(7) Net interest income includes FTE adjustments of $110 million and $128 million for the second quarter of 2021 and 2020.

Table 7 Year-to-Date Average Balances and Interest Rates - FTE Basis

(Dollars in millions)	Average Balance 2021		Interest Income/ Expense [1] 2021	Yield/ Rate 2021		Average Balance 2020		Interest Income/ Expense [1] 2020	Yield/ Rate 2020

Impact of noninterest-bearing sources				0.08					0.20
Net interest income/yield on earning assets [7]		$	20,651	1.64 %			$	23,250	2.09 %

(1) Includes the impact of interest rate risk management contracts. For more information, see Interest Rate Risk Management for the Banking Book on page 45.
(2) Nonperforming loans are included in the respective average loan balances. Income on these nonperforming loans is generally recognized on a cost recovery basis.
(3) Includes non-U.S. consumer loans of $3.0 billion and $2.9 billion for the six months ended June 30, 2021 and 2020.
(4) Certain prior-period amounts have been reclassified to conform to current-period presentation.
(5) Includes U.S. commercial real estate loans of $56.3 billion and $60.7 billion, and non-U.S. commercial real estate loans of $3.2 billion and $3.7 billion for the six months ended June 30, 2021 and 2020.
(6) Includes $30.9 billion and $35.6 billion of structured notes and liabilities for the six months ended June 30, 2021 and 2020.
(7) Net interest income includes FTE adjustments of $221 million and $272 million for the six months ended June 30, 2021 and 2020.

Business Segment Operations

Segment Description and Basis of Presentation

We report our results of operations through four business segments: *Consumer Banking, GWIM, Global Banking* and *Global Markets*, with the remaining operations recorded in *All Other*. We manage our segments and report their results on an FTE basis. For more information, see Business Segment Operations in the MD&A of the Corporation's 2020 Annual Report on Form 10-K.

We periodically review capital allocated to our businesses and allocate capital annually during the strategic and capital planning processes. We utilize a methodology that considers the effect of regulatory capital requirements in addition to internal risk-based capital models. Our internal risk-based capital models use a risk-adjusted methodology incorporating each segment's credit, market, interest rate, business and operational risk components. For more information on the nature of these risks, see Managing Risk on page 22. The capital allocated to the business segments is referred to as allocated capital. Allocated equity in the reporting units is comprised of allocated capital plus capital for the portion of goodwill and intangibles specifically assigned to the reporting unit. For more information, including the definition of a reporting unit, see Complex Accounting Estimates on page 46 and *Note 7 – Goodwill and Intangible Assets* to the Consolidated Financial Statements.

For more information on our presentation of financial information on an FTE basis, see Supplemental Financial Data on page 7, and for reconciliations to consolidated total revenue, net income and period-end total assets, see *Note 17 – Business Segment Information* to the Consolidated Financial Statements.

Key Performance Indicators

We present certain key financial and nonfinancial performance indicators that management uses when evaluating segment results. We believe they are useful to investors because they provide additional information about our segments' operational performance, customer trends and business growth.

See page 11 for footnotes.

Consumer Banking, comprised of Deposits and Consumer Lending, offers a diversified range of credit, banking and investment products and services to consumers and small businesses. For more information about *Consumer Banking*, see Business Segment Operations in the MD&A of the Corporation's 2020 Annual Report on Form 10-K.

Consumer Banking Results

Three-Month Comparison

Net income for *Consumer Banking* was $3.0 billion compared to $70 million for the same period in 2020. The increase in net income was primarily due to improvement in the provision for credit losses and higher revenue, partially offset by higher noninterest expense. Noninterest income increased $352 million to $2.2 billion driven by higher card income due to increased client activity and higher service charges, partially offset by lower other income due to the allocation of asset and liability management (ALM) results.

The provision for credit losses improved $3.7 billion to a benefit of $697 million primarily due to a reserve release, as the macroeconomic outlook improved and our credit quality remained strong. Noninterest expense increased $124 million to $4.9 billion primarily driven by the contribution to the Bank of America Foundation, cost of increased client activity and continued investments for business growth, including the merchant services platform, partially offset by lower COVID-19 related costs to support customers and employees.

The return on average allocated capital was 32 percent, up from one percent, driven by higher net income. For more information on capital allocated to the business segments, see Business Segment Operations on page 11.

Six-Month Comparison

Net income for *Consumer Banking* increased $3.9 billion to $5.7 billion primarily due to improvement in the provision for credit losses, partially offset by lower revenue and higher noninterest expense. Net interest income decreased $960 million to $11.9 billion primarily due to lower interest rates and loan balances, partially offset by the benefit of higher deposit balances. Noninterest income increased $235 million to $4.4 billion driven by higher card income due to increased client activity, partially offset by lower other income due to the allocation of ALM results.

The provision for credit losses improved $6.6 billion to a benefit of $1.3 billion primarily driven by the same factors as described in the three-month discussion. Noninterest expense increased $760 million to $10.0 billion primarily driven by an impairment charge of $240 million for real estate rationalization, the contribution to the Bank of America Foundation, cost of increased client activity and continued investments for business growth, including the merchant services platform, partially offset by lower COVID-19 related costs to support customers and employees.

The return on average allocated capital was 30 percent, up from 10 percent, driven by higher net income.

Deposits

Three-Month Comparison

Net income for Deposits increased $304 million to $1.1 billion primarily driven by higher revenue. Net interest income increased $181 million to $3.5 billion primarily due to the benefit of higher deposit balances. Noninterest income increased $101 million to $865 million primarily driven by higher service charges, partially offset by other income due to the allocation of ALM results.

The provision for credit losses decreased $107 million to $47 million due to an improved macroeconomic outlook.

Average deposits increased $167.6 billion to $972.0 billion primarily due to net inflows of $94.4 billion in checking and time deposits and $72.1 billion in traditional savings and money market savings driven by strong organic growth and additional government stimulus measures.

Six-Month Comparison

Net income for Deposits decreased $677 million to $1.8 billion primarily driven by lower revenue and higher noninterest expense. Net interest income declined $489 million to $6.8 billion primarily due to lower interest rates, partially offset by the benefit of growth in deposits. Noninterest income decreased $84 million to $1.8 billion primarily driven by lower other income due to the allocation of ALM results, as well as lower service charges due to higher deposit balances.

The provision for credit losses decreased $148 million to $121 million due to an improved macroeconomic outlook. Noninterest expense increased $472 million to $6.1 billion primarily driven by an impairment charge for real estate rationalization, and the cost of increased client activity and continued investments for business growth, partially offset by lower COVID-19 related costs to support customers and employees.

Average deposits increased $177.0 billion to $944.8 billion primarily due to net inflows of $103.4 billion in checking and time deposits and $72.7 billion in traditional savings and money market savings driven by strong organic growth and additional government stimulus measures.

The table below provides key performance indicators for Deposits. Management uses these metrics, and we believe they are useful to investors because they provide additional information to evaluate our deposit profitability and digital/mobile trends.

Key Statistics – Deposits

	Three Months Ended June 30		Six Months Ended June 30	
	2021	2020	**2021**	2020
Total deposit spreads (excludes noninterest costs) [1]	**1.71%**	1.94%	**1.72%**	2.05%
Period End				
Consumer investment assets (in millions) [2]			**$ 345,809**	$ 246,146
Active digital banking users (units in thousands) [3]			**40,512**	39,294
Active mobile banking users (units in thousands) [4]			**31,796**	30,307
Financial centers			**4,296**	4,298
ATMs			**16,795**	16,862

(1) Includes deposits held in Consumer Lending.
(2) Includes client brokerage assets, deposit sweep balances and AUM in *Consumer Banking*.
(3) Active digital banking users represents mobile and/or online active users over the past three months.
(4) Active mobile banking users represents mobile active users over the past three months.

Consumer investment assets increased $99.7 billion to $345.8 billion driven by market performance and client flows. Active mobile banking users increased approximately one million reflecting continuing changes in our customers' banking preferences. We had a net decrease of two financial centers as we continue to optimize our consumer banking network.

Consumer Lending

Three-Month Comparison

Net income for Consumer Lending was $1.9 billion, an increase of $2.7 billion, primarily due to improvement in the provision for credit losses. Net interest income decreased $199 million to $2.5 billion primarily due to lower loan balances. Noninterest income increased $251 million to $1.3 billion primarily driven by higher card income due to increased client activity.

The provision for credit losses improved $3.6 billion to a benefit of $744 million primarily due to a reserve release, as the macroeconomic outlook improved and our credit quality remained strong. Noninterest expense increased $137 million to $2.0 billion primarily driven by investments in the business.

Average loans decreased $38.9 billion to $277.3 billion primarily driven by a decline in residential mortgage and credit cards.

Six-Month Comparison

Net income for Consumer Lending was $4.0 billion, an increase of $4.5 billion, primarily due to improvement in the provision for credit losses. Net interest income declined $471 million to $5.1 billion primarily due to lower interest rates and loan balances. Noninterest income increased $319 million to $2.6 billion primarily driven by higher card income due to increased client activity.

The provision for credit losses improved $6.4 billion to a benefit of $1.4 billion primarily driven by the same factors as described in the three-month discussion. Noninterest expense increased $288 million to $3.9 billion primarily driven by the same factors as described in the three-month discussion.

Average loans decreased $32.1 billion to $281.8 billion primarily driven by the same factors as described in the three-month discussion.

The table below provides key performance indicators for Consumer Lending. Management uses these metrics, and we believe they are useful to investors because they provide additional information about loan growth and profitability.

ey Statistics – Consumer Lending

	Three Months Ended June 30		Six Months Ended June 30	
ollars in millions)	**2021**	2020	**2021**	2020
tal credit card [1]				
Gross interest yield [2]	**10.10 %**	9.95 %	**10.31 %**	10.23 %
Risk-adjusted margin [3]	**9.76**	8.49	**9.53**	8.20
New accounts (in thousands)	**931**	449	**1,605**	1,504
Purchase volumes	**$ 78,384**	$ 53,694	**$ 142,975**	$ 118,073
Debit card purchase volumes	**$ 121,905**	$ 89,631	**$ 229,812**	$ 178,219

(1) Includes *GWIM's* credit card portfolio.
(2) Calculated as the effective annual percentage rate divided by average loans.
(3) Calculated as the difference between total revenue, net of interest expense, and net credit losses divided by average loans.

During the three and six months ended June 30, 2021, the total risk-adjusted margin increased 127 bps and 133 bps primarily driven by higher net interest margin, higher fee income and lower net credit losses. During the three and six months ended June 30, 2021, total credit card purchase volumes increased $24.7 billion to $78.4 billion, and $24.9 billion to $143.0 billion as spending continued to recover, with improvements across categories with growth primarily in retail and travel. During the three and six months ended June 30, 2021, debit card purchase volumes increased $32.3 billion to $121.9 billion, and $51.6 billion to $229.8 billion due to the impacts of government stimulus measures, tax refunds and continued retail growth from the pandemic recovery.

Key Statistics – Residential Mortgage Loan Production [1]

	Three Months Ended June 30		Six Months Ended June 30	
(Dollars in millions)	**2021**	2020	**2021**	2020
Consumer Banking:				
First mortgage	**$ 11,502**	$ 15,049	**$ 20,684**	$ 27,930
Home equity	**907**	3,176	**1,317**	5,817
Total [2]:				
First mortgage	**$ 20,266**	$ 23,124	**$ 35,499**	$ 42,062
Home equity	**1,166**	3,683	**1,669**	6,707

(1) The loan production amounts represent the unpaid principal balance of loans and, in the case of home equity, the principal amount of the total line of credit.
(2) In addition to loan production in *Consumer Banking*, there is also first mortgage and home equity loan production in *GWIM.*

First mortgage loan originations for *Consumer Banking* and the total Corporation decreased $3.5 billion and $2.9 billion during the three months ended June 30, 2021 and $7.2 billion and $6.6 billion during the six months ended June 30, 2021, primarily driven by lower demand.

Home equity production in *Consumer Banking* and for the total Corporation decreased $2.3 billion and $2.5 billion during the three months ended June 30, 2021 and $4.5 billion and $5.0 billion during the six months ended June 30, 2021, driven by lower demand.

GWIM consists of two primary businesses: Merrill Lynch Global Wealth Management (MLGWM) and Bank of America Private Bank. For more information about *GWIM*, see Business Segment Operations in the MD&A of the Corporation's 2020 Annual Report on Form 10-K.

Three-Month Comparison

Net income for *GWIM* increased $368 million to $991 million primarily driven by higher revenue and improvement in the provision for credit losses, partially offset by higher noninterest expense. The operating margin was 26 percent compared to 19 percent a year ago.

Net interest income decreased $24 million to $1.4 billion due to lower interest rates, partially offset by the benefit of strong deposit and loan growth.

Noninterest income, which primarily includes investment and brokerage services income, increased $664 million to $3.7 billion primarily due to higher market valuations and positive AUM flows, partially offset by declines in AUM pricing.

The provision for credit losses improved $198 million to a benefit of $62 million primarily due to an improved macroeconomic outlook. Noninterest expense increased $350 million to $3.8 billion primarily driven by higher revenue-related incentives.

The return on average allocated capital was 24 percent, up from 17 percent, due to an increase in net income, partially offset by an increase in allocated capital. For more information on capital allocated to the business segments, see Business Segment Operations on page 11.

Average loans increased $11.8 billion to $194.0 billion primarily driven by securities-based lending and custom lending. Average deposits increased $46.4 billion to $333.5 billion primarily driven by inflows from new accounts and client responses to market volatility.

MLGWM revenue of $4.3 billion increased 18 percent primarily driven by the benefits of higher market valuations and positive AUM flows.

Bank of America Private Bank revenue of $805 million increased one percent primarily driven by the benefits of higher market valuations and AUM flows, partially offset by the realignment of certain business results to MLGWM.

Six-Month Comparison

Net income for *GWIM* increased $384 million to $1.9 billion due to the same factors as described in the three-month discussion. The operating margin was 25 percent compared to 21 percent a year ago.

Net interest income decreased $264 million to $2.7 billion due to the same factors as described in the three-month discussion.

Noninterest income, which primarily includes investment and brokerage services income, increased $939 million to $7.4 billion due to the same factors as described in the three-month discussion.

The provision for credit losses improved $452 million to a benefit of $127 million primarily due to an improved macroeconomic outlook. Noninterest expense increased $618 million to $7.7 billion, primarily due to the same factor as described in the three-month discussion.

The return on average allocated capital was 23 percent, up from 20 percent, due to higher net income, partially offset by an increase in allocated capital.

Average loans increased $10.9 billion to $191.3 billion primarily due to the same factors as described in the three-month discussion. Average deposits increased $54.7 billion to $329.9 billion primarily due to the same factors as described in the three-month discussion.

MLGWM revenue of $8.4 billion increased 10 percent primarily driven by higher market valuations and positive AUM flows, partially offset by the impact of lower interest rates.

Bank of America Private Bank revenue of $1.6 billion decreased four percent primarily driven by the realignment of certain business results to MLGWM and lower interest rates, partially offset by the benefits of higher market valuations and AUM flows.

Global Banking, which includes Global Corporate Banking, Global Commercial Banking, Business Banking and Global Investment Banking, provides a wide range of lending-related products and services, integrated working capital management and treasury solutions, and underwriting and advisory services through our network of offices and client relationship teams. For more information about *Global Banking,* see Business Segment Operations in the MD&A of the Corporation's 2020 Annual Report on Form 10-K.

Three-Month Comparison

Net income for *Global Banking* increased $1.7 billion to $2.4 billion primarily driven by improvement in the provision for credit losses, partially offset by higher noninterest expense.

Net interest income decreased $379 million to $2.0 billion primarily driven by the impact of lower loan balances and lower deposit spreads, partially offset by higher credit spreads and the impact of higher deposit balances.

Noninterest income increased $377 million to $3.1 billion driven by higher leasing-related revenue and treasury and credit service charges as well as the addition of merchant services revenue, partially offset by lower valuation-driven adjustments on the fair value loan portfolio and leveraged loans.

The provision for credit losses improved $2.7 billion to a benefit of $831 million primarily driven by a reserve release due to an improved macroeconomic outlook.

Noninterest expense increased $377 million primarily due to higher operating costs and compensation and benefits expense, as well as the addition of merchant services costs.

The return on average allocated capital was 23 percent, up from seven percent, due to higher net income. For more information on capital allocated to the business segments, see Business Segment Operations on page 11.

Six-Month Comparison

Net income for *Global Banking* increased $3.7 billion to $4.6 billion primarily due to the same factors as described in the three-month discussion.

Net interest income decreased $1.0 billion to $4.0 billion primarily due to the same factors as described in the three-month discussion.

Noninterest income increased $1.0 billion to $5.8 billion driven by higher investment banking fees, treasury and credit service charges and higher valuation-driven adjustments on the fair value loan portfolio, debt securities and leveraged loans, as well as the addition of merchant services revenue.

The provision for credit losses improved $5.9 billion to a benefit of $2.0 billion primarily driven by a reserve release due to an improved macroeconomic outlook.

Noninterest expense increased $840 million to $5.4 billion, primarily due to higher revenue-related incentives and an acceleration in expenses from incentive compensation award changes, as well as higher operating costs, including the addition of merchant services costs.

The return on average allocated capital was 22 percent, up from four percent, due to higher net income.

Global Corporate, Global Commercial and Business Banking

Business Lending revenue increased $49 million for the three months ended June 30, 2021 compared to the same period in 2020 primarily due to higher credit spreads and leasing equity investment income, partially offset by the impact of lower loan balances. Business Lending revenue decreased $358 million for the six months ended June 30, 2021 primarily due to the impact of lower loan balances and interest rates, partially offset by higher credit spreads.

Global Transaction Services revenue decreased $91 million and $451 million for the three and six months ended June 30, 2021 driven by lower interest rates, partially offset by the impact of higher deposit balances.

Average loans and leases decreased 24 percent and 21 percent for the three and six months ended June 30, 2021 driven by client paydowns.

Average deposits increased two percent and 13 percent for the three and six months ended June 30, 2021 primarily driven by elevated balances from prior-year inflows on client responses to market volatility and government stimulus measures.

Global Investment Banking

Client teams and product specialists underwrite and distribute debt, equity and loan products, and provide advisory services and tailored risk management solutions. The economics of certain investment banking and underwriting activities are shared primarily between *Global Banking* and *Global Markets* under an internal revenue-sharing arrangement. *Global Banking* originates certain deal-related transactions with our corporate and commercial clients that are executed and distributed by *Global Markets*. To provide a complete discussion of our consolidated investment banking fees, the following table presents total Corporation investment banking fees and the portion attributable to *Global Banking.*

Investment Banking Fees

(Dollars in millions)	Global Banking		Total Corporation		Global Banking		Total Corporation

n/m = not meaningful

Global Markets offers sales and trading services and research services to institutional clients across fixed-income, credit, currency, commodity and equity businesses. *Global Markets* product coverage includes securities and derivative products in both the primary and secondary markets. For more information about *Global Markets*, see Business Segment Operations in the MD&A of the Corporation's 2020 Annual Report on Form 10-K.

The following explanations for current period-over-period changes for *Global Markets*, including those disclosed under Sales and Trading Revenue, are the same for amounts including and excluding net DVA. Amounts excluding net DVA are a non-GAAP financial measure. For more information on net DVA, see Supplemental Financial Data on page 7.

Three-Month Comparison

Net income for *Global Markets* decreased $987 million to $908 million. Net DVA losses were $34 million compared to losses of $261 million in the prior-year period. Excluding net DVA, net income decreased $1.2 billion to $934 million. These decreases were primarily driven by higher noninterest expense and lower revenue, partially offset by lower provision for credit losses.

Revenue decreased $630 million to $4.7 billion primarily driven by lower sales and trading revenue. Sales and trading revenue decreased $590 million, and excluding net DVA, decreased $817 million. These decreases were driven by lower revenue in Fixed Income, Currencies and Commodities (FICC), partially offset by higher revenue in Equities.

The provision for credit losses decreased $83 million primarily due to an improved macroeconomic outlook.

Noninterest expense increased $787 million to $3.5 billion driven by higher costs associated with processing transactional card claims related to state unemployment benefits and activity-related expenses for sales and trading.

Average total assets increased $134.5 billion to $797.6 billion driven by higher client balances in Global Equities, and higher levels of inventory and loan growth in FICC.

The return on average allocated capital was 10 percent, down from 21 percent, reflecting lower net income and an increase in allocated capital. For more information on capital allocated to the business segments, see Business Segment Operations on page 11.

Six-Month Comparison

Net income for *Global Markets* decreased $638 million to $3.0 billion. Net DVA losses were $36 million compared to gains of $39 million in the prior-year period. Excluding net DVA, net income decreased $581 million to $3.0 billion. These decreases were primarily driven by higher noninterest expense.

Revenue increased $343 million to $10.9 billion primarily driven by higher investment banking income. Sales and trading revenue decreased $147 million, and excluding net DVA, decreased $72 million driven by a decline in FICC revenue, partially offset by higher revenue in Equities. Noninterest expense increased $1.4 billion to $6.9 billion, primarily driven by the same factors as described in the three-month discussion, as well as an acceleration in expenses from incentive compensation award changes.

The provision for credit losses decreased $195 million primarily due to an improved macroeconomic outlook.

Average total assets increased $72.6 billion to $760.6 billion, primarily due to higher client balances in Global Equities. Period-end total assets increased $157.1 billion since December 31, 2020 to $773.7 billion driven by higher client balances and increased hedging of client activity with stock positions relative to derivatives in Global Equities, and higher levels of inventory and loan growth in FICC.

The return on average allocated capital was 16 percent, down from 20 percent, reflecting lower net income and an increase in allocated capital.

Sales and Trading Revenue

For a description of sales and trading revenue, see Business Segment Operations in the MD&A of the Corporation's 2020 Annual Report on Form 10-K. The following table and related discussion present sales and trading revenue, substantially all of which is in *Global Markets,* with the remainder in *Global Banking*. In addition, the following table and related discussion present sales and trading revenue, excluding net DVA, which is a non-GAAP financial measure. For more information on net DVA, see Supplemental Financial Data on page 7.

Sales and Trading Revenue [1, 2, 3]

	Three Months Ended June 30		Six Months Ended June 30	
(Dollars in millions)	**2021**	2020	**2021**	2020
Sales and trading revenue				
Fixed income, currencies and commodities	**$ 1,937**	$ 2,941	**$ 5,179**	$ 5,886
Equities	**1,624**	1,210	**3,460**	2,900
Total sales and trading revenue	**$ 3,561**	$ 4,151	**$ 8,639**	$ 8,786
Sales and trading revenue, excluding net DVA [4]				
Fixed income, currencies and commodities	**$ 1,965**	$ 3,186	**$ 5,216**	$ 5,857
Equities	**1,630**	1,226	**3,459**	2,890
Total sales and trading revenue, excluding net DVA	**$ 3,595**	$ 4,412	**$ 8,675**	$ 8,747

(1) For more information on sales and trading revenue, see *Note 3 – Derivatives* to the Consolidated Financial Statements.
(2) Includes FTE adjustments of $59 million and $132 million for the three and six months ended June 30, 2021 compared to $38 million and $100 million for the same periods in 2020.
(3) Includes *Global Banking* sales and trading revenue of $170 million and $274 million for the three and six months ended June 30, 2021 compared to $65 million and $294 million for the same periods in 2020.
(4) FICC and Equities sales and trading revenue, excluding net DVA, is a non-GAAP financial measure. FICC net DVA losses were $28 million and $37 million for the three and six months ended June 30, 2021 compared to losses of $245 million and gains of $29 million for the same periods in 2020. Equities net DVA losses were $6 million and gains of $1 million for the three and six months ended June 30, 2021 compared to losses of $16 million and gains of $10 million for the same periods in 2020.

Three-Month Comparison

FICC revenue decreased $1.2 billion as the prior year benefited from a robust trading environment for macro products and market recoveries from the end of the first quarter of 2020, whereas markets were more benign in the current-year period and weak for agency mortgages. Equities revenue increased $404 million driven by stronger trading performance and increased client activity in derivatives and Asia.

Six-Month Comparison

FICC revenue decreased $641 million driven by reduced activity in macro products, partially offset by stronger performance in credit and municipal products, and gains in commodities (partially offset by related losses in another segment) from market volatility driven by a weather-related event. Equities revenue increased $569 million driven by stronger trading performance and increased client activity.

All Other

Balance Sheet

	Three Months Ended June 30			Six Months Ended June 30		
Average	**2021**	2020	% Change	**2021**	2020	% Change
Total loans and leases	**$ 19,209**	$ 29,923	(36) %	**$ 20,007**	$ 33,238	(40) %
Total assets [(1)]	**187,226**	249,846	(25)	**197,281**	225,674	(13)
Total deposits	**14,073**	21,387	(34)	**14,212**	22,473	(37)
Period end				**June 30 2021**	December 31 2020	% Change
Total loans and leases				**$ 18,306**	$ 21,301	(14) %
Total assets [(1)]				**206,341**	264,141	(22)
Total deposits				**13,540**	12,998	4

(1) In segments where the total of liabilities and equity exceeds assets, which are generally deposit-taking segments, we allocate assets from *All Other* to those segments to match liabilities (i.e., deposits) and allocated shareholders' equity. Average allocated assets were $1.1 trillion and $1.0 trillion for the three and six months ended June 30, 2021 compared to $740.7 billion and $656.5 billion for the same periods in 2020, and period-end allocated assets were $1.1 trillion and $977.7 billion at June 30, 2021 and December 31, 2020.

n/m = not meaningful

All Other primarily consists of ALM activities, liquidating businesses and certain expenses not otherwise allocated to a business segment. ALM activities encompass interest rate and foreign currency risk management activities for which substantially all of the results are allocated to our business segments. For more information on our ALM activities, see *Note 17 – Business Segment Information* to the Consolidated Financial Statements.

Three-Month Comparison

Net income increased $1.6 billion to $1.9 billion primarily driven by an increase in the income tax benefit, partially offset by lower revenue.

Revenue decreased $1.2 billion primarily due to a $704 million gain on sales of certain mortgage loans in the prior-year period and lower market making and similar activities.

The income tax benefit increased $2.8 billion primarily due to the impact of the U.K. tax law change and a higher level of income tax credits associated with increased ESG investment activities. For more information on the U.K. tax law change, see Financial Highlights on page 4. Both periods included income tax benefit adjustments to eliminate the FTE treatment of certain tax credits recorded in *Global Banking*.

Six-Month Comparison

Net income increased $2.4 billion to $2.1 billion primarily due to an increase in the income tax benefit, partially offset by lower revenue.

Revenue decreased $1.2 billion primarily due to the same factors as described in the three-month discussion.

The provision for credit losses improved $193 million to a benefit of $100 million primarily due to an improved macroeconomic outlook.

The income tax benefit increased $3.4 billion primarily due to the same factors as described in the three-month discussion. Both periods included income tax benefit adjustments to eliminate the FTE treatment of certain tax credits recorded in *Global Banking*.

Off-Balance Sheet Arrangements and Contractual Obligations

We have contractual obligations to make future payments on debt and lease agreements. Additionally, in the normal course of business, we enter into contractual arrangements whereby we commit to future purchases of products or services from unaffiliated parties. For more information on obligations and commitments, see *Note 10 – Commitments and Contingencies* to the Consolidated Financial Statements herein, as well as Off-Balance Sheet Arrangements and Contractual Obligations in the MD&A of the Corporation's 2020 Annual Report on Form 10-K, and *Note 11 – Long-term Debt* and *Note 12 – Commitments and Contingencies* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.

Representations and Warranties Obligations

For more information on representations and warranties obligations in connection with the sale of mortgage loans, see *Note 12 – Commitments and Contingencies* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.

Managing Risk

Risk is inherent in all our business activities. The seven key types of risk faced by the Corporation are strategic, credit, market, liquidity, compliance, operational and reputational. Sound risk management enables us to serve our customers and deliver for our shareholders. If not managed well, risks can result in financial loss, regulatory sanctions and penalties, and damage to our reputation, each of which may adversely impact our ability to execute our business strategies. We take a comprehensive approach to risk management with a defined Risk Framework and an articulated Risk Appetite Statement, which are approved annually by the Enterprise Risk Committee and the Board.

Our Risk Framework serves as the foundation for the consistent and effective management of risks facing the Corporation. The Risk Framework sets forth clear roles, responsibilities and accountability for the management of risk and provides a blueprint for how the Board, through delegation of authority to committees and executive officers, establishes risk appetite and associated limits for our activities.

Our Risk Appetite Statement is intended to ensure that the Corporation maintains an acceptable risk profile by providing a common framework and a comparable set of measures for senior management and the Board to clearly indicate the level of risk the Corporation is willing to accept. Risk appetite is set at least annually and is aligned with the Corporation's strategic, capital and financial operating plans. Our line-of-business strategies and risk appetite are also similarly aligned.

For more information about the Corporation's risks related to the pandemic, see Item 1A. Risk Factors – Coronavirus Disease of the Corporation's 2020 Annual Report on Form 10-K. These pandemic-related risks are being managed within our Risk Framework and supporting risk management programs.

For more information on our Risk Framework, our risk management activities and the key types of risk faced by the Corporation, see the Managing Risk section in the MD&A of the Corporation's 2020 Annual Report on Form 10-K.

Capital Management

The Corporation manages its capital position so that its capital is more than adequate to support its business activities and aligns with risk, risk appetite and strategic planning. For more information, including related regulatory requirements, see Capital Management in the MD&A of the Corporation's 2020 Annual Report on Form 10-K.

CCAR and Capital Planning

The Federal Reserve requires BHCs to submit a capital plan and planned capital actions on an annual basis, consistent with the rules governing the CCAR capital plan. We submitted our 2021 CCAR capital plan and related supervisory stress tests in April 2021 and received our results on June 24, 2021. Based on our results, we will be subject to a preliminary 2.5 percent SCB, unchanged from the current level, effective October 1, 2021 to September 30, 2022. Our CET1 capital ratio under the Standardized approach must remain above 9.5 percent during this period in order to avoid restrictions on capital distributions and discretionary bonus payments.

Due to uncertainty resulting from the pandemic, the Federal Reserve imposed various restrictions on share repurchase programs and dividends. In conjunction with its release of 2021 CCAR supervisory stress test results, the Federal Reserve announced those restrictions would end as of July 1, 2021 for large banks, including the Corporation, and large banks would be subject to the normal restrictions under the Federal Reserve's SCB framework.

On April 15, 2021, the Corporation announced that the Board authorized the repurchase of up to $25 billion of common stock over time. The Board also authorized repurchases to offset shares awarded under equity-based compensation plans. During the second quarter of 2021, we repurchased $4.2 billion of common stock, including repurchases to offset shares awarded under equity-based compensation plans during the period.

The timing and amount of common stock repurchases made pursuant to our stock repurchase program are subject to various factors, including the Corporation's capital position, liquidity, financial performance and alternative uses of capital, stock trading price, regulatory requirements and general market conditions, and may be suspended at any time. Such repurchases may be effected through open market purchases or privately negotiated transactions, including repurchase plans that satisfy the conditions of Rule 10b5-1 of the Securities Exchange Act of 1934, as amended (Exchange Act).

Regulatory Capital

As a financial services holding company, we are subject to regulatory capital rules, including Basel 3, issued by U.S. banking regulators. The Corporation's depository institution subsidiaries are also subject to the Prompt Corrective Action (PCA) framework. The Corporation and its primary affiliated banking entity, BANA, are Advanced approaches institutions under Basel 3 and are required to report regulatory risk-based capital ratios and risk-weighted assets (RWA) under both the Standardized and Advanced approaches. The approach that yields the lower ratio is used to assess capital adequacy including under the PCA framework. As of June 30, 2021, the CET1, Tier 1 capital and Total capital ratios for the Corporation were lower under the Standardized approach.

Minimum Capital Requirements

In order to avoid restrictions on capital distributions and discretionary bonus payments, the Corporation must meet risk-based capital ratio requirements that include a capital conservation buffer or SCB, plus any applicable countercyclical capital buffer and a global systemically important bank (G-SIB) surcharge. The buffers and surcharge must be comprised solely of CET1 capital. The Corporation's CET1 capital ratio must be a minimum of 9.5 percent under both the Standardized and Advanced approaches.

The Corporation is also required to maintain a minimum supplementary leverage ratio (SLR) of 3.0 percent plus a leverage buffer of 2.0 percent in order to avoid certain restrictions on capital distributions and discretionary bonus payments. Our insured depository institution subsidiaries are required to maintain a minimum 6.0 percent SLR to be considered well capitalized under the PCA framework.

Capital Composition and Ratios

Table 8 presents Bank of America Corporation’s capital ratios and related information in accordance with Basel 3 Standardized and Advanced approaches as measured at June 30, 2021 and December 31, 2020. For the periods presented herein, the Corporation met the definition of well capitalized under current regulatory requirements.

Table 8 Bank of America Corporation Regulatory Capital under Basel 3

(Dollars in millions, except as noted)	Standardized Approach [1]	Advanced Approaches [1]	Regulatory Minimum [2]
	June 30, 2021		
Risk-based capital metrics:			
Common equity tier 1 capital	**$ 178,818**	**$ 178,818**	
Tier 1 capital	**202,245**	**202,245**	
Total capital [3]	**234,486**	**227,736**	
Risk-weighted assets (in billions)	**1,552**	**1,380**	
Common equity tier 1 capital ratio	**11.5 %**	**13.0 %**	**9.5 %**
Tier 1 capital ratio	**13.0**	**14.7**	**11.0**
Total capital ratio	**15.1**	**16.5**	**13.0**
Leverage-based metrics:			
Adjusted quarterly average assets (in billions) [4]	**$ 2,938**	**$ 2,938**	
Tier 1 leverage ratio	**6.9 %**	**6.9 %**	**4.0**
Supplementary leverage exposure (in billions) [5]		**$ 3,444**	
Supplementary leverage ratio		**5.9 %**	**5.0**
	December 31, 2020		
Risk-based capital metrics:			
Common equity tier 1 capital	$ 176,660	$ 176,660	
Tier 1 capital	200,096	200,096	
Total capital [3]	237,936	227,685	
Risk-weighted assets (in billions)	1,480	1,371	
Common equity tier 1 capital ratio	11.9 %	12.9 %	9.5 %
Tier 1 capital ratio	13.5	14.6	11.0
Total capital ratio	16.1	16.6	13.0
Leverage-based metrics:			
Adjusted quarterly average assets (in billions) [4]	$ 2,719	$ 2,719	
Tier 1 leverage ratio	7.4 %	7.4 %	4.0
Supplementary leverage exposure (in billions) [5]		$ 2,786	
Supplementary leverage ratio		7.2 %	5.0

(1) As of June 30, 2021 and December 31, 2020, capital ratios are calculated using the regulatory capital rule that allows a five-year transition period related to the adoption of the current expected credit losses (CECL) accounting standard.
(2) The capital conservation buffer and G-SIB surcharge were 2.5 percent at both June 30, 2021 and December 31, 2020. At June 30, 2021 and December 31, 2020, the Corporation's SCB of 2.5 percent was applied in place of the capital conservation buffer under the Standardized approach. The countercyclical capital buffer for both periods was zero. The CET1 capital regulatory minimum is the sum of the CET1 capital ratio minimum of 4.5 percent, our G-SIB surcharge of 2.5 percent and our SCB or the capital conservation buffer, as applicable, of 2.5 percent. The SLR regulatory minimum includes a leverage buffer of 2.0 percent.
(3) Total capital under the Advanced approaches differs from the Standardized approach due to differences in the amount permitted in Tier 2 capital related to the qualifying allowance for credit losses.
(4) Reflects total average assets adjusted for certain Tier 1 capital deductions.
(5) Supplementary leverage exposure at December 31, 2020 reflects the temporary exclusion of U.S. Treasury securities and deposits at Federal Reserve Banks. The temporary relief expired after March 31, 2021 and is not reflected in supplementary leverage exposure at June 30, 2021.

At June 30, 2021, CET1 capital was $178.8 billion, an increase of $2.2 billion from December 31, 2020, driven by earnings, partially offset by common stock repurchases, dividends, the increase in deferred tax assets due to the change in U.K. tax law and lower net unrealized gains on available-for-sale (AFS) debt securities included in accumulated other comprehensive income (OCI). Tier 1 capital increased $2.1 billion primarily driven by the same factors as CET1 capital. Total capital under the Standardized approach decreased $3.5 billion primarily driven by a decrease in the adjusted allowance for credit losses included in Tier 2 capital, partially offset by the same factors driving the increase in CET1 capital. RWA under the Standardized approach, which yielded the lower CET1 capital ratio at June 30, 2021, increased $71.9 billion during the six months ended June 30, 2021 to $1,552 billion primarily due to strong client activity in *Global Markets* and investments of excess liquidity. Supplementary leverage exposure at June 30, 2021 increased $658.1 billion during the six months ended June 30, 2021 primarily due to the expiration of the Federal Reserve’s temporary relief to exclude U.S. Treasury securities and deposits at Federal Reserve Banks.

Table 9 shows the capital composition at June 30, 2021 and December 31, 2020.

Table 9 Capital Composition under Basel 3

(Dollars in millions)	June 30 2021	December 31 2020
Total common shareholders' equity	**$ 253,678**	$ 248,414
CECL transitional amount (1)	**2,994**	4,213
Goodwill, net of related deferred tax liabilities	**(68,638)**	(68,565)
Deferred tax assets arising from net operating loss and tax credit carryforwards	**(7,641)**	(5,773)
Intangibles, other than mortgage servicing rights, net of related deferred tax liabilities	**(1,662)**	(1,617)
Defined benefit pension plan net assets	**(1,196)**	(1,164)
Cumulative unrealized net (gain) loss related to changes in fair value of financial liabilities attributable to own creditworthiness, net-of-tax	**1,499**	1,753
Other	**(216)**	(601)
Common equity tier 1 capital	**178,818**	176,660
Qualifying preferred stock, net of issuance cost	**23,440**	23,437
Other	**(13)**	(1)
Tier 1 capital	**202,245**	200,096
Tier 2 capital instruments	**20,674**	22,213
Qualifying allowance for credit losses (2)	**11,993**	15,649
Other	**(426)**	(22)
Total capital under the Standardized approach	**234,486**	237,936
Adjustment in qualifying allowance for credit losses under the Advanced approaches (2)	**(6,750)**	(10,251)
Total capital under the Advanced approaches	**$ 227,736**	$ 227,685

(1) Includes the impact of the Corporation's adoption of the CECL accounting standard on January 1, 2020 and 25 percent of the increase in reserves since the initial adoption.
(2) Includes the impact of transition provisions related to the CECL accounting standard.

Table 10 shows the components of RWA as measured under Basel 3 at June 30, 2021 and December 31, 2020.

Table 10 Risk-weighted Assets under Basel 3

	Standardized Approach	**Advanced Approaches**	Standardized Approach	Advanced Approaches
(Dollars in billions)	**June 30, 2021**		December 31, 2020

Supplementary leverage exposure (in billions)		**$ 2,664**	
Supplementary leverage ratio		**6.4 %**	**6.0**
	December 31, 2020		
Risk-based capital metrics:			
Common equity tier 1 capital	$ 164,593	$ 164,593	
Tier 1 capital	164,593	164,593	
Total capital [3]	181,370	170,992	
Risk-weighted assets (in billions)	1,221	1,014	
Common equity tier 1 capital ratio	13.5 %	16.2 %	7.0 %
Tier 1 capital ratio	13.5	16.2	8.5
Total capital ratio	14.9	16.9	10.5
Leverage-based metrics:			
Adjusted quarterly average assets (in billions) [4]	$ 2,143	$ 2,143	
Tier 1 leverage ratio	7.7 %	7.7 %	5.0
Supplementary leverage exposure (in billions)		$ 2,525	
Supplementary leverage ratio		6.5 %	6.0

(1) Capital ratios for both June 30, 2021 and December 31, 2020 are calculated using the regulatory capital rule that allows a five-year transition period related to the adoption of CECL.
(2) Risk-based capital regulatory minimums at June 30, 2021 and December 31, 2020 are the minimum ratios under Basel 3 including a capital conservation buffer of 2.5 percent. The regulatory minimums for the leverage ratios as of both period ends are the percent required to be considered well capitalized under the PCA framework.
(3) Total capital under the Advanced approaches differs from the Standardized approach due to differences in the amount permitted in Tier 2 capital related to the qualifying allowance for credit losses.
(4) Reflects total average assets adjusted for certain Tier 1 capital deductions.

Total Loss-Absorbing Capacity Requirements

Total loss-absorbing capacity (TLAC) consists of the Corporation’s Tier 1 capital and eligible long-term debt issued directly by the Corporation. Eligible long-term debt for TLAC ratios is comprised of unsecured debt that has a remaining maturity of at least one year and satisfies additional requirements as prescribed in the TLAC final rule. As with the risk-based capital ratios and SLR, the Corporation is required to maintain TLAC ratios in excess of minimum requirements plus applicable buffers to avoid restrictions on capital distributions and discretionary bonus payments. Table 12 presents the Corporation's TLAC and long-term debt ratios and related information as of June 30, 2021 and December 31, 2020.

Table 12 Bank of America Corporation Total Loss-Absorbing Capacity and Long-Term Debt

(Dollars in millions)	TLAC [1]	Regulatory Minimum [2]	Long-term Debt	Regulatory Minimum [3]
	June 30, 2021			
Total eligible balance	**$ 429,120**		**$ 218,484**	
Percentage of risk-weighted assets [4]	**27.7 %**	**22.0 %**	**14.1 %**	**8.5 %**
Percentage of supplementary leverage exposure [5]	**12.5**	**9.5**	**6.3**	**4.5**
	December 31, 2020			
Total eligible balance	$ 405,153		$ 196,997	
Percentage of risk-weighted assets [4]	27.4 %	22.0 %	13.3 %	8.5 %
Percentage of supplementary leverage exposure [5]	14.5	9.5	7.1	4.5

(1) As of June 30, 2021 and December 31, 2020, TLAC ratios are calculated using the regulatory capital rule that allows a five-year transition period related to the adoption of CECL.
(2) The TLAC RWA regulatory minimum consists of 18.0 percent plus a TLAC RWA buffer comprised of 2.5 percent plus the Method 1 G-SIB surcharge of 1.5 percent. The countercyclical buffer is zero for both periods. The TLAC supplementary leverage exposure regulatory minimum consists of 7.5 percent plus a 2.0 percent TLAC leverage buffer. The TLAC RWA and leverage buffers must be comprised solely of CET1 capital and Tier 1 capital, respectively.
(3) The long-term debt RWA regulatory minimum is comprised of 6.0 percent plus an additional 2.5 percent requirement based on the Corporation's Method 2 G-SIB surcharge. The long-term debt leverage exposure regulatory minimum is 4.5 percent.
(4) The approach that yields the higher RWA is used to calculate TLAC and long-term debt ratios, which was the Standardized approach as of June 30, 2021 and December 31, 2020.
(5) Supplementary leverage exposure at December 31, 2020 reflects the temporary exclusion of U.S. Treasury Securities and deposits at Federal Reserve Banks. The temporary relief expired after March 31, 2021 and is not reflected in supplementary leverage exposure at June 30, 2021.

Regulatory Developments

The following supplements the disclosure in Capital Management – Regulatory Developments in the MD&A of the Corporation's 2020 Annual Report on Form 10-K.

Supplementary Leverage Ratio

On March 19, 2021, the U.S. banking regulators announced that the temporary change to the SLR for BHCs and depository institutions issued in 2020 would expire as scheduled after March 31, 2021. While the temporary relief automatically applied to the Corporation, the Corporation's lead depository institution, Bank of America, N.A., did not opt to take advantage of the SLR relief offered by the OCC. At June 30, 2021, the Corporation's SLR, reflecting the expiration of the temporary relief, was 5.9 percent, which is 0.9 percent, or $30 billion, in excess of the 5.0 percent required by the Federal Reserve.

Regulatory Capital and Securities Regulation

The Corporation's principal U.S. broker-dealer subsidiaries are BofA Securities, Inc. (BofAS), Merrill Lynch Professional Clearing Corp. (MLPCC) and Merrill Lynch, Pierce, Fenner & Smith Incorporated (MLPF&S). The Corporation's principal European broker-dealer subsidiaries are Merrill Lynch International (MLI) and BofA Securities Europe SA (BofASE).

The U.S. broker-dealer subsidiaries are subject to the net capital requirements of Rule 15c3-1 under the Exchange Act. BofAS computes its minimum capital requirements as an alternative net capital broker-dealer under Rule 15c3-1e, and MLPCC and MLPF&S compute their minimum capital requirements in accordance with the alternative standard under Rule 15c3-1. BofAS and MLPCC are also registered as futures commission merchants and are subject to CFTC Regulation 1.17. The U.S. broker-dealer subsidiaries are also registered with the Financial Industry Regulatory Authority, Inc. (FINRA). Pursuant to FINRA Rule 4110, FINRA may impose higher net capital requirements than Rule 15c3-1 under the Exchange Act with respect to each of the broker-dealers.

BofAS provides institutional services, and in accordance with the alternative net capital requirements, is required to maintain tentative net capital in excess of $1.0 billion and net capital in excess of the greater of $500 million or a certain percentage of its reserve requirement. BofAS must also notify the SEC in the event its tentative net capital is less than $5.0 billion. BofAS is also required to hold a certain percentage of its customers' and affiliates' risk-based margin in order to meet its CFTC minimum net capital requirement. At June 30, 2021, BofAS had tentative net capital of $18.0 billion. BofAS also had regulatory net capital of $15.2 billion, which exceeded the minimum requirement of $3.0 billion.

MLPCC is a fully-guaranteed subsidiary of BofAS and provides clearing and settlement services as well as prime brokerage and arranged financing services for institutional clients. At June 30, 2021, MLPCC's regulatory net capital of $5.7 billion exceeded the minimum requirement of $1.5 billion.

MLPF&S provides retail services. At June 30, 2021, MLPF&S' regulatory net capital was $3.7 billion, which exceeded the minimum requirement of $182 million.

Our European broker-dealers are regulated by non-U.S. regulators. MLI, a U.K. investment firm, is regulated by the Prudential Regulation Authority and the FCA and is subject to certain regulatory capital requirements. At June 30, 2021, MLI's capital resources were $33.9 billion, which exceeded the minimum Pillar 1 requirement of $14.8 billion. BofASE, a French investment firm, is regulated by the Autorité de Contrôle Prudentiel et de Résolution and the Autorité des Marchés Financiers, and is subject to certain regulatory capital requirements. At June 30, 2021, BofASE's capital resources were $7.2 billion which exceeded the minimum Pillar 1 requirement of $2.7 billion.

Liquidity Risk

Funding and Liquidity Risk Management

Our primary liquidity risk management objective is to meet expected or unexpected cash flow and collateral needs while continuing to support our businesses and customers under a range of economic conditions. To achieve that objective, we analyze and monitor our liquidity risk under expected and stressed conditions, maintain liquidity and access to diverse funding sources, including our stable deposit base, and seek to align liquidity-related incentives and risks. These liquidity risk management practices have allowed us to effectively manage the market stress from the pandemic that began in the first quarter of 2020. For more information on the effects of the pandemic, see Executive Summary – Recent Developments – COVID-19 Pandemic on page 3 herein and Item 1A. Risk Factors – Coronavirus Disease of the Corporation's 2020 Annual Report on Form 10-K.

We define liquidity as readily available assets, limited to cash and high-quality, liquid, unencumbered securities that we can use to meet our contractual and contingent financial obligations as they arise. We manage our liquidity position through line-of-business and ALM activities, as well as through our legal entity funding strategy, on both a forward and current (including intraday) basis under both expected and stressed conditions. We believe that a centralized approach to funding and liquidity management enhances our ability to monitor liquidity requirements, maximizes access to funding sources, minimizes borrowing costs and facilitates timely responses to liquidity events. For more information regarding global funding and liquidity risk management, as well as liquidity sources, liquidity arrangements, contingency planning and credit ratings discussed below, see Liquidity Risk in the MD&A of the Corporation's 2020 Annual Report on Form 10-K.

NB Holdings Corporation

We have intercompany arrangements with certain key subsidiaries under which we transferred certain assets of Bank of America Corporation, as the parent company, which is a separate and distinct legal entity from our bank and nonbank subsidiaries, and agreed to transfer certain additional parent company assets not needed to satisfy anticipated near-term expenditures to NB Holdings Corporation, a wholly-owned holding company subsidiary (NB Holdings). The parent company is expected to continue to have access to the same flow of dividends, interest and other amounts of cash necessary to service its debt, pay dividends and perform other obligations as it would have had if it had not entered into these arrangements and transferred any assets. These arrangements support our preferred single point of entry resolution strategy, under which only the parent company would be resolved under the U.S. Bankruptcy Code.

Global Liquidity Sources and Other Unencumbered Assets

Table 13 presents average Global Liquidity Sources (GLS) for the three months ended June 30, 2021 and December 31, 2020.

Table 13 Average Global Liquidity Sources

	Three Months Ended	
(Dollars in billions)	**June 30 2021**	December 31 2020
Bank entities	**$ 909**	$ 773
Nonbank and other entities [1]	**154**	170
Total Average Global Liquidity Sources	**$ 1,063**	$ 943

[1] Nonbank includes Parent, NB Holdings and other regulated entities.

Our bank subsidiaries' liquidity is primarily driven by deposit and lending activity, as well as securities valuation and net debt activity. Bank subsidiaries can also generate incremental liquidity by pledging a range of unencumbered loans and securities to certain Federal Home Loan Banks (FHLBs) and the Federal Reserve Discount Window. The cash we could have obtained by borrowing against this pool of specifically-identified eligible assets was $300 billion and $306 billion at June 30, 2021 and December 31, 2020. We have established operational procedures to enable us to borrow against these assets, including regularly monitoring our total pool of eligible loans and securities collateral. Eligibility is defined in guidelines from the FHLBs and the Federal Reserve and is subject to change at their discretion. Due to regulatory restrictions, liquidity generated by the bank subsidiaries can generally be used only to fund obligations within the bank subsidiaries, and transfers to the parent company or nonbank subsidiaries may be subject to prior regulatory approval.

Liquidity is also held in nonbank entities, including the Parent, NB Holdings and other regulated entities. Parent company and NB Holdings liquidity is typically in the form of cash deposited at BANA, which is excluded from the liquidity at bank subsidiaries, and high-quality, liquid, unencumbered securities. Liquidity held in other regulated entities, comprised primarily of broker-dealer subsidiaries, is primarily available to meet the obligations of that entity, and transfers to the parent company or to any other subsidiary may be subject to prior regulatory approval due to regulatory restrictions and minimum requirements. Our other regulated entities also hold unencumbered investment-grade securities and equities that we believe could be used to generate additional liquidity.

Table 14 presents the composition of average GLS for the three months ended June 30, 2021 and December 31, 2020.

Table 14 Average Global Liquidity Sources Composition

	Three Months Ended	
(Dollars in billions)	**June 30 2021**	December 31 2020
Cash on deposit	**$ 247**	$ 322
U.S. Treasury securities	**227**	141
U.S. agency securities, mortgage-backed securities, and other investment-grade securities	**570**	462
Non-U.S. government securities	**19**	18
Total Average Global Liquidity Sources	**$ 1,063**	$ 943

Our GLS are substantially the same in composition to what qualifies as High Quality Liquid Assets (HQLA) under the final U.S. Liquidity Coverage Ratio (LCR) rules. However, HQLA for purposes of calculating LCR is not reported at market value, but at a lower value that incorporates regulatory deductions and the exclusion of excess liquidity held at certain subsidiaries. The LCR is calculated as the amount of a financial institution's unencumbered HQLA relative to the estimated net cash outflows the institution could encounter over a 30-day period of significant liquidity stress, expressed as a percentage. Our average consolidated HQLA, on a net basis, was $602 billion and $584 billion for the three months ended June 30, 2021 and December 31, 2020. For the same periods, the average consolidated LCR was 117 percent and 122 percent. Our LCR fluctuates due to normal business flows from customer activity.

Liquidity Stress Analysis

We utilize liquidity stress analysis to assist us in determining the appropriate amounts of liquidity to maintain at the parent company and our subsidiaries to meet contractual and contingent cash outflows under a range of scenarios. For more information on liquidity stress analysis, see Liquidity Risk – Liquidity Stress Analysis in the MD&A of the Corporation's 2020 Annual Report on Form 10-K.

Net Stable Funding Ratio Final Rule

On October 20, 2020, the U.S. Agencies finalized the Net Stable Funding Ratio (NSFR), a rule requiring large banks to maintain a minimum level of stable funding over a one-year period. The final rule is intended to support the ability of banks to lend to households and businesses in both normal and adverse economic conditions and is complementary to the LCR rule, which focuses on short-term liquidity risks. The final rule was effective July 1, 2021. The U.S. NSFR applies to the Corporation on a consolidated basis and to our insured depository institutions. The Corporation is in compliance with the final NSFR rule in the regulatory timeline provided, and there have not been any significant impacts to the Corporation.

Diversified Funding Sources

We fund our assets primarily with a mix of deposits, and secured and unsecured liabilities through a centralized, globally coordinated funding approach diversified across products, programs, markets, currencies and investor groups. We fund a substantial portion of our lending activities through our deposits, which were $1.91 trillion and $1.80 trillion at June 30, 2021 and December 31, 2020.

Our trading activities in other regulated entities are primarily funded on a secured basis through securities lending and repurchase agreements, and these amounts will vary based on customer activity and market conditions.

Long-term Debt

During the six months ended June 30, 2021, we issued $48.2 billion of long-term debt consisting of $36.9 billion of notes issued by Bank of America Corporation, substantially all of which was TLAC compliant, $4.4 billion of notes issued by Bank of America, N.A. and $6.9 billion of other debt.

During the six months ended June 30, 2021, we had total long-term debt maturities and redemptions in the aggregate of $29.0 billion consisting of $17.6 billion for Bank of America Corporation, $5.4 billion for Bank of America, N.A. and $6.0 billion of other debt. Table 15 presents the carrying value of aggregate annual contractual maturities of long-term debt at June 30, 2021.

Table 15 Long-term Debt by Maturity

(Dollars in millions)	Remainder of 2021	2022	2023	2024	2025	Thereafter	Total
Bank of America Corporation							
Senior notes [1]	$ 3,391	$ 5,819	$ 23,615	$ 23,845	$ 20,020	$ 129,724	**$ 206,414**

Other debt							
Structured Liabilities	2,872	3,964	2,273	1,563	615	6,379	**17,666**
Nonbank VIEs [2]	1	—	—	—	—	565	**566**
Total other debt	2,873	3,964	2,273	1,563	615	6,944	**18,232**
Total long-term debt	$ 8,627	$ 16,058	$ 28,186	$ 30,169	$ 26,703	$ 164,861	**$ 274,604**

(1) Total includes $168.7 billion of outstanding notes that are both TLAC eligible and callable one year before their stated maturities, including $2.5 billion during the remainder of 2021, and $15.2 billion, $17.1 billion, $16.1 billion and $12.9 billion during each year of 2022 through 2025, respectively, and $104.9 billion thereafter. For more information on our TLAC eligible and callable outstanding notes, see Liquidity Risk – Diversified Funding Sources in the MD&A of the Corporation's 2020 Annual Report on Form 10-K.
(2) Represents liabilities of consolidated variable interest entities (VIEs) included in total long-term debt on the Consolidated Balance Sheet.

Total long-term debt increased $11.7 billion to $274.6 billion during the six months ended June 30, 2021, primarily due to debt issuances, partially offset by debt maturities and redemptions and valuation adjustments. We may, from time to time, purchase outstanding debt instruments in various transactions, depending on market conditions, liquidity and other factors. Our other regulated entities may also make markets in our debt instruments to provide liquidity for investors.

During the six months ended June 30, 2021, we issued $2.2 billion of structured notes, which are unsecured debt obligations that pay investors returns linked to other debt or equity securities, indices, currencies or commodities. These structured notes are typically issued to meet client demand, and notes with certain attributes may also be TLAC eligible. We typically hedge the returns we are obligated to pay on these liabilities with derivatives and/or investments in the underlying instruments, so that from a funding perspective, the cost is similar to our other unsecured long-term debt. We could be required to settle certain structured note obligations for cash or other securities prior to maturity under certain circumstances, which we consider for liquidity planning purposes. We believe, however, that a portion of such borrowings will remain outstanding beyond the earliest put or redemption date.

Substantially all of our senior and subordinated debt obligations contain no provisions that could trigger a requirement for an early repayment, require additional collateral support, result in changes to terms, accelerate maturity or create additional financial obligations upon an adverse change in our credit ratings, financial ratios, earnings, cash flows or stock price. For more information on long-term debt funding, including issuances and maturities and redemptions, see *Note 11 – Long-term Debt* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.

We use derivative transactions to manage interest rate and currency risks of our borrowings, considering the characteristics of the assets they are funding. For more information on our ALM activities, see Interest Rate Risk Management for the Banking Book on page 45.

Credit Ratings

Credit ratings and outlooks are opinions expressed by rating agencies on our creditworthiness and that of our obligations or securities, including long-term debt, short-term borrowings, preferred stock and other securities, including asset securitizations. Table 16 presents the Corporation's current long-term/short-term senior debt ratings and outlooks expressed by the rating agencies.

On May 24, 2021, Standard & Poor’s Global Ratings (S&P) affirmed the current ratings of the Corporation and its subsidiaries, while at the same time revising its rating outlook to Positive from Stable.

On June 7, 2021, Fitch Ratings (Fitch) upgraded the long-term senior debt ratings of the Corporation and its rated subsidiaries by one notch, to AA- and AA, respectively. Fitch also upgraded the Corporation’s short-term rating to F1+ which is now aligned with the short-term rating of its subsidiaries, including BANA. Following the upgrade, the rating outlook for the Corporation and its subsidiaries is Stable.

The current ratings and Stable outlooks for the Corporation and its subsidiaries from Moody's Investors Service did not change from those disclosed in the Corporation's 2020 Annual Report on Form 10-K.

For more information on additional collateral and termination payments that could be required in connection with certain over-the-counter derivative contracts and other trading agreements in the event of a credit rating downgrade, see *Note 3 – Derivatives* to the Consolidated Financial Statements herein and Item 1A. Risk Factors of the Corporation’s 2020 Annual Report on Form 10-K.

Finance Subsidiary Issuers and Parent Guarantor

BofA Finance LLC, a Delaware limited liability company, is a consolidated finance subsidiary of the Corporation that has issued and sold, and is expected to continue to issue and sell, its senior unsecured debt securities. In addition, each of BAC Capital Trust XIII and BAC Capital Trust XIV, Delaware statutory trusts, is a 100 percent owned finance subsidiary of the Corporation that has issued and sold trust preferred securities that remained outstanding at June 30, 2021. The Corporation has fully and unconditionally guaranteed (or effectively provided for the full and unconditional guarantee of) all such securities issued by such finance subsidiaries. For more information regarding such guarantees by the Corporation, see Liquidity Risk – Finance Subsidiary Issuers and Parent Guarantor in the MD&A of the Corporation’s 2020 Annual Report on Form 10-K.

Credit Risk Management

For information on our credit risk management activities, see Consumer Portfolio Credit Risk Management below, Commercial Portfolio Credit Risk Management on page 35, Non-U.S. Portfolio on page 40, Allowance for Credit Losses on page 41, and *Note 5 – Outstanding Loans and Leases and Allowance for Credit Losses* to the Consolidated Financial Statements.

During the six months ended June 30, 2021, the economy gained momentum as unemployment continued to decline from double-digit highs during 2020 and parts of the economy continued to open as vaccination rates increased, case levels showed improvements and restrictions generally began to ease. Individuals and businesses in the U.S. continue to receive various forms of support through economic stimulus packages enacted in 2020 and 2021. While there has been improvement, uncertainty remains about the timing and strength of the economy's recovery, which could lead to adverse impacts to credit quality metrics in future periods. For more information on how the pandemic may affect our operations, see Executive Summary – Recent Developments – COVID-19 Pandemic on page 3 and Item 1A. Risk Factors – Coronavirus Disease of the Corporation’s 2020 Annual Report on Form 10-K.

Consumer Portfolio Credit Risk Management

Credit risk management for the consumer portfolio begins with initial underwriting and continues throughout a borrower’s credit cycle. Statistical techniques in conjunction with experiential judgment are used in all aspects of portfolio management including underwriting, product pricing, risk appetite, setting credit limits, and establishing operating processes and metrics to quantify and balance risks and returns. Statistical models are built using detailed behavioral information from external sources such as credit bureaus and/or internal historical experience and are a component of our consumer credit risk management process. These models are used in part to assist in making both new and ongoing credit decisions, as well as portfolio management strategies, including authorizations and line management, collection practices and strategies, and determination of the allowance for loan and lease losses and allocated capital for credit risk.

Consumer Credit Portfolio

The economic environment improved during the six months ended June 30, 2021, with the U.S. unemployment rate continuing to decline and home prices increasing. During the three and six months ended June 30, 2021, net charge-offs decreased $221 million and $400 million to $513 million and $1.2 billion primarily due to lower credit card losses, as balance declines and the impact of government stimulus measures were partially offset by charge-offs associated with deferrals that expired in 2020. During the six months ended June 30, 2021, nonperforming loans increased due to deferral activity.

The consumer allowance for loan and lease losses decreased $2.6 billion during the six months ended June 30, 2021 to $7.4 billion primarily due to an improved economic outlook. For more information, see Allowance for Credit Losses on page 41.

For more information on our accounting policies regarding delinquencies, nonperforming status, charge-offs and troubled debt restructurings (TDRs) for the consumer portfolio, as well as interest accrual policies and delinquency status for loan modifications related to the pandemic, see *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K and *Note 5 – Outstanding Loans and Leases and Allowance for Credit Losses* to the Consolidated Financial Statements.

Table 17 presents our outstanding consumer loans and leases, consumer nonperforming loans and accruing consumer loans past due 90 days or more.

Table 17 Consumer Credit Quality

	Outstandings [1]		Nonperforming		Accruing Past Due 90 Days or More	
(Dollars in millions)	**June 30 2021**	December 31 2020	**June 30 2021**	December 31 2020	**June 30 2021**	December 31 2020
Residential mortgage [2]	**$ 214,324**	$ 223,555	**$ 2,343**	$ 2,005	**$ 687**	$ 762
Home equity	**30,469**	34,311	**651**	649	**—**	—
Credit card	**75,599**	78,708	**n/a**	n/a	**533**	903
Direct/Indirect consumer [3]	**96,903**	91,363	**50**	71	**15**	33
Other consumer	**172**	124	**—**	—	**—**	—
Consumer loans excluding loans accounted for under the fair value option	**$ 417,467**	$ 428,061	**$ 3,044**	$ 2,725	**$ 1,235**	$ 1,698
Loans accounted for under the fair value option [4]	**654**	735				
Total consumer loans and leases	**$ 418,121**	$ 428,796				
Percentage of outstanding consumer loans and leases [5]	**n/a**	n/a	**0.73 %**	0.64 %	**0.30 %**	0.40 %
Percentage of outstanding consumer loans and leases, excluding fully-insured loan portfolios [5]	**n/a**	n/a	**0.75**	0.65	**0.14**	0.22

(1) Outstandings include non-core residential mortgage of $7.2 billion and $8.3 billion and home equity of $3.6 billion and $4.0 billion at June 30, 2021 and December 31, 2020. For more information on non-core loans, see Consumer Credit Risk Management in the MD&A of the Corporation's 2020 Annual Report on Form 10-K.
(2) Residential mortgage loans accruing past due 90 days or more are fully-insured loans. At June 30, 2021 and December 31, 2020, residential mortgage includes $501 million and $537 million of loans on which interest had been curtailed by the Federal Housing Administration (FHA), and therefore were no longer accruing interest, although principal was still insured, and $186 million and $225 million of loans on which interest was still accruing.
(3) Outstandings primarily include auto and specialty lending loans and leases of $46.4 billion and $46.4 billion, U.S. securities-based lending loans of $46.4 billion and $41.1 billion and non-U.S. consumer loans of $3.0 billion and $3.0 billion at June 30, 2021 and December 31, 2020.
(4) Consumer loans accounted for under the fair value option include residential mortgage loans of $257 million and $298 million and home equity loans of $397 million and $437 million at June 30, 2021 and December 31, 2020. For more information on the fair value option, see *Note 15 – Fair Value Option* to the Consolidated Financial Statements.
(5) Excludes consumer loans accounted for under the fair value option. At June 30, 2021 and December 31, 2020, $13 million and $11 million of loans accounted for under the fair value option were past due 90 days or more and not accruing interest.
n/a = not applicable

Table 18 presents net charge-offs and related ratios for consumer loans and leases.

Table 18 Consumer Net Charge-offs and Related Ratios

	Net Charge-offs				Net Charge-off Ratios [1]			
	Three Months Ended June 30		Six Months Ended June 30		Three Months Ended June 30		Six Months Ended June 30	
(Dollars in millions)	**2021**	2020	**2021**	2020	**2021**	2020	**2021**	2020
Residential mortgage	**$ (6)**	$ (20)	**$ (10)**	$ (21)	**(0.01)%**	(0.03)%	**(0.01)%**	(0.02)%
Home equity	**(24)**	(14)	**(59)**	(25)	**(0.31)**	(0.14)	**(0.37)**	(0.13)
Credit card	**488**	665	**1,122**	1,435	**2.67**	3.10	**3.07**	3.19
Direct/Indirect consumer	**(9)**	26	**22**	66	**(0.04)**	0.12	**0.05**	0.15
Other consumer	**64**	77	**131**	151	**n/m**	n/m	**n/m**	n/m
Total	**$ 513**	$ 734	**$ 1,206**	$ 1,606	**0.50**	0.65	**0.59**	0.70

(1) Net charge-off ratios are calculated as annualized net charge-offs divided by average outstanding loans and leases excluding loans accounted for under the fair value option.
n/m = not meaningful

We believe that the presentation of information adjusted to exclude the impact of the fully-insured loan portfolio and loans accounted for under the fair value option is more representative of the ongoing operations and credit quality of the business. As a result, in the following tables and discussions of the residential mortgage and home equity portfolios, we exclude loans accounted for under the fair value option and provide information that excludes the impact of the fully-insured loan portfolio in certain credit quality statistics.

Residential Mortgage

The residential mortgage portfolio made up the largest percentage of our consumer loan portfolio at 51 percent of consumer loans and leases at June 30, 2021. Approximately 51 percent of the residential mortgage portfolio was in *Consumer Banking* and 42 percent was in *GWIM*. The remaining portion was in *All Other* and was comprised of loans used in our overall ALM activities, delinquent FHA loans repurchased pursuant to our servicing agreements with the Government National Mortgage Association, as well as loans repurchased related to our representations and warranties.

Outstanding balances in the residential mortgage portfolio decreased $9.2 billion during the six months ended June 30, 2021 as paydowns were partially offset by originations.

At June 30, 2021 and December 31, 2020, the residential mortgage portfolio included $12.5 billion and $11.8 billion of outstanding fully-insured loans, of which $2.5 billion and $2.8 billion had FHA insurance, with the remainder protected by Fannie Mae long-term standby agreements.

Table 19 presents certain residential mortgage key credit statistics on both a reported basis and excluding the fully-insured loan portfolio. The following discussion presents the residential mortgage portfolio excluding the fully-insured loan portfolio.

Table 19 Residential Mortgage – Key Credit Statistics

	Reported Basis [1]		Excluding Fully-insured Loans [1]	
(Dollars in millions)	**June 30 2021**	December 31 2020	**June 30 2021**	December 31 2020
Outstandings	**$ 214,324**	$ 223,555	**$ 201,805**	$ 211,737
Accruing past due 30 days or more	**1,906**	2,314	**909**	1,224
Accruing past due 90 days or more	**687**	762	**—**	—
Nonperforming loans [2]	**2,343**	2,005	**2,343**	2,005

Refreshed LTV greater than 100	**—**	1	**—**	1
Refreshed FICO below 620	**2**	2	**1**	1
2006 and 2007 vintages [3]	**3**	3	**3**	3

[1] Outstandings, accruing past due, nonperforming loans and percentages of portfolio exclude loans accounted for under the fair value option. For information on our interest accrual policies and delinquency status for loan modifications related to the pandemic, see *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.
[2] Includes loans that are contractually current which primarily consist of collateral-dependent TDRs, including those that have been discharged in Chapter 7 bankruptcy and loans that have not yet demonstrated a sustained period of payment performance following a TDR.
[3] These vintages of loans accounted for $458 million, or 20 percent, and $503 million, or 25 percent, of nonperforming residential mortgage loans at June 30, 2021 and December 31, 2020.

Nonperforming outstanding balances in the residential mortgage portfolio increased $338 million during the six months ended June 30, 2021 primarily driven by deferral activity. Of the nonperforming residential mortgage loans at June 30, 2021, $1.2 billion, or 53 percent, were current on contractual payments. Loans accruing past due 30 days or more decreased $315 million driven by continued improvement in credit quality.

Net recoveries of $6 million and $10 million for the three and six months ended June 30, 2021 remained relatively unchanged compared to the same periods in the prior year.

Of the $201.8 billion in total residential mortgage loans outstanding at June 30, 2021, as shown in Table 20, 28 percent were originated as interest-only loans. The outstanding balance of interest-only residential mortgage loans that have entered the amortization period was $5.3 billion, or nine percent, at June 30, 2021. Residential mortgage loans that have entered the amortization period generally experienced a higher rate of early stage delinquencies and nonperforming status compared to the residential mortgage portfolio as a whole. At June 30, 2021, $66 million, or one percent, of outstanding interest-only residential mortgages that had entered the amortization period were accruing past due 30 days or more compared to $909 million, or less than one percent, for the entire residential mortgage portfolio. In addition, at June 30, 2021, $314 million, or six percent, of outstanding interest-only residential mortgage loans that had entered the amortization period were nonperforming, of which $112 million were contractually current, compared to $2.3 billion, or one percent, for the entire residential mortgage portfolio. Loans that have yet to enter the amortization period in our interest-only residential mortgage portfolio are primarily well-collateralized loans to our wealth management clients and have an interest-only period of three to ten years. Approximately 98 percent of these loans that have yet to enter the amortization period will not be required to make a fully-amortizing payment until 2022 or later.

Table 20 presents outstandings, nonperforming loans and net charge-offs by certain state concentrations for the residential mortgage portfolio. The Los Angeles-Long Beach-Santa Ana Metropolitan Statistical Area (MSA) within California represented 15 percent and 16 percent of outstandings at June 30, 2021 and December 31, 2020. In the New York area, the New York-Northern New Jersey-Long Island MSA made up 15 percent and 14 percent of outstandings at June 30, 2021 and December 31, 2020.

[1] Outstandings and nonperforming loans exclude loans accounted for under the fair value option.

Home Equity

At June 30, 2021, the home equity portfolio made up seven percent of the consumer portfolio and was comprised of home equity lines of credit (HELOCs), home equity loans and reverse mortgages. HELOCs generally have an initial draw period of 10 years, and after the initial draw period ends, the loans generally convert to 15- or 20-year amortizing loans. We no longer originate home equity loans or reverse mortgages.

At June 30, 2021, 80 percent of the home equity portfolio was in *Consumer Banking*, 12 percent was in *All Other* and the remainder of the portfolio was primarily in *GWIM*. Outstanding balances in the home equity portfolio decreased $3.8 billion during the six months ended June 30, 2021 primarily due to paydowns outpacing new originations and draws on existing lines. Of the total home equity portfolio at June 30, 2021 and December 31, 2020, $12.8 billion, or 42 percent, and $13.8 billion, or 40 percent, were in first-lien positions. At June 30, 2021, outstanding balances in the home equity portfolio that were in a second-lien or more junior-lien position and where we also held the first-lien loan totaled $5.1 billion, or 17 percent of our total home equity portfolio.

Unused HELOCs totaled $41.0 billion and $42.3 billion at June 30, 2021 and December 31, 2020. The HELOC utilization rate was 41 percent and 43 percent at June 30, 2021 and December 31, 2020.

Table 21 presents certain home equity portfolio key credit statistics.

Table 21 **Home Equity – Key Credit Statistics** [(1)]

(Dollars in millions)	June 30 2021	December 31 2020
Outstandings	$ 30,469	$ 34,311
Accruing past due 30 days or more [(2)]	167	186
Nonperforming loans [(2, 3)]	651	649
Percent of portfolio		
Refreshed CLTV greater than 90 but less than or equal to 100	1 %	1 %
Refreshed CLTV greater than 100	1	1
Refreshed FICO below 620	3	3
2006 and 2007 vintages [(4)]	16	16

(1) Outstandings, accruing past due, nonperforming loans and percentages of the portfolio exclude loans accounted for under the fair value option. For information on our interest accrual policies and delinquency status for loan modifications related to the pandemic, see *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.
(2) Accruing past due 30 days or more include $21 million and $25 million and nonperforming loans include $90 million and $88 million of loans where we serviced the underlying first lien at June 30, 2021 and December 31, 2020.
(3) Includes loans that are contractually current which primarily consist of collateral-dependent TDRs, including those that have been discharged in Chapter 7 bankruptcy, junior-lien loans where the underlying first lien is 90 days or more past due, as well as loans that have not yet demonstrated a sustained period of payment performance following a TDR.
(4) These vintages of loans accounted for 35 percent and 36 percent of nonperforming home equity loans at June 30, 2021 and December 31, 2020.

Nonperforming outstanding balances in the home equity portfolio remained relatively unchanged at $651 million at June 30, 2021. Of the nonperforming home equity loans at June 30, 2021, $264 million, or 41 percent were current on contractual payments. In addition, $246 million, or 38 percent of nonperforming home equity loans were 180 days or more past due and had been written down to the estimated fair value of the collateral, less costs to sell. Accruing loans that were 30 days or more past due decreased $19 million during the six months ended June 30, 2021.

Net recoveries increased $10 million to $24 million and $34 million to $59 million for the three and six months ended June 30, 2021 compared to the same periods in 2020. The increase was driven by favorable portfolio trends due partly to improvement in home prices.

Of the $30.5 billion in total home equity portfolio outstandings at June 30, 2021, as shown in Table 21, 15 percent require interest-only payments. The outstanding balance of HELOCs that have reached the end of their draw period and have entered the amortization period was $8.0 billion at June 30, 2021. The HELOCs that have entered the amortization period have experienced a higher percentage of early stage delinquencies and nonperforming status when compared to the HELOC portfolio as a whole. At June 30, 2021, $107 million, or one percent, of outstanding HELOCs that had entered the amortization period were accruing past due 30 days or more. In addition, at June 30, 2021, $473 million, or six percent, were nonperforming. Loans that have yet to enter the amortization period in our interest-only portfolio are primarily post-2008 vintages and generally have better credit quality than the previous vintages that had entered the amortization period. We communicate to contractually current customers more than a year prior to the end of their draw period to inform them of the potential change to the payment structure before entering the amortization period, and provide payment options to customers prior to the end of the draw period.

Although we do not actively track how many of our home equity customers pay only the minimum amount due on their home equity loans and lines, we can infer some of this information through a review of our HELOC portfolio that we service and that is still in its revolving period. During the three months ended June 30, 2021, 19 percent of these customers with an outstanding balance did not pay any principal on their HELOCs.

Table 22 presents outstandings, nonperforming balances and net charge-offs by certain state concentrations for the home equity portfolio. In the New York area, the New York-Northern New Jersey-Long Island MSA made up 13 percent of the outstanding home equity portfolio at both June 30, 2021 and December 31, 2020. The Los Angeles-Long Beach-Santa Ana MSA within California made up 11 percent of the outstanding home equity portfolio at both June 30, 2021 and December 31, 2020.

Credit Card

At June 30, 2021, 97 percent of the credit card portfolio was managed in *Consumer Banking* with the remainder in *GWIM*. Outstandings in the credit card portfolio decreased $3.1 billion during the six months ended June 30, 2021 to $75.6 billion as increased payments more than offset higher purchase volumes as spending continued to recover. Net charge-offs decreased $177 million to $488 million and $313 million to $1.1 billion during the three and six months ended June 30, 2021 compared to the same periods in 2020 due to balance declines and the impact of government stimulus measures, partially offset by charge-offs of certain loans with deferrals that expired in 2020. Credit card loans 30 days or more past due and still accruing interest decreased $713 million, and loans 90 days or more past due and still accruing interest decreased $370 million primarily due to charge-offs of certain loans with deferrals that expired in 2020 and the impact of government stimulus measures.

Unused lines of credit for credit card increased to $351.1 billion at June 30, 2021 from $342.4 billion at December 31, 2020.

Table 23 presents certain state concentrations for the credit card portfolio.

(1) For information on our interest accrual policies and delinquency status for loan modifications related to the pandemic, see *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.

Direct/Indirect Consumer

At June 30, 2021, 48 percent of the direct/indirect portfolio was included in *Consumer Banking* (consumer auto and recreational vehicle lending) and 52 percent was included in *GWIM* (principally securities-based lending loans). Outstandings in the direct/indirect portfolio increased by $5.5 billion during the six months ended June 30, 2021 to $96.9 billion driven by client demand for liquidity and high asset values in the securities-based lending portfolio.

Table 24 presents certain state concentrations for the direct/indirect consumer loan portfolio.

Table 24 Direct/Indirect State Concentrations

(Dollars in millions)	Outstandings June 30 2021	Outstandings December 31 2020	Accruing Past Due 90 Days or More (1) June 30 2021	Accruing Past Due 90 Days or More (1) December 31 2020	Net Charge-offs Three Months Ended June 30 2021	Net Charge-offs Three Months Ended June 30 2020	Net Charge-offs Six Months Ended June 30 2021	Net Charge-offs Six Months Ended June 30 2020

Total direct/indirect loan portfolio	$ 96,903	$ 91,363	$ 15	$ 33	$ (9)	$ 26	$ 22	$ 66

(1) For information on our interest accrual policies and delinquency status for loan modifications related to the pandemic, see *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.

Nonperforming Consumer Loans, Leases and Foreclosed Properties Activity

Table 25 presents nonperforming consumer loans, leases and foreclosed properties activity for the three and six months ended June 30, 2021 and 2020. During the six months ended June 30, 2021, nonperforming consumer loans increased $319 million to $3.0 billion primarily driven by consumer real estate deferral activity.

At June 30, 2021, $823 million, or 27 percent of nonperforming loans were 180 days or more past due and had been written down to their estimated property value less costs to sell. In addition, at June 30, 2021, $1.6 billion, or 51 percent of nonperforming consumer loans were modified and are now current after successful trial periods, or are current loans classified as nonperforming loans in accordance with applicable policies.

Foreclosed properties decreased $30 million during the six months ended June 30, 2021 to $93 million as the Corporation has continued to pause formal loan foreclosure proceedings and foreclosure sales for occupied properties during 2021.

Nonperforming loans also include certain loans that have been modified in TDRs where economic concessions have been granted to borrowers experiencing financial difficulties. Nonperforming TDRs are included in Table 25.

Table 25 Nonperforming Consumer Loans, Leases and Foreclosed Properties Activity

	Three Months Ended June 30		Six Months Ended June 30	
(Dollars in millions)	**2021**	2020	**2021**	2020
Nonperforming loans and leases, beginning of period	**$ 3,091**	$ 2,204	**$ 2,725**	$ 2,053
Additions	**431**	354	**1,282**	831
Reductions:				
Paydowns and payoffs	**(160)**	(84)	**(283)**	(190)
Sales	**(1)**	(25)	**(2)**	(31)
Returns to performing status [1]	**(291)**	(233)	**(638)**	(398)
Charge-offs	**(25)**	(22)	**(37)**	(49)
Transfers to foreclosed properties	**(1)**	(3)	**(3)**	(25)
Total net additions/(reductions) to nonperforming loans and leases	**(47)**	(13)	**319**	138
Total nonperforming loans and leases, June 30	**3,044**	2,191	**3,044**	2,191
Foreclosed properties, June 30 [2]	**93**	169	**93**	169
Nonperforming consumer loans, leases and foreclosed properties, June 30	**$ 3,137**	$ 2,360	**$ 3,137**	$ 2,360
Nonperforming consumer loans and leases as a percentage of outstanding consumer loans and leases [3]	**0.73 %**	0.49 %		
Nonperforming consumer loans, leases and foreclosed properties as a percentage of outstanding consumer loans, leases and foreclosed properties [3]	**0.75**	0.52		

(1) Consumer loans may be returned to performing status when all principal and interest is current and full repayment of the remaining contractual principal and interest is expected, or when the loan otherwise becomes well-secured and is in the process of collection.
(2) Foreclosed property balances do not include properties insured by certain government-guaranteed loans, principally FHA-insured, of $66 million and $124 million at June 30, 2021 and 2020.
(3) Outstanding consumer loans and leases exclude loans accounted for under the fair value option.

Table 26 presents TDRs for the consumer real estate portfolio. Performing TDR balances are excluded from nonperforming loans and leases in Table 25.

Table 26 Consumer Real Estate Troubled Debt Restructurings

	June 30, 2021			December 31, 2020		
(Dollars in millions)	**Nonperforming**	**Performing**	**Total**	Nonperforming	Performing	Total
Residential mortgage [1, 2]	**$ 1,548**	**$ 2,585**	**$ 4,133**	$ 1,195	$ 2,899	$ 4,094
Home equity [3]	**268**	**743**	**1,011**	248	836	1,084
Total consumer real estate troubled debt restructurings	**$ 1,816**	**$ 3,328**	**$ 5,144**	$ 1,443	$ 3,735	$ 5,178

(1) At June 30, 2021 and December 31, 2020, residential mortgage TDRs deemed collateral dependent totaled $1.7 billion and $1.4 billion, and included $1.4 billion and $1.0 billion of loans classified as nonperforming and $315 million and $361 million of loans classified as performing.
(2) At June 30, 2021 and December 31, 2020, residential mortgage performing TDRs include $1.4 billion and $1.5 billion of loans that were fully-insured.
(3) At June 30, 2021 and December 31, 2020, home equity TDRs deemed collateral dependent totaled $405 million and $407 million, and include $234 million and $216 million of loans classified as nonperforming and $171 million and $191 million of loans classified as performing.

In addition to modifying consumer real estate loans, we work with customers who are experiencing financial difficulty by modifying credit card and other consumer loans. Credit card and other consumer loan modifications generally involve a reduction in the customer's interest rate on the account and placing the customer on a fixed payment plan not exceeding 60 months.

Modifications of credit card and other consumer loans are made through programs utilizing direct customer contact, but may also utilize external programs. At June 30, 2021 and December 31, 2020, our credit card and other consumer TDR portfolio was $673 million and $701 million, of which $600 million and $614 million were current or less than 30 days past due under the modified terms.

Commercial Portfolio Credit Risk Management

Commercial credit risk is evaluated and managed with the goal that concentrations of credit exposure continue to be aligned with our risk appetite. We review, measure and manage concentrations of credit exposure by industry, product, geography, customer relationship and loan size. We also review, measure and manage commercial real estate loans by geographic location and property type. In addition, within our non-U.S. portfolio, we evaluate exposures by region and by country. Tables 31, 34 and 37 summarize our concentrations. We also utilize syndications of exposure to third parties, loan sales, hedging and other risk mitigation techniques to manage the size and risk profile of the commercial credit portfolio. For more information on our industry concentrations, see Table 34 and Commercial Portfolio Credit Risk Management – Industry Concentrations on page 38.

For more information on our accounting policies regarding delinquencies, nonperforming status, net charge-offs and TDRs for the commercial portfolio as well as interest accrual policies and delinquency status for loan modifications related to the pandemic, see *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.

Commercial Credit Portfolio

During the six months ended June 30, 2021, commercial asset quality improved as the economic recovery gained momentum amid COVID-19 containment and vaccination progress. Accordingly, charge-offs, nonperforming commercial loans and reservable criticized utilized exposure declined during this period. Outstanding commercial loans and leases increased $1.7 billion during the six months ended June 30, 2021 due to growth in commercial and industrial, primarily in *Global Markets* with most of the increase in investment grade exposures. This increase was largely offset by lower U.S. small business commercial loans due to PPP forgiveness. For more information on PPP loans, see *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.

Credit quality of commercial real estate borrowers has begun to stabilize in many sectors as economies have reopened. However, certain sectors, including hospitality and retail, while showing signs of improvement, continue to be negatively impacted due to the pandemic. Moreover, many real estate markets, while improving, are still experiencing some disruptions in demand, supply chain challenges and tenant difficulties.

The commercial allowance for loan and lease losses decreased $2.1 billion during the six months ended June 30, 2021 to $6.7 billion primarily driven by an improved macroeconomic outlook. For more information, see Allowance for Credit Losses on page 41.

Total commercial utilized credit exposure decreased $7.3 billion during the six months ended June 30, 2021 to $613.0 billion primarily driven by lower derivative assets. The utilization rate for loans and leases, standby letters of credit (SBLCs) and financial guarantees, and commercial letters of credit, in the aggregate, was 55 percent at June 30, 2021 and 57 percent at December 31, 2020.

Table 27 presents commercial credit exposure by type for utilized, unfunded and total binding committed credit exposure. Commercial utilized credit exposure includes SBLCs and financial guarantees and commercial letters of credit that have been issued and for which we are legally bound to advance funds under prescribed conditions during a specified time period, and excludes exposure related to trading account assets. Although funds have not yet been advanced, these exposure types are considered utilized for credit risk management purposes.

Table 27 Commercial Credit Exposure by Type

	Commercial Utilized (1)		Commercial Unfunded (2, 3, 4)		Total Commercial Committed

Total	**$ 613,030**	$ 620,303	**$ 461,933**	$ 419,941	**$ 1,074,963**	$ 1,040,244

(1) Commercial utilized exposure includes loans of $6.3 billion and $5.9 billion and issued letters of credit with a notional amount of $80 million and $89 million accounted for under the fair value option at June 30, 2021 and December 31, 2020.
(2) Commercial unfunded exposure includes commitments accounted for under the fair value option with a notional amount of $5.2 billion and $3.9 billion at June 30, 2021 and December 31, 2020.
(3) Excludes unused business card lines, which are not legally binding.
(4) Includes the notional amount of unfunded legally binding lending commitments net of amounts distributed (i.e., syndicated or participated) to other financial institutions. The distributed amounts were $10.9 billion and $10.5 billion at June 30, 2021 and December 31, 2020.
(5) Derivative assets are carried at fair value, reflect the effects of legally enforceable master netting agreements and have been reduced by cash collateral of $32.3 billion and $42.5 billion at June 30, 2021 and December 31, 2020. Not reflected in utilized and committed exposure is additional non-cash derivative collateral held of $37.1 billion and $39.3 billion at June 30, 2021 and December 31, 2020, which consists primarily of other marketable securities.

Nonperforming commercial loans decreased $364 million and commercial reservable criticized utilized exposure decreased $9.8 billion, which was broad-based across industries. Table 28 presents our commercial loans and leases portfolio and related credit quality information at June 30, 2021 and December 31, 2020.

(1) Net charge-off ratios are calculated as annualized net charge-offs divided by average outstanding loans and leases excluding loans accounted for under the fair value option.

Table 30 presents commercial reservable criticized utilized exposure by loan type. Criticized exposure corresponds to the Special Mention, Substandard and Doubtful asset categories as defined by regulatory authorities. Total commercial reservable criticized utilized exposure decreased $9.8 billion during the six months ended June 30, 2021, which was broad-based across industries. At June 30, 2021 and December 31, 2020, 84 percent and 79 percent of commercial reservable criticized utilized exposure was secured.

Table 30 Commercial Reservable Criticized Utilized Exposure [1, 2]

(Dollars in millions)	**June 30, 2021**		December 31, 2020	
Commercial and industrial:				
U.S. commercial	**$ 14,903**	**4.66 %**	$ 21,388	6.83 %
Non-U.S. commercial	**3,559**	**3.44**	5,051	5.03
Total commercial and industrial	**18,462**	**4.36**	26,439	6.40
Commercial real estate	**8,898**	**14.51**	10,213	16.42
Commercial lease financing	**733**	**4.65**	714	4.18
	28,093	**5.61**	37,366	7.59
U.S. small business commercial	**785**	**2.63**	1,300	3.56
Total commercial reservable criticized utilized exposure	**$ 28,878**	**5.45**	$ 38,666	7.31

(1) Total commercial reservable criticized utilized exposure includes loans and leases of $27.4 billion and $36.6 billion and commercial letters of credit of $1.5 billion and $2.1 billion at June 30, 2021 and December 31, 2020.
(2) Percentages are calculated as commercial reservable criticized utilized exposure divided by total commercial reservable utilized exposure for each exposure category.

Commercial and Industrial

Commercial and industrial loans include U.S. commercial and non-U.S. commercial portfolios.

U.S. Commercial

At June 30, 2021, 61 percent of the U.S. commercial loan portfolio, excluding small business, was managed in *Global Banking,* 21 percent in *Global Markets*, 16 percent in *GWIM* (loans that provide financing for asset purchases, business investments and other liquidity needs for high net worth clients) and the remainder primarily in *Consumer Banking*. U.S. commercial loans increased $2.4 billion during the six months ended June 30, 2021 driven by *Global Markets*. Reservable criticized utilized exposure decreased $6.5 billion, which was broad-based across industries.

Non-U.S. Commercial

At June 30, 2021, 72 percent of the non-U.S. commercial loan portfolio was managed in *Global Banking* and 28 percent in *Global Markets*. Non-U.S. commercial loans increased $7.7 billion during the six months ended June 30, 2021 primarily in *Global Markets*. For information on the non-U.S. commercial portfolio, see Non-U.S. Portfolio on page 40.

Commercial Real Estate

Commercial real estate primarily includes commercial loans secured by non-owner-occupied real estate and is dependent on the sale or lease of the real estate as the primary source of repayment. Outstanding loans declined by $758 million during the six months ended June 30, 2021 as paydowns exceeded new originations. The portfolio remains diversified across property types and geographic regions. California represented the largest state concentration at 24 percent and 23 percent of the commercial real estate portfolio at June 30, 2021 and December 31, 2020. The commercial real estate portfolio is predominantly managed in *Global Banking* and consists of loans made primarily to public and private developers, and commercial real estate firms.

For the three and six months ended June 30, 2021 and 2020, we continued to see low default rates and varying degrees of improvement in the portfolio. We use a number of proactive risk mitigation initiatives to reduce adversely rated exposure in the commercial real estate portfolio, including transfers of deteriorating exposures for management by independent special asset officers and the pursuit of loan restructurings or asset sales to achieve the best results for our customers and the Corporation.

Table 31 presents outstanding commercial real estate loans by geographic region, based on the geographic location of the collateral, and by property type.

Table 31 Outstanding Commercial Real Estate Loans

(Dollars in millions)	June 30 2021	December 31 2020
By Geographic Region		
California	**$ 14,178**	$ 14,028

Other	**6,643**	7,146
Total non-residential	**58,197**	59,147
Residential	**1,409**	1,217
Total outstanding commercial real estate loans	**$ 59,606**	$ 60,364

U.S. Small Business Commercial

The U.S. small business commercial loan portfolio is comprised of small business card loans and small business loans primarily managed in *Consumer Banking,* and includes $15.7 billion and $22.7 billion of PPP loans outstanding at June 30, 2021 and December 31, 2020. The decline of $7.0 billion in PPP loans during the six months ended June 30, 2021 was due to repayment of the loans by the Small Business Administration under the terms of the program. Excluding PPP, credit card-related products were 51 percent and 50 percent of the U.S. small business commercial portfolio at June 30, 2021 and December 31, 2020. Of the U.S. small business commercial net charge-offs, 100 percent and 95 percent were credit card-related products for the three and six months ended June 30, 2021 compared to 95 percent and 92 percent for the same periods in 2020.

Nonperforming Commercial Loans, Leases and Foreclosed Properties Activity

Table 32 presents the nonperforming commercial loans, leases and foreclosed properties activity during the three and six months ended June 30, 2021 and 2020. Nonperforming loans do not include loans accounted for under the fair value option. During the six months ended June 30, 2021, nonperforming commercial loans and leases decreased $364 million to $1.9 billion. At June 30, 2021, 78 percent of commercial nonperforming loans, leases and foreclosed properties were secured and 59 percent were contractually current. Commercial nonperforming loans were carried at approximately 88 percent of their unpaid principal balance, as the carrying value of these loans has been reduced to the estimated collateral value less costs to sell.

Table 32 Nonperforming Commercial Loans, Leases and Foreclosed Properties Activity [1, 2]

(Dollars in millions)	Three Months Ended June 30 2021	Three Months Ended June 30 2020	Six Months Ended June 30 2021	Six Months Ended June 30 2020
Nonperforming loans and leases, beginning of period	**$ 2,071**	$ 1,852	**$ 2,227**	$ 1,499
Additions	**503**	889	**975**	1,670

Sales	**(77)**	(10)	**(99)**	(26)
Returns to performing status [3]	**(59)**	(8)	**(87)**	(24)
Charge-offs	**(108)**	(344)	**(186)**	(528)
Transfers to loans held-for-sale	**(203)**	—	**(391)**	—
Total net additions (reductions) to nonperforming loans and leases	**(208)**	350	**(364)**	703
Total nonperforming loans and leases, June 30	**1,863**	2,202	**1,863**	2,202
Foreclosed properties, June 30	**31**	49	**31**	49
Nonperforming commercial loans, leases and foreclosed properties, June 30	**$ 1,894**	$ 2,251	**$ 1,894**	$ 2,251
Nonperforming commercial loans and leases as a percentage of outstanding commercial loans and leases [4]	**0.38 %**	0.41 %		
Nonperforming commercial loans, leases and foreclosed properties as a percentage of outstanding commercial loans, leases and foreclosed properties [4]	**0.38**	0.42		

(1) Balances do not include nonperforming loans held-for-sale of $348 million and $151 million at June 30, 2021 and 2020.
(2) Includes U.S. small business commercial activity. Small business card loans are excluded as they are not classified as nonperforming.
(3) Commercial loans and leases may be returned to performing status when all principal and interest is current and full repayment of the remaining contractual principal and interest is expected, or when the loan otherwise becomes well-secured and is in the process of collection. TDRs are generally classified as performing after a sustained period of demonstrated payment performance.
(4) Outstanding commercial loans exclude loans accounted for under the fair value option.

Table 33 presents our commercial TDRs by product type and performing status. U.S. small business commercial TDRs are comprised of renegotiated small business card loans and small business loans. The renegotiated small business card loans are not classified as nonperforming as they are charged off no later than the end of the month in which the loan becomes 180 days past due.

Table 33 Commercial Troubled Debt Restructurings

(Dollars in millions)	June 30, 2021 Nonperforming	June 30, 2021 Performing	June 30, 2021 Total	December 31, 2020 Nonperforming	December 31, 2020 Performing	December 31, 2020 Total

Industry Concentrations

Table 34 presents commercial committed and utilized credit exposure by industry. For information on net notional credit protection purchased to hedge funded and unfunded exposures for which we elected the fair value option, as well as certain other credit exposures, see Commercial Portfolio Credit Risk Management – Risk Mitigation.

Our commercial credit exposure is diversified across a broad range of industries. Total commercial committed exposure increased $34.7 billion, or three percent, during the six months ended June 30, 2021 to $1.1 trillion. The increase in commercial committed exposure was concentrated in Asset managers and funds, Finance companies, Healthcare equipment and services and Media industry sectors. Increases were partially offset by decreased exposure to the Government and public education and Vehicle dealers industry sectors.

For information on industry limits, see Commercial Portfolio Credit Risk Management – Industry Concentrations in the MD&A of the Corporation's 2020 Annual Report on Form 10-K.

Asset managers and funds, our largest industry concentration with committed exposure of $118.6 billion, increased $18.3 billion, or 18 percent, during the six months ended June 30, 2021.

Real estate, our second largest industry concentration with committed exposure of $92.9 billion, increased $1.2 billion, or one percent, during the six months ended June 30, 2021. For more information on the commercial real estate and related portfolios, see Commercial Portfolio Credit Risk Management – Commercial Real Estate on page 37.

Capital goods, our third largest industry concentration with committed exposure of $84.2 billion, increased $3.4 billion, or four percent, during the six months ended June 30, 2021.

Given the widespread impact of the pandemic on the U.S. and global economy, a number of industries have been and may continue to be adversely impacted. We continue to monitor all industries, particularly higher risk industries that are experiencing or could experience a more significant impact to their financial condition. For more information on the pandemic, see Executive Summary – Recent Developments – COVID-19 Pandemic on page 3.

Financial markets infrastructure (clearinghouses)	3,666	4,939	5,779	8,648
Total commercial credit exposure by industry	**$ 613,030**	$ 620,303	**$ 1,074,963**	$ 1,040,244

(1) Includes U.S. small business commercial exposure.
(2) Includes the notional amount of unfunded legally binding lending commitments net of amounts distributed (i.e., syndicated or participated) to other financial institutions. The distributed amounts were $10.9 billion and $10.5 billion at June 30, 2021 and December 31, 2020.
(3) Industries are viewed from a variety of perspectives to best isolate the perceived risks. For purposes of this table, the real estate industry is defined based on the primary business activity of the borrowers or counterparties using operating cash flows and primary source of repayment as key factors.

Risk Mitigation

We purchase credit protection to cover the funded portion as well as the unfunded portion of certain credit exposures. To lower the cost of obtaining our desired credit protection levels, we may add credit exposure within an industry, borrower or counterparty group by selling protection.

At June 30, 2021 and December 31, 2020, net notional credit default protection purchased in our credit derivatives portfolio to hedge our funded and unfunded exposures for which we elected the fair value option, as well as certain other credit exposures, was $3.6 billion and $4.2 billion. For these same positions, we recorded net losses of $32 million and $68 million for the three and six months ended June 30, 2021 compared to net losses of $231 million and $2 million for the same periods in 2020. The gains and losses on these instruments were offset by gains and losses on the related exposures. The Value-at-Risk (VaR) results for these exposures are included in the fair value option portfolio information in Table 40. For more information, see Trading Risk Management on page 43.

Tables 35 and 36 present the maturity profiles and the credit exposure debt ratings of the net credit default protection portfolio at June 30, 2021 and December 31, 2020.

Table 35 Net Credit Default Protection by Maturity

	June 30 2021	December 31 2020
Less than or equal to one year	47 %	65 %
Greater than one year and less than or equal to five years	51	34
Greater than five years	2	1
Total net credit default protection	**100 %**	100 %

Table 36 Net Credit Default Protection by Credit Exposure Debt Rating

(Dollars in millions)	Net Notional [1] June 30, 2021	Percent of Total June 30, 2021	Net Notional [1] December 31, 2020	Percent of Total December 31, 2020
Ratings [2, 3]

[2] Ratings are refreshed on a quarterly basis.
[3] Ratings of BBB- or higher are considered to meet the definition of investment grade.
[4] NR is comprised of index positions held and any names that have not been rated.

For more information on credit derivatives and counterparty credit risk valuation adjustments, see *Note 3 – Derivatives* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.

Non-U.S. Portfolio

Our non-U.S. credit and trading portfolios are subject to country risk. We define country risk as the risk of loss from unfavorable economic and political conditions, currency fluctuations, social instability and changes in government policies. A risk management framework is in place to measure, monitor and manage non-U.S. risk and exposures. In addition to the direct risk of doing business in a country, we also are exposed to indirect country risks (e.g., related to the collateral received on secured financing transactions or related to client clearing activities). These indirect exposures are managed in the normal course of business through credit, market and operational risk governance rather than through country risk governance. For more information on our non-U.S. credit and trading portfolios, see Non-U.S. Portfolio in the MD&A of the Corporation's 2020 Annual Report on Form 10-K.

Table 37 presents our 20 largest non-U.S. country exposures at June 30, 2021. These exposures accounted for 91 percent and 90 percent of our total non-U.S. exposure at June 30, 2021 and December 31, 2020. Net country exposure for these 20 countries increased $37.9 billion in the six months ended June 30, 2021. The majority of the increase was due to higher deposits with central banks in Japan, Switzerland and Ireland, increased exposure with central clearing counterparts in the U.K. and increased corporate exposure in Canada.

Table 37 Top 20 Non-U.S. Countries Exposure

(Dollars in millions)	Funded Loans and Loan Equivalents	Unfunded Loan Commitments	Net Counterparty Exposure	Securities/ Other Investments	Country Exposure at June 30 2021	Hedges and Credit Default Protection	**Net Country Exposure at June 30 2021**	Increase (Decrease) from December 31 2020

India	5,559	174	450	2,448	8,631	(163)	**8,468**	657
Ireland	5,830	2,184	94	260	8,368	(24)	**8,344**	4,179
South Korea	5,313	873	521	1,655	8,362	(124)	**8,238**	(313)
Spain	2,648	2,995	277	1,072	6,992	(271)	**6,721**	1,905
Hong Kong	4,708	235	388	1,161	6,492	(59)	**6,433**	(104)
Mexico	3,715	1,682	172	802	6,371	(285)	**6,086**	(201)
Italy	2,508	1,540	544	2,120	6,712	(629)	**6,083**	391
Belgium	2,725	1,454	299	282	4,760	(204)	**4,556**	(411)
United Arab Emirates	2,414	116	46	306	2,882	(12)	**2,870**	183
Total top 20 non-U.S. countries exposure	$ 179,598	$ 78,514	$ 22,764	$ 42,518	$ 323,394	$ (7,528)	**$ 315,866**	$ 37,896

Our largest non-U.S. country exposure at June 30, 2021 was the U.K. with net exposure of $64.9 billion, which represents a $5.4 billion increase from December 31, 2020. Our second largest non-U.S. country exposure was Germany with net exposure of $40.6 billion at June 30, 2021, a $4.3 billion decrease from December 31, 2020.

In light of the global pandemic, we are monitoring our non-U.S. exposure closely, particularly in countries where restrictions on certain activities, in an attempt to contain the spread and impact of the virus, have affected and will likely continue to adversely affect economic activity. We are managing the impact to our international business operations as part of our overall response framework and are taking actions to manage exposure carefully in impacted regions while supporting the needs of our clients. While vaccines have become more widely available in certain countries, the magnitude and duration of the pandemic and its full impact on the global economy continue to be highly uncertain. The impact of the pandemic could have an adverse impact on the global economy for a prolonged period of time. For more information on the pandemic, see Item 1A. Risk Factors – Coronavirus Disease and Executive Summary – Recent Developments – COVID-19 Pandemic of the Corporation’s 2020 Annual Report on Form 10-K.

Allowance for Credit Losses

The allowance for credit losses decreased by $4.9 billion from December 31, 2020 to $15.8 billion at June 30, 2021, which included a $2.2 billion reserve decrease related to the commercial portfolio and a $2.7 billion reserve decrease related to the consumer portfolio. The decreases were primarily driven by an improved macroeconomic outlook.

Table 38 presents an allocation of the allowance for credit losses by product type for June 30, 2021 and December 31, 2020.

Table 38 Allocation of the Allowance for Credit Losses by Product Type

(Dollars in millions)	Amount	Percent of Total	Percent of Loans and Leases Outstanding [(1)]	Amount	Percent of Total	Percent of Loans and Leases Outstanding [(1)]
	June 30, 2021			December 31, 2020		
Allowance for loan and lease losses						
Residential mortgage	**$ 394**	**2.80 %**	**0.18 %**	$ 459	2.44 %	0.21 %
Home equity	**203**	**1.44**	**0.67**	399	2.12	1.16
Credit card	**6,234**	**44.22**	**8.25**	8,420	44.79	10.70
Direct/Indirect consumer	**555**	**3.93**	**0.57**	752	4.00	0.82
Other consumer	**46**	**0.33**	**n/m**	41	0.22	n/m
Total consumer	**7,432**	**52.72**	**1.78**	10,071	53.57	2.35
U.S. commercial [(2)]	**3,529**	**25.04**	**1.10**	5,043	26.82	1.55
Non-U.S. commercial	**1,091**	**7.74**	**1.11**	1,241	6.60	1.37
Commercial real estate	**1,956**	**13.88**	**3.28**	2,285	12.15	3.79
Commercial lease financing	**87**	**0.62**	**0.55**	162	0.86	0.95
Total commercial	**6,663**	**47.28**	**1.35**	8,731	46.43	1.77
Allowance for loan and lease losses	**14,095**	**100.00 %**	**1.55**	18,802	100.00 %	2.04
Reserve for unfunded lending commitments	**1,687**			1,878		
Allowance for credit losses	**$ 15,782**			$ 20,680		

(1) Ratios are calculated as allowance for loan and lease losses as a percentage of loans and leases outstanding excluding loans accounted for under the fair value option.
(2) Includes allowance for loan and lease losses for U.S. small business commercial loans of $1.4 billion and $1.5 billion at June 30, 2021 and December 31, 2020.
n/m = not meaningful

Net charge-offs for the three and six months ended June 30, 2021 were $595 million and $1.4 billion compared to $1.1 billion and $2.3 billion for the same periods in 2020 driven by decreases across most products. The provision for credit losses decreased $6.7 billion to a $1.6 billion benefit, and $13.4 billion to a $3.5 billion benefit, for the three and six months ended June 30, 2021 compared to the same periods in 2020. The allowance for credit losses had a reserve release of $4.9 billion for the six months ended June 30, 2021, primarily driven by an improved macroeconomic outlook. The provision for credit losses for the consumer portfolio, including unfunded lending commitments, decreased $3.3 billion to a $707 million benefit and $6.2 billion to a $1.5 billion benefit for the three and six months ended June 30, 2021 compared to the same periods in 2020. The provision for credit losses for the commercial portfolio, including unfunded lending commitments, decreased $3.4 billion to a $914 million benefit and $7.2 billion to a $2.0 billion benefit for the three and six months ended June 30, 2021 compared to the same periods in 2020.

Table 39 presents a rollforward of the allowance for credit losses, including certain loan and allowance ratios for the three and six months ended June 30, 2021 and 2020. For more information on the Corporation’s credit loss accounting policies and activity related to the allowance for credit losses, see *Note 1 – Summary of Significant Accounting Principles* of the Corporation's 2020 Annual Report on Form 10-K and *Note 5 – Outstanding Loans and Leases and Allowance for Credit Losses* to the Consolidated Financial Statements.

Table 39 Allowance for Credit Losses

(Dollars in millions)	Three Months Ended June 30 2021	Three Months Ended June 30 2020	Six Months Ended June 30 2021	Six Months Ended June 30 2020

Ratio of the allowance for loan and lease losses at June 30 to net charge-offs	**5.90**	4.21	**4.93**	4.25
Amounts included in allowance for loan and lease losses for loans and leases that are excluded from nonperforming loans and leases at June 30 [4]	**$ 7,532**	$ 10,517	**$ 7,532**	$ 10,517
Allowance for loan and lease losses as a percentage of total nonperforming loans and leases, excluding the allowance for loan and lease losses for loans and leases that are excluded from nonperforming loans and leases at June 30 [4]	**134 %**	202 %	**134 %**	202 %

(1) Includes U.S. small business commercial charge-offs of $102 million and $203 million for the three and six months ended June 30, 2021 compared to $84 million and $170 million for the same periods in 2020.
(2) Includes U.S. small business commercial recoveries of $20 million and $40 million for the three and six months ended June 30, 2021 compared to $11 million and $22 million for the same periods in 2020.
(3) Ratios are calculated as allowance for loan and lease losses as a percentage of loans and leases outstanding excluding loans accounted for under the fair value option.
(4) Primarily includes amounts related to credit card and unsecured consumer lending portfolios in *Consumer Banking*.

Market Risk Management

For more information on our market risk management process, see Market Risk Management in the MD&A of the Corporation's 2020 Annual Report on Form 10-K.

Market risk is the risk that changes in market conditions may adversely impact the value of assets or liabilities, or otherwise negatively impact earnings. This risk is inherent in the financial instruments associated with our operations, primarily within our *Global Markets* segment. We are also exposed to these risks in other areas of the Corporation (e.g., our ALM activities). In the event of market stress, these risks could have a material impact on our results.

We have been affected, and may continue to be affected, by market stress resulting from the pandemic that began in the first quarter of 2020. For more information, see Executive Summary – Recent Developments – COVID-19 Pandemic on page 3 and Item 1A. Risk Factors – Coronavirus Disease of the Corporation's 2020 Annual Report on Form 10-K.

Trading Risk Management

To evaluate risks in our trading activities, we focus on the actual and potential volatility of revenues generated by individual positions as well as portfolios of positions. VaR is a common statistic used to measure market risk. Our primary VaR statistic is equivalent to a 99 percent confidence level, which means that for a VaR with a one-day holding period, there should not be losses in excess of VaR, on average, 99 out of 100 trading days.

Table 40 presents the total market-based portfolio VaR, which is the combination of the total covered positions (and less liquid trading positions) portfolio and the fair value option portfolio. For more information on the market risk VaR for trading activities, see Trading Risk Management in the MD&A of the Corporation's 2020 Annual Report on Form 10-K.

The total market-based portfolio VaR results in Table 40 include market risk to which we are exposed from all business segments, excluding credit valuation adjustment (CVA), DVA and related hedges. The majority of this portfolio is within the *Global Markets* segment.

Table 40 presents period-end, average, high and low daily trading VaR for the three months ended June 30, 2021, March 31, 2021 and June 30, 2020 using a 99 percent confidence level, as well as average daily trading VaR for the six months ended June 30, 2021 and 2020. The amounts disclosed in Table 40 and Table 41 align to the view of covered positions used in the Basel 3 capital calculations. Foreign exchange and commodity positions are always considered covered positions, regardless of trading or banking treatment for the trade, except for structural foreign currency positions that are excluded with prior regulatory approval.

The average of total covered positions and less liquid trading positions portfolio VaR increased for the three months ended June 30, 2021 compared to the prior quarter primarily due to an increase in interest rate risk, partially offset by an increased diversification benefit between asset classes.

Table 40 Market Risk VaR for Trading Activities

	Three Months Ended												Six Months Ended June 30	
	June 30, 2021				March 31, 2021				June 30, 2020					
(Dollars in millions)	Period End	Average	High (1)	Low (1)	Period End	Average	High (1)	Low (1)	Period End	Average	High (1)	Low (1)	2021 Average	2020 Average

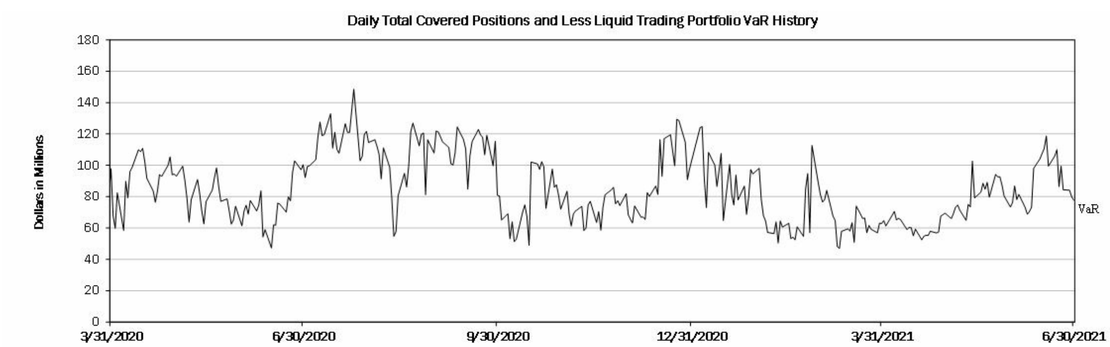
Total fair value option portfolio	30	29	31	24	30	45	53	30	35	51	86	34	37	34
Portfolio diversification	(14)	(9)	—	—	(19)	(1)	—	—	(16)	(12)	—	—	(5)	(12)
Total market-based portfolio	$ 94	$ 97	146	64	$ 74	$ 118	169	62	$ 119	$ 120	159	76	$ 108	$ 87

(1) The high and low for each portfolio may have occurred on different trading days than the high and low for the components. Therefore the impact from less liquid exposures and the amount of portfolio diversification, which is the difference between the total portfolio and the sum of the individual components, is not relevant.

The graph below presents the daily covered positions and less liquid trading positions portfolio VaR for the previous five quarters, corresponding to the data in Table 40.



Additional VaR statistics produced within our single VaR model are provided in Table 41 at the same level of detail as in Table 40. Evaluating VaR with additional statistics allows for an increased understanding of the risks in the portfolio as the historical market data used in the VaR calculation does not necessarily follow a predefined statistical distribution. Table 41 presents average trading VaR statistics at 99 percent and 95 percent confidence levels for the three months ended June 30, 2021, March 31, 2021 and June 30, 2020.

Table 41 Average Market Risk VaR for Trading Activities – 99 percent and 95 percent VaR Statistics

	Three Months Ended

Total market-based portfolio	$ 97	$ 36	$ 118	$ 33	$ 120	$ 25

Backtesting

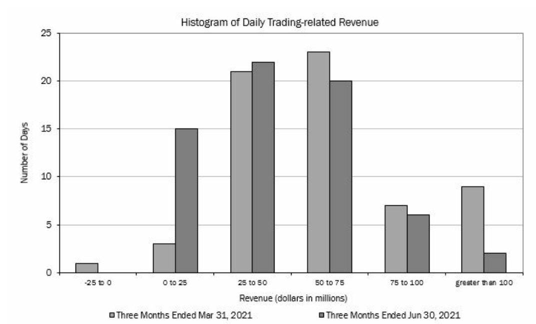
The accuracy of the VaR methodology is evaluated by backtesting, which compares the daily VaR results, utilizing a one-day holding period, against a comparable subset of trading revenue. For more information on our backtesting process, see Trading Risk Management – Backtesting in the MD&A of the Corporation's 2020 Annual Report on Form 10-K.

During the three and six months ended June 30, 2021, there were no days where this subset of trading revenue had losses that exceeded our total covered portfolio VaR, utilizing a one-day holding period.

Total Trading-related Revenue

Total trading-related revenue, excluding brokerage fees, and CVA, DVA and funding valuation adjustment gains (losses), represents the total amount earned from trading positions, including market-based net interest income, which are taken in a diverse range of financial instruments and markets. For more information, see Trading Risk Management – Total Trading-related Revenue in the MD&A of the Corporation's 2020 Annual Report on Form 10-K.

The following histogram is a graphic depiction of trading volatility and illustrates the daily level of trading-related revenue for the three months ended June 30, 2021 compared to the three months ended March 31, 2021. During the three months ended June 30, 2021, positive trading-related revenue was recorded for 100 percent of the trading days, of which 77 percent were daily trading gains of over $25 million. This compares to the three months ended March 31, 2021 where positive trading-related revenue was recorded for 98 percent of the trading days, of which 94 percent were daily trading gains of over $25 million.



Trading Portfolio Stress Testing

Because the very nature of a VaR model suggests results can exceed our estimates and it is dependent on a limited historical window, we also stress test our portfolio using scenario analysis. This analysis estimates the change in the value of our trading portfolio that may result from abnormal market movements. For more information, see Trading Risk Management – Trading Portfolio Stress Testing in the MD&A of the Corporation's 2020 Annual Report on Form 10-K.

Interest Rate Risk Management for the Banking Book

The following discussion presents net interest income for banking book activities. For more information, see Interest Rate Risk Management for the Banking Book in the MD&A of the Corporation's 2020 Annual Report on Form 10-K.

Table 42 presents the spot and 12-month forward rates used in our baseline forecasts at June 30, 2021 and December 31, 2020.

Table 42 Forward Rates

	June 30, 2021		
	Federal Funds	**Three-month LIBOR**	**10-Year Swap**
Spot rates	**0.25 %**	**0.15 %**	**1.44 %**
12-month forward rates	**0.25**	**0.27**	**1.65**
	December 31, 2020		
Spot rates	0.25 %	0.24 %	0.93 %
12-month forward rates	0.25	0.19	1.06

Table 43 shows the pretax impact to forecasted net interest income over the next 12 months from June 30, 2021 and December 31, 2020 resulting from instantaneous parallel and non-parallel shocks to the market-based forward curve. Periodically we evaluate the scenarios presented so that they are meaningful in the context of the current rate environment. The interest rate scenarios also assume U.S. dollar rates are floored at zero.

During the six months ended June 30, 2021, the decrease in asset sensitivity of our balance sheet to Up-rate and Down-rate scenarios was primarily due to ALM activity and an increase in long-end rates. We continue to be asset sensitive to a parallel upward move in interest rates with the majority of that impact coming from the short end of the yield curve. Additionally, higher interest rates impact the fair value of debt securities and, accordingly, for debt securities classified as AFS, may adversely affect accumulated OCI and thus capital levels under the Basel 3 capital rules. Under instantaneous upward parallel shifts, the near-term adverse impact to Basel 3 capital is reduced over time by offsetting positive impacts to net interest income. For more information on Basel 3, see Capital Management – Regulatory Capital on page 22.

Table 43 Estimated Banking Book Net Interest Income Sensitivity to Curve Changes

(Dollars in millions)	Short Rate (bps)	Long Rate (bps)	June 30 2021	December 31 2020
Parallel Shifts				
+100 bps instantaneous shift	+100	+100	**$ 8,035**	$ 10,468
-25 bps instantaneous shift	-25	-25	**(2,255)**	(2,766)
Flatteners				
Short-end instantaneous change	+100	—	**5,556**	6,321
Long-end instantaneous change	—	-25	**(1,219)**	(1,686)
Steepeners				
Short-end instantaneous change	-25	—	**(1,014)**	(1,084)
Long-end instantaneous change	—	+100	**2,651**	4,333

The sensitivity analysis in Table 43 assumes that we take no action in response to these rate shocks and does not assume any change in other macroeconomic variables normally correlated with changes in interest rates. As part of our ALM activities, we use securities, certain residential mortgages, and interest rate and foreign exchange derivatives in managing interest rate sensitivity.

The behavior of our deposits portfolio in the baseline forecast and in alternate interest rate scenarios is a key assumption in our projected estimates of net interest income. The sensitivity analysis in Table 43 assumes no change in deposit portfolio size or mix from the baseline forecast in alternate rate environments. In higher rate scenarios, any customer activity resulting in the replacement of low-cost or non-interest-bearing deposits with higher yielding deposits or market-based funding would reduce our benefit in those scenarios.

Interest Rate and Foreign Exchange Derivative Contracts

We use interest rate and foreign exchange derivative contracts in our ALM activities to manage our interest rate and foreign exchange risks. Specifically, we use those derivatives to manage both the variability in cash flows and changes in fair value of various assets and liabilities arising from those risks. Our interest rate derivative contracts are generally non-leveraged swaps tied to various benchmark interest rates and foreign exchange basis swaps, options, futures and forwards, and our foreign exchange contracts include cross-currency interest rate swaps, foreign currency futures contracts, foreign currency forward contracts and options.

The derivatives used in our ALM activities can be split into two broad categories: designated accounting hedges and other risk management derivatives. Designated accounting hedges are primarily used to manage our exposure to interest rates as described in the Interest Rate Risk Management for the Banking Book section and are included in the sensitivities presented in Table 43. The Corporation also uses foreign currency derivatives in accounting hedges to manage substantially all of the foreign exchange risk of our foreign operations. By hedging the foreign exchange risk of our foreign operations, the Corporation's market risk exposure in this area is insignificant.

Risk management derivatives are predominantly used to hedge foreign exchange risks related to various foreign currency-denominated assets and liabilities and eliminate substantially all foreign currency exposures in the cash flows of the Corporation's non-trading foreign currency-denominated financial instruments. These foreign exchange derivatives are sensitive to other market risk exposures such as cross-currency basis spreads and interest rate risk. However, as these features are not a significant component of these foreign exchange derivatives, the market risk related to this exposure is insignificant. For more information on the accounting for derivatives, see *Note 3 – Derivatives* to the Consolidated Financial Statements.

Mortgage Banking Risk Management

We originate, fund and service mortgage loans, which subject us to credit, liquidity and interest rate risks, among others. We determine whether loans will be held for investment or held for sale at the time of commitment and manage credit and liquidity risks by selling or securitizing a portion of the loans we originate.

Changes in interest rates impact the value of interest rate lock commitments (IRLCs) and the related residential first mortgage loans held-for-sale (LHFS), as well as the value of the MSRs. Because the interest rate risks of these hedged items offset, we combine them into one overall hedged item with one combined economic hedge portfolio consisting of derivative contracts and securities. For more information on IRLCs and the related residential mortgage LHFS, see Mortgage Banking Risk Management in the MD&A of the Corporation's 2020 Annual Report on Form 10-K.

During the three and six months ended June 30, 2021, we recorded gains of $9 million and $22 million related to the change in fair value of the MSRs, IRLCs and LHFS, net of gains and losses on the hedge portfolio, compared to gains of $65 million and $228 million for the same periods in 2020. For more information on MSRs, see *Note 14 – Fair Value Measurements* to the Consolidated Financial Statements.

Climate Risk Management

Climate-related risks are divided into two major categories: (1) risks related to the transition to a low-carbon economy, and (2) risks related to the physical impacts of climate change. The financial impacts of transition risk can lead to and amplify credit risk. Physical risk can also lead to increased credit risk by diminishing borrowers' repayment capacity or collateral values. As climate risk is interconnected with all key risk types, we have developed and continue to enhance processes to embed climate risk considerations into our Risk Framework and risk management programs established for strategic, credit, market, liquidity, compliance, operational and reputational risks. For more information on our governance framework and climate risk management process, see the Managing Risk and the Climate Risk Management sections in the MD&A of the Corporation's 2020 Annual Report on Form 10-K. For additional information on climate risk, see Item 1A. Risk Factors – Other of the Corporation's 2020 Annual Report on Form 10-K.

Complex Accounting Estimates

Our significant accounting principles are essential in understanding the MD&A. Many of our significant accounting principles require complex judgments to estimate the values of assets and liabilities. We have procedures and processes in place to facilitate making these judgments. For more information, see Complex Accounting Estimates in the MD&A of the Corporation's 2020 Annual Report on Form 10-K and *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.

Goodwill and Intangible Assets

The nature of and accounting for goodwill and intangible assets are discussed in *Note 7 – Goodwill and Intangible Assets* to the Consolidated Financial Statements herein and *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K. Table 44 presents goodwill recorded on our consolidated balance sheet as of the periods presented.

Table 44 Goodwill by Reporting Unit

(Dollars in millions)	June 30 2021	December 31 2020
Consumer Banking		
Consumer Lending	**$ 11,723**	$ 11,709
Deposits	**18,414**	18,414
Global Wealth and Investment Management		
Private Bank	**2,918**	2,918
Merrill Lynch Global Wealth Management	**6,759**	6,759
Global Banking		
Global Commercial Banking	**16,204**	16,146
Global Corporate and Investment Banking [(1)]	**6,277**	6,277
Business Banking	**1,546**	1,546
Global Markets	**5,182**	5,182
Total	**$ 69,023**	$ 68,951

(1) Prior period has been revised to conform to current-period presentation.

We completed our annual goodwill impairment test as of June 30, 2021 by using a qualitative assessment to determine whether it is more likely than not that the fair value of each reporting unit is less than its respective carrying value. Factors considered in the qualitative assessment include, among other things, macroeconomic conditions, industry and market considerations, financial performance of the respective reporting unit and other relevant entity- and reporting-unit specific considerations. Based on our qualitative assessment, we have concluded that it was not "more likely than not" that the reporting units' fair values were less than their carrying values.

Non-GAAP Reconciliations

Table 45 provides reconciliations of certain non-GAAP financial measures to the most closely related GAAP financial measures.

Table 45 Period-end and Average Supplemental Financial Data and Reconciliations to GAAP Financial Measures [(1)]

	Period-end		Average			
			Three Months Ended June 30		Six Months Ended June 30	
(Dollars in millions)	**June 30 2021**	December 31 2020	**2021**	2020	**2021**	2020

Preferred stock	**(23,441)**	(24,510)	**(23,684)**	(23,427)	**(24,039)**	(23,442)
Tangible common shareholders' equity	**$ 183,378**	$ 178,232	**$ 180,628**	$ 173,088	**$ 180,053**	$ 172,143
Total assets	**$ 3,029,894**	$ 2,819,627				
Goodwill	**(69,023)**	(68,951)				
Intangible assets (excluding MSRs)	**(2,192)**	(2,151)				
Related deferred tax liabilities	**915**	920				
Tangible assets	**$ 2,959,594**	$ 2,749,445				

(1) For more information on non-GAAP financial measures and ratios we use in assessing the results of the Corporation, see Supplemental Financial Data on page 7.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

See Market Risk Management on page 42 in the MD&A and the sections referenced therein for Quantitative and Qualitative Disclosures about Market Risk.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

As of the end of the period covered by this report, the Corporation's management, including the Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness and design of the Corporation's disclosure controls and procedures (as that term is defined in Rule 13a-15(e) of the Exchange Act). Based upon that evaluation, the Corporation's Chief Executive Officer and Chief Financial Officer concluded that the Corporation's disclosure controls and procedures were effective, as of the end of the period covered by this report.

Changes in Internal Control Over Financial Reporting

There have been no changes in the Corporation's internal control over financial reporting (as defined in Rule 13a-15(f) of the Exchange Act) during the three months ended June 30, 2021, that have materially affected, or are reasonably likely to materially affect, the Corporation's internal control over financial reporting.

Consolidated Balance Sheet

(Dollars in millions)	June 30 2021	December 31 2020
Assets		
Cash and due from banks	$ 30,327	$ 36,430
Interest-bearing deposits with the Federal Reserve, non-U.S. central banks and other banks	229,703	344,033
Cash and cash equivalents	260,030	380,463
Time deposits placed and other short-term investments	7,356	6,546
Federal funds sold and securities borrowed or purchased under agreements to resell (includes **$163,344** and $108,856 measured at fair value)	268,594	304,058
Trading account assets (includes **$114,268** and $91,510 pledged as collateral)	291,733	198,854
Derivative assets	41,498	47,179
Debt securities:		
Carried at fair value	288,913	246,601
Held-to-maturity, at cost (fair value – **$650,025** and $448,180)	651,401	438,249
Total debt securities	940,314	684,850
Loans and leases (includes **$6,950** and $6,681 measured at fair value)	918,928	927,861
Allowance for loan and lease losses	(14,095)	(18,802)
Loans and leases, net of allowance	904,833	909,059
Premises and equipment, net	10,747	11,000
Goodwill	69,023	68,951
Loans held-for-sale (includes **$2,207** and $1,585 measured at fair value)	8,277	9,243
Customer and other receivables	67,967	64,221
Other assets (includes **$14,928** and $15,718 measured at fair value)	159,522	135,203
Total assets	**$ 3,029,894**	$ 2,819,627
Liabilities		
Deposits in U.S. offices:		
Noninterest-bearing	$ 719,481	$ 650,674
Interest-bearing (includes **$515** and $481 measured at fair value)	1,076,355	1,038,341
Deposits in non-U.S. offices:		
Noninterest-bearing	25,190	17,698
Interest-bearing	88,116	88,767
Total deposits	1,909,142	1,795,480
Federal funds purchased and securities loaned or sold under agreements to repurchase (includes **$165,781** and $135,391 measured at fair value)	213,787	170,323
Trading account liabilities	110,084	71,320
Derivative liabilities	38,916	45,526
Short-term borrowings (includes **$4,490** and $5,874 measured at fair value)	21,635	19,321
Accrued expenses and other liabilities (includes **$15,174** and $16,311 measured at fair value and **$1,687** and $1,878 of reserve for unfunded lending commitments)	184,607	181,799
Long-term debt (includes **$30,361** and $32,200 measured at fair value)	274,604	262,934
Total liabilities	**2,752,775**	2,546,703
Commitments and contingencies *(Note 6 – Securitizations and Other Variable Interest Entities* and *Note 10 – Commitments and Contingencies)*		
Shareholders' equity		
Preferred stock, $0.01 par value; authorized – **100,000,000** shares; issued and outstanding – **3,887,686** and 3,931,440 shares	23,441	24,510
Common stock and additional paid-in capital, **$0.01** par value; authorized – **12,800,000,000** shares; issued and outstanding – **8,487,151,465** and 8,650,814,105 shares	79,242	85,982
Retained earnings	177,499	164,088
Accumulated other comprehensive income (loss)	(3,063)	(1,656)
Total shareholders' equity	**277,119**	272,924
Total liabilities and shareholders' equity	**$ 3,029,894**	$ 2,819,627
Assets of consolidated variable interest entities included in total assets above (isolated to settle the liabilities of the variable interest entities)		
Trading account assets	$ 4,418	$ 5,225
Loans and leases	16,970	23,636
Allowance for loan and lease losses	(1,047)	(1,693)
Loans and leases, net of allowance	15,923	21,943
All other assets	1,134	1,387
Total assets of consolidated variable interest entities	**$ 21,475**	$ 28,555
Liabilities of consolidated variable interest entities included in total liabilities above		
Short-term borrowings (includes **$37** and $22 of non-recourse short-term borrowings)	$ 324	$ 454
Long-term debt (includes **$5,137** and $7,053 of non-recourse debt)	5,137	7,053
All other liabilities (includes **$15** and $16 of non-recourse liabilities)	15	16
Total liabilities of consolidated variable interest entities	**$ 5,476**	$ 7,523

See accompanying Notes to Consolidated Financial Statements.

Bank of America Corporation and Subsidiaries
Notes to Consolidated Financial Statements

NOTE 1 Summary of Significant Accounting Principles

Bank of America Corporation, a bank holding company and a financial holding company, provides a diverse range of financial services and products throughout the U.S. and in certain international markets. The term "the Corporation" as used herein may refer to Bank of America Corporation, individually, Bank of America Corporation and its subsidiaries, or certain of Bank of America Corporation's subsidiaries or affiliates.

Principles of Consolidation and Basis of Presentation

The Consolidated Financial Statements include the accounts of the Corporation and its majority-owned subsidiaries and those variable interest entities (VIEs) where the Corporation is the primary beneficiary. Intercompany accounts and transactions have been eliminated. Results of operations of acquired companies are included from the dates of acquisition, and for VIEs, from the dates that the Corporation became the primary beneficiary. Assets held in an agency or fiduciary capacity are not included in the Consolidated Financial Statements. The Corporation accounts for investments in companies for which it owns a voting interest and for which it has the ability to exercise significant influence over operating and financing decisions using the equity method of accounting. These investments are included in other assets. Equity method investments are subject to impairment testing, and the Corporation's proportionate share of income or loss is included in other income.

The preparation of the Consolidated Financial Statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect reported amounts and disclosures. Actual results could materially differ from those estimates and assumptions.

These unaudited Consolidated Financial Statements should be read in conjunction with the audited Consolidated Financial Statements, and related notes thereto, of the Corporation's 2020 Annual Report on Form 10-K.

The nature of the Corporation's business is such that the results of any interim period are not necessarily indicative of results for a full year. In the opinion of management, all adjustments, which consist of normal recurring adjustments necessary for a fair statement of the interim period results, have been made. The Corporation evaluates subsequent events through the date of filing with the Securities and Exchange Commission. Certain prior-period amounts have been reclassified to conform to current-period presentation.

U.K. Tax Law Change

On June 10, 2021, the U.K. enacted the 2021 Finance Act, which increases the U.K. corporation income tax rate to 25 percent from 19 percent, effective April 1, 2023. As a result, during the second quarter of 2021, the Corporation recorded a write-up of U.K. net deferred tax assets of approximately $2.0 billion with a corresponding positive income tax adjustment.

NOTE 2 Net Interest Income and Noninterest Income

The following table presents the Corporation's net interest income and noninterest income disaggregated by revenue source for the three and six months ended June 30, 2021 and 2020. For more information, see *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K. For a disaggregation of noninterest income by business segment and *All Other*, see *Note 17 – Business Segment Information*.

[1] Gross interchange fees and merchant income were $2.9 billion and $2.0 billion for the three months ended June 30, 2021 and 2020 and are presented net of $1.7 billion and $1.2 billion of expenses for rewards and partner payments as well as certain other card costs for the same periods. Gross interchange fees and merchant income were $5.4 billion and $4.3 billion for the six months ended June 30, 2021 and 2020 and are presented net of $3.1 billion and $2.7 billion of expenses for rewards and partner payments as well as certain other card costs for the same periods.

NOTE 3 Derivatives

Derivative Balances

Derivatives are entered into on behalf of customers, for trading or to support risk management activities. Derivatives used in risk management activities include derivatives that may or may not be designated in qualifying hedge accounting relationships. Derivatives that are not designated in qualifying hedge accounting relationships are referred to as other risk management derivatives. For more information on the Corporation's derivatives and hedging activities, see *Note 1 – Summary of Significant Accounting Principles and Note 3 – Derivatives* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K. The following tables present derivative instruments included on the Consolidated Balance Sheet in derivative assets and liabilities at June 30, 2021 and December 31, 2020. Balances are presented on a gross basis, prior to the application of counterparty and cash collateral netting. Total derivative assets and liabilities are adjusted on an aggregate basis to take into consideration the effects of legally enforceable master netting agreements and have been reduced by cash collateral received or paid.

[1] Represents the total contract/notional amount of derivative assets and liabilities outstanding.
[2] The net derivative asset and notional amount of written credit derivatives for which the Corporation held purchased credit derivatives with identical underlying referenced names were $2.2 billion and $269.8 billion at December 31, 2020.

Offsetting of Derivatives

The Corporation enters into International Swaps and Derivatives Association, Inc. (ISDA) master netting agreements or similar agreements with substantially all of the Corporation's derivative counterparties. For more information, see *Note 3 – Derivatives* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.

The following table presents derivative instruments included in derivative assets and liabilities on the Consolidated Balance Sheet at June 30, 2021 and December 31, 2020 by primary risk (e.g., interest rate risk) and the platform, where applicable, on which these derivatives are transacted. Balances are presented on a gross basis, prior to the application of counterparty and cash collateral netting. Total gross derivative assets and liabilities are adjusted on an aggregate basis to take into consideration the effects of legally enforceable master netting agreements, which include reducing the balance for counterparty netting and cash collateral received or paid.

For more information on offsetting of securities financing agreements, see *Note 9 – Federal Funds Sold or Purchased, Securities Financing Agreements, Short-term Borrowings and Restricted Cash*.

Total derivative assets/liabilities	**41.5**	**38.9**	47.2	45.5
Less: Financial instruments collateral [3]	**(14.2)**	**(13.3)**	(16.1)	(16.6)
Total net derivative assets/liabilities	**$ 27.3**	**$ 25.6**	$ 31.1	$ 28.9

(1) Over-the-counter derivatives include bilateral transactions between the Corporation and a particular counterparty. Over-the-counter cleared derivatives include bilateral transactions between the Corporation and a counterparty where the transaction is cleared through a clearinghouse. Exchange-traded derivatives include listed options transacted on an exchange.
(2) Consists of derivatives entered into under master netting agreements where the enforceability of these agreements is uncertain under bankruptcy laws in some countries or industries.
(3) Amounts are limited to the derivative asset/liability balance and, accordingly, do not include excess collateral received/pledged. Financial instruments collateral includes securities collateral received or pledged and cash securities held and posted at third-party custodians that are not offset on the Consolidated Balance Sheet but shown as a reduction to derive net derivative assets and liabilities.

Derivatives Designated as Accounting Hedges

The Corporation uses various types of interest rate and foreign exchange derivative contracts to protect against changes in the fair value of its assets and liabilities due to fluctuations in interest rates and exchange rates (fair value hedges). The Corporation also uses these types of contracts to protect against changes in the cash flows of its assets and liabilities, and other forecasted transactions (cash flow hedges). The Corporation hedges its net investment in consolidated non-U.S. operations determined to have functional currencies other than the U.S. dollar using forward exchange contracts and cross-currency basis swaps, and by issuing foreign currency-denominated debt (net investment hedges).

Fair Value Hedges

The table below summarizes information related to fair value hedges for the three and six months ended June 30, 2021 and 2020.

Gains and Losses on Derivatives Designated as Fair Value Hedges

(Dollars in millions)	**Three Months Ended June 30, 2021**		Three Months Ended June 30, 2020	
	Derivative	**Hedged Item**	Derivative	Hedged Item
Interest rate risk on long-term debt [1]	**$ 3,484**	**$ (3,454)**	$ 475	$ (600)
Interest rate and foreign currency risk on long-term debt [2]	**5**	**(5)**	60	(60)
Interest rate risk on available-for-sale securities [3]	**(1,863)**	**1,825**	(361)	356
Total	**$ 1,626**	**$ (1,634)**	$ 174	$ (304)

`

	Six Months Ended June 30, 2021		Six Months Ended June 30, 2020	
	Derivative	**Hedged Item**	Derivative	Hedged Item
Interest rate risk on long-term debt [1]	**$ (4,579)**	**$ 4,548**	$ 10,809	$ (10,876)
Interest rate and foreign currency risk on long-term debt [2]	**(23)**	**21**	565	(551)
Interest rate risk on available-for-sale securities [3]	**3,378**	**(3,325)**	(711)	698
Total	**$ (1,224)**	**$ 1,244**	$ 10,663	$ (10,729)

(1) Amounts are recorded in interest expense in the Consolidated Statement of Income.
(2) For the three and six months ended June 30, 2021, the derivative amount includes gains (losses) of $(7) million and $(51) million in interest expense, $23 million and $31 million in market making and similar activities, and $(1) million and $(3) million in accumulated other comprehensive income (OCI). For the same periods in 2020, the derivative amount includes gains (losses) of $(3) million and $731 million in interest expense, $63 million and $(178) million in market making and similar activities, and $0 and $12 million in accumulated OCI. Line item totals are in the Consolidated Statement of Income and on the Consolidated Balance Sheet.
(3) Amounts are recorded in interest income in the Consolidated Statement of Income.

The table below summarizes the carrying value of hedged assets and liabilities that are designated and qualifying in fair value hedging relationships along with the cumulative amount of fair value hedging adjustments included in the carrying value that have been recorded in the current hedging relationships. These fair value hedging adjustments are open basis adjustments that are not subject to amortization as long as the hedging relationship remains designated.

Designated Fair Value Hedged Assets and Liabilities

	June 30, 2021		December 31, 2020	
(Dollars in millions)	**Carrying Value**	**Cumulative Fair Value Adjustments (1)**	Carrying Value	Cumulative Fair Value Adjustments (1)
Long-term debt (2)	**$ 171,872**	**$ 6,742**	$ 150,556	$ 8,910
Available-for-sale debt securities (2, 3, 4)	**152,348**	**(2,876)**	116,252	114
Trading account assets (5)	**366**	**—**	427	15

(1) Increase (decrease) to carrying value.
(2) At June 30, 2021 and December 31, 2020, the cumulative fair value adjustments remaining on long-term debt and available-for-sale debt securities from discontinued hedging relationships resulted in an increase in the related liability of $10 billion and $3.7 billion and a decrease in the related asset of $68 million and $69 million, which are being amortized over the remaining contractual life of the de-designated hedged items.
(3) These amounts include the amortized cost of the prepayable financial assets used to designate hedging relationships in which the hedged item is the last layer expected to be remaining at the end of the hedging relationship (i.e. last-of-layer hedging relationship). At June 30, 2021 and December 31, 2020, the amortized cost of the closed portfolios used in these hedging relationships was $26.8 billion and $34.6 billion, of which $7.0 billion was designated in the last-of-layer hedging relationship at both dates. At June 30, 2021, the cumulative adjustment associated with these hedging relationships was a decrease of $99 million. At December 31, 2020, the cumulative adjustment was insignificant.
(4) Carrying value represents amortized cost.
(5) Represents hedging activities related to certain commodities inventory.

Cash Flow and Net Investment Hedges

The table below summarizes certain information related to cash flow hedges and net investment hedges for the three and six months ended June 30, 2021 and 2020. Of the $273 million after-tax net loss ($365 million pretax) on derivatives in accumulated OCI at June 30, 2021, gains of $244 million after-tax ($330 million pretax) related to both open and terminated cash flow hedges are expected to be reclassified into earnings in the next 12 months. These net gains reclassified into earnings are expected to primarily increase net interest income related to the respective hedged items. For terminated cash flow hedges, the time period over which the majority of the forecasted transactions are hedged is approximately 3 years, with a maximum length of time for certain forecasted transactions of 15 years.

Gains and Losses on Derivatives Designated as Cash Flow and Net Investment Hedges

	Gains (Losses) Recognized in Accumulated OCI on Derivatives	**Gains (Losses) in Income Reclassified from Accumulated OCI**	**Gains (Losses) Recognized in Accumulated OCI on Derivatives**	**Gains (Losses) in Income Reclassified from Accumulated OCI**
(Dollars in millions, amounts pretax)	**Three Months Ended June 30, 2021**		**Six Months Ended June 30, 2021**	
Cash flow hedges				
Interest rate risk on variable-rate assets (1)	**$ 481**	**$ 36**	**$ (576)**	**$ 73**
Price risk on forecasted MBS purchases (1)	**92**	**6**	**(301)**	**15**
Price risk on certain compensation plans (2)	**35**	**14**	**59**	**26**
Total	**$ 608**	**$ 56**	**$ (818)**	**$ 114**
Net investment hedges				
Foreign exchange risk (3)	**$ (224)**	**$ —**	**$ 503**	**$ —**
	Three Months Ended June 30, 2020		Six Months Ended June 30, 2020	
Cash flow hedges				
Interest rate risk on variable-rate assets (1)	$ 320	$ (23)	$ 911	$ (49)
Price risk on certain compensation plans (2)	73	—	(9)	—
Total	$ 393	$ (23)	$ 902	$ (49)
Net investment hedges				
Foreign exchange risk (3)	$ (400)	$ 1	$ 968	$ 1

(1) Amounts reclassified from accumulated OCI are recorded in interest income in the Consolidated Statement of Income.
(2) Amounts reclassified from accumulated OCI are recorded in compensation and benefits expense in the Consolidated Statement of Income.
(3) Amounts reclassified from accumulated OCI are recorded in other income in the Consolidated Statement of Income. For the three and six months ended June 30, 2021, amounts excluded from effectiveness testing and recognized in market making and similar activities were losses of $48 million and $50 million. For the same periods in 2020 amounts excluded from effectiveness testing and recognized in other income were gains of $75 million and $105 million.

Other Risk Management Derivatives

Other risk management derivatives are used by the Corporation to reduce certain risk exposures by economically hedging various assets and liabilities.The table below presents gains (losses) on these derivatives for the three and six months ended June 30, 2021 and 2020. These gains (losses) are largely offset by the income or expense recorded on the hedged item.

Gains and Losses on Other Risk Management Derivatives

	Three Months Ended June 30		Six Months Ended June 30	
(Dollars in millions)	**2021**	2020	**2021**	2020
Interest rate risk on mortgage activities [1, 2]	**$ 85**	$ 62	**$ (105)**	$ 441
Credit risk on loans [2]	**(14)**	(66)	**(31)**	22
Interest rate and foreign currency risk on asset and liability management activities [3]	**(318)**	(1,017)	**943**	511
Price risk on certain compensation plans [4]	**318**	603	**598**	(154)

(1) Primarily related to hedges of interest rate risk on mortgage servicing rights (MSRs) and interest rate lock commitments (IRLCs) to originate mortgage loans that will be held for sale. The net gains on IRLCs, which are not included in the table but are considered derivative instruments, were $27 million and $46 million for the three and six months ended June 30, 2021 compared to $19 million and $87 million for the same periods in 2020.
(2) Gains (losses) on these derivatives are recorded in other income.
(3) Gains (losses) on these derivatives are recorded in market making and similar activities.
(4) Gains (losses) on these derivatives are recorded in compensation and benefits expense.

Transfers of Financial Assets with Risk Retained through Derivatives

The Corporation enters into certain transactions involving the transfer of financial assets that are accounted for as sales where substantially all of the economic exposure to the transferred financial assets is retained through derivatives (e.g., interest rate and/or credit), but the Corporation does not retain control over the assets transferred. At June 30, 2021 and December 31, 2020, the Corporation had transferred $4.9 billion and $5.2 billion of non-U.S. government-guaranteed mortgage-backed securities (MBS) to a third-party trust and retained economic exposure to the transferred assets through derivative contracts. In connection with these transfers, the Corporation received gross cash proceeds of $5.0 billion and $5.2 billion at the transfer dates. At June 30, 2021 and December 31, 2020, the fair value of the transferred securities was $5.3 billion and $5.5 billion.

Sales and Trading Revenue

The Corporation enters into trading derivatives to facilitate client transactions and to manage risk exposures arising from trading account assets and liabilities. It is the Corporation's policy to include these derivative instruments in its trading activities, which include derivatives and non-derivative cash instruments. The resulting risk from these derivatives is managed on a portfolio basis as part of the Corporation's *Global Markets* business segment. For more information on sales and trading revenue, see *Note 3 – Derivatives* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.

The table below, which includes both derivatives and non-derivative cash instruments, identifies the amounts in the respective income statement line items attributable to the Corporation's sales and trading revenue in *Global Markets*, categorized by primary risk, for the three and six months ended June 30, 2021 and 2020. This table includes debit valuation adjustment (DVA) and funding valuation adjustment (FVA) gains (losses). *Global Markets* results in *Note 17 – Business Segment Information* are presented on a fully taxable-equivalent (FTE) basis. The table below is not presented on an FTE basis.

Sales and Trading Revenue

(Dollars in millions)	Market making and similar activities	Net Interest Income	Other [1]	Total	Market making and similar activities	Net Interest Income	Other [1]	Total
	Three Months Ended June 30, 2021				**Six Months Ended June 30, 2021**

(1) Represents amounts in investment and brokerage services and other income that are recorded in *Global Markets* and included in the definition of sales and trading revenue. Includes investment and brokerage services revenue of $462 million and $1.0 billion for the three and six months ended June 30, 2021 compared to $470 million and $1.0 billion for the same periods in 2020.
(2) Includes commodity risk.

Credit Derivatives

The Corporation enters into credit derivatives primarily to facilitate client transactions and to manage credit risk exposures. Credit derivatives are classified as investment and non-investment grade based on the credit quality of the underlying referenced obligation. The Corporation considers ratings of BBB- or higher as investment grade. Non-investment grade includes non-rated credit derivative instruments. The Corporation discloses internal categorizations of investment grade and non-investment grade consistent with how risk is managed for these instruments. For more information on credit derivatives, see *Note 3 – Derivatives* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.

Credit derivative instruments where the Corporation is the seller of credit protection and their expiration at June 30, 2021 and December 31, 2020 are summarized in the table below.

Credit Derivative Instruments

(Dollars in millions)	Less than One Year	One to Three Years	Three to Five Years	Over Five Years	Total

Total credit derivatives	$ 114,227	$ 105,926	$ 123,300	$ 26,679	$ 370,132

The notional amount represents the maximum amount payable by the Corporation for most credit derivatives. However, the Corporation does not monitor its exposure to credit derivatives based solely on the notional amount because this measure does not take into consideration the probability of occurrence. As such, the notional amount is not a reliable indicator of the Corporation's exposure to these contracts. Instead, a risk framework is used to define risk tolerances and establish limits so that certain credit risk-related losses occur within acceptable, predefined limits.

Credit-related notes in the table above include investments in securities issued by collateralized debt obligation (CDO), collateralized loan obligation (CLO) and credit-linked note vehicles. These instruments are primarily classified as trading securities. The carrying value of these instruments equals the Corporation's maximum exposure to loss. The Corporation is not obligated to make any payments to the entities under the terms of the securities owned.

Credit-related Contingent Features and Collateral

Certain of the Corporation's derivative contracts contain credit risk-related contingent features, primarily in the form of ISDA master netting agreements and credit support documentation that enhance the creditworthiness of these instruments compared to other obligations of the respective counterparty with whom the Corporation has transacted. These contingent features may be for the benefit of the Corporation as well as its counterparties with respect to changes in the Corporation's creditworthiness and the mark-to-market exposure under the derivative transactions. At June 30, 2021 and December 31, 2020, the Corporation held cash and securities collateral of $85.8 billion and $96.5 billion and posted cash and securities collateral of $76.9 billion and $88.6 billion in the normal course of business under derivative agreements, excluding cross-product margining agreements where clients are permitted to margin on a net basis for both derivative and secured financing arrangements.

In connection with certain over-the-counter derivative contracts and other trading agreements, the Corporation can be required to provide additional collateral or to terminate transactions with certain counterparties in the event of a downgrade of the senior debt ratings of the Corporation or certain subsidiaries. The amount of additional collateral required depends on the contract and is usually a fixed incremental amount and/or the market value of the exposure. For more information on credit-related contingent features and collateral, see *Note 3 – Derivatives* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.

At June 30, 2021, the amount of collateral, calculated based on the terms of the contracts, that the Corporation and certain subsidiaries could be required to post to counterparties but had not yet posted to counterparties was $2.6 billion, including $1.4 billion for Bank of America, National Association.

Some counterparties are currently able to unilaterally terminate certain contracts, or the Corporation or certain subsidiaries may be required to take other action such as find a suitable replacement or obtain a guarantee. At June 30, 2021 and December 31, 2020, the liability recorded for these derivative contracts was not significant.

The table below presents the amount of additional collateral that would have been contractually required by derivative contracts and other trading agreements at June 30, 2021 if the rating agencies had downgraded their long-term senior debt ratings for the Corporation or certain subsidiaries by one incremental notch and by an additional second incremental notch. The table also presents derivative liabilities that would be subject to unilateral termination by counterparties upon downgrade of the Corporation's or certain subsidiaries' long-term senior debt ratings.

Additional Collateral Required to be Posted and Derivative Liabilities Subject to Unilateral Termination Upon Downgrade at June 30, 2021

(Dollars in millions)	One incremental notch	Second incremental notch
Additional collateral required to be posted upon downgrade		
Bank of America Corporation	$ 318	$ 786
Bank of America, N.A. and subsidiaries (1)	69	589
Derivative liabilities subject to unilateral termination upon downgrade		
Derivative liabilities	$ 26	$ 480
Collateral posted	11	313

(1) Included in Bank of America Corporation collateral requirements in this table.

Valuation Adjustments on Derivatives

The table below presents credit valuation adjustment (CVA), DVA and FVA gains (losses) on derivatives (excluding the effect of any related hedge activities), which are recorded in market making and similar activities, for the three and six months ended June 30, 2021 and 2020. For more information on the valuation adjustments on derivatives, see *Note 3 – Derivatives* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.

Valuation Adjustments Gains (Losses) on Derivatives (1)

	Three Months Ended June 30	
(Dollars in millions)	**2021**	2020
Derivative assets (CVA)	**$ 3**	$ 276
Derivative assets/liabilities (FVA)	**(33)**	69
Derivative liabilities (DVA)	**(31)**	(256)

	Six Months Ended June 30	
(Dollars in millions)	**2021**	2020
Derivative assets (CVA)	**$ 158**	$ (508)
Derivative assets/liabilities (FVA)	**15**	(87)
Derivative liabilities (DVA)	**(8)**	158

(1) At June 30, 2021 and December 31, 2020, cumulative CVA reduced the derivative assets balance by $488 million and $646 million, cumulative FVA reduced the net derivatives balance by $162 million and $177 million, and cumulative DVA reduced the derivative liabilities balance by $301 million and $309 million.

NOTE 4 Securities

The table below presents the amortized cost, gross unrealized gains and losses, and fair value of available-for-sale (AFS) debt securities, other debt securities carried at fair value and held-to-maturity (HTM) debt securities at June 30, 2021 and December 31, 2020.

Debt Securities

(Dollars in millions)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value

Agency mortgage-backed securities	414,289	9,768	(36)	424,021
U.S. Treasury and agency securities	16,084	—	(71)	16,013
Other taxable securities	7,906	327	(87)	8,146
Total held-to-maturity debt securities	438,279	10,095	(194)	448,180
Total debt securities [3, 4]	$ 678,237	$ 16,908	$ (364)	$ 694,781

(1) At both June 30, 2021 and December 31, 2020, the underlying collateral type included approximately 37 percent prime, two percent Alt-A and 61 percent subprime.
(2) Primarily includes non-U.S. securities used to satisfy certain international regulatory requirements. Any changes in value are reported in market making and similar activities. For detail on the components, see *Note 14 – Fair Value Measurements*.
(3) Includes securities pledged as collateral of $82.8 billion and $65.5 billion at June 30, 2021 and December 31, 2020.
(4) The Corporation held debt securities from Fannie Mae (FNMA) and Freddie Mac (FHLMC) that each exceeded 10 percent of shareholders' equity, with an amortized cost of $338.3 billion and $197.8 billion, and a fair value of $339.7 billion and $197.3 billion at June 30, 2021, and an amortized cost of $260.1 billion and $118.1 billion, and a fair value of $267.5 billion and $120.7 billion at December 31, 2020.

At June 30, 2021, the accumulated net unrealized gain on AFS debt securities, excluding the amount related to debt securities previously transferred to held to maturity, included in accumulated OCI was $3.5 billion, net of the related income tax expense of $1.2 billion. The Corporation had nonperforming AFS debt securities of $19 million and $20 million at June 30, 2021 and December 31, 2020.

At June 30, 2021 and December 31, 2020, the Corporation had $241.4 billion and $200.0 billion in AFS debt securities, which were primarily U.S. agency and U.S. Treasury securities that have a zero credit loss assumption. For the remaining $36.8 billion and $34.5 billion in AFS debt securities at June 30, 2021 and December 31, 2020, the amount of expected credit losses was insignificant. Substantially all of the

Corporation's HTM debt securities consist of U.S. agency and U.S. Treasury securities and have a zero credit loss assumption.

At June 30, 2021 and December 31, 2020, the Corporation held equity securities at an aggregate fair value of $616 million and $769 million and other equity securities, as valued under the measurement alternative, at a carrying value of $270 million and $240 million, both of which are included in other assets. At June 30, 2021 and December 31, 2020, the Corporation also held money market investments at a fair value of $1.5 billion and $1.6 billion, which are included in time deposits placed and other short-term investments.

In the three months ended June 30, 2021, sales of AFS securities were not significant. In the six months ended June 30, 2021, the Corporation recorded gross realized gains on the sales of AFS debt securities of $15 million and gross realized losses of $15 million. For the same periods in 2020, the Corporation recorded gross realized gains of $63 million and $379 million and gross realized losses of $1 million and $2 million, resulting in net gains of $62 million and $377 million, with $15 million and $94 million of income taxes attributable to the realized net gains on sales of these AFS debt securities.

The table below presents the fair value and the associated gross unrealized losses on AFS debt securities and whether these securities have had gross unrealized losses for less than 12 months or for 12 months or longer at June 30, 2021 and December 31, 2020.

Total AFS Debt Securities in a Continuous Unrealized Loss Position

(1) Consumer real estate loans 30-59 days past due includes fully-insured loans of $213 million and nonperforming loans of $157 million. Consumer real estate loans 60-89 days past due includes fully-insured loans of $97 million and nonperforming loans of $129 million. Consumer real estate loans 90 days or more past due includes fully-insured loans of $687 million. Consumer real estate loans current or less than 30 days past due includes $1.5 billion and direct/indirect consumer includes $48 million of nonperforming loans. For information on the Corporation's interest accrual policies and delinquency status for loan modifications related to the pandemic, see *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.

(2) Total outstandings primarily includes auto and specialty lending loans and leases of $46.4 billion, U.S. securities-based lending loans of $46.4 billion and non-U.S. consumer loans of $3.0 billion.

(3) Consumer loans accounted for under the fair value option includes residential mortgage loans of $257 million and home equity loans of $397 million. Commercial loans accounted for under the fair value option includes U.S. commercial loans of $4.4 billion and non-U.S. commercial loans of $1.9 billion. For more information, see *Note 14 – Fair Value Measurements* and *Note 15 – Fair Value Option*.

(4) Total outstandings includes U.S. commercial real estate loans of $55.8 billion and non-U.S. commercial real estate loans of $3.8 billion.

(5) Includes Paycheck Protection Program loans.

(6) Total outstandings includes loans and leases pledged as collateral of $12.8 billion. The Corporation also pledged $153.0 billion of loans with no related outstanding borrowings to secure potential borrowing capacity with the Federal Reserve Bank and Federal Home Loan Bank.

(1) Consumer real estate loans 30-59 days past due includes fully-insured loans of $225 million and nonperforming loans of $126 million. Consumer real estate loans 60-89 days past due includes fully-insured loans of $103 million and nonperforming loans of $95 million. Consumer real estate loans 90 days or more past due includes fully-insured loans of $762 million. Consumer real estate loans current or less than 30 days past due includes $1.2 billion and direct/indirect consumer includes $66 million of nonperforming loans. For information on the Corporation's interest accrual policies and delinquency status for loan modifications related to the pandemic, see *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.
(2) Total outstandings primarily includes auto and specialty lending loans and leases of $46.4 billion, U.S. securities-based lending loans of $41.1 billion and non-U.S. consumer loans of $3.0 billion.
(3) Consumer loans accounted for under the fair value option includes residential mortgage loans of $298 million and home equity loans of $437 million. Commercial loans accounted for under the fair value option includes U.S. commercial loans of $2.9 billion and non-U.S. commercial loans of $3.0 billion. For more information, see *Note 14 – Fair Value Measurements* and *Note 15 – Fair Value Option*.
(4) Total outstandings includes U.S. commercial real estate loans of $57.2 billion and non-U.S. commercial real estate loans of $3.2 billion.
(5) Includes Paycheck Protection Program loans.
(6) Total outstandings includes loans and leases pledged as collateral of $15.5 billion. The Corporation also pledged $153.1 billion of loans with no related outstanding borrowings to secure potential borrowing capacity with the Federal Reserve Bank and Federal Home Loan Bank.

The Corporation has entered into long-term credit protection agreements with FNMA and FHLMC on loans totaling $10.0 billion and $9.0 billion at June 30, 2021 and December 31, 2020, providing full credit protection on residential mortgage loans that become severely delinquent. All of these loans are individually insured, and therefore the Corporation does not record an allowance for credit losses related to these loans.

Nonperforming Loans and Leases

Commercial nonperforming loans decreased to $1.9 billion at June 30, 2021 from $2.2 billion at December 31, 2020. Consumer nonperforming loans increased to $3.0 billion at June 30, 2021 from $2.7 billion at December 31, 2020 driven by consumer real estate deferral activity.

The following table presents the Corporation's nonperforming loans and leases including nonperforming troubled debt restructurings (TDRs), and loans accruing past due 90 days or more at June 30, 2021 and December 31, 2020. Nonperforming loans held-for-sale (LHFS) are excluded from nonperforming loans and leases as they are recorded at either fair value or the lower of cost or fair value. For more information on the criteria for classification as nonperforming, see *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.

(1) For information on the Corporation's interest accrual policies and delinquency status for loan modifications related to the pandemic, see *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.

(2) Residential mortgage loans accruing past due 90 days or more are fully-insured loans. At June 30, 2021 and December 31, 2020 residential mortgage includes $501 million and $537 million of loans on which interest had been curtailed by the Federal Housing Administration (FHA), and therefore were no longer accruing interest, although principal was still insured, and $186 million and $225 million of loans on which interest was still accruing.

(3) Primarily relates to loans for which the estimated fair value of the underlying collateral less any costs to sell is greater than the amortized cost of the loans as of the reporting date.

n/a = not applicable

Credit Quality Indicators

The Corporation monitors credit quality within its Consumer Real Estate, Credit Card and Other Consumer, and Commercial portfolio segments based on primary credit quality indicators. For more information on the portfolio segments, see *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K. Within the Consumer Real Estate portfolio segment, the primary credit quality indicators are refreshed loan-to-value (LTV) and refreshed Fair Isaac Corporation (FICO) score. Refreshed LTV measures the carrying value of the loan as a percentage of the value of the property securing the loan, refreshed quarterly. Home equity loans are evaluated using combined loan-to-value (CLTV), which measures the carrying value of the Corporation's loan and available line of credit combined with any outstanding senior liens against the property as a percentage of the value of the property securing the loan, refreshed quarterly. FICO score measures the creditworthiness of the borrower based on the financial obligations of the borrower and the borrower's credit history. FICO scores are typically refreshed quarterly or more frequently. Certain borrowers (e.g., borrowers that have had debts discharged in a bankruptcy proceeding) may not have their FICO scores updated. FICO scores are also a primary credit quality indicator for the Credit Card and Other Consumer portfolio segment and the business card portfolio within U.S. small business commercial. Within the Commercial portfolio segment, loans are evaluated using the internal classifications of pass rated or reservable criticized as the primary credit quality indicators. The term reservable criticized refers to those commercial loans that are internally classified or listed by the Corporation as Special Mention, Substandard or Doubtful, which are asset quality categories defined by regulatory authorities. These assets have an elevated level of risk and may have a high probability of default or total loss. Pass rated refers to all loans not considered reservable criticized. In addition to these primary credit quality indicators, the Corporation uses other credit quality indicators for certain types of loans.

The following tables present certain credit quality indicators for the Corporation's Consumer Real Estate, Credit Card and Other Consumer, and Commercial portfolio segments by class of financing receivables and year of origination for term loan balances at June 30, 2021, including revolving loans that converted to term loans without an additional credit decision after origination or through a TDR.

(1) Excludes $5.9 billion of loans accounted for under the fair value option at December 31, 2020.
(2) Includes $58 million of loans that converted from revolving to term loans.
(3) Excludes U.S. Small Business Card loans of $6.5 billion. Refreshed FICO scores for this portfolio are $265 million for less than 620; $582 million for greater than or equal to 620 and less than 680; $1.7 billion for greater than or equal to 680 and less than 740; and $3.9 billion greater than or equal to 740.

During the six months ended June 30, 2021, commercial asset quality showed signs of stabilization as economic recovery gained momentum. Commercial reservable criticized utilized exposure decreased to $28.9 billion at June 30, 2021 from $38.7 billion (to 5.45 percent from 7.31 percent of total commercial reservable utilized exposure) at December 31, 2020, which was broad-based across industries.

Troubled Debt Restructurings

The Corporation has been entering into loan modifications with borrowers in response to the pandemic, most of which are not classified as TDRs, and therefore are not included in the following discussion. For more information on the criteria for classifying loans as TDRs, see *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.

Consumer Real Estate

Modifications of consumer real estate loans are classified as TDRs when the borrower is experiencing financial difficulties and a concession has been granted. Concessions may include reductions in interest rates, capitalization of past due amounts, principal and/or interest forbearance, payment extensions, principal and/or interest forgiveness, or combinations thereof. Prior to permanently modifying a loan, the Corporation may enter into trial modifications with certain borrowers under both government and proprietary programs. Trial modifications generally represent a three- to four-month period during which the borrower makes monthly payments under the anticipated modified payment terms. Upon successful completion of the trial period, the Corporation and the borrower enter into a permanent modification. Binding trial modifications are classified as TDRs when the trial offer is made and continue to be classified as TDRs regardless of whether the borrower enters into a permanent modification.

Consumer real estate loans of $343 million that have been discharged in Chapter 7 bankruptcy with no change in repayment terms and not reaffirmed by the borrower were included in TDRs at June 30, 2021, of which $99 million were classified as nonperforming and $61 million were loans fully insured.

Consumer real estate TDRs are measured primarily based on the net present value of the estimated cash flows discounted at the loan's original effective interest rate. If the carrying value of a TDR exceeds this amount, a specific allowance is recorded as a component of the allowance for loan and lease losses. Alternatively, consumer real estate TDRs that are considered to be dependent solely on the collateral for repayment (e.g., due to the lack of income verification) are measured based on the estimated fair value of the collateral, and a charge-off is recorded if the carrying value exceeds the fair value of the collateral. Consumer real estate loans that reach 180 days past due prior to modification are charged off to their net realizable value, less costs to sell, before they are modified as TDRs in accordance with established policy. Subsequent declines in the fair value of the collateral after a loan has reached 180 days past due are recorded as charge-offs. Fully-insured loans are protected against principal loss, and therefore, the Corporation does not record an allowance for loan and lease losses on the outstanding principal balance, even after they have been modified in a TDR.

At June 30, 2021 and December 31, 2020, remaining commitments to lend additional funds to debtors whose terms have been modified in a consumer real estate TDR were not significant. Consumer real estate foreclosed properties totaled $93 million and $123 million at June 30, 2021 and December 31, 2020. The carrying value of consumer real estate loans, including fully-insured loans, for which formal foreclosure proceedings were in process at June 30, 2021 was $1.1 billion. Although the Corporation has continued to pause formal loan foreclosure proceedings and foreclosure sales for occupied properties, during the six months ended June 30, 2021, the Corporation reclassified $20 million of consumer real estate loans completed or which were in process prior to the pause in foreclosures, to foreclosed properties or, for properties acquired upon foreclosure of certain government-guaranteed loans (principally FHA-insured loans), to other assets. The reclassifications represent non-cash investing activities and, accordingly, are not reflected in the Consolidated Statement of Cash Flows.

The table below presents the June 30, 2021 and 2020 unpaid principal balance, carrying value, and average pre- and post-modification interest rates of consumer real estate loans that were modified in TDRs during the three and six months ended June 30, 2021 and 2020. The following Consumer Real Estate portfolio segment tables include loans that were initially classified as TDRs during the period and also loans that had previously been classified as TDRs and were modified again during the period.

[1] Includes loans discharged in Chapter 7 bankruptcy with no change in repayment terms that are classified as TDRs.
[2] Includes trial modification offers to which the customer did not respond.

Credit Card and Other Consumer

The Corporation seeks to assist customers that are experiencing financial difficulty by modifying loans while ensuring compliance with federal and local laws and guidelines. Credit card and other consumer loan modifications generally involve reducing the interest rate on the account, placing the customer on a fixed payment plan not exceeding 60 months and canceling the customer's available line of credit, all of which are considered TDRs. The Corporation makes loan modifications directly with borrowers for debt held only by the Corporation (internal programs). Additionally, the Corporation makes loan modifications for borrowers working with third-party renegotiation agencies that provide solutions to customers' entire unsecured debt structures (external programs). The Corporation classifies other secured consumer loans that have been discharged in Chapter 7 bankruptcy as TDRs, which are written down to collateral value and placed on nonaccrual status no later than the time of discharge.

The table below provides information on the Corporation's Credit Card and Other Consumer TDR portfolio including the June 30, 2021 and 2020 unpaid principal balance, carrying value, and average pre- and post-modification interest rates of loans that were modified in TDRs during the three and six months ended June 30, 2021 and 2020.

[1] Includes accrued interest and fees.

The table below presents the June 30, 2021 and 2020 carrying value for Credit Card and Other Consumer loans that were modified in a TDR during the three and six months ended June 30, 2021 and 2020, by program type.

Credit Card and Other Consumer – TDRs by Program Type

	TDRs Entered into During the Three Months Ended June 30		TDRs Entered into During the Six Months Ended June 30	
(Dollars in millions)	**2021**	2020	**2021**	2020
Internal programs	**$ 57**	$ 43	**$ 121**	$ 109
External programs	**13**	18	**29**	43
Other	**2**	8	**4**	12
Total	**$ 72**	$ 69	**$ 154**	$ 164

Credit card and other consumer loans are deemed to be in payment default during the quarter in which a borrower misses the second of two consecutive payments. Payment defaults are one of the factors considered when projecting future cash flows in the calculation of the allowance for loan and lease losses for credit card and other consumer. Based on historical experience, the Corporation estimates that 11 percent of new credit card TDRs and 20 percent of new direct/indirect consumer TDRs may be in payment default within 12 months after modification.

Commercial Loans

Modifications of loans to commercial borrowers that are experiencing financial difficulty are designed to reduce the Corporation's loss exposure while providing the borrower with an opportunity to work through financial difficulties, often to avoid foreclosure or bankruptcy. Each modification is unique and reflects the individual circumstances of the borrower. Modifications that result in a TDR may include extensions of maturity at a concessionary (below market) rate of interest, payment forbearances or other actions designed to benefit the borrower while mitigating the Corporation's risk exposure. Reductions in interest rates are rare. Instead, the interest rates are typically increased, although the increased rate may not represent a market rate of interest. Infrequently, concessions may also include principal forgiveness in connection with foreclosure, short sale or other settlement agreements leading to termination or sale of the loan.

At the time of restructuring, the loans are remeasured to reflect the impact, if any, on projected cash flows resulting from the modified terms. If a portion of the loan is deemed to be uncollectible, a charge-off may be recorded at the time of restructuring. Alternatively, a charge-off may have already been recorded in a previous period such that no charge-off is required at the time of modification.

During the three and six months ended June 30, 2021, the carrying value of the Corporation's commercial loans that were modified as TDRs was $320 million and $865 million compared to $789 million and $1.3 billion for the same periods in 2020. At June 30, 2021 and December 31, 2020, the Corporation had $1.9 billion and $1.7 billion of commercial TDRs with remaining commitments to lend additional funds to debtors of $343 million and $402 million. The balance of commercial TDRs in payment default was $149 million and $218 million at June 30, 2021 and December 31, 2020.

Loans Held-for-sale

The Corporation had LHFS of $8.3 billion and $9.2 billion at June 30, 2021 and December 31, 2020. Cash and non-cash proceeds from sales and paydowns of loans originally classified as LHFS were $18.2 billion and $11.1 billion for the six months ended June 30, 2021 and 2020. Cash used for originations and purchases of LHFS totaled approximately $17.0 billion and $9.2 billion for the six months ended June 30, 2021 and 2020.

Accrued Interest Receivable

Accrued interest receivable for loans and leases and loans held-for-sale at June 30, 2021 and December 31, 2020 was $2.3 billion and $2.4 billion and is reported in customer and other receivables on the Consolidated Balance Sheet.

Outstanding credit card loan balances include unpaid principal, interest and fees. Credit card loans are not classified as nonperforming but are charged off no later than the end of the month in which the account becomes 180 days past due, within 60 days after receipt of notification of death or bankruptcy, or upon confirmation of fraud. During the three and six months ended June 30, 2021, the Corporation reversed $124 million and $282 million of interest and fee income against the income statement line item in which it was originally recorded upon charge-off of the principal balance of the loan.

For the outstanding residential mortgage, home equity, direct/indirect consumer and commercial loan balances classified as nonperforming during the three and six months ended June 30, 2021, the Corporation reversed $9 million and $17 million of interest and fee income at the time the loans were classified as nonperforming against the income statement line item in which it was originally recorded. For more information on the Corporation's nonperforming loan policies, see *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.

Allowance for Credit Losses

The allowance for credit losses is estimated using quantitative and qualitative methods that consider a variety of factors, such as historical loss experience, the current credit quality of the portfolio and an economic outlook over the life of the loan. Qualitative reserves cover losses that are expected but, in the Corporation's assessment, may not be adequately reflected in the quantitative methods or the economic assumptions. The Corporation incorporates forward-looking information through the use of several macroeconomic scenarios in determining the weighted economic outlook over the forecasted life of the assets. These scenarios include key macroeconomic variables such as gross domestic product, unemployment rate, real estate prices and corporate bond spreads. The scenarios that are chosen each quarter and the weighting given to each scenario depend on a variety of factors including recent economic events, leading economic indicators, internal and third-party economist views, and industry trends. For more information on the Corporation's credit loss accounting policies including the allowance for credit losses, see *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.

The June 30, 2021 estimate for allowance for credit losses was based on various economic outlooks that included consensus estimates, a downside scenario that assumed a significantly longer period until economic recovery, a tail risk scenario similar to the severely adverse scenario used in stress testing, a scenario to account for inflationary risk and higher interest rates and an upside scenario to reflect the continued improvement in the consensus outlooks. The weighted economic outlook assumed that the U.S. unemployment rate at the end of 2021 will be relatively consistent with the level as of June 2021, which was approximately six percent, and continue to decline to slightly above five percent by the end of 2022. Additionally, in this economic outlook, year-over-year U.S. gross domestic product is forecasted to grow at 4.5 percent, 1.9 percent and 2.1 percent in the fourth quarters of 2021, 2022 and 2023, respectively. The allowance for credit losses considered the impact of enacted government stimulus measures and continued to factor in the uncertainty resulting from the unprecedented nature of the current health crisis and risks that may prevent a full economic recovery.

The Corporation also factored into its allowance for credit losses an estimated impact from higher-risk segments that included leveraged loans and industries such as travel and entertainment, which have been adversely impacted by the effects of the pandemic, as well as the energy sector.

The allowance for credit losses at June 30, 2021 was $15.8 billion, a decrease of $4.9 billion compared to December 31, 2020. The decrease in the allowance for credit losses was primarily driven by an improved macroeconomic outlook. The decrease in the allowance for credit losses was comprised of a net decrease of $4.7 billion in the allowance for loan and lease losses and a $191 million decrease in the reserve for unfunded lending commitments. The decrease in the allowance for credit losses was attributed to $291 million in the consumer real estate portfolio, $2.4 billion in the credit card and other consumer portfolio, and $2.2 billion in the commercial portfolio.

Outstanding loans and leases excluding loans accounted for under the fair value option decreased $9.2 billion in the six months ended June 30, 2021, driven by consumer loans, which decreased $10.6 billion primarily due to a decline in consumer real estate due to prepayments in a low rate environment. However, outstanding commercial loans and leases, excluding small business, increased $8.0 billion during the six months ended June 30, 2021, primarily driven by *Global Markets* with most of the increase in investment grade exposures.

The changes in the allowance for credit losses, including net charge-offs and provision for loan and lease losses, are detailed in the following table.

(Dollars in millions)	Consumer Real Estate	Credit Card and Other Consumer	Commercial	Total
	Three Months Ended June 30, 2021

NOTE 6 Securitizations and Other Variable Interest Entities

The Corporation utilizes VIEs in the ordinary course of business to support its own and its customers' financing and investing needs. The tables in this Note present the assets and liabilities of consolidated and unconsolidated VIEs at June 30, 2021 and December 31, 2020 in situations where the Corporation has continuing involvement with transferred assets or if the Corporation otherwise has a variable interest in the VIE. The tables also present the Corporation's maximum loss exposure at June 30, 2021 and December 31, 2020 resulting from its involvement with consolidated and unconsolidated VIEs in which the Corporation holds a variable interest. For more information on the Corporation's use of VIEs and related maximum loss exposure, see *Note 1 – Summary of Significant Accounting Principles* and *Note 6 – Securitizations and Other Variable Interest Entities* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.

The Corporation invests in ABS issued by third-party VIEs with which it has no other form of involvement and enters into certain commercial lending arrangements that may also incorporate the use of VIEs, for example to hold collateral. These securities and loans are included in *Note 4 – Securities* or

Note 5 – Outstanding Loans and Leases and Allowance for Credit Losses. In addition, the Corporation has used VIEs in connection with its funding activities.

The Corporation did not provide financial support to consolidated or unconsolidated VIEs during the six months ended June 30, 2021 or the year ended December 31, 2020 that it was not previously contractually required to provide, nor does it intend to do so.

The Corporation had liquidity commitments, including written put options and collateral value guarantees, with certain unconsolidated VIEs of $968 million and $929 million at June 30, 2021 and December 31, 2020.

First-lien Mortgage Securitizations

As part of its mortgage banking activities, the Corporation securitizes a portion of the first-lien residential mortgage loans it originates or purchases from third parties. Except as described in *Note 10 – Commitments and Contingencies*, the Corporation does not provide guarantees or recourse to the securitization trusts other than standard representations and warranties.

The table below summarizes select information related to first-lien mortgage securitizations for the three and six months ended June 30, 2021 and 2020.

First-lien Mortgage Securitizations

	Residential Mortgage - Agency				Commercial Mortgage			
	Three Months Ended June 30		Six Months Ended June 30		Three Months Ended June 30		Six Months Ended June 30	
(Dollars in millions)	**2021**	2020	**2021**	2020	**2021**	2020	**2021**	2020
Proceeds from loan sales [(1)]	**$ 1,652**	$ 11,375	**$ 2,895**	$ 12,927	**$ 2,175**	$ 220	**$ 2,840**	$ 2,292
Gains on securitizations [(2)]	**3**	715	**5**	721	**31**	(1)	**64**	40
Repurchases from securitization trusts [(3)]	**98**	167	**178**	295	**—**	—	**—**	—

(1) The Corporation transfers residential mortgage loans to securitizations sponsored primarily by the Government-sponsored enterprise (GSEs) or Government National Mortgage Association (GNMA) in the normal course of business and primarily receives RMBS in exchange. Substantially all of these securities are classified as Level 2 within the fair value hierarchy and are typically sold shortly after receipt.

(2) A majority of the first-lien residential mortgage loans securitized are initially classified as LHFS and accounted for under the fair value option. Gains recognized on these LHFS prior to securitization, which totaled $40 million and $73 million, net of hedges, during the three and six months ended June 30, 2021 compared to $34 million and $61 million for the same periods in 2020, are not included in the table above.

(3) The Corporation may have the option to repurchase delinquent loans out of securitization trusts, which reduces the amount of servicing advances it is required to make. The Corporation may also repurchase loans from securitization trusts to perform modifications. Repurchased loans include FHA-insured mortgages collateralizing GNMA securities.

The Corporation recognizes consumer MSRs from the sale or securitization of consumer real estate loans. The unpaid principal balance of loans serviced for investors, including residential mortgage and home equity loans, totaled $138.7 billion and $183.4 billion at June 30, 2021 and 2020. Servicing fee and ancillary fee income on serviced loans was $104 million and $217 million during the three and six months ended June 30, 2021 compared to $124 million and $252 million for the same periods in 2020. Servicing advances on serviced loans, including loans serviced for others and loans held for investment, were $2.1 billion and $2.2 billion at June 30, 2021 and December 31, 2020. For more information on MSRs, see *Note 14 – Fair Value Measurements*.

During the six months ended June 30, 2020, the Corporation completed the sale of $9.3 billion of consumer real estate loans through GNMA loan securitizations. As part of the securitizations, the Corporation retained $8.4 billion of mortgage-backed securities, which are classified as debt securities carried at fair value on the Consolidated Balance Sheet. Total gains on loan sales of $704 million were recorded in other income in the Consolidated Statement of Income.

The following table summarizes select information related to first-lien mortgage securitization trusts in which the Corporation held a variable interest at June 30, 2021 and December 31, 2020.

[1] Maximum loss exposure includes obligations under loss-sharing reinsurance and other arrangements for non-agency residential mortgage and commercial mortgage securitizations, but excludes the reserve for representations and warranties obligations and corporate guarantees and also excludes servicing advances and other servicing rights and obligations. For more information, see *Note 10 – Commitments and Contingencies* and *Note 14 – Fair Value Measurements*.

[2] Principal balance outstanding includes loans where the Corporation was the transferor to securitization VIEs with which it has continuing involvement, which may include servicing the loans.

Other Asset-backed Securitizations

The table below summarizes select information related to home equity, credit card and other asset-backed VIEs in which the Corporation held a variable interest at June 30, 2021 and December 31, 2020.

[1] For unconsolidated home equity loan VIEs, the maximum loss exposure includes outstanding trust certificates issued by trusts in rapid amortization, net of recorded reserves. For both consolidated and unconsolidated home equity loan VIEs, the maximum loss exposure excludes the reserve for representations and warranties obligations and corporate guarantees. For more information, see *Note 10 – Commitments and Contingencies*.

[2] At June 30, 2021 and December 31, 2020, loans and leases in the consolidated credit card trust included $3.0 billion and $7.6 billion of seller's interest.

[3] The retained senior securities were valued using quoted market prices or observable market inputs (Level 2 of the fair value hierarchy).

Home Equity Loans

The Corporation retains interests, primarily senior securities, in home equity securitization trusts to which it transferred home equity loans. In addition, the Corporation may be obligated to provide subordinate funding to the trusts during a rapid amortization event. This obligation is included in the maximum loss exposure in the table above. The charges that will ultimately be recorded as a result of the rapid amortization events depend on the undrawn portion of the home equity lines of credit, performance of the loans, the amount of subsequent draws and the timing of related cash flows.

Credit Card Securitizations

The Corporation securitizes originated and purchased credit card loans. The Corporation's continuing involvement with the securitization trust includes servicing the receivables, retaining an undivided interest (seller's interest) in the receivables, and holding certain retained interests, including subordinate interests, in accrued interest and fees on the securitized receivables and cash reserve accounts.

During the six months ended June 30, 2021, there were $1.0 billion of new senior debt securities issued to third-party investors from the credit card securitization trust. No new senior debt securities were issued to third-party investors from the credit card securitization trust during the six months ended June 30, 2020.

At June 30, 2021 and December 31, 2020, the Corporation held subordinate securities issued by the credit card securitization trust with a notional principal amount of $6.6 billion and $6.8 billion. These securities serve as a form of credit enhancement to the senior debt securities and have a stated interest rate of zero percent. There were $161 million of these subordinate securities issued by the credit card securitization trust during the six months ended June 30, 2021. No subordinate securities were issued by the credit card securitization trust during the six months ended June 30, 2020.

Resecuritization Trusts

The Corporation transfers securities, typically MBS, into resecuritization VIEs generally at the request of customers seeking securities with specific characteristics. Generally, there are no significant ongoing activities performed in a resecuritization trust, and no single investor has the unilateral ability to liquidate the trust.

The Corporation resecuritized $5.9 billion and $14.7 billion of securities during the three and six months ended June 30, 2021 compared to $10.7 billion and $18.1 billion for the same periods in 2020. Securities transferred into resecuritization VIEs were measured at fair value with changes in fair value recorded in market making and similar activities prior to the resecuritization and, accordingly, no gain or loss on sale was recorded. During the three and six months ended June 30, 2021 and 2020, resecuritization proceeds included securities with an initial fair value of $233 million and $519 million compared to $4.4 billion and $4.9 billion, of which substantially all of the securities in the current-year period were classified as trading account assets. Of the securities received as resecuritization proceeds during the three months ended June 30, 2020, $654 million, $2.1 billion and $1.7 billion were classified as trading account assets, debt securities carried at fair value and HTM securities, respectively. Of the securities received as resecuritization proceeds during the six months ended June 30, 2020, $1.2 billion, $2.1 billion and $1.7 billion were classified as trading account assets, debt securities carried at fair value and HTM securities, respectively. Substantially all of the trading account securities carried at fair value were categorized as Level 2 within the fair value hierarchy.

Municipal Bond Trusts

The Corporation administers municipal bond trusts that hold highly-rated, long-term, fixed-rate municipal bonds. The trusts obtain financing by issuing floating-rate trust certificates that reprice on a weekly or other short-term basis to third-party investors.

The Corporation's liquidity commitments to unconsolidated municipal bond trusts, including those for which the Corporation was transferor, totaled $3.7 billion and $3.5 billion at June 30, 2021 and December 31, 2020. The weighted-average remaining life of bonds held in the trusts at June 30, 2021 was 6.5 years. There were no significant write-downs or downgrades of assets or issuers during the six months ended June 30, 2021 and 2020.

Other Variable Interest Entities

The table below summarizes select information related to other VIEs in which the Corporation held a variable interest at June 30, 2021 and December 31, 2020.

Other VIEs

(Dollars in millions)	Consolidated	Unconsolidated	Total	Consolidated	Unconsolidated	Total
	June 30, 2021			December 31, 2020		
Maximum loss exposure	**$ 4,565**	**$ 24,829**	**$ 29,394**	$ 4,106	$ 23,870	$ 27,976
On-balance sheet assets						
Trading account assets	**$ 2,437**	**$ 606**	**$ 3,043**	$ 2,080	$ 623	$ 2,703
Debt securities carried at fair value	**—**	**8**	**8**	—	9	9
Loans and leases	**2,319**	**182**	**2,501**	2,108	184	2,292

Total	**$ 216**	**$ 5,972**	**$ 6,188**	$ 133	$ 5,658	$ 5,791
Total assets of VIEs	**$ 4,781**	**$ 83,221**	**$ 88,002**	$ 4,239	$ 77,984	$ 82,223

Customer VIEs

Customer VIEs include credit-linked, equity-linked and commodity-linked note VIEs, repackaging VIEs and asset acquisition VIEs, which are typically created on behalf of customers who wish to obtain market or credit exposure to a specific company, index, commodity or financial instrument.

The Corporation's maximum loss exposure to consolidated and unconsolidated customer VIEs totaled $2.7 billion and $2.3 billion at June 30, 2021 and December 31, 2020, including the notional amount of derivatives to which the Corporation is a counterparty, net of losses previously recorded, and the Corporation's investment, if any, in securities issued by the VIEs.

Collateralized Debt Obligation VIEs

The Corporation receives fees for structuring CDO VIEs, which hold diversified pools of fixed-income securities, typically corporate debt or ABS, which the CDO VIEs fund by issuing multiple tranches of debt and equity securities. CDOs are generally managed by third-party portfolio managers. The Corporation typically transfers assets to these CDOs, holds securities issued by the CDOs and may be a derivative counterparty to the CDOs. The Corporation's maximum loss exposure to consolidated and unconsolidated CDOs totaled $256 million and $298 million at June 30, 2021 and December 31, 2020.

Investment VIEs

The Corporation sponsors, invests in or provides financing, which may be in connection with the sale of assets, to a variety of investment VIEs that hold loans, real estate, debt securities or other financial instruments and are designed to provide the desired investment profile to investors or the Corporation. At June 30, 2021 and December 31, 2020, the Corporation's consolidated investment VIEs had total assets of $764 million and $494 million. The Corporation also held investments in unconsolidated VIEs with total assets of $6.6 billion and $5.4 billion at June 30, 2021 and December 31, 2020. The Corporation's maximum loss exposure associated with both consolidated and unconsolidated investment VIEs totaled $1.9 billion and $1.5 billion at June 30, 2021 and December 31, 2020 comprised primarily of on-balance sheet assets less non-recourse liabilities.

Leveraged Lease Trusts

The Corporation's net investment in consolidated leveraged lease trusts totaled $1.6 billion and $1.7 billion at June 30, 2021 and December 31, 2020. The trusts hold long-lived equipment such as rail cars, power generation and distribution equipment, and commercial aircraft. The Corporation structures the trusts and holds a significant residual interest. The net investment represents the Corporation's maximum loss exposure to the trusts in the unlikely event that the leveraged lease investments become worthless. Debt issued by the leveraged lease trusts is non-recourse to the Corporation.

Tax Credit VIEs

The Corporation holds investments in unconsolidated limited partnerships and similar entities that construct, own and operate affordable housing, wind and solar projects. An unrelated third party is typically the general partner or managing member and has control over the significant activities of the VIE. The Corporation earns a return primarily through the receipt of tax credits allocated to the projects. The maximum loss exposure included in the Other VIEs table was $22.8 billion and $22.0 billion at June 30, 2021 and December 31, 2020. The Corporation's risk of loss is generally mitigated by policies requiring that the project qualify for the expected tax credits prior to making its investment.

The Corporation's investments in affordable housing partnerships, which are reported in other assets on the Consolidated Balance Sheet, totaled $11.7 billion and $11.2 billion, including unfunded commitments to provide capital contributions of $5.3 billion and $5.0 billion, at June 30, 2021 and December 31, 2020. The unfunded commitments are expected to be paid over the next five years. The Corporation recognized tax credits and other tax benefits from investments in affordable housing partnerships of $334 million and $727 million and reported pretax losses in other income of $279 million and $555 million for the three and six months ended June 30, 2021. For the same periods in 2020, the Corporation recognized tax credits and other tax benefits of $342 million and $610 million and reported pretax losses in other income of $255 million and $527 million. These tax credits are recognized as part of the Corporation's annual effective tax rate used to determine tax expense in a given quarter. The Corporation may be asked to invest additional amounts to support a troubled affordable housing project. Such additional investments have not been and are not expected to be significant.

NOTE 7 Goodwill and Intangible Assets

Goodwill

The table below presents goodwill balances by business segment at June 30, 2021 and December 31, 2020. The reporting units utilized for goodwill impairment testing are the operating segments or one level below. The Corporation completed its annual goodwill impairment test as of June 30, 2021 and determined there was no impairment. For more information regarding the nature and accounting for the Corporation's annual goodwill impairment testing, see *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.

Goodwill

(Dollars in millions)	June 30 2021	December 31 2020
Consumer Banking	$ 30,137	$ 30,123
Global Wealth & Investment Management	9,677	9,677
Global Banking [1]	24,027	23,969
Global Markets	5,182	5,182
Total goodwill	**$ 69,023**	$ 68,951

[1] Prior period has been revised to conform to current-period presentation.

Intangible Assets

At both June 30, 2021 and December 31, 2020, the net carrying value of intangible assets was $2.2 billion. At both June 30, 2021 and December 31, 2020, intangible assets included $1.6 billion of intangible assets associated with trade names, substantially all of which had an indefinite life and, accordingly, are not being amortized. Amortization of intangibles expense was $20 million and $37 million for the three and six months ended June 30, 2021 compared to $16 million and $32 million for the same periods in 2020.

NOTE 8 Leases

The Corporation enters into both lessor and lessee arrangements. For more information on lease accounting, see *Note 1 – Summary of Significant Accounting Principles* and *Note 8 – Leases* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K. For more information on lease financing receivables, see *Note 5 – Outstanding Loans and Leases and Allowance for Credit Losses*.

Lessor Arrangements

The Corporation's lessor arrangements primarily consist of operating, sales-type and direct financing leases for equipment. Lease agreements may include options to renew and for the lessee to purchase the leased equipment at the end of the lease term.

The table below presents the net investment in sales-type and direct financing leases at June 30, 2021 and December 31, 2020.

Net Investment (1)

(Dollars in millions)	June 30 2021	December 31 2020
Lease receivables	$ 16,852	$ 17,627
Unguaranteed residuals	2,191	2,303
Total net investment in sales-type and direct financing leases	$ 19,043	$ 19,930

(1) In certain cases, the Corporation obtains third-party residual value insurance to reduce its residual asset risk. The carrying value of residual assets with third-party residual value insurance for at least a portion of the asset value was $7.2 billion and $6.9 billion at June 30, 2021 and December 31, 2020.

The table below presents lease income for the three and six months ended June 30, 2021 and 2020.

Lease Income

	Three Months Ended June 30		Six Months Ended June 30	
(Dollars in millions)	2021	2020	2021	2020
Sales-type and direct financing leases	$ 152	$ 175	$ 316	$ 372
Operating leases	223	236	454	479
Total lease income	$ 375	$ 411	$ 770	$ 851

Lessee Arrangements

The Corporation's lessee arrangements predominantly consist of operating leases for premises and equipment; the Corporation's financing leases are not significant.

The table below provides information on the right-of-use assets and lease liabilities at June 30, 2021 and December 31, 2020.

Lessee Arrangements

(Dollars in millions)	June 30 2021	December 31 2020
Right-of-use asset	$ 10,030	$ 10,000
Lease liabilities	10,653	10,474

NOTE 9 Federal Funds Sold or Purchased, Securities Financing Agreements, Short-term Borrowings and Restricted Cash

The table below presents federal funds sold or purchased, securities financing agreements (which include securities borrowed or purchased under agreements to resell and securities loaned or sold under agreements to repurchase) and short-term borrowings. The Corporation elects to account for certain securities financing agreements and short-term borrowings under the fair value option. For more information on the fair value option, see *Note 15 – Fair Value Option*.

	Amount	Rate	Amount	Rate	Amount	Rate	Amount	Rate

n/a = not applicable

Offsetting of Securities Financing Agreements

The Corporation enters into securities financing agreements to accommodate customers (also referred to as "matched-book transactions"), obtain securities to cover short positions and finance inventory positions. For more information on the securities financing agreements and the offsetting of securities financing transactions, see *Note 10 – Federal Funds Sold or Purchased, Securities Financing Agreements, Short-term Borrowings and Restricted Cash* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.

The Securities Financing Agreements table presents securities financing agreements included on the Consolidated Balance Sheet in federal funds sold and securities borrowed or purchased under agreements to resell, and in federal funds purchased and securities loaned or sold under agreements to repurchase at June 30, 2021 and December 31, 2020. Balances are presented on a gross basis, prior to the application of counterparty netting. Gross assets and liabilities are adjusted on an aggregate basis to take into consideration the effects of legally enforceable master netting agreements. For more information on the offsetting of derivatives, see *Note 3 – Derivatives*.

Securities Financing Agreements

(Dollars in millions)	Gross Assets/Liabilities [1]	Amounts Offset	Net Balance Sheet Amount	Financial Instruments [2]	Net Assets/Liabilities
			June 30, 2021		
Securities borrowed or purchased under agreements to resell [3]	**$ 524,946**	**$ (256,352)**	**$ 268,594**	**$ (241,909)**	**$ 26,685**
Securities loaned or sold under agreements to repurchase	**$ 470,139**	**$ (256,352)**	**$ 213,787**	**$ (202,435)**	**$ 11,352**
Other [4]	**15,071**	**—**	**15,071**	**(15,071)**	**—**
Total	**$ 485,210**	**$ (256,352)**	**$ 228,858**	**$ (217,506)**	**$ 11,352**
			December 31, 2020		
Securities borrowed or purchased under agreements to resell [3]	$ 492,387	$ (188,329)	$ 304,058	$ (272,351)	$ 31,707
Securities loaned or sold under agreements to repurchase	$ 358,652	$ (188,329)	$ 170,323	$ (158,867)	$ 11,456
Other [4]	16,210	—	16,210	(16,210)	—
Total	$ 374,862	$ (188,329)	$ 186,533	$ (175,077)	$ 11,456

(1) Includes activity where uncertainty exists as to the enforceability of certain master netting agreements under bankruptcy laws in some countries or industries.
(2) Includes securities collateral received or pledged under repurchase or securities lending agreements where there is a legally enforceable master netting agreement. These amounts are not offset on the Consolidated Balance Sheet, but are shown as a reduction to derive a net asset or liability. Securities collateral received or pledged where the legal enforceability of the master netting agreements is uncertain is excluded from the table.
(3) Excludes repurchase activity of $20.1 billion and $14.7 billion reported in loans and leases on the Consolidated Balance Sheet at June 30, 2021 and December 31, 2020.
(4) Balance is reported in accrued expenses and other liabilities on the Consolidated Balance Sheet and relates to transactions where the Corporation acts as the lender in a securities lending agreement and receives securities that can be pledged as collateral or sold. In these transactions, the Corporation recognizes an asset at fair value, representing the securities received, and a liability, representing the obligation to return those securities.

Repurchase Agreements and Securities Loaned Transactions Accounted for as Secured Borrowings

The following tables present securities sold under agreements to repurchase and securities loaned by remaining contractual term to maturity and class of collateral pledged. Included in "Other" are transactions where the Corporation acts as the lender in a securities lending agreement and receives securities that can be pledged as collateral or sold. Certain agreements contain a right to substitute collateral and/or terminate the agreement prior to maturity at the option of the Corporation or the counterparty. Such agreements are included in the table below based on the remaining contractual term to maturity. For more information on collateral requirements, see *Note 10 – Federal Funds Sold or Purchased, Securities Financing Agreements, Short-term Borrowings and Restricted Cash* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.

Remaining Contractual Maturity

Restricted Cash

At June 30, 2021 and December 31, 2020, the Corporation held restricted cash included within cash and cash equivalents on the Consolidated Balance Sheet of $6.0 billion and $7.0 billion, predominantly related to cash segregated in compliance with securities regulations and cash held on deposit with central banks to meet reserve requirements.

NOTE 10 Commitments and Contingencies

In the normal course of business, the Corporation enters into a number of off-balance sheet commitments. These commitments expose the Corporation to varying degrees of credit and market risk and are subject to the same credit and market risk limitation reviews as those instruments recorded on the Consolidated Balance Sheet. For more information on commitments and contingencies, see *Note 12 – Commitments and Contingencies* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.

Credit Extension Commitments

The Corporation enters into commitments to extend credit such as loan commitments, standby letters of credit (SBLCs) and commercial letters of credit to meet the financing needs of its customers. The following table includes the notional amount of unfunded legally binding lending commitments net of amounts distributed (i.e., syndicated or participated) to other financial institutions. The distributed amounts were $10.9 billion and $10.5 billion at June 30, 2021 and December 31, 2020. The carrying value of these commitments at June 30, 2021 and December 31, 2020, excluding commitments accounted for under the fair value option, was $1.7 billion and $1.9 billion, which primarily related to the reserve for unfunded lending commitments. The carrying value of these commitments is classified in accrued expenses and other liabilities on the Consolidated Balance Sheet.

Legally binding commitments to extend credit generally have specified rates and maturities. Certain of these commitments have adverse change clauses that help to protect the Corporation against deterioration in the borrower's ability to pay.

The following table includes the notional amount of commitments of $5.3 billion and $4.0 billion at June 30, 2021 and December 31, 2020 that are accounted for under the fair value option. However, the table excludes the cumulative net fair value for these commitments of $103 million and $99 million at June 30, 2021 and December 31, 2020, which is classified in accrued expenses and other liabilities. For more information regarding the Corporation's loan commitments accounted for under the fair value option, see *Note 15 – Fair Value Option.*

Credit Extension Commitments

(Dollars in millions)	Expire in One Year or Less	Expire After One Year Through Three Years	Expire After Three Years Through Five Years	Expire After Five Years	Total

Total credit extension commitments	$ 515,919	$ 187,114	$ 150,668	$ 47,267	$ 900,968

(1) At June 30, 2021 and December 31, 2020, $5.5 billion and $4.8 billion of these loan commitments were held in the form of a security.
(2) The notional amounts of SBLCs and financial guarantees classified as investment grade and non-investment grade based on the credit quality of the underlying reference name within the instrument were $25.3 billion and $9.1 billion at June 30, 2021, and $25.0 billion and $10.2 billion at December 31, 2020. Amounts in the table include consumer SBLCs of $476 million and $500 million at June 30, 2021 and December 31, 2020.
(3) At June 30, 2021 and December 31, 2020, included are letters of credit of $1.9 billion and $1.8 billion related to certain liquidity commitments of VIEs. For more information, see *Note 6 – Securitizations and Other Variable Interest Entities*
(4) Includes business card unused lines of credit.

Other Commitments

At June 30, 2021 and December 31, 2020, the Corporation had commitments to purchase loans (e.g., residential mortgage and commercial real estate) of $64 million and $93 million, which upon settlement will be included in trading account assets, loans or LHFS, and commitments to purchase commercial loans of $430 million and $645 million, which upon settlement will be included in trading account assets.

At June 30, 2021 and December 31, 2020, the Corporation had commitments to purchase commodities, primarily liquefied natural gas, of $616 million and $582 million, which upon settlement will be included in trading account assets.

At June 30, 2021 and December 31, 2020, the Corporation had commitments to enter into resale and forward-dated resale and securities borrowing agreements of $127.8 billion and $66.5 billion, and commitments to enter into forward-dated repurchase and securities lending agreements of $67.5 billion and $32.1 billion. These commitments generally expire within the next 12 months.

At June 30, 2021 and December 31, 2020, the Corporation had a commitment to originate or purchase up to $4.0 billion and $3.9 billion on a rolling 12-month basis, of auto loans and leases from a strategic partner. This commitment extends through November 2022 and can be terminated with 12 months prior notice.

Other Guarantees

Bank-owned Life Insurance Book Value Protection

The Corporation sells products that offer book value protection to insurance carriers who offer group life insurance policies to corporations, primarily banks. At both June 30, 2021 and December 31, 2020, the notional amount of these guarantees totaled $6.3 billion and $7.1 billion. At both June 30, 2021 and December 31, 2020, the Corporation's maximum exposure related to these guarantees totaled $934 million and $1.1 billion, with estimated maturity dates between 2033 and 2039.

Merchant Services

The Corporation in its role as merchant acquirer or as a sponsor of other merchant acquirers may be held liable for any reversed charges that cannot be collected from the merchants, due to, among other things, merchant fraud or insolvency. If charges are properly reversed after a purchase and cannot be collected from either the merchants or merchant acquirers, the Corporation may be held liable for these reversed charges. The ability to reverse a charge is primarily governed by the applicable regulatory and card network rules, which include, but are not limited to, the type of charge, type of payment used and time limits. For the six months ended June 30, 2021, the Corporation processed an aggregate purchase volume of $411.8 billion. The Corporation's risk in this area primarily relates to circumstances where a cardholder has purchased goods or services for future delivery. The Corporation mitigates this risk by requiring cash deposits, guarantees, letters of credit or other types of collateral from certain merchants. The Corporation's reserves for contingent losses and the losses incurred related to the merchant processing activity were not significant. The Corporation continues to monitor its exposure in this area due to the potential economic impacts of the pandemic.

Representations and Warranties Obligations and Corporate Guarantees

For more information on representations and warranties obligations and corporate guarantees, see *Note 12 – Commitments and Contingencies* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K

The reserve for representations and warranties obligations and corporate guarantees was $1.2 billion and $1.3 billion at June 30, 2021 and December 31, 2020 and is included in accrued expenses and other liabilities on the Consolidated Balance Sheet and the related provision is included in other income in the Consolidated Statement of Income. The representations and warranties reserve represents the Corporation’s best estimate of probable incurred losses, is based on its experience in previous negotiations, and is subject to judgment, a variety of assumptions, and known or unknown uncertainties. Future representations and warranties losses may occur in excess of the amounts recorded for these exposures; however, the Corporation does not expect such amounts to be material to the Corporation's financial condition and liquidity. See Litigation and Regulatory Matters below for the Corporation's combined range of possible loss in excess of the reserve for representations and warranties and the accrued liability for litigation.

Fixed Income Clearing Corporation Sponsored Member Repo Program

The Corporation acts as a sponsoring member in a repo program whereby the Corporation clears certain eligible resale and repurchase agreements through the Government Securities Division of the Fixed Income Clearing Corporation on behalf of clients that are sponsored members in accordance with the Fixed Income Clearing Corporation’s rules. As part of this program, the Corporation guarantees the payment and performance of its sponsored members to the Fixed Income Clearing Corporation. The Corporation’s guarantee obligation is secured by a security interest in cash or high-quality securities collateral placed by clients with the clearinghouse and therefore, the potential for the Corporation to incur significant losses under this arrangement is remote. The Corporation’s maximum potential exposure, without taking into consideration the related collateral, was $13.6 billion and $22.5 billion at June 30, 2021 and December 31, 2020.

Other Guarantees

The Corporation has entered into additional guarantee agreements and commitments, including sold risk participation swaps, liquidity facilities, lease-end obligation agreements, partial credit guarantees on certain leases, real estate joint venture guarantees, divested business commitments and sold put options that require gross settlement. The maximum potential future payments under these agreements are approximately $9.2 billion and $8.8 billion at June 30, 2021 and December 31, 2020. The estimated maturity dates of these obligations extend up to 2049. The Corporation has made no material payments under these guarantees. For more information on maximum potential future payments under VIE-related liquidity commitments, see *Note 6 – Securitizations and Other Variable Interest Entities*.

In the normal course of business, the Corporation periodically guarantees the obligations of its affiliates in a variety of transactions including ISDA-related transactions and non-ISDA related transactions such as commodities trading, repurchase agreements, prime brokerage agreements and other transactions.

Guarantees of Certain Long-term Debt

The Corporation, as the parent company, fully and unconditionally guarantees the securities issued by BofA Finance LLC, a consolidated finance subsidiary of the Corporation, and effectively provides for the full and unconditional guarantee of trust securities issued by certain statutory trust companies that are 100 percent owned finance subsidiaries of the Corporation.

Litigation and Regulatory Matters

The following disclosures supplement the disclosure in *Note 12 – Commitments and Contingencies* to the Consolidated Financial Statements of the Corporation’s 2020 Annual Report on Form 10-K (the prior commitments and contingencies disclosure).

In the ordinary course of business, the Corporation and its subsidiaries are routinely defendants in or parties to many pending and threatened legal, regulatory and governmental actions and proceedings. In view of the inherent difficulty of predicting the outcome of such matters, particularly where the claimants seek very large or indeterminate damages or where the matters present novel legal theories or involve a large number of parties, the Corporation generally cannot predict the eventual outcome of the pending matters, timing of the ultimate resolution of these matters, or eventual loss, fines or penalties related to each pending matter.

As a matter develops, the Corporation, in conjunction with any outside counsel handling the matter, evaluates whether such matter presents a loss contingency that is probable and estimable, and, for the matter described below and the matters disclosed in the prior commitments and contingencies disclosure, whether a loss in excess of any accrued liability is reasonably possible in future periods. Once the loss contingency is deemed to be both probable and estimable, the Corporation will establish an accrued liability and record a corresponding amount of litigation-related expense. The Corporation continues to monitor the matter for further developments that could affect the amount of the accrued liability that has been previously established. Excluding expenses of internal and external legal service providers, litigation-related expense of $55 million and $89 million was recognized for the three and six months ended June 30, 2021 compared to $57 million and $81 million for the same periods in 2020.

For any matter disclosed in this Note and in the prior commitments and contingencies disclosure, for which a loss in future periods is reasonably possible and estimable (whether in excess of an accrued liability or where there is no accrued liability) and for representations and warranties exposures, the Corporation’s estimated range of possible loss is $0 to $1.3 billion in excess of the accrued liability, if any, as of June 30, 2021.

The accrued liability and estimated range of possible loss are based upon currently available information and subject to significant judgment, a variety of assumptions and known and unknown uncertainties. The matters underlying the accrued liability and estimated range of possible loss are unpredictable and may change from time to time, and actual losses may vary significantly from the current estimate and accrual. The estimated range of possible loss does not represent the Corporation's maximum loss exposure.

Information is provided below, or in the prior commitments and contingencies disclosure regarding the nature of the litigation and, where specified, associated claimed damages. Based on current knowledge, and taking into account accrued liabilities, management does not believe that loss contingencies arising from pending matters, including the matters described below, and in the prior commitments and contingencies disclosure, will have a material adverse effect on the consolidated financial condition or liquidity of the Corporation. However, in light of the significant judgment, variety of assumptions and uncertainties involved in those matters, some of which are beyond the Corporation's control, and the very large or indeterminate damages sought in some of those matters, an adverse outcome in one or more of these matters could be material to the Corporation's business or results of operations for any particular reporting period, or cause significant reputational harm.

Ambac Bond Insurance Litigation

Ambac v. Countrywide I

On May 11, 2021, the First Department, a New York State appellate court, affirmed the dismissal of Ambac's fraudulent inducement claim.

LIBOR, Other Reference Rates, Foreign Exchange and Bond Trading Matters

On April 28, 2021, the European Commission concluded its investigation regarding trading by various financial institutions in sovereign, supranational, and agency bonds by issuing a fine in an amount not material to the Corporation.

On May 20, 2021, the European Commission concluded its investigation regarding trading by various financial institutions in European government bonds. Although it found that the respondent financial institutions violated European competition rules, it did not fine the Corporation because the conduct at issue occurred beyond the statute of limitations.

NOTE 11 Shareholders' Equity

Common Stock

Declared Quarterly Cash Dividends on Common Stock [1]

Declaration Date	Record Date	Payment Date	Dividend Per Share
July 21, 2021	September 3, 2021	September 24, 2021	$ 0.21
April 22, 2021	June 4, 2021	June 25, 2021	0.18
January 19, 2021	March 5, 2021	March 26, 2021	0.18

(1) In 2021, and through July 30, 2021.

During the three and six months ended June 30, 2021, the Corporation repurchased and retired 103 million and 204 million shares of common stock, which reduced shareholders' equity by $4.2 billion and $7.7 billion.

During the six months ended June 30, 2021, in connection with employee stock plans, the Corporation issued 63 million shares of its common stock and, to satisfy tax withholding obligations, repurchased 24 million shares of its common stock. At June 30, 2021, the Corporation had reserved 566 million unissued shares of common stock for future issuances under employee stock plans, convertible notes and preferred stock.

On July 21, 2021, the Board of Directors declared a quarterly common stock dividend of $0.21 per share.

Preferred Stock

During the three months ended March 31, 2021 and June 30, 2021, the Corporation declared $490 million and $260 million of cash dividends on preferred stock, or a total of $750 million for the six months ended June 30, 2021. Additionally, on April 25, 2021, the Corporation fully redeemed Series EE Preferred Stock for $900 million. For more information on the Corporation's preferred stock, including liquidation preference, dividend requirements and redemption period, see *Note 13 – Shareholders' Equity* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.

NOTE 12 Accumulated Other Comprehensive Income (Loss)

The table below presents the changes in accumulated OCI after-tax for the six months ended June 30, 2021 and 2020.

(Dollars in millions)	Debt Securities	Debit Valuation Adjustments	Derivatives	Employee Benefit Plans	Foreign Currency	Total
Balance, December 31, 2019	$ 323	$ (1,494)	$ (400)	$ (4,168)	$ (894)	$ (6,633)
Net change	4,693	53	732	100	(107)	5,471
Balance, June 30, 2020	$ 5,016	$ (1,441)	$ 332	$ (4,068)	$ (1,001)	$ (1,162)
Balance, December 31, 2020	$ 5,122	$ (1,992)	$ 426	$ (4,266)	$ (946)	$ (1,656)
Net change	**(1,090)**	**265**	**(699)**	**120**	**(3)**	**(1,407)**
Balance, June 30, 2021	**$ 4,032**	**$ (1,727)**	**$ (273)**	**$ (4,146)**	**$ (949)**	**$ (3,063)**

The following table presents the net change in fair value recorded in accumulated OCI, net realized gains and losses reclassified into earnings and other changes for each component of OCI pre- and after-tax for the six months ended June 30, 2021 and 2020.

(Dollars in millions)	Pretax	Tax effect	After-tax	Pretax	Tax effect	After-tax
	Six Months Ended June 30					
	2021			2020		
Debt securities:						
Net increase (decrease) in fair value	$ (1,445)	$ 355	$ (1,090)	$ 6,628	$ (1,652)	$ 4,976
Net realized gains reclassified into earnings [(1)]	—	—	—	(377)	94	(283)
Net change	(1,445)	355	(1,090)	6,251	(1,558)	4,693
Debit valuation adjustments:						
Net increase in fair value	336	(76)	260	63	(13)	50
Net realized losses reclassified into earnings [(1)]	7	(2)	5	4	(1)	3
Net change	343	(78)	265	67	(14)	53
Derivatives:						
Net increase (decrease) in fair value	(820)	205	(615)	914	(222)	692
Reclassifications into earnings:						
Net interest income	(84)	20	(64)	53	(13)	40
Compensation and benefits expense	(26)	6	(20)	—	—	—
Net realized (gains) losses reclassified into earnings	(110)	26	(84)	53	(13)	40
Net change	(930)	231	(699)	967	(235)	732
Employee benefit plans:						
Net actuarial losses and other reclassified into earnings [(2)]	142	(22)	120	133	(33)	100
Net change	142	(22)	120	133	(33)	100
Foreign currency:						
Net decrease in fair value	116	(119)	(3)	115	(222)	(107)
Net change	116	(119)	(3)	115	(222)	(107)
Total other comprehensive income (loss)	$ (1,774)	$ 367	$ (1,407)	$ 7,533	$ (2,062)	$ 5,471

(1) Reclassifications of pretax debt securities, DVA and foreign currency (gains) losses are recorded in other income in the Consolidated Statement of Income.
(2) Reclassifications of pretax employee benefit plan costs are recorded in other general operating expense in the Consolidated Statement of Income.

NOTE 13 Earnings Per Common Share

The calculation of earnings per common share (EPS) and diluted EPS for the three and six months ended June 30, 2021 and 2020 is presented below. For more information on the calculation of EPS, see *Note 1 – Summary of Significant Accounting Principles*to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.

(In millions, except per share information)	Three Months Ended June 30		Six Months Ended June 30	
	2021	2020	2021	2020
Earnings per common share				
Net income	$ 9,224	$ 3,533	$ 17,274	$ 7,543
Preferred stock dividends	(260)	(249)	(750)	(718)
Net income applicable to common shareholders	$ 8,964	$ 3,284	$ 16,524	$ 6,825
Average common shares issued and outstanding	8,620.8	8,739.9	8,660.4	8,777.6
Earnings per common share	$ 1.04	$ 0.38	$ 1.91	$ 0.78
Diluted earnings per common share				
Net income applicable to common shareholders	$ 8,964	$ 3,284	$ 16,524	$ 6,825
Add preferred stock dividends due to assumed conversions	56	—	112	—
Net income allocated to common shareholders	$ 9,020	$ 3,284	$ 16,636	$ 6,825
Average common shares issued and outstanding	8,620.8	8,739.9	8,660.4	8,777.6
Dilutive potential common shares [(1)]	114.7	28.2	115.8	35.7
Total diluted average common shares issued and outstanding	8,735.5	8,768.1	8,776.2	8,813.3
Diluted earnings per common share	$ 1.03	$ 0.37	$ 1.90	$ 0.77

(1) Includes incremental dilutive shares from preferred stock, restricted stock units, restricted stock and warrants.

For the three and six months ended June 30, 2021,62 million average dilutive potential common shares associated with the Series L preferred stock were included in the diluted share count under the "if-converted" method, whereas they were antidilutive for the three and six months ended June 30, 2020.

NOTE 14 Fair Value Measurements

Under applicable accounting standards, fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The Corporation determines the fair values of its financial instruments under applicable accounting standards and conducts a review of fair value hierarchy classifications on a quarterly basis. Transfers into or out of fair value hierarchy classifications are made if the significant inputs used in the financial models measuring the fair values of the assets and liabilities become unobservable or observable in the current marketplace. During the six months ended June 30, 2021, there were no changes to valuation approaches or techniques that had, or are expected to have, a material impact on the Corporation's consolidated financial position or results of operations.

For more information regarding the fair value hierarchy, how the Corporation measures fair value and valuation techniques, see *Note 1 – Summary of Significant Accounting Principles* and *Note 20 – Fair Value Measurements* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K The Corporation accounts for certain financial instruments under the fair value option. For more information, see *Note 15 – Fair Value Option*.

Recurring Fair Value

Assets and liabilities carried at fair value on a recurring basis at June 30, 2021 and December 31, 2020, including financial instruments that the Corporation accounts for under the fair value option, are summarized in the following tables.

	June 30, 2021				
	Fair Value Measurements				
(Dollars in millions)	Level 1	Level 2	Level 3	Netting Adjustments [(1)]	Assets/Liabilities at Fair Value
Assets

Total liabilities [(5)]	$ 116,424	$ 555,911	$ 7,273	$ (314,287)	$ 365,321

(1) Amounts represent the impact of legally enforceable master netting agreements and also cash collateral held or placed with the same counterparties.
(2) Includes $23.7 billion of GSE obligations.
(3) Includes securities with a fair value of $8.6 billion that were segregated in compliance with securities regulations or deposited with clearing organizations. This amount is included in the parenthetical disclosure on the Consolidated Balance Sheet. Trading account assets also includes certain commodities inventory of $2.1 billion that are accounted for at the lower of cost or net realizable value, which is the current selling price less any costs to sell.
(4) Includes MSRs of $976 million which are classified as Level 3 assets.
(5) Total recurring Level 3 assets were 0.36 percent of total consolidated assets, and total recurring Level 3 liabilities were 0.26 percent of total consolidated liabilities.

Accrued expenses and other liabilities	12,297	4,014	—	—	16,311
Long-term debt	—	31,036	1,164	—	32,200
Total liabilities (5)	$ 80,671	$ 607,514	$ 7,399	$ (388,481)	$ 307,103

(1) Amounts represent the impact of legally enforceable master netting agreements and also cash collateral held or placed with the same counterparties.
(2) Includes $22.2 billion of GSE obligations.
(3) Includes securities with a fair value of $16.8 billion that were segregated in compliance with securities regulations or deposited with clearing organizations. This amount is included in the parenthetical disclosure on the Consolidated Balance Sheet. Trading account assets also includes certain commodities inventory of $576 million that are accounted for at the lower of cost or net realizable value, which is the current selling price less any costs to sell.
(4) Includes MSRs of $1.0 billion which are classified as Level 3 assets.
(5) Total recurring Level 3 assets were0.35 percent of total consolidated assets, and total recurring Level 3 liabilities were0.29 percent of total consolidated liabilities.

The following tables present a reconciliation of all assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) during the three and six months ended June 30, 2021 and 2020, including net realized and unrealized gains (losses) included in earnings and accumulated OCI. Transfers into Level 3 occur primarily due to decreased price observability, and transfers out of Level 3 occur primarily due to increased price observability. Transfers occur on a regular basis for long-term debt instruments due to changes in the impact of unobservable inputs on the value of the embedded derivative in relation to the instrument as a whole.

(1) Assets (liabilities). For assets, increase (decrease) to Level 3 and for liabilities, (increase) decrease to Level 3.
(2) Includes gains (losses) reported in earnings in the following income statement line items: Trading account assets/liabilities - predominantly market making and similar activities; Net derivative assets (liabilities) - market making and similar activities and other income; AFS debt securities - other income; Other debt securities carried at fair value - other income; Loans and leases - market making and similar activities and other income; Loans held-for-sale - other income; Other assets - primarily other income related to MSRs; Long-term debt - market making and similar activities.
(3) Includes unrealized gains (losses) in OCI on AFS debt securities, foreign currency translation adjustments and the impact of changes in the Corporation's credit spreads on long-term debt accounted for under the fair value option. Amounts include net unrealized gains (losses) of $67 million and $(126) million related to financial instruments still held at June 30, 2021 and 2020.
(4) Net derivative assets (liabilities) include derivative assets of $3.3 billion and $2.6 billion and derivative liabilities of $6.2 billion and $5.9 billion at June 30, 2021 and 2020.
(5) Amounts represent instruments that are accounted for under the fair value option.
(6) Issuances represent loan originations and MSRs recognized following securitizations or whole-loan sales.
(7) Settlements primarily represent the net change in fair value of the MSR asset due to the recognition of modeled cash flows and the passage of time.

			Weighted-average life, variable rate [5]	0 to 10 years	3 years
			Option-adjusted spread, fixed rate	7% to 14%	9 %
			Option-adjusted spread, variable rate	9% to 15%	12 %
Structured liabilities					
Long-term debt	**$ (1,060)**	Discounted cash flow, Market comparables, Industry standard derivative pricing [3]	Yield	0% to 14%	12 %
			Equity correlation	3% to 99%	74 %
			Long-dated equity volatilities	4% to 61%	37 %
			Price	$0 to $124	$87
			Natural gas forward price	$2/MMBtu to $6/MMBtu	$3 /MMBtu
Net derivative assets (liabilities)					
Credit derivatives	**$ (108)**	Discounted cash flow, Stochastic recovery correlation model	Credit spreads	1 to 375 bps	85 bps
			Upfront points	16 to 100 points	74 points
			Prepayment speed	15% CPR	n/a
			Default rate	2% CDR	n/a
			Credit correlation	21% to 60%	55 %
			Price	$0 to $122	$63
Equity derivatives	**$ (1,440)**	Industry standard derivative pricing [3]	Equity correlation	3% to 99%	74 %
			Long-dated equity volatilities	4% to 60%	37 %
Commodity derivatives	**$ (1,259)**	Discounted cash flow, Industry standard derivative pricing [3]	Natural gas forward price	$2/MMBtu to $6/MMBtu	$3 /MMBtu
			Correlation	54% to 85%	74 %
			Volatilities	27% to 51%	41 %
Interest rate derivatives	**$ (77)**	Industry standard derivative pricing [4]	Correlation (IR/IR)	(1)% to 90%	52 %
			Correlation (FX/IR)	0% to 58%	19 %
			Long-dated inflation rates	(8)% to 15%	6 %
			Long-dated inflation volatilities	0% to 1%	1 %
			Interest rate volatilities	0% to 2%	1 %
Total net derivative assets (liabilities)	**$ (2,884)**				

(1) For loans and securities, structured liabilities and net derivative assets (liabilities), the weighted average is calculated based upon the absolute fair value of the instruments.

(2) The categories are aggregated based upon product type which differs from financial statement classification. The following is a reconciliation to the line items in the table on page 87: Trading account assets – Corporate securities, trading loans and other of $1.8 billion, Trading account assets – Non-U.S. sovereign debt of $414 million, Trading account assets – Mortgage trading loans, MBS and ABS of $1.5 billion, AFS debt securities of $341 million, Other debt securities carried at fair value - Non-agency residential of $281 million, Other assets, including MSRs, of $1.8 billion, Loans and leases of $857 million and LHFS of $263 million.

(3) Includes models such as Monte Carlo simulation and Black-Scholes.

(4) Includes models such as Monte Carlo simulation, Black-Scholes and other methods that model the joint dynamics of interest, inflation and foreign exchange rates.

(5) The weighted-average life is a product of changes in market rates of interest, prepayment rates and other model and cash flow assumptions.

CPR = Constant Prepayment Rate
CDR = Constant Default Rate
MMBtu = Million British thermal units
IR = Interest Rate
FX = Foreign Exchange
n/a = not applicable

(1) For loans and securities, structured liabilities and net derivative assets (liabilities), the weighted average is calculated based upon the absolute fair value of the instruments.

(2) The categories are aggregated based upon product type which differs from financial statement classification. The following is a reconciliation to the line items in the table on page 88: Trading account assets – Corporate securities, trading loans and other of $1.8 billion, Trading account assets – Non-U.S. sovereign debt of $354 million, Trading account assets – Mortgage trading loans, MBS and ABS of $1.4 billion, AFS debt securities of $643 million, Other debt securities carried at fair value - Non-agency residential of $267 million, Other assets, including MSRs, of $2.0 billion, Loans and leases of $717 million and LHFS of $236 million.

(3) Includes models such as Monte Carlo simulation and Black-Scholes.

(4) Includes models such as Monte Carlo simulation, Black-Scholes and other methods that model the joint dynamics of interest, inflation and foreign exchange rates.

(5) The weighted-average life is a product of changes in market rates of interest, prepayment rates and other model and cash flow assumptions.

CPR = Constant Prepayment Rate
CDR = Constant Default Rate
MMBtu = Million British thermal units
IR = Interest Rate
FX = Foreign Exchange
n/a = not applicable

Uncertainty of Fair Value Measurements from Unobservable Inputs

For information on the types of instruments, valuation approaches and the impact of changes in unobservable inputs used in Level 3 measurements, see *Note 20 – Fair Value Measurements* to the Consolidated Financial Statements of the Corporation’s 2020 Annual Report on Form 10-K.

Nonrecurring Fair Value

The Corporation holds certain assets that are measured at fair value only in certain situations (e.g., the impairment of an asset), and these measurements are referred to herein as nonrecurring. The amounts below represent assets still held as of the reporting date for which a nonrecurring fair value adjustment was recorded during the three and six months ended June 30, 2021 and 2020.

Assets Measured at Fair Value on a Nonrecurring Basis

	June 30, 2021		Three Months Ended June 30, 2021	Six Months Ended June 30, 2021
(Dollars in millions)	**Level 2**	**Level 3**	**Gains (Losses)**	
Assets				
Loans held-for-sale	**$ 1,105**	**$ 52**	**$ 9**	**$ 9**
Loans and leases [(1)]	**—**	**142**	**(24)**	**(37)**
Foreclosed properties [(2, 3)]	**—**	**3**	**—**	**(1)**
Other assets	**322**	**2,172**	**(67)**	**(470)**
	June 30, 2020		Three Months Ended June 30, 2020	Six Months Ended June 30, 2020
Assets				
Loans held-for-sale	$ 505	$ 1,119	$ (37)	$ (113)
Loans and leases [(1)]	—	186	(22)	(45)
Foreclosed properties [(2, 3)]	—	16	(5)	(8)
Other assets	187	6	(26)	(27)

(1) Includes $15 million and $18 million of losses on loans that were written down to a collateral value of zero during the three and six months ended June 30, 2021 compared to losses of $9 million and $18 million for the same periods in 2020.
(2) Amounts are included in other assets on the Consolidated Balance Sheet and represent the carrying value of foreclosed properties that were written down subsequent to their initial classification as foreclosed properties. Losses on foreclosed properties include losses recorded during the first 90 days after transfer of a loan to foreclosed properties.
(3) Excludes $66 million and $124 million of properties acquired upon foreclosure of certain government-guaranteed loans (principally FHA-insured loans) at June 30, 2021 and 2020.

The table below presents information about significant unobservable inputs utilized in the Corporation's nonrecurring Level 3 fair value measurements at June 30, 2021 and December 31, 2020.

Quantitative Information about Nonrecurring Level 3 Fair Value Measurements

			Inputs		
Financial Instrument	**Fair Value**	**Valuation Technique**	**Significant Unobservable Inputs**	**Ranges of Inputs**	**Weighted Average [(1)]**
(Dollars in millions)			**Six Months Ended June 30, 2021**		
Loans and leases [(2)]	**$ 142**	Market comparables	OREO discount	13% to 59%	24 %
			Costs to sell	8% to 26%	9 %
Other assets [(3)]	**1,955**	Discounted cash flow	Discount rate	7 %	n/a
	211	Market comparables	Estimated appraisal value	n/a	n/a
			Year Ended December 31, 2020		
Loans held-for-sale	$ 792	Discounted cash flow	Price	$8 to $ 99	$95
Loans and leases [(2)]	301	Market comparables	OREO discount	13% to 59%	24 %
			Costs to sell	8% to 26%	9 %
Other assets [(4)]	576	Discounted cash flow	Revenue attrition	2% to 19%	7 %
			Discount rate	11% to 14%	12 %

(1) The weighted average is calculated based upon the fair value of the loans.
(2) Represents residential mortgages where the loan has been written down to the fair value of the underlying collateral.
(3) Represents the fair value of certain impaired renewable energy investments and impaired assets related to the Corporation's real estate rationalization.
(4) Represents the fair value of the intangible asset related to the merchant contracts received from the dissolution of the Corporation's merchant services joint venture.
n/a = not applicable

NOTE 15 Fair Value Option

The Corporation elects to account for certain financial instruments under the fair value option. For more information on the primary financial instruments for which the fair value option elections have been made, see *Note 21 – Fair Value Option* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K. The following tables provide information about the fair value carrying amount and the contractual principal outstanding of assets and liabilities accounted for under the fair value option at June 30, 2021 and December 31, 2020, and information about where changes in the fair value of assets and liabilities accounted for under the fair value option are included in the Consolidated Statement of Income for the three and six months ended June 30, 2021 and 2020.

Fair Value Option Elections

(Dollars in millions)	June 30, 2021 Fair Value Carrying Amount	June 30, 2021 Contractual Principal Outstanding	June 30, 2021 Fair Value Carrying Amount Less Unpaid Principal	December 31, 2020 Fair Value Carrying Amount	December 31, 2020 Contractual Principal Outstanding	December 31, 2020 Fair Value Carrying Amount Less Unpaid Principal
Federal funds sold and securities borrowed or purchased under agreements to resell	**$ 163,344**	**$ 163,314**	**$ 30**	$ 108,856	$ 108,811	$ 45
Loans reported as trading account assets [1]	**9,818**	**18,392**	**(8,574)**	7,967	17,372	(9,405)
Trading inventory – other	**24,322**	**n/a**	**n/a**	22,790	n/a	n/a
Consumer and commercial loans	**6,950**	**7,000**	**(50)**	6,681	6,778	(97)
Loans held-for-sale [1]	**2,207**	**3,128**	**(921)**	1,585	2,521	(936)
Other assets	**183**	**n/a**	**n/a**	200	n/a	n/a
Long-term deposits	**515**	**501**	**14**	481	448	33
Federal funds purchased and securities loaned or sold under agreements to repurchase	**165,781**	**165,790**	**(9)**	135,391	135,390	1
Short-term borrowings	**4,490**	**4,497**	**(7)**	5,874	5,178	696
Unfunded loan commitments	**103**	**n/a**	**n/a**	99	n/a	n/a
Long-term debt	**30,361**	**31,436**	**(1,075)**	32,200	33,470	(1,270)

[1] A significant portion of the loans reported as trading account assets and LHFS are distressed loans that were purchased at a deep discount to par, and the remainder are loans with a fair value near contractual principal outstanding.
n/a = not applicable

Gains (Losses) Related to Assets and Liabilities Accounted for Under the Fair Value Option

[1] The gains in market making and similar activities are primarily offset by losses on trading liabilities that hedge these assets.
[2] Includes the value of IRLCs on funded loans, including those sold during the period.
[3] The net losses in market making and similar activities relate to the embedded derivatives in structured liabilities and are typically offset by gains on derivatives and securities that hedge these liabilities. For the cumulative impact of changes in the Corporation's own credit spreads and the amount recognized in accumulated OCI, see *Note 12 – Accumulated Other Comprehensive Income (Loss)* For more information on how the Corporation's own credit spread is determined, see *Note 20 – Fair Value Measurements* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.
[4] Includes gains (losses) on federal funds sold and securities borrowed or purchased under agreements to resell, other assets, long-term deposits and federal funds purchased and securities loaned or sold under agreements to repurchase.

Gains (Losses) Related to Borrower-specific Credit Risk for Assets and Liabilities Accounted for Under the Fair Value Option

Loans held-for-sale	**4**	(19)	**(2)**	(93)
Unfunded loan commitments	**(11)**	46	**(6)**	(70)

NOTE 16 Fair Value of Financial Instruments

The following disclosures include financial instruments that are not carried at fair value or only a portion of the ending balance is carried at fair value on the Consolidated Balance Sheet. Certain loans, deposits, long-term debt, unfunded lending commitments and other financial instruments are accounted for under the fair value option. For more information, see *Note 21 – Fair Value Option* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.

Fair Value of Financial Instruments

The carrying values and fair values by fair value hierarchy of certain financial instruments where only a portion of the ending balance was carried at fair value at June 30, 2021 and December 31, 2020 are presented in the following table.

Fair Value of Financial Instruments

		Fair Value		
(Dollars in millions)	Carrying Value	Level 2	Level 3	Total
	June 30, 2021			
Financial assets				
Loans	**$ 883,938**	**$ 50,383**	**$ 875,364**	**$ 925,747**
Loans held-for-sale	**8,277**	**7,489**	**788**	**8,277**
Financial liabilities				
Deposits [1]	**1,909,142**	**1,909,132**	**—**	**1,909,132**
Long-term debt	**274,604**	**282,903**	**1,060**	**283,963**
Commercial unfunded lending commitments [2]	**1,790**	**103**	**6,259**	**6,362**
	December 31, 2020			
Financial assets				
Loans	$ 887,289	$ 49,372	$ 877,682	$ 927,054
Loans held-for-sale	9,243	7,864	1,379	9,243
Financial liabilities				
Deposits [1]	1,795,480	1,795,545	—	1,795,545
Long-term debt	262,934	271,315	1,164	272,479
Commercial unfunded lending commitments [2]	1,977	99	5,159	5,258

(1) Includes demand deposits of $936.2 billion and $799.0 billion with no stated maturities at June 30, 2021 and December 31, 2020.
(2) The carrying value of commercial unfunded lending commitments is included in accrued expenses and other liabilities on the Consolidated Balance Sheet. The Corporation does not estimate the fair value of consumer unfunded lending commitments because, in many instances, the Corporation can reduce or cancel these commitments by providing notice to the borrower. For more information on commitments, see *Note 10 – Commitments and Contingencies*.

NOTE 17 Business Segment Information

The Corporation reports its results of operations through the following four business segments: *Consumer Banking*, *Global Wealth & Investment Management*, *Global Banking* and *Global Markets*, with the remaining operations recorded in *All Other*. For more information see *Note 23 – Business Segment Information* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K. The following tables present net income and the components thereto (with net interest income on an FTE basis for the business segments, *All Other* and the total Corporation) for the three and six months ended June 30, 2021 and 2020, and total assets at June 30, 2021 and 2020 for each business segment, as well as *All Other.*

Consolidated total assets	**$ 3,029,894**	$ 2,741,688

(1) Adjustments include consolidated income, expense and asset amounts not specifically allocated to individual business segments.

Glossary

Alt-A Mortgage – A type of U.S. mortgage that is considered riskier than A-paper, or “prime,” and less risky than “subprime,” the riskiest category. Typically, Alt-A mortgages are characterized by borrowers with less than full documentation, lower credit scores and higher LTVs.

Assets Under Management (AUM) – The total market value of assets under the investment advisory and/or discretion of *GWIM* which generate asset management fees based on a percentage of the assets’ market values. AUM reflects assets that are generally managed for institutional, high net worth and retail clients, and are distributed through various investment products including mutual funds, other commingled vehicles and separate accounts.

Banking Book – All on- and off-balance sheet financial instruments of the Corporation except for those positions that are held for trading purposes.

Brokerage and Other Assets – Non-discretionary client assets which are held in brokerage accounts or held for safekeeping.

Committed Credit Exposure – Any funded portion of a facility plus the unfunded portion of a facility on which the lender is legally bound to advance funds during a specified period under prescribed conditions.

Credit Derivatives – Contractual agreements that provide protection against a specified credit event on one or more referenced obligations.

Credit Valuation Adjustment (CVA) – A portfolio adjustment required to properly reflect the counterparty credit risk exposure as part of the fair value of derivative instruments.

Debit Valuation Adjustment (DVA) – A portfolio adjustment required to properly reflect the Corporation’s own credit risk exposure as part of the fair value of derivative instruments and/or structured liabilities.

Funding Valuation Adjustment (FVA) – A portfolio adjustment required to include funding costs on uncollateralized derivatives and derivatives where the Corporation is not permitted to use the collateral it receives.

Interest Rate Lock Commitment (IRLC) – Commitment with a loan applicant in which the loan terms are guaranteed for a designated period of time subject to credit approval.

Letter of Credit – A document issued on behalf of a customer to a third party promising to pay the third party upon presentation of specified documents. A letter of credit effectively substitutes the issuer’s credit for that of the customer.

Loan-to-value (LTV) – A commonly used credit quality metric. LTV is calculated as the outstanding carrying value of the loan divided by the estimated value of the property securing the loan.

Margin Receivable – An extension of credit secured by eligible securities in certain brokerage accounts.

Matched Book – Repurchase and resale agreements or securities borrowed and loaned transactions where the overall asset and liability position is similar in size and/or maturity. Generally, these are entered into to accommodate customers where the Corporation earns the interest rate spread.

Mortgage Servicing Rights (MSR) – The right to service a mortgage loan when the underlying loan is sold or securitized. Servicing includes collections for principal, interest and escrow payments from borrowers and accounting for and remitting principal and interest payments to investors.

Nonperforming Loans and Leases – Includes loans and leases that have been placed on nonaccrual status, including nonaccruing loans whose contractual terms have been restructured in a manner that grants a concession to a borrower experiencing financial difficulties.

Prompt Corrective Action (PCA) – A framework established by the U.S. banking regulators requiring banks to maintain certain levels of regulatory capital ratios, comprised of five categories of capitalization: “well capitalized,” “adequately capitalized,” “undercapitalized,” “significantly undercapitalized” and “critically undercapitalized.” Insured depository institutions that fail to meet certain of these capital levels are subject to increasingly strict limits on their activities, including their ability to make capital distributions, pay management compensation, grow assets and take other actions.

Subprime Loans – Although a standard industry definition for subprime loans (including subprime mortgage loans) does not exist, the Corporation defines subprime loans as specific product offerings for higher risk borrowers.

Troubled Debt Restructurings (TDRs) – Loans whose contractual terms have been restructured in a manner that grants a concession to a borrower experiencing financial difficulties. Certain consumer loans for which a binding offer to restructure has been extended are also classified as TDRs.

Value-at-Risk (VaR) – VaR is a model that simulates the value of a portfolio under a range of hypothetical scenarios in order to generate a distribution of potential gains and losses. VaR represents the loss the portfolio is expected to experience with a given confidence level based on historical data. A VaR model is an effective tool in estimating ranges of potential gains and losses on our trading portfolios.

Key Metrics

Active Digital Banking Users – Mobile and/or online users with activity at period end.

Active Mobile Banking Users – Mobile users with activity at period end.

Book Value – Ending common shareholders' equity divided by ending common shares outstanding.

Deposit Spread – Annualized net interest income divided by average deposits.

Efficiency Ratio – Noninterest expense divided by total revenue, net of interest expense.

Gross Interest Yield – Effective annual percentage rate divided by average loans.

Net Interest Yield – Net interest income divided by average total interest-earning assets.

Operating Margin – Income before income taxes divided by total revenue, net of interest expense.

Return on Average Allocated Capital – Adjusted net income divided by allocated capital.

Return on Average Assets – Net income divided by total average assets.

Return on Average Common Shareholders' Equity – Net income applicable to common shareholders divided by average common shareholders' equity.

Return on Average Shareholders' Equity – Net income divided by average shareholders' equity.

Risk-adjusted Margin – Difference between total revenue, net of interest expense, and net credit losses divided by average loans.

Part II. Other Information

Bank of America Corporation and Subsidiaries

Item 1. Legal Proceedings

See Litigation and Regulatory Matters in *Note 10 – Commitments and Contingencies* to the Consolidated Financial Statements, which is incorporated by reference in this Item 1, for litigation and regulatory disclosure that supplements the disclosure in *Note 12 – Commitments and Contingencies* to the Consolidated Financial Statements of the Corporation's 2020 Annual Report on Form 10-K.

Item 1A. Risk Factors

There are no material changes from the risk factors set forth under Part 1, Item 1A. Risk Factors of the Corporation's 2020 Annual Report on Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The table below presents share repurchase activity for the three months ended June 30, 2021. The primary source of funds for cash distributions by the Corporation to its shareholders is dividends received from its banking subsidiaries. Each of the banking subsidiaries is subject to various regulatory policies and requirements relating to the payment of dividends, including requirements to maintain capital above regulatory minimums. All of the Corporation's preferred stock outstanding has preference over the Corporation's common stock with respect to payment of dividends.

(Dollars in millions, except per share information; shares in thousands)	Total Common Shares Repurchased [1,2]	Weighted-Average Per Share Price	Total Shares Purchased as Part of Publicly Announced Programs [2]	Remaining Buyback Authority Amounts [3]
April 1 - 30, 2021	24,756	$ 38.99	24,747	$ 24,102
May 1 - 31, 2021	35,799	41.76	35,798	22,703
June 1 - 30, 2021	42,129	41.52	42,128	21,067
Three months ended June 30, 2021	**102,684**	**40.99**	**102,673**	

(1) Includes 10 thousand shares of the Corporation's common stock acquired by the Corporation in connection with satisfaction of tax withholding obligations on vested restricted stock or restricted stock units and certain forfeitures and terminations of employment-related awards and for potential re-issuance to certain employees under equity incentive plans.

(2) On April 15, 2021, the Corporation announced the Board has authorized the repurchase of up to $25 billion of common stock over time. The Board also authorized repurchases to offset shares awarded under equity-based compensation plans. During the three months ended June 30, 2021, the Corporation repurchased 103 million shares, or $4.2 billion, of its common stock, including to offset shares awarded under the equity-based compensation plans. For more information, see Capital Management - CCAR and Capital Planning in the MD&A on page 22 and *Note 11 – Shareholders' Equity* to the Consolidated Financial Statements.

(3) Excludes repurchases to offset shares awarded under equity-based compensation plans.

The Corporation did not have any unregistered sales of equity securities during the three months ended June 30, 2021.

CERTIFICATION PURSUANT TO SECTION 302
OF THE SARBANES-OXLEY ACT OF 2002
FOR THE CHIEF EXECUTIVE OFFICER

I, Brian T. Moynihan, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Bank of America Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
   a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
   d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
   a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
   b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

BANK OF AMERICA

Coming together in new ways

Annual Report 2020

CONTENTS

A letter from Chairman and CEO Brian Moynihan

To our shareholders and clients,

To my teammates,

To leaders and partners in the communities
we serve across the U.S. and around the world,

I hope this finds you safe and well.

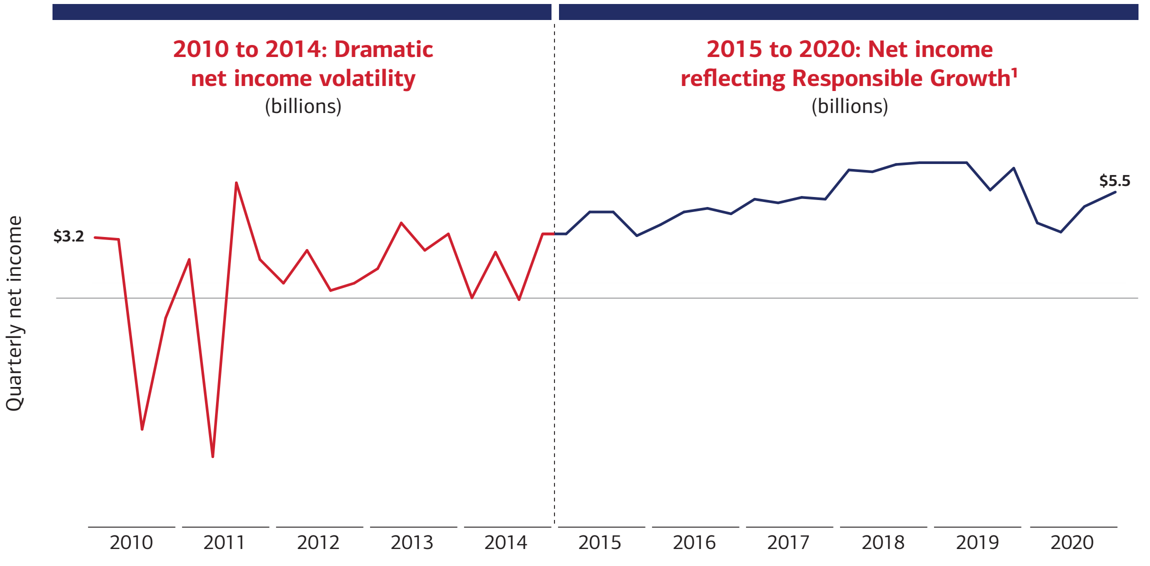
It is my pleasure to share with you the 2020 Bank of America Annual Report. Our report documents how your company responded to the impacts — both humanitarian and financial — of the global health crisis. It describes how we responded to the social and racial justice issues that moved to the forefront in 2020. The pages also tell the story of how our company came together in new ways to deliver for our shareholders, our teammates, our clients, our communities *and* to help address society's biggest challenges.

I begin this letter by thanking my 213,000 teammates and our senior management team. I thank them for their extraordinary efforts over the past 12 months, and for everything they do to support our clients, and each other, every day.

I would also like to thank our Board of Directors for their leadership and guidance throughout 2020. In particular, I would like to extend my gratitude to our outgoing Lead Independent Director, Jack Bovender, for all he has done for our company and those we serve. As we announced in September 2020, Lionel Nowell III takes over this important role. Lionel is an experienced leader and has been a valued member of our Board for the past eight years. **Jack and Lionel share their perspectives on the past year, and what lies ahead, on page 11.**

Looking at our 2020 results, one thing is clear: Our decade-long focus on Responsible Growth prepared us well for this crisis. It allowed us to be a source of stability for our customers and clients during challenging times, to continue supporting the communities in which we work and live and deliver more consistent results for our shareholders through a well-understood risk framework. You can see the impact of Responsible Growth in the chart below.

Despite the impacts of the global health crisis, which resulted in a historically low interest rate



[1] 4Q 2017 net income of $5.3B represents a non-GAAP financial measure. GAAP net income of $2.4B excludes $2.9B related to the adoption of the Tax Cuts and Jobs Act.

environment and a period of market volatility, your company earned $17.9 billion in net income, or $1.87 per share. Moreover, we ended 2020 with more capital, more deposits, record liquidity and improved capital ratios. We did this while increasing support for our clients.

In March of 2020, the stock price for banks in general saw a sharp drop as the health crisis unfolded and investors contemplated potentially large credit losses and revenue declines from interest rates and a paucity of economic activity. From those lows, bank stocks made a steady recovery as fears moderated, ending the year modestly down from the start of the year.

Our stock price declined 49% in March from the beginning of 2020 and then saw a 68% recovery, ending the year down 14%. This was in line with the broader bank index but below the broader market rise of 16%. Despite the 2020 decline, our stock price has outperformed the broader bank index on a 3-year and 5-year basis. As we prepare to issue this report in late February 2021, the price is up 14% this year, reflecting the improved economic outlook.

During 2020, we delivered $12 billion in capital back to shareholders through dividends and net share repurchases. We did this even as we halted share repurchases late in the first quarter of 2020 in line with additional federal bank regulatory restrictions. We have resumed share repurchases in the first quarter of 2021 from a position of strength with $36 billion of capital above our minimum regulatory requirements.

Our results in 2020 built onto a solid foundation established by focusing on Responsible Growth for the past decade. We have a strong balance sheet, a best-in-class suite of products and capabilities — including our industry-leading digital capabilities — and a global team of dedicated professionals that is second to none. We are well-positioned to continue delivering for our shareholders, and all those we serve, in 2021 and beyond.

We believe we must continue to deliver these strong results *and* help make progress on important societal priorities. That is core to how we run our business and drive Responsible Growth.

In 2020, we also continued to make meaningful progress on important issues that affect us all. During the year, we accelerated our longstanding work to promote racial equality and economic opportunity, with a $1 billion, four-year commitment aimed at supporting jobs, healthcare, housing and businesses. While we were pleased to see commitments being made by other companies and organizations, we have moved quickly to get money moving to our priority areas of focus. So far, we have invested in jobs and skills training at 11 historically Black colleges and universities and 11 community colleges. We have delivered over 20 million masks and other personal protective equipment (PPE) to

Chairman and CEO

community partners, nonprofits, and other venues. We have invested in 14 Minority Depository Institutions (MDIs) to help them grow and serve their communities. We have increased our overall commitment to Community Development Financial Institutions (CDFIs) to $1.7 billion — making Bank of America the largest private sector CDFI funder. And, we have agreed to invest in 61 minority-owned or -focused venture capital or private equity funds in communities around the U.S., which will deliver more equity into thousands of minority-owned small businesses. **You can find out more about our commitment to racial equality and economic opportunity on page 33.**

We also continued to support the transition to a low-carbon, sustainable economy, through our operations, our business activities and our partnerships. This includes our commitment to a goal of achieving net-zero carbon emissions by 2050.

Responsible Growth

There are four pillars to Responsible Growth.

- We must grow in the market, no excuses.
- We must grow with a customer focus.
- We must grow within our risk framework.
- We must grow in a sustainable manner.

I'll discuss each of these in turn, and the ways our team in 2020 delivered on these pillars.

Grow in the market, no excuses

What could we do in an economy to help our clients and grow?

We supported our clients in lockdown with our various customer assistance programs. We supported small businesses with Paycheck Protection Program (PPP) loans. We supported wealth management clients with advice, expertise and execution in volatile markets. We supported commercial clients with our strong balance sheet that provided more than $70 billion in loans in a few-week period, and raised $772 billion in capital over the course of the year. For institutional investors, it meant having the market expertise and insights, trading capabilities and access to enable them to navigate through.

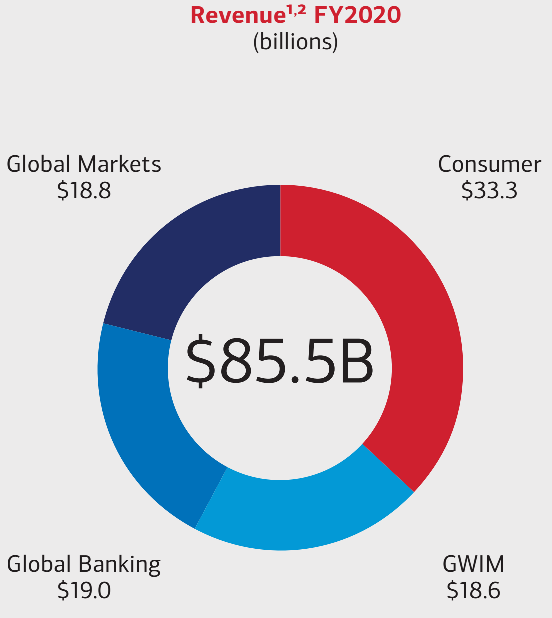
But we believe it was our planning and investments over the past decade that made this all work. We supplied needed capital and liquidity to borrowers. Our investments in digital client interfaces across our client groups allowed us to maintain a close relationship with our clients, as they moved seamlessly to digital check deposits, payments, banking and investing. On the commercial side, we had invested in our CashPro application, which allowed our clients to safely and securely move billions of dollars every day. We used automated signature capabilities to allow clients to complete estate plans, borrow or invest — all with the same security as doing it in person. With institutional investors, we moved quickly to supply liquidity and a strong and resilient platform to support their activities and help assure stability of the financial system.

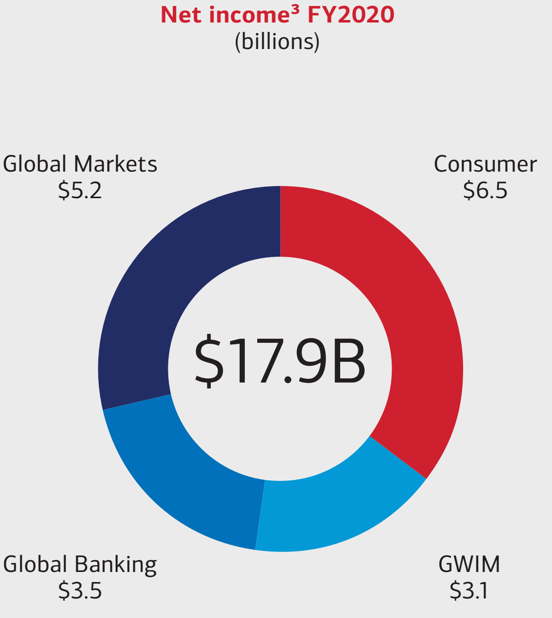
All of this, and more, allowed us to continue to serve clients relatively uninterrupted by the pandemic, even as volumes surged. We played our part, with our industry colleagues, in helping ensure economies around the world, and here in the U.S., recover more quickly. In the end, that is the role of the bank. Your company executed that role well.

And we grew.

In 2020, average deposits increased 18% year-over-year to approximately $1.6 trillion. In Consumer Banking, we added $115 billion in average deposits during the year, cementing our position as the #1 bank in the U.S. by retail deposits. We leveraged our leading digital capabilities to serve our consumer clients how, when and where they chose to bank with us. Across all consumer sales in 2020, 42% of sales came through digital channels.

During the year, we also enrolled more than one million clients into our flagship loyalty program, Preferred Rewards, driving total membership to 7.2 million. Preferred Rewards recognizes





Note: Amounts may not total due to rounding.
[1] Business segment results are reported on a fully taxable-equivalent (FTE) basis with remaining operations recorded in All Other with revenue of ($3.6B).
[2] Total revenue, net of interest expense, on a GAAP basis is $85.5B and $86.0B on an FTE basis, a non-GAAP financial measure. The FTE adjustment is $499M.
[3] Net Income of $17.9B includes a net loss of $407M in All Other.

and rewards clients for their entire relationship with us, and we continue to see 99% retention rates from our members.

We brought our top retail bank brand to new markets in the U.S., including markets in Ohio and Utah, while building our presence in existing markets. According to our internal research, we continued to gain share in key markets. In 25 of the top 30 markets across America — representing over half of the U.S. population — we now hold the #1, #2 or #3 position. That is twice as many markets as our closest peer and includes 14 markets in which we hold the #1 position.

During the year, our wealth management team found new ways to connect with, and deliver for, our Merrill and Private Bank clients. **On page 22, we take a closer look at how our advisors continued to support clients and helped them navigate a changing environment.** We added roughly 22,000 Merrill and 1,800 Private Bank relationships in 2020, and ended the year with client balances at all-time highs of $3.3 trillion.

For the companies we serve, we begin with our small business clients. Apart from the role we played as the largest lender in the federal government's PPP by number of loans, we also continued as the largest small business lender in the country overall, ending the year with more than $32 billion in small business loan balances. We also deployed our new merchant services capabilities.

For our commercial clients, the year was difficult as they had to absorb massive changes to the business cycle brought by the health crisis. We were there for them. Early in the year, we supported their borrowing rush as they sought liquidity in February, March and April. As conditions stabilized, we helped with market access for them to raise needed and permanent capital. We continued to bring digital capabilities to ensure their businesses could run smoothly, even in a work-from-home environment. The results for us were a surge in loans to these businesses. We peaked at $585 billion in commercial loans; by year-end those were down to $499 billion.

Our investment banking team recorded $7 billion in total investment banking fees and posted three of the strongest investment banking quarters in our history. Our performance in this business helped us gain market share and retain the #3 market position, thanks to the efforts of our talented team. **Matthew Koder, President of Global Corporate & Investment Banking, looks back on his team's accomplishments on page 20.**

In Global Markets, full-year sales and trading revenue for 2020 increased 18% year-over-year to $15 billion. During the year we continued to push our innovative capabilities in electronic trading forward to help win mindshare with some of our largest clients. At the same time, our own research team was again ranked as one of the top Global Research Firms by Institutional Investor—placing as one of the top two firms for each of the past 10 years. **You can read more about our award-winning research capabilities on page 23.**

Each of our businesses contributed to our results, and the diversity of our offerings served us well through a dynamic market environment. It will continue to serve us well as we look forward.

Grow by focusing on our clients

Last year, thanks to the commitment of our teammates, the strength of our platform and our focus on Responsible Growth, we achieved the highest client satisfaction scores in company history. That is a credit to each and every member of our global team, who work hard to serve our customers and clients — and exceed their expectations — in every interaction.

In 2020, that included far-ranging measures to support those impacted by the health crisis, through our own relief programs and those provided by the federal government. We processed approximately 2 million payment deferral requests as part of our Client Assistance Program. We processed more than 16 million Economic Impact Payments (EIP), totaling more than $26 billion in the initial round of U.S. government stimulus payments — and continued processing additional payments following subsequent relief legislation.

As the largest PPP lender by number of PPP loans in the first three rounds of the program, in 2020 we helped more than 343,000 small business clients — in every industry, every market — receive PPP loans, delivering more than $25 billion in PPP loan funds to businesses in need. We began accepting applications for PPP loans once again in January 2021, in line with a new round of federal PPP lending. Once again, we are among the top lenders in the program.

At the same time, we remained focused on supporting the everyday financial needs of millions of clients. With additional health and safety measures in place, our teams continued to serve individuals and businesses across our nationwide network of approximately 4,300 financial centers and 17,000 ATMs. I'd like to offer a special thanks to my teammates in the financial centers who have played an essential role for our clients and communities through this health crisis.

Not surprisingly, we also saw a growing number of clients choose to connect with us digitally during 2020. Our ten-plus years of sustained investment into technology — such as

39.3M

digital customers
at year-end, up 3% over 2019

artificial intelligence (AI) — and our award-winning digital platforms ensured we could continue to serve our clients when they needed us most.

In Consumer Banking, we ended 2020 with 39.3 million digital customers, up 3% over 2019. They connected with us nearly 11 billion times. Our roughly 13 million active Zelle® users, both consumers and small businesses, sent approximately $141 billion in transfers in 2020. To put that into perspective, that's almost 50% of the payments made by our 38 million consumers and small businesses using their credit cards.

More than 17 million of our digital banking clients use Erica®, our AI-based virtual financial assistant, to do everything from checking their balances to paying their bills. Erica will also reach out to help if, for example, a client's balance is at risk of going below $0 in the next week, or if a merchant charges them twice. Erica continues to gain knowledge and evolve in response to client needs. For example, at the beginning of the health crisis, Erica learned 60,000 new pandemic-related intents in a matter of days. In 2020 alone, Erica completed 135 million client requests.

In September, we launched LifePlan®, which gives clients the power to select what's most important to them and receive personalized insights — through both high-tech and high-touch interactions — to help them achieve their financial needs and goals. By the end of 2020, our clients had created more than 2 million plans, one of the fastest product rollouts in our history.

Our digital platforms also allow us to extend further into our communities, allowing millions of clients to access services and connect into the broader economy. In 2020, we added Balance Assist™, a low-cost, digital-only alternative to payday-type loans. Balance Assist, which allows clients to borrow up to $500 for a $5 flat fee, joins our existing suite of safe banking solutions, including SafeBalance™ and Secured Card. **D. Steve Boland, President of Retail, joins Aron Levine, President of Preferred and Consumer Banking & Investments, to discuss how these products can help provide financial freedom and stability for clients on page 18.**

$1B

In 2020, our team generated more than 1,700 ideas to drive operational excellence, **saving the company nearly $1 billion.**

Digital connectivity was also fundamental to our success in wealth management, and we saw digital engagement for wealth management clients climb to record levels. By the end of 2020, 77% of Merrill Lynch households and Private Bank clients were using online or mobile banking. Our digital platforms also allowed for effective advisor-client communications, which became a critical part of relationship building as the pandemic continued.

In Global Banking, our CashPro® platform helped more CFOs and other business leaders efficiently and securely manage their cash flow from their offices and homes—and on their mobile devices. Our roughly 500,000 CashPro users drove a 40% increase in platform sign-ins in 2020. Here, too, we applied the power of AI for our clients, digitally matching 19 million incoming receivables in a 12-month period using our Intelligent Receivables® solution.

Stepping back, what we saw in 2020 was the impact of years of investment in capabilities and digital access across our platform and our businesses. And what was unique is that even in areas where we had heretofore experienced customers or employees traditionally preferring to operate in a face-to-face, physical world, we saw dramatic changes. We had a record year in new $10 million or higher relationships in Global Wealth & Investment Management (GWIM), yet we were unable to have many face-to-face meetings. We had a record year in investment banking fees, yet all of our "pitch" meetings with clients were virtual. We saw record movement in money by our consumer customers yet we had up to 30% of our financial centers closed for safety. The implications for the long term are yet to be borne out. But we are confident that the investments we have made set us on the correct course.

I want to call out our technology and operations team, who showed creativity and excellence in execution by positioning all of our client-facing teammates to be able to operate in a work-from-home environment. In four weeks, our tech and ops team deployed 100,000 computers and screens to those teammates. It was no small task, and it enabled us to continue to serve clients who themselves were adjusting to the pandemic conditions.

Grow within our risk framework

Growing within our established risk framework is integral to how we drive Responsible Growth. Our principled approach to risk management allowed us to continue supporting our customers and clients against the backdrop of one of the worst economic declines in U.S. history, driven by the global pandemic.

At the onset on the health crisis, we took immediate action to strengthen our reserves for credit losses. We ended 2020 with nearly $21 billion in credit reserves, more than twice what we had at the end of 2019. Together with our existing capital, we have substantial reserves available to manage potential losses. Credit losses were much lower than many expected, but we were confident our underwriting would hold up, and it did. In fact, our actual charge-offs moved from $3.6 billion in 2019 to $4.1 billion in 2020, a slight increase.

On the markets side, our team led by Tom Montag and Jim DeMare navigated the markets very well and we had a strong year of trading revenue. More importantly, we provided support for our institutional clients. And we had only a handful of days with trading losses.

We continue to actively monitor and assess the impacts — both direct and indirect — of the health crisis and other potential risks through our risk management framework. And we continue to drive out operational risk from the company through our focus on operational excellence.

Grow in a sustainable manner

To drive Responsible Growth, we must ensure that our growth is sustainable. There are three complementary and interdependent tenets to how we approach sustainable growth: driving operational excellence, being the best place for teammates to work and sharing our success with our communities.

Driving operational excellence
While "operational excellence," "organizational health," "simplify and improve" and other terms we use may sound a little mechanical, they are instrumental to our success. In 2015, your company had $57 billion in expenses. In 2020, we had $55 billion, including roughly $1.5 billion in net coronavirus-related costs. Compared with 2015, we have more customers and clients and more transactions — so more work. Yet costs are down and headcount is down. During those six years, we invested about $18 billion in technology initiatives, added 15% more sales teammates, opened 300 financial centers and refurbished 2,000 more. All of these investments were made while costs came down. We continue to apply the practice of operational excellence to enable us to produce strong returns above our cost of capital while investing back into our company and our capabilities. This will provide powerful leverage as interest rates rise and the economy continues to recover and grow.

Operational excellence is as much a mindset as it is a program. It describes the ways in which we drive continuous improvement, reduce operational risk and seek to find faster, simpler and more efficient ways of working and serving our clients.

This work is fueled by the ingenuity and creativity of our teammates, who continuously look for ways we can do things better. In total, we've approved nearly 8,600 of their ideas, which commit to delivering billions in expense savings. In 2020 alone, our team generated more than 1,700 ideas that helped us define commitments to save nearly $1 billion. We reinvested those savings back into our team, our capabilities, our client experience, our communities and our shareholders.

For example, savings from operational excellence help fund the ongoing modernization of sites across our real estate portfolio, including renovating our financial centers to deliver a client-focused interior and exterior design and full support for digital transactions.

It's important to note we made investments like these in 2020 — and many more described throughout this report — while at the same time returning $12 billion in net capital to our shareholders. And — as you will see discussed elsewhere in this report — we invested in our team, including the fourth consecutive year of company-wide supplemental bonuses, increasing our minimum hourly rate of pay for U.S. employees and keeping medical expenses down for our lesser-paid teammates.

Being a great place to work for our teammates
Attracting and retaining the best talent is key to driving Responsible Growth and one of our top priorities. It helps us manage our operations, provide the best service for our clients and support our communities.

We strive to make Bank of America a great place to work for all teammates. And we fulfill this commitment by being a diverse and inclusive workplace, attracting and developing talent, recognizing and rewarding performance and supporting teammates' physical, emotional and financial wellness. **On page 26, Sheri Bronstein, our Chief Human Resources Officer, shares her thoughts on our progress in 2020 and what it means for the future.**

Our workforce must reflect the communities we serve. As highlighted in our 2020 Human Capital Management Report, we have continued to make progress in our goal to ensure diverse representation at all levels of our company. Fifty percent of our management team is diverse, and Bank of America is one of only five S&P 100 companies with six or more women on the Board. And over the past decade, the number of people of color we hire in the U.S. from universities has increased by 50%.

1 of 5

Bank of America is one of only five S&P 100 companies with **six or more women on the Board.**

$20

In 2020, we **raised our minimum hourly rate** of pay for U.S. teammates to $20.

We want our teammates to build long-term careers with Bank of America. And that starts with a competitive starting wage and benefits. We moved to our minimum hourly rate of pay for U.S. teammates of $20 — roughly $42,000 per year — one year earlier than planned. And we offer ongoing training and development resources to help those teammates grow and thrive within our organization. We hire with a career mindset. And we work to reskill our teammates.

For teammates earning lower salaries, we provide higher company subsidies for medical premiums. Since 2012, there has been no increase in medical premiums for teammates earning less than $50,000.

To support our teammates during the health crisis, at work and at home, we expanded many of our benefits and resources. This included additional support for mental health, free virtual consultations and no-cost coronavirus testing.

As the pandemic hit, we knew our teammates were going to be under pressure at home. For most of them, home was their workplace. For our 40,000 teammates with children, home was often a school or daycare. For many teammates with aging parents, home became an assisted living space. Our teammates needed help. We offered them $100 per day to hire that help. More than 3 million days of care have been provided. This helped our teammates immensely — they have told us. And it also allowed them to serve our clients better.

In 2020, we came together to support one another like never before. It was a great reflection of the commitments, the compassion and the people that make our company a great place to work.

$2B

We issued a **$2 billion equality progress sustainability bond** designed to advance racial equality, economic opportunity and environmental sustainability.

$1B

We launched a **$1 billion corporate social bond**, the first issued by a U.S. commercial bank to entirely focus on fighting the pandemic.

Sharing our success with our communities

One of the ways we ensure our growth is sustainable is by sharing our success with the communities in which we work and live. We invest significant time and money to help address issues facing our local communities and society at large, and commit all of our business activities and operations to the task.

This begins with our $250 million in annual corporate philanthropy. To this, we added another $100 million in 2020 to increase access to food and medical supplies in local communities.

Individual giving by my teammates, combined with matching gifts from Bank of America, amounted to more than $65 million in additional philanthropic support in 2020. To maximize the impact of each employee gift, we lowered the employee matching gift minimum to $1 and doubled our match for employee donations to 17 organizations through 2020.

We also support our communities through our lending and investing activities. In 2020, for example, we provided a record $5.87 billion in loans, tax credit equity investments and other real estate development solutions, and deployed $3.62 billion in debt commitments and $2.25 billion in investments to help build strong, sustainable communities by financing affordable housing and economic development across the country. Between 2005 and 2020, we financed more than 215,000 affordable housing units.

In May of 2020, we launched a $1 billion corporate social bond, the first issued by a U.S. commercial bank to entirely focus on fighting the pandemic. We followed that up with an industry-first $2 billion equality progress sustainability bond designed to advance racial equality, economic opportunity and environmental sustainability.

Our commitment to racial equality and economic opportunity demonstrates the way in which we approach major societal issues and align all of our resources to help drive progress locally. Our investments and partnerships in this work are targeted at strategic areas in which we already are a leader: jobs, healthcare, housing and businesses. By providing even sharper focus, we seek to make a lasting impact on underserved minority entrepreneurs and communities. **You can read more about how we are executing on our $1 billion commitment and a broader update on our work in sustainable finance in the discussion between Vice Chairman Anne Finucane and Global Sustainable Finance Executive Karen Fang on pages 33–35.**

The most important way we shape our engagement in local communities is through our market president organization. Our network of 90 presidents is responsible for leading an integrated team to deliver for clients, teammates and the community, serving as the chief executive for Bank of America in that market. **We talk more about how our presidents support our clients and communities on page 25.**

Driving profits and purpose

The principles of stakeholder capitalism are embedded in Responsible Growth. We deliver for our clients, our employees, our communities and our shareholders and, at the same time, do our part to deliver progress against society's biggest challenges. This includes our work to support the health and safety of our teammates, the many ways we help the communities we serve grow and prosper, our efforts to promote racial equality and economic opportunity and our ongoing drive toward a clean energy future.

Stakeholder capitalism is not a new concept, even if its recent focus makes it seem that way. As a financial institution, our success has always been tied to the success of the communities and markets we serve. In recent years, business organizations including the U.S. Business Roundtable, the World Economic Forum and others have helped create broader awareness of the ways that companies must think about delivering long-term value — for shareholders, of course, but for all of our other stakeholders, too.

Helping address societal issues can stimulate the commitment of private sector capital to help drive even more progress. And there's growing evidence to back that up. As our Global Research team has found, companies that pay close attention to environmental, social and governance (ESG) priorities are much less likely to fail than companies that do not, giving investors a significant opportunity to build investment portfolios for the long-term. And — through research and our own lived experience — we know that ESG commitments can translate into a better brand, more client favorability and a better place for our teammates to work.

There is an important discussion underway about the role capitalism plays in our society and the ways in which it must evolve to ensure all participants in our economic system are treated fairly and rewards are available equitably. Public companies have an important role to play to help drive that discussion. At Bank of America, we embrace our dual responsibility to drive both profits *and* purpose. And we work with organizations and leaders around the world to champion these ideals and drive meaningful progress. We need a way to measure that and in 2020 we made substantial progress on that front, too.

Measuring and delivering long-term value

To help society make progress toward important goals you need to know two things.

First, you need to understand what society's priorities are. And we do. The countries of the world identified those priorities in 2015, when nearly 200 countries agreed to the United Nations (U.N.) Sustainable Development Goals (SDGs). The SDGs reflect 17 categories of societal priorities that

Measuring stakeholder capitalism

The International Business Council, with the collaboration of the accounting firms Deloitte, KPMG, PwC and EY, compiled a set of common ESG Stakeholder Capitalism Metrics disclosures. These metrics are compiled from leading ESG standards-setters, including the Task Force on Climate-related Disclosures (TCFD), the Sustainability Accounting Standards Board (SASB), the Global Reporting Initiative (GRI) and others. As discussed in CEO Brian Moynihan's shareholder letter in this report, the goal of the Stakeholder Capitalism Metrics is to provide investors and other stakeholders a common set of standards by which to evaluate the progress the company is making to address the societal priorities agreed to in the SDGs. The metrics include non-financial disclosures in four categories: people, planet, prosperity and principles of governance.

Nearly 70 global companies have agreed to begin using the Stakeholder Capitalism Metrics, and many more are evaluating them for their own use. Bank of America is a founding member of His Royal Highness the Prince of Wales' Sustainable Markets Initiative (SMI), which seeks to harness the creativity, the innovation and the balance sheets of businesses around the world to help drive long-term growth in a globally sustainable fashion. In December 2020, under the guidance of His Holiness Pope Francis and His Eminence Cardinal Peter Turkson, Bank of America joined an alliance of business leaders and companies around the world as part of the Vatican's Council for Inclusive Capitalism (VCIC). Comprising companies that collectively have more than 200 million employees from over 163 countries, the VCIC illustrates how capitalism can take the lead in creating economic growth that is fair, responsible, trusted, dynamic and sustainable. The SMI, the VCIC, and similar organizations recognize the Stakeholder Capitalism Metrics as an important step toward providing the disclosures needed to measure the progress that private sector capitalism can help deliver in addressing important societal priorities.

Given the cross-industry application of this set of common metrics, not each standard will apply to each company that is disclosing. Where a disclosure is not provided or not linked to another Bank of America disclosure, we provide a brief explanation. We share the long-term objective of other companies, asset owners and asset managers, key government regulators and the standards-setters themselves that eventually there will be a single set of non-financial ESG disclosure standards to help stakeholders evaluate companies in the same fashion that standard financial disclosures now permit.

address equality of opportunity, affordable housing, prosperity, access to clean water, renewable energy, and other priorities, with specific goals to be met. Leaders in each country agreed these goals are the ones we need to address to build a sustainable future and create opportunity and prosperity for all.

Second, you need to know how to measure progress. The International Business Council (IBC), which I am privileged to chair, has compiled a set of Stakeholder Capitalism Metrics aligned to the SDGs. These metrics create a consistent way of measuring companies' long-term value, across industries. This, in turn, helps direct investment toward high performers and align capital to progress on the SDG and ultimately defines stakeholder capitalism. It also aligns capitalism's innovation, its entrepreneurship and its massive resources to the progress, which won't be made without the private sector.

In September, the IBC — working with the accounting firms Deloitte, EY, KPMG and PwC — released a set of 21 core metrics, and 34 expanded metrics, aligned to the themes of people, planet, prosperity and principles of governance. As of January 2021, Bank of America and nearly 70 other global corporations have agreed to implement reporting on the Stakeholder Capitalism Metrics, and the coalition continues to grow. **Later in this Annual Report you can see our initial set of Stakeholder Capitalism Metrics disclosures.**

At Bank of America, we drive progress on the SDGs through all of our efforts and activities. We do so through our operations, our philanthropy, our human resources practices, our client financing capabilities and the guidance we provide to investor clients. We bring our $2.8 trillion balance sheet, our $55 billion expense base and the trillions of dollars we raise each year for our clients to the task. And, critically, we commit the considerable ingenuity, innovation and passion of our team.

For over a decade, we have focused on driving Responsible Growth so that we can create value for every stakeholder and for society — through every economic environment. Our focus on Responsible Growth positioned us well as we faced the unforeseen challenges of 2020, and positions us well as we look to the future. We remain committed to delivering for our shareholders, our teammates, our clients, our communities *and* to making a positive impact on the world for years to come.

On behalf of my 213,000 teammates, our management team and the Board of Directors, I thank you for your support of Bank of America.

Brian Moynihan
March 1, 2021

A message from outgoing Lead Independent Director Jack Bovender

Dear shareholders:

Thank you for investing in Bank of America. The directors bring independent and diverse perspectives to our task of helping create long-term value for you. We represent a range of expertise, backgrounds and skills, including chief executives and others who have served in senior risk, operations, finance, technology and human resources positions.

This mix of expertise and experience is beneficial throughout the year, including in the fall when the management team presents the company strategy for the board to review and approve. We oversee the execution of the strategy through regular, systematic interaction with company management. In performing our duties, we are mindful of developments in the markets, the economy and geopolitical issues that may impact the execution of the strategy.

Our responsibility is to assess opportunities and risks and determine how well the company is adhering to the tenets of Responsible Growth that drive the company's strategy. CEO Brian Moynihan discusses this in greater detail in his nearby letter and you will see it brought to life in the articles and disclosures throughout this report. The tenets of Responsible Growth include the company's ESG practices. Our Corporate Governance, ESG and Sustainability Committee reviews and reports to the board on the company's activities in these areas. This includes, for instance, the company's recently announced commitment to net-zero greenhouse gas emissions by 2050.

As many of you know, I will be retiring from our board at the time of the annual meeting. Since becoming the Lead Independent Director of Bank of America, I have had the privilege of meeting annually with many of our shareholders. The feedback from these meetings has been invaluable and I have routinely shared it with the board. It has significantly shaped our approach to fulfilling our governance responsibilities. For more detailed information, please review this 2020 Annual Report, our 2021 Proxy Statement and our Human Capital Management Report.

At the annual meeting, Lionel Nowell will assume the role of Lead Independent Director. Lionel is totally committed to his new role and will continue our practice of meeting regularly with our shareholders.

It has been both an honor and pleasure to serve as Lead Independent Director. On behalf of Brian, Lionel and the other directors, thank you for investing in Bank of America.

A message from incoming Lead Independent Director Lionel Nowell

To my fellow shareholders:

I join Brian Moynihan, Jack Bovender and the other directors in thanking you for choosing to invest in Bank of America. I began my service as a Bank of America director in January 2013, and I have appreciated the opportunity to oversee the development and execution of the company's strategy for long-term Responsible Growth. Fifteen of the company's 16 directors are independent and we bring our unique perspectives to each of our board and committee meetings.

Our discussions among ourselves and with the company's management are grounded in facts and data. I am particularly pleased with the level of detail we regularly disclose to our investors, including in the 2020 Human Capital Management Report and other non-financial disclosures we make to give you as clear a picture of our company as we can.

I also value the insights I receive when I speak with shareholders; I intend to maintain a consistent rhythm of engagement in the same fashion as my predecessor, Jack Bovender. I want to thank Jack for his impressive leadership as our Lead Independent Director, and I look forward to assuming those responsibilities after the 2021 annual meeting.

Thank you again for your investment in our company.

Addressing a global health crisis as one company

We're united in helping our teammates, clients and communities — when and where they need us most.

In 2020, our company rallied as we never have before — across every business and in cities and towns around the world — to respond to the health and humanitarian crisis affecting individuals, families and business owners in the communities where we live and work. Our services are essential to our clients and to the economy. Through our global presence and longstanding focus on addressing critical social issues, we've taken care of our teammates and their families, delivered for our clients when and where they needed it most and supported relief efforts around the world. And, together, we ended 2020 stronger and more committed to the people and causes we care about.

Supporting the health and safety of our teammates

Our teammates' health and safety is always our top priority. Since the coronavirus was first identified, we have taken many broad-ranging steps to protect all of our teammates and to support their families.

- **We seamlessly transitioned about 85% of our employees to work from home**, including any teammate who identified as high-risk. For employees who identify as high-risk, many have been redeployed to roles they can perform remotely.
- **To ensure our employees maintain access to critical medical resources**, we have provided no-cost telehealth resources with 24/7 virtual access to general medicine doctors and mental health specialists, home delivery service of preventative prescription medications with a temporarily waived refill waiting period and no-cost coronavirus testing.
- To help address the personal impacts the environment has had on teammates and their families, we have **expanded our back-up childcare for employees in the U.S.**, including providing nearly three million days of back-up child and adult care and an investment of nearly $300 million in child and adult care reimbursements in 2020 to help offset costs for our teammates. We have continued that support in 2021.
- Additionally, we have provided a variety of **resources to help parents and caregivers as their children return to school** (whether in-person or virtually), including a dedicated back-to-school website with webinars, articles, weekly tips and discounts on computers, devices and school supplies.
- We also have added **new physical and mental health resources**, such as training for stress management, resiliency and mindfulness — and provided additional vacation and personal day flexibility.
- We have expanded our dedicated team of **Life Event Services (LES) specialists** to provide personalized support to teammates impacted by the coronavirus, and we continue to offer 24/7 confidential counseling through our **Employee Assistance Program (EAP)** for teammates and their immediate family members.

Additionally, we have taken specific actions to support the health of our thousands of teammates working in the office — in our financial centers, operations centers and trading floors — and to recognize all our employees are doing in support of our clients, including:

- **Temperature checks, daily health screenings and onsite nurses** at many of our sites. We will continue to expand these measures prior to additional employees returning to the office.
- **Onsite coronavirus testing** introduced for employees working **in our financial centers and administrative buildings** with more than 100 employees working in the office
- **Enhanced deep cleanings** of our facilities, installing thousands of **wellness barriers** and putting **physical distancing markings** in place for our employees and clients
- **Special compensation programs**, including supplemental pay, enhanced overtime pay and other special incentives for employees working in our offices and buildings to serve clients
- **Transportation and meal subsidies**, delivering more than three million meals to employees to-date

These are just some examples of how we have supported our teammates and their families during this critical time. For more information on these and other programs and benefits we provide, read about our response to the coronavirus in our 2020 Human Capital Management Report.

Delivering for our clients

When our clients needed us most, our teammates redoubled efforts to help clients navigate the changes and challenges of 2020 in new and creative ways: transitioning from in-person to virtual interactions, using new technologies and launching client relief efforts.

Employees around the world continued to provide advice, guidance and access to all our capabilities to help clients meet their financial needs. In particular, teammates have been proactively reaching out to clients across all businesses, including by sending millions of emails and placing outbound calls to Consumer & Small Business clients, holding thousands of calls, meetings and broadcasts to actively advise and connect with Merrill Lynch Wealth Management and Private Bank clients, and issuing proactive guidance and market insight from our BofA Global Research and Investment Insights teams through multiple channels, including virtual investor conferences.

Our employees have also delivered critical financial relief for clients through our programs as well as efforts launched by the federal government.

Specifically, we helped 343,000 small business clients receive loans through the Small Business Administration's Paycheck Protection Program — extending more than $25 billion — and processed more than $26 billion of EIP for clients in 2020. We also processed nearly two million payment deferral requests.

343,000

We have **helped 343,000 small business clients receive loans** through the Small Business Administration's PPP.

Investing in our communities

Additionally, to help address the impact of the coronavirus in our communities, we donated important PPE to communities across the U.S., including more than 22 million face coverings, nearly 3 million gloves and more than 17,000 cases of sanitizer through early February 2021.

We pledged $100 million toward medical supplies, food security and other vital support, and an additional $250 million to community development financial institutions (CDFIs) to provide more companies and not-for-profits access to important capital.

And, in recognition of the broad and deep impact the humanitarian crisis is having on communities and people of color, we have made a $1 billion, four-year commitment to accelerate work underway to help advance racial equality and economic opportunity — specifically focused on workforce development, healthcare, housing and small-business assistance.

Looking ahead to 2021

While we made a tremendous impact in supporting our teammates, clients and communities in 2020, our work isn't finished. The health crisis continues to affect the global economy as well as individuals and communities around the world. Our focus now is what else we can do — and how we can do it better. Throughout 2021 and beyond, we remain resolute in how we meet our clients' changing needs, how we take care of our teammates and how we help our communities move forward in meaningful ways.

Working together to meet clients' changing needs in a challenging year

Q&A with D. Steve Boland, President, Retail and
Aron Levine, President, Preferred and Consumer Banking & Investments

In 2020, Steve and Aron worked together to deliver exceptional service and a full suite of products and platforms to help make our clients' financial lives better.

Q. What did you learn from clients last year, and how did you respond to their changing needs?

Steve: Our clients needed to know that we would stand by them and help provide safe and reliable ways to help them manage their finances any time and any way they choose. We found that the best way to do this — and what our clients are most comfortable with — is through our award-winning digital capabilities. Our high-tech and high-touch approach means that between our full-featured mobile and online platforms and the expert, personal service we offer in our financial centers, we believe we can quickly adapt and respond to clients' evolving needs. In 2020, we used our Client Assistance Program to help clients experiencing hardships related to the impact of the coronavirus and provided financial relief through the Coronavirus Aid, Relief and Economic Security Act and the PPP, as well as by processing EIP.

Q. How is Bank of America meeting the needs of today's mass affluent clients?

Aron: Mass affluent clients have more diverse needs than ever before and are looking for advice and education to help them meet their banking, lending and investing goals. Our Preferred business is designed to provide these clients with streamlined ways to manage their finances and obtain advice and guidance when and wherever they want. We provide extensive rewards and benefits across their entire relationship with us — the more they do with us, the more their benefits grow. Throughout 2020, our high-tech digital capabilities together with our personalized high-touch approach allowed us to deliver a more intuitive and efficient banking experience for our clients across all of our channels, providing the expertise of financial professionals in our financial centers, Merrill offices, digitally and over the phone.

Q. Bank of America launched Balance Assist last year. What is it, and why was it the right thing to do?

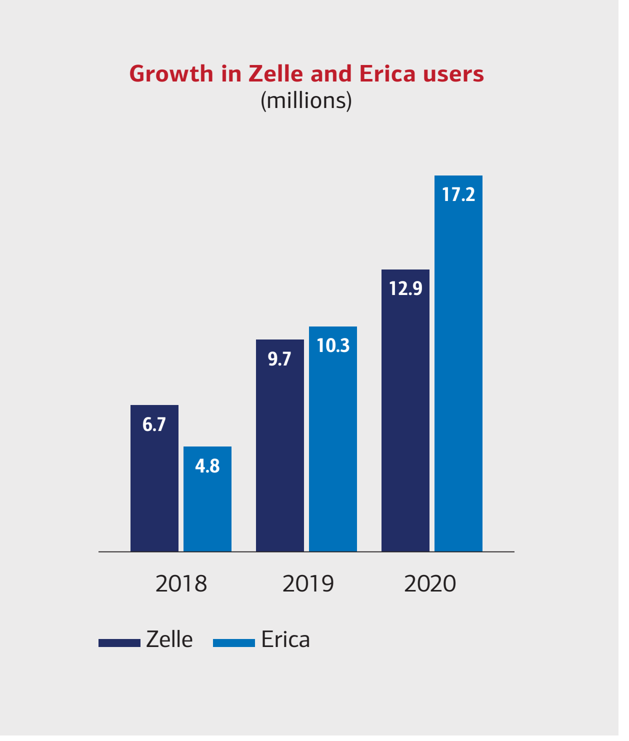
Steve: Balance Assist provides a unique low-cost, digital way for our clients to manage their short-term liquidity needs, borrowing only the amount they need, up to $500. We believe people want the power to achieve financial freedom and stability, and are seeking simple, clear solutions and advice

"We're in an advantageous position to provide the solutions and advice our clients need while helping them build their financial acumen."

to help them along the way. Balance Assist is the latest in a set of transparent, easy-to-use solutions to help our clients budget, save, spend and borrow carefully and confidently. With solutions like SafeBalance Banking®, the Keep the Change® savings program, our secured credit cards and our affordable homeownership options, we're in an advantageous position to provide the solutions and advice our clients need while helping them build their financial acumen.

Q. Clients often begin a financial relationship with Bank of America as young adults then progress to Retail, Preferred and beyond. How is Bank of America equipped to help clients at every stage of life?

Aron: We are committed to meeting the full range of our clients' needs, at every stage of their financial lives. To do so, we strive to develop strong partnerships across our Retail and Preferred businesses, as well as with Merrill and the Private Bank, to serve the needs of our clients along the full wealth spectrum. We introduced Bank of America Life Plan® to help clients set and track progress on their short- and long-term financial goals based on their life priorities and relationship with us. We've also invested heavily in providing quality financial education and developing industry-leading tools and resources, like Better Money Habits® and our new Idea Builder to help ensure clients are banking and investing with their financial goals in mind. Together, we offer a comprehensive relationship, and provide a streamlined way for clients to manage their finances with advice and guidance that grows along with them.



"We are committed to meeting the full range of our clients' needs, at every stage of their financial lives."

Growth of digital banking, lending and investing at Bank of America

In 2020, our clients depended on our digital capabilities more than ever before, with 69% of our Consumer, Small Business and Wealth Management households generating nine billion logins.

To better serve our clients, we invested in new technologies and enhanced our industry-leading digital capabilities, developed and deployed by Head of Digital David Tyrie and his team, in partnership with Chief Information Officer and Head of Consumer, Small Business & Wealth Management Technology Aditya Bhasin and his organization in Global Technology & Operations.

Digital accounted for 42% of consumer sales, and our Consumer & Small Business households were reliant on our core digital capabilities, such as our digital financial assistant Erica®, Zelle® and Mobile Check Deposit, among many others, as well as our virtual (phone, video and chat) channels. The number of Erica users grew 67% over the course of the year, and Erica has helped clients with over 200 million requests since launch in 2018. Notably, Zelle transaction volume grew 71% year-over-year. Our automated channels (mobile, online and ATMs) accounted for 84% of deposits in 2020, up from 78% in 2019.

We deliver a wealth of services through our mobile and online banking, ATM and Erica platforms, and are constantly exploring ways to expand, interconnect and perfect these tools to deliver a more seamless, personalized experience for each client that spans and supports their entire relationship with us.

Delivering for our clients with defining differentiators

Q&A with Matthew Koder
President, Global Corporate & Investment Banking

For our Global Corporate & Investment Banking teammates and operational specialists, close coordination and enhanced communication was key to providing optimal financing and strategic solutions for clients while winning their confidence in 2020.

Q. How did your business stand out in 2020?

Matthew: Despite last year's unprecedented uncertain market environment, we were relentless in helping our clients and distinguishing our business with many leading, innovative solutions. We provided support by advising across the entire capital structure and executing transactions across loans, bonds, convertibles, follow-ons, IPOs, private capital markets, mergers and acquisitions and more. Through it all, we believe the high volume of deals and transactions we completed on behalf of our clients repeatedly showed we had their trust and that our integrated corporate banking, investment banking and capital market services — along with the bank's strong balance sheet, highly developed global platform and innovative solutions — were our defining differentiators.

While 2020 may have physically separated us from our clients, it didn't dampen the opportunity to stay connected, deepen relationships and drive enhanced value. We significantly increased the level of our communications with our clients and expanded our client base by leveraging local coverage teams and cross-business integration opportunities. We believe the more clients do with us, the more value we can offer them from our integrated resources and expertise. In addition, despite the complexities of the environment, we continued to enhance our client-facing platforms at a record pace to drive connectivity and efficiency and deliver smarter, faster and more secure digital experiences for clients.

Q. What were some of your key accomplishments in 2020?

Matthew: When our clients needed a strong financial partner through the crisis, we were committed to be there — approving over $100 billion in credit across approximately 500 requests. In addition, our team's resilience and the seamless strength of our connections positioned us as the industry leader in re-opening the capital markets after the initial market dislocation resulting from the pandemic. By the end of 2020, we helped raise approximately $772 billion of capital in the global capital markets. This leadership and experience further provided us with critical insight into investor receptivity, which allowed us to advise our clients on optimal financing solutions across products, markets and geographies throughout the year.

We believe all of these efforts resonated with our clients and translated into our ability to increase our investment banking fees by 27% in 2020. This resulted in a total of $7.2 billion in fees, which was a record for a full-year and also included three of the strongest quarters in our company's history. In addition, we increased our investment banking industry ranking to #3 and grew our market share by 70 bps — including our highest ever share in equity capital markets and mergers and acquisitions. We see all of these as valuable indicators of our clients' confidence in our people and capabilities.

Q. What impact did your business make on sustainable finance in 2020?

Matthew: Leadership in ESG and sustainable finance are valuable competitive differentiators for Bank of America. We're always looking for innovative solutions for investors to support social and environmental change. The past year was particularly meaningful to us because our bankers and operations teams drove a number of industry-leading achievements.

For example, we were the #1 global underwriter of corporate ESG-related bonds. In addition, we helped launch the world's first sustainability-linked bond and led the first green convertible bond in the U.S. with a designated green use of proceeds. This particular accomplishment represented an important, innovative landmark, as it was the first time sustainable finance tools crossed over into the equity-linked market. We also underwrote nearly $50 billion in coronavirus-related social bonds, helping a broad audience from corporations to national governments finance their pandemic responses.

Strong interest from our clients in these bonds shows that companies can do good *and* do well. There is a growing desire around the globe to support investments that have a positive societal impact. And, we're proud to be at the forefront in delivering these solutions.

Q. Looking to 2021 and beyond, what do you want your clients to know?

Matthew: That we will continue to be there for them. In the long shadow of the health crisis and amidst so many transformational changes, we will continue to be there for our clients as their steadfast and trusted partner. We are committed to leveraging our resources and franchise to deliver for them — and grow with them — as the recovery takes root.

Making significant progress internationally

A message from Bernie Mensah
President, International

Our international presence, which spans approximately 35 countries and territories, is vital to the thousands of corporate and institutional clients that we serve. We strive to provide rapid, on-the-ground access to our expansive platform and capabilities, exceptional market insight and a talented, diverse and dedicated employee base. Never has this been more important than in 2020, a year of significant progress for our company internationally, notwithstanding the challenges of the health crisis.

In Asia Pacific, we generated record revenues participating in the rapid growth of capital markets in the region and connecting investment capital to significant opportunities presented in many of the world's fastest growing large economies. From China to Australia, and India to Japan, we provided critical advice on multiple transactions, helping clients to access primary capital and market liquidity as needed.

In Europe, Africa and the Middle East, despite the backdrop of more challenging economic conditions and political uncertainties, we continued to see our franchise advance with important new client gains in many product areas. In addition, after nearly four years of preparation, we successfully completed our thorough Brexit planning, making the necessary adjustments to ensure we could continue to seamlessly and efficiently service all clients in both the E.U. and the U.K. from our key hubs in Dublin, Paris and London and additional local offices. With Brexit uncertainties behind us, we now look forward to continuing to expand our market share across all our lines of business in the region.

We now are focused on building on our current momentum by continuing to drive Responsible Growth globally and meeting client needs in the year ahead.

Delivering innovative wealth solutions and exceptional client service

Our focus on supporting our clients in Merrill Lynch Wealth Management and Bank of America Private Bank is stronger — and more important — than ever before. To meet clients' diverse needs and maintain the highest level of service as we helped them navigate the changes 2020 presented, our advisors created new ways to deliver innovative solutions and the power of Bank of America's capabilities and technology. As a result, we forged even deeper, more meaningful connections with our existing clients, while adding thousands of new relationships — and improving client satisfaction across the board.

Running a relationship business when people can't come together
As the environment changed, our wealth management businesses quickly transitioned to connecting with clients in new ways, including meeting virtually. Through rapid deployment of Webex video conferencing, 25,000 wealth teammates held approximately 375,000 virtual client meetings — five times more than the year before — engaging clients in wealth, estate and philanthropic planning conversations. Our teams also stayed connected virtually, setting strategy, sharing peer-to-peer learning and insights and recognizing success in new ways.

Expanding digital capabilities to meet clients' needs
Throughout the year, we added a steady stream of digital enhancements to transform how we deliver advice and service. Working closely with our clients, we empowered them to embrace our digital innovations so they could access information, execute transactions and seamlessly collaborate with their advisors.

For example, clients now use Mobile Easy Sign digital signatures for more than 80% of account opening and maintenance tasks. Through the Client Engagement Work Station, advisors can view all critical information regarding clients' accounts which helps deliver a great experience. Another innovation, the Personal Wealth Analysis, is a single tool connecting clients' goals to investment solutions.

The bank's digital leadership also made it easier for us to provide more comprehensive service. With one click, clients can deposit checks, make transfers, pay their mortgage and see their credit card activity. During 2020, 77% of wealth management clients used our online or mobile platforms and opened 107,000 bank accounts.

The importance of advice and guidance in a changing environment
Throughout 2020, our clients and families expressed a greater need for comprehensive and personalized financial advice than at any time in the past. Our Chief Investment Office helped answer the call by providing valuable insights through its rapid-response commentaries, as well as through its industry-leading thought leadership and investment strategies, the latter comprising more than 100 managed investment platforms.

Building wealth management for the future
In 2020, we continued to carry out our vision to be our clients' trusted partners — providing support, helping them meet their needs and achieve their goals by providing helpful advice and service at every stage of their financial lives. We are led by advisor teams with a passion to serve and excel. Our exceptional colleagues are winning more top rankings than any other firm and multiple awards for their customer service and philanthropy expertise. And we are becoming more diverse, better reflecting the families, enterprises, institutions and communities we serve.

We believe Bank of America's wealth management businesses are strongly positioned for the future, ready to answer the next set of challenging questions that comes. We will continue to strive to be an industry leader, and we will judge our performance on our success in helping our clients achieve their goals.

What sets us apart: BofA Global Research

Candace Browning
Head of Global Research

Under the leadership of Candace Browning, BofA Global Research is constantly evolving with a singular focus — to best serve the needs of our clients. The division was named Top Global Research Firm by Institutional Investor magazine from 2011-2016 and in 2019, and the No. 2 firm in 2017, 2018 and 2020. More information about these awards can be found at *https://go.bofa.com/awards.*

A team of more than 675 analysts located in 20 countries provides recommendations on 3,300 stocks and 1,350 corporate bond issuers globally across 24 sectors, as well as forecasts for 56 economies, forecasts for 26 commodities and recommendations on 47 currencies. The goal is to create innovative, collaborative and forward-looking research and deliver it in a variety of ways that suit our clients.

44,000+

Delivered **more than 44,000 research reports**

"Through strategic innovation and collaboration across regions, sectors and disciplines, our mission is to transform information into actionable investment insight," said Browning.

From major world events to deep-dives into sectors and industry-leading research on ESG impacts, the team leverages its knowledge, relationships and cutting-edge technology to uncover insights and trends.

In 2020, during a year of unprecedented market volatility, BofA Global Research demonstrated its commitment to our clients by delivering more than 44,000 research reports and hosting nearly 3,000 conference calls.

Serving our clients and communities through technology

Through our Global Technology & Operations team, we're providing industry-leading capabilities to drive client service and deepen relationships, faster and better.

There is no question that the events of the past year accelerated the use of digital capabilities by our clients across every line of business, with nine billion online and mobile logins in our consumer and wealth management businesses alone. We saw record-setting levels of use of our digital and electronic channels to conduct every element of our clients' business — investing, savings, all the way up to our large institutional customers.

People are interested in virtual connectivity and its ability to augment and, in some cases, replace physical connectivity. Add in the fact that we had no choice but to connect virtually, and our digital capabilities really worked to our advantage. 2020 has shown us that digital adoption will continue to grow.

Our clients' rapid adoption of digital capabilities was made possible by work we began a decade ago. Back then, we started to simplify and modernize our technology and infrastructure, an intensive transformation that would support our businesses, help reduce risk and improve our competitive cost position. Through that work, we removed $2 billion annually from our operating expenses while replacing core platforms to create modern operations.

"Merrill benefits tremendously from the technology investments made by Bank of America over the past several years," said Andy Sieg, president of Merrill Lynch Wealth Management. "Our best-in-industry digital capabilities continue to set Merrill apart from the competition, enabling clients to work with us when they want, how they want, while providing the seamless experience they demand."

Shared platforms and a common infrastructure across the enterprise brought together company data and emerging technology to improve service, drive speed to market and increase data accuracy, while decreasing risk and improving cost to serve our clients. Our modern infrastructure and simplified operations underscore the importance of smart investments. We continue to invest approximately $3 billion annually in technology growth — especially in digital, mobile and online platforms.

Further driving the digital transformation is our culture of innovation. Last year, the bank ranked 108th on the Intellectual Property Owners Association's list of the top 300 U.S. organizations receiving patents, our highest ranking ever. That ranking reflects our company's record-high 443 patents for innovations related to money transfers, bill payments, ATM transactions, check verification using augmented reality and authentication technology. The bank's patent portfolio consists of more than 4,600 patents and applications, resulting from the work of more than 5,700 inventors from 12 countries.

"Innovating is essential to making life easier for our clients," said Cathy Bessant, chief operations and technology officer. "We do not have an innovation lab or an innovation team, because it's everyone's job. These numbers demonstrate our unmatched commitment to making sure innovation is part of our DNA."

During the world health crisis this past year, we realized the importance of connectivity, bandwidth and technical tools. We are using technology to bridge divides by helping to make sure connectivity is universal and equally available to all. We believe equity of access and service will drive economic mobility and equality going forward, and Bank of America will strive to be at the forefront of that change.

Market Presidents deliver our global company to each client, employee and community

Hong Ogle
President, Bank of America Houston

In cities and towns across the U.S., Bank of America's more than 90 market presidents and their teams lead the local work of the company to serve clients, support teammates and strengthen communities. In 2020, the efforts of our market presidents were more critical than ever, particularly in cities like Houston, Texas, that faced challenges on multiple fronts.

"2020 will be a year to remember," said Hong Ogle, president of Bank of America Houston, who also leads the Central South Division for the Private Bank region, overseeing offices in Texas, Kansas, Oklahoma, Arkansas and the surrounding states. "In addition to the health crisis, oil and gas price volatility added extra stress on Houston, the energy capital of the world. And, being the hometown to George Floyd pushed our city to the front lines of the racial justice movement."

Through it all, Hong says, the team remained undeterred, rising to the challenge to support teammates, serve clients and help the Houston community. Hong is especially complimentary of the financial center teammates who expertly cared for clients who needed our support and services throughout the health crisis and of commercial banking client managers, financial advisors and personal bankers who rallied to help their clients manage through changing conditions.

Integrating our full capabilities for the benefit of each client is among the chief responsibilities of our market presidents, who help to ensure all lines of business are working together seamlessly.

For example, last year, Houston teammates in Business Banking and the Private Bank came together to help a 20-year, Houston-based client sell their company to another client in Ohio. The Houston-based client manager connected the Texas client to a local Private Bank advisor, ultimately helping them entrust the proceeds of the sale, along with other assets, to the Private Bank. This interaction highlights the value and importance of integration across our businesses in markets across the country.

Integrating our capabilities and expertise influences how market presidents and their teams address challenges facing their communities. After our four-year, $1 billion commitment to drive racial equality and economic opportunity was announced, the Houston team went to work, partnering with local elected officials and community leaders to help ensure the collective resources were spent wisely.

Hong also feels a personal connection to the commitment the company has made to driving equality and helps further these efforts locally in the Houston community. She came to the U.S. from China when she was 24, and is a leader in several company diversity groups as well as the city's Greater Houston Partnership Racial Equity Committee. "I feel a strong responsibility to help make sure dollars are spent where it makes a difference," she said. "It's not just about giving money — it's helping people and communities. And it's helping not just those individuals who benefit directly from these programs; it's also helping their families and future generations."

This focus on clients and community led Bank of America to be named Large Corporation of the Year by the Association of Fundraising Professionals Greater Houston and Hong to be recognized as a Houston Business Journal Most Admired CEO in 2019, accolades that reflect the team's work carrying forward the bank's mission while making an impact locally.

Being a great place for our teammates to work

A message from Sheri Bronstein
Chief Human Resources Officer

We know 2020 will be remembered for many reasons, including the global health crisis and the social and racial inequalities that were exacerbated by it. At Bank of America, it was a year that strengthened our resolve to identify additional opportunities to support our teammates and address societal issues. Together, we continued driving progress, and we have much to be hopeful for as we look ahead. And importantly, in 2020 we were reminded how critical it is that we take care of ourselves, our families, our clients, our communities and each other.

As a company, we have a long history of supporting our teammates and their families by investing in their physical, emotional and financial well-being. In response to the global health crisis, we took significant steps to provide enhanced resources and benefits to help our teammates stay healthy and balance the competing priorities of work and home. Those benefits include access to virtual medical and behavioral consultations, robust emotional wellness training through our partnership with Thrive Global and child and adult care resources designed to help our teammates ensure their loved ones were cared for. You can read more about our support for teammates on page 15.

We also felt the urgency to address the ongoing impacts of racial inequality in the communities where we live and work. While diversity and inclusion is and has been core to our values as a company for multiple decades, it was a year in which we needed to bring together our efforts with our teammates and marry those with the work we do with our communities and clients. Our courageous conversations series served as a foundation for dialogue amongst our leaders, our teammates, visiting speakers and authors, and gave a platform for our $25 million charitable donation to the Smithsonian so they could facilitate conversations on race across our country through the eyes of one of our most important educational museums and institutions. Our longstanding efforts to drive economic opportunity and upward mobility provided the foundation for us to quickly accelerate efforts we had underway to create greater opportunities for people and communities of color. While we have much more to do, I am proud of the initiatives we're advancing in connection to our $1 billion, four-year initiative focused on addressing systemic gaps in education, healthcare, workforce development, housing and other important areas. You can learn more about these efforts on page 33.

I also encourage you to read about our efforts to support the health and safety of our teammates as well as the work we're doing to advance racial equality and economic opportunity in our 2020 Human Capital Management Report. We initially launched this report in 2019 as a means to provide transparency into our employee practices, our workforce diversity metrics and all that we do for our teammates to be a great place to work. It was the first-of-its-kind in the industry and has been met with overwhelmingly positive responses from our shareholders, our teammates and our clients.

Our deep appreciation for our teammates, their dedication to living our purpose and their support for each other remained at the core of every decision we made in 2020. And from last year, we learned incredible lessons: thanks to our teammates, our ability to remain resilient and the importance of our decade-long commitment to Responsible Growth, we were able to serve our clients and communities when they needed us most. As we begin a new year, our focus on supporting our teammates, their families and the clients and communities we serve will continue to guide everything we do.

200,000+

We support our **more than 200,000 global teammates** and their families through comprehensive benefits, programs and resources.

2020 Human Capital Management Report

In November, we released our 2020 Human Capital Management Report, which continues our efforts to provide clarity and transparency around all we do to be a great place to work and to support our more than 200,000 teammates and their families. Building on our inaugural Human Capital Management Report from 2019, our 2020 report shares the many programs and resources, as well as supporting data, in our primary focus areas: being a diverse and inclusive workplace; attracting and retaining exceptional talent; providing holistic benefits supporting our teammates' physical, emotional and financial wellness; and recognizing and rewarding performance.

New in this year's report is information on the many unprecedented steps we have taken during the ongoing health crisis and to advance work underway to drive racial equality and economic opportunity. In addition, we continue to share metrics on diverse representation across our company, a practice we have had in place for many years. We will continue to report on these items and the progress we're making as part of our ongoing focus on driving Responsible Growth and making this the best place for our teammates to work.

Driving meaningful change when the world needs it most

Our ongoing work to foster a diverse and inclusive environment took on greater meaning for our more than 200,000 global teammates during a year that brought issues of racial inequality and social injustice to the forefront. The global health crisis has exposed longstanding disparities in our society and inspired one of the greatest social justice movements in modern history.

These realities strengthened our resolve and inspired our work to right the injustices we've witnessed. We have a greater clarity of purpose for where we want to go as a company and in the communities where we live and work — as well as the work we need to do to get there.

This starts with being a great place for our teammates to work, which is foundational to continuing to drive Responsible Growth. We know we must reflect the diversity of the clients and communities we serve and continue to take meaningful steps to ensure diverse representation at all levels of our company. Attracting diverse talent is a priority, and we achieve this through a variety of recruiting efforts, including through internships and campus programs, targeted partnerships with diverse organizations, support for military and veterans, and hiring and reskilling individuals from low-and-moderate income (LMI) communities. "We know that just because you have diversity in representation does not mean you have inclusion. That's why we continue to work to ensure we have a culture where our teammates feel comfortable bringing who they are to work each day and why we offer equal access to opportunity at all levels of our company," says our Chief Diversity & Inclusion and Talent Acquisition Officer Cynthia Bowman.

We also look to address societal priorities that impact communities around the world. In 2020, building on longstanding work underway, we made a $1 billion, four-year commitment to help drive racial equality and economic opportunity for people and communities of color with a focus on healthcare, jobs, small businesses and housing. We've also continued to deploy capital to businesses and communities in need of economic revitalization through CDFIs and issuing social bonds.

Another way we actively promote these principles is by engaging each other through courageous conversations — sharing perspectives on our differences and establishing connections to create greater empathy and understanding. Last year, we held courageous conversations, reaching more than 165,000 employees with civil rights, social justice and inclusion leaders focused on racial, social and economic injustices.

As we look to the work and road ahead, investing in our teammates, our clients and communities will always be core to who we are and how we drive Responsible Growth. By first looking inward and holding ourselves accountable to increasing diversity across our teams, we will continue taking steps forward to help drive inclusion and meaningful progress in the communities we serve.

Supporting emotional wellness and mental health

Supporting our teammates' emotional wellness and mental health has always been a critical focus for us. In 2020, people's daily lives and routines were impacted in many ways, bringing the conversation of emotional wellness and mental health to the forefront. Given the new stressors and demands our teammates faced over the year, it was important employees understood the range of resources available to support their emotional wellness and mental health. We enhanced our ongoing offerings to include innovative, industry-leading and flexible programs and resources to help our teammates and their families.

In 2020, we provided no-cost consultations with Teladoc's® behavioral health specialists for employees on a national U.S. bank medical plan. We also expanded training and education to help teammates build key skills to enhance their well-being. Additionally, through our partnership with Thrive Global, a corporate and consumer well-being firm, we launched emotional wellness and resiliency training for employees. These virtual courses address stress management as well as ways to build resiliency and avoid burnout. Our mindfulness daily practice sessions and introductory courses hosted by internal specialists help teammates create and maintain peace of mind. In addition, ongoing mental health tips from experts, mindfulness apps and open conversations about mental health helped teammates prioritize their own wellness.

Our ongoing work to care for our teammates' emotional wellness and mental health includes confidential counseling and unlimited telephone consultations, available 24/7, through our Employee Assistance Programs for both teammates and members of their household. And, for support for major life events, our internal, highly specialized Life Event Services team connects employees to resources, benefits and counseling.

"The last year taught us that prioritizing our emotional wellness and mental health was incredibly important. It was critical to ensure that our employees knew they, and their loved ones, were supported. As we move into 2021, our focus will stay the same — offering benefits, programs and resources to meet their diverse needs."

— **Chris Fabro,** Global Head of Compensation, Benefits and Executive Development

Continuing to be a workplace where all teammates can grow and thrive

In a year unlike any before, the diversity and broad perspectives of our teammates enabled us to make a positive impact for our clients and communities. We continue to invest heavily in our people — bringing diverse talent to our company, supporting their well-being and giving opportunities to grow and develop. Meet four exceptional women who bring their diversity of thought and experiences to life across our company.

Helping teammates care for their families

Jessica Cullen
Global Banking & Markets
Global Commercial Banking Relationship Manager

Jessica Cullen, a relationship manager in Global Commercial Banking, and her husband started working from home in early 2020 due to the health crisis, while also caring for their two young daughters. With daycare centers closed, Jessica needed care for her children while working from home, so she looked into Bank of America's expanded childcare benefits after hearing about them from her manager. Eligible teammates can take advantage of the bank's expanded back-up care benefits, which include reimbursement of up to $100 a day when securing their own care provider. "It was super easy to sign up for the childcare benefit, and the reimbursement process is quick," explains Jessica. She took advantage of the opportunity to hire someone from her personal network, and was thrilled to be able to help one of the teachers at her daughters' daycare center who had lost income due to the coronavirus-related closures. "It's good for her and good for us," Jessica said. "The best part is my entire management team has been extremely supportive. The resources and empathy toward working parents make me really proud to work for Bank of America."

Hiring the next generation of leaders

Reena Shukla
Global Technology & Operations
EMEA Operations Executive

London-based Reena Shukla believes exceptional talent can be found at all levels. After completing Merrill's graduate recruitment program, she has grown her career and is now a managing director, leading the EMEA Client Services team for Global Markets. Reena is passionate about recruiting others early in their careers whose contributions can challenge the status quo and inspire new ways of thinking to strengthen our teams and client relationships — something she can relate to given her own experience with the bank's recruiting efforts. Reena is focused on hiring teammates who demonstrate a natural curiosity to learn and challenge themselves. "Recruiting fresh talent pushes boundaries within our teams and enables new ideas for the ways we serve our clients," explains Reena. Through Bank of America's Africa recruitment initiative and the U.K. government apprenticeship program, Reena has built a balanced team with both experienced and new talent, with each providing significant contributions for future success. "Hiring talent early in their careers helps develop our future leaders, something that I have experienced firsthand at our company."

Leading the way to a more inclusive environment

Adrienne Hughes
Merrill
Client Experience Executive

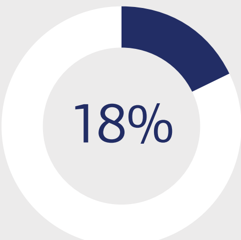
As Merrill's client experience executive, Adrienne Hughes recognizes the power of strong, authentic connections. She is personally committed to creating an inclusive culture that values, encourages and leverages the strength of our diversity. "Inclusion comes from celebrating our uniqueness and creating an environment where people are valued and encouraged to bring who they are to the workplace — creatively collaborating to strengthen our business," says Adrienne. Involved in several Bank of America Employee Networks, which help teammates be heard, develop leadership skills, build ties with peers and local communities and advance diversity recruitment, Adrienne has embraced her advocacy for inclusion in the workplace by using her voice and encouraging others to do the same. She has taken advantage of Bank of America's passion for open and honest discussions and hosted several courageous conversations around race, equality and economic opportunity in the Chicago market. As a member of our Women's Leadership Council and the Multicultural Women Ready to Lead Initiative, Adrienne also continues to be a leader for women's equality in the workplace. "I am proud to work for a company that invests in creating a culture where every individual is valued. I'm inspired to lead by example and drive that commitment forward."

Helping teammates grow and develop fulfilling careers

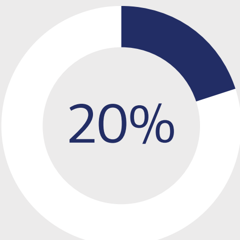
Evelyn Castillo
Consumer & Small Business
Consumer Banking Region Executive

After joining Bank of America in 2009, Evelyn Castillo, a Consumer Banking region executive, never imagined she would still be working at the same company nearly a decade later. Motivated by support from mentors as well as the many development opportunities she's discovered, Evelyn has grown her career at Bank of America in a way that takes advantage of her strengths and builds new skills. "I have been blessed to have great leaders and mentors who invested in me and my abilities. I see the impact this has had on my career, and I want to give that same opportunity to others," says Evelyn. Inspired by her experiences at the bank, she has made it her mission to mentor her teammates and develop their leadership skills. By taking advantage of the bank's many career development resources, Evelyn has been able to help develop and promote the next generation of leaders. Additionally, as a market president lead for Consumer & Small Business and member of the Hispanic/Latino Organization for Leadership and Advancement Employee Network, Evelyn is able to interact with diverse employees and connect them to areas of interest. "Making connections enables career mobility, which helps retain our talent. I'm proof you can have a lifelong career at Bank of America."

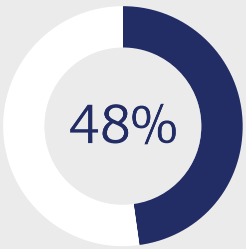
Representation of people of color across our company



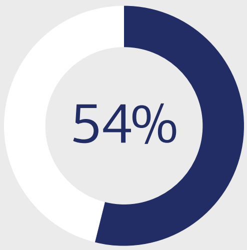
of our **management team** are people of color



of our **management levels 1–3** are people of color



of our **U.S. workforce** are people of color



of our **full-time campus hires** are people of color

Being a great place to work — 2020 highlights

A critical component of how we drive Responsible Growth is making Bank of America a great place to work. See how we fulfill that commitment to our employees.

Hired 10K+ military veterans

We surpassed our goal of hiring over 10,000 military veterans, achieving our five-year commitment, with plans to maintain hiring momentum for the future.

Supporting career development

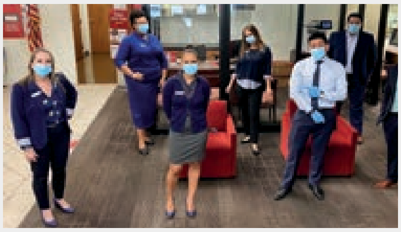
We provide an extensive portfolio of learning and leadership development opportunities to our more than 200,000 employees, including foundational and skills-based training and an enterprise-wide focus on manager development.

Hiring 10K+ from LMI communities

We hired more than 10,000 employees from LMI communities since 2018 — ahead of our commitment to do so by 2023.

Up to $7,500 in tuition reimbursement

Through our tuition reimbursement program, we provide up to $7,500 (up to $5,250 tax-free) annually for eligible undergraduate or graduate courses.

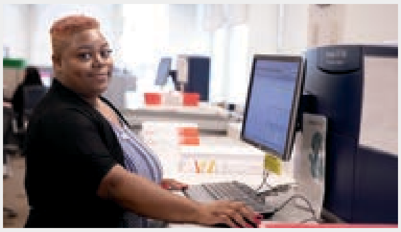


$20 minimum hourly rate

In the first quarter of 2020, we raised our minimum hourly rate of pay for U.S. employees to $20, one year earlier than planned.

Medical premiums for employees

Since 2012, there has been no increase in medical premiums for employees earning less than $50,000.



Sharing our success

For the fourth time since 2017, we recognized teammates with a special award in cash or restricted stock. In the first quarter of 2021, approximately 97% of teammates received a Delivering Together award, in addition to any regular annual incentives.

Equal pay for equal work

For teammates in comparable positions, compensation received by women, on average, was greater than 99% of that received by men; and compensation received by people of color was, on average, greater than 99% of that received by teammates who are not people of color.

$500 wellness credit

We provide a $500 credit toward medical plan premiums following completion of a wellness screening and questionnaire (or $1,000 if a covered spouse or partner also completes).

Employee Relief Fund

Employees can receive up to $2,500 in financial assistance through our Employee Relief Fund for a qualified disaster and up to $5,000 for an emergency hardship.

Investing $1 billion over four years to advance racial equality and economic opportunity

In 2020, we saw intensified passion to address the obstacles to true racial equality in the U.S. In response, we accelerated work already underway to announce a $1 billion, four-year initiative to help advance racial equality and economic opportunity with a focus on four areas:

- **Jobs and reskilling** the workforce
- Supporting minority **small business** owners
- Making **home ownership and rental housing** more affordable
- Addressing inequities in **health services**

This work is being led by Vice Chairman Anne Finucane and developed by a cross-functional team led by Global Head of ESG Andrew Plepler with the expertise and perspective of the company's Black and Hispanic Leadership councils, our local market teams and other business leaders. It recognizes that issues of racial equality and economic opportunity are deeply connected, and that understanding the past is critical to charting a path forward. Our objective is to address systemic barriers where they exist and help drive more opportunity and sustained progress.

Already, we've allocated more than $300 million (or one-third) across 91 markets and globally, including:

Investments in **61 private equity funds** across the U.S.

$150 million in funds focused on minority entrepreneurs and predominantly led by diverse fund managers

Partnerships with **more than 20 higher education institutions** and major employers

Jobs initiatives with community colleges, historically Black colleges and universities and Hispanic-serving institutions to connect students to career success

Launched Smithsonian's "Race, Community and Our Shared Future"

Program to deliver thought leadership on civil rights, social justice and economic mobility to communities across the country

Expanding opportunities for **50,000 women**

Bank of America Institute for Women's Entrepreneurship at Cornell, with a focus on women of color

Capital investments in **14 MDIs and CDFI banks**

Toward lending, housing, neighborhood revitalization and other banking services

Partnerships with CVS Health and local nonprofits

Flu vaccine vouchers in under-resourced communities and donations of PPE to community partners across the country

"We must not let the current intense demand for action die down. And we will not. Our management team, our market presidents and market executives, leaders of our company at every level, all of us can and will do more." —**CEO Brian Moynihan**

Addressing the world's challenges through sustainable finance

A conversation with Anne Finucane, Vice Chairman and Karen Fang, Global Head of Sustainable Finance

At Bank of America, sustainability is embedded in our operating model. This extends to how we support our clients through core lending and investments; equity and debt capital markets activities; the advisory services we offer; how we manage our supply chain and how we conduct our own operations. In 2020, after meeting our goal to be carbon-neutral a year early, we finalized our commitment to achieve net-zero greenhouse gas (GHG) emissions before 2050 across all scopes of emissions including those from our operations, financing activities and supply chain.

Central to our purpose as a financial services company, we will need to assist our clients in their own carbon reduction journey. To accelerate our sustainable finance work and help create a consistent perspective across all of our capabilities and product offerings, in January 2020, we established the Sustainable Markets Committee, which I co-chair along with Chief Operating Officer Tom Montag. To lead this effort, we named Karen Fang as the Global Head of Sustainable Finance. Karen and I sat down recently to talk about our progress, the business, and our goals for 2021.

Anne: Karen, we have developed a leadership position in clean energy finance, and we will discuss that later. This year, though, we saw particular interest in other aspects of sustainable finance, against a backdrop of economic and social challenges during the global health crisis. We mobilized and deployed approximately $100 billion of sustainable finance capital aligned with the United Nations (U.N.) SDGs in 2020, a significant increase from 2019 despite the global challenges, with approximately $55 billion allocated to climate finance. In addition, approximately $45 billion was allocated to Inclusive Development. This includes our significant lending and investing in affordable housing, healthcare, education and other social infrastructure as a part of our support for local communities across the U.S. Also included are the deposits and equity capital we provided to CDFIs and MDIs, and equity and fund investments into minority-owned businesses as a part of our $1 billion racial equality and economic opportunity initiative. And the global health crisis and associated challenges did offer the opportunity for some unique offerings by our company. Can you discuss that a little bit?

Karen: Yes, we are particularly proud of two innovative transactions we completed in 2020 for Bank of America that demonstrate the creativity and strength of collaboration across many of our lines of business in an effort to deliver for our clients. In May 2020, we issued a $1 billion corporate social bond focused on the coronavirus response, the first such

> "The Sustainable Markets Committee gathers our capabilities across every line of business and puts them to work for our clients who are innovating and investing in the low carbon, sustainable economy."
>
> — **Tom Montag**, Chief Operating Officer

offering by a U.S. bank. This bond was designed to provide targeted lending to healthcare institutions that are on the front lines of combatting the health crisis, and it paved the way for Bank of America to underwrite and distribute more than $50 billion of social bonds for numerous governments, agencies and public companies. This speaks to our ability to scale capital deployment for important societal needs.

In September 2020, we issued a $2 billion equality progress sustainability bond to advance racial equality, economic opportunity and environmental sustainability. The social side of the proceeds were exclusively allocated to make new and impactful investments and lending in affordable housing, healthcare, and small businesses in Black and Hispanic-Latino communities. This first-of-its-kind transaction again inspired other issuers to follow similar approaches, scaling capital for wealth creation and socioeconomic empowerment of these communities.

Some highlights on the environmental transition side include underwriting and distributing green and sustainability bonds, completing some of the largest asset finance transactions for renewable energy generation and providing financing and leasing solutions for energy efficiency projects and electric vehicles (EVs).

Bank of America's commitment to sustainable finance runs deeper than just doing transactions. Thanks to the commitment and leadership from you, our whole Management Team and all of our teammates, we are at the forefront of climate change thought leadership. We are key members of various global alliances focused on sustainable development, such as the U.N. Global Investors for Sustainable Development, the World Economic Forum Net-Zero Transition Finance Committee, His Royal Highness the Prince of Wales' Sustainable Markets Initiative, the Rocky Mountain Institute Center for Climate Aligned Finance and the 1t.org U.S. Steering Council, among others.

Anne: Let's talk a little more about "traditional" sustainable finance, if I can use that term since we've been at it now for so many years. We reached carbon neutrality in our own footprint and are on a path toward net-zero before 2050. We have reduced our energy use by 40% and our location-based GHG emissions by 50%, sourced renewable energy to power our facilities, and purchased and retired carbon offsets for those final amounts of unavoidable emissions. In keeping with our focus on the environment, we even erected the first platinum Leadership in Energy and Environmental Design (LEED) skyscraper and continue to make progress in our own real estate footprint. So our own track record means we are well positioned to (i) have a comprehensive discussion with our clients about carbon neutrality and net-zero as a business imperative; (ii) encourage clients to establish a concrete and credible glide path plan to reduce their own carbon footprints; and (iii) offer clients advisory services and financial tools to support their decarbonization efforts toward net-zero.

Karen: Exactly. In 2020, we developed the "4 R's" approach to decarbonization for our corporate clients: Reduce, Renew, Retire, and Realign. We financed energy efficiency projects that helped clients reduce their energy usage; we helped shift clients' electricity footprints from fossil fuels to renewable energy by providing debt financing, tax equity and leasing capital for wind and solar power generation; we mobilized capital for more EV production and leasing; and we financed LEED-certified construction of office facilities and manufacturing sites. We are also helping develop a more robust, voluntary carbon-offset market.

Anne: Whether it is Environmental Transition or Inclusive Development, our business focus has been to expand current activities and innovate to help advance emerging technologies. New domains and possibilities seem to be emerging at an ever faster pace. In the area of Environmental Transition, we are looking at solutions for the next frontier beyond wind, solar, and EVs including (i) clean hydrogen, fuel cells, sustainable aviation fuels and waste-to-energy; (ii) EV charging and battery infrastructure; (iii) nature and engineered solutions for carbon capture and offsets; and (iv) sustainable agriculture and better water infrastructure. Let's talk about what we're focused on in the Inclusive Development side of things.

Karen: We'll continue to help advance racial and gender equality, support healthcare as we focus on continued coronavirus response and vaccine delivery, and investing in job training and reskilling. Certain projects that we are pursuing include working with developers to create affordable housing projects that incorporate more environmental and social sustainability features and materials. Also, we are expanding our supply chain financing and banking services to more minority-owned and operated businesses.

2020 ESG highlights*

Our strong focus on environmental, social and governance (ESG) is key to how we drive Responsible Growth. We're addressing society's greatest challenges through our investments, philanthropy and responsible business operations. This helps us to serve clients, deliver returns for our shareholders and contribute to a more sustainable future.

Sustainable finance

We mobilized and deployed approximately $100 billion in capital to support the environmental transition to a low-carbon economy, as well as inclusive development focusing on affordable housing, healthcare, education and racial/gender equality.

Environmental business commitment

Our Environmental Business Initiative will direct at least $445 billion to low-carbon, sustainable business activities by 2030. Since 2007 when it was launched, we have mobilized more than $200 billion to these efforts across the globe.

Tax equity for renewables

We have been the top tax equity investor in the U.S. since 2015. Our Tax Equity renewable energy portfolio at the end of 2020 was approximately $10.1 billion. Our investments have contributed to the development of approximately 17% (33GW) of total installed renewable wind and solar energy capacity in the U.S.

Blended Finance Catalyst Pool

Our Blended Finance Catalyst Pool will provide $60 million from Bank of America to leverage additional private capital to help address the U.N. SDGs. We finalized commitments totaling $15 million in four different blended finance vehicles that will help mobilize more than $500 million in total investor funds.

Affordable homeownership

Having surpassed our initial commitment, we tripled our Bank of America Community Homeownership Commitment® to $15 billion through 2025, aiming to help more than 60,000 LMI individuals and families purchase a home. Since 2019, the initiative has helped nearly 21,000 individuals and families purchase a home and over $180 million in down payment and closing cost grants.

Community Development Banking

We provided a record $5.87 billion in loans, tax credit equity investments and other real estate development solutions through $3.62 billion in debt commitments and $2.25 billion in investments to help build strong, sustainable communities by financing affordable housing and economic development across the country. Between 2005 and 2020, we financed more than 215,000 affordable housing units.

Community development financial institutions (CDFI) lending

We originated over $394 million in loans and investments as part of our more than $1.8 billion portfolio in 256 CDFIs to finance affordable housing, economic development projects, small businesses, healthcare centers, charter schools, and other community facilities and services.

Small business lending

We provide dedicated support to meet the needs of our 13 million small business owners and are a top lender in the SBA's 504 and 7(a) programs, according to the FDIC. More than half (54%) of all small business loans booked in 2020 were made to LMI borrowers.

Sustainable client balances

We have $36.8 billion in assets in our wealth management business with a clearly defined ESG investment approach.

Green, social and sustainability bonds

We issued a $1 billion corporate social bond to support those on the front lines of the health crisis; and a first-of-its kind $2 billion equality progress sustainability bond to help advance racial equality, economic opportunity and environmental sustainability. Since 2013, Bank of America has issued $9.85 billion in eight corporate Green, Social and Sustainability Bonds. We have also been a leader in ESG-themed bond underwriting globally since 2007, having underwritten more than $75 billion on behalf of more than 225 clients, supported more than 400 deals and provided critical funding to environmental and social projects.

*Data and metrics are as of year-end 2020 unless otherwise noted.

Net-zero commitment

We are carbon neutral and purchase 100% renewable electricity. We have committed to achieving net-zero greenhouse gas emissions in our financing activities, operations and supply chain before 2050.

Climate risk and ESG disclosure

We disclose our risk and governance practices under several frameworks. On page 40, we have reported under new ESG Stakeholder Capitalism Metrics developed by the World Economic Forum's International Business Council. We issued our first report under the recommendations of the TCFD, and our first SASB report. This is in addition to publicly disclosed information about how we manage climate risk in the Management Discussion & Analysis section of our Annual Report on Form 10-K and reporting through the GRI and CDP (formerly known as Carbon Disclosure Project) global disclosure system. We also disclose our ESG strategy, policies and practices in our Environmental and Social Risk Policy Framework and Human Capital Management Report.

Arts and culture

We remain steadfast in our support of arts and culture, providing more than $50 million in support to arts and culture nonprofits around the world last year. We fulfilled all commitments in 2020, whether or not partners were open and/or their programming had been digitized, postponed or canceled.

Women's economic empowerment

We expanded opportunities for 50,000 women entrepreneurs, with a focus on women of color, to participate in the Bank of America Institute for Women's Entrepreneurship at Cornell, the only online Ivy League certificate program for women business owners in the world. More than 20,000 women are currently enrolled, representing over 85 countries, including the U.S..

Philanthropic giving

We increased our philanthropy to more than $350 million, including $100 million to support communities impacted by the health and humanitarian crisis and $250 million to drive economic mobility and social progress in the communities we serve. We continue to advance economic mobility and nonprofit leadership through our Neighborhood Builders and Neighborhood Champions programs, investing $256 million to support more than 1,000 nonprofits and 2,000 nonprofit executives since 2004. Last year, through local partnerships and our own Student Leaders program, we connected more than 4,000 young people to early employment.

Employee giving and volunteering

In response to the health and humanitarian crisis and the need to advance racial equality, we lowered our matching gift minimum to $1 and doubled our match for donations to 17 organizations focused on racial equality and economic opportunity. Last year, despite shifting to a virtual environment, our employees volunteered over 1.1 million hours and directed $65 million to communities through individual giving and the bank's matching gifts program.

Pathways

Since 2018, Bank of America's Pathways program has fueled our enterprise-wide talent pipeline, hiring more than 10,000 employees from LMI neighborhoods — well ahead of our commitment to do so by 2023. We do this through partnerships with community colleges and long-time partners such as Year Up, UnidosUS and the National Urban League.

Better Money Habits®

Through our Better Money Habits platform, we continue to connect people to relevant advice, tools and guidance that empowers them to take control of their finances. Content on the Better Money Habits website was accessed for free over 6 million times, and consumers clicked through to make an appointment more than 23,000 times. Mejores Habitos Financieros, our Spanish site, was accessed more than 1 million times. To further extend these resources in LMI communities, more than 4,300 employee volunteers serve as Better Money Habits Volunteer Champions, delivering financial know-how in partnership with local nonprofits across the U.S.

Bank of America Corporation — Financial highlights

Bank of America Corporation (NYSE: BAC) is headquartered in Charlotte, North Carolina. As of December 31, 2020, we operated across the United States, its territories and more than 35 countries. Through our banking and various nonbank subsidiaries throughout the United States and in international markets, we provide a diversified range of banking and nonbank financial services and products through four business segments: Consumer Banking, Global Wealth and Investment Management, Global Banking and Global Markets.

[1] Represents a non-GAAP financial measure. For more information on these measures and ratios, and a corresponding reconciliation to GAAP financial measures, see Supplemental Financial Data on page 54 and Non-GAAP Reconciliations on page 111 of the 2020 Financial Review section.

[2] This graph compares the yearly change in the Corporation's total cumulative shareholder return on its common stock with (i) the Standard & Poor's 500 Index and (ii) the KBW Bank Index for the years ended December 31, 2015 through 2020. The graph assumes an initial investment of $100 at the end of 2015 and the reinvestment of all dividends during the years indicated.

Recognition

We are honored to be recognized by organizations and media around the world for our work in driving Responsible Growth, including our ESG commitments and initiatives and our efforts to be a great place to work.

In 2020, we were recognized by Fortune as one of their 100 Best Companies to Work For, Working Mother as the number-one best company for Dads and Euromoney as the World's Best Bank for Corporate Responsibility, among several others. Below are some of our most recent awards.

Fortune
100 Best Companies to Work For (2020, 2019)

Best Big Companies to Work For (2020, 2019)
only financial services company recognized two years in a row

Best Workplaces for Women (2020, 2019)

Best Workplaces in Financial Services & Insurance (2020, 2019)

Best Workplaces for Diversity (2019)

Best Workplaces for Parents (2020, 2019)

Best Workplaces for Giving Back (2018)

Change the World (2020, 2019)
named the top global bank two years in a row

Euromoney
World's Best Bank for Corporate Responsibility (2020)

Excellence in Leadership—North America (2020)

Best Digital Bank—North America (2020)

Best Bank for Transaction Services—North America and Latin America (2020)

Best Bank for Small and Medium-Sized Enterprises—North America (2020)

World's Best Bank for Diversity and Inclusion (2019)

World's Best Bank (2018)

World's Best Bank for Corporate Social Responsibility (2017)

STAKEHOLDER CAPITALISM METRICS

The index reflects our report in alignment with the Stakeholder Capitalism Metrics (the Metrics) published by the International Business Council of the World Economic Forum. We believe these Metrics help to demonstrate how our sustainable business model drives progress towards inclusive capitalism and the U.N.'s Sustainable Development Goals. In this index, we either reference existing disclosures or respond directly. We currently do not report on all of the Metrics but will continue to evaluate both core and expanded metrics for potential future additional disclosure. Our commitment is to provide investors with useful, relevant and meaningful sustainability information and we expect our disclosures to evolve over time. All reported data is as of and for year end December 31, 2020, unless otherwise noted.

INDICATES CORE METRIC

Principles of Governance

THEME	METRIC	RESPONSE
Governing Purpose	**Setting Purpose:** The company's stated purpose, as the expression of the means by which a business proposes solutions to economic, environmental, and social issues. Corporate purpose should create value for all stakeholders, including shareholders.	Our Responsible Growth strategy referenced in this 2020 Annual Report and our 2021 Proxy Statement articulates how our purpose and environmental, social and governance leadership creates stakeholder value.
	Purpose-led management: How the company's stated purpose is embedded in company strategies, policies, and goals.	
Quality of Governing Body	**Governing Body Composition:** Composition of the highest governance body and its committees by: competencies relating to economic, environmental, and social topics; executive or non-executive; independence; tenure on the governance body; number of each individual's other significant positions and commitments, and the nature of the commitments; gender; membership of under-represented social groups; stakeholder representation.	Refer to the section entitled "Proposal 1: Electing directors" in our 2021 Proxy Statement available on the Bank of America Investor Relations website at www.bankofamerica.com/investor.
	Progress against strategic milestones: Disclosure of the material strategic economic, environmental, and social milestones expected to be achieved in the following year, such milestones achieved from the previous year, and how those milestones are expected to or have contributed to long-term value.	Refer to our 2019 ESG Performance Data Summary available at www.bankofamerica.com/ESGData.
	Remuneration: **1.** How performance criteria in the remuneration policies relate to the highest governance body's and senior executives' objectives for economic, environmental and social topics, as connected to the company's stated purpose, strategy, and long-term value. **2.** Remuneration policies for the highest governance body and senior executives for the following types of remuneration: Fixed pay and variable pay, including performance-based pay, equity-based pay, bonuses, and deferred or vested shares, Sign-on bonuses or recruitment incentive payments, termination payments, clawback and retirement benefits.	Refer to the section entitled "Compensation discussion and analysis" in our 2021 Proxy Statement available on the Bank of America Investor Relations website at www.bankofamerica.com/investor.
Ethical Behavior	**Anti-corruption:** **1.** Total percentage of governance body members, employees and business partners who have received training on the organization's anti-corruption policies and procedures, broken down by region. **2.** (a) Total number and nature of incidents of corruption confirmed during the current year but related to previous years and (b) Total number and nature of incidents of corruption confirmed during the current year, related to this year. **3.** Discussion of initiatives and stakeholder engagement to improve the broader operating environment and culture, in order to combat corruption.	1. 100% of Bank of America employees are required to take training on anti-bribery and anti-corruption policies as part of Bank of America's Code of Conduct training. 2. For disclosure of significant litigation and regulatory matters, see *Note 12 — Commitments and Contingencies* on page 161 of the 2020 Financial Review section. 3. Refer to our Code of Conduct on the Bank of America Investor Relations website available at www.bankofamerica.com/investor.
	Protected ethics advice and reporting mechanisms: A description of internal and external mechanisms for: **1.** Seeking advice about ethical and lawful behaviour and organizational integrity **2.** Reporting concerns about unethical or unlawful behaviour and organizational integrity	Refer to page 13 in our Code of Conduct on the Bank of America Investor Relations website available at www.bankofamerica.com/investor.
	Monetary losses from unethical behaviour: Total amount of monetary losses as a result of legal proceedings associated with: fraud, insider trading, anti-trust, anti-competitive behaviour, market manipulation, malpractice, or violations of other related industry laws or regulations.	For disclosure of significant litigation and regulatory matters, see *Note 12 — Commitments and Contingencies* on page 161 of the 2020 Financial Review section.

THEME	METRIC	RESPONSE
Ethical Behavior (continued)	**Alignment of strategy and policies to lobbying:** The significant issues that are the focus of the company's participation in public policy development and lobbying; the company's strategy relevant to these areas of focus; and any differences between its lobbying positions, purpose, and any stated policies, goals, or other public positions.	Refer to our Political Activities disclosure available on the Bank of America Investor Relations website at www.bankofamerica.com/investor.
Risk and Opportunity Oversight	**Integrating risk and opportunity into business process:** Company risk factor and opportunity disclosures that clearly identify the principal material risks and opportunities facing the company specifically (as opposed to generic sector risks), the company appetite in respect of these risks, how these risks and opportunities have moved over time and the response to those changes. These opportunities and risks should integrate material economic, environmental, and social issues, including climate change and data stewardship.	Refer to our Environmental and Social Risk Policy Framework available at www.bankofamerica.com/ESRPF.
Stakeholder Engagement	**Material issues impacting stakeholders:** A list of the topics that are material to key stakeholders and the company, how the topics were identified, and how the stakeholders were engaged.	Refer to our ESG Materiality disclosure available at www.bankofamerica.com/ESGMateriality.

Planet*

THEME	METRIC	RESPONSE
Climate Change	**Greenhouse Gas (GHG) emissions:** For all relevant greenhouse gases (e.g. carbon dioxide, methane, nitrous oxide, F-gases etc.), report in metric tonnes of carbon dioxide equivalent (tCO_2e) GHG Protocol Scope 1 and Scope 2 emissions. Estimate and report material upstream and downstream (GHG Protocol Scope 3) emissions where appropriate.	Bank of America's 2019 greenhouse gas emissions (tCO_2e) are as follows. Since 2010, we have reduced location-based emissions 56% globally. For more information, refer to our ESG Performance Data Summary (2019) available at www.bankofamerica.com/ESGData. • Scope 1: 62,639 • Location-based Scope 2: 728,771 • Market-Based Scope 2: 17,523 • Total net Scope 1 and Market-Based Scope 2: 0 • Scope 3 Purchased Goods and Services: 2,329,208 • Scope 3 Capital Goods: 251,336 • Scope 3 Fuel- and Energy-Related Activities: 161,151 • Scope 3 Upstream Transportation and Distribution: 140,215 • Scope 3 Waste (Traditional Disposal): 22,386 • Scope 3 Business Travel: 162,457 • Scope 3 Employee Commuting: 378,088 • Scope 3 Downstream Transportation and Distribution: 1,400,000 • Scope 3 Use of Sold Products: 4,000 • Scope 3 End of Life Treatment of Sold Products: 19,000
	TCFD implementation: Fully implement the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD). If necessary, disclose a timeline of at most three years for full implementation. Disclose whether you have set, or have committed to set GHG emissions targets that are in line with the goals of the Paris Agreement — to limit global warming to well-below 2°C above pre-industrial levels and pursue efforts to limit warming to 1.5°C — and to achieve net-zero emissions before 2050.	In 2020, Bank of America released its Task Force on Climate-related Financial Disclosures (TCFD) Report available at www.bankofamerica.com/TCFD. In early 2021, Bank of America took the next step in our climate journey by publicly committing to achieve net zero greenhouse gas emissions before 2050 across our operations, supply chain, and financing activities. For more information, refer to www.bankofamerica.com/NetZero.
	Paris-aligned GHG emissions targets: Define and report progress against time-bound science-based GHG emissions targets that are in line with the goals of the Paris Agreement — to limit global warming to well-below 2°C above pre-industrial levels and pursue efforts to limit warming to 1.5°C. This should include defining a date before 2050 by which you will achieve net-zero greenhouse gas emissions and interim reduction targets based on the methodologies provided by the Science Based Targets initiative if applicable.	To reach the goals of the Paris Agreement, we are developing a strategy across our entire value chain which includes setting interim emission reduction targets based on science, engaging with clients on climate goals and supporting climate innovation. Our net zero goal includes operations (Scope 1 and 2), supply chain (Scope 3 upstream emissions) and all material emissions attributed to our loans and investments (Scope 3 investments). For more information, refer to www.bankofamerica.com/NetZero.
	Impact of Greenhouse gas emissions: Report wherever material along the value chain (GHG protocol Scopes 1, 2 & 3), the valued societal impact of greenhouse gas emissions. Disclose the estimate of the social/societal cost of carbon used and the source or basis for this estimate.	The societal impact of Bank of America's Scope 1, Scope 2 (location-based), and Scope 3 (Categories 1–7, 9, 11–12) emissions in 2019 was estimated to be $238 million. This figure was calculated using the EPA's 2020 social cost of carbon of $42/metric ton CO_2 (3% discount rate, reported in 2007 USD).
Fresh water availability	**Water consumption and withdrawal in water-stressed areas:** Report for operations where material, mega litres of water withdrawn, mega litres of water consumed and the percentage of each in regions with high or extremely high baseline water stress according to WRI Aqueduct water risk atlas tool. Estimate and report the same information for the full value chain (upstream and downstream) where appropriate.	In 2019, Bank of America withdrew 7,550 and consumed 1,630 mega liters of water from our global operations. Of this, 38% of withdrawals and 41% of consumption were from regions with high or extremely high baseline water stress according to the WRI Aqueduct water risk atlas tool.

THEME	METRIC	RESPONSE
Nature Loss	**Land use and ecological sensitivity:** Report the number and area (in hectares) of sites owned, leased or managed in or adjacent to protected areas and/or key biodiversity areas (KBA).	In 2019, Bank of America had 8 active U.S. sites that intersected with areas protected for biodiversity. The area of these buildings is 6,900 square meters. Only U.S. sites are included in this analysis; U.S. sites make up over 90% of Bank of America's real estate footprint. Sites were overlaid on the U.S. Geological Survey's Protected Areas Database (PADUS) to understand intersection with protected areas.
Air pollution	**Air pollution:** Report wherever material along the value chain: Nitrogen oxides (NO_x), sulphur oxides (SO_x), particulate matter and other significant air emissions. Wherever possible, estimate the proportion of specified emissions that occur in or adjacent to urban/densely populated areas.	Bank of America's 2019 air pollution emissions (metric tons) are as follows. These air pollution emissions are from all of our sites globally and are not specific to urban/densely populated areas. For more information, refer to our 2019 ESG Performance Data Summary available at www.bankofamerica.com/ESGData. • SO_x: 1 • NO_x: 20 • CO: 32 • VOC: 2 • Particulate Matter: 3
	Impact of air pollution: Report wherever material along the value chain, the valued impact of air pollution, including nitrogen oxides (NO_x), sulfur oxides (SO_x), particulate matter and other significant air emissions.	The valued impact of Bank of America's air pollution (SO_x, NO_x, CO, VOCs, and PM) in 2019 was estimated to be $146,000. This figure was calculated using the social cost factors of each pollutant as reported in the World Resources Institute's Transport Emissions & Social Cost Assessment (TESCA) Tool v1.0. These social cost factors are weighted averages based on a meta-analysis of international academic studies.

*2020 Environmental Data will be published in Q2 2021.

Prosperity

THEME	METRIC	RESPONSE
Employment and wealth generation	**Absolute number and rate of employment:** **1.** Total number and rate of new employee hires during the reporting period, by age group, gender, other indicators of diversity and region. **2.** Total number and rate of employee turnover during the reporting period, by age group, gender, other indicators of diversity and region.	See External Hires and Turnover tables below. In 2020, turnover was at extremely low levels given the pandemic, however we would not assume these levels to remain in the future. While external research has found that women are dropping out of the workforce at a higher rate than men, we have not experienced this turnover at Bank of America.
	Economic Contribution: **1.** Direct economic value generated and distributed (EVG&D) — on an accrual basis, covering the basic components for the organization's global operations, ideally split out by: a. Revenue b. Operating Costs c. Employee wages and benefits d. Payments to providers of capital e. Payments to government f. Community Investment. **2.** Financial assistance received from the government — Total monetary value of financial assistance received by the organization from any government during the reporting period.	1a–d. Refer to *Financial Statements and Notes* beginning on page 116 of the 2020 Financial Review section. 1e. Refer to Total tax paid metric. 1f. 2020 Total philanthropic giving was $350 million. 2. See the company's response for the Total Tax Paid metric for more information about certain income tax credits that the company does not consider to be nor includes in the response as financial assistance received from a government.

Hispanic/Latino	7%	Canada	4%

THEME	METRIC	RESPONSE
Wealth creation and Employment	**Financial investment contribution disclosure:** **1.** Total capital expenditures (CapEx) minus depreciation supported by narrative to describe the company's investment strategy. **2.** Share buybacks plus dividend payments supported by narrative to describe the company's strategy for returns of capital to shareholders.	1. We made $2.74 billion in fixed asset capital investments ($0.83 billion net of depreciation) primarily related to our real estate portfolio and technology expenditures. Our real estate investments focused on items that will allow us to bring teammates together to drive greater collaboration and efficiencies in support of our effort to deliver one company to our clients. We invested in modernizing sites across the portfolio while also providing health and safety resources to all locations to support our teammates. We also continue to invest in the expansion and modernization of our financial center network. Additionally, our technology purchases represent hardware and software to support ongoing investments in the Bank of America technology infrastructure and represent efforts to continue to support customers, clients, and employees. 2. For more information outlining our return of capital to shareholders, see *Note 13—Shareholders' Equity* on page 166 of the 2020 Financial Review section.
Community and social vitality	**Total tax paid:** The total global tax borne by the company, including corporate income taxes, property taxes, non-creditable VAT and other sales taxes, employer-paid payroll taxes and other taxes that constitute costs to the company, by category of taxes.	The following table reflects the approximate amount of each category of tax borne by the company globally. U.S. income tax law provides investors in affordable housing projects, renewable energy projects and other activities that further ESG principles with credits that can reduce income taxes otherwise owed. These investments generally involve substantial pre-tax losses. The amount shown in the table for Corporate Income Taxes paid would have been approximately $3 billion higher were it not for these credits. **Global Tax Paid in 2020** ($ in billions) Corporate Income Taxes: 2.9 Property Taxes: 0.2 Non-creditable VAT and Other Sales Taxes: 0.6 Employer-paid Payroll Taxes: 1.7 Other Taxes: 0.8 **Total: 6.2**
Innovation in better products and services	**Total R&D expenses ($):** Total costs related to research and development.	While R&D expenses are indicative of a company's investment in innovation and producing better products and services for their clients, it is not the only way to measure a company's efforts to innovate new products and services and to be fit for the future. For example, Bank of America is in the midst of a 10-year $300B commitment to finance the transition to a low-carbon economy including the adoption of low-carbon technologies such as resource-efficient building construction, renewable energy generation, sustainable transportation such as electric vehicles and charging infrastructure, and resource-efficient agriculture. We are also dedicating significant financial, intellectual, philanthropic and catalytic capital to support the advancement of developing technologies, such as carbon finance, sustainable agriculture and biofuels, water infrastructure, clean hydrogen, waste-to-energy, and carbon capture sequestration. In addition to our financing commitment referenced above, we invest heavily in technology development to meet the needs of the Corporation in support of LRR (Laws, Rules, Regulations), Data Remediation, Resiliency and Stability, clients / new products and efficiencies. We spent $3.5B on these items during 2020. Bank of America is also granted patents by the U.S. Patent Office. In 2020, we filed 722 patent applications and separately received 444 patents for the products and services we bring to our clients including innovations in information security, ATM technology, data integrity and monitoring using artificial intelligence (AI) or machine learning, fully functioning payment instruments, network management and network traffic analysis. The bank is one of the top 15 holders of U.S. banking-related patents and applications.

People

THEME	METRIC	RESPONSE
Dignity and equality	**Diversity and inclusion (%):** Percentage of employees per employee category, per age group, gender and other indicators of diversity (e.g. ethnicity).	Refer to pages 11 & 27 in our 2020 Human Capital Management Report available on the Bank of America Investor Relations website at www.bankofamerica.com/investor.
	Pay equality: Ratio of the basic salary and remuneration for each employee category by significant locations of operation for priority areas of equality: women to men; minor to major ethnic groups; and other relevant equality areas.	Refer to the Equal Pay for Equal Work Section in our 2021 Proxy Statement available on the Bank of America Investor Relations website at www.bankofamerica.com/investor. We conduct rigorous analysis with outside experts to examine individual employee pay before year-end compensation decisions are finalized adjusting compensation where appropriate. The results of our equal pay for equal work review are disclosed in the Proxy Statement. Our analysis focuses on total compensation and includes geographies where we have significant operations for women and covers the U.S. for people of color.
	Wage level (%): **1.** Ratios of standard entry-level wage by gender compared to local minimum wage **2.** Ratio of CEO's total annual compensation to median total annual compensation of all employees (excluding the CEO)	1. We are an industry leader in establishing an internal minimum rate of pay above all mandated minimums for our U.S. hourly teammates, and have made regular increases over the past several years. Our minimum hourly wage for U.S. teammates was raised to $20 in the first quarter of 2020, more than one year earlier than planned. We compare our average U.S. hourly pay and benefits to living wage standards utilizing MIT's Living Wage Calculator. The Living Wage calculator is a market based approach that measures the basic needs of a family including items such as food, childcare, health insurance and housing costs. We are above the living wage for a family of four in all of our U.S. markets when we consider our average hourly pay plus benefits in alignment with the living wage definition. 2. Refer to the section entitled "CEO pay ratio" in our 2021 Proxy Statement on the Bank of America Investor Relations website available at www.bankofamerica.com/investor.
	Risk for incidents of child, forced or compulsory labor: An explanation of the operations and suppliers considered to have significant risk for incidents of child labor, forced or compulsory labor. Such risks could emerge in relation to type of operation (such as manufacturing plant) and type of supplier; or countries or geographic areas with operations and suppliers considered at risk.	Refer to our 2019 Modern Slavery Act Statement available at www.bankofamerica.com/ModernSlaveryAct.
	Discrimination and Harassment Incidents (#) and the Total Amount of Monetary Losses ($): Number of discrimination and harassment incidents, status of the incidents and actions taken and the total amount of monetary losses as a result of legal proceedings associated with (1) law violations and (2) employment discrimination.	For disclosure of significant litigation and regulatory matters, see *Note 12 — Commitments and Contingencies* on page 161 of the 2020 Financial Review section.
	Freedom of Association and Collective Bargaining at Risk (%): **1.** Percentage of active workforce covered under collective bargaining agreements **2.** An explanation of the assessment performed on suppliers for which the right to freedom of association and collective bargaining is at risk including measures taken by the organization to address these risks.	1. No U.S.-based employees are subject to collective bargaining agreements. 2. We do not currently conduct this assessment.
Health and well being	**Health and Safety (%):** **1.** The number and rate of fatalities as a result of work-related injury; high-consequence work-related injuries (excluding fatalities); recordable work-related injuries, main types of work-related injury; and the number of hours worked. **2.** An explanation of how the organization facilitates workers' access to non-occupational medical and healthcare services and the scope of access provided for employees and workers.	1. This metric is not material for the banking industry. 2. Refer to pages 20–23 of our 2020 Human Capital Management Report on the Bank of America Investor Relations website available at www.bankofamerica.com/investor.
Skills for the future	**Training provided (#, $):** **1.** Average hours of training per person that the organization's employees have undertaken during the reporting period, by gender and employee category (total number of trainings provided to employees divided by the number of employees). **2.** Average training and development expenditure per full time employee.	1. Training Hours Per Person **Total** **42** Female 47 POC 54 Black/ African American 53 Hispanic/Latino 66 2. $1,600 per employee
	Number of unfilled "Skilled" positions (#, %): **1.** Number of unfilled "Skilled" positions (#) **2.** Percentage of unfilled "Skilled" positions for which the company will hire unskilled candidates and train them. (%).	Bank of America is committed to creating opportunities for our current and prospective employees to grow and develop, including creating avenues for reskilling for specialized jobs. For example, we have hired more than 10,000 individuals from low- to moderate-income communities through our Pathways career program. For more information on how we attract and develop talent, refer to pages 15–18 of our Human Capital Management report available on the Bank of America Investor Relations website at www.bankofamerica.com/investor.

2020 Financial Review

Financial Review
Table of Contents

Management's Discussion and Analysis of Financial Condition and Results of Operations

Bank of America Corporation (the "Corporation") and its management may make certain statements that constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. These statements can be identified by the fact that they do not relate strictly to historical or current facts. Forward-looking statements often use words such as "anticipates," "targets," "expects," "hopes," "estimates," "intends," "plans," "goals," "believes," "continue" and other similar expressions or future or conditional verbs such as "will," "may," "might," "should," "would" and "could." Forward-looking statements represent the Corporation's current expectations, plans or forecasts of its future results, revenues, provision for credit losses, expenses, efficiency ratio, capital measures, strategy and future business and economic conditions more generally, and other future matters. These statements are not guarantees of future results or performance and involve certain known and unknown risks, uncertainties and assumptions that are difficult to predict and are often beyond the Corporation's control. Actual outcomes and results may differ materially from those expressed in, or implied by, any of these forward-looking statements.

You should not place undue reliance on any forward-looking statement and should consider the following uncertainties and risks, as well as the risks and uncertainties more fully discussed under Item 1A. Risk Factors of our 2020 Annual Report on Form 10-K: the Corporation's potential judgments, damages, penalties, fines and reputational damage resulting from pending or future litigation, regulatory proceedings and enforcement actions; the possibility that the Corporation's future liabilities may be in excess of its recorded liability and estimated range of possible loss for litigation, and regulatory and government actions, including as a result of our participation in and execution of government programs related to the Coronavirus Disease 2019 (COVID-19) pandemic; the possibility that the Corporation could face increased claims from one or more parties involved in mortgage securitizations; the Corporation's ability to resolve representations and warranties repurchase and related claims; the risks related to the discontinuation of the London Interbank Offered Rate and other reference rates, including increased expenses and litigation and the effectiveness of hedging strategies; uncertainties about the financial stability and growth rates of non-U.S. jurisdictions, the risk that those jurisdictions may face difficulties servicing their sovereign debt, and related stresses on financial markets, currencies and trade, and the Corporation's exposures to such risks, including direct, indirect and operational; the impact of U.S. and global interest rates, inflation, currency exchange rates, economic conditions, trade policies and tensions, including tariffs, and potential geopolitical instability; the impact of the interest rate environment on the Corporation's business, financial condition and results of operations; the possibility that future credit losses may be higher than currently expected due to changes in economic assumptions, customer behavior, adverse developments with respect to U.S. or global economic conditions and other uncertainties; the Corporation's concentration of credit risk; the Corporation's ability to achieve its expense targets and expectations regarding revenue, net interest income, provision for credit losses, net charge-offs, effective tax rate, loan growth or other projections; adverse changes to the Corporation's credit ratings from the major credit rating agencies; an inability to access capital markets or maintain deposits or borrowing costs; estimates of the fair value and other accounting values, subject to impairment assessments, of certain of the Corporation's assets and liabilities; the estimated or actual impact of changes in accounting standards or assumptions in applying those standards; uncertainty regarding the content, timing and impact of regulatory capital and liquidity requirements; the impact of adverse changes to total loss-absorbing capacity requirements, stress capital buffer requirements and/or global systemically important bank surcharges; the potential impact of actions of the Board of Governors of the Federal Reserve System on the Corporation's capital plans; the effect of regulations, other guidance or additional information on the impact from the Tax Cuts and Jobs Act; the impact of implementation and compliance with U.S. and international laws, regulations and regulatory interpretations, including, but not limited to, recovery and resolution planning requirements, Federal Deposit Insurance Corporation assessments, the Volcker Rule, fiduciary standards, derivatives regulations and the Coronavirus Aid, Relief, and Economic Security Act and any similar or related rules and regulations; a failure or disruption in or breach of the Corporation's operational or security systems or infrastructure, or those of third parties, including as a result of cyber attacks or campaigns; the impact on the Corporation's business, financial condition and results of operations from the United Kingdom's exit from the European Union; the impact of climate change; the impact of any future federal government shutdown and uncertainty regarding the federal government's debt limit or changes to the U.S. presidential administration and Congress; the emergence of widespread health emergencies or pandemics, including the magnitude and duration of the COVID-19 pandemic and its impact on the U.S. and/or global, financial market conditions and our business, results of operations, financial condition and prospects; the impact of natural disasters, extreme weather events, military conflict, terrorism or other geopolitical events; and other matters.

Forward-looking statements speak only as of the date they are made, and the Corporation undertakes no obligation to update any forward-looking statement to reflect the impact of circumstances or events that arise after the date the forward-looking statement was made.

Notes to the Consolidated Financial Statements referred to in the Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) are incorporated by reference into the MD&A. Certain prior-year amounts have been reclassified to conform to current-year presentation. Throughout the MD&A, the Corporation uses certain acronyms and abbreviations which are defined in the Glossary.

Executive Summary

Business Overview

The Corporation is a Delaware corporation, a bank holding company (BHC) and a financial holding company. When used in this report, "the Corporation," "we," "us" and "our" may refer to Bank of America Corporation individually, Bank of America Corporation and its subsidiaries, or certain of Bank of America Corporation's subsidiaries or affiliates. Our principal executive offices are located in Charlotte, North Carolina. Through our various bank and nonbank subsidiaries throughout the U.S. and in international markets, we provide a diversified range of banking and nonbank financial services and products through four business segments: *Consumer Banking*, *Global Wealth & Investment Management (GWIM)*, *Global Banking* and *Global Markets*, with the remaining operations recorded in *All Other*. We operate our banking activities primarily under the Bank of

America, National Association (Bank of America, N.A. or BANA) charter. At December 31, 2020, the Corporation had $2.8 trillion in assets and a headcount of approximately 213,000 employees.

As of December 31, 2020, we served clients through operations across the U.S., its territories and approximately 35 countries. Our retail banking footprint covers all major markets in the U.S., and we serve approximately 66 million consumer and small business clients with approximately 4,300 retail financial centers, approximately 17,000 ATMs, and leading digital banking platforms (www.bankofamerica.com) with more than 39 million active users, including approximately 31 million active mobile users. We offer industry-leading support to approximately three million small business households. Our *GWIM* businesses, with client balances of $3.3 trillion, provide tailored solutions to meet client needs through a full set of investment management, brokerage, banking, trust and retirement products. We are a global leader in corporate and investment banking and trading across a broad range of asset classes serving corporations, governments, institutions and individuals around the world.

Recent Developments

Capital Management

In June 2020, the Board of Governors of the Federal Reserve System (Federal Reserve) notified BHCs of their 2020 Comprehensive Capital Analysis and Review (CCAR) supervisory stress test results. Due to economic uncertainty resulting from the Coronavirus Disease 2019 (COVID-19) pandemic (the pandemic), the Federal Reserve required all large banks to update and resubmit their capital plans in November 2020 based on the Federal Reserve's updated supervisory stress test scenarios. The results of the additional supervisory stress tests were published in December 2020.

The Federal Reserve also required large banks to suspend share repurchase programs during the second half of 2020, except for repurchases to offset shares awarded under equity-based compensation plans, and to limit common stock dividends to existing rates that did not exceed the average of the last four quarters' net income. In December 2020, the Federal Reserve announced that beginning in the first quarter of 2021, large banks would be permitted to pay common stock dividends at existing rates and to repurchase shares in an amount that, when combined with dividends paid, does not exceed the average of net income over the last four quarters.

On January 19, 2021, we announced that the Board of Directors (the Board) declared a quarterly common stock dividend of $0.18 per share, payable on March 26, 2021 to shareholders of record as of March 5, 2021. We also announced that the Board authorized the repurchase of $2.9 billion in common stock through March 31, 2021, plus repurchases to offset shares awarded under equity-based compensation plans during the same period, estimated to be approximately $300 million. This authorization equals the maximum amount allowed by the Federal Reserve for the period. For more information, see Capital Management on page 73.

COVID-19 Pandemic

In the first quarter of 2020, the World Health Organization declared the outbreak of COVID-19 a pandemic. In an attempt to contain the spread and impact of the pandemic, travel bans and restrictions, quarantines, shelter-in-place orders and other limitations on business activity were implemented. Additionally, there has been a decline in global economic activity, reduced U.S. and global economic output and a deterioration in macroeconomic conditions in the U.S. and globally. This has resulted in, among other things, higher rates of unemployment and underemployment and caused volatility and disruptions in the global financial markets, including the energy and commodity markets. Although vaccines have been approved for immunization against COVID-19 in certain countries and restrictive measures have been eased in certain areas, COVID-19 cases have significantly increased in recent months in the U.S. and many regions of the world compared to earlier levels. Businesses, market participants, our counterparties and clients, and the U.S. and global economies have been negatively impacted and are likely to be so for an extended period of time, as there remains significant uncertainty about the timing and strength of an economic recovery.

To address the economic impact in the U.S., in March and April 2020, four economic stimulus packages were enacted to provide relief to businesses and individuals, including the Coronavirus Aid, Relief, and Economic Security Act (CARES Act). Among other measures, the CARES Act established the Small Business Administration (SBA) Paycheck Protection Program (PPP), which provides loans to small businesses to keep their employees on payroll and make other eligible payments. The original funding for the PPP under the CARES Act was fully allocated by mid-April 2020, with additional funding made available on April 24, 2020 under the Paycheck Protection Program and Health Care Enhancement Act. In December 2020, an additional economic stimulus package was included as part of the Consolidated Appropriations Act of 2021 (the Consolidated Appropriations Act), which provides relief to individuals and businesses. This relief included additional funding for the PPP under the Economic Aid to Hard-Hit Small Businesses, Nonprofits, and Venues Act (the Economic Aid Act).

In response to the pandemic, the Corporation has implemented protocols and processes to execute its business continuity plans and help protect its employees and support its clients. The Corporation is managing its response to the pandemic according to its Enterprise Response Framework, which invokes centralized management of the crisis event and the integration of its response. The CEO and key members of the Corporation's management team meet regularly with co-leaders of the Executive Response Team, which is composed of senior executives across the Corporation, to help drive decisions, communications and consistency of response across all businesses and functions. We are also coordinating with global, regional and local authorities and health experts, including the U.S. Centers for Disease Control and Prevention (CDC) and the World Health Organization.

Additionally, we have implemented a number of measures to assist our employees, clients and the communities we serve as discussed below.

Employees

We are providing support to our teammates to help promote the health and safety of our employees and help to ensure our protocols remain aligned to current guidance by monitoring guidance from the CDC, medical boards and health authorities and sharing such guidance with our employees. We are also operating our businesses from remote locations and leveraging our business continuity plans and capabilities.

The Corporation has globally implemented a work-from-home posture, which has resulted in the substantial majority of our employees working from home, and pre-planned contingency strategies for site-based operations for our remaining employees. We continue to evaluate our continuity plans and work-from-home strategy in an effort to best protect the health and safety of our employees.

Clients

We continue to leverage our business continuity plans and capabilities to service our clients and meet our clients' financial needs by offering assistance to clients affected by the pandemic, including providing access to credit and the important financial services on which our clients rely. We are also participating in the programs created by the CARES Act and Federal Reserve lending programs for businesses, including originating PPP loans. We have also participated in the Main Street Lending Program, which ended on January 8, 2021. While most of our deferral programs expired in the third quarter of 2020, we continue to offer assistance on a case-by-case basis when requested by clients affected by the pandemic.

As of December 31, 2020, we had approximately 332,000 PPP loans outstanding with a carrying value of $22.7 billion, which were recorded in the *Consumer*, *GWIM* and *Global Banking* segments. Since the PPP's inception through February 17, 2021, borrowers have submitted applications for forgiveness to us for approximately 113,000 PPP loans with balances totaling $10.9 billion. We have submitted approximately 72,000 PPP loans with balances totaling $8.5 billion to the SBA for repayment, of which we have received to date $5.4 billion in repayment from the SBA. Additionally, as of February 17, 2021, we have originated $4.1 billion in PPP loans under the Economic Aid Act. For more information on PPP loans, see Credit Risk Management on page 84, and for more information on accounting for PPP loans and loan modifications under the CARES Act, see *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements.

Community Partners

We continue to support the communities where we live and work by engaging in various initiatives to help those affected by COVID-19. These initiatives include committing resources to provide medical supplies, food and other necessities for those in need. We are also supporting racial equality, economic opportunity and environmental sustainability through direct equity investments in minority-owned depository institutions, equity investments in minority entrepreneurs, businesses and funds, as well as other initiatives.

Risk Management

We continue to manage the increased operational risk related to the execution of our business continuity plans in accordance with our Enterprise Response Framework, Risk Framework and Operational Risk Management Program. For more information, see Managing Risk on page 70.

Loan Modifications

The Corporation has implemented various consumer and commercial loan modification programs to provide its borrowers relief from the economic impacts of COVID-19. Based on guidance in the CARES Act that the Corporation adopted, COVID-19 related modifications to consumer and commercial loans that were current as of December 31, 2019 are exempt from troubled debt restructuring (TDR) classification under accounting principles generally accepted in the United States of America (GAAP). In addition, the bank regulatory agencies issued interagency guidance stating that COVID-19 related short-term modifications (i.e., six months or less) granted to consumer or commercial loans that were current as of the loan modification program implementation date are not TDRs. In December 2020, the Consolidated Appropriations Act amended the CARES Act by extending the exemption from TDR classification for COVID-19 related modifications from December 31, 2020 to the earlier of January 1, 2022 or 60 days after the national emergency has ended. For more information, see *Note 1 – Summary of Significant Accounting Principles* and *Note 5 – Outstanding Loans and Leases and Allowance for Credit Losses* to the Consolidated Financial Statements.

We have provided borrowers with relief from the economic impacts of COVID-19 through payment deferral and forbearance programs. A significant portion of deferrals expired during the second half of 2020, reflecting a decline in customer requests for assistance. As of February 17, 2021, deferred consumer and small business loans recorded on the Consolidated Balance Sheet totaled $6.8 billion, predominantly consisting of $6.4 billion of residential mortgage and home equity loans, including loans serviced by others, that are well-collateralized.

Other Related Matters

Although the macroeconomic outlook improved modestly during the second half of 2020, the future direct and indirect impact of COVID-19 on our businesses, results of operations and financial condition of the Corporation remains highly uncertain. Should current economic conditions persist or deteriorate, this macroeconomic environment will have a continued adverse effect on our businesses and results of operations and could have an adverse effect on our financial condition. For more information on how the risks related to the pandemic may adversely affect our businesses, results of operations and financial condition, see Item 1A. Risk Factors of our 2020 Annual Report on Form 10-K.

LIBOR and Other Benchmark Rates

Following the 2017 announcement by the U.K.'s Financial Conduct Authority (FCA) that it would no longer compel participating banks to submit rates for the London Interbank Offered Rate (LIBOR) after 2021, regulators, trade associations and financial industry working groups have identified recommended replacement rates for LIBOR, as well as other Interbank Offered Rates (IBORs), and have published recommended conventions to allow new and existing products to incorporate fallbacks or that reference these Alternative Reference Rates (ARRs). The continuation of all British Pound Sterling, Euro, Swiss Franc and Japanese Yen LIBOR settings and one-week and two-month U.S. dollar LIBOR settings on the current basis are expected to terminate at the end of December 2021, and the remaining U.S. dollar LIBOR settings (i.e., overnight, one month, three month, six month and 12 month) are expected to terminate at the end of June 2023.

As a result of this and other announcements, financial benchmark reforms, regulatory guidance and changes in short-term interbank lending markets more generally, a major transition is in progress in global financial markets with respect to the replacement of IBORs and certain benchmarks. The transition of IBORs to ARRs is a complex process impacting a variety of global financial markets and our business and operations.

IBORs are used in many of the Corporation's products and contracts, including derivatives, consumer and commercial loans, mortgages, floating-rate notes and other adjustable-rate products and financial instruments. The discontinuation of IBORs requires us to transition a significant number of IBOR-based products and contracts, including related hedging arrangements. In response, the Corporation established an enterprise-wide IBOR transition program led by senior management in early 2018. This program, which is led by the Corporation's Chief Operating Officer, includes active involvement of senior management and regular reports to the Enterprise Risk Committee (ERC). The program is intended to address the Corporation's industry and regulatory engagement, client and financial contract changes, internal and external communications, technology and operations modifications, introduction of new products, migration of existing clients, and program strategy and governance. In addition, the program is designed to monitor a variety of scenarios, including operational risks associated with insufficient preparation by individual market participants or the overall market ecosystem, volatility along the Secured Overnight Financing Rate (SOFR) curve, development and adoption of credit-sensitive and other rates, regulatory and legal uncertainty with respect to various matters including contract continuity, access by market participants to liquidity in certain products, and IBOR continuity beyond December 2021.

As of February 1, 2021, a significant majority of the aggregate notional amount of our LIBOR-based products and contracts maturing after 2021 include or have been updated to include fallbacks to ARRs based on market driven protocols, regulatory guidance and industry-recommended fallback provisions and related mechanisms. For certain of the remaining products and contracts, the transition will be more complex, particularly where there is no industry-wide protocol or similar mechanism. The Corporation is executing transition plans that are intended to be in line with applicable major industry-wide IBOR product cessation and launch milestones recommended by the Alternative Reference Rates Committee, a group of private market participants and official sector entities convened by the Federal Reserve and the Federal Reserve Bank of New York, and the Bank of England Sterling Risk Free Rate Working Group, other than the cessation of LIBOR-based adjustable-rate consumer mortgages. The Corporation plans to no longer offer these mortgages and launch SOFR-based adjustable-rate consumer mortgages by the end of the first quarter of 2021.

The Corporation is executing product and client roadmaps that it believes align with industry-recommended and regulatory milestones, and the Corporation has developed employee training programs as well as other internal and external sources of information on the various challenges and opportunities that the replacement of IBORs presents. As the transition to ARRs evolves, the Corporation continues to monitor and participate in the development and usage of certain ARRs, including SOFR, the Euro Short Term Rate and the Sterling Overnight Index Average (SONIA). The Corporation's key transition efforts to date include issuances of debt and deposits linked to SOFR and SONIA by the Corporation, facilitating debt issuances linked to ARRs by clients and secondary market liquidity for products linked to ARRs, originating and arranging loans linked to ARRs, including hedging arrangements, executing, trading, market making and clearing ARR-based derivatives, and launching capabilities and services to support the issuance and trading in products indexed to certain ARRs. The Corporation updated its operational models, systems, procedures and internal infrastructure in connection with the transition to ARRs by the central clearing counterparties. In October 2020, the Corporation and certain of its subsidiaries adhered to the International Swaps and Derivatives Association, Inc. 2020 IBOR Fallbacks Protocol, effective January 25, 2021, which provides a mechanism to enable market participants to incorporate fallbacks for certain legacy non-cleared derivatives linked to certain IBORs.

Additionally, the Corporation is continuing to evaluate potential regulatory, tax and accounting impacts of the transition, including guidance published and/or proposed by the Internal Revenue Service and Financial Accounting Standards Board, engage impacted clients in connection with the transition to ARRs and work actively with global regulators, industry working groups and trade associations to develop strategies for an effective transition to ARRs. For more information on the expected replacement of LIBOR and other benchmark rates, see Item 1A. Risk Factors of our 2020 Annual Report on Form 10-K.

U.K. Exit from the EU

On January 31, 2020, the U.K. formally exited the European Union (EU), and a transition period began during which time the U.K. and the EU negotiated a trade agreement and other terms associated with their future relationship. The transition period ended on December 31, 2020.

We conduct business in Europe, the Middle East and Africa primarily through our subsidiaries in the U.K., Ireland and France and implemented changes to enable us to continue to operate in the region, including establishing a bank and broker-dealer in the EU, as well as minimize the potential for any operational disruption. As the global economic impact of the U.K.'s withdrawal from the EU remains uncertain and could result in regional and global financial market disruptions, we continue to assess potential operational, regulatory and legal risks. For more information, see Item 1A. Risk Factors of our 2020 Annual Report on Form 10-K.

Financial Highlights

Effective January 1, 2020, we adopted the new accounting standard on current expected credit losses (CECL), under which the allowance is measured based on management's best estimate of lifetime expected credit losses (ECL). Prior-year periods presented reflect measurement of the allowance based on management's estimate of probable incurred credit losses. For more information, see *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements.

Table 1 Summary Income Statement and Selected Financial Data

(Dollars in millions, except per share information)	2020	2019
Income statement		
Net interest income	$ 43,360	$ 48,891
Noninterest income	42,168	42,353
Total revenue, net of interest expense	85,528	91,244
Provision for credit losses	11,320	3,590
Noninterest expense	55,213	54,900
Income before income taxes	18,995	32,754
Income tax expense	1,101	5,324
Net income	17,894	27,430
Preferred stock dividends	1,421	1,432
Net income applicable to common shareholders	$ 16,473	$ 25,998
Per common share information		
Earnings	$ 1.88	$ 2.77
Diluted earnings	1.87	2.75
Dividends paid	0.72	0.66
Performance ratios		
Return on average assets [(1)]	0.67 %	1.14 %
Return on average common shareholders' equity [(1)]	6.76	10.62
Return on average tangible common shareholders' equity [(2)]	9.48	14.86
Efficiency ratio [(1)]	64.55	60.17
Balance sheet at year end		
Total loans and leases	$ 927,861	$ 983,426
Total assets	2,819,627	2,434,079
Total deposits	1,795,480	1,434,803
Total liabilities	2,546,703	2,169,269
Total common shareholders' equity	248,414	241,409
Total shareholders' equity	272,924	264,810

(1) For definitions, see Key Metrics on page 196.
(2) Return on average tangible common shareholders' equity is a non-GAAP financial measure. For more information and a corresponding reconciliation to the most closely related financial measures defined by accounting principles generally accepted in the United States of America, see Non-GAAP Reconciliations on page 111.

Net income was $17.9 billion or $1.87 per diluted share in 2020 compared to $27.4 billion or $2.75 per diluted share in 2019. The decline in net income was primarily due to higher provision for credit losses driven by the weaker economic outlook related to COVID-19 and lower net interest income.

For discussion and analysis of our consolidated and business segment results of operations for 2019 compared to 2018, see the Financial Highlights and Business Segment Operations sections in the MD&A of the Corporation's 2019 Annual Report on Form 10-K.

Net Interest Income

Net interest income decreased $5.5 billion to $43.4 billion in 2020 compared to 2019. Net interest yield on a fully taxable-equivalent (FTE) basis decreased 53 basis points (bps) to 1.90 percent for 2020. The decrease in net interest income was primarily driven by lower interest rates, partially offset by reduced deposit and funding costs, the deployment of excess deposits into securities and an additional day of interest accrual. Assuming continued economic improvement and based on the forward interest rate curve as of January 19, 2021, when we announced quarterly and annual results for the periods ended December 31, 2020, we expect net interest income to be higher in the second half of 2021 as compared to both the second half of 2020 and the first half of 2021. For more information on net interest yield and the FTE basis, see Supplemental Financial Data on page 54, and for more information on interest rate risk management, see Interest Rate Risk Management for the Banking Book on page 105.

Noninterest Income

Table 2 Noninterest Income

(Dollars in millions)	2020	2019
Fees and commissions:		
Card income	$ 5,656	$ 5,797
Service charges	7,141	7,674
Investment and brokerage services	14,574	13,902
Investment banking fees	7,180	5,642
Total fees and commissions	34,551	33,015
Market making and similar activities	8,355	9,034
Other income	(738)	304
Total noninterest income	$ 42,168	$ 42,353

Noninterest income decreased $185 million to $42.2 billion in 2020 compared to 2019. The following highlights the significant changes.

- Card income decreased $141 million primarily due to lower levels of consumer spending driven by the impact of COVID-19, partially offset by higher income related to the processing of unemployment insurance.
- Service charges decreased $533 million primarily due to higher deposit balances and lower client activity due to the impact of COVID-19.
- Investment and brokerage services income increased $672 million primarily due to higher client transactional activity, higher market valuations and assets under management (AUM) flows, partially offset by declines in AUM pricing.
- Investment banking fees increased $1.5 billion primarily driven by higher equity issuance fees.
- Market making and similar activities decreased $679 million primarily due to the impact of lower U.S. interest rates on certain risk management derivatives, partially offset by increased client activity and strong trading performance in fixed income, currencies and commodities (FICC).
- Other income decreased $1.0 billion primarily due to lower equity investment income, higher partnership losses on tax credit investments, primarily affordable housing and renewable energy, partially offset by higher gains on loan sales and sales of debt securities.

Provision for Credit Losses

The provision for credit losses increased $7.7 billion to $11.3 billion in 2020 compared to 2019 primarily driven by higher ECL due to a weaker economic outlook related to COVID-19. For more information on the provision for credit losses, see Allowance for Credit Losses on page 99.

Noninterest Expense

Table 3 Noninterest Expense

(Dollars in millions)	2020	2019
Compensation and benefits	$ 32,725	$ 31,977
Occupancy and equipment	7,141	6,588
Information processing and communications	5,222	4,646
Product delivery and transaction related	3,433	2,762
Marketing	1,701	1,934
Professional fees	1,694	1,597
Other general operating	3,297	5,396
Total noninterest expense	$ 55,213	$ 54,900

Noninterest expense increased $313 million to $55.2 billion in 2020 compared to 2019. The increase was primarily due to higher operating costs related to COVID-19, merchant services expenses, which were previously recorded in other income as part of joint venture net earnings, and higher activity-based expenses due to increased client activity, partially offset by a $2.1 billion pretax impairment charge related to the notice of termination of the merchant services joint venture in 2019.

Income Tax Expense

Table 4 Income Tax Expense

(Dollars in millions)	2020	2019
Income before income taxes	$ 18,995	$ 32,754
Income tax expense	1,101	5,324
Effective tax rate	5.8 %	16.3 %

Income tax expense was $1.1 billion for 2020 compared to $5.3 billion in 2019, resulting in an effective tax rate of 5.8 percent compared to 16.3 percent.

The change in the effective tax rate for 2020 was driven by the impact of our recurring tax preference benefits on lower levels of pretax income. These benefits primarily consist of tax credits from environmental, social and governance (ESG) investments in affordable housing and renewable energy, aligning with our responsible growth strategy to address global sustainability challenges. Excluding tax credits related to our ESG investment activity, the effective tax rate for 2020 would have been 21 percent.

The 2020 rate also included the impact of the U.K. tax law change, whereby on July 22, 2020, the U.K. enacted a repeal of the final two percent of scheduled decreases in the U.K. corporation tax rate, which had been previously enacted. This change will unfavorably affect income tax expense on future U.K. earnings, and requires a reversal of the adjustment to the U.K. net deferred tax assets recognized at the time the tax rate decreases were originally enacted. Accordingly, during the third quarter of 2020, the Corporation recorded an income tax benefit of approximately $700 million along with a corresponding increase to the U.K. net deferred tax assets.

The effective tax rate for 2019 included net tax benefits primarily related to the resolution of various tax controversy matters.

Absent unusual items, we expect the effective tax rate for 2021 to be in the range of 10 – 12 percent, reflecting tax credits related to our ESG investment activity.

Balance Sheet Overview

Table 5 Selected Balance Sheet Data

(Dollars in millions)	December 31 2020	December 31 2019	% Change
Assets			
Cash and cash equivalents	$ 380,463	$ 161,560	135 %
Federal funds sold and securities borrowed or purchased under agreements to resell	304,058	274,597	11

Total liabilities	2,546,703	2,169,269	17
Shareholders' equity	272,924	264,810	3
Total liabilities and shareholders' equity	$ 2,819,627	$ 2,434,079	16

Assets

At December 31, 2020, total assets were approximately $2.8 trillion, up $385.5 billion from December 31, 2019. The increase in assets was primarily due to higher cash held at central banks that was primarily funded by deposit growth and debt securities, partially offset by a decline in loans and leases.

Cash and Cash Equivalents

Cash and cash equivalents increased $218.9 billion driven by deposit growth.

Federal Funds Sold and Securities Borrowed or Purchased Under Agreements to Resell

Federal funds transactions involve lending reserve balances on a short-term basis. Securities borrowed or purchased under agreements to resell are collateralized lending transactions utilized to accommodate customer transactions, earn interest rate spreads, and obtain securities for settlement and for collateral. Federal funds sold and securities borrowed or purchased under agreements to resell increased $29.5 billion primarily due to deployment of deposit inflows.

Trading Account Assets

Trading account assets consist primarily of long positions in equity and fixed-income securities including U.S. government and agency securities, corporate securities and non-U.S. sovereign debt. Trading account assets decreased $31.0 billion due to a decline in inventory within *Global Markets*.

Debt Securities

Debt securities primarily include U.S. Treasury and agency securities, mortgage-backed securities (MBS), principally agency MBS, non-U.S. bonds, corporate bonds and municipal debt. We use the debt securities portfolio primarily to manage interest rate and liquidity risk and to take advantage of market conditions that create economically attractive returns on these investments. Debt securities increased $212.7 billion primarily driven by the deployment of deposit inflows. For more information on debt securities, see *Note 4 – Securities* to the Consolidated Financial Statements.

Loans and Leases

Loans and leases decreased $55.6 billion primarily driven by commercial loan paydowns, lower credit card spending and lower residential mortgages due to higher paydowns and a decline in originations. For more information on the loan portfolio, see Credit Risk Management on page 84.

Allowance for Loan and Lease Losses

The allowance for loan and lease losses increased $9.4 billion primarily due to the weaker economic outlook related to COVID-19 and the impact of the adoption of the new credit loss accounting standard. For more information, see Allowance for Credit Losses on page 99.

Liabilities

At December 31, 2020, total liabilities were approximately $2.5 trillion, up $377.4 billion from December 31, 2019, primarily due to deposit growth.

Deposits

Deposits increased $360.7 billion primarily due to an increase in retail and wholesale deposits.

Federal Funds Purchased and Securities Loaned or Sold Under Agreements to Repurchase

Federal funds transactions involve borrowing reserve balances on a short-term basis. Securities loaned or sold under agreements to repurchase are collateralized borrowing transactions utilized to accommodate customer transactions, earn interest rate spreads and finance assets on the balance sheet. Federal funds purchased and securities loaned or sold under agreements to repurchase increased $5.2 billion primarily driven by client activity within *Global Markets*.

Trading Account Liabilities

Trading account liabilities consist primarily of short positions in equity and fixed-income securities including U.S. Treasury and agency securities, corporate securities and non-U.S. sovereign debt. Trading account liabilities decreased $12.0 billion primarily due to lower levels of short positions within *Global Markets*.

Short-term Borrowings

Short-term borrowings provide an additional funding source and primarily consist of Federal Home Loan Bank (FHLB) short-term borrowings, notes payable and various other borrowings that generally have maturities of one year or less. Short-term borrowings decreased $4.9 billion due to higher deposit levels. For more information on short-term borrowings, see *Note 10 – Federal Funds Sold or Purchased, Securities Financing Agreements, Short-term Borrowings and Restricted Cash* to the Consolidated Financial Statements.

Long-term Debt

Long-term debt increased $22.1 billion primarily due to debt issuances and valuation adjustments, partially offset by maturities and redemptions. For more information on long-term debt, see *Note 11 – Long-term Debt* to the Consolidated Financial Statements.

Shareholders' Equity

Shareholders' equity increased $8.1 billion driven by net income, market value increases on debt securities and issuances of preferred and common stock, partially offset by the return of capital to shareholders totaling $14.7 billion through share repurchases and common and preferred stock dividends, as well as the impact of the adoption of the new credit loss accounting standard and the redemption of preferred stock.

Cash Flows Overview

The Corporation's operating assets and liabilities support our global markets and lending activities. We believe that cash flows from operations, available cash balances and our ability to generate cash through short- and long-term debt are sufficient to fund our operating liquidity needs. Our investing activities primarily include the debt securities portfolio and loans and leases. Our financing activities reflect cash flows primarily related to customer deposits, securities financing agreements and long-term debt. For more information on liquidity, see Liquidity Risk on page 80.

Supplemental Financial Data

Non-GAAP Financial Measures

In this Form 10-K, we present certain non-GAAP financial measures. Non-GAAP financial measures exclude certain items or otherwise include components that differ from the most directly comparable measures calculated in accordance with GAAP. Non-GAAP financial measures are provided as additional useful information to assess our financial condition, results of operations (including period-to-period operating performance) or compliance with prospective regulatory requirements. These non-GAAP financial measures are not intended as a substitute for GAAP financial measures and may not be defined or calculated the same way as non-GAAP financial measures used by other companies.

We view net interest income and related ratios and analyses on an FTE basis, which when presented on a consolidated basis are non-GAAP financial measures. To derive the FTE basis, net interest income is adjusted to reflect tax-exempt income on an equivalent before-tax basis with a corresponding increase in income tax expense. For purposes of this calculation, we use the federal statutory tax rate of 21 percent and a representative state tax rate. Net interest yield, which measures the basis points we earn over the cost of funds, utilizes net interest income on an FTE basis. We believe that presentation of these items on an FTE basis allows for comparison of amounts from both taxable and tax-exempt sources and is consistent with industry practices.

We may present certain key performance indicators and ratios excluding certain items (e.g., debit valuation adjustment (DVA) gains (losses)) which result in non-GAAP financial measures. We believe that the presentation of measures that exclude these items is useful because such measures provide additional information to assess the underlying operational performance and trends of our businesses and to allow better comparison of period-to-period operating performance.

We also evaluate our business based on certain ratios that utilize tangible equity, a non-GAAP financial measure. Tangible equity represents shareholders' equity or common shareholders' equity reduced by goodwill and intangible assets (excluding mortgage servicing rights (MSRs)), net of related deferred tax liabilities ("adjusted" shareholders' equity or common shareholders' equity). These measures are used to evaluate our use of equity. In addition, profitability, relationship and investment models use both return on average tangible common shareholders' equity and return on average tangible shareholders' equity as key measures to support our overall growth objectives. These ratios are as follows:

- Return on average tangible common shareholders' equity measures our net income applicable to common shareholders as a percentage of adjusted average common shareholders' equity. The tangible common equity ratio represents adjusted ending common shareholders' equity divided by total tangible assets.
- Return on average tangible shareholders' equity measures our net income as a percentage of adjusted average total shareholders' equity. The tangible equity ratio represents adjusted ending shareholders' equity divided by total tangible assets.
- Tangible book value per common share represents adjusted ending common shareholders' equity divided by ending common shares outstanding.

We believe ratios utilizing tangible equity provide additional useful information because they present measures of those assets that can generate income. Tangible book value per common share provides additional useful information about the level of tangible assets in relation to outstanding shares of common stock.

The aforementioned supplemental data and performance measures are presented in Tables 6 and 7.

For more information on the reconciliation of these non-GAAP financial measures to the corresponding GAAP financial measures, see Non-GAAP Reconciliations on page 111.

Key Performance Indicators

We present certain key financial and nonfinancial performance indicators (key performance indicators) that management uses when assessing our consolidated and/or segment results. We believe they are useful to investors because they provide additional information about our underlying operational performance and trends. These key performance indicators (KPIs) may not be defined or calculated in the same way as similar KPIs used by other companies. For information on how these metrics are defined, see Key Metrics on page 196.

Our consolidated key performance indicators, which include various equity and credit metrics, are presented in Table 1 on page 50 and/or Tables 6 and 7 on pages 55 and 56.

For information on key segment performance metrics, see Business Segment Operations on page 59.

Tangible equity [2]	**7.4**	8.2	8.6	8.9	9.2
Tangible common equity [2]	**6.5**	7.3	7.6	7.9	8.0

(1) For definitions, see Key Metrics on page 196

(2) Tangible equity ratios and tangible book value per share of common stock are non-GAAP financial measures. For more information on these ratios and corresponding reconciliations to GAAP financial measures, see Supplemental Financial Data on page 54 and Non-GAAP Reconciliations on page 111.

(3) Asset quality metrics include $75 million of non-U.S. consumer credit card net charge-offs in 2017 and $243 million of non-U.S. consumer credit card allowance for loan and lease losses, $9.2 billion of non-U.S. consumer credit card loans and $175 million of non-U.S. consumer credit card net charge-offs in 2016. The Corporation sold its non-U.S. consumer credit card business in 2017.

(4) Includes the allowance for loan and leases losses and the reserve for unfunded lending commitments.

(5) Balances and ratios do not include loans accounted for under the fair value option. For additional exclusions from nonperforming loans, leases and foreclosed properties, see Consumer Portfolio Credit Risk Management – Nonperforming Consumer Loans, Leases and Foreclosed Properties Activity on page 90 and corresponding Table 28 and Commercial Portfolio Credit Risk Management – Nonperforming Commercial Loans, Leases and Foreclosed Properties Activity on page 94 and corresponding Table 35.

(6) Basel 3 transition provisions for regulatory capital adjustments and deductions were fully phased-in as of January 1, 2018. Prior periods are presented on a fully phased-in basis. For additional information, including which approach is used to assess capital adequacy, see Capital Management on page 73.

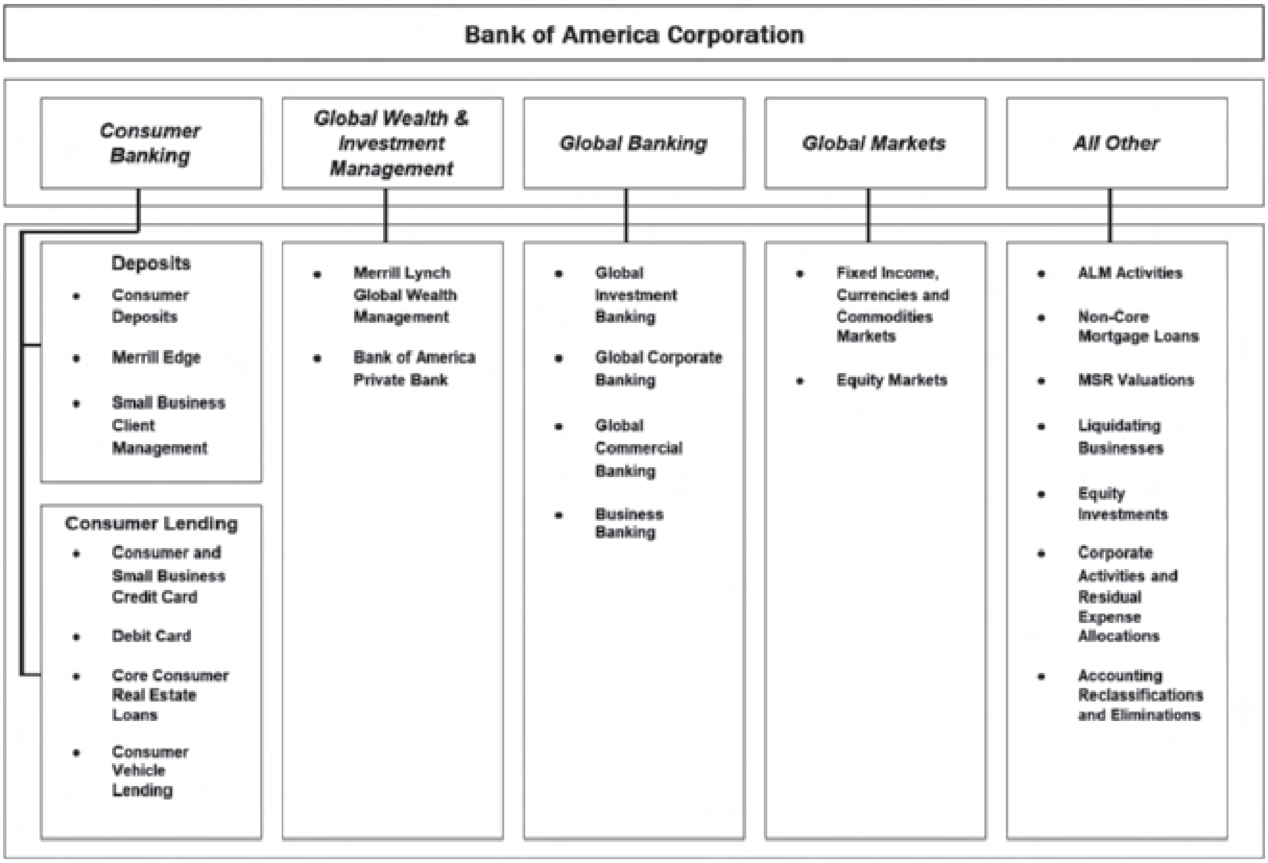
Net increase (decrease) in interest expense			(14,120)			3,738
Net increase (decrease) in net interest income [3]			$ (5,627)			$ 714

[1] The changes for each category of interest income and expense are divided between the portion of change attributable to the variance in volume and the portion of change attributable to the variance in rate for that category. The unallocated change in rate or volume variance is allocated between the rate and volume variances.
[2] Certain prior-period amounts have been reclassified to conform to current-period presentation.
[3] Includes changes in FTE basis adjustments of a $96 million decrease from 2019 to 2020 and a $15 million decrease from 2018 to 2019.

Business Segment Operations

Segment Description and Basis of Presentation

We report our results of operations through four business segments: *Consumer Banking, GWIM, Global Banking* and *Global Markets*, with the remaining operations recorded in *All Other*. We manage our segments and report their results on an FTE basis. The primary activities, products and businesses of the business segments and *All Other* are shown below.



We periodically review capital allocated to our businesses and allocate capital annually during the strategic and capital planning processes. We utilize a methodology that considers the effect of regulatory capital requirements in addition to internal risk-based capital models. Our internal risk-based capital models use a risk-adjusted methodology incorporating each segment's credit, market, interest rate, business and operational risk components. For more information on the nature of these risks, see Managing Risk on page 70. The capital allocated to the business segments is referred to as allocated capital. Allocated equity in the reporting units is comprised of allocated capital plus capital for the portion of goodwill and intangibles specifically assigned to the reporting unit. For more information, including the definition of a reporting unit, see *Note 7 – Goodwill and Intangible Assets* to the Consolidated Financial Statements.

For more information on our presentation of financial information on an FTE basis, see Supplemental Financial Data on page 54, and for reconciliations to consolidated total revenue, net income and period-end total assets, see *Note 23 – Business Segment Information* to the Consolidated Financial Statements.

Key Performance Indicators

We present certain key financial and nonfinancial performance indicators that management uses when evaluating segment results. We believe they are useful to investors because they provide additional information about our segments' operational performance, customer trends and business growth.

Consumer Banking

(Dollars in millions)	Deposits 2020	Deposits 2019	Consumer Lending 2020	Consumer Lending 2019	Total Consumer Banking 2020	Total Consumer Banking 2019	% Change

Total deposits	906,092	725,665	6,560	5,080	912,652	730,745	25

(1) Estimated at the segment level only.

(2) In segments and businesses where the total of liabilities and equity exceeds assets, we allocate assets from *All Other* to match the segments' and businesses' liabilities and allocated shareholders' equity. As a result, total earning assets and total assets of the businesses may not equal total *Consumer Banking*.

Consumer Banking, which is comprised of Deposits and Consumer Lending, offers a diversified range of credit, banking and investment products and services to consumers and small businesses. Deposits and Consumer Lending include the net impact of migrating customers and their related deposit, brokerage asset and loan balances between Deposits, Consumer Lending and *GWIM*, as well as other client-managed businesses. Our customers and clients have access to a coast to coast network including financial centers in 38 states and the District of Columbia. Our network includes approximately 4,300 financial centers, approximately 17,000 ATMS, nationwide call centers and leading digital banking platforms with more than 39 million active users, including approximately 31 million active mobile users.

Consumer Banking Results.

Net income for *Consumer Banking* decreased $6.5 billion to $6.5 billion in 2020 compared to 2019 primarily due to lower revenue, higher provision for credit losses and higher expenses. Net interest income decreased $3.5 billion to $24.7 billion primarily due to lower rates, partially offset by the benefit of higher deposit and loan balances. Noninterest income decreased $1.9 billion to $8.6 billion driven by a decline in service charges primarily due to higher deposit balances and lower card income due to decreased client activity, as well as lower other income due to the allocation of asset and liability management (ALM) results.

The provision for credit losses increased $2.0 billion to $5.8 billion primarily due to the weaker economic outlook related to COVID-19. Noninterest expense increased $1.2 billion to $18.9 billion primarily driven by incremental expense to support customers and employees during the pandemic, as well as the cost of increased client activity and continued investments for business growth, including the merchant services platform.

The return on average allocated capital was 17 percent, down from 35 percent, driven by lower net income and, to a lesser extent, an increase in allocated capital. For information on capital allocated to the business segments, see Business Segment Operations on page 59.

Deposits

Deposits includes the results of consumer deposit activities which consist of a comprehensive range of products provided to consumers and small businesses. Our deposit products include traditional savings accounts, money market savings accounts, CDs and IRAs, and noninterest- and interest-bearing checking accounts, as well as investment accounts and products. Net interest income is allocated to the deposit products using our funds transfer pricing process that matches assets and liabilities with similar interest rate sensitivity and maturity characteristics. Deposits generates fees such as account service fees, non-sufficient funds fees, overdraft charges and ATM fees, as well as investment and brokerage fees from Merrill Edge accounts. Merrill Edge is an integrated investing and banking service targeted at customers with less than $250,000 in investable assets. Merrill Edge provides investment advice and guidance, client brokerage asset services, a self-directed online investing platform and key banking capabilities including access to the Corporation's network of financial centers and ATMs.

Net income for Deposits decreased $4.1 billion to $4.2 billion primarily driven by lower revenue. Net interest income declined $3.2 billion to $13.7 billion primarily due to lower interest rates, partially offset by the benefit of growth in deposits. Noninterest income decreased $1.3 billion to $3.7 billion primarily driven by lower service charges due to higher deposit balances and lower client activity related to the impact of COVID-19, as well as lower other income due to the allocation of ALM results.

The provision for credit losses increased $110 million to $379 million in 2020 due to the weaker economic outlook related to COVID-19. Noninterest expense increased $790 million to $11.5 billion driven by continued investments in the business and incremental expense to support customers and employees during the pandemic.

Average deposits increased $114.0 billion to $817.0 billion in 2020 driven by strong organic growth of $79.3 billion in checking and time deposits and $34.4 billion in traditional savings and money market savings.

The following table provides key performance indicators for Deposits. Management uses these metrics, and we believe they are useful to investors because they provide additional information to evaluate our deposit profitability and digital/mobile trends.

Key Statistics – Deposits

	2020	2019
Total deposit spreads (excludes noninterest costs) [(1)]	**1.94%**	2.34%
Year End		
Consumer investment assets (in millions) [(2)]	**$306,104**	$240,132
Active digital banking users (units in thousands) [(3)]	**39,315**	38,266
Active mobile banking users (units in thousands) [(4)]	**30,783**	29,174
Financial centers	**4,312**	4,300
ATMs	**16,904**	16,788

(1) Includes deposits held in Consumer Lending.
(2) Includes client brokerage assets, deposit sweep balances and AUM in *Consumer Banking*.
(3) Active digital banking users represents mobile and/or online users at period end.
(4) Active mobile banking users represents mobile users at period end.

Consumer investment assets increased $66.0 billion in 2020 driven by market performance and client flows. Active mobile banking users increased approximately two million reflecting continuing changes in our customers' banking preferences. We had a net increase of 12 financial centers as we continued to optimize our consumer banking network.

Consumer Lending

Consumer Lending offers products to consumers and small businesses across the U.S. The products offered include credit and debit cards, residential mortgages and home equity loans, and direct and indirect loans such as automotive, recreational vehicle and consumer personal loans. In addition to earning net interest spread revenue on its lending activities, Consumer Lending generates interchange revenue from credit and debit card transactions, late fees, cash advance fees, annual credit card fees, mortgage banking fee income and other miscellaneous fees. Consumer Lending products are available to our customers through our retail network, direct telephone, and online and mobile channels. Consumer Lending results also include the impact of servicing residential mortgages and home equity loans in the core portfolio, including loans held on the balance sheet of Consumer Lending and loans serviced for others.

Net income for Consumer Lending was $2.3 billion, a decrease of $2.4 billion, primarily due to higher provision for credit losses. Net interest income declined $295 million to $11.0 billion primarily due to lower interest rates, partially offset by loan growth. Noninterest income decreased $555 million to $4.9 billion primarily driven by lower card income due to lower client activity, as well as lower other income due to the allocation of ALM results.

The provision for credit losses increased $1.9 billion to $5.4 billion primarily due to the weaker economic outlook related to COVID-19. Noninterest expense increased $442 million to $7.4 billion primarily driven by investments in the business and incremental expense to support customers and employees during the pandemic.

Average loans increased $14.9 billion to $310.4 billion primarily driven by an increase in residential mortgages and PPP loans, partially offset by a decline in credit cards.

The following table provides key performance indicators for Consumer Lending. Management uses these metrics, and we believe they are useful to investors because they provide additional information about loan growth and profitability.

Key Statistics – Consumer Lending

(Dollars in millions)	2020	2019
Total credit card [1]		
Gross interest yield [2]	**10.27 %**	10.76 %
Risk-adjusted margin [3]	**9.16**	8.28
New accounts (in thousands)	**2,505**	4,320
Purchase volumes	**$ 251,599**	$ 277,852
Debit card purchase volumes	**$ 384,503**	$ 360,672

(1) Includes GWIM's credit card portfolio.
(2) Calculated as the effective annual percentage rate divided by average loans.
(3) Calculated as the difference between total revenue, net of interest expense, and net credit losses divided by average loans.

During 2020, the total risk-adjusted margin increased 88 bps compared to 2019 driven by a lower mix of customer balances at promotional rates, the lower interest rate environment and lower net credit losses. Total credit card purchase volumes declined $26.3 billion to $251.6 billion. The decline in credit card purchase volumes was driven by the impact of COVID-19. While overall spending improved during the second half of 2020, spending for travel and entertainment remained lower compared to 2019. During 2020, debit card purchase volumes increased $23.8 billion to $384.5 billion, despite COVID-19 impacts. Debit card purchase volumes improved in the second half of 2020 as businesses reopened and spending improved.

Key Statistics – Residential Mortgage Loan Production [1]

(Dollars in millions)	2020	2019
Consumer Banking:		
First mortgage	**$ 43,197**	$ 49,179
Home equity	**6,930**	9,755
Total [2]:		
First mortgage	**$ 69,086**	$ 72,467
Home equity	**8,160**	11,131

(1) The loan production amounts represent the unpaid principal balance of loans and, in the case of home equity, the principal amount of the total line of credit.
(2) In addition to loan production in *Consumer Banking*, there is also first mortgage and home equity loan production in *GWIM*.

First mortgage loan originations in *Consumer Banking* and for the total Corporation decreased $6.0 billion and $3.4 billion in 2020 primarily driven by a decline in nonconforming applications.

Home equity production in *Consumer Banking* and for the total Corporation decreased $2.8 billion and $3.0 billion in 2020 primarily driven by a decline in applications.

n/m = not meaningful

GWIM consists of two primary businesses: Merrill Lynch Global Wealth Management (MLGWM) and Bank of America Private Bank.

MLGWM's advisory business provides a high-touch client experience through a network of financial advisors focused on clients with over $250,000 in total investable assets. MLGWM provides tailored solutions to meet clients' needs through a full set of investment management, brokerage, banking and retirement products.

Bank of America Private Bank, together with MLGWM's Private Wealth Management business, provides comprehensive wealth management solutions targeted to high net worth and ultra high net worth clients, as well as customized solutions to meet clients' wealth structuring, investment management, trust and banking needs, including specialty asset management services.

Net income for *GWIM* decreased $1.2 billion to $3.1 billion primarily due to lower net interest income, higher noninterest expense and higher provision for credit losses.

Net interest income decreased $1.0 billion to $5.5 billion due to the impact of lower interest rates, partially offset by the benefit of strong deposit and loan growth.

Noninterest income, which primarily includes investment and brokerage services income, increased $82 million to $13.1 billion primarily due to higher market valuations and positive AUM flows, largely offset by declines in AUM pricing as well as lower other income due to the allocation of ALM results.

The provision for credit losses increased $275 million to $357 million primarily due to the weaker economic outlook related to COVID-19. Noninterest expense increased $329 million to $14.2 billion primarily driven by higher investments in primary sales professionals and revenue-related incentives.

The return on average allocated capital was 21 percent, down from 29 percent, due to lower net income and, to a lesser extent, a small increase in allocated capital.

Average loans increased $14.5 billion to $183.4 billion primarily driven by residential mortgage and custom lending. Average deposits increased $30.6 billion to $287.1 billion primarily driven by inflows resulting from client responses to market volatility and lower spending.

MLGWM revenue of $15.3 billion decreased five percent primarily driven by the impact of lower interest rates, partially offset by the benefits of higher market valuations and positive AUM flows.

Bank of America Private Bank revenue of $3.3 billion decreased four percent primarily driven by the impact of lower interest rates.

Key Indicators and Metrics

(Dollars in millions, except as noted)	2020	2019
Revenue by Business		
Merrill Lynch Global Wealth Management	$ 15,292	$ 16,112
Bank of America Private Bank	3,292	3,426
Total revenue, net of interest expense	$ 18,584	$ 19,538
Client Balances by Business, at year end		
Merrill Lynch Global Wealth Management	$ 2,808,340	$ 2,558,102
Bank of America Private Bank	541,464	489,690
Total client balances	$ 3,349,804	$ 3,047,792
Client Balances by Type, at year end		
Assets under management	$ 1,408,465	$ 1,275,555
Brokerage and other assets	1,479,614	1,372,733
Deposits	322,157	263,103
Loans and leases [1]	191,124	179,296
Less: Managed deposits in assets under management	(51,556)	(42,895)
Total client balances	$ 3,349,804	$ 3,047,792
Assets Under Management Rollforward		
Assets under management, beginning of year	$ 1,275,555	$ 1,072,234

Primary sales professionals	1,759	1,766

(1) Includes margin receivables which are classified in customer and other receivables on the Consolidated Balance Sheet.
(2) For a definition, see Key Metrics on page 196.

Client Balances

Client balances managed under advisory and/or discretion of *GWIM* are AUM and are typically held in diversified portfolios. Fees earned on AUM are calculated as a percentage of clients' AUM balances. The asset management fees charged to clients per year depend on various factors, but are commonly driven by the breadth of the client's relationship. The net client AUM flows represent the net change in clients' AUM balances over a specified period of time, excluding market appreciation/depreciation and other adjustments.

Client balances increased $302.0 billion, or 10 percent, to $3.3 trillion at December 31, 2020 compared to December 31, 2019. The increase in client balances was primarily due to higher market valuations and positive client flows.

Global Banking, which includes Global Corporate Banking, Global Commercial Banking, Business Banking and Global Investment Banking, provides a wide range of lending-related products and services, integrated working capital management and treasury solutions, and underwriting and advisory services through our network of offices and client relationship teams. Our lending products and services include commercial loans, leases, commitment facilities, trade finance, commercial real estate lending and asset-based lending. Our treasury solutions business includes treasury management, foreign exchange, short-term investing options and merchant services. We also provide investment banking products to our clients such as debt and equity underwriting and distribution, and merger-related and other advisory services. Underwriting debt and equity issuances, fixed-income and equity research, and certain market-based activities are executed through our global broker-dealer affiliates, which are our primary dealers in several countries. Within *Global Banking,* Global Corporate Banking clients generally include large global corporations, financial institutions and leasing clients. Global Commercial Banking clients generally include middle-market companies, commercial real estate firms and not-for-profit companies. Business Banking clients include mid-sized U.S.-based businesses requiring customized and integrated financial advice and solutions.

Net income for *Global Banking* decreased $4.6 billion to $3.5 billion primarily driven by higher provision for credit losses as well as lower revenue.

Revenue decreased $1.5 billion to $19.0 billion driven by lower net interest income. Net interest income decreased $1.7 billion to $9.0 billion primarily driven by lower interest rates, partially offset by higher loan and deposit balances.

Noninterest income of $10.0 billion increased $166 million driven by higher investment banking fees, partially offset by lower valuation driven adjustments on the fair value loan portfolio, debt securities and leveraged loans, as well as the allocation of ALM results.

The provision for credit losses increased $4.5 billion to $4.9 billion primarily due to the weaker economic outlook related to COVID-19. Noninterest expense increased $326 million primarily due to continued investments in the business, partially offset by lower revenue-related incentives.

The return on average allocated capital was eight percent in 2020 compared to 20 percent in 2019 due to lower net income and, to a lesser extent, an increase in allocated capital. For information on capital allocated to the business segments, see Business Segment Operations on page 59.

Global Corporate, Global Commercial and Business Banking

Global Corporate, Global Commercial and Business Banking each include Business Lending and Global Transaction Services activities. Business Lending includes various lending-related products and services, and related hedging activities, including commercial loans, leases, commitment facilities, trade finance, real estate lending and asset-based lending. Global Transaction Services includes deposits, treasury management, credit card, foreign exchange and short-term investment products.

The table below and following discussion present a summary of the results, which exclude certain investment banking, merchant services and PPP activities in *Global Banking*.

Global Corporate, Global Commercial and Business Banking

	Global Corporate Banking		Global Commercial Banking		Business Banking		Total	
(Dollars in millions)	**2020**	2019	**2020**	2019	**2020**	2019	**2020**	2019
Revenue

Business Lending revenue decreased $933 million in 2020 compared to 2019. The decrease was primarily driven by lower interest rates.

Global Transaction Services revenue decreased $1.5 billion in 2020 compared to 2019 driven by the allocation of ALM results, partially offset by the impact of higher deposit balances.

Average loans and leases were relatively flat in 2020 compared to 2019. Average deposits increased 26 percent primarily due to client responses to market volatility, government stimulus and placement of credit draws.

Global Investment Banking

Client teams and product specialists underwrite and distribute debt, equity and loan products, and provide advisory services and tailored risk management solutions. The economics of certain investment banking and underwriting activities are shared primarily between *Global Banking* and *Global Markets* under an internal revenue-sharing arrangement. *Global Banking* originates certain deal-related transactions with our corporate and commercial clients that are executed and distributed by *Global Markets*. To provide a complete discussion of our consolidated investment banking fees, the following table presents total Corporation investment banking fees and the portion attributable to *Global Banking.*

Investment Banking Fees

	Global Banking		Total Corporation	
(Dollars in millions)	**2020**	2019	**2020**	2019
Products				
Advisory	**$ 1,458**	$ 1,336	**$ 1,621**	$ 1,460
Debt issuance	**1,555**	1,348	**3,443**	3,107
Equity issuance	**997**	453	**2,328**	1,259
Gross investment banking fees	**4,010**	3,137	**7,392**	5,826

n/m = not meaningful

Global Markets offers sales and trading services and research services to institutional clients across fixed-income, credit, currency, commodity and equity businesses. *Global Markets* product coverage includes securities and derivative products in both the primary and secondary markets. *Global Markets* provides market-making, financing, securities clearing, settlement and custody services globally to our institutional investor clients in support of their investing and trading activities. We also work with our commercial and corporate clients to provide risk management products using interest rate, equity, credit, currency and commodity derivatives, foreign exchange, fixed-income and mortgage-related products. As a result of our market-making activities in these products, we may be required to manage risk in a broad range of financial products including government securities, equity and equity-linked securities, high-grade and high-yield corporate debt securities, syndicated loans, MBS, commodities and asset-backed securities. The economics of certain investment banking and underwriting activities are shared primarily between *Global Markets* and *Global Banking* under an internal revenue-sharing arrangement. *Global Banking* originates certain deal-related transactions with our corporate and commercial clients that are executed and distributed by *Global Markets*. For information on investment banking fees on a consolidated basis, see page 66.

The following explanations for year-over-year changes for *Global Markets*, including those disclosed under Sales and Trading Revenue, are the same for amounts including and excluding net DVA. Amounts excluding net DVA are a non-GAAP financial measure. For more information on net DVA, see Supplemental Financial Data on page 54.

Net income for *Global Markets* increased $1.7 billion to $5.2 billion. Net DVA losses were $133 million compared to losses of $222 million in 2019. Excluding net DVA, net income increased $1.7 billion to $5.4 billion. These increases were primarily driven by higher revenue, partially offset by higher noninterest expense and provision for credit losses.

Revenue increased $3.2 billion to $18.8 billion primarily driven by higher sales and trading revenue and investment banking fees. Sales and trading revenue increased $2.3 billion, and excluding net DVA, increased $2.2 billion. These increases were driven by higher revenue across FICC and Equities.

The provision for credit losses increased $260 million primarily due to the weaker economic outlook related to COVID-19. Noninterest expense increased $694 million to

$11.4 billion driven by higher activity-based expenses for both card and trading.

Average total assets increased $5.7 billion to $685.0 billion driven by higher client balances in Global Equities. Year-end total assets decreased $25.2 billion to $616.6 billion driven by lower levels of inventory in FICC and increased hedging of client activity in Equities with derivative transactions relative to stock positions.

The return on average allocated capital was 15 percent, up from 10 percent, reflecting higher net income, partially offset by an increase in allocated capital.

Sales and Trading Revenue

Sales and trading revenue includes unrealized and realized gains and losses on trading and other assets which are included in market making and similar activities, net interest income, and fees primarily from commissions on equity securities. Sales and trading revenue is segregated into fixed-income (government debt obligations, investment and non-investment grade corporate debt obligations, commercial MBS, residential mortgage-backed securities, collateralized loan obligations, interest rate and credit derivative contracts), currencies (interest rate and foreign exchange contracts), commodities (primarily futures, forwards, swaps and options) and equities (equity-linked derivatives and cash equity activity). The following table and related discussion present sales and trading revenue, substantially all of which is in *Global Markets,* with the remainder in *Global Banking*. In addition, the following table and related discussion present sales and trading revenue, excluding net DVA, which is a non-GAAP financial measure. For more information on net DVA, see Supplemental Financial Data on page 54.

Sales and Trading Revenue [1, 2, 3]

(Dollars in millions)	2020	2019
Sales and trading revenue		
Fixed income, currencies and commodities	$ 9,595	$ 8,189
Equities	5,422	4,493
Total sales and trading revenue	$ 15,017	$ 12,682
Sales and trading revenue, excluding net DVA [4]		
Fixed income, currencies and commodities	$ 9,725	$ 8,397
Equities	5,425	4,507
Total sales and trading revenue, excluding net DVA	$ 15,150	$ 12,904

(1) For more information on sales and trading revenue, see *Note 3 – Derivatives* to the Consolidated Financial Statements.
(2) Includes FTE adjustments of $196 million and $187 million for 2020 and 2019.
(3) Includes *Global Banking* sales and trading revenue of $478 million and $538 million for 2020 and 2019.
(4) FICC and Equities sales and trading revenue, excluding net DVA, is a non-GAAP financial measure. FICC net DVA losses were $130 million and $208 million for 2020 and 2019. Equities net DVA losses were $3 million and $14 million for 2020 and 2019.

FICC revenue increased $1.3 billion driven by increased client activity and improved market-making conditions across macro products. Equities revenue increased $918 million driven by increased client activity and a strong trading performance in a more volatile market environment.

All Other

(Dollars in millions)	2020	2019	% Change
Net interest income	$ 34	$ 234	(85)%

Net loss	$ (407)	$ (1,356)	(70)
Balance Sheet			
Average			
Total loans and leases	$ 28,159	$ 42,935	(34)%
Total assets [1]	228,783	210,689	9
Total deposits	18,247	21,359	(15)
Year end			
Total loans and leases	$ 21,301	$ 37,156	(43)%
Total assets [1]	264,141	224,375	18
Total deposits	12,998	23,089	(44)

(1) In segments where the total of liabilities and equity exceeds assets, which are generally deposit-taking segments, we allocate assets from *All Other* to those segments to match liabilities (i.e., deposits) and allocated shareholders' equity. Average allocated assets were $763.1 billion and $544.3 billion for 2020 and 2019, and year-end allocated assets were $977.7 billion and $565.4 billion at December 31, 2020 and 2019.

All Other consists of ALM activities, equity investments, non-core mortgage loans and servicing activities, liquidating businesses and certain expenses not otherwise allocated to a business segment. ALM activities encompass certain residential mortgages, debt securities, and interest rate and foreign currency risk management activities. Substantially all of the results of ALM activities are allocated to our business segments. For more information on our ALM activities, see *Note 23 – Business Segment Information* to the Consolidated Financial Statements.

Residential mortgage loans that are held for ALM purposes, including interest rate or liquidity risk management, are classified as core and are presented on the balance sheet of *All Other*. During 2020, residential mortgage loans held for ALM activities decreased $12.7 billion to $9.0 billion due primarily to loan sales. Non-core residential mortgage and home equity loans, which are principally runoff portfolios, are also held in *All*

Other. During 2020, total non-core loans decreased $3.0 billion to $12.6 billion due primarily to payoffs and paydowns, as well as Federal Housing Administration (FHA) loan conveyances and sales, partially offset by repurchases. For more information on the composition of the core and non-core portfolios, see Consumer Portfolio Credit Risk Management on page 85.

The net loss for *All Other* decreased $949 million to a net loss of $407 million, primarily due to a $2.1 billion pretax impairment charge related to the notice of termination of the merchant services joint venture in 2019, partially offset by lower revenue and higher provision for credit losses.

Revenue decreased $1.2 billion primarily due to extinguishment losses on certain structured liabilities, higher client-driven ESG investment activity, resulting in higher partnership losses on these tax-advantaged investments, and lower net interest income, partially offset by a gain on sales of mortgage loans.

The provision for credit losses increased $719 million to $50 million from a provision benefit of $669 million in 2019, primarily due to recoveries from sales of previously charged-off non-core consumer real estate loans in 2019, as well as the weaker economic outlook related to COVID-19.

Noninterest expense decreased $2.3 billion to $1.4 billion primarily due to the $2.1 billion pretax impairment charge in 2019, partially offset by higher litigation expense.

The income tax benefit increased $589 million primarily driven by the impact of the U.K. tax law change and a higher level of income tax credits related to our ESG investment activity, partially offset by the positive impact from the resolution of various tax controversy matters in 2019. Both years included income tax benefit adjustments to eliminate the FTE treatment of certain tax credits recorded in *Global Banking*.

Off-Balance Sheet Arrangements and Contractual Obligations

We have contractual obligations to make future payments on debt and lease agreements. Additionally, in the normal course of business, we enter into contractual arrangements whereby we commit to future purchases of products or services from unaffiliated parties. Purchase obligations are defined as obligations that are legally binding agreements whereby we agree to purchase products or services with a specific minimum quantity at a fixed, minimum or variable price over a specified period of time. Included in purchase obligations are vendor contracts, the most significant of which include communication services, processing services and software contracts. Debt, lease and other obligations are more fully discussed in *Note 11 – Long-term Debt* and *Note 12 – Commitments and Contingencies* to the Consolidated Financial Statements.

Other long-term liabilities include our contractual funding obligations related to the Non-U.S. Pension Plans and Nonqualified and Other Pension Plans (together, the Plans). Obligations to the Plans are based on the current and projected obligations of the Plans, performance of the Plans' assets, and any participant contributions, if applicable. During 2020 and 2019, we contributed $115 million and $135 million to the Plans, and we expect to make $136 million of contributions during 2021. The Plans are more fully discussed in *Note 17 – Employee Benefit Plans* to the Consolidated Financial Statements.

We enter into commitments to extend credit such as loan commitments, standby letters of credit (SBLCs) and commercial letters of credit to meet the financing needs of our customers. For a summary of the total unfunded, or off-balance sheet, credit extension commitment amounts by expiration date, see Credit Extension Commitments in *Note 12 – Commitments and Contingencies* to the Consolidated Financial Statements.

We also utilize variable interest entities (VIEs) in the ordinary course of business to support our financing and investing needs as well as those of our customers. For more information on our involvement with unconsolidated VIEs, see *Note 6 – Securitizations and Other Variable Interest Entities* to the Consolidated Financial Statements.

Table 10 includes certain contractual obligations at December 31, 2020 and 2019.

Table 10 Contractual Obligations

	December 31, 2020					December 31 2019
(Dollars in millions)	Due in One Year or Less	Due After One Year Through Three Years	Due After Three Years Through Five Years	Due After Five Years	Total	Total
Long-term debt	$ 20,352	$ 50,824	$ 48,568	$ 143,190	**$ 262,934**	$ 240,856
Operating lease obligations	1,927	3,169	2,395	4,609	**12,100**	11,794
Purchase obligations	551	700	80	103	**1,434**	3,530
Time deposits	50,661	3,206	426	1,563	**55,856**	74,673
Other long-term liabilities	1,656	1,092	953	781	**4,482**	4,099
Estimated interest expense on long-term debt and time deposits [(1)]	4,542	8,123	6,958	30,924	**50,547**	44,385
Total contractual obligations	$ 79,689	$ 67,114	$ 59,380	$ 181,170	**$ 387,353**	$ 379,337

(1) Represents forecasted net interest expense on long-term debt and time deposits based on interest rates at December 31, 2020 and 2019. Forecasts are based on the contractual maturity dates of each liability, and are net of derivative hedges, where applicable.

Representations and Warranties Obligations

For information on representations and warranties obligations in connection with the sale of mortgage loans, see *Note 12 – Commitments and Contingencies* to the Consolidated Financial Statements.

Managing Risk

Risk is inherent in all our business activities. Sound risk management enables us to serve our customers and deliver for our shareholders. If not managed well, risks can result in financial loss, regulatory sanctions and penalties, and damage to our reputation, each of which may adversely impact our ability to execute our business strategies. We take a comprehensive approach to risk management with a defined Risk Framework and an articulated Risk Appetite Statement, which are approved annually by the ERC and the Board.

The seven key types of risk faced by the Corporation are strategic, credit, market, liquidity, compliance, operational and reputational.

- Strategic risk is the risk to current or projected financial condition arising from incorrect assumptions about external or internal factors, inappropriate business plans, ineffective business strategy execution, or failure to respond in a timely manner to changes in the regulatory, macroeconomic or competitive environments in the geographic locations in which we operate.
- Credit risk is the risk of loss arising from the inability or failure of a borrower or counterparty to meet its obligations.
- Market risk is the risk that changes in market conditions may adversely impact the value of assets or liabilities, or otherwise negatively impact earnings. Market risk is composed of price risk and interest rate risk.
- Liquidity risk is the inability to meet expected or unexpected cash flow and collateral needs while continuing to support our businesses and customers under a range of economic conditions.
- Compliance risk is the risk of legal or regulatory sanctions, material financial loss or damage to the reputation of the Corporation arising from the failure of the Corporation to comply with the requirements of applicable laws, rules and regulations and our internal policies and procedures.
- Operational risk is the risk of loss resulting from inadequate or failed processes, people and systems, or from external events.
- Reputational risk is the risk that negative perceptions of the Corporation's conduct or business practices may adversely impact its profitability or operations.

The following sections address in more detail the specific procedures, measures and analyses of the major categories of risk. This discussion of managing risk focuses on the current Risk Framework that, as part of its annual review process, was approved by the ERC and the Board.

As set forth in our Risk Framework, a culture of managing risk well is fundamental to fulfilling our purpose and our values and delivering responsible growth. It requires us to focus on risk in all activities and encourages the necessary mindset and behavior to enable effective risk management, and promotes sound risk-taking within our risk appetite. Sustaining a culture of managing risk well throughout the organization is critical to our success and is a clear expectation of our executive management team and the Board.

Our Risk Framework serves as the foundation for the consistent and effective management of risks facing the Corporation. The Risk Framework sets forth clear roles, responsibilities and accountability for the management of risk and provides a blueprint for how the Board, through delegation of authority to committees and executive officers, establishes risk appetite and associated limits for our activities.

Executive management assesses, with Board oversight, the risk-adjusted returns of each business. Management reviews and approves the strategic and financial operating plans, as well as the capital plan and Risk Appetite Statement, and recommends them annually to the Board for approval. Our strategic plan takes into consideration return objectives and financial resources, which must align with risk capacity and risk appetite. Management sets financial objectives for each business by allocating capital and setting a target for return on capital for each business. Capital allocations and operating limits are regularly evaluated as part of our overall governance processes as the businesses and the economic environment in which we operate continue to evolve. For more information regarding capital allocations, see Business Segment Operations on page 59.

The Corporation's risk appetite indicates the amount of capital, earnings or liquidity we are willing to put at risk to achieve our strategic objectives and business plans, consistent with applicable regulatory requirements. Our risk appetite provides a common and comparable set of measures for senior management and the Board to clearly indicate our aggregate level of risk and to monitor whether the Corporation's risk profile remains in alignment with our strategic and capital plans. Our risk appetite is formally articulated in the Risk Appetite Statement, which includes both qualitative components and quantitative limits.

Our overall capacity to take risk is limited; therefore, we prioritize the risks we take in order to maintain a strong and flexible financial position so we can withstand challenging economic conditions and take advantage of organic growth opportunities. Therefore, we set objectives and targets for capital and liquidity that are intended to permit us to continue to operate in a safe and sound manner, including during periods of stress.

Our lines of business operate with risk limits (which may include credit, market and/or operational limits, as applicable) that align with the Corporation's risk appetite. Executive management is responsible for tracking and reporting performance measurements as well as any exceptions to guidelines or limits. The Board, and its committees when appropriate, oversee financial performance, execution of the strategic and financial operating plans, adherence to risk appetite limits and the adequacy of internal controls.

For a more detailed discussion of our risk management activities, see the discussion below and pages 73 through 108.

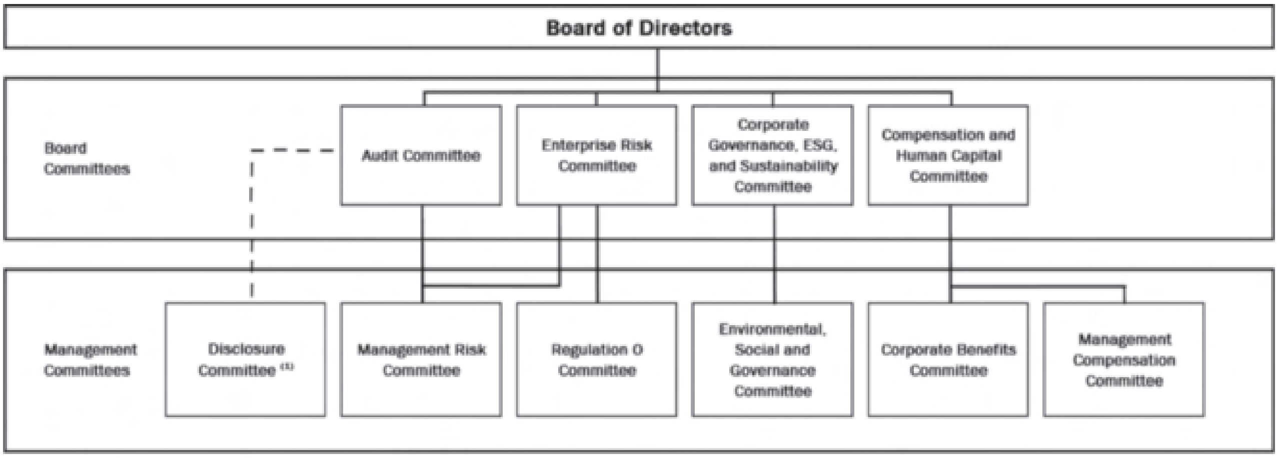
For more information about the Corporation's risks related to the pandemic, see Item 1A. Risk Factors of our 2020 Annual Report on Form 10-K. These COVID-19 related risks are being managed within our Risk Framework and supporting risk management programs.

Risk Management Governance

The Risk Framework describes delegations of authority whereby the Board and its committees may delegate authority to management-level committees or executive officers. Such delegations may authorize certain decision-making and approval functions, which may be evidenced in, for example, committee charters, job descriptions, meeting minutes and resolutions.

The chart below illustrates the inter-relationship among the Board, Board committees and management committees that have the majority of risk oversight responsibilities for the Corporation.

The chart below illustrates the inter-relationship among the Board, Board committees and management committees that have the majority of risk oversight responsibilities for the Corporation.



(1) Reports to the CEO and CFO with oversight by the Audit Committee

Board of Directors and Board Committees

The Board is composed of 17 directors, all but one of whom are independent. The Board authorizes management to maintain an effective Risk Framework, and oversees compliance with safe and sound banking practices. In addition, the Board or its committees conduct inquiries of, and receive reports from management on risk-related matters to assess scope or resource limitations that could impede the ability of Independent Risk Management (IRM) and/or Corporate Audit to execute its responsibilities. The Board committees discussed below have the principal responsibility for enterprise-wide oversight of our risk management activities. Through these activities, the Board and applicable committees are provided with information on our risk profile and oversee executive management addressing key risks we face. Other Board committees, as described below, provide additional oversight of specific risks.

Each of the committees shown on the above chart regularly reports to the Board on risk-related matters within the committee's responsibilities, which is intended to collectively provide the Board with integrated insight about our management of enterprise-wide risks.

Audit Committee

The Audit Committee oversees the qualifications, performance and independence of the Independent Registered Public Accounting Firm, the performance of our corporate audit function, the integrity of our consolidated financial statements, our compliance with legal and regulatory requirements, and makes inquiries of management or the Chief Audit Executive (CAE) to determine whether there are scope or resource limitations that impede the ability of Corporate Audit to execute its responsibilities. The Audit Committee is also responsible for overseeing compliance risk pursuant to the New York Stock Exchange listing standards.

Enterprise Risk Committee

The ERC has primary responsibility for oversight of the Risk Framework and key risks we face and of the Corporation's overall risk appetite. It approves the Risk Framework and the Risk Appetite Statement and further recommends these documents to the Board for approval. The ERC oversees senior management's responsibilities for the identification, measurement, monitoring and control of key risks we face. The ERC may consult with other Board committees on risk-related matters.

Other Board Committees

Our Corporate Governance, ESG, and Sustainability Committee oversees our Board's governance processes, identifies and reviews the qualifications of potential Board members, recommends nominees for election to our Board, recommends committee appointments for Board approval and reviews our Environmental, Social and Governance and stockholder engagement activities.

Our Compensation and Human Capital Committee oversees establishing, maintaining and administering our compensation programs and employee benefit plans, including approving and recommending our Chief Executive Officer's (CEO) compensation to our Board for further approval by all independent directors; reviewing and approving all of our executive officers' compensation, as well as compensation for non-management directors; and reviewing certain other human capital management topics.

Management Committees

Management committees may receive their authority from the Board, a Board committee, another management committee or from one or more executive officers. Our primary management level risk committee is the Management Risk Committee (MRC). Subject to Board oversight, the MRC is responsible for management oversight of key risks facing the Corporation. This includes providing management oversight of our compliance and operational risk programs, balance sheet and capital management, funding activities and other liquidity activities, stress testing, trading activities, recovery and resolution planning, model risk, subsidiary governance and activities between member banks and their nonbank affiliates pursuant to Federal Reserve rules and regulations, among other things.

Lines of Defense

We have clear ownership and accountability across three lines of defense: Front Line Units (FLUs), IRM and Corporate Audit. We also have control functions outside of FLUs and IRM (e.g., Legal and Global Human Resources). The three lines of defense are integrated into our management-level governance structure. Each of these functional roles is further described in this section.

Executive Officers

Executive officers lead various functions representing the functional roles. Authority for functional roles may be delegated to executive officers from the Board, Board committees or management-level committees. Executive officers, in turn, may further delegate responsibilities, as appropriate, to management level committees, management routines or individuals. Executive officers review our activities for consistency with our Risk Framework, Risk Appetite Statement and applicable strategic, capital and financial operating plans, as well as applicable policies, standards, procedures and processes. Executive officers and other employees make decisions individually on a day-to-day basis, consistent with the authority they have been delegated. Executive officers and other employees may also serve on committees and participate in committee decisions.

Front Line Units

FLUs, which include the lines of business as well as the Global Technology and Operations Group, are responsible for appropriately assessing and effectively managing all of the risks associated with their activities.

Three organizational units that include FLU activities and control function activities, but are not part of IRM are first, the Chief Financial Officer (CFO) Group; second, Environmental, Social and Governance (ESG), Capital Deployment (CD) and Public Policy (PP); and third, the Chief Administrative Officer (CAO) Group.

Independent Risk Management

IRM is part of our control functions and includes Global Risk Management. We have other control functions that are not part of IRM (other control functions may also provide oversight to FLU activities), including Legal, Global Human Resources and certain activities within the CFO Group; ESG, CD and PP; and CAO Group. IRM, led by the Chief Risk Officer (CRO), is responsible for independently assessing and overseeing risks within FLUs and other control functions. IRM establishes written enterprise policies and procedures that include concentration risk limits, where appropriate. Such policies and procedures outline how aggregate risks are identified, measured, monitored and controlled.

The CRO has the stature, authority and independence to develop and implement a meaningful risk management framework. The CRO has unrestricted access to the Board and reports directly to both the ERC and to the CEO. Global Risk Management is organized into horizontal risk teams that cover a specific risk area and vertical CRO teams that cover a particular front line unit or control function. These teams work collaboratively in executing their respective duties.

Corporate Audit

Corporate Audit and the CAE maintain their independence from the FLUs, IRM and other control functions by reporting directly to the Audit Committee or the Board. The CAE administratively reports to the CEO. Corporate Audit provides independent assessment and validation through testing of key processes and controls across the Corporation. Corporate Audit includes Credit Review which periodically tests and examines credit portfolios and processes.

Risk Management Processes

The Risk Framework requires that strong risk management practices are integrated in key strategic, capital and financial planning processes and in day-to-day business processes across the Corporation, with a goal of ensuring risks are appropriately considered, evaluated and responded to in a timely manner. We employ our risk management process, referred to as Identify, Measure, Monitor and Control, as part of our daily activities.

Identify – To be effectively managed, risks must be clearly defined and proactively identified. Proper risk identification focuses on recognizing and understanding key risks inherent in our business activities or key risks that may arise from external factors. Each employee is expected to identify and escalate risks promptly. Risk identification is an ongoing process, incorporating input from FLUs and control functions, designed to be forward looking and capture relevant risk factors across all of our lines of business.

Measure – Once a risk is identified, it must be prioritized and accurately measured through a systematic risk quantification process including quantitative and qualitative components. Risk is measured at various levels including, but not limited to, risk type, FLU, legal entity and on an aggregate basis. This risk quantification process helps to capture changes in our risk profile due to changes in strategic direction, concentrations, portfolio quality and the overall economic environment. Senior management considers how risk exposures might evolve under a variety of stress scenarios.

Monitor – We monitor risk levels regularly to track adherence to risk appetite, policies, standards, procedures and processes. We also regularly update risk assessments and review risk exposures. Through our monitoring, we can determine our level of risk relative to limits and can take action in a timely manner. We also can determine when risk limits are breached and have processes to appropriately report and escalate exceptions. This includes requests for approval to managers and alerts to executive management, management-level committees or the Board (directly or through an appropriate committee).

Control – We establish and communicate risk limits and controls through policies, standards, procedures and processes that define the responsibilities and authority for risk-taking. The limits and controls can be adjusted by the Board or management when conditions or risk tolerances warrant. These limits may be absolute (e.g., loan amount, trading volume) or relative (e.g., percentage of loan book in higher-risk categories). Our lines of business are held accountable to perform within the established limits.

The formal processes used to manage risk represent a part of our overall risk management process. We instill a strong and comprehensive culture of managing risk well through communications, training, policies, procedures and organizational roles and responsibilities. Establishing a culture reflective of our purpose to help make our customers' financial lives better and delivering our responsible growth strategy is also critical to effective risk management. We understand that improper actions, behaviors or practices that are illegal, unethical or contrary to our core values could result in harm to the Corporation, our shareholders or our customers, damage the integrity of the financial markets, or negatively impact our reputation, and have established protocols and structures so that such conduct risk is governed and reported across the Corporation. Specifically, our Code of Conduct provides a framework for all of our employees to conduct themselves with the highest integrity. Additionally, we continue to strengthen the link between the employee performance management process and individual compensation to encourage employees to work toward enterprise-wide risk goals.

Corporation-wide Stress Testing

Integral to our Capital Planning, Financial Planning and Strategic Planning processes, we conduct capital scenario management and stress forecasting on a periodic basis to better understand balance sheet, earnings and capital sensitivities to certain economic and business scenarios, including economic and market conditions that are more severe than anticipated. These stress forecasts provide an understanding of the potential impacts from our risk profile on the balance sheet, earnings and capital, and serve as a key component of our capital and risk management practices. The intent of stress testing is to develop a comprehensive understanding of potential impacts of on- and off-balance sheet risks at the Corporation and how they impact financial resiliency, which provides confidence to management, regulators and our investors.

Contingency Planning

We have developed and maintain contingency plans that are designed to prepare us in advance to respond in the event of potential adverse economic, financial or market stress. These contingency plans include our Capital Contingency Plan and Financial Contingency and Recovery Plan, which provide monitoring, escalation, actions and routines designed to enable us to increase capital, access funding sources and reduce risk through consideration of potential options that include asset sales, business sales, capital or debt issuances, or other de-risking strategies. We also maintain a Resolution Plan to limit adverse systemic impacts that could be associated with a potential resolution of Bank of America.

Strategic Risk Management

Strategic risk is embedded in every business and is one of the major risk categories along with credit, market, liquidity, compliance, operational and reputational risks. This risk results from incorrect assumptions about external or internal factors, inappropriate business plans, ineffective business strategy execution, or failure to respond in a timely manner to changes in the regulatory, macroeconomic or competitive environments in the geographic locations in which we operate, such as competitor actions, changing customer preferences, product obsolescence and technology developments. Our strategic plan is consistent with our risk appetite, capital plan and liquidity requirements and specifically addresses strategic risks.

On an annual basis, the Board reviews and approves the strategic plan, capital plan, financial operating plan and Risk Appetite Statement. With oversight by the Board, executive management directs the lines of business to execute our strategic plan consistent with our core operating principles and risk appetite. The executive management team monitors business performance throughout the year and provides the Board with regular progress reports on whether strategic objectives and timelines are being met, including reports on strategic risks and if additional or alternative actions need to be considered or implemented. The regular executive reviews focus on assessing forecasted earnings and returns on capital, the current risk profile, current capital and liquidity requirements, staffing levels and changes required to support the strategic plan, stress testing results, and other qualitative factors such as market growth rates and peer analysis.

Significant strategic actions, such as capital actions, material acquisitions or divestitures, and resolution plans are reviewed and approved by the Board. At the business level, processes are in place to discuss the strategic risk implications of new, expanded or modified businesses, products or services and other strategic initiatives, and to provide formal review and approval where required. With oversight by the Board and the ERC, executive management performs similar analyses throughout the year and evaluates changes to the financial forecast or the risk, capital or liquidity positions as deemed appropriate to balance and optimize achieving the targeted risk appetite, shareholder returns and maintaining the targeted financial strength. Proprietary models are used to measure the capital requirements for credit, country, market, operational and strategic risks. The allocated capital assigned to each business is based on its unique risk profile. With oversight by the Board, executive management assesses the risk-adjusted returns of each business in approving strategic and financial operating plans. The businesses use allocated capital to define business strategies and price products and transactions.

Capital Management

The Corporation manages its capital position so that its capital is more than adequate to support its business activities and aligns with risk, risk appetite and strategic planning. Additionally, we seek to maintain safety and soundness at all times, even under adverse scenarios, take advantage of organic growth opportunities, meet obligations to creditors and counterparties, maintain ready access to financial markets, continue to serve as a credit intermediary, remain a source of strength for our subsidiaries, and satisfy current and future regulatory capital requirements. Capital management is integrated into our risk and governance processes, as capital is a key consideration in the development of our strategic plan, risk appetite and risk limits.

We conduct an Internal Capital Adequacy Assessment Process (ICAAP) on a periodic basis. The ICAAP is a forward-looking assessment of our projected capital needs and resources, incorporating earnings, balance sheet and risk forecasts under baseline and adverse economic and market conditions. We utilize periodic stress tests to assess the potential impacts to our balance sheet, earnings, regulatory capital and liquidity under a variety of stress scenarios. We perform qualitative risk assessments to identify and assess material risks not fully captured in our forecasts or stress tests. We assess the potential capital impacts of proposed changes to regulatory capital requirements. Management assesses ICAAP results and provides documented quarterly assessments of the adequacy of our capital guidelines and capital position to the Board or its committees.

We periodically review capital allocated to our businesses and allocate capital annually during the strategic and capital planning processes. For more information, see Business Segment Operations on page 59.

CCAR and Capital Planning

The Federal Reserve requires BHCs to submit a capital plan and planned capital actions on an annual basis, consistent with the rules governing the CCAR capital plan.

Based on the results of our 2020 CCAR supervisory stress test that was submitted to the Federal Reserve in the second quarter of 2020, we are subject to a 2.5 percent stress capital buffer (SCB) for the period beginning October 1, 2020 and ending on September 30, 2021. Our Common equity tier 1 (CET1) capital ratio under the Standardized approach must remain above 9.5 percent during this period (the sum of our CET1 capital ratio minimum of 4.5 percent, global systemically important bank (G-SIB) surcharge of 2.5 percent and our SCB of 2.5 percent) in order to avoid restrictions on capital distributions and discretionary bonus payments.

Due to economic uncertainty resulting from the pandemic, the Federal Reserve required all large banks to update and resubmit their capital plans in November 2020 based on the Federal Reserve's updated supervisory stress test scenarios. The results of the additional supervisory stress tests were published in December 2020.

The Federal Reserve also required large banks to suspend share repurchase programs during the second half of 2020, except for repurchases to offset shares awarded under equity-based compensation plans, and to limit common stock dividends to existing rates that did not exceed the average of the last four quarters' net income. The Federal Reserve's directives regarding share repurchases aligned with our decision to voluntarily suspend our general common stock repurchase program during the first half of 2020. The suspension of our repurchases did not include repurchases to offset shares awarded under our equity-based compensation plans. Pursuant to the Board's authorization, we repurchased $7.0 billion of common stock during 2020.

In December 2020, the Federal Reserve announced that beginning in the first quarter of 2021, large banks would be permitted to pay common stock dividends at existing rates and to repurchase shares in an amount that, when combined with dividends paid, does not exceed the average of net income over the last four quarters.

On January 19, 2021, we announced that the Board declared a quarterly common stock dividend of $0.18 per share, payable on March 26, 2021 to shareholders of record as of March 5, 2021. We also announced that the Board authorized the repurchase of $2.9 billion in common stock through March 31, 2021, plus repurchases to offset shares awarded under equity-based compensation plans during the same period, estimated to be approximately $300 million. This authorization equals the maximum amount allowed by the Federal Reserve for the period.

Our stock repurchase program is subject to various factors, including the Corporation's capital position, liquidity, financial performance and alternative uses of capital, stock trading price and general market conditions, and may be suspended at any time. Such repurchases may be effected through open market purchases or privately negotiated transactions, including repurchase plans that satisfy the conditions of Rule 10b5-1 of the Securities Exchange Act of 1934, as amended (Exchange Act).

Regulatory Capital

As a financial services holding company, we are subject to regulatory capital rules, including Basel 3, issued by U.S. banking regulators. Basel 3 established minimum capital ratios and buffer requirements and outlined two methods of calculating risk-weighted assets (RWA), the Standardized approach and the Advanced approaches. The Standardized approach relies primarily on supervisory risk weights based on exposure type, and the Advanced approaches determine risk weights based on internal models.

The Corporation's depository institution subsidiaries are also subject to the Prompt Corrective Action (PCA) framework. The Corporation and its primary affiliated banking entity, BANA, are Advanced approaches institutions under Basel 3 and are required to report regulatory risk-based capital ratios and RWA under both the Standardized and Advanced approaches. The approach that yields the lower ratio is used to assess capital adequacy including under the PCA framework. As of December 31, 2020, the CET1, Tier 1 capital and Total capital ratios for the Corporation were lower under the Standardized approach.

Minimum Capital Requirements

In order to avoid restrictions on capital distributions and discretionary bonus payments, the Corporation must meet risk-based capital ratio requirements that include a capital conservation buffer greater than 2.5 percent, plus any applicable countercyclical capital buffer and a G-SIB surcharge. On October 1, 2020, the capital conservation buffer was replaced by the SCB for the Corporation's Standardized approach ratio requirements. The buffers and surcharge must be comprised solely of CET1 capital.

The Corporation is also required to maintain a minimum supplementary leverage ratio (SLR) of 3.0 percent plus a leverage buffer of 2.0 percent in order to avoid certain restrictions on capital distributions and discretionary bonus payments. Our insured depository institution subsidiaries are required to maintain a minimum 6.0 percent SLR to be considered well capitalized under the PCA framework. The numerator of the SLR is quarter-end Basel 3 Tier 1 capital. The denominator is total leverage exposure based on the daily average of the sum of on-balance sheet exposures less permitted deductions and applicable temporary exclusions, as well as the simple average of certain off-balance sheet exposures, as of the end of each month in a quarter. For more information, see Capital Management – Regulatory Developments on page 78.

Capital Composition and Ratios

Table 11 presents Bank of America Corporation's capital ratios and related information in accordance with Basel 3 Standardized and Advanced approaches as measured at December 31, 2020 and 2019. For the periods presented herein, the Corporation met the definition of well capitalized under current regulatory requirements.

Table 11 Bank of America Corporation Regulatory Capital under Basel 3

(Dollars in millions, except as noted)	Standardized Approach [1, 2]	Advanced Approaches [1]	Regulatory Minimum [3]
	December 31, 2020		
Risk-based capital metrics:			
Common equity tier 1 capital	$ 176,660	$ 176,660	
Tier 1 capital	200,096	200,096	
Total capital [4]	237,936	227,685	
Risk-weighted assets (in billions)	1,480	1,371	
Common equity tier 1 capital ratio	11.9 %	12.9 %	9.5 %
Tier 1 capital ratio	13.5	14.6	11.0
Total capital ratio	16.1	16.6	13.0
Leverage-based metrics:			
Adjusted quarterly average assets (in billions) [5]	$ 2,719	$ 2,719	
Tier 1 leverage ratio	7.4 %	7.4 %	4.0
Supplementary leverage exposure (in billions) [6]		$ 2,786	
Supplementary leverage ratio		7.2 %	5.0
	December 31, 2019		
Risk-based capital metrics:			
Common equity tier 1 capital	$ 166,760	$ 166,760	
Tier 1 capital	188,492	188,492	
Total capital [4]	221,230	213,098	
Risk-weighted assets (in billions)	1,493	1,447	
Common equity tier 1 capital ratio	11.2 %	11.5 %	9.5 %
Tier 1 capital ratio	12.6	13.0	11.0
Total capital ratio	14.8	14.7	13.0
Leverage-based metrics:			
Adjusted quarterly average assets (in billions) [5]	$ 2,374	$ 2,374	
Tier 1 leverage ratio	7.9 %	7.9 %	4.0
Supplementary leverage exposure (in billions)		$ 2,946	
Supplementary leverage ratio		6.4 %	5.0

(1) As of December 31, 2020, capital ratios are calculated using the regulatory capital rule that allows a five-year transition period related to the adoption of CECL.
(2) Derivative exposure amounts are calculated using the standardized approach for measuring counterparty credit risk at December 31, 2020 and the current exposure method at December 31, 2019.
(3) The capital conservation buffer and G-SIB surcharge were 2.5 percent at both December 31, 2020 and 2019. At December 31, 2020, the Corporation's SCB of 2.5 percent was applied in place of the capital conservation buffer under the Standardized approach. The countercyclical capital buffer for both periods was zero. The SLR minimum includes a leverage buffer of 2.0 percent.
(4) Total capital under the Advanced approaches differs from the Standardized approach due to differences in the amount permitted in Tier 2 capital related to the qualifying allowance for credit losses.
(5) Reflects total average assets adjusted for certain Tier 1 capital deductions.
(6) Supplementary leverage exposure at December 31, 2020 reflects the temporary exclusion of U.S. Treasury securities and deposits at Federal Reserve Banks.

At December 31, 2020, CET1 capital was $176.7 billion, an increase of $9.9 billion from December 31, 2019, driven by earnings and net unrealized gains on available-for-sale (AFS) debt securities included in accumulated other comprehensive income (OCI), partially offset by common stock repurchases and dividends. Total capital under the Standardized approach increased $16.7 billion primarily driven by the same factors as CET1 capital, an increase in the adjusted allowance for credit losses included in Tier 2 capital and the issuance of preferred stock. RWA under the Standardized approach, which yielded the lower CET1 capital ratio at December 31, 2020, decreased $13.7 billion during 2020 to $1,480 billion primarily due to lower commercial and consumer lending exposures, partially offset by investments of excess deposits in securities. Table 12 shows the capital composition at December 31, 2020 and 2019.

Table 12 Capital Composition under Basel 3

(Dollars in millions)	December 31 2020	December 31 2019
Total common shareholders' equity	$ 248,414	$ 241,409
CECL transitional amount [1]	4,213	—
Goodwill, net of related deferred tax liabilities	(68,565)	(68,570)
Deferred tax assets arising from net operating loss and tax credit carryforwards	(5,773)	(5,193)
Intangibles, other than mortgage servicing rights, net of related deferred tax liabilities	(1,617)	(1,328)
Defined benefit pension plan net assets	(1,164)	(1,003)
Cumulative unrealized net (gain) loss related to changes in fair value of financial liabilities attributable to own creditworthiness, net-of-tax	1,753	1,278
Other	(601)	167
Common equity tier 1 capital	176,660	166,760
Qualifying preferred stock, net of issuance cost	23,437	22,329
Other	(1)	(597)
Tier 1 capital	200,096	188,492
Tier 2 capital instruments	22,213	22,538
Qualifying allowance for credit losses [2]	15,649	10,229
Other	(22)	(29)
Total capital under the Standardized approach	237,936	221,230
Adjustment in qualifying allowance for credit losses under the Advanced approaches [2]	(10,251)	(8,132)
Total capital under the Advanced approaches	$ 227,685	$ 213,098

(1) The CECL transitional amount includes the impact of the Corporation's adoption of the new CECL accounting standard on January 1, 2020 plus 25 percent of the increase in the adjusted allowance for credit losses from January 1, 2020 through December 31, 2020.
(2) The balance at December 31, 2020 includes the impact of transition provisions related to the new CECL accounting standard.

Table 13 shows the components of RWA as measured under Basel 3 at December 31, 2020 and 2019.

Table 13 Risk-weighted Assets under Basel 3

(Dollars in billions)	Standardized Approach [1] 2020	Advanced Approaches 2020	Standardized Approach [1] 2019	Advanced Approaches 2019
	December 31			
Credit risk	$ 1,420	$ 896	$ 1,437	$ 858
Market risk	60	60	56	55

(1) Derivative exposure amounts are calculated using the standardized approach for measuring counterparty credit risk at December 31, 2020 and the current exposure method at December 31, 2019.
(2) December 31, 2020 includes the effects of an update made to our operational risk RWA model during the third quarter of 2020.
n/a = not applicable

Bank of America, N.A. Regulatory Capital

Table 14 presents regulatory capital information for BANA in accordance with Basel 3 Standardized and Advanced approaches as measured at December 31, 2020 and 2019. BANA met the definition of well capitalized under the PCA framework for both periods.

Table 14 Bank of America, N.A. Regulatory Capital under Basel 3

(Dollars in millions, except as noted)	Standardized Approach (1, 2)	Advanced Approaches (1)	Regulatory Minimum (3)
	December 31, 2020		
Risk-based capital metrics:			
Common equity tier 1 capital	$ 164,593	$ 164,593	
Tier 1 capital	164,593	164,593	
Total capital (4)	181,370	170,922	
Risk-weighted assets (in billions)	1,221	1,014	
Common equity tier 1 capital ratio	13.5 %	16.2 %	7.0 %
Tier 1 capital ratio	13.5	16.2	8.5
Total capital ratio	14.9	16.9	10.5
Leverage-based metrics:			
Adjusted quarterly average assets (in billions) (5)	$ 2,143	$ 2,143	
Tier 1 leverage ratio	7.7 %	7.7 %	5.0
Supplementary leverage exposure (in billions)		$ 2,525	
Supplementary leverage ratio		6.5 %	6.0
	December 31, 2019		
Risk-based capital metrics:			
Common equity tier 1 capital	$ 154,626	$ 154,626	
Tier 1 capital	154,626	154,626	
Total capital (4)	166,567	158,665	
Risk-weighted assets (in billions)	1,241	991	
Common equity tier 1 capital ratio	12.5 %	15.6 %	7.0 %
Tier 1 capital ratio	12.5	15.6	8.5
Total capital ratio	13.4	16.0	10.5
Leverage-based metrics:			
Adjusted quarterly average assets (in billions) (5)	$ 1,780	$ 1,780	
Tier 1 leverage ratio	8.7 %	8.7 %	5.0
Supplementary leverage exposure (in billions)		$ 2,177	
Supplementary leverage ratio		7.1 %	6.0

(1) As of December 31, 2020, capital ratios are calculated using the regulatory capital rule that allows a five-year transition period related to the adoption of CECL.
(2) Derivative exposure amounts are calculated using the standardized approach for measuring counterparty credit risk at December 31, 2020 and the current exposure method at December 31, 2019.
(3) Risk-based capital regulatory minimums at both December 31, 2020 and 2019 are the minimum ratios under Basel 3 including a capital conservation buffer of 2.5 percent. The regulatory minimums for the leverage ratios as of both period ends are the percent required to be considered well capitalized under the PCA framework.
(4) Total capital under the Advanced approaches differs from the Standardized approach due to differences in the amount permitted in Tier 2 capital related to the qualifying allowance for credit losses.
(5) Reflects total average assets adjusted for certain Tier 1 capital deductions.

Total Loss-Absorbing Capacity Requirements

Total loss-absorbing capacity (TLAC) consists of the Corporation's Tier 1 capital and eligible long-term debt issued directly by the Corporation. Eligible long-term debt for TLAC ratios is comprised of unsecured debt that has a remaining maturity of at least one year and satisfies additional requirements as prescribed in the TLAC final rule. As with the risk-based capital ratios and SLR, the Corporation is required to maintain TLAC ratios in excess of minimum requirements plus applicable buffers to avoid restrictions on capital distributions and discretionary bonus payments. Table 15 presents the Corporation's TLAC and long-term debt ratios and related information as of December 31, 2020 and 2019.

Table 15 Bank of America Corporation Total Loss-Absorbing Capacity and Long-Term Debt

(Dollars in millions)	TLAC (1)	Regulatory Minimum (2)	Long-term Debt	Regulatory Minimum (3)
	December 31, 2020			
Total eligible balance	$ 405,153		$ 196,997	
Percentage of risk-weighted assets (4)	27.4 %	22.0 %	13.3 %	8.5 %
Percentage of supplementary leverage exposure (5, 6)	14.5	9.5	7.1	4.5
	December 31, 2019			
Total eligible balance	$ 367,449		$ 171,349	
Percentage of risk-weighted assets (4)	24.6 %	22.0 %	11.5 %	8.5 %
Percentage of supplementary leverage exposure (6)	12.5	9.5	5.8	4.5

(1) As of December 31, 2020, TLAC ratios are calculated using the regulatory capital rule that allows a five-year transition period related to the adoption of CECL.
(2) The TLAC RWA regulatory minimum consists of 18.0 percent plus a TLAC RWA buffer comprised of 2.5 percent plus the Method 1 G-SIB surcharge of 1.5 percent. The countercyclical buffer is zero for both periods. The TLAC supplementary leverage exposure regulatory minimum consists of 7.5 percent plus a 2.0 percent TLAC leverage buffer. The TLAC RWA and leverage buffers must be comprised solely of CET1 capital and Tier 1 capital, respectively.
(3) The long-term debt RWA regulatory minimum is comprised of 6.0 percent plus an additional 2.5 percent requirement based on the Corporation's Method 2 G-SIB surcharge. The long-term debt leverage exposure regulatory minimum is 4.5 percent.
(4) The approach that yields the higher RWA is used to calculate TLAC and long-term debt ratios, which was the Standardized approach as of both December 31, 2020 and 2019.
(5) Supplementary leverage exposure at December 31, 2020 reflects the temporary exclusion of U.S. Treasury Securities and deposits at Federal Reserve Banks.
(6) Derivative exposure amounts are calculated using the standardized approach for measuring counterparty credit risk at December 31, 2020 and the current exposure method at December 31, 2019.

Regulatory Developments

Revisions to Basel 3 to Address Current Expected Credit Loss Accounting

On January 1, 2020, the Corporation adopted the new accounting standard that requires the measurement of the allowance for credit losses to be based on management's best estimate of lifetime ECL inherent in the Corporation's relevant financial assets. For more information, see *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements. During the first quarter of 2020, in accordance with an interim final rule issued by U.S. banking regulators that was finalized on August 26, 2020, the Corporation delayed for two years the initial adoption impact of CECL on regulatory capital, followed by a three-year transition period to phase out the aggregate amount of the capital benefit provided during 2020 and 2021 (i.e., a five-year transition period). During the two-year delay, the Corporation will add back to CET1 capital 100 percent of the initial adoption impact of CECL plus 25 percent of the cumulative quarterly changes in the allowance for credit losses (i.e., quarterly transitional amounts). After two years, starting on January 1, 2022, the quarterly transitional amounts along with the initial adoption impact of CECL will be phased out of CET1 capital over the three-year period.

Stress Capital Buffer

On March 4, 2020, the Federal Reserve issued a final rule that integrates the annual quantitative assessment of the CCAR program with the buffer requirements in the U.S. Basel 3 Final Rule. The new approach replaced the static 2.5 percent capital conservation buffer for Basel 3 Standardized approach requirements with a SCB, calculated as the decline in the CET1 capital ratio under the supervisory severely adverse scenario plus four quarters of planned common stock dividends, floored at 2.5 percent. Based on the CCAR 2020 supervisory stress test results, the Corporation is subject to a 2.5 percent SCB for the period beginning October 1, 2020 and ending on September 30, 2021.

In conjunction with this new requirement, the Federal Reserve has removed the annual CCAR quantitative objection process beginning with CCAR 2020. While the final rule continues to require that the Corporation describe its planned capital distributions in its CCAR capital plan, the Corporation is no longer required to seek prior approval if it makes capital distributions in excess of those included in its CCAR capital plan. The Corporation is instead subject to automatic distribution limitations if its capital ratios fall below its buffer requirements, which include the SCB.

Eligible Retained Income

On March 17, 2020, in response to the economic impact of the pandemic, the U.S. banking regulators issued an interim final rule that revises the definition of eligible retained income to be based on average net income over the prior four quarters. This change, which was finalized on August 26, 2020, more gradually phases in automatic distribution restrictions to the extent capital buffers are breached.

Supplementary Leverage Ratio

On April 1, 2020, in response to the economic impact of the pandemic, the Federal Reserve issued an interim final rule to temporarily exclude the on-balance sheet amounts of U.S. Treasury securities and deposits at Federal Reserve Banks from the calculation of supplementary leverage exposure for bank holding companies. The rule is effective for June 30, 2020 through March 31, 2021 reports. As of December 31, 2020, temporary exclusions improved the SLR by 1.0 percent to 7.2 percent.

On May 15, 2020, the U.S. banking regulators issued an interim final rule that provides a similar temporary exclusion to depository institutions, effective from the beginning of the second quarter of 2020 through March 31, 2021; however, institutions must elect the relief. Beginning in the third quarter of 2020, a depository institution electing to apply the exclusion must receive approval from its primary regulator prior to making any capital distributions as long as the exclusion is in effect. As of December 31, 2020, the Corporation's insured depository institution subsidiaries have not elected the exclusion.

Paycheck Protection Program Loans

On April 9, 2020, in response to the economic impact of the pandemic, the U.S. banking regulators issued an interim final rule that, among other things, stipulates PPP loans, which are guaranteed by the SBA, will receive a zero percent risk weight under the Basel 3 Advanced and Standardized approaches. The rule was later finalized by the U.S. banking regulators on October 28, 2020. For more information on the PPP, see Executive Summary – Recent Developments – COVID-19 Pandemic on page 48 and *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements.

Standardized Approach for Measuring Counterparty Credit Risk

On June 30, 2020 the Corporation adopted the new standardized approach for measuring counterparty credit risk (SA-CCR), which replaces the current exposure method for calculating the exposure amount of derivative contracts for risk-weighted assets and supplementary leverage exposure. Adoption of SA-CCR resulted in a decrease of approximately $15 billion in the Corporation's Standardized RWA, and a $66 billion decrease in supplementary leverage exposure.

Swap Dealer Capital Requirements

On July 22, 2020, the U.S. Commodity Futures Trading Commission (CFTC) issued a final rule to establish capital requirements for swap dealers and major swap participants that are not subject to existing U.S. prudential regulation. Under the rule, applicable subsidiaries of the Corporation would be permitted to elect one of two approaches to compute their regulatory capital. The first approach is a bank-based capital approach, which requires that firms maintain CET1 capital greater than or equal to 6.5 percent of the entity's RWA as calculated under Basel 3, Total capital greater than or equal to 8.0 percent of the entity's RWA as calculated under Basel 3 and Total capital greater than or equal to 8.0 percent of the entity's uncleared swap margin. The second approach is based on net liquid assets and requires that a firm maintain net capital greater than or equal to 2.0 percent of its uncleared swap margin. The final rule also includes reporting requirements. The impact on the Corporation is not expected to be significant.

Deduction of Unsecured Debt of G-SIBs

On October 20, 2020, the Federal Reserve, Federal Deposit Insurance Corporation (FDIC) and the Office of the Comptroller of the Currency (U.S. Agencies) finalized a rule requiring Advanced approaches institutions to deduct from regulatory capital certain investments in TLAC-eligible long-term debt and other pari passu or subordinated debt instruments issued by G-SIBs above a specified threshold. The final rule is intended to limit the interconnectedness between G-SIBs and is complementary to existing regulatory capital requirements that generally require banks to deduct investments in the regulatory capital of financial institutions. The final rule is effective April 1, 2021. The impact to the Corporation is not expected to be significant.

Volcker Rule

Effective January 1, 2020, we became subject to certain changes to the Volcker Rule, including removing the requirement for banking organizations to deduct from Tier 1 capital ownership interests of covered funds acquired or retained under the underwriting or market-making exemptions of the Volcker Rule, which the banking entity did not organize or offer.

Single-Counterparty Credit Limits

The Federal Reserve established single-counterparty credit limits (SCCL) for BHCs with total consolidated assets of $250 billion or more. The SCCL rule is designed to ensure that the maximum possible loss that a BHC could incur due to the default of a single counterparty or a group of connected counterparties would not endanger the BHC's survival, thereby reducing the probability of future financial crises. Beginning January 1, 2020, G-SIBs must calculate SCCL on a daily basis by dividing the aggregate net credit exposure to a given counterparty by the G-SIB's Tier 1 capital, ensuring that exposures to other G-SIBs and nonbank financial institutions regulated by the Federal Reserve do not breach 15 percent of Tier 1 capital and exposures to most other counterparties do not breach 25 percent of Tier 1 capital. Certain exposures, including exposures to the U.S. government, U.S. government-sponsored entities and qualifying central counterparties, are exempt from the credit limits.

Regulatory Capital and Securities Regulation

The Corporation's principal U.S. broker-dealer subsidiaries are BofA Securities, Inc. (BofAS), Merrill Lynch Professional Clearing Corp. (MLPCC) and Merrill Lynch, Pierce, Fenner & Smith Incorporated (MLPF&S). The Corporation's principal European broker-dealer subsidiaries are Merrill Lynch International (MLI) and BofA Securities Europe SA (BofASE).

The U.S. broker-dealer subsidiaries are subject to the net capital requirements of Rule 15c3-1 under the Exchange Act. BofAS computes its minimum capital requirements as an alternative net capital broker-dealer under Rule 15c3-1e, and MLPCC and MLPF&S compute their minimum capital requirements in accordance with the alternative standard under Rule 15c3-1. BofAS and MLPCC are also registered as futures commission merchants and are subject to CFTC Regulation 1.17. The U.S. broker-dealer subsidiaries are also registered with the Financial Industry Regulatory Authority, Inc. (FINRA). Pursuant to FINRA Rule 4110, FINRA may impose higher net capital requirements than Rule 15c3-1 under the Exchange Act with respect to each of the broker-dealers.

BofAS provides institutional services, and in accordance with the alternative net capital requirements, is required to maintain tentative net capital in excess of $1.0 billion and net capital in excess of the greater of $500 million or a certain percentage of its reserve requirement. BofAS must also notify the Securities and Exchange Commission (SEC) in the event its tentative net capital is less than $5.0 billion. BofAS is also required to hold a certain percentage of its customers' and affiliates' risk-based margin in order to meet its CFTC minimum net capital requirement. At December 31, 2020, BofAS had tentative net capital of $16.8 billion. BofAS also had regulatory net capital of $14.1 billion, which exceeded the minimum requirement of $2.9 billion.

MLPCC is a fully-guaranteed subsidiary of BofAS and provides clearing and settlement services as well as prime brokerage and arranged financing services for institutional clients. At December 31, 2020, MLPCC's regulatory net capital of $8.6 billion exceeded the minimum requirement of $1.4 billion.

MLPF&S provides retail services. At December 31, 2020, MLPF&S' regulatory net capital was $3.6 billion, which exceeded the minimum requirement of $180 million.

Our European broker-dealers are regulated by non-U.S. regulators. MLI, a U.K. investment firm, is regulated by the Prudential Regulation Authority and the FCA and is subject to certain regulatory capital requirements. At December 31, 2020, MLI's capital resources were $34.1 billion, which exceeded the minimum Pillar 1 requirement of $14.7 billion. BofASE, a French investment firm, is regulated by the Autorité de Contrôle Prudentiel et de Résolution and the Autorité des Marchés Financiers, and is subject to certain regulatory capital requirements. At December 31, 2020, BofASE's capital resources were $6.2 billion, which exceeded the minimum Pillar 1 requirement of $1.9 billion.

Liquidity Risk

Funding and Liquidity Risk Management

Our primary liquidity risk management objective is to meet expected or unexpected cash flow and collateral needs while continuing to support our businesses and customers under a range of economic conditions. To achieve that objective, we analyze and monitor our liquidity risk under expected and stressed conditions, maintain liquidity and access to diverse funding sources, including our stable deposit base, and seek to align liquidity-related incentives and risks. These liquidity risk management practices have allowed us to effectively manage the market stress from the pandemic that began in the first quarter of 2020. For more information on the effects of the pandemic, see Item 1A. Risk Factors of our 2020 Annual Report on Form 10-K and Executive Summary – Recent Developments – COVID-19 Pandemic on page 48.

We define liquidity as readily available assets, limited to cash and high-quality, liquid, unencumbered securities that we can use to meet our contractual and contingent financial obligations as those obligations arise. We manage our liquidity position through line-of-business and ALM activities, as well as through our legal entity funding strategy, on both a forward and current (including intraday) basis under both expected and stressed conditions. We believe that a centralized approach to funding and liquidity management enhances our ability to monitor liquidity requirements, maximizes access to funding sources, minimizes borrowing costs and facilitates timely responses to liquidity events.

The Board approves our liquidity risk policy and the Financial Contingency and Recovery Plan. The ERC establishes our liquidity risk tolerance levels. The MRC is responsible for overseeing liquidity risks and directing management to maintain exposures within the established tolerance levels. The MRC reviews and monitors our liquidity position and stress testing results, approves certain liquidity risk limits and reviews the impact of strategic decisions on our liquidity. For more information, see Managing Risk on page 70. Under this governance framework, we have developed certain funding and liquidity risk management practices which include: maintaining liquidity at the parent company and selected subsidiaries, including our bank subsidiaries and other regulated entities; determining what amounts of liquidity are appropriate for these entities based on analysis of debt maturities and other potential cash outflows, including those that we may experience during stressed market conditions; diversifying funding sources, considering our asset profile and legal entity structure; and performing contingency planning.

NB Holdings Corporation

We have intercompany arrangements with certain key subsidiaries under which we transferred certain assets of Bank of America Corporation, as the parent company, which is a separate and distinct legal entity from our bank and nonbank subsidiaries, and agreed to transfer certain additional parent company assets not needed to satisfy anticipated near-term expenditures, to NB Holdings Corporation, a wholly-owned holding company subsidiary (NB Holdings). The parent company is expected to continue to have access to the same flow of dividends, interest and other amounts of cash necessary to service its debt, pay dividends and perform other obligations as it would have had if it had not entered into these arrangements and transferred any assets.

In consideration for the transfer of assets, NB Holdings issued a subordinated note to the parent company in a principal amount equal to the value of the transferred assets. The aggregate principal amount of the note will increase by the amount of any future asset transfers. NB Holdings also provided the parent company with a committed line of credit that allows the parent company to draw funds necessary to service near-term cash needs. These arrangements support our preferred single point of entry resolution strategy, under which only the parent company would be resolved under the U.S. Bankruptcy Code. These arrangements include provisions to terminate the line of credit, forgive the subordinated note and require the parent company to transfer its remaining financial assets to NB Holdings if our projected liquidity resources deteriorate so severely that resolution of the parent company becomes imminent.

Global Liquidity Sources and Other Unencumbered Assets

We maintain liquidity available to the Corporation, including the parent company and selected subsidiaries, in the form of cash and high-quality, liquid, unencumbered securities. Our liquidity buffer, referred to as Global Liquidity Sources (GLS), is comprised of assets that are readily available to the parent company and selected subsidiaries, including holding company, bank and broker-dealer subsidiaries, even during stressed market conditions. Our cash is primarily on deposit with the Federal Reserve Bank and, to a lesser extent, central banks outside of the U.S. We limit the composition of high-quality, liquid, unencumbered securities to U.S. government securities, U.S. agency securities, U.S. agency MBS and a select group of non-U.S. government securities. We can quickly obtain cash for these securities, even in stressed conditions, through repurchase agreements or outright sales. We hold our GLS in legal entities that allow us to meet the liquidity requirements of our global businesses, and we consider the impact of potential regulatory, tax, legal and other restrictions that could limit the transferability of funds among entities.

Table 16 presents average GLS for the three months ended December 31, 2020 and 2019.

Table 16 Average Global Liquidity Sources

	Three Months Ended December 31	
(Dollars in billions)	**2020**	2019
Bank entities	**$ 773**	$ 454
Nonbank and other entities [1]	**170**	122
Total Average Global Liquidity Sources	**$ 943**	$ 576

[1] Nonbank includes Parent, NB Holdings and other regulated entities.

Our bank subsidiaries' liquidity is primarily driven by deposit and lending activity, as well as securities valuation and net debt activity. Bank subsidiaries can also generate incremental liquidity by pledging a range of unencumbered loans and securities to certain FHLBs and the Federal Reserve Discount Window. The cash we could have obtained by borrowing against this pool of specifically-identified eligible assets was $306 billion and $372 billion at December 31, 2020 and 2019. We have established operational procedures to enable us to borrow against these assets, including regularly monitoring our total pool of eligible loans and securities collateral. Eligibility is defined in guidelines from the FHLBs and the Federal Reserve and is subject to change at their discretion. Due to regulatory restrictions, liquidity generated by the bank subsidiaries can generally be used only to fund obligations within the bank subsidiaries, and transfers to the parent company or nonbank subsidiaries may be subject to prior regulatory approval.

Liquidity is also held in nonbank entities, including the Parent, NB Holdings and other regulated entities. Parent company and NB Holdings liquidity is typically in the form of cash deposited at BANA and is excluded from the liquidity at bank subsidiaries. Liquidity held in other regulated entities, comprised primarily of broker-dealer subsidiaries, is primarily available to meet the obligations of that entity, and transfers to the parent company or to any other subsidiary may be subject to prior regulatory approval due to regulatory restrictions and minimum requirements. Our other regulated entities also hold unencumbered investment-grade securities and equities that we believe could be used to generate additional liquidity.

Table 17 presents the composition of average GLS for the three months ended December 31, 2020 and 2019.

Table 17 Average Global Liquidity Sources Composition

(Dollars in billions)	Three Months Ended December 31 2020	2019
Cash on deposit	**$ 322**	$ 103
U.S. Treasury securities	**141**	98
U.S. agency securities, mortgage-backed securities, and other investment-grade securities	**462**	358
Non-U.S. government securities	**18**	17
Total Average Global Liquidity Sources	**$ 943**	$ 576

Our GLS are substantially the same in composition to what qualifies as High Quality Liquid Assets (HQLA) under the final U.S. Liquidity Coverage Ratio (LCR) rules. However, HQLA for purposes of calculating LCR is not reported at market value, but at a lower value that incorporates regulatory deductions and the exclusion of excess liquidity held at certain subsidiaries. The LCR is calculated as the amount of a financial institution's unencumbered HQLA relative to the estimated net cash outflows the institution could encounter over a 30-day period of significant liquidity stress, expressed as a percentage. Our average consolidated HQLA, on a net basis, was $584 billion and $464 billion for the three months ended December 31, 2020 and 2019. For the same periods, the average consolidated LCR was 122 percent and 116 percent. Our LCR fluctuates due to normal business flows from customer activity.

Liquidity Stress Analysis

We utilize liquidity stress analysis to assist us in determining the appropriate amounts of liquidity to maintain at the parent company and our subsidiaries to meet contractual and contingent cash outflows under a range of scenarios. The scenarios we consider and utilize incorporate market-wide and Corporation-specific events, including potential credit rating downgrades for the parent company and our subsidiaries, and more severe events including potential resolution scenarios. The scenarios are based on our historical experience, experience of distressed and failed financial institutions, regulatory guidance, and both expected and unexpected future events.

The types of potential contractual and contingent cash outflows we consider in our scenarios may include, but are not limited to, upcoming contractual maturities of unsecured debt and reductions in new debt issuances; diminished access to secured financing markets; potential deposit withdrawals; increased draws on loan commitments, liquidity facilities and letters of credit; additional collateral that counterparties could call if our credit ratings were downgraded; collateral and margin requirements arising from market value changes; and potential liquidity required to maintain businesses and finance customer activities. Changes in certain market factors, including, but not limited to, credit rating downgrades, could negatively impact potential contractual and contingent outflows and the related financial instruments, and in some cases these impacts could be material to our financial results.

We consider all sources of funds that we could access during each stress scenario and focus particularly on matching available sources with corresponding liquidity requirements by legal entity. We also use the stress modeling results to manage our asset and liability profile and establish limits and guidelines on certain funding sources and businesses.

Net Stable Funding Ratio Final Rule

On October 20, 2020, the U.S. Agencies finalized the Net Stable Funding Ratio (NSFR), a rule requiring large banks to maintain a minimum level of stable funding over a one-year period. The final rule is intended to support the ability of banks to lend to households and businesses in both normal and adverse economic conditions and is complementary to the LCR rule, which focuses on short-term liquidity risks. The final rule is effective July 1, 2021. The U.S. NSFR would apply to the Corporation on a consolidated basis and to our insured depository institutions. The Corporation expects to be in compliance within the final NSFR rule in the regulatory timeline provided and does not expect any significant impacts to the Corporation.

Diversified Funding Sources

We fund our assets primarily with a mix of deposits, and secured and unsecured liabilities through a centralized, globally coordinated funding approach diversified across products, programs, markets, currencies and investor groups.

The primary benefits of our centralized funding approach include greater control, reduced funding costs, wider name recognition by investors and greater flexibility to meet the variable funding requirements of subsidiaries. Where regulations, time zone differences or other business considerations make parent company funding impractical, certain other subsidiaries may issue their own debt.

We fund a substantial portion of our lending activities through our deposits, which were $1.80 trillion and $1.43 trillion at December 31, 2020 and 2019. Deposits are primarily generated by our *Consumer Banking*, *GWIM* and *Global Banking* segments. These deposits are diversified by clients, product type and geography, and the majority of our U.S. deposits are insured by the FDIC. We consider a substantial portion of our deposits to be a stable, low-cost and consistent source of funding. We believe this deposit funding is generally less sensitive to interest rate changes, market volatility or changes in our credit ratings than wholesale funding sources. Our lending activities may also be financed through secured borrowings, including credit card securitizations and securitizations with government-sponsored enterprises (GSE), the FHA and private-label investors, as well as FHLB loans.

Our trading activities in other regulated entities are primarily funded on a secured basis through securities lending and repurchase agreements, and these amounts will vary based on customer activity and market conditions. We believe funding these activities in the secured financing markets is more cost-efficient and less sensitive to changes in our credit ratings than unsecured financing. Repurchase agreements are generally short-term and often overnight. Disruptions in secured financing markets for financial institutions have occurred in prior market cycles which resulted in adverse changes in terms or significant reductions in the availability of such financing. We manage the liquidity risks arising from secured funding by sourcing funding globally from a diverse group of counterparties, providing a range of securities collateral and pursuing longer durations, when appropriate. For more information on secured financing agreements, see *Note 10 – Federal Funds Sold or Purchased, Securities Financing Agreements, Short-term Borrowings and Restricted Cash* to the Consolidated Financial Statements.

Total long-term debt increased $22.1 billion to $262.9 billion during 2020, primarily due to debt issuances and valuation adjustments, partially offset by maturities and redemptions. We may, from time to time, purchase outstanding debt instruments in various transactions, depending on market conditions, liquidity and other factors. Our other regulated entities may also make markets in our debt instruments to provide liquidity for investors.

During 2020, we issued $56.9 billion of long-term debt consisting of $43.8 billion of notes issued by Bank of America Corporation, substantially all of which was TLAC compliant, $4.8 billion of notes issued by Bank of America, N.A. and $8.3 billion of other debt. During 2019, we issued $52.5 billion of long-term debt consisting of $29.3 billion of notes issued by Bank of America Corporation, substantially all of which was TLAC compliant, $10.9 billion of notes issued by Bank of America, N.A. and $12.3 billion of other debt.

During 2020, we had total long-term debt maturities and redemptions in the aggregate of $47.1 billion consisting of $22.6 billion for Bank of America Corporation, $11.5 billion for Bank of America, N.A. and $13.0 billion of other debt. During 2019, we had total long-term debt maturities and redemptions in the aggregate of $50.6 billion consisting of $21.1 billion for Bank of America Corporation, $19.9 billion for Bank of America, N.A. and $9.6 billion of other debt.

At December 31, 2020, Bank of America Corporation's senior notes of $191.2 billion included $146.6 billion of outstanding notes that are both TLAC eligible and callable at least one year before their stated maturities. Of these senior notes, $12.0 billion will be callable and become TLAC ineligible during 2021, and $15.3 billion, $14.6 billion, $11.7 billion and $13.2 billion will do so during each of 2022 through 2025, respectively, and $79.8 billion thereafter.

We issue long-term unsecured debt in a variety of maturities and currencies to achieve cost-efficient funding and to maintain an appropriate maturity profile. While the cost and availability of unsecured funding may be negatively impacted by general market conditions or by matters specific to the financial services industry or the Corporation, we seek to mitigate refinancing risk by actively managing the amount of our borrowings that we anticipate will mature within any month or quarter. We may issue unsecured debt in the form of structured notes for client purposes, certain of which qualify as TLAC-eligible debt. During 2020, we issued $7.3 billion of structured notes, which are unsecured debt obligations that pay investors returns linked to other debt or equity securities, indices, currencies or commodities. We typically hedge the returns we are obligated to pay on these liabilities with derivatives and/or investments in the underlying instruments, so that from a funding perspective, the cost is similar to our other unsecured long-term debt. We could be required to settle certain structured note obligations for cash or other securities prior to maturity under certain circumstances, which we consider for liquidity planning purposes. We believe, however, that a portion of such borrowings will remain outstanding beyond the earliest put or redemption date.

Substantially all of our senior and subordinated debt obligations contain no provisions that could trigger a requirement for an early repayment, require additional collateral support, result in changes to terms, accelerate maturity or create additional financial obligations upon an adverse change in our credit ratings, financial ratios, earnings, cash flows or stock price. For more information on long-term debt funding, including issuances and maturities and redemptions, see *Note 11 – Long-term Debt* to the Consolidated Financial Statements.

We use derivative transactions to manage the duration, interest rate and currency risks of our borrowings, considering the characteristics of the assets they are funding. For more information on our ALM activities, see Interest Rate Risk Management for the Banking Book on page 105.

Contingency Planning

We maintain contingency funding plans that outline our potential responses to liquidity stress events at various levels of severity. These policies and plans are based on stress scenarios and include potential funding strategies and communication and notification procedures that we would implement in the event we experienced stressed liquidity conditions. We periodically review and test the contingency funding plans to validate efficacy and assess readiness.

Our U.S. bank subsidiaries can access contingency funding through the Federal Reserve Discount Window. Certain non-U.S. subsidiaries have access to central bank facilities in the jurisdictions in which they operate. While we do not rely on these sources in our liquidity modeling, we maintain the policies, procedures and governance processes that would enable us to access these sources if necessary.

Credit Ratings

Our borrowing costs and ability to raise funds are impacted by our credit ratings. In addition, credit ratings may be important to customers or counterparties when we compete in certain markets and when we seek to engage in certain transactions, including over-the-counter (OTC) derivatives. Thus, it is our objective to maintain high-quality credit ratings, and management maintains an active dialogue with the major rating agencies.

Credit ratings and outlooks are opinions expressed by rating agencies on our creditworthiness and that of our obligations or securities, including long-term debt, short-term borrowings, preferred stock and other securities, including asset securitizations. Our credit ratings are subject to ongoing review by the rating agencies, and they consider a number of factors, including our own financial strength, performance, prospects and operations as well as factors not under our control. The rating agencies could make adjustments to our ratings at any time, and they provide no assurances that they will maintain our ratings at current levels.

Other factors that influence our credit ratings include changes to the rating agencies' methodologies for our industry or certain security types; the rating agencies' assessment of the general operating environment for financial services companies; our relative positions in the markets in which we compete; our various risk exposures and risk management policies and activities; pending litigation and other contingencies or potential tail risks; our reputation; our liquidity position, diversity of funding sources and funding costs; the current and expected level and volatility of our earnings; our capital position and capital management practices; our corporate governance; the sovereign credit ratings of the U.S. government; current or future regulatory and legislative initiatives; and the agencies' views on whether the U.S. government would provide meaningful support to the Corporation or its subsidiaries in a crisis.

On April 22, 2020, Fitch Ratings (Fitch) completed its review of large, complex securities trading and universal banks in the U.S., including Bank of America, in response to declining economic activity from the pandemic. The agency affirmed its long-term and short-term senior debt ratings for the Corporation and all of its rated subsidiaries, except for select issuer and instrument-level ratings that had previously been placed under criteria observation on March 4, 2020, following changes in the agency's bank rating criteria on February 28, 2020.

Concurrently, Fitch reached a conclusion on select under-criteria-observation designations for the Corporation and upgraded its long-term and short-term senior debt ratings of MLI and BofASE by one notch to AA-/F1+. The agency also upgraded its preferred stock rating for the Corporation by one notch to BBB and downgraded its subordinated debt rating for the Corporation by one notch to A-. According to Fitch, rating changes under criteria observation are the sole result of bank rating criteria changes and do not reflect a change in the underlying fundamentals of the institution. Fitch's outlook for all of our long-term ratings is currently Stable.

On June 9, 2020, Fitch affirmed its rating for the subordinated debt of BANA at A. This rating had remained under criteria observation following Fitch's broader rating actions.

On November 18, 2020, Moody's Investors Service (Moody's) affirmed its long-term and short-term debt ratings for the Corporation and all of its rated subsidiaries, which did not change during 2020. Moody's outlook for all of our long-term ratings is currently Stable.

The current ratings and Stable outlooks for the Corporation and its subsidiaries from Standard & Poor's Global Ratings also did not change during 2020.

Table 18 presents the Corporation's current long-term/short-term senior debt ratings and outlooks expressed by the rating agencies.

Table 18 Senior Debt Ratings

	Moody's Investors Service			Standard & Poor's Global Ratings			Fitch Ratings		
	Long-term	Short-term	Outlook	Long-term	Short-term	Outlook	Long-term	Short-term	Outlook
Bank of America Corporation	A2	P-1	Stable	A-	A-2	Stable	A+	F1	Stable
Bank of America, N.A.	Aa2	P-1	Stable	A+	A-1	Stable	AA-	F1+	Stable

BofA Securities Europe SA	NR	NR	NR	A+	A-1	Stable	AA-	F1+	Stable

NR = not rated

A reduction in certain of our credit ratings or the ratings of certain asset-backed securitizations may have a material adverse effect on our liquidity, potential loss of access to credit markets, the related cost of funds, our businesses and on certain revenues, particularly in those businesses where counterparty creditworthiness is critical. In addition, under the terms of certain OTC derivative contracts and other trading agreements, in the event of downgrades of our or our rated subsidiaries' credit ratings, the counterparties to those agreements may require us to provide additional collateral, or to terminate these contracts or agreements, which could cause us to sustain losses and/or adversely impact our liquidity. If the short-term credit ratings of our parent company, bank or broker-dealer subsidiaries were downgraded by one or more levels, the potential loss of access to short-term funding sources such as repo financing and the effect on our incremental cost of funds could be material.

While certain potential impacts are contractual and quantifiable, the full scope of the consequences of a credit rating downgrade to a financial institution is inherently uncertain, as it depends upon numerous dynamic, complex and inter-related factors and assumptions, including whether any downgrade of a company's long-term credit ratings precipitates downgrades to its short-term credit ratings, and assumptions about the potential behaviors of various customers, investors and counterparties. For more information on potential impacts of credit rating downgrades, see Liquidity Risk – Liquidity Stress Analysis on page 81.

For more information on additional collateral and termination payments that could be required in connection with certain over-the-counter derivative contracts and other trading agreements in the event of a credit rating downgrade, see *Note 3 – Derivatives* to the Consolidated Financial Statements and Item 1A. Risk Factors of our 2020 Annual Report on Form 10-K.

Common Stock Dividends

For a summary of our declared quarterly cash dividends on common stock during 2020 and through February 24, 2021, see *Note 13 – Shareholders' Equity* to the Consolidated Financial Statements.

Finance Subsidiary Issuers and Parent Guarantor

BofA Finance LLC, a Delaware limited liability company (BofA Finance), is a consolidated finance subsidiary of the Corporation that has issued and sold, and is expected to continue to issue and sell, its senior unsecured debt securities (Guaranteed Notes), that are fully and unconditionally guaranteed by the Corporation. The Corporation guarantees the due and punctual payment, on demand, of amounts payable on the Guaranteed Notes if not paid by BofA Finance. In addition, each of BAC Capital Trust XIII and BAC Capital Trust XIV, Delaware statutory trusts (collectively, the Trusts), is a 100 percent owned finance subsidiary of the Corporation that has issued and sold trust preferred securities (the Trust Preferred Securities and, together with the Guaranteed Notes, the Guaranteed Securities) that remained outstanding at December 31, 2020. The Corporation guarantees the payment of amounts and distributions with respect to the Trust Preferred Securities if not paid by the Trusts, to the extent of funds held by the Trusts, and this guarantee, together with the Corporation's other obligations with respect to the Trust Preferred Securities, effectively constitutes a full and unconditional guarantee of the Trusts' payment obligations on the Trust Preferred Securities. No other subsidiary of the Corporation guarantees the Guaranteed Securities.

BofA Finance and each of the Trusts are finance subsidiaries, have no independent assets, revenues or operations and are dependent upon the Corporation and/or the Corporation's other subsidiaries to meet their respective obligations under the Guaranteed Securities in the ordinary course. If holders of the Guaranteed Securities make claims on their Guaranteed Securities in a bankruptcy, resolution or similar proceeding, any recoveries on those claims will be limited to those available under the applicable guarantee by the Corporation, as described above.

The Corporation is a holding company and depends upon its subsidiaries for liquidity. Applicable laws and regulations and intercompany arrangements entered into in connection with the Corporation's resolution plan could restrict the availability of funds from subsidiaries to the Corporation, which could adversely affect the Corporation's ability to make payments under its guarantees. In addition, the obligations of the Corporation under the guarantees of the Guaranteed Securities will be structurally subordinated to all existing and future liabilities of its subsidiaries, and claimants should look only to assets of the Corporation for payments. If the Corporation, as guarantor of the Guaranteed Notes, transfers all or substantially all of its assets to one or more direct or indirect majority-owned subsidiaries, under the indenture governing the Guaranteed Notes, the subsidiary or subsidiaries will not be required to assume the Corporation's obligations under its guarantee of the Guaranteed Notes.

For more information on factors that may affect payments to holders of the Guaranteed Securities, see Liquidity Risk – NB Holdings Corporation in this section, see Item 1. Business of our 2020 Annual Report on Form 10-K and Item 1A. Risk Factors of our 2020 Annual Report on Form 10-K.

Credit Risk Management

Credit risk is the risk of loss arising from the inability or failure of a borrower or counterparty to meet its obligations. Credit risk can also arise from operational failures that result in an erroneous advance, commitment or investment of funds. We define the credit exposure to a borrower or counterparty as the loss potential arising from all product classifications including loans and leases, deposit overdrafts, derivatives, assets held-for-sale and unfunded lending commitments which include loan commitments, letters of credit and financial guarantees. Derivative positions are recorded at fair value and assets held-for-sale are recorded at either fair value or the lower of cost or fair value. Certain loans and unfunded commitments are accounted for under the fair value option. Credit risk for categories of assets carried at fair value is not accounted for as part of the allowance for credit losses but as part of the fair value adjustments recorded in earnings. For derivative positions, our credit risk is measured as the net cost in the event the counterparties with contracts in which we are in a gain position fail to perform under the terms of those contracts. We use the current fair value to represent credit exposure without giving consideration to future mark-to-market changes. The credit risk amounts take into consideration the effects of legally enforceable master netting agreements and cash collateral. Our consumer and commercial credit extension and review procedures encompass funded and unfunded credit exposures. For more information on derivatives and credit extension commitments, see *Note 3 – Derivatives* and *Note 12 – Commitments and Contingencies* to the Consolidated Financial Statements.

We manage credit risk based on the risk profile of the borrower or counterparty, repayment sources, the nature of underlying collateral, and other support given current events, conditions and expectations. We classify our portfolios as either consumer or commercial and monitor credit risk in each as discussed below.

We refine our underwriting and credit risk management practices as well as credit standards to meet the changing economic environment. To mitigate losses and enhance customer support in our consumer businesses, we have in place collection programs and loan modification and customer assistance infrastructures. We utilize a number of actions to mitigate losses in the commercial businesses including increasing the frequency and intensity of portfolio monitoring, hedging activity and our practice of transferring management of deteriorating commercial exposures to independent special asset officers as credits enter criticized categories.

For information on our credit risk management activities, see Consumer Portfolio Credit Risk Management below, Commercial Portfolio Credit Risk Management on page 91, Non-U.S. Portfolio on page 97, Allowance for Credit Losses on page 99, and *Note 5 – Outstanding Loans and Leases and Allowance for Credit Losses* to the Consolidated Financial Statements.

During 2020, the pandemic negatively impacted economic activity in the U.S. and around the world. In particular, beginning in the latter portion of the first quarter of 2020, the pandemic resulted in changes to consumer and business behaviors and restrictions on economic activity. These restrictions gave rise to increased unemployment and underemployment, lower business profits, increased business closures and bankruptcies, fluctuations and disruptions to commercial and consumer spending and markets, and lower global GDP, all of which negatively impacted our consumer and commercial credit portfolio.

To provide relief to individuals and businesses in the U.S., economic stimulus packages were enacted throughout 2020, including the CARES Act, an executive order signed in August 2020 to establish the Lost Wage Assistance Program, and most recently, the Consolidated Appropriations Act enacted in December 2020. In addition, U.S. bank regulatory agencies issued interagency guidance to financial institutions that have worked with and continue to work with borrowers affected by COVID-19.

To support our customers, we implemented various loan modification programs and other forms of support beginning in March 2020, including offering loan payment deferrals, refunding certain fees, and pausing foreclosure sales, evictions and repossessions. Since June 2020, we have experienced a decline in the need for customer assistance as the number of customer accounts and balances on deferral decreased significantly. For information on the accounting for loan modifications related to the pandemic, see *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements.

Furthermore, as COVID-19 cases eased and initial restrictions lifted, the global economy began to improve. This improvement, coupled with the aforementioned relief, facilitated economic recovery, with unemployment dropping from double-digit highs in the second quarter of 2020 and GDP significantly rebounding in the third quarter of 2020.

However, economic recovery remains uneven, with certain sectors of the economy more significantly impacted from the pandemic (e.g., travel and entertainment). As a result, we have experienced increases in commercial reservable criticized utilized exposures driven by industries most heavily impacted by COVID-19. Also, we have seen modest increases in nonperforming loans driven by commercial loans and consumer real estate customer deferral activities, though consumer charge-offs remained low during 2020 due to payment deferrals and government stimulus benefits.

The pandemic and its full impact on the global economy continue to be highly uncertain. While COVID-19 cases have begun to ease from their January 2021 peak, the spread of new, more contagious variants could impact the magnitude and duration of this health crisis. However, ongoing virus containment efforts and vaccination progress, as well as the possibility of further government stimulus, could accelerate the macroeconomic recovery. For more information on how the pandemic may affect our operations, see Executive Summary – Recent Developments – COVID-19 Pandemic on page 48 and Item 1A. Risk Factors of our 2020 Annual Report on Form 10-K.

Consumer Portfolio Credit Risk Management

Credit risk management for the consumer portfolio begins with initial underwriting and continues throughout a borrower's credit cycle. Statistical techniques in conjunction with experiential judgment are used in all aspects of portfolio management including underwriting, product pricing, risk appetite, setting credit limits, and establishing operating processes and metrics to quantify and balance risks and returns. Statistical models are built using detailed behavioral information from external sources such as credit bureaus and/or internal historical experience and are a component of our consumer credit risk management process. These models are used in part to assist in making both new and ongoing credit decisions, as well as portfolio management strategies, including authorizations and line management, collection practices and strategies, and determination of the allowance for loan and lease losses and allocated capital for credit risk.

Consumer Credit Portfolio

While COVID-19 is severely impacting economic activity, and is contributing to increasing nonperforming loans within certain consumer portfolios, it did not have a significant impact on consumer portfolio charge-offs during 2020 due to payment deferrals and government stimulus benefits. However, COVID-19 could lead to adverse impacts to credit quality metrics in future periods if negative economic conditions continue or worsen. During 2020, net charge-offs decreased $334 million to $2.7 billion primarily due to lower credit card losses.

The consumer allowance for loan and lease losses increased $5.5 billion in 2020 to $10.1 billion due to the adoption of the new CECL accounting standard and deterioration in the economic outlook resulting from the impact of COVID-19. For more information, see Allowance for Credit Losses on page 99.

For more information on our accounting policies regarding delinquencies, nonperforming status, charge-offs, TDRs for the consumer portfolio, as well as interest accrual policies and delinquency status for loan modifications related to the pandemic, see *Note 1 – Summary of Significant Accounting Principles* and *Note 5 – Outstanding Loans and Leases and Allowance for Credit Losses* to the Consolidated Financial Statements.

Table 19 presents our outstanding consumer loans and leases, consumer nonperforming loans and accruing consumer loans past due 90 days or more.

Table 19 Consumer Credit Quality

(Dollars in millions)	Outstandings		Nonperforming		Accruing Past Due 90 Days or More	
	December 31					
	2020	2019	**2020**	2019	**2020**	2019
Residential mortgage [1]	**$ 223,555**	$ 236,169	**$ 2,005**	$ 1,470	**$ 762**	$ 1,088
Home equity	**34,311**	40,208	**649**	536	**—**	—

Consumer loans excluding loans accounted for under the fair value option	**$ 428,061**	$ 465,175	**$ 2,725**	$ 2,053	**$ 1,698**	$ 2,163
Loans accounted for under the fair value option [3]	**735**	594				
Total consumer loans and leases	**$ 428,796**	$ 465,769				
Percentage of outstanding consumer loans and leases [4]	**n/a**	n/a	**0.64 %**	0.44 %	**0.40 %**	0.47 %
Percentage of outstanding consumer loans and leases, excluding fully-insured loan portfolios [4]	**n/a**	n/a	**0.65**	0.46	**0.22**	0.24

[1] Residential mortgage loans accruing past due 90 days or more are fully-insured loans. At December 31, 2020 and 2019, residential mortgage includes $537 million and $740 million of loans on which interest had been curtailed by the FHA, and therefore were no longer accruing interest, although principal was still insured, and $225 million and $348 million of loans on which interest was still accruing.

[2] Outstandings primarily include auto and specialty lending loans and leases of $46.4 billion and $50.4 billion, U.S. securities-based lending loans of $41.1 billion and $36.7 billion and non-U.S. consumer loans of $3.0 billion and $2.8 billion at December 31, 2020 and 2019.

[3] Consumer loans accounted for under the fair value option include residential mortgage loans of $298 million and $257 million and home equity loans of $437 million and $337 million at December 31, 2020 and 2019. For more information on the fair value option, see *Note 21 – Fair Value Option* to the Consolidated Financial Statements.

[4] Excludes consumer loans accounted for under the fair value option. At December 31, 2020 and 2019, $11 million and $6 million of loans accounted for under the fair value option were past due 90 days or more and not accruing interest.

n/a = not applicable

Table 20 presents net charge-offs and related ratios for consumer loans and leases.

Table 20 Consumer Net Charge-offs and Related Ratios

(Dollars in millions)	Net Charge-offs		Net Charge-off Ratios [1]	
	2020	2019	**2020**	2019
Residential mortgage	**$ (30)**	$ (47)	**(0.01)%**	(0.02)%
Home equity	**(73)**	(358)	**(0.19)**	(0.81)

Other consumer	**284**	234	**n/m**	n/m
Total	**$ 2,652**	$ 2,986	**0.59**	0.66

[1] Net charge-off ratios are calculated as net charge-offs divided by average outstanding loans and leases excluding loans accounted for under the fair value option.

n/m = not meaningful

Table 21 presents outstandings, nonperforming balances, net charge-offs, allowance for credit losses and provision for credit losses for the core and non-core portfolios within the consumer real estate portfolio. We categorize consumer real estate loans as core and non-core based on loan and customer characteristics such as origination date, product type, loan-to value (LTV), Fair Isaac Corporation (FICO) score and delinquency status consistent with our current consumer and mortgage servicing strategy. Generally, loans that were originated after January 1, 2010, qualified under GSE underwriting guidelines, or otherwise met our underwriting guidelines in place in 2015 are characterized as core loans. All other loans are generally characterized as non-core loans and represent runoff portfolios. Core loans as reported in Table 21 include loans held in the *Consumer Banking* and *GWIM* segments, as well as loans held for ALM activities in *All Other*.

As shown in Table 21, outstanding core consumer real estate loans decreased $15.4 billion during 2020 driven by a decrease of $10.5 billion in residential mortgage and a $4.9 billion decrease in home equity.

Table 21 Consumer Real Estate Portfolio [1]

(Dollars in millions)	Outstandings December 31 2020	Outstandings December 31 2019	Nonperforming December 31 2020	Nonperforming December 31 2019	Net Charge-offs 2020	Net Charge-offs 2019

(1) Outstandings and nonperforming loans exclude loans accounted for under the fair value option. Consumer loans accounted for under the fair value option include residential mortgage loans of $298 million and $257 million and home equity loans of $437 million and $337 million at December 31, 2020 and 2019. For more information, see *Note 21 – Fair Value Option* to the Consolidated Financial Statements.
(2) The home equity non-core allowance is in a negative position at December 31, 2020 as it includes expected recoveries of amounts previously charged off.
(3) Home equity allowance includes a reserve for unfunded lending commitments of $137 million at December 31, 2020.

We believe that the presentation of information adjusted to exclude the impact of the fully-insured loan portfolio and loans accounted for under the fair value option is more representative of the ongoing operations and credit quality of the business. As a result, in the following tables and discussions of the residential mortgage and home equity portfolios, we exclude loans accounted for under the fair value option and provide information that excludes the impact of the fully-insured loan portfolio in certain credit quality statistics.

Residential Mortgage

The residential mortgage portfolio made up the largest percentage of our consumer loan portfolio at 52 percent of consumer loans and leases at December 31, 2020. Approximately 52 percent of the residential mortgage portfolio was in *Consumer Banking* and 40 percent was in *GWIM.* The remaining portion was in *All Other* and was comprised of loans used in our overall ALM activities, delinquent FHA loans repurchased pursuant to our servicing agreements with the Government National Mortgage Association as well as loans repurchased related to our representations and warranties.

Outstanding balances in the residential mortgage portfolio decreased $12.6 billion in 2020 as both loan sales and paydowns were partially offset by originations.

At December 31, 2020 and 2019, the residential mortgage portfolio included $11.8 billion and $18.7 billion of outstanding fully-insured loans, of which $2.8 billion and $11.2 billion had FHA insurance, with the remainder protected by Fannie Mae long-term standby agreements. The decline was primarily driven by sales of loans with FHA insurance during 2020.

Table 22 presents certain residential mortgage key credit statistics on both a reported basis and excluding the fully-insured loan portfolio. The following discussion presents the residential mortgage portfolio excluding the fully-insured loan portfolio.

Table 22 Residential Mortgage – Key Credit Statistics

(Dollars in millions)	Reported Basis[1]		Excluding Fully-insured Loans[1]	
	December 31			
	2020	2019	**2020**	2019
Outstandings	**$ 223,555**	$ 236,169	**$ 211,737**	$ 217,479
Accruing past due 30 days or more	**2,314**	3,108	**1,224**	1,296
Accruing past due 90 days or more	**762**	1,088	**—**	—
Nonperforming loans[2]	**2,005**	1,470	**2,005**	1,470
Percent of portfolio				
Refreshed LTV greater than 90 but less than or equal to 100	**2%**	2 %	**1%**	2 %
Refreshed LTV greater than 100	**1**	1	**1**	1
Refreshed FICO below 620	**2**	3	**1**	2
2006 and 2007 vintages[3]	**3**	4	**3**	4

(1) Outstandings, accruing past due, nonperforming loans and percentages of portfolio exclude loans accounted for under the fair value option. For information on our interest accrual policies and delinquency status for loan modifications related to the pandemic, see *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements.

(2) Includes loans that are contractually current which primarily consist of collateral-dependent TDRs, including those that have been discharged in Chapter 7 bankruptcy and loans that have not yet demonstrated a sustained period of payment performance following a TDR.

(3) These vintages of loans accounted for $503 million and $365 million, or 25 percent, of nonperforming residential mortgage loans at both December 31, 2020 and 2019.

Nonperforming outstanding balances in the residential mortgage portfolio increased $535 million in 2020 primarily driven by COVID-19 deferral activity, as well as the inclusion of certain loans that, upon adoption of the new credit loss standard, became accounted for on an individual basis, which previously had been accounted for under a pool basis. Of the nonperforming residential mortgage loans at December 31, 2020, $892 million, or 45 percent, were current on contractual payments. Loans accruing past due 30 days or more decreased $72 million.

Net charge-offs increased $17 million to a net recovery of $30 million in 2020 compared to a net recovery of $47 million in 2019. This increase is due largely to lower recoveries from the sales of previously charged-off loans.

Of the $211.7 billion in total residential mortgage loans outstanding at December 31, 2020, as shown in Table 22, 27 percent were originated as interest-only loans. The outstanding balance of interest-only residential mortgage loans that have entered the amortization period was $5.9 billion, or 10 percent, at December 31, 2020. Residential mortgage loans that have entered the amortization period generally have experienced a higher rate of early stage delinquencies and nonperforming status compared to the residential mortgage portfolio as a whole. At December 31, 2020, $113 million, or two percent of outstanding interest-only residential mortgages that had entered the amortization period were accruing past due 30 days or more compared to $1.2 billion, or less than one percent, for the entire residential mortgage portfolio. In addition, at December 31, 2020, $356 million, or six percent, of outstanding interest-only residential mortgage loans that had entered the amortization period were nonperforming, of which $96 million were contractually current, compared to $2.0 billion, or one percent, for the entire residential mortgage portfolio. Loans that have yet to enter the amortization period in our interest-only residential mortgage portfolio are primarily well-collateralized loans to our wealth management clients and have an interest-only period of three to ten years. Approximately 98 percent of these loans that have yet to enter the amortization period will not be required to make a fully-amortizing payment until 2022 or later.

Table 23 presents outstandings, nonperforming loans and net charge-offs by certain state concentrations for the residential mortgage portfolio. The Los Angeles-Long Beach-Santa Ana Metropolitan Statistical Area (MSA) within California represented 16 percent of outstandings at both December 31, 2020 and 2019. In the New York area, the New York-Northern New Jersey-Long Island MSA made up 14 percent and 13 percent of outstandings at December 31, 2020 and 2019.

Table 23 Residential Mortgage State Concentrations

(Dollars in millions)	Outstandings[1]		Nonperforming[1]		Net Charge-offs	
	December 31					
	2020	2019	**2020**	2019	**2020**	2019
California	**$ 83,185**	$ 88,998	**$ 570**	$ 274	**$ (18)**	$ (22)

Residential mortgage loans	**$ 211,737**	$ 217,479	**$ 2,005**	$ 1,470	**$ (30)**	$ (47)
Fully-insured loan portfolio	**11,818**	18,690				
Total residential mortgage loan portfolio	**$ 223,555**	$ 236,169				

(1) Outstandings and nonperforming loans exclude loans accounted for under the fair value option.

Home Equity

At December 31, 2020, the home equity portfolio made up eight percent of the consumer portfolio and was comprised of home equity lines of credit (HELOCs), home equity loans and reverse mortgages. HELOCs generally have an initial draw period of 10 years, and after the initial draw period ends, the loans generally convert to 15- or 20-year amortizing loans. We no longer originate home equity loans or reverse mortgages.

At December 31, 2020, 80 percent of the home equity portfolio was in *Consumer Banking*, 12 percent was in *All Other* and the remainder of the portfolio was primarily in *GWIM*. Outstanding balances in the home equity portfolio decreased

$5.9 billion in 2020 primarily due to paydowns outpacing new originations and draws on existing lines. Of the total home equity portfolio at December 31, 2020 and 2019, $13.8 billion, or 40 percent, and $15.0 billion, or 37 percent, were in first-lien positions. At December 31, 2020, outstanding balances in the home equity portfolio that were in a second-lien or more junior-lien position and where we also held the first-lien loan totaled $5.9 billion, or 17 percent, of our total home equity portfolio.

Unused HELOCs totaled $42.3 billion and $43.6 billion at December 31, 2020 and 2019. The HELOC utilization rate was 43 percent and 46 percent at December 31, 2020 and 2019.

Table 24 presents certain home equity portfolio key credit statistics.

Table 24 Home Equity – Key Credit Statistics [1]

(Dollars in millions)	December 31 2020	2019
Outstandings	$ 34,311	$ 40,208
Accruing past due 30 days or more [2]	186	218
Nonperforming loans [2, 3]	649	536
Percent of portfolio		
Refreshed CLTV greater than 90 but less than or equal to 100	1%	1 %
Refreshed CLTV greater than 100	1	2
Refreshed FICO below 620	3	3
2006 and 2007 vintages [4]	16	18

(1) Outstandings, accruing past due, nonperforming loans and percentages of the portfolio exclude loans accounted for under the fair value option. For information on our interest accrual policies and delinquency status for loan modifications related to the pandemic, see *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements.

(2) Accruing past due 30 days or more include $25 million and $30 million and nonperforming loans include $88 million and $57 million of loans where we serviced the underlying first lien at December 31, 2020 and 2019.

(3) Includes loans that are contractually current which primarily consist of collateral-dependent TDRs, including those that have been discharged in Chapter 7 bankruptcy, junior-lien loans where the underlying first lien is 90 days or more past due, as well as loans that have not yet demonstrated a sustained period of payment performance following a TDR.

(4) These vintages of loans accounted for 36 percent and 34 percent of nonperforming home equity loans at December 31, 2020 and 2019.

Nonperforming outstanding balances in the home equity portfolio increased $113 million during 2020 primarily driven by COVID-19 deferral activity. Of the nonperforming home equity loans at December 31, 2020, $259 million, or 40 percent, were current on contractual payments. In addition, $237 million, or 36 percent, of nonperforming home equity loans were 180 days or more past due and had been written down to the estimated fair value of the collateral, less costs to sell. Accruing loans that were 30 days or more past due decreased $32 million in 2020.

Net charge-offs increased $285 million to a net recovery of $73 million in 2020 compared to a net recovery of $358 million in 2019 as the prior-year period included recoveries from non-core home equity loan sales.

Of the $34.3 billion in total home equity portfolio outstandings at December 31, 2020, as shown in Table 24, 15 percent require interest-only payments. The outstanding balance of HELOCs that have reached the end of their draw period and have entered the amortization period was $9.2 billion at December 31, 2020. The HELOCs that have entered the amortization period have experienced a higher percentage of early stage delinquencies and nonperforming status when compared to the HELOC portfolio as a whole. At December 31, 2020, $121 million, or one percent of outstanding HELOCs that had entered the amortization period were accruing past due 30 days or more. In addition, at December 31, 2020, $477 million, or five percent, were nonperforming. Loans that have yet to enter the amortization period in our interest-only portfolio are primarily post-2008 vintages and generally have better credit quality than the previous vintages that had entered the amortization period. We communicate to contractually current customers more than a year prior to the end of their draw period to inform them of the potential change to the payment structure before entering the amortization period, and provide payment options to customers prior to the end of the draw period.

Although we do not actively track how many of our home equity customers pay only the minimum amount due on their home equity loans and lines, we can infer some of this information through a review of our HELOC portfolio that we service and that is still in its revolving period. During 2020, nine percent of these customers with an outstanding balance did not pay any principal on their HELOCs.

Table 25 presents outstandings, nonperforming balances and net charge-offs by certain state concentrations for the home equity portfolio. In the New York area, the New York-Northern New Jersey-Long Island MSA made up 13 percent of the outstanding home equity portfolio at both December 31, 2020 and 2019. The Los Angeles-Long Beach-Santa Ana MSA within California made up 11 percent of the outstanding home equity portfolio at both December 31, 2020 and 2019.

Table 25 Home Equity State Concentrations

	Outstandings [1]		Nonperforming [1]		Net Charge-offs	
	December 31					
(Dollars in millions)	2020	2019	2020	2019	2020	2019

Total home equity loan portfolio	$ 34,311	$ 40,208	$ 649	$ 536	$ (73)	$ (358)

(1) Outstandings and nonperforming loans exclude loans accounted for under the fair value option.

Credit Card

At December 31, 2020, 97 percent of the credit card portfolio was managed in *Consumer Banking* with the remainder in *GWIM*. Outstandings in the credit card portfolio decreased $18.9 billion in 2020 to $78.7 billion due to lower retail spending and higher payments. Net charge-offs decreased $599 million to $2.3 billion during 2020 compared to net charge-offs of $2.9 billion in 2019 due to government stimulus benefits and payment deferrals associated with COVID-19. Credit card loans 30 days or more past due and still accruing interest decreased $346 million, and loans 90 days or more past due and still accruing interest decreased $139 million primarily due to government stimulus benefits and declines in loan balances.

Unused lines of credit for credit card increased to $342.4 billion at December 31, 2020 from $336.9 billion in 2019.

Table 26 presents certain state concentrations for the credit card portfolio.

Table 26 Credit Card State Concentrations

	Outstandings		Accruing Past Due 90 Days or More [1]		Net Charge-offs	
	December 31

[1] For information on our interest accrual policies and delinquency status for loan modifications related to the pandemic, see *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements.

Direct/Indirect Consumer

At December 31, 2020, 51 percent of the direct/indirect portfolio was included in *Consumer Banking* (consumer auto and recreational vehicle lending) and 49 percent was included in *GWIM* (principally securities-based lending loans). Outstandings in the direct/indirect portfolio increased $365 million in 2020 to $91.4 billion primarily due to increases in securities-based lending offset by lower originations in Auto.

Table 27 presents certain state concentrations for the direct/indirect consumer loan portfolio.

Table 27 Direct/Indirect State Concentrations

	Outstandings		Accruing Past Due 90 Days or More [1]		Net Charge-offs

Total direct/indirect loan portfolio	**$ 91,363**	$ 90,998	**$ 33**	$ 33	**$ 122**	$ 209

[1] For information on our interest accrual policies and delinquency status for loan modifications related to the pandemic, see *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements.

Nonperforming Consumer Loans, Leases and Foreclosed Properties Activity

Table 28 presents nonperforming consumer loans, leases and foreclosed properties activity during 2020 and 2019. During 2020, nonperforming consumer loans increased $672 million to $2.7 billion primarily driven by COVID-19 deferral activity, as well as the inclusion of $144 million of certain loans that were previously classified as purchased credit-impaired loans and accounted for under a pool basis.

At December 31, 2020, $892 million, or 33 percent of nonperforming loans were 180 days or more past due and had been written down to their estimated property value less costs to sell. In addition, at December 31, 2020, $1.2 billion, or 45 percent of nonperforming consumer loans were modified and are now current after successful trial periods, or are current loans classified as nonperforming loans in accordance with applicable policies.

Foreclosed properties decreased $106 million in 2020 to $123 million as the Corporation has paused formal loan foreclosure proceedings and foreclosure sales for occupied properties during 2020.

Nonperforming loans also include certain loans that have been modified in TDRs where economic concessions have been granted to borrowers experiencing financial difficulties. Nonperforming TDRs are included in Table 28. For more information on our loan modification programs offered in response to the pandemic, most of which are not TDRs, see Executive Summary – Recent Developments – COVID-19 Pandemic on page 48 and *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements.

Table 28 Nonperforming Consumer Loans, Leases and Foreclosed Properties Activity

(Dollars in millions)	2020	2019
Nonperforming loans and leases, January 1	**$ 2,053**	$ 3,842
Additions	**2,278**	1,407
Reductions:		
Paydowns and payoffs	**(440)**	(701)
Sales	**(38)**	(1,523)
Returns to performing status [1]	**(1,014)**	(766)
Charge-offs	**(78)**	(111)
Transfers to foreclosed properties	**(36)**	(95)
Total net additions/(reductions) to nonperforming loans and leases	**672**	(1,789)
Total nonperforming loans and leases, December 31	**2,725**	2,053
Foreclosed properties, December 31 [2]	**123**	229
Nonperforming consumer loans, leases and foreclosed properties, December 31	**$ 2,848**	$ 2,282
Nonperforming consumer loans and leases as a percentage of outstanding consumer loans and leases [3]	0.64 %	0.44 %
Nonperforming consumer loans, leases and foreclosed properties as a percentage of outstanding consumer loans, leases and foreclosed properties [3]	0.66	0.49

(1) Consumer loans may be returned to performing status when all principal and interest is current and full repayment of the remaining contractual principal and interest is expected, or when the loan otherwise becomes well-secured and is in the process of collection.
(2) Foreclosed property balances do not include properties insured by certain government-guaranteed loans, principally FHA-insured, of $119 million and $260 million at December 31, 2020 and 2019.
(3) Outstanding consumer loans and leases exclude loans accounted for under the fair value option.

Table 29 presents TDRs for the consumer real estate portfolio. Performing TDR balances are excluded from nonperforming loans and leases in Table 28. For more information on our loan modification programs offered in response to the pandemic, most of which are not TDRs, see Executive Summary – Recent Developments – COVID-19 Pandemic on page 48 and *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements.

Table 29 Consumer Real Estate Troubled Debt Restructurings

	December 31, 2020			December 31, 2019		
(Dollars in millions)	Nonperforming	Performing	Total	Nonperforming	Performing	Total
Residential mortgage [1, 2]	**$ 1,195**	**$ 2,899**	**$ 4,094**	$ 921	$ 3,832	$ 4,753
Home equity [3]	**248**	**836**	**1,084**	252	977	1,229
Total consumer real estate troubled debt restructurings	**$ 1,443**	**$ 3,735**	**$ 5,178**	$ 1,173	$ 4,809	$ 5,982

(1) At December 31, 2020 and 2019, residential mortgage TDRs deemed collateral dependent totaled $1.4 billion and $1.2 billion, and included $1.0 billion and $748 million of loans classified as nonperforming and $361 million and $468 million of loans classified as performing.
(2) At December 31, 2020 and 2019, residential mortgage performing TDRs include $1.5 billion and $2.1 billion of loans that were fully-insured.
(3) At December 31, 2020 and 2019, home equity TDRs deemed collateral dependent totaled $407 million and $442 million, and include $216 million and $209 million of loans classified as nonperforming and $191 million and $233 million of loans classified as performing.

In addition to modifying consumer real estate loans, we work with customers who are experiencing financial difficulty by modifying credit card and other consumer loans. Credit card and other consumer loan modifications generally involve a reduction in the customer's interest rate on the account and placing the customer on a fixed payment plan not exceeding 60 months.

Modifications of credit card and other consumer loans are made through programs utilizing direct customer contact, but may also utilize external programs. At December 31, 2020 and 2019, our credit card and other consumer TDR portfolio was $701 million and $679 million, of which $614 million and $570 million were current or less than 30 days past due under the modified terms.

Commercial Portfolio Credit Risk Management

Credit risk management for the commercial portfolio begins with an assessment of the credit risk profile of the borrower or counterparty based on an analysis of its financial position. As part of the overall credit risk assessment, our commercial credit exposures are assigned a risk rating and are subject to approval based on defined credit approval standards. Subsequent to loan origination, risk ratings are monitored on an ongoing basis, and if necessary, adjusted to reflect changes in the financial condition, cash flow, risk profile or outlook of a borrower or counterparty. In making credit decisions, we consider risk rating, collateral, country, industry and single-name concentration limits while also balancing these considerations with the total borrower or counterparty relationship. We use a variety of tools to continuously monitor the ability of a borrower or counterparty to perform under its obligations. We use risk rating aggregations to measure and evaluate concentrations within portfolios. In addition, risk ratings are a factor in determining the level of allocated capital and the allowance for credit losses.

As part of our ongoing risk mitigation initiatives, we attempt to work with clients experiencing financial difficulty to modify their loans to terms that better align with their current ability to pay. In situations where an economic concession has been granted to a borrower experiencing financial difficulty, we identify these loans as TDRs. For more information on our accounting policies regarding delinquencies, nonperforming status and net charge-offs for the commercial portfolio, see *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements.

Management of Commercial Credit Risk Concentrations

Commercial credit risk is evaluated and managed with the goal that concentrations of credit exposure continue to be aligned with our risk appetite. We review, measure and manage concentrations of credit exposure by industry, product, geography, customer relationship and loan size. We also review, measure and manage commercial real estate loans by geographic location and property type. In addition, within our non-U.S. portfolio, we evaluate exposures by region and by country. Tables 34, 37 and 40 summarize our concentrations. We also utilize syndications of exposure to third parties, loan sales, hedging and other risk mitigation techniques to manage the size and risk profile of the commercial credit portfolio. For more information on our industry concentrations, see Commercial Portfolio Credit Risk Management – Industry Concentrations on page 95 and Table 37.

We account for certain large corporate loans and loan commitments, including issued but unfunded letters of credit which are considered utilized for credit risk management purposes, that exceed our single-name credit risk concentration guidelines under the fair value option. Lending commitments, both funded and unfunded, are actively managed and monitored, and as appropriate, credit risk for these lending relationships may be mitigated through the use of credit derivatives, with our credit view and market perspectives determining the size and timing of the hedging activity. In addition, we purchase credit protection to cover the funded portion as well as the unfunded portion of certain other credit exposures. To lessen the cost of obtaining our desired credit protection levels, credit exposure may be added within an industry, borrower or counterparty group by selling protection. These credit derivatives do not meet the requirements for treatment as accounting hedges. They are carried at fair value with changes in fair value recorded in other income.

In addition, we are a member of various securities and derivative exchanges and clearinghouses, both in the U.S. and other countries. As a member, we may be required to pay a pro-rata share of the losses incurred by some of these organizations as a result of another member default and under other loss scenarios. For more information, see *Note 12 – Commitments and Contingencies* to the Consolidated Financial Statements.

Commercial Credit Portfolio

During 2020, commercial asset quality weakened as a result of the economic impact from COVID-19. However, there were also positive signs during this period. The draws by large corporate and commercial clients contributing to the $67.2 billion loan growth in the first quarter of 2020 have largely been repaid, as emergency or contingent funding was no longer needed or clients were able to access capital markets. Additionally, as part of the CARES Act, we had $22.7 billion of PPP loans outstanding with our small business clients at December 31, 2020, which are included in U.S. small business commercial in the tables in this section. For more information on PPP loans, see *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements.

Credit quality of commercial real estate borrowers has begun to stabilize in many sectors as certain economies have reopened. Certain sectors, including hospitality and retail, continue to be negatively impacted as a result of COVID-19. Moreover, many real estate markets, while improving, are still experiencing some disruptions in demand, supply chain challenges and tenant difficulties.

The commercial allowance for loan and lease losses increased $3.9 billion during 2020 to $8.7 billion due to the deterioration in the economic outlook resulting from the impact of COVID-19. For more information, see Allowance for Credit Losses on page 99.

Total commercial utilized credit exposure decreased $15.0 billion during 2020 to $620.3 billion driven by lower loans and leases. The utilization rate for loans and leases, SBLCs and financial guarantees, and commercial letters of credit, in the aggregate, was 57 percent at December 31, 2020 and 58 percent at December 31, 2019.

Table 30 presents commercial credit exposure by type for utilized, unfunded and total binding committed credit exposure. Commercial utilized credit exposure includes SBLCs and financial guarantees and commercial letters of credit that have been issued and for which we are legally bound to advance funds under prescribed conditions during a specified time period, and excludes exposure related to trading account assets. Although funds have not yet been advanced, these exposure types are considered utilized for credit risk management purposes.

Table 30 Commercial Credit Exposure by Type

	Commercial Utilized [1]		Commercial Unfunded [2, 3, 4]		Total Commercial Committed	
	December 31					
(Dollars in millions)	**2020**	2019	**2020**	2019	**2020**	2019
Loans and leases	**$ 499,065**	$ 517,657	**$ 404,740**	$ 405,834	**$ 903,805**	$ 923,491
Derivative assets [5]	**47,179**	40,485	**—**	—	**47,179**	40,485
Standby letters of credit and financial guarantees	**34,616**	36,062	**538**	468	**35,154**	36,530
Debt securities and other investments	**22,618**	25,546	**4,827**	5,101	**27,445**	30,647
Loans held-for-sale	**8,378**	7,047	**9,556**	15,135	**17,934**	22,182
Operating leases	**6,424**	6,660	**—**	—	**6,424**	6,660
Commercial letters of credit	**855**	1,049	**280**	451	**1,135**	1,500
Other	**1,168**	800	**—**	—	**1,168**	800
Total	**$ 620,303**	$ 635,306	**$ 419,941**	$ 426,989	**$ 1,040,244**	$ 1,062,295

(1) Commercial utilized exposure includes loans of $5.9 billion and $7.7 billion and issued letters of credit with a notional amount of $89 million and $170 million accounted for under the fair value option at December 31, 2020 and 2019.
(2) Commercial unfunded exposure includes commitments accounted for under the fair value option with a notional amount of $3.9 billion and $4.2 billion at December 31, 2020 and 2019.
(3) Excludes unused business card lines, which are not legally binding.
(4) Includes the notional amount of unfunded legally binding lending commitments net of amounts distributed (i.e., syndicated or participated) to other financial institutions. The distributed amounts were $10.5 billion and $10.6 billion at December 31, 2020 and 2019.
(5) Derivative assets are carried at fair value, reflect the effects of legally enforceable master netting agreements and have been reduced by cash collateral of $42.5 billion and $33.9 billion at December 31, 2020 and 2019. Not reflected in utilized and committed exposure is additional non-cash derivative collateral held of $39.3 billion and $35.2 billion at December 31, 2020 and 2019, which consists primarily of other marketable securities.

Outstanding commercial loans and leases decreased $18.6 billion during 2020 primarily driven by repayments due in part to reduced working capital needs and a favorable capital markets environment, partially offset by $22.7 billion of PPP loans outstanding at December 31, 2020. Nonperforming commercial loans increased $728 million across industries, and commercial reservable criticized utilized exposure increased $27.2 billion spread across several industries, including travel and entertainment, as a result of weaker economic conditions arising from COVID-19. Table 31 presents our commercial loans and leases portfolio and related credit quality information at December 31, 2020 and 2019.

Table 31 Commercial Credit Quality

	456,650	494,583	**2,152**	1,449	**269**	153
U.S. small business commercial [1]	**36,469**	15,333	**75**	50	**115**	97
Commercial loans excluding loans accounted for under the fair value option	**493,119**	509,916	**2,227**	1,499	**384**	250
Loans accounted for under the fair value option [2]	**5,946**	7,741				
Total commercial loans and leases	**$ 499,065**	$ 517,657				

(1) Includes card-related products.

(2) Commercial loans accounted for under the fair value option include U.S. commercial of $2.9 billion and $4.7 billion and non-U.S. commercial of $3.0 billion and $3.1 billion at December 31, 2020 and 2019. For more information on the fair value option, see *Note 21 – Fair Value Option* to the Consolidated Financial Statements.

(3) For information on our interest accrual policies and delinquency status for loan modifications related to the pandemic, see *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements.

Table 32 presents net charge-offs and related ratios for our commercial loans and leases for 2020 and 2019.

Table 32 Commercial Net Charge-offs and Related Ratios

	Net Charge-offs		Net Charge-off Ratios [1]	
(Dollars in millions)	**2020**	2019	**2020**	2019
Commercial and industrial:				
U.S. commercial	**$ 718**	$ 256	**0.23%**	0.08%
Non-U.S. commercial	**155**	84	**0.15**	0.08
Total commercial and industrial	**873**	340	**0.21**	0.08
Commercial real estate	**270**	29	**0.43**	0.05
Commercial lease financing	**59**	21	**0.32**	0.10
	1,202	390	**0.24**	0.08
U.S. small business commercial	**267**	272	**0.86**	1.83
Total commercial	**$ 1,469**	$ 662	**0.28**	0.13

(1) Net charge-off ratios are calculated as net charge-offs divided by average outstanding loans and leases excluding loans accounted for under the fair value option.

Table 33 presents commercial reservable criticized utilized exposure by loan type. Criticized exposure corresponds to the Special Mention, Substandard and Doubtful asset categories as defined by regulatory authorities. Total commercial reservable criticized utilized exposure increased $27.2 billion during 2020, which was spread across several industries, including travel and entertainment, as a result of weaker economic conditions arising from COVID-19. At December 31, 2020 and 2019, 79 percent and 90 percent of commercial reservable criticized utilized exposure was secured.

Table 33 Commercial Reservable Criticized Utilized Exposure [1, 2]

	December 31			
(Dollars in millions)	**2020**		2019	
Commercial and industrial:				
U.S. commercial	**$ 21,388**	**6.83 %**	$ 8,272	2.46%
Non-U.S. commercial	**5,051**	**5.03**	989	0.89
Total commercial and industrial	**26,439**	**6.40**	9,261	2.07
Commercial real estate	**10,213**	**16.42**	1,129	1.75
Commercial lease financing	**714**	**4.18**	329	1.66
	37,366	**7.59**	10,719	2.01
U.S. small business commercial	**1,300**	**3.56**	733	4.78
Total commercial reservable criticized utilized exposure [1]	**$ 38,666**	**7.31**	$ 11,452	2.09

(1) Total commercial reservable criticized utilized exposure includes loans and leases of $36.6 billion and $10.7 billion and commercial letters of credit of $2.1 billion and $715 million at December 31, 2020 and 2019.

(2) Percentages are calculated as commercial reservable criticized utilized exposure divided by total commercial reservable utilized exposure for each exposure category.

Commercial and Industrial

Commercial and industrial loans include U.S. commercial and non-U.S. commercial portfolios.

U.S. Commercial

At December 31, 2020, 65 percent of the U.S. commercial loan portfolio, excluding small business, was managed in *Global Banking,* 18 percent in *Global Markets*, 15 percent in *GWIM* (generally business-purpose loans for high net worth clients) and the remainder primarily in *Consumer Banking*. U.S. commercial loans decreased $18.3 billion during 2020 driven by *Global Banking*. Reservable criticized utilized exposure increased $13.1 billion, which was spread across several industries, including travel and entertainment, as a result of weaker economic conditions arising from COVID-19.

Non-U.S. Commercial

At December 31, 2020, 79 percent of the non-U.S. commercial loan portfolio was managed in *Global Banking* and 21 percent in *Global Markets*. Non-U.S. commercial loans decreased $14.5 billion during 2020, primarily in *Global Banking*. For information on the non-U.S. commercial portfolio, see Non-U.S. Portfolio on page 97.

Commercial Real Estate

Commercial real estate primarily includes commercial loans secured by non-owner-occupied real estate and is dependent on the sale or lease of the real estate as the primary source of repayment. Outstanding loans declined by $2.3 billion during 2020 as paydowns exceeded new originations. Reservable criticized utilized exposure increased $9.1 billion to $10.2 billion from $1.1 billion, or 16.42 and 1.75 percent of the commercial real estate portfolio at December 31, 2020 and 2019, due to downgrades driven by the impact of COVID-19 across industries, primarily hotels. Although we have observed property-level improvements in a number of the most impacted sectors, the length of time for recovery has been slower than originally anticipated, which has prompted additional downgrades. The portfolio remains diversified across property types and geographic regions. California represented the largest state concentration at 23 percent and 24 percent of the commercial real estate portfolio at December 31, 2020 and 2019. The commercial real estate portfolio is predominantly managed in *Global Banking* and consists of loans made primarily to public and private developers, and commercial real estate firms.

During 2020, we continued to see low default rates and varying degrees of improvement in the portfolio. We use a number of proactive risk mitigation initiatives to reduce adversely rated exposure in the commercial real estate portfolio, including transfers of deteriorating exposures to management by independent special asset officers and the pursuit of loan restructurings or asset sales to achieve the best results for our customers and the Corporation.

Table 34 presents outstanding commercial real estate loans by geographic region, based on the geographic location of the collateral, and by property type.

Table 34 Outstanding Commercial Real Estate Loans

	December 31	
(Dollars in millions)	**2020**	2019
By Geographic Region		
California	**$ 14,028**	$ 14,910
Northeast	**11,628**	12,408
Southwest	**8,551**	8,408

Hotels / Motels	**7,226**	6,982
Multi-family rental	**7,051**	7,250
Unsecured	**2,336**	3,438
Multi-use	**1,460**	1,788
Other	**7,146**	6,958
Total non-residential	**59,147**	61,178
Residential	**1,217**	1,511
Total outstanding commercial real estate loans	**$ 60,364**	$ 62,689

(1) Includes unsecured loans to real estate investment trusts and national home builders whose portfolios of properties span multiple geographic regions and properties in the states of Colorado, Utah, Hawaii, Wyoming and Montana.

U.S. Small Business Commercial

The U.S. small business commercial loan portfolio is comprised of small business card loans and small business loans primarily managed in *Consumer Banking,* and includes $22.7 billion of PPP loans outstanding at December 31, 2020. Excluding PPP, credit card-related products were 50 percent and 52 percent of the U.S. small business commercial portfolio at December 31, 2020 and 2019. Of the U.S. small business commercial net charge-offs, 91 percent and 94 percent were credit card-related products in 2020 and 2019.

Nonperforming Commercial Loans, Leases and Foreclosed Properties Activity

Table 35 presents the nonperforming commercial loans, leases and foreclosed properties activity during 2020 and 2019.

Nonperforming loans do not include loans accounted for under the fair value option. During 2020, nonperforming commercial loans and leases increased $728 million to $2.2 billion, primarily driven by the impact of COVID-19. At December 31, 2020, 84 percent of commercial nonperforming loans, leases and foreclosed properties were secured and 66 percent were contractually current. Commercial nonperforming loans were carried at 81 percent of their unpaid principal balance before consideration of the allowance for loan and lease losses, as the carrying value of these loans has been reduced to the estimated collateral value less costs to sell.

Table 35 Nonperforming Commercial Loans, Leases and Foreclosed Properties Activity [1, 2]

(Dollars in millions)	2020	2019
Nonperforming loans and leases, January 1	**$ 1,499**	$ 1,102
Additions	**3,518**	2,048
Reductions:		
Paydowns	**(1,002)**	(648)
Sales	**(350)**	(215)
Returns to performing status [3]	**(172)**	(120)
Charge-offs	**(1,208)**	(478)
Transfers to foreclosed properties	**(2)**	(9)
Transfers to loans held-for-sale	**(56)**	(181)
Total net additions to nonperforming loans and leases	**728**	397
Total nonperforming loans and leases, December 31	**2,227**	1,499
Foreclosed properties, December 31	**41**	56
Nonperforming commercial loans, leases and foreclosed properties, December 31	**2,268**	1,555
Nonperforming commercial loans and leases as a percentage of outstanding commercial loans and leases [4]	**0.45 %**	0.29 %
Nonperforming commercial loans, leases and foreclosed properties as a percentage of outstanding commercial loans, leases and foreclosed properties [4]	**0.46**	0.30

(1) Balances do not include nonperforming loans held-for-sale of $359 million and $239 million at December 31, 2020 and 2019.
(2) Includes U.S. small business commercial activity. Small business card loans are excluded as they are not classified as nonperforming.
(3) Commercial loans and leases may be returned to performing status when all principal and interest is current and full repayment of the remaining contractual principal and interest is expected, or when the loan otherwise becomes well-secured and is in the process of collection. TDRs are generally classified as performing after a sustained period of demonstrated payment performance.
(4) Outstanding commercial loans exclude loans accounted for under the fair value option.

Table 36 presents our commercial TDRs by product type and performing status. U.S. small business commercial TDRs are comprised of renegotiated small business card loans and small business loans. The renegotiated small business card loans are not classified as nonperforming as they are charged off no later than the end of the month in which the loan becomes 180 days past due. For more information on TDRs, see *Note 5 – Outstanding Loans and Leases and Allowance for Credit Losses* to the Consolidated Financial Statements. For more information on our loan modification programs offered in response to the pandemic, most of which are not TDRs, see Executive Summary – Recent Developments – COVID-19 Pandemic on page 48 and *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements.

Table 36 Commercial Troubled Debt Restructurings

	December 31, 2020			December 31, 2019

Total commercial troubled debt restructurings	**$ 737**	**$ 1,000**	**$ 1,737**	$ 888	$ 1,264	$ 2,152

Industry Concentrations

Table 37 presents commercial committed and utilized credit exposure by industry and the total net credit default protection purchased to cover the funded and unfunded portions of certain credit exposures. Our commercial credit exposure is diversified across a broad range of industries. Total commercial committed exposure decreased $22.1 billion, or two percent, during 2020 to $1.0 trillion. The decrease in commercial committed exposure was concentrated in the Global commercial banks, Asset managers and funds, Utilities, and Real estate industry sectors. Decreases were partially offset by increased exposure to the Finance companies and Automobiles and components industry sectors.

Industry limits are used internally to manage industry concentrations and are based on committed exposure that is determined on an industry-by-industry basis. A risk management framework is in place to set and approve industry limits as well as to provide ongoing monitoring. The MRC oversees industry limit governance.

Asset managers and funds, our largest industry concentration with committed exposure of $101.5 billion, decreased $8.5 billion, or eight percent, during 2020.

Real estate, our second largest industry concentration with committed exposure of $92.4 billion, decreased $4.0 billion, or four percent, during 2020. For more information on the commercial real estate and related portfolios, see Commercial Portfolio Credit Risk Management – Commercial Real Estate on page 94.

Capital goods, our third largest industry concentration with committed exposure of $81.0 billion, remained flat during 2020.

Given the widespread impact of the pandemic on the U.S. and global economy, a number of industries have been and will likely continue to be adversely impacted. We continue to monitor all industries, particularly higher risk industries which are experiencing or could experience a more significant impact to their financial condition. The impact of the pandemic has also placed significant stress on global demand for oil. Our energy-related committed exposure decreased $3.3 billion, or nine percent, during 2020 to $33.0 billion, driven by declines in exploration and production, refining and marketing exposure, energy equipment and services, partially offset by an increase in our integrated client exposure. For more information on COVID-19, see Executive Summary – Recent Developments – COVID-19 Pandemic on page 48.

Religious and social organizations	**4,769**	3,844	**6,759**	5,756
Total commercial credit exposure by industry	**$ 620,303**	$ 635,306	**$ 1,040,244**	$ 1,062,295
Net credit default protection purchased on total commitments [4]			**$ (4,170)**	$ (3,349)

(1) Includes U.S. small business commercial exposure.
(2) Includes the notional amount of unfunded legally binding lending commitments net of amounts distributed (i.e., syndicated or participated) to other financial institutions. The distributed amounts were $10.5 billion and $10.6 billion at December 31, 2020 and 2019.
(3) Industries are viewed from a variety of perspectives to best isolate the perceived risks. For purposes of this table, the real estate industry is defined based on the primary business activity of the borrowers or counterparties using operating cash flows and primary source of repayment as key factors.
(4) Represents net notional credit protection purchased to hedge funded and unfunded exposures for which we elected the fair value option, as well as certain other credit exposures. For more information, see Commercial Portfolio Credit Risk Management – Risk Mitigation.

Risk Mitigation

We purchase credit protection to cover the funded portion as well as the unfunded portion of certain credit exposures. To lower the cost of obtaining our desired credit protection levels, we may add credit exposure within an industry, borrower or counterparty group by selling protection.

At December 31, 2020 and 2019, net notional credit default protection purchased in our credit derivatives portfolio to hedge our funded and unfunded exposures for which we elected the fair value option, as well as certain other credit exposures, was $4.2 billion and $3.3 billion. We recorded net losses of $240 million in 2020 compared to net losses of $145 million in 2019 for these same positions. The gains and losses on these instruments were offset by gains and losses on the related exposures. The Value-at-Risk (VaR) results for these exposures are included in the fair value option portfolio information in Table 44. For more information, see Trading Risk Management on page 102.

Tables 38 and 39 present the maturity profiles and the credit exposure debt ratings of the net credit default protection portfolio at December 31, 2020 and 2019.

Table 38 Net Credit Default Protection by Maturity

	December 31	
	2020	2019
Less than or equal to one year	**65 %**	54 %
Greater than one year and less than or equal to five years	**34**	45
Greater than five years	**1**	1
Total net credit default protection	**100 %**	100 %

Table 39 Net Credit Default Protection by Credit Exposure Debt Rating

	Net Notional [1]	Percent of Total	Net Notional [1]	Percent of Total
	December 31			
(Dollars in millions)	**2020**		2019	
Ratings [2, 3]				
A	**$ (250)**	**6.0 %**	$ (697)	20.8 %
BBB	**(1,856)**	**44.5**	(1,089)	32.5
BB	**(1,363)**	**32.7**	(766)	22.9
B	**(465)**	**11.2**	(373)	11.1
CCC and below	**(182)**	**4.4**	(119)	3.6
NR [4]	**(54)**	**1.2**	(305)	9.1
Total net credit default protection	**$ (4,170)**	**100.0 %**	$ (3,349)	100.0 %

(1) Represents net credit default protection purchased.
(2) Ratings are refreshed on a quarterly basis.
(3) Ratings of BBB- or higher are considered to meet the definition of investment grade.
(4) NR is comprised of index positions held and any names that have not been rated.

In addition to our net notional credit default protection purchased to cover the funded and unfunded portion of certain credit exposures, credit derivatives are used for market-making activities for clients and establishing positions intended to profit from directional or relative value changes. We execute the majority of our credit derivative trades in the OTC market with large, multinational financial institutions, including broker-dealers and, to a lesser degree, with a variety of other investors. Because these transactions are executed in the OTC market, we are subject to settlement risk. We are also subject to credit risk in the event that these counterparties fail to perform under the terms of these contracts. In order to properly reflect counterparty credit risk, we record counterparty credit risk valuation adjustments on certain derivative assets, including our purchased credit default protection. In most cases, credit derivative transactions are executed on a daily margin basis. Therefore, events such as a credit downgrade, depending on the ultimate rating level, or a breach of credit covenants would typically require an increase in the amount of collateral required by the counterparty, where applicable, and/or allow us to take additional protective measures such as early termination of all trades. For more information on credit derivatives and counterparty credit risk valuation adjustments, see *Note 3 – Derivatives* to the Consolidated Financial Statements.

Non-U.S. Portfolio

Our non-U.S. credit and trading portfolios are subject to country risk. We define country risk as the risk of loss from unfavorable economic and political conditions, currency fluctuations, social instability and changes in government policies. A risk management framework is in place to measure, monitor and manage non-U.S. risk and exposures. In addition to the direct risk of doing business in a country, we also are exposed to indirect country risks (e.g., related to the collateral received on secured financing transactions or related to client clearing activities). These indirect exposures are managed in the normal course of business through credit, market and operational risk governance, rather than through country risk governance.

Table 40 presents our 20 largest non-U.S. country exposures at December 31, 2020. These exposures accounted for 90 percent and 88 percent of our total non-U.S. exposure at December 31, 2020 and 2019. Net country exposure for these 20 countries increased $21.2 billion in 2020. The majority of the increase was due to higher deposits with central banks in Germany and Japan.

Non-U.S. exposure is presented on an internal risk management basis and includes sovereign and non-sovereign credit exposure, securities and other investments issued by or domiciled in countries other than the U.S.

Funded loans and loan equivalents include loans, leases, and other extensions of credit and funds, including letters of credit and due from placements. Unfunded commitments are the undrawn portion of legally binding commitments related to loans and loan equivalents. Net counterparty exposure includes the fair value of derivatives, including the counterparty risk associated with credit default swaps (CDS), and secured financing transactions. Securities and other investments are carried at fair value and long securities exposures are netted against short exposures with the same underlying issuer to, but not below, zero. Net country exposure represents country exposure less hedges and credit default protection purchased, net of credit default protection sold.

Table 40 Top 20 Non-U.S. Countries Exposure

(Dollars in millions)	Funded Loans and Loan Equivalents	Unfunded Loan Commitments	Net Counterparty Exposure	Securities/ Other Investments	Country Exposure at December 31 2020	Hedges and Credit Default Protection	**Net Country Exposure at December 31 2020**	Increase (Decrease) from December 31 2019

Mexico	3,712	1,379	205	1,112	6,408	(121)	**6,287**	(1,524)
Italy	2,456	1,784	553	1,568	6,361	(669)	**5,692**	315
Belgium	2,471	1,334	505	797	5,107	(140)	**4,967**	(1,540)
Spain	2,835	1,156	262	914	5,167	(351)	**4,816**	94
Ireland	2,785	1,050	100	253	4,188	(23)	**4,165**	798
United Arab Emirates	2,218	136	266	77	2,697	(10)	**2,687**	(900)
Total top 20 non-U.S. countries exposure	$ 157,132	$ 67,670	$ 19,665	$ 42,117	$ 286,584	$ (8,614)	**$ 277,970**	$ 21,241

Our largest non-U.S. country exposure at December 31, 2020 was the U.K. with net exposure of $59.5 billion, which represents a $3.6 billion increase from December 31, 2019. Our second largest non-U.S. country exposure was Germany with net exposure of $44.9 billion at December 31, 2020, a $14.1 billion increase from December 31, 2019. The increase in Germany was primarily driven by an increase in deposits with the central bank.

In light of the global pandemic, we are monitoring our non-U.S. exposure closely, particularly in countries where restrictions on certain activities, in an attempt to contain the spread and impact of the virus, have affected and will likely continue to adversely affect economic activity. We are managing the impact to our international business operations as part of our overall response framework and are taking actions to manage exposure carefully in impacted regions while supporting the needs of our clients. The magnitude and duration of the pandemic and its full impact on the global economy continue to be highly uncertain.

The impact of COVID-19 could have an adverse impact on the global economy for a prolonged period of time. For more information on how the pandemic may affect our operations, see Executive Summary – Recent Developments – COVID-19 Pandemic on page 48 and Item 1A. Risk Factors of our 2020 Annual Report on Form 10-K.

Table 41 presents countries that had total cross-border exposure, including the notional amount of cash loaned under secured financing agreements, exceeding one percent of our total assets at December 31, 2020. Local exposure, defined as exposure booked in local offices of a respective country with clients in the same country, is excluded. At December 31, 2020, the U.K. and France were the only countries where their respective total cross-border exposures exceeded one percent of our total assets. No other countries had total cross-border exposure that exceeded 0.75 percent of our total assets at December 31, 2020.

Table 41 Total Cross-border Exposure Exceeding One Percent of Total Assets

(Dollars in millions)	December 31	Public Sector	Banks	Private Sector	Cross-border Exposure	Exposure as a Percent of Total Assets
United Kingdom	**2020**	**$ 4,733**	**$ 2,269**	**$ 95,180**	**$ 102,182**	**3.62 %**
	2019	1,859	3,580	93,232	98,671	4.05
	2018	1,505	3,458	46,191	51,154	2.17
France	**2020**	**3,073**	**1,726**	**26,399**	**31,198**	**1.11**
	2019	736	2,473	23,172	26,381	1.08
	2018	633	2,385	29,847	32,865	1.40

Allowance for Credit Losses

On January 1, 2020, the Corporation adopted the new accounting standard that requires the measurement of the allowance for credit losses to be based on management's best estimate of lifetime ECL inherent in the Corporation's relevant financial assets. Upon adoption of the new accounting standard, the Corporation recorded a net increase of $3.3 billion in the allowance for credit losses which was comprised of a net increase of $2.9 billion in the allowance for loan and lease losses and an increase of $310 million in the reserve for unfunded lending commitments. The net increase was primarily driven by a $3.1 billion increase related to the credit card portfolio.

The allowance for credit losses further increased by $7.2 billion from January 1, 2020 to $20.7 billion at December 31, 2020, which included a $5.0 billion reserve increase related to the commercial portfolio and a $2.2 billion reserve increase related to the consumer portfolio. The increases were driven by deterioration in the economic outlook resulting from the impact of COVID-19.

The following table presents an allocation of the allowance for credit losses by product type for December 31, 2020, January 1, 2020 and December 31, 2019 (prior to the adoption of the CECL accounting standard).

Table 42 Allocation of the Allowance for Credit Losses by Product Type

(Dollars in millions)	Amount	Percent of Total	Percent of Loans and Leases Outstanding (1)	Amount	Percent of Total	Percent of Loans and Leases Outstanding (1)	Amount	Percent of Total	Percent of Loans and Leases Outstanding (1)
	December 31, 2020			January 1, 2020			December 31, 2019		
Allowance for loan and lease losses									
Residential mortgage	$ 459	2.44 %	0.21 %	$ 212	1.72 %	0.09 %	$ 325	3.45 %	0.14 %
Home equity	399	2.12	1.16	228	1.84	0.57	221	2.35	0.55
Credit card	8,420	44.79	10.70	6,809	55.10	6.98	3,710	39.39	3.80
Direct/Indirect consumer	752	4.00	0.82	566	4.58	0.62	234	2.49	0.26
Other consumer	41	0.22	n/m	55	0.45	n/m	52	0.55	n/m
Total consumer	10,071	53.57	2.35	7,870	63.69	1.69	4,542	48.23	0.98
U.S. commercial (2)	5,043	26.82	1.55	2,723	22.03	0.84	3,015	32.02	0.94
Non-U.S. commercial	1,241	6.60	1.37	668	5.41	0.64	658	6.99	0.63
Commercial real estate	2,285	12.15	3.79	1,036	8.38	1.65	1,042	11.07	1.66
Commercial lease financing	162	0.86	0.95	61	0.49	0.31	159	1.69	0.80
Total commercial	8,731	46.43	1.77	4,488	36.31	0.88	4,874	51.77	0.96
Allowance for loan and lease losses	18,802	100.00 %	2.04	12,358	100.00 %	1.27	9,416	100.00 %	0.97
Reserve for unfunded lending commitments	1,878			1,123			813		
Allowance for credit losses	$ 20,680			$ 13,481			$ 10,229		

(1) Ratios are calculated as allowance for loan and lease losses as a percentage of loans and leases outstanding excluding loans accounted for under the fair value option. Consumer loans accounted for under the fair value option include residential mortgage loans of $298 million at December 31, 2020 and $257 million at January 1, 2020 and December 31, 2019 and home equity loans of $437 million at December 31, 2020 and $337 million at January 1, 2020 and December 31, 2019. Commercial loans accounted for under the fair value option include U.S. commercial loans of $2.9 billion, $5.1 billion and $4.7 billion at December 31, 2020, January 1, 2020 and December 31, 2019, and non-U.S. commercial loans of $3.0 billion, $3.2 billion and $3.1 billion at December 31, 2020, January 1, 2020 and December 31, 2019.

(2) Includes allowance for loan and lease losses for U.S. small business commercial loans of $1.5 billion, $831 million and $523 million at December 31, 2020, January 1, 2020 and December 31, 2019.

n/m = not meaningful

Net charge-offs for 2020 were $4.1 billion compared to $3.6 billion in 2019 driven by increases in commercial losses. The provision for credit losses increased $7.7 billion to $11.3 billion during 2020 compared to 2019. The allowance for credit losses included a reserve build of $7.2 billion for 2020, excluding the impact of the new accounting standard, primarily due to the deterioration in the economic outlook resulting from the impact of COVID-19 on both the consumer and commercial portfolios. The provision for credit losses for the consumer portfolio, including unfunded lending commitments, increased $2.0 billion to $4.9 billion during 2020 compared to 2019. The provision for credit losses for the commercial portfolio, including unfunded lending commitments, increased $5.7 billion to $6.5 billion during 2020 compared to 2019.

The following table presents a rollforward of the allowance for credit losses, including certain loan and allowance ratios for 2020, noting that measurement of the allowance for credit losses for 2019 was based on management's estimate of probable incurred losses. For more information on the Corporation's credit loss accounting policies and activity related to the allowance for credit losses, see *Note 1 – Summary of Significant Accounting Principles* and *Note 5 – Outstanding Loans and Leases and Allowance for Credit Losses* to the Consolidated Financial Statements.

Table 43 Allowance for Credit Losses

(Dollars in millions)	2020	2019
Allowance for loan and lease losses, January 1	$ 12,358	$ 9,601
Loans and leases charged off		
Residential mortgage	(40)	(93)
Home equity	(58)	(429)
Credit card	(2,967)	(3,535)
Direct/Indirect consumer	(372)	(518)
Other consumer	(307)	(249)
Total consumer charge-offs	(3,744)	(4,824)
U.S. commercial (1)	(1,163)	(650)
Non-U.S. commercial	(168)	(115)
Commercial real estate	(275)	(31)
Commercial lease financing	(69)	(26)
Total commercial charge-offs	(1,675)	(822)
Total loans and leases charged off	(5,419)	(5,646)
Recoveries of loans and leases previously charged off		
Residential mortgage	70	140
Home equity	131	787
Credit card	618	587
Direct/Indirect consumer	250	309
Other consumer	23	15
Total consumer recoveries	1,092	1,838
U.S. commercial (2)	178	122
Non-U.S. commercial	13	31
Commercial real estate	5	2
Commercial lease financing	10	5
Total commercial recoveries	206	160
Total recoveries of loans and leases previously charged off	1,298	1,998
Net charge-offs	(4,121)	(3,648)
Provision for loan and lease losses	10,565	3,574
Other	—	(111)
Allowance for loan and lease losses, December 31	18,802	9,416
Reserve for unfunded lending commitments, January 1	1,123	797
Provision for unfunded lending commitments	755	16
Reserve for unfunded lending commitments, December 31	1,878	813
Allowance for credit losses, December 31	$ 20,680	$ 10,229
Loan and allowance ratios:		
Loans and leases outstanding at December 31 (3)	$ 921,180	$ 975,091
Allowance for loan and lease losses as a percentage of total loans and leases outstanding at December 31 (3)	2.04 %	0.97 %
Consumer allowance for loan and lease losses as a percentage of total consumer loans and leases outstanding at December 31 (4)	2.35	0.98
Commercial allowance for loan and lease losses as a percentage of total commercial loans and leases outstanding at December 31 (5)	1.77	0.96
Average loans and leases outstanding (3)	$ 974,281	$ 951,583
Annualized net charge-offs as a percentage of average loans and leases outstanding (3)	0.42 %	0.38 %
Allowance for loan and lease losses as a percentage of total nonperforming loans and leases at December 31	380	265
Ratio of the allowance for loan and lease losses at December 31 to net charge-offs	4.56	2.58
Amounts included in allowance for loan and lease losses for loans and leases that are excluded from nonperforming loans and leases at December 31 (6)	$ 9,854	$ 4,151
Allowance for loan and lease losses as a percentage of total nonperforming loans and leases, excluding the allowance for loan and lease losses for loans and leases that are excluded from nonperforming loans and leases at December 31 (6)	181 %	148 %

(1) Includes U.S. small business commercial charge-offs of $321 million in 2020 compared to $320 million in 2019.
(2) Includes U.S. small business commercial recoveries of $54 million in 2020 compared to $48 million in 2019.
(3) Outstanding loan and lease balances and ratios do not include loans accounted for under the fair value option of $6.7 billion and $8.3 billion at December 31, 2020 and 2019. Average loans accounted for under the fair value option were $8.2 billion in 2020 compared to $6.8 billion in 2019.
(4) Excludes consumer loans accounted for under the fair value option of $735 million and $594 million at December 31, 2020 and 2019.
(5) Excludes commercial loans accounted for under the fair value option of $5.9 billion and $7.7 billion at December 31, 2020 and 2019.
(6) Primarily includes amounts related to credit card and unsecured consumer lending portfolios in *Consumer Banking*.

Market Risk Management

Market risk is the risk that changes in market conditions may adversely impact the value of assets or liabilities, or otherwise negatively impact earnings. This risk is inherent in the financial instruments associated with our operations, primarily within our *Global Markets* segment. We are also exposed to these risks in other areas of the Corporation (e.g., our ALM activities). In the event of market stress, these risks could have a material impact on our results. For more information, see Interest Rate Risk Management for the Banking Book on page 105.

We have been affected, and expect to continue to be affected, by market stress resulting from the pandemic that began in the first quarter of 2020. For more information on the effects of the pandemic, see Executive Summary – Recent Developments – COVID-19 Pandemic on page 48.

Our traditional banking loan and deposit products are non-trading positions and are generally reported at amortized cost for assets or the amount owed for liabilities (historical cost). However, these positions are still subject to changes in economic value based on varying market conditions, with one of the primary risks being changes in the levels of interest rates. The risk of adverse changes in the economic value of our non-trading positions arising from changes in interest rates is managed through our ALM activities. We have elected to account for certain assets and liabilities under the fair value option.

Our trading positions are reported at fair value with changes reflected in income. Trading positions are subject to various changes in market-based risk factors. The majority of this risk is generated by our activities in the interest rate, foreign exchange, credit, equity and commodities markets. In addition, the values of assets and liabilities could change due to market liquidity, correlations across markets and expectations of market volatility. We seek to manage these risk exposures by using a variety of techniques that encompass a broad range of financial instruments. The key risk management techniques are discussed in more detail in the Trading Risk Management section.

Global Risk Management is responsible for providing senior management with a clear and comprehensive understanding of the trading risks to which we are exposed. These responsibilities include ownership of market risk policy, developing and maintaining quantitative risk models, calculating aggregated risk measures, establishing and monitoring position limits consistent with risk appetite, conducting daily reviews and analysis of trading inventory, approving material risk exposures and fulfilling regulatory requirements. Market risks that impact businesses outside of *Global Markets* are monitored and governed by their respective governance functions.

Model risk is the potential for adverse consequences from decisions based on incorrect or misused model outputs and reports. Given that models are used across the Corporation, model risk impacts all risk types including credit, market and operational risks. The Enterprise Model Risk Policy defines model risk standards, consistent with our risk framework and risk appetite, prevailing regulatory guidance and industry best practice. All models, including risk management, valuation and regulatory capital models, must meet certain validation criteria, including effective challenge of the conceptual soundness of the model, independent model testing and ongoing monitoring through outcomes analysis and benchmarking. The Enterprise Model Risk Committee (EMRC), a subcommittee of the MRC, oversees that model standards are consistent with model risk requirements and monitors the effective challenge in the model validation process across the Corporation.

Interest Rate Risk

Interest rate risk represents exposures to instruments whose values vary with the level or volatility of interest rates. These instruments include, but are not limited to, loans, debt securities, certain trading-related assets and liabilities, deposits, borrowings and derivatives. Hedging instruments used to mitigate these risks include derivatives such as options, futures, forwards and swaps.

Foreign Exchange Risk

Foreign exchange risk represents exposures to changes in the values of current holdings and future cash flows denominated in currencies other than the U.S. dollar. The types of instruments exposed to this risk include investments in non-U.S. subsidiaries, foreign currency-denominated loans and securities, future cash flows in foreign currencies arising from foreign exchange transactions, foreign currency-denominated debt and various foreign exchange derivatives whose values fluctuate with changes in the level or volatility of currency exchange rates or non-U.S. interest rates. Hedging instruments used to mitigate this risk include foreign exchange options, currency swaps, futures, forwards, and foreign currency-denominated debt and deposits.

Mortgage Risk

Mortgage risk represents exposures to changes in the values of mortgage-related instruments. The values of these instruments are sensitive to prepayment rates, mortgage rates, agency debt ratings, default, market liquidity, government participation and interest rate volatility. Our exposure to these instruments takes several forms. For example, we trade and engage in market-making activities in a variety of mortgage securities including whole loans, pass-through certificates, commercial mortgages and collateralized mortgage obligations including collateralized debt obligations using mortgages as underlying collateral. In addition, we originate a variety of MBS, which involves the accumulation of mortgage-related loans in anticipation of eventual securitization, and we may hold positions in mortgage securities and residential mortgage loans as part of the ALM portfolio. We also record MSRs as part of our mortgage origination activities. Hedging instruments used to mitigate this risk include derivatives such as options, swaps, futures and forwards as well as securities including MBS and U.S. Treasury securities. For more information, see Mortgage Banking Risk Management on page 107.

Equity Market Risk

Equity market risk represents exposures to securities that represent an ownership interest in a corporation in the form of domestic and foreign common stock or other equity-linked instruments. Instruments that would lead to this exposure include, but are not limited to, the following: common stock, exchange-traded funds, American Depositary Receipts, convertible bonds, listed equity options (puts and calls), OTC equity options, equity total return swaps, equity index futures and other equity derivative products. Hedging instruments used to mitigate this risk include options, futures, swaps, convertible bonds and cash positions.

Commodity Risk

Commodity risk represents exposures to instruments traded in the petroleum, natural gas, power and metals markets. These instruments consist primarily of futures, forwards, swaps and options. Hedging instruments used to mitigate this risk include options, futures and swaps in the same or similar commodity product, as well as cash positions.

Issuer Credit Risk

Issuer credit risk represents exposures to changes in the creditworthiness of individual issuers or groups of issuers. Our portfolio is exposed to issuer credit risk where the value of an asset may be adversely impacted by changes in the levels of credit spreads, by credit migration or by defaults. Hedging instruments used to mitigate this risk include bonds, CDS and other credit fixed-income instruments.

Market Liquidity Risk

Market liquidity risk represents the risk that the level of expected market activity changes dramatically and, in certain cases, may even cease. This exposes us to the risk that we will not be able to transact business and execute trades in an orderly manner which may impact our results. This impact could be further exacerbated if expected hedging or pricing correlations are compromised by disproportionate demand or lack of demand for certain instruments. We utilize various risk mitigating techniques as discussed in more detail in Trading Risk Management.

Trading Risk Management

To evaluate risks in our trading activities, we focus on the actual and potential volatility of revenues generated by individual positions as well as portfolios of positions. Various techniques and procedures are utilized to enable the most complete understanding of these risks. Quantitative measures of market risk are evaluated on a daily basis from a single position to the portfolio of the Corporation. These measures include sensitivities of positions to various market risk factors, such as the potential impact on revenue from a one basis point change in interest rates, and statistical measures utilizing both actual and hypothetical market moves, such as VaR and stress testing. Periods of extreme market stress influence the reliability of these techniques to varying degrees. Qualitative evaluations of market risk utilize the suite of quantitative risk measures while understanding each of their respective limitations. Additionally, risk managers independently evaluate the risk of the portfolios under the current market environment and potential future environments.

VaR is a common statistic used to measure market risk as it allows the aggregation of market risk factors, including the effects of portfolio diversification. A VaR model simulates the value of a portfolio under a range of scenarios in order to generate a distribution of potential gains and losses. VaR represents the loss a portfolio is not expected to exceed more than a certain number of times per period, based on a specified holding period, confidence level and window of historical data. We use one VaR model consistently across the trading portfolios and it uses a historical simulation approach based on a three-year window of historical data. Our primary VaR statistic is equivalent to a 99 percent confidence level, which means that for a VaR with a one-day holding period, there should not be losses in excess of VaR, on average, 99 out of 100 trading days.

Within any VaR model, there are significant and numerous assumptions that will differ from company to company. The accuracy of a VaR model depends on the availability and quality of historical data for each of the risk factors in the portfolio. A VaR model may require additional modeling assumptions for new products that do not have the necessary historical market data or for less liquid positions for which accurate daily prices are not consistently available. For positions with insufficient historical data for the VaR calculation, the process for establishing an appropriate proxy is based on fundamental and statistical analysis of the new product or less liquid position. This analysis identifies reasonable alternatives that replicate both the expected volatility and correlation to other market risk factors that the missing data would be expected to experience.

VaR may not be indicative of realized revenue volatility as changes in market conditions or in the composition of the portfolio can have a material impact on the results. In particular, the historical data used for the VaR calculation might indicate higher or lower levels of portfolio diversification than will be experienced. In order for the VaR model to reflect current market conditions, we update the historical data underlying our VaR model on a weekly basis, or more frequently during periods of market stress, and regularly review the assumptions underlying the model. A minor portion of risks related to our trading positions is not included in VaR. These risks are reviewed as part of our ICAAP. For more information regarding ICAAP, see Capital Management on page 73.

Global Risk Management continually reviews, evaluates and enhances our VaR model so that it reflects the material risks in our trading portfolio. Changes to the VaR model are reviewed and approved prior to implementation and any material changes are reported to management through the appropriate management committees.

Trading limits on quantitative risk measures, including VaR, are independently set by Global Markets Risk Management and reviewed on a regular basis so that trading limits remain relevant and within our overall risk appetite for market risks. Trading limits are reviewed in the context of market liquidity, volatility and strategic business priorities. Trading limits are set at both a granular level to allow for extensive coverage of risks as well as at aggregated portfolios to account for correlations among risk factors. All trading limits are approved at least annually. Approved trading limits are stored and tracked in a centralized limits management system. Trading limit excesses are communicated to management for review. Certain quantitative market risk measures and corresponding limits have been identified as critical in the Corporation's Risk Appetite Statement. These risk appetite limits are reported on a daily basis and are approved at least annually by the ERC and the Board.

In periods of market stress, *Global Markets* senior leadership communicates daily to discuss losses, key risk positions and any limit excesses. As a result of this process, the businesses may selectively reduce risk.

Table 44 presents the total market-based portfolio VaR which is the combination of the total covered positions (and less liquid trading positions) portfolio and the fair value option portfolio. Covered positions are defined by regulatory standards as trading assets and liabilities, both on- and off-balance sheet, that meet a defined set of specifications. These specifications identify the most liquid trading positions which are intended to be held for a short-term horizon and where we are able to hedge the material risk elements in a two-way market. Positions in less liquid markets, or where there are restrictions on the ability to trade the positions, typically do not qualify as covered positions. Foreign exchange and commodity positions are always considered covered positions, except for structural foreign currency positions that are excluded with prior regulatory approval. In addition, Table 44 presents our fair value option portfolio, which includes substantially all of the funded and unfunded exposures for which we elect the fair value option, and their corresponding hedges. Additionally, market risk VaR for trading activities as presented in Table 44 differs from VaR used for regulatory capital calculations due to the holding period being used. The holding period for VaR used for regulatory capital calculations is 10 days, while for the market risk VaR presented below, it is one day. Both measures utilize the same process and methodology.

The total market-based portfolio VaR results in Table 44 include market risk to which we are exposed from all business segments, excluding credit valuation adjustment (CVA), DVA and related hedges. The majority of this portfolio is within the *Global Markets* segment.

Table 44 presents year-end, average, high and low daily trading VaR for 2020 and 2019 using a 99 percent confidence level. The amounts disclosed in Table 44 and Table 45 align to the view of covered positions used in the Basel 3 capital calculations. Foreign exchange and commodity positions are always considered covered positions, regardless of trading or banking treatment for the trade, except for structural foreign currency positions that are excluded with prior regulatory approval.

The annual average of total covered positions and less liquid trading positions portfolio VaR increased for 2020 compared to 2019 primarily due to the impact of market volatility related to the pandemic in the VaR look back period.

Table 44 Market Risk VaR for Trading Activities

	2020				2019			
(Dollars in millions)	Year End	Average	High [1]	Low [1]	Year End	Average	High [1]	Low [1]

Portfolio diversification	(4)	(15)	—	—	(5)	(7)	—	—
Total market-based portfolio	$ 163	$ 106	171	32	$ 45	$ 38	56	28

[1] The high and low for each portfolio may have occurred on different trading days than the high and low for the components. Therefore the impact from less liquid exposures and the amount of portfolio diversification, which is the difference between the total portfolio and the sum of the individual components, is not relevant.

The graph below presents the daily covered positions and less liquid trading positions portfolio VaR for 2020, corresponding to the data in Table 44. Peak VaR in mid-March 2020 was driven by increased market realized volatility and higher implied volatilities.

Additional VaR statistics produced within our single VaR model are provided in Table 45 at the same level of detail as in Table 44. Evaluating VaR with additional statistics allows for an increased understanding of the risks in the portfolio as the historical market data used in the VaR calculation does not necessarily follow a predefined statistical distribution. Table 45 presents average trading VaR statistics at 99 percent and 95 percent confidence levels for 2020 and 2019. The increase in VaR for the 99 percent confidence level for 2020 was primarily due to COVID-19 related market volatility, which impacted the 99 percent VaR average more severely than the 95 percent VaR average.

Table 45 Average Market Risk VaR for Trading Activities – 99 percent and 95 percent VaR Statistics

	2020		2019	
(Dollars in millions)	99 percent	95 percent	99 percent	95 percent
Foreign exchange	**$ 7**	**$ 4**	$ 6	$ 3
Interest rate	**19**	**9**	24	15
Credit	**58**	**18**	23	15
Equity	**24**	**13**	22	11
Commodities	**6**	**3**	6	3
Portfolio diversification	**(61)**	**(26)**	(49)	(29)
Total covered positions portfolio	**53**	**21**	32	18
Impact from less liquid exposures	**27**	**2**	3	2
Total covered positions and less liquid trading positions portfolio	**80**	**23**	35	20
Fair value option loans	**52**	**13**	10	5
Fair value option hedges	**13**	**7**	10	6
Fair value option portfolio diversification	**(24)**	**(8)**	(10)	(5)
Total fair value option portfolio	**41**	**12**	10	6
Portfolio diversification	**(15)**	**(6)**	(7)	(5)
Total market-based portfolio	**$ 106**	**$ 29**	$ 38	$ 21

Backtesting

The accuracy of the VaR methodology is evaluated by backtesting, which compares the daily VaR results, utilizing a one-day holding period, against a comparable subset of trading revenue. A backtesting excess occurs when a trading loss exceeds the VaR for the corresponding day. These excesses are evaluated to understand the positions and market moves that produced the trading loss with a goal to ensure that the VaR methodology accurately represents those losses. We expect the frequency of trading losses in excess of VaR to be in line with the confidence level of the VaR statistic being tested. For example, with a 99 percent confidence level, we expect one trading loss in excess of VaR every 100 days or between two to three trading losses in excess of VaR over the course of a year. The number of backtesting excesses observed can differ from the statistically expected number of excesses if the current level of market volatility is materially different than the level of market volatility that existed during the three years of historical data used in the VaR calculation.

The trading revenue used for backtesting is defined by regulatory agencies in order to most closely align with the VaR component of the regulatory capital calculation. This revenue differs from total trading-related revenue in that it excludes revenue from trading activities that either do not generate market risk or the market risk cannot be included in VaR. Some examples of the types of revenue excluded for backtesting are fees, commissions, reserves, net interest income and intra-day trading revenues.

We conduct daily backtesting on the VaR results used for regulatory capital calculations as well as the VaR results for key legal entities, regions and risk factors. These results are reported to senior market risk management. Senior management regularly reviews and evaluates the results of these tests.

During 2020, there were seven days where this subset of trading revenue had losses that exceeded our total covered portfolio VaR, utilizing a one-day holding period.

Total Trading-related Revenue

Total trading-related revenue, excluding brokerage fees, and CVA, DVA and funding valuation adjustment gains (losses), represents the total amount earned from trading positions, including market-based net interest income, which are taken in a diverse range of financial instruments and markets. For more information on fair value, see *Note 20 – Fair Value Measurements* to the Consolidated Financial Statements.

Trading-related revenue can be volatile and is largely driven by general market conditions and customer demand. Also, trading-related revenue is dependent on the volume and type of transactions, the level of risk assumed, and the volatility of price and rate movements at any given time within the ever-changing market environment. Significant daily revenue by business is monitored and the primary drivers of these are reviewed.

The following histogram is a graphic depiction of trading volatility and illustrates the daily level of trading-related revenue for 2020 and 2019. During 2020, positive trading-related revenue was recorded for 98 percent of the trading days, of which 87 percent were daily trading gains of over $25 million, and the largest loss was $90 million. This compares to 2019 where positive trading-related revenue was recorded for 98 percent of the trading days, of which 80 percent were daily trading gains of over $25 million, and the largest loss was $35 million.

Trading Portfolio Stress Testing

Because the very nature of a VaR model suggests results can exceed our estimates and it is dependent on a limited historical window, we also stress test our portfolio using scenario analysis. This analysis estimates the change in the value of our trading portfolio that may result from abnormal market movements.

A set of scenarios, categorized as either historical or hypothetical, are computed daily for the overall trading portfolio and individual businesses. These scenarios include shocks to underlying market risk factors that may be well beyond the shocks found in the historical data used to calculate VaR. Historical scenarios simulate the impact of the market moves that occurred during a period of extended historical market stress. Generally, a multi-week period representing the most severe point during a crisis is selected for each historical scenario. Hypothetical scenarios provide estimated portfolio impacts from potential future market stress events. Scenarios are reviewed and updated in response to changing positions and new economic or political information. In addition, new or ad hoc scenarios are developed to address specific potential market events or particular vulnerabilities in the portfolio. The stress tests are reviewed on a regular basis and the results are presented to senior management.

Stress testing for the trading portfolio is integrated with enterprise-wide stress testing and incorporated into the limits framework. The macroeconomic scenarios used for enterprise-wide stress testing purposes differ from the typical trading portfolio scenarios in that they have a longer time horizon and the results are forecasted over multiple periods for use in consolidated capital and liquidity planning. For more information, see Managing Risk on page 70.

Interest Rate Risk Management for the Banking Book

The following discussion presents net interest income for banking book activities.

Interest rate risk represents the most significant market risk exposure to our banking book balance sheet. Interest rate risk is measured as the potential change in net interest income caused by movements in market interest rates. Client-facing activities, primarily lending and deposit-taking, create interest rate sensitive positions on our balance sheet.

We prepare forward-looking forecasts of net interest income. The baseline forecast takes into consideration expected future business growth, ALM positioning -and the direction of interest rate movements as implied by the market-based forward curve.

We then measure and evaluate the impact that alternative interest rate scenarios have on the baseline forecast in order to assess interest rate sensitivity under varied conditions. The net interest income forecast is frequently updated for changing assumptions and differing outlooks based on economic trends, market conditions and business strategies. Thus, we continually monitor our balance sheet position in order to maintain an acceptable level of exposure to interest rate changes.

The interest rate scenarios that we analyze incorporate balance sheet assumptions such as loan and deposit growth and pricing, changes in funding mix, product repricing, maturity characteristics and investment securities premium amortization. Our overall goal is to manage interest rate risk so that movements in interest rates do not significantly adversely affect earnings and capital.

Table 46 presents the spot and 12-month forward rates used in our baseline forecasts at December 31, 2020 and 2019.

Table 46 Forward Rates

	December 31, 2020		
	Federal Funds	Three-month LIBOR	10-Year Swap
Spot rates	**0.25 %**	**0.24 %**	**0.93 %**
12-month forward rates	**0.25**	**0.19**	**1.06**
	December 31, 2019		
Spot rates	1.75 %	1.91 %	1.90 %
12-month forward rates	1.50	1.62	1.92

Table 47 shows the pretax impact to forecasted net interest income over the next 12 months from December 31, 2020 and 2019 resulting from instantaneous parallel and non-parallel shocks to the market-based forward curve. Periodically we evaluate the scenarios presented so that they are meaningful in the context of the current rate environment. The interest rate scenarios also assume U.S. dollar rates are floored at zero.

During 2020, the asset sensitivity of our balance sheet increased in both up-rate and down-rate scenarios primarily due to continued deposit growth invested in long-term securities. We continue to be asset sensitive to a parallel upward move in interest rates with the majority of that impact coming from the short end of the yield curve. Additionally, higher interest rates impact the fair value of debt securities and, accordingly, for debt securities classified as AFS, may adversely affect accumulated OCI and thus capital levels under the Basel 3 capital rules. Under instantaneous upward parallel shifts, the near-term adverse impact to Basel 3 capital is reduced over time by offsetting positive impacts to net interest income. For more information on Basel 3, see Capital Management – Regulatory Capital on page 74.

Table 47 Estimated Banking Book Net Interest Income Sensitivity to Curve Changes

(Dollars in millions)	Short Rate (bps)	Long Rate (bps)	December 31 2020	2019
Parallel Shifts				
+100 bps instantaneous shift	+100	+100	$ **10,468**	$ 4,190
-25 bps instantaneous shift	-25	-25	**(2,766)**	(1,500)
Flatteners				
Short-end instantaneous change	+100	—	**6,321**	2,641
Long-end instantaneous change	—	-25	**(1,686)**	(653)
Steepeners				
Short-end instantaneous change	-25	—	**(1,084)**	(844)
Long-end instantaneous change	—	+100	**4,333**	1,561

The sensitivity analysis in Table 47 assumes that we take no action in response to these rate shocks and does not assume any change in other macroeconomic variables normally correlated with changes in interest rates. As part of our ALM activities, we use securities, certain residential mortgages, and interest rate and foreign exchange derivatives in managing interest rate sensitivity.

The behavior of our deposits portfolio in the baseline forecast and in alternate interest rate scenarios is a key assumption in our projected estimates of net interest income. The sensitivity analysis in Table 47 assumes no change in deposit portfolio size or mix from the baseline forecast in alternate rate environments. In higher rate scenarios, any customer activity resulting in the replacement of low-cost or non-interest-bearing deposits with higher yielding deposits or market-based funding would reduce our benefit in those scenarios.

Interest Rate and Foreign Exchange Derivative Contracts

Interest rate and foreign exchange derivative contracts are utilized in our ALM activities and serve as an efficient tool to manage our interest rate and foreign exchange risk. We use derivatives to hedge the variability in cash flows or changes in fair value on our balance sheet due to interest rate and foreign exchange components. For more information on our hedging activities, see *Note 3 – Derivatives* to the Consolidated Financial Statements.

Our interest rate contracts are generally non-leveraged generic interest rate and foreign exchange basis swaps, options, futures and forwards. In addition, we use foreign exchange contracts, including cross-currency interest rate swaps, foreign currency futures contracts, foreign currency forward contracts and options to mitigate the foreign exchange risk associated with foreign currency-denominated assets and liabilities.

Changes to the composition of our derivatives portfolio during 2020 reflect actions taken for interest rate and foreign exchange rate risk management. The decisions to reposition our derivatives portfolio are based on the current assessment of economic and financial conditions including the interest rate and foreign currency environments, balance sheet composition and trends, and the relative mix of our cash and derivative positions.

We use interest rate derivative instruments to hedge the variability in the cash flows of our assets and liabilities and other forecasted transactions (collectively referred to as cash flow hedges). The net results on both open and terminated cash flow hedge derivative instruments recorded in accumulated OCI were a gain of $580 million and a loss of $496 million, on a pretax basis, at December 31, 2020 and 2019. These gains and losses are expected to be reclassified into earnings in the same period as the hedged cash flows affect earnings and will decrease income or increase expense on the respective hedged cash flows. Assuming no change in open cash flow derivative hedge positions and no changes in prices or interest rates beyond what is implied in forward yield curves at December 31, 2020, the after-tax net gains are expected to be reclassified into earnings as follows: a gain of $187 million within the next year, a gain of $358 million in years two through five, a loss of $59 million in years six through ten, with the remaining loss of $50 million thereafter. For more information on derivatives designated as cash flow hedges, see *Note 3 – Derivatives* to the Consolidated Financial Statements.

We hedge our net investment in non-U.S. operations determined to have functional currencies other than the U.S. dollar using forward foreign exchange contracts that typically settle in less than 180 days, cross-currency basis swaps and foreign exchange options. We recorded net after-tax losses on derivatives in accumulated OCI associated with net investment hedges which were offset by gains on our net investments in consolidated non-U.S. entities at December 31, 2020.

Table 48 presents derivatives utilized in our ALM activities and shows the notional amount, fair value, weighted-average receive-fixed and pay-fixed rates, expected maturity and average estimated durations of our open ALM derivatives at December 31, 2020 and 2019. These amounts do not include derivative hedges on our MSRs. During 2020, the fair value of receive-fixed interest rate swaps increased while pay-fixed interest swaps decreased, primarily driven by lower swap rates on hedges of U.S. dollar long-term debt.

Table 48 Asset and Liability Management Interest Rate and Foreign Exchange Contracts

	December 31, 2020								
		Expected Maturity							
(Dollars in millions, average estimated duration in years)	Fair Value	Total	2021	2022	2023	2024	2025	Thereafter	Average Estimated Duration
Receive-fixed interest rate swaps [1]	$ 14,885								8.08
Notional amount		$269,015	$ 11,050	$ 20,908	$ 30,654	$ 31,317	$ 32,898	$142,188	
Weighted-average fixed-rate		1.54 %	3.25 %	0.91 %	1.48 %	1.17 %	1.07 %	1.69 %	
Pay-fixed interest rate swaps [1]	(5,502)								6.52
Notional amount		$252,698	$ 7,562	$ 21,667	$ 24,671	$ 24,406	$ 32,052	$142,340	
Weighted-average fixed-rate		0.89 %	0.57 %	0.10 %	1.28 %	0.86 %	0.68 %	1.00 %	
Same-currency basis swaps [2]	(235)								
Notional amount		$223,659	$ 18,769	$ 12,245	$ 9,747	$ 22,737	$ 28,222	$131,939	
Foreign exchange basis swaps [1, 3, 4]	(1,014)								
Notional amount		112,465	27,424	16,038	8,066	3,819	4,446	52,672

Net ALM contracts	$ 8,567								

(1) Does not include basis adjustments on either fixed-rate debt issued by the Corporation or AFS debt securities, which are hedged using derivatives designated as fair value hedging instruments, that substantially offset the fair values of these derivatives.

(2) At December 31, 2020 and 2019, the notional amount of same-currency basis swaps included $223.7 billion and $152.2 billion in both foreign currency and U.S. dollar-denominated basis swaps in which both sides of the swap are in the same currency.

(3) Foreign exchange basis swaps consisted of cross-currency variable interest rate swaps used separately or in conjunction with receive-fixed interest rate swaps.

(4) Does not include foreign currency translation adjustments on certain non-U.S. debt issued by the Corporation that substantially offset the fair values of these derivatives.

(5) The notional amount of foreign exchange contracts of $(42.5) billion at December 31, 2020 was comprised of $34.2 billion in foreign currency-denominated and cross-currency receive-fixed swaps, $(74.3) billion in net foreign currency forward rate contracts, $(3.1) billion in foreign currency-denominated interest rate swaps and $711 million in net foreign currency futures contracts. Foreign exchange contracts of $(53.1) billion at December 31, 2019 were comprised of $29.0 billion in foreign currency-denominated and cross-currency receive-fixed swaps, $(82.4) billion in net foreign currency forward rate contracts, $(313) million in foreign currency-denominated interest rate swaps and $644 million in foreign currency futures contracts.

(6) Reflects the net of long and short positions. Amounts shown as negative reflect a net short position.

Mortgage Banking Risk Management

We originate, fund and service mortgage loans, which subject us to credit, liquidity and interest rate risks, among others. We determine whether loans will be held for investment or held for sale at the time of commitment and manage credit and liquidity risks by selling or securitizing a portion of the loans we originate.

Interest rate risk and market risk can be substantial in the mortgage business. Changes in interest rates and other market factors impact the volume of mortgage originations. Changes in interest rates also impact the value of interest rate lock commitments (IRLCs) and the related residential first mortgage loans held-for-sale (LHFS) between the date of the IRLC and the date the loans are sold to the secondary market. An increase in mortgage interest rates typically leads to a decrease in the value of these instruments. Conversely, when there is an increase in interest rates, the value of the MSRs will increase driven by lower prepayment expectations. Because the interest rate risks of these hedged items offset, we combine them into one overall hedged item with one combined economic hedge portfolio consisting of derivative contracts and securities.

During 2020, 2019 and 2018, we recorded gains of $321 million, $291 million and $244 million related to the change in fair value of the MSRs, IRLCs and LHFS, net of gains and losses on the hedge portfolio. For more information on MSRs, see *Note 20 – Fair Value Measurements* to the Consolidated Financial Statements.

Compliance and Operational Risk Management

Compliance risk is the risk of legal or regulatory sanctions, material financial loss or damage to the reputation of the Corporation arising from the failure of the Corporation to comply with the requirements of applicable laws, rules, regulations and our internal policies and procedures (collectively, applicable laws, rules and regulations).

Operational risk is the risk of loss resulting from inadequate or failed processes, people and systems or from external events. Operational risk may occur anywhere in the Corporation, including third-party business processes, and is not limited to operations functions. Effects may extend beyond financial losses and may result in reputational risk impacts. Operational risk includes legal risk. Additionally, operational risk is a component in the calculation of total RWA used in the Basel 3 capital calculation. For more information on Basel 3 calculations, see Capital Management on page 73.

FLUs and control functions are first and foremost responsible for managing all aspects of their businesses, including their compliance and operational risk. FLUs and control functions are required to understand their business processes and related risks and controls, including third-party dependencies, the related regulatory requirements, and monitor and report on the effectiveness of the control environment. In order to actively monitor and assess the performance of their processes and controls, they must conduct comprehensive quality assurance activities and identify issues and risks to remediate control gaps and weaknesses. FLUs and control functions must also adhere to compliance and operational risk appetite limits to meet strategic, capital and financial planning objectives. Finally, FLUs and control functions are responsible for the proactive identification, management and escalation of compliance and operational risks across the Corporation.

Global Compliance and Operational Risk teams independently assess compliance and operational risk, monitor business activities and processes and evaluate FLUs and control functions for adherence to applicable laws, rules and regulations, including identifying issues and risks, determining and developing tests to be conducted by the Enterprise Independent Testing unit, and reporting on the state of the control environment. Enterprise Independent Testing, an independent testing function within IRM, works with Global Compliance and Operational Risk, the FLUs and control functions in the identification of testing needs and test design, and is accountable for test execution, reporting and analysis of results.

Corporate Audit provides independent assessment and validation through testing of key compliance and operational risk processes and controls across the Corporation.

The Corporation's Global Compliance Enterprise Policy and Operational Risk Management – Enterprise Policy set the requirements for reporting compliance and operational risk information to executive management as well as the Board or appropriate Board-level committees in support of Global Compliance and Operational Risk's responsibilities for conducting independent oversight of our compliance and operational risk management activities. The Board provides oversight of compliance risk through its Audit Committee and the ERC, and operational risk through the ERC.

A key operational risk facing the Corporation is information security, which includes cybersecurity. Cybersecurity risk represents, among other things, exposure to failures or interruptions of service or breaches of security, including as a result of malicious technological attacks, that impact the confidentiality, availability or integrity of our, or third parties' (including their downstream service providers, the financial services industry and financial data aggregators) operations, systems or data, including sensitive corporate and customer information. The Corporation manages information security risk in accordance with internal policies which govern our comprehensive information security program designed to protect the Corporation by enabling preventative, detective and responsive measures to combat information and cybersecurity risks. The Board and the ERC provide cybersecurity and information security risk oversight for the Corporation, and our Global Information Security Team manages the day-to-day implementation of our information security program.

Reputational Risk Management

Reputational risk is the risk that negative perceptions of the Corporation's conduct or business practices may adversely impact its profitability or operations. Reputational risk may result from many of the Corporation's activities, including those related to the management of our strategic, operational, compliance and credit risks.

The Corporation manages reputational risk through established policies and controls in its businesses and risk management processes to mitigate reputational risks in a timely manner and through proactive monitoring and identification of potential reputational risk events. If reputational risk events occur, we focus on remediating the underlying issue and taking action to minimize damage to the Corporation's reputation. The Corporation has processes and procedures in place to respond to events that give rise to reputational risk, including educating individuals and organizations that influence public opinion, implementing external communication strategies to mitigate the risk, and informing key stakeholders of potential reputational risks. The Corporation's organization and governance structure provides oversight of reputational risks, and reputational risk reporting is provided regularly and directly to management and the ERC, which provides primary oversight of reputational risk. In addition, each FLU has a committee, which includes representatives from Compliance, Legal and Risk, that is responsible for the oversight of reputational risk. Such committees' oversight includes providing approval for business activities that present elevated levels of reputational risks.

Climate Risk Management

Climate-related risks are divided into two major categories: (1) risks related to the transition to a low-carbon economy, which may entail extensive policy, legal, technology and market changes, and (2) risks related to the physical impacts of climate change, driven by extreme weather events, such as hurricanes and floods, as well as chronic longer-term shifts, such as temperature increases and sea level rises. These changes and events can have broad impacts on operations, supply chains, distribution networks, customers, and markets and are otherwise referred to, respectively, as transition risk and physical risk. The financial impacts of transition risk can lead to and amplify credit risk. Physical risk can also lead to increased credit risk by diminishing borrowers' repayment capacity or collateral values.

As climate risk is interconnected with all key risk types, we have developed and continue to enhance processes to embed climate risk considerations into our Risk Framework and risk management programs established for strategic, credit, market, liquidity, compliance, operational and reputational risks. A key element of how we manage climate risk is the Risk Identification process through which climate and other risks are identified across all FLUs and control functions, prioritized in our risk inventory and evaluated to determine estimated severity and likelihood of occurrence. Once identified, climate risks are assessed for potential impacts and incorporated into the design of macroeconomic scenarios to generate loss forecasts and assess how climate-related impacts could affect us and our clients.

Our governance framework establishes oversight of climate risk practices and strategies by the Board, supported by its Corporate Governance, ESG, and Sustainability Committee, the ERC and the Global Environmental, Social and Governance Committee, a management-level committee comprised of senior leaders across every major FLU and control function. The Climate Risk Steering Council oversees our climate risk management practices, shapes our approach to managing climate-related risks in line with our Risk Framework and meets monthly. In 2020, the climate risk management effort was bolstered through the appointment of a Global Climate Risk Executive who reports to the CRO, and establishment of a new division within our Global Risk organization to drive execution of the climate risk management program with the support of FLUs, Technology & Operations and Risk partners. For additional information about climate risk, see the Bank of America website (the content of which is not incorporated by reference into this Annual Report on Form 10-K).

Complex Accounting Estimates

Our significant accounting principles, as described in *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements, are essential in understanding the MD&A. Many of our significant accounting principles require complex judgments to estimate the values of assets and liabilities. We have procedures and processes in place to facilitate making these judgments.

The more judgmental estimates are summarized in the following discussion. We have identified and described the development of the variables most important in the estimation processes that involve mathematical models to derive the estimates. In many cases, there are numerous alternative judgments that could be used in the process of determining the inputs to the models. Where alternatives exist, we have used the factors that we believe represent the most reasonable value in developing the inputs. Actual performance that differs from our estimates of the key variables could materially impact our results of operations. Separate from the possible future impact to our results of operations from input and model variables, the value of our lending portfolio and market-sensitive assets and liabilities may change subsequent to the balance sheet date, often significantly, due to the nature and magnitude of future credit and market conditions. Such credit and market conditions may change quickly and in unforeseen ways and the resulting volatility could have a significant, negative effect on future operating results. These fluctuations would not be indicative of deficiencies in our models or inputs.

Allowance for Credit Losses

On January 1, 2020, the Corporation adopted the new accounting standard that requires the measurement of the allowance for credit losses, which includes the allowance for loan and lease losses and the reserve for unfunded lending commitments, to be based on management's best estimate of lifetime ECL inherent in the Corporation's relevant financial assets.

The Corporation's estimate of lifetime ECL includes the use of quantitative models that incorporate forward-looking macroeconomic scenarios that are applied over the contractual life of the loan portfolios, adjusted for expected prepayments and borrower-controlled extension options. These macroeconomic scenarios include variables that have historically been key drivers of increases and decreases in credit losses. These variables include, but are not limited to, unemployment rates, real estate prices, gross domestic product and corporate bond spreads. As any one economic outlook is inherently uncertain, the Corporation leverages multiple scenarios. The scenarios that are chosen each quarter and the amount of weighting given to each scenario depend on a variety of factors including recent economic events, leading economic indicators, views of internal and third-party economists and industry trends.

The Corporation also includes qualitative reserves to cover losses that are expected but, in the Corporation's assessment, may not be adequately reflected in the economic assumptions described above. For example, factors the Corporation considers include changes in lending policies and procedures, business conditions, the nature and size of the portfolio, portfolio concentrations, the volume and severity of past due loans and nonaccrual loans, the effect of external factors such as competition and legal and regulatory requirements, among others. Further, the Corporation considers the inherent uncertainty in quantitative models that are built on historical data.

The allowance for credit losses can also be impacted by unanticipated changes in asset quality of the portfolio, such as increases in risk rating downgrades in our commercial portfolio, deterioration in borrower delinquencies or credit scores in our credit card portfolio or increases in LTVs in our consumer real estate portfolio. In addition, while we have incorporated our estimated impact of COVID-19 into our allowance for credit losses, the ultimate impact of the pandemic is still unknown, including how long economic activities will be impacted and what effect the unprecedented levels of government fiscal and monetary actions will have on the economy and our credit losses.

As described above, the process to determine the allowance for credit losses requires numerous estimates and assumptions, some of which require a high degree of judgment and are often interrelated. Changes in the estimates and assumptions can result in significant changes in the allowance for credit losses. Our process for determining the allowance for credit losses is further discussed in *Note 1 – Summary of Significant Accounting Principles* and *Note 5 – Outstanding Loans and Leases and Allowance for Credit Losses* to the Consolidated Financial Statements.

Fair Value of Financial Instruments

Under applicable accounting standards, we are required to maximize the use of observable inputs and minimize the use of unobservable inputs in measuring fair value. We classify fair value measurements of financial instruments and MSRs based on the three-level fair value hierarchy in the accounting standards.

The fair values of assets and liabilities may include adjustments, such as market liquidity and credit quality, where appropriate. Valuations of products using models or other techniques are sensitive to assumptions used for the significant inputs. Where market data is available, the inputs used for valuation reflect that information as of our valuation date. Inputs to valuation models are considered unobservable if they are supported by little or no market activity. In periods of extreme volatility, lessened liquidity or in illiquid markets, there may be more variability in market pricing or a lack of market data to use in the valuation process. In keeping with the prudent application of estimates and management judgment in determining the fair value of assets and liabilities, we have in place various processes and controls that include: a model validation policy that requires review and approval of quantitative models used for deal pricing, financial statement fair value determination and risk quantification; a trading product valuation policy that requires verification of all traded product valuations; and a periodic review and substantiation of daily profit and loss reporting for all traded products. Primarily through validation controls, we utilize both broker and pricing service inputs which can and do include both market-observable and internally-modeled values and/or valuation inputs. Our reliance on this information is affected by our understanding of how the broker and/or pricing service develops its data with a higher degree of reliance applied to those that are more directly observable and lesser reliance applied to those developed through their own internal modeling. For example, broker quotes in less active markets may only be indicative and therefore less reliable. These processes and controls are performed independently of the business. For more information, see *Note 20 – Fair Value Measurements* and *Note 21 – Fair Value Option* to the Consolidated Financial Statements.

Level 3 Assets and Liabilities

Financial assets and liabilities, and MSRs, where values are based on valuation techniques that require inputs that are both unobservable and are significant to the overall fair value measurement are classified as Level 3 under the fair value hierarchy established in applicable accounting standards. The fair value of these Level 3 financial assets and liabilities and MSRs is determined using pricing models, discounted cash flow methodologies or similar techniques for which the determination of fair value requires significant management judgment or estimation.

Level 3 financial instruments may be hedged with derivatives classified as Level 1 or 2; therefore, gains or losses associated with Level 3 financial instruments may be offset by gains or losses associated with financial instruments classified in other levels of the fair value hierarchy. The Level 3 gains and losses recorded in earnings did not have a significant impact on our liquidity or capital. We conduct a review of our fair value hierarchy classifications on a quarterly basis. Transfers into or out of Level 3 are made if the significant inputs used in the financial models measuring the fair values of the assets and liabilities became unobservable or observable, respectively, in the current marketplace. For more information on transfers into and out of Level 3 during 2020, 2019 and 2018, see *Note 20 – Fair Value Measurements* to the Consolidated Financial Statements.

Accrued Income Taxes and Deferred Tax Assets

Accrued income taxes, reported as a component of either other assets or accrued expenses and other liabilities on the Consolidated Balance Sheet, represent the net amount of current income taxes we expect to pay to or receive from various taxing jurisdictions attributable to our operations to date. We currently file income tax returns in more than 100 jurisdictions and consider many factors, including statutory, judicial and regulatory guidance, in estimating the appropriate accrued income taxes for each jurisdiction.

Net deferred tax assets, reported as a component of other assets on the Consolidated Balance Sheet, represent the net decrease in taxes expected to be paid in the future because of net operating loss (NOL) and tax credit carryforwards and because of future reversals of temporary differences in the bases of assets and liabilities as measured by tax laws and their bases as reported in the financial statements. NOL and tax credit carryforwards result in reductions to future tax liabilities, and many of these attributes can expire if not utilized within certain periods. We consider the need for valuation allowances to reduce net deferred tax assets to the amounts that we estimate are more likely than not to be realized.

Consistent with the applicable accounting guidance, we monitor relevant tax authorities and change our estimates of accrued income taxes and/or net deferred tax assets due to changes in income tax laws and their interpretation by the courts and regulatory authorities. These revisions of our estimates, which also may result from our income tax planning and from the resolution of income tax audit matters, may be material to our operating results for any given period.

See *Note 19 – Income Taxes* to the Consolidated Financial Statements for a table of significant tax attributes and additional information. For more information, see Item 1A. Risk Factors of our 2020 Annual Report on Form 10-K.

Goodwill and Intangible Assets

The nature of and accounting for goodwill and intangible assets are discussed in *Note 1 – Summary of Significant Accounting Principles*, and *Note 7 – Goodwill and Intangible Assets* to the Consolidated Financial Statements.

We completed our annual goodwill impairment test as of June 30, 2020. In performing that test, we compared the fair value of each reporting unit to its estimated carrying value as measured by allocated equity. We estimated the fair value of each reporting unit based on the income approach (which utilizes the present value of cash flows to estimate fair value) and the market multiplier approach (which utilizes observable market prices and metrics of peer companies to estimate fair value).

Our discounted cash flows were generally based on the Corporation's three-year internal forecasts with a long-term growth rate of 3.68 percent. Our estimated cash flows considered the current challenging global industry and market conditions related to the pandemic, including the low interest rate environment. The cash flows were discounted using rates that ranged from 9 percent to 12 percent, which were derived from a capital asset pricing model that incorporates the risk and uncertainty in the cash flow forecasts, the financial markets and industries similar to each of the reporting units.

Under the market multiplier approach, we estimated the fair value of the individual reporting units utilizing various market multiples, primarily various pricing multiples, from comparable publicly-traded companies in industries similar to the reporting unit and then factored in a control premium based upon observed comparable premiums paid for change-in-control transactions for financial institutions.

Based on the results of the test, we determined that each reporting unit's estimated fair value exceeded its respective carrying value and that the goodwill assigned to each reporting unit was not impaired. The fair values of the reporting units as a percentage of their carrying values ranged from 109 percent to 213 percent. It currently remains difficult to estimate the future economic impacts related to the pandemic. If economic and market conditions (both in the U.S. and internationally) deteriorate, our reporting units could be negatively impacted, which could change our key assumptions and related estimates and may result in a future impairment charge.

Certain Contingent Liabilities

For more information on the complex judgments associated with certain contingent liabilities, see *Note 12 – Commitments and Contingencies* to the Consolidated Financial Statements.

Non-GAAP Reconciliations

Tables 49 and 50 provide reconciliations of certain non-GAAP financial measures to GAAP financial measures.

Table 49 Five-year Reconciliations to GAAP Financial Measures [1]

(Dollars in millions, shares in thousands)	2020	2019	2018	2017	2016
Reconciliation of average shareholders' equity to average tangible shareholders' equity and average tangible common shareholders' equity					
Shareholders' equity	**$ 267,309**	$ 267,889	$ 264,748	$ 271,289	$ 265,843

Total commercial loans excluding loans accounted for under the fair value option	**493,119**	509,916	495,997	476,691	452,492
Commercial loans accounted for under the fair value option [3]	**5,946**	7,741	3,667	4,782	6,034
Total commercial	**499,065**	517,657	499,664	481,473	458,526
Less: Loans of business held for sale [6]	**—**	—	—	—	(9,214)
Total loans and leases	**$ 927,861**	$ 983,426	$ 946,895	$ 936,749	$ 906,683

(1) Includes primarily auto and specialty lending loans and leases of $46.4 billion, $50.4 billion, $50.1 billion, $52.4 billion and $50.7 billion, U.S. securities-based lending loans of $41.1 billion, $36.7 billion, $37.0 billion, $39.8 billion and $40.1 billion and non-U.S. consumer loans of $3.0 billion, $2.8 billion, $2.9 billion, $3.0 billion and $3.0 billion at December 31, 2020, 2019, 2018, 2017 and 2016, respectively.

(2) Substantially all of other consumer at December 31, 2020, 2019, 2018 and 2017 is consumer overdrafts. Other consumer at December 31, 2016 also includes consumer finance loans of $465 million.

(3) Consumer loans accounted for under the fair value option include residential mortgage loans of $298 million, $257 million, $336 million, $567 million and $710 million, and home equity loans of $437 million, $337 million, $346 million, $361 million and $341 million at December 31, 2020, 2019, 2018, 2017 and 2016, respectively. Commercial loans accounted for under the fair value option include U.S. commercial loans of $2.9 billion, $4.7 billion, $2.5 billion, $2.6 billion and $2.9 billion, and non-U.S. commercial loans of $3.0 billion, $3.1 billion, $1.1 billion, $2.2 billion and $3.1 billion at December 31, 2020, 2019, 2018, 2017 and 2016, respectively.

(4) Includes U.S. commercial real estate loans of $57.2 billion, $59.0 billion, $56.6 billion, $54.8 billion and $54.3 billion, and non-U.S. commercial real estate loans of $3.2 billion, $3.7 billion, $4.2 billion, $3.5 billion and $3.1 billion at December 31, 2020, 2019, 2018, 2017 and 2016, respectively.

(5) Includes card-related products.

(6) Represents non-U.S. credit card loans, which were included in assets of business held for sale on the Consolidated Balance Sheet.

Table II Nonperforming Loans, Leases and Foreclosed Properties (1)

(Dollars in millions)	December 31 2020	2019	2018	2017	2016
Consumer					
Residential mortgage	$ **2,005**	$ 1,470	$ 1,893	$ 2,476	$ 3,056
Home equity	**649**	536	1,893	2,644	2,918
Direct/Indirect consumer	**71**	47	56	46	28
Other consumer	**—**	—	—	—	2
Total consumer (2)	**2,725**	2,053	3,842	5,166	6,004
Commercial					
U.S. commercial	**1,243**	1,094	794	814	1,256
Non-U.S. commercial	**418**	43	80	299	279
Commercial real estate	**404**	280	156	112	72
Commercial lease financing	**87**	32	18	24	36
	2,152	1,449	1,048	1,249	1,643
U.S. small business commercial	**75**	50	54	55	60
Total commercial (3)	**2,227**	1,499	1,102	1,304	1,703
Total nonperforming loans and leases	**4,952**	3,552	4,944	6,470	7,707
Foreclosed properties	**164**	285	300	288	377
Total nonperforming loans, leases and foreclosed properties	$ **5,116**	$ 3,837	$ 5,244	$ 6,758	$ 8,084

(1) Balances exclude foreclosed properties insured by certain government-guaranteed loans, principally FHA-insured loans, that entered foreclosure of $119 million, $260 million, $488 million, $801 million and $1.2 billion at December 31, 2020, 2019, 2018, 2017 and 2016, respectively.
(2) In 2020, $372 million in interest income was estimated to be contractually due on $2.7 billion of consumer loans and leases classified as nonperforming at December 31, 2020, as presented in the table above, plus $4.4 billion of TDRs classified as performing at December 31, 2020. Approximately $254 million of the estimated $372 million in contractual interest was received and included in interest income for 2020.
(3) In 2020, $115 million in interest income was estimated to be contractually due on $2.2 billion of commercial loans and leases classified as nonperforming at December 31, 2020, as presented in the table above, plus $1.0 billion of TDRs classified as performing at December 31, 2020. Approximately $71 million of the estimated $115 million in contractual interest was received and included in interest income for 2020.

Table III Accruing Loans and Leases Past Due 90 Days or More (1)

(Dollars in millions)	December 31 2020	2019	2018	2017	2016
Consumer					
Residential mortgage (2)	$ **762**	$ 1,088	$ 1,884	$ 3,230	$ 4,793
Credit card	**903**	1,042	994	900	782
Non-U.S. credit card	**—**	—	—	—	66
Direct/Indirect consumer	**33**	33	38	40	34
Other consumer	**—**	—	—	—	4
Total consumer	**1,698**	2,163	2,916	4,170	5,679
Commercial					
U.S. commercial	**228**	106	197	144	106
Non-U.S. commercial	**10**	8	—	3	5
Commercial real estate	**6**	19	4	4	7
Commercial lease financing	**25**	20	29	19	19
	269	153	230	170	137
U.S. small business commercial	**115**	97	84	75	71
Total commercial	**384**	250	314	245	208
Total accruing loans and leases past due 90 days or more	$ **2,082**	$ 2,413	$ 3,230	$ 4,415	$ 5,887

(1) Our policy is to classify consumer real estate-secured loans as nonperforming at 90 days past due, except for the fully-insured loan portfolio and loans accounted for under the fair value option.
(2) Balances are fully-insured loans.

Table IV Selected Loan Maturity Data [1, 2]

(Dollars in millions)	Due in One Year or Less	Due After One Year Through Five Years	Due After Five Years	Total
	December 31, 2020			
U.S. commercial	$ 82,577	$ 198,898	$ 46,642	**$ 328,117**
U.S. commercial real estate	14,073	37,552	5,552	**57,177**
Non-U.S. and other [3]	33,196	54,488	8,989	**96,673**
Total selected loans	**$ 129,846**	**$ 290,938**	**$ 61,183**	**$ 481,967**
Percent of total	27 %	60 %	13 %	**100 %**
Sensitivity of selected loans to changes in interest rates for loans due after one year:				
Fixed interest rates		$ 46,911	$ 32,280	
Floating or adjustable interest rates		244,027	28,903	
Total		**$ 290,938**	**$ 61,183**	

(1) Loan maturities are based on the remaining maturities under contractual terms.
(2) Includes loans accounted for under the fair value option.
(3) Loan maturities include non-U.S. commercial and commercial real estate loans.

Table V Allowance for Credit Losses [1]

(Dollars in millions)	**2020**	2019	2018	2017	2016
Allowance for loan and lease losses, January 1	**$ 12,358**	$ 9,601	$ 10,393	$ 11,237	$ 12,234

(1) On January 1, 2020, the Corporation adopted the CECL accounting standard, which increased the allowance for loan and lease losses by $2.9 billion and the reserve for unfunded lending commitments by $310 million. For more information, see *Note 1 – Summary of Significant Accounting Principles* to the Consolidated Financial Statements.
(2) Represents amounts related to the non-U.S. credit card loan portfolio, which was sold in 2017.
(3) Includes U.S. small business commercial charge-offs of $321 million, $320 million, $287 million, $258 million and $253 million in 2020, 2019, 2018, 2017 and 2016, respectively.
(4) Includes U.S. small business commercial recoveries of $54 million, $48 million, $47 million, $43 million and $45 million in 2020, 2019, 2018, 2017 and 2016, respectively.
(5) Primarily represents write-offs of purchased credit-impaired loans for years prior to 2020, the net impact of portfolio sales, consolidations and deconsolidations, foreign currency translation adjustments, transfers to held for sale and certain other reclassifications.
(6) Represents allowance related to the non-U.S. credit card loan portfolio, which was sold in 2017.

Table V Allowance for Credit Losses (continued)

(Dollars in millions)	2020	2019	2018	2017	2016
Loan and allowance ratios [7]**:**

Ratio of the allowance for loan and lease losses at December 31 to net charge-offs	**4.56**	2.58	2.55	2.61	3.00
Amounts included in allowance for loan and lease losses for loans and leases that are excluded from nonperforming loans and leases at December 31 [11]	**$ 9,854**	$ 4,151	$ 4,031	$ 3,971	$ 3,951
Allowance for loan and lease losses as a percentage of total nonperforming loans and leases, excluding the allowance for loan and lease losses for loans and leases that are excluded from nonperforming loans and leases at December 31 [11]	**181 %**	148 %	113 %	99 %	98 %

(7) Loan and allowance ratios for 2016 include $243 million of non-U.S. credit card allowance for loan and lease losses and $9.2 billion of ending non-U.S. credit card loans, which were sold in 2017.

(8) Outstanding loan and lease balances and ratios do not include loans accounted for under the fair value option of $6.7 billion, $8.3 billion, $4.3 billion, $5.7 billion and $7.1 billion at December 31, 2020, 2019, 2018, 2017 and 2016, respectively. Average loans accounted for under the fair value option were $8.2 billion, $6.8 billion, $5.5 billion, $6.7 billion and $8.2 billion in 2020, 2019, 2018, 2017 and 2016, respectively.

(9) Excludes consumer loans accounted for under the fair value option of $735 million, $594 million, $682 million, $928 million and $1.1 billion at December 31, 2020, 2019, 2018, 2017 and 2016, respectively.

(10) Excludes commercial loans accounted for under the fair value option of $5.9 billion, $7.7 billion, $3.7 billion, $4.8 billion and $6.0 billion at December 31, 2020, 2019, 2018, 2017 and 2016, respectively.

(11) Primarily includes amounts related to credit card and unsecured consumer lending portfolios in *Consumer Banking* and, in 2017 and 2016, the non-U.S. credit card portfolio in *All Other*.

Report of Management on Internal Control Over Financial Reporting

Bank of America Corporation and Subsidiaries

The management of Bank of America Corporation is responsible for establishing and maintaining adequate internal control over financial reporting.

The Corporation's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. The Corporation's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Corporation; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States of America, and that receipts and expenditures of the Corporation are being made only in accordance with authorizations of management and directors of the Corporation; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Corporation's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of the Corporation's internal control over financial reporting as of December 31, 2020 based on the framework set forth by the Committee of Sponsoring Organizations of the Treadway Commission in *Internal Control – Integrated Framework (2013)*. Based on that assessment, management concluded that, as of December 31, 2020, the Corporation's internal control over financial reporting is effective.

The Corporation's internal control over financial reporting as of December 31, 2020 has been audited by PricewaterhouseCoopers, LLP, an independent registered public accounting firm, as stated in their accompanying report which expresses an unqualified opinion on the effectiveness of the Corporation's internal control over financial reporting as of December 31, 2020.

Brian T. Moynihan
Chairman, Chief Executive Officer and President

Paul M. Donofrio
Chief Financial Officer

Report of Independent Registered Public Accounting Firm

Bank of America Corporation and Subsidiaries

To the Board of Directors and Shareholders of Bank of America Corporation:

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Bank of America Corporation and its subsidiaries (the "Corporation") as of December 31, 2020 and 2019, and the related consolidated statements of income, comprehensive income, changes in shareholders' equity and cash flows for each of the three years in the period ended December 31, 2020, including the related notes (collectively referred to as the "consolidated financial statements"). We also have audited the Corporation's internal control over financial reporting as of December 31, 2020, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Corporation as of December 31, 2020 and 2019, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2020 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Corporation maintained, in all material respects, effective internal control over financial reporting as of December 31, 2020, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the COSO.

Change in Accounting Principle

As discussed in Note 1 to the consolidated financial statements, the Corporation changed the manner in which it accounts for credit losses on certain financial instruments in 2020.

Basis for Opinions

The Corporation's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Report of Management on Internal Control Over Financial Reporting. Our responsibility is to express opinions on the Corporation's consolidated financial statements and on the Corporation's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Corporation in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current period audit of the consolidated financial statements that were communicated or required to be communicated to the audit committee and that (i) relate to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Allowance for Loan and Lease Losses - Commercial and Consumer Card Loans

As described in Notes 1 and 5 to the consolidated financial statements, the allowance for loan and lease losses represents management's estimate of the expected credit losses in the Corporation's loan and lease portfolio, excluding loans and unfunded lending commitments accounted for under the fair value option. As of December 31, 2020, the allowance for loan and lease losses was $18.8 billion on total loans and leases of

$921.2 billion, which excludes loans accounted for under the fair value option. For commercial and consumer card loans, the expected credit loss is estimated using quantitative methods that consider a variety of factors such as historical loss experience, the current credit quality of the portfolio as well as an economic outlook over the life of the loan. In its loss forecasting framework, the Corporation incorporates forward looking information through the use of macroeconomic scenarios applied over the forecasted life of the assets. These macroeconomic scenarios include variables that have historically been key drivers of increases and decreases in credit losses. These variables include, but are not limited to, unemployment rates, real estate prices, gross domestic product levels and corporate bond spreads. The scenarios that are chosen and the amount of weighting given to each scenario depend on a variety of factors including recent economic events, leading economic indicators, views of internal as well as third-party economists and industry trends. Also included in the allowance for loan losses are qualitative reserves to cover losses that are expected but, in the Corporation's assessment, may not be adequately reflected in the quantitative methods or the economic assumptions. Factors that the Corporation considers include changes in lending policies and procedures, business conditions, the nature and size of the portfolio, portfolio concentrations, the volume and severity of past due loans and nonaccrual loans, the effect of external factors such as competition, and legal and regulatory requirements, among others. Further, the Corporation considers the inherent uncertainty in quantitative models that are built on historical data.

The principal considerations for our determination that performing procedures relating to the allowance for loan and lease losses for the commercial and consumer card portfolios is a critical audit matter are (i) the significant judgment and estimation by management in developing lifetime economic forecast scenarios, related weightings to each scenario and certain qualitative reserves, which in turn led to a high degree of auditor judgment, subjectivity and effort in performing procedures and in evaluating audit evidence obtained, and (ii) the audit effort involved professionals with specialized skill and knowledge to assist in evaluating certain audit evidence.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the allowance for loan and lease losses, including controls over the evaluation and approval of models, forecast scenarios and related weightings, and qualitative reserves. These procedures also included, among others, testing management’s process for estimating the allowance for loan losses, including (i) evaluating the appropriateness of the loss forecast models and methodology, (ii) evaluating the reasonableness of certain macroeconomic variables, (iii) evaluating the reasonableness of management’s development, selection and weighting of economic forecast scenarios used in the loss forecast models, (iv) testing the completeness and accuracy of data used in the estimate, and (v) evaluating certain qualitative reserves made to the model output results to determine the overall allowance for loan losses. The procedures also included the involvement of professionals with specialized skill and knowledge to assist in evaluating the appropriateness of certain loss forecast models, the reasonableness of economic forecast scenarios and related weightings and the reasonableness of certain qualitative reserves.

Valuation of Certain Level 3 Financial Instruments

As described in Notes 1 and 20 to the consolidated financial statements, the Corporation carries certain financial instruments at fair value, which includes $10.0 billion of assets and $7.4 billion of liabilities classified as Level 3 fair value measurements on a recurring basis and $1.7 billion of assets classified as Level 3 fair value measurements on a nonrecurring basis, for which the determination of fair value requires significant management judgment or estimation. The Corporation determines the fair value of Level 3 financial instruments using pricing models, discounted cash flow methodologies, or similar techniques that require inputs that are both unobservable and are significant to the overall fair value measurement. Unobservable inputs, such as volatility or price, may be determined using quantitative-based extrapolations or other internal methodologies which incorporate management estimates and available market information.

The principal considerations for our determination that performing procedures relating to the valuation of certain Level 3 financial instruments is a critical audit matter are the significant judgment and estimation used by management to determine the fair value of these financial instruments, which in turn led to a high degree of auditor judgment and effort in performing procedures, including the involvement of professionals with specialized skill and knowledge to assist in evaluating certain audit evidence.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the valuation of financial instruments, including controls related to valuation models, significant unobservable inputs, and data. These procedures also included, among others, the involvement of professionals with specialized skill and knowledge to assist in developing an independent estimate of fair value for a sample of these certain financial instruments and comparison of management’s estimate to the independently developed estimate of fair value. Developing the independent estimate involved testing the completeness and accuracy of data provided by management and evaluating the reasonableness of management’s assumptions used to develop the significant unobservable inputs.

PricewaterhouseCoopers LLP

NOTE 1 Summary of Significant Accounting Principles

Bank of America Corporation, a bank holding company and a financial holding company, provides a diverse range of financial services and products throughout the U.S. and in certain international markets. The term "the Corporation" as used herein may refer to Bank of America Corporation, individually, Bank of America Corporation and its subsidiaries, or certain of Bank of America Corporation's subsidiaries or affiliates.

Principles of Consolidation and Basis of Presentation

The Consolidated Financial Statements include the accounts of the Corporation and its majority-owned subsidiaries and those variable interest entities (VIEs) where the Corporation is the primary beneficiary. Intercompany accounts and transactions have been eliminated. Results of operations of acquired companies are included from the dates of acquisition, and for VIEs, from the dates that the Corporation became the primary beneficiary. Assets held in an agency or fiduciary capacity are not included in the Consolidated Financial Statements. The Corporation accounts for investments in companies for which it owns a voting interest and for which it has the ability to exercise significant influence over operating and financing decisions using the equity method of accounting. These investments are included in other assets. Equity method investments are subject to impairment testing, and the Corporation's proportionate share of income or loss is included in other income.

The preparation of the Consolidated Financial Statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect reported amounts and disclosures. Actual results could materially differ from those estimates and assumptions. Certain prior-period amounts have been reclassified to conform to current period presentation.

New Accounting Standards

Accounting for Financial Instruments – Credit Losses

On January 1, 2020, the Corporation adopted the new accounting standard that requires the measurement of the allowance for credit losses to be based on management's best estimate of lifetime expected credit losses (ECL) inherent in the Corporation's relevant financial assets. Upon adoption of the standard on January 1, 2020, the Corporation recorded a $3.3 billion, or 32 percent, increase to the allowance for credit losses. After adjusting for deferred taxes and other adoption effects, a $2.4 billion decrease was recorded in retained earnings through a cumulative-effect adjustment. Prior to January 1, 2020, the allowance for credit losses was determined based on management's estimate of probable incurred losses.

Reference Rate Reform

The Financial Accounting Standards Board (FASB) issued a new accounting standard in March 2020, which was subsequently amended in January 2021, related to contracts or hedging relationships that reference London Interbank Offered Rate (LIBOR) or other reference rates that are expected to be discontinued due to reference rate reform. The new standard provides for optional expedients and other guidance regarding the accounting related to modifications of contracts, hedging relationships and other transactions affected by reference rate reform. The Corporation has elected to retrospectively adopt the new standard as of January 1, 2020. The adoption did not have a material accounting impact on the Corporation's consolidated financial position or results of operations; however, it did ease the administrative burden in accounting for certain effects of reference rate reform.

Significant Accounting Principles

Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, cash items in the process of collection, cash segregated under federal and other brokerage regulations, and amounts due from correspondent banks, the Federal Reserve Bank and certain non-U.S. central banks. Certain cash balances are restricted as to withdrawal or usage by legally binding contractual agreements or regulatory requirements.

Securities Financing Agreements

Securities borrowed or purchased under agreements to resell and securities loaned or sold under agreements to repurchase (securities financing agreements) are treated as collateralized financing transactions except in instances where the transaction is required to be accounted for as individual sale and purchase transactions. Generally, these agreements are recorded at acquisition or sale price plus accrued interest, except for securities financing agreements that the Corporation accounts for under the fair value option. Changes in the fair value of securities financing agreements that are accounted for under the fair value option are recorded in market making and similar activities in the Consolidated Statement of Income.

The Corporation's policy is to monitor the market value of the principal amount loaned under resale agreements and obtain collateral from or return collateral pledged to counterparties when appropriate. Securities financing agreements do not create material credit risk due to these collateral provisions; therefore, an allowance for loan losses is not necessary.

In transactions where the Corporation acts as the lender in a securities lending agreement and receives securities that can be pledged or sold as collateral, it recognizes an asset on the Consolidated Balance Sheet at fair value, representing the securities received, and a liability, representing the obligation to return those securities.

Collateral

The Corporation accepts securities and loans as collateral that it is permitted by contract or practice to sell or repledge. At December 31, 2020 and 2019, the fair value of this collateral was $812.4 billion and $693.0 billion, of which $758.5 billion and $593.8 billion were sold or repledged. The primary source of this collateral is securities borrowed or purchased under agreements to resell.

The Corporation also pledges company-owned securities and loans as collateral in transactions that include repurchase agreements, securities loaned, public and trust deposits, U.S. Treasury tax and loan notes, and short-term borrowings. This collateral, which in some cases can be sold or repledged by the counterparties to the transactions, is parenthetically disclosed on the Consolidated Balance Sheet.

In certain cases, the Corporation has transferred assets to consolidated VIEs where those restricted assets serve as collateral for the interests issued by the VIEs. These assets are included on the Consolidated Balance Sheet in Assets of Consolidated VIEs.

In addition, the Corporation obtains collateral in connection with its derivative contracts. Required collateral levels vary depending on the credit risk rating and the type of counterparty. Generally, the Corporation accepts collateral in the form of cash, U.S. Treasury securities and other marketable securities. Based on provisions contained in master netting agreements, the Corporation nets cash collateral received against derivative assets. The Corporation also pledges collateral on its own derivative positions which can be applied against derivative liabilities.

Trading Instruments

Financial instruments utilized in trading activities are carried at fair value. Fair value is generally based on quoted market prices for the same or similar assets and liabilities. If these market prices are not available, fair values are estimated based on dealer quotes, pricing models, discounted cash flow methodologies, or similar techniques where the determination of fair value may require significant management judgment or estimation. Realized gains and losses are recorded on a trade-date basis. Realized and unrealized gains and losses are recognized in market making and similar activities.

Derivatives and Hedging Activities

Derivatives are entered into on behalf of customers, for trading or to support risk management activities. Derivatives used in risk management activities include derivatives that are both designated in qualifying accounting hedge relationships and derivatives used to hedge market risks in relationships that are not designated in qualifying accounting hedge relationships (referred to as other risk management activities). The Corporation manages interest rate and foreign currency exchange rate sensitivity predominantly through the use of derivatives. Derivatives utilized by the Corporation include swaps, futures and forward settlement contracts, and option contracts.

All derivatives are recorded on the Consolidated Balance Sheet at fair value, taking into consideration the effects of legally enforceable master netting agreements that allow the Corporation to settle positive and negative positions and offset cash collateral held with the same counterparty on a net basis. For exchange-traded contracts, fair value is based on quoted market prices in active or inactive markets or is derived from observable market-based pricing parameters, similar to those applied to over-the-counter (OTC) derivatives. For non-exchange traded contracts, fair value is based on dealer quotes, pricing models, discounted cash flow methodologies or similar techniques for which the determination of fair value may require significant management judgment or estimation.

Valuations of derivative assets and liabilities reflect the value of the instrument including counterparty credit risk. These values also take into account the Corporation's own credit standing.

Trading Derivatives and Other Risk Management Activities

Derivatives held for trading purposes are included in derivative assets or derivative liabilities on the Consolidated Balance Sheet with changes in fair value included in market making and similar activities.

Derivatives used for other risk management activities are included in derivative assets or derivative liabilities. Derivatives used in other risk management activities have not been designated in qualifying accounting hedge relationships because they did not qualify or the risk that is being mitigated pertains to an item that is reported at fair value through earnings so that the effect of measuring the derivative instrument and the asset or liability to which the risk exposure pertains will offset in the Consolidated Statement of Income to the extent effective. The changes in the fair value of derivatives that serve to mitigate certain risks associated with mortgage servicing rights (MSRs), interest rate lock commitments (IRLCs) and first-lien mortgage loans held-for-sale (LHFS) that are originated by the Corporation are recorded in other income. Changes in the fair value of derivatives that serve to mitigate interest rate risk and foreign currency risk are included in market making and similar activities. Credit derivatives are also used by the Corporation to mitigate the risk associated with various credit exposures. The changes in the fair value of these derivatives are included in market making and similar activities and other income.

Derivatives Used For Hedge Accounting Purposes (Accounting Hedges)

For accounting hedges, the Corporation formally documents at inception all relationships between hedging instruments and hedged items, as well as the risk management objectives and strategies for undertaking various accounting hedges. Additionally, the Corporation primarily uses regression analysis at the inception of a hedge and for each reporting period thereafter to assess whether the derivative used in an accounting hedge transaction is expected to be and has been highly effective in offsetting changes in the fair value or cash flows of a hedged item or forecasted transaction. The Corporation discontinues hedge accounting when it is determined that a derivative is not expected to be or has ceased to be highly effective as a hedge, and then reflects changes in fair value of the derivative in earnings after termination of the hedge relationship.

Fair value hedges are used to protect against changes in the fair value of the Corporation's assets and liabilities that are attributable to interest rate or foreign exchange volatility. Changes in the fair value of derivatives designated as fair value hedges are recorded in earnings, together and in the same income statement line item with changes in the fair value of the related hedged item. If a derivative instrument in a fair value hedge is terminated or the hedge designation removed, the previous adjustments to the carrying value of the hedged asset or liability are subsequently accounted for in the same manner as other components of the carrying value of that asset or liability. For interest-earning assets and interest-bearing liabilities, such adjustments are amortized to earnings over the remaining life of the respective asset or liability.

Cash flow hedges are used primarily to minimize the variability in cash flows of assets and liabilities or forecasted transactions caused by interest rate or foreign exchange rate fluctuations. The Corporation also uses cash flow hedges to hedge the price risk associated with deferred compensation. Changes in the fair value of derivatives used in cash flow hedges are recorded in accumulated other comprehensive income (OCI) and are reclassified into the line item in the income statement in which the hedged item is recorded in the same period the hedged item affects earnings. Components of a derivative that are excluded in assessing hedge effectiveness are recorded in the same income statement line item as the hedged item.

Net investment hedges are used to manage the foreign exchange rate sensitivity arising from a net investment in a foreign operation. Changes in the spot prices of derivatives that are designated as net investment hedges of foreign operations are recorded as a component of accumulated OCI. The remaining components of these derivatives are excluded in assessing hedge effectiveness and are recorded in market making and similar activities.

Securities

Debt securities are reported on the Consolidated Balance Sheet at their trade date. Their classification is dependent on the purpose for which the securities were acquired. Debt securities purchased for use in the Corporation's trading activities are reported in trading account assets at fair value with unrealized gains and losses included in market making and similar activities. Substantially all other debt securities purchased are used in the Corporation's asset and liability management (ALM) activities and are reported on the Consolidated Balance Sheet as either debt securities carried at fair value or as held-to-maturity (HTM) debt securities. Debt securities carried at fair value are either available-for-sale (AFS) securities with unrealized gains and losses net-of-tax included in accumulated OCI or carried at fair value with unrealized gains and losses reported in market making and similar activities. HTM debt securities are debt securities that management has the intent and ability to hold to maturity and are reported at amortized cost.

The Corporation evaluates each AFS security where the value has declined below amortized cost. If the Corporation intends to sell or believes it is more likely than not that it will be required to sell the debt security, it is written down to fair value through earnings. For AFS debt securities the Corporation intends to hold, the Corporation evaluates the debt securities for ECL except for debt securities that are guaranteed by the U.S. Treasury, U.S. government agencies or sovereign entities of high credit quality where the Corporation applies a zero credit loss assumption. For the remaining AFS debt securities, the Corporation considers qualitative parameters such as internal and external credit ratings and the value of underlying collateral. If an AFS debt security fails any of the qualitative parameters, a discounted cash flow analysis is used by the Corporation to determine if a portion of the unrealized loss is a result of an expected credit loss. The Corporation will then recognize either credit loss expense or a reversal of credit loss expense in other income for the amount necessary to adjust the debt securities valuation allowance to its current estimate of excepted credit losses. Cash flows expected to be collected are estimated using all relevant information available such as remaining payment terms, prepayment speeds, the financial condition of the issuer, expected defaults and the value of the underlying collateral. If any of the decline in fair value is related to market factors, that amount is recognized in accumulated OCI. In certain instances, the credit loss may exceed the total decline in fair value, in which case, the allowance recorded is limited to the difference between the amortized cost and the fair value of the asset.

The Corporation separately evaluates its HTM debt securities for any credit losses, of which substantially all qualify for the zero loss assumption. For the remaining securities, the Corporation performs a discounted cash flow analysis to estimate any credit losses which are then recognized as part of the allowance for credit losses.

Interest on debt securities, including amortization of premiums and accretion of discounts, is included in interest income. Premiums and discounts are amortized or accreted to interest income at a constant effective yield over the contractual lives of the securities. Realized gains and losses from the sales of debt securities are determined using the specific identification method.

Equity securities with readily determinable fair values that are not held for trading purposes are carried at fair value with unrealized gains and losses included in other income. Equity securities that do not have readily determinable fair values are recorded at cost less impairment, if any, plus or minus qualifying observable price changes. These securities are reported in other assets.

Loans and Leases

Loans, with the exception of loans accounted for under the fair value option, are measured at historical cost and reported at their outstanding principal balances net of any unearned income, charge-offs, unamortized deferred fees and costs on originated loans, and for purchased loans, net of any unamortized premiums or discounts. Loan origination fees and certain direct origination costs are deferred and recognized as adjustments to interest income over the lives of the related loans. Unearned income, discounts and premiums are amortized to interest income using a level yield methodology. The Corporation elects to account for certain consumer and commercial loans under the fair value option with interest reported in interest income and changes in fair value reported in market making and similar activities or other income.

Under applicable accounting guidance, for reporting purposes, the loan and lease portfolio is categorized by portfolio segment and, within each portfolio segment, by class of financing receivables. A portfolio segment is defined as the level at which an entity develops and documents a systematic methodology to determine the allowance for credit losses, and a class of financing receivables is defined as the level of disaggregation of portfolio segments based on the initial measurement attribute, risk characteristics and methods for assessing risk. The Corporation's three portfolio segments are Consumer Real Estate, Credit Card and Other Consumer, and Commercial. The classes within the Consumer Real Estate portfolio segment are residential mortgage and home equity. The classes within the Credit Card and Other Consumer portfolio segment are credit card, direct/indirect consumer and other consumer. The classes within the Commercial portfolio segment are U.S. commercial, non-U.S. commercial, commercial real estate, commercial lease financing and U.S. small business commercial.

Leases

The Corporation provides equipment financing to its customers through a variety of lessor arrangements. Direct financing leases and sales-type leases are carried at the aggregate of lease payments receivable plus the estimated residual value of the leased property less unearned income, which is accreted to interest income over the lease terms using methods that approximate the interest method. Operating lease income is recognized on a straight-line basis. The Corporation's lease arrangements generally do not contain non-lease components.

Allowance for Credit Losses

The allowance for credit losses includes both the allowance for loan and lease losses and the reserve for unfunded lending commitments and represents management's estimate of the ECL in the Corporation's loan and lease portfolio, excluding loans and unfunded lending commitments accounted for under the fair value option. The ECL on funded consumer and commercial loans and leases is referred to as the allowance for loan and lease losses and is reported separately as a contra-asset to loans and leases on the Consolidated Balance Sheet. The ECL for unfunded lending commitments, including home equity lines of credit (HELOCs), standby letters of credit (SBLCs) and binding unfunded loan commitments is reported on the Consolidated Balance Sheet in accrued expenses and other liabilities. The provision for credit losses related to the loan and lease portfolio and unfunded lending commitments is reported in the Consolidated Statement of Income.

For loans and leases, the ECL is typically estimated using quantitative methods that consider a variety of factors such as historical loss experience, the current credit quality of the portfolio as well as an economic outlook over the life of the loan. The life of the loan for closed-ended products is based on the contractual maturity of the loan adjusted for any expected prepayments. The contractual maturity includes any extension options that are at the sole discretion of the borrower. For open-ended products (e.g., lines of credit), the ECL is determined based on the maximum repayment term associated with future draws from credit lines unless those lines of credit are unconditionally cancellable (e.g., credit cards) in which case the Corporation does not record any allowance.

In its loss forecasting framework, the Corporation incorporates forward-looking information through the use of macroeconomic scenarios applied over the forecasted life of the assets. These macroeconomic scenarios include variables that have historically been key drivers of increases and decreases in credit losses. These variables include, but are not limited to, unemployment rates, real estate prices, gross domestic product levels and corporate bond spreads. As any one economic outlook is inherently uncertain, the Corporation leverages multiple scenarios. The scenarios that are chosen each quarter and the weighting given to each scenario depend on a variety of factors including recent economic events, leading economic indicators, views of internal and third-party economists and industry trends.

The estimate of credit losses includes expected recoveries of amounts previously charged off (i.e., negative allowance). If a loan has been charged off, the expected cash flows on the loan are not limited by the current amortized cost balance. Instead, expected cash flows can be assumed up to the unpaid principal balance immediately prior to the charge-off.

The allowance for loan and lease losses for troubled debt restructurings (TDR) is measured based on the present value of projected future lifetime principal and interest cash flows discounted at the loan's original effective interest rate, or in cases where foreclosure is probable or the loan is collateral dependent, at the loan's collateral value or its observable market price, if available. The measurement of ECL for the renegotiated consumer credit card TDR portfolio is based on the present value of projected cash flows discounted using the average TDR portfolio contractual interest rate, excluding promotionally priced loans, in effect prior to restructuring. Projected cash flows for TDRs use the same economic outlook as discussed above. For purposes of computing this specific loss component of the allowance, larger impaired loans are evaluated individually and smaller impaired loans are evaluated as a pool.

Also included in the allowance for loan and lease losses are qualitative reserves to cover losses that are expected but, in the Corporation's assessment, may not be adequately reflected in the quantitative methods or the economic assumptions described above. For example, factors that the Corporation considers include changes in lending policies and procedures, business conditions, the nature and size of the portfolio, portfolio concentrations, the volume and severity of past due loans and nonaccrual loans, the effect of external factors such as competition, and legal and regulatory requirements, among others. Further, the Corporation considers the inherent uncertainty in quantitative models that are built on historical data.

With the exception of the Corporation's credit card portfolio, the Corporation does not include reserves for interest receivable in the measurement of the allowance for credit losses as the Corporation generally classifies consumer loans as nonperforming at 90 days past due and reverses interest income for these loans at that time. For credit card loans, the Corporation reserves for interest and fees as part of the allowance for loan and lease losses. Upon charge-off of a credit card loan, the Corporation reverses the interest and fee income against the income statement line item where it was originally recorded.

The Corporation has identified the following three portfolio segments and measures the allowance for credit losses using the following methods.

Consumer Real Estate

To estimate ECL for consumer loans secured by residential real estate, the Corporation estimates the number of loans that will default over the life of the existing portfolio, after factoring in estimated prepayments, using quantitative modeling methodologies. The attributes that are most significant in estimating the Corporation's ECL include refreshed loan-to-value (LTV) or, in the case of a subordinated lien, refreshed combined LTV (CLTV), borrower credit score, months since origination and geography, all of which are further broken down by present collection status (whether the loan is current, delinquent, in default, or in bankruptcy). The estimates are based on the Corporation's historical experience with the loan portfolio, adjusted to reflect the economic outlook. The outlook on the unemployment rate and consumer real estate prices are key factors that impact the frequency and severity of loss estimates. The Corporation does not reserve for credit losses on the unpaid principal balance of loans insured by the Federal Housing Administration (FHA) and long-term standby loans, as these loans are fully insured. The Corporation records a reserve for unfunded lending commitments for the ECL associated with the undrawn portion of the Corporation's HELOCs, which can only be canceled by the Corporation if certain criteria are met. The ECL associated with these unfunded lending commitments is calculated using the same models and methodologies noted above and incorporate utilization assumptions at time of default.

For loans that are more than 180 days past due and collateral-dependent TDRs, the Corporation bases the allowance on the estimated fair value of the underlying collateral as of the reporting date less costs to sell. The fair value of the collateral securing these loans is generally determined using an automated valuation model (AVM) that estimates the value of a property by reference to market data including sales of comparable properties and price trends specific to the Metropolitan Statistical Area in which the property being valued is located. In the event that an AVM value is not available, the Corporation utilizes publicized indices or if these methods provide less reliable valuations, the Corporation uses appraisals or broker price opinions to estimate the fair value of the collateral. While there is inherent imprecision in these valuations, the Corporation believes that they are representative of this portfolio in the aggregate.

For loans that are more than 180 days past due and collateral-dependent TDRs, with the exception of the Corporation's fully insured portfolio, the outstanding balance of loans that is in excess of the estimated property value after adjusting for costs to sell is charged off. If the estimated property value decreases in periods subsequent to the initial charge-off, the Corporation will record an additional charge-off; however, if the value increases in periods subsequent to the charge-off, the Corporation will adjust the allowance to account for the increase but not to a level above the cumulative charge-off amount.

Credit Cards and Other Consumer

Credit cards are revolving lines of credit without a defined maturity date. The estimated life of a credit card receivable is determined by estimating the amount and timing of expected future payments (e.g., borrowers making full payments, minimum payments or somewhere in between) that it will take for a receivable balance to pay off. The ECL on the future payments incorporates the spending behavior of a borrower through time using key borrower-specific factors and the economic outlook described above. The Corporation applies all expected payments in accordance with the Credit Card Accountability Responsibility and Disclosure Act of 2009 (i.e., paying down the highest interest rate bucket first). Then forecasted future payments are prioritized to pay off the oldest balance until it is brought to zero or an expected charge-off amount. Unemployment rate outlook, borrower credit score, delinquency status and historical payment behavior are all key inputs into the credit card receivable loss forecasting model. Future draws on the credit card lines are excluded from the ECL as they are unconditionally cancellable.

The ECL for the consumer vehicle lending portfolio is also determined using quantitative methods supplemented with qualitative analysis. The quantitative model estimates ECL giving consideration to key borrower and loan characteristics such as delinquency status, borrower credit score, LTV ratio, underlying collateral type and collateral value.

Commercial

The ECL on commercial loans is forecasted using models that estimate credit losses over the loan's contractual life at an individual loan level. The models use the contractual terms to forecast future principal cash flows while also considering expected prepayments. For open-ended commitments such as revolving lines of credit, changes in funded balance are captured by forecasting a borrower's draw and payment behavior over the remaining life of the commitment. For loans collateralized with commercial real estate and for which the underlying asset is the primary source of repayment, the loss forecasting models consider key loan and customer attributes such as LTV ratio, net operating income and debt service coverage, and captures variations in behavior according to property type and region. The outlook on the unemployment rate, gross domestic product, and forecasted real estate prices are utilized to determine indicators such as rent levels and vacancy rates, which impact the ECL estimate. For all other commercial loans and leases, the loss forecasting model determines the probabilities of transition to different credit risk ratings or default at each point over the life of the asset based on the borrower's current credit risk rating, industry sector, size of the exposure and the geographic market. The severity of loss is determined based on the type of collateral securing the exposure, the size of the exposure, the borrower's industry sector, any guarantors and the geographic market. Assumptions of expected loss are conditioned to the economic outlook, and the model considers key economic variables such as unemployment rate, gross domestic product, corporate bond spreads, real estate and other asset prices and equity market returns.

In addition to the allowance for loan and lease losses, the Corporation also estimates ECL related to unfunded lending commitments such as letters of credit, financial guarantees, unfunded bankers acceptances and binding loan commitments, excluding commitments accounted for under the fair value option. Reserves are estimated for the unfunded exposure using the same models and methodologies as the funded exposure and are reported as reserves for unfunded lending commitments.

Nonperforming Loans and Leases, Charge-offs and Delinquencies

Nonperforming loans and leases generally include loans and leases that have been placed on nonaccrual status. Loans accounted for under the fair value option and LHFS are not reported as nonperforming.

In accordance with the Corporation's policies, consumer real estate-secured loans, including residential mortgages and home equity loans, are generally placed on nonaccrual status and classified as nonperforming at 90 days past due unless repayment of the loan is insured by the FHA or through individually insured long-term standby agreements with Fannie Mae (FNMA) or Freddie Mac (FHLMC) (the fully-insured portfolio). Residential mortgage loans in the fully-insured portfolio are not placed on nonaccrual status and, therefore, are not reported as nonperforming. Junior-lien home equity loans are placed on nonaccrual status and classified as nonperforming when the underlying first-lien mortgage loan becomes 90 days past due even if the junior-lien loan is current. The outstanding balance of real estate-secured loans that is in excess of the estimated property value less costs to sell is charged off no later than the end of the month in which the loan becomes 180 days past due unless the loan is fully insured, or for loans in bankruptcy, within 60 days of receipt of notification of filing, with the remaining balance classified as nonperforming.

Consumer loans secured by personal property, credit card loans and other unsecured consumer loans are not placed on nonaccrual status prior to charge-off and, therefore, are not reported as nonperforming loans, except for certain secured consumer loans, including those that have been modified in a TDR. Personal property-secured loans (including auto loans) are charged off to collateral value no later than the end of the month in which the account becomes 120 days past due, or upon repossession of an auto or, for loans in bankruptcy, within 60 days of receipt of notification of filing. Credit card and other unsecured customer loans are charged off no later than the end of the month in which the account becomes 180 days past due, within 60 days after receipt of notification of death or bankruptcy, or upon confirmation of fraud.

Commercial loans and leases, excluding business card loans, that are past due 90 days or more as to principal or interest, or where reasonable doubt exists as to timely collection, including loans that are individually identified as being impaired, are generally placed on nonaccrual status and classified as nonperforming unless well-secured and in the process of collection.

Business card loans are charged off in the same manner as consumer credit card loans. Other commercial loans and leases are generally charged off when all or a portion of the principal amount is determined to be uncollectible.

The entire balance of a consumer loan or commercial loan or lease is contractually delinquent if the minimum payment is not received by the specified due date on the customer's billing statement. Interest and fees continue to accrue on past due loans and leases until the date the loan is placed on nonaccrual status, if applicable. Accrued interest receivable is reversed when loans and leases are placed on nonaccrual status. Interest collections on nonaccruing loans and leases for which the ultimate collectability of principal is uncertain are applied as principal reductions; otherwise, such collections are credited to income when received. Loans and leases may be restored to accrual status when all principal and interest is current and full repayment of the remaining contractual principal and interest is expected.

Troubled Debt Restructurings

Consumer and commercial loans and leases whose contractual terms have been restructured in a manner that grants a concession to a borrower experiencing financial difficulties are classified as TDRs. Concessions could include a reduction in the interest rate to a rate that is below market on the loan, payment extensions, forgiveness of principal, forbearance or other actions designed to maximize collections. Loans that are carried at fair value and LHFS are not classified as TDRs.

Loans and leases whose contractual terms have been modified in a TDR and are current at the time of restructuring may remain on accrual status if there is demonstrated performance prior to the restructuring and payment in full under the restructured terms is expected. Otherwise, the loans are placed on nonaccrual status and reported as nonperforming, except for fully-insured consumer real estate loans, until there is sustained repayment performance for a reasonable period, generally six months. If accruing TDRs cease to perform in accordance with their modified contractual terms, they are placed on nonaccrual status and reported as nonperforming TDRs.

Secured consumer loans that have been discharged in Chapter 7 bankruptcy and have not been reaffirmed by the borrower are classified as TDRs at the time of discharge. Such loans are placed on nonaccrual status and written down to the estimated collateral value less costs to sell no later than at the time of discharge. If these loans are contractually current, interest collections are generally recorded in interest income on a cash basis. Consumer real estate-secured loans for which a binding offer to restructure has been extended are also classified as TDRs. Credit card and other unsecured consumer loans that have been renegotiated in a TDR generally remain on accrual status until the loan is either paid in full or charged off, which occurs no later than the end of the month in which the loan becomes 180 days past due or, for loans that have been placed on a fixed payment plan, 120 days past due.

A loan that had previously been modified in a TDR and is subsequently refinanced under current underwriting standards at a market rate with no concessionary terms is accounted for as a new loan and is no longer reported as a TDR.

COVID-19 Programs

The Corporation has implemented various consumer and commercial loan modification programs to provide its borrowers relief from the economic impacts of the COVID-19 pandemic (the pandemic). In accordance with the Coronavirus Aid, Relief, and Economic Security Act (CARES Act), the Corporation has elected to not apply TDR classification to eligible COVID-19 related loan modifications that were performed after March 1, 2020 to loans that were current as of December 31, 2019. Accordingly, these restructurings are not classified as TDRs. The availability of this election expires upon the earlier of January 1, 2022 or 60 days after the national emergency related to COVID-19 terminates. In addition, for loans modified in response to the pandemic that do not meet the above criteria (e.g., current payment status at December 31, 2019), the Corporation is applying the guidance included in an interagency statement issued by the bank regulatory agencies. This guidance states that loan modifications performed in light of the pandemic, including loan payment deferrals that are up to six months in duration, that were granted to borrowers who were current as of the implementation date of a loan modification program or modifications granted under government mandated modification programs, are not TDRs. For loan modifications that include a payment deferral and are not TDRs, the borrowers' past due and nonaccrual status have not been impacted during the deferral period. The Corporation has continued to accrue interest during the deferral period using a constant effective yield method. For most mortgage, HELOC and commercial loan modifications, the contractual interest that accrued during the deferral period is payable at the maturity of the loan. The Corporation includes these amounts with the unpaid principal balance when computing its allowance for credit losses. Amounts that are subsequently deemed uncollectible are written off against the allowance for credit losses.

Loans Held-for-sale

Loans that the Corporation intends to sell in the foreseeable future, including residential mortgages, loan syndications, and to a lesser degree, commercial real estate, consumer finance and other loans, are reported as LHFS and are carried at the lower of aggregate cost or fair value. The Corporation accounts for certain LHFS, including residential mortgage LHFS, under the fair value option. Loan origination costs for LHFS carried at the lower of cost or fair value are capitalized as part of the carrying value of the loans and, upon the sale of a loan, are recognized as part of the gain or loss in noninterest income. LHFS that are on nonaccrual status and are reported as nonperforming, as defined in the policy herein, are reported separately from nonperforming loans and leases.

Premises and Equipment

Premises and equipment are carried at cost less accumulated depreciation and amortization. Depreciation and amortization are recognized using the straight-line method over the estimated useful lives of the assets. Estimated lives range up to 40 years for buildings, up to 12 years for furniture and equipment, and the shorter of lease term or estimated useful life for leasehold improvements.

Other Assets

For the Corporation’s financial assets that are measured at amortized cost and are not included in debt securities or loans and leases on the Consolidated Balance Sheet, the Corporation evaluates these assets for ECL using various techniques. For assets that are subject to collateral maintenance provisions, including federal funds sold and securities borrowed or purchased under agreements to resell, where the collateral consists of daily margining of liquid and marketable assets where the margining is expected to be maintained into the foreseeable future, the expected losses are assumed to be zero. For all other assets, the Corporation performs qualitative analyses, including consideration of historical losses and current economic conditions, to estimate any ECL which are then included in a valuation account that is recorded as a contra-asset against the amortized cost basis of the financial asset.

Lessee Arrangements

Substantially all of the Corporation's lessee arrangements are operating leases. Under these arrangements, the Corporation records right-of-use assets and lease liabilities at lease commencement. Right-of-use assets are reported in other assets on the Consolidated Balance Sheet, and the related lease liabilities are reported in accrued expenses and other liabilities. All leases are recorded on the Consolidated Balance Sheet except leases with an initial term less than 12 months for which the Corporation made the short-term lease election. Lease expense is recognized on a straight-line basis over the lease term and is recorded in occupancy and equipment expense in the Consolidated Statement of Income.

The Corporation made an accounting policy election not to separate lease and non-lease components of a contract that is or contains a lease for its real estate and equipment leases. As such, lease payments represent payments on both lease and non-lease components. At lease commencement, lease liabilities are recognized based on the present value of the remaining lease payments and discounted using the Corporation's incremental borrowing rate. Right-of-use assets initially equal the lease liability, adjusted for any lease payments made prior to lease commencement and for any lease incentives.

Goodwill and Intangible Assets

Goodwill is the purchase premium after adjusting for the fair value of net assets acquired. Goodwill is not amortized but is reviewed for potential impairment on an annual basis, or when events or circumstances indicate a potential impairment, at the reporting unit level. A reporting unit is a business segment or one level below a business segment.

The Corporation assesses the fair value of each reporting unit against its carrying value, including goodwill, as measured by allocated equity. For purposes of goodwill impairment testing, the Corporation utilizes allocated equity as a proxy for the carrying value of its reporting units. Allocated equity in the reporting units is comprised of allocated capital plus capital for the portion of goodwill and intangibles specifically assigned to the reporting unit.

In performing its goodwill impairment testing, the Corporation first assesses qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. Qualitative factors include, among other things, macroeconomic conditions, industry and market considerations, financial performance of the respective reporting unit and other relevant entity- and reporting-unit specific considerations.

If the Corporation concludes it is more likely than not that the fair value of a reporting unit is less than its carrying value, a quantitative assessment is performed. The Corporation has an unconditional option to bypass the qualitative assessment for any reporting unit in any period and proceed directly to performing the quantitative goodwill impairment test. The Corporation may resume performing the qualitative assessment in any subsequent period.

When performing the quantitative assessment, if the fair value of the reporting unit exceeds its carrying value, goodwill of the reporting unit would not be considered impaired. If the carrying value of the reporting unit exceeds its fair value, a goodwill impairment loss would be recognized for the amount by which the reporting unit's allocated equity exceeds its fair value. An impairment loss recognized cannot exceed the amount of goodwill assigned to a reporting unit. An impairment loss establishes a new basis in the goodwill, and subsequent reversals of goodwill impairment losses are not permitted under applicable accounting guidance.

For intangible assets subject to amortization, an impairment loss is recognized if the carrying value of the intangible asset is not recoverable and exceeds fair value. The carrying value of the intangible asset is considered not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use of the asset. Intangible assets deemed to have indefinite useful lives are not subject to amortization. An impairment loss is recognized if the carrying value of the intangible asset with an indefinite life exceeds its fair value.

Variable Interest Entities

A VIE is an entity that lacks equity investors or whose equity investors do not have a controlling financial interest in the entity through their equity investments. The Corporation consolidates a VIE if it has both the power to direct the activities of the VIE that most significantly impact the VIE's economic performance and an obligation to absorb losses or the right to receive benefits that could potentially be significant to the VIE. On a quarterly basis, the Corporation reassesses its involvement with the VIE and evaluates the impact of changes in governing documents and its financial interests in the VIE. The consolidation status of the VIEs with which the Corporation is involved may change as a result of such reassessments.

The Corporation primarily uses VIEs for its securitization activities, in which the Corporation transfers whole loans or debt securities into a trust or other vehicle. When the Corporation is the servicer of whole loans held in a securitization trust, including non-agency residential mortgages, home equity loans, credit cards, and other loans, the Corporation has the power to direct the most significant activities of the trust. The Corporation generally does not have the power to direct the most significant activities of a residential mortgage agency trust except in certain circumstances in which the Corporation holds substantially all of the issued securities and has the unilateral right to liquidate the trust. The power to direct the most significant activities of a commercial mortgage securitization trust is typically held by the special servicer or by the party holding specific subordinate securities which embody certain controlling rights. The Corporation consolidates a whole-loan securitization trust if it has the power to direct the most significant activities and also holds securities issued by the trust or has other contractual arrangements, other than standard representations and warranties, that could potentially be significant to the trust.

The Corporation may also transfer trading account securities and AFS securities into municipal bond or resecuritization trusts. The Corporation consolidates a municipal bond or resecuritization trust if it has control over the ongoing activities of the trust such as the remarketing of the trust's liabilities or, if there are no ongoing activities, sole discretion over the design of the trust, including the identification of securities to be transferred in and the structure of securities to be issued, and also retains securities or has liquidity or other commitments that could potentially be significant to the trust. The Corporation does not consolidate a municipal bond or resecuritization trust if one or a limited number of third-party investors share responsibility for the design of the trust or have control over the significant activities of the trust through liquidation or other substantive rights.

Other VIEs used by the Corporation include collateralized debt obligations (CDOs), investment vehicles created on behalf of customers and other investment vehicles. The Corporation does not routinely serve as collateral manager for CDOs and, therefore, does not typically have the power to direct the activities that most significantly impact the economic performance of a CDO. However, following an event of default, if the Corporation is a majority holder of senior securities issued by a CDO and acquires the power to manage its assets, the Corporation consolidates the CDO.

The Corporation consolidates a customer or other investment vehicle if it has control over the initial design of the vehicle or manages the assets in the vehicle and also absorbs potentially significant gains or losses through an investment in the vehicle, derivative contracts or other arrangements. The Corporation does not consolidate an investment vehicle if a single investor controlled the initial design of the vehicle or manages the assets in the vehicles or if the Corporation does not have a variable interest that could potentially be significant to the vehicle.

Retained interests in securitized assets are initially recorded at fair value. In addition, the Corporation may invest in debt securities issued by unconsolidated VIEs. Fair values of these debt securities, which are classified as trading account assets, debt securities carried at fair value or HTM securities, are based primarily on quoted market prices in active or inactive markets. Generally, quoted market prices for retained residual interests are not available; therefore, the Corporation estimates fair values based on the present value of the associated expected future cash flows.

Fair Value

The Corporation measures the fair values of its assets and liabilities, where applicable, in accordance with accounting guidance that requires an entity to base fair value on exit price. Under this guidance, an entity is required to maximize the use of observable inputs and minimize the use of unobservable inputs in measuring fair value. Under applicable accounting standards, fair value measurements are categorized into one of three levels based on the inputs to the valuation technique with the highest priority given to unadjusted quoted prices in active markets and the lowest priority given to unobservable inputs. The Corporation categorizes its fair value measurements of financial instruments based on this three-level hierarchy.

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities. Level 1 assets and liabilities include debt and equity securities and derivative contracts that are traded in an active exchange market, as well as certain U.S. Treasury securities that are highly liquid and are actively traded in OTC markets.

Level 2 Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 assets and liabilities include debt securities with quoted prices that are traded less frequently than exchange-traded instruments and derivative contracts where fair value is determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data. This category generally includes U.S. government and agency mortgage-backed (MBS) and asset-backed securities (ABS), corporate debt securities, derivative contracts, certain loans and LHFS.

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the overall fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments for which the determination of fair value requires significant management judgment or estimation. The fair value for such assets and liabilities is generally determined using pricing models, discounted cash flow methodologies or similar techniques that incorporate the assumptions a market participant would use in pricing the asset or liability. This category generally includes retained residual interests in securitizations, consumer MSRs, certain ABS, highly structured, complex or long-dated derivative contracts, certain loans and LHFS, IRLCs and certain CDOs where independent pricing information cannot be obtained for a significant portion of the underlying assets.

Income Taxes

There are two components of income tax expense: current and deferred. Current income tax expense reflects taxes to be paid or refunded for the current period. Deferred income tax expense results from changes in deferred tax assets and liabilities between periods. These gross deferred tax assets and liabilities represent decreases or increases in taxes expected to be paid in the future because of future reversals of temporary differences in the bases of assets and liabilities as measured by tax laws and their bases as reported in the financial statements. Deferred tax assets are also recognized for tax attributes such as net operating loss carryforwards and tax credit carryforwards. Valuation allowances are recorded to reduce deferred tax assets to the amounts management concludes are more likely than not to be realized.

Income tax benefits are recognized and measured based upon a two-step model: first, a tax position must be more likely than not to be sustained based solely on its technical merits in order to be recognized, and second, the benefit is measured as the largest dollar amount of that position that is more likely than not to be sustained upon settlement. The difference between the benefit recognized and the tax benefit claimed on a tax return is referred to as an unrecognized tax benefit. The Corporation records income tax-related interest and penalties, if applicable, within income tax expense.

Revenue Recognition

The following summarizes the Corporation’s revenue recognition accounting policies for certain noninterest income activities.

Card Income

Card income includes annual, late and over-limit fees as well as interchange, cash advances and other miscellaneous items from credit and debit card transactions and from processing card transactions for merchants. Card income is presented net of direct costs. Interchange fees are recognized upon settlement of the credit and debit card payment transactions and are generally determined on a percentage basis for credit cards and fixed rates for debit cards based on the corresponding payment network’s rates. Substantially all card fees are recognized at the transaction date, except for certain time-based fees such as annual fees, which are recognized over 12 months. Fees charged to cardholders and merchants that are estimated to be uncollectible are reserved in the allowance for loan and lease losses. Included in direct cost are rewards and credit card partner payments. Rewards paid to cardholders are related to points earned by the cardholder that can be redeemed for a broad range of rewards including cash, travel and gift cards. The points to be redeemed are estimated based on past redemption behavior, card product type, account transaction activity and other historical card performance. The liability is reduced as the points are redeemed. The Corporation also makes payments to credit card partners. The payments are based on revenue-sharing agreements that are generally driven by cardholder transactions and partner sales volumes. As part of the revenue-sharing agreements, the credit card partner provides the Corporation exclusive rights to market to the credit card partner's members or customers on behalf of the Corporation.

Service Charges

Service charges include deposit and lending-related fees. Deposit-related fees consist of fees earned on consumer and commercial deposit activities and are generally recognized when the transactions occur or as the service is performed. Consumer fees are earned on consumer deposit accounts for account maintenance and various transaction-based services, such as ATM transactions, wire transfer activities, check and money order processing and insufficient funds/overdraft transactions. Commercial deposit-related fees are from the Corporation's Global Transaction Services business and consist of commercial deposit and treasury management services, including account maintenance and other services, such as payroll, sweep account and other cash management services. Lending-related fees generally represent transactional fees earned from certain loan commitments, financial guarantees and SBLCs.

Investment and Brokerage Services

Investment and brokerage services consist of asset management and brokerage fees. Asset management fees are earned from the management of client assets under advisory agreements or the full discretion of the Corporation's financial advisors (collectively referred to as assets under management (AUM)). Asset management fees are earned as a percentage of the client's AUM and generally range from 50 basis points (bps) to 150 bps of the AUM. In cases where a third party is used to obtain a client's investment allocation, the fee remitted to the third party is recorded net and is not reflected in the transaction price, as the Corporation is an agent for those services.

Brokerage fees include income earned from transaction-based services that are performed as part of investment management services and are based on a fixed price per unit or as a percentage of the total transaction amount. Brokerage fees also include distribution fees and sales commissions that are primarily in the *Global Wealth & Investment Management* (*GWIM*) segment and are earned over time. In addition, primarily in the *Global Markets* segment, brokerage fees are earned when the Corporation fills customer orders to buy or sell various financial products or when it acknowledges, affirms, settles and clears transactions and/or submits trade information to the appropriate clearing broker. Certain customers pay brokerage, clearing and/or exchange fees imposed by relevant regulatory bodies or exchanges in order to execute or clear trades. These fees are recorded net and are not reflected in the transaction price, as the Corporation is an agent for those services.

Investment Banking Income

Investment banking income includes underwriting income and financial advisory services income. Underwriting consists of fees earned for the placement of a customer's debt or equity securities. The revenue is generally earned based on a percentage of the fixed number of shares or principal placed. Once the number of shares or notes is determined and the service is completed, the underwriting fees are recognized. The Corporation incurs certain out-of-pocket expenses, such as legal costs, in performing these services. These expenses are recovered through the revenue the Corporation earns from the customer and are included in operating expenses. Syndication fees represent fees earned as the agent or lead lender responsible for structuring, arranging and administering a loan syndication.

Financial advisory services consist of fees earned for assisting clients with transactions related to mergers and acquisitions and financial restructurings. Revenue varies depending on the size of the transaction and scope of services performed and is generally contingent on successful completion of the transaction. Revenue is typically recognized once the transaction is completed and all services have been rendered. Additionally, the Corporation may earn a fixed fee in merger and acquisition transactions to provide a fairness opinion, with the fees recognized when the opinion is delivered to the client.

Other Revenue Measurement and Recognition Policies

The Corporation did not disclose the value of any open performance obligations at December 31, 2020, as its contracts with customers generally have a fixed term that is less than one year, an open term with a cancellation period that is less than one year, or provisions that allow the Corporation to recognize revenue at the amount it has the right to invoice.

Earnings Per Common Share

Earnings per common share (EPS) is computed by dividing net income allocated to common shareholders by the weighted-average common shares outstanding, excluding unvested common shares subject to repurchase or cancellation. Net income allocated to common shareholders is net income adjusted for preferred stock dividends including dividends declared, accretion of discounts on preferred stock including accelerated accretion when preferred stock is repaid early, and cumulative dividends related to the current dividend period that have not been declared as of period end, less income allocated to participating securities. Diluted EPS is computed by dividing income allocated to common shareholders plus dividends on dilutive convertible preferred stock and preferred stock that can be tendered to exercise warrants, by the weighted-average common shares outstanding plus amounts representing the dilutive effect of stock options outstanding, restricted stock, restricted stock units (RSUs), outstanding warrants and the dilution resulting from the conversion of convertible preferred stock, if applicable.

Foreign Currency Translation

Assets, liabilities and operations of foreign branches and subsidiaries are recorded based on the functional currency of each entity. When the functional currency of a foreign operation is the local currency, the assets, liabilities and operations are translated, for consolidation purposes, from the local currency to the U.S. dollar reporting currency at period-end rates for assets and liabilities and generally at average rates for results of operations. The resulting unrealized gains and losses are reported as a component of accumulated OCI, net-of-tax. When the foreign entity's functional currency is the U.S. dollar, the resulting remeasurement gains or losses on foreign currency-denominated assets or liabilities are included in earnings.

Paycheck Protection Program

The Corporation is participating in the Paycheck Protection Program (PPP), which is a loan program that originated from the CARES Act and was subsequently expanded by the Paycheck Protection Program and Health Care Enhancement Act. The PPP is designed to provide U.S. small businesses with cash-flow assistance through loans fully guaranteed by the Small

Business Administration (SBA). If the borrower meets certain criteria and uses the proceeds towards certain eligible expenses, the borrower's obligation to repay the loan can be forgiven up to the full principal amount of the loan and any accrued interest. Upon borrower forgiveness, the SBA pays the Corporation for the principal and accrued interest owed on the loan. If the full principal of the loan is not forgiven, the loan will operate according to the original loan terms with the 100 percent SBA guaranty remaining. As of December 31, 2020, the Corporation had approximately 332,000 PPP loans with a carrying value of $22.7 billion. As compensation for originating the loans, the Corporation received lender processing fees from the SBA, which are capitalized, along with the loan origination costs, and will be amortized over the loans' contractual lives and recognized as interest income. Upon forgiveness of a loan and repayment by the SBA, any unrecognized net capitalized fees and costs related to the loan will be recognized as interest income in that period.

NOTE 2 Net Interest Income and Noninterest Income

The table below presents the Corporation's net interest income and noninterest income disaggregated by revenue source for 2020, 2019 and 2018. For more information, see *Note 1 – Summary of Significant Accounting Principles.* For a disaggregation of noninterest income by business segment and *All Other*, see *Note 23 – Business Segment Information*.

(Dollars in millions)	2020	2019	2018
Net interest income			
Interest income			
Loans and leases	**$ 34,029**	$ 43,086	$ 40,811
Debt securities	**9,790**	11,806	11,724
Federal funds sold and securities borrowed or purchased under agreements to resell	**903**	4,843	3,176
Trading account assets	**4,128**	5,196	4,811
Other interest income	**2,735**	6,305	6,247
Total interest income	**51,585**	71,236	66,769
Interest expense			
Deposits	**1,943**	7,188	4,495
Short-term borrowings	**987**	7,208	5,839
Trading account liabilities	**974**	1,249	1,358
Long-term debt	**4,321**	6,700	6,915
Total interest expense	**8,225**	22,345	18,607
Net interest income	**$ 43,360**	$ 48,891	$ 48,162
Noninterest income			
Fees and commissions			
Card income			
Interchange fees [1]	**$ 3,954**	$ 3,834	$ 3,866
Other card income	**1,702**	1,963	1,958
Total card income	**5,656**	5,797	5,824
Service charges			
Deposit-related fees	**5,991**	6,588	6,667
Lending-related fees	**1,150**	1,086	1,100
Total service charges	**7,141**	7,674	7,767
Investment and brokerage services			
Asset management fees	**10,708**	10,241	10,189
Brokerage fees	**3,866**	3,661	3,971
Total investment and brokerage services	**14,574**	13,902	14,160
Investment banking fees			
Underwriting income	**4,698**	2,998	2,722
Syndication fees	**861**	1,184	1,347
Financial advisory services	**1,621**	1,460	1,258
Total investment banking fees	**7,180**	5,642	5,327
Total fees and commissions	**34,551**	33,015	33,078
Market making and similar activities	**8,355**	9,034	9,008
Other income (loss)	**(738)**	304	772
Total noninterest income	**$ 42,168**	$ 42,353	$ 42,858

[1] Gross interchange fees were $9.2 billion, $10.0 billion and $9.5 billion for 2020, 2019 and 2018, respectively, and are presented net of $5.5 billion, $6.2 billion and $5.6 billion of expenses for rewards and partner payments as well as certain other card costs for the same periods.

NOTE 3 Derivatives

Derivative Balances

Derivatives are entered into on behalf of customers, for trading or to support risk management activities. Derivatives used in risk management activities include derivatives that may or may not be designated in qualifying hedge accounting relationships. Derivatives that are not designated in qualifying hedge accounting relationships are referred to as other risk management derivatives. For more information on the Corporation's derivatives and hedging activities, see *Note 1 – Summary of Significant Accounting Principles.* The following tables present derivative instruments included on the Consolidated Balance Sheet in derivative assets and liabilities at December 31, 2020 and 2019. Balances are presented on a gross basis, prior to the application of counterparty and cash collateral netting. Total derivative assets and liabilities are adjusted on an aggregate basis to take into consideration the effects of legally enforceable master netting agreements and have been reduced by cash collateral received or paid.

Less: Cash collateral received/paid				(33.9)			(28.5)
Total derivative assets/liabilities				$ 40.5			$ 38.2

(1) Represents the total contract/notional amount of derivative assets and liabilities outstanding.
(2) The net derivative asset (liability) and notional amount of written credit derivatives for which the Corporation held purchased credit derivatives with identical underlying referenced names were $2.8 billion and $309.7 billion at December 31, 2019.

Offsetting of Derivatives

The Corporation enters into International Swaps and Derivatives Association, Inc. (ISDA) master netting agreements or similar agreements with substantially all of the Corporation's derivative counterparties. Where legally enforceable, these master netting agreements give the Corporation, in the event of default by the counterparty, the right to liquidate securities held as collateral and to offset receivables and payables with the same counterparty. For purposes of the Consolidated Balance Sheet, the Corporation offsets derivative assets and liabilities and cash collateral held with the same counterparty where it has such a legally enforceable master netting agreement.

The following table presents derivative instruments included in derivative assets and liabilities on the Consolidated Balance Sheet at December 31, 2020 and 2019 by primary risk (e.g., interest rate risk) and the platform, where applicable, on which these derivatives are transacted. Balances are presented on a gross basis, prior to the application of counterparty and cash collateral netting. Total gross derivative assets and liabilities are adjusted on an aggregate basis to take into consideration the effects of legally enforceable master netting agreements which include reducing the balance for counterparty netting and cash collateral received or paid.

For more information on offsetting of securities financing agreements, see *Note 10 – Federal Funds Sold or Purchased, Securities Financing Agreements, Short-term Borrowings and Restricted Cash*.

Offsetting of Derivatives [1]

(Dollars in billions)	Derivative Assets	Derivative Liabilities	Derivative Assets	Derivative Liabilities

Total net derivative assets/liabilities	$ **31.1**	$ **28.9**	$ 25.9	$ 22.1

(1) OTC derivatives include bilateral transactions between the Corporation and a particular counterparty. OTC-cleared derivatives include bilateral transactions between the Corporation and a counterparty where the transaction is cleared through a clearinghouse. Exchange-traded derivatives include listed options transacted on an exchange.
(2) Consists of derivatives entered into under master netting agreements where the enforceability of these agreements is uncertain under bankruptcy laws in some countries or industries.
(3) Amounts are limited to the derivative asset/liability balance and, accordingly, do not include excess collateral received/pledged. Financial instruments collateral includes securities collateral received or pledged and cash securities held and posted at third-party custodians that are not offset on the Consolidated Balance Sheet but shown as a reduction to derive net derivative assets and liabilities.

ALM and Risk Management Derivatives

The Corporation's ALM and risk management activities include the use of derivatives to mitigate risk to the Corporation including derivatives designated in qualifying hedge accounting relationships and derivatives used in other risk management activities. Interest rate, foreign exchange, equity, commodity and credit contracts are utilized in the Corporation's ALM and risk management activities.

The Corporation maintains an overall interest rate risk management strategy that incorporates the use of interest rate contracts, which are generally non-leveraged generic interest rate and basis swaps, options, futures and forwards, to minimize significant fluctuations in earnings caused by interest rate volatility. The Corporation's goal is to manage interest rate sensitivity and volatility so that movements in interest rates do not significantly adversely affect earnings or capital. As a result of interest rate fluctuations, hedged fixed-rate assets and liabilities appreciate or depreciate in fair value. Gains or losses on the derivative instruments that are linked to the hedged fixed-rate assets and liabilities are expected to substantially offset this unrealized appreciation or depreciation.

Market risk, including interest rate risk, can be substantial in the mortgage business. Market risk in the mortgage business is the risk that values of mortgage assets or revenues will be adversely affected by changes in market conditions such as interest rate movements. To mitigate the interest rate risk in mortgage banking production income, the Corporation utilizes forward loan sale commitments and other derivative instruments, including purchased options, and certain debt securities. The Corporation also utilizes derivatives such as interest rate options, interest rate swaps, forward settlement contracts and eurodollar futures to hedge certain market risks of MSRs.

The Corporation uses foreign exchange contracts to manage the foreign exchange risk associated with certain foreign currency-denominated assets and liabilities, as well as the Corporation's investments in non-U.S. subsidiaries. Exposure to loss on these contracts will increase or decrease over their respective lives as currency exchange and interest rates fluctuate.

The Corporation purchases credit derivatives to manage credit risk related to certain funded and unfunded credit exposures. Credit derivatives include credit default swaps (CDS), total return swaps and swaptions. These derivatives are recorded on the Consolidated Balance Sheet at fair value with changes in fair value recorded in other income.

Derivatives Designated as Accounting Hedges

The Corporation uses various types of interest rate and foreign exchange derivative contracts to protect against changes in the fair value of its assets and liabilities due to fluctuations in interest rates and exchange rates (fair value hedges). The Corporation also uses these types of contracts to protect against changes in the cash flows of its assets and liabilities, and other forecasted transactions (cash flow hedges). The Corporation hedges its net investment in consolidated non-U.S. operations determined to have functional currencies other than the U.S. dollar using forward exchange contracts and cross-currency basis swaps, and by issuing foreign currency-denominated debt (net investment hedges).

Fair Value Hedges

The following table summarizes information related to fair value hedges for 2020, 2019 and 2018.

Gains and Losses on Derivatives Designated as Fair Value Hedges

	Derivative			Hedged Item		
(Dollars in millions)	**2020**	2019	2018	**2020**	2019	2018
Interest rate risk on long-term debt [1]	**$ 7,091**	$ 6,113	$ (1,538)	**$ (7,220)**	$ (6,110)	$ 1,429
Interest rate and foreign currency risk on long-term debt [2]	**783**	119	(1,187)	**(783)**	(101)	1,079
Interest rate risk on available-for-sale securities [3]	**(44)**	(102)	(52)	**49**	98	50
Total	**$ 7,830**	$ 6,130	$ (2,777)	**$ (7,954)**	$ (6,113)	$ 2,558

(1) Amounts are recorded in interest expense in the Consolidated Statement of Income.
(2) In 2020, 2019 and 2018, the derivative amount includes gains (losses) of $701 million, $73 million and $(116) million in interest expense, $73 million, $28 million and $(992) million in market making and similar activities, and $9 million, $18 million and $(79) million in accumulated OCI, respectively. Line item totals are in the Consolidated Statement of Income and on the Consolidated Balance Sheet.
(3) Amounts are recorded in interest income in the Consolidated Statement of Income.

The table below summarizes the carrying value of hedged assets and liabilities that are designated and qualifying in fair value hedging relationships along with the cumulative amount of fair value hedging adjustments included in the carrying value that have been recorded in the current hedging relationships. These fair value hedging adjustments are open basis adjustments that are not subject to amortization as long as the hedging relationship remains designated.

Designated Fair Value Hedged Assets (Liabilities)

	Carrying Value	**Cumulative Fair Value Adjustments [1]**	Carrying Value	Cumulative Fair Value Adjustments [1]
(Dollars in millions)	**December 31, 2020**		December 31, 2019	
Long-term debt [2]	**$ (150,556)**	**$ (8,910)**	$ (162,389)	$ (8,685)
Available-for-sale debt securities [2, 3, 4]	**116,252**	**114**	1,654	64
Trading account assets [5]	**427**	**15**	—	—

(1) For assets, increase (decrease) to carrying value and for liabilities, (increase) decrease to carrying value.
(2) At December 31, 2020 and 2019, the cumulative fair value adjustments remaining on long-term debt and AFS debt securities from discontinued hedging relationships resulted in an (increase) decrease in the related liability of $(3.7) billion and $1.3 billion and an increase (decrease) in the related asset of $(69) million and $8 million, which are being amortized over the remaining contractual life of the de-designated hedged items.
(3) These amounts include the amortized cost basis of the prepayable financial assets used to designate hedging relationships in which the hedged item is the last layer expected to be remaining at the end of the hedging relationship (i.e. last-of-layer hedging relationship). At December 31, 2020, the amortized cost of the closed portfolios used in these hedging relationships was $34.6 billion, of which $7.0 billion was designated in the last-of-layer hedging relationship. The cumulative basis adjustments associated with these hedging relationships were not significant.
(4) Carrying value represents amortized cost.
(5) Represents hedging activities related to precious metals inventory.

Cash Flow and Net Investment Hedges

The following table summarizes certain information related to cash flow hedges and net investment hedges for 2020, 2019 and 2018. Of the $426 million after-tax net gain ($566 million pretax) on derivatives in accumulated OCI at December 31, 2020, gains of $190 million after-tax ($254 million pretax) related to both open and terminated hedges are expected to be reclassified into earnings in the next 12 months. These net gains reclassified into earnings are expected to primarily increase net interest income related to the respective hedged items. For terminated cash flow hedges, the time period over which the majority of the forecasted transactions are hedged is approximately 3 years, with a maximum length of time for certain forecasted transactions of 16 years.

Gains and Losses on Derivatives Designated as Cash Flow and Net Investment Hedges

	Gains (Losses) Recognized in Accumulated OCI on Derivatives			Gains (Losses) in Income Reclassified from Accumulated OCI		
(Dollars in millions, amounts pretax)	**2020**	2019	2018	**2020**	2019	2018
Cash flow hedges						
Interest rate risk on variable-rate assets [1]	**$ 763**	$ 671	$ (159)	**$ (7)**	$ (104)	$ (165)
Price risk on forecasted MBS purchases [1]	**241**	—	—	**9**	—	—
Price risk on certain compensation plans [2]	**85**	34	4	**12**	(2)	27
Total	**$ 1,089**	$ 705	$ (155)	**$ 14**	$ (106)	$ (138)
Net investment hedges						
Foreign exchange risk [3]	**$ (834)**	$ 22	$ 989	**$ 4**	$ 366	$ 411

(1) Amounts reclassified from accumulated OCI are recorded in interest income in the Consolidated Statement of Income.
(2) Amounts reclassified from accumulated OCI are recorded in compensation and benefits expense in the Consolidated Statement of Income.
(3) Amounts reclassified from accumulated OCI are recorded in other income in the Consolidated Statement of Income. Amounts excluded from effectiveness testing and recognized in market making and similar activities were gains (losses) of $(11) million, $154 million and $47 million in 2020, 2019 and 2018, respectively.

Other Risk Management Derivatives

Other risk management derivatives are used by the Corporation to reduce certain risk exposures by economically hedging various assets and liabilities. The following table presents gains (losses) on these derivatives for 2020, 2019 and 2018. These gains (losses) are largely offset by the income or expense recorded on the hedged item.

Gains and Losses on Other Risk Management Derivatives

(Dollars in millions)	**2020**	2019	2018
Interest rate risk on mortgage activities [1, 2]	**$ 446**	$ 315	$ (107)
Credit risk on loans [2]	**(68)**	(58)	9
Interest rate and foreign currency risk on ALM activities [3]	**(2,971)**	1,112	3,278
Price risk on certain compensation plans [4]	**700**	943	(495)

(1) Primarily related to hedges of interest rate risk on MSRs and IRLCs to originate mortgage loans that will be held for sale. The net gains on IRLCs, which are not included in the table but are considered derivative instruments, were $165 million, $73 million and $47 million in 2020, 2019 and 2018.
(2) Gains (losses) on these derivatives are recorded in other income.
(3) Gains (losses) on these derivatives are recorded in market making and similar activities.
(4) Gains (losses) on these derivatives are recorded in compensation and benefits expense.

Transfers of Financial Assets with Risk Retained through Derivatives

The Corporation enters into certain transactions involving the transfer of financial assets that are accounted for as sales where substantially all of the economic exposure to the transferred financial assets is retained through derivatives (e.g., interest rate and/or credit), but the Corporation does not retain control over the assets transferred. At both December 31, 2020 and 2019, the Corporation had transferred $5.2 billion of non-U.S. government-guaranteed mortgage-backed securities to a third-party trust and retained economic exposure to the transferred assets through derivative contracts. In connection with these transfers, the Corporation received gross cash proceeds of $5.2 billion as of both transfer dates. At December 31, 2020 and 2019, the fair value of the transferred securities was $5.5 billion and $5.3 billion.

Sales and Trading Revenue

The Corporation enters into trading derivatives to facilitate client transactions and to manage risk exposures arising from trading account assets and liabilities. It is the Corporation's policy to include these derivative instruments in its trading activities, which include derivatives and non-derivative cash instruments. The resulting risk from these derivatives is managed on a portfolio basis as part of the Corporation's *Global Markets* business segment. The related sales and trading revenue generated within *Global Markets* is recorded in various income statement line items, including market making and similar activities and net interest income as well as other revenue categories.

Sales and trading revenue includes changes in the fair value and realized gains and losses on the sales of trading and other assets, net interest income, and fees primarily from commissions on equity securities. Revenue is generated by the difference in the client price for an instrument and the price at which the trading desk can execute the trade in the dealer market. For equity securities, commissions related to purchases and sales are recorded in the "Other" column in the Sales and Trading Revenue table. Changes in the fair value of these securities are included in market making and similar activities. For debt securities, revenue, with the exception of interest associated with the debt securities, is typically included in market making and similar activities. Unlike commissions for equity securities, the initial revenue related to broker-dealer services for debt securities is typically included in the pricing of the instrument rather than being charged through separate fee arrangements. Therefore, this revenue is recorded in market making and similar activities as part of the initial mark to fair value. For derivatives, the majority of revenue is included in market making and similar activities. In transactions where the Corporation acts as agent, which include exchange-traded futures and options, fees are recorded in other income.

The following table, which includes both derivatives and non-derivative cash instruments, identifies the amounts in the respective income statement line items attributable to the Corporation's sales and trading revenue in *Global Markets*, categorized by primary risk, for 2020, 2019 and 2018. This table includes debit valuation adjustment (DVA) and funding valuation adjustment (FVA) gains (losses). *Global Markets* results in *Note 23 – Business Segment Information* are presented on a fully taxable-equivalent (FTE) basis. The table below is not presented on an FTE basis.

Sales and Trading Revenue

(Dollars in millions)	**Market making and similar activities**	**Net Interest Income**	**Other [1]**	**Total**
	2020			
Interest rate risk	**$ 2,211**	**$ 2,400**	**$ 231**	**$ 4,842**

(1) Represents amounts in investment and brokerage services and other income that are recorded in *Global Markets* and included in the definition of sales and trading revenue. Includes investment and brokerage services revenue of $1.9 billion, $1.7 billion and $1.7 billion in 2020, 2019 and 2018, respectively.

Credit Derivatives

The Corporation enters into credit derivatives primarily to facilitate client transactions and to manage credit risk exposures. Credit derivatives derive value based on an underlying third-party referenced obligation or a portfolio of referenced obligations and generally require the Corporation, as the seller of credit protection, to make payments to a buyer upon the occurrence of a predefined credit event. Such credit events generally include bankruptcy of the referenced credit entity and failure to pay under the obligation, as well as acceleration of indebtedness and payment repudiation or moratorium. For credit derivatives based on a portfolio of referenced credits or credit indices, the Corporation may not be required to make payment until a specified amount of loss has occurred and/or may only be required to make payment up to a specified amount.

Credit derivatives are classified as investment and non-investment grade based on the credit quality of the underlying referenced obligation. The Corporation considers ratings of BBB- or higher as investment grade. Non-investment grade includes non-rated credit derivative instruments. The Corporation discloses internal categorizations of investment grade and non-investment grade consistent with how risk is managed for these instruments.

Credit derivative instruments where the Corporation is the seller of credit protection and their expiration at December 31, 2020 and 2019 are summarized in the following table.

Credit Derivative Instruments

(Dollars in millions)	Less than One Year	One to Three Years	Three to Five Years	Over Five Years	Total
	December 31, 2020				
	Carrying Value

Total credit derivatives	$ 160,071	$ 95,016	$ 101,104	$ 30,181	$ 386,372

The notional amount represents the maximum amount payable by the Corporation for most credit derivatives. However, the Corporation does not monitor its exposure to credit derivatives based solely on the notional amount because this measure does not take into consideration the probability of occurrence. As such, the notional amount is not a reliable indicator of the Corporation's exposure to these contracts. Instead, a risk framework is used to define risk tolerances and establish limits so that certain credit risk-related losses occur within acceptable, predefined limits.

Credit-related notes in the table above include investments in securities issued by CDO, collateralized loan obligation (CLO) and credit-linked note vehicles. These instruments are primarily classified as trading securities. The carrying value of these instruments equals the Corporation's maximum exposure to loss. The Corporation is not obligated to make any payments to the entities under the terms of the securities owned.

Credit-related Contingent Features and Collateral

The Corporation executes the majority of its derivative contracts in the OTC market with large, international financial institutions, including broker-dealers and, to a lesser degree, with a variety of non-financial companies. A significant majority of the derivative transactions are executed on a daily margin basis. Therefore, events such as a credit rating downgrade (depending on the ultimate rating level) or a breach of credit covenants would typically require an increase in the amount of collateral required of the counterparty, where applicable, and/or allow the Corporation to take additional protective measures such as early termination of all trades. Further, as previously discussed on page 135, the Corporation enters into legally enforceable master netting agreements that reduce risk by permitting closeout and netting of transactions with the same counterparty upon the occurrence of certain events.

Certain of the Corporation's derivative contracts contain credit risk-related contingent features, primarily in the form of ISDA master netting agreements and credit support documentation that enhance the creditworthiness of these instruments compared to other obligations of the respective counterparty with whom the Corporation has transacted. These contingent features may be for the benefit of the Corporation as well as its counterparties with respect to changes in the Corporation's creditworthiness and the mark-to-market exposure under the derivative transactions. At December 31, 2020 and 2019, the Corporation held cash and securities collateral of $96.5 billion and $84.3 billion and posted cash and securities collateral of $88.6 billion and $69.1 billion in the normal course of business under derivative agreements, excluding cross-product margining agreements where clients are permitted to margin on a net basis for both derivative and secured financing arrangements.

In connection with certain OTC derivative contracts and other trading agreements, the Corporation can be required to provide additional collateral or to terminate transactions with certain counterparties in the event of a downgrade of the senior debt ratings of the Corporation or certain subsidiaries. The amount of additional collateral required depends on the contract and is usually a fixed incremental amount and/or the market value of the exposure.

At December 31, 2020, the amount of collateral, calculated based on the terms of the contracts, that the Corporation and certain subsidiaries could be required to post to counterparties but had not yet posted to counterparties was $2.6 billion, including $1.2 billion for Bank of America, National Association (BANA).

Some counterparties are currently able to unilaterally terminate certain contracts, or the Corporation or certain subsidiaries may be required to take other action such as find a suitable replacement or obtain a guarantee. At December 31, 2020 and 2019, the liability recorded for these derivative contracts was not significant.

The following table presents the amount of additional collateral that would have been contractually required by derivative contracts and other trading agreements at December 31, 2020 if the rating agencies had downgraded their long-term senior debt ratings for the Corporation or certain subsidiaries by one incremental notch and by an additional second incremental notch.

Additional Collateral Required to be Posted Upon Downgrade at December 31, 2020

(Dollars in millions)	One incremental notch	Second incremental notch
Bank of America Corporation	$ 300	$ 735
Bank of America, N.A. and subsidiaries [1]	61	570

[1] Included in Bank of America Corporation collateral requirements in this table.

The following table presents the derivative liabilities that would be subject to unilateral termination by counterparties and the amounts of collateral that would have been contractually required at December 31, 2020 if the long-term senior debt ratings for the Corporation or certain subsidiaries had been lower by one incremental notch and by an additional second incremental notch.

Derivative Liabilities Subject to Unilateral Termination Upon Downgrade at December 31, 2020

(Dollars in millions)	One incremental notch	Second incremental notch
Derivative liabilities	$ 45	$ 1,035
Collateral posted	23	544

Valuation Adjustments on Derivatives

The Corporation records credit risk valuation adjustments on derivatives in order to properly reflect the credit quality of the counterparties and its own credit quality. The Corporation calculates valuation adjustments on derivatives based on a modeled expected exposure that incorporates current market risk factors. The exposure also takes into consideration credit mitigants such as enforceable master netting agreements and collateral. CDS spread data is used to estimate the default probabilities and severities that are applied to the exposures. Where no observable credit default data is available for counterparties, the Corporation uses proxies and other market data to estimate default probabilities and severity.

The table below presents credit valuation adjustment (CVA), DVA and FVA gains (losses) on derivatives (excluding the effect of any related hedge activities), which are recorded in market making and similar activities, for 2020, 2019 and 2018. CVA gains reduce the cumulative CVA thereby increasing the derivative assets balance. DVA gains increase the cumulative DVA thereby decreasing the derivative liabilities balance. CVA and DVA losses have the opposite impact. FVA gains related to derivative assets reduce the cumulative FVA thereby increasing the derivative assets balance. FVA gains related to derivative liabilities increase the cumulative FVA thereby decreasing the derivative liabilities balance. FVA losses have the opposite impact.

Valuation Adjustments Gains (Losses) on Derivatives [1]

(Dollars in millions)	**2020**	2019	2018
Derivative assets (CVA)	**$ (118)**	$ 72	$ 77
Derivative assets/liabilities (FVA)	**(24)**	(2)	(15)
Derivative liabilities (DVA)	**24**	(147)	(19)

[1] At December 31, 2020, 2019 and 2018, cumulative CVA reduced the derivative assets balance by $646 million, $528 million and $600 million, cumulative FVA reduced the net derivatives balance by $177 million, $153 million and $151 million, and cumulative DVA reduced the derivative liabilities balance by $309 million, $285 million and $432 million, respectively.

NOTE 4 Securities

The table below presents the amortized cost, gross unrealized gains and losses, and fair value of AFS debt securities, other debt securities carried at fair value and HTM debt securities at December 31, 2020 and 2019.

Debt Securities

(Dollars in millions)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
	December 31, 2020			
Available-for-sale debt securities				
Mortgage-backed securities:				
Agency	$ 59,518	$ 2,370	$ (39)	$ 61,849

Held-to-maturity debt securities, substantially all U.S. agency mortgage-backed securities	215,730	4,433	(342)	219,821
Total debt securities [(3, 4)]	$ 469,633	$ 7,464	$ (809)	$ 476,288

(1) At December 31, 2020 and 2019, the underlying collateral type included approximately 37 percent and 49 percent prime, two percent and six percent Alt-A and 61 percent and 45 percent subprime.
(2) Primarily includes non-U.S. securities used to satisfy certain international regulatory requirements. Any changes in value are reported in market making and similar activities. For detail on the components, see *Note 20 – Fair Value Measurements*.
(3) Includes securities pledged as collateral of $65.5 billion and $67.0 billion at December 31, 2020 and 2019.
(4) The Corporation held debt securities from FNMA and FHLMC that each exceeded 10 percent of shareholders' equity, with an amortized cost of $260.1 billion and $118.1 billion, and a fair value of $267.5 billion and $120.7 billion at December 31, 2020, and an amortized cost of $157.2 billion and $54.1 billion, and a fair value of $160.6 billion and $55.1 billion at December 31, 2019.

At December 31, 2020, the accumulated net unrealized gain on AFS debt securities, excluding the amount related to debt securities previously transferred to held to maturity, included in accumulated OCI was $4.7 billion, net of the related income tax expense of $1.6 billion. The Corporation had nonperforming AFS debt securities of $20 million and $9 million at December 31, 2020 and 2019.

Effective January 1, 2020, the Corporation adopted the new accounting standard for credit losses that requires evaluation of AFS and HTM debt securities for any expected losses with recognition of an allowance for credit losses, when applicable. For more information, see *Note 1 – Summary of Significant Accounting Principles*. At December 31, 2020, the Corporation had $200.0 billion in AFS debt securities, which were primarily U.S. agency and U.S. Treasury securities that have a zero credit loss assumption. For the remaining $34.5 billion in AFS debt securities, the amount of ECL was insignificant. Substantially all of the Corporation's HTM debt securities are U.S. agency and U.S. Treasury securities and have a zero credit loss assumption.

At December 31, 2020 and 2019, the Corporation held equity securities at an aggregate fair value of $769 million and $891 million and other equity securities, as valued under the measurement alternative, at a carrying value of $240 million and $183 million, both of which are included in other assets. At December 31, 2020 and 2019, the Corporation also held money market investments at a fair value of $1.6 billion and $1.0 billion, which are included in time deposits placed and other short-term investments.

The gross realized gains and losses on sales of AFS debt securities for 2020, 2019 and 2018 are presented in the table below.

Gains and Losses on Sales of AFS Debt Securities

(Dollars in millions)	2020	2019	2018
Gross gains	$ 423	$ 336	$ 169
Gross losses	(12)	(119)	(15)
Net gains on sales of AFS debt securities	$ 411	$ 217	$ 154
Income tax expense attributable to realized net gains on sales of AFS debt securities	$ 103	$ 54	$ 37

The table below presents the fair value and the associated gross unrealized losses on AFS debt securities and whether these securities have had gross unrealized losses for less than 12 months or for 12 months or longer at December 31, 2020 and 2019.

Total AFS Debt Securities in a Continuous Unrealized Loss Position

	Less than Twelve Months		Twelve Months or Longer		Total	
(Dollars in millions)	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses

Total taxable securities	33,971		40,266		84,806		70,784		229,827	
Tax-exempt securities	874		8,554		4,566		2,780		16,774	
Total debt securities carried at fair value	**$ 34,845**		**$ 48,820**		**$ 89,372**		**$ 73,564**		**$ 246,601**	
Fair value of HTM debt securities [(2)]	**$ 14**		**$ 69**		**$ 17,139**		**$ 430,958**		**$ 448,180**	

(1) The weighted-average yield is computed based on a constant effective interest rate over the contractual life of each security. The average yield considers the contractual coupon and the amortization of premiums and accretion of discounts, excluding the effect of related hedging derivatives.

(2) Substantially all U.S. agency MBS.

NOTE 5 Outstanding Loans and Leases and Allowance for Credit Losses

The following tables present total outstanding loans and leases and an aging analysis for the Consumer Real Estate, Credit Card and Other Consumer, and Commercial portfolio segments, by class of financing receivables, at December 31, 2020 and 2019.

(Dollars in millions)	30-59 Days Past Due [1]	60-89 Days Past Due [1]	90 Days or More Past Due [1]	Total Past Due 30 Days or More	Total Current or Less Than 30 Days Past Due [1]	Loans Accounted for Under the Fair Value Option	Total Outstandings
	December 31, 2020						
Consumer real estate							
Core portfolio							
Residential mortgage	$ 1,157	$ 175	$ 786	$ 2,118	$ 213,155		$ 215,273
Home equity	126	61	269	456	29,872		30,328
Non-core portfolio							
Residential mortgage	273	122	913	1,308	6,974		8,282
