## Baton Rouge MSA

Chase ranked first in deposits out of 34 institutions with 35.5 percent market share.
In overall home mortgage lending, Chase ranked second out of 415 lenders with 4.9 percent market share, placing it in the top one percent of lenders. This is a highly competitive market with no significantly dominant lender. The top lender was GMFS LLC with 9.5 percent market share.

In small loans to businesses, Chase ranked third out of 97 institutions with 10.0 percent market share, placing it in the top three percent of lenders. The other major lenders and respective market shares are American Express National Bank (17.9 percent) and Lake Forest Bank and Trust (11.5 percent).

In small loans to farms, Chase ranked second out of 11 lenders with a 20.9 percent market share. The other major lenders and respective market shares are John Deere Financial, F.S.B. (29.9 percent), Wells Fargo Bank, N.A. (16.4 percent), Capital One, N.A. (7.5 percent), and Bank of America, N.A. (7.5 percent).

## Monroe-Ruston CSA

Chase ranked first in deposits of 17 institutions with market share of 35.5 percent.

In overall home mortgage lending, Chase ranked sixth out of 221 lenders with 4.2 percent market share, placing it in the top three percent of lenders. This is a highly competitive market. The top three lenders and their market share are Origin Bank ( 8.0 percent), BancorpSouth Bank ( 6.3 percent), and Wells Fargo Bank, N.A. (5.4 percent).

In small loans to businesses, Chase ranked fourth out of 63 institutions with 7.6 percent market share. The top three lenders and their market share are Origin Bank ( 15.5 percent), American Express National Bank (14.9 percent), and Lake Forest Bank and Trust (8.3 percent).

In small loans to farms, Chase ranked second out of the 10 lenders with a 20.5 percent market share. The other major lenders and respective market shares are John Deere Financial, F.S.B (21.8 percent), Wells Bank, N.A. (20.5 percent), and BancorpSouth (15.4 percent).

## Distribution of Loans by Income Level of the Geography

The bank exhibits an adequate geographic distribution of loans in its AAs.

## Home Mortgage Loans

Refer to Table O in the state of Louisiana section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of home mortgage loan originations and purchases is adequate. The following information was taken into consideration when determining this rating.

## Baton Rouge MSA

- The limited proportion of housing units in low-income geographies, particularly OOUs (4.0 percent), constrained lending opportunities; therefore, performance in moderate-income geographies was given slightly more consideration due to the higher percentage of OOUs in those geographies.
- The level of competition in the AA (415 home mortgage lenders) was also considered and examiners placed greater significance on performance compared to the aggregate of lenders.
- Between 2017 and 2019, the proportion of loans in low-income areas was well below both the percentage of owner-occupied units and the aggregate distribution of loans. In moderate-income areas, the proportion of loans was below the percentage of owner-occupied units and near to the aggregate distribution of loans.
- During 2014 through 2016, performance in low-income geographies was well below the percentage of owner-occupied units and below the aggregate distribution of loans. The performance in moderate-income geographies was well below the percentage of owner-occupied units and near to the aggregate distribution of loans.

## Monroe-Ruston CSA

- The smaller proportion of housing units in low- and moderate-income geographies was considered, particularly OOUs ( 20.0 percent), which provided less lending opportunity compared to opportunities in MUI geographies (80.0 percent OOUs).
- The level of competition in the AA (221 home mortgage lenders) was also considered and examiners placed greater significance on performance compared to the aggregate of lenders.
- Between 2017 and 2019, the proportion of loans in low- and moderate-income areas was near to both the percentage of owner-occupied units and the aggregate distribution of loans.
- Between 2014 and 2016, performance was weaker than in 2017 to 2019. The proportion of loans in low-income areas was well below the percentage of owner-occupied units and near to the aggregate distribution of loans. The proportion of loans in moderate- income areas was below the percentage of owner-occupied units and exceeded the aggregate distribution of loans.

## Small Loans to Businesses

Refer to Table Q in the state of Louisiana section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses.

Based on the data in the table and the following considerations, the bank's overall geographic distribution of small loans to businesses for this evaluation is adequate. The following information was taken into consideration when determining this rating.

## Baton Rouge MSA

- The small proportion of businesses in low-income geographies ( 6.5 percent) and competition between 97 lenders constrains lending opportunities to existing businesses. Therefore, performance in moderate-income geographies was given slightly more consideration due to the higher percentage of businesses in those geographies.
- Performance against the aggregate distribution of lenders was given additional consideration as it reflects the difficulties all lenders are experiencing due to the economic constraints discussed above under the Description of the Full-Scope AA.
- Between 2017 and 2019, the proportion of small loans to businesses in low-income geographies was well below both the proportion of businesses and the aggregate distribution, while the proportion of small loans to businesses in moderate-income geographies was below both the proportion of businesses and the aggregate distribution
- During 2014 to 2016, the bank's proportion of small loans to businesses in low- and moderateincome geographies was respectively well below and below the proportion of businesses and the aggregate distribution.

## Monroe-Ruston CSA

- Performance against the aggregate distribution of lenders was given additional consideration as it reflects the difficulties all lenders are experiencing due to the economic constraints discussed above under the Description of the Full-Scope AA.
- Between 2017 and 2019, the proportion of small loans to businesses in low-income geographies was well below both the proportion of businesses and the aggregate distribution, while the proportion of small loans to businesses in moderate-income geographies was below the proportion of businesses and exceeded the aggregate distribution.
- During 2014 to 2016, the bank's proportion of small loans to businesses in low- and moderateincome geographies was respectively well below and below the proportion of businesses. The proportion of loans in low- and moderate-income geographies was respectively below and near to the aggregate distribution.

## Small Loans to Farms

Refer to Table $S$ in the state of Louisiana section of appendix $D$ for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to farms.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of small loans to farms is poor. The following information was taken into consideration when determining this rating.

## Baton Rouge MSA

- The limited number of farms in low-income geographies ( 3.6 percent), constrained lending opportunities; therefore, performance in moderate-income geographies was given slightly more consideration due to the higher number of farms in those geographies.
- The fact that farm lending is not a focus of the bank was also considered.
- Between 2017 and 2019, the proportion of loans to small farms in low-income geographies met the proportion of farms in those geographies and significantly exceeded the aggregate distribution of all lenders. The proportion of loans to small farms in moderate-income geographies was well below the proportion of farms in those geographies and near to the aggregate distribution of all lenders.
- Performance in low- and moderate-income geographies during the 2014 to 2016 period was weaker than performance during the 2017 to 2019 period. The proportion of loans to small farms in lowincome geographies was below the proportion of farms in those geographies and well below the aggregate distribution for the geographies. The proportion of loans to small farms in moderateincome geographies was well below both the proportion of farms in those geographies and the aggregate distribution.

## Monroe-Ruston CSA

- The limited percentage of farms in low-income geographies ( 5.5 percent), constrained lending opportunities; therefore, performance in moderate-income geographies was given slightly more consideration due to the higher percentage of farms in those geographies.
- The fact that farm lending is not a focus of the bank was also considered.
- Between 2017 and 2019, the proportion of loans to small farms in low-income geographies was well below both the proportion of farms and the aggregate distribution of all lenders. The proportion of loans to small farms in moderate-income geographies was below the proportion of farms and the aggregate distribution.
- The proportion of loans to small farms in low-income geographies was well below both the proportion of farms and aggregate distribution. The proportion of loans to small farms in moderateincome geographies was well below the proportion of farms and exceeded the aggregate distribution.

## Lending Gap Analysis

A review of home mortgage loans, small loans to business, and small loans to farms including summary reports and AA maps did not identify any unexplained conspicuous lending gaps in the bank's activities.

## Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and business and farms of different sizes, given the product lines offered by the institution.

## Home Mortgage Loans

Refer to Table P in the state of Louisiana section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases.

Based on the data in the tables and the following considerations, the bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good. The following information was taken into consideration when determining this rating.

## Baton Rouge MSA

- Greater significance was placed on performance against the aggregate distribution as it reflects the difficulties all lenders are experiencing due to competition and the economic constraints discussed above under the Description of the Full-Scope AA.
- Examiners particularly considered the high level of poverty and housing affordability challenges, especially for low-income borrowers.
- Between 2017 and 2019, the proportion of loans to low-income borrowers was well below the percentage of low-income families and below the aggregate distribution of lenders. The proportion of moderate-income loans met the proportion of moderate-income families and was near to the aggregate distribution of all lenders.
- During 2014 to 2016 the bank's performance was generally consistent with performance between 2017 to 2019. The proportion of loans to low-income borrowers was well below the percentage of low-income families and near to the aggregate distribution of lenders. The proportion of moderateincome loans exceeded the proportion of moderate-income families and was near to the aggregate distribution.

## Monroe-Ruston CSA

- Greater significance was placed on performance against the aggregate distribution as it reflects the difficulties all lenders are experiencing due to competition and the economic constraints discussed above under the Description of the Full-Scope AA.
- Examiners particularly considered the high level of poverty, unemployment rate, and housing affordability challenges, especially for low-income borrowers.
- Between 2017 and 2019, the proportion of loans to low-income borrowers was well below the percentage of low-income families but exceeded the aggregate distribution of lenders. The proportion of moderate-income loans was well below the proportion of moderate-income families and below the aggregate distribution of all lenders.
- During 2014 to 2016, the bank's lending to moderate-income borrowers was stronger than performance between 2017 to 2019. The proportion of loans to low-income borrowers was well below the percentage of low-income families and below the aggregate distribution of lenders. The proportion of moderate-income loans exceeded both the proportion of moderate-income families and the aggregate distribution.

## Small Loans to Businesses

Refer to Table R in the state of Louisiana section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses.

Based on the data in the tables and the following factors, the distribution of the bank's originations and purchases of small loans to businesses by revenue category is good. The following information was taken into consideration when determining this rating.

## Baton Rouge MSA

- Greater significance was placed on performance against the aggregate distribution of lenders as it reflects the difficulties all lenders are experiencing due to the economic constraints discussed above under the Description of the Full-Scope AA.
- Between 2017 and 2019, the bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.
- During 2014 to 2016, the bank's performance was weaker than performance between 2017 and 2019. The bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was well below the percentage of businesses and exceeded the aggregate distribution.

## Monroe-Ruston CSA

- Greater significance was placed on performance against the aggregate distribution of lenders as it reflects the difficulties all lenders are experiencing due to the economic constraints discussed above under the Description of the Full-Scope AA.
- Between 2017 and 2019, the bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.
- During 2014 to 2016, the bank's performance was weaker than performance between 2017 and 2019. The bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was well below the percentage of businesses and exceeded the aggregate distribution.

## Small Loans to Farms

Refer to Table T in the state of Louisiana section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to farms.

Based on the data in the table and the following considerations, the distribution of the bank's originations and purchases of small loans to farms by revenue category is good. The following information was taken into consideration when determining this rating.

## Baton Rouge MSA

- Greater significance was placed on performance against the aggregate distribution of lenders as it reflects the difficulties all lenders are experiencing due to the economic constraints discussed above under the Description of the Full-Scope AA.
- The fact that farm lending is not a focus of the bank was considered.
- Between 2017 and 2019, the bank's percentage of loans to farms with revenues of $\$ 1$ million or less was near to the percentage of farms and significantly exceeded the aggregate distribution.
- During 2014 to 2016, the bank's percentage of loans to farms with revenues of $\$ 1$ million or less was below the percentage of farms and significantly exceeded the aggregate distribution.

## Monroe-Ruston CSA

- Greater significance was placed on performance against the aggregate distribution of lenders as it reflects the difficulties all lenders are experiencing due to the economic constraints discussed above under the Description of the Full-Scope AA.
- The fact that farm lending is not a focus of the bank was considered.
- Between 2017 and 2019, the bank's percentage of loans to farms with revenues of $\$ 1$ million or less was below the percentage of farms and exceeded the aggregate distribution.
- During 2014 to 2016, the bank's performance was consistent with performance between 2017 and 2019. The bank's percentage of loans to farms with revenues of $\$ 1$ million or less was below the percentage of farms and exceeded the aggregate distribution.

## Community Development Lending

The institution has made a low level of CD loans.
The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

## Baton Rouge MSA

The bank made four CD loans in its AA for a total of $\$ 21.9$ million, which represents 2.6 percent of the tier 1 capital allocated to the AA.

Examples of CD loans include:

- In February 2015, the bank made a $\$ 9.3$ million construction loan to build a new apartment complex in a moderate-income tract in Baton Rouge, LA. The project created 144 affordable housing units for low- and moderate-income senior residents age 55 and older.
- In May 2018, the bank made a $\$ 5.5$ million construction loan develop 48 new affordable housing units for low- and moderate-income seniors in Baton Rouge, LA.

## Monroe-Ruston CSA

The bank made two CD loans in its AA for a total of $\$ 795,000$, which represents 0.9 percent of the tier 1 capital allocated to the AA.

An example of CD loans includes:

- In October 2014, the bank made a $\$ 765,000$ loan to provide affordable housing in an area that the National Low-Income Housing Coalition identified as being in need. Sixty one of the 67 units will be restricted to low- and moderate-income families and individuals.

## Product Innovation and Flexibility

The bank made extensive use of innovative and/or flexible lending practices to serve AA credit needs in each of the full-scope AAs reviewed. Refer to the comments in the Product Innovation and Flexibility section of this performance evaluation for additional details regarding the programs.

## Baton Rouge MSA

As outlined below, a total of 2,696 loans were funded totaling $\$ 478.8$ million.

| Loan Type | Number of <br> Loans | Dollar Amount <br> $\mathbf{( \$ 0 0 0 ' s )}$ |
| :--- | :---: | :---: |
| DreaMaker | 191 | 33,808 |
| FHA | 450 | 57,461 |
| HARP | 256 | 31,845 |
| VA | 118 | 21,411 |
| SBA | 57 | 10,703 |
| USDA | 1,624 | 323,555 |

## Monroe-Ruston CSA

As outlined below, a total of 648 loans were funded totaling $\$ 83.1$ million.

| Loan Type | Number of <br> Loans | Dollar Amount <br> $\mathbf{( \$ 0 0 0 ' s )}$ |
| :--- | :---: | :---: |
| DreaMaker | 18 | 2,381 |

| SBA | 10 | 934 |
| USDA | 432 | 56,289 |

## Conclusions for Areas Receiving a Limited-Scope Review

Performance in the limited-scope AAs was factored into the state's overall Low Satisfactory Lending Test rating and did not significantly affect the initial overall conclusions based on the AAs receiving full-scope review. Based on limited-scope reviews, the bank's performance under the Lending Test in the New Orleans-Metairie-Hammond CSA and in the Lafayette-Opelousas-Morgan City CSA is stronger than the bank's overall adequate performance in the full-scope areas. In the Alexandria MSA, Houma-Thibodaux MSA, Lake Charles MSA, Shreveport-Bossier City MSA, and Louisiana Non-MSA (DeRidder), performance is consistent with the bank's overall performance under the Lending Test in the full-scope areas.

Refer to Tables O through T in the state of Louisiana section of appendix D for the facts and data that support these conclusions.

## INVESTMENT TEST

The bank's performance under the Investment Test in the state of Louisiana is rated High Satisfactory.

## Conclusions for Area Receiving a Full-Scope Review

Based on full-scope reviews, the bank's performance in the Baton Rouge MSA is adequate and in Monroe-Ruston CSA is excellent.

** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

## Baton Rouge MSA

The bank has an adequate level of qualified investments and grants, but not in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period qualified investments represent 2.3 percent of tier 1 capital allocated to the AA.

The bank exhibits excellent responsiveness to credit and community economic development needs. All current period investments and 84.4 percent of the total dollar amount of prior period investments are considered responsive to credit and community economic development needs such as affordable housing, community service, and revitalization/stabilization efforts. The bank made three qualified investments totaling $\$ 9.7$ million supporting affordable housing in the current period. Twenty-six current period grants totaled $\$ 1.3$ million with 50.4 percent of the total dollar amount supporting revitalization/stabilization efforts, 41.0 percent supporting community service, and 8.6 percent supporting affordable housing. Additionally, all prior period investments still outstanding supported affordable housing.

The bank occasionally uses innovative and/or complex investments to support CD initiatives. None of the current period investments are considered innovative and/or complex. However, 6.1 percent of the total dollar amount of current period investments are considered catalyst investments as they are part of
a local government plan for revitalization/stabilization that will encourage future growth and improvement. Additionally, 63.5 percent of the total dollar amount of prior investments still outstanding are considered complex as they are Direct Investment LIHTC transactions.

Examples of CD Investments in the AA include:

- The bank provided $\$ 7.4$ million of equity in a project that was funded by a LIHTC fund investment, contributing to the creation of 100 affordable housing units.
- The bank provided a $\$ 100,000$ grant to a redevelopment authority to allow them to redevelop Baton Rouge's oldest commercial corridor into a transit-oriented neighborhood. The goal was to help stabilize and revitalize the Plank Road corridor communities with opportunities for existing and new businesses, including workforce development and reduction of crime and public health hazards. The bank's support helped with the efforts to build strong communities where blight mitigation and property stabilization is a priority and helped them grow and stabilize the area.
- The bank provided five grants totaling $\$ 339,000$ to a redevelopment organization whose mission is to develop and promote the growth and revitalization of mid-city Baton Rouge by attracting new and retaining current residents.
- Three grants helped revitalize and stabilize communities through redeveloping underutilized or vacant buildings, in this case, redevelopment of three historic fire stations that are no longer in service. Revitalization of these three underutilized buildings will drive economic growth, preserve historical sites, and inspire reinvestment in low- and moderate-income communities. These investments serve a catalyst for other community development activities for revitalization or stabilization that will encourage future growth and improvements in the area.
- One grant was for to provide continuous support for the organization's home ownership program, which serves as a HUD approved housing counseling agency that provides credit counseling, firsttime home buyer education, financial literacy and foreclosure intervention and default counseling in East Baton Rouge and surrounding parishes. A significant majority or 90 percent of its program participants earn an annual income that is less than 80 percent the area's median family income.
- The remaining grant was for the organization's leadership program, geared to residents demonstrating an interest in leading neighborhood change. Residents will be recruited from several areas, Old South Baton Rouge, Convention Street, Glen Oaks, Scotlandville, and Plank Road, and will receive training on effective strategies for improved neighborhood development.

## Monroe-Ruston CSA

The bank has an excellent level of qualified CD investments and grants, but not in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period qualified investments represent 7.6 percent of tier 1 capital allocated to the AA.

The bank exhibits excellent responsiveness to credit and community economic development needs. All current and prior period investments are considered responsive to credit and community economic development needs such as affordable housing and community service. The bank made six current period grants totaling $\$ 385$ thousand with 84.4 percent of the total dollar amount supporting community
service and 15.6 percent supporting affordable housing. Additionally, all prior period investments still outstanding supported affordable housing.

The bank makes significant use of innovative and/or complex investments to support CD initiatives. None of the current period investments are considered innovative and/or complex. However, 85.7 percent of the total dollar amount of prior investments still outstanding are considered complex as they are Direct Investment LIHTC transactions.

Examples of CD Investments in the AA include:

- The bank provided four grants totaling $\$ 314,980$ to a local foundation to support their Workforce Solution's Program to benefit low-income students in Monroe.
- One grant supported the Foundation's workforce development plan, including specific needs of businesses. Focusing on those needs, area institutions of higher education developed programs to teach and train students. After graduation, students were linked back to employers for placement in good jobs with benefits.
- One grant supported the foundation's Accounting Tech Program for high school students in Quachita Parish, LA. The program prepares participants to work as bookkeepers, tax preparers and other careers in high demand in the region. It also prepares the students to enroll at in a local community college and university. The community college will work in partnership with Monroe City Schools to develop and supervise a remedial math program for students who want to enroll in the Accounting Tech program but need to improve their math score.
- Two grants were provided for the foundation's healthcare workforce strategy to benefit low-income residents in Monroe, LA. Funding will support the foundation's workforce development plan in partnership with another organization that find solutions for employers who could not find skilled and qualified employees.
- The bank provided a $\$ 60,000$ grant to community development corporation, located in Monroe, for its neighborhood revitalization pilot project. Funding was used to launch a 24 -month pilot project focused on cultivating neighborhood developers with the capacity to build affordable housing and assist low- and moderate-income families in attaining homeownership. Eighty percent of those who benefitted are of low- and moderate-income. The project was a collaboration with the City of Monroe's Planning and Urban Development Department targeting South Monroe neighborhoods struggling with blight, aging housing stock and in need of new investment. The project provided certification training and support for small contractors/developers/individuals interested in being neighborhood developers that advanced a system to transfer adjudicated property to those who complete the program and to build affordable homes for first-time homebuyers.
- The bank provided a $\$ 10,000$ grant to an organization to cover its operating expenses. The organization provides individuals with developmental disabilities assistance with learning social and other skills and teaches those without disabilities how to relate without hesitations. The majority of those the organization serves are of low-income.

## Statewide Investments in the State of Louisiana

The bank has 48 current and prior period CD investments and grants with and without a $\mathrm{P} / \mathrm{M} / \mathrm{F}$ to serve AAs in the broader statewide or regional area. Ninety-four percent support affordable housing and six percent support community services. These statewide investments further supported the bank's overall good performance under the Investment Test in the state of Louisiana.

## Conclusions for Areas Receiving Limited-Scope Reviews

Based on limited-scope reviews, the bank's performance under the Investment Test in the Lafayette-Opelousas-Morgan City CSA is consistent with the bank's overall good performance under the Investment Test in the full-scope areas. Performance under the Investment Test in the New Orleans-Metairie-Hammond CSA and Houma-Thibodaux MSA is stronger than the bank's overall good performance under the Investment Test in the full-scope areas. Stronger performance is due to a higher level of investments. Performance under the Investment Test in the Shreveport-Bossier City MSA, Alexandria MSA, Lake Charles-Jennings CSA, and LA Non-Metro AA is weaker than the bank's overall good performance under the Investment Test in the full-scope areas. Weaker performance is based on low levels of qualified investments. Performance differences in the limited-scope AAs did not impact the overall Investment Test rating for the state of Louisiana.

## SERVICE TEST

The bank's performance under the Service Test in state of Louisiana is rated Outstanding.

## Conclusions for Areas Receiving Full-Scope Reviews

Based on a full-scope review, including the data in the tables below, the bank's performance in the Baton Rouge MSA is excellent and the bank's performance in the Monroe-Ruston CSA is excellent.

## Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the bank's AA.

## Baton Rouge MSA

Based on the data in the table below, the branch distribution in low- and moderate-income geographies exceeds the percentage of the population in these respective geographies.

## Monroe-Ruston CSA

Based on the data in the table below, the branch distribution in low- and moderate-income geographies is near to the percentage of the population in these respective geographies. When considering the four adjacent branches, two serving low- income geographies, and two serving moderate-income geographies the distribution exceeds the percentage of populations within both low- and moderate-income geographies.

Examiners considered internal data provided by Chase indicating the extent to which adjacent branches, located in middle- and upper-income geographies, are being used by customers residing in nearby lowand moderate-income geographies. Middle- and upper-income branch usage data had a positive impact on the evaluation of the accessibility of service delivery systems.

## Baton Rouge MSA

The OCC considered alternative delivery systems, including the bank's 72 ATMs, online banking, mobile banking, and telephone banking in evaluating the accessibility of delivery systems to deliver retail banking services to low- and moderate-income geographies. Bank-provided data for online, mobile, and telephone banking showed increases in the adoption of these services by low- and moderateincome individuals. Alternative delivery systems enhance the delivery of banking services to geographies and individuals of all income levels and had a positive effect on the retail banking services conclusion.

## Monroe-Ruston CSA

The OCC considered alternative delivery systems, including the bank's 20 ATMs, online banking, mobile banking, and telephone banking in evaluating the accessibility of delivery systems to deliver retail banking services to low- and moderate-income geographies. Bank-provided data for online, mobile, and telephone banking showed increases in the adoption of these services by low-income individuals and decreases in the adoption of these services by moderate-income individuals. Alternative delivery systems generally enhance the delivery of banking services to geographies and individuals of all income levels and had a neutral effect on the retail banking services conclusion.

|  |  |  | Low | Mod | Mid | Upp |
| Baton Rouge MSA | 1 | 7 | -1 | -1 | -1 | -3 |
| Monroe-Ruston CSA | 0 | 3 | -1 | -1 | 0 | -1 |

## Baton Rouge MSA

To the extent changes have been made, the bank's closing of branches has not adversely affected the accessibility of its delivery systems, the accessibility of its delivery systems, particularly in low- and moderate-income geographies and/or to low- and moderate-income individuals. The bank closed one branch in a low-income and one in a moderate-income geography. The branch closures did not negatively impact the branch distribution relative to the population residing in those geographies.

Based on branch usage data, the OCC considered these branch closures to be mitigated. The closure in a low- and moderate-income geography was the result of a market exit, reduced customer usage trends, or branch consolidation based on the bank's retail branch consolidation strategy. Despite the branch closure, branch locations remained accessible to geographies and individuals of different income levels in the bank's AA.

Services, including where appropriate, business hours, do not vary in a way that inconveniences its AA, particularly low- and moderate-income geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 5:00 pm and Saturday from 9:00 am to 1:00 pm.

All retail banking services are available at all branches within the low- and moderate-income geographies.

## Monroe-Ruston CSA

To the extent changes have been made, the bank's closing of branches has not adversely affected the accessibility of its delivery systems, the accessibility of its delivery systems, particularly in low- and moderate-income geographies and/or to low- and moderate-income individuals. The bank closed one branch in a low-income and one in a moderate-income geography. The branch closures did not negatively impact the branch distribution relative to the population residing in those geographies.

Based on branch usage data, the OCC considered these branch closures to be mitigated. The closure in a low- and moderate-income geography was the result of a market exit, reduced customer usage trends, or branch consolidation based on the bank's retail branch consolidation strategy. Despite the branch closure, branch locations remained accessible to geographies and individuals of different income levels in the bank's AA.

Services, including where appropriate, business hours, do not vary in a way that inconveniences its AA, particularly low- and moderate-income geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 6:00 pm and Saturday from 9:00 am to 2:00 pm.

All retail banking services are available at all branches within the low- and moderate-income geographies.

## Community Development Services

## Baton Rouge MSA

The bank provides an adequate level of CD services.

Bank records show that employees provided technical assistance and/or job-specific expertise for 174 CD service activities to 16 organizations for a total of 372 qualified hours of service. All the bank's assistance was to organizations that provide community services to low- and moderate-income individuals and families. The services were responsive to the needs of the AA particularly financial education. The following are examples of CD services provided in this AA:

- Bank employees conducted 78 financial education and first-time homebuyer seminars conjunction with a non-profit organization that served 548 low- and moderate-income individuals.

## Monroe-Ruston CSA

The bank provides an adequate level of CD services.
Bank records show that employees provided technical assistance and/or job-specific expertise for 54 CD service activities to 6 organizations for a total of 150 qualified hours of service. All the bank's assistance was to organizations that provide community services to low- and moderate-income individuals and families. The services were responsive to the needs of the AA particularly financial education. The following are examples of CD services provided in this AA:

- Bank employees conducted 43 financial literacy seminars conjunction with a non-profit organization that served 215 low- and moderate-income individuals.

## Conclusions for Areas Receiving Limited-Scope Reviews

Based on limited-scope reviews, the bank's performance under the Service Test in the Lafayette-Opelousas-Morgan City, LA and Lake Charles-Jennings, LA AAs is consistent with the bank's overall performance under the Service Test in the full-scope area. The bank's performance under the Service Test in the Alexandria, LA; Houma-Thibodaux, LA; New Orleans-Metairie-Hammond, LA-MS; and Shreveport-Bossier City, LA AAs is weaker than the bank's overall performance under the Service Test in the full-scope area due to lower percentage of branch distribution in low- and moderate-income geographies.

Based on a limited-scope review, the bank's performance under the Service Test in the DeRidder-Fort Polk South, LA CSA is weaker than the bank's overall performance under the Service Test in the fullscope area. The OCC based limited-scope conclusions on the provision of services to the AA in general as there are no low- and moderate-income census tracts in the CSA.

## SERVICE TEST

The bank's performance under the Service Test in state of Louisiana is rated High Satisfactory.

## Conclusions for Areas Receiving Full-Scope Reviews

Based on a full-scope review, including the data in the tables below, the bank's performance in the Baton Rouge MSA and the Monroe-Ruston CSA is good. More weight was given to the Baton Rouge, LA MSA due to the larger deposit base, lending, and branch presence.

## Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the bank's full-scope AAs.

Examiners evaluated the data as outlined in the Scope section at the front of this document including bank-provided data on usage of branches adjacent to low- and moderate-income geographies by individuals residing in those geographies and on increases in the usage of alternative delivery systems.

## Baton Rouge MSA

Based on the data in the table below and performance context, the branch distribution is excellent. In low- and moderate-income geographies, the distribution exceeds the percentage of the population. The bank had two branches in low-income geographies and eight branches in moderate-income geographies. The distribution was augmented by one MUI tract branch that serves low-income tracts and one MUI tract branches that serves moderate-income tracts. Examiners reviewed data on the accounts held and transactions conducted at the MUI branches and confirmed they were serving the adjacent low- and moderate-income populations.

## Monroe-Ruston CSA

Based on the data in the table below and performance context, the branch distribution is good. In lowand moderate-income geographies, the distribution is near to the percentage of the population. The bank had one branch in a low-income geography and one branch in a moderate-income geography. The distribution was augmented by one MUI tract branch that serves low-income tracts and two MUI tract branches that serve moderate-income tracts. Examiners reviewed data on the accounts held and transactions conducted at the MUI branches and confirmed they were serving the adjacent low- and moderate-income populations.

## Baton Rouge MSA

Alternative delivery systems enhanced the delivery of banking services to geographies and individuals of all income levels. The OCC considered the availability and use of alternative delivery systems over the evaluation period. This included review of the bank's 72 deposit-taking ATMs, online banking, mobile banking, and telephone banking to determine the effectiveness of these systems to make retail banking services available to individuals in low- and moderate-income geographies. The bank increased the deposit-taking ATMs in low- and moderate-income geographies by 50.0 percent over the prior rating period to eight ( 11.1 percent) deposit-taking ATMs in low-income geographies and 22 (30.6 percent)

ATMs in moderate-income geographies. Additionally, bank-provided data on use of online, mobile, and telephone banking showed increases in the adoption of these services by low- and moderate-income individuals from the prior rating period.

## Monroe-Ruston CSA

Alternative delivery systems generally enhanced the delivery of banking services to geographies and individuals of all income levels. The OCC considered the availability and use of alternative delivery systems over the evaluation period. This included review of the bank's 20 deposit-taking ATMs, online banking, mobile banking, and telephone banking to determine the effectiveness of these systems to make retail banking services available to individuals in low- and moderate-income geographies. The bank decreased the deposit-taking ATMs in low- and moderate-income geographies to two (10.0 percent) deposit-taking ATMs in low-income geographies and four (20.0 percent) ATMs in moderate-income geographies. Bank-provided data on use of online, mobile, and telephone banking showed increases in the adoption of these services by low- and moderate-income individuals from the prior rating period.

| Monroe-Ruston <br> CSA | 0 | 3 | -1 | -1 | 0 | -1 |  |

## Baton Rouge MSA

The bank's opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and/or to low- and moderateincome individuals. The bank closed one branch in a low-income geography and closed one branch in a moderate-income geography. Branch closures were due to reduced customer usage and proximity to other Chase branches. Despite the branch closures, branch locations remained accessible to geographies and individuals of different income levels in the bank's AA.

Services, including where appropriate, business hours, do not vary in a way that inconveniences its AA, particularly low- and moderate-income geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 5:00 pm and Saturday from 9:00 am to 1:00 pm. All retail banking services are available at all branches within the low- and moderate-income geographies.

## Monroe-Ruston, CSA

The bank's opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and/or to low- and moderateincome individuals. The bank closed one branch in a low-income geography and closed one branch in a moderate-income geography. Branch closures were due to proximity to other Chase branches. Despite the branch closures, branch locations remained accessible to geographies and individuals of different income levels in the bank's AA as the three adjacent branches provided continued accessibility to customers in the low- and moderate-income geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences its AA, particularly low- and moderate-income geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 6:00 pm and Saturday from 9:00 am to 2:00 pm. All retail banking services are available at all branches within the low- and moderate-income geographies.

## Community Development Services

## Baton Rouge MSA

The bank provides an adequate level of CD services.
Bank records show that employees provided technical assistance and/or job-specific expertise for 174 CD service activities to 16 organizations for a total of 372 qualified hours of service. All the bank's assistance was to organizations that provide community services to low- and moderate-income individuals and families. The services were responsive to the needs of the AA, particularly financial education. The following is an example of CD services provided in this AA:

- Bank employees conducted 78 financial education and first-time homebuyer seminars conjunction with a non-profit organization that served 548 low- and moderate-income individuals.

## Monroe-Ruston CSA

The bank provides an adequate level of CD services.
Bank records show that employees provided technical assistance and/or job-specific expertise for 54 CD service activities to 6 organizations for a total of 150 qualified hours of service. All the bank's assistance was to organizations that provide community services to low- and moderate-income individuals and families. The services were responsive to the needs of the AA particularly financial education. The following is an example of CD services provided in this AA:

- Bank employees conducted 43 financial literacy seminars conjunction with a non-profit organization that served 215 low- and moderate-income individuals.

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall High Satisfactory Service Test rating and did not significantly change the initial overall conclusions based on the AAs receiving full-scope review. Based on limited-scope reviews, the bank's performance under the Service Test in the Lafayette-Opelousas-Morgan City, LA and Lake Charles-Jennings, LA AAs is stronger than the bank's overall performance under the Service Test in the full-scope areas due to stronger branch distribution. Performance in the Houma-Thibodaux, LA and Shreveport-Bossier City, LA AAs is consistent with performance in full-scope AAs, while performance in the Alexandria, LA and New Orleans-Metairie-Hammond, LA-MS AAs is weaker than the bank's performance in the full-scope areas due to weaker branch distribution in low- and moderate-income geographies. The bank's performance under the Service Test in the DeRidder-Fort Polk South, LA CSA is also weaker than the bank's overall performance under the Service Test in the full-scope areas. The OCC based limited-scope conclusions on the provision of services to the AA in general as there are no low- and moderate-income census tracts in the CSA.

## State Rating

## State of Massachusetts

CRA rating for the State of Massachusetts ${ }^{\mathbf{1 8} \text { : Outstanding }}$
The Lending Test is rated: Outstanding
The Investment Test is rated: Outstanding
The Service Test is rated: High Satisfactory
The major factors that support this rating include:

- An excellent level of lending activity.
- A good geographic distribution of home mortgage loans and small loans to businesses.
- Good borrower distribution of home mortgage loans and small loans to businesses.
- A leader in making CD loans, which had significantly positive affect on the rating.
- The extensive use of flexible products, which had a positive effect on the rating.
- An excellent level of CD investments that demonstrated excellent responsiveness to credit and community economic development needs.
- The extensive use of innovative and/or complex qualified investments.
- A high level of investments in the broader statewide areas.
- Weak performance in limited-scope areas had a negative effect on readily accessible retail service delivery systems in the full-scope AA.
- Leadership in providing CD services that are responsive to AA needs.

## Description of Institution's Operations in Massachusetts

The state of Massachusetts is Chase's $30^{\text {th }}$ largest rating area based on its total deposits of $\$ 178.7$ million, representing less than one percent of the bank's total deposits. As of December 31, 2019, the bank operated 15 branches and 103 deposit-taking ATMs within the rating area, representing 0.3 percent of total branches and 0.6 percent of total ATMs. The bank originated and purchased approximately $\$ 7.5$ billion in loans or 1.1 percent of total bank loan originations and purchases during the evaluation period in the state.

According to FDIC deposit market share data, as of June 30, 2019, there were 143 banks operating 2,137 branches in the state of Massachusetts. The bank-maintained six branches with deposits of $\$ 178.0$ million in the state ranking it $111^{\text {th }}$ in deposit market share with 0.1 percent. State Street Bank and Trust Company was first in deposit market share with 26.3 percent, followed by Bank of America, N.A. with 19.3 percent and Citizens Bank with 10.4 percent.

The bank delineated three AAs in the state of Massachusetts. The Boston-Worcester-Providence CSA (Boston CSA), which accounts for 100 percent of the bank's deposits in Massachusetts, received a fullscope review. The bank entered the Worcester MSA portion of the rating area on March 20, 2019, and the Cambridge-Newton-Framingham MD portion of the rating area on March 21, 2019. The Pittsfield MSA and Springfield MSA, which have only deposit-taking ATMs and no branches, received limitedscope reviews. The delineated AAs are described in appendix A.

[^116]
## Boston CSA

The following table provides a summary of the demographics that includes housing and business information for the Boston CSA. Table A indicates that the volume of OOUs is small in low-income census tracts ( 3.5 percent) and over 23.5 percent of families in the AA are low-income. The Boston CSA's high cost of housing also limits access to affordable homeownership among LMI borrowers. The median housing value in the Boston CSA is approximately 4.2 times the averaged median income across the CSA, 5.3 times the moderate-income, and 8.5 times the low-income, indicating a limited proportion of OOUs are affordable to low- and moderate-income borrowers. One simplistic method used to determine housing affordability assumes a maximum monthly principal and interest payment of no more than 30 percent of the applicant's income.

In the Boston CSA, assuming a 30-year mortgage with a 5 percent interest rate, and not accounting for down payment, homeowners insurance, real estate taxes, or any additional monthly expenses, a lowincome borrower making $\$ 45,369$ per year (or less than 50 percent of the FFIEC adjusted median family income in the CSA) could afford a $\$ 164,991$ mortgage with a payment of $\$ 1,361$ per month; a moderateincome borrower earning $\$ 72,590$ per year (or less than 80 percent of the FFIEC adjusted median family income in the AA) could afford a $\$ 294,779$ mortgage with a payment of $\$ 2,178$ per month.

Median rents and the percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

## Economic Data

According to the September 2019 Moody's Analytics report the area has a highly educated workforce with a large presence of biotech and IT firms that bolsters high wage employment. Major employment industries include healthcare, education, professional and business services. Major employers include Partners Healthcare, University of Massachusetts, Stop and Shop Supermarkets, Steward Healthcare System, and Harvard University. Unemployment is low; however, the area has a high cost of living and high housing costs which makes it difficult to attract workers to fill lower-wage and mid-wage jobs, particularly in industries not related to biotech or IT.

## Community Contacts

A review was conducted of seven community contacts completed during the examination period. The contacts were conducted with organizations located throughout the rating area. The mission of the organizations contacted focused on several areas including affordable housing, community development, and community revitalization. The area is served by numerous nonprofits, community development financial institutions, and community development entities providing multiple opportunities for participation and support by area financial institutions. Most contacts noted the high cost of housing in the area as a significant concern as most low- and moderate-income residents are challenged in finding both affordable rental housing as well as homes to purchase. The contacts identified the following needs in the community:

- Affordable Housing, including affordable rental housing
- Housing Counseling Assistance
- Loan programs for small businesses that do not meet traditional lending requirements
- Loan programs to support the rehabilitation of older housing
- Support for financial education programs
- Low cost deposit and loan products to help low and moderate-income individuals establish and repair credit.

## Scope of Evaluation in Massachusetts

The Boston CSA, which accounts for 100 percent of the bank's deposits in Massachusetts, received a full-scope review. The remaining AAs in the state of Massachusetts received a limited-scope review. Performance in limited-scope AAs and its effect on the CRA rating are discussed at the end of each test.

## CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN MASSACHUSETTS

## LENDING TEST

The bank's performance under the Lending Test in the state of Massachusetts is rated Outstanding.
Performance in AAs receiving limited-scope reviews was factored together with performance from AAs receiving full-scope reviews to determine the state's overall Outstanding Lending Test rating. Limitedscope conclusions did not significantly affect the initial overall conclusions based on the AAs receiving full-scope review.

## Conclusions for Area Receiving a Full-Scope Review

Based on a full-scope review, the bank's performance in the Boston CSA is excellent. Overall excellent lending levels and leadership in CD lending enhance good geographic and borrower distribution of loans. Product innovation and flexibility was also considered favorably.

## Lending Activity

Lending levels reflect excellent responsiveness to AA credit needs.
Examiners considered the number and amount of home mortgage, small business, and small farm loans originated or purchased relative to Chase's capacity based on deposits, competition, and market presence. Lending activity for home mortgage and small loans to businesses received the most weight in reaching conclusions. Respectively, home mortgage lending and small loans to businesses account for 36.7 percent and 62.9 percent of the loan volume in the state by number and 92.9 and 4.3 percent of loan volume by dollar. Small farm lending is not a strategic focus of the bank and received minimal weight in reaching conclusions. Farm loans represented 0.2 percent of the loan volume in the state by number and 0.02 percent loan volume by dollar.

| Number of Loans* |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Total | $6,961,477$ | 323,981 | 1,221 | 205,955 | $7,492,634$ | 100.0 | 100.0 |

*The tables present the data for all assessment areas. The narrative below addresses performance in full-scope areas only.
Chase ranked 111th in deposits with 0.1 percent market share.
In overall home mortgage lending, Chase ranked seventh out of 593 lenders with a 2.6 percent market share. Other lenders in the market include Citizens Bank, N.A. ( 5.5 percent), Wells Fargo Bank, N.A. (4.9 percent), and Bank of America, N.A. (3.7 percent).

In small loans to businesses, Chase ranked third out of 182 lenders with 9.9 percent market share. Other major lenders are American Express National Bank (26.2 percent), Bank of America, N.A. (12.9 percent), and Citibank, N.A. (7.4 percent).

In small loans to farms, Chase ranked first out of 18 lenders with a 29.9 percent market share. The other major lenders and respective market shares are U.S. Bank, N.A. (19.0 percent), Bank of America, N.A. (17.0 percent), and Capital One, N.A. (9.3 percent).

The comparison between deposit and lending market share rankings supports the bank's excellent responsiveness. Factors considered included:

## Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in its AA.

## Home Mortgage Loans

Refer to Table O in the state of Massachusetts section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good. The following information was taken into consideration when determining this rating.

- The limited proportion of housing units in low-income geographies, particularly OOUs ( 3.5 percent), constrained lending opportunities; therefore, performance in moderate-income geographies was given slightly more consideration due to the higher percentage of OOUs in those geographies.
- The high level of competition in the AA was also considered and examiners placed greater significance on performance compared to the aggregate of lenders.
- Between 2017 and 2019, the proportion of loans in low-income areas was near to the percentage of owner-occupied units and below the aggregate distribution of loans. In moderate-income areas the proportion of loans exceeded the percentage of owner-occupied units and was near to the aggregate distribution of loans.
- During 2014 through 2016, performance in low-and moderate-income geographies was below the percentage of owner-occupied units and the aggregate distribution of loans.

## Small Loans to Businesses

Refer to Table Q in the state of Massachusetts section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of small loans to businesses for this evaluation is good. The following information was taken into consideration when determining this rating.

- The small proportion of businesses in low-income geographies (7.2 percent) and competition between 593 lenders constrained lending opportunities to existing businesses. Therefore, performance in moderate-income geographies was given slightly more consideration due to the higher percentage of businesses in those geographies.
- Performance against the aggregate distribution of lenders was given additional consideration as it reflects the difficulties all lenders are experiencing due to the economic constraints discussed above under the Description of the Full-Scope AA.
- Between 2017 and 2019, the proportion of small loans to businesses in low-income geographies was below both the proportion of businesses and the aggregate distribution, while the proportion of small loans to businesses in moderate-income geographies exceeded both the proportion of businesses and the aggregate distribution
- During 2014 to 2016, the proportion of small loans to businesses in low-income geographies was below both the proportion of businesses and near to the aggregate distribution, while the proportion of small loans to businesses in moderate-income geographies exceeded both the proportion of businesses and the aggregate distribution.

## Small Loans to Farms

Refer to Table S in the state of Massachusetts section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to farms.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of small loans to farms is good. The following information was taken into consideration when determining this rating.

- The limited number of farms in low-income geographies, (3.1 percent), constrained lending opportunities; therefore, performance in moderate-income geographies was given slightly more consideration due to the higher number of farms in those geographies.
- The fact that farm lending is not a focus of the bank was also considered.
- Between 2017 and 2019, the proportion of loans to small farms in low-income geographies was below the proportion of farms in those geographies and near to the aggregate distribution of all lenders. The proportion of loans to small farms in moderate-income geographies was near to the proportion of farms in those geographies and exceeded the aggregate distribution of all lenders.
- During 2014 to 2016 period the bank made no loans to small farms in low- or moderate-income geographies.

## Lending Gap Analysis

A review of home mortgage loans, small loans to business, and small loans to farms including summary reports and AA maps did not identify any unexplained conspicuous lending gaps in the bank's activities.

## Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and business and farms of different sizes, given the product lines offered by the institution.

## Home Mortgage Loans

Refer to Table P in the state of Massachusetts section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases.

Based on the data in the tables and the following considerations, the bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good. The following information was taken into consideration when determining this rating.

- Greater significance was placed on performance against the aggregate distribution as it reflects the difficulties all lenders are experiencing due to competition and the economic constraints discussed above under the Description of the Full-Scope AA.
- Examiners particularly considered housing affordability challenges for low- and moderate-income borrowers.
- Between 2017 and 2019, the proportion of loans to low-income borrowers was well below the percentage of low-income families and the aggregate distribution of lenders. The proportion of moderate-income loans was near to the proportion of moderate-income families and below the aggregate distribution.
- During 2014 to 2016 the bank's performance was generally consistent with performance between 2017 to 2019. The proportion of loans to low-income borrowers was well below the percentage of low-income families and near to the aggregate distribution of lenders. The proportion of moderateincome loans was below the proportion of moderate-income families and the aggregate distribution.

## Small Loans to Businesses

Refer to Table R in the state of Massachusetts section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses.

Based on the data in the tables and the following factors, the distribution of the bank's originations and purchases of small loans to businesses by revenue category is good. The following information was taken into consideration when determining this rating.

- Greater significance was placed on performance against the aggregate distribution of lenders as it reflects the difficulties all lenders are experiencing due to competition and the economic constraints discussed above under the Description of the Full-Scope AA.
- Between 2017 and 2019, the bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.
- During 2014 to 2016, the bank's performance was consistent with its performance between 2017 and 2019. The bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.

## Small Loans to Farms

Refer to Table T in the state of Massachusetts section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to farms.

Based on the data in the table and the following considerations, the distribution of the bank's originations and purchases of small loans to farms by revenue category is good. The following information was taken into consideration when determining this rating.

- Greater significance was placed on performance against the aggregate distribution of lenders as it reflects the difficulties all lenders are experiencing due to the economic constraints discussed above under the Description of the Full-Scope AA.
- The fact that farm lending is not a focus of the bank was considered.
- Between 2017 and 2019, the bank's percentage of loans to farms with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.
- During 2014 to 2016, the bank's performance was consistent with performance between 2017 and 2019. The bank's percentage of loans to farms with revenues of $\$ 1$ million or less was below the percentage of farms and exceeded the aggregate distribution.

## Community Development Lending

The bank is a leader in making CD loans.
The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The bank made 33 CD loans in its AA for a total of $\$ 206.0$ million, which represents 894.7 percent of the tier 1 capital allocated to the AA.

Examples of CD loans in the AA include:

- In November 2014, the bank provided a $\$ 7.7$ million loan to preserve the availability of 60 units of affordable housing, which will be comprised of 39 one-bedroom units, 17 two-bedroom units, three three-bedroom units, and one studio unit. The project was located in Belmont, MA.
- In April 2017, the bank provided a total of $\$ 1.7$ million in community service loans. The proceeds were used by a community center in a low-income census tract in the Boston area. The center provides high impact programs that help youth in the Allston-Brighton community succeed academically, explore, and master the arts, develop career readiness skills, and adopt healthy lifestyles.
- In July 2019, the bank provided a loan for $\$ 40.0$ million to create 55 affordable housing units in public transportation-oriented areas. The project was aligned with the Concord-Alewife Plan, which included addressing the housing stock and affordability needs in Cambridge, MA.

## Product Innovation and Flexibility

The bank makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. As outlined below, a total of 1,210 loans were funded totaling $\$ 384.2$ million. Refer to the comments in the Product Innovation and Flexibility section of this performance evaluation for additional details regarding the programs.

| Loan Type | Number of <br> Loans | Dollar Amount <br> $\mathbf{( \$ 0 0 0 ’ \mathbf { s } )}$ |
| :--- | :---: | :---: |
| DreaMaker | 710 | 236,754 |
| FHA | 221 | 75,069 |
| HARP | 184 | 35,986 |
| VA | 83 | 33,886 |
| SBA | 0 | 0 |
| USDA | 12 | 2,512 |

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall Outstanding Lending Test rating and did not significantly affect the initial overall conclusions based on the AAs receiving fullscope review. Examiners considered that there are no deposits attributed to these AAs and the bank's presence is limited to deposit-taking ATMs. Based on limited-scope reviews, the bank's performance under the Lending Test in the Pittsfield MSA and Springfield MSA is weaker than the bank's overall performance under the Lending Test in the full-scope area. Weaker performance results from weaker geographic and borrower distributions.

Refer to Tables O through T in the state of Massachusetts section of appendix D for the facts and data that support these conclusions.

## INVESTMENT TEST

The bank's performance under the Investment Test in the state of Massachusetts is rated Outstanding.

## Conclusions for Area Receiving a Full-Scope Review

Based on a full-scope review, the bank's performance in the Boston CSA is excellent.
The bank has an excellent level of qualified investment, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period qualified investments represent 746.0 percent of tier 1 capital allocated to the AA. A significant majority, or 91.4 percent of total investments, represent current period investments.

The bank exhibits excellent responsiveness to credit and community economic development needs. The bank made 36 CD investments totaling $\$ 149.7$ million, with 72.3 percent supporting affordable housing, 13.4 percent supporting community service, and 14.3 percent supporting revitalization/stabilization efforts. 44 grants totaled $\$ 7.3$ million with 98.6 percent supporting community service and 1.4 percent supporting revitalization/stabilization efforts. All prior period investments still outstanding are considered responsive to credit and community economic development needs such as affordable housing
and community service. In addition, 18 of the current period investments, or 26.5 percent, are catalysts for future development and investment and mainly relate to NMTC financings.

The bank makes extensive use of innovative and/or complex investments to support CD initiatives. Exclusive of grants, 25 of the 80 current period investments are considered complex as they are mainly related to Direct Investment LIHTC and NMTC transactions. Additionally, 19.7 percent of the total dollar amount of prior investments still outstanding consist of complex Direct Investment LIHTC and NMTC transactions.

Examples of CD Investments in the AA include:

- The bank provided $\$ 23.1$ million in a LIHTC investment that contributed to the creation of 95 affordable housing units to be used by low- and moderate-income individuals and families.
- The bank provided $\$ 2.2$ million of equity in a LIHTC, which contributed to the creation of 83 affordable housing units in a low- and moderate-income facility for senior living. This facility provides senior care options that includes assisted living and independent living for elderly lowincome adults in this AA.
- The bank provided a $\$ 7.2$ million NMTC equity investment that was used for a hotel project, located in a low-income tract in Boston's Dudley Square community. The project was part of a greater neighborhood urban renewal effort to redevelop the Dudley Square area as detailed in the Roxbury Strategic Master Plan. This project was the primary component of a multi-use development project consisting of a 135 -room hotel and commercial/retail space that will help with the revitalization of the low-income area. The Hotel and adjacent retail component created 40 permanent jobs and the construction created over 250 jobs.

Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

## Statewide Investment in the State of Massachusetts

The bank has qualified investments throughout the state of Massachusetts whose $\mathrm{P} / \mathrm{M} / \mathrm{F}$ include serving the AAs. Forty-eight percent support affordable housing, 29 percent support community services, and 22 percent support revitalization/stabilization. Affordable housing and support for community service organizations are particular needs within the state. Investments with no $\mathrm{P} / \mathrm{M} / \mathrm{F}$ to serve AAs support affordable housing and community services. Investments with and without a $\mathrm{P} / \mathrm{M} / \mathrm{F}$ to serve AAs represent 29 percent of total state qualified investments. These investment in the broader statewide area further support the bank's overall performance under the Investment Test in state of Massachusetts.

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall Outstanding Investment Test rating and did not change the initial overall conclusions based on the AA receiving a full-scope review. Based on limited-scope reviews, the bank's performance under the Investment Test in the Pittsfield MSA and Springfield MSA is consistent with the bank's overall performance under the Investment Test in the full-scope area.

## SERVICE TEST

The bank's performance under the Service Test in Massachusetts is rated High Satisfactory. Weak performance in limited-scope areas had a negative effect on strong performance in the full-scope AA.

## Conclusions for Area Receiving a Full-Scope Review

Based on a full-scope review, the bank's performance in the Boston CSA is excellent.

## Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the bank's full-scope AA.

Examiners evaluated the data as outlined in the Scope section at the front of this document including bank-provided data on usage of branches adjacent to low- and moderate-income geographies by individuals residing in those geographies and on increases in the usage of alternative delivery systems.

Based on the data in the table below and performance context, the branch distribution is good. In lowand moderate-income geographies, the distribution respectively exceeds and is well below the percentage of the population. The bank had three branches in low-income geographies and one branch in a moderate-income geography. The distribution was augmented by three MUI tract branches that serve moderate-income tracts. Examiners reviewed data on the accounts held and transactions conducted at the MUI branches and confirmed they were serving the adjacent moderate-income populations.

| Distribution of Branch Delivery System |  |  |  |  |  |  |  | As of December 31, 2019 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Boston-WorcesterProvidence, CSA | 100 | 15 | 100 | 20.0 | 6.7 | 6.7 | 66.7 | 10.0 | 19.4 | 38.9 | 31.3 |

* May not add up to 100 percent due to geographies with unknown tract income level and rounding

Alternative delivery systems enhanced the delivery of banking services to geographies and individuals of all income levels. The OCC considered the availability and use of alternative delivery systems over the evaluation period. This included review of the bank's 96 deposit-taking ATMs, online banking, mobile banking, and telephone banking to determine the effectiveness of these systems to make retail banking services available to individuals in low- and moderate-income geographies. The bank increased the deposit-taking ATMs in low- and moderate-income geographies by almost 100.0 percent as there was only one ATM in this AA during the prior evaluation period. The bank installed or acquired 17 (17.7 percent) deposit-taking ATMs in low-income geographies and eight ( 8.3 percent) ATMs in moderate-income geographies. Additionally, bank-provided data on use of online, mobile, and telephone banking showed increases in the adoption of these services by low- and moderate-income individuals from the prior rating period.

| Distribution of Branch Openings/Closings |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Assessment | \# of Branch Openings | \# of Branch Closings | Net change in Location of Branches(+ or -) |  |  |  |
|  |  |  | Low | Mod | Mid | Upp |
| Boston CSA | 15 | 0 | +3 | +1 | +1 | +10 |

The bank's opening and closing of branches has improved the accessibility of its delivery systems, particularly in low- and moderate-income geographies and/or to low- and moderate-income individuals. The bank opened three branches in low-income geographies and one branch in a moderate-income geography. The increase in branches in this AA was part of the bank's branch expansion strategy. The bank did not close any branches during the evaluation period.

Services, including where appropriate, business hours, do not vary in a way that inconveniences its AA, particularly low- and moderate-income geographies and/or individuals. Generally, branches are open Monday through Thursday from 9:00 am to 5:00 pm, Friday from 9:00 am to 6:00 pm and Saturday from 9:00 am to 1:00 pm. All retail banking services are available at all branches within the low- and moderate-income geographies.

## Community Development Services

The bank was a leader in providing CD services that are responsive to AA needs.

Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 394 CD service activities to 38 organizations, logging 1,699 qualified hours. All of the bank's assistance were to organizations that provide community services to low- and moderate-income individuals and families. The bank's CD services were responsive to the community needs in the AA, particularly financial literacy. The following are examples of CD services provided:

- The bank provided financial literacy training to more than 950 low- and moderate-income individuals.
- The bank provided six homebuyer seminars to more than 250 low- and moderate-income individuals.

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall High Satisfactory Service Test rating and had a negative effect on the initial overall conclusions based on the AAs receiving fullscope review. Based on limited-scope reviews, the bank's performance under the Service Test in the Pittsfield, MA and Springfield, MA AAs is very poor and weaker than the bank's excellent performance under the Service Test in the full-scope area due to very weak branch distribution in low- and moderateincome geographies.

## State Rating

## State of Michigan

CRA rating for the State of Michigan ${ }^{19}$ : Outstanding
The Lending Test is rated: High Satisfactory
The Investment Test is rated: Outstanding
The Service Test is rated: Outstanding
The major factors that support this rating include:

- A good level of lending activity.
- Overall adequate geographic distribution of home mortgage loans and small loans to businesses.
- Overall good borrower distribution of home mortgage loans and small loans to businesses.
- A leader in making CD loans, which positively affected the rating.
- The extensive use of flexible products, which positively affected the rating.
- An excellent level of qualified investments, excellent responsiveness to credit and community economic development needs, and a high level of investments in the broader statewide or regional area.
- Retail service delivery systems are readily available to geographies and individuals of different income levels in the full-scope AA.
- Chase is a leader in providing CD services that are responsive to AA needs.

## Description of Institution's Operations in Michigan

The state of Michigan is Chase's fifth largest rating area based on aggregate deposits of $\$ 44.6$ billion, representing 3.2 percent of the bank's total deposits. As of December 31, 2019, the bank operated 209 branches and 479 deposit-taking ATMs within the rating area, representing 4.2 percent of total branches and 3.0 percent of total ATMs. The bank originated and purchased approximately $\$ 16.2$ billion in loans or 2.3 percent of total bank loan originations and purchases during the evaluation period in the state.

According to the FDIC Deposit Market Share Data, as of June 30, 2019, there were 118 banks operating 2,426 branches in the state of Michigan. Chase ranked first in deposit market share with 19.6 percent. Other major banks and their deposit market share are Comerica Bank ( 12.8 percent), Bank of America, N.A. (10.1 percent), and PNC Bank, N.A. (7.5 percent).

Chase has seven AAs in the state of Michigan and the Detroit-Warren-Ann Arbor, MI CSA (Detroit CSA) was selected for a full-scope review. The CSA consists of the Detroit-Warren-Dearborn, MI MSA, which includes the following MDs: Detroit-Dearborn-Livonia, MI MD and Warren-TroyFarmington Hills, MI MD. It also includes the following MSAs: Ann Arbor, MI MSA and Flint, MI MSA. The Grand Rapids-Wyoming-Muskegon MSA, Kalamazoo-Battle Creek-Portage CSA, LansingEast Lansing-Owosso MSA, Niles-Benton Harbor MSA, Saginaw MSA, and Michigan Non-MSA received limited-scope reviews. Refer to appendix A for a complete description of the AAs.

## Description of Full-Scope AA

[^117]The following table provides a summary of the demographic that includes housing and business information for the Detroit CSA. Table A indicates that the volume of OOUs is very small in lowincome CTs and over 23.0 percent of families in the AA are low-income with 12.8 percent below the poverty level. The median housing value in the Detroit CSA ranges from two to three times the median income, three times the moderate-income and five times the low-income, indicating a limited proportion of OOUs are affordable to low- income borrowers. One simplistic method used to determine housing affordability assumes a maximum monthly principal and interest payment of no more than 30 percent of the applicant's income.

In the Detroit CSA, assuming a 30-year mortgage with a five percent interest rate and three percent down payment, while not accounting for homeowners insurance, real estate taxes, or any additional monthly expenses, a low-income borrower making $\$ 26,367$ per year (or less than 50 percent of the FFIEC adjusted median family income in the CSA) could afford a $\$ 74,442$ mortgage loan with a payment of $\$ 791$ per month; a moderate-income borrower earning $\$ 42,186$ per year (or less than 80 percent of the FFIEC adjusted median family income in the CSA) could afford a $\$ 149,890$ mortgage loan with a payment of $\$ 1,266$ per month.

Median rents and the significant percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

| Table A - Demographic Information of the Assessment Area |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| Ansessment Area: Detroit-Warren-Ann Arbor MI CSA 2017-2019 |  |  |  |  |  |  |

## Economic Data

According to Moody's Analytics October 2019 Report, the Detroit area's strengths include high housing affordability and a concentration of auto industry headquarters; production; and research and development. However, the area suffers from a below-average quality of life; eroding infrastructure; a challenging fiscal situation in the city; and persistent out migration. After nearly a decade of growth, the area economy is taking a breather. The unemployment rate has remained historically low, in the low 5.0 percent range, for the past year, but the labor force is no longer rising. Employment has slipped since the start of the year. Softness is widespread across industries, although losses have been particularly painful in healthcare and professional/business services. Investments by the logistics industry will keep transportation/warehousing payrolls moving in the right direction. Detroit has a high concentration of jobs in transportation/warehousing. Construction of the Gordie Howe International Bridge between Detroit and Windsor, Canada, which is slated for completion in 2024, will spur more traffic and growth in transportation-related industries. The auto industry is also very important to the Detroit economy with the three major automakers employing more than 117,000 people combined.

Major employment industries in the Detroit area include education and health services; professional and business services; and manufacturing. Major employers in in the area include Ford Motor Company; General Motors; University of Michigan; Chrysler Group LLC. Population trends in Detroit are weak. While net outflows have narrowed in recent years, the secular decline of manufacturing and low and falling living standards continues to weigh on Detroit's attractiveness. Household formation has flatlined and will reduce the need for additional housing supply. Sales of single-family homes have been flat and starts are trending lower.

## Community Contacts

Examiners considered three community contacts completed during the period with entities serving the area. The contacts were with organizations focused on affordable housing, economic development and community and social services. Contacts indicated that there are multiple economies at work in the Greater Detroit area and that Detroit was doing much worse than other Southeast Michigan cities as it relates to unemployment, workforce development, education, transportation, access to affordable housing and small business lending. Contacts noted that there were high concentrations of poverty in the area. Many residents reside in food deserts and are food insecure. Many of the available affordable housing units are substandard. Other needs identified in the community include access to affordable home renovation financing, adult literacy training, job training/workforce development, access to affordable childcare services for low- and moderate-income households, transportation assistance for low-income households, financial education programs and services targeted to individuals re-entering the community from the penal system, access to capital for small businesses, water infrastructure replacement and improvements, elimination of vacant and blighted properties, affordable housing (rental and owner-occupied) and credit counseling and credit repair.

Contacts noted that there are numerous opportunities available for banks to support the needs of the community including providing grant funding to support the programs and services of area non-profits; more collaboration with financial intermediaries, such as Community Development Financial Institutions; and offering flexible products and services that help bring low-income individuals into the financial mainstream.

## Scope of Evaluation in Michigan

The Detroit CSA received a full-scope review. The CSA accounts for 89.5 percent of deposits and 75.0 percent of the lending in the state. The remaining six AAs received a limited-scope review. Performance in limited-scope AAs that affected the CRA rating are discussed at the end of each test.

## CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN MICHIGAN

## LENDING TEST

The bank's performance under the Lending Test in the state of Michigan is rated High Satisfactory.
Performance in AAs receiving limited-scope reviews was factored together with performance from AAs receiving full-scope reviews to determine the state's overall High Satisfactory Lending Test rating. Limited-scope conclusions did not affect the initial overall conclusions based on the AAs receiving fullscope review.

## Conclusions for Area Receiving a Full-Scope Review

Based on a full-scope review, the bank's performance in the Detroit CSA is good. Overall good lending levels and borrower distribution of loans offset weaker adequate geographic distribution of loans. The bank's leadership in making CD loans affected the rating positively while product innovation and flexibility were also considered favorably.

## Lending Activity

Lending levels reflect good responsiveness to AA credit needs in the bank's AAs.
Examiners considered the number and amount of home mortgage, small business, small farm loans originated or purchased relative to Chase's capacity based on deposits, competition, and market presence. Lending activity for home mortgage and small loans to businesses received the most weight in reaching conclusions. Respectively, home mortgage lending and small loans to businesses account for 34.7 percent and 64.6 percent of the loan volume in the state by number and 75.1 and 20.1 percent of loan volume by dollar. Small farm lending is not a strategic focus of the bank and received minimal weight in reaching conclusions. Farm loans represented 0.68 percent of the loan volume in the state by number and 0.13 percent loan volume by dollar.

| Number of Loans* |  |  |  |  |  |  |  |

| Total | $12,187,140$ | $3,261,422$ | 21,283 | 756,602 | $16,226,447$ | 100 | 100 |

*Due to rounding, totals may not equal $100.0 \%$. The tables present the data for all assessment areas. The narrative below addresses performance in full-
scope areas only.
Chase ranked first in deposits of 47 institutions with market share of 30.9 percent.
In overall HMDA lending, Chase ranked second with 5.8 percent market share. This is a highly competitive market with 695 mortgage lenders. No lender dominated the mortgage market. Other major home lenders with respective market shares are Quicken Loans (8.3 percent), Huntington National Bank (4.7 percent), and Wells Fargo Bank, N.A. (3.9 percent).

Chase ranked second in small loans to businesses with 19.5 percent market share. There are 167 lenders in the CSA. Other major lenders are American Express National Bank ( 20.6 percent), Citibank, N.A. (11.5 percent), and Bank of America, N.A. ( 6.6 percent).

Chase ranked first in small loans to farms with 30.8 percent market share. There were 24 lenders in the CSA. Other major lenders and market share are John Deere Financial, F.S.B. (18.6 percent), U.S. Bank, N.A. (13.8 percent) and Huntington National Bank (9.7 percent).

## Distribution of Loans by Income Level of the Geography

The bank exhibits adequate geographic distribution of loans in its AA.

## Home Mortgage Loans

Refer to Table O in the state of Michigan section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate. The following information was taken into consideration when determining this rating.

- The limited proportion of housing units in low-income geographies, particularly OOUs ( 6.3 percent), constrained lending opportunities; therefore, performance in moderate-income geographies was given slightly more consideration due to the higher percentage of OOUs in those geographies.
- The high level of competition in the AA ( 695 home mortgage lenders) was also considered and examiners placed greater significance on performance compared to the aggregate of lenders.
- Between 2017 and 2019, the proportion of loans in low-income areas was significantly below the proportion of OOUs in those geographies and well-below aggregate distribution of loans. The proportion of loans in moderate-income areas was below the proportion of OOUs in those geographies and near to the aggregate distribution of loans.
- The performance in low- and moderate-income geographies during the 2014 and 2016 time periods was inconsistent with 2017 to 2019. The proportion of loans in low-income geographies is significantly below the proportion of OOUs in those geographies and near to the aggregate distribution of loans. The proportion of loans in moderate-income geographies is well-below the proportion of OOUs and near to the aggregate distribution of loans.

## Small Loans to Businesses

Refer to Table Q in the state of Michigan section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of small loans to businesses for this evaluation is adequate. The following information was taken into consideration when determining this rating.

- During the 2017 to 2019 period, the proportion of loans to small businesses in low- and moderateincome geographies was well-below and below the proportion of businesses in low- and moderateincome geographies and below the aggregate distribution of loans in those areas.
- The performance during the 2014 to 2016 time periods was consistent with 2017-2019. Between 2104 and 2016, the proportion of loans to small businesses in low- and moderate-income geographies was well-below and below the proportion of businesses in low- and moderate-income geographies and near to the aggregate distribution of loans in those areas.

## Small Loans to Farms

Refer to Table $S$ in the state of Michigan section of appendix $D$ for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to farms.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of small loans to farms is good. The following information was taken into consideration when determining this rating.

- The limited percentage of farms in low-income geographies (4.6 percent) constrained lending opportunities; therefore, performance in moderate-income geographies was given slightly more consideration due to the higher percentage of farms in those geographies.
- Farm lending is not a focus of the bank, therefore, examiners placed greater significance on performance compared to aggregate of lender. Chase ranked first in deposit market share with 30.8 percent amongst the high level of competition in the AA ( 24 lenders).
- Between 2017 and 2019, the bank did not make any loans to small farms in low-income geographies and the proportion of loans to small farms in low-income geographies significantly below the proportion of farms in those geographies and the aggregate distribution.
- Between 2017 and 2019, the proportion of loans to small farms in moderate-income geographies was well-below to the proportion of farms in those geographies and below the aggregate distribution.
- Performance in low- and moderate-income geographies during the 2014 to 2016 period was better than the performance during the 2017 to 2019 period. The proportion of loans to small farms in lowincome geographies was well below the proportion of farms in those geographies and exceeded the aggregate distribution. The proportion of loans to small farms in moderate-income geographies near to the proportion of farms in those geographies and exceeded the aggregate distribution.

## Lending Gap Analysis

A review of home mortgage loans, small loans to business, and small loans to farms including summary reports and AA maps did not identify any unexplained conspicuous lending gaps in the bank's activities.

## Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and business and farms of different sizes, given the product lines offered by the bank.

## Home Mortgage Loans

Refer to Table P in the state of Michigan section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases.

Based on the data in the tables and the following considerations, the bank's overall borrower distribution of home mortgage loans originations and purchases is good. The following information was taken into consideration when determining this rating.

- Greater significance was placed on performance against the aggregate distribution as it reflects the difficulties all lenders are experiencing due to competition and the economic constraints discussed above under the Description of this Full-Scope AA.
- Examiners particularly considered housing affordability challenges for low- and moderate-income borrowers.
- Between 2017 and 2019, the proportion of loans to low-income borrowers was well below the percentage of low-income families and near to the aggregate distribution of lenders. The proportion of moderate-income loans exceeded the proportion of moderate-income families and the aggregate distribution.
- During 2014 to 2016, the bank's performance was consistent with performance between 2017 to 2019. The proportion of loans to low-income borrowers was well below the percentage of lowincome families and near to the aggregate distribution of lenders. The proportion of moderateincome loans exceeded the proportion of moderate-income families and was near to the aggregate distribution.

## Small Loans to Businesses

Refer to Table R in the state of Michigan section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses

Based on the data in the tables and the following factors, the distribution of the bank's originations and purchases of small loans to businesses by revenue category is good. The following information was taken into consideration when determining this rating.

- Greater significance was placed on performance against the aggregate distribution of lenders as it reflects the difficulties all lenders are experiencing due to competition and the economic constraints discussed above under the Description of Full-Scope AA.
- Between 2017 and 2019, the bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and significantly exceeded the aggregate distribution.
- Performance against both the aggregate and borrower distribution in 2014 through 2016 were consistent with 2017-2019. The bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and significantly exceeded the aggregate distribution.

## Small Loans to Farms

Refer to Table T in the state of Michigan section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to farms.

Based on the data in the table and the following considerations, the distribution of the bank's originations and purchases of small loans to farms by revenue category is good. The following information was taken into consideration when determining this rating.

- Between 2017 and 2019, the bank's percentage of loans to farms with revenues of $\$ 1$ million or less was below the percentage of businesses and substantially exceeded the aggregate distribution.
- During 2014 to 2016, the bank's performance was consistent with performance between 2017 and 2019. The bank's percentage of loans to farms with revenues of $\$ 1$ million or less was below the percentage of businesses and substantially exceeded the aggregate distribution.

## Community Development Lending

The bank is a leader in making CD loans.
The Lending Activity Tables, shown above, set forth the information and data used to evaluate the bank's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

There were 71 CD loans made for a total of $\$ 635$ million. This represents 12.4 percent of tier 1 capital allocated to the AA. The majority of the CD loans, 71.8 percent, were for community service purposes, which is a critical need in this AA.

Examples of CD loans in the AA include:

- In August 2016, Chase renewed a $\$ 100$ million line of credit to a foundation based in Troy, MI. Funding was used for general working capital and for work to expand opportunities in Detroit through grant making and investing in arts and culture, education, the environment, health, human services, and community development efforts, particularly in the city of Detroit.
- Chase made 26 loans over the period to Detroit Public Schools, amounting to $\$ 19.7$ million, to continue their effort to implement best practices regarding curriculum, academic intervention, and school improvements. The school system has 74.2 percent of the students who are eligible for the Federal Free or Reduced Lunch program.

## Product Innovation and Flexibility

The bank makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. As shown in the table below, the bank originated 11,342 loans totaling nearly $\$ 1.6$ billion in the AA. Refer to the comments in the Product Innovation and Flexibility section of this performance evaluation for additional details regarding the programs.

| Loan Type | Number of <br> Loans | Dollar Amount <br> $\mathbf{( \$ 0 0 0 ' s )}$ |
| :--- | :---: | :---: |
| DreaMaker | 2,495 | 402,973 |
| FHA | 2,972 | 336,025 |
| HARP | 2,153 | 272,624 |
| VA | 772 | 148,645 |
| SBA | 521 | 149,041 |
| USDA | 2,429 | 299,623 |

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall High Satisfactory Lending Test rating and did not significantly change the initial overall conclusions based on the AA receiving full-scope review. Based on limited-scope reviews, the bank's performance under the Lending Test in the Grand Rapids-Wyoming-Muskegon MSA, Kalamazoo-Battle Creek-Portage CSA, Lansing-East Lansing-Owosso MSA, Niles-Benton Harbor MSA, Saginaw MSA, and Michigan Non-MSA is weaker than the bank's overall good performance under the Lending Test in the full-scope area. Performance is weaker primarily due to lower levels of CD lending.

Refer to Tables O through T in the state of Michigan section of appendix D for the facts and data that support these conclusions.

## INVESTMENT TEST

The bank's performance under the Investment Test in the state of Michigan is rated Outstanding.

## Conclusions for Area Receiving a Full-Scope Review

Based on a full-scope review, the bank's performance in the Detroit CSA is excellent.
The bank has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period qualified investments represent 8.7 percent of tier 1 capital allocated to the AA. Nearly 94 percent of total investments represent current period investments.

The bank exhibits excellent responsiveness to credit and community economic development needs. The bank investments included 46.9 percent supporting revitalization/stabilization efforts, 31.2 percent supporting community services, 20.6 percent supporting affordable housing, and 1.3 percent supporting economic development. In total, 3,214 low- and moderate-income new housing units were created, and 9,777 housing units were retained.

The bank makes occasional use of innovative and/or complex investments to support CD initiatives. Twenty-two ( 29 percent of the total dollar amount) of current investments are considered complex. Additionally, 15.8 percent of the total dollar amount of prior investments still outstanding are considered complex. Both current and prior period investments are Direct Investment LIHTC transactions and NMTC financings. Of the 60 current period investments, 50 percent of the total dollar amount are considered catalyst investments that will encourage future growth and improvements or are part of local government plans for community revitalization/stabilization. The bank plays a leadership role in helping the City of Detroit strengthen its redevelopment efforts. The bank is investing $\$ 100$ million over a five-year period to accelerate blight removal, help residents prepare for new jobs and provide funds for home loans.

| MI Non-Metro AA | 9 | 454 | 9 | 5,186 | 18 | 2.78 | 5,640 | 0.90 | 0 | 0 |
| Statewide Investments with Purpose, Mandate, or Function to Serve AAs | 0 | 0 | 32 | 36,314 | 32 | 4.94 | 36,314 | 5.79 | 0 | 0 |
| Statewide Investments with Purpose, Mandate, or Function to Serve AAs | 60 | 1,873 | 2 | 28 | 62 | 9.57 | 1,901 | 0.30 | 0 | 0 |

Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date. Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

Examples of CD Investments in the AA include:

- The bank made two LIHTC investments totaling $\$ 33.2$ million for the rehabilitation of a historic, 10story, apartment building located in Detroit. The overall project consisted of 91 units in two separately financed phases. All are affordable to low- and moderate-income senior residents. Some units are fully accessible for residents with physical impairments or for residents with hearing or visual impairments.
- The bank made two NMTC investment totaling $\$ 11.9$ million to help a company fund two capital intensive projects/new product lines in Detroit, Michigan and Toledo, Ohio. For this investment, $\$ 5.9$ million was allocated to the Detroit AA. This manufacturing capacity expansion allowed for the addition of a primary customer, supported a new product offering, and expanded assembly support for multiple automotive manufacturers. The investments serve as a catalyst for other community development activities as it is part of a local government plan for revitalization or stabilization that will encourage future growth and improvements in the area.

## Statewide Investments in State of Michigan

The bank has 94 current and prior period investments totaling $\$ 38.2$ million with and without a $\mathrm{P} / \mathrm{M} / \mathrm{F}$ to serve AAs in the state of Michigan. These CD investments primarily support affordable housing with support for community services and revitalization/stabilization to a lesser extent. Qualified investments in the broader statewide or regional area represent 6.0 percent of total qualified investments in the state of Michigan. These investments enhanced the bank's overall performance in the state of Michigan.

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall Outstanding Investment Test rating and did not significantly change the initial overall conclusions based on the AA receiving a fullscope review. Based on limited-scope reviews, the bank's performance in the Grand Rapids-WyomingMuskegon CSA, Lansing-East Lansing-Owosso CSA and Kalamazoo-Battle Creek-Portage CSA is consistent with the overall excellent performance under the Investment Test in the full-scope area. Strong performance is due to a higher level of investments in relation to allocated tier 1 capital. The bank's performance under the Investment Test in the Niles-Benton Harbor MSA, the Saginaw MSA, and the Michigan Non-Metro AA is weaker than the bank's overall excellent performance under the Investment Test in the full-scope area. Weaker performance is due to a lower level of qualified investments.

## SERVICE TEST

The bank's performance under the Service Test in state of Michigan is rated Outstanding.

## Conclusions for Area Receiving a Full-Scope Review

Based on a full-scope review, the bank's performance in the Detroit CSA is excellent.

## Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the bank's full-scope AA.

Examiners evaluated the data as outlined in the Scope section at the front of this document including bank-provided data on usage of branches adjacent to low-and moderate-income geographies by individuals residing in those geographies and on increases in the usage of alternative delivery systems.

## Detroit CSA

Based on the data in the table below and performance context, the branch distribution is excellent. In low- and moderate-income geographies, the distribution is respectively near to and below the percentage of the population. The bank had 16 branches in low-income geographies and 24 branches in moderateincome geographies. The distribution was augmented by six MUI tract branches that serve low-income tracts and 23 MUI tract branches that serve moderate-income tracts. Examiners reviewed data on the accounts held and transactions conducted at the MUI branches and confirmed they were serving the adjacent low- and moderate-income populations.

| Distribution of Branch Delivery System |  |  |  |  |  |  |  | As of December 31, 2019 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Deposits | Branches |  |  |  |  |  |  |  |  |  |
| Assessment | \% of Rated Area | \# of <br> BANK <br> Branches | \% of <br> Rated <br> Area <br> Branches in AA | Location of Branches by Income of Geographies (\%) |  |  |  | \% of Population within Each Geography |  |  |  |
| Area | Deposits in AA |  |  | Low | Mod | Mid | Upp | Low | Mod | Mid | Upp |
| Detroit- <br> Warren-Ann <br> Arbor CSA | 89.5 | 153 | 73.2 | 10.5 | 15.7 | 37.9 | 35.3 | 10.7 | 22.9 | 34.5 | 31.5 |

[^118]Alternative delivery systems enhanced the delivery of banking services to geographies and individuals of all income levels. The OCC considered the availability and use of alternative delivery systems over the evaluation period. This included review of the bank's 392 deposit-taking ATMs, online banking, mobile banking, and telephone banking to determine the effectiveness of these systems to make retail banking services available to individuals in low- and moderate-income geographies. The bank increased the deposit-taking ATMs in low- and moderate-income geographies by 13.3 percent over the prior rating period to ten ( 4.0 percent) deposit-taking ATMs in low-income geographies and 41 (16.6 percent) ATMs in moderate-income geographies. Additionally, bank-provided data on use of online, mobile, and telephone banking showed increases in the adoption of these services by low- and moderate-income individuals from the prior rating period.

| Distribution of Branch Openings/Closings |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| A | \# of Branch Openings | \# of Branch Closings* | Net change in Location of Branches (+ or -) |  |  |  |
|  |  |  | Low | Mod | Mid | Upp |
| Detroit-Warren-Ann Arbor CSA | 0 | 45 | -4 | -7 | -25 | -8 |

$\left({ }^{*}\right)$ There is one branch closure in a geography that has not been assigned an income classification and is referred to as NA.
The bank's opening and closing of branches, has adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and/or to low- and moderate-income individuals. The bank closed four branches in low-income geographies and seven branches in moderateincome geographies. Branch closures were due to the bank's strategy to exit the market, reduced customer usage, and proximity to other Chase branches. Despite the branch closures, branch locations remained accessible to geographies and individuals of different income levels in the bank's AA due to the proximity of branches in MUI tracts used by individuals in low- and moderate-income tracts.

Services, including where appropriate, business hours, do not vary in a way that inconveniences its AA, particularly low- and moderate-income geographies and/or individuals. Generally, branches are open Monday through Thursday from 9:00 am to 5:00 pm, Friday from 9:00 am to 6:00 pm and Saturday from 9:00 am to 1:00 pm. All retail banking services are available at all branches within the low- and moderate-income geographies.

## Community Development Services

The bank was a leader in providing CD services that are responsive to AA needs.
Bank records show that employees provided 3,844 CD service activities to 100 organizations, logging 27,704 qualified hours which benefitted more than 12,700 low- and moderate-income individuals. All of the bank's assistance were to organizations that provide community services to low- and moderateincome individuals and families. The bank's community development services were responsive to the community needs in the AA, particularly homeownership counseling and financial literacy. The following are examples of CD services provided:

- The bank was responsive to a significant need in the AA by providing more than 210 financial literacy training sessions to more than 5,300 low- and moderate-income individuals. The bank partnered with a non-profit organization to provide financial capability and literacy education programs for citizens re-entering society after incarceration.
- The bank provided 142 homebuyer workshops and seminars to 4,211 low- and moderate-income individuals.

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall Outstanding Service Test rating and did not significantly change the initial overall conclusions based on the AAs receiving fullscope review. Based on limited-scope reviews, the bank's performance under the Service Test in the Lansing-East Lansing-Owosso, MI and MI Non-Metro AAs is consistent with the bank's overall performance under the Service Test in the full-scope area. The bank's performance in the Grand Rapids-Kentwood-Muskegon, MI; Kalamazoo-Battle Creek-Portage, MI; Niles-Benton Harbor MI; and Saginaw-Midland-Bay City, MI AAs is weaker than the bank's overall performance under the Service Test in the full-scope area due to weaker branch distribution in low- and moderate-income geographies.

## State Rating

## State of Nevada

CRA rating for the State of Nevada ${ }^{20}$ : Satisfactory
The Lending Test is rated: High Satisfactory
The Investment Test is rated: Outstanding
The Service Test is rated: High Satisfactory
The major factors that support this rating include:

- A good level of lending activity.
- An adequate geographic distribution of home mortgage loans and small loans to businesses.
- A good borrower distribution of home mortgage loans and small loans to businesses.
- A relatively high level of CD loans that positively affected the rating
- The extensive use of innovative/flexible products that positively affected the rating.
- An excellent level of CD investments that displayed excellent responsiveness to credit and community economic development needs.
- The extensive use of innovative and/or complex qualified investments.
- Retail service delivery systems that are reasonably accessible to geographies and individuals of different income levels.
- Leadership in providing CD services that are responsive to AA needs.

## Description of Institution's Operations in Nevada

The state of Nevada is Chase's $18^{\text {th }}$ largest rating area based on its total deposits of $\$ 4.3$ billion, representing 0.3 percent of the bank's total deposits. As of December 31, 2019, the bank operated 56 branches and 179 deposit-taking ATMs within the rating area, representing 1.1 percent of total branches and 1.1 percent of total ATMs. The bank originated and purchased approximately $\$ 4.2$ billion in loans or 0.6 percent of total bank loan originations and purchases during the evaluation period in the state.

According to FDIC Deposit Market Share Data, as of June 30, 2019, there were 50 banks s operating 492 branches s in the state of Nevada. The bank maintained 52 offices with deposits of $\$ 4.3$ billion ranking it $9^{\text {th }}$ in deposit market share with 1.6 percent. Charles Schwab Bank was ranked $1^{\text {st }}$ in deposit market share with 69.9 percent, followed by Wells Fargo Bank, N.A. with 6.7 percent and Bank of America, N.A. with 5.7 percent.

The bank delineated two AAs in the state of Nevada. The Las Vegas-Henderson-Paradise, NV MSA (Las Vegas MSA) accounts for 97.0 percent of the bank's deposits and 98.8 percent of loans in Nevada and received a full-scope review. The Reno MSA received a limited-scope review. The delineated AAs are described in appendix A.

## Description of Full-Scope AA

The following table provides a summary of the demographics that includes housing and business information for the Las Vegas MSA. Table A indicates that the volume of OOUs is small in low-

[^119]income census tracts ( 1.9 percent) and over 20.7 percent of families in the AA are low-income. The Las Vegas MSA's cost of housing also limits access to affordable homeownership among LMI borrowers. The median housing value in the Las Vegas MSA is 2.8 times the median income, 3.5 times the moderate-income, and 5.6 times the low-income, indicating a proportion of OOUs are unaffordable to most low-income and many moderate-income borrowers. One simplistic method used to determine housing affordability assumes a maximum monthly principal and interest payment of no more than 36 percent of the applicant's income.

In the Las Vegas MSA, assuming a 30-year mortgage with a 5.0 percent interest rate, 3.0 down payment, and not accounting for homeowners insurance, real estate taxes, or any additional monthly expenses, a low-income borrower making $\$ 29,997$ per year (or less than 50 percent of the FFIEC adjusted median family income in the MSA) could afford a $\$ 91,774$ mortgage with a payment of $\$ 900$ per month; a moderate-income borrower earning $\$ 47,994$ per year (or less than 80 percent of the FFIEC adjusted median family income in the AA) could afford a $\$ 177,575$ mortgage with a payment of $\$ 1,440$ per month.

Median rents and the significant percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

(*) The NA category consists of geographies that have not been assigned an income classification.

## Economic Data

According to the November 2019 Moody's Analytics Report, tourism is a key driver of the economy in the area led by gaming and entertainment. Las Vegas visitor volume is up 0.5 percent year to date through October, better than the 1.0 percent drop during the same period in 2018. Hotel occupancy is
rebounding, and gaming revenue is increasing. Furthermore, $\$ 16.2$ billion in tourism-related construction projects are scheduled to be completed over the next five years. Construction employment is rising and while it accounts for only 7 percent of employment in the area, it is responsible for 60.0 percent of the jobs created over the last year. Construction will remain a vital secondary driver of the economy. Major employment industries include leisure and hospitality services; professional and business services; and retail trade. Major employers in the area include MGM Resorts International; Caesar's Entertainment Corp; Station Casino Inc.; and Wynn Las Vegas LLC.

Moody's Analytics also states that after rising at one of the fastest paces among metro areas last year, house price appreciation in the area recently dipped below the U.S. average. Inventory has improved over the past year, but a four-month supply of homes for sale is still well below the six-month supply in a balanced market. Many potential homebuyers were priced out of the market last year as house prices rose twice as fast as incomes. An increase in construction of more affordable homes and multifamily units will support home sales over the near term.

## Community Contacts

A review was conducted of three community contacts completed during the examination period. The contacts were completed with organizations focused on affordable housing and small business support. Contacts noted that the area is experiencing strong economic growth which is leading to a higher cost of living. Much of the housing that is being constructed is geared towards middle and upper-income borrowers making it more difficult for first time home buyers and low-income households to secure long term housing. Contacts also noted that there are opportunities available for area banks to provide support for small businesses. Identified community needs include:

- Financing for small businesses with a particular emphasis on smaller dollar loans and loans for startup businesses
- Affordable multi-family housing development
- Flexible first-time home buyers' programs, including down payment assistance programs

## Scope of Evaluation in Nevada

The rating for the state of Nevada is based on an evaluation of the bank's performance in AAs as listed in appendix A. The Las Vegas MSA AA accounts for a significant majority, 97.0 percent, of the bank's deposits in Nevada and received a full-scope review. The remaining AA in the state of Nevada received a limited-scope review. Performance in limited-scope AAs and its effect on the CRA rating are discussed at the end of each test.

## CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN NEVADA

## LENDING TEST

The bank's performance under the Lending Test in the state of Nevada is rated High Satisfactory.
Performance in AAs receiving limited-scope reviews was factored together with performance from AAs receiving full-scope reviews to determine the state's overall High Satisfactory Lending Test rating. Limited-scope conclusions did not significantly affect the initial overall conclusions based on the AAs receiving full-scope review.

## Conclusions for Area Receiving a Full-Scope Review

Based on a full-scope review, the bank's performance in the Las Vegas MSA is good. Overall good lending levels, good borrower distribution of loans and a relatively high level of CD lending, offset weaker adequate geographic distribution. Product innovation and flexibility was considered favorably when determining the rating.

## Lending Activity

Lending levels reflect good responsiveness to AA credit needs.
Examiners considered the number and amount of home mortgage, small business, and small farm loans originated or purchased relative to Chase's capacity based on deposits, competition, and market presence. Lending activity for home mortgage and small loans to businesses received the most weight in reaching conclusions. Respectively, home mortgage lending and small loans to businesses account for 31.3 percent and 68.4 percent of the loan volume in the state by number and 85.6 and 13.3 percent of loan volume by dollar. Small farm lending is not a strategic focus of the bank and received minimal weight in reaching conclusions. Farm loans represented 0.1 percent of the loan volume in the state by number and 0.02 percent loan volume by dollar.

| Number of Loans* |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Las Vegas-Henderson-Paradise <br> MSA | 14,524 | 31,843 | 83 | 7 | 46,457 | 98.8 | 97.0 |
| Reno MSA | 189 | 352 | 9 | 0 | 550 | 1.2 | 3.0 |
| Total | 14,713 | 32,195 | 92 | 7 | 47,007 | 100.0 | 100.0 |

*The tables present the data for all assessment areas. The narrative below addresses performance in full-scope areas only.

| Dollar Volume of Loans* (in \$000s) |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Home <br> Assessment Area <br> Mortgage | Small <br> Business | Small <br> Farm | Community <br> Development | Total | \% of <br> State <br> Loans | \% State <br> Deposits |
| Las Vegas-Henderson- <br> Paradise MSA | $3,552,157$ | 558,962 | 1,030 | 48,712 | $4,160,861$ | 98.0 | 97.0 |
| Reno MSA | 80,779 | 4,258 | 110 | 0 | 85,147 | 2.0 | 3.0 |
| Total | $3,632,936$ | 563,220 | 1,140 | 48,712 | $4,246,008$ | 100.0 | 100.0 |

*The tables present the data for all assessment areas. The narrative below addresses performance in full-scope areas only.
Chase ranked fifth in deposits out of 42 institutions with 6.8 percent market share.
In overall home mortgage lending, Chase ranked sixth out of 551 lenders with a 2.9 percent market share. Other lenders in the market include Wells Fargo Bank, N.A. (8.8 percent), U.S. Bank, N.A. (7.7 percent), and Quicken Loans (4.8 percent).

In small loans to businesses, Chase ranked first out of 140 lenders with 15.3 percent market share. Other major lenders are Wells Fargo Bank, N.A. (14.4 percent), American Express National Bank (14.1 percent), and Bank of America, N.A. (10.8 percent).

In small loans to farms, Chase ranked first out of ten lenders with a 31.8 percent market share. The other major lenders are Wells Fargo Bank, N.A. (23.8 percent), U.S. Bank, N.A. (23.8 percent), and Bank of America, N.A. (9.5 percent).

## Distribution of Loans by Income Level of the Geography

The bank exhibits adequate geographic distribution of loans in its AA.

## Home Mortgage Loans

Refer to Table O in the state of Nevada section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate. The following information was taken into consideration when determining this rating.

- Examiners considered the limited proportion of housing units in low-income geographies, particularly OOUs (1.9 percent), which constrained lending opportunities.
- The high level of competition in the AA was also considered and examiners placed greater significance on performance compared to the aggregate of lenders.
- Between 2017 and 2019, the proportion of loans in low- and moderate-income areas was below the percentage of owner-occupied units and aggregate distribution of loans.
- During 2014 through 2016, performance in low-income geographies was well below both the percentage of owner-occupied units and aggregate distribution of loans, while performance in moderate-income geographies was well below the percentage of owner-occupied units and below the aggregate distribution of loans.

## Small Loans to Businesses

Refer to Table Q in the state of Nevada section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of small loans to businesses for this evaluation is adequate. The following information was taken into consideration when determining this rating.

- Examiners considered the small proportion of businesses in low-income geographies (3.6 percent) and competition between lenders.
- Performance against the aggregate distribution of lenders was given additional consideration as it reflects the difficulties all lenders are experiencing due to the economic constraints discussed above under the Description of the Full-Scope AA. The economic data particularly indicates the high cost of doing business and limited labor force as challenges for businesses.
- Between 2017 and 2019, the proportion of small loans to businesses in low-income geographies was well below the proportion of businesses and below the aggregate distribution, while the proportion of small loans to businesses in moderate-income geographies was below both the proportion of businesses and the aggregate distribution.
- During 2014 to 2016, the proportion of small loans to businesses in low-income geographies was well below the proportion of businesses and below the aggregate distribution, while the proportion of small loans to businesses in moderate-income geographies was below both the proportion of businesses and the aggregate distribution.

## Small Loans to Farms

Refer to Table $S$ in the state of Nevada section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to farms.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of small loans to farms is excellent. The following information was taken into consideration when determining this rating.

- The limited number of farms in low-income geographies, (2.3 percent), constrained lending opportunities; therefore, performance in moderate-income geographies was given slightly more consideration due to the higher number of farms in those geographies.
- The fact that farm lending is not a focus of the bank was also considered.
- Between 2017 and 2019, the proportion of loans to small farms in low- and moderate-income geographies exceeded both the proportion of farms in those geographies and the aggregate distribution of all lenders.
- During 2014 to 2016, the proportion of loans to small farms in low- and moderate-income geographies exceeded both the proportion of farms in those geographies and the aggregate distribution of all lenders.

## Lending Gap Analysis

A review of home mortgage loans, small loans to business, and small loans to farms including summary reports and AA maps did not identify any unexplained conspicuous lending gaps in the bank's activities.

## Distribution of Loans by Income Level of the Borrower

The bank exhibits good distribution of loans among individuals of different income levels and business of different sizes.

## Home Mortgage Loans

Refer to Table P in the state of Nevada section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases.

Based on the data in the tables and the following considerations, the bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good. The following information was taken into consideration when determining this rating.

- Greater significance was placed on performance against the aggregate distribution as it reflects the difficulties all lenders are experiencing due to competition and the economic constraints discussed above under the Description of the Full-Scope AA.
- Examiners particularly considered housing affordability challenges for low-income borrowers.
- Between 2017 and 2019, the proportion of loans to low-income borrowers was well below the percentage of low-income families and exceeded the aggregate distribution of lenders. The proportion of moderate-income loans exceeded both the proportion of moderate-income families and the aggregate distribution.
- During 2014 to 2016, the proportion of loans to low-income borrowers was well below the percentage of low-income families and exceeded the aggregate distribution of lenders. The proportion of moderate-income loans exceeded the proportion of moderate-income families and was near to the aggregate distribution.

## Small Loans to Businesses

Refer to Table R in the state of Nevada section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses.

Based on the data in the tables and the following factors, the distribution of the bank's originations and purchases of small loans to businesses by revenue category is good. The following information was taken into consideration when determining this rating.

- Greater significance was placed on performance against the aggregate distribution of lenders as it reflects the difficulties all lenders are experiencing due to competition and the economic constraints discussed above under the Description of the Full-Scope AA.
- Between 2017 and 2019, the bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.
- During 2014 to 2016, the bank's performance was consistent with performance between 2017 and 2019. The bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.

## Small Loans to Farms

Refer to Table T in the state of Nevada section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to farms.

Based on the data in the table and the following considerations, the distribution of the bank's originations and purchases of small loans to farms by revenue category is good. The following information was taken into consideration when determining this rating.

- Greater significance was placed on performance against the aggregate distribution of lenders as it reflects the difficulties all lenders are experiencing due to the economic constraints discussed above under the Description of the Full-Scope AA.
- The fact that farm lending is not a focus of the bank was considered.
- Between 2017 and 2019, the bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was near to the percentage of businesses and exceeded the aggregate distribution.
- During 2014 to 2016, the bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was near to the percentage of businesses and exceeded the aggregate distribution.

## Community Development Lending

The bank made a relatively high level of CD loans.
The Lending Activity Tables, shown above, set forth the information and data used to evaluate the bank's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The bank originated seven CD loans totaling $\$ 48.7$ million. This represents 9.0 percent of the tier 1 capital allocated to the AA. All CD loans were for affordable housing purposes, which is a critical need in this AA.

Examples of CD loans in the AA include:

- In July 2018, Chase originated a $\$ 10.0$ million construction loan for the renovation of a 100 -unit public housing complex. The project consists of 19 one-story apartment buildings. Seniors occupy the rental units, with 80 units to be rent restricted at 30 percent to 50 percent of the AMI and 20 units are covered under a 20 -year HAP project-based Section 8 contract. Southern Nevada Regional Housing Authority (SNRHA) is the Sponsor and will also serve as the property manager. The mission of HAP is to develop low-income housing for eligible residents of the Las Vegas area.
- In September 2019, Chase originated a $\$ 9.8$ million construction loan to renovate affordable apartment units located in Las Vegas. The project consists of 125 units, with 117 units rent restricted to low- and moderate-income individuals and or families. Sixty-six units will undergo substantial renovation and 59 units will require minimal upgrades. A mix of elderly, non-elderly, and disabled individuals currently occupy the units. A 20-year HAP project-based Section 8 contract will cover all units.

## Product Innovation and Flexibility

The bank makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. As outlined below, a total of 2,982 loans were funded totaling $\$ 594.0$ million. Refer to the comments in the Product Innovation and Flexibility section of this performance evaluation for additional details regarding the programs.

| Loan Type | Number of <br> Loans | Dollar Amount <br> (\$000's) |
| :--- | :---: | :---: |
| DreaMaker | 381 | 74,956 |
| FHA | 1,015 | 163,673 |
| HARP | 729 | 104,682 |
| VA | 634 | 157,176 |
| SBA | 161 | 83,284 |
| USDA | 62 | 10,225 |

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall High Satisfactory Lending Test rating and did not significantly affect the initial overall conclusions based on the AAs receiving full-scope review. Based on a limited-scope review, the bank's performance under the Lending Test in the Reno MSA is weaker than the bank's overall performance under the Lending Test in the full-scope area due to weaker borrower distributions and no CD lending activity.

Refer to Tables O through T in the state of Nevada section of appendix D for the facts and data that support these conclusions.

## INVESTMENT TEST

The bank's performance under the Investment Test in the state of Nevada is rated Outstanding.

## Conclusions for Area Receiving a Full-Scope Review

Based on a full-scope review, the bank's performance in the Las Vegas MSA AA is rated excellent.
The bank has an excellent level of qualified CD investments and grants, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 13.9 percent of tier 1 capital allocated to the AA. A significant majority, or 77.6 percent of total investments represent current period investments.

The bank exhibits excellent responsiveness to the needs identified in this AA. Seventy percent of the bank's CD investments focused on affordable housing, which is an identified credit need in the AA. Additionally, the bank provided 11 grants totaling $\$ 400,000$ to a variety of organizations that primarily support community service and economic development needs. All prior period investments are related to LIHTC investments that support affordable housing.

The bank makes extensive use of innovative and/or complex investments to support CD initiatives. Exclusive of grants, the bank made 10 current period CD Investments that included seven complex NMTC investments and LIHTC projects. NMTC funding serve as catalysts for revitalization or stabilization that encourages future economic development, while LIHTC projects include participations from federal and state governments, local housing agencies, and real estate developers.

Examples of CD investments in the AA include:

- The bank invested $\$ 12.0$ million in a LIHTC fund for affordable housing development in the AA. The bank does not use a syndicator but employs a multi-disciplined approach that focuses on the long-term nature of the investment. The bank performs all the functions a syndicator would perform
through in-house expertise. The bank conducts the underwriting, pricing, and due diligence prior to originating the investment. After origination, it monitors construction quality, lease-up and performance of the property through stabilization. Finally, the bank manages the asset for the entire fifteen- year hold period, ensuring compliance with the LIHTC program and conducting annual onsite inspections.
- The bank made three grants totaling $\$ 100,000$ to an entity that is responsive to the need of preparing low- and moderate-income job-seekers for middle skills jobs through employer partnership pipelines and/or on-the-job technical skills training in order to maximize the quality of life for each individual served. This promotes economic stability for low- and moderate-income individuals in the bank's AA.

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

## Statewide Investment in the State of Nevada

The bank has qualified investments throughout the state of Nevada whose $\mathrm{P} / \mathrm{M} / \mathrm{F}$ include serving the AAs. Thirty-four percent support affordable housing, 58 percent support community services, and eight percent support economic development. Investments with no $\mathrm{P} / \mathrm{M} / \mathrm{F}$ to serve AAs support affordable housing. Investments with and without a P/M/F to serve AAs represent $26.7 \%$ of total state qualified investments. The investments all address an identified community development need. These investment in the broader statewide area further support the bank's overall excellent performance under the Investment Test in state of Nevada.

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AA was factored into the state's overall Outstanding Investment Test rating and did not significantly change the initial overall conclusions based on the AA receiving fullscope review. Based on a limited-scope review, the bank's performance under the Investment Test in the Reno MSA AA is consistent with the bank's overall excellent performance under the Investment

Test in the full-scope area. Performance in the limited-scope area did not impact the bank's Investment Test rating for the state of Nevada.

## SERVICE TEST

The bank's performance under the Service Test in state of Nevada is rated High Satisfactory.

## Conclusions for Area Receiving a Full-Scope Review

Based on a full-scope review, the bank's performance in the Las Vegas MSA is good.

## Retail Banking Services

Service delivery systems are reasonably accessible to geographies and individuals of different income levels in the bank's AA.

Examiners evaluated the data as outlined in the Scope section at the front of this document including bank-provided data on usage of branches adjacent to low- and moderate-income geographies by individuals residing in those geographies and on increases in the usage of alternative delivery systems.

Based on the data in the table below and performance context, the branch distribution is adequate. In low- and moderate-income geographies, the distribution is respectively well below and below the percentage of the population. The bank had no branches in low-income geographies and eight branches in moderate-income geographies. The distribution was augmented by seven MUI tract branches that serve moderate-income tracts. Examiners reviewed data on the accounts held and transactions conducted at the MUI branches and confirmed they were serving the adjacent moderate-income populations.

| Distribution of Branch Delivery System |  |  |  |  |  |  |  | $\begin{gathered} \text { As of December 31, } 2019 \\ \hline \text { Population } \\ \hline \end{gathered}$ |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Assessment Area | Deposits | Branches |  |  |  |  |  |  |  |  |  |
|  | \% of Rated Area Deposits in AA | \# of <br> BANK <br> Branches | \% of <br> Rated <br> Area <br> Branches in $\mathbf{A A}$ | Location of Branches by Income of Geographies (\%) |  |  |  | \% of Population within Each Geography |  |  |  |
|  |  |  |  | Low | Mod | Mid | Upp | Low | Mod | Mid | Upp |
| Las VegasHenderson MSA | 100 | 49 | 100 | 0.0 | 16.3 | 49.0 | 34.7 | 5.0 | 25.3 | 39.2 | 30.3 |

* May not add up to 100 percent due to geographies with unknown tract income level and rounding

Alternative delivery systems enhanced the delivery of banking services to geographies and individuals of all income levels. The OCC considered the availability and use of alternative delivery systems over the evaluation period. This included review of the bank's 153 deposit-taking ATMs, online banking, mobile banking, and telephone banking to determine the effectiveness of these systems to make retail banking services available to individuals in low- and moderate-income geographies. The bank increased the deposit-taking ATMs in moderate-income geographies by 47.8 percent over the prior rating period to 34 (22.2 percent). There were no deposit-taking ATMs in low-income geographies. However, bankprovided data on use of online, mobile, and telephone banking systems showed increases in the adoption of these services by low- and moderate-income individuals from the prior rating period.

| Distribution of Branch Openings/Closings |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| Assessment <br> Area | \# of Branch <br> Openings | \# of Branch <br> Closings | Net change in Location of Branches <br> (+ or -$)$ |  |  |  |
|  |  | Low | Mod | Mid | Upp |  |
| Las Vegas- <br> Henderson <br> MSA | 4 | 4 | 0 | -1 | 0 | +1 |

The bank's opening and closing of branches has not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and/or to low- and moderate-income individuals. The bank did not open or close any branches in the low-income geographies and closed one branch in a moderate-income geography. Branch closures were due to reduced customer usage and unprofitability. Despite the branch closures, branch locations remained generally accessible to geographies and individuals of different income levels in the bank's AA.

Services, including where appropriate, business hours, do not vary in a way that inconveniences its AA, particularly low- and moderate-income geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 6:00 pm and Saturday from 9:00 am to 2:00 pm. All retail banking services are available at all branches within the moderate-income geographies.

## Community Development Services

The bank was a leader in providing CD services that are responsive to AA needs.
Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 243 qualified CD service activities to 29 organizations since the last evaluation, logging a total of 1,032 hours. All the bank's assistance was to organizations that provide community services to low- and moderate-income individuals and families. The bank's community development services were very responsive to the community needs in the AA, particularly affordable housing, and financial literacy. The following are examples of CD services provided:

- The bank provided financial incentives to 108 low- and moderate-income homebuyers to take homebuyer education from third-party organizations.
- Eighteen bank employees provided financial literacy training to low- and moderate-income participants of a national nonprofit whose program teaches students the basic concepts of financial literacy as it relates to everyday economics and how they apply this information into adulthood.

## Conclusions for Area Receiving a Limited-Scope Review

Performance in the limited-scope AAs was factored into the state's overall High Satisfactory Service Test rating and did not significantly change the initial overall conclusions based on the AAs receiving full-scope review. Based on a limited-scope review, the bank's performance under the Service Test in the Reno MSA is consistent with the bank's overall performance under the Service Test in the full-scope area.

## State Rating

## State of New York

CRA rating for the State of New York ${ }^{\mathbf{2 1}}$ : Outstanding
The Lending Test is rated: High Satisfactory
The Investment Test is rated: Outstanding
The Service Test is rated: Outstanding
The major factors that support this rating include:

- A good level of lending activity.
- An adequate geographic distribution of home mortgage loans and small loans to businesses.
- A good borrower distribution of home mortgage loans and small loans to businesses.
- A relatively high level of CD loans that positively affected the rating
- The extensive use of innovative/flexible products that positively affected the rating.
- An excellent level of CD investments that displayed excellent responsiveness to credit and community economic development needs.
- The extensive use of innovative and/or complex qualified investments.
- Retail service delivery systems that are readily accessible to geographies and individuals of different income levels.
- Leadership in providing CD services that are responsive to AA needs.

## Description of Institution's Operations in New York

The state of New York is Chase's $20^{\text {th }}$ largest rating area based on its total deposits of $\$ 4.1$ billion, representing 0.3 percent of the bank's total deposits. As of December 31, 2019, the bank operated 38 branches and 71 deposit-taking ATMs within the rating area, representing 0.7 percent of total branches and 0.4 percent of total ATMs. The bank originated and purchased approximately $\$ 1.2$ billion in loans or 0.2 percent of total bank loan originations and purchases during the evaluation period in the state.

According to FDIC Deposit Market Share Data as of June 30, 2019, there were 211 banks operating 4,795 branches in the state of New York. The bank-maintained 702 offices with deposits of $\$ 573.7$ billion in the state, ranking $1^{\text {st }}$ in deposit market share with 32.9 percent. Major competitors in the state include The Bank of New York Mellon with 7.1 percent market share, Citibank, N.A. with 6.3 percent market share, and HSBC Bank with 6 percent market share.

The bank delineated three AAs in the state of New York. The Rochester, NY MSA (Rochester MSA), which accounts for 67.0 percent of the bank's deposits and 62.9 percent of loans in New York, received a full-scope review. The Syracuse MSA and NY Non-Metro AA received limited-scope reviews. The delineated AAs are described in appendix A.

## Description of Full-Scope AA

The following table provides a summary of the demographics that includes housing and business information for the Rochester MSA. Table A indicates that the volume of OOUs is small in low-income

[^120]census tracts ( 3.8 percent) and over 21.6 percent of families in the AA are low-income. The Rochester MSA's cost of housing also limits access to affordable homeownership among some low-income borrowers. The median housing value in the Rochester MSA is 1.9 times the median income, 2.5 times the moderate-income, and 3.9 times the low-income, indicating a proportion of OOUs are unaffordable to some low-income borrowers. One simplistic method used to determine housing affordability assumes a maximum monthly principal and interest payment of no more than 36 percent of the applicant's income.

In the Rochester MSA, assuming a 30 -year mortgage with a 5.0 percent interest rate, 3.0 down payment, and not accounting for homeowners insurance, real estate taxes, or any additional monthly expenses, a low-income borrower making $\$ 33,878$ per year (or less than 50 percent of the FFIEC adjusted median family income in the MSA) could afford a $\$ 110,250$ mortgage with a payment of $\$ 1,016$ per month; a moderate-income borrower earning \$54,206 per year (or less than 80 percent of the FFIEC adjusted median family income in the AA) could afford a $\$ 207,147$ mortgage with a payment of $\$ 1,626$ per month.

Median rents and the significant percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

(*) The NA category consists of geographies that have not been assigned an income classification.

## Economic Data

According to the September 2019 Moody's Analytics Report, the Rochester area's strengths include stability and support to high wage jobs from educational institutions and hospitals; housing that is relatively affordable; and solid educational attainment relative to other upstate and western New York
peers. However, the area does suffer from persistent out-migration from younger residents and the labor market is tightening. The area has an over dependence on legacy manufacturers such as Kodak and Xerox, which have both been steadily contracting and laying off employees. Hopes that a photonics hub would leverage the metro area's key assets and revitalize the economy are fading. The national photonics institute that was announced four years ago and was initially projected to create 6,000 jobs has been slow to launch. A photonics firm that announced plans to expand in the Rochester area just over a year ago, has changed course and is now laying off workers. Major employment industries include education and health services; government; professional and business services; and manufacturing. Anchor institutions the University of Rochester and Rochester Regional Health System are significant contributors to the local economy and major employers. Other major employers include Wegmans Food Markets; Paychex, Inc; and Rochester Institute of Technology. Moody's notes that the cost of housing in the area is relatively affordable, however, inventory is tight. The lack of homes is suppressing sales and bidding wars from potential home buyers are becoming more commonplace.

## Community Contacts

A review was conducted of three community contacts completed with organizations serving the area during the examination period. One of the contacts was completed with an organization focused on affordable housing, while the other contact was the result of a listening session completed with a variety of organizations serving the community. These organizations focused on areas such as affordable housing; workforce development; community services; community advocacy; and financial education. Contacts noted that the area has a tight housing supply which makes it difficult for the neediest residents to find decent and affordable housing. The area has a high poverty rate and the percentage of children in Rochester who live in poverty is among the highest in the country. Contacts noted that there is a significant need for affordable mortgage loans for low- and moderate-income borrowers; loans for smaller sized businesses, and affordable auto loans for low-income individuals, particularly for those who have had past credit challenges. Contacts also noted the need to support revitalization and stabilization efforts in low- and moderate-income neighborhoods in the area. There is also a significant need for community development loans, investments, and services in the City, with many opportunities for banks to be more engaged.

## Scope of Evaluation in New York

The rating for the state of New York is based on an evaluation of the bank's performance in AAs as listed in appendix A. The Rochester MSA accounts for 67.0 percent of the bank's deposits in New York and received a full-scope review. The remaining two AAs in the state of New York received limitedscope reviews. Performance in limited-scope AAs and its effect on the CRA rating are discussed at the end of each test.

## CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN NEW YORK

## LENDING TEST

The bank's performance under the Lending Test in the state of New York is rated High Satisfactory.
Performance in AAs receiving limited-scope reviews was factored together with performance from AAs receiving full-scope reviews to determine the state's overall High Satisfactory Lending Test rating.

Limited-scope conclusions did not significantly affect the initial overall conclusions based on the AAs receiving full-scope review.

## Conclusions for Area Receiving a Full-Scope Review

Based on a full-scope review, the bank's performance in the Rochester MSA is good. Overall good lending levels, good borrower distribution of loans and a relatively high level of CD lending, offset weaker adequate geographic distribution. Product innovation and flexibility was considered favorably when determining the rating.

## Lending Activity

Lending levels reflect good responsiveness to AA credit needs.
Examiners considered the number and amount of home mortgage, small business, and small farm loans originated or purchased relative to Chase's capacity based on deposits, competition, and market presence. Lending activity for home mortgage and small loans to businesses received the most weight in reaching conclusions. Respectively, home mortgage lending and small loans to businesses account for 21.1 percent and 77.3 percent of the loan volume in the state by number and 60.2 and 33.6 percent of loan volume by dollar. Small farm lending is not a strategic focus of the bank and received minimal weight in reaching conclusions. Farm loans represented 1.4 percent of the loan volume in the state by number and 0.30 percent loan volume by dollar.

| Number of Loans* |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Assessment Area | Home <br> Mortgage | Small <br> Business | Small <br> Farm | Community <br> Development | \% <br> Total | State <br> Loans | Deposits |
| Rochester, NY MSA | 2,758 | 12,613 | 216 | 10 | 15,597 | 62.9 | 67.0 |
| Syracuse, NY MSA | 2,217 | 5,656 | 105 | 7 | 7,985 | 32.2 | 29.7 |

| Total | 5,243 | 19,177 | 357 | 20 | 24,797 | 100 | 100 |

*Due to rounding, totals may not equal $100.0 \%$. The tables present the data for all assessment areas. The narrative below addresses performance in full-scope areas only.

| Dollar Volume of Loans* (in \$000s) |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Home <br> Mortgage | Small <br> Business | Small <br> Farm | Community <br> Development | Total | \% <br> State <br> Loans | \% State <br> Deposits |
| Rochester, NY MSA | 381,560 | 231,278 | 2,108 | 37,825 | 652,771 | 55.8 | 67.0 |
| Syracuse, NY MSA | 278,011 | 147,192 | 451 | 19,785 | 445,439 | 38.1 | 29.7 |
| NY Non-Metro AA | 45,106 | 15,333 | 972 | 10,190 | 71,601 | 6.1 | 3.2 |
| Total | 704,677 | 393,803 | 3,531 | 67,800 | $1,169,811$ | 100 | 100 |

*Due to rounding, totals may not equal $100.0 \%$. The tables present the data for all assessment areas. The narrative below addresses performance in full-scope areas only.

Chase ranked second in deposits out of 19 institutions with 14.3 percent market share.
In overall home mortgage lending, Chase ranked 16th out of 279 lenders with a 2.2 percent market share. Other lenders in the market include ESL Federal Credit Union (17.6 percent), Wells Fargo Bank, N.A. ( 7.5 percent), and Premium Mortgage Corporation ( 5.8 percent).

In small loans to businesses, Chase ranked second out of 96 lenders with 17.3 percent market share. Other major lenders are M\&T Bank ( 21.6 percent), Canandaigua National Bank ( 15.5 percent), and KeyBank National Association (6.9 percent).

In small loans to farms, Chase ranked third out of 17 lenders with a 15.5 percent market share. The other major lenders are USNY Bank (27.0 percent), John Deere Financial, F.S.B. (18.1 percent), and Community Bank, N.A. (10.1 percent).

## Distribution of Loans by Income Level of the Geography

The bank exhibits an adequate geographic distribution of loans in its AA.

## Home Mortgage Loans

Refer to Table O in the state of New York section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good. The following information was taken into consideration when determining this rating.

- Examiners considered the limited proportion of housing units in low-income geographies, particularly OOUs ( 3.8 percent), which constrained lending opportunities.
- The high level of competition in the AA was also considered and examiners placed greater significance on performance compared to the aggregate of lenders.
- Between 2017 and 2019, the proportion of loans in low-income areas was well below the percentage of owner-occupied units and aggregate distribution of loans. In moderate-income areas the proportion of loans was below the percentage of owner-occupied units and near to the aggregate distribution of loans.
- During 2014 through 2016, performance in low-income geographies was well below both the percentage of owner-occupied units and aggregate distribution of loans, while performance in moderate-income geographies was near to the percentage of owner-occupied units and exceeded the aggregate distribution of loans.

## Small Loans to Businesses

Refer to Table Q in the state of New York section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses.

Based on the data in the table and the following considerations, the distribution of the bank's originations and purchases of small loans to businesses by revenue category is adequate. The following information was taken into consideration when determining this rating.

- Examiners considered the small proportion of businesses in low-income geographies ( 10.0 percent) and competition between lenders.
- Performance against the aggregate distribution of lenders was given additional consideration as it reflects the difficulties all lenders are experiencing due to the economic constraints discussed above under the Description of the Full-Scope AA. The economic data particularly indicates the high cost of doing business and limited labor force as challenges for businesses.
- Between 2017 and 2019, the proportion of small loans to businesses in low- and moderate-income geographies was below both the proportion of businesses and the aggregate distribution.
- During 2014 to 2016, the proportion of small loans to businesses in low-income geographies was well below the proportion of businesses and below the aggregate distribution, while the proportion of small loans to businesses in moderate-income geographies was well below both the proportion of businesses and the aggregate distribution.

## Small Loans to Farms

Refer to Table S in the state of New York section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to farms.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of small loans to farms is poor. The following information was taken into consideration when determining this rating.

- The limited number of farms in low-income geographies (2.1 percent) constrained lending opportunities; therefore, performance in moderate-income geographies was given slightly more consideration due to the higher number of farms in those geographies.
- The fact that farm lending is not a focus of the bank was also considered.
- Between 2017 and 2019, the proportion of loans to small farms in low-income geographies was well below the proportion of farms in those geographies and exceeded the aggregate distribution of all lenders. The proportion of loans to small farms in moderate-income geographies was well below both the proportion of farms in those geographies and the aggregate distribution of all lenders.
- During 2014 to 2016, the proportion of loans to small farms in low- and moderate-income geographies was well below both the proportion of farms in those geographies and the aggregate distribution of all lenders.

## Lending Gap Analysis

A review of home mortgage loans, small loans to business, and small loans to farms including summary reports and AA maps did not identify any unexplained conspicuous lending gaps in the bank's activities.

## Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and business of different sizes.

## Home Mortgage Loans

Refer to Table P in the state of New York section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases.

Based on the data in the tables and the following considerations, the bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good. The following information was taken into consideration when determining this rating.

- Greater significance was placed on performance against the aggregate distribution as it reflects the difficulties all lenders are experiencing due to competition and the economic constraints discussed above under the Description of the Full-Scope AA.
- Examiners particularly considered housing affordability challenges for low-income borrowers.
- Between 2017 and 2019, the proportion of loans to low-income borrowers was below the percentage of low-income families and near to the aggregate distribution of lenders. The proportion of moderate-income loans exceeded the proportion of moderate-income families and was near to the aggregate distribution.
- During 2014 to 2016 the proportion of loans to low-income borrowers was below the percentage of low-income families and exceeded the aggregate distribution of lenders. The proportion of moderate-income loans exceeded the proportion of moderate-income families and was below the aggregate distribution.

## Small Loans to Businesses

Refer to Table R in the state of New York section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses.

Based on the data in the tables and the following factors, the distribution of the bank's originations and purchases of small loans to businesses by revenue category is good. The following information was taken into consideration when determining this rating.

- Greater significance was placed on performance against the aggregate distribution of lenders as it reflects the difficulties all lenders are experiencing due to competition and the economic constraints discussed above under the Description of the Full-Scope AA.
- Between 2017 and 2019, the bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.
- During 2014 to 2016, the bank's performance was consistent with performance between 2017 and 2019. The bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.

## Small Loans to Farms

Refer to Table T in the state of New York section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to farms.

Based on the data in the table and the following considerations, the distribution of the bank's originations and purchases of small loans to farms by revenue category is good. The following information was taken into consideration when determining this rating.

- Greater significance was placed on performance against the aggregate distribution of lenders as it reflects the difficulties all lenders are experiencing due to the economic constraints discussed above under the Description of the Full-Scope AA.
- The fact that farm lending is not a focus of the bank was considered.
- Between 2017 and 2019, the bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.
- During 2014 to 2016, the bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.

## Community Development Lending

The bank made a relatively high level of CD loans.
The Lending Activity Tables, shown above, set forth the information and data used to evaluate the bank's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The bank made 10 CD loans totaling $\$ 37.8$ million, which represents 11.0 percent of the tier 1 capital allocated to the AA. The majority of the CD loans, or 65.3 percent, were for affordable housing purposes, which is a critical need in this AA.

Examples of CD loans in the AA include:

- In October 2019, Chase originated a $\$ 7.4$ million construction loan to partially finance the development of an apartment complex located in Brockport, NY (Monroe County). The project will consist of 48 units of affordable housing available to households earning between 50 percent and 60 percent of the AMI. There will be eight units set aside for persons with physical disabilities and/or traumatic brain injuries with supportive services to be provided for them.
- In March 2017, Chase originated an $\$ 8.8$ million loan for the construction and rehabilitation of affordable housing in a low-income region of Rochester, NY. The project includes an existing threestory building, which was converted from a commercial space to residential units. The property will contain a total of 72 mixed-income affordable units with 68 units being restricted to 60 percent of the AMI. In addition, 16 of the units are set aside for tenants with intellectual and developmental disabilities.

## Product Innovation and Flexibility

The bank makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. As shown in the table below, the bank originated 774 loans totaling $\$ 80.4$ million in the AA.

Refer to the comments in the Product Innovation and Flexibility section of this performance evaluation for additional details regarding the programs.

| Loan Type | Number of <br> Loans | Dollar Amount <br> (\$000's) |
| :--- | :---: | :---: |
| DreaMaker | 131 | 14,492 |
| Federal Housing Administration (FHA) | 273 | 24,052 |
| U.S. Department of Agriculture (USDA) | 256 | 25,977 |
| Veteran's Administration (VA) | 67 | 10,792 |
| Home Affordable Refinance Program (HARP) | 34 | 3,169 |
| Small Business Administration (SBA) | 13 | 1,968 |

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall High Satisfactory Lending Test rating and did not significantly affect the initial overall conclusions based on the AAs receiving full-scope review. Based on limited-scope reviews, the bank's performance in the Syracuse MSA and NY Non-Metro AA is consistent with the bank's overall performance under the Lending Test in the fullscope area.

Refer to Tables O through T in the state of New York section of appendix D for the facts and data that support these conclusions.

## INVESTMENT TEST

The bank's performance under the Investment Test in the state of New York is rated Outstanding.

## Conclusions for Area Receiving a Full-Scope Review

Based on a full-scope review, the bank's performance in the Rochester MSA is excellent.
The bank has an excellent level of qualified CD investments and grants, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 27.5 percent of tier 1 capital allocated to the AA. A significant majority, or 94.6 percent of total investments represent current period investments.

The bank exhibits excellent responsiveness to the community development needs in the AA including affordable housing and community services for low- and moderate-income individuals and geographies. All of the bank's current and prior period CD investments focused on affordable housing, an identified credit needs in the AA. Additionally, the bank provided 25 grants totaling $\$ 1.6$ million to a variety of organizations that primarily support community service needs. In total, the bank's investments helped create 955 and retain 1,808 low- and moderate-income affordable housing units.

The bank makes extensive use of innovative and/or complex investments to support CD initiatives. Exclusive of grants, the bank made six current period and one prior complex CD investments. These include five complex Direct Investment LIHTC transactions, where the bank manages the asset throughout the holding period using in-house expertise, and one transaction supporting a construction and rehabilitation of a 52 -unit housing unit building in a low-income area.

Examples of CD investments in the AA include:

- The bank made a $\$ 12.5$ million single Direct Investment LIHTC transaction to an organization that provided 160 rental units to low- and moderate-income individuals and families.
- The bank made six grants totaling $\$ 286,000$ to an entity that creates new low- and mid-skilled job opportunities in low- and moderate-income neighborhoods. The entity creates an accelerator to develop a pipeline of businesses that are investment ready. The program identifies businesses that are located or will locate in higher poverty neighborhoods and bring needed job opportunities for low- and mid-skill workers living in those low- and moderate-income communities. The majority of the business participants are low- and moderate-income individuals.

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

## Statewide Investments in the State of New York

The bank has qualified investments throughout the state of New York whose $\mathrm{P} / \mathrm{M} / \mathrm{F}$ includes serving the AAs. Ninety-five percent support affordable housing, four percent support revitalization/stabilization, one percent support community service and one small investment supports economic development. Investments with no $\mathrm{P} / \mathrm{M} / \mathrm{F}$ to serve AAs support affordable housing, economic development, and community services. Investments with and without a $\mathrm{P} / \mathrm{M} / \mathrm{F}$ to serve AAs represent 58.9 percent of total state qualified investments. These investment in the broader statewide area further support the bank's overall excellent performance under the Investment Test in state of New York.

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall Outstanding Investment Test rating and did not change the initial overall conclusions based on the AA receiving a full-scope review. Based on limited-scope reviews, the bank's performance under the Investment Test in the Syracuse MSA and the NY Non-Metro AA is consistent with the bank's overall excellent performance under the Investment Test in the full-scope area.

## SERVICE TEST

The bank's performance under the Service Test in state of New York is rated Outstanding.

## Conclusions for Area Receiving a Full-Scope Review

Based on a full-scope review, the bank's performance in the Rochester MSA is excellent.

## Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the bank's AA.

Examiners evaluated the data as outlined in the Scope section at the front of this document including bank-provided data on usage of branches adjacent to low- and moderate-income geographies by individuals residing in those geographies and on increases in the usage of alternative delivery systems.

Based on the data in the table below and performance context, the branch distribution is excellent. In low- and moderate-income geographies, the distribution is respectively near to and exceeds the percentage of the population. The bank had two branches in low-income geographies and six branches in moderate-income geographies. The distribution was augmented by one MUI tract branch that serves low-income tracts and one MUI tract branch that serves moderate-income tracts. Examiners reviewed data on the accounts held and transactions conducted at the MUI branches and confirmed they were serving the adjacent low- and moderate-income populations.

| Distribution of Branch Delivery System |  |  |  |  |  |  |  | As of December 31, 2019 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | $\begin{gathered} \text { Deposits } \\ \hline \text { \% of } \\ \text { Rated } \\ \text { Area } \\ \text { Deposits } \\ \text { in AA } \end{gathered}$ | Branches |  |  |  |  |  | Population |  |  |  |

* May not add up to 100 percent due to geographies with unknown tract income level and rounding

Alternative delivery systems enhanced the delivery of banking services to geographies and individuals of all income levels. The OCC considered the availability and use of alternative delivery systems over the evaluation period. This included review of the bank's 45 deposit-taking ATMs, online banking,
mobile banking, and telephone banking to determine the effectiveness of these systems to make retail banking services available to individuals in low- and moderate-income geographies. The bank increased the deposit-taking ATMs in low- and moderate-income geographies by 45.5 percent over the prior rating period to three ( 6.7 percent) deposit-taking ATMs in low-income geographies and 13 (28.9 percent) ATMs in moderate-income geographies. Additionally, bank-provided data on use of online, mobile, and telephone banking showed increases in the adoption of these services by low- and moderate-income individuals from the prior rating period.

| Distribution of Branch Openings/Closings |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Assessment Area | \# of Branch Openings | \# of Branch Closings | Net change in Location of Branches(+ or -) |  |  |  |
|  |  |  | Low | Mod | Mid | Upp |
| Rochester-Batavia-Seneca Falls CSA | 0 | 4 | -1 | 0 | -2 | -1 |

The bank's opening and closing of branches has not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and/or to low- and moderate-income individuals. The bank closed one branch in a low-income geography and did not open or close any branches in moderate-income geographies. The branch closure in the low-income geography was due reduced customer usage and unprofitability. Despite the branch closure, branch locations in general remained accessible to geographies and individuals of different income levels in the bank's AA.

Services, including where appropriate, business hours, do not vary in a way that inconveniences, its AA, particularly in low- and moderate-income geographies and/or to low- and moderate-income individuals. Generally, branches are open Monday through Friday from 8:30 am to 6:00 pm and Saturday from 9:00 am to 2:00 pm. All retail banking services are available at all branches within the low- and moderateincome geographies.

## Community Development Services

The bank was a leader in providing CD services that are responsive to AA needs.
Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 233 CD service activities to 15 organizations since the last evaluation, logging a total of 1,044 qualified hours. All the bank's assistance was to organizations that provide community services to low- and moderate-income individuals and families. The bank's CD services were very responsive to the community needs in the AA, particularly affordable housing. The following are examples of CD services provided:

- The bank provided financial incentives to 70 low- and moderate-income homebuyers to take homebuyer education from third-party organizations. Successfully completing the pre-purchase homebuyer education curriculum provides low- and moderate-income customers tools and resources to become financially successful homeowners.
- Eight bank employees provided technical assistance to the local office of a statewide nonprofit whose vision is to achieve social and economic justice for the people of New York State who are poor, disabled, or disenfranchised.

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall Outstanding Service Test rating and did not significantly change the initial overall conclusions based on the AAs receiving fullscope review. Based on limited-scope reviews, the bank's performance under the Service Test in the NY Non-Metro AA is consistent with the bank's overall performance under the Service Test in the fullscope area. The bank's performance under the Service Test in the Syracuse MSA is good and weaker than the bank's overall performance under the Service Test in the full-scope area due to weaker branch distribution.

## State Rating

## State of Ohio

CRA rating for the State of Ohio ${ }^{\mathbf{2 2}}$ : Outstanding
The Lending Test is rated: High Satisfactory
The Investment Test is rated: Outstanding The Service Test is rated: Outstanding

The major factors that support this rating include:

- An excellent level of lending activity.
- Overall adequate geographic distribution of home mortgage loans and small loans to businesses.
- Overall good borrower distribution of home mortgage loans and small loans to businesses.
- Few, if any CD loans which has a negative effect on the Lending Test rating.
- The extensive use of flexible products, which positively affected the rating.
- An excellent level of qualified investments, excellent responsiveness to credit and community economic development needs, and qualified investments provided in a broader statewide or regional area.
- Retail service delivery systems are readily accessible to geographies and individuals of different income levels.
- Chase is a leader in providing CD services that are responsive to AA needs.

## Description of Institution's Operations in Ohio

The state of Ohio is Chase's ninth largest rating area based on aggregate deposits of $\$ 27.3$ billion, representing 2.0 percent of the bank's total deposits. As of December 31, 2019, the bank operated 214 branches and 499 deposit-taking ATMs within the rating area, representing 4.3 percent of total branches and 3 percent of total ATMs. The bank originated and purchased approximately $\$ 12.6$ billion in loans or 1.8 percent of total bank loan originations and purchases during the evaluation period in the state.

According to the FDIC Deposit Market Share Data, as of June 30, 2019, there were 188 banks operating 2,999 branches in the state of Ohio. Chase ranked second in deposit market share with 11.5 percent. Major competitors in the state based on deposit market share include Huntington National Bank (21.3 percent), PNC Bank, N.A. (10.2 percent), and KeyBank (9.9 percent).

Chase has delineated nine AAs in the state of Ohio. The Columbus-Marion-Zanesville, OH CSA was selected for a full-scope review. The CSA consists only of the Columbus, OH MSA. The Cleveland-Akron-Canton CSA, Lima MSA, Dayton-Springfield-Sidney CSA, Mansfield MSA, Toledo MSA, Weirton-Steubenville MSA, Youngstown-Warren-Boardman MSA, and the Ohio Non-Metro AA received limited-scope reviews. The bank's performance under the Lending Test in the Refer to appendix A for a complete description of the AAs.

[^121]
## Description of Full-Scope AA

The following table provides a summary of the demographic that includes housing and business information for the Columbus MSA. Table A indicates that the volume of OOUs is very small in lowincome CTs and over 22.3 percent of families in the AA are low-income with 10.5 percent below the poverty level. The median housing value in the Columbus MSA is three times the median income, three times the moderate-income and five times the low-income, indicating a limited proportion of OOUs are affordable to low-income borrowers. One simplistic method used to determine housing affordability assumes a maximum monthly principal and interest payment of no more than 30 percent of the applicant's income.

In the Columbus MSA, assuming a 30-year mortgage with a five percent interest rate and three percent down payment, while not accounting for homeowners insurance, real estate taxes, or any additional monthly expenses, a low-income borrower making $\$ 35,227$ per year (or less than 50 percent of the FFIEC adjusted median family income in the MSA) could afford a $\$ 116,713$ mortgage loan with a payment of $\$ 1,057$ per month; a moderate-income borrower earning $\$ 56,363$ per year (or less than 80 percent of the FFIEC adjusted median family income in the MSA) could afford a $\$ 217,444$ mortgage loan with a payment of $\$ 1,691$ per month.

## Economic Data

According to the Moody's Analytics September 2019 report, the Columbus economy has gained ground and is now outperforming all the state's major metro areas year to date. The area's strengths include good prospects for high tech and other knowledge-based industries; favorable migration patterns and age
structure; a highly educated workforce; low-costs of living and doing business; and above-average house price growth. However, per capita income in the area is below the U.S. average and single-family residential building is weak. White collar services, healthcare, and government are driving employment in the area. Major employers in the area include Ohio State University; JP Morgan Chase; Ohio Health; and Nationwide. Housing demand in the area is strong and vacancy rates, in terms of both percentage of houses for sale and percentage of inventory for rent, are below both statewide and national averages.

## Community Contacts

Examiners considered six community contacts completed during the review period with entities serving the area. The contacts were with organizations focused on community revitalization and self-sufficiency for low-income households and individuals. Contacts noted that the population in the area is growing and because of increasing demand for housing, landlords are being more selective when screening potential tenants. As such, individuals with criminal histories, poor credit or past evictions have more difficulty in securing safe and affordable housing. Contacts also noted that despite the growing economy many families in the area are food insecure and rely on food pantries for assistance. Other needs identified by the contacts included greater access to affordable housing, small business loans, general operating support for area non-profits, affordable mortgage loans and rehabilitation loans.

## Scope of Evaluation in Ohio

The Columbus MSA received a full-scope review. The MSA accounts for 50.6 percent of the deposits and 37.9 percent of the lending in the state. The remaining eight AAs in the state of Ohio received limited-scope reviews. Performance in limited-scope AAs and its effect on the CRA rating are discuss at the end of each test.

## CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN OHIO

## LENDING TEST

The bank's performance under the Lending Test in the state of Ohio is rated High Satisfactory.

## Conclusions for Area Receiving a Full-Scope Review

Based on a full-scope review, the bank's performance in the Columbus MSA is good based on overall excellent lending levels, adequate geographic distribution of loans and good borrower distribution of loans.

## Lending Activity

Lending levels reflect excellent responsiveness to the credit needs in the bank's AA.
Examiners considered the number and amount of home mortgage, small business, small farm loans originated or purchased relative to Chase's capacity based on deposits, competition, and market presence. Lending activity for home mortgage and small loans to businesses received the most weight in reaching conclusions. Respectively, home mortgage lending and small loans to businesses account for 33.5 percent and 65.5 percent of the loan volume in the state by number and 75.4 percent and 23.5 percent of loan volume by dollar. Small farm lending is not a strategic focus of the bank and received
minimal weight in reaching conclusions. Farm loans represented 0.93 percent of the loan volume in the state by number 0.31 percent loan volume by dollar.

*Due to rounding, totals may not equal $100.0 \%$. The tables present the data for all assessment areas. The narrative below addresses performance in fullscope areas only.

Chase ranked second in deposits of 55 institutions with market share of 22.3 percent.
In overall HMDA lending, Chase ranked second with 6.0 percent market share. This is a highly competitive market with 592 mortgage lenders. The top lender in this market is Huntington National Bank with 12.7 percent market share with U.S. Bank, N.A. behind Chase with 4.8 percent market share.

Chase ranked first in small loans to businesses with 25.4 percent market share. There were 139 lenders in this MSA. Other major lenders and their market share are American Express National Bank (14.7 percent), PNC Bank, N.A. (13.0 percent), and Huntington National Bank (7.4 percent).

Chase ranked second in small loans to farms 20.3 percent market share. There are 26 lenders in the MSA. The other major lender in this market is John Deere, Financial, F.S.B. with 20.5 percent market share. Huntington National Bank is ranked third with 11.9 percent market share.

## Distribution of Loans by Income Level of the Geography

The bank exhibits an adequate geographic distribution of loans in its AA.

## Home Mortgage Loans

Refer to Table O in the state of Ohio section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate. The following information was taken into consideration when determining this rating.

## Columbus MSA

- The limited proportion of housing units in low-income geographies, particularly OOUs ( 5.2 percent), constrained lending opportunities; therefore, performance in moderate-income geographies was given slightly more consideration due to the higher percentage of OOUs in those geographies.
- The high level of competition in the AA (592 home mortgage lenders) was also considered and examiners placed greater significance on performance compared to the aggregate of lenders.
- Between 2017 and 2019, the proportion of loans in low- and moderate-income areas was near to the proportion of OOUs in those geographies and the aggregate distribution of loans.
- The performance in low- and moderate-income geographies during the 2014 and 2016 time periods was inconsistent with 2017 to 2019. The proportion of loans in low- and moderate-income geographies is well below the proportion of OOUs in those geographies, and below the aggregate distribution of loans.

## Small Loans to Businesses

Refer to Table Q in the state of Ohio section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of small loans to businesses for this evaluation is adequate. The following information was taken into consideration when determining this rating.

- Ohio is ranked the third worst state in the country for business tax advantages.
- The overall AA scores poorly in small-business vitality.
- Between 2017 and 2019, the proportion of loans to small businesses in low- and moderate-income geographies was below the proportion of small businesses in those areas and well-below the aggregate distribution of loans.
- The performance in low- and moderate-income geographies during the 2014 and 2016 time periods was generally consistent with 2017 to 2019. The proportion of loans to small businesses in low- and moderate-income geographies was below the proportion of small businesses in those areas and the aggregate distribution of loans.

## Small Loans to Farms

Refer to Table $S$ in the state of Ohio section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to farms.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of small loans to farms is good. The following information was taken into consideration when determining this rating.

- The limited percentage of farms in low-income geographies (4.5 percent) constrained lending opportunities; therefore, performance in moderate-income geographies was given slightly more consideration due to the higher percentage of farms in those geographies.
- Between 2017 and 2019, the proportion of loans to small farms in low-income geographies was significantly below the proportion of farms in those geographies and significantly exceeded the aggregate distribution of all lenders. The proportion of loans to small farms in moderate-income geographies was near to the proportion of farms in those geographies and exceeded the aggregate distribution of all lenders.
- Performance in low- and moderate-income geographies during the 2014 to 2016 period was weaker than performance during 2017 to 2019 period. The proportion of loans to small farms in low-income geographies was significantly below both the proportion of farms in those geographies and the aggregate distribution. The proportion of loans to small farms in moderate-income geographies was well below the proportion of farms in those geographies and below the aggregate distribution.

## Lending Gap Analysis

A review of home mortgage loans, small loans to business, and small loans to farms including summary reports and AA maps did not identify any unexplained conspicuous lending gaps in the bank's activities.

## Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and business of different sizes.

## Home Mortgage Loans

Refer to Table P in the state of Ohio section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases.

Based on the data in the tables and the following considerations, the bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good. The following information was taken into consideration when determining this rating.

- Between 2017 and 2019, the performance to low- and moderate-income borrowers was near to both the proportion of low- and moderate-income families and the aggregate distribution.
- Performance in low-income geographies between 2014 and 2016 was consistent with performance in 2017 to 2019. The performance to low- and moderate-income borrowers was near to both the proportion of low- and moderate-income families and the aggregate distribution.

## Small Loans to Businesses

Refer to Table R in the state of Ohio section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses.

Based on the data in the tables and the following factors, the distribution of the bank's originations and purchases of small loans to businesses by revenue category is good. The following information was taken into consideration when determining this rating.

- In all time periods, the bank's distribution of small loans to businesses with revenues of $\$ 1$ million or less was below the percentage of small businesses located in the AA and exceeded the aggregate distribution.

## Small Loans to Farms

Refer to Table T in the state of Ohio section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to farms.

Based on the data in the table and the following considerations, the distribution of the bank's originations and purchases of small loans to farms by revenue category is good. The following information was taken into consideration when determining this rating.

- Between 2017 and 2019, the bank's percentage of loans to farms with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.
- During 2014 to 2016, the bank's performance was generally consistent with performance between 2017 and 2019. The bank's percentage of loans to farms with revenues of $\$ 1$ million or less was well-below the percentage of businesses and exceeded the aggregate distribution.

## Community Development Lending

The bank made few, if any, CD loans in the Columbus MSA.
The Lending Activity Tables, shown above, set forth the information and data used to evaluate the bank's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The bank originated or purchased six CD loans totaling $\$ 9.8$ million. This represents 0.6 percent of the tier 1 capital allocated to the AA. Most of the CD loans were for affordable housing purposes, which is a critical need in this AA.

Examples of CD loans in the AA include:

- In May 2014, Chase provided a $\$ 1.1$ million loan for the permanent financing of a 66 -unit apartment complex in Whitehall, OH. The project has LIHTC financing. All the units are restricted to seniors over 55 years up to 60 percent of the AMI. Twenty of the units were covered by HAP project-based vouchers and tenants are required to pay 30 percent of their adjusted gross incomes towards rent. Residents were also assisted with credit counseling and social services.
- In December 2014, Chase originated a $\$ 29,800$ loan to a housing authority for pre-development construction costs in Hocking County, OH. The authority administers the public housing and Section 8 voucher housing programs.
- In June 2018, Chase originated a $\$ 5.9$ million loan to finance the acquisition and substantial rehabilitation of 59 LIHTC affordable units of existing properties in Columbus, OH. All units are restricted to households earning 30 percent to 50 percent of the AMI.

## Product Innovation and Flexibility

The bank makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. A total of 5,293 loans were funded totaling $\$ 790.9$ million. Refer to the comments in the Product Innovation and Flexibility section of this performance evaluation for additional details regarding the programs.

| Loan Type | Number of <br> Loans | Dollar Amount <br> $\mathbf{( \$ 0 0 0 ’ \mathbf { s } )}$ |
| :--- | :---: | :---: |
| DreaMaker | 1,289 | 196,421 |
| Federal Housing Administration (FHA) | 1,851 | 237,883 |
| U.S. Department of Agriculture (USDA) | 617 | 82,789 |
| Veteran's Administration (VA) | 700 | 138,060 |
| Home Affordable Refinance Program (HARP) | 529 | 62,483 |
| Small Business Administration (SBA) | 307 | 73,246 |

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall High Satisfactory Lending Test rating and did not change the initial overall conclusions based on the AA receiving the full-scope review. Based on limited-scope reviews, the bank's performance under the Lending Test in the Cleveland-Akron-Canton CSA, Lima MSA, and the OH Non-Metro AA is consistent with the bank's overall performance under the Lending Test in the full-scope area. The bank's performance under the Lending Test in the Dayton-Springfield-Sidney CSA, Mansfield MSA, Toledo MSA, WeirtonSteubenville MSA, and Youngstown-Warren-Boardman MSA is weaker than the bank's overall performance under the Lending Test in the full-scope area. Weaker performance was primarily due to weaker performance in the geographic distribution and lack of CD lending. Performance in the limitedscope AAs did not affect the overall Lending Test rating for the state of Ohio.

Refer to Tables O through T in the state of Ohio section of appendix D for the facts and data that support these conclusions.

## INVESTMENT TEST

The bank's performance under the Investment Test in the state of Ohio is rated Outstanding.

## Conclusions for Area Receiving a Full-Scope Review

Based on a full-scope review, the bank's performance in the Columbus MSA is excellent.
The bank has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. Current and prior period investments represent 10.6 percent of tier 1 capital allocated to the AA.

The bank exhibits excellent responsiveness to credit and community economic development needs identified as affordable housing, community service, economic development, and revitalization/stabilization. A majority of total investments represent current period investments. Of the dollars invested, nearly 87.7 percent supported affordable housing, 6.8 percent supported revitalization/stabilization, and 6.1 percent supported community services. All prior period investments support affordable housing. Current and prior period affordable housing investments created 8,007 lowand moderate-income units for individuals and families. In the current period, the bank provided 69 grants totaling $\$ 11.3$ million to a variety of organizations supporting community service, revitalization/stabilization, economic development, and affordable housing. In some occurrences, grants were provided annually.

The bank rarely uses innovative and/or complex investments to support CD initiatives. Three current and prior period investments are complex, as they relate to NMTC and Direct Investor LIHTC transactions. Direct Investor transactions require bank expertise and capacity in selecting projects and partners, negotiating agreements, overseeing project development and operations, and ensuring compliance. Eight current period investments are catalysts that will encourage future growth and other improvements.

Examples of CD Investments in the AA include:

- In March 2014, the bank made a $\$ 3.9$ million NMTC equity investment for rehabilitating a vacant school in Columbus, OH into a new high school. It is a college preparatory high school exclusively for students from low-income families. Financing was used for the build-out of the classrooms and administrative space and to complete structural work on the roof and windows. Upon completion, the project was ready for full capacity occupancy of 500 students. In addition, the school created 78 full-time jobs for administrators, teachers, and staff during its first five years of operation. The bank also provided six \$500,000 grants starting in 2014 through 2019.
- From 2014 through 2019, the bank provided annual grants of $\$ 500,000$ to a community college development foundation. The first five grants were part of a total $\$ 2.5$ million commitment to continue the bank's support of the foundation's Central Ohio Compact (COC). The COC was established with the goal of being the most productive education partnership in the nation, fully able to raise education attainment levels and support the region's economic growth strategies. The COC made a regional commitment to address significant gaps between workplace requirements and
current population skill sets, as well as increase the number of individuals holding a post-secondary degree or certificate. Funds were used to hire a leadership team to coordinate with various groups throughout the community to develop plans to bring replicable models to scale; create a data collection system to align career pathways, curriculum, and credentials with regional employer demands; and provide professional development for career and guidance counselors. Sixty-nine percent of those benefiting from the program had annual earnings less than 80 percent of the AMI for the area served by the program.

The sixth $\$ 500,000$ grant is part of a 5 -year, $\$ 250$ million New Skills at Work Initiative. The initiative was developed by the bank and was the largest-ever private sector initiative. The grant addressed the need for workforce development programs to increase economic stability for low- and moderate-income individuals in the Columbus, OH metropolitan area.

- From 2016 through 2019, the bank provided annual grants of $\$ 300,000$ to a hospital foundation for its Helping Families by Transforming Neighborhoods initiative, a part of their Healthy Neighborhoods, Healthy Families (HNHF) plan. HNHF is committed to making a significant, positive difference for hospital neighbors and surrounding community, including affordable housing. In response to limited availability of affordable housing tax credits, HNHF implemented a strategy to renovate existing duplexes into quality rentals for individuals and families earning 60-80 percent of AMI. There are 32 communities in the area; over 84 percent are low- and moderate-income communities. HNHF acquired and renovated 75 blighted duplexes utilizing a blend of loan financing from the hospital and the Affordable Housing Trust of Franklin County and grant dollars from the bank and the City of Columbus. These grants served as a catalyst for other community development activities supporting a local government plan for revitalization or stabilization to encourage future growth and improvements in the area.

Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

## Statewide Investments in the State of Ohio

Statewide investments with a $\mathrm{P} / \mathrm{M} / \mathrm{F}$ to serve AAs included investments related to affordable housing and community services. Current period investments were $\$ 85.1$ million or 87.1 percent for affordable housing and $\$ 11.1$ million or 12.9 percent for community service. Affordable housing investments created 3,358 low- and moderate-income units for individuals and families. Thirty-eight grants totaling $\$ 5.4$ million were provided to a variety of organizations, primarily agencies administering financial education services. In some occurrences, grants were provided annually. The level of investments in the broader statewide area had a positive impact on the Investment Test rating for the state of Ohio.

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall Outstanding Investment Test rating and did not change the initial overall conclusions based on the AA receiving a full-scope review. Based on limited-scope reviews, the bank's performance under the Investment Test in the Cleveland-Akron-Canton CSA, Dayton-Springfield-Sidney CSA, Mansfield MSA, Toledo MSA, Youngstown-Warren-Boardman MSA, and Ohio Non-Metro is consistent with the bank's overall excellent performance under the Investment Test in the full-scope area. The bank's performance under the Investment Test in the Lima-Van Wert-Celina MSA and Weirton-Steubenville MSA is weaker than the bank's overall performance under the Investment Test in the full-scope area due to a low level of qualified investments.

## SERVICE TEST

The bank's performance under the Service Test in state of Ohio is rated Outstanding.

## Conclusions for Area Receiving a Full-Scope Review

Based on a full-scope review, including the data in the tables below, the bank's performance in the Columbus MSA is excellent.

## Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the bank's AA.

Examiners evaluated the data as outlined in the Scope section at the front of this document including bank-provided data on usage of branches adjacent to low- and moderate-income geographies by individuals residing in those geographies and on increases in the usage of alternative delivery systems.

Based on the data in the table below and performance context, the branch distribution is excellent. In low- and moderate-income geographies, the distribution is near to the percentage of the population. The bank had five branches in low-income geographies and eleven branches in moderate-income geographies. The distribution was augmented by four MUI tract branches that serve low-income tracts and 13 MUI tract branches that serve moderate-income tracts. Examiners reviewed data on the accounts held and transactions conducted at the MUI branches and confirmed they were serving the adjacent lowand moderate-income populations.

| Distribution of Branch Delivery System |  |  |  |  |  |  |  | As of December 31, 2019 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Assessment Area | Deposits | Branches |  |  |  |  |  |  |  |  |  |
|  | $\%$ of <br> Rated <br> Area <br> Deposits in AA | \# of <br> BANK <br> Branches | \% of <br> Rated <br> Area <br> Branches <br> in AA | Location of Branches by Income of Geographies (\%) |  |  |  | Population\% of Population within EachGeography |  |  |  |
|  |  |  |  | Low | Mod | Mid | Upp | Low | Mod | Mid | Upp |
| Columbus MSA | 50.6 | 67 | 26.1 | 7.5 | 16.4 | 35.8 | 40.3 | 10.1 | 22.3 | 35.3 | 31.5 |

* May not add up to 100 percent due to geographies with unknown tract income level and rounding

Alternative delivery systems enhanced the delivery of banking services to geographies and individuals of all income levels. The OCC considered the availability and use of alternative delivery systems over the evaluation period. This included review of the bank's 212 deposit-taking ATMs, online banking, mobile banking, and telephone banking to determine the effectiveness of these systems to make retail banking services available to individuals in low- and moderate-income geographies. The bank increased the deposit-taking ATMs in low- and moderate-income geographies by 4.0 percent over the prior rating period to 17 ( 8.0 percent) deposit-taking ATMs in low-income geographies and 35 ( 16.5 percent) ATMs in moderate-income geographies. Additionally, bank-provided data on use of online, mobile, and telephone banking showed increases in the adoption of these services by low- and moderate-income individuals from the prior rating period.

| Distribution of Branch Openings/Closings |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Assessment <br> Area | \# of Branch <br> Openings | \# of Branch <br> Closings | Net change in Location of Branches <br> (+ or - ) |  |  |  |  |
|  |  | Low | Mod | Mid | Upp |  |  |
| Columbus <br> MSA | 2 | 10 | 0 | -2 | -4 | -2 |  |

The bank's opening and closing of branches has not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and/or to low- and moderate-income individuals. The bank opened one branch and closed one branch in low-income geographies and closed two branches in moderate-income geographies. Branch closures were due to real estate issues that resulted in poor customer experiences and reduced customer usage. Despite the branch closures, branch locations remained accessible to geographies and individuals of different income levels in the bank's AA.

Services, including where appropriate, business hours, do not vary in a way that inconveniences its AA, particularly low- and moderate-income geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 6:00 pm and Saturday from 9:00 am to 2:00 pm. All retail banking services are available at all branches within the low- and moderate-income geographies.

## Community Development Services

The bank was a leader in providing CD services that are responsive to AA needs.
Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 2,427 qualified CD service activities to 45 organizations since the last evaluation, logging a total of 12,196 hours. All the bank's assistance was to organizations that provide community services to low- and moderate-income individuals and families. The bank's CD services were responsive to the
community needs in the AA, particularly homeownership education. The following are examples of CD services provided:

- The bank provided financial incentives to 519 low- and moderate-income homebuyers to take homebuyer education. Successfully completing the pre-purchase homebuyer education curriculum provides low- and moderate-income customers tools and resources to become financially successful homeowners.
- Two hundred and twenty-five bank employees provided tax preparation assistance to 383 low- and moderate-income individuals across six years. The activity is provided in association with a nonprofit organization's sponsorship of a program that provides free tax filing assistance for individuals eligible for the Earned Income Tax Credit (EITC) and Child Tax Credit.
- Five hundred and fifty-five bank employees provided financial literacy training to low- and moderate-income participants of a national nonprofit whose program teaches students the basic concepts of financial literacy as it relates to everyday economics and how they apply this information into adulthood.

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall Outstanding Service Test rating and did not significantly change the initial overall conclusions based on the AAs receiving fullscope review. Based on limited-scope reviews, the bank's performance under the Service Test in the Dayton-Springfield-Kettering CSA is consistent with the bank's overall performance under the Service Test in the full-scope area. The bank's performance under the Service Test in the Cleveland-AkronCanton CSA, Youngstown-Warren MSA, Lima MSA, Mansfield MSA, Toledo MSA, WeirtonSteubenville MSA, and OH Non-Metro AA is weaker than the bank's overall performance under the Service Test in the full-scope area due to weaker branch distribution in low- and moderate-income geographies.

## State Rating

## State of Oklahoma

CRA rating for the State of Oklahoma ${ }^{23}$ : Satisfactory
The Lending Test is rated: Low Satisfactory
The Investment Test is rated: High Satisfactory
The Service Test is rated: Outstanding
The major factors that support this rating include:

- An excellent level of lending activity.
- Overall adequate geographic distribution of home mortgage loans and small loans to businesses.
- Overall good borrower distribution of home mortgage loans and small loans to businesses.
- Few, if any CD loans which has a negative effect on the Lending Test rating.
- The extensive use of flexible products, which positively affected the rating.
- An adequate level of qualified investments, good responsiveness to credit and community economic development needs, supported by an excellent level of CD investments in the limited-scope area, and the level of investments in the broader statewide area which positively affected the rating.
- Retail service delivery systems are readily accessible to geographies and individuals of different income levels.
- Chase is a leader in providing CD services that are responsive to AA needs.

## Description of Institution's Operations in Oklahoma

The state of Oklahoma is Chase's 19th largest rating area aggregate deposits of $\$ 4.3$ billion, representing 0.3 percent of the bank's total deposits. As of December 31, 2019, the bank operated 28 branches and 72 deposit-taking ATMs within the rating area, representing 0.5 percent of total branches and 0.4 percent of total ATMs. The bank originated and purchased approximately $\$ 1.7$ billion in loans or 0.2 percent of total bank loan originations and purchases during the evaluation period in the state.

According to FDIC Deposit Market Share data, as of June 30, 2019, there were 223 banks operating 1,338 branches in the state of Oklahoma. Chase ranked sixth in deposit market share with 4.6 percent. Major competitors in the state based on deposit market share include BOKF, N.A. (13.1 percent), MidFirst Bank ( 7.3 percent), and BancFirst ( 7.3 percent).

Chase has two AAs in the state of Oklahoma and the Oklahoma City-Shawnee, OK CSA received a fullscope review. The CSA consists of only the Oklahoma City, OK MSA. The Tulsa MSA received a limited-scope review. Refer to appendix A for a complete description of the AAs.

## Description of Full-Scope AA

The following table provides a summary of the demographic that includes housing and business information for the Oklahoma City MSA. Table A indicates that the volume of OOUs is very small in low-income CTs (3.9 percent) and over 21.5 percent of families in the AA are low-income, with 11.5

[^122]percent below the poverty level. The median housing value in the Oklahoma City MSA is two times the median income, indicating a limited proportion of OOUs are affordable to low- and moderate-income borrowers. One simplistic method used to determine housing affordability assumes a maximum monthly principal and interest payment of no more than 30 percent of the applicant's income.

In the Oklahoma City MSA, assuming a 30-year mortgage with a five percent interest rate and three percent down payment, while not accounting for homeowners insurance, real estate taxes, or any additional monthly expenses, a low-income borrower making $\$ 32,254$ per year (or less than 50 percent of the FFIEC adjusted median family income in the MSA) could afford a $\$ 102,528$ mortgage loan with a payment of $\$ 968$ per month; a moderate-income borrower earning $\$ 51,606$ per year (or less than 80 percent of the FFIEC adjusted median family income in the MSA) could afford a $\$ 194,735$ mortgage loan with a payment of $\$ 1,548$ per month.

## Economic Data

According to Moody's Analytics September 2019 Report, population growth in the area exceeds the U.S. average and has experienced positive net migration. The area has a diverse economy and a high concentration of prime age workers. However, a downturn in the energy industry is spilling into private services and weighing on the economy. Employment growth is below 1 percent for the first time since mid-2017. Fewer jobs in mining and in tightly linked professional services are sapping the area of valuable high-wage positions that support incomes and spending. Energy firms in Oklahoma have cut back on drilling. The area's energy-related industries are projected to lose more jobs in coming quarters, suggesting the economy will weaken before it improves. Over half of the major companies based in Oklahoma City are energy related. While oil prices have stabilized after a drop in the second quarter, concerns about the global economic outlook and robust domestic supplies are weighing on expectations
for future activity. Government accounts for a significant percentage of the employment in the area. The area is home to Tinker Airforce Base which is the largest employer in area. Other major employers include University of Oklahoma-Norman; FAA Mike Monroney Aeronautical Center; and Integris Health. Moody's indicates that single-family housing in the area is already more affordable than in any other southern metro area or division with at least one million residents. However, sales of singlefamily homes are expected to plateau soon as the economy weakens. A jump in single-family starts in the third quarter will help keep a floor under construction employment, but additional supply will hit the market the same time sales plateau, and house price appreciation will decelerate.

## Community Contacts

Examiners considered two community contacts completed during the review period with entities serving the area. The contacts were with organizations focused on the unmet infrastructure needs due to multiple natural disasters in recent years with the need to repair and replace infrastructure such as roads, bridges and drainage systems that were damaged because of these disasters. While housing is generally considered affordable, there is still a need for affordable housing, particularly for low- and very-lowincome individuals and households. Contacts also noted the need to support programs to assist first time home buyers as well as the need to create job opportunities for low-income individuals by expanding existing businesses and attracting new businesses. Other needs included affordable starter homes, affordable and accessible mortgages for low- to moderate-income families and a local hospital or medical care.

## Scope of Evaluation in Oklahoma

The Oklahoma City MSA received a full-scope review. The area accounts for 83.0 percent of the bank's deposits and 53.2 percent of the lending in Oklahoma. The other AA received a limited-scope review. Performance in limited-scope AA that affected the CRA rating is addressed within their respective tests.

## CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN OKLAHOMA

## LENDING TEST

The bank's performance under the Lending Test in the state of Oklahoma is rated Low Satisfactory.

## Conclusions for Areas Receiving a Full-Scope Review

Based on a full-scope review, the bank's performance in the Oklahoma City MSA is adequate. Overall, excellent lending levels, adequate geographic distribution of loans and good borrower distribution of loans.

## Lending Activity

Lending levels reflect excellent responsiveness to credit needs in the bank's AA.
Examiners considered the number and dollar amount of home mortgage, small business, small farm originated or purchased relative to Chase's capacity based on deposits, competition, and market presence. Lending activity for home mortgage and small loans to businesses received the most weight
in reaching conclusions. Respectively, home mortgage lending and small loans to businesses account for 18.5 percent and 80.8 percent of the loan volume in the state by number and 71.1 percent and 28.6 percent of loan volume by dollar. Small farm lending is not a strategic focus of the bank and received minimal weight in reaching conclusions. Farms loans represented 0.7 percent of the loan volume in the state by number 0.2 percent loan volume by dollar.

| Number of Loans* |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

*The tables present the data for all assessment areas. The narrative below addresses performance in full-scope areas only.
Chase ranked second in deposits of 72 institutions with 10.4 percent market share.
In overall home mortgage lending, Chase ranked eleventh with 2.2 percent market share. This is a very competitive market with 538 mortgage lenders. The top lenders in this market were BOKF, NA (4.8 percent), Wells Fargo Bank, NA (4.5 percent), and Cornerstone Home Lending, Inc. (4.4 percent).

Chase ranked second in small loans to businesses with 12.9 percent market share. There are 126 lenders in the MSA. The major lender in this market is American Express National Bank with 19.5 percent market share.

Chase ranked second in small loans to farms 10.7 percent market share. There are 20 lenders in the MSA. The major lender in this market is Bancfirst with 42.0 percent market share.

## Distribution of Loans by Income Level of the Geography

The bank exhibits adequate geographic distribution of loans in its AAs.

## Home Mortgage Loans

Refer to Table O in the state of Oklahoma section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate. The following information was taken into consideration when determining this rating.

- Between 2017 and 2019, the proportion of loans in low-income geographies was significantly below the proportion of OOUs in those areas and below the aggregate distribution of loans. The proportion of moderate-income geographies was below the proportion of OOUs in those areas and significantly exceeded the aggregate distribution of loans.
- Performance in the low- and moderate-income geographies between 2014 and 2016 was inconsistent with the performance during the 2017-2019 period. Between 2014 and 2016, the proportion of loans in low-income geographies was significantly below the proportion of OOUs in those areas and well below the aggregate distribution of loans. The proportion of moderate-income geographies was well below the proportion of OOUs in those areas and near to the aggregate distribution of loans. The weaker performance between 2014 and 2016 did affect the 2017-2019 performance.

## Small Loans to Businesses

Refer to Table Q in the state of Oklahoma section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of small loans to businesses for this evaluation is adequate. The following information was taken into consideration when determining this rating.

- Between 2017-2019, the proportion of loans to small businesses in low- and moderate-income geographies was below the proportion of businesses and the aggregate distribution of loans.
- Performance in low- and moderate-income geographies during the 2014 and 2016 time periods was consistent with 2017 to 2019 period. Between 2104 and 2016, the proportion of loans to small businesses in low- and moderate-income geographies was below the proportion of businesses. The proportion of loans to small businesses in low- and moderate-income geographies was near to aggregate distribution of loans.

## Small Loans to Farms

Refer to Table $S$ in the state of Oklahoma section of appendix $D$ for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to farms.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of small loans to farms is good. The following information was taken into consideration when determining this rating.

- The limited percentage of farms in low-income geographies (3.4 percent) constrained lending opportunities; therefore, performance in moderate-income geographies was given slightly more consideration due to the higher percentage of farms in those geographies.
- Between 2017 and 2019, the proportion of loans to small farms in low- and moderate-income geographies was significantly below both the proportion of farms in those geographies and wellbelow the aggregate distribution.
- Performance in low- and moderate-income geographies during the 2014 to 2016 period was better than the performance during 2017 to 2019 period. Between 2014 and 2016, the proportion of loans
to small farms in low- and moderate-income geographies was below the proportion of farms in those geographies and near to the aggregate distribution.

## Lending Gap Analysis

A review of home mortgage loans, small loans to business, and small loans to farms including summary reports and AA maps did not identify any unexplained conspicuous lending gaps in the bank's activities.

## Distribution of Loans by Income Level of the Borrower

The bank exhibits good distribution of loans among individuals of different income levels and business and farms of different sizes.

## Home Mortgage Loans

Refer to Table P in the state of Oklahoma section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases.

Based on the data in the tables and the following considerations, the bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good. The following information was taken into consideration when determining this rating.

- Between 2017 and 2019, the proportion of loans to low- and moderate-income borrowers was near to the percentage of low-and moderate-income families in the AA and exceeded the aggregate distribution of loans.
- Performance between 2014 and 2016 was consistent with the 2017-2019 period, which contributed to the overall good performance. The proportion of loans to low- and moderate-income borrowers was near to the percentage of low-and moderate-income families in the AA and exceeded the aggregate distribution of loans.

## Small Loans to Businesses

Refer to Table R in the state of Oklahoma section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses.

Based on the data in the tables and the following factors, the distribution of the bank's originations and purchases of small loans to businesses by revenue category is good. The following information was taken into consideration when determining this rating.

- Between 2017 and 2019, the bank's distribution of loans to businesses with revenues of $\$ 1$ million or less was below the proportion of businesses with revenues of $\$ 1$ million or less and significantly exceeded the aggregate distribution of loans.
- Performance in the 2014 to 2016 period was consistent with the performance between 2017-2019. The bank's distribution of loans to businesses with revenues of $\$ 1$ million or less was below the proportion of businesses with revenues of $\$ 1$ million or less and significantly exceeded the aggregate distribution of loans.

## Small Loans to Farms

Refer to Table T in the state of Oklahoma section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to farms.

Based on the data in the table and the following considerations, the distribution of the bank's originations and purchases of small loans to farms by revenue category is good. The following information was taken into consideration when determining this rating.

- Between 2017 and 2019, the bank's percentage of loans to farms with revenues of $\$ 1$ million or less was near to the percentage of businesses and significantly exceeded the aggregate distribution.
- During 2014 to 2016, the bank's performance was weaker than the performance between 2017 and 2019. The bank's percentage of loans to farms with revenues of $\$ 1$ million or less was well-below the percentage of businesses and below the aggregate distribution.

## Community Development Lending

The bank has made few, if any, CD loans in the Oklahoma City MSA.
The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The bank made one CD loan in its AA for a $\$ 1.8$ million, which represents less than one percent of the tier 1 capital allocated to the AA.

Details of the CD loan:

- In April 2015, the bank funded a $\$ 1.8$ million construction loan to build a new 11.5 -acre mental health center located in a medically underserved low-income community with a poverty rate of 37.3 percent. The mental health care provider serves the needs of adults living with severe mental illness and children living with severe emotional disturbances. Upon completion of the project, 230 jobs were retained, and 50 jobs were created.

## Product Innovation and Flexibility

The bank makes extensive use of innovative and/or flexible lending practices to serve AA credit needs. A total of 1,502 loans were funded totaling nearly $\$ 203.6$ million. Refer to the comments in the Product Innovation and Flexibility section of this performance evaluation for additional details regarding the programs.

| Loan Type | Number of <br> Loans | Dollar Amount <br> $\mathbf{( \$ 0 0 0 ' s )}$ |
| :--- | :---: | :---: |
| DreaMaker | 165 | 26,701 |
| FHA | 606 | 65,886 |
| Home Affordable Refinance Program (HARP) | 279 | 31,987 |
| Veteran's Administration (VA) | 286 | 47,258 |

| U.S. Department of Agriculture (USDA) | 114 | 14,094 |

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AA was factored into the state's overall Low Satisfactory Lending Test rating and did not significantly affect the initial overall conclusions based on the AA receiving fullscope review. Based on a limited-scope review, the bank's performance under the Lending Test in the Tulsa MSA is consistent with the bank's overall performance under the Lending Test in the full-scope area.

Refer to Tables O through T in the state of Oklahoma section of appendix D for the facts and data that support these conclusions.

## INVESTMENT TEST

The bank's performance under the Investment Test in Oklahoma is rated High Satisfactory. Statewide investments totaling 29.0 percent enhanced the bank's overall performance.

## Conclusions for Area Receiving a Full-scope Review

Based on a full-scope review, the bank's performance in the Oklahoma City MSA is adequate.
The bank has an adequate level of qualified CD investments and grants, particularly those that are not routinely provided by private investors. The current and prior period of qualified investments represents 3.9 percent of tier 1 capital allocated to the AA. A significant majority or 94 percent of total qualified investments are from the current period.

The bank exhibits good responsiveness to credit and community economic development needs identified in the AA, including affordable housing, community services, and revitalization/stabilization for lowand moderate-income individuals and geographies. Sixty-two percent of the bank's CD investments focused on affordable housing and 37.8 percent focused on community services, identified credit needs in the AA. Additionally, the bank provided 19 grants totaling $\$ 698,000$ to a variety of organizations that primarily supported community service needs.

The bank rarely uses innovative and/or complex investments to support CD initiatives in this AA. The bank made two current period investments consisting of NMTC projects that also serve to encourage future growth and improvement in the area. No prior period qualified investments are complex.

Examples of CD investments in the AA include:

- The bank originated a $\$ 4.0$ million LIHTC equity investment in support of a CD project that provided 160 affordable rental units to low- and moderate-income individuals and families in the AA. This investment was part of a $\$ 211.9$ million LIHTC affordable housing fund.
- The bank invested $\$ 4.3$ million in a LIHTC project that provided 57 affordable housing units to lowand moderate-income individuals and families in the AA.

| Qualified Investments -State of Oklahoma |  |  |  |  |  |  |  |  |  |  |

Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

## Statewide Investments in the State of Oklahoma

There are 49 current and prior period investments and grants with and without a purpose, mandate, or function to serve AAs in the broader statewide area. Eighty-nine percent support affordable housing and ten percent support community services while the remaining support revitalization/stabilization. These statewide investments totaling 29 percent further enhanced the bank's overall performance under the Investment Test in the state of Oklahoma.

## Conclusions for Area Receiving a Limited-Scope Review

Performance in the limited-scope AA was factored into the state's overall High Satisfactory Investment Test rating and had a positive impact on the overall Investment Test rating for the state. Based on a limited-scope review, the bank's performance under the Investment Test in the Tulsa MSA is stronger than the bank's overall performance under the Investment Test in the full-scope area. This is due to a higher volume of CD investments.

## SERVICE TEST

The bank's performance under the Service Test in state of Oklahoma is rated Outstanding.

## Conclusions for Area Receiving a Full-Scope Review

Based on a full-scope review, including the data in the tables below, the bank's performance in the Oklahoma City MSA is excellent.

## Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the bank's full-scope AA.

Examiners evaluated the data as outlined in the Scope section at the front of this document including bank-provided data on usage of branches adjacent to low- and moderate-income geographies by individuals residing in those geographies and on increases in the usage of alternative delivery systems.

Based on the data in the table below and performance context, the branch distribution is good. In lowand moderate-income geographies, the distribution is respectively well below and exceeds the percentage of the population. The bank had no branches in low-income geographies and five branches in moderate-income geographies. Examiners gave slightly more weight to the bank's performance in moderate-income geographies as they contain three times the population as low-income geographies. The distribution was augmented by five MUI tract branches that serve moderate-income tracts. Examiners reviewed data on the accounts held and transactions conducted at the MUI branches and confirmed they were serving the adjacent low- and moderate-income populations.

| Distribution of Branch Delivery System |  |  |  |  |  |  |  | As of December 31, 2019 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Deposits | Branches |  |  |  |  |  | Population <br> \% of Population within Each Geography |  |  |  |
| Assessment | $\%$ of Rated | \# of <br> BANK <br> Branches | \% of Rated Area Branches in $\mathbf{A A}$ | Location of Branches by Income of Geographies (\%) |  |  |  |  |  |  |  |
|  | Deposits in AA |  |  | Low | Mod | Mid | Upp | Low | Mod | Mid | Upp |
| Oklahoma City MSA | 83.0 | 18 | 66.7 | 0 | 27.8 | 27.8 | 38.9 | 7.0 | 25.2 | 37.7 | 29.9 |

* May not add up to 100 percent due to geographies with unknown tract income level and rounding

Alternative delivery systems enhanced the delivery of banking services to geographies and individuals of all income levels. The OCC considered the availability and use of alternative delivery systems over the evaluation period. This included review of the bank's 52 deposit-taking ATMs, online banking, mobile banking, and telephone banking to determine the effectiveness of these systems to make retail banking services available to individuals in low- and moderate-income geographies. The bank increased the deposit-taking ATMs in low- and moderate-income geographies by 30.7 percent over the prior rating period to 1 (1.9 percent) deposit-taking ATMs in low-income geographies and 16 (30.8 percent) ATMs in moderate-income geographies. Additionally, bank-provided data on use of online, mobile, and telephone banking showed increases in the adoption of these services by low- and moderate-income individuals from the prior rating period.

| Distribution of Branch Openings/Closings |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Assessment Area | \# of Branch Openings | \# of Branch Closings | Net change in Location of Branches (+ or -) |  |  |  |
|  |  |  | Low | Mod | Mid | Upp |
| Oklahoma City MSA | 1 | 4 | 0 | -2 | -1 | 0 |

The bank's opening and closing of branches has not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and/or to low- and moderate-income individuals. The bank did not open or close any branches in the low-income geographies and closed two branches in moderate-income geographies. Branch closures were due to location issues, reduced customer usage, and proximity to other Chase branches. Despite the branch closures, branch locations remained accessible to geographies and individuals of different income levels in the bank's AA.

Services, including where appropriate, business hours, do not vary in a way that inconveniences its AA, particularly low- and moderate-income geographies and/or individuals. Generally, branches are open Monday through Thursday from 9:00 am to 5:00 pm, Friday from 9:00 am to 6:00 pm, and Saturday from 9:00 am to 1:00 pm. All retail banking services are available at all branches within the low- and moderate-income geographies.

## Community Development Services

The bank was a leader in providing CD services that are responsive to AA needs.
Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 308 qualified CD service activities to ten organizations since the last evaluation, logging a total of 775 hours. All the bank's assistance was to organizations that provide community services to low- and moderate-income individuals and families. The bank's CD services were responsive to the community needs in the AA, particularly homeownership education. The following is an example of CD services provided:

- Bank employees provided 37 first-time homebuyer seminars serving 266 low- and moderate-income individuals through a partnership with an affordable housing organization.

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall Outstanding Service Test rating and positively affected the initial overall conclusions based on the AA receiving a full-scope review. Based on a limited-scope review, the bank's performance under the Service Test in the Tulsa MSA is excellent and consistent with the bank's performance under the Service Test in the full-scope area.

## State Rating

## State of Oregon

CRA rating for the State of Oregon ${ }^{24}$ : Outstanding The Lending Test is rated: Outstanding
The Investment Test is rated: High Satisfactory
The Service Test is rated: Outstanding
The major factors that support this rating include:

- An excellent level of lending activity.
- An excellent geographic distribution of home mortgage loans and small loans to businesses.
- A good borrower distribution of home mortgage loans and small loans to businesses.
- Leadership in making CD loans, which positively affected the rating.
- The extensive use of innovative/flexible products, which positively affected the rating.
- An excellent level of qualified investments that demonstrated excellent responsiveness to credit and community economic development needs lowered by weaker performance in the limited-scope AAs.
- The occasional use of innovative and/or complex investments.
- Retail service delivery systems that are readily accessible to geographies and individuals of different income levels.
- A significant level of CD services that are responsive to AA needs.

## Description of Institution's Operations in Oregon

The state of Oregon is Chase's $24^{\text {th }}$ largest rating area based on its total deposits of $\$ 1.9$ billion, representing 0.1 percent of the bank's total deposits. As of December 31, 2019, the bank operated 46 branches and 44 deposit-taking ATMs within the rating area, representing 0.9 percent of total branches and 0.2 percent of total ATMs. These totals exclude the branch and ATMs in Portland-VancouverSalem, Oregon-Washington CSA. The bank originated and purchased approximately $\$ 2.0$ billion in loans or 0.3 percent of total bank loan originations and purchases during the evaluation period in the state.

According to FDIC Deposit Market Share Data, as of June 30, 2019, the bank-maintained $\$ 7.7$ billion in deposits in the state of Oregon, ranking $5^{\text {th }}$ with 9.6 percent deposit market share. Banking competition consists of 43 institutions operating 944 offices in the state. U.S. Bank, N.A. was $1^{\text {st }}$ in deposit market share with 20.5 percent; followed by Wells Fargo Bank, N.A. with 15.2 percent; and Bank of America with 13.2 percent.

The bank has delineated four AAs in the state of Oregon. The Medford-Grants Pass CSA (Medford CSA) accounts for 39.4 percent of the bank's deposits in the state of Oregon and received a full-scope review. The Bend-Redmond-Prineville CSA, Eugene-Springfield MSA, and the Oregon Non-Metro AA received a limited-scope reviews. The delineated AAs are described in appendix A.

## Description of Full-Scope AA

The Medford CSA consists of the Medford MSA and the Grants Pass MSA. The bank defines its AA as the entire Medford-Grants Pass CSA. According to FDIC Deposit Market Share Data, as of June 30,

[^123]2019, the bank-maintained $\$ 754.0$ million in deposits in the AA, ranking $2^{\text {nd }}$ in deposit market share with 14.8 percent.

The following table provides a summary of the demographics that includes housing and business information for the Medford CSA. Table A indicates that the percentage of low-income geographies is very low ( 1.8 percent), that the of volume of OOUs is very small in low-income census tracts ( 0.7 percent), however over 20.6 percent of families in the AA are low-income. The Medford CSA's cost of housing limits access to affordable homeownership among LMI borrowers. The median housing value in the Medford CSA is 3.3 times the averaged median income ( $\$ 49,947$ ), 5.5 times the moderateincome, and 8.8 times the low-income, indicating a large proportion of OOUs are unaffordable to most low-income and many moderate-income borrowers. One simplistic method used to determine housing affordability assumes a maximum monthly principal and interest payment of no more than 36 percent of the applicant's income.

In the Medford CSA, assuming a 30-year mortgage with a 5.0 percent interest rate, 3.0 down payment, and not accounting for homeowners insurance, real estate taxes, or any additional monthly expenses, a low-income borrower making $\$ 24,974$ per year (or less than 50 percent of the FFIEC adjusted median family income in the MSA) could afford a $\$ 67,807$ mortgage with a payment of $\$ 749$ per month; a moderate-income borrower earning $\$ 39,958$ per year (or less than 80 percent of the FFIEC adjusted median family income in the AA) could afford a $\$ 139,250$ mortgage with a payment of $\$ 1,199$ per month.

Median rents and the significant percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

## Economic Data

According to Moody's Analytics November 2019 Report, the Medford area has strong and improving migration trends; solid labor force growth; relatively low business costs; and a high share of jobs in new companies. However, the area has few high-tech jobs; low incomes; heavy exposure to cyclical retail and manufacturing; exposure to weak agriculture sector; and is distant from major airports and seaports. Leisure/hospitality, retail and construction have all shed jobs and healthcare growth has slowed considerably. On the bright side, a flatlining labor force and the lowest unemployment rate in recorded history are boosting average hourly earnings. Tourism is an important part of the area economy as the area has an array of wineries, outdoor activities, and an annual Shakespeare festival, which draws more than 100,000 visitors every year. The area's large and fast-growing population, particularly the population of seniors, will ensure that healthcare leads near-term job creation. Major employment industries in the area include education and health services; leisure and hospitality; and retail trade. Major employers include Asante Health System; Lithla Motors; Harry \& David Operations Corp; and Rogue Valley Medical Center. Almost 1 in 4 residents in the area is age 65 or older and the cohort is expanding briskly. Unlike in most areas with a senior-heavy population, Medford's working-age cohort is growing several times faster than the U.S. average, and educational attainment is only slightly below average, which bodes well for labor supply. Relatively strong multifamily construction has propelled growth in residential starts in 2019, compensating for some of the weakness in the single-family market.

Within the Grants Pass portion of the AA, Moody's Analytics July 2019 Report indicates that the latecycle expansion has cooled. The metro area has been unable to bounce back from a slowdown that took hold at the end of 2018 due in large part to a tight labor market. At 5 percent, the unemployment rate is down at least 1 percentage point from the lows reached at the height of its few expansions. Job creation has slowed along with labor force growth, and payroll employment is rising a touch more slowly. Despite business costs that are among the nation's lowest and favorable migration patterns; the area has an aging population; low labor force participation; above-average employment volatility; and a large retiree population past peak expenditure years. Manufacturing is holding up reasonably well, but downstream industries such as wholesale trade employ fewer workers than at any time since the early 2000s. A large and fast-growing population of seniors will ensure that healthcare and social assistance play an outsize role in the area's economy in the years to come. Although the area has not experienced as much of a spurt in population growth as in the rest of Oregon, the metro area is adding residents faster than the nation. Also, with a median age of just less than 48 years, Grants Pass has the 16th oldest population in the nation. One in three residents are over the age of 60 , more than 50 percent higher than the U.S. average. Major employment industries in the area include education and health services; retail trade; and leisure and hospitality. Major employers in the area include Three Rivers Community Hospital; Rogue Community College; Master Brand Cabinet Co.; and Walmart. The area's housing market also has slowed considerably with sales and starts edging lower over the past two years. Singlefamily price appreciation has slowed significantly. Multifamily building, however, is a key area of strength.

## Community Contacts

Three community contacts completed during the examination period were reviewed to gain an understanding of the needs in the community. Contacts were completed with organizations focused on economic development and community services. In addition to completed community contacts, a community needs assessment completed for the area by a consortium of nonprofit organizations was also reviewed. Contacts noted that Jackson and Josephine counties lag the larger metropolitan areas (Eugene, Salem, and Portland), but are ahead of the more rural areas. Medford especially continues to
see steady population growth. There is a housing shortage in both counties. Identified community needs include:

- Affordable Housing
- Living wage employment
- Higher educational attainment
- Nutrition and healthcare assistance
- Community outreach to educate low-income residents on available services
- Access to capital for new/developing small businesses
- Supportive services for seniors and individuals with disabilities
- Mental health care services
- Substance abuse counseling
- Access to a more efficient transportation system for rural residents without a vehicle
- Bi-lingual outreach to increase opportunity to those in limited English-speaking households

## Scope of Evaluation in Oregon

The rating for the state of Oregon is based on an evaluation of the bank's performance in all AAs as listed in appendix A. The Medford CSA accounts for 39.4 percent of the bank's deposits in the state of Oregon and received a full-scope review. The remaining three AAs in the state of Oregon received limited-scope reviews. Performance in limited-scope AAs and its effect on the CRA rating are discussed at the end of each test.

## CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN OREGON

## LENDING TEST

The bank's performance under the Lending Test in the state of Oregon is rated Outstanding.
Performance in AAs receiving limited-scope reviews was factored together with performance from AAs receiving full-scope reviews to determine the state's overall Outstanding Lending Test rating. Limitedscope conclusions did not significantly affect the initial overall conclusions based on the AAs receiving full-scope review.

## Conclusions for Area Receiving a Full-Scope Review

Based on a full-scope review, the bank's performance in the Medford CSA is excellent. Overall excellent lending levels, excellent geographic distribution of loans, and a high level of CD lending offset weaker but good borrower distribution. Product innovation/flexibility was also considered favorably when determining the rating.

## Lending Activity

Lending levels reflect excellent responsiveness to AA credit needs.
Examiners considered the number and amount of home mortgage, small business, and small farm loans originated or purchased relative to Chase's capacity based on deposits, competition, and market presence. Lending activity for home mortgage and small loans to businesses received the most weight
in reaching conclusions. Respectively, home mortgage lending and small loans to businesses account for 29.8 percent and 67.8 percent of the loan volume in the state by number and 86.4 and 10.2 percent of loan volume by dollar. Small farm lending is not a strategic focus of the bank and received minimal weight in reaching conclusions. Farm loans represented 2.2 percent of the loan volume in the state by number and 0.03 percent loan volume by dollar.

*The tables present the data for all assessment areas. The narrative below addresses performance in full-scope areas only.
Chase ranked second in deposits out of 12 institutions with 13.6 percent market share.
In overall home mortgage lending, Chase ranked ninth out of 303 lenders with a 2.9 percent market share. Other lenders in the market include Rogue ( 8.7 percent), Guild Mortgage Co. ( 7.3 percent), and UMPQUA Bank ( 6.6 percent).

In small loans to businesses, Chase ranked first out of 72 lenders with 15.9 percent market share. Other major lenders are U.S. Bank, N.A. (13.8 percent), Citibank, N.A. (12.6 percent), and American Express National Bank (11.6 percent).

In small loans to farms, Chase ranked second out of 12 lenders with a 24.0 percent market share. The other major lenders and respective market shares are U.S. Bank, N.A. (33.5), Wells Fargo Bank, N.A. (11.7 percent), and Washington Federal ( 9.5 percent).

## Distribution of Loans by Income Level of the Geography

The bank exhibits excellent geographic distribution of loans in its AA.

## Home Mortgage Loans

Refer to Table O in the state of Oregon section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is excellent. The following information was taken into consideration when determining this rating.

- Examiners considered the limited proportion of low-income geographies and low proportion of housing units in low-income geographies, particularly OOUs ( 0.1 percent), which constrained lending opportunities. Greater significance was placed on performance in moderate-income geographies.
- The high level of competition in the AA was also considered and examiners placed greater significance on performance compared to the aggregate of lenders.
- Between 2017 and 2019, the bank made no loans in low-income geographies. In moderate-income areas the proportion of loans exceeded both the percentage of owner-occupied units and aggregate distribution of loans.
- During 2014 through 2016, the bank made no loans in low-income geographies. In moderateincome areas the proportion of loans was near to the percentage of owner-occupied units and exceeded the aggregate distribution of loans.

## Small Loans to Businesses

Refer to Table Q in the state of Oregon section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses.

Based on the data in the table and the following considerations, the distribution of the bank's originations and purchases of small loans to businesses by revenue category is good. The following information was taken into consideration when determining this rating.

- Examiners considered the small proportion of businesses in low-income geographies (4.1 percent) and competition between 72 lenders constrained lending opportunities to existing businesses.
- Performance against the aggregate distribution of lenders was given additional consideration as it reflects the difficulties all lenders are experiencing due to the economic constraints discussed above under the Description of the Full-Scope AA. The economic data particularly indicates the high cost of doing business and limited labor force as challenges for businesses.
- Between 2017 and 2019, the proportion of small loans to businesses in both low-and moderateincome geographies was below the proportion of businesses and near to the aggregate distribution.
- During 2014 to 2016, the proportion of small loans to businesses in both low- and moderate-income geographies was below the proportion of businesses and exceeded the aggregate distribution.

## Small Loans to Farms

Refer to Table $S$ in the state of Oregon section of appendix $D$ for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to farms.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of small loans to farms is poor. The following information was taken into consideration when determining this rating.

- Examiners considered the limited number of farms in low-income geographies, (1.2 percent) and the fact that farm lending is not a focus of the bank was also considered.
- Between 2017 and 2019, the proportions of loans to small farms in low-income geographies was excellent and below the aggregate distribution. The proportion of loans to small farms in moderateincome geographies was well below both the proportion of farms in those geographies and the aggregate distribution of all lenders.
- During 2014 to 2016, the bank made no loans to small farms in low-or-moderate-income geographies.

## Lending Gap Analysis

A review of home mortgage loans, small loans to business, and small loans to farms including summary reports and AA maps did not identify any unexplained conspicuous lending gaps in the bank's activities.

## Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and business and farms of different sizes, given the product lines offered by the institution.

## Home Mortgage Loans

Refer to Table $P$ in the state of Oregon section of appendix $D$ for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases.

Based on the data in the tables and the following considerations, the bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good. The following information was taken into consideration when determining this rating.

- Greater significance was placed on performance against the aggregate distribution as it reflects the difficulties all lenders are experiencing due to competition and the economic constraints discussed above under the Description of the Full-Scope AA.
- Examiners particularly considered housing affordability challenges for low- and moderate-income borrowers.
- Between 2017 and 2019, the proportion of loans to low-income borrowers was well below the percentage of low-income families and below the aggregate distribution of lenders. The proportion of loans to moderate-income borrowers exceeded the proportion of moderate-income families and the aggregate distribution.
- During 2014 to 2016, the proportion of loans to low-income borrowers was well below the percentage of low-income families and exceeded the aggregate distribution of lenders. The proportion of moderate-income loans was below the proportion of moderate-income families and near to the aggregate distribution.

## Small Loans to Businesses

Refer to Table R in the state of Oregon section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses.

Based on the data in the tables and the following factors, the distribution of the bank's originations and purchases of small loans to businesses by revenue category is good. The following information was taken into consideration when determining this rating.

- Greater significance was placed on performance against the aggregate distribution of lenders as it reflects the difficulties all lenders are experiencing due to competition and the economic constraints discussed above under the Description of the Full-Scope AA.
- Between 2017 and 2019, the bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.
- During 2014 to 2016, the bank's performance was consistent with performance between 2017 and 2019. The bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.

## Small Loans to Farms

Refer to Table T in the state of Oregon section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to farms.

Based on the data in the table and the following considerations, the distribution of the bank's originations and purchases of small loans to farms by revenue category is adequate. The following information was taken into consideration when determining this rating.

- Greater significance was placed on performance against the aggregate distribution of lenders as it reflects the difficulties all lenders are experiencing due to the economic constraints discussed above under the Description of the Full-Scope AA.
- The fact that farm lending is not a focus of the bank was considered.
- Between 2017 and 2019, the bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below to the percentage of businesses and exceeded the aggregate distribution.
- During 2014 to 2016, the bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was well below the percentage of businesses and below the aggregate distribution.

## Community Development Lending

The institution is a leader in making CD loans.
The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as $C D$ loans.

The bank made four CD loans in its AA for a total of $\$ 16.4$ million, which represents 16.9 percent of the tier 1 capital allocated to the AA.

Examples of CD loans in the AA include:

- In January 2014, the bank made a loan for $\$ 177,000$ to provide 50 units of affordable housing to low- and moderate-income borrowers as identified by the National Low-Income Housing Coalition.
- In November 2014, the bank made a $\$ 6.1$ million loan to re-open the only operating sawmill in the county which provides jobs to 64 people. The mill is located in a middle-income census tract in a community that is classified as highly distressed due to its poverty rate of 31.7 percent and an unemployment rate of 15.6 percent.
- In May 2015, the bank made a $\$ 5.3$ million loan to enhance educational opportunities to low- and moderate-income students.

## Product Innovation and Flexibility

The bank makes extensive use of innovative and/or flexible lending practices to serve AA credit needs. A total of 390 loans were funded totaling nearly $\$ 71.9$ million. Refer to the comments in the Product Innovation and Flexibility section of this performance evaluation for additional details regarding the programs.

| Loan Type | Number of <br> Loans | Dollar Amount <br> $\mathbf{( \$ 0 0 0 ' s )}$ |

| SBA | 12 | 5,768 |
| USDA | 150 | 26,143 |

## Conclusions for areas Receiving a Limited-Scope Review

Performance in the limited-scope AAs was factored into the state's overall Outstanding Lending Test rating and did not significantly affect the initial overall conclusions based on the AAs receiving fullscope review. Based on limited-scope reviews, the bank's performance under the Lending Test in the Eugene-Springfield MSA and the OR Non-Metro AA is consistent with the bank's overall performance under the Lending Test in the full-scope area. The bank's performance under the Lending Test in the Bend-Redmond-Prineville CSA is weaker than the bank's overall performance under the Lending Test in the full-scope area. Weaker performance is primarily due to the lack of CD lending.

Refer to Tables O through T in the state of Oregon section of appendix D for the facts and data that support these conclusions.

## INVESTMENT TEST

The bank's performance under the Investment Test in the state of Oregon is rated High Satisfactory. An excellent level of qualified investments that demonstrated excellent responsiveness to credit and community economic development needs was lowered by weaker performance in the limited-scope AAs.

## Conclusions for Area Receiving a Full-Scope Review

Based on a full-scope review, the bank's performance in the Medford CSA is excellent.
The bank has an excellent level of qualified CD investments and grants, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 19.4 percent of tier 1 capital allocated to the AA. A significant majority or 99.6 percent of total investments represent current period investments.

The bank exhibits excellent responsiveness to credit and community economic development needs identified in the AA, including supporting affordable housing and community services for LMI individuals, and revitalization/stabilization. Fifty-three percent of the bank's CD investments focus on affordable housing, while 47.1 percent focus on revitalizations/stabilizations and consisted of two NMTC serving as catalysts for future growth and development. Both are identified credit needs in the AA. The bank did not give any grants within the current period. Three prior period CD investments address affordable housing through LIHTC transactions.

The bank makes occasional use of innovative and/or complex investments to support CD initiatives in this AA. Complex investments represent 47.0 percent of total investments in the AA. These investments consist of NMTCs and serve as catalysts for future growth and other improvements.

Examples of community development investments in the AA include:

- The bank invested $\$ 1.5$ million in a LIHTC project, which contributed to the creation of 207 affordable housing units for low- and moderate-income individuals and families in the AA.
- The bank originated a $\$ 5.1$ million NMTC investment for the redevelopment of a 92 -year-old Southern Oregon lumberyard owned by a small neighborhood business. This investment allowed the business to reopen and upgrade its Small Log Mill (SLM). The upgrade and restart of the SLM brought back 64 employees out of the 85 that were laid off in 2013, spurring much needed economic stimulus throughout the region, and re-established the only operating sawmill in the county. This area lies within a moderate-income community, defined by high economic distress (poverty rate of 31.67 percent and an unemployment rate of 15.6 percent) due to the downturn of the historical timber resource-based economy.

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

## Statewide Investment in the State of Oregon

The bank has qualified investments throughout the state of Oregon whose $\mathrm{P} / \mathrm{M} / \mathrm{F}$ include serving the AAs. They consist of LIHTC investments and many grants to organizations responding to the need for providing financial education, financial management and credit building skills to low- and moderateincome individuals and families. Investments with no P/M/F to serve AAs consist of three LIHTC investments that helped create 108 low- and moderate-income housing units. Investments with and without a $\mathrm{P} / \mathrm{M} / \mathrm{F}$ to serve AAs represent 4.3 percent of total state qualified investments. The investments all address an identified community development need. These investment in the broader statewide area further support the bank's overall good performance under the Investment Test in state of Oregon.

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall High Satisfactory Investment Test rating which did significantly change the initial overall conclusions based on the AA receiving fullscope review. Based on limited-scope reviews, the bank's performance under the Investment Test in the Eugene-Springfield MSA and the OR Non-Metro AA is consistent with bank's overall excellent performance under the Investment Test in the full-scope area. The bank's performance under the Investment Test in the Bend-Redmond-Prineville CSA is weaker than the bank's overall excellent performance under the Investment Test in the full-scope area due to a lower volume of CD investments.

## SERVICE TEST

The bank's performance under the Service Test in state of Oregon is rated Outstanding.

## Conclusions for Area Receiving a Full-Scope Review

Based on a full-scope review, including the data in the tables below, the bank's performance in the Medford CSA is excellent.

## Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the bank's AA.

Examiners evaluated the data as outlined in the Scope section at the front of this document including bank-provided data on usage of branches adjacent to low- and moderate-income geographies by individuals residing in those geographies and on increases in the usage of alternative delivery systems.

Based on the data in the table below and performance context, the branch distribution is excellent. In low- and moderate-income geographies, the distribution exceeds the population. The bank had one branch in a low-income geography and three branches in moderate-income geographies.

Charter Number: 8

| Distribution of Branch Delivery System |  |  |  |  |  |  |  | As of December 31, 2019 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Assessment Area | Deposits | Branches |  |  |  |  |  | Population <br> \% of Population within Each <br> Geography |  |  |  |
|  | \% of <br> Rated <br> Area <br> Deposits in AA | \# of <br> BANK <br> Branches | $\%$ of <br> Rated <br> Area <br> Branches <br> in AA | Location of Branches by Income of Geographies (\%) |  |  |  |  |  |  |  |
|  |  |  |  | Low | Mod | Mid | Upp | Low | Mod | Mid | Upp |
| MedfordGrants Pass CSA | 39.4 | 11 | 36.7 | 9.1 | 27.3 | 54.5 | 9.1 | 0.7 | 15.5 | 59.5 | 24.3 |

* May not add up to 100 percent due to geographies with unknown tract income level and rounding

Alternative delivery systems enhanced the delivery of banking services to geographies and individuals of all income levels. The OCC considered the availability and use of alternative delivery systems over the evaluation period. This included review of the bank's 17 deposit-taking ATMs, online banking, mobile banking, and telephone banking to determine the effectiveness of these systems to make retail banking services available to individuals in low- and moderate-income geographies. The bank increased the deposit-taking ATMs in low- and moderate-income geographies by 60.0 percent over the prior rating period to two ( 11.8 percent) deposit-taking ATMs in low-income geographies and six ( 35.3 percent) ATMs in moderate-income geographies. Additionally, bank-provided data on use of online, mobile, and telephone banking showed increases in the adoption of these services by low- and moderate-income individuals from the prior rating period.

| Distribution of Branch Openings/Closings |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| Assessment Area | \# of Branch <br> Openings | \# of Branch <br> Closings | Net change in Location of Branches <br> (+ or -$)$ |  |  |  |
|  |  |  | Mod | Mid | Upp |  |
| Medford-Grants <br> Pass CSA | 0 | 1 | 0 | 0 | -1 | 0 |

The bank's opening and closing of branches has not affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and/or to low- and moderate-income individuals. The bank did not open or close any branches in low- and moderate-income geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences its AA, particularly low- and moderate-income geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 6:00 pm and Saturday from 9:00 am to 1:00 pm. All retail banking services are available at all branches within the low- and moderate-income geographies.

## Community Development Services

The bank provided a significant level of CD services that are responsive to AA needs.
Bank records show that employees provided technical assistance and/or job-specific expertise for 31 CD service activities to 3 organizations for a total of 100 qualified hours of service within the AA. A majority of the bank's assistance was to organizations that provide community services to low- and moderate-income individuals and families. The activities were responsive to AA needs, particularly affordable housing, and financial literacy. The following are examples of CD services provided in the AA:

- The bank provided financial incentives to 76 low- and moderate-income homebuyers to take homebuyer education from third-party organizations.
- A bank employee provided financial literacy training to low- and moderate-income participants of a national nonprofit. The purpose of this training was to equip nonprofit staff with tools and resources to make them more effective. The bank provided innovative trainings on topics such as financial education for the senior population focused on the rising issues of financial fraud and abuse and trainings on innovative financial tools and resources.

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall Outstanding Service Test rating and did not significantly change the initial overall conclusions based on the AAs receiving fullscope review. Based on limited-scope reviews, the bank's performance under the Service Test in the Bend-Prineville MSA and OR Non-Metro AA is consistent with the bank's overall excellent performance under the Service Test in the full-scope area. The bank's performance under the Service Test in the Eugene-Springfield MSA is weaker than the bank's overall performance under the Service Test in the full-scope area due to weaker branch distribution in low- and moderate-income geographies.

## State Rating

## State of Texas

CRA rating for the State of Texas ${ }^{25}$ : Satisfactory
The Lending Test is rated: High Satisfactory
The Investment Test is rated: High Satisfactory
The Service Test is rated: High Satisfactory
The major factors that support this rating include:

- Excellent level of lending activity.
- Adequate geographic distribution of home mortgage loans and small loans to businesses.
- Good borrower distribution of home mortgage loans and small loans to businesses.
- A poor level of CD loans, which negatively affected the rating.
- The extensive use of innovative/flexible products, which positively affected the rating.
- A good level of investments that displayed excellent responsiveness to credit and community economic development needs.
- The significant use of innovative and/or complex qualified investments.
- Broader statewide investments, which positively affected the rating.
- Retail service delivery systems that are accessible to geographies and individuals of different income levels.
- A significant level of CD services that were responsive to AA needs.

## Description of Institution's Operations in Texas

The state of Texas is Chase's second largest rating area based on aggregate deposits of $\$ 191.9$ billion representing 18.3 percent of the bank's total deposits. As of December 31, 2019, the bank operated 541 branches and 1,777 deposit-taking ATMs within the rating area, representing 10.9 percent of total branches and 24.2 percent of total ATMs. The bank originated and purchased approximately $\$ 61.7$ billion in loans or 8.8 percent of total bank loan originations and purchases during the evaluation period in the state

According to FDIC Deposit Market Share Data, as of June 30, 2019, there were 510 banks operating 6,399 branches $s$ in the state. Chase ranked first in deposit market share with 21.9 percent. Major competitors in the state based on deposit market share include Bank of America, N.A. (14.7 percent), USAA Federal Savings (8.7 percent), and Wells Fargo Bank, N.A.(8.1 percent).

Chase delineated 21 AAs in the state of Texas. Refer to appendix A for a complete description of the AAs. The Austin-Round Rock-Georgetown, TX MSA (Austin MSA), Dallas-Fort Worth, TX CSA (Dallas CSA), and Houston-The Woodlands-Sugar Land, TX MSA (Houston MSA), which combined account for 96.2 percent of the deposits and 82.9 percent of lending in the state, received full-scope reviews. The Abilene MSA, Amarillo MSA, Beaumont-Port Arthur MSA, Brownsville-Harlingen MSA, College Station-Bryan MSA, El Paso MSA, Killeen-Temple MSA, Laredo MSA, Longview MSA, Lubbock MSA, McAllen-Edinburg-Mission MSA, Midland-Odessa CSA, San Antonio-New

[^124]Braunfels MSA, Tyler MSA, Waco MSA, Wichita Falls MSA, and Texas Non-MSA received limitedscope reviews. Refer to appendix A for a complete description of each AA.

## Description of Full-Scope AAs

## Austin MSA

According to FDIC Deposit Market Share Data as of June 30, 2019, the bank-maintained deposits of $\$ 110$ billion in the area, ranking it $1^{\text {st }}$ in deposit market share with 44.1 percent. Banking competition consists of 95 financial institutions operating 1,416 offices in the AA. Major banking competitors include Wells Fargo Bank, N.A. with 9.8 percent market share; Bank of America, N.A. with 9.5 percent market share; and BBVA USA with 5.69 percent market share. As of December 31, 2019, the bank operated 186 branches and 681 deposit-taking ATMs in the AA, representing 3.7 percent of total bank branches and 4.1 percent of total bank ATMs.

The following table provides a summary of the demographics that includes housing and business information for the Austin MSA. Table A indicates that the volume of OOUs is small in low-income census tracts ( 3.8 percent) and over 22.5 percent of families in the AA are low-income with 9.5 percent below the poverty level. The Austin MSA cost of housing also limits access to affordable homeownership, particularly among low-income borrowers. The median housing value in the Austin MSA $(\$ 233,705)$ is approximately three times the MSA's median income, almost four times moderateincome, and up to six times low-income, indicating a limited proportion of OOUs are affordable to lowincome borrowers. One simplistic method used to determine housing affordability assumes a maximum monthly principal and interest payment of no more than 30 percent of the applicant's income.

In the Austin MSA, assuming a 30-year mortgage with a five percent interest rate and three percent down payment, while not accounting for homeowners insurance, real estate taxes, or any additional monthly expenses, a low-income borrower making $\$ 39,499$ per year (or less than 50 percent of the FFIEC adjusted median family income in the MSA) could afford a $\$ 115,663$ mortgage loan with a payment of $\$ 1,185$ per month; a moderate-income borrower earning $\$ 63,198$ per year (or less than 80 percent of the FFIEC adjusted median family income in the AA) could afford a $\$ 257,781$ mortgage loan with a payment of $\$ 1,896$, per month.

Median rents and the percentage of families below poverty level suggest rental housing is also unaffordable for some low-income residents.

## Economic Data

According to Moody's Analytics January 2020 report, the Austin-Round Rock-Georgetown area is advancing steadily, with job growth about a percentage point faster than the national average on a year-over-year basis. High tech is the primary driver of growth. In November, Apple announced that it had broken ground on its new campus. The development of the 133 -acre site will cost $\$ 1$ billion, employing hundreds of construction workers. Completion is expected in 2022, and the facility could house up to 9,000 additional employees. This would potentially bring the local employee total to 15,000 , making the company the largest private employer in the metro area. Other technology focused companies have also been expanding in the area, including Google, Dell, Facebook, and Oracle. The area has strong population growth and a well-educated labor force. Major employment industries include professional and business services; leisure and hospitality; and education and health services. Major employers in the area include University of Texas-Austin; Dell; and Seton Healthcare Network.

Moody's indicates that home sales rose nearly 20 percent in 2019, defying previous expectations of a slowdown. Further, house prices increased 4.7 percent, faster than the national average. These results have stimulated development and as a result, new permits for both single- and multifamily are nearly back to their previous peaks. The strong labor market and in-migration of professionals taking high paying jobs in IT will keep housing demand strong.

## Community Contacts

Three community contacts completed during the examination period with organizations serving the area were reviewed to ascertain credit and community development needs. Contacts were completed with organizations focused on affordable housing; services for low-income individuals; and community revitalization. Contacts noted that the Austin area economy is booming. The area, which had previously been known as a "music capital" has seen an influx of high-tech businesses, which has brought a lot of wealth to the area. Contacts noted that land values in Austin are high, which makes it more challenging to develop affordable housing. Community needs identified include:

- Affordable housing for low- and moderate-income individuals and households
- Financial education for the unbanked and underbanked
- Program related investments to help non-profit developers create affordable housing

## Dallas CSA

According to FDIC Deposit Market Share Data as of June 30, 2019, the bank-maintained deposits of $\$ 110$ billion in the area, ranking it $1^{\text {st }}$ in deposit market share with 44.1 percent. Banking competition consists of 95 financial institutions operating 1,416 offices in the AA. Major banking competitors include Wells Fargo Bank, N.A. with 9.8 percent market share; Bank of America, N.A. with 9.5 percent market share; and BBVA USA with 5.69 percent market share. As of December 31, 2019, the bank operated 186 branches and 681 deposit-taking ATMs in the AA, representing 3.7 percent of total bank branches and 4.1 percent of total bank ATMs.

Table A below provides a summary of the demographics that includes housing and business information for the Dallas CSA. The table indicates that the volume of OOUs is small in low-income census tracts ( 5.0 percent) and over 23.3 percent of families in the AA are low-income with 11.4 percent below the poverty level. The Dallas CSA cost of housing also limits access to affordable homeownership, particularly among low-income borrowers. The median housing value in the Dallas CSA $(\$ 174,539)$ ranges from two to three times the CSA's median income, almost four times moderate-income, and up to almost six times low-income, indicating a limited proportion of OOUs are affordable to low- income borrowers. One simplistic method used to determine housing affordability assumes a maximum monthly principal and interest payment of no more than 30 percent of the applicant's income.

In the Dallas CSA, assuming a 30 -year mortgage with a five percent interest rate and three percent down payment, while not accounting for homeowners insurance, real estate taxes, or any additional monthly expenses, a low-income borrower making $\$ 30,437$ per year (or less than 50 percent of the FFIEC adjusted median family income in the CSA) could afford a $\$ 79,609$ mortgage loan with a payment of $\$ 913$ per month; a moderate-income borrower earning $\$ 48,698$ per year (or less than 80 percent of the FFIEC adjusted median family income in the AA) could afford a $\$ 152,194$ mortgage loan with a payment of $\$ 1,461$ per month.

Median rents and the percentage of families below poverty level suggest rental housing is also unaffordable for some low-income residents.

## Economic Data

According to Moody's Analytics February 2020 report, the Dallas-Plano-Irving area is one of the largest metro areas in the country and has been the best performing in terms of job gains over the past year. The pace of job gains has tripled the national average. Core professional services, financial services, and construction are leading job gains with construction up at a double-digit rate in 2019. These are especially well-paying industries, and consequently growth in the number of high-wage jobs has also been triple the U.S. rate. The unemployment rate has declined to a 20 -year low 3.1 percent, even as the labor force has risen strongly. Over the past year, payrolls in professional services have risen 5.5 percent. The source of many of the new entrants in the labor force has been in-migration of workers taking new jobs amid corporate expansions and relocations. Major employers in the area include Walmart; AT \&T; Baylor Scott \& White Health; and Bank of America, N.A. In the housing market, new construction has rebounded since mid-2019. Past above-average home price increases have reduced affordability in the single-family housing market; however, recent price increases have been no faster than the national average.

The Fort Worth-Arlington area has a lower cost of doing business and more housing affordability compared to Dallas. According to Moody's Analytics February 2020 report, the Fort Worth-Arlington area is advancing at a pace slightly above the national average in terms of job growth. The performance of each major industry approximately matches its national counterpart with a few exceptions. Specifically, financial services have grown at twice the national rate over the past year, but well-paying professional services have been declining since mid-2018. As a result, growth rates of both high-wage jobs and average hourly earnings have been below the national average. The unemployment rate has remained a very low 3.2 percent and labor force growth has been above average. Major employers include American Airlines; Lockheed Martin; and Texas Health Resources. Housing market indicators are improving. In late 2018 and the first part of 2019, new permits for single-family homes declined about 20 percent, but they have since rebounded by 15 percent. Apartment building is rebounding as well.

## Community Contacts

Three community contacts completed during the examination period with organizations serving the area were reviewed to ascertain credit and community development needs. Contacts were completed with organizations focused on affordable housing; services and programs for low-income individuals; and economic development. Contacts noted that the area economy is good with stable job growth and low unemployment. Because the economy is doing so well affordable housing access is becoming more of an issue. There are some parts of the area where low-income residents struggle with lack of food access (food deserts); are unbanked or underbanked; and do not have access to reliable transportation allowing them to access better paying jobs. Contacts identified several needs in the area including:

- Access to affordable housing, including single-family dwellings for purchase and affordable rental housing
- Support for workforce development and job training programs
- Financial education and self-sufficiency training

## Houston MSA

According to FDIC Deposit Market Share Data as of June 30, 2019, the bank-maintained deposits of $\$ 110$ billion in the area, ranking it $1^{\text {st }}$ in deposit market share with 44.1 percent. Banking competition consists of 95 financial institutions operating 1,416 offices in the AA. Major banking competitors include Wells Fargo, Bank, N.A. with 9.8 percent market share; Bank of America, N.A. with 9.5 percent market share; and BBVA USA with 5.69 percent market share. As of December 31, 2019, the bank operated 186 branches and 681 deposit-taking ATMs in the AA, representing 3.7 percent of total bank branches and 4.1 percent of total bank ATMs.

Table A below provides a summary of the demographics that includes housing and business information for the Houston MSA. The table indicates that the volume of OOUs is small in low-income census tracts ( 5.2 percent) and over 24.4 percent of families in the AA are low-income with 12.8 percent below the poverty level. The Houston MSA cost of housing also limits access to affordable homeownership, particularly among low-income borrowers. The median housing value in the Houston MSA $(\$ 172,974)$ is approximately 2.5 times the MSA's median income, over three times es moderate-income, and up to five times low-income, indicating a limited proportion of OOUs are affordable to low- and moderateincome borrowers. One simplistic method used to determine housing affordability assumes a maximum monthly principal and interest payment of no more than 30 percent of the applicant's income.

In the Houston MSA, assuming a 30-year mortgage with a five percent interest rate and three percent down payment, while not accounting for homeowners insurance, real estate taxes, or any additional monthly expenses, a low-income borrower making $\$ 34,686$ per year (or less than 50 percent of the FFIEC adjusted median family income in the MSA) could afford a $\$ 114,139$ mortgage loan with a payment of $\$ 1,041$ per month; a moderate-income borrower earning $\$ 55,498$ per year (or less than 80 percent of the FFIEC adjusted median family income in the AA) could afford a $\$ 213,325$ mortgage loan with a payment of $\$ 1,665$ per month.

Median rents and the percentage of families below poverty level suggest rental housing is also unaffordable for some low-income residents.

## Economic Data

According to Moody's Analytics February 2020 Report, the Houston MSA advanced twice as fast as the national average in terms of job growth over the past year. All major industries outperformed their national counterparts, with professional services, construction and distribution leading the way. Because these are well-paying industries, growth in high-wage jobs was twice the national average. However, manufacturing has been weak in recent months, with the local Purchasing Manager's Index signaling contraction in November and December. The area is a leader in oil and gas technologies which supports technical and professional service jobs in these industries. The area also has significant trade and export links given its location along the Texas Gulf Coast. The unemployment rate has begun to rise a bit over the past several months from a low of 3.4 percent in September to 3.7 percent in December. However, the labor force is still growing. Major employment sectors in the area include professional and business services, education and health services and government. Major employers include Memorial Hermann Health System; The University of Texas Health Science Center; and Schlumberger LTD (an oil services company). Housing indicators are improving, and above-average population growth is anticipated.

## Community Contacts

Five community contacts completed during the examination period with organizations and entities serving the community were reviewed to ascertain community credit needs. The organizations contacted focus on activities such as affordable housing, small business assistance and funding, community services, and community and economic development. Contacts noted that the area had been significantly impacted by recent natural disasters such as Hurricanes Irma and Harvey in 2017 and that recovery from these disasters has been more problematic for minority households in the area's lowincome neighborhoods. The potential for people to be victimized by predatory lenders and non-licensed or unqualified contractors is higher due to the demand for rebuilding, cost of rebuilding, and payment ability. Those on limited incomes are less prepared than those with disposable incomes or savings. Financial education is needed, along with small dollar loans to assist low-income residents. Other needs identified by the contacts include:

- Technical assistance for small businesses to help them be better prepared to deal with natural disasters
- Financing, including down payment assistance for low- and moderate-income borrowers to purchase homes
- Affordable rental housing for low- and very low-income households
- Funding support for area non-profits
- Foreclosure assistance
- Financing for small businesses, including micro-loans

## Scope of Evaluation in Texas

Examiners applied the methodology described under the Ratings section at the front of this document. The Austin MSA, Dallas CSA and Houston MSA, Dallas CSA received full-scope reviews. The AAs combined account for 96.2 percent of the deposits and 82.9 percent of the lending in the state. The performance in the Houston MSA and Dallas CSA, received greater weight based on their volume of deposits and lending. The remaining AAs in the state of Texas received a limited-scope review. Performance in limited-scope AAs and its effect on the CRA rating is discussed at the end of each test.

## CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN TEXAS

## LENDING TEST

The bank's performance under the Lending Test in the state of Texas is rated High Satisfactory.
Performance in AAs receiving limited-scope reviews was factored together with performance from AAs receiving full-scope reviews to determine the state's overall High Satisfactory Lending Test rating. Limited-scope conclusions did not significantly affect the initial overall conclusions based on the AAs receiving full-scope review.

Home mortgage and small loans to businesses received the most weight in reaching conclusions. Respectively, home mortgage lending and small loans to businesses account for 28.3 percent and 71.1 percent of the loan volume in the state by number and 81.4 and 15.3 percent of loan volume by dollar. Small farm lending is not a strategic focus of the bank and received the least weight in reaching conclusions; however, examiners also considered the importance of the bank's farm lending to the AA. Farm loans represented 0.5 percent of the loan volume in the state by number and 0.1 percent loan volume by dollar.

## Conclusions for Areas Receiving a Full-Scope Review

Based on full-scope reviews, the bank's performance in the Houston MSA, Dallas CSA and Austin MSA is good. The conclusion reflects overall excellent lending levels, good borrower distribution of loans, and adequate geographic distribution of loans. Product innovation and flexibility was considered favorably while the overall low level of CD lending was given negative consideration.

## Lending Activity

Lending levels reflect an excellent responsiveness to the credit needs in the bank's AAs. Examiners considered the number and amount of home mortgage, small business, and small farm loans originated or purchased relative to Chase's capacity based on deposits, competition, and market presence.

*Due to rounding, totals may not equal $100.0 \%$. The tables present the data for all assessment areas. The narrative below addresses performance in fullscope areas only.

## Houston MSA

Chase dominated the deposit market and ranked first out of 95 institutions with 44.1 percent market share.

In overall home mortgage lending, Chase ranked second with 6.3 percent market share placing it in the top 1 percent of lenders. This is a highly competitive market with 1,011 mortgage lenders. No lender dominated the mortgage market. The other leading lenders and market share are Wells Fargo Bank, N.A. ( 8.5 percent), Quicken Loans (3.8 percent), and Bank of America, N.A. (3.7 percent).

In small loans to businesses, Chase ranked first with 22.6 percent market share out of 235 lenders. American Express National Bank was second in the market with 20.6 percent market share.

Chase ranked first in small loans to farms with 26.3 percent market share. There were 35 lenders in the MSA. Other major lenders and market share are Prosperity Bank (19.1), Wells Fargo Bank, N.A. (16.0 percent) and John Deere Financial, F.S.B. (9.3 percent).

## Dallas CSA

Chase ranked second in deposits out of 164 institutions with 21.8 percent market share.
In overall home mortgage lending, Chase ranked second with 6.4 percent market share placing it in the top 1 percent of lenders. This is a highly competitive market with 1,101 mortgage lenders. No lender dominated the mortgage market. The other leading lenders and market share are Wells Fargo Bank, N.A. ( 9.6 percent), Bank of America, N.A. ( 3.8 percent), and Quicken Loans (3.3 percent).

In small loans to businesses, Chase ranked first with 20.2 percent market share out of 259 lenders. American Express National Bank was second in the market with 19 percent market share.

Chase ranked first in small loans to farms with 19.4 percent market share. There were 57 lenders in the MSA. Other major lenders and market share are Wells Fargo Bank, N.A. (15.1 percent) First Financial Bank, N.A. (7.7), and John Deere Financial, F.S.B. (7.7 percent).

## Austin MSA

Chase ranked second in deposits out of 67 institutions with 17.9 percent market share.
In overall home mortgage lending, Chase ranked second with 5.1 percent market share placing it in the top 1 percent of lenders. This is a highly competitive market with 823 mortgage lenders. No lender dominated the mortgage market. The other leading lenders and market share are Wells Fargo Bank, N.A. (9.8 percent), University Federal Credit Union (3.1 percent), and Quicken Loans (2.6 percent).

In small loans to businesses, Chase ranked first with 25 percent market share out of 185 lenders. American Express National Bank was second in the market with 19.1 percent market share.

Chase ranked first in small loans to farms with 29.5 percent market share. There were 27 lenders in the MSA. Other major lenders and market share are BancorpSouth ( 16.6 percent), Wells Fargo Bank, N.A. (13.4 percent), and John Deere Financial, F.S.B. (9.91 percent).

## Distribution of Loans by Income Level of the Geography

The bank exhibits adequate geographic distribution of loans in its AAs.

## Home Mortgage Loans

Refer to Table O in the state of Texas section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of home mortgage loan originations and purchases is adequate. The following information was taken into consideration when determining this rating.

## Houston MSA

- The limited proportion of housing units in low-income geographies, particularly OOUs ( 5.2 percent), constrained lending opportunities; therefore, performance in moderate-income geographies was given more consideration due to the higher percentage of OOUs in those geographies.
- The high level of competition in the AA (1,011 home mortgage lenders) was also considered and examiners placed greater significance on performance compared to the aggregate of lenders.
- Between 2017 and 2019, the proportion of loans in low- and moderate-income geographies was well below the percentage of OOUs and respectively exceeded and was near to the aggregate distribution of loans by all lenders.
- Performance in low- and moderate-income geographies during the 2014 to 2016 period was weaker than performance during the 2017 to 2019 period. The proportion of loans in low- and moderateincome geographies was well below the percentage of OOUs and respectively near to and below the aggregate distribution of loans by all lenders.

## Dallas CSA

- The limited proportion of housing units in low-income geographies, particularly OOUs ( 5.0 percent), constrained lending opportunities; therefore, performance in moderate-income geographies was given more consideration due to the higher percentage of OOUs in those geographies.
- The high level of competition in the AA (1,011 home mortgage lenders) was also considered and examiners placed greater significance on performance when compared to the aggregate of lenders.
- Between 2017 and 2019, the proportion of loans in low- and moderate-income geographies was well below the percentage of OOUs and respectively was below and near to the aggregate distribution of loans by all lenders.
- Performance in low- and moderate-income geographies during the 2014 to 2016 period was weaker than performance during the 2017 to 2019 period. The proportion of loans in low- and moderateincome geographies was well below the percentage of OOUs and below the aggregate distribution of loans by all lenders.

## Austin MSA

- The limited proportion of housing units in low-income geographies, particularly OOUs ( 3.8 percent), constrained lending opportunities; therefore, performance in moderate-income geographies was given more consideration due to the higher percentage of OOUs in those geographies.
- The high level of competition in the AA (823 home mortgage lenders) was also considered and examiners placed greater significance on performance when compared to the aggregate of lenders.
- Between 2017 and 2019, the proportion of loans in low-income geographies was near to the percentage of OOUs and the aggregate distribution of loans by all lenders. In moderate-income geographies, the proportion of loans was well below percentage of OOUs and below the aggregate distribution of loans by all lenders.
- Performance in low- and moderate-income geographies during the 2014 to 2016 period was generally consistent with the performance during the 2017 to 2019 period. The proportion of loans in low- and moderate-income geographies was below the percentage of OOUs and respectively near to and below the aggregate distribution of loans by all lenders.

## Small Loans to Businesses

Refer to Table Q in the state of Texas section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of small loans to businesses for this evaluation is adequate. The following information was taken into consideration when determining this conclusion.

## Houston MSA

- The smaller proportion of businesses in low-income geographies ( 9.4 percent) and competition between 235 lenders constrained lending opportunities to existing businesses. Therefore, performance in moderate-income geographies was given slightly more consideration due to the higher percentage of businesses in those geographies.
- Between 2017 and 2019, the proportion of small loans to businesses in low- and moderate-income geographies was below both the proportion of businesses and the aggregate distribution.
- During 2014 to 2016, the bank's proportion of small loans to businesses in low- and moderateincome geographies was stronger. Performance in low- and moderate-income geographies was below the proportion of businesses and near to the aggregate distribution.

## Dallas CSA

- The smaller proportion of businesses in low-income geographies ( 6.8 percent) and competition between 259 lenders constrained lending opportunities to existing businesses. Therefore, performance in moderate-income geographies was given slightly more consideration due to the higher percentage of businesses in those geographies.
- Between 2017 and 2019, the proportion of small loans to businesses in low- and moderate-income geographies was below both the proportion of businesses and the aggregate distribution.
- During 2014 to 2016, the bank's proportion of small loans to businesses in low- and moderateincome geographies was consistent with performance from 2017 to 2019. Performance in low- and moderate-income geographies was below the proportion of businesses and the aggregate distribution.

## Austin MSA

- Between 2017 and 2019, the proportion of small loans to businesses in low- income geographies exceeded both the proportion of businesses and the aggregate distribution. The proportion of small loans to businesses in moderate- income geographies was below the proportion of businesses and near to the aggregate distribution.
- During 2014 to 2016, the bank's proportion of small loans to businesses in low- and moderateincome geographies was slightly weaker than the aggregate performance in moderate-income tracts during 2017 to 2019 and otherwise consistent. The proportion of small loans to businesses in lowincome geographies exceeded both the proportion of businesses and the aggregate distribution, while the proportion of small loans to businesses in moderate- income geographies was below the proportion of businesses and the aggregate distribution.

## Small Loans to Farms

Refer to Table $S$ in the state of Texas section of appendix $D$ for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to farms.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of small loans to farms is adequate. The following information was taken into consideration when determining this rating.

## Houston MSA

- The limited percentage of farms in low-income geographies ( 5.2 percent), level of competition in the AA ( 35 lenders) and the fact that farm lending is not a focus of the bank was considered and examiners placed greater significance on performance compared to the aggregate of lenders.
- Between 2017 and 2019, the proportion of loans to small farms in low- income geographies were well below the proportion of farms in those geographies and exceeded the aggregate distribution. The proportion of loans to small farms in moderate-income geographies was well below both the proportion of farms in those geographies and the aggregate distribution.
- Performance in low- and moderate-income geographies during the 2014 to 2016 period was generally consistent with performance during the 2017 to 2019 period. the proportion of loans to small farms in low- income geographies was below the proportion of farms in those geographies and exceeded the aggregate distribution. The proportion of loans to small farms in moderate-income geographies was well below both the proportion of farms in those geographies and the aggregate distribution

## Dallas CSA

- The limited percentage of farms in low-income geographies (4.7 percent), level of competition in the AA ( 57 lenders) and the fact that farm lending is not a focus of the bank was considered and examiners placed greater significance on performance compared to the aggregate of lenders.
- Between 2017 and 2019, the proportion of loans to small farms in low- and moderate-income geographies was well below both the proportion of farms in those geographies and exceeded the aggregate distribution.
- Performance in low- and moderate-income geographies during the 2014 to 2016 period was stronger than performance during the 2017 to 2019 period. The proportion of loans to small farms in lowincome geographies exceeded the proportion of farms in those geographies and the aggregate distribution. The proportion of loans to small farms in moderate-income geographies was below the proportion of farms in those geographies and near to the aggregate distribution

## Austin MSA

- The limited percentage of farms in low-income geographies (4.7 percent), level of competition in the AA (27 lenders) and the fact that farm lending is not a focus of the bank was considered and examiners placed greater significance on performance compared to the aggregate of lenders.
- Between 2017 and 2019, the proportion of loans to small farms in low- income geographies were near to the proportion of farms in those geographies and exceeded the aggregate distribution. The proportion of loans to small farms in moderate-income geographies was near to the proportion of farms in those geographies and well below the aggregate distribution.
- Performance in low- and moderate-income geographies during the 2014 to 2016 period was weaker than performance during the 2017 to 2019 period. The proportion of loans to small farms in lowincome geographies was well below the proportion of farms in those geographies and exceeded the aggregate distribution. The proportion of loans to small farms in moderate-income geographies was well below both the proportion of farms in those geographies and the aggregate distribution

## Lending Gap Analysis

A review of home mortgage loans, small loans to business, and small loans to farms including summary reports and AA maps did not identify any unexplained conspicuous lending gaps in the bank's activities.

## Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and business of different sizes.

## Home Mortgage Loans

Refer to Table P in the state of Texas section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases.

Based on the data in the tables and the following considerations, the bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good. The following information was taken into consideration when determining this rating.

## Houston MSA

- Greater significance was placed on performance against the aggregate distribution as it reflects the difficulties all lenders are experiencing due to competition and the economic constraints discussed above under the Description of the Full-Scope AA.
- Examiners particularly considered housing affordability challenges for low- and moderate-income borrowers.
- Between 2017 and 2019, the proportion of loans to low-income borrowers was well below the percentage of low-income families and near to the aggregate distribution of lenders. The proportion of moderate-income loans was near to both the proportion of moderate-income families and the aggregate distribution.
- During 2014 to 2016 the bank's performance was similar to performance between 2017 to 2019 . The proportion of loans to low-income borrowers was well below the percentage of low-income families and exceeded the aggregate distribution of lenders. The proportion of moderate-income loans was below both the proportion of moderate-income families and the aggregate distribution.

## Dallas CSA

- Greater significance was placed on performance against the aggregate distribution as it reflects the difficulties all lenders are experiencing due to competition and the economic constraints discussed above under the Description of the Full-Scope AA.
- Examiners considered housing affordability challenges, particularly for low-income borrowers.
- Between 2017 and 2019, the proportion of loans to low-income borrowers was well below the percentage of low-income families and near to the aggregate distribution of lenders. The proportion of moderate-income loans was near to the proportion of moderate-income families and exceeded the aggregate distribution.
- During 2014 to 2016 the bank's performance was weaker than performance between 2017 to 2019. The proportion of loans to low-income borrowers was well below the percentage of low-income families and exceeded the aggregate distribution of lenders. The proportion of moderate-income loans was below both the proportion of moderate-income families and the aggregate distribution.

## Austin MSA

- Greater significance was placed on performance against the aggregate distribution as it reflects the difficulties all lenders are experiencing due to competition and the economic constraints discussed above under the Description of the Full-Scope AA.
- Examiners particularly considered housing affordability challenges, particularly for low- income borrowers.
- Between 2017 and 2019, the proportion of loans to low-income borrowers was well below the percentage of low-income families and below the aggregate distribution of lenders. The proportion of moderate-income loans was below both the proportion of moderate-income families and the aggregate distribution.
- During 2014 to 2016 the bank's performance was slightly stronger than performance between 2017 to 2019. The proportion of loans to low-income borrowers was well below the percentage of lowincome families and exceeded the aggregate distribution of lenders. The proportion of moderateincome loans was below both the proportion of moderate-income families and the aggregate distribution.

## Small Loans to Businesses

Refer to Table R in the state of Texas section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses.

Based on the data in the tables and the following factors, the distribution of the bank's originations and purchases of small loans to businesses by revenue category is good. The following information was taken into consideration when determining this rating.

## Houston MSA

- Slightly greater significance was placed on performance against the aggregate distribution of lenders as it reflects the difficulties all lenders are experiencing due to competition and the economic constraints discussed above under the Description of the Full-Scope AA.
- Between 2017 and 2019, the bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.
- During 2014 to 2016, the bank's performance was consistent with performance between 2017 and 2019. The bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.

## Dallas CSA

- Slightly greater significance was placed on performance against the aggregate distribution of lenders as it reflects the difficulties all lenders are experiencing due to competition and the economic constraints discussed above under the Description of the Full-Scope AA.
- Between 2017 and 2019, the bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.
- During 2014 to 2016, the bank's performance was consistent with performance between 2017 and 2019. The bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.

## Austin MSA

- Slightly greater significance was placed on performance against the aggregate distribution of lenders as it reflects the difficulties all lenders are experiencing due to competition and the economic constraints discussed above under the Description of the Full-Scope AA.
- Between 2017 and 2019, the bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.
- During 2014 to 2016, the bank's performance was consistent with performance between 2017 and 2019. The bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.

## Small Loans to Farms

Refer to Table T in the state of Texas section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to farms.

Based on the data in the table and the following considerations, the distribution of the bank's originations and purchases of small loans to farms by revenue category is good. The following information was taken into consideration when determining this rating.

## Houston MSA

- Between 2017 and 2019, the bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.
- During 2014 to 2016, the bank's performance was consistent with performance between 2017 and 2019. The bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.

## Dallas CSA

- Between 2017 and 2019, the bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.
- During 2014 to 2016, the bank's performance was consistent with performance between 2017 and 2019. The bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.

## Austin MSA

- Between 2017 and 2019, the bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.
- During 2014 to 2016, the bank's performance was consistent with performance between 2017 and 2019. The bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.

## Community Development Lending

The bank made a low level of CD loans which was considered negatively when determining the Lending Test rating for the state of Texas. The respective excellent and adequate levels of CD lending in Dallas and Austin was offset by poor to very poor levels in the larger Houston. MSA

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the bank's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

## Houston MSA

The bank has made few, if any, CD loans in the Houston-The Woodlands- Sugar Land, TX MSA. There were 18 CD loans made for a total of $\$ 106.4$ million. This represents 0.8 percent of the tier 1 capital allocated to the AA. Most of the CD loans were for community services, which is a critical need in this AA.

Examples of CD loans in the AA include:

- In July 2015, Chase originated a $\$ 40$ million loan to Houston Independent School District for a TaxExempt Direct Purchase Bond, used to refund existing Series 2005 Limited Tax Bonds, lower the overall debt service requirements of the district, and paid costs of issuing the bonds. According to the National Center for Education Statistics (NCES), 80 percent of the district student population is eligible for the Federal Free or Reduced Lunch program.
- In May 2019, Chase originated a $\$ 32$ million term loan to Goose Creek Consolidated Independent School District, located in Harris County, TX for a Series 2019 Maintenance Tax Note. The proceeds will be used to renovate and upgrade pipes, valves, insulation, turf, and exterior lighting in the District. According to the NCES, the majority of the student population is eligible for the Federal Free or Reduced Lunch program.

## Dallas CSA

The bank has made an adequate level of CD lending in the Dallas-Fort Worth, TX-OK CSA. The bank originated eight CD loans totaling $\$ 342.8$ million. This represents 4.6 percent of the tier 1 capital allocated to the AA. Most of the CD loans were for community services which is a critical need in this AA.

Examples of CD loans in the AA include:

- The bank provided a $\$ 322$ million loan to Dallas Independent School District. Funds were used for the purposes of constructing, improving, renovating, and equipping school buildings of the District. Funds were also used to acquire real property, purchase school buses, construct and equip bus maintenance and operating facilities for the District, and refinancing, renewing, or refunding Notes and Loans. According to the NCES, 88 percent of the student population is eligible for the Federal Free or Reduced Lunch program.
- The bank's New Markets Tax Credit Group originated a $\$ 11.7$ million construction loan to finance the new construction of a 44,000 square foot medical care facility to primarily serve low-income residents in South Dallas.

## Austin MSA

The bank is a leader in making CD loans in the Austin-Round Rock, TX MSA. The bank made 30 CD loans totaling $\$ 737.1$ million. This represents 74.5 percent of the tier 1 capital allocated to the AA. Most of the CD loans were for revitalization/stabilization, which is a critical need in this AA.

Examples of CD loans in the AA include:

- The bank originated a $\$ 166.2$ million construction loan to finance the acquisition and development of a 625,590 square foot retail property to be located in Austin, TX in a moderate-income census tract. The lifestyle center represents the retail component of a mixed-use project, which will provide
a wide variety of opportunities and enhancement to current and future residents of the moderateincome geography.
- The bank originated a $\$ 70$ million term loan to refinance the development of a 3-story office building located on the southeast side of Northwest Austin. The project will revitalize this commercial/industrial area into a mixed-use neighborhood

## Product Innovation and Flexibility

The bank makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. Refer to the comments in the Product Innovation and Flexibility section of this performance evaluation for additional details regarding the programs.

## Houston MSA

As shown in the table below, a total of 11,335 loans were funded totaling $\$ 1.8$ billion.

| Loan Type | Number of <br> Loans | Dollar Amount <br> $\mathbf{( \$ 0 0 0 ’ s )}$ |
| :--- | :---: | :---: |
| DreaMaker | 2,173 | 433,622 |
| FHA | 4,805 | 618,392 |
| USDA | 718 | 106,923 |
| VA | 1,025 | 230,053 |
| HARP | 1,931 | 224,361 |
| SBA | 683 | 242,547 |

Dallas CSA
As shown in the table below, a total of 11,909 loans were funded totaling $\$ 1.9$ billion.

| Loan Type | Number of <br> Loans | Dollar Amount <br> $\mathbf{( \$ 0 0 0 ' s )}$ |
| :--- | :---: | :---: |
| DreaMaker | 2,447 | 493,101 |

| HARP | 463 | 63,494 |
| SBA | 263 | 95,811 |

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall High Satisfactory Lending Test rating and did not significantly affect the initial overall conclusions based on the AAs receiving full-scope review. Based on limited-scope reviews, the bank's performance under the Lending Test in the Abilene MSA, Amarillo MSA, Brownsville-Harlingen MSA, El Paso MSA, Killeen-Temple MSA, Laredo MSA, McAllen-Edinburg-Mission MSA, Midland-Odessa CSA, San Antonio-New Braunfels MSA, Waco MSA, Wichita Falls MSA, and Texas Non-MSA is consistent with the bank's overall good performance under the Lending Test in the full-scope areas. The performance under the Lending Test in the Beaumont-Port Arthur MSA, College Station-Bryan MSA, Tyler MSA, Longview MSA, and Lubbock MSA is weaker than the bank's overall performance under the Lending Test in the full-scope areas. Performance is weaker due to weaker proportional performance overall.

Refer to Tables O through T in the state of Texas section of appendix D for the facts and data that support these conclusions.

## INVESTMENT TEST

The bank's performance under the Investment Test in the state of Texas is rated High Satisfactory.

## Conclusions for Areas Receiving Full-Scope Reviews

Based on full-scope reviews, the bank's performance in the Houston MSA and the Dallas CSA is good and is excellent in the Austin MSA.

## Houston MSA

The bank has an adequate level of qualified CD investments and grants, although rarely in a leadership position, particularly those that are not routinely provided by private investors. Current and prior period investments are 2.9 percent of tier 1 capital allocated to the AA. A significant majority or 81.2 percent of total investments represent current period investments.

The bank exhibits excellent responsiveness to the needs identified in this AA including community service, affordable housing, and revitalization/stabilization for low- and moderate-income individuals and geographies. Seventy percent of current period investments focused on community service while 29.1 percent related to affordable housing. Current and prior period investments created or retained 14,328 low- and moderate-income housing units for individuals and families. The bank provided 118 grants totaling $\$ 12.7$ million to a variety of organizations that support community service, revitalization/stabilization, and affordable housing needs. In some occurrences, grants were provided in multiple years.

The bank makes significant use of innovative and/or complex investments to support CD initiatives. The bank made 29 current and prior period complex CD investments totaling $\$ 172.8$ million ( 42 percent) of total investments. Complex investments were related to affordable housing and community services through Direct Investor LIHTC and NMTC programs. LIHTC investments require bank expertise and capacity in selecting projects and partners, negotiating agreements, overseeing project development and operations, and ensuring compliance. Twenty-two ( 5.5 percent) of current period investments were catalysts for future growth and other improvements.

Examples of CD investments in the AA include:

- The bank made a $\$ 14.5$ million single investment and Direct Investor LIHTC transaction with an organization to provide 110 rental units to low- and moderate-income seniors 55 and over in the AA. The bank does not use a syndicator but employs a multi-disciplined approach that focuses on the long-term nature of the investment. The bank performs all the functions a syndicator would perform through in-house expertise. The bank conducts the underwriting, pricing, and due diligence prior to originating the investment. After origination, it monitors construction quality, lease-up and performance of the property through stabilization. The bank manages the asset for the entire fifteenyear hold period, ensuring compliance with the LIHTC program and conducting annual on-site inspections.
- The bank made a $\$ 2.2$ million NMTC investment with a community organization that reaches approximately 2,000 at-risk children annually through their mentoring program in this AA. In 2015 the organization was forced to vacate its home due to safety concerns, and in 2017 was still operating out of donated temporary space that was not ideally suited to meet the needs of the AA's at-risk youth. The purpose of the bank's investment was to help fill the gap, so the building project can be completed on time without significantly curtailing services provided by the community organization.
- The bank made a $\$ 14.4$ million single investment and Direct Investor LIHTC transaction to provide 102 rental units to low- and moderate-income individuals and families in the AA. The bank does not use a syndicator but employs a multi-disciplined approach that focuses on the long-term nature of the investment. The bank performs all the functions a syndicator would perform through in-house expertise. The bank conducts the underwriting, pricing, and due diligence prior to originating the investment. After origination it monitors construction quality, lease-up and performance of the property through stabilization. The bank will manage the asset for the entire fifteen- year hold period, ensuring compliance with the LIHTC program and conducting annual on-site inspections.
- The bank made eight investments totaling $\$ 38.9$ million in municipal bonds used to finance the construction or rehabilitation of affordable rental housing. The proceeds may also be used to help low- and moderate-income individuals and families purchase a home. This investment was in response to the needs of local agencies seeking investors for affordable housing programs in this AA.
- The bank provided four grants totaling $\$ 435$ thousand to a non-profit community development organization that aligns with a government economic revitalization or stabilization plan. Part of this funding was in response to the need to preserve and improve unsubsidized rental housing in a neighborhood where 435,000 low-income households spend over 30 percent of their income on housing and/or living in substandard conditions.
- The bank provided a $\$ 300$ thousand grant to an organization that serves economically disadvantaged families that need multiple supportive services to become financially resilient. The knowledge, support, and practices provided can empower these low- and moderate-income families and increase their financial capability.

## Dallas CSA

The bank has an adequate level of qualified CD investments and grants, although rarely in a leadership position, particularly those that are not routinely provided by private investors. Current and prior period investments are 2.1 percent of tier 1 capital allocated to the AA. A large majority ( 84.2 percent) of total investments represent current period investments.

The bank exhibits excellent responsiveness to the needs identified in this AA including affordable housing, community services, and revitalize/stabilize for low- and moderate-income individuals and geographies. Current period investments were mainly 85.2 percent affordable housing, 10.5 percent community service, and 4.1 percent revitalization/Stabilization. Current and prior period investments created or retained 11,220 low- and moderate-income housing units for individuals and families. In the current period the bank provided 128 grants totaling $\$ 17.7$ million to a variety of organizations that support community service, revitalization/stabilization, and affordable housing needs. In some occurrences, grants were provided in multiple years.

The bank makes extensive use of innovative and/or complex investments to support CD initiatives. The bank made 22 complex investments totaling $\$ 211.7$ million or 70.9 percent of current period investments. Complex investments were related to affordable housing and community services through Direct Investor LIHTC and NMTC programs. Thirteen investments or 86.8 percent of the dollar volume were Direct Investor LIHTC transactions; seven were related to NMTCs. Direct Investor LIHTC investments require bank expertise and capacity in selecting projects and partners, negotiating agreements, overseeing project development and operations, and ensuring compliance. Fourteen (10.4 percent) of current period investments were catalysts for future growth and other improvements.

Examples of CD investments in the AA include:

- The bank made a $\$ 12.4$ million single investment and Direct Investor LIHTC transaction with an organization to provide 65 rental units to low- and moderate-income individuals and families in the AA. The bank does not use a syndicator but employs a multi-disciplined approach that focuses on the long-term nature of the investment. The bank performs all the functions a syndicator would perform through in-house expertise. The bank conducts the underwriting, pricing, and due diligence prior to originating the investment. After origination it monitors construction quality, lease-up and performance of the property through stabilization. The bank manages the asset for the entire fifteenyear hold period, ensuring compliance with the LIHTC program and conducting annual on-site inspections.
- The bank made two LIHTC investments totaling $\$ 8.7$ million to provide 193 rental units to low- and moderate-income individuals and families in the AA. The bank invested in this multi-investor fund primarily to diversify and meet affordable housing needs in these areas that are difficult to penetrate directly because regional multi-investor fund syndicators exercise significant control over these markets.
- The bank provided $\$ 7.4$ million in NMTC financing to support the development of healthy food options, the expansion of vital community services, and the growth of employment opportunities in the most disinvested parts of Dallas, with the expansion of a new facility. Chase partnered with other CDEs that provide allocation to a project by providing the final component of allocation necessary to ensure the project's success.
- The bank provided two grants totaling $\$ 357$ thousand to a non-profit organization that empowers creativity and helps build social and emotional well-being for 151,000 youth in this AA by bringing arts and cultural performances into classrooms. Many students from participating schools come from low- and moderate-income families and are eligible for Federal Free or Reduced lunch programs.

## Austin MSA

The bank's performance in the Austin-Round Rock-Georgetown MSA is excellent. The bank has an excellent level of qualified CD investments and grants, occasionally in a leadership position, particularly those that are not routinely provided by private investors. Current and prior period investments are 8.4 percent of tier 1 capital allocated to the AA. A large majority ( 81.1 percent) of total investments represent current period investments.

The bank exhibits excellent responsiveness to the needs identified in this AA including affordable housing, community services, and revitalize/stabilize for low- and moderate-income individuals and geographies. CD investments included 88.4 percent affordable housing and 11.6 percent community service. Current and prior period investments created or retained 4,985 low- and moderate-income housing units for individuals and families. The bank provided 38 grants totaling $\$ 2.3$ million to a variety of organizations that support community service and affordable housing. In some occurrences, grants were provided in multiple years.

The bank makes extensive use of innovative and/or complex investments to support CD initiatives. The bank made six complex investments totaling $\$ 57.1$ million or 81.9 percent of current period investments; four were related to Direct Investor fund LIHTCs. Direct Investor LIHTC investments require bank expertise and capacity in selecting projects and partners, negotiating agreements, overseeing project development and operations, and ensuring compliance. Two current period investments were catalysts for future growth and other improvements.

Examples of CD investments in the AA include:

- The bank made an $\$ 11.7$ million single investment and Direct Investor LIHTC transaction to provide 60 rental units to low- and moderate-income individuals and families in the AA. The bank does not use a syndicator but employs a multi-disciplined approach that focuses on the long-term nature of the investment. The bank performs all the functions a syndicator would perform through in-house expertise. The bank conducts the underwriting, pricing, and due diligence prior to originating the investment. After origination, it monitors construction quality, lease-up and performance of the property through stabilization. The bank will manage the asset for the entire fifteen-year hold period, ensuring compliance with the LIHTC program and conducting annual on-site inspections.
- The bank provided a $\$ 14.1$ million single investor LIHTC investment to fund an affordable housing project to provide 122 rental units to low- and moderate-income individuals and families in this AA The bank does not use a syndicator but employs a multi-disciplined approach that focuses on the long-term nature of the investment. The bank performs all the functions a syndicator would perform through in-house expertise. The bank conducts the underwriting, pricing, and due diligence prior to originating the investment. After origination, it monitors construction quality, lease-up and performance of the property through stabilization. The bank manages the asset for the entire fifteenyear hold period, ensuring compliance with the LIHTC program and conducting annual on-site inspections.
- The bank partnered with a non-profit food bank organization to provide $\$ 6.2$ million in NMTC financing. The organization will provide much needed services to low- and moderate-income communities to help create healthy neighborhoods. Funding provided by the bank is considered a gap filler, which ensures that projects receive enough of a subsidy to be viable.

** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

## Statewide Investments in State of Texas

Statewide Investments with a $\mathrm{P} / \mathrm{M} / \mathrm{F}$ included investments related to affordable housing, community services, and revitalization/stabilization. Nineteen investments totaling $\$ 59$ million were made for affordable housing. Twenty-nine grants totaling $\$ 22.2$ million were provided to a variety of organizations, primarily agencies administering financial education services. Occasionally, grants were made annually. The level of investments had a positive impact on the Investment Test rating for the state of Texas.

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall High Satisfactory Investment Test rating and did not significantly affect the initial overall conclusions based on the AAs receiving full-scope review. Based on limited-scope reviews, the bank's performance under the Investment Test in the Wichita Falls MSA is consistent with the bank's overall good performance under the Investment Test in the full-scope areas. The bank's performance under the Investment Test in the Abilene MSA, Amarillo MSA, Beaumont-Port Arthur MSA, Brownsville-Harlingen MSA, College Station-Bryan MSA, El Paso MSA, Killeen-Temple MSA, Laredo MSA, Lubbock MSA, McAllen-Edinburg-Mission MSA, Midland-Odessa CSA, San-Antonio-New Braunfels MSA, and Waco MSA is stronger than the bank's overall performance in the full-scope areas due to a higher level of qualified investments in relation to allocated tier 1 capital. The bank's performance in the Longview MSA, Tyler MSA, and Texas Non-MSA is weaker than the bank's overall good performance under the Investment Test in the full-scope areas due to the low level of qualified investments in relation to allocated tier 1 capital.

## SERVICE TEST

The bank's performance under the Service Test in state of Texas is rated High Satisfactory.

## Conclusions for Areas Receiving Full-Scope Reviews

Based on a full-scope review, including the data in the tables below, the bank's performance in the Dallas CSA is excellent and in the Houston MSA is good. The bank's performance in the Austin MSA is adequate. More weight was given to performance in the Dallas CSA and Houston MSA due to the bank's larger deposit and branch presence.

## Retail Banking Services

Service delivery systems are accessible to geographies and individuals of different income levels in the bank's AAs.

Examiners evaluated the data as outlined in the Scope section at the front of this document including bank-provided data on usage of branches adjacent to low- and moderate-income geographies by individuals residing in those geographies and on increases in the usage of alternative delivery systems.

## Houston MSA

Based on the data in the table below and performance context, the branch distribution is good. In lowand moderate-income geographies, the distribution is near to the percentage of the population. The bank had 15 branches in low-income geographies and 37 branches in moderate-income geographies. The distribution was augmented by two MUI tract branches that serve low-income tracts and 28 MUI tract branches that serve moderate-income tracts. Examiners reviewed data on the accounts held and transactions conducted at the MUI branches and confirmed they were serving the adjacent low- and moderate-income populations.

## Dallas CSA

Based on the data in the table below and performance context, the branch distribution is excellent. In low- and moderate-income geographies, the distribution is below and is near to the percentage of the population. The bank had 13 branches in low-income geographies and 47 branches in moderate-income geographies. The distribution was augmented by six MUI tract branches that serve low-income tracts and 32 MUI tract branches that serve moderate-income tracts. Examiners reviewed data on the accounts held and transactions conducted at the MUI branches and confirmed they were serving the adjacent lowand moderate-income populations.

## Austin MSA

Based on the data in the table below and performance context, the branch distribution is adequate. In low- and moderate-income geographies, the distribution is near to and well below the percentage of the population. The bank had four branches in low-income geographies and three branches in moderateincome geographies. The distribution was augmented by five MUI tract branches that serve moderateincome tracts. Examiners reviewed data on the accounts held and transactions conducted at the MUI branches and confirmed they were serving the adjacent low- and moderate-income populations.

## Houston MSA

Alternative delivery systems enhanced the delivery of banking services to geographies and individuals of all income levels. The OCC considered the availability and use of alternative delivery systems over the evaluation period. This included review of the bank's 681 deposit-taking ATMs, online banking, mobile banking, and telephone banking to determine the effectiveness of these systems to make retail banking services available to individuals in low- and moderate-income geographies. The bank increased the deposit-taking ATMs in low- and moderate-income geographies by 54.3 percent over the prior rating
period to 83 (12.2 percent) deposit-taking ATMs in low-income geographies and 164 (24.1 percent) ATMs in moderate-income geographies. Additionally, bank-provided data on use of online, mobile, and telephone banking showed increases in the adoption of these services by low- and moderate-income individuals from the prior rating period.

## Dallas CSA

Alternative delivery systems enhanced the delivery of banking services to geographies and individuals of all income levels. The OCC considered the availability and use of alternative delivery systems over the evaluation period. This included review of the bank's 680 deposit-taking ATMs, online banking, mobile banking, and telephone banking to determine the effectiveness of these systems to make retail banking services available to individuals in low- and moderate-income geographies. The bank increased the deposit-taking ATMs in low- and moderate-income geographies by 63.1 percent over the prior rating period to 47 ( 6.9 percent) deposit-taking ATMs in low-income geographies and 188 ( 27.6 percent) ATMs in moderate-income geographies. Additionally, bank-provided data on use of online, mobile, and telephone banking showed increases in the adoption of these services by low- and moderate-income individuals from the prior rating period.

## Austin MSA

Alternative delivery systems did not significantly enhance the delivery of banking services to geographies and individuals of all income levels. The OCC considered the availability and use of alternative delivery systems over the evaluation period. This included review of the bank's 121 deposittaking ATMs, online banking, mobile banking, and telephone banking to determine the effectiveness of these systems to make retail banking services available to individuals in low- and moderate-income geographies. The number of deposit-taking ATMs in low- and moderate-income geographies decreased by 26.7 percent from the prior rating period to 19 ( 15.7 percent) deposit-taking ATMs in low-income geographies and seven ( 5.8 percent) ATMs in moderate-income geographies. Additionally, bankprovided data on use of online, mobile, and telephone banking showed increases in the adoption of these services by low- and moderate-income individuals from the prior rating period.

## Houston MSA

The bank's opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and/or to low- and moderateincome individuals. The bank did not open any branches in the low- and moderate-income geographies
and closed eight branches in low-income and seven branches in moderate-income geographies. Branch closure rationale included reduced customer usage, unprofitability, branch consolidations, safety issues, and proximity to other Chase branches. Despite the branch closures, branch locations remained accessible to geographies and individuals of different income levels in the bank's AA.

Services, including where appropriate, business hours, do not vary in a way that inconveniences its AA, particularly low- and moderate-income geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 6:00 pm and Saturday from 9:00 am to 4:00 pm. All retail banking services are available at all branches within the low- and moderate-income geographies.

## Dallas CSA

The bank's opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and/or to low- and moderateincome individuals. The bank did not open any branches in the low- and moderate-income geographies and closed three branches in low-income and six branches in moderate-income geographies. Branch closure rationale included reduced customer usage, unprofitability, branch consolidations, and proximity to other Chase branches. Despite the branch closures, branch locations remained accessible to geographies and individuals of different income levels in the bank's AA.

Services, including where appropriate, business hours, do not vary in a way that inconveniences its AA, particularly low- and moderate-income geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 6:00 pm and Saturday from 9:00 am to 4:00 pm. All retail banking services are available at all branches within the low- and moderate-income geographies.

## Austin MSA

The bank's opening and closing of branches has generally not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and/or to low- and moderateincome individuals. The bank did not open any branches in the low- and moderate-income geographies and closed one branch in a low-income geography. The branch closure was due to its proximity to another Chase branch. Despite the branch closure, branch locations generally remained accessible to geographies and individuals of different income levels in the bank's AA.

Services, including where appropriate, business hours, do not vary in a way that inconveniences its AA, particularly low- and moderate-income geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 6:00 pm and Saturday from 9:00 am to 2:00 pm. All retail banking services are available at all branches within the low- and moderate-income geographies.

## Community Development Services

The bank provided a significant level of CD services in the Houston MSA and Dallas CSA, and an adequate level of CD services in the Austin MSA. The provided services were responsive to the needs of the full-scope AAs.

## Houston MSA

Bank employees provided their financial or job-specific expertise and/or technical assistance for 2,609 qualified CD activities to 58 organizations for a total of 9,450 hours during the evaluation period. Most
of the bank's assistance went to organizations that provide services to low- and moderate-income individuals and families. These services were responsive to the needs for financial literacy and affordable housing. The following are examples of CD services provided in this AA:

- Bank employees provided 247 financial literacy workshops for low- and moderate-income customers through partnership with a nonprofit organization benefitting 4836 low- and moderateincome individuals.
- Bank employees held four affordable homeownership seminars serving 155 low- and moderateincome individuals one on one with the basics of obtaining a mortgage.

## Dallas CSA

Bank employees provided their financial or job-specific expertise and/or technical assistance for 1,884 qualified CD activities to 47 organizations for a total of 8,619 hours during the evaluation period. Most of the bank's assistance went to organizations that provide services to low- and moderate-income individuals and families. These services were responsive to the needs for affordable housing and technical assistance. The following are examples of CD services provided in this AA:

- Bank employees provided 779 pre-purchase homebuyer education seminars for low- and moderateincome customers. The educational curriculum is provided by a HUD-approved nonprofit housing counseling agency. The seminar is offered either in person or through webinar.
- Bank employees provided 2,318 hours and 505 technical assistance services for not-for-profits that serve low- and moderate-income individuals and communities.

## Austin MSA

Bank employees provided their financial or job-specific expertise and/or technical assistance for 499 qualified CD activities to 14 organizations for a total of 2,120 hours during the evaluation period. Most of the bank's assistance went to organizations that provide services to low- and moderate-income individuals and families. These services were responsive to the needs affordable housing and financial education. The following are examples of CD services provided in this AA:

- Bank employees provided 61 homebuyer education seminars benefiting 265 low- and moderateincome customers.
- Bank employees provided more than 1148 hours of first-time homebuyer educational service to lowand moderate-income customers as a voluntary option during the homebuying process from thirdparty organizations.

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall High Satisfactory Service Test rating and had a marginally negative affect on the initial overall conclusions based on the AAs receiving full-scope review. Based on limited-scope reviews, the bank's performance under the Service Test in the Abilene MSA, Brownsville-Harlingen MSA, El Paso MSA, and TX Non-Metro AAs is stronger than the bank's overall performance under the Service Test in the full-scope areas due to
stronger branch distribution in low- and moderate-income geographies. The bank's performance under the Service Test in the Amarillo MSA, Beaumont-Port Arthur MSA, College Station-Bryan MSA, Killeen-Temple MSA, Laredo MSA, Longview MSA, Lubbock MSA, McAllen-Edinburg-Mission MSA, Midland MSA, Odessa MSA, San Antonio-New Braunfels MSA, Tyler MSA, Waco MSA, and Wichita Falls MSA is weaker than the bank's overall performance under the Service Test in the fullscope area due to weaker branch distribution in low- and moderate-income geographies.

## State Rating

## State of Utah

CRA rating for the State of Utah ${ }^{\mathbf{2 6} \text { : Outstanding }}$
The Lending Test is rated: Outstanding
The Investment Test is rated: High Satisfactory
The Service Test is rated: Outstanding
The major factors that support this rating include:

- An excellent level of lending activity.
- An excellent geographic distribution of home mortgage loans and small loans to businesses.
- A good borrower distribution of home mortgage loans and small loans to businesses.
- A relatively high level of CD loans, which positively affected the rating.
- The extensive use of innovative/flexible products, which positively affected the rating.
- A good level of qualified investments that demonstrated excellent responsiveness to community economic development needs.
- The extensive use of complex investments.
- Retail service delivery systems that are readily available to geographies and individuals of different income levels.
- Leadership in providing CD services that are responsive to AA needs.

## Description of Institution's Operations in Utah

The state of Utah is Chase's 13th rating area based on its total deposits of $\$ 13.3$ billion, representing 1.0 percent of the bank's total deposits. As of December 31, 2019, the bank operated 49 branches and 92 deposit-taking ATMs within the rating area, representing 0.9 percent of total branches and 0.5 percent of total ATMs. The bank has delineated four AAs in the state of Utah. The bank originated and purchased approximately $\$ 7.6$ billion in loans or 1.1 percent of total bank loan originations and purchases during the evaluation period in the state.

According to FDIC Deposit Market Share Data as of June 30, 2019, there were 51 banks operating 512 branches in the state of Utah. The bank maintained 49 offices with deposits of $\$ 13.2$ billion, ranking it 9th in deposit market share in the state with 2.3 percent. Major competitors in the state include Ally Bank with 20.5 percent market share. Morgan Stanley with 19.6 percent market share, and American Express National Bank with 12.58 percent market share.

The bank delineated four AAs in the state of Utah. The Salt Lake City-Provo-Orem, UT CSA (Salt Lake City CSA), which accounts for 95.1 percent of deposits in the state of Utah, received a full-scope review. The St. George MSA, Logan MSA, and UT Non-Metro AA received limited-scope reviews. The delineated AAs are described in appendix A.

The Salt Lake City CSA consists of the Salt Lake City MSA, Provo-Orem MSA and Ogden-Clearfield MSA. The bank defines the AA as the entire Salt Lake City MSA, Utah County in the Provo-Orem MSA, and Davis and Weber counties in the Ogden-Clearfield MSA.

The following table provides a summary of the demographics that includes housing and business information for the Salt Lake City CSA. Table A indicates that the volume of OOUs is small in lowincome census tracts ( 1.3 percent) and over 21.7 percent of families in the AA are low-income. The Salt Lake City CSA's higher cost of housing also limits access to affordable homeownership among LMI borrowers. The median housing value in the Salt Lake City CSA is 3.3 times the averaged median income, 4.1 times the moderate-income, and 6.6 times the low-income, indicating a large proportion of OOUs are unaffordable to most low-income and many moderate-income borrowers. One simplistic method used to determine housing affordability assumes a maximum monthly principal and interest payment of no more than 36 percent of the applicant's income.

In the Salt Lake City CSA, assuming a 30-year mortgage with a 5.0 percent interest rate, 3.0 down payment, and not accounting for homeowners insurance, real estate taxes, or any additional monthly expenses, a low-income borrower making $\$ 35,140$ per year (or less than 50 percent of the FFIEC adjusted median family income in the MSA) could afford a $\$ 116,256$ mortgage with a payment of $\$ 1,054$ per month; a moderate-income borrower earning $\$ 56,224$ per year (or less than 80 percent of the FFIEC adjusted median family income in the AA) could afford a $\$ 216,757$ mortgage with a payment of $\$ 1,687$ per month.

Median rents and the significant percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

## Economic Data

According to the Moody's Analytics November 2019 report, Salt Lake City has a strong economy and a strong quality of life. Strengths include sturdy house price appreciation, lots of high-wage jobs in tech and other knowledge-based industries, below-average business costs, business-friendly climate, welleducated workforce, and a high concentration of prime-age adults. However, it is limited in the availability of office space and exposure to federal fiscal policy. Since the Great Recession the state has maintained balanced budgets by avoiding an overhaul of its tax and spending policies, while expanding services and employment. An educated workforce has been key to fueling growth in knowledge-based industries. The metro area's population growth was more than double the country's in 2018 and will continue to impress as robust job additions and reasonable costs relative to the rest of the West attract residents from elsewhere. More educated workers with high wages will power gains in retail and leisure spending while spurring faster household formation, which in turn benefits the housing market.

Economic drivers include finance, high tech, and state capital. Major employment sectors include professional and business services. government. education and health services and retail trade. In addition to federal, state, and local government, major employers in the University of Utah, Intermountain Health Care Inc., Walmart, Delta Airlines and Smith's Food \& Drug.

## Community Contacts

Two community contacts completed during the examination period were reviewed to gain an understanding of the needs in the community. Contacts were completed with organizations focused on affordable housing, community services and economic development. Contacts noted there is a housing shortage in Salt Lake County, specifically in multi-family housing and affordable housing. Middle and upper-income Utahans are faring better that low- and moderate-income constituents after the great recession. Low-income populations have not benefitted from the economic recovery in the same way as affluent populations. The technology industry is causing rents to increase and become unaffordable to low-income populations. There is a growing homeless population as social service programs dwindle, and the resources available to assist the homeless continue to disappear. Student loan debt is impacting housing affordability and exacerbated by increased rental prices adding to the homeless situation. Predatory lending is a challenge. Nonprofit program and infrastructure support, such as IT and marketing are critical. Some nonprofits had to cease operations due to lack of funding and support. Other needs mentioned for the area include:

- Workforce housing
- Small dollar loans
- Need more micro-loans for small business
- Affordable rental housing
- Technical assistance for small businesses
- Community services for the large refugee population
- Support for financial education
- First time homebuyer counseling
- Down payment assistance

## Scope of Evaluation in Utah

The rating for the state of Utah is based on an evaluation of the bank's performance in all AAs as listed in appendix A. The Salt Lake City CSA accounts for 95.1 percent of deposits in the state of Utah and received a full-scope review. The remaining three AAs in the state of Utah received limited-scope reviews. Performance in limited-scope AAs and its effect on the CRA rating are discussed at the end of each test.

## CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN UTAH

## LENDING TEST

The bank's performance under the Lending Test in the state of Utah is rated Outstanding.
Performance in AAs receiving limited-scope reviews was factored together with performance from AAs receiving full-scope reviews to determine the state's overall Outstanding Lending Test rating. Limitedscope conclusions did not significantly affect the initial overall conclusions based on the AAs receiving full-scope review.

## Conclusions for Areas Receiving a Full-Scope Review

Based on a full-scope review, the bank's performance in the Salt Lake City CSA is excellent. Overall excellent lending levels, excellent geographic distribution of loans, offset weaker but good borrower distribution. A relatively high level of CD lending and product innovation and flexibility was considered favorably when determining the rating.

## Lending Activity

Lending levels reflect excellent responsiveness to AA credit needs.
Examiners considered the number and amount of home mortgage, small business, and small farm loans originated or purchased relative to Chase's capacity based on deposits, competition, and market presence. Lending activity for home mortgage and small loans to businesses received the most weight in reaching conclusions. Respectively, home mortgage lending and small loans to businesses account for 31.8 percent and 67.7 percent of the loan volume in the state by number and 83.8 and 14.2 percent of loan volume by dollar. Small farm lending is not a strategic focus of the bank and received minimal
weight in reaching conclusions. Farm loans represented 0.43 percent of the loan volume in the state by number and 0.05 percent loan volume by dollar.

| Number of Loans* |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

*Due to rounding, totals may not equal $100.0 \%$. The tables present the data for all assessment areas. The narrative below addresses performance in fullscope areas only.

Chase ranked 59th in deposits with 0.3 percent market share.
In overall home mortgage lending, Chase ranked seventh out of 438 lenders with a 3.1 percent market share. Other lenders in the market include America First (9.3 percent), Wells Fargo Bank, N.A. (7.1 percent), and Mountain America (5.8 percent).

In small loans to businesses, Chase ranked second out of 138 lenders with 17.7 percent market share. Other major lenders are American Express National Bank (26.6 percent), Citibank, N.A. (10.0 percent), and Wells Fargo Bank, N.A. (9.9 percent),

In small loans to farms, Chase ranked first out of 18 lenders with a 29.6 percent market share. The other major lenders and respective market shares are Wells Fargo Bank, N.A. ( 22.8 percent), Zions Bank, N.A. (12.2 percent), and People's InterMountain Bank, N.A. (8.5 percent).

## Distribution of Loans by Income Level of the Geography

The bank exhibits excellent geographic distribution of loans in its AA.

## Home Mortgage Loans

Refer to Table O in the state of Utah section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is excellent. The following information was taken into consideration when determining this rating.

- Examiners considered the limited proportion of housing units in low-income geographies, particularly OOUs (1.3 percent), which constrained lending opportunities.
- The high level of competition in the AA was also considered and examiners placed greater significance on performance compared to the aggregate of lenders.
- Between 2017 and 2019, the proportion of loans in low-income areas exceeded the percentage of owner-occupied units and aggregate distribution of loans. In moderate-income areas the proportion of loans was near to the percentage of owner-occupied units and aggregate distribution of loans.
- During 2014 through 2016, performance in low-income geographies exceeded the percentage of owner-occupied units and aggregate distribution of loans, while performance in moderate-income geographies was below the percentage of owner-occupied units and the aggregate distribution of loans.

## Small Loans to Businesses

Refer to Table Q in the state of Utah section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of small loans to businesses for this evaluation is good. The following information was taken into consideration when determining this rating.

- Examiners considered the small proportion of businesses in low-income geographies (3.9 percent) and competition between 438 lenders constrained lending opportunities to existing businesses.
- Performance against the aggregate distribution of lenders was given additional consideration as it reflects the difficulties all lenders are experiencing due to the economic constraints discussed above under the Description of the Full-Scope AA. The economic data particularly indicates the high cost of doing business and limited labor force as challenges for businesses.
- Between 2017 and 2019, the proportion of small loans to businesses in low-income geographies exceeded both the proportion of businesses and the aggregate distribution, while the proportion of small loans to businesses in moderate-income geographies was below both the proportion of businesses and the aggregate distribution.
- During 2014 to 2016, the proportion of small loans to businesses in low-income geographies exceeded both the proportion of businesses and the aggregate distribution, while the proportion of small loans to businesses in moderate-income geographies was near to both the proportion of businesses and the aggregate distribution.

## Small Loans to Farms

Refer to Table S in the state of Utah section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to farms.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of small loans to farms is adequate. The following information was taken into consideration when determining this rating.

- The limited number of farms in low-income geographies, (2.4 percent), constrained lending opportunities; therefore, performance in moderate-income geographies was given slightly more consideration due to the higher number of farms in those geographies.
- The fact that farm lending is not a focus of the bank was also considered.
- Between 2017 and 2019, the bank made no loans to small farms in low-income geographies. The proportion of loans to small farms in moderate-income geographies was well below both the proportion of farms in those geographies and the aggregate distribution of all lenders.
- During 2014 to 2016, the bank made no loans to small farms in low-income geographies. The proportion of loans to small farms in moderate-income geographies exceeded both the proportion of farms in those geographies and the aggregate distribution for the respective geographies.

## Lending Gap Analysis

A review of home mortgage loans, small loans to business, and small loans to farms including summary reports and AA maps did not identify any unexplained conspicuous lending gaps in the bank's activities.

## Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and business of different sizes.

## Home Mortgage Loans

Refer to Table P in the state of Utah section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases.

Based on the data in the tables and the following considerations, the bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good. The following information was taken into consideration when determining this rating.

- Greater significance was placed on performance against the aggregate distribution as it reflects the difficulties all lenders are experiencing due to competition and the economic constraints discussed above under the Description of this Full-Scope AA.
- Examiners particularly considered housing affordability challenges for low- and moderate-income borrowers.
- Between 2017 and 2019, the proportion of loans to low-income borrowers was well below the percentage of low-income families and near to the aggregate distribution of lenders. The proportion of moderate-income loans exceeded the proportion of moderate-income families and the aggregate distribution.
- During 2014 to 2016 the bank's performance was generally consistent with performance between 2017 to 2019. The proportion of loans to low-income borrowers was well below the percentage of low-income families and exceeded the aggregate distribution of lenders. The proportion of moderate-income loans exceeded the proportion of moderate-income families and was below the aggregate distribution.

## Small Loans to Businesses

Refer to Table R in the state of Utah section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses.

Based on the data in the tables and the following factors, the distribution of the bank's originations and purchases of small loans to businesses by revenue category is good. The following information was taken into consideration when determining this rating.

- Greater significance was placed on performance against the aggregate distribution of lenders as it reflects the difficulties all lenders are experiencing due to competition and the economic constraints discussed above under the Description of the Full-Scope AA.
- Between 2017 and 2019, the bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.
- During 2014 to 2016, the bank's performance was consistent with performance between 2017 and 2019. The bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.

## Small Loans to Farms

Refer to Table T in the state of Utah section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to farms.

Based on the data in the table and the following considerations, the distribution of the bank's originations and purchases of small loans to farms by revenue category is good. The following information was taken into consideration when determining this rating.

- Greater significance was placed on performance against the aggregate distribution of lenders as it reflects the difficulties all lenders are experiencing due to the economic constraints discussed above under the Description of the Full-Scope AA.
- The fact that farm lending is not a focus of the bank was considered.
- Between 2017 and 2019, the bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was near to the percentage of businesses and exceeded the aggregate distribution.
- During 2014 to 2016, the bank's percentage of loans to businesses with revenues of $\$ 1$ million or less below the percentage of businesses and exceeded the aggregate distribution.

## Community Development Lending

The bank has made a relatively high level of CD loans.
The Lending Activity Tables, shown above, set forth the information and data used to evaluate the bank's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The bank made 16 CD loans totaling $\$ 145.3$ million. This represents 8.9 percent of the tier 1 capital allocated to the AA. Most of the CD loans ( 73 percent) were for affordable housing purposes, which is a critical need in this AA.

Examples of CD loans in the AA include:

- The bank originated a $\$ 15.3$ million construction loan for the acquisition and development of affordable housing in a moderate-income census tract in Salt Lake City. The project is Phase I of a four phase development and will contain 118 units of housing. Eighty-four units in the project are affordable to families with incomes of 50 percent or less of the moderate-income and 34 units will be market rate. Of the 118 units, 10 units are set aside for veterans, five units will be set aside for previously homeless individuals, nine units are designed for occupancy by handicapped individuals, and two units are set aside for large families. The project has also entered a memorandum of understanding with the local Public Housing Authority to accept qualified Section 8 tenants.
- The bank originated a $\$ 16.1$ million construction loan for affordable housing in Salt Lake City. Located in a moderate-income census tract, the project will comprise 126 units of affordable housing and 37 units at market rates. This financing funds Phase 2 of a 4 Phase project. Of the 126 units, 11 are set aside for veterans and five units will be set aside for previously homeless individuals. The project has also entered a memorandum of understanding with the local Public Housing Authority to accept qualified Section 8 tenants.
- The bank originated a $\$ 12.0$ million construction loan to purchase bonds for the construction of affordable housing in Salt Lake City. The project is located in a moderate-income census tract and is comprised of 134 units. The development will have 120 units restricted for low- and moderateincome individuals, with 10 units set aside for veterans, 13 units set aside for large families, and seven units that are Type A Wheelchair Accessible Units. The project has also entered a memorandum of understanding with the local Public Housing Authority to accept qualified Section 8 tenants.

## Product Innovation and Flexibility

The bank makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. A total of 4,535 loans were funded totaling $\$ 1$ billion. Refer to the comments in the Product

Innovation and Flexibility section of this performance evaluation for additional details regarding the programs.

| Loan Type | Number of <br> Loans | Dollar Amount <br> $\mathbf{( \$ 0 0 0 ' s )}$ |
| :--- | :---: | :---: |
| DreaMaker | 896 | 216,493 |
| FHA | 998 | 193,829 |
| HARP | 1,187 | 220,434 |
| VA | 511 | 139,578 |
| SBA | 592 | 88,169 |
| USDA | 351 | 176,793 |

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall Outstanding Lending Test rating and did not significantly affect the initial overall conclusions based on the AAs receiving fullscope review. Based on limited-scope reviews, the bank's performance under the Lending Test in the St. George MSA, Logan MSA, and UT Non-Metro AA is weaker than the bank's overall performance under the Lending Test in the full-scope area. Performance is weaker primarily due to weaker geographic and borrower income distributions and the lack of CD lending. The limited-scope AAs represent less than five percent of the state's deposits.

Refer to Tables O through T in the state of Utah section of appendix D for the facts and data that support these conclusions.

## INVESTMENT TEST

The bank's performance under the Investment Test in state of Utah is rated High Satisfactory.

## Conclusions for Area Receiving a Full-Scope Review

Based on a full-scope review, the bank's performance in the Salt Lake City CSA is good.

The bank has a good level of qualified CD investments and grants, but not in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 4.0 percent of tier 1 capital allocated to the AA. A significant majority or 90 percent are current period investments

The bank exhibits excellent responsiveness to credit and community economic development needs identified in the AA, including affordable housing, community services, and revitalization/stabilization for low- and moderate-income individuals and geographies. Eight CD investments total $\$ 57.9$ million with 83.5 percent, 11.4 percent, and 5.15 percent focusing on affordable housing, community services, and revitalization/stabilization. Eleven grants total $\$ 515,000$ with 53.4 percent supporting community services, 29.1 percent supporting economic development, 9.7 percent affordable housing, and 7.8 percent revitalization/stabilization.

The bank makes significant use of complex investments to support CD initiatives. Six complex current period CD investments and grants totaling $\$ 27.1$ million or 46 percent of total current period investments consist primarily of single investor fund/Direct Investor LIHTC and NMTC transactions.

Seven prior period CD investments totaling $\$ 6.3$ million or 97 percent of prior period investments consist of single investor fund/Direct Investor LIHTC transactions. Four CD investments and grants serve as catalyst investments that encourage future growth, improvements, or community revitalization/stabilization.

Examples of community development investments in the AA include:

- The bank originated a $\$ 3.3$ million NMTC equity investment for the facility to serve patients seeking cancer treatment services and support in Salt Lake City. This investment serves the needs of adult patients seeking cancer treatment services. The facility has 42 patient suites to serve 800 adult patients annually at no cost along with access to other cancer support services for patients requiring lifesaving, medically prescribed treatment and financial resources, legal aid, food assistance, and clinical trials. The facility is comprehensive resource for heavily burdened patients in an increasingly complex healthcare delivery system.
- The bank invested $\$ 30.0$ million in Freddie Mac Multifamily ML Certificates Series ML-05 Bonds. Proceeds of the bonds were used for the acquisition of two multifamily housing properties located in Salt Lake County. The properties consisted of a total of 408 units, of which 400 are affordable to those earning less than 80 percent AMI.
- The bank originated a $\$ 10.8$ million LIHTC investment. The property consists of 105 one- and twobedroom units for seniors at a variety of income levels with the majority ranging from 25 percent AMI to 50 percent AMI. Services were provided at no charge to the tenants and were facilitated by Utah Independent Living Center, Department of Veterans Affairs, or the Road Home.

| Qualified Investments - State of Utah |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

## Statewide Investments in the State of Utah

The bank has 19 current and prior period CD investments and grants with and without a purpose, mandate, or function to serve AAs in the broader statewide area. Fifty percent supports affordable housing and 50 percent supports community services. These statewide investments further support the bank's overall good performance under the Investment Test in the state of Utah.

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall High Satisfactory Investment Test rating and did not significantly change the initial overall conclusions based on the AAs receiving full-scope review. Based on limited-scope reviews, the bank's performance under the Investment Test in the Logan MSA, St. George MSA, and UT Non-Metro AA is weaker the bank's overall performance under the Investment Test in the full-scope area. Performance is weaker due to a lower level of investments in each of the three AAs in relations to tier one capital.

## SERVICE TEST

The bank's performance under the Service Test in state of Utah is rated Outstanding.

## Conclusions for Area Receiving a Full-Scope Review

Based on a full-scope review, the bank's performance in the Salt Lake City CSA is excellent.

## Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the bank's AA. Based on the data in the table below, the branch distribution in low- and moderateincome geographies exceeds the percentage of the population in these respective geographies.

| Distribution of Branch Delivery System |  |  |  |  |  |  |  | As of December 31, 2019 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\begin{gathered} \text { Assessment } \\ \text { Area } \end{gathered}$ | Deposits | Branches |  |  |  |  |  | Population |  |  |  |
|  | \% of Rated | \# of <br> BANK <br> Branches | \% of <br> Rated <br> Area <br> Branches <br> in $\mathbf{A A}$ | Location of Branches by Income of Geographies (\%) |  |  |  | \% of Population within Each Geography |  |  |  |
|  | Deposits in AA |  |  | Low | Mod | Mid | Upp | Low | Mod | Mid | Upp |
| Salt Lake City-ProvoOrem CSA | 95.1 | 40 | 81.6 | 10.0 | 30.0 | 32.5 | 27.5 | 3.8 | 20.2 | 46.1 | 29.5 |

* May not add up to 100 percent due to geographies with unknown tract income level and rounding

Alternative delivery systems enhanced the delivery of banking services to geographies and individuals of all income levels. The OCC considered the availability and use of alternative delivery systems over the evaluation period. This included review of the bank's 78 deposit-taking ATMs, online banking, mobile banking, and telephone banking to determine the effectiveness of these systems to make retail banking services available to individuals in low- and moderate-income geographies. The bank increased the deposit-taking ATMs in low- and moderate-income geographies by 61.9 percent over the prior rating period to seven ( 9.0 percent) deposit-taking ATMs in low-income geographies and 27 ( 34.6 percent) ATMs in moderate-income geographies. Additionally, bank-provided data on use of online, mobile, and telephone banking showed increases in the adoption of these services by low- and moderate-income individuals from the prior rating period.

| Distribution of Branch Openings/Closings |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | \# of Branch Openings | \# of Branch Closings | Net change in Location of Branches (+ or -) |  |  |  |
|  |  |  | Low | Mod | Mid | Upp |
| Salt Lake City-Provo-Orem CSA | 2 | 14 | 0 | -2 | -8 | -2 |

The bank's opening and closing of branches has not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and/or to low- and moderate-income individuals. The bank did not open or close any branches in the low-income geographies and closed two branches in moderate-income geographies. Branch closures were due to poor location and reduced customer usage. Despite the branch closures, branch locations remained accessible to geographies and individuals of different income levels in the bank's AA.

Services, including where appropriate, business hours, do not vary in a way that inconveniences, its AA, particularly moderate-income geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 6:00 pm and Saturday from 9:00 am to 2:00 pm. All retail banking services are available at all branches within the low- and moderate-income geographies.

## Community Development Services

The bank was a leader in providing CD services that are responsive to AA needs.
Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 477 qualified CD service activities to 27 organizations since the last evaluation, logging a total of 1,612 hours. All the bank's assistance was to organizations that provide community services to low- and moderate-income individuals and families. The bank's community development services were very responsive to the community needs in the AA, particularly affordable housing. The following are examples of CD services provided:

- The bank provided financial incentives to 112 low- and moderate-income homebuyers to take homebuyer education from third-party organizations.
- Five bank employees provided financial literacy seminar/webinar training to low- and moderateincome participants by providing the material and options for residents to reach the goal of homeownership. To date these seminars has helped more than 4000 families in over 125 Utah communities become homeowners.

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall Outstanding Service Test rating and did not significantly change the initial overall conclusions based on the AA receiving a fullscope review. Based on limited-scope reviews, the bank's performance under the Service Test in the UT Non-Metro AA is consistent with the bank's overall performance under the Service Test in the fullscope area. The bank's performance in the Logan MSA and St. George MSA is weaker than the bank's overall performance in the full-scope area due to weaker branch distribution in low- and moderateincome geographies.

## State Rating

## State of Washington

CRA rating for the State of Washington ${ }^{27}$ : Outstanding
The Lending Test is rated: Outstanding
The Investment Test is rated: Outstanding
The Service Test is rated: Outstanding
The major factors that support this rating include:

- A good level of lending activity.
- Good geographic distribution of home mortgage loans and small loans to businesses.
- Good borrower distribution of home mortgage loans and small loans to businesses.
- Leadership in making CD loans in the Seattle-Tacoma CSA, which had a significantly positive affect on the rating.
- The extensive use of innovative/flexible products, which positively affected the rating.
- An excellent level of qualified CD investments that displayed excellent responsiveness to credit and community economic development needs.
- The extensive use of innovative and/or complex qualified investments.
- Retail service delivery systems that are accessible to geographies and individuals of different income levels.
- A significant level of CD services that were responsive to AA needs.

## Description of Institution's Operations in Washington

The state of Washington is Chase's 8th largest rating area based on aggregate deposits of $\$ 32.4$ billion, representing 2.5 percent of the bank's total deposits. As of December 31, 2019, the bank operated 182 branches and 320 deposit-taking ATMs within the rating area, representing 3.7 percent of total branches and 1.9 percent of total ATMs. The bank originated and purchased approximately $\$ 26.4$ billion in loans or 3.8 percent of total bank loan originations and purchases during the evaluation period in the state.

According to FDIC Deposit Market Share Data, as of June 30, 2019, there were 77 banks operating 1,670 branches in the state of Washington. Chase ranks $3^{\text {rd }}$ in deposit market share with 11.6 percent. Major competitors in the state based on deposit market share include Bank of America, N.A. (20.8 percent), Wells Fargo Bank, N.A. (11.6 percent), and U.S. Bank, N.A. (9.9 percent).

The bank delineated seven AAs in the state of Washington. The Seattle-Tacoma CSA (Seattle CSA) and the Spokane-Spokane Valley MSA (Spokane MSA), which combined account for 95.2 percent of the deposits and 88.0 percent of lending, received full-scope reviews. The Bellingham MSA, Kennewick-Richland-Walla Walla CSA, Wenatchee MSA, Yakima MSA, and WA Non-Metro AA received limited-scope reviews. Refer to appendix A for a complete description of each AA.

## Seattle CSA

The bank defines its AA as the entire Seattle CSA. According to FDIC Deposit Market Share Data as of June 30, 2019, the bank-maintained $\$ 15.5$ billion in deposits in the AA, ranking $3^{\text {rd }}$ in deposit market share with 12.4 percent. As of December 31, 2019, the bank operated 159 branches and 294 deposittaking ATMs in the area, accounting for 3.2 percent of bank branches and 1.8 percent of bank deposittaking ATMs.

The following table provides a summary of the demographics that includes housing and business information for the Seattle CSA. Table A indicates that the volume of OOUs is small in low-income census tracts ( 2.2 percent) and over 20.8 percent of families in the AA are low-income. The Seattle CSA's high cost of housing also limits access to affordable homeownership among LMI borrowers. The median housing value across the Seattle CSA ranges from four to six times the median income, over five times the moderate-income, and more than seven times the low-income, indicating a limited proportion of OOUs are affordable to low- and moderate-income borrowers. One simplistic method used to determine housing affordability assumes a maximum monthly principal and interest payment of no more than 30 percent of the applicant's income.

In the Seattle CSA, assuming a 30-year mortgage with a five percent interest rate, three percent down payment, homeowners insurance, real estate taxes, and not accounting for any additional monthly expenses, a low-income borrower making $\$ 37,210$ per year (or less than 50 percent of the FFIEC adjusted median family income in the CSA) could afford a $\$ 126,094$ mortgage with a payment of $\$ 1,116$ per month; a moderate-income borrower earning $\$ 59,536$ per year (or less than 80 percent of the FFIEC adjusted median family income in the AA) could afford a $\$ 232,545$ mortgage with a payment of $\$ 1,786$ per month.

Median rents and the percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

| Table A - Demographic Information of the Assessment Area |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## Economic Data

According to Moody's Analytics November 2019 Report, the Seattle area economy is strong. The area has a highly trained and well-educated workforce; a relatively high per capita income; and is a global center for cloud computing and software development. Job and labor force gains have accelerated over the past year, and residential and commercial construction is firming after a hiccup late last year. Technology is a major economic driver with companies such as Amazon and Microsoft continuing their expansion in the area. Amazon's workforce has grown by almost 25 percent in the 2 years since the completion of its South Lake Union campus. Google has also opened new offices in the area which will increase the competition for top technology talent. Boeing, which is the largest employer in the area, has experienced some troubles related to safety issues with its 737 Max Jet. Other major employers in the area include Amazon, Microsoft, and the University of Washington. Housing affordability is an issue in the area, and although house price appreciation is no longer outpacing incomes, two years of double-digit gains have eroded potential buyers' purchasing power. Declining affordability and slower growth in mid-paying jobs pose a risk to the outlook for homebuilding. Although housing affordability is about even with the national average, broad measures of affordability belie a skewed income distribution that has grown more so with the shift in Seattle's industrial base from manufacturing to information technology.

## Community Contacts

Six community contacts completed during the examination period were reviewed to gain an understanding of the needs in the community. Contacts were completed with organizations focused on affordable housing, economic development, and community services. Contacts noted that there is a severe affordable housing shortage in the area. Low- and moderate-income residents are being pushed further away from Seattle into communities that do not provide access to the transportation, employment, or services they need. Residents with Section 8 (Housing Choice) vouchers have difficulty finding landlords willing to rent to them; while residents with disabilities are paying so much for rent, they cannot afford needed assistance devices like hearing aids. Many neighborhoods have either already
gentrified or are gentrifying and for every affordable housing project that comes online, there are hundreds of individuals and households on the waiting list. Property taxes are rising in the area, which is bringing financial pressure to senior and low-and moderate-income homeowners. The Hispanic population is growing in the more rural parts of the AA. The disparity between rural and urban communities within the AA is growing in terms of costs, access to affordable housing stock, and access to services. Contacts identified a number of needs in the area including:

- Affordable housing for low- and moderate-income residents
- Home modifications for aging baby boomers
- Greater access to banking services in the rural portions of the AA
- Greater broadband access in rural communities
- Financial education and counseling, particularly for youth, and second chance checking accounts
- Home evictions and property taxes are rising
- Micro-loans for small businesses
- Debt financing for affordable housing developers
- Funding support for CDFIs and Nonprofits
- Rural broadband

Contacts noted that there are multiple opportunities available in the area for banks serving the community including general community development support; small business lending and technical assistance; asset development; and providing low-cost financial services.

## Spokane MSA

The bank defines its AA as the entire Spokane MSA. According to FDIC Deposit Market Share Data as of June 30, 2019, the bank maintained nearly $\$ 740.0$ million in deposits in the AA, ranking $5^{\text {th }}$ in deposit market share with 8.1 percent. As of December 31, 2019, the bank operated 12 branches and 17 deposittaking ATMs in the AA, representing 0.2 percent of total bank branches and 0.1 percent of total bank ATMs.

The following table provides a summary of the demographics that includes housing and business information for the Spokane MSA. Table A indicates that the volume of OOUs is small in low-income census tracts ( 0.1 percent) and over 24.4 percent of families in the AA are low-income. The Spokane MSA's cost of housing also limits access to affordable homeownership among low-income borrowers. The median housing value in the Spokane MSA is three times the median income, over five times the moderate-income, and more than seven times the low-income, indicating a limited proportion of OOUs are affordable to low- and moderate-income borrowers. One simplistic method used to determine housing affordability assumes a maximum monthly principal and interest payment of no more than 30 percent of the applicant's income.

In the Spokane MSA, assuming a 30-year mortgage with a five percent interest rate, three percent down payment, homeowners insurance, real estate taxes, and not accounting for any additional monthly expenses, a low-income borrower making $\$ 31,032$ per year (or less than 50 percent of the FFIEC adjusted median family income in the CSA) could afford a $\$ 147,921$ mortgage with a payment of $\$ 931$ per month; a moderate-income borrower earning $\$ 49,651$ per year (or less than 80 percent of the FFIEC adjusted median family income in the AA) could afford a $\$ 236,639$ mortgage with a payment of $\$ 1,489$ per month.

Median rents and the percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

## Economic Data

According to Moody's Analytics November 2019 Report, the Spokane area economy is stable. The area's strengths include stability from a large healthcare industry; a large student population that supports consumer industries; low cost of doing business; positive net-migration; and high industrial diversity. Healthcare will remain a key driver of job growth in the medium term and will add more than a quarter of all net new jobs over the next decade. Demand for medical care will be driven by an aging population. The area is home to Fairchild Airforce Base, which is the largest employer in the area and where recent expansion has led to an increase in construction hiring. The expansion of the Fairchild Air Force Base will support a broad array of industries in Spokane through 2021. Department of Defense expenditures in the area rose dramatically over fiscal 2019, which saw more than $\$ 100.0$ million spent on various construction services and supplies for new buildings and renovations at Fairchild AFB. The new federal spending will be spread between on-base facilities and off-base single-family housing for the 1,000 new airmen and family members who are arriving now. The unemployment rate in the area has risen, but only because the labor force is growing. In addition to Fairchild Airforce Base, other major employers in the area include Providence Healthcare - Eastern Washington; Northern Quest Resort Casino; and URM Stores. In addition, the area is the location of several colleges and universities including Eastern Washington University: Community Colleges of Spokane and Gonzaga University. Housing affordability has ticked up on the back of solid income growth.

## Community Contacts

Community contacts completed during the examination period were reviewed to gain an understanding of the needs in the community. Contacts were completed with organizations focused on affordable housing, economic development, and community services. Contacts noted that high poverty rates as well as high levels of unemployment and under employment were a concern, particularly in some neighborhoods in the northeast section of Spokane. This area also is lacking in available services to assist low-income individuals. The area has a growing refugee population that needs services and support. Contacts noted that the homeless population is growing and there is a need for services to assist this group. Vacant and abandoned properties are still a problem, particularly in the northeast part of the city. Other identified needs include:

- Focus on homeownership for low- and moderate-income individuals
- Micro-loans for entrepreneurs
- Workforce development training to provide greater access to living wage jobs
- Unrestricted grant dollars for nonprofit organizations
- Long term investments in financial literacy programs

Contacts indicated that opportunities are available for banks to support the needs in the community including general community development; affordable housing; workforce development; small business development; and asset development.

## Scope of Evaluation in Washington

The Seattle CSA and Spokane MSA received full-scope reviews. The Seattle CSA and Spokane MSA combined account for 95.2 percent of the bank's deposits and 88.0 percent of lending in the state. More weight was placed on performance in the Seattle CSA based on the bank's higher level of deposits and lending. The remaining AAs in the state of Washington received a limited-scope reviews. Performance in limited-scope AAs and its effect on the CRA rating are discussed at the end of each test.

## CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN WASHINGTON

## LENDING TEST

The bank's performance under the Lending Test in Washington is rated Outstanding.
Performance in AAs receiving limited-scope reviews was factored together with performance from AAs receiving full-scope reviews to determine the state's overall Outstanding Lending Test rating. Limitedscope conclusions did not significantly affect the initial overall conclusions based on the AAs receiving full-scope review.

## Conclusions for Areas Receiving Full-Scope Reviews

Based on full-scope reviews, the bank's performance in the Seattle CSA and the Spokane MSA is excellent. Strong CD lending had a significantly positive effect on the overall good lending levels and good geographic and borrower distribution of loans. Product innovation and flexibility was considered favorably.

## Lending Activity

Lending levels reflect a good responsiveness to the credit needs in the bank's AAs.
Examiners considered the number and amount of home mortgage, small business, and small farm loans originated or purchased relative to Chase's capacity based on deposits, competition, and market presence. Lending activity for home mortgage and small loans to businesses received the most weight in reaching conclusions. Respectively, home mortgage lending and small loans to businesses account for 39.7 percent and 59.3 percent of the loan volume in the state by number and 90.0 and 5.5 percent of loan volume by dollar. Small farm lending is not a strategic focus of the bank and received minimal weight in reaching conclusions. Farm loans represented 0.8 percent of the loan volume in the state by number and 0.05 percent loan volume by dollar.
Lending levels reflect good responsiveness to AA credit needs.

*Due to rounding, totals may not equal $100.0 \%$. The tables present the data for all assessment areas. The narrative below addresses performance in fullscope areas only.

## Seattle CSA

As of June 30, 2019, Chase ranked third in deposits out of 57 institutions with 12.6 percent market share.

In overall home mortgage lending, Chase ranked third out of 660 lenders with a 4.1 percent market share. The two lenders ranked first and second in the market are respectively Boeing Employees Credit Union ( 9.15 percent) and Wells Fargo ( 7.7 percent).

In small loans to businesses, Chase ranked second out of 153 lenders with 15.6 percent market share. Other major lenders are Bank of America, N.A. (19.0 percent), and American Express National Bank (14.5 percent).

In small loans to farms, Chase ranked second out of 23 lenders with a 20.6 percent market share. The other major lenders and respective market shares are Bank of America, N.A. (26.9 percent), U.S. Bank, N.A. (15.9 percent), and Wells Fargo Bank, N.A. (13.4 percent).

## Spokane MSA

As of June 30, 2019, Chase ranked fifth in deposits out of 17 institutions with 8.9 percent market share.
In overall home mortgage lending, Chase ranked tenth out of 390 lenders with a 2.4 percent market share. Other lenders are Spokane Teachers ( 8.8 percent), Numerica Credit Union (5.8) percent), and Wells Fargo Bank, N.A. (5.6 percent).

In small loans to businesses, Chase ranked first out of 69 lenders with 15.6 percent market share. Other major lenders are Citibank, N.A. (11.8 percent), American Express National Bank (11.6 percent), U.S. Bank, N.A. (10.7 percent), and Bank of America, N.A. (10.3 percent).

In small loans to farms, Chase ranked second out of 13 lenders with a 15.0 percent market share. The other major lenders and respective market shares are Wells Fargo Bank, N.A. (17.4 percent), U.S. Bank, N.A. (14.6 percent), and John Deere Financial, F.S.B. (12.7).

## Distribution of Loans by Income Level of the Geography

The bank exhibits good geographic distribution of loans in its AAs.

## Home Mortgage Loans

Refer to Table O in the state of Washington section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of home mortgage loan originations and purchases is good. The following information was taken into consideration when determining this rating.

## Seattle CSA

- In determining overall performance, examiners considered the limited proportion of OOUs (2.2 percent) in low-income areas and overall level of competition.
- Between 2017 and 2019, the proportion of loans in low-income areas met the percentage of owneroccupied units and was near to the aggregate distribution of loans. The proportion of loans in
moderate-income areas was near to the percentage of owner-occupied units and was below the aggregate distribution of loans.
- Inconsistent and weaker performance in low- and moderate-income geographies between the 2014 and 2016 time periods affected overall conclusions. The proportion of loans in low-income areas was near to the percentage of owner-occupied units and below the aggregate distribution of loans. The proportion of loans in moderate-income areas was below both the percentage of owner-occupied units and the aggregate distribution of loans.

## Spokane MSA

- Examiners considered the limited proportion of low-income geographies ( 0.9 percent) and volume of OOUs ( 0.6 percent), which constrained lending opportunities.
- Between 2017 and 2019, the proportion of loans in low-income areas exceeded the percentage of owner-occupied units and was well below the aggregate distribution of loans. The proportion of loans in moderate-income areas was near to the percentage of owner-occupied units and was below the aggregate distribution of loans.
- Inconsistent and weaker performance in low-income geographies during the 2014 and 2016 time periods affected aggregated conclusions. The proportion of loans in low-income areas was below the percentage of owner-occupied units and the aggregate distribution of loans. The proportion of loans in moderate-income areas was near to both the percentage of owner-occupied units and the aggregate distribution of loans.

## Small Loans to Businesses

Refer to Table Q in the state of Washington section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of small loans to businesses for this evaluation is good. The following information was taken into consideration when determining this rating.

## Seattle CSA

- The small proportion of low-income geographies, volume of businesses in low-income geographies ( 5.1 percent), and level of competition constrained lending opportunities to existing businesses. Therefore, performance in moderate-income geographies was given slightly more consideration due to the higher percentage of businesses in those geographies.
- Performance against the aggregate distribution of lenders was given additional consideration as it reflects the difficulties all lenders are experiencing due to the economic constraints discussed above under the Description of the Full-Scope AA. The economic data particularly indicates the high cost of doing business and limited labor force as challenges for businesses.
- Between 2017 and 2019, the proportion of small loans to businesses in low-income geographies was below the proportion of businesses and well below the aggregate distribution, while the proportion
of small loans to businesses in moderate-income geographies was below the proportion of businesses and near to the aggregate distribution.
- During 2014 to 2016, the bank's performance was stronger, particularly in low-income geographies, and positively affected aggregated conclusions. The proportion of small loans to businesses in lowincome geographies was near to the proportion of businesses and exceeded the aggregate distribution, while the proportion of small loans to businesses in moderate-income geographies was below the proportion of businesses and near to the aggregate distribution.

## Spokane MSA

- The small proportion of low-income geographies, volume of businesses in low-income geographies ( 2.9 percent), and level of competition constrained lending opportunities to existing businesses. Therefore, performance in moderate-income geographies was given slightly more consideration due to the higher percentage of businesses in those geographies.
- Performance against the aggregate distribution of lenders was also given additional consideration as it reflects the difficulties all lenders are experiencing due to the economic constraints discussed above under the Description of the Full-Scope AA. The economic data particularly indicates the high cost of doing business and limited labor force as challenges for businesses.
- Between 2017 and 2019, the proportion of small loans to businesses in low- and moderate-income geographies was below the proportion of businesses and near to the aggregate distribution.
- During 2014 to 2016, the bank's performance was stronger in moderate-income geographies, and positively affected aggregated conclusions. The proportion of small loans to businesses in lowincome geographies was below the proportion of businesses and near to the aggregate distribution, while the proportion of small loans to businesses in moderate-income geographies near to the proportion of businesses and exceeded the aggregate distribution.

## Small Loans to Farms

Refer to Table S in the state of Washington section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to farms.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of small loans to farms is adequate. The following information was taken into consideration when determining this rating.

## Seattle CSA

- The limited number of farms in low-income geographies, (2.9 percent), constrained lending opportunities; therefore, performance in moderate-income geographies was given slightly more consideration due to the higher number of farms in those geographies.
- The fact that farm lending is not a focus of the bank was also considered.
- Between 2017 and 2019, the proportion of loans to small farms in low-income geographies was well below the proportion of farms in those geographies and the aggregate distribution of all lenders. The proportion of loans to small farms in moderate-income geographies was well below the proportion of farms in those geographies and below the aggregate distribution of all lenders.
- During the 2014 to 2016 period, the proportion of loans to small farms in low-income geographies exceeded both the proportion of farms in those geographies and the aggregate distribution. The proportion of loans to small farms in moderate-income geographies was well below both the proportion of farms in those geographies and the aggregate distribution.

## Spokane MSA

- The limited percentage of farms in low-income geographies, ( 0.6 percent), constrained lending opportunities; therefore, performance in moderate-income geographies was given slightly more consideration due to the higher percentage of farms in those geographies.
- The fact that farm lending is not a focus of the bank was also considered.
- Between 2017 and 2019, the bank made no small farm loans in low-income geographies. The proportion of loans to small farms in moderate-income geographies exceeded the proportion of farms and the aggregate distribution.
- During the 2014 to 2016 period, the bank made no farm loans in low- or moderate-income geographies during the period.

## Lending Gap Analysis

A review of home mortgage loans, small loans to business, and small loans to farms including summary reports and AA maps did not identify any unexplained conspicuous lending gaps in the bank's activities.

## Distribution of Loans by Income Level of the Borrower

The bank exhibits good distribution of loans among individuals of different income levels and business and farms of different sizes, given the product lines offered by the institution.

## Home Mortgage Loans

Refer to Table P in the state of Washington section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases.

Based on the data in the tables and the following considerations, the bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good. The following information was taken into consideration when determining this rating.

## Seattle CSA

- Greater significance was placed on performance against the aggregate distribution as it reflects the difficulties all lenders are experiencing due to competition and the economic constraints discussed above under the Description of the Full-Scope AA.
- Examiners particularly considered housing affordability challenges for low-income borrowers.
- Between 2017 and 2019, the proportion of loans to low-income borrowers was well below the percentage of low-income families and near to the aggregate distribution of lenders. The proportion of moderate-income loans was below the proportion of moderate-income families and near to the aggregate distribution.
- During 2014 to 2016, the bank's performance was stronger in lending to low-income borrowers than performance between 2017 to 2019. The proportion of loans to low-income borrowers was well below the percentage of low-income families and exceeded the aggregate distribution of lenders. The proportion of loans to moderate-income borrowers was below the proportion of moderateincome families and the aggregate distribution.

## Spokane MSA

- Greater significance was placed on performance against the aggregate distribution as it reflects the difficulties all lenders are experiencing due to competition and the economic constraints discussed above under the Description of the Full-Scope AA.
- Examiners particularly considered housing affordability challenges for low-income borrowers.
- Between 2017 and 2019, the proportion of loans to low-income borrowers was well below the percentage of low-income families and near to the aggregate distribution of lenders. The proportion of moderate-income loans exceeded both the proportion of moderate-income families and the aggregate distribution.
- During 2014 to 2016, the bank's performance in lending to low-income borrowers was stronger than performance between 2017 to 2019. The proportion of loans to low-income borrowers was well below the percentage of low-income families and exceeded the aggregate distribution of lenders. The proportion of loans to moderate-income borrowers exceeded both the proportion of moderateincome families and the aggregate distribution.

## Small Loans to Businesses

Refer to Table R in the state of Washington section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses.

Based on the data in the tables and the following factors, the distribution of the bank's originations and purchases of small loans to businesses by revenue category is good. The following information was taken into consideration when determining this rating.

## Seattle CSA

- Between 2017 and 2019, the bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.
- During 2014 to 2016, the bank's performance was consistent with performance between 2017 and 2019. The bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.

## Spokane MSA

- Between 2017 and 2019, the bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.
- During 2014 to 2016, the bank's performance was consistent with performance between 2017 and 2019. The bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.

## Small Loans to Farms

Refer to Table T in the state of California section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to farms.

Based on the data in the table and the following considerations, the distribution of the bank's originations and purchases of small loans to farms by revenue category is excellent. The following information was taken into consideration when determining this rating.

## Seattle CSA

- Greater significance was placed on performance against the aggregate distribution of lenders as it reflects the difficulties all lenders are experiencing due to the economic constraints discussed above under the Description of the Full-Scope AA.
- The fact that farm lending is not a focus of the bank was considered.
- Between 2017 and 2019, the bank's percentage of loans to farms with revenues of $\$ 1$ million or less was below the percentage of farms and significantly exceeded the aggregate distribution.
- During 2014 to 2016, the bank's performance was consistent with performance between 2017 and 2019. The bank's percentage of loans to farms with revenues of $\$ 1$ million or less was below the percentage of farms and significantly exceeded the aggregate distribution.

## Spokane MSA

- Greater significance was placed on performance against the aggregate distribution of lenders as it reflects the difficulties all lenders are experiencing due to the economic constraints discussed above under the Description of the Full-Scope AA.
- The fact that farm lending is not a focus of the bank was considered.
- Between 2017 and 2019, the bank's percentage of loans to farms with revenues of $\$ 1$ million or less was near to the percentage of farms and significantly exceeded the aggregate distribution.
- During 2014 to 2016, the bank's performance was consistent with performance between 2017 and 2019. The bank's percentage of loans to farms with revenues of $\$ 1$ million or less was below the percentage of farms and significantly exceeded the aggregate distribution.

## Community Development Lending

## Seattle- CSA

The bank is a leader in making CD loans.
The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The bank made 13 CD loans totaling $\$ 1.1$ billion. This represents 28.7 percent of the tier 1 capital allocated to the AA. The majority (or 64.8 percent) of CD loans were for affordable housing purposes, which is a critical need in this AA.

Examples of CD loans in the AA include:

- The bank originated a $\$ 100,000$ line of credit to a not-for-profit organization that creates and operates social enterprise businesses designed to provide jobs and internships for homeless and atrisk families residing in low-income housing in Snohomish County and Camano Island, Washington. The organization partners with the community colleges and the Workforce Development Council, allowing residents to get college credits and degree certificates. Through 12 -week paid internships, the organization enables participants to gain career ladder employment and wage progression.
- The bank originated a $\$ 99.0$ million loan for a multi-phase construction project for a building that continues the transformation of the South Lake Union community in Seattle, WA. The project is located in a low-income census tract and established over 5,000 new jobs.
- The bank provided an $\$ 11.6$ million loan to help preserve the availability of affordable housing on a multifamily property. This property is comprised of 179 units, of which 178 are affordable to lowand moderate-income households and is located in a moderate-income census tract in Tukwila, WA.
- The bank funded a $\$ 58.0$ million loan to develop three multifamily structures in three separate moderate-income census tracts in Seattle, WA. The projects will result in 363 units for low- and moderate-income individuals and families in the AA.

## Spokane MSA

The bank has made a relatively high level of CD loans.
The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The bank made one CD loan totaling $\$ 10.0$ million. This represents 10.5 percent of the tier 1 capital allocated to the AA. The bank originated a $\$ 10.0$ million loan to finance the redevelopment of the historic Ridpath Hotel into an apartment complex. The redevelopment consisted of 206 housing units, with 179 units available individuals and families earning up to 60 percent of the AMI. The City of Spokane's City Council supported the project and has indicated the need for more affordable housing.

## Product Innovation and Flexibility

The bank made extensive use of innovative and/or flexible lending practices in order to serve AA credit needs in each of the full-scope areas. Refer to the comments in the Product Innovation and Flexibility section in the front of this performance evaluation for program details.

## Seattle CSA

A total of 7,369 loans were funded totaling $\$ 1.8$ billion under the following innovative and/or flexible programs.

| Loan Type | Number of <br> Loans | Dollar Amount <br> $\mathbf{( \$ 0 0 0 ' s )}$ |
| :--- | :---: | :---: |
| DreaMaker | 975 | 294,411 |
| FHA | 1,119 | 288,803 |
| HARP | 1,935 | 332,688 |
| VA | 1,357 | 412,838 |
| SBA | 255 | 89,123 |
| USDA | 1,728 | 352,915 |

## Spokane CSA

As outlined below, a total of 821 loans were funded totaling $\$ 132.7$ million under the following innovative and/or flexible programs.

| Loan Type | Number of <br> Loans | Dollar Amount <br> $\mathbf{( \$ 0 0 0 ' s )}$ |
| :--- | :---: | :---: |

| USDA | 86 | 14,695 |

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall Outstanding Lending Test rating and did not significantly affect the initial overall conclusions based on the AAs receiving fullscope review. Based on limited-scope reviews, the bank's performance under the Lending Test in the Bellingham MSA is consistent with the bank's overall performance in the full-scope areas. Lending performance in the Kennewick-Richland-Walla Walla CSA, Wenatchee MSA, Yakima MSA, and WA Non-Metro AA is weaker than the bank's performance under the Lending Test in the full-scope areas. Weaker performance is due to weaker geographic or borrower income distributions or lack of CD loans. Performance in the limited-scope areas did not impact the Lending Test rating for the state of Washington.

Refer to Tables O through T in the state of Washington section of appendix D for the facts and data that support these conclusions.

## INVESTMENT TEST

The bank's performance under the Investment Test in the state of Washington is rated Outstanding.

## Conclusions for Areas Receiving Full-Scope Reviews

Based on a full-scope review, the bank's performance in the Seattle CSA and the Spokane MSA is excellent.

## Seattle CSA

The bank has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 8.3 percent of tier 1 capital allocated to the AA. A significant majority, or 85.3 percent of total investments represent current period investments.

The bank exhibits excellent responsiveness to the needs identified in this AA including affordable housing, community services, and revitalize/stabilize for low- and moderate-income individuals and geographies. Ninety-nine percent of the bank's current period CD investments focused on affordable housing. Additionally, the bank provided 120 current period grants totaling $\$ 16.5$ million to a variety of organizations that primarily provide community service needs. All prior period investments support affordable housing. In total, the bank's investments helped create or retain 11,704 low- and moderateincome affordable housing units.

The bank makes extensive use of innovative and/or complex investments to support CD initiatives. Thirteen current period qualified investments, consisting of 12 Direct Investment LIHTC transactions, were complex. Fourteen current period CD investments and grants serve as catalysts as part of a local government plan for revitalization or stabilization to encourage further growth or improvements. In addition, the bank showed leadership with two investments made under the bank's New Skills at Work initiative. All seven complex prior period investments are Direct Investment LIHTC transactions.

Examples of CD investments in the AA include:

- The bank originated a $\$ 17.3$ million Direct Investment LIHTC transaction to an organization to provide 85 rental units to low- and moderate-income individuals and families in the AA.
- The bank originated a $\$ 21.9$ million Direct Investment LIHTC investment to provide 254 affordable rental housing units to low- and moderate-income individuals and families in the AA.
- The bank originated two NMTC equity investments totaling $\$ 3.0$ million with a hotel apartment organization. This organization is responsive to the Seattle Comprehensive Plan by renovating a vacant building and creating diverse housing opportunities along with retail and commercial use. This will also meet this low-income neighborhood's need for new market rate units and affordable residential units, which are in short supply. This project targets local businesses to return back to the building. This will help initiate additional investment and revitalization in this AA as well as help retain residents by providing much needed goods, services, and housing.
- The bank made two grants totaling $\$ 500,000$ to a community service organization that has been helping low- and moderate-income individuals transform their lives of poverty, homelessness, and hunger, through food for approximately 30 years. This organization addresses persistent poverty and economic mobility through advanced skill job training to low- and moderate-income individuals. The main goal and outcome of the Foodservice Apprenticeship Program is that graduates will increase their wages 25 percent. Participants in the program get practical work experience while giving back to their community.

## Spokane MSA

The bank has an excellent level of qualified CD investments and grants, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 70.2 percent of tier 1 capital allocated to the AA. A significant majority, or 85.7 percent of total investments represent current period investments.

The bank exhibits excellent responsiveness to the needs identified in this AA including affordable housing and community services for low- and moderate-income individuals and geographies. All of the bank's current period CD investments focused on affordable housing. The bank also provided 10 current period grants totaling $\$ 1.1$ million to a variety of organizations that support community service needs, and one totaling $\$ 25,000$ supporting affordable housing. All prior period investments are related to LIHTC transactions that support affordable housing. Overall, the bank's investments helped create 542 low- and moderate-income affordable housing units.

The bank makes occasional use of innovative and/or complex investments to support CD initiatives. The bank made six current and prior period CD investments consisting of Direct Investment LIHTC transactions.

Examples of CD investments in the AA include:

- The bank made a $\$ 24.3$ million Direct Investment LIHTC transaction to provide 379 rental units to low- and moderate-income individuals and families in the AA.
- The bank provided a $\$ 13.0$ million LIHTC investment to fund a housing project that provided 119 units for low- and moderate-income households. All rental units funded by LIHTC funds are set aside for low- and moderate-income households. To qualify for these units, earnings are capped at between 50-60 percent of the AMI.
- The bank made five grants totaling $\$ 625,000$ to a nonprofit community organization. The mission of this nonprofit is to fight poverty and unemployment with critical insights, researched guidance, innovative funding, and strategic partnership.

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

## Statewide Investments in State of Washington

The bank has qualified investments with and without $P / M / F$ to serve $A A s$ in the state of Washington. These CD investments support community services, with one supporting affordable housing. The investment represents 0.6 percent of total state investments. The level of investments did not impact the overall Investment Test rating for the state of Washington.

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall Outstanding Investment Test rating and did not change the initial overall conclusions based on the AAs receiving a full-scope review. Based on limited-scope reviews, the bank's performance under the Investment Test in the Bellingham MSA, the Yakima MSA, and the WA Non-Metro AAs is consistent with the bank's overall performance under the Investment Test in the full-scope areas. The bank's performance in the Wenatchee MSA and the Kennewick-Richland-Walla Walla CSA are weaker than the bank's overall performance under the Investment Test in the full-scope area, due primarily to a lower volume of CD investments.

## SERVICE TEST

The bank's performance under the Service Test in state of Washington is rated High Satisfactory.

## Conclusions for Area Receiving a Full-Scope Review

Based on full-scope reviews, the bank's performance in the Seattle CSA is excellent and the bank's performance in the Spokane MSA is adequate. More weight was given to the Seattle-Tacoma CSA due to the bank's larger deposit base and branch presence.

## Retail Banking Services

Service delivery systems are accessible to geographies and individuals of different income levels in the bank's full-scope AAs.

Examiners evaluated the data as outlined in the Scope section at the front of this document including bank-provided data on usage of branches adjacent to low- and moderate-income geographies by individuals residing in those geographies and on increases in the usage of alternative delivery systems.

## Seattle CSA

Based on the data in the table below and performance context, the branch distribution is excellent. In low- and moderate-income geographies, the distribution exceeds the percentage of the population. The bank had nine branches in low-income geographies and 43 branches in moderate-income geographies. The distribution was augmented by 14 MUI tract branches that serve moderate-income tracts. Examiners reviewed data on the accounts held and transactions conducted at the MUI branches and confirmed they were serving the adjacent low- and moderate-income populations.

## Spokane MSA

Based on the data in the table below and performance context, the branch distribution is good. In lowand moderate-income geographies, the distribution is respectively well below and exceeds the percentage of the population. The bank had no branches in low-income geographies and six branches in moderate-income geographies. More weight was given to the distribution in moderate-income geographies due to the small portion ( 0.6 percent) of the population residing in low-income geographies.

## Seattle CSA

Alternative delivery systems enhanced the delivery of banking services to geographies and individuals of all income levels. The OCC considered the availability and use of alternative delivery systems over
the evaluation period. This included review of the bank's 261 deposit-taking ATMs, online banking, mobile banking, and telephone banking to determine the effectiveness of these systems to make retail banking services available to individuals in low- and moderate-income geographies. The bank increased the deposit-taking ATMs in low- and moderate-income geographies by 53.1 percent over the prior rating period to 23 ( 8.8 percent) deposit-taking ATMs in low-income geographies and 75 (28.7 percent) ATMs in moderate-income geographies. Additionally, bank-provided data on use of online, mobile, and telephone banking showed increases in the adoption of these services by low- and moderate-income individuals from the prior rating period.

## Spokane MSA

Alternative delivery systems did not significantly enhance the delivery of banking services to geographies and individuals of all income levels. The OCC considered the availability and use of alternative delivery systems over the evaluation period. This included review of the bank's 17 deposittaking ATMs, online banking, mobile banking, and telephone banking to determine the effectiveness of these systems to make retail banking services available to individuals in low- and moderate-income geographies. The bank decreased the deposit-taking ATMs in low- and moderate-income geographies by 10.0 percent from the prior rating period to no deposit-taking ATMs in low-income geographies and nine ( 52.9 percent) ATMs in moderate-income geographies. Additionally, bank-provided data on use of online, mobile, and telephone banking showed decreases in the adoption of these services by low- and moderate-income individuals from the prior rating period.

| Spokane-Spokane <br> Valley MSA | 0 | 2 | 0 | 0 | -2 | 0 |  |

## Seattle CSA

The bank's opening and closing of branches has not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and/or to low- and moderate-income individuals. The bank closed two branches in low-income geographies and opened one branch and closed one branch in moderate-income geographies. Branch closures were due to reduced customer usage and unprofitability. Despite the branch closures, branch locations remained accessible to geographies and individuals of different income levels in the bank's AA.

Services, including where appropriate, business hours, do not vary in a way that inconveniences its AA, particularly low- and moderate-income geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 6:00 pm and Saturday from 9:00 am to 1:00 pm. All retail banking services are available at all branches within the low- and moderate-income geographies.

## Spokane MSA

The bank's opening and closing of branches has not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and/or to low- and moderate-income individuals. The bank did not open or close any branches in low- and moderate-income geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences its AA, particularly low- and moderate-income geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 6:00 pm and Saturday from 9:00 am to 1:00 pm.

All retail banking services are available at all branches within the low- and moderate-income geographies.

## Community Development Services

## Seattle CSA

The bank provided an excellent level of CD services.
Bank records show that employees provided technical assistance and/or job-specific expertise for 853 qualified CD service activities to 35 organizations for a total of over 3,510 hours of service. All the bank's assistance was to organizations that provide community services to low- and moderate-income individuals and families. The bank's community development services were responsive to the community needs in the AA, particularly affordable housing, and greater access to banking services. The following are examples of CD services provided in this AA:

- The bank provided more than 115 homebuyer workshops and seminars for more than 515 hours, impacting approximately 833 low- and moderate-income individuals.
- A bank employee provided technical assistance for low- and moderate-income individuals, in coordination with nonprofits that served the low- and moderate-income communities. The assistance provided education on safe, low-cost alternatives to traditional checking accounts and options to avoid high cost financial products such as payday loans and check cashers and provided standards for alternative products that are safe, low cost options for underbanked and unbanked individuals and families, and for those who are reentering the banking system.

## Spokane MSA

The bank provided an adequate level of CD services.
Bank records show that employees provided technical assistance and/or job-specific expertise for 77 qualified CD service activities to seven organizations for a total of over 335 hours of service. All the bank's assistance was to organizations that provide community services to low- and moderate-income individuals and families. The bank's community development services were responsive to the community needs in the AA, focus on homeownership for low- and moderate-income individuals. The following are examples of CD services provided in this AA:

- The bank provided 43 individual pre-purchase homebuyer education for more than 168 hours, impacting approximately 42 low- and moderate-income individuals.
- A bank employee provided 140 hours of technical assistance benefiting 412 low- and moderateincome individuals. The assistance provided education to first-time homebuyer clients interested in homeownership. The employee explained the mortgage process and provided information on mortgage products, services, and programs targeting low- and moderate-income homebuyers.

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall High Satisfactory Service Test rating and did not significantly change the initial overall conclusions based on the AAs receiving full-scope review. Based on limited-scope reviews, the bank's performance under the Service Test in the Wenatchee MSA and Yakima MSA is consistent with the bank's overall performance under the Service Test in the full-scope area and the bank's performance under the Service Test in the Bellingham MSA, Kennewick-Richland-Walla Walla MSA, and WA Non-Metro AA is weaker than the bank's overall performance under the Service Test in the full-scope areas due to weaker branch distribution in low- and moderate-income geographies.

## State Rating

## State of West Virginia

CRA rating for the State of West Virginia ${ }^{\mathbf{2 8} \text { : Satisfactory }}$
The Lending Test is rated: High Satisfactory
The Investment Test is rated: Outstanding
The Service Test is rated: Low Satisfactory
The major factors that support this rating include:

- A good level of lending activity.
- A good geographic distribution of home mortgage loans and small loans to businesses.
- An excellent borrower distribution of home mortgage loans and small loans to businesses.
- An adequate level of CD loans that has a neutral effect on the rating.
- The extensive use of flexible products that positively affected the rating.
- A good level of qualified investments that demonstrated excellent responsiveness to credit and community economic development needs.
- A high level of statewide investments enhanced the overall rating.
- Retail service delivery systems that are reasonably accessible to geographies and individuals of different income levels.
- An adequate level of CD services that were responsive to AA needs.

## Description of Institution's Operations in West Virginia

The state of West Virginia is Chase's 25th rating area based on its total deposits of $\$ 1.7$ billion, representing 0.1 percent of the bank's total deposits. As of December 31, 2019, the bank operated 18 branches and 39 deposit-taking ATMs within the rating area, representing 0.3 percent of total branches and 0.2 percent of total ATMs. The bank originated and purchased approximately $\$ 533.5$ million in loans or 0.1 percent of total bank loan originations and purchases during the evaluation period in the state.

According to FDIC Deposit Market Share Data as of June 30, 2019, there were 71 institutions operating 608 offices in the state of West Virginia. Chase ranked 6th in deposit market share with 5.4 percent. Major competitors in the state include Branch Banking and Trust Company with 15.4 percent market share; United Bank with 14 percent market share; and WesBanco Bank with 8.5 percent market share.

The bank delineated three AAs in the state of West Virginia. The Charleston-Huntington-Ashland CSA (Charleston CSA) accounted for 59.5 percent of the bank's deposits in the state of West Virginia and received a full-scope review. The Beckley MSA and West Virginia Non-Metro AA received limitedscope reviews. The delineated AAs are described in appendix A.

[^125]The Charleston CSA consists of the Charleston MSA and Huntington-Ashland MSA. The bank defines its assessment area as the entire Charleston MSA and the Cabell, Putnam, and Wayne counties of the Huntington-Ashland MSA.

According to FDIC Deposit Market Share, as of June 30, 2019, there were 33 institutions operating 193 offices in this area. The bank-maintains deposits of $\$ 1.02$ billion in the CSA, ranking it fifth in deposit market share. As of December 31, 2019, the bank operated ten branches and 21 deposit-taking ATMs in the AA, representing 0.2 percent of bank branches and 0.1 percent of deposit-taking ATMs in the area.

The following table provides a summary of the demographics that includes housing and business information for the Charleston CSA. Table A indicates that the volume of OOUs is small in low-income census tracts ( 1.8 percent) and over 22.0 percent of families in the AA are low-income. The Charleston CSA's cost of housing also limits access to affordable homeownership among low-income borrowers. The median housing value in the Charleston CSA is two times the median income, two to three times the moderate-income, and four times the low-income, indicating a large proportion of OOUs are not affordable to low-income borrowers. One simplistic method used to determine housing affordability assumes a maximum monthly principal and interest payment of no more than 36 percent of the applicant's income.

In the Charleston CSA, assuming a 30 -year mortgage with a 5.0 percent interest rate, 3.0 percent down payment, and not accounting homeowners insurance, real estate taxes, or any additional monthly expenses, a low-income borrower making $\$ 27,310$ per year (or less than 50 percent of the FFIEC adjusted median family income in the MSA) could afford a $\$ 78,961$ mortgage with a payment of $\$ 819$ per month; a moderate-income borrower earning $\$ 43,697$ per year (or less than 80 percent of the FFIEC adjusted median family income in the AA) could afford a $\$ 157,040$ mortgage with a payment of $\$ 1,311$ per month.

Median rents and the percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

## Economic Data

According to the Moody's Analytics December 2019 report, the strengths of the Charleston, WV area include a low cost of living, low business costs and below average employment volatility. However, it is experiencing a rapid decline in population, below average incomes, low quality of life, high poverty rates and a high share of surface mines which produce lower quality coal. Charleston is one of the most coal dependent metro areas in the nation. The area struggles to overcome a declining coal industry. It is among the worst-performing metro areas. There is a growing over-65 population. However, it is a less healthy population with a high death rate that is tied to poor health. Economic drivers are energy and resources, healthcare, and state government. Major employment sectors include government, education and health services and professional and business services. In addition to federal, state, and local government, major employers in the area include Charleston Area Medical Center, Herbert J. Thomas Memorial Hospital Association, FronTier Communications, Walmart, and MC Junking Corp. are also significant employers.

## Community Contacts

Four community contacts completed during the examination period were reviewed to gain an understanding of the needs in the community. Contacts were completed with organizations focused on affordable housing and economic development/small business. Contacts noted that there are several poverty related issues that need to be addressed including dental and vision care; medical care/prescription assistance; and assistance with basic day to day needs such as utilities, food, and clothing. The population in the area is aging and the number of elder rental households is increasing. There is high demand for affordable rental housing units including a growing need for affordable elder housing. There is also a need for support for programs that support asset development and selfsufficiency among low-income households. There are only a small number of institutions that operate in Kanawha County so there is a need for traditional banking services. It was reported by a community contact that the economic conditions vary widely throughout Kanawha and Putnam counties with some individuals living in severe poverty while others are affluent individuals. However, the majorly of the area is severely depressed. The level of development in the counties also vary from extremely rural to urban. The exodus of major employers (coal mining companies) has left some the rural areas with a significant employment gap as many residents refuse to relocate to areas with more job opportunities. Eastern Kanawha County has been impacted the most over the last 6-7 years by the departure of key employers. In Ashland, a new manufacturing facility is built, which will bring approximately 700-800 well-paying jobs. This will help reverse the decline in jobs that had been occurring over the past few years due to the decline of the coal industry. For housing, more of the focus seems to be on new construction. However, bank financing for rehab of some of the older housing stock as many housing units are substandard and in need of refurbishing or removal is also necessary. Other needs mentioned for the area include:

- Workforce development
- Affordable home loans for low- and moderate-income individuals
- Small business incubators
- Technical assistance for small businesses
- Funding for programs to combat the opioid addiction epidemic

## Scope of Evaluation in West Virginia

The Charleston CSA received a full-scope review. The CSA accounts for 59.5 percent of deposits in the state of West Virginia. The remaining AAs in the state of West Virginia received limited-scope reviews. Performance in the limited-scope AAs and its effect on the CRA rating are discussed at the end of each test.

## CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN WEST VIRGINIA

## LENDING TEST

The bank's performance under the Lending Test in the state of West Virginia is rated High Satisfactory.

## Conclusions for Areas Receiving a Full-Scope Review

Based on a full-scope review, the bank's performance in the Charleston CSA is good.
Performance in AAs receiving limited-scope reviews was factored together with performance from AAs receiving full-scope reviews to determine the state's overall High Satisfactory Lending Test rating. Limited-scope conclusions did not significantly affect the initial overall conclusions based on the AAs receiving full-scope review.

## Lending Activity

Lending levels reflect good responsiveness to credit needs in the bank's AAs.
Examiners considered the number and amount of home mortgage, small business, and small farm loans originated or purchased relative to Chase's capacity based on deposits, competition, and market presence. Lending activity for home mortgage and small loans to businesses received the most weight in reaching conclusions. Respectively, home mortgage lending and small loans to businesses account for 41.0 percent and 58.4 percent of the loan volume in the state by number and 61.4 and 38.0 percent of loan volume by dollar. Small farm lending is not a strategic focus of the bank and received minimal weight in reaching conclusions. Farm loans represented 0.6 percent of the loan volume in the state by number and 0.06 percent loan volume by dollar.

| Number of Loans* |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Charleston Huntington- <br> Ashland CSA | 206,877 | 149,023 | 238 | 4,550 | 360,688 | 67.6 | 59.5 |
| Beckley MSA | 53,192 | 29,258 | 64 | 0 | 82,514 | 15.5 | 16.0 |
| WV Non-Metro AA | 65,928 | 24,368 | 14 | 0 | 90,310 | 16.9 | 24.5 |
| Total | 325,997 | 202,649 | 316 | 4,550 | 533,512 | 100.0 | 100.0 |

*The tables present the data for all assessment areas. The narrative below addresses performance in full-scope areas only.
Chase ranked fourth in deposits out of 51 institutions with 7.2 percent market share.
In overall home mortgage lending, Chase ranked seventh with 3.7 percent market share. The top three lenders in the market are City National Bank of West Virginia (11.4 percent), Quicken Loans, Inc. (6.0 percent), and The Huntington National Bank ( 6.0 percent).

In small loans to businesses, Chase ranked third out of 76 lenders with a 10.0 percent market share. Other major lenders are Branch Banking and Trust Co., (16.0 percent), American Express National Bank (15.4 percent), and Synchrony Bank ( 7.5 percent).

In small loans to farms, Chase ranked first out of nine lenders with a 25.0 percent market share. The other major lenders and respective market shares are U.S. Bank, N.A. (25.0 percent), John Deere Financial, F.S.B. (12.5 percent), and Summit Community Bank, N.A. (14.1 percent).

## Distribution of Loans by Income Level of the Geography

The bank exhibits good geographic distribution of loans in its AA.

## Home Mortgage Loans

Refer to Table O in the state of West Virginia section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of home mortgage loan originations and purchases is adequate. The following information was taken into consideration when determining this rating.

- The limited proportion of housing units in low-income geographies, particularly OOUs ( 1.8 percent), constrained lending opportunities; therefore, performance in moderate-income geographies was given more consideration due to the higher percentage of OOUs in those geographies.
- The level of competition in the AA was also considered.
- Between 2017 and 2019, the proportion of loans in low-income areas was well below the percentage of owner-occupied units and the aggregate distribution of loans. In moderate-income areas the proportion of loans was below the percentage of owner-occupied units and exceeded the aggregate distribution of loans.
- During 2014 through 2016, performance in low-income geographies was below the percentage of owner-occupied units and exceeded the aggregate distribution of loans, while performance in moderate-income geographies was well below the percentage of owner-occupied units and below the aggregate distribution of loans.

## Small Loans to Businesses

Refer to Table Q in the state of West Virginia section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses.

Based on the data in the table and the following considerations, the bank's overall geographic distribution of small loans to businesses for this evaluation is excellent. The following information was taken into consideration when determining this rating.

- Performance against the aggregate distribution of lenders was given additional consideration as it reflects the difficulties all lenders are experiencing due to the economic constraints discussed above under the Description of the Full-Scope AA.
- Between 2017 and 2019, the proportion of small loans to businesses in low-income geographies exceeded both the proportion of businesses and the aggregate distribution, while the proportion of small loans to businesses in moderate-income geographies was below the proportion of businesses and near to the aggregate distribution
- During 2014 to 2016, the bank's proportion of small loans to businesses in low- and moderateincome geographies was near to the proportion of businesses and exceeded the aggregate distribution.

## Small Loans to Farms

Refer to Table S in the state of West Virginia section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to farms.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of small loans to farms is good. The following information was taken into consideration when determining this rating.

- The limited number of farms in low-income geographies, (3.1 percent), constrained lending opportunities; therefore, performance in moderate-income geographies was given slightly more consideration due to the higher number of farms in those geographies.
- The fact that farm lending is not a focus of the bank was also considered.
- Between 2017 and 2019, the bank made no loans to small farms in low-income geographies. The proportion of loans to small farms in moderate-income geographies was well below the proportion of farms and the aggregate distribution.
- During 2014 to 2016, the bank made no loans to small farms in low-income geographies. The proportion of loans to small farms in moderate-income geographies significantly exceeded the proportion of farms in those geographies and the aggregate distribution.

## Lending Gap Analysis

A review of home mortgage loans, small loans to business, and small loans to farms including summary reports and AA maps did not identify any unexplained conspicuous lending gaps in the bank's activities.

## Distribution of Loans by Income Level of the Borrower

The bank exhibits excellent distribution of loans among individuals of different income levels and business and farms of different sizes, given the product lines offered by the institution.

## Home Mortgage Loans

Refer to Table P in the state of West Virginia section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases.

Based on the data in the tables and the following considerations, the bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent. The following information was taken into consideration when determining this rating.

- Greater significance was placed on performance against the aggregate distribution as it reflects the difficulties all lenders are experiencing due to competition and the economic constraints discussed above under the Description of this Full-Scope AA.
- Examiners also particularly considered housing affordability challenges for low-income borrowers and placed slightly more weight on lending to moderate-income borrowers.
- Between 2017 and 2019, the proportion of loans to low-income borrowers was well below the percentage of low-income families and exceeded the aggregate distribution of lenders. The proportion of moderate-income loans met the proportion of moderate-income families and exceeded the aggregate distribution.
- During 2014 to 2016 the bank's performance was consistent with performance between 2017 to 2019. The proportion of loans to low-income borrowers was well below the percentage of lowincome families and exceeded the aggregate distribution of lenders. The proportion of moderateincome loans exceeded both the proportion of moderate-income families and the aggregate distribution.

## Small Loans to Businesses

Refer to Table R in the state of West Virginia section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses.

Based on the data in the tables and the following considerations, the distribution of the bank's originations and purchases of small loans to businesses by revenue category is good. The following information was taken into consideration when determining this rating.

- Greater significance was placed on performance against the aggregate distribution of lenders as it reflects the difficulties all lenders are experiencing due to competition and the economic constraints discussed above under the Description of the Full-Scope AA.
- Between 2017 and 2019, the bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was near to the percentage of businesses and exceeded the aggregate distribution.
- During 2014 to 2016, the bank’s performance was slightly weaker than performance between 2017 and 2019. The bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.

## Small Loans to Farms

Refer to Table T in the state of West Virginia section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to farms.

Based on the data in the table and the following considerations, the distribution of the bank's originations and purchases of small loans to farms by revenue category is good. The following information was taken into consideration when determining this rating.

- Greater significance was placed on performance against the aggregate distribution of lenders as it reflects the difficulties all lenders are experiencing due to the economic constraints discussed above under the Description of the Full-Scope AA.
- The fact that farm lending is not a focus of the bank was considered.
- Between 2017 and 2019, the bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was near to the percentage of businesses and exceeded the aggregate distribution.
- During 2014 to 2016, the bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.

## Community Development Lending

The bank has made an adequate level of CD loans.
The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as $C D$ loans.

The bank originated or purchased two CD loans totaling $\$ 4.6$ million, which represents 3.5 percent of the tier 1 capital allocated to the AA. Both loans were for affordable housing purposes, which is a need in the AA.

Examples of CD loans in the AA include:

- The bank funded a $\$ 440,000$ term loan to finance a portion of a public housing project located in a moderate-income census tract in Charleston, WV. The redevelopment project began in 2011 and upon completion, created 66 affordable housing units. Thirty-six units are for the elderly and disabled and the remaining are family units.
- The bank funded a $\$ 4.1$ million loan for the construction of Section 8 housing in Kanawha County. This created 24 units of affordable housing in the AA.

## Product Innovation and Flexibility

The bank made extensive use of innovative and/or flexible lending practices to serve AA credit needs. A total of 686 loans were funded totaling nearly $\$ 81.2$ million. Refer to the comments in the Product Innovation and Flexibility section in the front of this performance evaluation for program details.

## Charleston CSA

| Loan Type | Number of <br> Loans | Dollar Amount <br> $\mathbf{( \$ 0 0 0 ' s )}$ |
| :--- | :---: | :---: |
| DreaMaker | 40 | 4,617 |
| FHA | 216 | 22,288 |
| HARP | 90 | 9,599 |
| VA | 110 | 17,993 |
| SBA | 9 | 2,682 |
| USDA | 221 | 24,043 |

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall High Satisfactory Lending Test rating and did not significantly affect the initial overall conclusions based on the AAs receiving full-scope review. Based on limited-scope reviews, the bank's performance under the Lending Test in the Beckley MSA and WV Non-Metro AA is consistent with the bank's overall performance under the Lending Test in the full-scope area.

Refer to Tables O through T in the state of West Virginia section of appendix D for the facts and data that support these conclusions.

## INVESTMENT TEST

The bank's performance under the Investment Test in the state of West Virginia is rated Outstanding. A high number of statewide investments enhanced the bank's overall performance under the Investment Test.

## Conclusions for Area Receiving a Full-Scope Review

Based on a full-scope review, the bank's performance in the Charleston CSA is good.
The bank has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments represent 8.8 percent of tier 1 capital allocated to the AA. Sixty-five percent are current period investments.

The bank exhibits excellent responsiveness to credit and community economic development needs identified in the AA. Four current period CD investments totaled $\$ 3.2$ million with 81.1 percent supporting affordable housing. Eighteen current period grants totaled $\$ 745,000$ with 15.2 percent and 3.7 percent focusing on community services and revitalization/stabilization, respectively. All prior period investments support affordable housing. Three investments supporting revitalization/stabilization serve as catalysts to encourage future improvement and growth in the respective areas.

The bank does not use innovative and/or complex investments to support CD initiatives.
Examples of community development investments in the AA include:

- The bank provided four annual grants, totaling $\$ 272,000$, to an organization to fund the implementation and operation of its The Road to Self-Sufficiency program. The region the organization serves has an average unemployment rate of 8.8 percent, and approximately 22.1 percent of residents live below the poverty level. The organization, in partnership with the Consumer Credit Counseling Division (CCCD), provides training focusing on industrial certification programs, work adjustment/life skills training, customer service-janitorial-medical technician training, and general office skills. In addition, the CCCD provides financial stability and coaching support.
- The bank provided a $\$ 65,000$ grant to an organization for their farm's expansion project located in Kanawha County, WV. The project created at least ten jobs for low-income/unemployed residents by targeting economically disadvantaged, low-income, and unemployed individuals and exoffenders, for training and employment in the fields of agriculture and culinary arts.
- The bank provided two grants totaling $\$ 120,000$ to a local city Foundation for their River to Rail initiative. It targeted a low- and moderate-income area suffering from the spread of crime, slum and blighting conditions, and deterioration of the public infrastructure. Grant funding will be used to make improvements to public spaces, specifically new curb and sidewalk construction, installation of rain gardens, improvements to bicycle routes and facilities, landscaping, benches, and public art.

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

## Statewide Investments in the State of West Virginia

The bank has 27 current and prior period CD investment and grants with and without a $\mathrm{P} / \mathrm{M} / \mathrm{F}$ to serve AA in the broader statewide area. Ninety-nine percent support affordable housing. These investments represent a high 40 percent of total qualified investments and enhanced the bank's overall performance under the Investment Test in the state of West Virginia.

## Conclusions for Area Receiving a Limited-Scope Review

Performance in the limited-scope AAs was factored into the state's overall Outstanding Investment Test rating and did not change the initial overall conclusions based on the AA receiving a full-scope review. Based on limited-scope reviews, the bank's performance under the Investment Test in the WV NonMetro AA is strong than the bank's overall performance under the Investment Test in the full-scope area. Stronger performance is due to a high level of investments in relation to allocated tier 1 capital. The bank's performance under the Investment Test in the Beckley MSA is weaker than the bank's overall performance under the Investment Test in the full-scope area. Weaker performance is due to a lower level of investments.

## SERVICE TEST

The bank's performance under the Service Test in state of West Virginia is rated Low Satisfactory.

## Conclusions for Area Receiving a Full-Scope Review

Based on a full-scope review, the bank's performance in the Charleston CSA is adequate.

## Retail Banking Services

Service delivery systems are reasonably accessible to geographies and individuals of different income levels in the bank's AA.

Examiners evaluated the data as outlined in the Scope section at the front of this document including bank-provided data on usage of branches adjacent to low- and moderate-income geographies by individuals residing in those geographies and on increases in the usage of alternative delivery systems.

Based on the data in the table below and performance context, the branch distribution is adequate. In low- and moderate-income geographies, the distribution respectively exceeds and is well below the percentage of the population. The bank had one branch in a low-income geography and no branches in moderate-income geographies. The distribution was augmented by one MUI tract branch that serves moderate-income tracts. Examiners reviewed data on the accounts held and transactions conducted at the MUI branch and confirmed it was serving the adjacent moderate-income population.

Charter Number: 8

| Distribution of Branch Delivery System |  |  |  |  |  |  |  | As of December 31, 2019 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Deposits | Branches |  |  |  |  |  | Population |  |  |  |
| Assessment | \% of Rated <br> Area | \# of <br> BANK <br> Branches | \% of <br> Rated <br> Area <br> Branches <br> in AA | Location of Branches by Income of Geographies (\%) |  |  |  | \% of Population within Each Geography |  |  |  |
| Area | Deposits in <br> AA |  |  | Low | Mod | Mid | Upp | Low | Mod | Mid | Upp |
| $\begin{aligned} & \text { Charleston } \\ & \text { CSA } \end{aligned}$ | 59.5 | 10 | 55.6 | 10.0 | 0.0 | 80.0 | 10.0 | 3.5 | 17.7 | 50.4 | 27.8 |

* May not add up to 100 percent due to geographies with unknown tract income level and rounding

Alternative delivery systems enhanced the delivery of banking services to geographies and individuals of all income levels. The OCC considered the availability and use of alternative delivery systems over the evaluation period. This included review of the bank's 21 deposit-taking ATMs, online banking, mobile banking, and telephone banking to determine the effectiveness of these systems to make retail banking services available to individuals in low- and moderate-income geographies. The bank had four (10.0 percent) deposit-taking ATMs in low-income geographies and no ATMs in moderate-income geographies. Additionally, bank-provided data on use of online, mobile, and telephone banking showed increases in the adoption of these services by low- and moderate-income individuals from the prior rating period.

| Distribution of Branch Openings/Closings |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | \# of Branch Openings | \# of Branch Closings | Net change in Location of Branches (+ or -) |  |  |  |
|  |  |  | Low | Mod | Mid | Upp |
| Charleston-CSA | 0 | 4 | 0 | -1 | -2 | -1 |

The bank's opening and closing of branches has adversely affected the accessibility of its delivery systems, particularly in moderate-income geographies and/or to low- and moderate-income individuals. The bank did not open or close any branches in the low-income geographies and closed one branch in a moderate-income geography. The branch closure was due to its proximity to another Chase branch in a MUI geography. Data confirmed use of the MUI branch by individuals in the moderate-income geography.

## Community Development Services

The bank provided an adequate level of CD services.
Bank records show that employees provided technical assistance and/or job-specific expertise for 57 CD service activities to 17 organizations for a total of over 200 qualified hours of service over a six-year period, benefitting more than 250 low- and moderate-income individuals. All the bank's assistance was to organizations that provide community services to low- and moderate-income individuals and families. The following are examples of CD services provided in this AA:

- A bank employee provided 72 hours of board service for a not-for-profit micro enterprise development center and business incubator serving a predominately low- and moderate-income client base.
- A bank employee provided a financial literacy seminar for low- and moderate-income individuals, in coordination with a nonprofit that served the low- and moderate-income community. The education received helped equip participants with the knowledge and skills necessary to make good financial decisions, so that they can become self-sufficient and enjoy financial well-being over time.

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall Low Satisfactory Service Test rating and did not significantly change the initial overall conclusions based on the AAs receiving full-scope review. Based on limited-scope reviews, the bank's performance under the Service Test in the WV Non-Metro AA is stronger than the bank's overall performance under the Service Test in the full-scope area due to stronger branch distribution in low- and moderate-income geographies. The bank's performance in the Beckley MSA is weaker than the bank's overall performance under the Service Test due to weaker branch distribution in low- and moderate-income geographies.

## State Rating

## State of Wisconsin

CRA rating for the State of Wisconsin ${ }^{29}$ : Satisfactory
The Lending Test is rated: High Satisfactory
The Investment Test is rated: Outstanding
The Service Test is rated: High Satisfactory
The major factors that support this rating include:

- An excellent level of lending activity.
- An adequate geographic distribution of home mortgage loans and small loans to businesses.
- A good borrower distribution of home mortgage loans and small loans to businesses.
- An adequate level of CD loans that has a neutral effect on the rating.
- The extensive use of innovative/flexible products, which positively affected the rating.
- An excellent level of qualified CD investment that displayed excellent responsiveness to credit and community economic development needs.
- The extensive use of innovative and/or complex investments.
- A high level of statewide investments.
- Retail service delivery systems that are accessible to geographies and individuals of different income levels.
- A significant level of CD services that were responsive to AA needs.

## Description of Institution's Operations in Wisconsin

The state of Wisconsin is Chase's 14th rating area based on its total deposits of $\$ 9.2$ billion, representing 0.7 percent of the bank's total deposits. As of December 31, 2019, the bank operated 57 branches and 101 deposit-taking ATMs within the rating area, representing 1.1 percent of total branches and 0.6 percent of total ATMs. The bank originated and purchased approximately $\$ 6.7$ billion in loans or 1.0 percent of total bank loan originations and purchases during the evaluation period in the state.

According to FDIC Deposit Market Share Data as of June 30, 2019, there were 225 banks s operating 1,919 branches $s$ in the state of Wisconsin. Chase ranks fourth in deposit market share with 6.6 percent. Major banking competitors in the state include U.S. Bank, N.A. with 17.3 percent deposit market share; BMO Harris Bank with 14.2 percent deposit market share; and Associated Bank with 11.5 percent deposit market share.

The bank has delineated seven AAs in the state of Wisconsin. The Milwaukee-Waukesha-West Allis MSA (Milwaukee MSA), which accounts for 66.9 percent of the deposits and 50.9 percent of lending in the state, received a full-scope review. The Appleton-Oshkosh-Neenah CSA, Fond du Lac MSA, Green Bay MSA, Madison-Janesville-Beloit CSA, Racine MSA, and WI Non-Metro received limited-scope reviews. The delineated AAs are described in appendix A.

[^126]
## Description of Full-Scope AA

The following table provides a summary of the demographics that includes housing and business information for the Milwaukee MSA. Table A indicates that the volume of OOUs is small in lowincome census tracts ( 7.3 percent) and 23.5 percent of families in the AA are low-income. The Milwaukee MSA's cost of housing also limits access to affordable homeownership among low-income borrowers. The median housing value in the Milwaukee MSA is 2.6 times the median income, 3.2 times the moderate-income, and 5.2 times the low-income, indicating a proportion of OOUs are unaffordable to low-income borrowers. One simplistic method used to determine housing affordability assumes a maximum monthly principal and interest payment of no more than 36 percent of the applicant's income.

In the Milwaukee MSA, assuming a 30 -year mortgage with a 5.0 percent interest rate, 3.0 down payment, and not accounting for homeowners insurance, real estate taxes, or any additional monthly expenses, a low-income borrower making $\$ 35,882$ per year (or less than 50 percent of the FFIEC adjusted median family income in the MSA) could afford a $\$ 119,802$ mortgage with a payment of $\$ 1,076$ per month; a moderate-income borrower earning $\$ 57,411$ per year (or less than 80 percent of the FFIEC adjusted median family income in the AA) could afford a $\$ 222,420$ mortgage with a payment of $\$ 1,722$ per month.

## Economic Data

According to Moody's Analytics February 2020 Report, the area's strengths include a well-educated workforce; above-average per capita income; and an above-average resilience of manufacturers. Employment increased to finally exceed its prior peak reached in 2000, however the job recovery was
nuanced. Durables manufacturing fell as did professional services. Meanwhile, education/healthcare had strong gains, with additional support from trade. The labor market was weak for most of 2019. As Wisconsin's only large urban hub, Milwaukee is rapidly developing into a medical center. Since 2011, the area's healthcare employment share has grown by 25 percent above Wisconsin's. Aurora Healthcare, Ascension Wisconsin and Froedtert Health, the area's three largest employers, account for more than 5 percent of jobs. Given an above-average age and still-aging state population, demand for medical services is high and Milwaukee relies more on healthcare employment than average, in stark contrast to the rest of Wisconsin. As healthcare jobs pay more than farm and manufacturing jobs, the sector's presence will further cement a sizable 20 percent to 25 percent wage gap with the average Wisconsin metro area. Housing value appreciation in the area has slowed recently.

## Community Contacts

Two community contacts completed during the examination period with organizations serving the area were reviewed to ascertain credit and community development needs. Contacts were completed with organizations focused on community and social services for low-income individuals and economic development. Contacts noted that there are major pockets of low-income families and individuals in Milwaukee County. Milwaukee and Ozaukee counties have high levels of income inequality. Many low-income families have difficulty in locating safe and affordable housing due to ongoing deferred maintenance issues with many multi-family dwellings. Contacts identified the following needs in the area:

- Affordable housing
- Financial capability training
- Workforce development
- Small business and entrepreneurship support
- Access to transportation.

## Scope of Evaluation in Wisconsin

The Milwaukee MSA, which accounts for 66.9 percent of the bank's deposits in the state of Wisconsin received a full-scope review. The remaining AAs in the state of Wisconsin received limited-scope reviews. Performance in limited-scope AAs and its effect on the CRA rating are discussed at the end of each test.

## CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN WISCONSIN

## LENDING TEST

The bank's performance under the Lending Test in the state of Wisconsin is rated High Satisfactory.

Performance in AAs receiving limited-scope reviews was factored together with performance from AAs receiving full-scope reviews to determine the state's overall Outstanding Lending Test rating. Limitedscope conclusions did not significantly affect the initial overall conclusions based on the AAs receiving full-scope review.

## Conclusions for Areas Receiving a Full-Scope Review

Based on a full-scope review, the bank's performance in the Milwaukee MSA is good. Overall excellent lending levels, and good borrower distribution, off-set weaker but adequate geographic distribution of loans. The low level of CD lending had a neutral effect on the rating. Product innovation and flexibility was considered favorably.

## Lending Activity

Lending levels reflect excellent responsiveness to credit needs in the AA.
Examiners considered the number and amount of home mortgage, small business, and small farm loans originated or purchased relative to Chase's capacity based on deposits, competition, and market presence. Lending activity for home mortgage and small loans to businesses received the most weight in reaching conclusions. Respectively, home mortgage lending and small loans to businesses account for 34.6 percent and 64.2 percent of the loan volume in the state by number and 84.1 and 14.8 percent of loan volume by dollar. Small farm lending is not a strategic focus of the bank and received minimal weight in reaching conclusions. Farm loans represented 1.1 percent of the loan volume in the state by number and 0.42 percent loan volume by dollar.

| Number of Loans* |  |  |  |  |  |  |  |

*The tables present the data for all assessment areas. The narrative below addresses performance in full-scope areas only.
Chase ranked third in deposits out of 46 financial institutions with a 9.8 percent market share.

In overall home mortgage lending, Chase ranked third out of 537 lenders with a 5.2 percent market share. The market is highly competitive. Other major lenders are Landmark Credit Union (10.9 percent), Wells Fargo Bank, N.A. (7.1 percent), and Associated Bank (4.7 percent).

In small loans to businesses, Chase ranked first out of 112 lenders with 18.5 percent market share. Other major lenders are U.S. Bank, N.A. (11.3 percent), State Bank of the Lakes (6.9 percent), and Town Bank ( 6.9 percent).

In small loans to farms, Chase ranked third out of 20 lenders with a 15.5 percent market share. The other major lenders and respective market shares are U.S. Bank, N.A. (31.6 percent), John Deere Financial, F.S.B. (20.1 percent), and BMO Harris Bank, N.A. (9.8 percent).

## Distribution of Loans by Income Level of the Geography

The bank exhibits adequate geographic distribution of loans in its AA.

## Home Mortgage Loans

Refer to Table O in the state of Wisconsin section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate. The following information was taken into consideration when determining this rating.

- The smaller proportion of housing units in low-income geographies, particularly OOUs (7.3 percent), constrained lending opportunities; therefore, performance in moderate-income geographies was given slightly more consideration due to the higher percentage of OOUs in those geographies.
- The high level of competition in the AA (537 home mortgage lenders) was also considered and examiners placed greater significance on performance compared to the aggregate of lenders.
- Between 2017 and 2019, the proportion of loans in low- income areas were well below the percentage of owner-occupied units and the aggregate distribution of loans. In moderate-income areas the proportion of loans was below the percentage of owner-occupied units and aggregate distribution of loans.
- During 2014 through 2016, performance in low- and moderate-income geographies was well below both the percentage of owner-occupied units and aggregate distribution of loans, while performance in moderate-income geographies was well below the percentage of owner-occupied units and below the aggregate distribution of loans.

## Small Loans to Businesses

Refer to Table Q in the state of Wisconsin section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of small loans to businesses for this evaluation is adequate. The following information was taken into consideration when determining this rating.

- Performance against the aggregate distribution of lenders was given additional consideration as it reflects the difficulties all lenders are experiencing due to the economic constraints discussed above under the Description of the Full-Scope AA.
- Between 2017 and 2019, the proportion of small loans to businesses in low-income geographies was well below both the proportion of businesses and the aggregate distribution, while the proportion of small loans to businesses in moderate-income geographies was below both the proportion of businesses and the aggregate distribution.
- During 2014 to 2016, the proportion of small loans to businesses in low-income geographies was well below both the proportion of businesses and the aggregate distribution, while the proportion of small loans to businesses in moderate-income geographies was well below both the proportion of businesses and the aggregate distribution.

## Small Loans to Farms

Refer to Table S in the state of Wisconsin section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to farms.

Based on the data in the tables and the following considerations, the bank's overall geographic distribution of small loans to farms is excellent. The following information was taken into consideration when determining this rating.

- The limited number of farms in low-income geographies (5.7 percent) constrained lending opportunities; therefore, performance in moderate-income geographies was given slightly more consideration due to the higher number of farms in those geographies.
- The fact that farm lending is not a focus of the bank was also considered.
- Between 2017 and 2019, the bank made no loans to small farms in low-income geographies. The proportion of loans to small farms in moderate-income geographies was near to the proportion of farms in those geographies and significantly exceeded the aggregate distribution of all lenders.
- During 2014 to 2016, performance in low-income geographies was stronger than performance during the 2017 to 2019 period. The proportion of loans to small farms in low-income geographies significantly exceeded both the proportion of farms and the aggregate distribution. In moderateincome geographies, performance was below the proportion of farms in those geographies and significantly exceeded the aggregate distribution for the respective geographies.

## Lending Gap Analysis

A review of home mortgage loans, small loans to business, and small loans to farms including summary reports and AA maps did not identify any unexplained conspicuous lending gaps in the bank's activities.

## Distribution of Loans by Income Level of the Borrower

The bank exhibits good distribution of loans among individuals of different income levels and business and farms of different sizes, given the product lines offered by the institution.

## Home Mortgage Loans

Refer to Table P in the state of Wisconsin section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases.

Based on the data in the tables and the following considerations, the bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good. The following information was taken into consideration when determining this rating.

- Greater significance was placed on performance against the aggregate distribution as it reflects the difficulties all lenders are experiencing due to competition and the economic constraints discussed above under the Description of this Full-Scope AA.
- Examiners particularly considered housing affordability challenges for low-income borrowers.
- Between 2017 and 2019, the proportion of loans to low-income borrowers was well below the percentage of low-income families and below the aggregate distribution of lenders. The proportion of loans to moderate-income borrowers exceeded the proportion of moderate-income families and the aggregate distribution.
- During 2014 to 2016, the proportion of loans to low-income borrowers was well below the percentage of low-income families and below the aggregate distribution of lenders. The proportion of moderate-income loans met the proportion of moderate-income families and was below the aggregate distribution.

## Small Loans to Businesses

Refer to Table R in the state of Wisconsin section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses.

Based on the data in the tables and the following factors, the distribution of the bank's originations and purchases of small loans to businesses by revenue category is good. The following information was taken into consideration when determining this rating.

- Between 2017 and 2019, the bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.
- During 2014 to 2016, the bank's performance was weaker than performance between 2017 and 2019. The bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was well below the percentage of businesses and exceeded the aggregate distribution.

## Small Loans to Farms

Refer to Table T in the state of California section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to farms.

Based on the data in the table and the following considerations, the distribution of the bank's originations and purchases of small loans to farms by revenue category is good. The following information was taken into consideration when determining this rating.

- The fact that farm lending is not a focus of the bank was considered.
- Between 2017 and 2019, the bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was below the percentage of businesses and exceeded the aggregate distribution.
- During 2014 to 2016, the bank's performance was stronger than performance between 2017 and 2019. The bank's percentage of loans to businesses with revenues of $\$ 1$ million or less was near to the percentage of businesses and exceeded the aggregate distribution.

## Community Development Lending

The bank has made a low level of CD loans.
The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The bank originated or purchased 14 CD loans totaling $\$ 23.6$ million, which represents less than 3 percent of the tier 1 capital allocated to the AA. The majority of the loans were for community service purposes, which is a need in the AA.

Examples of CD loans in the AA include:

- The bank funded a $\$ 1.0$ million loan to the School District of Cudahy to continue its efforts to offer quality education to low- and moderate-income students. The district, which serves 2,500 students, comprises five elementary schools, two middle schools, and one high school. Over 50.0 percent of the students are eligible for the free and reduced lunch program.
- The bank funded a $\$ 668,500$ loan to replace an existing library and it created additional housing in downtown Milwaukee, WI. The project is located in a low-income census tract and added 11 lowincome units of affordable housing. The renovation was deemed vital to spur economic growth in the downtown neighborhood.
- The bank originated a $\$ 7.0$ million loan to expand an academy that focuses on at-risk children in the city of Milwaukee to offer academic, social, emotional, and spiritual tools. The organization's mission is to serve men, women, and children who are homeless, hungry, or poor in the city of Milwaukee.

## Product Innovation and Flexibility

The bank makes extensive use of innovative and/or flexible lending practices to serve AA credit needs. A total of 2,512 loans were funded totaling nearly $\$ 414.8$ million. Refer to the comments in the Product Innovation and Flexibility section of this performance evaluation for additional details regarding the programs.

| Loan Type | Number of <br> Loans | Dollar Amount <br> $\mathbf{( \$ 0 0 0 ' s )}$ |
| :--- | :---: | :---: |
| DreaMaker | 550 | 86,020 |

| USDA | 161 | 28,778 |

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall High Satisfactory Lending Test rating and did not significantly affect the initial overall conclusions based on the AAs receiving full-scope review. Based on limited-scope reviews, performance under the Lending Test in the Appleton-Oshkosh-Neenah CSA, Green Bay MSA, Madison-Janesville-Beloit CSA, and WI Non-Metro AA is consistent with the bank's overall performance under the Lending Test in the full-scope area. Performance under the Lending Test in the Fond du Lac MSA is stronger than the bank's overall performance under the Lending Test in the full-scope area. Performance is stronger due to stronger geographic and borrower income distribution performance. Performance under the Lending Test in the Racine MSA is weaker than the bank's overall performance primarily due to the lack of CD lending.

Refer to Tables O through T in the state of Wisconsin section of appendix D for the facts and data that support these conclusions.

## INVESTMENT TEST

The bank's performance under the Investment Test in the state of Wisconsin is rated Outstanding.

## Conclusions for Area Receiving a Full-Scope Review

Based on a full-scope review, the bank's performance in the Milwaukee MSA is excellent.
The bank has an excellent level of qualified CD investments and grants, occasionally in a leadership position, particularly those that are not routinely provided by private investors. Current and prior period investments represent 13.0 percent of allocated tier 1 capital. The majority or 58.3 percent of total investments represent current period investments.

The bank exhibits excellent responsiveness to credit and community economic development needs. Identified credit needs are affordable housing, affordable rental housing, financial capability training for the underserved, and economic and workforce development. Affordable and rental housing comprised 65.3 percent of total qualified investment dollars in the AA and created or retained 3,633 housing units for low- and moderate-income individuals and families. Revitalization/stabilization represented 18.9 percent of investments and community services 15.8 percent. Sixty-four grants totaling $\$ 5.8$ million
were provided to a variety of organizations for purposes of affordable housing, revitalization/stabilization, and community services. In some occurrences, grants were provided in multiple years.

The bank makes extensive use of innovative and/or complex investments to support CD initiatives. Current and prior period complex investments were 53.9 percent or $\$ 55.6$ million of total investments, mainly related to affordable housing, community service, and revitalization/stabilization. Investments included seven Direct Investor LIHTC and 11 NMTC transactions. LIHTC investments required bank expertise and capacity in selecting projects and partners, negotiating agreements, overseeing project development and operations, and ensuring compliance. Thirty-two percent or $\$ 33.0$ million of total investments served as catalysts for future growth and other improvements.

Examples of CD Investments in the AA include:

- The bank provided a $\$ 1.7$ million grant (total grant $\$ 3.5$ million) to an organization for a program located in Milwaukee. The organization is rooted in the MKE United Strategic Action Agenda, an integrated economic development plan for inclusive growth of Milwaukee's downtown and adjacent communities. Targeted commercial districts are in three low- and moderate-income neighborhoods close to downtown that have suffered from historical disinvestment and are in opportunity zones. They include the north side-Martin Luther King Drive, North Fond Du Lac Avenue, and the south side-Cesar Chavez Drive and National Avenue. These programs will inject capital and financial and technical assistance for businesses to fuel expansion, redevelopment, and revitalization in low- and moderate-income neighborhoods.
- The bank originated an $\$ 8.9$ million LIHTC investment for apartments located in Milwaukee, Wisconsin. The new construction project was a 65 -unit mixed-use development in a five-story elevator-serviced building. Fifty-six (56) units were restricted to families earning up to 30, 50, and 60 percent of AMI, along with nine (9) market rate units. Thirteen (13) units were set aside at 30 percent AMI targeted for veterans and their families who are at risk of homelessness and require access to specific resources and services. Service organizations will help meet the needs of veteran tenants.
- The bank originated an $\$ 8.5$ million NMTC equity investment to finance the construction of a K-12 school located in a low-income census tract in Milwaukee, WI. The school provides access to college preparatory education and primarily serves low-income students in Wisconsin neighborhoods where access to excellent schools is limited. Over 600 students were housed in the four-story, 200,000 square foot facility in 2017 with 1,500 students expected by 2021. Estimates showed at least 85 percent of the students would be eligible for free or reduced-rate lunches. Bank financing enabled the school to provide a community health clinic, gym, track, soccer facility, swimming facility, playground, and handball courts. The project created new construction jobs.

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

## Statewide Investments in the State of Wisconsin

Qualified Investments with and without a $\mathrm{P} / \mathrm{M} / \mathrm{F}$ to serve areas in the broader statewide area had a positive impact on the overall state of Wisconsin Investment Test rating. Thirty-one (31) support affordable housing, 22 support community service, and one (1) supports revitalization/stabilization. Affordable housing investments totaled $\$ 50.2$ million, community service $\$ 7.9$ million, and revitalization/stabilization $\$ 5.8$ million. Twenty (20) of the community service investments were grants provided to consumer credit counseling agencies for financial education to low- and moderate-income individuals and families to assist them in using credit responsibly and building assets. These investments enhanced the bank's overall Investment Test rating for the state of Wisconsin.

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall Outstanding Investment Test rating and did not significantly change the initial overall conclusions based on the AA receiving fullscope review. Based on limited-scope reviews, the bank's performance under the Investment Test in the Appleton-Oshkosh-Neenah CSA, Fond du Lac MSA, Green Bay MSA, Madison-Janesville-Beloit CSA and WI Non-Metro AA is consistent with the bank's overall performance under the Investment Test in the full-scope area. Strong performance is due to high levels of investments in relation to allocated tier 1 capital. Performance in the Racine MSA is weaker than the bank's overall performance under the Investment Test in the full-scope area. Weaker performance is based on low levels of qualified investments compared to allocated tier 1 capital.

## SERVICE TEST

The bank's performance under the Service Test in Wisconsin is rated High Satisfactory.

## Conclusions for Area Receiving a Full-Scope Review

Based on a full-scope review, including the data in the tables below, the bank's performance in the Milwaukee MSA is good.

## Retail Banking Services

Service delivery systems are accessible to geographies and individuals of different income levels in the bank's AA.

Examiners evaluated the data as outlined in the Scope section at the front of this document including bank-provided data on usage of branches adjacent to low- and moderate-income geographies by individuals residing in those geographies and on increases in the usage of alternative delivery systems.

Based on the data in the table below and performance context, the branch distribution is good. In lowand moderate-income geographies, the distribution is respectively near to and well below the percentage of the population. The bank had four branches in low-income geographies and two branches in moderate-income geographies. The distribution was augmented by two MUI tract branches that serve moderate-income tracts. Examiners reviewed data on the accounts held and transactions conducted at the adjacent MUI branches and confirmed they were serving those low- and moderate-income populations.

| Distribution of Branch Delivery System |  |  |  |  |  |  |  | As of December 31, 2019 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Assessment Area | Deposits | Branches |  |  |  |  |  | Population |  |  |  |
|  | $\%$ of Rated | \# of <br> BANK <br> Branches | \% ofRatedAreaBranchesin AA | Location of Branches by Income of Geographies (\%) |  |  |  | \% of Population within Each Geography |  |  |  |
|  | Deposits in AA |  |  | Low | Mod | Mid | Upp | Low | Mod | Mid | Upp |
| Milwaukee MSA | 66.9 | 28 | 49.1 | 14.3 | 7.1 | 25.0 | 53.6 | 16.7 | 14.9 | 33.7 | 34.7 |

* May not add up to 100 percent due to geographies with unknown tract income level and rounding

Alternative delivery systems enhanced the delivery of banking services to geographies and individuals of all income levels. The OCC considered the availability and use of alternative delivery systems over the evaluation period. This included review of the bank's 60 deposit-taking ATMs, online banking, mobile banking, and telephone banking to determine the effectiveness of these systems to make retail banking services available to individuals in low- and moderate-income geographies. The bank increased the deposit-taking ATMs in low- and moderate-income geographies by 70.0 percent over the prior rating period to ten ( 16.7 percent) deposit-taking ATMs in low-income geographies and seven (11.7 percent) ATMs in moderate-income geographies. Additionally, bank-provided data on use of online, mobile, and telephone banking showed increases in the adoption of these services by low- and moderate-income individuals from the prior rating period.

| Distribution of Branch Openings/Closings |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | \# of Branch Openings | \# of Branch Closings | Net change in Location of Branches (+ or -) |  |  |  |
|  |  |  | Low | Mod | Mid | Upp |
| Milwaukee MSA | 0 | 2 | -1 | 0 | -1 | 0 |

The bank's opening and closing of branches has not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and/or to low- and moderate-income individuals. The bank closed one branch in a low-income geography and did not open or close any branches in moderate-income geographies. The branch closure was due to reduced customer usage and unprofitability. Despite the branch closure, branch locations remained accessible to geographies and individuals of different income levels in the bank's AA.

Services, including where appropriate, business hours, do not vary in a way that inconveniences its AA, particularly low- and moderate-income geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 6:00 pm and Saturday from 9:00 am to 2:00 pm. All retail banking services are available at all branches within the low- and moderate-income geographies.

## Community Development Services

The bank had a significant level of CD services that were responsive to AA needs.
Bank records show employees provided nearly 594 qualified CD service activities to 21 organizations, logging over 3,153 hours over a six-year period which benefitted more than 9,015 low- and moderateincome individuals. All the bank's assistance was to organizations that provide community services to low- and moderate-income individuals and families. The bank's community development services responsiveness varies to the community needs in the AA, particularly community services. Nonprofit and community partners identified the following needs in the community, affordable housing, and affordable rental housing. The following are examples of CD services provided:

- Bank employees provided more than 314 hours of board service for four different nonprofits that serve the needs of low- and moderate-income communities.
- The bank provided more than 60 homebuyer workshops and seminars for more than 90 hours, impacting approximately 2,000 low- and moderate-income individuals.
- Bank employees provided more than 150 training sessions for more than 600 hours, impacting more than 150 low- and moderate-income individuals.

## Conclusions for Areas Receiving Limited-Scope Reviews

Performance in the limited-scope AAs was factored into the state's overall High Satisfactory Service Test rating and did not significantly change the initial overall conclusions based on the AAs receiving full-scope review. Based on limited-scope reviews, the bank's performance under the Service Test in the WI Non-Metro AA is stronger the bank's overall performance under the Service Test in the fullscope area due to stronger branch distribution in low- and moderate-income geographies. The bank's performance in the Fond du Lac MSA, Green Bay MSA, Madison-Janesville-Beloit CSA, and Racine MSA is consistent with the bank's overall performance under the Service Test in the full-scope area. The bank's performance under the Appleton-Oshkosh-Neenah CSA is well below the bank's overall performance under the Service Test in the full-scope area due to no branches in moderate-income geographies. This AA had no low-income tracts.

## Appendix A: Scope of Examination

The following table identifies the time period covered in this evaluation, affiliate activities that were reviewed, and loan products considered. The table also reflects the MSAs and non-Metro AAs that received comprehensive examination review, designated by the term "full-scope," and those that received a less comprehensive review, designated by the term "limited-scope".

${ }^{(*)}$ The Lending Test is weighted more heavily than the Investment and Service Tests in the overall rating.

## Appendix C: Definitions and Common Abbreviations

The following terms and abbreviations are used in this performance evaluation, including the CRA tables. The definitions are intended to provide the reader with a general understanding of the terms, not a strict legal definition.

Affiliate: Any company that controls, is controlled by, or is under common control with another company. A company is under common control with another company if the same company directly or indirectly controls both companies. For example, a bank subsidiary is controlled by the bank and is, therefore, an affiliate.

Aggregate Lending (Aggt.): The number of loans originated and purchased by all reporting lenders (HMDA or CRA) in specified income categories as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the state/assessment area.

Census Tract (CT): A small, relatively permanent statistical subdivision of a county delineated by a local committee of census data users for the purpose of presenting data. Census tracts nest within counties, and their boundaries normally follow visible features, but may follow legal geography boundaries and other non-visible features in some instances, Census tracts ideally contain about 4,000 people and 1,600 housing units.

Combined Statistical Area (CSA): A geographic entity consisting of two or more adjacent Core Based Statistical Areas with employment interchange measures of at least 15. An employment interchange measure is a measure of ties between two adjacent entities. The employment interchange measure is the sum of the percentage of workers living in the smaller entity who work in the larger entity and the percentage of employment in the smaller entity that is accounted for by workers who reside in the larger entity.

Community Development (CD): Affordable housing (including multifamily rental housing) for low- or moderate-income individuals; community services targeted to low- or moderate-income individuals; activities that promote economic development by financing businesses or farms that meet Small Business Administration Development Company or Small Business Investment Company programs size eligibility standards or have gross annual revenues of \$1 million or less; or activities that revitalize or stabilize low- or moderate-income geographies, distressed or underserved nonmetropolitan middleincome geographies, or designated disaster areas.

Community Reinvestment Act (CRA): the statute that requires the OCC to evaluate a bank's record of meeting the credit needs of its entire community, including LMI areas, consistent with the safe and sound operation of the bank, and to take this record into account when evaluating certain corporate applications filed by the bank.

Consumer Loan(s): A loan(s) to one or more individuals for household, family, or other personal expenditures. A consumer loan does not include a home mortgage, small business, or small farm loan. This definition includes the following categories: motor vehicle loans, credit card loans, other secured consumer loans, and other unsecured consumer loans.

Family: Includes a householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption. The number of family households always equals the number of families; however, a family household may also include non-relatives living with the family. Families are classified by type as either a married-couple family or other family, which is further classified into 'male householder' (a family with a male householder' and no wife present) or 'female householder' (a family with a female householder and no husband present).

Full-Scope Review: Performance under the Lending, Investment, and Service Tests is analyzed considering performance context, quantitative factors (e.g., geographic distribution, borrower distribution, and total number and dollar amount of investments), and qualitative factors (e.g., innovativeness, complexity, and responsiveness).

Geography: A census tract delineated by the United States Bureau of the Census in the most recent decennial census.

Home Mortgage Disclosure Act (HMDA): The statute that requires certain mortgage lenders that conduct business or have banking offices in a metropolitan statistical area to file annual summary reports of their mortgage lending activity. The reports include such data as the race, gender, and the income of applicants, the amount of loan requested, the disposition of the application (e.g., approved, denied, and withdrawn), the lien status of the collateral, any requests for preapproval, and loans for manufactured housing.

Home Mortgage Loans: A closed-end mortgage loan or an open-end line of credit as these terms are defined under $\S 1003.2$ of this title, and that is not an excluded transaction under $\S 1003.3(\mathrm{c})(1)$ through (10) and (13) of this title.

Household: Includes all persons occupying a housing unit. Persons not living in households are classified as living in group quarters. In 100 percent tabulations, the count of households always equals the count of occupied housing units.

Limited-Scope Review: Performance under the Lending, Investment, and Service Tests is analyzed using only quantitative factors (e.g., geographic distribution, borrower distribution, total number and dollar amount of investments, and branch distribution).

Low-Income Individual: Individual income that is less than 50 percent of the area median income.
Low-Income Geography: A census tract with a median family income that is less than 50 percent.
Market Share: The number of loans originated and purchased by the institution as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the state/assessment area.

Median Family Income (MFI): The median income determined by the U.S. Census Bureau every five years and used to determine the income level category of geographies. The median is the point at which half of the families have income above, and half below, a range of incomes. Also, the median income determined by the Federal Financial Institutions Examination Council (FFIEC) annually that is used to determine the income level category of individuals. For any given area, the median is the point at which half of the families have income above, and half below, a range of incomes.

Metropolitan Division: As defined by Office of Management and Budget, a county or group of counties within a Core Based Statistical Area that contains an urbanized population of at least 2.5 million. A Metropolitan Division consists of one or more main/secondary counties that represent an employment center or centers, plus adjacent counties associated with the main/secondary county or counties through commuting ties.

Metropolitan Statistical Area: An area, defined by the Office of Management and Budget, as a core based statistical area associated with at least one urbanized area that has a population of at least 50,000 . The Metropolitan Statistical Area comprises the central county or counties containing the core, plus adjacent outlying counties having a high degree of social and economic integration with the central county or counties as measured through commuting.

Middle-Income: Individual income that is at least 80 percent and less than 120 percent of the area median income, or a median family income that is at least 80 percent and less than 120 percent, in the case of a geography

Moderate-Income: Individual income that is at least 50 percent and less than 80 percent of the area median income, or a median family income that is at least 50 percent and less than 80 percent, in the case of a geography.

Multifamily: Refers to a residential structure that contains five or more units.
MMSA (state): Any multistate metropolitan statistical area or multistate combined statistical area, as defined by the Office of Management and Budget.

Owner-Occupied Units: Includes units occupied by the owner or co-owner, even if the unit has not been fully paid for or is mortgaged.

Qualified Investment: A qualified investment is defined as any lawful investment, deposit, membership share, or grant that has as its primary purpose community development.

Rating Area: A rated area is a state or multi-state metropolitan statistical area. For an institution with domestic branches in only one state, the institution's CRA rating would be the state rating. If an institution maintains domestic branches in more than one state, the institution will receive a rating for each state in which those branches are located. If an institution maintains domestic branches in two or more states within a multi-state metropolitan statistical area, the institution will receive a rating for the multi-state metropolitan statistical area.

Small Loan(s) to Business(es): A loan included in 'loans to small businesses' as defined in the Consolidated Report of Condition and Income (Call Report) instructions. These loans have original amounts of $\$ 1$ million or less and typically are either secured by nonfarm or nonresidential real estate or are classified as commercial and industrial loans.

Small Loan(s) to Farm(s): A loan included in 'loans to small farms' as defined in the instructions for preparation of the Consolidated Report of Condition and Income (Call Report). These loans have original amounts of $\$ 500,000$ or less and are either secured by farmland or are classified as loans to finance agricultural production and other loans to farmers.

Tier 1 Capital: The total of common shareholders' equity, perpetual preferred shareholders' equity with non-cumulative dividends, retained earnings and minority interests in the equity accounts of consolidated subsidiaries.

Upper-Income: Individual income that is at least 120 percent of the area median income, or a median family income that is at least 120 percent, in the case of a geography.

## Appendix D: Tables of Performance Data

## Content of Standardized Tables

A separate set of tables is provided for each state. All multistate metropolitan statistical areas, if applicable, are presented in one set of tables. References to the bank include activities of any affiliates that the bank provided for consideration (refer to appendix A: Scope of the Examination). For purposes of reviewing the Lending Test tables, the following are applicable: (1) purchased loans are treated the same as originations; and (2) aggregate is the percentage of the aggregate number of reportable loans originated and purchased by all HMDA or CRA reporting lenders in the MMSA/assessment area. Deposit data are compiled by the FDIC and are available as of June $30^{\text {th }}$ of each year. Tables without data are not included in this PE.

The following is a listing and brief description of the tables included in each set:
Table O. Assessment Area Distribution of Home Mortgage Loans by Income Category of the Geography - Compares the percentage distribution of the number of loans originated and purchased by the bank in low-, moderate-, middle-, and upper-income geographies to the percentage distribution of owner-occupied housing units throughout those geographies. The table also presents aggregate peer data for the years the data is available.

Table P. Assessment Area Distribution of Home Mortgage Loans by Income Category of the Borrower - Compares the percentage distribution of the number of loans originated and purchased by the bank to low-, moderate-, middle-, and upper-income borrowers to the percentage distribution of families by income level in each MMSA/assessment area. The table also presents aggregate peer data for the years the data is available.

Table Q. Assessment Area Distribution of Loans to Small Businesses by Income Category of the Geography - The percentage distribution of the number of small loans (less than or equal to $\$ 1$ million) to businesses that were originated and purchased by the bank in low-, moderate-, middle-, and upper-income geographies compared to the percentage distribution of businesses (regardless of revenue size) in those geographies. Because aggregate small business data are not available for geographic areas smaller than counties, it may be necessary to compare bank loan data to aggregate data from geographic areas larger than the bank's assessment area.

Table R. Assessment Area Distribution of Loans to Small Businesses by Gross Annual Revenue - Compares the percentage distribution of the number of small loans (loans less than or equal to $\$ 1$ million) originated and purchased by the bank to businesses with revenues of $\$ 1$ million or less to: 1) the percentage distribution of businesses with revenues of greater than $\$ 1$ million; and, 2) the percentage distribution of businesses for which revenues are not available. The table also presents aggregate peer small business data for the years the data is available.

Table S. Assessment Area Distribution of Loans to Farms by Income Category of the Geography - The percentage distribution of the number of small loans (less than or equal to $\$ 500,000$ ) to farms originated and purchased by the bank in low-, moderate-, middle-,
and upper-income geographies compared to the percentage distribution of farms (regardless of revenue size) throughout those geographies. Because aggregate small farm data are not available for geographic areas smaller than counties, it may be necessary to use geographic areas larger than the bank's assessment area.

Table T. Assessment Area Distribution of Loans to Farms by Gross Annual Revenues -
Compares the percentage distribution of the number of small loans (loans less than or equal to $\$ 500$ thousand) originated and purchased by the bank to farms with revenues of $\$ 1$ million or less to: 1) the percentage distribution of farms with revenues of greater than $\$ 1$ million; and, 2) the percentage distribution of farms for which revenues are not available. The table also presents aggregate peer small farm data for the years the data is available.

Table U. Assessment Area Distribution of Consumer Loans by Income Category of the Geography - Compares the percentage distribution of the number of loans originated and purchased by the bank in low-, moderate-, middle-, and upper-income geographies to the percentage distribution of households in those geographies.

Table V. Assessment Area Distribution of Consumer Loans by Income Category of the Borrower - Compares the percentage distribution of the number of loans originated and purchased by the bank to low-, moderate-, middle-, and upper-income borrowers to the percentage distribution of households by income level in each MMSA/assessment area.

## Overview

JPMorgan Chase \& Co. ("JPMorgan Chase" or the "Firm", NYSE: JPM), a financial holding company incorporated under Delaware law in 1968, is a leading financial services firm based in the United States of America ("U.S."), with operations worldwide. JPMorgan Chase had $\$ 3.7$ trillion in assets and $\$ 292.3$ billion in stockholders' equity as of December 31, 2022. The Firm is a leader in investment banking, financial services for consumers and small businesses, commercial banking, financial transaction processing and asset management. Under the J.P. Morgan and Chase brands, the Firm serves millions of customers, predominantly in the U.S., and many of the world's most prominent corporate, institutional and government clients globally.
JPMorgan Chase's principal bank subsidiary is JPMorgan Chase Bank, National Association ("JPMorgan Chase Bank, N.A."), a national banking association with U.S. branches in 48 states and Washington, D.C. JPMorgan Chase's principal non-bank subsidiary is J.P. Morgan Securities LLC ("J.P. Morgan Securities"), a U.S. broker-dealer. The bank and nonbank subsidiaries of JPMorgan Chase operate nationally as well as through overseas branches and subsidiaries, representative offices and subsidiary foreign banks. The Firm's principal operating subsidiaries outside the U.S. are J.P. Morgan Securities plc and J.P. Morgan SE ("JPMSE"), which are subsidiaries of JPMorgan Chase Bank, N.A. and are based in the United Kingdom ("U.K.") and Germany, respectively.

The Firm's website is www.jpmorganchase.com. JPMorgan Chase makes available on its website, free of charge, annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K pursuant to Section 13(a) or Section 15(d) of the Securities Exchange Act of 1934, as soon as reasonably practicable after it electronically files or furnishes such material to the U.S. Securities and Exchange Commission (the "SEC") at www.sec.gov. JPMorgan Chase makes new and important information about the Firm available on its website at https://www.jpmorganchase.com, including on the Investor Relations section of its website at https://www.jpmorganchase.com/ir. Information on the Firm's website is not incorporated by reference into this Annual Report on Form 10-K for the year ended December 31, 2022 ("2022 Form 10-K" or "Form 10-K") or the Firm's other filings with the SEC. The Firm has adopted, and posted on its website, a Code of Conduct for all employees of the Firm and a Code of Ethics for its Chairman and Chief Executive Officer, Chief Financial Officer, Principal Accounting Officer and all other professionals of the Firm worldwide serving in a finance, accounting, treasury, tax or investor relations role. The Code of Ethics is also available in print upon request to the Firm's Investor Relations team. Within the time period required by the SEC, JPMorgan Chase will post on its website any amendment to the Code of Ethics and any waiver applicable to a director or executive officer.

## Business segments

For management reporting purposes, JPMorgan Chase's activities are organized into four major reportable business segments, as well as a Corporate segment. The Firm's consumer business is the Consumer \& Community Banking ("CCB") segment. The Firm's wholesale business segments are the Corporate \& Investment Bank ("CIB"), Commercial Banking ("CB"), and Asset \& Wealth Management ("AWM").
A description of the Firm's business segments and the products and services they provide to their respective client bases is provided in the "Business segment results" section of Management's discussion and analysis of financial condition and results of operations ("Management's discussion and analysis" or "MD\&A"), beginning on page 46 and in Note 32.

## Competition

JPMorgan Chase and its subsidiaries and affiliates operate in highly competitive environments. Competitors include other banks, brokerage firms, investment banking companies, merchant banks, hedge funds, commodity trading companies, private equity firms, insurance companies, mutual fund companies, investment managers, credit card companies, mortgage banking companies, trust companies, securities processing companies, automobile financing companies, leasing companies, e-commerce and other internet-based companies, financial technology companies, and other companies engaged in providing similar as well as new products and services. The Firm's businesses generally compete on the basis of the quality and variety of the Firm's products and services, transaction execution, innovation, reputation and price. Competition also varies based on the types of clients, customers, industries and geographies served. With respect to some of its geographies and products, JPMorgan Chase competes globally; with respect to others, the Firm competes on a national or regional basis. New competitors in the financial services industry continue to emerge, including firms that offer products and services solely through the internet and non-financial companies that offer products and services that disintermediate traditional banking products and services offered by financial services firms such as JPMorgan Chase.

## Part I

## Human capital

JPMorgan Chase believes that its long-term growth and success depend on its ability to attract, develop and retain a highperforming and diverse workforce, with inclusion and accessibility as key components of the way the Firm does business. The information provided below relates to JPMorgan Chase's full-time and part-time employees and does not include the Firm's contractors.

## Global workforce

As of December 31, 2022, JPMorgan Chase had 293,723 employees globally, an increase of 22,698 employees from the prior year. The increase was primarily attributable to additional employees in technology and operations, as well as front office. The Firm's employees are located in 63 countries, with over $60 \%$ of the Firm's employees located in the U.S. The following table presents the distribution of the Firm's global workforce by region and by line of business ("LOB") and Corporate as of December 31, 2022 :

| Employee Breakdown by Region |  |
| :--- | ---: |
| Region | Employees |
| North America | 178,599 |
| Asia-Pacific | 82,696 |
| Europe/Middle East/Africa | 27,514 |
| Latin America/Caribbean | 4,914 |
| Total Firm | $\mathbf{2 9 3 , 7 2 3}$ |

|  | Employee Breakdown by LOB and Corporate |
| :--- | ---: |
| LOB | Employees |
| CCB | 135,347 |
| CIB | 73,452 |
| CB | 14,687 |
| AWM | 26,041 |
| Corporate | 44,196 |
| Total Firm | $\mathbf{2 9 3 , 7 2 3}$ |

## Diversity, equity and inclusion

In connection with its diversity initiatives, the Firm periodically requests that its employees and Board members self-identify based on specified diversity categories. The following table presents information on self-identifications as of December 31, 2022. Information on race/ethnicity of employees is categorized based on Equal Employment Opportunity ("EEO") classifications and is presented for U.S. employees who self-identified, and information on gender is presented for global employees who self-identified. Information on race/ethnicity and gender for members of the Operating Committee and the Board of Directors reflects all such members. Information on LGBTQ+ and veteran statuses is based on U.S. employees, and all members of the Operating Committee and the Board of Directors. Information on disability status is based on all U.S. employees and all members of the Operating Committee.

| December 31, 2022 | Total employees | Senior level employees ${ }^{(\text {e) }}$ | Operating Committee | Board of Directors ${ }^{(f)}$ |
| :---: | :---: | :---: | :---: | :---: |
| Race/Ethnicity ${ }^{(a)}$ : |  |  |  |  |
| White | 44 \% | 75 \% | 83 \% | 91 \% |
| Hispanic | 21 \% | 6 \% | 11 \% | - |
| Asian | 18 \% | 12 \% | 6 \% | - |
| Black | 14 \% | $5 \%$ | - | $9 \%$ |
| Other ${ }^{(b)}$ | 3 \% | 2 \% | - | - |
| Gender ${ }^{(c)}$ : |  |  |  |  |
| Men | 51 \% | 73 \% | 61 \% | 64 \% |
| Women | 49 \% | 27 \% | 39 \% | 36 \% |
| LGBTQ+ ${ }^{(d)}$ | 4 \% | 3 \% | 6 \% | - |
| Military veterans ${ }^{(d)}$ | 3 \% | 2 \% | - | 9 \% |
| People with disabilities ${ }^{(d)}$ | $4 \%$ | $3 \%$ | - | - (g) |

(a) Based on EEO metrics. Presented as a percentage of the respective populations who self-identified race/ethnicity, which was $96 \%$ and $95 \%$ of the Firm's total U.S.-based employees and U.S.-based senior level employees, respectively, and all members of the Operating Committee and the Board of Directors. Information for the Operating Committee include one member who is based outside of the U.S.
(b) Other includes American Indian or Alaskan Native, Native Hawaiian or Other Pacific Islander, and two or more races/ethnicities.
(c) Presented as a percentage of the respective populations who self-identified gender, which was $98 \%$ of the Firm's total global employees and $99 \%$ of the Firm's global senior level employees, and all members of the Operating Committee and the Board of Directors.
(d) Presented as a percentage of total U.S.-based employees, total U.S.-based senior level employees, all members of the Operating Committee, and all members of the Board of Directors, respectively.
(e) Senior level employees represents employees with the titles of Managing Director and above.
(f) Excludes Alicia Boler Davis, who was elected to the Firm's Board of Directors, effective March 20, 2023.
(g) The Firm did not request members of the Board of Directors to self-identify disability status.

## Firm culture

The foundations of JPMorgan Chase's culture are its core values and How We Do Business Principles, which are fundamental to the Firm's success and are represented by four central corporate tenets: exceptional client service; operational excellence; a commitment to integrity, fairness and responsibility; and cultivation of a great team and winning culture. The Firm maintains its focus on its culture of inclusion and respect, which is reinforced by its Code of Conduct and by increasing employee awareness, education, communication and training. An important part of these efforts includes the Firm's Business Resource Groups, which are groups of employees who support JPMorgan Chase's diversity, equity and inclusion strategies by leveraging the unique perspectives of their members. The Firm has global Diversity, Equity \& Inclusion centers of excellence that lead the Firm's strategy in supporting its commitments to create more equity and lasting impact in communities, and strengthen its inclusive culture.

## Attracting and retaining employees

The goal of JPMorgan Chase's recruitment efforts is to attract and hire talented individuals in all roles and at all career levels. The Firm strives to provide both external candidates and internal employees who are seeking a different role with challenging and stimulating career opportunities. These opportunities range from internship training programs for students to entry-level, management and executive careers. During 2022, approximately twothirds of the Firm's employment opportunities were filled by external candidates, with the remainder filled by existing employees. In addition, depending on business needs, and where appropriate, the Firm has implemented hybrid work models which include a mix of on-site and remote work for certain roles.

Diversity is an important area of focus throughout the Firm's hiring process. JPMorgan Chase engages in efforts aimed at hiring diverse talent, including initiatives focused on gender, underrepresented ethnic groups, LGBTQ+ individuals, people with disabilities, veterans and others. The Firm's global Diversity, Equity \& Inclusion centers of excellence seek to increase representation of and advance career opportunities for talented diverse individuals across the Firm through initiatives such as career coaching and mentorship.

JPMorgan Chase offers a competitive fellowship program that seeks to attract accomplished individuals who have taken a career break and wish to return to the workforce. In addition, and where appropriate, the Firm's hiring practices focus on the skills of a job candidate rather than degrees held.

## Developing employees

JPMorgan Chase supports the professional development and career growth of its employees. An onboarding training curriculum is required for new hires, which covers, among other topics, compliance with the Firm's Code of Conduct and information concerning Firm policies and standards,
including those relating to cybersecurity. In addition, the Firm offers extensive training programs and educational resources to all employees, covering a broad variety of topics such as leadership, change management, analytical thinking, culture and conduct, diversity, equity and inclusion, and risk and controls. Leadership Edge, the Firm's global leadership and management development center of excellence, is focused on creating one Firmwide leadership culture.

## Compensation and benefits

The Firm provides market-competitive compensation and benefits programs. JPMorgan Chase's compensation philosophy includes guiding principles that drive compensation-related decisions across the Firm, and includes: pay-for-performance practices designed to attract and retain top talent; responsiveness and alignment with shareholder interests; and reinforcement of the Firm's culture and How We Do Business Principles, including the integration of risk, controls and conduct considerations. The Firm's commitment to diversity, equity and inclusion for all employees includes compensation review processes that seek to ensure that the Firm's employees are paid equitably and competitively for the work they do.

The Firm also supports employees' well-being. JPMorgan Chase offers an extensive benefits and wellness package to employees and their families, including healthcare coverage, retirement benefits, life and disability insurance, on-site health and wellness centers, counseling and resources related to mental health, employee assistance programs, competitive vacation and leave policies, backup child care arrangements, tuition reimbursement programs, and financial coaching. In 2022, the Firm implemented or announced enhancements to certain health and wellness benefits for U.S. employees, including expanded medical plan coverage and paid time off policies related to parental, critical caregiving and bereavement leaves.

## Part I

## Supervision and regulation

The Firm is subject to extensive and comprehensive regulation under U.S. federal and state laws, as well as the applicable laws of the jurisdictions outside the U.S. in which the Firm does business.

Financial holding company:
Consolidated supervision. JPMorgan Chase \& Co. is a bank holding company ("BHC") and a financial holding company ("FHC") under U.S. federal law, and is subject to comprehensive consolidated supervision, regulation and examination by the Board of Governors of the Federal Reserve System (the "Federal Reserve"). The Federal Reserve acts as the supervisor of the consolidated operations of BHCs. Certain of JPMorgan Chase's subsidiaries are also regulated directly by additional authorities based on the activities or licenses of those subsidiaries.

JPMorgan Chase's national bank subsidiary, JPMorgan Chase Bank, N.A., is supervised and regulated by the Office of the Comptroller of the Currency ("OCC") and, with respect to certain matters, by the Federal Deposit Insurance Corporation (the "FDIC").

JPMorgan Chase's U.S. broker-dealers are supervised and regulated by the Securities and Exchange Commission ("SEC") and the Financial Industry Regulatory Authority ("FINRA"). Subsidiaries of the Firm that engage in certain futures-related and swaps-related activities are supervised and regulated by the Commodity Futures Trading Commission ("CFTC"). J.P. Morgan Securities plc is a U.K.based bank regulated by the U.K. Prudential Regulation Authority (the "PRA") and the U.K. Financial Conduct Authority ("FCA").

JPMSE is a Germany-based credit institution regulated by the European Central Bank ("ECB") as well as the local regulators in each of the countries in which it operates. The Firm's other non-U.S. subsidiaries are regulated by the banking, securities, prudential and conduct regulatory authorities, as applicable, in the countries in which they operate.

Permissible business activities. The Bank Holding Company Act restricts BHCs from engaging in business activities other than the business of banking and certain closely-related activities. FHCs are permitted to engage in a broader range of financial activities. The Federal Reserve has the authority to limit an FHC's ability to conduct otherwise permissible activities if the FHC or any of its depository institution subsidiaries ceases to meet applicable eligibility requirements. The Federal Reserve may also impose corrective capital and/or managerial requirements on the FHC, and if deficiencies are persistent, may require divestiture of the FHC's depository institutions. If any depository institution controlled by an FHC fails to maintain a satisfactory rating under the Community Reinvestment Act, the Federal Reserve must prohibit the FHC and its subsidiaries from engaging in any new activities other than
those permissible for BHCs, or acquiring a company engaged in such activities.

Capital and liquidity requirements. The Federal Reserve establishes capital, liquidity and leverage requirements for JPMorgan Chase that are generally consistent with the international Basel III capital and liquidity framework and evaluates the Firm's compliance with those requirements. The OCC establishes similar requirements for JPMorgan Chase Bank, N.A. Certain of the Firm's non-U.S. subsidiaries and branches are also subject to local capital and liquidity requirements.

Banking supervisors globally continue to refine and enhance the Basel III capital framework for financial institutions. U.S. banking regulators have announced their support for the issuance of the Basel III reforms and are considering how to appropriately apply such reforms in the U.S.

Refer to Capital Risk Management on pages 86-96 and Liquidity Risk Management on pages 97-104.
Stress tests. As a large BHC, JPMorgan Chase is subject to supervisory stress testing administered by the Federal Reserve as part of the Federal Reserve's annual Comprehensive Capital Analysis and Review ("CCAR") framework. The Firm must conduct annual company-run stress tests and must also submit an annual capital plan to the Federal Reserve, taking into account the results of separate stress tests designed by the Firm and the Federal Reserve. The Federal Reserve uses the results under the severely adverse scenario from its supervisory stress test to determine the Firm's Stress Capital Buffer ("SCB") requirement for the coming year, which forms part of the Firm's applicable capital buffers. The Firm is required to file its annual CCAR submission on April 5, 2023. The Federal Reserve will notify the Firm of its indicative SCB requirement by June 30, 2023 and final SCB requirement by August 31, 2023. The Firm's final SCB requirement will become effective on October 1, 2023. The OCC requires JPMorgan Chase Bank, N.A. to perform separate, similar stress tests annually. The Firm publishes each year the results of the annual stress tests for the Firm and JPMorgan Chase Bank, N.A. under the supervisory "severely adverse" scenarios provided by the Federal Reserve and the OCC. Refer to Capital Risk Management on pages 86-96 for more information concerning the Firm's CCAR.

Enhanced prudential standards. As part of its mandate to identify and monitor risks to the financial stability of the U.S. posed by large banking organizations, the Financial Stability Oversight Council ("FSOC") recommends prudential standards and reporting requirements to the Federal Reserve for systemically important financial institutions ("SIFIs"), such as JPMorgan Chase. The Federal Reserve has adopted several rules to implement those heightened prudential standards, including rules relating to risk management and corporate governance of subject BHCs. JPMorgan Chase is required under these rules to comply with enhanced liquidity and overall risk
management standards, including oversight by the board of directors of risk management activities.

Resolution and recovery. The Firm is required to maintain a comprehensive recovery plan, updated annually, summarizing the actions it would take to remain wellcapitalized and well-funded in order to avoid failure in the case of an adverse event. In addition, JPMorgan Chase Bank, N.A. is required to prepare and submit a recovery plan as directed by the OCC. The Firm is required to submit periodically to the Federal Reserve and the FDIC a plan for resolution in the event of material distress or failure (a "resolution plan"). In 2019, the FDIC and Federal Reserve revised the regulations governing resolution plan requirements, and on the basis of those revisions, the Firm's resolution plan submissions will alternate between "targeted" and "full" plans. The Firm's "targeted" resolution plan was filed on June 28, 2021, and the Firm's next "full" resolution plan is due to be filed on or before July 1, 2023. JPMorgan Chase Bank, N.A. is also required to prepare and submit a separate resolution plan as directed by the FDIC on or before December 1, 2023.

Certain of the Firm's non-U.S. subsidiaries and branches are also subject to local resolution and recovery planning requirements.

Orderly liquidation authority. Certain financial companies, including JPMorgan Chase and certain of its subsidiaries, can also be subjected to resolution under an "orderly liquidation authority." The U.S. Treasury Secretary, in consultation with the President of the United States, must first make certain determinations concerning extraordinary financial distress and systemic risk, and action must be recommended by the FDIC and the Federal Reserve. Absent such actions, the Firm, as a BHC, would remain subject to resolution under the Bankruptcy Code. The FDIC has issued a draft policy statement describing its "single point of entry" strategy for resolution of SIFIs under the orderly liquidation authority, which seeks to keep operating subsidiaries of a BHC open and impose losses on shareholders and creditors of the BHC in receivership according to their statutory order of priority.

Holding company as a source of strength. JPMorgan Chase \& Co. is required to serve as a source of financial strength for its depository institution subsidiaries and to commit resources to support those subsidiaries, including when directed to do so by the Federal Reserve.

Regulation of acquisitions. Acquisitions by BHCs and their banks are subject to requirements, limitations and prohibitions established by law and by the Federal Reserve and the OCC. For example, FHCs and BHCs are required to obtain the approval of the Federal Reserve before they acquire more than $5 \%$ of the voting shares of an unaffiliated bank. In addition, acquisitions by financial companies are prohibited if, as a result of the acquisition, the total liabilities of the financial company would exceed $10 \%$ of the total liabilities of all financial companies. Furthermore, for certain acquisitions, the Firm must
provide written notice to the Federal Reserve prior to acquiring direct or indirect ownership or control of any voting shares of any company with over $\$ 10$ billion in assets that is engaged in activities that are "financial in nature." Moreover, while FHCs may engage in a broader range of activities (including acquisitions) than BHCs, the Federal Reserve has the authority to limit an FHC's ability to conduct otherwise permissible acquisitions if the FHC or any of its depository institution subsidiaries ceases to meet applicable eligibility requirements.

Ongoing obligations. The Firm is subject to obligations under the terms of a Deferred Prosecution Agreement entered into with the Department of Justice on September 29,2020 relating to precious metals and U.S. Treasuries markets investigations as well as under a related order issued by the CFTC.

## Subsidiary banks:

The activities of JPMorgan Chase Bank, N.A., the Firm's principal subsidiary bank, are limited to those specifically authorized under the National Bank Act and related interpretations of the OCC. The OCC has authority to bring an enforcement action against JPMorgan Chase Bank, N.A. for unsafe or unsound banking practices, which could include limiting JPMorgan Chase Bank, N.A.'s ability to conduct otherwise permissible activities, or imposing corrective capital or managerial requirements on the bank.

FDIC deposit insurance. The FDIC deposit insurance fund provides insurance coverage for certain deposits and is funded through assessments on banks, including JPMorgan Chase Bank, N.A.

FDIC powers upon a bank insolvency. Upon any insolvency of JPMorgan Chase Bank, N.A., the FDIC could be appointed as conservator or receiver under the Federal Deposit Insurance Act. The FDIC has broad powers to transfer assets and liabilities without the approval of the institution's creditors.

Prompt corrective action. The Federal Deposit Insurance Corporation Improvement Act of 1991 requires the relevant federal banking regulator to take "prompt corrective action" with respect to a depository institution if that institution does not meet certain capital adequacy standards. The Federal Reserve is also authorized to take appropriate action against the parent BHC, such as JPMorgan Chase \& Co., based on the undercapitalized status of any bank subsidiary. In certain instances, the BHC would be required to guarantee the performance of the capital restoration plan for its undercapitalized subsidiary.

OCC Heightened Standards. The OCC has established guidelines setting forth heightened standards for large banks, including minimum standards for the design and implementation of a risk governance framework for banks. Under these standards, a bank's risk governance framework must ensure that the bank's risk profile is easily distinguished and separate from that of its parent BHC for risk management purposes. The bank's board or risk

## Part I

committee is responsible for approving the bank's risk governance framework, providing active oversight of the bank's risk-taking activities, and holding management accountable for adhering to the risk governance framework.

Restrictions on transactions with affiliates. JPMorgan Chase Bank, N.A. and its subsidiaries are subject to restrictions imposed by federal law on extensions of credit to, investments in stock or securities of, and derivatives, securities lending and certain other transactions with, JPMorgan Chase \& Co. and certain other affiliates. These restrictions prevent JPMorgan Chase \& Co. and other affiliates from borrowing from such subsidiaries unless the loans are secured in specified amounts and comply with certain other requirements.

Dividend restrictions. Federal law imposes limitations on the payment of dividends by national banks, such as JPMorgan Chase Bank, N.A. Refer to Note 26 for the amount of dividends that JPMorgan Chase Bank, N.A. could pay, at January 1, 2023, to JPMorgan Chase without the approval of the banking regulators. The OCC and the Federal Reserve also have authority to prohibit or limit the payment of dividends of a bank subsidiary that they supervise if, in the banking regulator's opinion, payment of a dividend would constitute an unsafe or unsound practice in light of the financial condition of the bank.

Depositor preference. Under federal law, the claims of a receiver of an insured depositary institution ("IDI") for administrative expense and the claims of holders of U.S. deposit liabilities (including the FDIC and deposits in nonU.S. branches that are dually payable in the U.S. and in a non-U.S. branch) have priority over the claims of other unsecured creditors of the institution, including depositors in non-U.S. branches and public noteholders.

Consumer supervision and regulation. JPMorgan Chase and JPMorgan Chase Bank, N.A. are subject to supervision and regulation by the Consumer Financial Protection Bureau ("CFPB") with respect to federal consumer protection laws, including laws relating to fair lending and the prohibition of unfair, deceptive or abusive acts or practices in connection with the offer, sale or provision of consumer financial products and services. The CFPB also has jurisdiction over small business lending activities with respect to fair lending and the Equal Credit Opportunity Act. As part of its regulatory oversight, the CFPB has authority to take enforcement actions against firms that offer certain products and services to consumers using practices that are deemed to be unfair, deceptive or abusive. In February 2023, the CFPB proposed a rule that would significantly reduce and limit the late payment fees that credit card issuers, including the Firm, would be permitted to charge to customers. The Firm's consumer activities are also subject to regulation under state statutes which are enforced by the Attorney General or empowered agency of each state.

In the U.K., the Firm operates a retail bank through J.P. Morgan Europe Limited ("JPMEL") and provides retail investment management services through Nutmeg Saving
and Investment Limited ("Nutmeg"). JPMEL is regulated by the PRA, and both JPMEL and Nutmeg are regulated by the FCA with respect to their conduct of financial services in the U.K., including obligations relating to the fair treatment of customers. JPMEL is also regulated by the U.K. Payment Systems Regulator with respect to its operation and use of payment systems. In addition, the retail businesses of JPMEL and Nutmeg are subject to U.K. consumer-protection legislation.

Securities and broker-dealer regulation: The Firm conducts securities underwriting, dealing and brokerage activities in the U.S. through J.P. Morgan Securities LLC and other non-bank broker-dealer subsidiaries, all of which are subject to regulations of the SEC, FINRA and the New York Stock Exchange, among others. The Firm conducts similar securities activities outside the U.S. subject to local regulatory requirements. In the U.K., those activities are conducted by J.P. Morgan Securities plc. Broker-dealers are subject to laws and regulations covering all aspects of the securities business, including sales and trading practices, securities offerings, publication of research reports, use of customer funds, the financing of client purchases, capital structure, recordkeeping and retention, and the conduct of their directors, officers and employees. Refer to Broker-dealer regulatory capital on page 96 for information concerning the capital of J.P. Morgan Securities LLC and J.P. Morgan Securities plc.

Investment management regulation:
The Firm's asset and wealth management businesses are subject to significant regulation in jurisdictions around the world relating to, among other things, the safeguarding and management of client assets, offerings of funds and marketing activities. Certain of the Firm's subsidiaries are registered with, and subject to oversight by, the SEC as investment advisers and broker-dealers. The Firm's registered investment advisers in the United States are subject to the fiduciary and other obligations imposed under the Investment Advisers Act of 1940 and applicable state and federal law. The Firm's bank fiduciary activities are subject to supervision by the OCC.

## Derivatives regulation:

The Firm is subject to comprehensive regulation of its derivatives businesses, including regulations that impose capital and margin requirements, require central clearing of standardized over-the-counter ("OTC") derivatives, mandate that certain standardized OTC swaps be traded on regulated trading venues, and provide for reporting of certain mandated information. JPMorgan Chase Bank, N.A., J.P. Morgan Securities LLC and J.P. Morgan Securities plc are registered with the CFTC as "swap dealers". In addition, JPMorgan Chase Bank, N.A. and J.P. Morgan Securities LLC are registered with the SEC as "security-based swap dealers". As a result, these entities are subject to a comprehensive regulatory framework applicable to their swap or security-based swap activities, including capital requirements, rules requiring the collateralization of uncleared swaps and security-based swaps, rules regarding
segregation of counterparty collateral, business conduct and documentation standards, record-keeping and reporting obligations, and anti-fraud and anti-manipulation requirements. Similar requirements have also been established under the European Market Infrastructure Regulation ("EMIR") and the Markets in Financial Instruments Directive ("MiFID II"), as implemented in the EU and as adopted in the U.K.
J.P. Morgan Securities LLC is also registered with the CFTC as a futures commission merchant and is a member of the National Futures Association.

Data, privacy and cybersecurity regulation:
The Firm and its subsidiaries are subject to laws, rules and regulations globally concerning data, including data protection, consumer protection, privacy, cybersecurity and related matters. These laws, rules and regulations are constantly evolving, subject to interpretation, remain a focus of regulators globally, may be enforced by private parties or government bodies, and will continue to have a significant impact on all of the Firm's businesses and operations.
The Bank Secrecy Act and Economic Sanctions: The Bank Secrecy Act ("BSA") requires all financial institutions, including banks and securities broker-dealers, to establish a risk-based system of internal controls reasonably designed to prevent money laundering and the financing of terrorism. The BSA includes a variety of recordkeeping and reporting requirements, as well as due diligence/know-your-customer documentation requirements. The Firm is also subject to the regulations and economic sanctions programs administered and enforced by the U.S. Treasury's Office of Foreign Assets Control ("OFAC") and EU and U.K. authorities which target entities or individuals that are, or are located in countries that are, involved in activities including terrorism, hostilities, embezzlement or human rights violations. The Firm is also subject to economic sanctions laws, rules and regulations in other jurisdictions in which it operates, including those that conflict with or prohibit a firm such as JPMorgan Chase from complying with certain laws, rules and regulations to which it is otherwise subject.

## Anti-Corruption:

The Firm is subject to laws and regulations relating to corrupt and illegal payments to government officials and others in the jurisdictions in which it operates, including the U.S. Foreign Corrupt Practices Act and the U.K. Bribery Act.

## Compensation practices:

The Firm's compensation practices are subject to oversight by the Federal Reserve, as well as other agencies. The Federal Reserve has jointly issued guidance with the FDIC and the OCC that is designed to ensure that incentive compensation paid by banking organizations does not encourage imprudent risk-taking that threatens the organizations' safety and soundness. The Financial Stability Board ("FSB") has also established standards covering compensation principles for banks. The Firm's compensation practices are also subject to regulation and oversight by regulators in other jurisdictions, notably the Fifth Capital Requirements Directive ("CRD V"), as implemented in the EU and as adopted in the U.K, which includes compensation-related provisions. The European Banking Authority has instituted guidelines on compensation policies including under CRD $V$ which in certain countries, such as Germany, are implemented or supplemented by local regulations or guidelines. The U.K. regulators have also instituted guidelines on CRD V compensation policies. The Firm expects that the implementation of regulatory guidelines regarding compensation in the U.S. and other countries will continue to evolve, and may affect the manner in which the Firm structures its compensation programs and practices.

Other significant international regulatory initiatives: Policymakers in the U.K. and EU continue to implement a program of regulatory enhancements relating to financial services, several key elements of which are discussed below.

MiFID II requires the trading of shares and certain standardized OTC derivatives to take place on specified trading venues. MiFID II also significantly enhanced requirements for pre- and post-trade transparency, transaction reporting and investor protection, and introduced a position limits and reporting regime for commodities. In November 2021, the European Commission ("EC") published a draft legislative proposal for amendments to MiFID II focused on changes to rules related to transparency and market structure, including the proposed creation of a consolidated tape intended to increase transparency into trading across the EU by providing a centralized source of market data. This legislation remains subject to review by the European Parliament and European Council.
In the U.K., MiFID II is being amended through the "Wholesale Markets Review", a set of proposals designed to streamline and improve regulation of the U.K. secondary markets following the U.K.'s departure from the EU. Some of the changes, such as the removal of the requirement to execute trades in shares on certain trading venues, have been introduced through the Financial Services and Markets Bill ("FSMB"), which is expected to be passed by the U.K. Parliament in the first half of 2023. Other changes, such as amendments to MiFID II rules related to transparency, will be subject to further consultation, which is expected during 2023.

In December 2022, the EC published a legislative proposal to amend EMIR to increase the competitiveness of the EU central clearing framework and to enhance supervision of EU central counterparties ("CCPs"). These proposals are subject to further review by the European Parliament and European Council.

The EU has adopted mandatory buy-in rules under the Central Securities Depositories Regulation ("CSDR") which will impose requirements relating to sourcing of securities in the event of a settlement fail. In June 2022, EU regulators proposed an amendment to postpone the application of these rules until November 2025. The amendment remains subject to review by the European Parliament and European Council.

In December 2022, the Chancellor of the Exchequer announced an extensive package of reforms to U.K. financial services regulation known as the "Edinburgh Reforms". These reforms aim to drive growth and competitiveness in the U.K. financial services sector following the U.K.'s departure from the EU. The reform package includes initiatives relating to a number of areas of financial services policy, including retail banks, payments, markets, digital assets and sustainable finance. The U.K. Government and regulators are expected to release further consultations and announcements related to these reforms in 2023.

EU and U.K. regulators are expected to finalize the rules implementing the Basel III framework during 2023. The Firm's banking entities in the EU and the U.K. will be required to comply with the Basel III final rules by January 2025, allowing for certain transitional arrangements until 2030 and 2032, respectively. The main changes implemented by the Basel III final rules will be revisions to the credit risk and operational risk calculation methods to reduce the use of and reliance on internal modelling approaches and introduce internationally-agreed changes to the market risk framework. The EU Basel III final rules also strengthen enforcement tools for supervisors overseeing EU banks and require EU banking entities to systematically identify, disclose and manage environmental, social and governance ("ESG") risks as part of their risk management practices. In addition, in December 2022, the European Banking Authority ("EBA") announced that it will publish rules and technical standards between 2023 and 2025 related to sustainable finance, which will be applicable to EU banks. The Firm's banking entities in the U.K. will be required to comply with regulatory policies and standards related to climate risk being developed by the PRA. In addition, EU legislation requires that certain non-EU banks operating in the EU establish an intermediate parent undertaking ("IPU") located in the EU. The IPU legislation allows a second IPU to be established if a single IPU would conflict with "home country" bank separation rules or impede resolvability. The Firm will be required to comply with the EU's IPU requirements by December 30, 2023.

The Firm's banking entities in the EU and U.K. are also subject to supervisory expectations published by the ECB
and the PRA, respectively, for management of financial risks arising from climate change and the increasing operational reliance on IT systems, third-party services and innovative technologies, as well as supervisory expectations for operational resilience and resilience from macrofinancial and geopolitical shocks. These expectations address bank strategy, governance, risk management, scenario analysis, risk reporting and disclosure.
Policymakers in the EU have continued to implement sustainability-related initiatives. In December 2022, the Corporate Sustainability Reporting Directive ("CSRD") was published in the Official Journal of the EU. The CSRD will replace and significantly expand the scope and content of ESG reporting requirements under the EU's existing ESG reporting rules. CSRD reporting requirements will be phased in beginning in 2024. In addition, the EC published its legislative proposal on the Corporate Sustainability Due Diligence Directive ("CSDDD") in February 2022. The draft directive sets mandatory due diligence obligations for companies to address actual and potential human rights violations and environmental adverse impacts stemming from their own operations and business relationships, including the activities of companies with which they have established business relationships. The proposed legislation may also require the adoption of company-specific climaterelated transition plans. The CSDDD is currently subject to review by the European Parliament and European Council. Both the CSRD and CSDDD will apply to certain of the Firm's EU entities as well as to certain non-EU entities.

## Item 1A. Risk Factors.

The following discussion sets forth the material risk factors that could affect JPMorgan Chase's financial condition and operations. Readers should not consider any descriptions of these factors to be a complete set of all potential risks that could affect the Firm. Any of the risk factors discussed below could by itself, or combined with other factors, materially and adversely affect JPMorgan Chase's business, results of operations, financial condition, capital position, liquidity, competitive position or reputation, including by materially increasing expenses or decreasing revenues, which could result in material losses or a decrease in earnings.

Summary
The principal risk factors that could adversely affect JPMorgan Chase's business, results of operations, financial condition, capital position, liquidity, competitive position or reputation include:

- Regulatory risks, including the impact that applicable laws, rules and regulations in the highly-regulated and supervised financial services industry, as well as changes to or in the application, interpretation or enforcement of those laws, rules and regulations, can have on JPMorgan Chase's business and operations; the ways in which differences in financial services regulation in different jurisdictions or with respect to certain competitors can negatively impact JPMorgan Chase's business; the penalties and collateral consequences, and higher compliance and operational costs, that JPMorgan Chase may incur when resolving a regulatory investigation; the ways in which less predictable legal and regulatory frameworks in certain countries can negatively impact JPMorgan Chase's operations and financial results; and the losses that security holders will absorb if JPMorgan Chase were to enter into a resolution.
- Political risks, including the potential negative effects on JPMorgan Chase's businesses due to economic uncertainty or instability caused by political developments.
- Market risks, including the effects that economic and market events and conditions, governmental policies, changes in interest rates and credit spreads, and market fluctuations can have on JPMorgan Chase's consumer and wholesale businesses and its investment and market-making positions and on JPMorgan Chase's earnings and its liquidity and capital levels.
- Credit risks, including potential negative effects from adverse changes in the financial condition of clients, customers, counterparties, custodians and central counterparties; and the potential for losses due to declines in the value of collateral in stressed market conditions or from concentrations of credit and market risk.
- Liquidity risks, including the risk that JPMorgan Chase's liquidity could be impaired by market-wide
illiquidity or disruption, unforeseen liquidity or capital requirements, the inability to sell assets, default by a significant market participant, unanticipated outflows of cash or collateral, or lack of market or customer confidence in JPMorgan Chase; the dependence of JPMorgan Chase \& Co. on the cash flows of its subsidiaries; the adverse effects that any downgrade in any of JPMorgan Chase's credit ratings may have on its liquidity and cost of funding; and potential negative impacts, including litigation risks, associated with the transition to alternative reference rates.
- Capital risks, including the risk that any failure by or inability of JPMorgan Chase to maintain the required level and composition of capital, or unfavorable changes in applicable capital requirements, could limit JPMorgan Chase's ability to distribute capital to shareholders or to support its business activities.
- Operational risks, including risks associated with JPMorgan Chase's dependence on its operational systems, its ability to maintain appropriately-staffed workforces and the competence, integrity, health and safety of its employees, as well as the systems and employees of third parties, market participants and service providers; the potential negative effects of failing to identify and address operational risks related to the introduction of or changes to products, services and delivery platforms; legal and regulatory risks related to safeguarding personal information; the harm that could be caused by a successful cyber attack affecting JPMorgan Chase or by other extraordinary events; risks associated with JPMorgan Chase's risk management framework, its models and estimations and associated judgments used in its stress testing and financial statements, and controls over disclosure and financial reporting; and potential adverse effects of failing to comply with heightened regulatory and other standards for the oversight of vendors and other service providers.
- Strategic risks, including the damage to JPMorgan Chase's competitive standing and results that could occur if management fails to develop and execute effective business strategies; risks associated with the significant and increasing competition that JPMorgan Chase faces; and the potential adverse impacts of climate change on JPMorgan Chase's business operations, clients and customers.
- Conduct risks, including the negative impact that can result from the actions or misconduct of employees, including any failure of employees to conduct themselves in accordance with JPMorgan Chase's expectations, policies and practices.
- Reputation risks, including the potential adverse effects on JPMorgan Chase's relationships with its clients, customers, shareholders, regulators and other stakeholders that could arise from employee misconduct, security breaches, inadequate risk

## Part I

management, compliance or operational failures, litigation and regulatory investigations, failure to satisfy expectations concerning environmental, social and governance concerns, failure to effectively manage conflicts of interest or to satisfy fiduciary obligations, or other factors that could damage JPMorgan Chase's reputation.

- Country risks, including potential impacts on JPMorgan Chase's businesses from an outbreak or escalation of hostilities between countries or within a country or region; and the potential adverse effects of local economic, political, regulatory and social factors on JPMorgan Chase's business and revenues in certain countries.
- People risks, including the criticality of attracting and retaining qualified and diverse employees; and the potential adverse effects of unfavorable changes in immigration or travel policies on JPMorgan Chase's workforce.
- Legal risks, including those relating to litigation and regulatory and government investigations.
The above summary is subject in its entirety to the discussion of the risk factors set forth below.

## Regulatory

JPMorgan Chase's businesses are highly regulated, and the laws, rules and regulations that apply to JPMorgan Chase have a significant impact on its business and operations.
JPMorgan Chase is a financial services firm with operations worldwide. JPMorgan Chase must comply with the laws, rules and regulations that apply to its operations in all of the jurisdictions around the world in which it does business, and financial services firms such as JPMorgan Chase are subject to extensive regulation and supervision.

The regulation and supervision of JPMorgan Chase significantly affects the way that it conducts its business and structures its operations, and JPMorgan Chase could be required to make changes to its business and operations in response to supervisory expectations or decisions or to new or changed laws, rules and regulations. These types of developments could result in JPMorgan Chase incurring additional costs in connection with complying with applicable laws, rules and regulations, which could reduce its profitability. Furthermore, JPMorgan Chase's entry into or acquisition of a new business or an increase in its principal investments may require JPMorgan Chase to comply with additional laws, rules, and regulations.

In response to new and existing laws, rules and regulations and expanded supervision, JPMorgan Chase has in the past been and could in the future be, required to:

- limit the products and services that it offers
- reduce the liquidity that it can provide through its market-making activities
- refrain from engaging in business opportunities that it might otherwise pursue
- pay higher taxes (including as part of any minimum global tax regime), assessments, levies or other governmental charges, including in connection with the resolution of tax examinations
- incur losses, including with respect to fraudulent transactions perpetrated against its customers
- dispose of certain assets, and do so at times or prices that are disadvantageous
- impose restrictions on certain business activities, or
- increase the prices that it charges for products and services, which could reduce the demand for them.

Any failure by JPMorgan Chase to comply with the laws, rules and regulations to which it is subject could result in:

- increased regulatory and supervisory scrutiny
- regulatory and governmental enforcement actions
- the imposition of fines, penalties or other sanctions
- increased exposure to litigation, or
- harm to its reputation.

Differences and inconsistencies in financial services regulation can negatively impact JPMorgan Chase's businesses, operations and financial results.

The content and application of laws, rules and regulations affecting financial services firms sometimes vary according to factors such as the size of the firm, the jurisdiction in which it is organized or operates, and other criteria. For example:

- larger firms such as JPMorgan Chase are often subject to more stringent supervision, regulation and regulatory scrutiny
- financial technology companies and other nontraditional competitors may not be subject to banking regulation, or may be supervised by a national or state regulatory agency that does not have the same resources or regulatory priorities as the regulatory agencies which supervise more diversified financial services firms, or
- the financial services regulatory framework in a particular jurisdiction may favor financial institutions that are based in that jurisdiction.
These types of differences in the regulatory framework can result in JPMorgan Chase losing market share to competitors that are less regulated or not subject to regulation, especially with respect to unregulated financial products.

There can also be significant differences in the ways that similar regulatory initiatives affecting the financial services industry are implemented in the U.S. and in other countries and regions in which JPMorgan Chase does business. For
example, when adopting rules that are intended to implement a global regulatory standard, a national regulator may introduce additional or more restrictive requirements, which can create competitive disadvantages for financial services firms, such as JPMorgan Chase, that may be subject to those enhanced regulations.

In addition, certain national and multi-national bodies and governmental agencies outside the U.S. have adopted laws, rules or regulations that may conflict with or prohibit JPMorgan Chase from complying with laws, rules and regulations to which it is otherwise subject, creating conflict of law issues that also increase its risks of non-compliance in those jurisdictions.

Legislative and regulatory initiatives outside the U.S. could require JPMorgan Chase to make significant modifications to its operations and legal entity structure in the relevant countries or regions in order to comply with those requirements. These include laws, rules and regulations that have been adopted or proposed relating to:

- the establishment of locally-based intermediate holding companies or operating subsidiaries
- requirements to maintain minimum amounts of capital or liquidity in locally-based subsidiaries
- to implement processes within locally-based subsidiaries to comply with local regulatory requirements
- the separation (or "ring fencing") of core banking products and services from markets activities
- the resolution of financial institutions
- requirements for executing or settling transactions on exchanges or through central counterparties ("CCPs")
- position limits and reporting rules for derivatives
- governance and accountability regimes
- conduct of business and control requirements, and
- restrictions on compensation.

These types of differences, inconsistencies and conflicts in financial services regulation have required and could in the future require JPMorgan Chase to:

- divest assets or restructure its operations
- absorb increased capital and liquidity costs
- incur higher operational and compliance costs
- change the prices that it charges for its products and services
- curtail the products and services that it offers to its customers and clients
- curtail other business opportunities, including acquisitions or principal investments, that it otherwise would have pursued
- become subject to regulatory fines, penalties or other sanctions, or
- incur higher costs for complying with different legal and regulatory frameworks.

Any or all of these factors could harm JPMorgan Chase's ability to compete against other firms that are not subject to the same laws, rules and regulations or supervisory oversight, or harm JPMorgan Chase's businesses, results of operations and profitability.

## Resolving regulatory investigations can subject JPMorgan Chase to significant penalties and collateral consequences, and could result in higher compliance costs or restrictions on its operations.

JPMorgan Chase is subject to heightened oversight and scrutiny from regulatory authorities in many jurisdictions. JPMorgan Chase has paid significant fines, provided other monetary relief, incurred other penalties and experienced other repercussions in connection with resolving investigations and enforcement actions by governmental agencies. JPMorgan Chase could become subject to similar regulatory or governmental resolutions or other actions in the future, and addressing the requirements of any such resolutions or actions could result in JPMorgan Chase incurring higher operational and compliance costs, including devoting substantial resources to the required remediation, or needing to comply with other restrictions.

In connection with resolving specific regulatory investigations or enforcement actions, certain regulators have required JPMorgan Chase and other financial institutions to admit wrongdoing with respect to the activities that gave rise to the resolution. These types of admissions can lead to:

- greater exposure in litigation
- damage to JPMorgan Chase's reputation
- disqualification from doing business with certain clients or customers, or in specific jurisdictions, or
- other direct and indirect adverse effects.

Furthermore, U.S. government officials have demonstrated a willingness to bring criminal actions against financial institutions and have required that institutions plead guilty to criminal offenses or admit other wrongdoing in connection with resolving regulatory investigations or enforcement actions. Resolutions of this type can have significant collateral consequences for the subject financial institution, including:

- loss of clients, customers and business
- restrictions on offering certain products or services, and
- Iosing permission to operate certain businesses, either temporarily or permanently.

JPMorgan Chase expects that:

## Part I

- it and other financial services firms will continue to be subject to heightened regulatory scrutiny and governmental investigations and enforcement actions
- governmental authorities will continue to require that financial institutions be penalized for actual or deemed violations of law with formal and punitive enforcement actions, including the imposition of significant monetary and other sanctions, rather than resolving these matters through informal supervisory actions; and
- governmental authorities will be more likely to pursue formal enforcement actions and resolutions against JPMorgan Chase to the extent that it has previously been subject to other governmental investigations or enforcement actions.

If JPMorgan Chase fails to meet the requirements of any resolution of a governmental investigation or enforcement action, or to maintain risk and control processes that meet the heightened standards and expectations of its regulators, it could be required to, among other things:

- enter into further resolutions of investigations or enforcement actions
- pay additional regulatory penalties or enter into judgments, or
- accept material regulatory restrictions on, or changes in the management of, its businesses.

In these circumstances, JPMorgan Chase could also become subject to other sanctions, or to prosecution or civil litigation with respect to the conduct that gave rise to an investigation or enforcement action.

JPMorgan Chase's operations and financial results can be negatively impacted in countries with less predictable legal and regulatory frameworks.
JPMorgan Chase conducts existing and new business in certain countries in which the application of the rule of law is inconsistent or less predictable, including with respect to:

- the absence of a statutory or regulatory basis or guidance for engaging in specific types of business or transactions
- conflicting or ambiguous laws, rules and regulations, or the inconsistent application or interpretation of existing laws, rules and regulations
- uncertainty concerning the enforceability of contractual, intellectual property or other obligations
- difficulty in competing in economies in which the government controls or protects all or a portion of the local economy or specific businesses, or where graft or corruption may be pervasive
- the threat of regulatory investigations, civil litigations or criminal prosecutions that are arbitrary or otherwise contrary to established legal principles in other parts of the world, and
- the termination of licenses required to operate in the local market or the suspension of business relationships with governmental bodies.

If the application of the laws, rules and regulations in any country is susceptible to producing inconsistent or unexpected outcomes, this can create a more difficult environment in which JPMorgan Chase conducts its business and could negatively affect JPMorgan Chase's operations and reduce its earnings with respect to that country. For example, conducting business could require JPMorgan Chase to devote significant additional resources to understanding, and monitoring changes in, local laws, rules and regulations, as well as structuring its operations to comply with local laws, rules and regulations and implementing and administering related internal policies and procedures.

There can be no assurance that JPMorgan Chase will always be successful in its efforts to fully understand and to conduct its business in compliance with the laws, rules and regulations of all of the jurisdictions in which it operates, and the risk of non-compliance can be greater in countries that have less predictable legal and regulatory frameworks.
Requirements for the orderly resolution of JPMorgan Chase could result in JPMorgan Chase having to restructure or reorganize its businesses and could increase its funding or operational costs or curtail its businesses.

JPMorgan Chase is required under Federal Reserve and FDIC rules to prepare and submit periodically to those agencies a detailed plan for rapid and orderly resolution in bankruptcy, without extraordinary government support, in the event of material financial distress or failure. The agencies' evaluation of JPMorgan Chase's resolution plan may change, and the requirements for resolution plans may be modified from time to time. Any such determinations or modifications could result in JPMorgan Chase needing to make changes to its legal entity structure or to certain internal or external activities, which could increase its funding or operational costs, or hamper its ability to serve clients and customers.

If the Federal Reserve and the FDIC were both to determine that a resolution plan submitted by JPMorgan Chase has deficiencies, they could jointly impose more stringent capital, leverage or liquidity requirements or restrictions on JPMorgan Chase's growth, activities or operations. The agencies could also require that JPMorgan Chase restructure, reorganize or divest assets or businesses in ways that could materially and adversely affect JPMorgan Chase's operations and strategy.
Holders of JPMorgan Chase \& Co.'s debt and equity securities will absorb losses if it were to enter into a resolution.

Federal Reserve rules require that JPMorgan Chase \& Co. (the "Parent Company") maintain minimum levels of unsecured external long-term debt and other loss-
absorbing capacity with specific terms ("eligible LTD") for purposes of recapitalizing JPMorgan Chase's operating subsidiaries if the Parent Company were to enter into a resolution either:

- in a bankruptcy proceeding under Chapter 11 of the U.S. Bankruptcy Code, or
- in a receivership administered by the FDIC under Title II of the Dodd-Frank Act ("Title II").

If the Parent Company were to enter into a resolution, holders of eligible LTD and other debt and equity securities of the Parent Company will absorb the losses of the Parent Company and its subsidiaries.

The preferred "single point of entry" strategy under JPMorgan Chase's resolution plan contemplates that only the Parent Company would enter bankruptcy proceedings. JPMorgan Chase's subsidiaries would be recapitalized, as needed, so that they could continue normal operations or subsequently be divested or wound down in an orderly manner. As a result, the Parent Company's losses and any losses incurred by its subsidiaries would be imposed first on holders of the Parent Company's equity securities and thereafter on its unsecured creditors, including holders of eligible LTD and other debt securities. Claims of holders of those securities would have a junior position to the claims of creditors of JPMorgan Chase's subsidiaries and to the claims of priority (as determined by statute) and secured creditors of the Parent Company.

Accordingly, in a resolution of the Parent Company in bankruptcy, holders of eligible LTD and other debt securities of the Parent Company would realize value only to the extent available to the Parent Company as a shareholder of JPMorgan Chase Bank, N.A. and its other subsidiaries, and only after any claims of priority and secured creditors of the Parent Company have been fully repaid.

The FDIC has similarly indicated that a single point of entry recapitalization model could be a desirable strategy to resolve a systemically important financial institution, such as the Parent Company, under Title II. However, the FDIC has not formally adopted a single point of entry resolution strategy.

If the Parent Company were to approach, or enter into, a resolution, none of the Parent Company, the Federal Reserve or the FDIC is obligated to follow JPMorgan Chase's preferred resolution strategy, and losses to holders of eligible LTD and other debt and equity securities of the Parent Company, under whatever strategy is ultimately followed, could be greater than they might have been under JPMorgan Chase's preferred strategy.

Political

## Economic uncertainty or instability caused by political developments can negatively impact JPMorgan Chase's businesses.

Political developments in the U.S. and other countries can cause uncertainty in the economic environment and market conditions in which JPMorgan Chase operates its businesses. Certain governmental policy initiatives, as well as heightened geopolitical tensions, could significantly affect U.S. and global economic growth and cause higher volatility in the financial markets, including:

- monetary policies and actions taken by the Federal Reserve and other central banks or governmental authorities, including any sustained large-scale asset purchases or any suspension or reversal of those actions
- fiscal policies, including with respect to taxation and spending
- actions that governments take or fail to take in response to the effects of health emergencies, the spread of infectious diseases, epidemics or pandemics, as well as the effectiveness of any actions taken
- governmental actions or initiatives relating to climate risk, or more generally, the impact of business activities on environmental, social and governance ("ESG") matters, and the management of climate and ESG-related risks
- isolationist foreign policies
- an outbreak or escalation of hostilities, or other geopolitical instabilities
- economic or financial sanctions
- the implementation of tariffs and other protectionist trade policies, or
- other governmental policies or actions adopted or taken in response to political or social pressures.

These types of political developments, and uncertainty about the possible outcomes of these developments, could:

- erode investor confidence in the U.S. economy and financial markets, which could potentially undermine the status of the U.S. dollar as a safe haven currency
- provoke retaliatory countermeasures by other countries and otherwise heighten tensions in regulatory, enforcement or diplomatic relations
- lead to the withdrawal of government support for agencies and enterprises such as the U.S. Federal National Mortgage Association and the U.S. Federal Home Loan Mortgage Corporation (together, the "U.S. GSEs")
- increase concerns about whether the U.S. government will be funded, and its outstanding debt serviced, at any particular time

## Part I

- result in periodic shutdowns of the U.S. government or governments in other countries
- increase investor reliance on actions by the Federal Reserve or other central banks, or influence investor perceptions concerning government support of sectors of the economy or the economy as a whole
- adversely affect the financial condition or credit ratings of clients and counterparties with which JPMorgan Chase does business, or
- cause JPMorgan Chase to refrain from engaging in business opportunities that it might otherwise pursue.

These factors could lead to:

- slower growth rates, rising inflation or recession
- greater market volatility
- a contraction of available credit and the widening of credit spreads
- erosion of adequate risk premium on certain financial assets
- diminished investor and consumer confidence
- lower investment growth
- large-scale sales of government debt and other debt and equity securities in the U.S. and other countries
- reduced commercial activity among trading partners
- the potential for a currency redenomination by a particular country
- the possible departure of a country from, or the dissolution of, a political or economic alliance or treaty
- potential expropriation or nationalization of assets, or
- other market dislocations, including the spread of unfavorable economic conditions from a particular country or region to other countries or regions.

Any of these potential outcomes could cause JPMorgan Chase to suffer losses on its market-making positions or in its investment portfolio, reduce its liquidity and capital levels, increase the allowance for credit losses or lead to higher net charge offs, hamper its ability to deliver products and services to its clients and customers, and weaken its results of operations and financial condition.

JPMorgan Chase's business and results of operations may also be adversely affected by actions or initiatives by national, state or local governmental authorities that:

- seek to discourage financial institutions from doing business with companies engaged in certain industries, or conversely, to penalize financial institutions that elect not to do business with such companies, or
- mandate specific business practices that companies operating in the relevant jurisdiction must adopt.

Because governmental policies in one jurisdiction may differ or conflict with those in other jurisdictions, JPMorgan Chase may face negative consequences regardless of the course of action it takes or elects not to take, including:

- restrictions or prohibitions on doing business within a particular jurisdiction, or with governmental entities in a jurisdiction
- the threat of enforcement actions, including under antitrust or other anti-competition laws, rules and regulations, and
- harm to its reputation arising from public criticism, including from politicians, activists and other stakeholders.

In addition, JPMorgan Chase's relationships or ability to transact with clients and customers, and with governmental or regulatory bodies in jurisdictions in which JPMorgan Chase does business, could be adversely affected if its decisions with respect to doing business with companies in certain sensitive industries are perceived to harm those companies or to align with particular political viewpoints. Furthermore, JPMorgan Chase's participation in or association with certain social and environmental industry groups or initiatives could be viewed by activists or governmental authorities as boycotting or other discriminatory business behavior.

## Market

## Economic and market events and conditions can materially affect JPMorgan Chase's businesses and investment and market-making positions.

JPMorgan Chase's results of operations can be negatively affected by adverse changes in any of the following:

- investor, consumer and business sentiment
- events that reduce confidence in the financial markets
- inflation, deflation or recession
- high unemployment or, conversely, a tightening labor market
- the availability and cost of capital, liquidity and credit
- levels and volatility of interest rates, credit spreads and market prices for currencies, equities and commodities, and the duration of any changes in levels or volatility
- the economic effects of an outbreak or escalation of hostilities, terrorism or other geopolitical instabilities, cyber attacks, climate change, natural disasters, severe weather conditions, health emergencies, the spread of infectious diseases, epidemics or pandemics or other extraordinary events beyond JPMorgan Chase's control, and
- the strength of the U.S. and global economies.

All of these are affected by global economic, market and political events and conditions, as well as regulatory restrictions.

In addition, JPMorgan Chase's investment portfolio and market-making businesses can suffer losses due to unanticipated market events, including:

- severe declines in asset values
- unexpected credit events
- unforeseen events or conditions that may cause previously uncorrelated factors to become correlated (and vice versa)
- the inability to effectively hedge market and other risks related to market-making and investment portfolio positions, or
- other market risks that may not have been appropriately taken into account in the development, structuring or pricing of a financial instrument.
If JPMorgan Chase experiences significant losses in its investment portfolio or from market-making activities, this could reduce JPMorgan Chase's profitability and its liquidity and capital levels, and thereby constrain the growth of its businesses.

## JPMorgan Chase's consumer businesses can be negatively affected by adverse economic conditions and governmental policies.

JPMorgan Chase's consumer businesses are particularly affected by U.S. and global economic conditions, including:

- personal and household income distribution
- unemployment or underemployment
- prolonged periods of exceptionally low or high interest rates
- housing prices
- the level of inflation and its effect on prices for goods and services
- consumer and small business confidence levels, and
- changes in consumer spending or in the level of consumer debt.

Heightened levels of unemployment or underemployment that result in reduced personal and household income could negatively affect consumer credit performance to the extent that consumers are less able to service their debts. In addition, sustained low growth, low or negative interest rates, inflationary pressures or recessionary conditions could diminish customer demand for the products and services offered by JPMorgan Chase's consumer businesses.

Adverse economic conditions could also lead to an increase in delinquencies, additions to the allowance for credit losses and higher net charge-offs, which can reduce JPMorgan Chase's earnings. These consequences could be significantly worse in certain geographies and industry segments where declining industrial or manufacturing activity has resulted in or could result in higher levels of unemployment, or where high levels of consumer debt, such as outstanding
student loans, could impair the ability of customers to pay their other consumer loan obligations.

JPMorgan Chase's earnings from its consumer businesses could also be adversely affected by governmental policies and actions that affect consumers, including:

- policies and initiatives relating to medical insurance, education, immigration, employment status and housing, and
- policies aimed at the economy more broadly, such as higher taxes and increased regulation which could result in reductions in consumer disposable income.

## Unfavorable market and economic conditions can have an adverse effect on JPMorgan Chase's wholesale businesses.

In JPMorgan Chase’s wholesale businesses, market and economic factors can affect the volume of transactions that JPMorgan Chase executes for its clients or for which it advises clients, and, therefore, the revenue that JPMorgan Chase receives from those transactions. These factors can also influence the willingness of other financial institutions and investors to participate in capital markets transactions that JPMorgan Chase manages, such as Ioan syndications or securities underwriting. Furthermore, if a significant and sustained deterioration in market conditions were to occur, the profitability of JPMorgan Chase's capital markets businesses, including its loan syndication, securities underwriting and leveraged lending activities, could be reduced to the extent that those businesses:

- earn less fee revenue due to lower transaction volumes, including when clients are unwilling or unable to refinance their outstanding debt obligations in unfavorable market conditions, or
- dispose of portions of credit commitments at a loss, or hold larger residual positions in credit commitments that cannot be sold at favorable prices.

An adverse change in market conditions in particular segments of the economy, such as a sudden and severe downturn in oil and gas prices or an increase in commodity prices, or sustained changes in consumer behavior that affect specific economic sectors, could have a material adverse effect on clients of JPMorgan Chase whose operations or financial condition are directly or indirectly dependent on the health or stability of those market segments or economic sectors, as well as clients that are engaged in related businesses. JPMorgan Chase could incur credit losses on its loans and other credit commitments to clients that operate in, or are dependent on, any sector of the economy that is under stress.

The fees that JPMorgan Chase earns from managing client assets or holding assets under custody for clients could be diminished by declining asset values or other adverse macroeconomic conditions. For example, higher interest rates or a downturn in financial markets could affect the valuations of client assets that JPMorgan Chase manages or

## Part I

holds under custody, which, in turn, could affect JPMorgan Chase's revenue from fees that are based on the amount of assets under management or custody. Similarly, adverse macroeconomic or market conditions could prompt outflows from JPMorgan Chase funds or accounts, or cause clients to invest in products that generate lower revenue. Substantial and unexpected withdrawals from a JPMorgan Chase fund can also hamper the investment performance of the fund, particularly if the outflows create the need for the fund to dispose of fund assets at disadvantageous times or prices, and could lead to further withdrawals based on the weaker investment performance.

An economic downturn or sustained changes in consumer behavior that results in shifts in consumer and business spending could also have a negative impact on certain of JPMorgan Chase's wholesale clients, and thereby diminish JPMorgan Chase's earnings from its wholesale operations. For example, the businesses of certain of JPMorgan Chase's wholesale clients are dependent on consistent streams of rental income from commercial real estate properties which are owned or being built by those clients. Sustained adverse economic conditions could result in reductions in the rental cash flows that owners or developers receive from their tenants which, in turn, could depress the values of the properties and impair the ability of borrowers to service or refinance their commercial real estate loans. These consequences could result in JPMorgan Chase experiencing increases in the allowance for credit losses, higher delinquencies, defaults and charge-offs within its commercial real estate loan portfolio and incurring higher costs for servicing a larger volume of delinquent loans in that portfolio, thereby reducing JPMorgan Chase's earnings from its wholesale businesses.

## Changes in interest rates and credit spreads can adversely affect JPMorgan Chase's earnings, its liquidity or its capital levels.

When interest rates are high or increasing, JPMorgan Chase can generally be expected to earn higher net interest income. However, higher interest rates can also lead to:

- fewer originations of commercial and residential real estate loans
- losses on underwriting exposures or incremental clientspecific downgrades, or increases in the allowance for credit losses and net charge-offs due to higher financing costs for clients
- the loss of deposits, particularly if customers withdraw deposits because they believe that interest rates offered by JPMorgan Chase are lower than those of competitors or if JPMorgan Chase makes incorrect assumptions about depositor behavior
- losses on available-for-sale ("AFS") securities held in the investment securities portfolio
- lower net interest income if central banks introduce interest rate increases more quickly than anticipated
and this results in a misalignment in the pricing of short-term and long-term borrowings
- less liquidity in the financial markets, and
- higher funding costs.

All of these outcomes could adversely affect JPMorgan Chase's earnings or its liquidity and capital levels. Higher interest rates can also negatively affect the payment performance on loans within JPMorgan Chase's consumer and wholesale loan portfolios that are linked to variable interest rates. If borrowers of variable rate loans are unable to afford higher interest payments, those borrowers may reduce or stop making payments, thereby causing JPMorgan Chase to incur losses and increased operational costs related to servicing a higher volume of delinquent loans.

On the other hand, a low or negative interest rate environment may cause:

- net interest margins to be compressed, which could reduce the amounts that JPMorgan Chase earns on its investment securities portfolio to the extent that it is unable to reinvest contemporaneously in higheryielding instruments
- unanticipated or adverse changes in depositor behavior, which could negatively affect JPMorgan Chase's broader asset and liability management strategy, and
- a reduction in the value of JPMorgan Chase's mortgage servicing rights ("MSRs") asset, thereby decreasing revenues.

When credit spreads widen, it becomes more expensive for JPMorgan Chase to borrow. JPMorgan Chase's credit spreads may widen or narrow not only in response to events and circumstances that are specific to JPMorgan Chase but also as a result of general economic and geopolitical events and conditions. Changes in JPMorgan Chase's credit spreads will affect, positively or negatively, JPMorgan Chase's earnings on certain liabilities, such as derivatives, that are recorded at fair value.

## JPMorgan Chase's results may be materially affected by market fluctuations and significant changes in the value of financial instruments.

The value of securities, derivatives and other financial instruments which JPMorgan Chase owns or in which it makes markets can be materially affected by market fluctuations. Market volatility, illiquid market conditions and other disruptions in the financial markets may make it extremely difficult to value certain financial instruments. Subsequent valuations of financial instruments in future periods, in light of factors then prevailing, may result in significant changes in the value of these instruments. In addition, at the time of any disposition of these financial instruments, the price that JPMorgan Chase ultimately realizes will depend on the demand and liquidity in the market at that time and may be materially lower than their
current fair value. Any of these factors could cause a decline in the value of financial instruments that JPMorgan Chase owns or in which it makes markets, which may have an adverse effect on JPMorgan Chase's results of operations.

JPMorgan Chase's risk management and monitoring processes, including its stress testing framework, seek to quantify and manage JPMorgan Chase's exposure to more extreme market moves. However, JPMorgan Chase's hedging and other risk management strategies may not be effective, and it could incur significant losses, if extreme market events were to occur.

Credit

## JPMorgan Chase can be negatively affected by adverse changes in the financial condition of clients, counterparties, custodians and CCPs.

JPMorgan Chase routinely executes transactions with clients and counterparties such as corporations, financial institutions, asset managers, hedge funds, securities exchanges and government entities within and outside the U.S. Many of these transactions expose JPMorgan Chase to the credit risk of its clients and counterparties, and can involve JPMorgan Chase in disputes and litigation if a client or counterparty defaults. JPMorgan Chase can also be subject to losses or liability where a financial institution that it has appointed to provide custodial services for client assets or funds becomes insolvent as a result of fraud or the failure to abide by existing laws and obligations, or where clients are unable to access assets held by JPMorgan Chase as custodian due to governmental actions or other factors.

A default by, or the financial or operational failure of, a CCP through which JPMorgan Chase executes contracts would require JPMorgan Chase to replace those contracts, thereby increasing its operational costs and potentially resulting in losses. In addition, JPMorgan Chase can be exposed to losses if a member of a CCP in which JPMorgan Chase is also a member defaults on its obligations to the CCP because of requirements that each member of the CCP absorb a portion of those losses. Furthermore, JPMorgan Chase can be subject to bearing its share of non-default losses incurred by a CCP, including losses from custodial, settlement or investment activities or due to cyber or other security breaches.

As part of its clearing services activities, JPMorgan Chase is exposed to the risk of nonperformance by its clients, which it seeks to mitigate by requiring clients to provide adequate collateral. JPMorgan Chase is also exposed to intra-day credit risk of its clients in connection with providing cash management, clearing, custodial and other transaction services to those clients. If a client for which JPMorgan Chase provides these services becomes bankrupt or insolvent, JPMorgan Chase may incur losses, become involved in disputes and litigation with one or more CCPs, the client's bankruptcy estate and other creditors, or be subject to regulatory investigations. All of the foregoing events can increase JPMorgan Chase's operational and
litigation costs, and JPMorgan Chase may suffer losses to the extent that any collateral that it has received is insufficient to cover those losses.

Transactions with government entities, including national, state, provincial, municipal and local authorities, can expose JPMorgan Chase to enhanced sovereign, credit, operational and reputation risks. Government entities may, among other things, claim that actions taken by government officials were beyond the legal authority of those officials or repudiate transactions authorized by a previous incumbent government. These types of actions have in the past caused, and could in the future cause, JPMorgan Chase to suffer losses or hamper its ability to conduct business in the relevant jurisdiction.

In addition, local laws, rules and regulations could limit JPMorgan Chase's ability to resolve disputes and litigation in the event of a counterparty default or unwillingness to make previously agreed-upon payments, which could subject JPMorgan Chase to losses.

Disputes may arise with counterparties to derivatives contracts with regard to the terms, the settlement procedures or the value of underlying collateral. The disposition of those disputes could cause JPMorgan Chase to incur unexpected transaction, operational and legal costs, or result in credit losses. These consequences can also impair JPMorgan Chase's ability to effectively manage its credit risk exposure from its market activities, or cause harm to JPMorgan Chase's reputation.

The financial or operational failure of a significant market participant, such as a major financial institution or a CCP, or concerns about the creditworthiness of such a market participant or its ability to fulfill its obligations, can cause substantial and cascading disruption within the financial markets, including in circumstances where coordinated action by multiple other market participants is required to address the failure or disruption. JPMorgan Chase's businesses could be significantly disrupted by such an event, particularly if it leads to other market participants incurring significant losses, experiencing liquidity issues or defaulting, and JPMorgan Chase is likely to have significant interrelationships with, and credit exposure to, such a significant market participant.

## JPMorgan Chase may suffer losses if the value of collateral declines in stressed market conditions.

During periods of market stress or illiquidity, JPMorgan Chase's credit risk may be further increased when:

- JPMorgan Chase fails to realize the fair value of the collateral it holds
- collateral is liquidated at prices that are not sufficient to recover the full amount owed to it, or
- counterparties are unable to post collateral, whether for operational or other reasons.

Furthermore, disputes with counterparties concerning the valuation of collateral may increase in times of significant

## Part I

market stress, volatility or illiquidity, and JPMorgan Chase could suffer losses during these periods if it is unable to realize the fair value of collateral or to manage declines in the value of collateral.

## JPMorgan Chase could incur significant losses arising from concentrations of credit and market risk.

JPMorgan Chase is exposed to greater credit and market risk to the extent that groupings of its clients or counterparties:

- engage in similar or related businesses, or in businesses in related industries
- do business in the same geographic region, or
- have business profiles, models or strategies that could cause their ability to meet their obligations to be similarly affected by changes in economic conditions.

For example, a significant deterioration in the credit quality of one of JPMorgan Chase's borrowers or counterparties could lead to concerns about the creditworthiness of other borrowers or counterparties in similar, related or dependent industries. This type of interrelationship could exacerbate JPMorgan Chase’s credit, liquidity and market risk exposure and potentially cause it to incur losses, including fair value losses in its market-making businesses and investment portfolios. In addition, JPMorgan Chase may be required to increase the allowance for credit losses with respect to certain clients or industries in order to align with directives or expectations of its banking regulators.

Similarly, challenging economic conditions that affect a particular industry or geographic area could lead to concerns about the credit quality of JPMorgan Chase's borrowers or counterparties not only in that particular industry or geography but in related or dependent industries, wherever located. These conditions could also heighten concerns about the ability of customers of JPMorgan Chase's consumer businesses who live in those areas or work in those affected industries or related or dependent industries to meet their obligations to JPMorgan Chase. JPMorgan Chase regularly monitors various segments of its credit and market risk exposures to assess the potential risks of concentration or contagion, but its ability to diversify or hedge its exposure against those risks may be limited.

JPMorgan Chase's consumer businesses can also be harmed by an excessive expansion of consumer credit by bank or non-bank competitors. Heightened competition for certain types of consumer loans could prompt industry-wide reactions such as significant reductions in the pricing or margins of those loans or the making of loans to lesscreditworthy borrowers. If large numbers of consumers subsequently default on their loans, whether due to weak credit profiles, an economic downturn or other factors, this could impair their ability to repay obligations owed to JPMorgan Chase and result in higher charge-offs and other credit-related losses. More broadly, widespread defaults on consumer debt could lead to recessionary conditions in the
U.S. economy, and JPMorgan Chase's consumer businesses may earn lower revenues in such an environment.

If JPMorgan Chase is unable to reduce positions effectively during a market dislocation, this can increase both the market and credit risks associated with those positions and the level of risk-weighted-assets ("RWA") that JPMorgan Chase holds on its balance sheet. These factors could adversely affect JPMorgan Chase's capital position, funding costs and the profitability of its businesses.

Liquidity

## JPMorgan Chase's ability to operate its businesses could be impaired if its liquidity is constrained.

JPMorgan Chase's liquidity could be impaired at any given time by factors such as:

- market-wide illiquidity or disruption
- unforeseen liquidity or capital requirements, including as a result of changes in laws, rules and regulations
- inability to sell assets, or to sell assets at favorable times or prices
- default by a CCP or other significant market participant
- unanticipated outflows of cash or collateral
- unexpected loss of consumer deposits or higher than anticipated draws on lending-related commitments, and
- lack of market or customer confidence in JPMorgan Chase or financial institutions in general.

A reduction in JPMorgan Chase's liquidity may be caused by events over which it has little or no control. For example, periods of market stress, low investor confidence and significant market illiquidity could result in higher funding costs for JPMorgan Chase and could limit its access to some of its traditional sources of liquidity.
JPMorgan Chase may need to raise funding from alternative sources if its access to stable and lower-cost sources of funding, such as deposits and borrowings from Federal Home Loan Banks, is reduced. Alternative sources of funding could be more expensive or limited in availability. JPMorgan Chase’s funding costs could also be negatively affected by actions that JPMorgan Chase may take in order to:

- satisfy applicable liquidity coverage ratio and net stable funding ratio requirements
- address obligations under its resolution plan, or
- satisfy regulatory requirements in jurisdictions outside the U.S. relating to the pre-positioning of liquidity in subsidiaries that are material legal entities.

More generally, if JPMorgan Chase fails to effectively manage its liquidity, this could constrain its ability to fund or invest in its businesses and subsidiaries, and thereby adversely affect its results of operations.

JPMorgan Chase \& Co. is a holding company and depends on the cash flows of its subsidiaries to make payments on its outstanding securities.

JPMorgan Chase \& Co. is a holding company that holds the stock of JPMorgan Chase Bank, N.A. and an intermediate holding company, JPMorgan Chase Holdings LLC (the "IHC"). The IHC in turn generally holds the stock of JPMorgan Chase's subsidiaries other than JPMorgan Chase Bank, N.A. and its subsidiaries. The IHC also owns other assets and provides intercompany lending to the holding company.

The holding company is obligated to contribute to the IHC substantially all the net proceeds received from securities issuances (including issuances of senior and subordinated debt securities and of preferred and common stock).

The ability of JPMorgan Chase Bank, N.A. and the IHC to make payments to the holding company is also limited. JPMorgan Chase Bank, N.A. is subject to regulatory restrictions on its dividend distributions, as well as capital adequacy requirements, such as the Supplementary Leverage Ratio ("SLR"), and liquidity requirements and other regulatory restrictions on its ability to make payments to the holding company. The IHC is prohibited from paying dividends or extending credit to the holding company if certain capital or liquidity thresholds are breached or if limits are otherwise imposed by JPMorgan Chase's management or Board of Directors.

As a result of these arrangements, the ability of the holding company to make various payments is dependent on its receiving dividends from JPMorgan Chase Bank, N.A. and dividends and borrowings from the IHC. These limitations could affect the holding company's ability to:

- pay interest on its debt securities
- pay dividends on its equity securities
- redeem or repurchase outstanding securities, and
- fulfill its other payment obligations.

These arrangements could also result in the holding company seeking protection under bankruptcy laws or otherwise entering into resolution proceedings at a time earlier than would have been the case absent the existence of the capital and liquidity thresholds to which the IHC is subject.

## Reductions in JPMorgan Chase's credit ratings may adversely affect its liquidity and cost of funding.

JPMorgan Chase \& Co. and certain of its principal subsidiaries are rated by credit rating agencies. Rating agencies evaluate general, firm-specific and industryspecific factors when determining credit ratings for a particular financial institution, including:

- expected future profitability
- risk management practices
- legal expenses
- ratings differentials between bank holding companies and their bank and non-bank subsidiaries
- regulatory developments
- assumptions about government support, and
- economic and geopolitical developments.

JPMorgan Chase closely monitors and manages, to the extent that it is able, factors that could influence its credit ratings. However, there is no assurance that JPMorgan Chase's credit ratings will not be lowered in the future. Furthermore, any such downgrade could occur at times of broader market instability when JPMorgan Chase's options for responding to events may be more limited and general investor confidence is low.

A reduction in JPMorgan Chase's credit ratings could curtail JPMorgan Chase's business activities and reduce its profitability in a number of ways, including:

- reducing its access to capital markets
- materially increasing its cost of issuing and servicing securities
- triggering additional collateral or funding requirements, and
- decreasing the number of investors and counterparties that are willing or permitted to do business with or lend to JPMorgan Chase.

Any rating reduction could also increase the credit spreads charged by the market for taking credit risk on JPMorgan Chase \& Co. and its subsidiaries. This could, in turn, adversely affect the value of debt and other obligations of JPMorgan Chase \& Co. and its subsidiaries.

## The transition to alternative reference rates could expose JPMorgan Chase to operational risks or litigation and other disputes.

Regulators, industry bodies and other market participants in the U.S. and other countries continue to engage in initiatives to introduce and encourage the use of alternative reference rates to replace certain interest rate indices that are deemed to be "benchmarks", and certain of these alternative rates have gained or are gaining acceptance among market participants. However, there is no assurance that:

- any of these new rates will be similar to, or produce the economic equivalent of, the benchmarks that they seek to replace
- arrangements by market participants to prepare for the discontinuation of certain benchmarks and the transition to alternative reference rates will be fully effective, or
- a particular alternative reference rate will be widely accepted by market participants, or that market acceptance of that rate will not be hindered by the introduction of other reference rates.

## Part I

For example, vast amounts of loans, mortgages, securities, derivatives and other financial instruments are still linked to the London Interbank Offered Rate ("LIBOR") benchmark, and significant progress has been made by regulators, industry bodies and market participants to introduce and implement the Secured Overnight Financing Rate ("SOFR") as a replacement rate for U.S. dollar LIBOR. However, if market participants have not implemented effective operational and other arrangements to address the transition from U.S. dollar LIBOR to SOFR, this could result in dislocation in the financial markets, volatility in the pricing of securities, derivatives and other instruments, and the suppression of capital markets activities, all of which could have a negative impact on JPMorgan Chase's results of operations and on U.S. dollar LIBOR-linked securities, credit or other instruments which are issued, funded, serviced or held by JPMorgan Chase.

JPMorgan Chase could also become involved in litigation and other types of disputes with clients, customers, counterparties and investors as a consequence of the transition from U.S. dollar LIBOR and other benchmark rates to replacement rates, including claims that JPMorgan Chase has:

- treated clients, customers, counterparties or investors unfairly, or caused them to experience losses, higher financing costs or lower returns on investments
- failed to appropriately communicate the effects of the transition from benchmark rates on the products that JPMorgan Chase has sold to its clients and customers, or failed to disclose purported conflicts of interest
- made inappropriate product recommendations to or investments on behalf of its clients, or sold products that did not serve their intended purpose, in connection with the transition from benchmark rates
- engaged in anti-competitive behavior, or in the manipulation of markets or specific benchmarks, in connection with the discontinuation of or transition from benchmark rates, or
- disadvantaged clients, customers, counterparties or investors when interpreting or making determinations under the terms of agreements or financial instruments.

These types of claims could subject JPMorgan Chase to higher legal expenses and operational costs, require it to pay significant amounts in connection with resolving litigation and other disputes, and harm its reputation.
Capital

## Maintaining the required level and composition of capital may impact JPMorgan Chase's ability to support business activities, meet evolving regulatory requirements and distribute capital to shareholders.

JPMorgan Chase is subject to various regulatory capital requirements, including leverage- and risk-based capital requirements. In addition, as a Globally Systemically

Important Bank ("GSIB"), JPMorgan Chase is required to hold additional capital buffers, including a GSIB surcharge, a Stress Capital Buffer ("SCB"), and a countercyclical buffer, each of which is reassessed at least annually. The amount of capital that JPMorgan Chase is required to hold in order to satisfy these leverage-and risk-based requirements could increase at any given time due to factors such as:

- actions by banking regulators, including changes in laws, rules, and regulations
- actions taken by the Federal Reserve or the U.S. government in response to the economic effects of systemic events, such as the actions taken in response to the COVID-19 pandemic which led to an expansion of the Federal Reserve balance sheet, growth in deposits held by JPMorgan Chase and other U.S. financial institutions and, consequently, an increase in leverage exposure and the GSIB surcharge
- changes in the composition of JPMorgan Chase's balance sheet or developments that could increase RWA, such as increased market risk, customer delinquencies, client credit rating downgrades or other factors, and
- increases in estimated stress losses as determined by the Federal Reserve under the Comprehensive Capital Analysis and Review, which could increase JPMorgan Chase's SCB.

Any failure by or inability of JPMorgan Chase to maintain the required level and composition of capital, or unfavorable changes in applicable capital requirements, could have an adverse impact on JPMorgan Chase's shareholders, such as:

- reducing the amount of common stock that JPMorgan Chase is permitted to repurchase
- requiring the issuance of, or prohibiting the redemption of, capital instruments in a manner inconsistent with JPMorgan Chase's capital management strategy
- constraining the amount of dividends that may be paid on common stock, or
- curtailing JPMorgan Chase's business activities or operations.

## Operational

## JPMorgan Chase's businesses are dependent on the effectiveness of its operational systems and those of other market participants.

JPMorgan Chase's businesses rely on the ability of JPMorgan Chase's financial, accounting, transaction execution, data processing and other operational systems to process, record, monitor and report a large number of transactions on a continuous basis, and to do so accurately, quickly and securely. In addition to proper design, installation, maintenance and training, the effective
functioning of JPMorgan Chase's operational systems depends on:

- the quality of the information contained in those systems, as inaccurate, outdated or corrupted data can significantly compromise the functionality or reliability of a particular system and other systems to which it transmits or from which it receives information, and
- the ability of JPMorgan Chase to appropriately maintain and upgrade its systems on a regular basis, and to ensure that any changes introduced to its systems are managed carefully to ensure security and operational continuity and adherence to all applicable legal and regulatory requirements.

JPMorgan Chase also depends on its ability to access and use the operational systems of third parties, including its custodians, vendors (such as those that provide data and cloud computing services, and security and technology services) and other market participants (such as clearing and payment systems, CCPs and securities exchanges).

The ineffectiveness, failure or other disruption of operational systems upon which JPMorgan Chase depends, including due to a systems malfunction, cyberbreach or other systems failure, could result in unfavorable ripple effects in the financial markets and for JPMorgan Chase and its clients and customers, including:

- delays or other disruptions in providing services, liquidity or information to clients and customers
- the inability to settle transactions or obtain access to funds and other assets, including those for which physical settlement and delivery is required
- failure to timely settle or confirm transactions
- the possibility that funds transfers, capital markets trades or other transactions are executed erroneously, as a result of illegal conduct or with unintended consequences
- financial losses, including due to loss-sharing requirements of CCPs, payment systems or other market infrastructures, or as possible restitution to clients and customers
- higher operational costs associated with replacing services provided by a system that is unavailable
- client or customer dissatisfaction with JPMorgan Chase's products and services
- limitations on JPMorgan Chase's ability to collect data as required in connection with regulatory or other investigations
- regulatory fines, penalties, or other sanctions against JPMorgan Chase
- loss of confidence in the ability of JPMorgan Chase, or financial institutions generally, to protect against and withstand operational disruptions, or
- harm to JPMorgan Chase's reputation.

As the speed, frequency, volume, interconnectivity and complexity of transactions continue to increase, it can become more challenging to effectively maintain and upgrade JPMorgan Chase's operational systems and infrastructure, especially due to the heightened risks that:

- attempts by third parties to defraud JPMorgan Chase or its clients and customers may increase, evolve or become more complex, particularly during periods of market disruption or economic uncertainty
- errors made by JPMorgan Chase or another market participant, whether inadvertent or malicious, cause widespread system disruption
- isolated or seemingly insignificant errors in operational systems compound, or migrate to other systems over time, to become larger issues
- failures in synchronization or encryption software, or degraded performance of microprocessors, could cause disruptions in operational systems, or the inability of systems to communicate with each other, and
- third parties may attempt to block the use of key technology solutions by claiming that the use infringes on their intellectual property rights.
If JPMorgan Chase's operational systems, or those of newlyacquired businesses or of external parties on which JPMorgan Chase's businesses depend, are unable to meet the requirements of JPMorgan Chase's businesses and operations or bank regulatory standards, or if they fail or have other significant shortcomings, JPMorgan Chase could be materially and adversely affected.

## A successful cyber attack affecting JPMorgan Chase could cause significant harm to JPMorgan Chase and its clients and customers.

JPMorgan Chase experiences numerous cyber attacks on its computer systems, software, networks and other technology assets on a daily basis from various actors, including groups acting on behalf of hostile countries, cyber-criminals, "hacktivists" (i.e., individuals or groups that use technology to promote a political agenda or social change) and others. These cyber attacks can take many forms, including attempts to introduce computer viruses or malicious code, which are commonly referred to as "malware," into JPMorgan Chase's systems. These attacks are often designed to:

- obtain unauthorized access to confidential information belonging to JPMorgan Chase or its clients, customers, counterparties or employees
- manipulate data
- destroy data or systems with the aim of rendering services unavailable
- disrupt, sabotage or degrade service on JPMorgan Chase's systems

## Part I

- steal money, or
- extort money through the use of so-called "ransomware."

JPMorgan Chase has also experienced:

- $\quad$ significant distributed denial-of-service attacks intended to disrupt online banking services and other business activities, and
- a higher volume and complexity of cyber attacks against the backdrop of heightened geopolitical tensions.

JPMorgan Chase has experienced security breaches due to cyber attacks in the past, and it is inevitable that additional breaches will occur in the future. Any such breach could result in serious and harmful consequences for JPMorgan Chase or its clients and customers.

A principal reason that JPMorgan Chase cannot provide absolute security against cyber attacks is that it may not always be possible to anticipate, detect or recognize threats to JPMorgan Chase's systems, or to implement effective preventive measures against all breaches because:

- the techniques used in cyber attacks evolve frequently and are increasingly sophisticated, and therefore may not be recognized until launched
- cyber attacks can originate from a wide variety of sources, including JPMorgan Chase's own employees, cyber-criminals, hacktivists, groups linked to terrorist organizations or hostile countries, or third parties whose objective is to disrupt the operations of financial institutions more generally
- JPMorgan Chase does not have control over the cybersecurity of the systems of the large number of clients, customers, counterparties and third-party service providers with which it does business, and
- it is possible that a third party, after establishing a foothold on an internal network without being detected, might obtain access to other networks and systems.

The risk of a security breach due to a cyber attack could increase in the future due to factors such as:

- JPMorgan Chase's ongoing expansion of its mobile banking and other internet-based product offerings and its internal use of internet-based products and applications, including those that use cloud computing services
- the acquisition and integration of new businesses, and
- the increased use of remote access and third party video conferencing solutions to facilitate work-fromhome arrangements for employees.

In addition, a third party could misappropriate confidential information obtained by intercepting signals or
communications from mobile devices used by JPMorgan Chase's employees.

A successful penetration or circumvention of the security of JPMorgan Chase's systems or the systems of a vendor, governmental body or another market participant could cause serious negative consequences, including:

- significant disruption of JPMorgan Chase's operations and those of its clients, customers and counterparties, including losing access to operational systems
- misappropriation of confidential information of JPMorgan Chase or that of its clients, customers, counterparties, employees or regulators
- disruption of or damage to JPMorgan Chase's systems and those of its clients, customers and counterparties
- the inability, or extended delays in the ability, to fully recover and restore data that has been stolen, manipulated or destroyed, or the inability to prevent systems from processing fraudulent transactions
- violations by JPMorgan Chase of applicable privacy and other laws
- financial loss to JPMorgan Chase or to its clients, customers, counterparties or employees
- Ioss of confidence in JPMorgan Chase's cybersecurity and business resiliency measures
- dissatisfaction among JPMorgan Chase’s clients, customers or counterparties
- significant exposure to litigation and regulatory fines, penalties or other sanctions, and
- harm to JPMorgan Chase's reputation.

The extent of a particular cyber attack and the steps that JPMorgan Chase may need to take to investigate the attack may not be immediately clear, and it may take a significant amount of time before such an investigation can be completed. While such an investigation is ongoing, JPMorgan Chase may not necessarily know the full extent of the harm caused by the cyber attack, and that damage may continue to spread. These factors may inhibit JPMorgan Chase's ability to provide rapid, full and reliable information about the cyber attack to its clients, customers, counterparties and regulators, as well as the public. Furthermore, it may not be clear how best to contain and remediate the harm caused by the cyber attack, and certain errors or actions could be repeated or compounded before they are discovered and remediated. Any or all of these factors could further increase the costs and consequences of a cyber attack.

## JPMorgan Chase can be negatively affected if it fails to identify and address operational risks associated with the introduction of or changes to products, services and delivery platforms.

When JPMorgan Chase launches a new product or service, introduces a new platform for the delivery or distribution of products or services (including mobile connectivity, electronic trading and cloud computing), acquires or invests in a business or makes changes to an existing product, service or delivery platform, it may not fully appreciate or identify new operational risks that may arise from those changes, or may fail to implement adequate controls to mitigate the risks associated with those changes. Any significant failure in this regard could diminish JPMorgan Chase's ability to operate one or more of its businesses or result in:

- potential liability to clients, counterparties and customers
- increased operating expenses
- higher litigation costs, including regulatory fines, penalties and other sanctions
- damage to JPMorgan Chase's reputation
- impairment of JPMorgan Chase's liquidity
- regulatory intervention, or
- weaker competitive standing.

Any of the foregoing consequences could materially and adversely affect JPMorgan Chase's businesses and results of operations.

## JPMorgan Chase's operational costs and customer satisfaction could be adversely affected by the failure of an external operational system.

External operational systems with which JPMorgan is connected, whether directly or indirectly, can be sources of operational risk to JPMorgan Chase. JPMorgan Chase may be exposed not only to a systems failure or cyber attack that may be experienced by a vendor or market infrastructure with which JPMorgan Chase is directly connected, but also to a systems breakdown or cyber attack involving another party to which such a vendor or infrastructure is connected. Similarly, retailers, payment systems and processors, data aggregators and other external parties with which JPMorgan Chase's customers do business can increase JPMorgan Chase's operational risk. This is particularly the case where activities of customers or other parties are beyond JPMorgan Chase's security and control systems, including through the use of the internet, cloud computing services, and personal smart phones and other mobile devices or services.

If an external party obtains access to customer account data on JPMorgan Chase's systems, whether authorized or unauthorized, and that party experiences a cyberbreach of its own systems or misappropriates that data, this could
result in a variety of negative outcomes for JPMorgan Chase and its clients and customers, including:

- heightened risk that external parties will be able to execute fraudulent transactions using JPMorgan Chase's systems
- losses from fraudulent transactions, as well as potential liability for losses that exceed thresholds established in consumer protection laws, rules and regulations
- increased operational costs to remediate the consequences of the external party's security breach, and
- reputational harm arising from the perception that JPMorgan Chase's systems may not be secure.

As JPMorgan Chase's interconnectivity with clients, customers and other external parties continues to expand, JPMorgan Chase increasingly faces the risk of operational failure or cyber attacks with respect to the systems of those parties. Security breaches affecting JPMorgan Chase's clients or customers, or systems breakdowns or failures, security breaches or human error or misconduct affecting other external parties, may require JPMorgan Chase to take steps to protect the integrity of its own operational systems or to safeguard confidential information, including restricting the access of customers to their accounts. These actions can increase JPMorgan Chase's operational costs and potentially diminish customer satisfaction and confidence in JPMorgan Chase.

Furthermore, the widespread and expanding interconnectivity among financial institutions, clearing banks, CCPs, payments processors, financial technology companies, securities exchanges, clearing houses and other financial market infrastructures increases the risk that the disruption of an operational system involving one institution or entity, including due to a cyber attack, may cause industry-wide operational disruptions that could materially affect JPMorgan Chase's ability to conduct business.

## JPMorgan Chase's business and operations rely on its ability, and the ability of key external parties, to maintain appropriately-staffed workforces, and on the competence, trustworthiness, health and safety of employees.

JPMorgan Chase's ability to operate its businesses efficiently and profitably, to offer products and services that meet the expectations of its clients and customers, and to maintain an effective risk management framework is highly dependent on its ability to staff its operations appropriately and on the competence, integrity, health and safety of its employees. JPMorgan Chase's businesses and operations similarly rely on the workforces of third parties, including employees of vendors, custodians and financial markets infrastructures, and of businesses that it may seek to acquire. JPMorgan Chase's businesses could be materially and adversely affected by:

- the ineffective implementation of business decisions

## Part I

- any failure to institute controls that appropriately address risks associated with business activities, or to appropriately train employees with respect to those risks and controls
- staffing shortages, particularly in tight labor markets
- the possibility that significant portions of JPMorgan Chase's workforce are unable to work effectively, including because of illness, quarantines, shelter-inplace arrangements, government actions or other restrictions in connection with health emergencies, the spread of infectious diseases, epidemics or pandemics
- a significant operational breakdown or failure, theft, fraud or other unlawful conduct, or
- other negative outcomes caused by human error or misconduct by an employee of JPMorgan Chase or of another party on which JPMorgan Chase's businesses or operations depend.

JPMorgan Chase's operations could also be impaired if the measures taken by it or by governmental authorities to help ensure the health and safety of its employees are ineffective, or if any external party on which JPMorgan Chase relies fails to take appropriate and effective actions to protect the health and safety of its employees.

## JPMorgan Chase faces substantial legal and operational risks in the processing and safeguarding of personal information.

JPMorgan Chase's businesses and operations are subject to complex and evolving laws, rules and regulations, both within and outside the U.S., governing the privacy and protection of personal information of individuals. Governmental authorities around the world have adopted and are considering the adoption of numerous legislative and regulatory initiatives concerning privacy, data protection and security. Litigation or enforcement actions relating to these laws, rules and regulations could result in fines or orders requiring that JPMorgan Chase change its data-related practices, which could have an adverse effect on JPMorgan Chase's ability to provide products and otherwise harm its business operations.

Implementing processes relating to JPMorgan Chase's collection, use, sharing and storage of personal information to comply with all applicable laws, rules and regulations in all relevant jurisdictions, including where the laws of different jurisdictions are in conflict, can:

- increase JPMorgan Chase's compliance and operating costs
- hinder the development of new products or services, curtail the offering of existing products or services, or affect how products and services are offered to clients and customers
- demand significant oversight by JPMorgan Chase's management, and
- require JPMorgan Chase to structure its businesses, operations and systems in less efficient ways.

Not all of JPMorgan Chase's clients, customers, vendors, counterparties and other external parties may have appropriate controls in place to protect the confidentiality, integrity or availability of the information exchanged between them and JPMorgan Chase, particularly where information is transmitted by electronic means. JPMorgan Chase could be exposed to litigation or regulatory fines, penalties or other sanctions if personal information of clients, customers, employees or others were to be mishandled or misused, such as situations where such information is:

- erroneously provided to parties who are not permitted to have the information, or
- intercepted or otherwise compromised by unauthorized third parties.

Concerns regarding the effectiveness of JPMorgan Chase's measures to safeguard personal information, or even the perception that those measures are inadequate, could cause JPMorgan Chase to lose existing or potential clients and customers or employees, and thereby reduce JPMorgan Chase's revenues. Furthermore, any failure or perceived failure by JPMorgan Chase to comply with applicable privacy or data protection laws, rules and regulations may subject it to inquiries, examinations and investigations that could result in requirements to modify or cease certain operations or practices, significant liabilities or regulatory fines, penalties or other sanctions. Any of these could damage JPMorgan Chase's reputation and otherwise adversely affect its businesses.

In recent years, well-publicized incidents involving the inappropriate collection, use, sharing or storage of personal information have led to expanded governmental scrutiny of practices relating to the processing or safeguarding of personal information by companies in the U.S. and other countries. That scrutiny has in some cases resulted in, and could in the future lead to, the adoption of stricter laws, rules and regulations relating to the collection, use, sharing and storage of personal information. These types of laws, rules and regulations could prohibit or significantly restrict financial services firms such as JPMorgan Chase from transferring information across national borders or sharing information among affiliates or with third parties such as vendors, thereby increase compliance costs, or could restrict JPMorgan Chase's use of personal information when developing or offering products or services to customers. Some countries are considering or have adopted legislation implementing data protection requirements or requiring local storage and processing of data which could increase the cost and complexity of JPMorgan Chase's delivery of products and services. These restrictions could also inhibit JPMorgan Chase's development or marketing of certain products or services, or increase the costs of offering them to customers.

## JPMorgan Chase's operations, results and reputation could be harmed by occurrences of extraordinary events beyond its control.

JPMorgan Chase's business and operational systems could be seriously disrupted, and its reputation could be harmed, by events or contributing factors that are wholly or partially beyond its control, including material instances of:

- cyber attacks
- security breaches of its physical premises, including threats to health and safety
- power, telecommunications or internet outages, or shutdowns of mass transit
- failure of, or loss of access to, technology or operational systems, including any resulting loss of critical data
- damage to or loss of property or assets of JPMorgan Chase or third parties, and any consequent injuries, including in connection with any construction projects undertaken by JPMorgan Chase
- effects of climate change
- natural disasters or severe weather conditions
- accidents such as explosions or structural failures
- health emergencies, the spread of infectious diseases, epidemics or pandemics, or
- events arising from local or larger-scale civil or political unrest, any outbreak or escalation of hostilities, or terrorist acts.

JPMorgan Chase maintains a Firmwide resiliency program that is intended to enable it to recover critical business functions and supporting assets, including staff, technology and facilities, in the event of a business disruption, including due to the occurrence of an extraordinary event beyond its control. There can be no assurance that JPMorgan Chase's resiliency plans will fully mitigate all potential business continuity risks to JPMorgan Chase, its clients, and customers and third parties with which it does business, or that its resiliency plans will be adequate to address the effects of simultaneous occurrences of multiple business disruption events. In addition, JPMorgan Chase's ability to respond effectively to a business disruption event could be hampered to the extent that the members of its workforce, physical assets or systems and other support infrastructure needed to address the event are geographically dispersed, or conversely, if such an event were to occur in an area in which they are concentrated. Further, should extraordinary events or the factors that cause or contribute to those events become more chronic, the disruptive effects of those events on JPMorgan Chase's business and operations, and on its clients, customers, counterparties and employees, could become more significant and long-lasting.

Any significant failure or disruption of JPMorgan Chase's operations or operational systems, or the occurrence of one or more extraordinary events that are beyond its control, could:

- hinder JPMorgan Chase's ability to provide services to its clients and customers or to transact with its counterparties
- require it to expend significant resources to correct the failure or disruption or to address the event
- cause it to incur losses or liabilities, including from loss of revenue, damage to or loss of property, or injuries
- disrupt market infrastructure systems on which JPMorgan Chase's businesses rely
- expose it to litigation or regulatory fines, penalties or other sanctions, and
- harm its reputation.

## Enhanced regulatory and other standards for the oversight of vendors and other service providers can result in higher costs and other potential exposures.

JPMorgan Chase must comply with enhanced regulatory and other standards associated with doing business with vendors and other service providers, including standards relating to the outsourcing of functions as well as the performance of significant banking and other functions by subsidiaries. JPMorgan Chase incurs significant costs and expenses in connection with its initiatives to address the risks associated with oversight of its internal and external service providers. JPMorgan Chase's failure to appropriately assess and manage these relationships, especially those involving significant banking functions, shared services or other critical activities, could materially adversely affect JPMorgan Chase. Specifically, any such failure could result in:

- potential harm to clients and customers, and any liability associated with that harm
- regulatory fines, penalties or other sanctions
- lower revenues, and the opportunity cost from lost revenues
- increased operational costs, or
- harm to JPMorgan Chase's reputation.

## JPMorgan Chase's risk management framework may not be effective in identifying and mitigating every risk to JPMorgan Chase.

Any inadequacy or lapse in JPMorgan Chase's risk management framework, governance structure, practices, models or reporting systems could expose it to unexpected losses, and its financial condition or results of operations could be materially and adversely affected. Any such inadequacy or lapse could:

## Part I

- hinder the timely escalation of material risk issues to JPMorgan Chase's senior management and Board of Directors
- lead to business decisions that have negative outcomes for JPMorgan Chase
- require significant resources and time to remediate
- lead to non-compliance with laws, rules and regulations
- attract heightened regulatory scrutiny
- expose JPMorgan Chase to litigation, regulatory investigations or regulatory fines, penalties or other sanctions
- lead to potential harm to customers and clients, and any liability associated with that harm
- harm its reputation, or
- otherwise diminish confidence in JPMorgan Chase.

JPMorgan Chase relies on data to assess its various risk exposures. Any deficiencies in the quality or effectiveness of JPMorgan Chase's data gathering, analysis and validation processes could result in ineffective risk management practices. These deficiencies could also result in inaccurate or untimely risk reporting.
Many of JPMorgan Chase's risk management strategies and techniques consider historical market behavior and to some degree are based on management's subjective judgment or assumptions. For example, many models used by JPMorgan Chase are based on assumptions regarding historical correlations among prices of various asset classes or other market indicators. In times of market stress, including difficult or less liquid market environments, or in the event of other unforeseen circumstances, previously uncorrelated indicators may become correlated. Conversely, previouslycorrelated indicators may become uncorrelated at those times. Sudden market movements and unanticipated market or economic movements could, in some circumstances, limit the effectiveness of JPMorgan Chase's risk management strategies, causing it to incur losses.

JPMorgan Chase could recognize unexpected losses, its capital levels could be reduced and it could face greater regulatory scrutiny if its models, estimations or judgments, including those used in its financial statements, prove to be inadequate or incorrect.

JPMorgan Chase has developed and uses a variety of models and other analytical and judgment-based estimations to measure, monitor and implement controls over its market, credit, capital, liquidity, operational and other risks. JPMorgan Chase also uses internal models and estimations as a basis for its stress testing and in connection with the preparation of its financial statements under U.S. generally accepted accounting principles ("U.S. GAAP").

These models and estimations are based on a variety of assumptions and historical trends, and are periodically
reviewed and modified as necessary. The models and estimations that JPMorgan Chase uses may not be effective in all cases to identify, observe and mitigate risk due to a variety of factors, such as:

- reliance on historical trends that may not persist in the future, including assumptions underlying the models and estimations such as correlations among certain market indicators or asset prices
- inherent limitations associated with forecasting uncertain economic and financial outcomes
- historical trend information may be incomplete, or may not be indicative of severely negative market conditions such as extreme volatility, dislocation or lack of liquidity
- sudden illiquidity in markets or declines in prices of certain loans and securities may make it more difficult to value certain financial instruments
- technology that is introduced to run models or estimations may not perform as expected, or may not be well understood by the personnel using the technology
- models and estimations may contain erroneous data, valuations, formulas or algorithms, and
- review processes may fail to detect flaws in models and estimations.

JPMorgan Chase may experience unexpected losses if models, estimates or judgments used or applied in connection with its risk management activities or the preparation of its financial statements prove to have been inadequate or incorrect. For example, where quoted market prices are not available for certain financial instruments that require a determination of their fair value, JPMorgan Chase may make fair value determinations based on internally developed models or other means which ultimately rely to some degree on management estimates and judgment.

Similarly, JPMorgan Chase establishes an allowance for expected credit losses related to its credit exposures which requires significant judgments, including forecasts of how macroeconomic conditions might impair the ability of JPMorgan Chase's clients and customers to repay their loans or other obligations. These types of estimates and judgments may not prove to be accurate due to a variety of factors, as noted above. This is particularly true when the current and forecasted environments are significantly different from the historical environments upon which the models were developed, as JPMorgan Chase experienced during the early stages of the COVID-19 pandemic. The increased uncertainty may necessitate a greater degree of judgment and analytics to inform any adjustments that JPMorgan Chase may make to model outputs than would otherwise be the case.

Some of the models and other analytical and judgmentbased estimations used by JPMorgan Chase in managing
risks are subject to review by, and require the approval of, JPMorgan Chase's regulators. These reviews are required before JPMorgan Chase may use those models and estimations for calculating market risk RWA, credit risk RWA and operational risk RWA under Basel III. If JPMorgan Chase's models or estimations are not approved by its regulators, it may be subject to higher capital charges, which could adversely affect its financial results or limit the ability to expand its businesses.
Lapses in controls over disclosure or financial reporting could materially affect JPMorgan Chase's profitability or reputation.

There can be no assurance that JPMorgan Chase's disclosure controls and procedures will be effective in every circumstance, or that a material weakness or significant deficiency in internal control over financial reporting will not occur. Any such lapses or deficiencies could result in inaccurate financial reporting which, in turn, could:

- materially and adversely affect JPMorgan Chase's business and results of operations or financial condition
- restrict its ability to access the capital markets
- require it to expend significant resources to correct the lapses or deficiencies
- expose it to litigation or regulatory fines, penalties or other sanctions
- harm its reputation, or
- otherwise diminish investor confidence in JPMorgan Chase.

## Strategic

If JPMorgan Chase's management fails to develop and execute effective business strategies, and to anticipate changes affecting those strategies, JPMorgan Chase's competitive standing and results could suffer.

JPMorgan Chase's business strategies significantly affect its competitive standing and operations. These strategies relate to:

- the products and services that JPMorgan Chase offers
- the geographies in which it operates
- the types of clients and customers that it serves
- the businesses that it acquires or in which it invests
- the counterparties with which it does business, and
- the methods and distribution channels by which it offers products and services.

If management makes choices about these strategies and goals that prove to be incorrect, are based on incomplete, inaccurate or fraudulent information, do not accurately assess the competitive landscape and industry trends, or fail to address changing regulatory and market environments or the expectations of clients, customers,
investors, employees and other stakeholders, then the franchise values and growth prospects of JPMorgan Chase's businesses may suffer and its earnings could decline.

JPMorgan Chase's growth prospects also depend on management's ability to develop and execute effective business plans to address these strategic priorities, both in the near term and over longer time horizons. Management's effectiveness in this regard will affect JPMorgan Chase's ability to develop and enhance its resources, control expenses and return capital to shareholders. Each of these objectives could be adversely affected by any failure on the part of management to:

- devise effective business plans and strategies
- offer products and services that meet changing expectations of clients and customers
- allocate capital in a manner that promotes long-term stability to enable JPMorgan Chase to build and invest in market-leading businesses, even in a highly stressed environment
- allocate capital appropriately due to imprecise modeling or subjective judgments made in connection with those allocations
- conduct appropriate due diligence on prospective business acquisitions or investments, or effectively integrate newly-acquired businesses
- appropriately address concerns of clients, customers, investors, employees and other stakeholders, including with respect to ESG matters
- react quickly to changes in market conditions or market structures, or
- develop and enhance the operational, technology, risk, financial and managerial resources necessary to grow and manage JPMorgan Chase's businesses.
Furthermore, JPMorgan Chase may incur costs in connection with disposing of excess properties, premises and facilities, and those costs could be material to its results of operations in a given period.

JPMorgan Chase faces significant and increasing competition in the rapidly evolving financial services industry.

JPMorgan Chase operates in a highly competitive environment in which it must evolve and adapt to the significant changes as a result of changes in financial regulation, technological advances, increased public scrutiny and changes in economic conditions. JPMorgan Chase expects that competition in the U.S. and global financial services industry will continue to be intense. Competitors include:

- other banks and financial institutions
- trading, advisory and investment management firms
- finance companies

## Part I

- technology companies, and
- other nonbank firms that are engaged in providing similar as well as new products and services.

JPMorgan Chase cannot provide assurance that the significant competition in the financial services industry will not materially and adversely affect its future results of operations. For example, aggressive or less disciplined lending practices by nonbank competitors could lead to a loss of market share for traditional banks, and in an economic downturn could result in instability in the financial services industry and adversely impact other market participants, including JPMorgan Chase.

New competitors in the financial services industry continue to emerge. For example, technological advances and the growth of e-commerce have made it possible for nondepository institutions to offer products and services that traditionally were banking products. These advances have also allowed financial institutions and other companies to provide electronic and internet-based financial solutions, including electronic securities and cryptocurrency trading, lending and other extensions of credit to consumers, payments processing and online automated algorithmicbased investment advice. Furthermore, both financial institutions and their non-banking competitors face the risk that payments processing and other products and services, including deposits and other traditional banking products, could be significantly disrupted by the use of new technologies, such as cryptocurrencies and other applications using secure distributed ledgers, that require no intermediation. New technologies have required and could require JPMorgan Chase to spend more to modify or adapt its products to attract and retain clients and customers or to match products and services offered by its competitors, including technology companies. In addition, new technologies may be used by customers, or breached or infiltrated by third parties, in unexpected ways, which can increase JPMorgan Chase's costs for complying with laws, rules and regulations that apply to the offering of products and services through those technologies and reduce the income that JPMorgan Chase earns from providing products and services through those technologies.

Ongoing or increased competition may put pressure on the pricing for JPMorgan Chase's products and services or may cause JPMorgan Chase to lose market share, particularly with respect to traditional banking products. This competition may be on the basis of quality and variety of products and services offered, transaction execution, innovation, reputation and price. The failure of any of JPMorgan Chase's businesses to meet the expectations of clients and customers, whether due to general market conditions, under-performance, a decision not to offer a particular product or service, changes in client and customer expectations or other factors, could affect JPMorgan Chase's ability to attract or retain clients and customers. Any such impact could, in turn, reduce JPMorgan Chase's revenues. Increased competition also
may require JPMorgan Chase to make additional capital investments in its businesses, or to extend more of its capital on behalf of its clients in order to remain competitive.

## The effects of climate change could adversely affect JPMorgan Chase's business and operations, both directly and as a result of impacts on its clients and customers.

JPMorgan Chase operates in many regions, countries and communities around the world where its business, and the activities of its clients and customers, could be adversely affected by climate change. Climate change could manifest as a financial risk to JPMorgan Chase either through changes in the physical climate or from the process of transitioning to a lower-carbon economy. Both physical risks and transition risks associated with climate change could have negative impacts on the financial condition or creditworthiness of JPMorgan's clients and customers, and on its exposure to those clients and customers.

Climate-related physical risks include the increased frequency or severity of acute weather events, such as floods, wildfires and tropical storms, and chronic shifts in the climate, such as persistent changes in precipitation levels, rising sea levels, or increases in average ambient temperature.Potential adverse impacts of climate-related physical risks include:

- declines in asset values, including due to the destruction or degradation of property
- reduced availability or increased cost of insurance for clients of JPMorgan Chase
- interruptions to business operations, including supply chain disruption, and
- population migration or unemployment in affected regions.
Transition risks arise from societal adjustment to a lowercarbon economy, such as changes in public policy, adoption of new technologies or changes in consumer preferences towards low-carbon goods and services. These risks could also be influenced by changes in the physical climate. Potential adverse impacts of transition risks include:
- sudden devaluation of assets, including unanticipated write-downs ("stranded assets")
- increased operational and compliance costs driven by changes in climate policy
- increased energy costs driven by governmental actions and initiatives such as higher taxation and accelerated decarbonization policies
- negative consequences to business models, and the need to make changes in response to those consequences, and
- damage to JPMorgan Chase's reputation, including due to any perception that its business practices are
contrary to public policy or the preferences of different stakeholders.

Climate risks can also arise from the inconsistencies and conflicts in the manner in which climate policy and financial regulation is implemented in the many regions where JPMorgan Chase operates, including initiatives to apply and enforce policy and regulation with extraterritorial effect.

Conduct

## Conduct failure by JPMorgan Chase employees can harm clients and customers, impact market integrity, damage JPMorgan Chase's reputation and trigger litigation and regulatory action.

JPMorgan Chase's employees interact with clients, customers and counterparties, and with each other, every day. All employees are expected to demonstrate values and exhibit the behaviors that are an integral part of JPMorgan Chase's Code of Conduct and How We Do Business Principles, including JPMorgan Chase’s commitment to "do first class business in a first class way." JPMorgan Chase endeavors to embed conduct risk management throughout an employee's life cycle, including recruiting, onboarding, training and development, and performance management. Conduct risk management is also an integral component of JPMorgan Chase's promotion and compensation processes.

Notwithstanding these expectations, policies and practices, certain employees have engaged in improper or illegal conduct in the past. These instances of misconduct have resulted in litigation, and resolutions of governmental investigations or enforcement actions involving consent orders, deferred prosecution agreements, non-prosecution agreements and other civil or criminal sanctions. There is no assurance that further inappropriate or unlawful actions by employees have not occurred or will not occur, lead to a violation of the terms of these resolutions (and associated consequences), or that any such actions will always be detected, deterred or prevented.

JPMorgan Chase's reputation could be harmed, and collateral consequences could result, from a failure by one or more employees to conduct themselves in accordance with JPMorgan Chase's expectations, policies and practices, including by acting in ways that harm clients, customers, other market participants, employees or others. Some examples of this include:

- improperly selling and marketing JPMorgan Chase’s products or services
- engaging in insider trading, market manipulation or unauthorized trading
- engaging in improper or fraudulent behavior in connection with government relief programs
- facilitating a transaction where a material objective is to achieve a particular tax, accounting or financial disclosure treatment that may be subject to scrutiny by governmental or regulatory authorities, or where the
proposed treatment is unclear or may not reflect the economic substance of the transaction
- failing to fulfill fiduciary obligations or other duties owed to clients or customers
- violating antitrust or anti-competition laws by colluding with other market participants
- using electronic communications channels that have not been approved by JPMorgan Chase
- engaging in discriminatory behavior or harassment with respect to clients, customers or employees, or acting contrary to JPMorgan Chase's goal of fostering a diverse and inclusive workplace
- managing or reporting risks in ways that subordinate JPMorgan Chase's risk appetite to business performance goals or employee compensation objectives, and
- misappropriating property, confidential or proprietary information, or technology assets belonging to JPMorgan Chase, its clients and customers or third parties.

The consequences of any failure by one or more employees to conduct themselves in accordance with JPMorgan Chase's expectations, policies or practices could include litigation, or regulatory or other governmental investigations or enforcement actions. Any of these proceedings or actions could result in judgments, settlements, fines, penalties or other sanctions, or lead to:

- financial losses
- increased operational and compliance costs
- greater scrutiny by regulators and other parties
- regulatory actions that require JPMorgan Chase to restructure, curtail or cease certain of its activities
- the need for significant oversight by JPMorgan Chase's management
- loss of clients or customers, and
- harm to JPMorgan Chase’s reputation.

The foregoing risks could be heightened with respect to newly-acquired businesses if JPMorgan Chase fails to successfully integrate employees of those businesses or any of those employees do not conduct themselves in accordance with JPMorgan Chase's expectations, policies and practices.

## Reputation

## Damage to JPMorgan Chase's reputation could harm its businesses.

Maintaining trust in JPMorgan Chase is critical to its ability to attract and retain clients, customers, investors and employees. Damage to JPMorgan Chase's reputation can therefore cause significant harm to JPMorgan Chase's

## Part I

business and prospects, and can arise from numerous sources, including:

- employee misconduct, including discriminatory behavior or harassment with respect to clients, customers or employees, or actions that are contrary to JPMorgan Chase's goal of fostering a diverse and inclusive workplace
- security breaches, including as a result of cyber attacks
- failure to safeguard client, customer or employee information
- failure to manage risks associated with its business activities or those of its clients, including those that may be unpopular among one or more constituencies
- failure to meet publicly-announced commitments to support ESG initiatives
- non-compliance with laws, rules, and regulations
- operational failures
- litigation or regulatory fines, penalties or other sanctions
- actions taken in executing regulatory and governmental requirements during a global or regional health emergency, spread of infectious disease, epidemic or pandemic
- regulatory investigations or enforcement actions, or resolutions of these matters, and
- failure or perceived failure to comply with laws, rules or regulations by JPMorgan Chase or its clients, customers, counterparties or other parties, including newly-acquired businesses, companies in which JPMorgan Chase has made principal investments, parties to joint ventures with JPMorgan Chase, and vendors with which JPMorgan Chase does business.
JPMorgan Chase's reputation may be significantly damaged by adverse publicity or negative information regarding JPMorgan Chase, whether or not true, that may be published or broadcast by the media or posted on social media, non-mainstream news services or other parts of the internet. This latter risk can be magnified by the speed and pervasiveness with which information is disseminated through those channels.
Social and environmental activists have been increasingly targeting JPMorgan Chase and other financial services firms with public criticism concerning their business practices, including business relationships with clients that are engaged in certain sensitive industries, such as companies :
- whose products are or are perceived to be harmful to human health, or
- whose activities negatively affect or are perceived to negatively affect the environment, workers' rights or communities.

Activists have also taken actions intended to change or influence JPMorgan Chase's business practices with respect to ESG matters, including public protests at JPMorgan Chase's headquarters and other properties, and submitting specific ESG-related proposals for a vote by JPMorgan Chase's shareholders.

These and other types of activist criticism and actions directed at JPMorgan Chase could potentially engender dissatisfaction among clients, customers, investors and employees with how JPMorgan Chase addresses ESG concerns in its business activities. In all of these cases, the resulting harm to JPMorgan Chase's reputation could:

- attract scrutiny from governmental or regulatory bodies
- cause certain clients and customers to cease doing business with JPMorgan Chase
- impair JPMorgan Chase’s ability to attract new clients and customers, or to expand its relationships with existing clients and customers
- diminish JPMorgan Chase's ability to hire or retain employees
- prompt JPMorgan Chase to cease doing business with certain clients or customers
- cause certain investors to divest from investments in securities of JPMorgan Chase, or
- otherwise negatively affect JPMorgan Chase's business and results of operations.

Actions by the financial services industry generally or individuals in the industry can also affect JPMorgan Chase's reputation. For example, the reputation of the industry as a whole can be damaged by concerns that:

- consumers have been treated unfairly by a financial institution, or
- a financial institution has acted inappropriately with respect to the methods used to offer products to customers.

If JPMorgan Chase is perceived to have engaged in these types of behaviors, this could weaken its reputation among clients or customers.

## Failure to effectively manage potential conflicts of interest or to satisfy fiduciary obligations can result in litigation and enforcement actions, as well as damage JPMorgan Chase's reputation.

JPMorgan Chase's ability to manage potential conflicts of interest is highly complex due to the broad range of its business activities which encompass a variety of transactions, obligations and interests with and among JPMorgan Chase's clients and customers. JPMorgan Chase can become subject to litigation, enforcement actions, and heightened regulatory scrutiny, and its reputation can be damaged, by the failure or perceived failure to:

- adequately address or appropriately disclose conflicts of interest, including potential conflicts of interest that may arise in connection with providing multiple products and services in, or having one or more investments related to, the same transaction
- identify and address any conflict of interest that a third party with which it is does business may have with respect to a transaction involving JPMorgan Chase
- deliver appropriate standards of service and quality
- treat clients and customers fairly and with the appropriate standard of care
- use client and customer data responsibly and in a manner that meets legal requirements and regulatory expectations
- provide fiduciary products or services in accordance with the applicable legal and regulatory standards, or
- handle or use confidential information of customers or clients appropriately and in compliance with applicable data protection and privacy laws, rules and regulations.
A failure or perceived failure to appropriately address conflicts of interest or fiduciary obligations could result in customer dissatisfaction, litigation and regulatory fines, penalties or other sanctions, and heightened regulatory scrutiny and enforcement actions, all of which can lead to lost revenue and higher operating costs and cause serious harm to JPMorgan Chase's reputation.

## Country

## An outbreak or escalation of hostilities between countries or within a country or region could have a material adverse effect on the global economy and on JPMorgan Chase's businesses within the affected region or globally.

Aggressive actions by hostile governments or groups, including armed conflict or intensified cyber attacks, could expand in unpredictable ways by drawing in other countries or escalating into full-scale war with potentially catastrophic consequences, particularly if one or more of the combatants possess nuclear weapons. Depending on the scope of the conflict, the hostilities could result in:

- worldwide economic disruption
- heightened volatility in financial markets
- severe declines in asset values, accompanied by widespread sell-offs of investments
- substantial depreciation of local currencies, potentially leading to defaults by borrowers and counterparties in the affected region
- disruption of global trade, and
- diminished consumer, business and investor confidence.
Any of the above consequences could have significant negative effects on JPMorgan Chase's operations and
earnings, both in the countries or regions directly affected by the hostilities or globally. Further, if the U.S. were to become directly involved in such a conflict, this could lead to a curtailment of any operations that JPMorgan Chase may have in the affected countries or region, as well as in any nation that is aligned against the U.S. in the hostilities. JPMorgan Chase could also experience more numerous and aggressive cyber attacks launched by or under the sponsorship of one or more of the adversaries in such a conflict.

## JPMorgan Chase's business and operations in certain countries can be adversely affected by local economic, political, regulatory and social factors.

Some of the countries in which JPMorgan Chase conducts business have economies or markets that are less developed and more volatile or may have political, legal and regulatory regimes that are less established or predictable than other countries in which JPMorgan Chase operates. In addition, in some jurisdictions in which JPMorgan Chase conducts business, the local economy and business activities are subject to substantial government influence or control. Some of these countries have in the past experienced economic disruptions, including:

- extreme currency fluctuations
- high inflation
- Iow or negative growth, and
- defaults or reduced ability to service sovereign debt.

The governments in these countries have sometimes reacted to these developments by imposing restrictive policies that adversely affect the local and regional business environment, such as:

- price, capital or exchange controls, including imposition of punitive transfer and convertibility restrictions or forced currency exchange
- expropriation or nationalization of assets or confiscation of property, including intellectual property, and
- changes in laws, rules and regulations.

The impact of these actions could be accentuated in trading markets that are smaller, less liquid and more volatile than more-developed markets. These types of government actions can negatively affect JPMorgan Chase's operations in the relevant country, either directly or by suppressing the business activities of local clients or multi-national clients that conduct business in the jurisdiction.
In addition, emerging markets countries, as well as more developed countries, have been susceptible to unfavorable social developments arising from poor economic conditions or governmental actions, including:

- widespread demonstrations, civil unrest or general strikes
- crime and corruption

## Part I

- security and personal safety issues
- an outbreak or escalation of hostilities, or other geopolitical instabilities
- overthrow of incumbent governments
- terrorist attacks, and
- other forms of internal discord.

These economic, political, regulatory and social developments have in the past resulted in, and in the future could lead to, conditions that can adversely affect JPMorgan Chase's operations in those countries and impair the revenues, growth and profitability of those operations. In addition, any of these events or circumstances in one country can affect JPMorgan Chase's operations and investments in another country or countries, including in the U.S.

## People

## JPMorgan Chase's ability to attract and retain qualified and diverse employees is critical to its success.

JPMorgan Chase's employees are its most important resource, and in many areas of the financial services industry, competition for qualified personnel is intense. JPMorgan Chase endeavors to attract talented and diverse new employees and retain, develop and motivate its existing employees. JPMorgan Chase's efforts to retain talented and diverse employees can be particularly challenging when members of its workforce are targeted for recruitment by competitors. If JPMorgan Chase were unable to continue to attract or retain qualified and diverse employees, including successors to the Chief Executive Officer, members of the Operating Committee and other senior leaders, JPMorgan Chase's performance, including its competitive position, could be materially and adversely affected.

JPMorgan Chase's increased use of hybrid work models could result in deterioration in employee performance or degradation of JPMorgan Chase's control environment which may have a material and adverse effect on its business and operations. Alternatively, discontinuing hybrid work models could harm JPMorgan Chase's ability to attract and retain employees.

## Unfavorable changes in immigration or travel policies could adversely affect JPMorgan Chase's businesses and operations.

JPMorgan Chase relies on the skills, knowledge and expertise of employees located throughout the world. Changes in immigration or travel policies in the U.S. and other countries that unduly restrict or otherwise make it more difficult for employees or their family members to work in, or travel to or transfer between, jurisdictions in which JPMorgan Chase has operations or conducts its business could inhibit JPMorgan Chase's ability to attract and retain qualified employees, and thereby dilute the quality of its workforce, or could prompt JPMorgan Chase to
make structural changes to its worldwide or regional operating models that cause its operations to be less efficient or more costly.

## Legal

## JPMorgan Chase faces significant legal risks from litigation and formal and informal regulatory and government investigations.

JPMorgan Chase is named as a defendant or is otherwise involved in many legal proceedings, including class actions and other litigation or disputes with third parties. Actions currently pending against JPMorgan Chase may result in judgments, settlements, fines, penalties or other sanctions adverse to JPMorgan Chase. Any of these matters could materially and adversely affect JPMorgan Chase's business, financial condition or results of operations, or cause serious reputational harm. As a participant in the financial services industry, it is likely that JPMorgan Chase will continue to experience a high level of litigation and regulatory and government investigations related to its businesses and operations.

Regulators and other government agencies conduct examinations of JPMorgan Chase and its subsidiaries both on a routine basis and in targeted exams, and JPMorgan Chase's businesses and operations are subject to heightened regulatory oversight. This heightened regulatory scrutiny, or the results of such an investigation or examination, may lead to additional regulatory investigations or enforcement actions. There is no assurance that those actions will not result in resolutions or other enforcement actions against JPMorgan Chase. Furthermore, a single event involving a potential violation of law or regulation may give rise to numerous and overlapping investigations and proceedings, either by multiple federal, state or local agencies and officials in the U.S. or, in some instances, regulators and other governmental officials in non-U.S. jurisdictions.

If another financial institution violates a law or regulation relating to a particular business activity or practice, this will often give rise to an investigation by regulators and other governmental agencies of the same or similar activity or practice by JPMorgan Chase.

These and other initiatives by U.S. and non-U.S. governmental authorities may subject JPMorgan Chase to judgments, settlements, fines, penalties or other sanctions, and may require JPMorgan Chase to restructure its operations and activities or to cease offering certain products or services. All of these potential outcomes could harm JPMorgan Chase's reputation or lead to higher operational costs, thereby reducing JPMorgan Chase's profitability, or result in collateral consequences. In addition, the extent of JPMorgan Chase's exposure to legal and regulatory matters can be unpredictable and could, in some cases, exceed the amount of reserves that JPMorgan Chase has established for those matters.

## Item 1B. Unresolved Staff Comments.

None.

## Item 2. Properties.

JPMorgan Chase's headquarters is located in New York City at 383 Madison Avenue, a 47 -story office building that it owns. The demolition of the Firm's former headquarters at 270 Park Avenue in New York City was completed in 2021, and construction of a new headquarters on the same site is underway.

The Firm owned or leased facilities in the following locations at December 31, 2022.

| December 31, 2022 (in millions) | Approximate square footage |
| :---: | :---: |
| United States ${ }^{(a)}$ |  |
| New York City, New York |  |

| (a) At December 31, 2022, the Firm owned or leased 4,787 retail branches in 48 states and Washington D.C. |  |
| The premises and facilities occupied by JPMorgan Chase are used across all of the Firm's business segments and for |  |
| corporate purposes. JPMorgan Chase continues to evaluate its current and projected space requirements and may determine from time to time that certain of its properties |  |
| longer necessary for its operations. There is no assurance that the Firm will be able to dispose of any such excess |  |
| costs in connection with such dispositions. Such disposition | not incur |
| costs may be material to the Firm's results of operations in |  |

a given period. Refer to the Consolidated Results of Operations on pages 51-54 for information on occupancy expense.

## Item 3. Legal Proceedings.

Refer to Note 30 for a description of the Firm's material legal proceedings.
Item 4. Mine Safety Disclosures.
Not applicable.

## Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

## Market for registrant's common equity

JPMorgan Chase's common stock is listed and traded on the New York Stock Exchange. Refer to "Five-year stock performance," on page 45 for a comparison of the cumulative total return for JPMorgan Chase common stock with the comparable total return of the S\&P 500 Index, the KBW Bank Index and the S\&P Financials Index over the fiveyear period ended December 31, 2022.

Refer to Capital actions in the Capital Risk Management section of Management's discussion and analysis on page 94 for information on the common dividend payout ratio. Refer to Note 21 for a discussion of restrictions on dividend payments. On January 31, 2023, there were 203,141 holders of record of JPMorgan Chase common stock. Refer to Part III, Item 12 on page 37 for information regarding securities authorized for issuance under the Firm's employee share-based incentive plans.
Repurchases under the common share repurchase program
Refer to Capital actions in the Capital Risk Management section of Management's discussion and analysis on page 94 for information regarding repurchases under the Firm's common share repurchase program.

Effective May 1, 2022, the Firm is authorized to purchase up to $\$ 30$ billion of common shares under its common share repurchase program, which superseded the previously approved repurchase program under which the Firm was authorized to purchase up to $\$ 30$ billion of common shares.
On July 14, 2022, the Firm announced that it had temporarily suspended share repurchases in anticipation of the increase in the Firm's regulatory capital requirements. The Firm had set a target for achieving CET1 capital of $13.0 \%$ by the first quarter of 2023. The Firm met and exceeded that target in the fourth quarter of 2022, and resumed repurchasing shares under its common share repurchase program in the first quarter of 2023.
Shares repurchased pursuant to the common share repurchase program during 2022 were as follows.

| Year ended December 31, 2022 | Total number of shares of common stock repurchased | Average price paid per share of common stock ${ }^{(\mathrm{a})}$ |  | Aggregate purchase price of common stock repurchases (in millions) ${ }^{(\mathrm{a})}$ |  | Dollar value of remaining authorized repurchase (in millions) ${ }^{(a)}$ |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| First quarter | 18,106,991 | \$ | 138.04 | \$ | 2,500 | \$ | 9,052 |  |
| Second quarter | 4,981,047 |  | 124.88 |  | 622 |  | 29,633 | (b)(c) |
| Third quarter | - |  | - |  | - |  | - |  |
| October | - |  | - |  | - |  | - |  |
| November | - |  | - |  | - |  | - |  |
| December | - |  | - |  | - |  | - |  |
| Fourth quarter | - |  | - |  | - |  | - |  |
| Year-to-date | 23,088,038 | \$ | 135.20 | \$ | 3,122 | \$ | 29,633 | (c) |

(a) Excludes commissions cost.
(b) The remaining amount of $\$ 8.8$ billion under the prior Board authorization was canceled when the $\$ 30$ billion repurchase program was authorized by the Board of Directors effective May 1, 2022.
(c) Represents the amount remaining under the $\$ 30$ billion repurchase program.

## Item 6. Reserved

## Item 7. Management's Discussion and Analysis of

 Financial Condition and Results of Operations.Management's discussion and analysis of financial condition and results of operations, entitled "Management's discussion and analysis," appears on pages 46-154. Such information should be read in conjunction with the Consolidated Financial Statements and Notes thereto, which appear on pages 159-291.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

Refer to the Market Risk Management section of Management's discussion and analysis on pages 131-138 for a discussion of quantitative and qualitative disclosures about market risk.

## Item 8. Financial Statements and Supplementary

 Data.The Consolidated Financial Statements, together with the Notes thereto and the report thereon dated February 21, 2023, of PricewaterhouseCoopers LLP, the Firm's independent registered public accounting firm (PCAOB ID 238), appear on pages 156-291.

The "Glossary of Terms and Acronyms" is included on pages 297-303.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure.

None.

## Item 9A. Controls and Procedures.

The internal control framework promulgated by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"), "Internal Control - Integrated Framework" ("COSO 2013"), provides guidance for designing, implementing and conducting internal control and assessing its effectiveness. The Firm used the COSO 2013 framework to assess the effectiveness of the Firm's internal control over financial reporting as of December 31, 2022. Refer to "Management's report on internal control over financial reporting" on page 155.
As of the end of the period covered by this report, an evaluation was carried out under the supervision and with the participation of the Firm's management, including its Chairman and Chief Executive Officer and its Chief Financial Officer, of the effectiveness of its disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934). Based on that evaluation, the Chairman and Chief Executive Officer and the Chief Financial Officer concluded that these disclosure controls and procedures were effective. Refer to Exhibits 31.1 and 31.2 for the Certifications furnished by the Chairman and Chief Executive Officer and Chief Financial Officer, respectively.
The Firm is committed to maintaining high standards of internal control over financial reporting. Nevertheless, because of its inherent limitations, internal control over financial reporting may not prevent or detect all misstatements. Deficiencies or lapses in internal controls may occur from time to time, and there can be no assurance that any such deficiencies will not result in significant deficiencies or material weaknesses in internal control in the future and collateral consequences therefrom. Refer to "Management's report on internal control over financial reporting" on page 155 for further information. There was no change in the Firm's internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) that occurred during the three months ended December 31, 2022, that has materially affected, or is reasonably likely to
materially affect, the Firm's internal control over financial reporting.

Item 9B. Other Information.
None.
Item 9 C . Disclosure regarding Foreign Jurisdictions that Prevent Inspections. Not applicable.

## Parts III and IV

## Item 10. Directors, Executive Officers and Corporate Governance.

## Executive officers of the registrant

| Age |  |  |
| :---: | :---: | :---: |
| Name | (at December 31, 2022) | Positions and offices |
| James Dimon | 66 | Chairman of the Board since December 2006 and Chief Executive Officer since December 2005. |
| Ashley Bacon | 53 | Chief Risk Officer since June 2013. |
| Jeremy Barnum | 50 | Chief Financial Officer since May 2021, prior to which he was Head of Global Research for the Corporate \& Investment Bank since February 2021. He previously served as Chief Financial Officer of the Corporate \& Investment Bank from July 2013 until February 2021. |
| Lori A. Beer | 55 | Chief Information Officer since September 2017, prior to which she had been Chief Information Officer of the Corporate \& Investment Bank since June 2016. |
| Mary Callahan Erdoes | 55 | Chief Executive Officer of Asset \& Wealth Management since September 2009. |
| Stacey Friedman | 54 | General Counsel since January 2016. |
| Marianne Lake | 53 | Co-Chief Executive Officer of Consumer \& Community Banking since May 2021, prior to which she had been Chief Executive Officer of Consumer Lending since May 2019. She was Chief Financial Officer from January 2013 until May 2019. |
| Robin Leopold | 58 | Head of Human Resources since January 2018, prior to which she had been Head of Human Resources for the Corporate \& Investment Bank since August 2012. |
| Douglas B. Petno | 57 | Chief Executive Officer of Commercial Banking since January 2012. |
| Jennifer A. Piepszak | 52 | Co-Chief Executive Officer of Consumer \& Community Banking since May 2021, prior to which she had been Chief Financial Officer since May 2019. She previously served as Chief Executive Officer for Card Services from February 2017 until May 2019. |
| Daniel E. Pinto | 60 | President and Chief Operating Officer since January 2022 and Chief Executive Officer of the Corporate \& Investment Bank since March 2014, having previously served as Co-President and Co-Chief Operating Officer since January 2018. |
| Peter L. Scher | 61 | Vice Chairman since March 2021. He previously served as Chairman of the MidAtlantic Region from February 2015 until December 2022 and Head of Corporate Responsibility from April 2011 until September 2021. |

Unless otherwise noted, during the five fiscal years ended December 31, 2022, all of JPMorgan Chase's above-named executive officers have continuously held senior-level positions with JPMorgan Chase. There are no family relationships among the foregoing executive officers. Information to be provided in Items $10,11,12,13$ and 14 of this 2022 Form 10-K and not otherwise included herein is incorporated by reference to the Firm's Definitive Proxy Statement for its 2023 Annual Meeting of Stockholders to be held on May 16, 2023, which will be filed with the SEC within 120 days of the end of the Firm's fiscal year ended December 31, 2022.

## Item 11. Executive Compensation.

Refer to Item 10.
Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

Refer to Item 10 for security ownership of certain beneficial owners and management.
The following table sets forth the total number of shares available for issuance under JPMorgan Chase's employee share-based incentive plans (including shares available for issuance to non-employee directors). The Firm is not authorized to grant sharebased incentive awards to non-employees, other than to non-employee directors.

| December 31, 2022 | Number of shares to be issued upon exercise of outstanding options/ stock appreciation rights | Weighted-average exercise price of outstanding options/stock appreciation rights | Number of shares remaining available for future issuance under stock incentive plans |
| :---: | :---: | :---: | :---: |
| Plan category |  |  |  |
| Employee share-based incentive plans approved by shareholders | 2,511,444 ${ }^{\text {(a) }}$ | \$ 141.19 | 69,327,901 ${ }^{\text {(b) }}$ |
| Total | 2,511,444 | \$ 141.19 | 69,327,901 |

(a) Does not include restricted stock units or performance stock units granted under the shareholder-approved Long-Term Incentive Plan ("LTIP"), as amended and restated effective May 18, 2021. Refer to Note 9 for further discussion.
(b) Represents shares available for future issuance under the shareholder-approved LTIP.

All shares available for future issuance will be issued under the shareholder-approved LTIP. Refer to Note 9 for further discussion.

## Item 13. Certain Relationships and Related

 Transactions, and Director Independence.Refer to Item 10.
Item 14. Principal Accounting Fees and Services.
Refer to Item 10.

Item 15. Exhibits, Financial Statement Schedules.

| 1 | Financial statements |

(a) Pre-provision profit, TBVPS and ROTCE are each non-GAAP financial measures. Tangible common equity ("TCE") is also a non-GAAP financial measure. Refer to Explanation and Reconciliation of the Firm's Use of Non-GAAP Financial Measures on pages 58-60 for a discussion of these measures.
(b) Quarterly ratios are based upon annualized amounts.
(c) For the years ended December 31, 2022, 2021 and 2020, the percentage represents average ratios for the three months ended December 31, 2022, 2021 and 2020.
(d) As of December 31, 2022, 2021 and 2020, the capital metrics reflect the relief provided by the Federal Reserve Board in response to the COVID-19 pandemic, including the Current Expected Credit Losses ("CECL") capital transition provisions. As of December 31, 2020, the SLR reflected the temporary exclusions of U.S. Treasury securities and deposits at Federal Reserve Banks, which became effective April 1, 2020 and remained in effect through March 31, 2021. Refer to Capital Risk Management on pages 86-96 for additional information.

## FIVE-YEAR STOCK PERFORMANCE

The following table and graph compare the five-year cumulative total return for JPMorgan Chase \& Co. ("JPMorgan Chase" or the "Firm") common stock with the cumulative return of the S\&P 500 Index, the KBW Bank Index and the S\&P Financials Index. The S\&P 500 Index is a commonly referenced equity benchmark in the United States of America ("U.S."), consisting of leading companies from different economic sectors. The KBW Bank Index seeks to reflect the performance of banks and thrifts that are publicly traded in the U.S. and is composed of leading national money center and regional banks and thrifts. The S\&P Financials Index is an index of financial companies, all of which are components of the S\&P 500. The Firm is a component of all three industry indices.

The following table and graph assume simultaneous investments of $\$ 100$ on December 31, 2017, in JPMorgan Chase common stock and in each of the above indices. The comparison assumes that all dividends were reinvested.

| December 31, <br> (in dollars) | 2017 | 2018 | 2019 | 2020 | $\mathbf{2 0 2 1}$ |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| JPMorgan Chase | $\$ 100.00$ | $\$$ | 93.35 | $\$ 137.48$ | $\$$ | 129.89 | $\$ 165.91$ |

December 31, (in dollars)

## Management's discussion and analysis

The following is Management's discussion and analysis of the financial condition and results of operations ("MD\&A") of JPMorgan Chase for the year ended December 31, 2022. The MD\&A is included in both JPMorgan Chase's Annual Report for the year ended December 31, 2022 ("Annual Report") and its Annual Report on Form 10-K for the year ended December 31, 2022 ("2022 Form 10-K" or "Form 10-K") filed with the Securities and Exchange Commission ("SEC"). Refer to the Glossary of terms and acronyms on pages 297-303 for definitions of terms and acronyms used throughout the Annual Report and the 2022 Form 10-K.

This Form 10-K contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements are based on the current beliefs and expectations of JPMorgan Chase's management, speak only as of the date of this Form 10-K and are subject to significant risks and uncertainties. Refer to Forward-looking Statements on page 154 and Part 1, Item 1A: Risk factors in this Form 10-K on pages $9-32$ for a discussion of certain of those risks and uncertainties and the factors that could cause JPMorgan Chase's actual results to differ materially because of those risks and uncertainties. There is no assurance that actual results will be in line with any outlook information set forth herein, and the Firm does not undertake to update any forward-looking statements.

## INTRODUCTION

JPMorgan Chase \& Co. (NYSE: JPM), a financial holding company incorporated under Delaware law in 1968, is a leading financial services firm based in the United States of America ("U.S."), with operations worldwide. JPMorgan Chase had $\$ 3.7$ trillion in assets and $\$ 292.3$ billion in stockholders' equity as of December 31, 2022. The Firm is a leader in investment banking, financial services for consumers and small businesses, commercial banking, financial transaction processing and asset management. Under the J.P. Morgan and Chase brands, the Firm serves millions of customers, predominantly in the U.S., and many of the world's most prominent corporate, institutional and government clients globally.
JPMorgan Chase's principal bank subsidiary is JPMorgan Chase Bank, National Association ("JPMorgan Chase Bank, N.A."), a national banking association with U.S. branches in 48 states and Washington, D.C. JPMorgan Chase's principal nonbank subsidiary is J.P. Morgan Securities LLC ("J.P. Morgan Securities"), a U.S. broker-dealer. The bank and non-bank subsidiaries of JPMorgan Chase operate nationally as well as through overseas branches and subsidiaries, representative offices and subsidiary foreign banks. The Firm's principal operating subsidiaries outside the U.S. are J.P. Morgan Securities plc and J.P. Morgan SE ("JPMSE"), which are subsidiaries of JPMorgan Chase Bank, N.A. and are based in the United Kingdom ("U.K.") and Germany, respectively.

For management reporting purposes, the Firm's activities are organized into four major reportable business segments, as well as a Corporate segment. The Firm's consumer business is the Consumer \& Community Banking ("CCB") segment. The Firm's wholesale business segments are the Corporate \& Investment Bank ("CIB"), Commercial Banking ("CB"), and Asset \& Wealth Management ("AWM"). Refer to Business Segment Results on pages 61-80, and Note 32 for a description of the Firm's business segments, and the products and services they provide to their respective client bases.

The Firm's website is www.jpmorganchase.com. JPMorgan Chase makes available on its website, free of charge, annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K pursuant to Section 13(a) or Section 15(d) of the Securities Exchange Act of 1934, as soon as reasonably practicable after it electronically files or furnishes such material to the U.S. Securities and Exchange Commission (the "SEC") at www.sec.gov. JPMorgan Chase makes new and important information about the Firm available on its website at https://www.jpmorganchase.com, including on the Investor Relations section of its website at https://www.jpmorganchase.com/ir. Information on the Firm's website is not incorporated by reference into this 2022 Form 10-K or the Firm's other filings with the SEC.

This executive overview of the MD\&A highlights selected information and does not contain all of the information that is important to readers of this 2022 Form 10-K. For a complete description of the trends and uncertainties, as well as the risks and critical accounting estimates affecting the Firm, this 2022 Form 10-K should be read in its entirety.

Financial performance of JPMorgan Chase

| Year ended December 31, (in millions, except per share data and ratios) |  | 2022 |  | 2021 | Change |

(a) The ratios reflect the CECL capital transition provisions. Refer to Capital Risk Management on pages 86-96 for additional information.
(b) NII and NIR refer to net interest income and noninterest revenue, respectively. Markets consists of CIB's Fixed Income Markets and Equity Markets businesses.
Comparisons noted in the sections below are for the full year of 2022 versus the full year of 2021, unless otherwise specified.

## Firmwide overview

JPMorgan Chase reported net income of $\$ 37.7$ billion for 2022, down $22 \%$, earnings per share of $\$ 12.09$, ROE of $14 \%$ and ROTCE of $18 \%$.

- Total net revenue was \$128.7 billion, up 6\%, reflecting:
- Net interest income of $\$ 66.7$ billion, up $28 \%$, driven by higher rates and loan growth, partially offset by lower Markets net interest income. Net interest income excluding Markets was $\$ 62.4$ billion, up $40 \%$.
- Noninterest revenue of $\$ 62.0$ billion, down $11 \%$, driven by lower Investment Banking fees, $\$ 2.4$ billion of net investment securities losses in Treasury and CIO, lower net production revenue in Home Lending and lower auto operating lease income, largely offset by higher CIB Markets revenue and a $\$ 914$ million gain on the sale of Visa Class B common shares ("Visa B shares") in Corporate.
- Noninterest expense was $\$ 76.1$ billion, up $7 \%$, driven by higher structural expense and continued investments in the business, including compensation, technology and marketing, partially offset by lower volume- and revenuerelated expense.
- The provision for credit losses was $\$ 6.4$ billion, reflecting:
- a net addition of $\$ 3.5$ billion to the allowance for credit losses, consisting of $\$ 2.3$ billion in wholesale and $\$ 1.2$ billion in consumer, driven by loan growth and deterioration in the Firm's macroeconomic outlook, partially offset by a reduction in the allowance related to a decrease in uncertainty associated with borrower behavior as the effects of the pandemic gradually recede, and
- $\$ 2.9$ billion of net charge-offs.

The prior year provision was a net benefit of $\$ 9.3$ billion, reflecting a net reduction to the allowance for credit losses of $\$ 12.1$ billion.

- The total allowance for credit losses was $\$ 22.2$ billion at December 31, 2022. The Firm had an allowance for loan losses to retained loans coverage ratio of $1.81 \%$, compared with $1.62 \%$ in the prior year.
- The Firm's nonperforming assets totaled $\$ 7.2$ billion at December 31, 2022, a net decrease of $\$ 1.1$ billion, predominantly driven by lower consumer nonaccrual loans, reflecting improved credit performance and loan sales.
- Firmwide average loans of \$1.1 trillion were up 6\%, driven by higher loans across the LOBs.
- Firmwide average deposits of $\$ 2.5$ trillion were up $5 \%$, reflecting:
- growth in CCB from existing and new accounts, and net inflows in AWM resulting from the residual effects of certain government actions, partially offset by the impact of growth in customer spending in CCB and migration into investments in AWM, and
- reductions in CIB and CB due to attrition driven by the rising interest rate environment.
Selected capital and other metrics
- CET1 capital was $\$ 219$ billion, and the Standardized and Advanced CET1 ratios were $13.2 \%$ and $13.6 \%$, respectively.
- SLR was 5.6\%.
- TBVPS grew by $2 \%$, ending 2022 at $\$ 73.12$.

## Management's discussion and analysis

- As of December 31, 2022, the Firm had average eligible High Quality Liquid Assets ("HQLA") of approximately $\$ 733$ billion and unencumbered marketable securities with a fair value of approximately $\$ 694$ billion, resulting in approximately \$1.4 trillion of liquidity sources. Refer to Liquidity Risk Management on pages 97-104 for additional information.

Refer to Consolidated Result of Operations and Consolidated Balance Sheets Analysis on pages 51-54 and pages 55-56, respectively, for a further discussion of the Firm's results.
Pre-provision profit, ROTCE, TCE, TBVPS, NII and NIR excluding Markets, and total net revenue on a managed basis are non-GAAP financial measures. Refer to Explanation and Reconciliation of the Firm's Use of NonGAAP Financial Measures on pages 58-60 for a further discussion of each of these measures.

Business segment highlights
Selected business metrics for each of the Firm's four LOBs are presented below for the full year of 2022.

| $\begin{aligned} & \text { CCB } \\ & \text { ROE } \\ & 29 \% \end{aligned}$ | - Average deposits up $10 \%$; client investment assets down 10\% <br> - Average loans up 1\%; Card Services net charge-off rate of $1.47 \%$ <br> - Debit and credit card sales volume ${ }^{(a)}$ up $14 \%$ <br> - Active mobile customers ${ }^{(b)}$ up 9\% |
| :---: | :---: |
| $\begin{aligned} & \text { CIB } \\ & \text { ROE } \\ & 14 \% \end{aligned}$ | - \#1 ranking for Global Investment Banking fees with $8.0 \%$ wallet share for the year <br> - Total Markets revenue of $\$ 29.0$ billion, up $6 \%$, with Fixed Income Markets up 10\% and Equity Markets down 2\% |
| $\begin{aligned} & \text { CB } \\ & \text { ROE } \\ & 16 \% \end{aligned}$ | - Gross Investment Banking revenue of $\$ 3.0$ billion, down 42\% <br> - Average deposits down 2\%; average loans up 9\% |
| AWM ROE <br> 25\% | - Assets under management ("Aum") of $\$ 2.8$ trillion, down 11\% <br> - Average deposits up $14 \%$; average loans up 9\% |

(a) Excludes Commercial Card.
(b) Users of all mobile platforms who have logged in within the past 90 days.

Refer to the Business Segment Results on pages 61-62 for a detailed discussion of results by business segment.

Credit provided and capital raised JPMorgan Chase continues to support consumers, businesses and communities around the globe. The Firm provided new and renewed credit and raised capital for wholesale and consumer clients during 2022, consisting of:

```
$2.4
trillion
```

Total credit provided and capital raised (including loans and commitments) ${ }^{(a)}$
$\$ 250$
billion
Credit for consumers
\$33
billion
Credit for U.S. small businesses
\$1.1
trillion
Credit for corporations
$\$ 1.0$
trillion
Capital raised for corporate clients and non-U.S. government entities

## \$65

billion

Credit and capital raised for nonprofit and U.S. government entities ${ }^{(\mathrm{a})}$
(a) Includes states, municipalities, hospitals and universities.

## Recent events

- On January 20, 2023, JPMorgan Chase announced that J.P. Morgan Asset Management had received regulatory approval from the China Securities Regulatory Commission to complete its acquisition of China International Fund Management Co., Ltd.
- On January 17, 2023, JPMorgan Chase announced that Alicia Boler Davis had been elected as a director of the Firm, effective March 20, 2023. Ms. Davis serves as Chief Executive Officer of Alto Pharmacy.

Outlook
These current expectations are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are based on the current beliefs and expectations of JPMorgan Chase's management, speak only as of the date of this Form 10-K, and are subject to significant risks and uncertainties. Refer to Forward-Looking Statements on page 154, and the Risk Factors section on pages 9-32 of this Form 10-K for a further discussion of certain of those risks and uncertainties and the other factors that could cause JPMorgan Chase's actual results to differ materially because of those risks and uncertainties. There is no assurance that actual results in 2023 will be in line with the outlook information set forth below, and the Firm does not undertake to update any forward-looking statements.
JPMorgan Chase's current outlook for full-year 2023 should be viewed against the backdrop of the global and U.S. economies, financial markets activity, the geopolitical environment, the competitive environment, client and customer activity levels, and regulatory and legislative developments in the U.S. and other countries where the Firm does business. Each of these factors will affect the performance of the Firm. The Firm will continue to make appropriate adjustments to its businesses and operations in response to ongoing developments in the business, economic, regulatory and legal environments in which it operates.
Full-year 2023

- Management expects net interest income to be approximately $\$ 73$ billion, market dependent.
- Management expects net interest income excluding Markets to be approximately $\$ 74$ billion, market dependent.
- Management expects adjusted expense to be approximately $\$ 81$ billion, market dependent.
- Management expects the net charge-off rate in Card Services to be approximately $2.6 \%$.
Net interest income excluding Markets and adjusted expense are non-GAAP financial measures. Refer to Explanation and Reconciliation of the Firm's Use of NonGAAP Financial Measures on pages 58-60.

## Management's discussion and analysis

## Business Developments

## War in Ukraine

The duration and potential outcomes of the war in Ukraine remain uncertain. The Firm has taken and continues to take steps to close positions and reduce certain of its business activities and exposures connected with the war, and to assist clients with fulfilling any pre-existing obligations and managing their Russia-related risks.

The Firm's exposure to Russia and Russia-associated clients and counterparties is not material to its financial condition or results of operations. However, the Firm continues to monitor potential secondary impacts of the war, including increased market volatility, inflationary pressures and the effects of financial and economic sanctions imposed by various governments, that could have adverse effects on the Firm's businesses.

The Firm also continues to monitor and manage the operational risks associated with the war, including compliance with the financial and economic sanctions and the increased risk of cyber attacks.

Refer to Wholesale Credit Portfolio on pages 116-126, Allowance for Credit Losses on pages 127-129, Market Risk Management on pages 131-138, Country Risk Management on pages 139-140 and Operational Risk Management on pages 142-144 for additional information.
For purposes of this Form 10-K, "Russia" refers to exposure to clients and counterparties of the Firm for which the largest proportion of their assets is located, or the largest proportion of their revenue is derived, in Russia, based on the Firm's internal country risk management framework; and "Russia-associated" refers to exposure to clients and counterparties of the Firm with respect to which economic or financial sanctions relating to the war in Ukraine have been imposed or which have close association with Russia.

Interbank Offered Rate ("IBOR") transition
The Firm and other market participants are preparing for the final stages of the transition from the use of the London Interbank Offered Rate ("LIBOR") and other IBORs in accordance with the International Organization of Securities Commission's standards for transaction-based benchmark rates. The cessation of the publication of the remaining principal tenors of U.S. dollar LIBOR (i.e., overnight, onemonth, three-month, six-month and 12-month LIBOR) ("LIBOR Cessation") is scheduled for June 30, 2023.
As of December 31, 2022, the Firm had significantly reduced the notional amount of its exposure to contracts that reference U.S. dollar LIBOR, including in derivatives, bilateral and syndicated loans, securities, and debt and preferred stock issuances, and is on-track to meet both its internal milestones for contract remediation as well as the industry milestones and recommendations published by National Working Groups, including the Alternative Reference Rates Committee in the U.S. The Firm also continues to engage with clients to assist them with transitioning their U.S. dollar LIBOR-linked contracts to replacement rates in anticipation of LIBOR Cessation. The majority of the Firm's remaining LIBOR exposure is to derivative contracts. The Firm will be participating in initiatives by the principal central counterparties ("CCPs") to convert cleared derivatives contracts linked to U.S. dollar LIBOR in the second quarter of 2023 which will remediate approximately 40\% of the Firm's remaining U.S. dollar LIBOR derivatives exposure. The Firm expects that the majority of the remaining derivatives exposure will be remediated predominantly through contractual fallback provisions.

On March 15, 2022, the Adjustable Interest Rate (LIBOR) Act ("LIBOR Act") was signed into law in the U.S. The LIBOR Act provides a framework for replacing U.S. dollar LIBOR as the reference rate in legacy financial contracts that may not otherwise transition to a replacement rate upon LIBOR Cessation. In addition, the U.K. Financial Conduct Authority is proposing that the administrator of LIBOR be required to continue to publish the one-month, three-month and sixmonth tenors of U.S. dollar LIBOR on a "synthetic" basis which would allow market participants to use such rates through September 30, 2024. This proposal would apply to contracts that are outside the scope of the LIBOR Act, including U.S. dollar LIBOR-linked contracts that are not governed by U.S. law. Both the LIBOR Act and the proposed publication of "synthetic" LIBOR are intended to facilitate, and reduce the risks associated with, the transition from LIBOR, including the potential for disputes or litigation.

The Firm continues to make necessary changes to its risk management systems in connection with the transition from LIBOR, including modifications to its operational systems and models. In addition, the Firm continues to monitor and evaluate client, industry, market, regulatory and legislative developments relating to the transition from LIBOR. Refer to Part 1, Item 1A: Risk Factors on pages 9-32 of the 2022 Form $10-\mathrm{K}$ and to Accounting and Reporting Developments on page 153 for additional information.

| This section provides a comparative discussion of JPMorgan Chase's Consolidated Results of Operations on a reported basis for the two-year period ended December 31, 2022, unless otherwise specified. Refer to Consolidated Results of Operations on pages 52-54 of the Firm's Annual Report on Form 10-K for the year ended December 31, 2021 (the "2021 Form 10-K") for a discussion of the 2021 versus 2020 results. Factors that relate primarily to a single business segment are discussed in more detail within that business segment's results. Refer to pages 149-152 for a discussion of the Critical Accounting Estimates Used by the Firm that affect the Consolidated Results of Operations. |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Revenue |  |  |  |  |  |  |

| Total net revenue |  | 128,695 |  | 121,649 |  | 119,951 |

(a) Included operating lease income of $\$ 3.7$ billion, $\$ 4.9$ billion and $\$ 5.5$ billion for the years ended December 31, 2022, 2021 and 2020, respectively. Also includes losses on tax-oriented investments. Refer to Note 6 for additional information.

## 2022 compared with 2021

Investment banking fees decreased in CIB, as volatile market conditions resulted in:

- lower equity and debt underwriting fees due to lower issuance activity, and
- lower advisory fees driven by a lower level of announced deals.

Refer to CIB segment results on pages 67-72 and Note 6 for additional information.
Principal transactions revenue increased, reflecting:

- higher net revenue in Fixed Income Markets, driven by a strong performance in the macro businesses amid volatile market conditions, particularly Currencies \& Emerging Markets and Rates, partially offset by lower revenue in Securitized Products and Credit, and
- higher revenue associated with Equity Derivatives and Prime Finance in Equity Markets,
largely offset by
- a loss of $\$ 836$ million in Credit Adjustments \& Other in CIB, compared with a gain of $\$ 250$ million in the prior year. The loss in the current year reflected funding spread widening and, to a lesser extent, losses on exposures relating to commodities and Russia and Russiaassociated counterparties,
- net markdowns recorded in the second quarter of 2022 on held-for-sale positions, primarily unfunded commitments, in the bridge financing portfolio in CIB and CB,
- higher net losses on certain legacy private equity investments in Corporate, and
- net losses in Treasury and CIO related to cash deployment transactions, which were more than offset by the related net interest income earned on those transactions.
Principal transactions revenue in CIB may in certain cases have offsets across other revenue lines, including net interest income. The Firm assesses the performance of its CIB Markets business on a total revenue basis.
Refer to CIB, CB and Corporate segment results on pages 67-72, pages 73-75 and pages 79-80, respectively, and Note 6 for additional information.

Lending- and deposit-related fees increased due to higher service fee volume in CCB, predominantly offset by lower cash management fees in CB and CIB due to a higher level of credits earned by clients and applied against such fees. Refer to CCB, CIB and CB segment results on pages 63-66, pages 67-72 and pages 73-75, respectively, and Note 6 for additional information.

Asset management, administration and commissions revenue decreased driven by:

- Iower asset management fees in AWM resulting from lower average market levels, predominantly offset by the removal of most money market fund fee waivers, and net long-term inflows,
- lower custody fees in Securities Services, primarily associated with lower average market values of assets under custody, and
- lower brokerage commissions, largely in AWM, reflecting reduced volumes,
partially offset by
- higher commissions on travel-related services and annuity sales in CCB.
Refer to CCB, CIB and AWM segment results on pages 63-66, pages 67-72 and pages 76-78, respectively, and Note 6 for additional information.

## Management's discussion and analysis

Investment securities gains/(losses) reflected higher net losses on sales of U.S. GSE and government agency MBS and U.S. Treasuries, associated with repositioning the investment securities portfolio in Treasury and CIO. Refer to Corporate segment results on pages 79-80 and Note 10 for additional information.
Mortgage fees and related income decreased driven by Home Lending, reflecting:

- lower production revenue due to lower margins and volume,
largely offset by
- higher net mortgage servicing revenue, reflecting
- the absence of a net loss in MSR risk management in the prior year primarily driven by updates to model inputs related to prepayment expectations, and
- higher operating revenue due to a higher level of thirdparty loans serviced.
Refer to CCB segment results on pages 63-66, Note 6 and 15 for further information.
Card income decreased driven by higher amortization related to new account origination costs, partially offset by higher annual fees in CCB, and higher payments revenue on volume growth in commercial cards in CIB and CB.
Refer to CCB, CIB and CB segment results on pages 63-66, pages 67-72 and pages 73-75, respectively, and Note 6 for further information.
Other income decreased reflecting:
- lower auto operating lease income in CCB as a result of a decline in volume, and
- net losses on certain investments in CIB and AWM, compared with net gains in the prior year,
partially offset by
- an increase in Other Corporate from:
- a gain of \$914M on the sale of Visa B shares,
- higher net gains related to certain other investments, and
- proceeds from an insurance settlement in the first quarter of 2022,
- a gain on an equity-method investment received in partial satisfaction of a loan in CB,
- the impact of movements in foreign exchange rates related to net investment hedges in Treasury and CIO, primarily as a result of the strengthening of the U.S. dollar, and
- the absence of weather-related write-downs recorded in the prior year on certain renewable energy investments in CIB.
Refer to Note 2 for additional information on Visa B shares.

Net interest income increased driven by higher rates and Ioan growth, partially offset by lower Markets NII.
The Firm's average interest-earning assets were \$3.3 trillion, up $\$ 133$ billion, and the yield was $2.78 \%$, up 97 basis points ("bps"). The net yield on these assets, on an FTE basis, was $2.00 \%$, an increase of 36 bps. The net yield excluding Markets was $2.60 \%$, up 69 bps.
Refer to the Consolidated average balance sheets, interest and rates schedule on pages 292-296 for further information. Net yield excluding Markets is a non-GAAP financial measure. Refer to Explanation and Reconciliation of the Firm's Use of Non-GAAP Financial Measures on pages $58-60$ for a further discussion of Net yield excluding Markets.

Provision for credit losses

| Year ended December 31, |  |  |  |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: |
| (in millions) |  | $\mathbf{2 0 2 2}$ | 2021 | 2020 |  |
| Consumer, excluding credit card | $\$$ | 506 | $\$(1,933)$ | $\$$ | 1,016 |
| Credit card | $\mathbf{3 , 3 5 3}$ | $(4,838)$ | 10,886 |  |  |
| Total consumer | $\mathbf{3 , 8 5 9}$ | $(6,771)$ | 11,902 |  |  |
| Wholesale | $\mathbf{2 , 4 7 6}$ | $(2,449)$ | 5,510 |  |  |
| Investment securities |  | $\mathbf{5 4}$ | $(36)$ | 68 |  |
| Total provision for credit losses | $\$$ | $\mathbf{6 , 3 8 9}$ | $\$(9,256)$ | $\$ 17,480$ |  |

2022 compared with 2021
The provision for credit losses was $\$ 6.4$ billion, reflecting a net addition of $\$ 3.5$ billion to the allowance for credit losses and $\$ 2.9$ billion of net charge-offs. The net addition to the allowance for credit losses consisted of:

- $\$ 2.3$ billion in wholesale, driven by deterioration in the Firm's macroeconomic outlook, and loan growth predominantly in CB and CIB, and
- \$1.2 billion in consumer, predominantly driven by Card Services, reflecting higher outstanding balances and deterioration in the Firm's macroeconomic outlook, partially offset by a reduction in the allowance related to a decrease in uncertainty associated with borrower behavior as the effects of the pandemic gradually recede.
The prior year included a $\$ 12.1$ billion net reduction in the allowance for credit losses.
Deterioration in the Firm's macroeconomic outlook included both updates to the central scenario in the fourth quarter of 2022, which now reflects a mild recession, as well as the impact of the increased weight placed on the adverse scenarios beginning in the first quarter of 2022 due to the effects associated with higher inflation, changes in monetary policy, and geopolitical risks, including the war in Ukraine.

Net charge-offs were $\$ 2.9$ billion, flat compared with 2021, and included:

- a $\$ 309$ million decrease in Card Services, reflecting the ongoing financial strength of U.S. consumers. However, median deposit balances declined in the second half of 2022, impacted by the growth in consumer spending,

## offset by

- a $\$ 190$ million increase in net charge-offs in Auto and Banking \& Wealth Management ("BWM") as net chargeoffs in the prior year benefited from government stimulus and payment assistance programs, and an increase of $\$ 76$ million in CIB.
Refer to the segment discussions of CCB on pages 63-66, CIB on pages 67-72, CB on pages 73-75, AWM on pages 76-78, the Allowance for Credit Losses on pages 127-129, and Notes 1,10 and 13 for further discussion of the credit portfolio and the allowance for credit losses.

| Year ended December 31, (in millions) |  | 2022 |  | 2021 |  | 2020 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Compensation expense | \$ | 41,636 | \$ | 38,567 | \$ | 34,988 |
| Noncompensation expense: |  |  |  |  |  |  |
| Occupancy |  | 4,696 |  | 4,516 |  | 4,449 |
| Technology, communications and equipment ${ }^{\text {(a) }}$ |  | 9,358 |  | 9,941 |  | 10,338 |
| Professional and outside services |  | 10,174 |  | 9,814 |  | 8,464 |
| Marketing |  | 3,911 |  | 3,036 |  | 2,476 |
| Other ${ }^{(b)}$ |  | 6,365 |  | 5,469 |  | 5,941 |
| Total noncompensation expense |  | 34,504 |  | 32,776 |  | 31,668 |
| Total noninterest expense | \$ | 76,140 | \$ | 71,343 | \$ | 66,656 |

(a) Includes depreciation expense associated with auto operating lease assets.
(b) Included Firmwide legal expense of $\$ 266$ million, $\$ 426$ million and $\$ 1.1$ billion for the years ended December 31, 2022, 2021 and 2020, respectively.

## 2022 compared with 2021

Compensation expense increased driven by additional headcount, primarily in technology and operations, as well as front office, and the impact of inflation, partially offset by lower revenue-related compensation in CIB.
Noncompensation expense increased as a result of:

- higher investments in the business, including marketing and technology, and
- higher structural expense, including travel and entertainment; regulatory assessments; occupancy expense associated with higher utilities and exit costs of certain leases; and other employee-related expense,
partially offset by
- lower volume-related expense, reflecting lower depreciation expense on lower Auto lease assets; and lower distribution fees in AWM, partially offset by higher operating losses and outside services, both in CCB; and
- lower legal expense.

The prior year included a $\$ 550$ million contribution to the Firm's Foundation.

Income tax expense

| Year ended December 31, <br> (in millions, except rate) | $\mathbf{2 0 2 2}$ | 2021 | 2020 |
| :--- | :---: | :---: | :---: |
| Income before income tax <br> expense | $\mathbf{\$ 4 6 , 1 6 6}$ | $\$ 59,562$ | $\$ 35,815$ |
| Income tax expense | $\mathbf{8 , 4 9 0}$ | 11,228 | 6,684 |
| Effective tax rate | $\mathbf{1 8 . 4} \%$ | $18.9 \%$ | $18.7 \%$ |

2022 compared with 2021
The effective tax rate decreased driven by income tax benefits compared with income tax expense in the prior year related to tax audit settlements, largely offset by other tax adjustments and a change in the level and mix of income and expenses subject to U.S. federal and state and local taxes. Refer to Note 25 for further information.

## Consolidated balance sheets analysis

The following is a discussion of the significant changes between December 31, 2022 and 2021.
Selected Consolidated balance sheets data

| December 31, (in millions) | 2022 |  | 2021 |  | Change |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Assets |  |  |  |  |  |
| Cash and due from banks | \$ | 27,697 | \$ | 26,438 | 5 \% |
| Deposits with banks |  | 539,537 |  | 714,396 | (24) |
| Federal funds sold and securities purchased under resale agreements |  | 315,592 |  | 261,698 | 21 |
| Securities borrowed |  | 185,369 |  | 206,071 | (10) |
| Trading assets |  | 453,799 |  | 433,575 | 5 |
| Available-for-sale securities |  | 205,857 |  | 308,525 | (33) |
| Held-to-maturity securities |  | 425,305 |  | 363,707 | 17 |
| Investment securities, net of allowance for credit losses |  | 631,162 |  | 672,232 | (6) |
| Loans |  | 1,135,647 |  | 1,077,714 | 5 |
| Allowance for loan losses |  | $(19,726)$ |  | $(16,386)$ | 20 |
| Loans, net of allowance for loan losses |  | 1,115,921 |  | 1,061,328 | 5 |
| Accrued interest and accounts receivable |  | 125,189 |  | 102,570 | 22 |
| Premises and equipment |  | 27,734 |  | 27,070 | 2 |
| Goodwill, MSRs and other intangible assets |  | 60,859 |  | 56,691 | 7 |
| Other assets |  | 182,884 |  | 181,498 | 1 |
| Total assets | \$ | 3,665,743 | \$ | 3,743,567 | (2)\% |

Cash and due from banks and deposits with banks decreased primarily as a result of lower deposits across the LOBs and loan growth. Deposits with banks reflect the Firm's placement of its excess cash with various central banks, including the Federal Reserve Banks.
Federal funds sold and securities purchased under resale agreements increased, reflecting:

- the impact of a lower level of netting on client-driven market-making activities and on collateral requirements in Markets,
- higher demand for securities to cover short positions in Fixed Income Markets, and
- an increase in the deployment of cash in Treasury and CIO.

Securities borrowed decreased driven by Markets, reflecting lower client-driven activities and lower demand for securities to cover short positions in Equity Markets.
Refer to Note 11 for additional information on securities purchased under resale agreements and securities borrowed. Trading assets increased due to:

- higher derivative receivables, primarily in foreign exchange, as a result of market movements, and
- an increase in the deployment of cash in Treasury and CIO.

Refer to Notes 2 and 5 for additional information.
Investment securities decreased, driven by lower available-for-sale ("AFS") securities, partially offset by higher held-tomaturity ("НTM") securities, which includes the impact of the transfer of $\$ 78.3$ billion of securities from AFS to HTM in 2022, for capital management purposes.

- The decrease in AFS securities was also due to paydowns, as well as unrealized losses, which are recognized in accumulated other comprehensive income ("AOCI"),
largely offset by net purchases, and
- the increase in HTM securities also reflected purchases partially offset by paydowns.

Refer to Corporate segment results on pages 79-80, Investment Portfolio Risk Management on page 130 and Notes 2 and 10 for additional information on investment securities.
Loans increased, reflecting:

- higher balances in Card Services driven by higher consumer spending and net new originations,
- higher originations and revolver utilization in CB, and
- higher wholesale Ioans in CIB,
partially offset by
- lower mortgage warehouse loans in Home Lending as sales outpaced originations due to higher interest rates, and
- the impact from PPP loan forgiveness in BWM.

The allowance for loan losses increased, reflecting a net addition of $\$ 3.3$ billion to the allowance for loan losses, consisting of:

- \$2.1 billion in wholesale, resulting from deterioration in the Firm's macroeconomic outlook, and loan growth predominantly in CB and CIB, and
- $\$ 1.2$ billion in consumer, predominantly driven by Card Services, reflecting higher outstanding balances, and deterioration in the Firm's macroeconomic outlook, partially offset by a reduction in the allowance related to a decrease in uncertainty associated with borrower behavior as the effects of the pandemic gradually recede.
There was also a $\$ 121$ million addition to the allowance for lending-related commitments recognized in other liabilities

## Management's discussion and analysis

on the Consolidated balance sheets, and a $\$ 54$ million addition to the allowance for investment securities.
Refer to Credit and Investment Risk Management on pages 106-130, and Notes 1, 2, 3, 12 and 13 for further discussion of loans and the allowance for loan losses.
Accrued interest and accounts receivable increased due to higher client receivables related to client-driven activities in Markets, as well as higher receivables in Payments related to the timing of payment activities, with December 31, 2022 falling on a weekend.
Premises and equipment, refer to Note 16 and 18 for additional information.

Goodwill, MSRs and other intangibles increased reflecting:

- higher MSRs as a result of higher market interest rates and net additions, partially offset by the realization of expected cash flows, and
- additions to goodwill associated with the acquisitions of Renovite Technologies, Inc. in the fourth quarter of 2022, Global Shares PLC and Figg, Inc. in the third quarter of 2022, and Frosch Travel Group, LLC and Volkswagen Payments S.A. in the second quarter of 2022.
Refer to Note 15 for additional information.
Other assets increased predominantly due to the impact of securities financing activities in Markets, offset by lower auto operating lease assets in CCB.

Selected Consolidated balance sheets data

| December 31, (in millions) | $\mathbf{2 0 2 2}$ | 2021 | Change |  |
| :--- | ---: | ---: | ---: | :---: |
| Liabilities |  |  |  |  |
| Deposits | $\mathbf{2 , 3 4 0 , 1 7 9}$ | $\$$ | $2,462,303$ | (5) |
| Federal funds purchased and securities loaned or sold under repurchase agreements | $\mathbf{2 0 2 , 6 1 3}$ | 194,340 | 4 |  |
| Short-term borrowings | $\mathbf{4 4 , 0 2 7}$ | 53,594 | $(18)$ |  |
| Trading liabilities | $\mathbf{1 7 7 , 9 7 6}$ | 164,693 | 8 |  |
| Accounts payable and other liabilities | $\mathbf{3 0 0 , 1 4 1}$ | 262,755 | 14 |  |
| Beneficial interests issued by consolidated variable interest entities ("VIEs") | $\mathbf{1 2 , 6 1 0}$ | 10,750 | 17 |  |
| Long-term debt | $\mathbf{2 9 5 , 8 6 5}$ | 301,005 | (2) |  |
| Total liabilities | $\mathbf{3 , 3 7 3 , 4 1 1}$ | $\mathbf{3 , 4 4 9 , 4 4 0}$ | (2) |  |
| Stockholders' equity | $\mathbf{2 9 2 , 3 3 2}$ | 294,127 | (1) |  |
| Total liabilities and stockholders' equity | $\$$ | $\mathbf{3 , 6 6 5 , 7 4 3}$ | $\$$ | $\mathbf{3 , 7 4 3 , 5 6 7}$ |

## Deposits decreased reflecting:

- attrition in CB and CIB, particularly non-operating deposits in CB, partially offset by net issuances of structured notes in Markets,
- net outflows into investments in AWM amid the rising interest rate environment, and
- a decline in balances in existing accounts in CCB due to higher customer spending, predominantly offset by net inflows into new accounts.
Federal funds purchased and securities loaned or sold under repurchase agreements increased due to:
- higher secured financing of trading assets in Markets, partially offset by
- lower secured financing of AFS investment securities in Treasury and CIO.
Short-term borrowings decreased predominantly as a result of lower financing requirements in Markets.
Refer to Liquidity Risk Management on pages 97-104 for additional information on deposits, federal funds purchased and securities loaned or sold under repurchase agreements, and short-term borrowings; and also to Notes 2 and 17 for deposits and Note 11 for federal funds purchased and securities loaned or sold under repurchase agreements. Trading liabilities increased due to client-driven marketmaking activities, which resulted in higher levels of short positions in Markets. Refer to Notes 2 and 5 for additional information.

Accounts payable and other liabilities increased due to higher client payables related to client-driven activities in Markets, including Prime Finance, as well as higher payables in Payments related to the timing of payment activities, with December 31, 2022 falling on a weekend. Refer to Note 19 for additional information.

Beneficial interests issued by consolidated VIEs increased driven by higher issuance of commercial paper as a result of an increase in Ioan balances in the Firm-administered multiseller conduits. Refer to Liquidity Risk Management on pages 97-104; and Notes 14 and 28 for additional information on Firm-sponsored VIEs and Ioan securitization trusts.

Long-term debt decreased driven by:

- fair value hedge accounting adjustments in Treasury and CIO as a result of higher rates, and a decline in the fair value of structured notes in Markets,
largely offset by
- net issuances of senior debt in Treasury and CIO and structured notes in Markets. Refer to Liquidity Risk Management on pages 97-104 and Note 20 for additional information.
Stockholders' equity reflects net unrealized losses in AOCI, predominantly driven by the impact of higher interest rates on the AFS portfolio and cash flow hedges in Treasury and CIO. Refer to Consolidated Statements of Changes in Stockholders' Equity on page 162, Capital Actions on page 94, and Note 24 for additional information.

## Consolidated cash flows analysis

The following is a discussion of cash flow activities during the years ended December 31, 2022 and 2021. Refer to Consolidated cash flows analysis on page 57 of the Firm's 2021 Form 10-K for a discussion of the 2020 activities.

|  | Year ended December 31, |  |  |
| :--- | :---: | :---: | :---: |
| (in millions) | $\mathbf{2 0 2 2}$ | 2021 | 2020 |
| Net cash provided by/(used in) |  |  |  |
| Operating activities | $\mathbf{\$ 1 0 7 , 1 1 9}$ | $\$$ | 78,084 |
| Investing activities | $\mathbf{( 1 3 7 , 8 1 9 )}$ | $(129,344)$ | $(261,912)$ |
| Financing activities | $\mathbf{( 1 2 6 , 2 5 7 )}$ | 275,993 | 596,645 |
| Effect of exchange rate <br> changes on cash | $\mathbf{( 1 6 , 6 4 3 )}$ | $(11,508)$ | 9,155 |
| Net increase/(decrease) in <br> cash and due from banks and <br> deposits with banks | $\mathbf{\$ ( 1 7 3 , 6 0 0 )}$ | $\$ 213,225$ | $\$ 263,978$ |

## Operating activities

JPMorgan Chase's operating assets and liabilities primarily support the Firm's lending and capital markets activities. These assets and liabilities can vary significantly in the normal course of business due to the amount and timing of cash flows, which are affected by client-driven and risk management activities and market conditions. The Firm believes that cash flows from operations, available cash and other liquidity sources, and its capacity to generate cash through secured and unsecured sources, are sufficient to meet its operating liquidity needs.

- In 2022, cash provided resulted from higher accounts payable and other liabilities, lower securities borrowed, and net proceeds from sales, securitizations, and paydowns of loans held-for-sale, partially offset by higher trading assets.
- In 2021, cash provided resulted from lower trading assets and higher accounts payable and other liabilities, partially offset by higher securities borrowed and lower trading liabilities.

## Investing activities

The Firm's investing activities predominantly include originating held-for-investment loans, investing in the investment securities portfolio and other short-term instruments.

- In 2022, cash used resulted from net originations of loans and higher securities purchased under resale agreements, partially offset by net proceeds from investment securities.
- In 2021, cash used resulted from net purchases of investment securities and higher net originations of loans, partially offset by lower securities purchased under resale agreements.

## Financing activities

The Firm's financing activities include acquiring customer deposits and issuing long-term debt and preferred stock.

- In 2022, cash used reflected lower deposits, partially offset by net proceeds from long- and short-term borrowings.
- In 2021, cash provided reflected higher deposits and net proceeds from long- and short-term borrowings, partially offset by a decrease in securities loaned or sold under repurchase agreements.
- For both periods, cash was used for repurchases of common stock and cash dividends on common and preferred stock.

Refer to Consolidated Balance Sheets Analysis on pages 55-56, Capital Risk Management on pages 86-96, and Liquidity Risk Management on pages 97-104, and the Consolidated Statements of Cash Flows on page 163 for a further discussion of the activities affecting the Firm's cash flows.

## Management's discussion and analysis

## EXPLANATION AND RECONCILIATION OF THE FIRM'S USE OF NON-GAAP FINANCIAL MEASURES

## Non-GAAP financial measures

The Firm prepares its Consolidated Financial Statements in accordance with U.S. GAAP; these financial statements appear on pages $159-163$. That presentation, which is referred to as "reported" basis, provides the reader with an understanding of the Firm's results that can be tracked consistently from year-to-year and enables a comparison of the Firm's performance with the U.S. GAAP financial statements of other companies.

In addition to analyzing the Firm's results on a reported basis, management reviews Firmwide results, including the overhead ratio, on a "managed" basis; these Firmwide managed basis results are non-GAAP financial measures. The Firm also reviews the results of the LOBs on a managed basis. The Firm's definition of managed basis starts, in each case, with the reported U.S. GAAP results and includes certain reclassifications to present total net revenue for the Firm (and each of the reportable business segments) on an FTE basis. Accordingly, revenue from investments that receive tax credits and tax-exempt securities is presented in the managed results on a basis comparable to taxable investments and securities. These financial measures allow
management to assess the comparability of revenue from year-to-year arising from both taxable and tax-exempt sources. The corresponding income tax impact related to tax-exempt items is recorded within income tax expense. These adjustments have no impact on net income as reported by the Firm as a whole or by the LOBs.

Management also uses certain non-GAAP financial measures at the Firm and business-segment level because these other non-GAAP financial measures provide information to investors about the underlying operational performance and trends of the Firm or of the particular business segment, as the case may be, and therefore facilitate a comparison of the Firm or the business segment with the performance of its relevant competitors. Refer to Business Segment Results on pages 61-80 for additional information on these non-GAAP measures. Non-GAAP financial measures used by the Firm may not be comparable to similarly named non-GAAP financial measures used by other companies.

The following summary table provides a reconciliation from the Firm's reported U.S. GAAP results to managed basis.

|  | 2022 |  |  |  | 2021 |  |  |  | 2020 |  |  |  |

(a) Predominantly recognized in CIB, CB and Corporate.

Net interest income, net yield, and noninterest revenue excluding CIB Markets
In addition to reviewing net interest income, net yield, and noninterest revenue on a managed basis, management also reviews these metrics excluding CIB Markets, as shown below. CIB Markets consists of Fixed Income Markets and Equity Markets. These metrics, which exclude CIB Markets, are non-GAAP financial measures. Management reviews these metrics to assess the performance of the Firm's lending, investing (including asset-liability management) and deposit-raising activities, apart from any volatility associated with CIB Markets activities. In addition, management also assesses CIB Markets business performance on a total revenue basis as offsets may occur across revenue lines. Management believes that these measures provide investors and analysts with alternative measures to analyze the revenue trends of the Firm.

| Year ended December 31, (in millions, except rates) |  | 2022 |  | 2021 |  | 2020 |

(a) Interest includes the effect of related hedges. Taxable-equivalent amounts are used where applicable.
(b) Refer to pages 70-71 for further information on CIB Markets.

Calculation of certain U.S. GAAP and non-GAAP financial measures
Certain U.S. GAAP and non-GAAP financial measures are calculated as follows:

Book value per share ("BVPS")
Common stockholders' equity at period-end /
Common shares at period-end
Overhead ratio
Total noninterest expense / Total net revenue
ROA
Reported net income / Total average assets
ROE
Net income* / Average common stockholders' equity
ROTCE
Net income* / Average tangible common equity
TBVPS
Tangible common equity at period-end / Common shares at period-end

* Represents net income applicable to common equity

In addition, the Firm reviews other non-GAAP measures such as

- Adjusted expense, which represents noninterest expense excluding Firmwide legal expense, and
- Pre-provision profit, which represents total net revenue less total noninterest expense.
Management believes that these measures help investors understand the effect of these items on reported results and provide an alternative presentation of the Firm's performance.
The Firm also reviews the allowance for loan losses to period-end loans retained excluding trade finance and conduits, a non-GAAP financial measure, to provide a more meaningful assessment of CIB's allowance coverage ratio.

## TCE, ROTCE and TBVPS

TCE, ROTCE and TBVPS are each non-GAAP financial measures. TCE represents the Firm's common stockholders' equity (i.e., total stockholders' equity less preferred stock) less goodwill and identifiable intangible assets (other than MSRs), net of related deferred tax liabilities. ROTCE measures the Firm's net income applicable to common equity as a percentage of average TCE. TBVPS represents the Firm's TCE at period-end divided by common shares at period-end. TCE, ROTCE and TBVPS are utilized by the Firm, as well as investors and analysts, in assessing the Firm's use of equity.
The following summary table provides a reconciliation from the Firm's common stockholders' equity to TCE.

| (in millions, except per share and ratio data) | Period-end |  |  |  | Average |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | $\begin{gathered} \text { Dec 31, } \\ 2022 \end{gathered}$ |  | $\begin{gathered} \text { Dec 31, } \\ 2021 \end{gathered}$ |  | Year ended December 31, |  |  |
|  |  |  | 2022 | 2021 | 2020 |
| Common stockholders' equity | \$ | 264,928 |  |  | \$ | 259,289 | \$ 253,068 | \$ 250,968 | \$ 236,865 |
| Less: Goodwill |  | 51,662 |  | 50,315 | 50,952 | 49,584 | 47,820 |
| Less: Other intangible assets |  | 1,224 |  | 882 | 1,112 | 876 | 781 |
| Add: Certain deferred tax liabilities ${ }^{(\mathrm{a})}$ |  | 2,510 |  | 2,499 | 2,505 | 2,474 | 2,399 |
| Tangible common equity | \$ | 214,552 | \$ | 210,591 | \$ 203,509 | \$ 202,982 | \$ 190,663 |
| Return on tangible common equity | NA |  |  | NA | 18 \% | 23 \% | $14 \%$ |
| Tangible book value per share | \$ | 73.12 | \$ | 71.53 | NA | NA | NA |

(a) Represents deferred tax liabilities related to tax-deductible goodwill and to identifiable intangibles created in nontaxable transactions, which are netted against goodwill and other intangibles when calculating TCE.

The Firm is managed on an LOB basis. There are four major reportable business segments - Consumer \& Community Banking, Corporate \& Investment Bank, Commercial Banking and Asset \& Wealth Management. In addition, there is a Corporate segment.

The business segments are determined based on the products and services provided, or the type of customer served, and they reflect the manner in which financial information is evaluated by the Firm's Operating Committee. Segment results are presented on a managed basis. Refer to Explanation and Reconciliation of the Firm's use of Non-GAAP Financial Measures, on pages 58-60 for a definition of managed basis.

| JPMorgan Chase |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Consumer Businesses |  |  | Wholesale Businesses |  |  |  |

(a) In the fourth quarter of 2022, Consumer \& Business Banking was renamed Banking \& Wealth Management ("BWM").
(b) In the fourth quarter of 2022, Card \& Auto was renamed Card Services \& Auto.

Description of business segment reporting methodology Results of the business segments are intended to present each segment as if it were a stand-alone business. The management reporting process that derives business segment results includes the allocation of certain income and expense items. The Firm also assesses the level of capital required for each LOB on at least an annual basis. The Firm periodically assesses the assumptions, methodologies and reporting classifications used for segment reporting, and further refinements may be implemented in future periods. The Firm's LOBs also provide various business metrics which are utilized by the Firm and its investors and analysts in assessing performance.

## Revenue sharing

When business segments join efforts to sell products and services to the Firm's clients and customers, the participating business segments may agree to share revenue from those transactions. Revenue is generally recognized in the segment responsible for the related product or service, with allocations to the other segment(s) involved in the transaction. The segment results reflect these revenue-sharing agreements.

## Expense Allocation

Where business segments use services provided by corporate support units, or another business segment, the costs of those services are allocated to the respective business segments. The expense is generally
allocated based on the actual cost and use of services provided. In contrast, certain costs and investments related to corporate support units, technology and operations that are not currently utilized by any LOB, are not allocated to the business segments and are retained in Corporate. Expense retained in Corporate generally includes costs that would not be incurred if the segments were stand-alone businesses, and other items not aligned with a particular business segment.

## Funds transfer pricing

Funds transfer pricing ("FTP") is the process by which the Firm allocates interest income and expense to the LOBs and Other Corporate and transfers the primary interest rate risk and liquidity risk to Treasury and CIO.

The funds transfer pricing process considers the interest rate and liquidity risk characteristics of assets and liabilities and off-balance sheet products. Periodically, the methodology and assumptions utilized in the FTP process are adjusted to reflect economic conditions and other factors, which may impact the allocation of net interest income to the segments.
As a result of the rising interest rate environment, the cost of funds for assets and the credits earned for liabilities have generally increased, impacting the business segments' net interest income. During the period ended December 31, 2022, this has resulted in higher cost of funds for loans and contributed to margin expansion on deposits.

## Management's discussion and analysis

## Foreign exchange risk

Foreign exchange risk is transferred from the LOBs and Other Corporate to Treasury and CIO for certain revenues and expenses. Treasury and CIO manages these risks centrally and reports the impact of foreign exchange rate movements related to the transferred risk in its results. Refer to Market Risk Management on page 137 for additional information.

## Debt expense and preferred stock dividend allocation

 As part of the funds transfer pricing process, almost all of the cost of the credit spread component of outstanding unsecured long-term debt and preferred stock dividends is allocated to the reportable business segments, while the balance of the cost is retained in Corporate. The methodology to allocate the cost of unsecured long-term debt and preferred stock dividends to the business segments is aligned with the relevant regulatory capital requirements and funding needs of the LOBs, as applicable. The allocated cost of unsecured long-term debt is included in a business segment's net interest income, and net income is reduced by preferred stock dividends to arrive at abusiness segment's net income applicable to common equity.
Refer to Capital Risk Management on pages 86-96 for additional information.

## Capital allocation

The amount of capital assigned to each business segment is referred to as equity. The Firm's allocation methodology incorporates Basel III Standardized Risk-weighted assets ("RWA"), Basel III Advanced RWA, the global systemically important banks ("GSIB") surcharge, and a simulation of capital in a severe stress environment. At least annually, the assumptions, judgments and methodologies used to allocate capital are reassessed and, as a result, the capital allocated to the LOBs may change. As of January 1, 2023, the Firm has changed its line of business capital allocations primarily as a result of updates to the Firm's capital requirements and changes in RWA for each LOB.

Refer to Line of business equity on page 93 for additional information on capital allocation.

Segment Results - Managed Basis
The following tables summarize the Firm's results by segment for the periods indicated.

| Year ended December 31, | Consumer \& Community Banking |  |  | Corporate \& Investment Bank |  |  | Commercial Banking |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## Selected Firmwide Metrics

The following tables present key metrics for Wealth Management, which consists of the Global Private Bank in AWM and J.P. Morgan Wealth Management in CCB; and total revenue and key metrics for J.P. Morgan Payments, which consists of payments activities in CIB and CB. This presentation is intended to provide investors with additional information concerning Wealth Management and J.P. Morgan Payments, each of which consists of similar business activities conducted across LOBs to serve different types of clients and customers.

## Selected metrics - Wealth Management

| Year ended December 31, | $\mathbf{2 0 2 2}$ | 2021 | 2020 |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |

The following sections provide a comparative discussion of the Firm's results by segment as of or for the years ended December 31, 2022 and 2021.

Consumer \& Community Banking offers products and services to consumers and small businesses through bank branches, ATMs, digital (including mobile and online) and telephone banking. CCB is organized into Banking \& Wealth Management (including Consumer Banking, J.P. Morgan Wealth Management and Business Banking), Home Lending (including Home Lending Production, Home Lending Servicing and Real Estate Portfolios) and Card Services \& Auto. Banking \& Wealth Management offers deposit, investment and lending products, cash management, payments and services. Home Lending includes mortgage origination and servicing activities, as well as portfolios consisting of residential mortgages and home equity loans. Card Services issues credit cards and offers travel services. Auto originates and services auto loans and leases.

(a) Included operating lease income of $\$ 3.6$ billion, $\$ 4.8$ billion and $\$ 5.4$ billion for the years ended December 31, 2022, 2021 and 2020, respectively.
(b) Included depreciation expense on leased assets of $\$ 2.4$ billion, $\$ 3.3$ billion and $\$ 4.2$ billion for the years ended December 31, 2022, 2021 and 2020, respectively.
(c) In the fourth quarter of 2022, Consumer \& Business Banking was renamed Banking \& Wealth Management.
(d) In the fourth quarter of 2022, Card \& Auto was renamed Card Services \& Auto.
(e) Included MSR risk management results of $\$ 93$ million, $\$(525)$ million and \$(18) million for the years ended December 31, 2022, 2021 and 2020, respectively.

## Management's discussion and analysis

2022 compared with 2021
Net income was $\$ 14.9$ billion, down 29\%, reflecting a net increase in the provision for credit losses compared with a net benefit in the prior year.
Net revenue was $\$ 55.0$ billion, an increase of $10 \%$. Net interest income was $\$ 39.9$ billion, up 22\%, predominantly driven by:

- margin expansion on higher rates as well as growth in deposits in Banking \& Wealth Management ("BWM"), and higher revolving loans in Card Services,
partially offset by
- lower NII associated with PPP Ioan forgiveness in BWM, and tighter loan spreads in Home Lending.

Noninterest revenue was $\$ 15.1$ billion, down 13\%, reflecting:

- lower production revenue from lower margins and volume in Home Lending,
- lower auto operating lease income as a result of a decline in volume, and
- lower card income reflecting higher amortization related to new account origination costs partially offset by higher annual fees in Card Services, while net interchange income was relatively flat,
partially offset by
- higher net mortgage servicing revenue, reflecting the absence of a net loss in MSR risk management in the prior year primarily driven by updates to model inputs related to prepayment expectations, as well as higher operating revenue on a higher level of third-party loans serviced,
- higher commissions reflecting travel-related services in Card Services and increased annuity sales in BWM, and
- higher deposit-related fees due to higher service fee volume in BWM.
Refer to Note 6 for additional information on card income and asset management, administration and commissions. Refer to Note 15 for further information regarding changes in the value of the MSR asset and related hedges, and mortgage fees and related income.

Noninterest expense was \$31.5 billion, up 8\%, reflecting:

- investments in the business and higher structural expenses, predominantly driven by compensation, technology and marketing,
partially offset by
- lower volume- and revenue-related expenses, predominantly driven by lower depreciation expense on lower auto lease assets, partially offset by higher operating losses.
The provision for credit losses was $\$ 3.8$ billion, driven by:
- net charge-offs of $\$ 2.7$ billion, down from $\$ 2.8$ billion in the prior year and included
- a \$309 million decrease in Card Services, reflecting the ongoing financial strength of U.S. consumers. However, median deposit balances declined in the second half of 2022, impacted by the growth in consumer spending,
largely offset by
- a $\$ 190$ million increase in net charge-offs in Auto and BWM as net charge-offs in the prior year benefited from government stimulus and payment assistance programs, and
- a $\$ 1.1$ billion net addition to the allowance for credit losses driven by
- \$950 million in Card Services, reflecting higher outstanding balances, and deterioration in the Firm's macroeconomic outlook, partially offset by a reduction in the allowance related to a decrease in uncertainty associated with borrower behavior as the effects of the pandemic gradually recede, and
- \$175 million in Home Lending.

The prior year included a $\$ 9.8$ billion reduction in the allowance for credit losses across CCB.
Refer to Credit and Investment Risk Management on pages 106-130 and Allowance for Credit Losses on pages 127-129 for a further discussion of the credit portfolios and the allowance for credit losses.

Total allowance for Ioan losses
\$13,504 \$12,340
(a) At December 31, 2022, 2021 and 2020, nonaccrual loans excluded mortgage loans 90 or more days past due and insured by U.S. government agencies of $\$ 187$ million, $\$ 342$ million and $\$ 558$ million, respectively. These amounts have been excluded based upon the government guarantee. In addition, the Firm's policy is generally to exempt credit card loans from being placed on nonaccrual status as permitted by regulatory guidance.
(b) At December 31, 2022, 2021 and 2020, generally excludes loans that were under payment deferral programs offered in response to the COVID-19 pandemic. Refer to Credit Portfolio on pages 108-109 for further information on consumer assistance. Includes loans to customers that have exited COVID-19 related payment deferral programs and are 90 or more days past due, predominantly all of which were considered collateral-dependent at time of exit.
(c) At December 31, 2022, 2021 and 2020, included $\$ 350$ million, $\$ 5.4$ billion and $\$ 19.2$ billion of loans, respectively, in Business Banking under the PPP. The Firm does not expect to realize material credit losses on PPP loans because the loans are guaranteed by the SBA. Refer to Credit Portfolio on pages 108-109 for a further discussion of the PPP.
(d) At December 31, 2022, 2021 and 2020, the principal balance of loans under payment deferral programs offered in response to the COVID-19 pandemic was $\$ 449$ million, $\$ 1.1$ billion and $\$ 9.1$ billion in Home Lending, respectively. Loans that are performing according to their modified terms are generally not considered delinquent. Refer to Credit Portfolio on pages 108-109 for further information on consumer assistance.
(e) At December 31, 2022, 2021 and 2020, excluded mortgage loans insured by U.S. government agencies of $\$ 258$ million, $\$ 405$ million and $\$ 744$ million, respectively, that are 30 or more days past due. These amounts have been excluded based upon the government guarantee.
(f) At December 31, 2022 and 2021, nonaccrual loans excluded $\$ 101$ million and $\$ 506$ million of PPP loans 90 or more days past due and guaranteed by the SBA, respectively.

(a) Users of all web and/or mobile platforms who have logged in within the past 90 days.
(b) Users of all mobile platforms who have logged in within the past 90 days.
(c) Total payments transaction volume includes debit and credit card sales volume and gross outflows of ACH, ATM, teller, wires, BillPay, PayChase, Zelle, person-to-person and checks.
(d) Includes assets invested in managed accounts and J.P. Morgan mutual funds where AWM is the investment manager. Refer to AWM segment results on pages 76-78 for additional information.
(e) Firmwide mortgage origination volume was $\$ 81.8$ billion, $\$ 182.4$ billion and $\$ 133.4$ billion for the years ended December 31, 2022, 2021 and 2020, respectively.
(f) Included origination volume under the PPP of $\$ 10.6$ billion and $\$ 21.9$ billion for the years ended December 31, 2021 and 2020, respectively. The program ended on May 31, 2021 for new applications.

The Corporate \& Investment Bank, which consists of Banking and Markets \& Securities Services, offers a broad suite of investment banking, market-making, prime brokerage, lending, and treasury and securities products and services to a global client base of corporations, investors, financial institutions, merchants, government and municipal entities. Banking offers a full range of investment banking products and services in all major capital markets, including advising on corporate strategy and structure, capital-raising in equity and debt markets, as well as loan origination and syndication. Banking also includes Payments, which provides payments services enabling clients to manage payments and receipts globally, and cross-border financing. Markets \& Securities Services includes Markets, a global market-maker across products, including cash and derivative instruments, which also offers sophisticated risk management solutions, prime brokerage, and research. Markets \& Securities Services also includes Securities Services, a leading global custodian which provides custody, fund accounting and administration, and securities lending products principally for asset managers, insurance companies and public and private investment funds.

(a) Consists primarily of centrally managed credit valuation adjustments ("CVA"), funding valuation adjustments ("FVA") on derivatives, other valuation adjustments, and certain components of fair value option elected liabilities, which are primarily reported in principal transactions revenue. Results are presented net of associated hedging activities and net of CVA and FVA amounts allocated to Fixed Income Markets and Equity Markets. Refer to Notes 2, 3 and 24 for additional information.

## Management's discussion and analysis

2022 compared with 2021
Net income was $\$ 15.0$ billion, down 29\%.
Net revenue was $\$ 47.9$ billion, down $7 \%$.
Banking revenue was $\$ 15.3$ billion, down 23\%.

- Investment Banking revenue was $\$ 6.5$ billion, down 48\%, driven by lower Investment Banking fees, which were also down $48 \%$, as volatile market conditions resulted in lower fees across products, and $\$ 251$ million of markdowns on held-for-sale positions, primarily unfunded commitments, in the bridge financing portfolio in the second quarter of 2022. The Firm ranked \#1 for Global Investment Banking fees, according to Dealogic.
- Equity underwriting fees were $\$ 1.0$ billion, down 74\%, and debt underwriting fees were $\$ 2.8$ billion, down $43 \%$, due to lower issuance activity.
- Advisory fees were $\$ 3.1$ billion, down 30\%, driven by a lower level of announced deals.
- Payments revenue was $\$ 7.4$ billion, up $18 \%$, and included the net impact of equity investments. Excluding this net impact, revenue was $\$ 7.8$ billion, up $33 \%$, driven by deposit margin expansion on higher rates and growth in fees on higher volumes.
- Lending revenue was $\$ 1.4$ billion, up $38 \%$, driven by higher net interest income primarily on higher loans, as well as fair value gains on hedges of retained loans, compared with losses in the prior year.

Markets \& Securities Services revenue was $\$ 32.6$ billion, up 2\%. Markets revenue was $\$ 29.0$ billion, up $6 \%$.

- Fixed Income Markets revenue was $\$ 18.6$ billion, up $10 \%$, driven by strong performance in the macro businesses amid volatile market conditions, particularly in Currencies \& Emerging Markets and Rates, partially offset by lower revenue in Securitized Products.
- Equity Markets revenue was \$10.4 billion, down 2\%, driven by lower revenue in Cash Equities, largely offset by Equity Derivatives.
- Securities Services revenue was \$4.5 billion, up 4\%, driven by deposit margin expansion on higher rates and growth in fees, largely offset by lower average market values of assets under custody and lower deposits.
- Credit Adjustments \& Other was a loss of $\$ 836$ million, reflecting funding spread widening, and, to a lesser extent, losses on exposures relating to commodities and Russia and Russia-associated counterparties, compared with a gain of $\$ 250$ million in the prior year.
Noninterest expense was \$27.1 billion, up 7\%, driven by higher structural expense and investments in the business, including higher compensation, partially offset by lower revenue-related compensation as well as lower legal expense.

The provision for credit losses was $\$ 1.2$ billion, predominantly driven by a net addition to the allowance for credit losses, reflecting deterioration in the Firm's macroeconomic outlook and loan growth.
The provision for credit losses in the prior year was a net benefit of $\$ 1.2$ billion, driven by a net reduction in the allowance for credit losses.

| Nonaccrual loans to total period-end loans |  | 0.68 |  | 0.68 |  | 1.54 |

(a) Allowance for loan losses of $\$ 104$ million, $\$ 58$ million and $\$ 278$ million were held against these nonaccrual loans at December 31, 2022, 2021 and 2020, respectively.
(b) At December 31, 2022, 2021 and 2020, nonaccrual loans excluded mortgage loans 90 or more days past due and insured by U.S. government agencies of $\$ 115$ million, $\$ 281$ million and $\$ 316$ million, respectively. These amounts have been excluded based upon the government guarantee.
(c) Loans held-for-sale and loans at fair value were excluded when calculating the net charge-off/(recovery) rate.
(d) Management uses allowance for loan losses to period-end loans retained, excluding trade finance and conduits, a non-GAAP financial measure, to provide a more meaningful assessment of CIB's allowance coverage ratio. Refer to Explanation and Reconciliation of the Firm's Use of Non-GAAP Financial Measures on pages 58-60.

(b) Global M\&A excludes any withdrawn transactions. U.S. M\&A revenue wallet represents wallet from client parents based in the u.S.
(c) Global equity and equity-related ranking includes rights offerings and Chinese A-Shares.
(d) Long-term debt rankings include investment-grade, high-yield, supranationals, sovereigns, agencies, covered bonds, asset-backed securities ("ABS") and mortgage-backed securities ("MBS"); and exclude money market, short-term debt, and U.S. municipal securities.
(e) Global investment banking fees exclude money market, short-term debt and shelf securities.

## Markets revenue

The following table summarizes selected income statement data for the Markets businesses. Markets includes both Fixed Income Markets and Equity Markets. Markets revenue consists of principal transactions, fees, commissions and other income, as well as net interest income. The Firm assesses its Markets business performance on a total revenue basis, as offsets may occur across revenue line items. For example, securities that generate net interest income may be risk-managed by derivatives that are reflected at fair value in principal transactions revenue. Refer to Notes 6 and 7 for a description of the composition of these income statement line items.

Principal transactions reflects revenue on financial instruments and commodities transactions that arise from client-driven market-making activity. Principal transactions revenue includes amounts recognized upon executing new transactions with market participants, as well as "inventoryrelated revenue", which is revenue recognized from gains and losses on derivatives and other instruments that the Firm has been holding in anticipation of, or in response to, client demand, and changes in the fair value of instruments used by the Firm to actively manage the risk exposure arising from such inventory. Principal transactions revenue recognized upon executing new transactions with market participants is affected by many factors including the level of client activity, the bid-offer spread (which is the
difference between the price at which a market participant is willing and able to sell an instrument to the Firm and the price at which another market participant is willing and able to buy it from the Firm, and vice versa), market liquidity and volatility. These factors are interrelated and sensitive to the same factors that drive inventory-related revenue, which include general market conditions, such as interest rates, foreign exchange rates, credit spreads, and equity and commodity prices, as well as other macroeconomic conditions.

For the periods presented below, the predominant source of principal transactions revenue was the amount recognized upon executing new transactions.

| Year ended December 31, (in millions, except where otherwise noted) | 2022 |  |  |  |  |  | 2021 |  |  |  |  |  | 2020 |  |  |  |  |  |

| Total net revenue | \$ | 18,617 | \$ | 10,367 | \$ | 28,984 | \$ | 16,865 | \$ | 10,529 | \$ | 27,394 | \$ | 20,878 | \$ | 8,605 | \$ | 29,483 |
| Loss days ${ }^{\text {(a) }}$ |  |  |  |  |  | 7 |  |  |  |  |  | 4 |  |  |  |  |  | 4 |

(a) Loss days represent the number of days for which CIB Markets, which consists of Fixed Income Markets and Equity Markets, posted losses to total net revenue. The loss days determined under this measure differ from the measure used to determine backtesting gains and losses. Daily backtesting gains and losses include positions in the Firm's Risk Management value-at-risk ("VaR") measure and exclude certain components of total net revenue, which may more than offset backtesting gains or losses on a particular day. For more information on daily backtesting gains and losses, refer to the VaR discussion on pages 133-135.

(a) Total net revenue and loans retained (excluding loans held-for-sale and loans at fair value) are based on the location of the trading desk, booking location, or domicile of the client, as applicable.
(b) Client deposits and other third-party liabilities pertaining to the Payments and Securities Services businesses, and Auc, are based on the domicile of the client.

## Commercial Banking provides comprehensive financial solutions, including lending, payments, investment banking and asset management products across three primary client segments: Middle Market Banking, Corporate Client Banking and Commercial Real Estate Banking. Other includes amounts not aligned with a primary client segment. <br> Middle Market Banking covers small and midsized companies, local governments and nonprofit clients. <br> Corporate Client Banking covers large corporations. <br> Commercial Real Estate Banking covers investors, developers, and owners of multifamily, office, retail, industrial and affordable housing properties.

Selected income statement data

| Year ended December 31, <br> (in millions) | $\mathbf{2 0 2 2}$ | 2021 | 2020 |  |
| :--- | ---: | ---: | ---: | ---: |
| Revenue |  |  |  |  |
| Lending- and deposit-related fees | $\mathbf{1 , 2 4 3}$ | $\$$ | 1,392 | $\$$ |
| All other income ${ }^{(\mathrm{a})}$ |  |  |  |  |

(a) Includes card income of $\$ 685$ million, $\$ 624$ million and $\$ 525$ million for the years ended December 31, 2022, 2021 and 2020, respectively.
(b) Total net revenue included tax-equivalent adjustments from income tax credits related to equity investments in designated community development entities and in entities established for rehabilitation of historic properties, as well as tax-exempt income related to municipal financing activities of $\$ 322$ million, $\$ 330$ million and $\$ 350$ million for the years ended December 31, 2022, 2021 and 2020, respectively.

## 2022 compared with 2021

Net income was $\$ 4.2$ billion, down 20\%, reflecting a net increase in the provision for credit losses compared with a net benefit in the prior year.
Net revenue was $\$ 11.5$ billion, up $15 \%$. Net interest income was $\$ 8.2$ billion, up $35 \%$, driven by deposit margin expansion on higher rates and growth in loans, predominantly offset by the impact of higher funding costs and lower deposits.

Noninterest revenue was $\$ 3.3$ billion, down 15\%, driven by lower investment banking revenue and net markdowns on held-for-sale positions, primarily unfunded commitments, in the bridge financing portfolio. The decreases were partially offset by a gain on an equity method investment received in partial satisfaction of a loan.
Noninterest expense was $\$ 4.7$ billion, up 17\%, largely driven by higher volume-and revenue-related expense, as well as structural expense, including higher compensation expense, and expense associated with growth in payments.
The provision for credit losses was $\$ 1.3$ billion, predominantly driven by a net addition to the allowance for credit losses, reflecting deterioration in the Firm's macroeconomic outlook and loan growth.
The provision for credit losses in the prior year was a net benefit of $\$ 947$ million, driven by a net reduction in the allowance for credit losses.

## Management's discussion and analysis

## CB product revenue consists of the following:

Lending includes a variety of financing alternatives, which are primarily provided on a secured basis; collateral includes receivables, inventory, equipment, real estate or other assets. Products include term loans, revolving lines of credit, bridge financing, asset-based structures, leases, and standby letters of credit.

Payments includes revenue from a broad range of products and services that CB clients use to manage payments and receipts globally, as well as invest and manage funds.

Investment banking includes investment banking fees and markets revenue from a full range of products and services providing CB clients with advisory, loan syndications, capital-raising in equity and debt markets, and risk management solutions.

Other revenue primarily includes tax-equivalent adjustments generated from Community Development Banking and activity derived from principal transactions.

| Nonaccrual loans to period-end total loans | 0.33 | 0.36 | 0.67 |

(a) Allowance for loan losses of $\$ 153$ million, $\$ 124$ million and $\$ 273$ million was held against nonaccrual loans retained at December 31, 2022, 2021 and 2020, respectively.
(b) Loans held-for-sale and loans at fair value were excluded when calculating the net charge-off/(recovery) rate.
(c) At December 31, 2022 and 2021, nonaccrual loans excluded $\$ 18$ million and $\$ 114$ million, respectively, of PPP loans 90 or more days past due and guaranteed by the SBA.

Asset \& Wealth Management, with client assets of \$4.0 trillion, is a global leader in investment and wealth management.

## Asset Management

Offers multi-asset investment management solutions across equities, fixed income, alternatives and money market funds to institutional and retail investors providing for a broad range of clients' investment needs.

## Global Private Bank

Provides retirement products and services, brokerage, custody, estate planning, lending, deposits and investment management to high net worth clients.

The majority of AWM's client assets are in actively managed portfolios.

Selected income statement data

| Year ended December 31, (in millions, except ratios) | 2022 | 2021 | 2020 |
| :---: | :---: | :---: | :---: |
| Revenue |  |  |  |
| Asset management, administration and commissions | \$12,172 | \$12,333 | \$10,610 |
| All other income | 335 | 738 | 212 |

| Global Private Bank | 8,930 | 7,711 | 6,586 |
| Total net revenue | \$17,748 | \$16,957 | \$14,240 |
| Financial ratios |  |  |  |
| Return on equity | 25 \% | 33 \% | 28 \% |
| Overhead ratio | 67 | 64 | 70 |
| Pre-tax margin ratio: |  |  |  |
| Asset Management | 30 | 35 | 29 |
| Global Private Bank | 35 | 39 | 27 |
| Asset \& Wealth Management | 33 | 37 | 28 |

2022 compared with 2021
Net income was $\$ 4.4$ billion, down $8 \%$.
Net revenue was $\$ 17.7$ billion, up $5 \%$. Net interest income was $\$ 5.2$ billion, up $35 \%$. Noninterest revenue was $\$ 12.5$ billion, down 4\%.

Revenue from Asset Management was $\$ 8.8$ billion, down $5 \%$, predominantly driven by:

- net investment valuation losses compared to net gains in the prior year and,
- lower asset management fees reflecting a decline in market levels and the impact of net liquidity outflows, predominantly offset by the removal of most money market fund fee waivers.
Revenue from Global Private Bank was $\$ 8.9$ billion, up $16 \%$, driven by:
- margin expansion on higher rates and higher average deposits; and to a lesser extent higher average loans and wider spreads,
partially offset by
- lower brokerage and placement fees on reduced volume, and lower management fees.
Noninterest expense was \$11.8 billion, up 8\%, driven by higher structural expense and investments in the business, largely compensation.
The provision for credit losses was $\$ 128$ million, driven by a net addition to the allowance for credit losses.
The provision for credit losses in the prior year was a net benefit of $\$ 227$ million driven by a net reduction in the allowance for credit losses.

## Asset Management has two high-level measures of its overall fund performance.

- Percentage of mutual fund assets under management in funds rated 4 - or 5 -star: Mutual fund rating services rank funds based on their risk adjusted performance over various periods. A 5 -star rating is the best rating and represents the top $10 \%$ of industry-wide ranked funds. A 4-star rating represents the next $22.5 \%$ of industry-wide ranked funds. A 3 -star rating represents the next $35 \%$ of industrywide ranked funds. A 2 -star rating represents the next $22.5 \%$ of industry-wide ranked funds. A 1-star rating is the worst rating and represents the bottom $10 \%$ of industrywide ranked funds. An overall Morningstar rating is derived from a weighted average of the performance associated with a fund's three-, five and ten- year (if applicable) Morningstar Rating metrics. For U.S.-domiciled funds, separate star ratings are provided at the individual share class level. The Nomura "star rating" is based on three-year riskadjusted performance only. Funds with fewer than three years of history are not rated and hence excluded from these rankings. All ratings, the assigned peer categories and the asset values used to derive these rankings are sourced from the applicable fund rating provider. Where applicable, the fund rating providers redenominate asset values into U.S. dollars. The percentage of AuM is based on star ratings at the share class level for U.S.-domiciled funds, and at a "primary share class" level to represent the star rating of all other funds, except for Japan, for which Nomura provides ratings at the fund level. The performance data may have been different if all share classes had been included. Past performance is not indicative of future results.
- Percentage of mutual fund assets under management in funds ranked in the 1st or 2nd quartile (one, three and five years):All quartile rankings, the assigned peer categories and the asset values used to derive these rankings are sourced from the fund rating providers. Quartile rankings are based on the net-of-fee absolute return of each fund. Where applicable, the fund rating providers redenominate asset values into U.S. dollars. The percentage of AUM is based on fund performance and associated peer rankings at the share class level for U.S.-domiciled funds, at a "primary share class" level to represent the quartile ranking for U.K., Luxembourg and Hong Kong SAR funds and at the fund level for all other funds. The performance data may have been different if all share classes had been included. Past performance is not indicative of future results.
"Primary share class" means the C share class for European funds and Acc share class for Hong Kong SAR and Taiwan funds. If these share classes are not available, the oldest share class is used as the primary share class.

(a) Represents the Morningstar Rating for all domiciled funds except for Japan domiciled funds which use Nomura. Includes only Asset Management retail open-ended mutual funds that have a rating. Excludes money market funds, Undiscovered Managers Fund, and Brazil domiciled funds.
(b) Quartile ranking sourced from Morningstar, Lipper and Nomura based on country of domicile. Includes only Asset Management retail openended mutual funds that are ranked by the aforementioned sources. Excludes money market funds, Undiscovered Managers Fund, and Brazil domiciled funds.
(c) Loans, deposits and related credit data and quality statistics relate to the Global Private Bank business.

## Management's discussion and analysis

## Client assets

## 2022 compared with 2021

Client assets were $\$ 4.0$ trillion, a decrease of $6 \%$. Assets under management were $\$ 2.8$ trillion, a decrease of $11 \%$ driven by lower market levels and net outflows from liquidity products, partially offset by continued net inflows into long term products.

Client assets

(a) Regional revenue is based on the domicile of the client.

The Corporate segment consists of Treasury and Chief Investment Office ("CIO") and Other Corporate. Treasury and CIO is predominantly responsible for measuring, monitoring, reporting and managing the Firm's liquidity, funding, capital, structural interest rate and foreign exchange risks.

Other Corporate includes staff functions and expense that is centrally managed as well as certain Firm initiatives and activities not aligned to a specific LOB. The major Other Corporate functions include Real Estate, Technology, Legal, Corporate Finance, Human Resources, Internal Audit, Risk Management, Compliance, Control Management, Corporate Responsibility and various Other Corporate groups.

| Headcount |  | 44,196 |  |  | 38,952 |  | 38,366 |

(a) Included tax-equivalent adjustments, driven by tax-exempt income from municipal bonds, of $\$ 235$ million, $\$ 257$ million and $\$ 241$ million for the years ended December 31, 2022, 2021 and 2020, respectively.
(b) Predominantly relates to the Firm's international consumer growth initiatives.

2022 compared with 2021
Net loss was $\$ 743$ million, compared with a net loss of $\$ 3.7$ billion in the prior year.

Net revenue was $\$ 80$ million, compared with a loss of $\$ 3.5$ billion driven by higher net interest income due to higher rates, partially offset by lower noninterest revenue.

Noninterest revenue was a loss of $\$ 1.8$ billion, compared with a gain of $\$ 68$ million driven by:

- higher net investment securities losses on sales of U.S. GSE and government agency MBS, and U.S. Treasuries associated with repositioning the investment securities portfolio,
- the impact of movements in foreign exchange on certain revenues, primarily as result of the U.S. dollar strengthening,
- net losses related to cash deployment transactions, which were more than offset by the related net interest income earned on those transactions,
- net losses, including hedging costs on an equity method investment related to the Firm's international consumer growth initiatives, and
- net losses on certain legacy private equity investments compared with net gains in prior year.
partially offset by
- a gain on the sale of Visa B shares. In connection with the sale, the Firm entered into a derivative instrument with the purchaser of the shares under which the Firm retains the risk associated with changes in the rate at which the shares are convertible into Visa Class A common shares ("Visa A shares"). Refer to Note 2 for additional information,
- higher net gains related to certain Other Corporate investments, and
- proceeds from an insurance settlement in the first quarter of 2022.
Noninterest expense was $\$ 1.0$ billion, down $\$ 768$ million, predominantly driven by:
- lower structural expense reflecting the impact of movements in foreign exchange on certain expenses primarily as a result of the U.S. dollar strengthening, and lower retained technology expense, and
- a lower contribution to the Firm's Foundation.
partially offset by
- higher investments, including the costs associated with the Firm's international consumer growth initiatives.
The net impact of movements in foreign exchange rates associated with the foreign exchange risk that is transferred to Treasury and CIO on certain revenues and expenses was not material to net income. Refer to Foreign Exchange Risk on page 62 for additional information.

## Management's discussion and analysis

Refer to Note 10 and Note 13 for additional information on the investment securities portfolio and the allowance for credit losses.
The current period income tax benefit was driven by benefits related to tax audit settlements as well as other tax adjustments, partially offset by a change in the level and mix of income and expenses subject to U.S. federal and state and local taxes that also impacted the Firm's tax reserves.
Other Corporate also reflects the Firm's international consumer growth initiatives, which include Chase U.K., the Firm's digital retail bank in the U.K.; Nutmeg, a digital wealth manager in the U.K.; and a 40\% ownership stake in C6 Bank, a digital bank in Brazil, which closed in the first quarter of 2022.

## Treasury and CIO overview

Treasury and CIO is predominantly responsible for measuring, monitoring, reporting and managing the Firm's liquidity, funding, capital, structural interest rate and foreign exchange risks. The risks managed by Treasury and CIO arise from the activities undertaken by the Firm's four major reportable business segments to serve their respective client bases, which generate both on- and offbalance sheet assets and liabilities.
Treasury and CIO seeks to achieve the Firm's asset-liability management objectives generally by investing in highquality securities that are managed for the longer-term as part of the Firm's investment securities portfolio. Treasury and CIO also uses derivatives to meet the Firm's assetliability management objectives. Refer to Note 5 for further information on derivatives. In addition, Treasury and CIO manages the Firm's cash position primarily through deposits at central banks and investments in short-term instruments. Refer to Liquidity Risk Management on pages 97-104 for further information on liquidity and funding risk. Refer to Market Risk Management on pages 131-138 for information on interest rate and foreign exchange risks.
The investment securities portfolio predominantly consists of U.S. and non-U.S. government securities, U.S. GSE and government agency and nonagency mortgage-backed securities, collateralized loan obligations, obligations of U.S. states and municipalities and other ABS. At December 31, 2022, the Treasury and CIO investment securities portfolio, net of the allowance for credit losses, was $\$ 629.3$ billion, and the average credit rating of the securities comprising the portfolio was AA+ (based upon external ratings where available and, where not available, based primarily upon internal risk ratings). Refer to Note 10 for further information on the Firm's investment securities portfolio and internal risk ratings.

(a) During 2022, 2021 and 2020, the Firm transferred $\$ 78.3$ billion, $\$ 104.5$ billion and $\$ 164.2$ billion of investment securities, respectively, from AFS to HTM for capital management purposes.
(b) At December 31, 2022, 2021 and 2020, the allowance for credit losses on investment securities was $\$ 67$ million, $\$ 42$ million and $\$ 78$ million, respectively.

Risk is an inherent part of JPMorgan Chase's business activities. When the Firm extends a consumer or wholesale loan, advises customers and clients on their investment decisions, makes markets in securities, or offers other products or services, the Firm takes on some degree of risk. The Firm's overall objective is to manage its business, and the associated risks, in a manner that balances serving the interests of its clients, customers and investors, and protecting the safety and soundness of the Firm.

The Firm believes that effective risk management requires, among other things:

- Acceptance of responsibility, including identification and escalation of risks by all individuals within the Firm;
- Ownership of risk identification, assessment, data and management within each of the LOBs and Corporate; and
- A Firmwide risk governance and oversight structure.

The Firm follows a disciplined and balanced compensation framework with strong internal governance and independent oversight by the Board of Directors (the "Board"). The impact of risk and control issues is carefully considered in the Firm's performance evaluation and incentive compensation processes.

## Risk governance framework

The Firm's risk governance framework involves understanding drivers of risks, types of risks, and impacts of risks.

Drivers of risks are factors that cause a risk to exist. Drivers of risks include, but are not limited to, the economic environment, regulatory or government policy, competitor or market evolution, business decisions, process or judgment error, deliberate wrongdoing, dysfunctional markets, and natural disasters.

Types of risks are categories by which risks manifest themselves. The Firm's risks are generally categorized in the following four risk types:

- Strategic risk is the risk to earnings, capital, liquidity or reputation associated with poorly designed or failed business plans or inadequate responses to changes in the operating environment.
- Credit and investment risk is the risk associated with the default or change in credit profile of a client, counterparty or customer; or loss of principal or a reduction in expected returns on investments, including
consumer credit risk, wholesale credit risk, and investment portfolio risk.
- Market risk is the risk associated with the effect of changes in market factors, such as interest and foreign exchange rates, equity and commodity prices, credit spreads or implied volatilities, on the value of assets and liabilities held for both the short and long term.
- Operational risk is the risk of an adverse outcome resulting from inadequate or failed internal processes or systems; human factors; or external events impacting the Firm's processes or systems. Operational risk includes compliance, conduct, legal, and estimations and model risk.

Impacts of risks are consequences of risks, both quantitative and qualitative. There may be many consequences of risks manifesting, including quantitative impacts such as a reduction in earnings and capital, liquidity outflows, and fines or penalties, or qualitative impacts such as damage to the Firm's reputation, loss of clients and customers, and regulatory and enforcement actions.

The Firm's risk governance framework is managed on a Firmwide basis. The Firm has an Independent Risk Management ("IRM") function, which is comprised of Risk Management and Compliance. The Firm's Chief Executive Officer ("CEO") appoints, subject to approval by the Risk Committee of the Board of Directors (the "Board Risk Committee"), the Firm's Chief Risk Officer ("CRO") to lead the IRM function and maintain the risk governance framework of the Firm. The framework is subject to approval by the Board Risk Committee through its review and approval of the Risk Governance and Oversight Policy.

The Firm's CRO oversees and delegates authority to the Firmwide Risk Executives ("FREs"), the Chief Risk Officers of the LOBs and Corporate ("LOB CROs"), and the Firm's Chief Compliance Officer ("CCO"), who, in turn, establish Risk Management and Compliance organizations, develop the Firm's risk governance policies and standards, and define and oversee the implementation of the Firm's risk governance framework. The LOB CROs oversee risks that arise in their LOBs and Corporate, while FREs oversee risks that span across the LOBs and Corporate, functions and regions. Each area of the Firm giving rise to risk is expected to operate within the parameters identified by the IRM function, and within its own management-identified risk and control standards.

## Three lines of defense

The Firm's "three lines of defense" are as follows:
The first line of defense consists of each LOB, Treasury and CIO, and certain Other Corporate initiatives, including their aligned Operations, Technology and Control Management. The first line of defense own the identification of risks within their respective organizations and the design and execution of controls to manage those risks.

## Management's discussion and analysis

Responsibilities also include adherence to applicable laws, rules and regulations and implementation of the risk governance framework established by IRM, which may include policies, standards, limits, thresholds and controls.

The second line of defense is the IRM function, which is separate from, and independently assesses and challenges, the first line of defense risk management practices. IRM is also responsible for the identification of risks within its respective organization, adherence to applicable laws, rules and regulations and for the development and implementation of policies and standards with respect to its own processes.

The third line of defense is Internal Audit, an independent function that provides objective assessment of the adequacy and effectiveness of Firmwide processes, controls, governance and risk management. The Internal Audit function is headed by the General Auditor, who reports to the Audit Committee and administratively to the CEO.

In addition, there are other functions that contribute to the Firmwide control environment but are not considered part of a particular line of defense, including Finance, Human Resources and Legal. These other functions are responsible for the identification of risks within their respective organizations, adherence to applicable laws, rules and regulations and implementation of the risk governance framework established by IRM.

## Risk identification and ownership

The LOBs and Corporate own the identification of risks within their respective organizations, as well as the design and execution of controls, including IRM-specified controls, to manage those risks. To support this activity, the Firm has a risk identification framework designed to facilitate each LOB and Corporate's responsibility to identify material risks inherent to the Firm's business and operational activities, catalog them in a central repository and review material risks on a regular basis. The IRM function reviews and challenges the LOB and Corporate's identified risks, maintains the central repository and provides the consolidated Firmwide results to the Firmwide Risk Committee ("FRC") and the Board Risk Committee.

Risk appetite
The Firm's overall appetite for risk is governed by "Risk Appetite" frameworks for quantitative and qualitative risks. Periodically the Firm's risk appetite is set and approved by senior management (including the CEO and CRO) and approved by the Board Risk Committee. Quantitative and qualitative risks are assessed to monitor and measure the Firm's capacity to take risk consistent with its stated risk appetite. Risk appetite results are reported to the Board Risk Committee.

## Risk governance and oversight structure

The independent status of the IRM function is supported by a risk governance and oversight structure that provides channels for the escalation of risks and issues to senior management, the FRC, and the Board of Directors, as appropriate.

The chart below illustrates the committees of the Board of Directors and key senior management-level committees in the Firm's risk governance and oversight structure. In addition, there are other committees, forums and channels of escalation that support the oversight of risk that are not shown in the chart below or described in this Form 10-K.

The Firm's Operating Committee, which consists of the Firm's CEO, CRO, Chief Financial Officer ("CFO"), General Counsel, CEOs of the LOBs and other senior executives, is accountable to and may refer matters to the Firm's Board of Directors. The Operating Committee is responsible for escalating to the Board the information necessary to facilitate the Board's exercise of its duties.

## Board oversight

The Firm's Board of Directors actively oversees the business and affairs of the Firm. This includes monitoring the Firm's financial performance and condition and reviewing the strategic objectives and plans of the Firm. The Board carries out a significant portion of its oversight responsibilities through its principal standing committees, each of which consists solely of independent members of the Board. The Board Risk Committee is the principal committee that oversees risk matters. The Audit Committee oversees the control environment, and the Compensation \& Management Development Committee oversees compensation and other management-related matters. Each committee of the Board oversees reputational risks, conduct risks, and ESG matters within its scope of responsibility.

The JPMorgan Chase Bank, N.A. Board of Directors is responsible for the oversight of management of the bank, which it discharges both acting directly and through the principal standing committees of the Firm's Board of Directors. Risk and control oversight on behalf of JPMorgan Chase Bank N.A. is primarily the responsibility of the Board

Risk Committee and the Audit Committee, respectively, and, with respect to compensation and other managementrelated matters, the Compensation \& Management Development Committee.

The Board Risk Committee assists the Board in its oversight of management's responsibility to implement a global risk management framework reasonably designed to identify, assess and manage the Firm's risks. The Board Risk Committee's responsibilities include approval of applicable primary risk policies and review of certain associated frameworks, analysis and reporting established by management. Breaches in risk appetite and parameters, issues that may have a material adverse impact on the Firm, including capital and liquidity issues, and other significant risk-related matters are escalated to the Board Risk Committee, as appropriate.

The Audit Committee assists the Board in its oversight of management's responsibility to ensure that there is an effective system of controls reasonably designed to safeguard the Firm's assets and income, ensure the integrity of the Firm's financial statements, and maintain compliance with the Firm's ethical standards, policies, plans and procedures, and with laws and regulations. It also assists the Board in its oversight of the qualifications, independence and performance of the Firm's independent registered public accounting firm, and of the performance of the Firm's Internal Audit function.

## Management's discussion and analysis

The Compensation \& Management Development Committee ("CMDC") assists the Board in its oversight of the Firm's compensation principles and practices. The CMDC reviews and approves the Firm's compensation and qualified benefits programs. The Committee reviews the performance of Operating Committee members against their goals, and approves their compensation awards. In addition, the CEO's award is subject to ratification by the independent directors of the Board. The CMDC also reviews the development of and succession for key executives. As part of the Board's role of reinforcing, demonstrating and communicating the "tone at the top," the CMDC oversees the Firm's culture, including reviewing updates from management regarding significant conduct issues and any related actions with respect to employees, including compensation actions.

The Public Responsibility Committee oversees and reviews the Firm's positions and practices on public responsibility matters such as community investment, fair lending, sustainability, consumer practices and other public policy issues that reflect the Firm's values and character and could impact the Firm's reputation among its stakeholders. The Committee also provides guidance on these matters to management and the Board, as appropriate.

The Corporate Governance \& Nominating Committee exercises general oversight with respect to the governance of the Board of Directors. It reviews the qualifications of and recommends to the Board proposed nominees for election to the Board. The Committee evaluates and recommends to the Board corporate governance practices applicable to the Firm. It also reviews the framework for assessing the Board's performance and self-evaluation.

## Management oversight

The Firm's senior management-level committees that are primarily responsible for key risk-related functions include:

The Firmwide Risk Committee ("FRC") is the Firm's highest management-level risk committee. It oversees the risks inherent in the Firm's business and provides a forum for discussion of topics, and issues that are raised or escalated by its members and other committees.

The Firmwide Control Committee ("FCC") is an escalation committee for senior management to review and discuss the Firmwide operational risk environment including identified issues, operational risk metrics and significant events that have been escalated.

Line of Business and Regional Risk Committees are responsible for overseeing the governance, limits, and controls that have been established within the scope of their respective activities. These committees review the ways in which the particular LOB or the businesses operating in a particular region could be exposed to adverse outcomes, with a focus on identifying, accepting, escalating and/or requiring remediation of matters brought to these committees.

Line of Business and Corporate Function Control Committees oversee the operational risk and control environment of their respective business or function, inclusive of Operational Risk, Compliance and Conduct Risks. As part of that mandate, they are responsible for reviewing indicators of elevated or emerging risks and other data that may impact the level of operational risk in a business or function, addressing key operational risk issues, with an emphasis on processes with control concerns and overseeing control remediation.

The Asset and Liability Committee ("ALCO") is responsible for overseeing the Firm's asset and liability management ("ALM"), including the activities and frameworks supporting management of the balance sheet, liquidity risk, interest rate risk, and capital risk.

The Firmwide Valuation Governance Forum ("VGF") is composed of senior finance and risk executives and is responsible for overseeing the management of risks arising from valuation activities conducted across the Firm.

## Risk governance and oversight functions

The Firm manages its risk through risk governance and oversight functions. The scope of a particular function or business activity may include one or more drivers, types and/or impacts of risk. For example, Country Risk Management oversees country risk which may be a driver of risk or an aggregation of exposures that could give rise to multiple risk types such as credit or market risk.
The following sections discuss the risk governance and oversight functions that have been established to manage the risks inherent in the Firm's business activities.

| Risk governance and oversight functions | Page |
| :--- | :---: |
| Strategic Risk | 85 |
| Capital Risk | $86-96$ |
| Liquidity Risk | $97-104$ |
| Reputation Risk | 105 |
| Consumer Credit Risk | $110-115$ |
| Wholesale Credit Risk | $116-126$ |
| Investment Portfolio Risk | 130 |
| Market Risk | $131-138$ |
| Country Risk | $139-140$ |
| Climate Risk | 141 |
| Operational Risk | $142-148$ |
| Compliance Risk | 145 |
| Conduct Risk | 146 |
| Legal Risk | 147 |
| Estimations and Model Risk | 148 |

Strategic risk is the risk to earnings, capital, liquidity or reputation associated with poorly designed or failed business plans or inadequate responses to changes in the operating environment.

## Management and oversight

The Operating Committee, together with the senior leadership of each LOB and Corporate, is responsible for managing the Firm's most significant strategic risks. IRM engages regularly in strategic business discussions and decision-making, including participation in relevant business reviews and senior management meetings, risk and control committees and other relevant governance forums, and acquisition and new business initiative reviews. The Board of Directors oversees management's strategic decisions, and the Board Risk Committee oversees IRM and the Firm's risk governance framework.

In the process of developing business plans and strategic initiatives, LOB and Corporate senior management identify the associated risks that are incorporated into the Firmwide Risk Identification framework and their impact on risk appetite.

In addition, IRM conducts a qualitative assessment of the LOB and Corporate strategic initiatives to assess their impact on the risk profile of the Firm.

The Firm's strategic planning process, which includes the development of the Firm's strategic plan and other strategic initiatives, is one component of managing the Firm's strategic risk. The strategic plan outlines the Firm's strategic framework and initiatives, and includes components such as budget, risk appetite, capital, earnings and asset-liability management objectives. Guided by the Firm's How We Do Business Principles, the Operating Committee and senior management teams in each LOB and Corporate review and update the strategic plan periodically, including evaluating the strategic framework and performance against prior-year initiatives, assessing the operating environment, refining existing strategies and developing new strategies.
The Firm's strategic plan, together with IRM's assessment, are provided to the Board as part of its review and approval of the Firm's strategic plan, and the plan is also reflected in the Firm's budget.

The Firm's balance sheet strategy, which focuses on riskadjusted returns, strong capital and robust liquidity, is also a component in the management of strategic risk. Refer to Capital Risk Management on pages 86-96 for further information on capital risk. Refer to Liquidity Risk Management on pages 97-104 for further information on liquidity risk. Refer to Reputation Risk Management on page 105 for further information on reputation risk.

# Management's discussion and analysis 

## CAPITAL RISK MANAGEMENT

Capital risk is the risk the Firm has an insufficient level or composition of capital to support the Firm's business activities and associated risks during normal economic environments and under stressed conditions.

A strong capital position is essential to the Firm's business strategy and competitive position. Maintaining a strong balance sheet to manage through economic volatility is considered a strategic imperative of the Firm's Board of Directors, CEO and Operating Committee. The Firm's fortress balance sheet philosophy focuses on risk-adjusted returns, strong capital and robust liquidity. The Firm's capital risk management strategy focuses on maintaining long-term stability to enable the Firm to build and invest in market-leading businesses, including in highly stressed environments. Senior management considers the implications on the Firm's capital prior to making significant decisions that could impact future business activities. In addition to considering the Firm's earnings outlook, senior management evaluates all sources and uses of capital with a view to ensuring the Firm's capital strength.

## Capital risk management

The Firm has a Capital Risk Management function whose primary objective is to provide independent oversight of capital risk across the Firm.
Capital Risk Management's responsibilities include:

- Defining, monitoring and reporting capital risk metrics;
- Establishing, calibrating and monitoring capital risk limits and indicators, including capital risk appetite;
- Developing a process to classify, monitor and report capital limit breaches;
- Performing an assessment of the Firm's capital management activities, including changes made to the Contingency Capital Plan described below; and
- Conducting assessments of the Firm's regulatory capital framework intended to ensure compliance with applicable regulatory capital rules.
Capital management
Treasury and CIO is responsible for capital management.
The primary objectives of the Firm's capital management are to:
- Maintain sufficient capital in order to continue to build and invest in the Firm's businesses through the cycle and in stressed environments;
- Retain flexibility to take advantage of future investment opportunities;
- Promote the Firm's ability to serve as a source of strength to its subsidiaries;
- Ensure the Firm operates above the minimum regulatory capital ratios as well as maintain "well-capitalized" status for the Firm and its insured depository institution ("IDI") subsidiaries at all times under applicable regulatory capital requirements;
- Meet capital distribution objectives; and
- Maintain sufficient capital resources to operate throughout a resolution period in accordance with the Firm's preferred resolution strategy.
The Firm addresses these objectives through:
- Establishing internal minimum capital requirements and maintaining a strong capital governance framework. The internal minimum capital levels consider the Firm's regulatory capital requirements as well as an internal assessment of capital adequacy, in normal economic cycles and in stress events;
- Retaining flexibility in order to react to a range of potential events; and
- Regular monitoring of the Firm's capital position and following prescribed escalation protocols, both at the Firm and material legal entity levels.

## Governance

Committees responsible for overseeing the Firm's capital management include the Capital Governance Committee, the Firmwide ALCO and LOB and regional ALCOs, and the CIO, Treasury and Corporate ("CTC") Risk Committee. In addition, the Board Risk Committee periodically reviews the Firm's capital risk tolerance. Refer to Firmwide Risk Management on pages 81-84 for additional discussion of the Firmwide ALCO and other risk-related committees.

## Capital planning and stress testing

 Comprehensive Capital Analysis and Review The Federal Reserve requires large Bank Holding Companies ("BHCs"), including the Firm, to submit at least annually a capital plan that has been reviewed and approved by the Board of Directors. The Federal Reserve uses Comprehensive Capital Analysis and Review ("CCAR") and other stress testing processes to ensure that large BHCs have sufficient capital during periods of economic and financial stress, and have robust, forward-looking capital assessment and planning processes in place that address each BHC's unique risks to enable it to absorb losses under certain stress scenarios. Through CCAR, the Federal Reserve evaluates each BHC's capital adequacy and internal capital adequacy assessment processes ("ICAAP"), as well as its plans to make capital distributions, such as dividend payments or stock repurchases. The Federal Reserve uses results under the severely adverse scenario from its supervisory stress test to determine each firm's Stress Capital Buffer ("SCB") requirement for the coming year.On June 27, 2022, the Firm announced that it had completed the Federal Reserve's 2022 CCAR stress test process. On August 4, 2022, the Federal Reserve affirmed the Firm's 2022 SCB requirement of $4.0 \%$ (up from $3.2 \%$ ), and the Firm's Standardized CET1 capital ratio requirement, including regulatory buffers, of $12.0 \%$ (up from $11.2 \%$ ). The 2022 SCB requirement became effective on October 1, 2022, and will remain in effect until September 30, 2023.

Refer to Capital actions on page 94 for information on actions taken by the Firm's Board of Directors.

## Internal Capital Adequacy Assessment Process

Annually, the Firm prepares the ICAAP, which informs the Board of Directors of the ongoing assessment of the Firm's processes for managing the sources and uses of capital as well as compliance with supervisory expectations for capital planning and capital adequacy. The Firm's ICAAP integrates stress testing protocols with capital planning. The Firm's Audit Committee is responsible for reviewing and approving the capital planning framework.

Stress testing assesses the potential impact of alternative economic and business scenarios on the Firm's earnings and capital. Economic scenarios, and the parameters underlying those scenarios, are defined centrally and applied uniformly across the businesses. These scenarios are articulated in terms of macroeconomic factors, which are key drivers of business results; global market shocks, which generate short-term but severe trading losses; and idiosyncratic operational risk events. The scenarios are intended to capture and stress key vulnerabilities and idiosyncratic risks facing the Firm. In addition to CCAR and other periodic stress testing, management also considers tailored stress scenarios and sensitivity analyses, as necessary.

## Contingency Capital Plan

The Firm's Contingency Capital Plan establishes the capital management framework for the Firm and specifies the principles underlying the Firm's approach towards capital management in normal economic conditions and in stressed environments. The Contingency Capital Plan defines how the Firm calibrates its targeted capital levels and meets minimum capital requirements, monitors the ongoing appropriateness of planned capital distributions, and sets out the capital contingency actions that are expected to be taken or considered at various levels of capital depletion during a period of stress.

## Regulatory capital

The Federal Reserve establishes capital requirements, including well-capitalized standards, for the consolidated financial holding company. The OCC establishes similar minimum capital requirements and standards for the Firm's IDI subsidiaries, including JPMorgan Chase Bank, N.A. The U.S. capital requirements generally follow the Capital Accord of the Basel Committee, as amended from time to time.

## Basel III Overview

The capital rules under Basel III establish minimum capital ratios and overall capital adequacy standards for large and internationally active U.S. BHCs and banks, including the Firm and its IDI subsidiaries, including JPMorgan Chase Bank, N.A. The minimum amount of regulatory capital that must be held by BHCs and banks is determined by calculating RWA, which are on-balance sheet assets and offbalance sheet exposures, weighted according to risk. Two comprehensive approaches are prescribed for calculating RWA: a standardized approach ("Basel III Standardized"), and an advanced approach ("Basel III Advanced"). For each of the risk-based capital ratios, the capital adequacy of the Firm is evaluated against the lower of the Standardized or Advanced approaches compared to their respective regulatory capital ratio requirements. The Firm's Basel III Standardized risk-based ratios are currently more binding than the Basel III Advanced risk-based ratios.

Basel III establishes capital requirements for calculating credit risk RWA and market risk RWA, and in the case of Basel III Advanced, operational risk RWA. Key differences in the calculation of credit risk RWA between the Standardized and Advanced approaches are that for Basel III Advanced, credit risk RWA is based on risk-sensitive approaches which largely rely on the use of internal credit models and parameters, whereas for Basel III Standardized, credit risk RWA is generally based on supervisory risk-weightings which vary primarily by counterparty type and asset class. Market risk RWA is calculated on a generally consistent basis between Basel III Standardized and Basel III Advanced. In addition to the RWA calculated under these approaches, the Firm may supplement such amounts to incorporate management judgment and feedback from its regulators.
Basel III also includes a requirement for Advanced Approaches banking organizations, including the Firm, to calculate the SLR. Refer to SLR on page 93 for additional information.

## Key Regulatory Developments

## CECL regulatory capital transition.

Until December 31, 2021, the Firm's capital reflected a two year delay of the effects of CECL provided by the Federal Reserve Board in response to the COVID-19 pandemic.
Beginning January 1, 2022, the $\$ 2.9$ billion CECL capital benefit is being phased out at $25 \%$ per year over a threeyear period. As of December 31, 2022, the Firm's CET1 capital reflected the remaining $\$ 2.2$ billion benefit associated with the CECL capital transition provisions. Additionally, effective January 1, 2022, the Firm phased out $25 \%$ of the other CECL capital transition provisions which impacted Tier 2 capital, adjusted average assets, total leverage exposure and RWA, as applicable.
Refer to Note 1 for further information on the CECL accounting guidance.

# Management's discussion and analysis 

Standardized Approach for Counterparty Credit Risk. On January 1, 2022, the Firm adopted "Standardized Approach for Counterparty Credit Risk" ("SA-CCR"), which replaced the Current Exposure Method used to measure derivatives counterparty exposure under the Standardized and Advanced approach RWA where internal models are not used, as well as leverage exposure used to calculate the SLR in the regulatory capital framework. The rule issued by the U.S. banking regulators in November 2019 applies to Basel III Advanced Approaches banking organizations, such as the Firm and JPMorgan Chase Bank, N.A.

The adoption of SA-CCR on January 1, 2022 increased the Firm's Standardized RWA by approximately $\$ 40$ billion based on the Firm's derivatives exposure as of December 31, 2021, which resulted in a decrease of approximately 30 bps to the Firm's CET1 capital ratio and a modest decrease in its total leverage exposure. In addition, the adoption of SA-CCR increased the Firm's Advanced RWA, but to a lesser extent than Standardized RWA.

## Risk-based Capital Regulatory Requirements

The following chart presents the Firm's Basel III CET1 capital ratio requirements under the Basel III rules currently in effect.

All banking institutions are currently required to have a minimum CET1 capital ratio of $4.5 \%$ of risk-weighted assets.
Certain banking organizations, including the Firm, are required to hold additional levels of capital to serve as a "capital conservation buffer". The capital conservation buffer incorporates a GSIB surcharge, a discretionary countercyclical capital buffer and a fixed capital conservation buffer of $2.5 \%$ for Advanced regulatory capital requirements and a variable SCB requirement, floored at 2.5\%, for Standardized regulatory capital requirements.

Under the Federal Reserve's GSIB rule, the Firm is required to assess its GSIB surcharge on an annual basis under two separately prescribed methods based on data for the previous fiscal year-end, and is subject to the higher of the two. "Method 1" reflects the GSIB surcharge as prescribed by the Basel Committee's assessment methodology, and is calculated by the Financial Stability Board ("FSB") across five criteria: size, cross-jurisdictional activity, interconnectedness, complexity and substitutability. "Method 2", calculated by the Firm, modifies the Method 1 requirements to include a measure of short-term wholesale funding in place of substitutability, and introduces a GSIB score "multiplication factor".

## Management's discussion and analysis

The following table presents the Firm's effective GSIB surcharge for the years ended December 31, 2023, 2022 and 2021. For 2023, the Firm's effective GSIB surcharge under Method 1 and Method 2 has increased to $2.5 \%$ and 4.0\%, respectively.

|  | 2023 | 2022 | 2021 |
| :--- | :---: | :---: | :---: |
| Method 1 | $2.5 \%$ | $2.0 \%$ | $2.0 \%$ |
| Method 2 | $4.0 \%$ | $3.5 \%$ | $3.5 \%$ |

On November 21, 2022, the FSB released its annual GSIB list based upon data as of December 31, 2021, which affirmed the Firm's Method 1 GSIB surcharge of $2.5 \%$ (up from 2.0\%), effective January 1, 2023.

The Firm's Method 2 surcharge calculated using data as of December 31,2021 is $4.5 \%$, which will be effective January 1, 2024. The Firm's estimated Method 2 surcharge calculated using data as of December 31, 2022 is $4.5 \%$. Accordingly, based on the GSIB rule currently in effect, the Firm's effective GSIB surcharge is expected to increase to 4.5\% on January 1, 2024.

The U.S. federal regulatory capital standards include a framework for setting a discretionary countercyclical capital buffer taking into account the macro financial environment in which large, internationally active banks function. As of December 31, 2022, the U.S. countercyclical capital buffer remained at 0\%. The Federal Reserve will continue to review the buffer at least annually. The buffer can be increased if the Federal Reserve, FDIC and OCC determine that systemic risks are meaningfully above normal and can be calibrated up to an additional $2.5 \%$ of RWA subject to a 12-month implementation period.
Failure to maintain regulatory capital equal to or in excess of the risk-based regulatory capital minimum plus the capital conservation buffer (inclusive of the GSIB surcharge) and any countercyclical buffer will result in limitations to the amount of capital that the Firm may distribute, such as through dividends and common share repurchases, as well as certain executive discretionary bonus payments.

## Risk-based Capital Targets

The Firm's current target for its Basel III Standardized CET1 capital ratio is $13.0 \%$ for the first quarter of 2023 , increasing to $13.5 \%$ for the first quarter of 2024 with consideration for an increase in the GSIB surcharge in 2024, and assuming no change in the Stress Capital Buffer. The Firm's quarterly capital ratios may vary from these targets dependent on market conditions. These targets are based on the Basel III capital rules currently in effect.
Total Loss-Absorbing Capacity
The Federal Reserve's TLAC rule requires the U.S. GSIB toptier holding companies, including the Firm, to maintain minimum levels of external TLAC and eligible long-term debt ("eligible LTD"). Refer to TLAC on page 95 for additional information.

Leverage-based Capital Regulatory Requirements Supplementary leverage ratio
Banking organizations subject to the Basel III Advanced approach are currently required to have a minimum SLR of 3.0\%. Certain banking organizations, including the Firm, are also required to hold an additional 2.0\% leverage buffer.
The SLR is defined as Tier 1 capital under Basel III divided by the Firm's total leverage exposure. Total leverage exposure is calculated by taking the Firm's total average on-balance sheet assets, less amounts permitted to be deducted for Tier 1 capital, and adding certain off-balance sheet exposures, such as undrawn commitments and derivatives potential future exposure.
Failure to maintain an SLR equal to or greater than the regulatory requirement will result in limitations on the amount of capital that the Firm may distribute such as through dividends and common share repurchases, as well as on certain executive discretionary bonus payments.

## Other regulatory capital

In addition to meeting the capital ratio requirements of Basel III, the Firm and its IDI subsidiaries must also maintain minimum capital and leverage ratios in order to be "well-capitalized" under the regulations issued by the Federal Reserve and the Prompt Corrective Action ("PCA") requirements of the FDIC Improvement Act ("FDICIA"), respectively. Refer to Note 27 for additional information. Additional information regarding the Firm's capital ratios, as well as the U.S. federal regulatory capital standards to which the Firm is subject, is presented in Note 27. Refer to the Firm's Pillar 3 Regulatory Capital Disclosures reports, which are available on the Firm's website, for further information on the Firm's Basel III measures.

The following tables present the Firm's risk-based capital metrics under both the Basel III Standardized and Advanced approaches and leverage-based capital metrics. Refer to Note 27 for JPMorgan Chase Bank, N.A.'s risk-based and leveragebased capital metrics.

| (in millions, except ratios) | Standardized |  |  | Advanced |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | $\begin{gathered} \text { December 31, } \\ 2022 \end{gathered}$ | $\begin{gathered} \text { December 31, } \\ 2021 \end{gathered}$ | Capital ratio requirements ${ }^{(b)}$ | $\begin{gathered} \text { December 31, } \\ 2022 \end{gathered}$ | $\begin{gathered} \text { December 31, } \\ 2021 \end{gathered}$ | Capital ratio requirements ${ }^{(b)}$ |
| Risk-based capital metrics: ${ }^{\text {(a) }}$ |  |  |  |  |  |  |
| CET1 capital | \$ 218,934 | \$ 213,942 |  | \$ 218,934 | \$ 213,942 |  |
| Tier 1 capital | 245,631 | 246,162 |  | 245,631 | 246,162 |  |
| Total capital | 277,769 | 274,900 |  | 264,583 | 265,796 |  |
| Risk-weighted assets | 1,653,538 | 1,638,900 |  | 1,609,773 | 1,547,920 |  |
| CET1 capital ratio | 13.2 \% | 13.1 \% | 12.0 \% | 13.6 \% | 13.8 \% | 10.5 \% |
| Tier 1 capital ratio | 14.9 | 15.0 | 13.5 | 15.3 | 15.9 | 12.0 |
| Total capital ratio | 16.8 | 16.8 | 15.5 | 16.4 | 17.2 | 14.0 |

(a) The capital metrics reflect the CECL capital transition provisions.
(b) Represents minimum requirements and regulatory buffers applicable to the Firm for the period ended December 31, 2022. For the period ended December 31, 2021, the Basel III Standardized CET1, Tier 1, and Total capital ratio requirements applicable to the Firm were $11.2 \%, 12.7 \%$, and $14.7 \%$, respectively. Refer to Note 27 for additional information.

| Three months ended (in millions, except ratios) | December 31, 2022 |  | December 31, 2021 |  | Capital ratio requirements ${ }^{(C)}$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Leverage-based capital metrics: ${ }^{\text {(a) }}$ |  |  |  |  |  |
| Adjusted average assets ${ }^{(b)}$ | \$ | 3,703,873 | \$ | 3,782,035 |  |
| Tier 1 leverage ratio |  | 6.6 |  | 6.5 | 4.0 \% |
| Total leverage exposure | \$ | 4,367,092 | \$ | 4,571,789 |  |
| SLR |  | 5.6 |  | 5.4 | 5.0 \% |

(a) The capital metrics reflect the CECL capital transition provisions.
(b) Adjusted average assets, for purposes of calculating the leverage ratios, includes quarterly average assets adjusted for on-balance sheet assets that are subject to deduction from Tier 1 capital, predominantly goodwill, inclusive of estimated equity method goodwill, and other intangible assets.
(c) Represents minimum requirements and regulatory buffers applicable to the Firm. Refer to Note 27 for additional information.

## Management's discussion and analysis

## Capital components

The following table presents reconciliations of total stockholders' equity to Basel III CET1 capital, Tier 1 capital and Total capital as of December 31, 2022 and 2021.

| (in millions) | $\begin{array}{r} \text { December 31, } \\ 2022 \\ \hline \end{array}$ |  |  | $\begin{array}{r} \text { December 31, } \\ 2021 \\ \hline \end{array}$ |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Total stockholders' equity | \$ | 292,332 |  | \$ | 294,127 |
| Less: Preferred stock |  | 27,404 |  |  | 34,838 |
| Common stockholders' equity |  | 264,928 |  |  | 259,289 |
| Add: |  |  |  |  |  |
| Certain deferred tax liabilities ${ }^{\left({ }^{(2)}\right.}$ |  | 2,510 |  |  | 2,499 |
| Other CET1 capital adjustments ${ }^{(b)}$ |  | 6,221 |  |  | 3,351 |
| Less: |  |  |  |  |  |
| Goodwill |  | 53,501 | (f) |  | 50,315 |
| Other intangible assets |  | 1,224 |  |  | 882 |
| Standardized/Advanced CET1 capital |  | 218,934 |  |  | 213,942 |
| Add: Preferred stock |  | 27,404 |  |  | 34,838 |
| Less: Other Tier 1 adjustments ${ }^{(c)}$ |  | 707 |  |  | 2,618 |
| Standardized/Advanced Tier 1 capital | \$ | 245,631 |  | \$ | 246,162 |
| Long-term debt and other instruments qualifying as Tier 2 capital | \$ | 13,569 |  | \$ | 14,106 |
| Qualifying allowance for credit losses |  | 19,353 |  |  | 15,012 |
| Other |  | (784) |  |  | (380) |
| Standardized Tier 2 capital | \$ | 32,138 |  | \$ | 28,738 |
| Standardized Total capital | \$ | 277,769 |  | \$ | 274,900 |
| Adjustment in qualifying allowance for credit losses for Advanced Tier 2 capital ${ }^{(\mathrm{e})}$ |  | $(13,186)$ |  |  | $(9,104)$ |
| Advanced Tier 2 capital | \$ | 18,952 |  | \$ | 19,634 |
| Advanced Total capital | \$ | 264,583 |  | \$ | 265,796 |

(a) Represents deferred tax liabilities related to tax-deductible goodwill and to identifiable intangibles created in nontaxable transactions, which are netted against goodwill and other intangibles when calculating CET1 capital.
(b) As of December 31, 2022 and 2021, includes a net benefit associated with cash flow hedges and debit valuation adjustments ("DVA") related to structured notes recorded in AOCI of $\$ 5.2$ billion and $\$ 1.4$ billion and the benefit from the CECL capital transition provisions of $\$ 2.2$ billion and $\$ 2.9$ billion, respectively.
(c) As of December 31, 2021, Other Tier 1 adjustments included $\$ 2.0$ billion of Series $Z$ preferred stock called for redemption on December 31, 2021 and subsequently redeemed on February 1, 2022.
(d) Represents the allowance for credit losses eligible for inclusion in Tier 2 capital up to $1.25 \%$ of credit risk RWA, including the impact of the CECL capital transition provision with any excess deducted from RWA.
(e) Represents an adjustment to qualifying allowance for credit losses for the excess of eligible credit reserves over expected credit losses up to $0.6 \%$ of credit risk RWA, including the impact of the CECL capital transition provision with any excess deducted from RWA.
(f) Goodwill deducted from capital includes goodwill associated with equity method investments in nonconsolidated financial institutions based on regulatory requirements. Refer to Principal investment risk on page 130 for additional information.

## Capital rollforward

The following table presents the changes in Basel III CET1 capital, Tier 1 capital and Tier 2 capital for the year ended December 31, 2022.

| Year Ended December 31, (in millions) | 2022 |
| :--- | ---: |
| Standardized/Advanced CET1 capital at December 31, 2021 | $\$ 213,942$ |
| Net income applicable to common equity | 36,081 |
| Dividends declared on common stock | $(11,893)$ |
| Net purchase of treasury stock | $(1,921)$ |
| Changes in additional paid-in capital | 629 |
| Changes related to AOCI applicable to capital: |  |
| Unrealized gains/(losses) on investment securities | $(11,764)$ |
| Translation adjustments, net of hedges ${ }^{\text {(a) }}$ | $(611)$ |
| Fair value hedges | 98 |
| Defined benefit pension and other postretirement | $(1,241)$ |
| employee benefit ("OPEB") plans | $(4,386)$ |
| Changes related to other CET1 capital adjustments ${ }^{(\mathrm{b})}$ | 4,992 |
| Change in Standardized/Advanced CET1 capital |  |
| Standardized/Advanced CET1 capital at | 218,934 |
| December 31, 2022 |  |

Standardized/Advanced Tier 1 capital at December 31,

| 2021 | $\$ 246,162$ |
| :--- | ---: |
| Change in CET1 capital $^{(\text {b) }}$ | 4,992 |
| Redemptions of noncumulative perpetual preferred stock | $(5,434)$ |
| Other | (89) |
| Change in Standardized/Advanced Tier 1 capital | (531) |
| Standardized/Advanced Tier 1 capital at December 31, |  |
| $\mathbf{2 0 2 2}$ | $\mathbf{\$ 2 4 5 , 6 3 1}$ |

| Standardized Tier 2 capital at December 31, 2021 | \$ 28,738 |
| :---: | :---: |
| Change in long-term debt and other instruments qualifying as Tier 2 | (537) |
| Change in qualifying allowance for credit losses ${ }^{(b)}$ | 4,341 |
| Other | (404) |
| Change in Standardized Tier 2 capital | 3,400 |
| Standardized Tier 2 capital at December 31, 2022 | \$ 32,138 |
| Standardized Total capital at December 31, 2022 | \$ 277,769 |

Advanced Tier 2 capital at December 31, $2021 \quad \$ 19,634$

| Change in long-term debt and other instruments qualifying |  |
| :--- | ---: |
| as Tier 2 | (537) |
| Change in qualifying allowance for credit losses ${ }^{\text {(b) }}$ | 259 |
| Other | (404) |
| Change in Advanced Tier 2 capital | (682) |
| Advanced Tier 2 capital at December 31, 2022 | $\$ 18,952$ |
| Advanced Total capital at December 31, 2022 | $\$ 264,583$ |

(a) Includes foreign currency translation adjustments and the impact of related derivatives.
(b) Includes the impact of the CECL capital transition provisions.

## RWA rollforward

The following table presents changes in the components of RWA under Basel III Standardized and Advanced approaches for the year ended December 31, 2022. The amounts in the rollforward categories are estimates, based on the predominant driver of the change.

| Year ended December 31, 2022 (in millions) | Standardized |  |  |  |  |  | Advanced |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | $\begin{gathered} \hline \text { Credit risk } \\ \text { RWA }^{(\mathrm{c})} \end{gathered}$ |  | Market risk RWA |  | Total RWA |  | Credit risk RWA ${ }^{\text {(c) }}$ |  | Market risk RWA |  | Operational risk RWA |  | Total RWA |  |
| December 31, 2021 | \$ | 1,543,452 | \$ | 95,448 | \$ | 1,638,900 | \$ | 1,047,042 | \$ | 95,506 | \$ | 405,372 | \$ | 1,547,920 |
| Model \& data changes ${ }^{(a)}$ |  | $(7,313)$ |  | $(3,808)$ |  | $(11,121)$ |  | 966 |  | $(3,808)$ |  | - |  | $(2,842)$ |
| Movement in portfolio levels ${ }^{(b)}$ |  | 32,397 |  | $(6,638)$ |  | 25,759 |  | 30,068 |  | $(6,266)$ |  | 40,893 |  | 64,695 |
| Changes in RWA |  | 25,084 |  | $(10,446)$ |  | 14,638 |  | 31,034 |  | $(10,074)$ |  | 40,893 |  | 61,853 |
| December 31, 2022 | \$ | 1,568,536 | \$ | 85,002 | \$ | 1,653,538 | \$ | 1,078,076 | \$ | 85,432 | \$ | 446,265 | \$ | 1,609,773 |

(a) Model \& data changes refer to material movements in levels of RWA as a result of revised methodologies and/or treatment per regulatory guidance (exclusive of rule changes).
(b) Movement in portfolio levels (inclusive of rule changes) refers to: for Credit risk RWA, impact of SA-CCR adoption on January 1, 2022, changes in book size including position rolloffs in legacy portfolios in Home Lending, changes in composition and credit quality, market movements, and deductions for excess eligible credit reserves not eligible for inclusion in Tier 2 capital; for Market risk RWA, changes in position, market movements, and changes in the Firm's regulatory multiplier from Regulatory VaR backtesting exceptions; and for Operational risk RWA, updates to cumulative losses and macroeconomic model inputs.
(c) As of December 31, 2022 and 2021, the Basel III Standardized Credit risk RWA included wholesale and retail off balance-sheet RWA of $\$ 210.1$ billion and $\$ 218.5$ billion, respectively; and the Basel III Advanced Credit risk RWA included wholesale and retail off balance-sheet RWA of $\$ 180.8$ billion and $\$ 188.5$ billion, respectively.

Refer to the Firm's Pillar 3 Regulatory Capital Disclosures reports, which are available on the Firm's website, for further information on Credit risk RWA, Market risk RWA and Operational risk RWA.

## Supplementary leverage ratio

The following table presents the components of the Firm's SLR.

| Three months ended (in millions, except ratio) | $\begin{array}{r} \text { December 31, } \\ 2022 \end{array}$ | December 31, 2021 |
| :---: | :---: | :---: |
| Tier 1 capital | \$ 245,631 | \$ 246,162 |
| Total average assets | 3,755,271 | 3,831,655 |
| Less: Regulatory capital adjustments ${ }^{\text {a }}$ | 51,398 | 49,620 |
| Total adjusted average assets ${ }^{(\text {b) }}$ | 3,703,873 | 3,782,035 |
| Add: Off-balance sheet exposures ${ }^{(c)}$ | 663,219 | 789,754 |
| Total leverage exposure | \$ 4,367,092 | \$ 4,571,789 |
| SLR | 5.6 \% | 5.4 \% |

(a) For purposes of calculating the SLR, includes quarterly average assets adjusted for on-balance sheet assets that are subject to deduction from Tier 1 capital, predominantly goodwill, inclusive of estimated equity method goodwill, other intangible assets and adjustments for the CECL capital transition provisions.
(b) Adjusted average assets used for the calculation of Tier 1 leverage ratio.
(c) Off-balance sheet exposures are calculated as the average of the three month-end spot balances on applicable regulatory exposures during the reporting quarter. Effective January 1, 2022, includes the impact of the SA-CCR adoption. Refer to the Firm's Pillar 3 Regulatory Capital Disclosures reports for additional information.

## Line of business equity

Each business segment is allocated capital by taking into consideration a variety of factors including capital levels of similarly rated peers and applicable regulatory capital requirements. ROE is measured and internal targets for expected returns are established as key measures of a business segment's performance.
The Firm's allocation methodology incorporates Basel III Standardized RWA, Basel III Advanced RWA, the GSIB surcharge, and a simulation of capital in a severe stress environment. At least annually, the assumptions, judgments and methodologies used to allocate capital are reassessed and, as a result, the capital allocated to the LOBs may change. As of January 1, 2023, the Firm has changed its line of business capital allocations primarily as a result of updates to the Firm's capital requirements and changes in RWA for each LOB.

The following table presents the capital allocated to each business segment.
Line of business equity (Allocated capital)

|  |  | December 31, |  |  |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: |
| (in billions) | January 1, |  |  |  |  |  |
| Consumer \& Community Banking | $\$$ | $\mathbf{5 2 . 0}$ | $\$$ | 50.0 | $\$$ | 50.0 |
| Corporate \& Investment Bank | $\mathbf{1 0 8 . 0}$ |  | 103.0 | 83.0 |  |  |
| Commercial Banking | $\mathbf{2 8 . 5}$ |  | 25.0 | 24.0 |  |  |
| Asset \& Wealth Management | $\mathbf{1 6 . 0}$ |  | 17.0 | 14.0 |  |  |
| Corporate | $\mathbf{6 0 . 4}$ |  | 69.9 | 88.3 |  |  |
| Total common stockholders' equity | $\$$ | $\mathbf{2 6 4 . 9}$ | $\$$ | 264.9 | $\$$ | 259.3 |

## Management's discussion and analysis

## Capital actions

Common stock dividends
The Firm's common stock dividends are planned as part of the Capital Management governance framework in line with the Firm's capital management objectives.
The Firm's quarterly common stock dividend is currently $\$ 1.00$ per share. The Firm's dividends are subject to approval by the Board of Directors on a quarterly basis. Refer to Note 21 and Note 26 for information regarding dividend restrictions.

The following table shows the common dividend payout ratio based on net income applicable to common equity.

| Year ended December 31, | 2022 | 2021 | 2020 |
| :--- | :--- | :--- | :--- |
| Common dividend payout ratio | $33 \%$ | $25 \%$ | $40 \%$ |

## Common stock

Effective May 1, 2022, the Firm is authorized to purchase up to $\$ 30$ billion of common shares under its common share repurchase program, which superseded the previously approved repurchase program under which the Firm was authorized to purchase up to $\$ 30$ billion of common shares.
On July 14, 2022, the Firm announced that it had temporarily suspended share repurchases in anticipation of the increase in the Firm's regulatory capital requirements. The Firm had set a target for achieving CET1 capital of $13.0 \%$ by the first quarter of 2023. The Firm met and exceeded that target in the fourth quarter of 2022, and resumed repurchasing shares under its common share repurchase program in the first quarter of 2023.

The following table sets forth the Firm's repurchases of common stock for the years ended December 31, 2022, 2021 and 2020.

| Year ended December 31, (in millions) | 2022 | $2021^{(\mathrm{a})}$ | $2020^{(\mathrm{b})}$ |
| :--- | :---: | :---: | :---: |
| Total number of shares of common <br> stock repurchased | $\mathbf{2 3 . 1}$ | 119.7 | 50.0 |
| Aggregate purchase price of common <br> stock repurchases | $\mathbf{\$ 3 , 1 2 2}$ | $\$ 18,448$ | $\$ 6,397$ |

(a) As directed by the Federal Reserve, total net repurchases and common stock dividends in the first and second quarter of 2021 were restricted and could not exceed the average of the Firm's net income for the four preceding calendar quarters. Effective July 1, 2021, the Firm became subject to the normal capital distribution restrictions provided under the regulatory capital framework.
(b) On March 15, 2020, in response to the economic disruptions caused by the COVID-19 pandemic, the Firm temporarily suspended repurchases of its common stock. Subsequently, the Federal Reserve directed all large banks, including the Firm, to discontinue net share repurchases through the end of 2020.

The Board of Directors' authorization to repurchase common shares is utilized at management's discretion, and the timing of purchases and the exact amount of common shares that may be repurchased is subject to various factors, including market conditions; legal and regulatory considerations affecting the amount and timing of repurchase activity; the Firm's capital position (taking into account goodwill and intangibles); internal capital generation; and alternative investment opportunities. The $\$ 30$ billion common share repurchase program approved by the Board does not establish specific price targets or timetables. The repurchase program may be suspended by management at any time; and may be executed through open market purchases or privately negotiated transactions, or utilizing Rule 10b5-1 plans, which are written trading plans that the Firm may enter into from time to time under Rule 10b5-1 of the Securities Exchange Act of 1934 and which allow the Firm to repurchase its common shares during periods when it may otherwise not be repurchasing common shares - for example, during internal trading blackout periods.
Refer to Part II, Item 5: Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities on page 34 of the 2022 Form 10-K for additional information regarding repurchases of the Firm's equity securities.
Refer to capital planning and stress testing on pages 86-87 for additional information.

## Preferred stock

Preferred stock dividends declared were $\$ 1.6$ billion for each of the years ended December 31, 2022, 2021 and 2020.

During the year ended December 31, 2022, the Firm redeemed several series of non-cumulative preferred stock. Refer to Note 21 for additional information on the Firm's preferred stock, including the issuance and redemption of preferred stock.

## Subordinated Debt

Refer to Long-term funding and issuance on page 103 and Note 20 for additional information on the Firm's subordinated debt.

## Other capital requirements

Total Loss-Absorbing Capacity
The Federal Reserve's TLAC rule requires the U.S. GSIB toptier holding companies, including the Firm, to maintain minimum levels of external TLAC and eligible long-term debt.

The external TLAC requirements and the minimum level of eligible long-term debt requirements are shown below:

(a) RWA is the greater of Standardized and Advanced compared to their respective regulatory capital ratio requirements.
Failure to maintain TLAC equal to or in excess of the regulatory minimum plus applicable buffers will result in limitations on the amount of capital that the Firm may distribute, such as through dividends and common share repurchases, as well as on certain executive discretionary bonus payments.

The following table presents the eligible external TLAC and eligible LTD amounts, as well as a representation of these amounts as a percentage of the Firm's total RWA and total leverage exposure applying the impact of the CECL capital transition provisions as of December 31, 2022 and 2021.

| (in billions, except ratio) | December 31, 2022 |  |  |  | December 31, 2021 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | External TLAC |  | LTD |  | External TLAC |  | LTD |  |
| Total eligible amount | \$ | 486.0 | \$ | 228.5 | \$ | 464.6 | \$ | 210.4 |
| \% of RWA |  | 29.4 \% |  | 13.8 \% |  | 28.4 \% |  | 12.8 \% |
| Regulatory requirements |  | 22.5 |  | 9.5 |  | 22.5 |  | 9.5 |
| Surplus/ (shortfall) | \$ | 114.0 | \$ | 71.4 | \$ | 95.9 | \$ | 54.7 |
| \% of total leverage exposure |  | 11.1 \% |  | 5.2 \% |  | 10.2 \% |  | 4.6 \% |
| Regulatory requirements |  | 9.5 |  | 4.5 |  | 9.5 |  | 4.5 |
| Surplus/ <br> (shortfall) | \$ | 71.2 | \$ | 32.0 | \$ | 30.3 | \$ | 4.6 |

As of January 1, 2023, the regulatory requirement for TLAC to RWA and LTD to RWA ratios has increased by 50 bps to $23.0 \%$ and $10.0 \%$, respectively, due to the increase in the Firm's GSIB requirements. Refer to Risk-based Capital Regulatory Requirements on pages 89-90 for further information on the GSIB surcharge.
Refer to Liquidity Risk Management on pages 97-104 for further information on long-term debt issued by the Parent Company.
Refer to Part I, Item 1A: Risk Factors on pages 9-32 of the 2022 Form 10-K for information on the financial consequences to holders of the Firm's debt and equity securities in a resolution scenario.

## Management's discussion and analysis

## U.S. broker-dealer regulatory capital

## J.P. Morgan Securities

JPMorgan Chase’s principal U.S. broker-dealer subsidiary is J.P. Morgan Securities. J.P. Morgan Securities is subject to the regulatory capital requirements of Rule 15c3-1 under the Securities Exchange Act of 1934 (the "Net Capital Rule"). J.P. Morgan Securities is also registered as a futures commission merchant and is subject to regulatory capital requirements, including those imposed by the SEC, the Commodity Futures Trading Commission ("CFTC"), the Financial Industry Regulatory Authority ("FINRA") and the National Futures Association ("NFA").
J.P. Morgan Securities has elected to compute its minimum net capital requirements in accordance with the
"Alternative Net Capital Requirements" of the Net Capital Rule.

The following table presents J.P. Morgan Securities’ net capital:

| December 31, 2022 <br> (in millions) |  |  |  |  |
| :--- | ---: | ---: | ---: | ---: |
| Net Capital | $\$$ | 24,989 | $\$$ | 5,628 |

J.P. Morgan Securities is registered with the SEC as a security-based swap dealer and with the CFTC as a swap dealer. As a result of additional SEC and CFTC capital and financial reporting requirements for security-based swap dealers and swap dealers, J.P. Morgan Securities is subject to alternative minimum net capital requirements and required to hold "tentative net capital" in excess of \$5.0 billion. J.P. Morgan Securities is also required to notify the SEC and CFTC in the event that its tentative net capital is less than $\$ 6.0$ billion. Tentative net capital is net capital before deducting market and credit risk charges as defined by the Net Capital Rule. As of December 31, 2022, J.P. Morgan Securities maintained tentative net capital in excess of the minimum and notification requirements.

## Non-U.S. subsidiary regulatory capital

J.P. Morgan Securities plc
J.P. Morgan Securities plc is a wholly-owned subsidiary of JPMorgan Chase Bank, N.A. and has authority to engage in banking, investment banking and broker-dealer activities. J.P. Morgan Securities plc is jointly regulated in the U.K. by the Prudential Regulation Authority ("PRA") and the Financial Conduct Authority ("FCA"). J.P. Morgan Securities plc is subject to the European Union ("EU") Capital Requirements Regulation ("CRR"), as adopted in the U.K., and the PRA capital rules, each of which have implemented Basel III and thereby subject J.P. Morgan Securities plc to its requirements.

The Bank of England requires that U.K. banks, including U.K. regulated subsidiaries of overseas groups, maintain minimum requirements for own funds and eligible liabilities ("MREL"). As of December 31, 2022, J.P. Morgan Securities plc was compliant with its MREL requirements, which became fully phased-in on January 1, 2022.

Effective January 1, 2023, J.P. Morgan Securities plc was required to meet the minimum leverage capital requirement established by the PRA of $3.25 \%$, plus regulatory buffers. As of December 31, 2022, J.P. Morgan Securities plc was compliant with its leverage requirements.

The following table presents J.P. Morgan Securities plc's capital metrics:

| December 31, 2022 |  |  |  |
| :--- | :---: | :---: | ---: |
| (in millions, except ratios) |  | Actual | Regulatory <br> Minimum ratios |
| Total capital | $\$$ | $\mathbf{5 4 , 2 1 8}$ |  |
| CET1 capital ratio | $\mathbf{2 2 . 4} \%$ | $\mathbf{4 . 5} \%$ |  |
| Tier 1 capital ratio | $\mathbf{2 5 . 4} \%$ | $\mathbf{6 . 0} \%$ |  |
| Total capital ratio | $\mathbf{3 2 . 6} \%$ | $\mathbf{8 . 0} \%$ |  |

(a) Represents minimum Pillar 1 requirements specified by the PRA. J.P. Morgan Securities plc's capital ratios as of December 31, 2022 exceeded the minimum requirements, including the additional capital requirements specified by the PRA.

## J.P. Morgan SE

JPMSE is a wholly-owned subsidiary of JPMorgan Chase Bank, N.A. and has authority to engage in banking, investment banking and markets activities. JPMSE is regulated by the European Central Bank as well as the local regulators in each of the countries in which it operates, and it is subject to EU capital requirements under Basel III.
JPMSE is required by the EU Single Resolution Board to maintain MREL. As of December 31, 2022, JPMSE was compliant with its MREL requirements.

The following table presents JPMSE's capital metrics:

| December 31, 2022 <br> (in millions, except ratios) | Actual |  |  |
| :--- | ---: | ---: | ---: |
| Total capital | $\mathbf{3 8 , 8 7 9}$ |  |  |
| CET1 capital ratio | $\mathbf{1 9 . 7} \%$ | $\mathbf{4 . 5} \%$ |  |
| Tier 1 capital ratio | $\mathbf{1 9 . 7} \%$ | $\mathbf{6 . 0} \%$ |  |
| Total capital ratio | $\mathbf{3 3 . 8} \%$ | $\mathbf{8 . 0} \%$ |  |
| Tier 1 leverage ratio | $\mathbf{6 . 0} \%$ | $\mathbf{3 . 0} \%$ |  |

(a) Represents minimum Pillar 1 requirements specified by the EU CRR. J.P. Morgan SE's capital and leverage ratios as of December 31, 2022 exceeded the minimum requirements, including the additional capital requirements specified by the European Banking Authority.

Liquidity risk is the risk that the Firm will be unable to meet its contractual and contingent financial obligations as they arise or that it does not have the appropriate amount, composition and tenor of funding and liquidity to support its assets and liabilities.

## Liquidity risk management

The Firm has a Liquidity Risk Management ("LRM") function whose primary objective is to provide independent oversight of liquidity risk across the Firm. Liquidity Risk Management's responsibilities include:

- Defining, monitoring and reporting liquidity risk metrics;
- Independently establishing and monitoring limits and indicators, including liquidity risk appetite;
- Developing a process to classify, monitor and report limit breaches;
- Performing an independent review of liquidity risk management processes to evaluate their adequacy and effectiveness based on LRM's Independent Review Framework;
- Monitoring and reporting internal Firmwide and legal entity liquidity stress tests, regulatory defined metrics, as well as liquidity positions, balance sheet variances and funding activities; and
- Approving or escalating for review new or updated liquidity stress assumptions.

## Liquidity management

Treasury and CIO is responsible for liquidity management.
The primary objectives of the Firm's liquidity management are to:

- Ensure that the Firm's core businesses and material legal entities are able to operate in support of client needs and meet contractual and contingent financial obligations through normal economic cycles as well as during stress events, and
- Manage an optimal funding mix and availability of liquidity sources.
The Firm addresses these objectives through:
- Analyzing and understanding the liquidity characteristics of the assets and liabilities of the Firm, LOBs and legal entities, taking into account legal, regulatory, and operational restrictions;
- Developing internal liquidity stress testing assumptions;
- Defining and monitoring Firmwide and legal entityspecific liquidity strategies, policies, reporting and contingency funding plans;
- Managing liquidity within the Firm's approved liquidity risk appetite tolerances and limits;
- Managing compliance with regulatory requirements related to funding and liquidity risk; and
- Setting FTP in accordance with underlying liquidity characteristics of balance sheet assets and liabilities as well as certain off-balance sheet items.

As part of the Firm's overall liquidity management strategy, the Firm manages liquidity and funding using a centralized, global approach designed to:

- Optimize liquidity sources and uses;
- Monitor exposures;
- Identify constraints on the transfer of liquidity between the Firm's legal entities; and
- Maintain the appropriate amount of surplus liquidity at a Firmwide and legal entity level, where relevant.

## Governance

Committees responsible for liquidity governance include the Firmwide ALCO as well as LOB and regional ALCOs, the Treasurer Committee, and the CTC Risk Committee. In addition, the Board Risk Committee reviews and recommends to the Board of Directors, for formal approval, the Firm's liquidity risk tolerances, liquidity strategy, and liquidity policy. Refer to Firmwide Risk Management on pages 81-84 for further discussion of ALCO and other riskrelated committees.

## Internal stress testing

Liquidity stress tests are intended to ensure that the Firm has sufficient liquidity under a variety of adverse scenarios, including scenarios analyzed as part of the Firm's resolution and recovery planning. Stress scenarios are produced for JPMorgan Chase \& Co. ("Parent Company") and the Firm's material legal entities on a regular basis, and other stress tests are performed in response to specific market events or concerns. Liquidity stress tests assume all of the Firm's contractual financial obligations are met and take into consideration:

- Varying levels of access to unsecured and secured funding markets;
- Estimated non-contractual and contingent cash outflows;
- Considerations of credit rating downgrades;
- Collateral haircuts; and
- Potential impediments to the availability and transferability of liquidity between jurisdictions and material legal entities such as regulatory, legal or other restrictions.
Liquidity outflows are modeled across a range of time horizons and currency dimensions and contemplate both market and idiosyncratic stresses.
Results of stress tests are considered in the formulation of the Firm's funding plan and assessment of its liquidity position. The Parent Company acts as a source of funding for the Firm through equity and long-term debt issuances, and its intermediate holding company, JPMorgan Chase Holdings LLC (the "IHC"), provides funding support to the ongoing operations of the Parent Company and its subsidiaries. The Firm maintains liquidity at the Parent Company, the IHC, and operating subsidiaries at levels sufficient to comply with liquidity risk tolerances and

## Management's discussion and analysis

minimum liquidity requirements, and to manage through periods of stress when access to normal funding sources may be disrupted.

Contingency funding plan
The Firm's Contingency Funding Plan ("CFP") sets out the strategies for addressing and managing liquidity resource needs during a liquidity stress event and incorporates liquidity risk limits, indicators and risk appetite tolerances. The CFP also identifies the alternative contingent funding and liquidity resources available to the Firm and its legal entities in a period of stress.

## LCR and HQLA

The LCR rule requires that the Firm and JPMorgan Chase Bank, N.A. maintain an amount of eligible HQLA that is sufficient to meet their respective estimated total net cash outflows over a prospective 30 calendar-day period of significant stress. Eligible HQLA, for purposes of calculating the LCR, is the amount of unencumbered HQLA that satisfy certain operational considerations as defined in the LCR rule. HQLA primarily consist of cash and certain high-quality liquid securities as defined in the LCR rule.

Under the LCR rule, the amount of eligible HQLA held by JPMorgan Chase Bank, N.A. that is in excess of its standalone $100 \%$ minimum LCR requirement, and that is not transferable to non-bank affiliates, must be excluded from the Firm's reported eligible HQLA.
Estimated net cash outflows are based on standardized stress outflow and inflow rates prescribed in the LCR rule, which are applied to the balances of the Firm's assets, sources of funds, and obligations. The LCR for both the Firm and JPMorgan Chase Bank, N.A. is required to be a minimum of $100 \%$.

The following table summarizes the Firm and JPMorgan Chase Bank, N.A.'s average LCR for the three months ended December 31, 2022, September 30, 2022 and December 31, 2021 based on the Firm's interpretation of the LCR framework.

| Average amount (in millions) | Three months ended |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | $\begin{gathered} \text { December 31, } \\ 2022 \end{gathered}$ |  | $\begin{gathered} \text { September } 30, \\ 2022 \end{gathered}$ |  | $\begin{gathered} \text { December 31, } \\ 2021 \end{gathered}$ |  |
| JPMorgan Chase \& Co.: |  |  |  |  |  |  |
| HQLA |  |  |  |  |  |  |
| Eligible cash ${ }^{(a)}$ | \$ | 542,847 | \$ | 589,158 | \$ | 703,384 |
| Eligible securities ${ }^{(b)(c)}$ |  | 190,201 |  | 126,913 |  | 34,738 |
| Total HQLA ${ }^{(\mathrm{d})}$ | \$ | 733,048 | \$ | 716,071 | \$ | 738,122 |
| Net cash outflows | \$ | 652,580 | \$ | 635,072 | \$ | 664,801 |
| LCR |  | 112 \% |  | 113 \% |  | 111 \% |
| Net excess eligible $H^{2} A^{(d)}$ | \$ | 80,468 | \$ | 80,999 | \$ | 73,321 |
| JPMorgan Chase Bank, N.A.: |  |  |  |  |  |  |
| LCR |  | 151 \% |  | 165 \% |  | 178 \% |
| Net excess eligible HQLA | \$ | 356,733 | \$ | 450,260 | \$ | 555,300 |

[^135] Reserve Banks.
(b) Predominantly U.S. Treasuries, U.S. GSE and government agency MBS, and sovereign bonds net of applicable haircuts under the LCR rule.
(c) Eligible HQLA securities may be reported in securities borrowed or purchased under resale agreements, trading assets, or investment securities on the Firm's Consolidated balance sheets.
(d) Excludes average excess eligible HQLA at JPMorgan Chase Bank, N.A. that are not transferable to non-bank affiliates.

JPMorgan Chase Bank, N.A.'s average LCR decreased during the three months ended December 31, 2022, compared with the three months ended September 30, 2022 reflecting a decrease in JPMorgan Chase Bank, N.A.'s HQLA, primarily due to a reduction in cash associated with a decline in deposits, and loan growth.

JPMorgan Chase Bank, N.A.'s average LCR for the three months ended December 31, 2022 decreased when compared with the same period in the prior year, reflecting a decrease in JPMorgan Chase Bank, N.A.'s HQLA as a result of a reduction in cash from loan growth and a decline in deposits as well as lower market values of HQLA-eligible investment securities. Refer to Note 10 for additional information on the Firm's investment securities portfolio.

The Firm and JPMorgan Chase Bank, N.A.'s average LCR fluctuates from period to period due to changes in its eligible HQLA and estimated net cash outflows as a result of ongoing business activity. Refer to the Firm's U.S. LCR Disclosure reports, which are available on the Firm's website, for a further discussion of the Firm's LCR.

## Other liquidity sources

In addition to the assets reported in the Firm's eligible HQLA discussed above, the Firm had unencumbered marketable securities, such as equity and debt securities, that the Firm believes would be available to raise liquidity. This includes excess eligible HQLA securities at JPMorgan Chase Bank, N.A. that are not transferable to non-bank affiliates. The fair value of these securities was approximately $\$ 694$ billion and $\$ 914$ billion as of December 31, 2022 and 2021, respectively, although the amount of liquidity that could be raised at any particular time would be dependent on prevailing market conditions. The fair value decreased compared to December 31, 2021, primarily due to a decrease in excess eligible HQLA securities at JPMorgan Chase Bank, N.A., as noted above.

The Firm also had available borrowing capacity at the FHLBs and the discount window at the Federal Reserve Banks as a result of collateral pledged by the Firm to such banks of approximately $\$ 323$ billion and $\$ 308$ billion as of December 31, 2022 and 2021, respectively. This borrowing capacity excludes the benefit of cash and securities reported in the Firm's eligible HQLA or other unencumbered securities that are currently pledged at the Federal Reserve Banks discount window and other central banks. Available borrowing capacity increased from December 31, 2021 primarily due to increased credit card receivables pledged at the Federal Reserve Banks. Although available, the Firm does not view this borrowing capacity at the Federal Reserve Banks discount window and the other central banks as a primary source of liquidity.

NSFR
The net stable funding ratio ("NSFR") is a liquidity requirement for large banking organizations that is intended to measure the adequacy of "available" stable funding that is sufficient to meet their "required" amounts of stable funding over a one-year horizon.
As of December 31, 2022, the Firm and JPMorgan Chase Bank, N.A. were compliant with the $100 \%$ minimum NSFR requirement, based on the Firm's current interpretation of the final rule. The Firm will be required to publicly disclose its quarterly average NSFR semiannually beginning in the second half of 2023.

## Management's discussion and analysis

## Funding

## Sources of funds

Management believes that the Firm's unsecured and secured funding capacity is sufficient to meet its on- and off-balance sheet obligations, which includes both shortand long-term cash requirements.
The Firm funds its global balance sheet through diverse sources of funding including stable deposits, secured and unsecured funding in the capital markets and stockholders' equity. Deposits are the primary funding source for JPMorgan Chase Bank, N.A. Additionally, JPMorgan Chase Bank, N.A. may access funding through short- or long-term secured borrowings, through the issuance of unsecured
long-term debt, or from borrowings from the IHC. The Firm's non-bank subsidiaries are primarily funded from long-term unsecured borrowings and short-term secured borrowings which are primarily securities loaned or sold under repurchase agreements. Excess funding is invested by Treasury and CIO in the Firm's investment securities portfolio or deployed in cash or other short-term liquid investments based on their interest rate and liquidity risk characteristics.

Refer to Note 28 for additional information on off-balance sheet obligations.

## Deposits

The table below summarizes, by LOB and Corporate, the period-end and average deposit balances as of and for the years ended December 31, 2022 and 2021.

| As of or for the year ended December 31, (in millions) | 2022 |  | 2021 |  | Average |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | 2022 |  | 2021 |
| Consumer \& Community Banking | \$ | 1,131,611 |  |  | \$ | 1,148,110 | \$ | 1,162,680 | \$ | 1,054,956 |
| Corporate \& Investment Bank |  | 689,893 |  | 707,791 |  | 739,700 |  | 760,048 |
| Commercial Banking |  | 271,342 |  | 323,954 |  | 294,180 |  | 301,343 |
| Asset \& Wealth Management |  | 233,130 |  | 282,052 |  | 261,489 |  | 230,296 |
| Corporate |  | 14,203 |  | 396 |  | 9,866 |  | 511 |
| Total Firm | \$ | 2,340,179 | \$ | 2,462,303 | \$ | 2,467,915 | \$ | 2,347,154 |

Deposits provide a stable source of funding and reduce the Firm's reliance on the wholesale funding markets. A significant portion of the Firm's deposits are consumer deposits and wholesale operating deposits, which are both considered to be stable sources of liquidity. Wholesale operating deposits are considered to be stable sources of liquidity because they are generated from customers that maintain operating service relationships with the Firm.
The Firm believes that average deposit balances are generally more representative of deposit trends than period-end deposit balances. However, during periods of market disruption those trends could be affected.

Average deposits were higher for the year ended December 31, 2022 compared to the year ended December 31, 2021, reflecting:

- growth in CCB from existing and new accounts across both consumer and small business customers, partially offset by a decline in deposits starting in the second half of 2022, impacted by growth in customer spending, and
- net inflows in AWM resulting from the residual effects of certain government actions, partially offset by migration into investments starting in the second quarter of 2022 as a result of the rising interest rate environment partially offset by
- Iower average deposits in CIB and CB due to attrition, also as a result of the rising interest rate environment.

Period-end deposits decreased reflecting:

- attrition in CB and CIB, particularly non-operating deposits in CB, partially offset by net issuances of structured notes in Markets,
- net outflows into investments in AWM amid the rising interest rate environment, and
- a decline in balances in existing accounts in CCB due to higher customer spending, predominantly offset by net inflows into new accounts.
The increase in deposits for both spot and averages in Corporate was driven by the Firm's international consumer growth initiatives.
Refer to the discussion of the Firm's Consolidated Balance Sheets Analysis and the Business Segment Results on pages $55-56$ and pages 61-80, respectively, for further information on deposit and liability balance trends.

Certain deposits are covered by insurance protection that provides additional funding stability and results in a benefit to the LCR. Deposit insurance protection may be available to depositors in the countries in which the deposits are placed. For example, the Federal Deposit Insurance Corporation ("FDIC") provides deposit insurance protection for deposits placed in a U.S. depository institution. At December 31, 2022 and 2021, the Firmwide estimated uninsured deposits were $\$ 1,383.7$ billion and $\$ 1,489.6$ billion, respectively, primarily reflecting wholesale operating deposits.

Total uninsured deposits include time deposits. The table below presents an estimate of uninsured U.S. and non-U.S. time deposits, and their remaining maturities. The Firm's estimates of its uninsured U.S. time deposits are based on data that the Firm calculates periodically under applicable FDIC regulations. For purposes of this presentation, all nonU.S. time deposits are deemed to be uninsured.

(a) Primarily consists of short-term securities loaned or sold under agreements to repurchase.
(b) Included in beneficial interests issued by consolidated variable interest entities on the Firm's Consolidated balance sheets.
(c) Includes certain TLAC-eligible long-term unsecured debt issued by the Parent Company.
(d) Includes long-term structured notes which are secured.
(e) Refer to Capital Risk Management on pages 86-96, Consolidated statements of changes in stockholders' equity on page 162, Note 21 and Note 22 for additional information on preferred stock and common stockholders' equity.

## Short-term funding

The Firm's sources of short-term secured funding primarily consist of securities loaned or sold under agreements to repurchase. These instruments are secured predominantly by high-quality securities collateral, including governmentissued debt and U.S. GSE and government agency MBS. Securities sold under agreements to repurchase increased at December 31, 2022, compared with December 31, 2021, due to higher secured financing of trading assets in Markets, partially offset by lower secured financing of AFS investment securities in Treasury and CIO.

The balances associated with securities loaned or sold under agreements to repurchase fluctuate over time due to investment and financing activities of clients, the Firm's demand for financing, the ongoing management of the mix of the Firm's liabilities, including its secured and unsecured financing (for both the investment securities and marketmaking portfolios), and other market and portfolio factors.

The Firm's sources of short-term unsecured funding primarily consist of issuances of wholesale commercial paper and other borrowed funds.

The decrease in period-end commercial paper and the increase in average balances for the year ended December 31, 2022 compared to the respective prior year periods, was due to changes in net issuance levels primarily for short-term liquidity management.

## Long-term funding and issuance

Long-term funding provides an additional source of stable funding and liquidity for the Firm. The Firm's long-term funding plan is driven primarily by expected client activity, liquidity considerations, and regulatory requirements, including TLAC. Long-term funding objectives include maintaining diversification, maximizing market access and optimizing funding costs. The Firm evaluates various funding markets, tenors and currencies in creating its optimal long-term funding plan.

The significant majority of the Firm's long-term unsecured funding is issued by the Parent Company to provide flexibility in support of the funding needs of both bank and non-bank subsidiaries. The Parent Company advances substantially all net funding proceeds to its subsidiary, the IHC. The IHC does not issue debt to external counterparties. The following table summarizes long-term unsecured issuance and maturities or redemptions for the years ended December 31, 2022 and 2021. Refer to Note 20 for additional information on the IHC and long-term debt.

Long-term unsecured funding

| Year ended December 31, (Notional in millions) | 2022 |  | 2021 |  | 2022 |  | 2021 |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Parent Company |  |  |  | Subsidiaries |  |  |  |
| Issuance |  |  |  |  |  |  |  |  |
| Senior notes issued in the U.S. market | \$ | 32,600 | \$ | 39,500 | \$ | - | \$ | - |
| Senior notes issued in non-U.S. markets |  | 2,752 |  | 5,581 |  | - |  | - |
| Total senior notes |  | 35,352 |  | 45,081 |  | - |  | - |
| Subordinated debt |  | 3,500 |  | - |  | - |  | - |
| Structured notes ${ }^{(2)}$ |  | 2,535 |  | 4,113 |  | 35,577 |  | 32,714 |
| Total long-term unsecured funding - issuance | \$ | 41,387 | \$ | 49,194 | \$ | 35,577 | \$ | 32,714 |
| Maturities/redemptions |  |  |  |  |  |  |  |  |
| Senior notes | \$ | 16,700 | \$ | 10,840 | \$ | 65 | \$ | 65 |
| Subordinated debt |  | - |  | 9 |  | - |  | - |
| Structured notes |  | 1,594 |  | 4,694 |  | 25,481 |  | 33,023 |
| Total long-term unsecured funding - maturities/redemptions | \$ | 18,294 | \$ | 15,543 | \$ | 25,546 | \$ | 33,088 |

(a) Includes certain TLAC-eligible long-term unsecured debt issued by the Parent Company.

The Firm can also raise secured long-term funding through securitization of consumer credit card loans and FHLB advances. The following table summarizes the securitization issuance and FHLB advances and their respective maturities or redemptions for the years ended December 31, 2022 and 2021.

Long-term secured funding

| Year ended December 31, (in millions) | Issuance |  |  |  | Maturities/Redemptions |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 2022 |  | 2021 |  | 2022 |  | 2021 |  |
| Credit card securitization | \$ | 999 | \$ | - | \$ | 1,400 | \$ | 2,550 |
| FHLB advances |  | - |  | - |  | 14 |  | 3,011 |
| Other long-term secured funding ${ }^{(a)}$ |  | 476 |  | 525 |  | 268 |  | 741 |
| Total long-term secured funding | \$ | 1,475 | \$ | 525 | \$ | 1,682 | \$ | 6,302 |

(a) Includes long-term structured notes that are secured.

The Firm's wholesale businesses also securitize loans for client-driven transactions; those client-driven loan securitizations are not considered to be a source of funding for the Firm and are not included in the table above. Refer to Note 14 for a further description of client-driven loan securitizations.

## Management's discussion and analysis

## Credit ratings

The cost and availability of financing are influenced by credit ratings. Reductions in these ratings could have an adverse effect on the Firm's access to liquidity sources, increase the cost of funds, trigger additional collateral or funding requirements and decrease the number of investors and counterparties willing to lend to the Firm. The nature and magnitude of the impact of ratings downgrades depends on numerous contractual and behavioral factors, which the Firm believes are incorporated in its liquidity risk and stress testing metrics. The Firm believes that it
maintains sufficient liquidity to withstand a potential decrease in funding capacity due to ratings downgrades.

Additionally, the Firm's funding requirements for VIEs and other third-party commitments may be adversely affected by a decline in credit ratings. Refer to liquidity risk and credit-related contingent features in Note 5 for additional information on the impact of a credit ratings downgrade on the funding requirements for VIEs, and on derivatives and collateral agreements.

The credit ratings of the Parent Company and the Firm's principal bank and non-bank subsidiaries as of December 31, 2022, were as follows:

| December 31, 2022 | JPMorgan Chase \& Co. |  |  | JPMorgan Chase Bank, N.A. |  |  | J.P. Morgan Securities LLC J.P. Morgan Securities plc J.P. Morgan SE |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Long-term issuer | Short-term issuer | Outlook | Long-term issuer | Short-term issuer | Outlook | Long-term issuer | Short-term issuer | Outlook |
| Moody's Investors Service | A1 | P-1 | Stable | Aa2 | P-1 | Stable | Aa3 | P-1 | Stable |
| Standard \& Poor's | A- | A-2 | Positive | A+ | A-1 | Positive | A+ | A-1 | Positive |
| Fitch Ratings | AA- | F1+ | Stable | AA | F1+ | Stable | AA | F1+ | Stable |

(a) In January 2022, the three rating agencies affirmed the credit ratings of J.P. Morgan SE, which are equivalent to the ratings previously assigned to J.P. Morgan SE's predecessors, J.P. Morgan Bank Luxembourg S.A. and J.P. Morgan AG.

On September 29, 2022, Moody's upgraded the Parent Company's long-term issuer rating to A1 (previously A2) and changed the long-term outlook to stable (previously positive). All other ratings and outlooks of the Parent Company and those of the Firm's principal bank and nonbank subsidiaries were affirmed by Moody's.
JPMorgan Chase's unsecured debt does not contain requirements that would call for an acceleration of payments, maturities or changes in the structure of the existing debt, provide any limitations on future borrowings or require additional collateral, based on unfavorable changes in the Firm's credit ratings, financial ratios, earnings, or stock price.

Critical factors in maintaining high credit ratings include a stable and diverse earnings stream, strong capital and liquidity ratios, strong credit quality and risk management controls, and diverse funding sources. Rating agencies continue to evaluate economic and geopolitical trends, regulatory developments, future profitability, risk management practices, and litigation matters, as well as their broader ratings methodologies. Changes in any of these factors could lead to changes in the Firm's credit ratings.

Reputation risk is the risk that an action or inaction may negatively impact perception of the Firm's integrity and reduce confidence in the Firm's competence by various constituents, including clients, counterparties, customers, investors, regulators, employees, communities or the broader public.

Organization and management
Reputation Risk Management establishes the governance framework for managing reputation risk across the Firm's LOBs and Corporate. Reputation risk is inherently challenging to identify, manage, and quantify.

The Firm's reputation risk management function includes the following activities:

- Maintaining a Firmwide Reputation Risk Governance policy and a standard consistent with the reputation risk framework
- Overseeing the governance execution through processes and infrastructure that support consistent identification, escalation, management and monitoring of reputation risk issues Firmwide

The types of events that result in reputation risk are wideranging and may be introduced by the Firm's employees and the clients, customers and counterparties with which the Firm does business. These events could result in financial losses, litigation, regulatory enforcement actions, fines, penalties or other sanctions, as well as other harm to the Firm.

## Governance and oversight

The Reputation Risk Governance policy establishes the principles for managing reputation risk for the Firm. It is the responsibility of employees in each LOB and Corporate to consider the reputation of the Firm when deciding whether to offer a new product, engage in a transaction or client relationship, enter a new jurisdiction, initiate a business process or consider any other activity. Environmental impacts and social concerns are increasingly important considerations in assessing the Firm's reputation risk, and are a component of the Firm's reputation risk governance.

Reputation risk issues that are deemed to be material are escalated as appropriate.

## Management's discussion and analysis

## CREDIT AND INVESTMENT RISK MANAGEMENT

Credit and investment risk is the risk associated with the default or change in credit profile of a client, counterparty or customer; or loss of principal or a reduction in expected returns on investments, including consumer credit risk, wholesale credit risk, and investment portfolio risk.

Credit risk management
Credit risk is the risk associated with the default or change in credit profile of a client, counterparty or customer. The Firm provides credit to a variety of clients and customers, ranging from large corporate and institutional clients to individual consumers and small businesses. In its consumer businesses, the Firm is exposed to credit risk primarily through its home lending, credit card, auto, and business banking businesses. In its wholesale businesses, the Firm is exposed to credit risk through its underwriting, lending, market-making, and hedging activities with and for clients and counterparties, as well as through its operating services activities (such as cash management and clearing activities), and securities financing activities. The Firm is also exposed to credit risk through its investment securities portfolio and cash placed with banks.
Credit Risk Management monitors, measures and manages credit risk throughout the Firm and defines credit risk policies and procedures. The Firm's credit risk management governance includes the following activities:

- Maintaining a credit risk policy framework
- Monitoring, measuring and managing credit risk across all portfolio segments, including transaction and exposure approval
- Setting industry and geographic concentration limits, as appropriate, and establishing underwriting guidelines
- Assigning and managing credit authorities in connection with the approval of credit exposure
- Managing criticized exposures and delinquent loans, and
- Estimating credit losses and supporting appropriate credit risk-based capital management

Risk identification and measurement
To measure credit risk, the Firm employs several methodologies for estimating the likelihood of obligor or counterparty default. Methodologies for measuring credit risk vary depending on several factors, including type of asset (e.g., consumer versus wholesale), risk measurement parameters (e.g., delinquency status and borrower's credit score versus wholesale risk-rating) and risk management and collection processes (e.g., retail collection center versus centrally managed workout groups). Credit risk measurement is based on the probability of default of an obligor or counterparty, the loss severity given a default event and the exposure at default.

Based on these factors and the methodology and estimates described in Note 13 and Note 10, the Firm estimates credit losses for its exposures. The allowance for loan losses reflects estimated credit losses related to the consumer and wholesale held-for-investment loan portfolios, the allowance for lending-related commitments reflects estimated credit losses related to the Firm's lending-related commitments and the allowance for investment securities reflects estimated credit losses related to the investment securities portfolio. Refer to Note 13, Note 10 and Critical Accounting Estimates used by the Firm on pages 149-152 for further information.

In addition, potential and unexpected credit losses are reflected in the allocation of credit risk capital and represent the potential volatility of actual losses relative to the established allowances for loan losses and lendingrelated commitments. The analyses for these losses include stress testing that considers alternative economic scenarios as described below.

## Stress testing

Stress testing is important in measuring and managing credit risk in the Firm's credit portfolio. The stress testing process assesses the potential impact of alternative economic and business scenarios on estimated credit losses for the Firm. Economic scenarios and the underlying parameters are defined centrally, articulated in terms of macroeconomic factors and applied across the businesses. The stress test results may indicate credit migration, changes in delinquency trends and potential losses in the credit portfolio. In addition to the periodic stress testing processes, management also considers additional stresses outside these scenarios, including industry and countryspecific stress scenarios, as necessary. The Firm uses stress testing to inform decisions on setting risk appetite both at a Firm and LOB level, as well as to assess the impact of stress on individual counterparties.

## Risk monitoring and management

The Firm has developed policies and practices that are designed to preserve the independence and integrity of the approval and decision-making process for extending credit so that credit risks are assessed accurately, approved properly, monitored regularly and managed actively at both the transaction and portfolio levels. The policy framework establishes credit approval authorities, concentration limits, risk-rating methodologies, portfolio review parameters and guidelines for management of distressed exposures. In addition, certain models, assumptions and inputs used in evaluating and monitoring credit risk are independently validated by groups that are separate from the LOBs.

Consumer credit risk is monitored for delinquency and other trends, including any concentrations at the portfolio level, as certain of these trends can be addressed through changes in underwriting policies and portfolio guidelines. Consumer Risk Management evaluates delinquency and other trends against business expectations, current and forecasted economic conditions, and industry benchmarks. Historical and forecasted economic performance and trends are incorporated into the modeling of estimated consumer credit losses and are part of the monitoring of the credit risk profile of the portfolio.

Wholesale credit risk is monitored regularly at an aggregate portfolio, industry, and individual client and counterparty level with established concentration limits that are reviewed and revised periodically as deemed appropriate by management. Industry and counterparty limits, as measured in terms of exposure and economic risk appetite, are subject to stress-based loss constraints. Wrong-way risk is the risk that exposure to a counterparty is positively correlated with the impact of a default by the same counterparty, which could cause exposure to increase at the same time as the counterparty's capacity to meet its obligations is decreasing.

Management of the Firm's wholesale credit risk exposure is accomplished through a number of means, including:

- Loan underwriting and credit approval processes
- Loan syndications and participations
- Loan sales and securitizations
- Credit derivatives
- Master netting agreements, and
- Collateral and other risk-reduction techniques

In addition to Credit Risk Management, an independent Credit Review function is responsible for:

- Independently validating or changing the risk grades assigned to exposures in the Firm's wholesale credit portfolio, and assessing the timeliness of risk grade changes initiated by responsible business units; and
- Evaluating the effectiveness of the credit management processes of the LOBs and Corporate, including the adequacy of credit analyses and risk grading/loss given default ("LGD") rationales, proper monitoring and management of credit exposures, and compliance with applicable grading policies and underwriting guidelines.

Refer to Note 12 for further discussion of consumer and wholesale Ioans.

## Risk reporting

To enable monitoring of credit risk and effective decisionmaking, aggregate credit exposure, credit quality forecasts, concentration levels and risk profile changes are reported regularly to senior members of Credit Risk Management. Detailed portfolio reporting of industry, clients, counterparties and customers, product and geography are prepared, and the appropriateness of the allowance for credit losses is reviewed by senior management at least on a quarterly basis. Through the risk reporting and governance structure, credit risk trends and limit exceptions are provided regularly to, and discussed with, risk committees, senior management and the Board of Directors.

## CREDIT PORTFOLIO

Credit risk is the risk associated with the default or change in credit profile of a client, counterparty or customer.
In the following tables, total loans include loans retained (i.e., held-for-investment); loans held-for-sale; and certain loans accounted for at fair value. The following tables do not include loans which the Firm accounts for at fair value and classifies as trading assets; refer to Notes 2 and 3 for further information regarding these loans. Refer to Notes 12,28 , and 5 for additional information on the Firm's loans, lending-related commitments and derivative receivables, including the Firm's related accounting policies.
Refer to Note 10 for information regarding the credit risk inherent in the Firm's investment securities portfolio; and refer to Note 11 for information regarding credit risk inherent in the securities financing portfolio. Refer to Consumer Credit Portfolio on pages 110-115 and Note 12 for further discussions of the consumer credit environment and consumer loans. Refer to Wholesale Credit Portfolio on pages 116-126 and Note 12 for further discussions of the wholesale credit environment and wholesale loans.

Total credit portfolio

| December 31, (in millions) | Credit exposure |  |  | Nonperforming ${ }^{(d)(\mathrm{e})}$ |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Liquid securities and other cash collateral held against derivatives | $(23,014)$ | $(10,102)$ |  | NA |  | NA |

(a) Receivables from customers reflect held-for-investment margin loans to brokerage clients in CIB, CCB and AWM; these are reported within accrued interest and accounts receivable on the Consolidated balance sheets.
(b) Represents the net notional amount of protection purchased and sold through credit derivatives and credit-related notes used to manage credit exposures.
(c) Prior-period amount has been revised to conform with the current presentation.
(d) At December 31, 2022 and 2021, nonperforming assets excluded mortgage loans 90 or more days past due and insured by U.S. government agencies of $\$ 302$ million and $\$ 623$ million, respectively. These amounts have been excluded based upon the government guarantee. In addition, the Firm's policy is generally to exempt credit card loans from being placed on nonaccrual status as permitted by regulatory guidance.
(e) At December 31, 2022, and 2021 nonaccrual loans excluded $\$ 119$ million and $\$ 633$ million, respectively, of PPP loans 90 or more days past due and guaranteed by the SBA.

The following table provides information on Firmwide nonaccrual loans to total loans.

| December 31, <br> (in millions, except ratios) | $\mathbf{2 0 2 2}$ |  |  |
| :--- | ---: | ---: | ---: |
| Total nonaccrual loans | $\$$ | $\mathbf{6 , 7 2 0}$ | $\$$ |

| Firmwide nonaccrual loans to total loans <br> outstanding | $\mathbf{0 . 5 9} \%$ |  |  |

The following table provides information about the Firm's net charge-offs and recoveries.

| Year ended December 31, <br> (in millions, except ratios) | $\mathbf{2 0 2 2}$ | 2021 |  |  |
| :--- | ---: | ---: | ---: | ---: |
| Net charge-offs | $\$$ | $\mathbf{2 , 8 5 3}$ | $\$$ | 2,865 |
| Average retained loans | $\mathbf{1 , 0 4 4 , 7 6 5}$ | 965,271 |  |  |
| Net charge-off rates | $\mathbf{0 . 2 7} \%$ | $\mathbf{0 . 3 0} \%$ |  |  |

Customer and client assistance
The Firm provided various forms of assistance to customers and clients impacted by the COVID-19 pandemic, including payment deferrals and covenant modifications. Assistance provided in response to the COVID-19 pandemic could delay the recognition of delinquencies, nonaccrual status, and net charge-offs for those customers and clients who would have otherwise moved into past due or nonaccrual status. Refer to Notes 12 and 13 for further information on the Firm's accounting policies for loan modifications and the allowance for credit losses.

Paycheck Protection Program ("PPP")
The PPP, implemented by the Small Business
Administration ("SBA"), provided the Firm with delegated authority to process and originate PPP loans. When certain criteria are met, PPP Ioans are subject to forgiveness and the Firm will receive payment of the forgiveness amount from the SBA. The PPP ended for new applications on May 31, 2021.
At December 31, 2022 and 2021, the Firm had $\$ 490$ million and $\$ 6.7$ billion, respectively, of PPP loans, including $\$ 350$ million and $\$ 5.4$ billion, respectively, in consumer, and $\$ 140$ million and $\$ 1.3$ billion, respectively, in wholesale.
At December 31, 2022 and 2021, $\$ 119$ million and $\$ 633$ million, respectively, of PPP loans 90 or more days past due have been excluded from the Firm's nonaccrual loans as they are guaranteed by the SBA. Refer to Note 12 for additional information.

CONSUMER CREDIT PORTFOLIO
The Firm's retained consumer portfolio consists primarily of
residential real estate loans, credit card loans, scored auto
and business banking loans, as well as associated lending-
related commitments. The Firm's focus is on serving
primarily the prime segment of the consumer credit market.
Originated mortgage loans are retained in the residential
real estate portfolio, securitized or sold to U.S. government
agencies and U.S. government-sponsored enterprises; other
types of consumer loans are typically retained on the
balance sheet. Refer to Note 12 for further information on
the consumer loan portfolio. Refer to Note 28 for further
information on lending-related commitments.

The following tables present consumer credit-related information with respect to the scored credit portfolio held in CCB, AWM, CIB and Corporate.

Consumer credit portfolio

(a) Includes scored mortgage and home equity loans held in CCB and AWM, and scored mortgage loans held in Corporate.
(b) At December 31, 2022 and 2021, excluded operating lease assets of $\$ 12.0$ billion and $\$ 17.1$ billion, respectively. These operating lease assets are included in other assets on the Firm's Consolidated balance sheets. Refer to Note 18 for further information.
(c) Includes scored auto and business banking loans and overdrafts.
(d) At December 31, 2022 and 2021, included $\$ 350$ million and $\$ 5.4$ billion of loans, respectively, in Business Banking under the PPP. The Firm does not expect to realize material credit losses on PPP loans because the loans are guaranteed by the SBA. Refer to Credit Portfolio on pages 108-109 for a further discussion of the PPP.
(e) Includes scored mortgage loans held in CCB and CIB.
(f) Credit card, home equity and certain business banking lending-related commitments represent the total available lines of credit for these products. The Firm has not experienced, and does not anticipate, that all available lines of credit would be used at the same time. For credit card commitments, and if certain conditions are met, home equity commitments and certain business banking commitments, the Firm can reduce or cancel these lines of credit by providing the borrower notice or, in some cases as permitted by law, without notice. Refer to Note 28 for further information.
(g) Includes billed interest and fees.
(h) Also includes commercial card lending-related commitments primarily in CB and CIB.
(i) Represents the notional amount of protection obtained through the issuance of credit-related notes that reference certain pools of residential real estate and auto loans in the retained consumer portfolio.
(j) At December 31, 2022 and 2021, nonaccrual loans excluded mortgage loans 90 or more days past due and insured by U.S. government agencies of $\$ 302$ million and $\$ 623$ million, respectively. These amounts have been excluded from nonaccrual loans based upon the government guarantee. In addition, the Firm's policy is generally to exempt credit card loans from being placed on nonaccrual status, as permitted by regulatory guidance.
(k) Generally excludes loans under payment deferral programs offered in response to the COVID-19 pandemic.
(I) At December 31, 2022 and 2021, nonaccrual loans excluded $\$ 101$ million and $\$ 506$ million, respectively, of PPP loans 90 or more days past due and guaranteed by the SBA.
(m) Average consumer loans held-for-sale and loans at fair value were $\$ 17.4$ billion and $\$ 29.1$ billion for the years ended December 31, 2022 and 2021, respectively. These amounts were excluded when calculating net charge-off/(recovery) rates.

## Management's discussion and analysis

Maturities and sensitivity to changes in interest rates
The table below sets forth loan maturities by scheduled repayments, by class of loan and the distribution between fixed and floating interest rates based on the stated terms of the loan agreements. Effective December 31, 2022, the Firm revised its methodology from contractual maturities to scheduled repayments. The Firm estimated the principal repayment amounts for both the residential real estate and auto and other loan classes by calculating the weighted-average loan balance and interest rates for loan pools based on remaining loan term.

(a) Credit card loans with maturities greater than one year represent TDRs and are at fixed interest rates. There are no credit card loans due after one year at variable interest rates.
(b) Includes loans held-for-sale and loans at fair value.
(c) Includes overdrafts.

## Consumer, excluding credit card

## Portfolio analysis

Loans decreased from December 31, 2021 driven by residential real estate loans at fair value and auto and other loans, largely offset by higher retained residential real estate loans.

The following discussions provide information concerning individual Ioan products. Refer to Note 12 for further information about this portfolio, including information about delinquencies, loan modifications and other credit quality indicators.
Residential real estate: The residential real estate portfolio, including loans held-for-sale and loans at fair value, predominantly consists of prime mortgage loans and home equity lines of credit.
Retained loans increased compared to December 31, 2021 reflecting originations, net of paydowns. Retained nonaccrual loans decreased from December 31, 2021 reflecting improved credit performance and loan sales. Net recoveries were lower for the year ended December 31, 2022 compared to the prior year driven by lower prepayments due to higher interest rates, partially offset by lower gross charge-offs.
Loans at fair value decreased from December 31, 2021, as warehouse loan sales in Home Lending outpaced originations due to higher interest rates and loan sales in CIB outpaced loan purchase activity. Nonaccrual Ioans at fair value decreased from December 31, 2021 driven by net portfolio activity in CIB.
The carrying value of home equity lines of credit outstanding was $\$ 15.7$ billion at December 31, 2022. This amount included $\$ 5.1$ billion of HELOCs that have recast from interest-only to fully amortizing payments or have been modified and $\$ 5.0$ billion of interest-only balloon HELOCs, which primarily mature after 2030. The Firm manages the risk of HELOCs during their revolving period by closing or reducing the undrawn line to the extent permitted by law when borrowers are exhibiting a material deterioration in their credit risk profile.
At December 31, 2022 and 2021, the carrying value of interest-only residential mortgage loans were $\$ 36.3$ billion and $\$ 30.0$ billion, respectively. These loans have an interest-only payment period generally followed by an adjustable-rate or fixed-rate fully amortizing payment period to maturity and are typically originated as higherbalance loans to higher-income borrowers, predominantly in AWM. The interest-only residential mortgage Ioan portfolio reflected net recoveries for the year ended December 31, 2022. The credit performance of this portfolio is comparable with the performance of the broader prime mortgage portfolio.

The following table provides a summary of the Firm's residential mortgage portfolio insured and/or guaranteed by U.S. government agencies, predominantly loans held-forsale and loans at fair value. The Firm monitors its exposure to certain potential unrecoverable claim payments related to government-insured loans and considers this exposure in estimating the allowance for loan losses.

| (in millions) | December 31, <br> 2022 | December 31, <br> 2021 |  |  |
| :--- | ---: | ---: | ---: | ---: |
| Current | $\$$ | $\mathbf{6 5 9}$ | $\$$ | 689 |
| 30-89 days past due |  | $\mathbf{1 3 6}$ | 135 |  |
| 90 or more days past due | $\mathbf{3 0 2}$ | 623 |  |  |
| Total government guaranteed loans | $\$$ | $\mathbf{1 , 0 9 7}$ | $\$$ | 1,447 |

Geographic composition and current estimated loan-tovalue ratio of residential real estate loans At December 31, 2022, $\$ 152.7$ billion, or $64 \%$ of the total retained residential real estate loan portfolio, excluding mortgage loans insured by U.S. government agencies, were concentrated in California, New York, Florida, Texas and Illinois, compared with $\$ 145.5$ billion, or $65 \%$ at December 31, 2021.
Average current estimated loan-to-value ("LTV") ratios were relatively flat.
Refer to Note 12 for information on the geographic composition and current estimated LTVs of the Firm's residential real estate loans.

Modified residential real estate Ioans
The following table presents information relating to modified retained residential real estate loans for which concessions have been granted to borrowers experiencing financial difficulty, which include both TDRs and modified PCD loans not accounted for as TDRs. The following table does not include loans with short-term or other insignificant modifications that are not considered concessions and, therefore, are not TDRs. Refer to Note 12 for further information on modifications for the years ended December 31, 2022 and 2021.

| (in millions) | December 31, <br> 2022 | December 31, <br> 2021 |  |
| :--- | ---: | ---: | ---: |
| Retained loans | $\$$ | $\mathbf{1 1 , 5 7 9}$ | $\$$ |
| Nonaccrual retained loans ${ }^{(\text {a })}$ |  | $\mathbf{3 , 3 0 0}$ | 3,251 |

(a) At both December 31, 2022 and 2021, nonaccrual loans included $\$ 2.7$ billion of TDRs for which the borrowers were less than 90 days past due. Refer to Note 12 for additional information about loans modified in a TDR that are on nonaccrual status.

## Management's discussion and analysis

Auto and other: The auto and other loan portfolio, including loans at fair value consists of prime-quality scored auto and business banking loans, as well as overdrafts. The portfolio decreased when compared with December 31, 2021 due to paydowns of scored Auto loans and PPP Ioan forgiveness in Business Banking predominantly offset by originations of scored Auto loans. Net charge-offs for the year ended December 31, 2022 increased compared to the prior year due to higher scored Auto and overdraft chargeoffs, as the prior year benefited from government stimulus and payment assistance programs. The scored Auto net charge-off rates were $0.24 \%$ and $0.04 \%$ for the years ended December 31, 2022 and 2021, respectively.

## Nonperforming assets

The following table presents information as of December 31, 2022 and 2021, about consumer, excluding credit card, nonperforming assets.

| Nonperforming assets ${ }^{(\mathrm{a})}$ |  |  |  |
| :--- | ---: | ---: | ---: |
| December 31, (in millions) | $\mathbf{2 0 2 2}$ | 2021 |  |
| Nonaccrual loans | $\mathbf{\$}$ | $\mathbf{4 , 1 9 6}$ | $\$$ |
| Residential real estate $^{(\mathrm{b})}$ | 5,231 |  |  |
| Auto and other ${ }^{(\mathrm{c})}$ | $\mathbf{1 2 9}$ | 119 |  |
| Total nonaccrual loans | $\mathbf{4 , 3 2 5}$ | 5,350 |  |
| Assets acquired in loan satisfactions |  |  |  |
| Real estate owned | $\mathbf{1 2 9}$ | 112 |  |
| Other | $\mathbf{2 8}$ | 22 |  |
| Total assets acquired in loan satisfactions | $\mathbf{1 5 7}$ | $\mathbf{1 3 4}$ |  |
| Total nonperforming assets | $\mathbf{\$}$ | $\mathbf{4 , 4 8 2}$ | $\$$ |

(a) At December 31, 2022 and 2021, nonperforming assets excluded mortgage loans 90 or more days past due and insured by U.S. government agencies of $\$ 302$ million and $\$ 623$ million, respectively. These amounts have been excluded based upon the government guarantee.
(b) Generally excludes loans under payment deferral programs offered in response to the COVID-19 pandemic.
(c) At December 31, 2022 and 2021, nonaccrual loans excluded \$101 million and $\$ 506$ million, respectively, of PPP loans 90 or more days past due and guaranteed by the SBA.

## Nonaccrual loans

The following table presents changes in consumer, excluding credit card, nonaccrual loans for the years ended December 31, 2022 and 2021.

Nonaccrual loan activity

| Year ended December 31, <br> (in millions) |  |  |  |
| :--- | ---: | ---: | ---: |
| Beginning balance | $\mathbf{2 0 2 2}$ | $\mathbf{2 0 2 1}$ |  |
| Additions: | $\mathbf{5 , 3 5 0}$ | $\$$ | 6,467 |
| Reductions: | $\mathbf{2 , 1 9 6}$ | 2,956 |  |
| $\quad$ Principal payments and other ${ }^{(\mathrm{a})}$ |  |  |  |
| Charge-offs | $\mathbf{1 , 3 9 3}$ | 2,018 |  |
| Returned to performing status | $\mathbf{2 5 5}$ | 229 |  |
| Foreclosures and other liquidations | $\mathbf{1 , 4 0 5}$ | 1,716 |  |
| Total reductions | $\mathbf{1 6 8}$ | 110 |  |
| Net changes | $\mathbf{3 , 2 2 1}$ | 4,073 |  |
| Ending balance | $\mathbf{( 1 , 0 2 5 )}$ | $\mathbf{( 1 , 1 1 7 )}$ |  |

(a) Other reductions include loan sales.

Refer to Note 12 for further information about the consumer credit portfolio, including information about delinquencies, other credit quality indicators, loan modifications and loans that were in the process of active or suspended foreclosure.
Purchased credit deteriorated ("PCD") loans
The following tables provide credit-related information for PCD loans which are reported in residential real estate.

| (in millions, except ratios) | $\begin{array}{r} \text { December 31, } \\ 2022 \end{array}$ |  | December 31, 2021 |  |
| :---: | :---: | :---: | :---: | :---: |
| Loan delinquency ${ }^{\text {(a) }}$ |  |  |  |  |
| Current | \$ | 10,910 | \$ | 12,746 |
| 30-149 days past due |  | 347 |  | 331 |
| 150 or more days past due |  | 277 |  | 664 |
| Total PCD loans | \$ | 11,534 | \$ | 13,741 |
| \% of $30+$ days past due to total retained PCD loans |  | 5.41 \% |  | 7.24 \% |
| Nonaccrual loans | \$ | 1,200 | \$ | 1,616 |
| Year ended December 31, (in millions, except ratios) |  | 2022 |  | 2021 |
| Net charge-offs/(recoveries) | \$ | (11) | \$ | 15 |
| Net charge-off/(recovery) rate |  | (0.09)\% |  | 0.10 \% |

(a) At December 31, 2022 and 2021, loans under payment deferral programs offered in response to the COVID-19 pandemic which are still within their deferral period and performing according to their modified terms are generally not considered delinquent.

## Credit card

Total credit card loans increased from December 31, 2021 driven by growth in balances on higher consumer spending and net new originations. The December 31, 2022 30+ and $90+$ day delinquency rates of $1.45 \%$ and $0.68 \%$, respectively, increased compared to the December 31, $202130+$ and 90+ day delinquency rates of $1.04 \%$ and $0.50 \%$, but remain below pre-pandemic levels. Net chargeoffs decreased for the year ended December 31, 2022 compared to the prior year. Delinquency and net charge-off rates continue to benefit from the ongoing financial strength of U.S. consumers. However, median deposit balances declined in the second half of 2022, impacted by the growth in consumer spending.
Consistent with the Firm's policy, all credit card Ioans typically remain on accrual status until charged off. However, the Firm's allowance for loan losses includes the estimated uncollectible portion of accrued and billed interest and fee income.

Geographic and FICO composition of credit card loans At December 31, 2022, $\$ 85.4$ billion, or $46 \%$ of the total retained credit card loan portfolio, was concentrated in California, Texas, New York, Florida and Illinois, compared with $\$ 70.5$ billion, or $46 \%$, at December 31, 2021.

## Modifications of credit card loans

At December 31, 2022, the Firm had $\$ 796$ million of credit card loans outstanding that have been modified in TDRs, compared to $\$ 1.0$ billion at December 31, 2021. These TDRs do not include loans with short-term or other insignificant modifications that are not considered TDRs.

Refer to Note 12 for further information about this portfolio, including information about delinquencies, geographic and FICO composition, and modifications.

# Management's discussion and analysis 

## WHOLESALE CREDIT PORTFOLIO

In its wholesale businesses, the Firm is exposed to credit risk primarily through its underwriting, lending, marketmaking, and hedging activities with and for clients and counterparties, as well as through various operating services (such as cash management and clearing activities), securities financing activities and cash placed with banks. A portion of the loans originated or acquired by the Firm's wholesale businesses is generally retained on the balance sheet. The Firm distributes a significant percentage of the loans that it originates into the market as part of its syndicated loan business and to manage portfolio concentrations and credit risk. The wholesale portfolio is actively managed, in part by conducting ongoing, in-depth reviews of client credit quality and transaction structure, inclusive of collateral where applicable, and of industry, product and client concentrations. Refer to the industry discussion on pages 118-121 for further information.
The Firm's wholesale credit portfolio includes exposure held in CIB, CB, AWM, and Corporate, as well as the risk-rated BWM and auto dealer exposure held in CCB, for which the wholesale methodology is applied when determining the allowance for loan losses.

In 2022, wholesale credit continued to perform well with charge-offs remaining low.

As of December 31, 2022, retained loans increased by $\$ 43.3$ billion driven by CIB and CB, including higher revolver utilization, partially offset by a decline in AWM. Lending-related commitments decreased $\$ 14.5$ billion, driven by net portfolio activity in CIB, including a decrease in held-for-sale positions in the bridge financing portfolio, largely offset by net portfolio activity in AWM and CB.

As of December 31, 2022, the investment-grade percentage of the portfolio remained relatively flat at 70\%, while criticized exposure decreased by $\$ 6.9$ billion from $\$ 38.2$ billion to $\$ 31.3$ billion. As of December 31, 2022, nonperforming exposure decreased by $\$ 406.0$ million driven by a decline in lending-related commitments in CIB and loans in AWM as a result of client-specific upgrades, paydowns and cancelled commitments, largely offset by client-specific downgrades in CIB including downgrades to certain Russia and Russia-associated clients in the first quarter of 2022. Refer to Business Developments on page 50 and Country Risk on pages 139-140 for additional information. Refer to Wholesale credit exposure - industry exposures on pages 118-121 for additional information.

Wholesale credit portfolio

| December 31, (in millions) | Credit exposure |  | Nonperforming |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 2022 | 2021 | 2022 | 2021 |
| Loans retained | \$ 603,670 | \$ 560,354 | \$ 1,963 | \$ 2,054 |
| Loans held-for-sale | 3,352 | 7,401 | 26 | 48 |
| Loans at fair value | 32,075 | 32,357 | 406 | 343 |
| Loans | 639,097 | 600,112 | 2,395 | 2,445 |
| Derivative receivables | 70,880 | 57,081 | 296 | 316 |
| Receivables from customers ${ }^{\text {a }}$ | 49,257 | 59,645 | - | - |
| Total wholesale credit-related assets | 759,234 | 716,838 | 2,691 | 2,761 |
| Assets acquired in loan satisfactions |  |  |  |  |
| Real estate owned | NA | NA | 74 | 101 |
| Other | NA | NA | - | - |
| Total assets acquired in loan satisfactions | NA | NA | 74 | 101 |
| Lending-related commitments | 471,980 | 486,445 | 455 | 764 |
| Total wholesale credit portfolio | \$1,231,214 \$1,203,283 |  | \$ 3,220 | \$ 3,626 |
| Credit derivatives and credit-related notes used in credit portfolio management activities ${ }^{(b)}$ | \$ $(18,143)$ | \$ $(18,711)^{(c)}$ | \$ | \$ |
| Liquid securities and other cash collateral held against derivatives | $(23,014)$ | $(10,102)$ | NA | NA |

(a) Receivables from customers reflect held-for-investment margin loans to brokerage clients in CIB, CCB and AWM; these are reported within accrued interest and accounts receivable on the Consolidated balance sheets.
(b) Represents the net notional amount of protection purchased and sold through credit derivatives and credit-related notes used to manage both performing and nonperforming wholesale credit exposures; these derivatives do not qualify for hedge accounting under U.S. GAAP. Refer to Credit derivatives on page 126 and Note 5 for additional information.
(c) Prior-period amounts have been revised to conform with the current presentation.

## Wholesale credit exposure - maturity and ratings profile

The following tables present the maturity and internal risk ratings profiles of the wholesale credit portfolio as of December 31, 2022 and 2021. The Firm generally considers internal ratings with qualitative characteristics equivalent to BBB-/Baa3 or higher as investment grade, and takes into consideration collateral and structural support when determining the internal risk rating for each credit facility. Refer to Note 12 for further information on internal risk ratings.

(a) Loans held-for-sale are primarily related to syndicated loans and loans transferred from the retained portfolio.
(b) These derivatives do not qualify for hedge accounting under U.S. GAAP.
(c) The notional amounts are presented on a net basis by underlying reference entity and the ratings profile shown is based on the ratings of the reference entity on which protection has been purchased. Predominantly all of the credit derivatives entered into by the Firm where it has purchased protection used in credit portfolio management activities are executed with investment-grade counterparties. In addition, the Firm obtains credit protection against certain loans in the retained loan portfolio through the issuance of credit-related notes.
(d) Prior-period amounts have been revised to conform with the current presentation.
(e) The maturity profile of retained loans, lending-related commitments and derivative receivables is generally based on remaining contractual maturity. Derivative contracts that are in a receivable position at December 31, 2022, may become payable prior to maturity based on their cash flow profile or changes in market conditions.

## Management's discussion and analysis

Wholesale credit exposure - industry exposures
The Firm focuses on the management and diversification of its industry exposures, and pays particular attention to industries with actual or potential credit concerns.

Exposures that are deemed to be criticized align with the U.S. banking regulators' definition of criticized exposures, which consist of the special mention, substandard and doubtful categories. Total criticized exposure, excluding loans held-for-sale and loans at fair value, was $\$ 31.3$ billion at December 31, 2022 and $\$ 38.2$ billion at December 31, 2021, representing approximately $2.7 \%$ and $3.5 \%$ of total wholesale credit exposure, respectively. Criticized exposure decreased driven by net portfolio activity and client-specific upgrades concentrated in Consumer \& Retail, Technology, Media \& Telecommunications and Real Estate, largely offset by client-specific downgrades. Of the $\$ 31.3$ billion of criticized exposure at December 31, 2022, approximately half was undrawn and $\$ 28.6$ billion was performing.

The table below summarizes by industry the Firm's exposures as of December 31, 2022 and 2021. The industry of risk category is generally based on the client or counterparty's primary business activity. Refer to Note 4 for additional information on industry concentrations.

(a) The industry rankings presented in the table as of December 31, 2021, are based on the industry rankings of the corresponding exposures at December 31, 2022, not actual rankings of such exposures at December 31, 2021.
(b) Individuals and Individual Entities predominantly consists of Global Private Bank clients within AWM and J.P. Morgan Wealth Management within CCB, and includes exposure to personal investment companies and personal and testamentary trusts.
(c) In addition to the credit risk exposure to states and municipal governments (both U.S. and non-U.S.) at December 31, 2022 and 2021 , noted above, the Firm held: $\$ 6.6$ billion and $\$ 7.1$ billion, respectively, of trading assets; $\$ 6.8$ billion and $\$ 15.9$ billion, respectively, of AFS securities; and $\$ 19.7$ billion and $\$ 14.0$ billion, respectively, of HTM securities, issued by U.S. state and municipal governments. Refer to Note 2 and Note 10 for further information.
(d) All other includes: SPEs and Private education and civic organizations, representing approximately $95 \%$ and $5 \%$, respectively, at December 31,2022 and 94\% and 6\%, respectively, at December 31, 2021.
(e) Excludes cash placed with banks of $\$ 556.6$ billion and $\$ 729.6$ billion, at December 31, 2022 and 2021, respectively, which is predominantly placed with various central banks, primarily Federal Reserve Banks.
(f) Credit exposure is net of risk participations and excludes the benefit of credit derivatives and credit-related notes used in credit portfolio management activities held against derivative receivables or loans and liquid securities and other cash collateral held against derivative receivables.
(g) Credit exposure includes held-for-sale and fair value option elected lending-related commitments.
(h) Represents the net notional amounts of protection purchased and sold through credit derivatives and credit-related notes used to manage the credit exposures; these derivatives do not qualify for hedge accounting under U.S. GAAP. The All other category includes purchased credit protection on certain credit indices.
(i) Prior-period amounts have been revised to conform with the current presentation.

## Management's discussion and analysis

Presented below is additional detail on certain of the Firm's industry exposures.

## Real Estate

Real Estate exposure was $\$ 170.9$ billion as of December 31, 2022. Criticized exposure decreased by $\$ 1.2$ billion from $\$ 5.3$ billion at December 31, 2021 to $\$ 4.0$ billion at December 31, 2022, driven by client-specific upgrades and net portfolio activity largely offset by client-specific downgrades.

| (in millions, except ratios) | December 31, 2022 |  |  |  |  |  |  |  |

| Total Real Estate Exposure | \$ | 153,956 | \$ | 1,113 | \$ | 155,069 | 77 \% | 77 \% |

(a) Multifamily exposure is largely in California.
(b) Other Income Producing Properties consists of clients with diversified property types or other property types outside of categories listed in the table above
(c) Real Estate exposure is approximately $79 \%$ secured; unsecured exposure is approximately $77 \%$ investment-grade.
(d) Represents drawn exposure as a percentage of credit exposure.

## Consumer \& Retail

Consumer \& Retail exposure was $\$ 120.6$ billion as of December 31, 2022. Criticized exposure decreased by $\$ 1.9$ billion from $\$ 9.9$ billion at December 31, 2021 to $\$ 7.9$ billion at December 31, 2022, driven by net portfolio activity and client-specific upgrades largely offset by client-specific downgrades.

| Total Consumer \& Retail | \$ | 120,120 | \$ | 2,669 | \$ | 122,789 | 49 \% | 32 \% |

(a) Retail consists of Home Improvement \& Specialty Retailers, Restaurants, Supermarkets, Discount \& Drug Stores, Specialty Apparel and Department Stores.
(b) Leisure consists of Gaming, Arts \& Culture, Travel Services and Sports \& Recreation. As of December 31, 2022, approximately $90 \%$ of the noninvestmentgrade Leisure portfolio is secured.
(c) Consumer \& Retail exposure is approximately 58\% secured; unsecured exposure is approximately $80 \%$ investment-grade.
(d) Represents drawn exposure as a percent of credit exposure.

## Oil \& Gas

Oil \& Gas exposure was $\$ 38.7$ billion as of December 31, 2022. Criticized exposure decreased by $\$ 1.2$ billion from $\$ 1.7$ billion at December 31, 2021 to $\$ 505$ million at December 31, 2022, driven by net portfolio activity and client-specific upgrades partially offset by client-specific downgrades.

| (in millions, except ratios) | December 31, 2022 |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Exploration \& Production ("E\&P") and Oil field Services | \$ | 17,631 | \$ | 5,452 | \$ | 23,083 | 39 \% | 26 \% |
| Other Oil \& Gas ${ }^{(1)}$ |  | 18,941 |  | 582 |  | 19,523 | 60 | 26 |
| Total Oil \& Gas | \$ | 36,572 | \$ | 6,034 | \$ | 42,606 | 49 \% | 26 \% |

(a) Other Oil \& Gas includes Integrated Oil \& Gas companies, Midstream/Oil Pipeline companies and refineries.
(b) Oil \& Gas exposure is approximately $41 \%$ secured, over half of which is reserve-based lending to the Exploration \& Production sub-sector; unsecured exposure is approximately $61 \%$ investment-grade.
(c) Represents drawn exposure as a percent of credit exposure.

## Loans

In its wholesale businesses, the Firm provides loans to a variety of clients, ranging from large corporate and institutional clients to high-net-worth individuals. Refer to Note 12 for a further discussion on loans, including information about delinquencies, loan modifications and other credit quality indicators.
The following table presents the change in the nonaccrual Ioan portfolio for the years ended December 31, 2022 and 2021. Since December 31, 2021, nonaccrual loan exposure decreased by $\$ 50$ million driven by Individuals and Individual Entities and Transportation due to client-specific upgrades and net portfolio activity, largely offset by Consumer \& Retail due to client-specific downgrades.

Wholesale nonaccrual loan activity

| Year ended December 31, (in millions) | 2022 | 2021 |  |
| :--- | ---: | ---: | ---: |
| Beginning balance | $\$$ | $\mathbf{2 , 4 4 5}$ | $\$$ |
| Additions | $\mathbf{2 , 1 1 9}$ |  |  |
| Reductions: |  | 2,909 |  |
| Paydowns and other | $\mathbf{1 , 3 2 9}$ | 2,676 |  |
| Gross charge-offs | $\mathbf{2 1 3}$ | 268 |  |
| Returned to performing status | $\mathbf{5 9 4}$ | 1,106 |  |
| Sales | $\mathbf{3 3}$ | 520 |  |
| Total reductions | $\mathbf{2 , 1 6 9}$ | 4,570 |  |
| Net changes |  | $\mathbf{( 5 0 )}$ | $(1,661)$ |
| Ending balance | $\mathbf{2 , 3 9 5}$ | $\$$ | 2,445 |

The following table presents net charge-offs/recoveries, which are defined as gross charge-offs less recoveries, for the years ended December 31, 2022 and 2021. The amounts in the table below do not include gains or losses from sales of nonaccrual loans recognized in noninterest revenue.
Wholesale net charge-offs/(recoveries)

| Year ended December 31, <br> (in millions, except ratios) | $\mathbf{2 0 2 2}$ | 2021 |
| :--- | :---: | :---: |
| Loans | $\mathbf{5 8 2 , 0 2 1}$ | $\$ 526,557$ |
| Average loans retained | $\mathbf{3 2 2}$ | 283 |
| Gross charge-offs | $\mathbf{( 1 4 1 )}$ | $\mathbf{( 1 4 1 )}$ |
| Gross recoveries collected | $\mathbf{1 8 1}$ | 142 |
| Net charge-offs/(recoveries) | $\mathbf{0 . 0 3} \%$ | $0.03 \%$ |
| Net charge-off/(recovery) rate |  |  |

## Maturities and sensitivity to changes in interest rates

The table below sets forth wholesale loan maturities and the distribution between fixed and floating interest rates based on the stated terms of the loan agreements by loan class. Effective December 31, 2022, the Firm revised its methodology from contractual maturities to scheduled repayments. Refer to Note 12 for further information on Ioan classes.

| December 31, 2022 <br> (in millions, except ratios) | $\begin{gathered} 1 \text { year or } \\ \text { less }^{(a)} \end{gathered}$ | After 1 year through 5 years |  | After 5 years through 15 years |  | fter 15 years | Total |

| Other | 166,967 | 122,062 |  | 32,291 |  | 4,014 | 325,334 |
| Total wholesale loans | \$ 230,650 | \$ 280,945 | \$ | 82,018 | \$ | 45,484 | \$ 639,097 |
| Loans due after one year at fixed interest rates |  |  |  |  |  |  |  |
| Secured by real estate |  | \$ 6,087 | \$ | 6,387 | \$ | 724 |  |
| Commercial and industrial |  | 5,432 |  | 1,107 |  | 4 |  |
| Other |  | 23,303 |  | 14,792 |  | 2,786 |  |
| Loans due after one year at variable interest rates |  |  |  |  |  |  |  |
| Secured by real estate |  | \$ 36,972 | \$ | 34,847 | \$ | 40,553 |  |
| Commercial and industrial |  | 110,391 |  | 7,387 |  | 189 |  |
| Other |  | 98,760 |  | 17,498 |  | 1,228 |  |
| Total wholesale loans |  | \$ 280,945 | \$ | 82,018 | \$ | 45,484 |  |

(a) Includes loans held-for-sale, demand loans and overdrafts.

The following table presents net charge-offs/recoveries, average retained loans and net charge-off/recovery rate by loan class for the year ended December 31, 2022 and 2021.

## Management's discussion and analysis

## Lending-related commitments

The Firm uses lending-related financial instruments, such as commitments (including revolving credit facilities) and guarantees, to address the financing needs of its clients. The contractual amounts of these financial instruments represent the maximum possible credit risk should the clients draw down on these commitments or when the Firm fulfills its obligations under these guarantees, and the clients subsequently fail to perform according to the terms of these contracts. Most of these commitments and guarantees have historically been refinanced, extended, cancelled, or expired without being drawn upon or a default occurring. As a result, the Firm does not believe that the total contractual amount of these wholesale lending-related commitments is representative of the Firm's expected future credit exposure or funding requirements. Refer to Note 28 for further information on wholesale lendingrelated commitments.

## Receivables from customers

Receivables from customers reflect held-for-investment margin loans to brokerage clients in CIB, CCB and AWM that are collateralized by assets maintained in the clients' brokerage accounts (e.g., cash on deposit, and liquid and readily marketable debt or equity securities). Because of this collateralization, no allowance for credit losses is generally held against these receivables. To manage its credit risk, the Firm establishes margin requirements and monitors the required margin levels on an ongoing basis, and requires clients to deposit additional cash or other collateral, or to reduce positions, when appropriate. These receivables are reported within accrued interest and accounts receivable on the Firm's Consolidated balance sheets.

## Derivative contracts

Derivatives enable clients and counterparties to manage risk, including credit risk and risks arising from fluctuations in interest rates, foreign exchange and equities and commodities prices. The Firm makes markets in derivatives in order to meet these needs and uses derivatives to manage certain risks associated with net open risk positions from its market-making activities, including the counterparty credit risk arising from derivative receivables. The Firm also uses derivative instruments to manage its own credit risk and other market risk exposure. The nature of the counterparty and the settlement mechanism of the derivative affect the credit risk to which the Firm is exposed. For OTC derivatives, the Firm is exposed to the credit risk of the derivative counterparty. For exchange-traded derivatives ("ETD"), such as futures and options, and cleared over-the-counter ("OTC-cleared") derivatives, the Firm can also be exposed to the credit risk of the relevant CCP. Where possible, the Firm seeks to mitigate its credit risk exposures arising from derivative contracts through the use of legally enforceable master netting arrangements and collateral agreements. The percentage of the Firm's OTC derivative transactions subject to collateral agreements excluding foreign exchange spot trades, which are not typically covered by collateral agreements due to their short
maturity and centrally cleared trades that are settled daily was approximately $87 \%$ and $88 \%$ at December 31, 2022 and 2021, respectively. Refer to Note 5 for additional information on the Firm's use of collateral agreements and further discussion of derivative contracts, counterparties and settlement types.
The fair value of derivative receivables reported on the Consolidated balance sheets were $\$ 70.9$ billion and $\$ 57.1$ billion at December 31, 2022 and 2021, respectively. The increase was primarily driven by higher foreign exchange as a result of market movements. Derivative receivables represent the fair value of the derivative contracts after giving effect to legally enforceable master netting agreements and the related cash collateral held by the Firm.
In addition, the Firm held liquid securities and other cash collateral that may be used as security when the fair value of the client's exposure is in the Firm's favor. For these purposes, the definition of liquid securities is consistent with the definition of high quality liquid assets as defined in the LCR rule.

In management's view, the appropriate measure of current credit risk should also take into consideration other collateral, which generally represents securities that do not qualify as high quality liquid assets under the LCR rule. The benefits of these additional collateral amounts for each counterparty are subject to a legally enforceable master netting agreement and limited to the net amount of the derivative receivables for each counterparty.

The Firm also holds additional collateral (primarily cash, G7 government securities, other liquid government agency and guaranteed securities, and corporate debt and equity securities) delivered by clients at the initiation of transactions, as well as collateral related to contracts that have a non-daily call frequency and collateral that the Firm has agreed to return but has not yet settled as of the reporting date. Although this collateral does not reduce the balances and is not included in the tables below, it is available as security against potential exposure that could arise should the fair value of the client's derivative contracts move in the Firm's favor. Refer to Note 5 for additional information on the Firm's use of collateral agreements.

The following tables summarize the net derivative receivables and the internal ratings profile for the periods presented.
Derivative receivables

| December 31, (in millions) | 2022 | 2021 |  |  |
| :--- | :---: | :---: | :---: | :---: |
| Total, net of cash collateral <br> Liquid securities and other cash <br> collateral held against derivative <br> receivables | $\$$ | $\mathbf{7 0 , 8 8 0}$ | $\$$ | 57,081 |
| Total, net of liquid securities and <br> other cash collateral | $\$$ | $\mathbf{4 7 , 8 6 6}$ | $\$$ | 46,979 |
| Other collateral <br> held against derivative receivables | $\mathbf{( 1 , 2 6 1 )}$ | $(1,544)$ |  |  |
| Total, net of collateral | $\mathbf{4 6 , 6 0 5}$ | $\$$ | $\mathbf{4 5 , 4 3 5}$ |  |

Ratings profile of derivative receivables

| December 31, (in millions, except ratios) | 2022 |  |  | 2021 |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Exposure net of collateral |  | \% of exposure net of collateral | Exposure net of collateral |  | \% of exposure net of collateral |
| Investment-grade | \$ | 35,097 | 75 \% | \$ | 30,278 | 67 \% |
| Noninvestment-grade |  | 11,508 | 25 |  | 15,157 | 33 |
| Total | \$ | 46,605 | 100 \% | \$ | 45,435 | 100 \% |

While useful as a current view of credit exposure, the net fair value of the derivative receivables does not capture the potential future variability of that credit exposure. To capture the potential future variability of credit exposure, the Firm calculates, on a client-by-client basis, three measures of potential derivatives-related credit loss: Peak, Derivative Risk Equivalent ("DRE"), and Average exposure ("AVG"). These measures all incorporate netting and collateral benefits, where applicable.
Peak represents a conservative measure of potential derivative exposure, including the benefit of collateral, to a counterparty calculated in a manner that is broadly equivalent to a $97.5 \%$ confidence level over the life of the transaction. Peak is the primary measure used by the Firm for setting credit limits for derivative contracts, senior management reporting and derivatives exposure management.
DRE exposure is a measure that expresses the risk of derivative exposure, including the benefit of collateral, on a basis intended to be equivalent to the risk of loan exposures. DRE is a less extreme measure of potential credit loss than Peak and is used as an input for aggregating derivative credit risk exposures with loans and other credit risk.
Finally, AVG is a measure of the expected fair value of the Firm's derivative exposure, including the benefit of collateral, at future time periods. AVG over the total life of the derivative contract is used as the primary metric for pricing purposes and is used to calculate credit risk capital and CVA, as further described below.
The fair value of the Firm's derivative receivables incorporates CVA to reflect the credit quality of counterparties. CVA is based on the Firm's AVG to a counterparty and the counterparty's credit spread in the credit derivatives market. The Firm believes that active risk management is essential to controlling the dynamic credit risk in the derivatives portfolio. In addition, the Firm's risk
management process for derivatives exposures takes into consideration the potential impact of wrong-way risk, which is broadly defined as the risk that exposure to a counterparty is positively correlated with the impact of a default by the same counterparty, which could cause exposure to increase at the same time as the counterparty's capacity to meet its obligations is decreasing. Many factors may influence the nature and magnitude of these correlations over time. To the extent that these correlations are identified, the Firm may adjust the CVA associated with a particular counterparty's AVG. The Firm risk manages exposure to changes in CVA by entering into credit derivative contracts, as well as interest rate, foreign exchange, equity and commodity derivative contracts.
The below graph shows exposure profiles to the Firm's current derivatives portfolio over the next 10 years as calculated by the Peak, DRE and AVG metrics. The three measures generally show that exposure will decline after the first year, if no new trades are added to the portfolio.

Exposure profile of derivatives measures
December 31, 2022
(in billions)

## Management's discussion and analysis

## Credit derivatives

The Firm uses credit derivatives for two primary purposes: first, in its capacity as a market-maker, and second, as an end-user to manage the Firm's own credit risk associated with various exposures.

## Credit portfolio management activities

Included in the Firm's end-user activities are credit derivatives used to mitigate the credit risk associated with traditional lending activities (loans and lending-related commitments) and derivatives counterparty exposure in the Firm's wholesale businesses (collectively, "credit portfolio management activities"). Information on credit portfolio management activities is provided in the table below.

The Firm also uses credit derivatives as an end-user to manage other exposures, including credit risk arising from certain securities held in the Firm's market-making businesses. These credit derivatives are not included in credit portfolio management activities.

Credit derivatives and credit-related notes used in credit portfolio management activities

| December 31, (in millions) | Notional amount of protection purchased and sold ${ }^{(\mathrm{a})}$ |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | 2022 |  | 2021 |  |  |
| Credit derivatives and credit-related notes used to manage: |  |  |  |  |  |
| Loans and lending-related commitments | \$ | 6,422 | \$ | 4,138 |  |
| Derivative receivables |  | 11,721 |  | 14,573 | (b) |
| Credit derivatives and credit-related notes used in credit portfolio management activities | \$ | 18,143 | \$ | 18,711 |  |

(a) Amounts are presented net, considering the Firm's net protection purchased or sold with respect to each underlying reference entity or index.
(b) Prior-period amount has been revised to conform with the current presentation

The credit derivatives used in credit portfolio management activities do not qualify for hedge accounting under U.S. GAAP; these derivatives are reported at fair value, with gains and losses recognized in principal transactions revenue. In contrast, the loans and lending-related commitments being risk-managed are accounted for on an accrual basis. This asymmetry in accounting treatment, between loans and lending-related commitments and the credit derivatives used in credit portfolio management activities, causes earnings volatility that is not representative, in the Firm's view, of the true changes in value of the Firm's overall credit exposure.

The effectiveness of credit default swaps ("CDS") as a hedge against the Firm's exposures may vary depending on a number of factors, including the named reference entity (i.e., the Firm may experience losses on specific exposures that are different than the named reference entities in the purchased CDS); the contractual terms of the CDS (which may have a defined credit event that does not align with an actual loss realized by the Firm); and the maturity of the Firm's CDS protection (which in some cases may be shorter than the Firm's exposures). However, the Firm generally seeks to purchase credit protection with a maturity date that is the same or similar to the maturity date of the exposure for which the protection was purchased, and remaining differences in maturity are actively monitored and managed by the Firm. Refer to Credit derivatives in Note 5 for further information on credit derivatives and derivatives used in credit portfolio management activities.

The Firm's allowance for credit losses represents management's estimate of expected credit losses over the remaining expected life of the Firm's financial assets measured at amortized cost and certain off-balance sheet lending-related commitments. The Firm's allowance for credit losses comprises:

- the allowance for loan losses, which covers the Firm's retained loan portfolios (scored and risk-rated) and is presented separately on the Consolidated balance sheets,
- the allowance for lending-related commitments, which is reflected in accounts payable and other liabilities on the Consolidated balance sheets, and
- the allowance for credit losses on investment securities, which is reflected in investment securities on the Consolidated balance sheets.

## Discussion of changes in the allowance

The allowance for credit losses as of December 31, 2022 was $\$ 22.2$ billion, reflecting a net addition of $\$ 3.5$ billion from December 31, 2021, consisting of:

- $\$ 2.3$ billion in wholesale, driven by deterioration in the Firm's macroeconomic outlook and loan growth, predominantly in CB and CIB, and
- \$1.2 billion in consumer, predominantly driven by Card Services, reflecting higher outstanding balances and deterioration in the Firm's macroeconomic outlook, partially offset by a reduction in the allowance related to a decrease in uncertainty associated with borrower behavior as the effects of the pandemic gradually recede.
Deterioration in the Firm's macroeconomic outlook included both updates to the central scenario in the fourth quarter of 2022, which now reflects a mild recession, as well as the impact of the increased weight placed on the adverse scenarios beginning in the first quarter of 2022 due to the effects associated with higher inflation, changes in monetary policy, and geopolitical risks, including the war in Ukraine.
The Firm's allowance for credit losses is estimated using a weighted average of five internally developed macroeconomic scenarios. The adverse scenarios incorporate more punitive macroeconomic factors than the central case assumptions provided in the table below, resulting in a weighted average U.S. unemployment rate peaking at $5.6 \%$ in the second quarter of 2024 , and a $1.2 \%$ lower U.S. real GDP exiting the second quarter of 2024.

The Firm's central case assumptions reflected U.S. unemployment rates and U.S. real GDP as follows:

|  | Assumptions at December 31, 2022 |  |  |
| :---: | :---: | :---: | :---: |
|  | 2Q23 | 4Q23 | 2Q24 |
| U.S. unemployment rate ${ }^{(a)}$ | 3.8 \% | 4.3 \% | 5.0 \% |
| YoY growth in U.S. real GDP ${ }^{(b)}$ | 1.5 \% | 0.4 \% | - \% |
|  | Assumptions at December 31, 2021 |  |  |
|  | 2Q22 | 4Q22 | 2Q23 |
| U.S. unemployment rate ${ }^{(a)}$ | 4.2 \% | 4.0 \% | 3.9 \% |
| YoY growth in U.S. real GDP ${ }^{(b)}$ | 3.1 \% | 2.8 \% | 2.1 \% |

(a) Reflects quarterly average of forecasted U.S. unemployment rate.
(b) The year over year growth in U.S. real GDP in the forecast horizon of the central scenario is calculated as the percentage change in U.S. real GDP levels from the prior year.

Subsequent changes to this forecast and related estimates will be reflected in the provision for credit losses in future periods.

Refer to Critical Accounting Estimates Used by the Firm on pages 149-152 for further information on the allowance for credit losses and related management judgments. Refer to Consumer Credit Portfolio on pages 110-115, Wholesale Credit Portfolio on pages 116-126 for additional information on the consumer and wholesale credit portfolios.

| Net charge-off rates |  | 0.09 |  | 1.47 |  | 0.03 |  |  | 0.27 |  | - |  | 1.94 |  | 0.03 |  | 0.30 |

(a) Includes collateral dependent loans, including those considered TDRs and those for which foreclosure is deemed probable, modified PCD loans, and noncollateral dependent loans that have been modified or are reasonably expected to be modified in a TDR. Also includes risk-rated loans that have been placed on nonaccrual status for the wholesale portfolio segment. The asset-specific credit card allowance for loan losses modified or reasonably expected to be modified in a TDR is calculated based on the loans' original contractual interest rates and does not consider any incremental penalty rates.
(b) At December 31, 2022, excludes an allowance for credit losses associated with certain accounts receivable in CIB of $\$ 21$ million.
(c) The Firm's policy is generally to exempt credit card loans from being placed on nonaccrual status as permitted by regulatory guidance.

Allocation of allowance for loan losses
The table below presents a breakdown of the allowance for loan losses by loan class. Refer to Note 12 for further information on loan classes.

| December 31, (in millions, except ratios) | 2022 |  |  | 2021 |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

# Management's discussion and analysis 

INVESTMENT PORTFOLIO RISK MANAGEMENT

Investment portfolio risk is the risk associated with the loss of principal or a reduction in expected returns on investments arising from the investment securities portfolio or from principal investments. The investment securities portfolio is predominantly held by Treasury and CIO in connection with the Firm's balance sheet and asset-liability management objectives. Principal investments are predominantly privately-held financial instruments and are managed in the LOBs and Corporate. Investments are typically intended to be held over extended periods and, accordingly, the Firm has no expectation for short-term realized gains with respect to these investments.

Investment securities risk
Investment securities risk includes the exposure associated with a default in the payment of principal and interest. This risk is mitigated given that the investment securities portfolio held by Treasury and CIO predominantly consists of high-quality securities. At December 31, 2022, the Treasury and CIO investment securities portfolio, net of the allowance for credit losses, was $\$ 629.3$ billion, and the average credit rating of the securities comprising the portfolio was AA+ (based upon external ratings where available, and where not available, based primarily upon internal risk ratings). Refer to Corporate segment results on pages 79-80 and Note 10 for further information on the investment securities portfolio and internal risk ratings. Refer to Liquidity Risk Management on pages 97-104 for further information on related liquidity risk. Refer to Market Risk Management on pages 131-138 for further information on the market risk inherent in the portfolio.

## Governance and oversight

Investment securities risks are governed by the Firm's Risk Appetite framework, and reviewed at the CTC Risk Committee with regular updates provided to the Board Risk Committee.
The Firm's independent control functions are responsible for reviewing the appropriateness of the carrying value of investment securities in accordance with relevant policies. Approved levels for investment securities are established for each risk category, including capital and credit risks.

Principal investment risk
Principal investments are typically privately-held financial instruments representing ownership interests or other forms of junior capital. In general, principal investments include tax-oriented investments and investments made to enhance or accelerate the Firm's business strategies and exclude those that are consolidated on the Firm's balance sheets. These investments are made by dedicated investing businesses or as part of a broader business strategy. The Firm's principal investments are managed by the LOBs and Corporate and are reflected within their respective financial results. The Firm's investments will continue to evolve in line with its strategies, including the Firm's commitment to support underserved communities and minority-owned businesses.

The table below presents the aggregate carrying values of the principal investment portfolios as of December 31, 2022 and 2021.

|  | December 31, <br> 2022 | December 31, <br> 2021 |  |  |
| :--- | :--- | :--- | :--- | ---: |
| (in billions) | $\mathbf{2 6 . 2}$ | $\$$ | 23.2 |  |
| Tax-oriented investments, <br> primarily in alternative energy <br> and affordable housing | $\$$ |  |  |  |
| Private equity, various debt and <br> equity instruments, and real <br> assets | $\mathbf{1 0 . 8}$ | (a) |  |  |
| Total carrying value | $\mathbf{3 7 . 0}$ | $\$$ | 30.5 |  |

(a) Includes the Firm's 40\% ownership in C6 Bank and 49\% ownership in Viva Wallet.

## Governance and oversight

The Firm's approach to managing principal risk is consistent with the Firm's risk governance structure. The Firm has established a Firmwide risk policy framework for all principal investing activities that includes approval by executives who are independent from the investing businesses, as appropriate.
The Firm's independent control functions are responsible for reviewing the appropriateness of the carrying value of investments in accordance with relevant policies. As part of the risk governance structure, approved levels for investments are established and monitored for each relevant business or segment in order to manage the overall size of the portfolios. The Firm also conducts stress testing on these portfolios using specific scenarios that estimate losses based on significant market moves and/or other risk events.

Market risk is the risk associated with the effect of changes in market factors such as interest and foreign exchange rates, equity and commodity prices, credit spreads or implied volatilities, on the value of assets and liabilities held for both the short and long term.

## Market Risk Management

Market Risk Management monitors market risks throughout the Firm and defines market risk policies and procedures.
Market Risk Management seeks to manage risk, facilitate efficient risk/return decisions, reduce volatility in operating performance and provide transparency into the Firm's market risk profile for senior management, the Board of Directors and regulators. Market Risk Management is responsible for the following functions:

- Maintaining a market risk policy framework
- Independently measuring, monitoring and controlling LOB, Corporate, and Firmwide market risk
- Defining, approving and monitoring of limits
- Performing stress testing and qualitative risk assessments

## Risk measurement

## Measures used to capture market risk

There is no single measure to capture market risk and therefore Market Risk Management uses various metrics, both statistical and nonstatistical, to assess risk including:

- Value-at-risk (VaR)
- Stress testing
- Profit and loss drawdowns
- Earnings-at-risk
- Other sensitivity-based measures

## Risk monitoring and control

Market risk exposure is managed primarily through a series of limits set in the context of the market environment and business strategy. In setting limits, Market Risk Management takes into consideration factors such as market volatility, product liquidity, accommodation of client business, and management judgment. Market Risk Management maintains different levels of limits. Firm level limits include VaR and stress limits. Similarly, LOB and Corporate limits include VaR and stress limits and may be supplemented by certain nonstatistical risk measures such as profit and loss drawdowns. Limits may also be set within the LOBs and Corporate, as well as at the legal entity level.

Market Risk Management sets limits and regularly reviews and updates them as appropriate. Senior management is responsible for reviewing and approving certain of these risk limits on an ongoing basis. Limits that have not been reviewed within specified time periods by Market Risk Management are reported to senior management. The LOBs and Corporate are responsible for adhering to established limits against which exposures are monitored and reported.
Limit breaches are required to be reported in a timely manner to limit approvers, which include Market Risk Management and senior management. In the event of a breach, Market Risk Management consults with senior members of appropriate groups within the Firm to determine the suitable course of action required to return the applicable positions to compliance, which may include a reduction in risk in order to remedy the breach or granting a temporary increase in limits to accommodate an expected increase in client activity and/or market volatility. Certain Firm, Corporate or LOB-level limit breaches are escalated as appropriate.
Models used to measure market risk are inherently imprecise and are limited in their ability to measure certain risks or to predict losses. This imprecision may be heightened when sudden or severe shifts in market conditions occur. For additional discussion on model uncertainty refer to Estimations and Model Risk Management on page 148.
Market Risk Management periodically reviews the Firm's existing market risk measures to identify opportunities for enhancement, and to the extent appropriate, will calibrate those measures accordingly over time.

## Management's discussion and analysis

The following table summarizes the predominant business activities and related market risks, as well as positions which give rise to market risk and certain measures used to capture those risks, for each LOB and Corporate.

In addition to the predominant business activities, each LOB and Corporate may engage in principal investing activities. To the extent principal investments are deemed market risk sensitive, they are reflected in relevant risk measures and captured in the table below. Refer to Investment Portfolio Risk Management on page 130 for additional discussion on principal investments.

| LOBs and Corporate | Predominant business activities | Related market risks | Positions included in Risk Management VaR | Positions included in earnings-at-risk | Positions included in other sensitivity-based measures |
| :---: | :---: | :---: | :---: | :---: | :---: |
| CCB | - Originates and services mortgage loans <br> - Originates loans and takes deposits | - Risk from changes in the probability of newly originated mortgage commitments closing <br> - Interest rate risk and prepayment risk | - Mortgage commitments, classified as derivatives <br> - Warehouse loans that are fair value option elected, classified as loans - debt instruments <br> - MSRs <br> - Hedges of mortgage commitments, warehouse loans and MSRs, classified as derivatives <br> - Interest-only and mortgagebacked securities, classified as trading assets debt instruments, and related hedges, classified as derivatives <br> - Fair value option elected liabilities ${ }^{(a)}$ | - Retained loan portfolio <br> - Deposits | - Fair value option elected liabilities DVA ${ }^{(a)}$ |
| CIB | - Makes markets and services clients across fixed income, foreign exchange, equities and commodities <br> - Originates loans and takes deposits | - Risk of loss from adverse movements in market prices and implied volatilities across interest rate, foreign exchange, credit, commodity and equity instruments <br> - Basis and correlation risk from changes in the way asset values move relative to one another <br> - Interest rate risk and prepayment risk | - Trading assets/liabilities debt and marketable equity instruments, and derivatives, including hedges of the retained loan portfolio <br> - Certain securities purchased, loaned or sold under resale agreements and securities borrowed <br> - Fair value option elected liabilities ${ }^{(\mathrm{a})}$ <br> - Certain fair value option elected loans <br> - Derivative CVA and associated hedges <br> - Marketable equity investments | - Retained Ioan portfolio <br> - Deposits | - Privately held equity and other investments measured at fair value; and certain real estate-related fair value option elected loans <br> - Derivatives FVA and fair value option elected liabilities DVA(a) <br> - Credit risk component of CVA and associated hedges for counterparties with credit spreads that have widened to elevated levels |
| CB | - Originates loans and takes deposits | - Interest rate risk and prepayment risk | - Marketable equity investments | - Retained Ioan portfolio <br> - Deposits |  |
| AWM | - Provides initial capital investments in products such as mutual funds and capital invested alongside third-party investors <br> - Originates loans and takes deposits | - Risk from adverse movements in market factors (e.g., market prices, rates and credit spreads) <br> - Interest rate risk and prepayment risk | - Debt securities held in advance of distribution to clients, classified as trading assets - debt instruments ${ }^{(b)}$ | - Retained loan portfolio <br> - Deposits | - Initial seed capital investments and related hedges, classified as derivatives <br> - Certain deferred compensation and related hedges, classified as derivatives <br> - Capital invested alongside third-party investors, typically in privately distributed collective vehicles managed by AWM (i.e., co-investments) |
| Corporate | - Manages the Firm's liquidity, funding, capital, structural interest rate and foreign exchange risks | - Structural interest rate risk from the Firm's traditional banking activities <br> - Structural non-USD foreign exchange risks | - Derivative positions measured through noninterest revenue in earnings <br> - Marketable equity investments | - Deposits with banks <br> - Investment securities portfolio and related interest rate hedges <br> - Long-term debt and related interest rate hedges <br> - Deposits | - Privately held equity and other investments measured at fair value <br> - Foreign exchange exposure related to Firm-issued nonUSD long-term debt ("LTD") and related hedges |

(a) Reflects structured notes in Risk Management VaR and the DVA on structured notes in other sensitivity-based measures.
(b) The AWM and CB contributions to Firmwide average VaR were not material for the years ended December 31, 2022 and 2021.

Value-at-risk
JPMorgan Chase utilizes value-at-risk ("VaR"), a statistical risk measure, to estimate the potential loss from adverse market moves in the current market environment. The Firm has a single VaR framework used as a basis for calculating Risk Management VaR and Regulatory VaR.
The framework is employed across the Firm using historical simulation based on data for the previous 12 months. The framework's approach assumes that historical changes in market values are representative of the distribution of potential outcomes in the immediate future. The Firm believes the use of Risk Management VaR provides a daily measure of risk that is closely aligned to risk management decisions made by the LOBs and Corporate and, along with other market risk measures, provides the appropriate information needed to respond to risk events.

The Firm's Risk Management VaR is calculated assuming a one-day holding period and an expected tail-loss methodology which approximates a 95\% confidence level. Risk Management VaR provides a consistent framework to measure risk profiles and levels of diversification across product types and is used for aggregating risks and monitoring limits across businesses. VaR results are reported to senior management, the Board of Directors and regulators.

Underlying the overall VaR model framework are individual VaR models that simulate historical market returns for individual risk factors and/or product types. To capture material market risks as part of the Firm's risk management framework, comprehensive VaR model calculations are performed daily for businesses whose activities give rise to market risk. These VaR models are granular and incorporate numerous risk factors and inputs to simulate daily changes in market values over the historical period; inputs are selected based on the risk profile of each portfolio, as sensitivities and historical time series used to generate daily market values may be different across product types or risk management systems. The VaR model results across all portfolios are aggregated at the Firm level.

As VaR is based on historical data, it is an imperfect measure of market risk exposure and potential future losses. In addition, based on their reliance on available historical data, limited time horizons, and other factors, VaR measures are inherently limited in their ability to measure certain risks and to predict losses, particularly those associated with market illiquidity and sudden or severe shifts in market conditions.

For certain products, specific risk parameters are not captured in VaR due to the lack of liquidity and availability of appropriate historical data. The Firm uses proxies to estimate the VaR for these and other products when daily time series are not available. It is likely that using an actual price-based time series for these products, if available, would affect the VaR results presented. The Firm therefore considers other nonstatistical measures such as stress
testing, in addition to VaR, to capture and manage its market risk positions.
The daily market data used in VaR models may be different than the independent third-party data collected for VCG price testing in its monthly valuation process. For example, in cases where market prices are not observable, or where proxies are used in VaR historical time series, the data sources may differ. Refer to Valuation process in Note 2 for further information on the Firm's valuation process. As VaR model calculations require daily data and a consistent source for valuation, it may not be practical to use the data collected in the VCG monthly valuation process for VaR model calculations.
The Firm's VaR model calculations are periodically evaluated and enhanced in response to changes in the composition of the Firm's portfolios, changes in market conditions, improvements in the Firm's modeling techniques and measurements, and other factors. Such changes may affect historical comparisons of VaR results. Refer to Estimations and Model Risk Management on page 148 for information regarding model reviews and approvals.
The Firm calculates separately a daily aggregated VaR in accordance with regulatory rules ("Regulatory VaR"), which is used to derive the Firm's regulatory VaR-based capital requirements under Basel III capital rules. This Regulatory VaR model framework currently assumes a ten business-day holding period and an expected tail loss methodology which approximates a 99\% confidence level. Regulatory VaR is applied to "covered" positions as defined by Basel III capital rules, which may be different than the positions included in the Firm's Risk Management VaR. For example, credit derivative hedges of accrual loans are included in the Firm's Risk Management VaR, while Regulatory VaR excludes these credit derivative hedges. In addition, in contrast to the Firm's Risk Management VaR, Regulatory VaR currently excludes the diversification benefit for certain VaR models.

Refer to JPMorgan Chase's Basel III Pillar 3 Regulatory Capital Disclosures reports, which are available on the Firm's website, for additional information on Regulatory VaR and the other components of market risk regulatory capital for the Firm (e.g., VaR-based measure, stressed VaR-based measure and the respective backtesting).

## Management's discussion and analysis

The table below shows the results of the Firm's Risk Management VaR measure using a 95\% confidence level. VaR can vary significantly as positions change, market volatility fluctuates, and diversification benefits change.
Total VaR

| As of or for the year ended December 31, (in millions) | 2022 |  |  |  |  |  | 2021 |  |  |  |  |  |

| Equities |  | 12 |  | 7 |  | 20 |  | 16 |  | 8 |  | 38 |
| Commodities and other |  | 15 |  | 10 |  | 28 |  | 19 |  | 9 |  | 43 |
| Diversification benefit to CIB trading VaR |  | (43) ${ }^{(2)}$ |  | NM ${ }^{(e)}$ |  | NM ${ }^{(e)}$ |  | (49) ${ }^{(2)}$ |  | NM ${ }^{(e)}$ |  | NM ${ }^{(e)}$ |
| CIB trading VaR |  | 51 |  | 34 |  | 69 |  | 52 |  | 22 |  | 134 |
| Credit Portfolio VaR |  | $16^{(b)(c)}$ |  |  |  | $235{ }^{\text {(b)(c) }}$ |  | 6 |  | 4 |  | 12 |
| Diversification benefit to CIB VaR |  | (10) ${ }^{(2)}$ |  | NM ${ }^{(\mathrm{e})}$ |  | NM ${ }^{(e)}$ |  | (6) ${ }^{(a)}$ |  | NM ${ }^{(e)}$ |  | NM ${ }^{(e)}$ |
| CIB VaR |  | 57 |  | 35 |  | 240 |  | 52 |  | 22 |  | 133 |
| CCB VaR |  | 6 |  | 2 |  | 20 |  | 5 |  | 3 |  | 11 |
| Corporate and other LOB VaR |  | $12{ }^{\text {(d) }}$ |  | 9 |  | $16^{(d)}$ |  | $24^{(d)}$ |  | 14 |  | $94^{(d)}$ |
| Diversification benefit to other VaR |  | (4) ${ }^{(a)}$ |  | NM ${ }^{(e)}$ |  | NM ${ }^{(e)}$ |  | (4) ${ }^{(a)}$ |  | NM ${ }^{(e)}$ |  | NM ${ }^{(e)}$ |
| Other VaR |  | 14 |  | 10 |  | 24 |  | 25 |  | 14 |  | 94 |
| Diversification benefit to CIB and other VaR |  | (13) ${ }^{(1)}$ |  | NM ${ }^{(e)}$ |  | NM ${ }^{(e)}$ |  | (22) ${ }^{\left({ }^{(2)}\right.}$ |  | NM ${ }^{(\mathrm{e})}$ |  | NM ${ }^{(e)}$ |
| Total VaR | \$ | 58 | \$ | 34 | \$ | 242 | \$ | 55 | \$ | 24 | \$ |  |

(a) Diversification benefit represents the difference between the portfolio VaR and the sum of its individual components. This reflects the non-additive nature of VaR due to imperfect correlation across LOBs, Corporate, and risk types.
(b) In the first quarter of 2022, in line with the Firm's internal model governance, the credit risk component of CVA related to certain counterparties was removed from Credit Portfolio VaR due to the widening of the credit spreads for those counterparties to elevated levels. The related hedges were also removed to maintain consistency. This exposure is now reflected in other sensitivity-based measures.
(c) In March 2022, the effects of nickel price increases and the associated volatility in the nickel market resulted in elevated average and maximum Credit Portfolio VaR.
(d) The decrease in Corporate and other LOB VaR was driven by lower market values for a legacy private equity position in Corporate which is publicly traded.
(e) The maximum and minimum VaR for each portfolio may have occurred on different trading days than the components, and consequently, diversification benefit is not meaningful.
Average Total VaR increased by $\$ 3$ million for the year ended December 31, 2022 when compared with the prior year. The increase was driven by the effects of nickel price increases and the associated volatility in the nickel market observed in March 2022 impacting Credit Portfolio VaR, predominantly offset by a decrease in Corporate and other LOB VaR.
The following graph presents daily Risk Management VaR for the four trailing quarters. The movement in VaR in March 2022 was driven by changes in nickel-related counterparty exposure in the Firm's Credit Portfolio.

## Daily Risk Management VaR

## VaR backtesting

The Firm performs daily VaR model backtesting, which compares the daily Risk Management VaR results with the daily gains and losses that are utilized for VaR backtesting purposes. The gains and losses depicted in the chart below do not reflect the Firm's reported revenue as they exclude certain components of total net revenue, such as those associated with the execution of new transactions (i.e., intraday client-driven trading and intraday risk management activities), fees, commissions, other valuation adjustments and net interest income. These excluded components of total net revenue may more than offset the backtesting gain or loss on a particular day. The definition of backtesting gains and losses above is consistent with the requirements for backtesting under Basel III capital rules.
A backtesting exception occurs when the daily backtesting loss exceeds the daily Risk Management VaR for the prior day. Under the Firm's Risk Management VaR methodology, assuming current changes in market values are consistent with the historical changes used in the simulation, the Firm would expect to incur VaR backtesting exceptions five times every 100 trading days on average. The number of VaR backtesting exceptions observed can differ from the statistically expected number of backtesting exceptions if the current level of market volatility is materially different from the level of market volatility during the 12 months of historical data used in the VaR calculation.
For the 12 months ended December 31, 2022, the Firm posted backtesting gains on 136 of the 259 days, and observed 17 VaR backtesting exceptions. Firmwide backtesting loss days can differ from the loss days for which Fixed Income Markets and Equity Markets posted losses, as disclosed in CIB Markets revenue, as the population of positions which compose each metric are different and due to the exclusion of certain components of total net revenue in backtesting gains and losses as described above. For more information on CIB Markets revenue, refer to pages 70-71.
The following chart presents the distribution of Firmwide daily backtesting gains and losses for the trailing 12 months and three months ended December 31, 2022. The daily backtesting losses are displayed as a percentage of the corresponding daily Risk Management VaR. The count of days with backtesting losses are shown in aggregate, in fifty percentage point intervals. Backtesting exceptions are displayed within the intervals that are greater than one hundred percent. The results in the chart below differ from the results of backtesting disclosed in the Market Risk section of the Firm's Basel III Pillar 3 Regulatory Capital Disclosures reports, which are based on Regulatory VaR applied to the Firm's covered positions.

Distribution of Daily Backtesting Gains and Losses

# Management's discussion and analysis 

## Other risk measures

## Stress testing

Along with VaR, stress testing is an important tool used to assess risk. While VaR reflects the risk of loss due to adverse changes in markets using recent historical market behavior, stress testing reflects the risk of loss from hypothetical changes in the value of market risk sensitive positions applied simultaneously. Stress testing measures the Firm's vulnerability to losses under a range of stressed but possible economic and market scenarios. The results are used to understand the exposures responsible for those potential losses and are measured against limits.
The Firm's stress framework covers market risk sensitive positions in the LOBs and Corporate. The framework is used to calculate multiple magnitudes of potential stress for both market rallies and market sell-offs, assuming significant changes in market factors such as credit spreads, equity prices, interest rates, currency rates and commodity prices, and combines them in multiple ways to capture an array of hypothetical economic and market scenarios.
The Firm generates a number of scenarios that focus on tail events in specific asset classes and geographies, including how the event may impact multiple market factors simultaneously. Scenarios also incorporate specific idiosyncratic risks and stress basis risk between different products. The flexibility in the stress framework allows the Firm to construct new scenarios that can test the outcomes against possible future stress events. Stress testing results are reported periodically to senior management of the Firm, as appropriate.
Stress scenarios are governed by the overall stress framework, under the oversight of Market Risk Management, and the models to calculate the stress results are subject to the Firm's Estimations and Model Risk Management Policy. The Firmwide Market Risk Stress Methodology Committee reviews and approves changes to stress testing methodology and scenarios across the Firm. Significant changes to the framework are escalated to senior management, as appropriate.
The Firm's stress testing framework is utilized in calculating the Firm's CCAR and other stress test results, which are reported periodically to the Board of Directors. In addition, stress testing results are incorporated into the Firm's Risk Appetite framework, and are reported periodically to the Board Risk Committee.

## Profit and loss drawdowns

Profit and loss drawdowns are used to highlight trading losses above certain levels of risk tolerance. A profit and loss drawdown is a decline in revenue from its year-to-date peak level.

## Earnings-at-risk

The effect of interest rate exposure on the Firm's reported net income is important as interest rate risk represents one of the Firm's significant market risks. Interest rate risk arises not only from trading activities but also from the

Firm's traditional banking activities, which include extension of loans and credit facilities, taking deposits, issuing debt and the investment securities portfolio. Refer to the table on page 132 for a summary by LOB and Corporate, identifying positions included in earnings-at-risk.
The CTC Risk Committee establishes the Firm's structural interest rate risk policy and related limits, which are subject to approval by the Board Risk Committee. Treasury and CIO, working in partnership with the LOBs, calculates the Firm's structural interest rate risk profile and reviews it with senior management, including the CTC Risk Committee. In addition, oversight of structural interest rate risk is managed through a dedicated risk function reporting to the CTC CRO. This risk function is responsible for providing independent oversight and governance around assumptions and establishing and monitoring limits for structural interest rate risk. The Firm manages structural interest rate risk generally through its investment securities portfolio and interest rate derivatives.
Structural interest rate risk can arise due to a variety of factors, including:

- Differences in timing among the maturity or repricing of assets, liabilities and off-balance sheet instruments
- Differences in the amounts of assets, liabilities and offbalance sheet instruments that are maturing or repricing at the same time
- Differences in the amounts by which short-term and longterm market interest rates change (for example, changes in the slope of the yield curve)
- The impact of changes in the maturity of various assets, liabilities or off-balance sheet instruments as interest rates change
The Firm manages interest rate exposure related to its assets and liabilities on a consolidated, Firmwide basis. Business units transfer their interest rate risk to Treasury and CIO through funds transfer pricing, which takes into account the elements of interest rate exposure that can be risk-managed in financial markets. These elements include asset and liability balances and contractual rates of interest, contractual principal payment schedules, expected prepayment experience, interest rate reset dates and maturities, rate indices used for repricing, and any interest rate ceilings or floors for adjustable rate products.
One way that the Firm evaluates its structural interest rate risk is through earnings-at-risk. Earnings-at-risk estimates the Firm's interest rate exposure for a given interest rate scenario. It is presented as a sensitivity to a baseline, which includes net interest income and certain interest rate sensitive fees. The baseline uses market interest rates and, in the case of deposits, pricing assumptions. The Firm conducts simulations of changes to this baseline for interest rate-sensitive assets and liabilities denominated in U.S. dollars and other currencies ("non-U.S. dollar" currencies). These simulations primarily include retained loans,
deposits, deposits with banks, investment securities, longterm debt and any related interest rate hedges, and funds transfer pricing of other positions in risk management VaR and other sensitivity-based measures as described on page 132.

Earnings-at-risk scenarios estimate the potential change to a net interest income baseline over the following 12 months utilizing multiple assumptions. These scenarios include a parallel shift involving changes to both short-term and longterm rates by an equal amount; a steeper yield curve involving holding short-term rates constant and increasing long-term rates; and a flatter yield curve involving increasing short-term rates and holding long-term rates constant or holding short-term rates constant and decreasing long-term rates. These scenarios consider many different factors, including:

- The impact on exposures as a result of instantaneous changes in interest rates from baseline rates.
- Forecasted balance sheet, as well as modeled prepayment and reinvestment behavior, but excluding assumptions about actions that could be taken by the Firm or its clients and customers in response to instantaneous rate changes. Mortgage prepayment assumptions are based on the interest rates used in the scenarios compared with underlying contractual rates, the time since origination, and other factors which are updated periodically based on historical experience. Deposit forecasts are a key assumption in the Firm's earnings-at-risk. The baseline reflects certain assumptions relating to the reversal of Quantitative Easing that are highly uncertain and require management judgment. Therefore, the actual amount of deposits held by the Firm, at any particular time, could be impacted by actions the Federal Reserve may take as part of monetary policy, including through the use of the Reverse Repurchase Facility. In addition, there are other factors that impact the amount of deposits held at the Firm such as the level of loans across the industry and competition for deposits.
- The pricing sensitivity of deposits, known as deposit betas, represent the amount by which deposit rates paid could change upon a given change in market interest rates. The deposit rates paid in these scenarios differ from actual deposit rates paid, due to repricing lags and other factors.

The Firm's earnings-at-risk scenarios are periodically evaluated and enhanced in response to changes in the composition of the Firm's balance sheet, changes in market conditions, improvements in the Firm's simulation and other factors. The Firm is currently evaluating the modeling of repricing lags for deposits in its earnings-at-risk scenarios. Incorporating repricing lags, in the current environment, would significantly affect the U.S. dollar interest rate scenarios, with higher interest rate scenarios expected to result in a positive impact, and lower interest rate scenarios expected to result in a negative impact, on the Firm's earnings-at-risk. While a relevant measure of the

Firm's interest rate exposure, the earnings-at-risk analysis does not represent a forecast of the Firm's net interest income (Refer to Outlook on page 49 for additional information).
The Firm's U.S. dollar sensitivities are presented in the table below.

| December 31, (in billions) | 2022 |  | 2021 |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Parallel shift: |  |  |  |  |  |
| +100 bps shift in rates | \$ | (2.0) | \$ | 5.0 |  |
| -100 bps shift in rates |  | 2.4 |  | NM |  |
| Steeper yield curve: |  |  |  |  |  |
| +100 bps shift in long-term rates |  | 0.8 |  | 1.8 |  |
| -100 bps shift in short-term rates |  | 3.2 |  | NM |  |
| Flatter yield curve: |  |  |  |  |  |
| +100 bps shift in short-term rates |  | (2.8) |  | 3.2 |  |
| -100 bps shift in long-term rates |  | (0.9) |  | NM | (a) |

(a) Given the level of market interest rates, these scenarios were not considered to be meaningful as of December 31, 2021.

The change in the Firm's U.S. dollar sensitivities as of December 31, 2022 compared to December 31, 2021 reflected updates to the Firm's baseline for higher interest rates and higher corresponding modeled deposit betas, as well as the impact of changes in the Firm's balance sheet.
As of December 31, 2022, the Firm's sensitivity to the $+/-100$ basis points parallel and short-term shift in rates is primarily the result of a greater impact from liabilities repricing compared to the impact of assets repricing, while a $+/-100$ basis points shift in long-term rates is primarily the result of a greater impact from assets repricing compared to the impact of liabilities repricing.
The Firm's non-U.S. dollar sensitivities are presented in the table below.

| December 31, (in billions) | 2022 |  | 2021 |  |
| :---: | :---: | :---: | :---: | :---: |
| Parallel shift: |  |  |  |  |
| +100 bps shift in rates | \$ | 0.7 | \$ | 0.8 |
| -100 bps shift in rates | \$ | (0.6) |  | NM |
| Steeper yield curve: |  |  |  |  |
| -100 bps shift in short-term rates | \$ | (0.6) |  | NM |
| Flatter yield curve: |  |  |  |  |
| +100 bps shift in short-term rates |  | 0.6 |  | 0.8 |

(a) Given the level of market interest rates, these scenarios were not considered to be meaningful as of December 31, 2021.
The results of the non-U.S. dollar interest rate scenario involving a steeper/flatter yield curve with long-term rates increasing/decreasing by 100 basis points and short-term rates staying at current levels were not material to the Firm's earnings-at-risk at December 31, 2022 and 2021.

## Management's discussion and analysis

## Non-U.S. dollar foreign exchange risk

Non-U.S. dollar FX risk is the risk that changes in foreign exchange rates affect the value of the Firm's assets or liabilities or future results. The Firm has structural non-U.S. dollar FX exposures arising from capital investments, forecasted expense and revenue, the investment securities portfolio and non-U.S. dollar-denominated debt issuance. Treasury and CIO, working in partnership with the LOBs, primarily manage these risks on behalf of the Firm. Treasury and CIO may hedge certain of these risks using derivatives. Refer to Business Segment Results on page 62 for additional information.

## Other sensitivity-based measures

The Firm quantifies the market risk of certain debt and equity and credit and funding-related exposures by assessing the potential impact on net revenue, other comprehensive income ("OCI") and noninterest expense due to changes in relevant market variables. Refer to the predominant business activities that give rise to market risk on page 132 for additional information on the positions captured in other sensitivity-based measures.

The table below represents the potential impact to net revenue, OCI or noninterest expense for market risk sensitive instruments that are not included in VaR or earnings-at-risk. Where appropriate, instruments used for hedging purposes are reported net of the positions being hedged. The sensitivities disclosed in the table below may not be representative of the actual gain or loss that would have been realized at December 31, 2022 and 2021, as the movement in market parameters across maturities may vary and are not intended to imply management's expectation of future changes in these sensitivities.

| Gain/(loss) (in millions) |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Activity | Description | Sensitivity measure |  | $\begin{array}{r} \text { nber 31, } \\ 2022 \end{array}$ | $\begin{array}{r} \text { December 31, } \\ 2021 \\ \hline \end{array}$ |
| Debt and equity ${ }^{(a)}$ |  |  |  |  |  |
| Asset Management activities | Consists of seed capital and related hedges; fund co-investments ${ }^{\text {(c) }}$; and certain deferred compensation and related hedges ${ }^{(\mathrm{d})}$ | $10 \%$ decline in market value | \$ | (56) \$ | (69) |
| Other debt and equity | Consists of certain real estate-related fair value option elected loans, privately held equity and other investments held at fair value | 10\% decline in market value |  | $(1,046)$ | (971) |
| Credit- and funding-related exposures |  |  |  |  |  |
| Non-USD LTD cross-currency basis | Represents the basis risk on derivatives used to hedge the foreign exchange risk on the non-USD LTD ${ }^{\text {te }}$ | 1 basis point parallel tightening of cross currency basis |  | (12) | (16) |
| Non-USD LTD hedges foreign currency ("FX") exposure | Primarily represents the foreign exchange revaluation on the fair value of the derivative hedges ${ }^{(\text {e })}$ | 10\% depreciation of currency |  | 3 | 15 |
| Derivatives - funding spread risk | Impact of changes in the spread related to derivatives FVA | 1 basis point parallel increase in spread |  | (4) | (7) |
| CVA - counterparty credit risk ${ }^{(\text {b) }}$ | Credit risk component of CVA and associated hedges | 10\% credit spread widening |  | (1) | N/A |
| Fair value option elected liabilities funding spread risk | Impact of changes in the spread related to fair value option elected liabilities DVA ${ }^{(\text {e) }}$ | 1 basis point parallel increase in spread |  | 43 | 41 |
| Fair value option elected liabilities interest rate sensitivity | Interest rate sensitivity on fair value option elected liabilities resulting from a change in the Firm's own credit spread ${ }^{(8)}$ | 1 basis point parallel increase in spread |  | - | (3) |
|  | Interest rate sensitivity related to risk management of changes in the Firm's own credit spread on the fair value option elected liabilities noted above ${ }^{(c)}$ | 1 basis point parallel increase in spread |  | - | 3 |

(a) Excludes equity securities without readily determinable fair values that are measured under the measurement alternative. Refer to Note 2 for additional information.
(b) In the first quarter of 2022, in line with the Firm's internal model governance, the credit risk component of CVA related to certain counterparties was removed from Credit Portfolio VaR due to the widening of the credit spreads for those counterparties to elevated levels. The related hedges were also removed to maintain consistency. This exposure is now reflected in other sensitivity-based measures.
(c) Impact recognized through net revenue.
(d) Impact recognized through noninterest expense.
(e) Impact recognized through OCI.

The Firm, through its LOBs and Corporate, may be exposed to country risk resulting from financial, economic, political or other significant developments which adversely affect the value of the Firm's exposures related to a particular country or set of countries. The Country Risk Management group actively monitors the various portfolios which may be impacted by these developments and measures the extent to which the Firm's exposures are diversified given the Firm's strategy and risk tolerance relative to a country.

## Organization and management

Country Risk Management is an independent risk management function that assesses, manages and monitors exposure to country risk across the Firm.

The Firm's country risk management function includes the following activities:

- Maintaining policies, procedures and standards consistent with a comprehensive country risk framework
- Assigning sovereign ratings, assessing country risks and establishing risk tolerance relative to a country
- Measuring and monitoring country risk exposure and stress across the Firm
- Managing and approving country limits and reporting trends and limit breaches to senior management
- Developing surveillance tools, such as signaling models and ratings indicators, for early identification of potential country risk concerns
- Providing country risk scenario analysis

## Sources and measurement

The Firm is exposed to country risk through its lending and deposits, investing, and market-making activities, whether cross-border or locally funded. Country exposure includes activity with both government and private-sector entities in a country.
Under the Firm's internal country risk management approach, attribution of exposure to an individual country is based on the country where the largest proportion of the assets of the counterparty, issuer, obligor or guarantor are located or where the largest proportion of its revenue is derived, which may be different than the domicile (i.e. legal residence) or country of incorporation.
Individual country exposures reflect an aggregation of the Firm's risk to an immediate default, with zero recovery, of the counterparties, issuers, obligors or guarantors attributed to that country. Activities which result in contingent or indirect exposure to a country are not included in the country exposure measure (for example, providing clearing services or secondary exposure to collateral on securities financing receivables).
Assumptions are sometimes required in determining the measurement and allocation of country exposure, particularly in the case of certain non-linear or index products, or where the nature of the counterparty, issuer, obligor or guarantor is not suitable for attribution to an
individual country. The use of different measurement approaches or assumptions could affect the amount of reported country exposure.
Under the Firm's internal country risk measurement framework:

- Deposits with banks are measured as the cash balances placed with central banks, commercial banks, and other financial institutions
- Lending exposures are measured at the total committed amount (funded and unfunded), net of the allowance for credit losses and eligible cash and marketable securities collateral received
- Securities financing exposures are measured at their receivable balance, net of eligible collateral received
- Debt and equity securities are measured at the fair value of all positions, including both long and short positions
- Counterparty exposure on derivative receivables is measured at the derivative's fair value, net of the fair value of the eligible collateral received
- Credit derivatives exposure is measured at the net notional amount of protection purchased or sold for the same underlying reference entity, inclusive of the fair value of the derivative receivable or payable, reflecting the manner in which the Firm manages these exposures

The Firm's internal country risk reporting differs from the reporting provided under the FFIEC bank regulatory requirements.

## Management's discussion and analysis

## Stress testing

Stress testing is an important component of the Firm's country risk management framework, which aims to estimate and limit losses arising from a country crisis by measuring the impact of adverse asset price movements to a country based on market shocks combined with counterparty specific assumptions. Country Risk Management periodically designs and runs tailored stress scenarios to test vulnerabilities to individual countries or sets of countries in response to specific or potential market events, sector performance concerns, sovereign actions and geopolitical risks. These tailored stress results are used to inform potential risk reduction across the Firm, as necessary.

## Risk reporting

Country exposure and stress are measured and reported regularly, and used by Country Risk Management to identify trends and monitor high usages and breaches against limits.
For country risk management purposes, the Firm may report exposure to jurisdictions that are not fully autonomous, including Special Administrative Regions ("SAR") and dependent territories, separately from the independent sovereign states with which they are associated.

The following table presents the Firm's top 20 exposures by country (excluding the U.S.) as of December 31, 2022, and their comparative exposures as of December 31, 2021. The selection of countries represents the Firm's largest total exposures by individual country, based on the Firm's internal country risk management approach, and does not represent the Firm's view of any existing or potentially adverse credit conditions. Country exposures may fluctuate from period to period due to client activity and market flows.

The increase in exposure to Germany and the decrease in exposure to the U.K. were primarily due to changes in cash placements with the central banks of those countries driven by balance sheet and liquidity management activities.

The decrease in exposure to Australia was driven by reductions in cash placed with the central bank of Australia and government debt securities, due to client-driven market-making activities and lower client cash deposits resulting from higher interest rates.
As of December 31, 2022, exposure to Russia was approximately $\$ 500$ million. This amount excludes certain deposits placed on behalf of clients, largely at the Russian National Settlement Depository. In accordance with requirements of the Bank of Russia, these deposits were transferred to the Depository Insurance Agency of Russia on February 3, 2023.

Top 20 country exposures (excluding the U.S.) ${ }^{(\mathrm{a})}$

| December 31, (in billions) |  |  | 2022 |  |  |  |  |  |  |  | $2021{ }^{(f)}$ |  |

| Luxembourg |  | 0.9 |  | 2.9 |  | 1.5 |  | - |  | 5.3 |  | 11.5 |
| Hong Kong SAR |  | 2.8 |  | 0.9 |  | 0.7 |  | 0.1 |  | 4.5 |  | 5.9 |
| Sweden |  | 1.1 |  | 3.1 |  | 0.2 |  | - |  | 4.4 |  | 4.4 |

(a) Country exposures presented in the table reflect $87 \%$ and $88 \%$ of total Firmwide non-U.S. exposure, where exposure is attributed to an individual country, at December 31, 2022 and 2021, respectively.
(b) Predominantly represents cash placed with central banks.
(c) Includes loans and accrued interest receivable, lending-related commitments (net of eligible collateral and the allowance for credit losses). Excludes intra-day and operating exposures, such as those from settlement and clearing activities.
(d) Includes market-making inventory, Investment securities, and counterparty exposure on derivative and securities financings net of eligible collateral and hedging. Includes exposure from single reference entity ("single-name"), index and other multiple reference entity transactions for which one or more of the underlying reference entities is in a country listed in the above table.
(e) Includes physical commodities inventory and clearing house guarantee funds.
(f) The country rankings presented in the table as of December 31, 2021, are based on the country rankings of the corresponding exposures at December 31, 2022, not actual rankings of such exposures at December 31, 2021.

Climate risk is the risk associated with the impacts of climate change on the Firm's clients, customers, operations and business strategy. Climate change is viewed as a driver of risk that may impact existing types of risks managed by the Firm. Climate risk is categorized into physical risk and transition risk.

Physical risk refers to economic costs and financial loss associated with a changing climate. Acute physical risk drivers include the increased frequency or severity of climate and weather events, such as floods, wildfires and tropical storms. Chronic physical risk drivers include more gradual shifts in the climate, such as rising sea levels, persistent changes in precipitation levels and increases in average ambient temperatures.

Transition risk refers to the financial and economic implications associated with a societal adjustment to a lowcarbon economy. Transition risk drivers include possible changes in public policy, adoption of new technologies and shifts in consumer preferences. Transition risks may also be influenced by changes in the physical climate.

## Organization and management

The Firm has a Climate Risk Management function that is responsible for establishing the Firmwide framework and strategy for managing climate risk. The Climate Risk Management function engages across the Firm to help integrate climate risk considerations into existing risk management frameworks, as appropriate.

Other responsibilities of Climate Risk Management include:

- Setting policies, standards, procedures and processes to support identification, escalation, monitoring and management of climate risk across the Firm
- Developing metrics, scenarios, and stress testing mechanisms designed to assess the range of potential climate-related financial and economic impacts to the Firm
- Establishing a Firmwide climate risk data strategy and the supporting climate risk technology infrastructure

The LOBs and Corporate are responsible for the identification, assessment and management of climate risks present in their business activities and for adherence to applicable climate-related laws, rules and regulations.

## Governance and oversight

The Firm's approach to managing climate risk is consistent with the Firm's risk governance structure. The LOBs and Corporate are responsible for integrating climate risk management into existing governance frameworks, or creating new governance frameworks, as appropriate.

The LOBs, Corporate and Climate Risk Management are responsible for providing the Board Risk Committee with information on significant climate risks and climate-related initiatives, as appropriate.

# Management's discussion and analysis 

## OPERATIONAL RISK MANAGEMENT

Operational risk is the risk of an adverse outcome resulting from inadequate or failed internal processes or systems; human factors; or external events impacting the Firm's processes or systems. Operational Risk includes compliance, conduct, legal, and estimations and model risk. Operational risk is inherent in the Firm's activities and can manifest itself in various ways, including fraudulent acts, business disruptions (including those caused by extraordinary events beyond the Firm's control), cyber attacks, inappropriate employee behavior, failure to comply with applicable laws, rules and regulations or failure of vendors or other third party providers to perform in accordance with their agreements. Operational Risk Management attempts to manage operational risk at appropriate levels in light of the Firm's financial position, the characteristics of its businesses, and the markets and regulatory environments in which it operates.

Operational Risk Management Framework
The Firm's Compliance, Conduct, and Operational Risk ("CCOR") Management Framework is designed to enable the Firm to govern, identify, measure, monitor and test, manage and report on the Firm's operational risk.

## Operational Risk Governance

The LOBs and Corporate are responsible for the management of operational risk. The Control Management Organization, which consists of control managers within each LOB and Corporate, is responsible for the day-to-day execution of the CCOR Framework.

The Firm's Global Chief Compliance Officer ("CCO") and FRE for Operational Risk and Qualitative Risk Appetite is responsible for defining the CCOR Management Framework and establishing the minimum standards for its execution. The LOB and Corporate aligned CCOR Lead Officers report to the Global CCO and FRE for Operational Risk and Qualitative Risk Appetite and are independent of the respective businesses or functions they oversee. The CCOR Management Framework is included in the Risk Governance and Oversight Policy that is reviewed and approved by the Board Risk Committee periodically.

## Operational Risk Identification

The Firm utilizes a structured risk and control selfassessment process that is executed by the LOBs and Corporate. As part of this process, the LOBs and Corporate evaluate the effectiveness of their respective control environment to assess where controls have failed, and to determine where remediation efforts may be required. The Firm's Operational Risk and Compliance organization ("Operational Risk and Compliance") provides oversight of and challenge to these evaluations and may also perform independent assessments of significant operational risk events and areas of concentrated or emerging risk.

Operational Risk Measurement
Operational Risk and Compliance performs an independent assessment of the operational risks inherent within the LOBs and Corporate, which includes evaluating the effectiveness of the control environments and reporting the results to senior management.

In addition, Operational Risk and Compliance assesses operational risks through quantitative means, including operational risk-based capital and estimation of operational risk losses under both baseline and stressed conditions.

The primary component of the operational risk capital estimate is the Loss Distribution Approach ("LDA") statistical model, which simulates the frequency and severity of future operational risk loss projections based on historical data. The LDA model is used to estimate an aggregate operational risk loss over a one-year time horizon, at a $99.9 \%$ confidence level. The LDA model incorporates actual internal operational risk losses in the quarter following the period in which those losses were realized, and the calculation generally continues to reflect such losses even after the issues or business activities giving rise to the losses have been remediated or reduced.
As required under the Basel III capital framework, the Firm's operational risk-based capital methodology, which uses the Advanced Measurement Approach ("AMA"), incorporates internal and external losses as well as management's view of tail risk captured through operational risk scenario analysis, and evaluation of key business environment and internal control metrics. The Firm does not reflect the impact of insurance in its AMA estimate of operational risk capital.

The Firm considers the impact of stressed economic conditions on operational risk losses and develops a forward looking view of material operational risk events that may occur in a stressed environment. The Firm's operational risk stress testing framework is utilized in calculating results for the Firm's CCAR and other stress testing processes.

Refer to Capital Risk Management on pages 86-96 for information related to operational risk RWA, and CCAR.

Operational Risk Monitoring and testing
The results of risk assessments performed by Operational Risk and Compliance are used in connection with their independent monitoring and testing compliance of the LOBs and Corporate with laws, rules and regulations. Through monitoring and testing, Operational Risk and Compliance independently identify areas of heightened operational risk and tests the effectiveness of controls within the LOBs and Corporate.

## Management of Operational Risk

The operational risk areas or issues identified through monitoring and testing are escalated to the LOBs and Corporate to be remediated through action plans, as needed, to mitigate operational risk. Operational Risk and Compliance may advise the LOBs and Corporate in the development and implementation of action plans.

## Operational Risk Reporting

All employees of the Firm are expected to escalate risks appropriately. Risks identified by Operational Risk and Compliance are escalated to the appropriate LOB and Corporate Control Committees, as needed. Operational Risk and Compliance has established standards designed to ensure that consistent operational risk reporting and operational risk reports are produced on a Firmwide basis as well as by the LOBs and Corporate. Reporting includes the evaluation of key risk and performance indicators against established thresholds as well as the assessment of different types of operational risk against stated risk appetite. The standards reinforce escalation protocols to senior management and to the Board of Directors.
Subcategories and examples of operational risks Operational risk can manifest itself in various ways. Operational risk subcategories include Compliance risk, Conduct risk, Legal risk, and Estimations and Model risk. Refer to pages $145,146,147$ and 148 , respectively for more information on Compliance, Conduct, Legal, and Estimations and Model risk. Details on other select examples of operational risks such as cybersecurity, business and technology resiliency, payment fraud and third-party outsourcing are provided below.

## War in Ukraine and Sanctions

In response to the war in Ukraine, numerous financial and economic sanctions have been imposed on Russia and Russia-associated entities and individuals by various governments around the world, including the authorities in the U.S., U.K. and EU. These sanctions are complex and continue to evolve. The Firm continues to face increased operational risk associated with addressing these complex compliance-related matters. To manage this increased risk, the Firm has implemented controls reasonably designed to mitigate the risk of non-compliance and to prevent dealing with sanctioned persons or in property subject to sanctions, as well as to block or restrict payments as required by the applicable regulations.

## Cybersecurity risk

Cybersecurity risk is the risk of the Firm's exposure to harm or loss resulting from misuse or abuse of technology by malicious actors. Cybersecurity risk is an important and continuously evolving focus for the Firm. Significant resources are devoted to protecting and enhancing the security of computer systems, software, networks, storage devices, and other technology assets. The Firm's security efforts are designed to protect against, among other things, cybersecurity attacks by unauthorized parties attempting to obtain access to confidential information, destroy data,
disrupt or degrade service, sabotage systems or cause other damage.

The Firm has experienced, and expects that it will continue to experience, a higher volume and complexity of cyber attacks against the backdrop of heightened geopolitical tensions. The Firm has implemented precautionary measures and controls reasonably designed to address this increased risk, such as enhanced threat monitoring. There can be no assurance that the measures taken by the Firm will be successful in defending against cyber attacks.

Ongoing business expansions may expose the Firm to potential new threats as well as expanded regulatory scrutiny including the introduction of new cybersecurity requirements. The Firm continues to make significant investments in enhancing its cyber defense capabilities and to strengthen its partnerships with the appropriate government and law enforcement agencies and other businesses in order to understand the full spectrum of cybersecurity risks in the operating environment, enhance defenses and improve resiliency against cybersecurity threats. The Firm actively participates in discussions and simulations of cybersecurity risks both internally and with law enforcement, government officials, peer and industry groups, and has significantly increased efforts to educate employees and certain clients on the topic of cybersecurity risks.

Third parties with which the Firm does business or that facilitate the Firm's business activities (e.g., vendors, supply chain, exchanges, clearing houses, central depositories, and financial intermediaries) are also sources of cybersecurity risk to the Firm. Third party cybersecurity incidents such as system breakdowns or failures, misconduct by the employees of such parties, or cyber attacks, including ransomware and supply-chain compromises, could affect their ability to deliver a product or service to the Firm or result in lost or compromised information of the Firm or its clients. Clients are also sources of cybersecurity risk to the Firm and its information assets, particularly when their activities and systems are beyond the Firm's own security and control systems. As a result, the Firm engages in regular and ongoing discussions with certain vendors and clients regarding cybersecurity risks and opportunities to improve security. However, where cybersecurity incidents occur as a result of client failures to maintain the security of their own systems and processes, clients are responsible for losses incurred.
To help safeguard the confidentiality, integrity and availability of the Firm's infrastructure, resources and information, the Firm maintains a Information Security Program designed to prevent, detect, and respond to cyberattacks. The Board of Directors is periodically provided with updates on the Firm's Information Security Program, recommended changes, cybersecurity policies and practices, ongoing efforts to improve security, as well as the Firm's efforts regarding significant cybersecurity events. In addition, the Firm has a cybersecurity incident response

## Management's discussion and analysis

plan ("IRP") designed to enable the Firm to respond to attempted cybersecurity incidents, coordinate such responses with law enforcement and other government agencies, and notify clients and customers, as applicable. Among other key focus areas, the IRP is designed to mitigate the risk of insider trading connected to a cybersecurity incident, and includes various escalation points.

The Global Cybersecurity and Technology Controls organization, working with each of the Firm's LOBs and Corporate, is responsible for identifying technology and cybersecurity risks and is responsible for the controls to manage threats. The organization consists of business aligned information security personnel that are supported within the organization by the following products and services that execute the Information Security Program for the Firm:

- Cyber Operations
- Identity \& Access Management
- Governance, Risk \& Controls
- Global Technology Product Security

The Global Cybersecurity and Technology Controls governance structure is designed to identify, escalate, and mitigate information security risks. This structure uses key governance forums to disseminate information and monitor technology efforts. These forums are established at multiple levels throughout the Firm. The forums are used to escalate information security risks or other matters as appropriate.

The IRM function provides oversight of the activities designed to identify, assess, measure, and mitigate cybersecurity risk.
The Firm's Security Awareness Program includes training that reinforces the Firm's Information Technology Risk and Security Management policies, standards and practices, as well as the expectation that employees comply with these policies. The Security Awareness Program engages personnel through training on how to identify potential cybersecurity risks and protect the Firm's resources and information. This training is mandatory for all employees globally on a periodic basis, and it is supplemented by Firmwide testing initiatives, including periodic phishing tests. The Firm provides specialized security training for certain employee roles such as application developers. Finally, the Firm's Global Privacy Program requires all employees to take periodic awareness training on data privacy. This privacy-focused training includes information about confidentiality and security, as well as responding to unauthorized access to or use of information.

## Business and technology resiliency risk

Disruptions can occur due to forces beyond the Firm's control such as the spread of infectious diseases or pandemics, severe weather, power or telecommunications loss, failure of a third party to provide expected services, cyberattacks and terrorism. The Firmwide Business Resiliency Program is designed to enable the Firm to prepare for, adapt to, withstand and recover from business disruptions including occurrence of an extraordinary event beyond its control that may impact critical business functions and supporting assets (i.e., staff, technology, facilities and third parties). The program includes governance, awareness training, planning and testing of recovery strategies, as well as strategic and tactical initiatives to identify, assess, and manage business interruption and public safety risks.

## Payment fraud risk

Payment fraud risk is the risk of external and internal parties unlawfully obtaining personal monetary benefit through misdirected or otherwise improper payment. The Firm employs various controls for managing payment fraud risk as well as providing employee and client education and awareness trainings.

## Third-party outsourcing risk

The Firm‘s Third-Party Oversight ("TPO") and Inter-affiliates Oversight ("IAO") frameworks assist the LOBs and Corporate in selecting, documenting, onboarding, monitoring and managing their supplier relationships including services provided by affiliates. The objectives of the TPO framework are to hold suppliers and other third parties to a high level of operational performance and to mitigate key risks, including data loss and business disruptions. The Corporate Third-Party Oversight group is responsible for Firmwide training, monitoring, reporting and standards.

## Insurance

One of the ways in which operational risk may be mitigated is through insurance maintained by the Firm. The Firm purchases insurance from commercial insurers and maintains a wholly-owned captive insurer, Park Assurance Company. Insurance may also be required by third parties with whom the Firm does business.

Compliance risk, a subcategory of operational risk, is the risk of failing to comply with laws, rules, regulations or codes of conduct and standards of self-regulatory organizations.

## Overview

Each of the LOBs and Corporate hold primary ownership of and accountability for managing their compliance risk. The Firm's Operational Risk and Compliance Organization ("Operational Risk and Compliance"), which is independent of the LOBs and Corporate, provides independent review, monitoring and oversight of business operations with a focus on compliance with the laws, rules, and regulations applicable to the delivery of the Firm's products and services to clients and customers.

These compliance risks relate to a wide variety of laws, rules and regulations varying across the LOBs and Corporate, and jurisdictions, and include risks related to financial products and services, relationships and interactions with clients and customers, and employee activities. For example, compliance risks include those associated with anti-money laundering compliance, trading activities, market conduct, and complying with the laws, rules, and regulations related to the offering of products and services across jurisdictional borders. Compliance risk is also inherent in the Firm's fiduciary activities, including the failure to exercise the applicable standard of care to act in the best interest of fiduciary clients and customers or to treat fiduciary clients and customers fairly.

Other functions provide oversight of significant regulatory obligations that are specific to their respective areas of responsibility.

Operational Risk and Compliance implements policies and standards designed to govern, identify, measure, monitor and test, manage, and report on compliance risk.

Governance and oversight
Operational Risk and Compliance is led by the Firm's Global CCO and FRE for Operational Risk and Qualitative Risk Appetite.

The Firm maintains oversight and coordination of its compliance risk through the implementation of the CCOR Management Framework. The Firm's Global CCO and FRE for Operational Risk and Qualitative Risk Appetite also provides regular updates to the Board Risk Committee and the Audit Committee on significant compliance risk issues, as appropriate.

## Code of Conduct

The Firm has a Code of Conduct (the "Code") that sets forth the Firm's expectation that employees will conduct themselves with integrity at all times and provides the principles that govern employee conduct with clients, customers, shareholders and one another, as well as with the markets and communities in which the Firm does business. The Code requires employees to promptly report any potential or actual violation of the Code, any Firm policy, or any law or regulation applicable to the Firm's business. It also requires employees to report any illegal conduct, or conduct that violates the underlying principles of the Code, by any of the Firm's employees, clients, customers, suppliers, contract workers, business partners, or agents. Training is assigned to newly hired employees upon joining the Firm, and to current employees periodically on an ongoing basis. Employees are required to affirm their compliance with the Code annually.

Employees can report any potential or actual violations of the Code through the Firm's Conduct Hotline by phone or the internet. The Hotline is anonymous, except in certain non-U.S. jurisdictions where laws prohibit anonymous reporting, and is available at all times globally, with translation services. It is administered by an outside service provider. The Code prohibits retaliation against anyone who raises an issue or concern in good faith. Periodically, the Audit Committee receives reports on the Code of Conduct program.

## CONDUCT RISK MANAGEMENT

Conduct risk, a subcategory of operational risk, is the risk that any action or misconduct by an employee could lead to unfair client or customer outcomes, impact the integrity of the markets in which the Firm operates, harm employees or the Firm, or compromise the Firm's reputation.

## Overview

Each LOB and Corporate is accountable for identifying and managing its conduct risk to provide appropriate engagement, ownership and sustainability of a culture consistent with the Firm's How We Do Business Principles (the "Principles"). The Principles serve as a guide for how employees are expected to conduct themselves. With the Principles serving as a guide, the Firm's Code sets out the Firm's expectations for each employee and provides information and resources to help employees conduct business ethically and in compliance with applicable laws, rules and regulations everywhere the Firm operates. Refer to Compliance Risk Management on page 145 for further discussion of the Code.

## Governance and oversight

The Conduct Risk Program is governed by the CCOR Management policy, which establishes the framework for governance, identification, measurement, monitoring and testing, management and reporting conduct risk in the Firm.

The Firm has a senior forum that provides oversight of the Firm's conduct initiatives to develop a more holistic view of conduct risks and to connect key programs across the Firm in order to identify opportunities and emerging areas of focus. This forum is responsible for setting overall program direction for strategic enhancements to the Firm's employee conduct framework and reviewing the consolidated Firmwide Conduct Risk Appetite Assessment.

Conduct risk management encompasses various aspects of people management practices throughout the employee life cycle, including recruiting, onboarding, training and development, performance management, promotion and compensation processes. Each LOB, Treasury and CIO, and each designated corporate function completes an assessment of conduct risk periodically, reviews metrics and issues which may involve conduct risk, and provides conduct education as appropriate.

Legal risk, a subcategory of operational risk, is the risk of loss primarily caused by the actual or alleged failure to meet legal obligations that arise from the rule of law in jurisdictions in which the Firm operates, agreements with clients and customers, and products and services offered by the Firm.

## Overview

The global Legal function ("Legal") provides legal services and advice to the Firm. Legal is responsible for managing the Firm's exposure to legal risk by:

- managing actual and potential litigation and enforcement matters, including internal reviews and investigations related to such matters
- advising on products and services, including contract negotiation and documentation
- advising on offering and marketing documents and new business initiatives
- managing dispute resolution
- interpreting existing laws, rules and regulations, and advising on changes to them
- advising on advocacy in connection with contemplated and proposed laws, rules and regulations, and
- providing legal advice to the LOBs, Corporate and the Board.

Legal selects, engages and manages outside counsel for the Firm on all matters in which outside counsel is engaged. In addition, Legal advises the Firm's Conflicts Office which reviews the Firm's wholesale transactions that may have the potential to create conflicts of interest for the Firm.

## Governance and oversight

The Firm's General Counsel reports to the CEO and is a member of the Operating Committee, the Firmwide Risk Committee and the Firmwide Control Committee. The Firm's General Counsel and other members of Legal report on significant legal matters to the Firm's Board of Directors and to the Audit Committee.

Legal serves on and advises various committees and advises the Firm's LOBs and Corporate on potential reputation risk issues.

Estimations and Model risk, a subcategory of operational risk, is the potential for adverse consequences from decisions based on incorrect or misused estimation outputs.

The Firm uses models and other analytical and judgmentbased estimations across various businesses and functions. The estimation methods are of varying levels of sophistication and are used for many purposes, such as the valuation of positions and measurement of risk, assessing regulatory capital requirements, conducting stress testing, evaluating the allowance for credit losses and making business decisions. A dedicated independent function, Model Risk Governance and Review ("MRGR"), defines and governs the Firm's policies relating to the management of model risk and risks associated with certain analytical and judgment-based estimations, such as those used in risk management, budget forecasting and capital planning and analysis.

The governance of analytical and judgment-based estimations within MRGR's scope follows a consistent approach which is used for models, as described in detail below.

Model risks are owned by the users of the models within the Firm based on the specific purposes of such models. Users and developers of models are responsible for developing, implementing and testing their models, as well as referring models to MRGR for review and approval. Once models have been approved, model users and developers are responsible for maintaining a robust operating environment, and must monitor and evaluate the performance of the models on an ongoing basis. Model users and developers may seek to enhance models in response to changes in the portfolios and in product and market developments, as well as to capture improvements in available modeling techniques and systems capabilities.

Models are tiered based on an internal standard according to their complexity, the exposure associated with the model and the Firm's reliance on the model. This tiering is subject to the approval of MRGR. In its review of a model, MRGR considers whether the model is suitable for the specific purposes for which it will be used. When reviewing a model, MRGR analyzes and challenges the model methodology and the reasonableness of model assumptions, and may perform or require additional testing, including back-testing of model outcomes. Model reviews are approved by the appropriate level of management within MRGR based on the relevant model tier.

Under the Firm's Estimations and Model Risk Management Policy, MRGR reviews and approves new models, as well as material changes to existing models, prior to their use. In certain circumstances, exceptions may be granted to the Firm's policy to allow a model to be used prior to review or approval. MRGR may also require the user to take appropriate actions to mitigate the model risk if it is to be used in the interim. These actions will depend on the model and may include, for example, limitation of trading activity.
While models are inherently imprecise, the degree of imprecision or uncertainty can be heightened by the market or economic environment. This is particularly true when the current and forecasted environments are significantly different from the historical environments upon which the models were developed, as the Firm experienced during the early stages of the COVID-19 pandemic. This increased uncertainty may necessitate a greater degree of judgment and analytics to inform any adjustments that the Firm may make to model outputs than would otherwise be the case.
Refer to Critical Accounting Estimates Used by the Firm on pages 149-152 and Note 2 for a summary of model-based valuations and other valuation techniques.

JPMorgan Chase's accounting policies and use of estimates are integral to understanding its reported results. The Firm's most complex accounting estimates require management's judgment to ascertain the appropriate carrying value of assets and liabilities. The Firm has established policies and control procedures intended to ensure that estimation methods, including any judgments made as part of such methods, are well-controlled, independently reviewed and applied consistently from period to period. The methods used and judgments made reflect, among other factors, the nature of the assets or liabilities and the related business and risk management strategies, which may vary across the Firm's businesses and portfolios. In addition, the policies and procedures are intended to ensure that the process for changing methodologies occurs in an appropriate manner. The Firm believes its estimates for determining the carrying value of its assets and liabilities are appropriate. The following is a brief description of the Firm's critical accounting estimates involving significant judgments.

## Allowance for credit losses

The Firm's allowance for credit losses represents management's estimate of expected credit losses over the remaining expected life of the Firm's financial assets measured at amortized cost and certain off-balance sheet lending-related commitments. The allowance for credit losses comprises:

- The allowance for Ioan losses, which covers the Firm's retained loan portfolios (scored and risk-rated),
- The allowance for lending-related commitments, and
- The allowance for credit losses on investment securities.

The allowance for credit losses involves significant judgment on a number of matters including development and weighting of macroeconomic forecasts, incorporation of historical loss experience, assessment of risk characteristics, assignment of risk ratings, valuation of collateral, and the determination of remaining expected life. Refer to Note 10 and Note 13 for further information on these judgments as well as the Firm's policies and methodologies used to determine the Firm's allowance for credit losses.
One of the most significant judgments involved in estimating the Firm's allowance for credit losses relates to the macroeconomic forecasts used to estimate credit losses over the eight-quarter forecast period within the Firm's methodology. The eight-quarter forecast incorporates hundreds of macroeconomic variables ("MEVs") that are relevant for exposures across the Firm, with modeled credit losses being driven primarily by a subset of less than twenty variables. The specific variables that have the greatest effect on the modeled losses of each portfolio vary by portfolio and geography.

- Key MEVs for the consumer portfolio include regional U.S. unemployment rates, HPI and U.S. real GDP.
- Key MEVs for the wholesale portfolio include U.S. real GDP, U.S. unemployment, U.S. equity prices, U.S. interest rates, corporate credit spreads, oil prices, commercial real estate prices and HPI.
Changes in the Firm's assumptions and forecasts of economic conditions could significantly affect its estimate of expected credit losses in the portfolio at the balance sheet date or lead to significant changes in the estimate from one reporting period to the next.
It is difficult to estimate how potential changes in any one factor or input might affect the overall allowance for credit losses because management considers a wide variety of factors and inputs in estimating the allowance for credit losses. Changes in the factors and inputs considered may not occur at the same rate and may not be consistent across all geographies or product types, and changes in factors and inputs may be directionally inconsistent, such that improvement in one factor or input may offset deterioration in others.
To consider the impact of a hypothetical alternate macroeconomic forecast, the Firm compared the modeled credit losses determined using its central and relative adverse macroeconomic scenarios, which are two of the five scenarios considered in estimating the allowances for loan losses and lending-related commitments. The central and relative adverse scenarios each included a full suite of MEVs, but differed in the levels, paths and peaks/troughs of those variables over the eight-quarter forecast period.
For example, compared to the Firm's central scenario shown on page 127 and in Note 13, the Firm's relative adverse scenario assumes an elevated U.S. unemployment rate, averaging approximately $1.9 \%$ higher over the eightquarter forecast, with a peak difference of approximately $2.8 \%$ in the fourth quarter of 2023 ; lower U.S. real GDP with a slower recovery, remaining nearly $3.1 \%$ lower at the end of the eight-quarter forecast, with a peak difference of approximately $3.9 \%$ in the fourth quarter of 2023; and lower national HPI with a peak difference of approximately $8.4 \%$ in the third quarter of 2024.
This analysis is not intended to estimate expected future changes in the allowance for credit losses, for a number of reasons, including:
- The allowance as of December 31, 2022, reflects credit losses beyond those estimated under the central scenario due to the weight placed on the adverse scenarios.
- The impacts of changes in many MEVs are both interrelated and nonlinear, so the results of this analysis cannot be simply extrapolated for more severe changes in macroeconomic variables.
- Expectations of future changes in portfolio composition and borrower behavior can significantly affect the allowance for credit losses.
To demonstrate the sensitivity of credit loss estimates to macroeconomic forecasts as of December 31, 2022, the

## Management's discussion and analysis

Firm compared the modeled estimates under its relative adverse scenario to its central scenario. Without considering offsetting or correlated effects in other qualitative components of the Firm's allowance for credit losses, the comparison between these two scenarios for the exposures below reflect the following differences:

- An increase of approximately \$500 million for residential real estate loans and lending-related commitments
- An increase of approximately $\$ 2.2$ billion for credit card Ioans
- An increase of approximately $\$ 3.9$ billion for wholesale loans and lending-related commitments

This analysis relates only to the modeled credit loss estimates and is not intended to estimate changes in the overall allowance for credit losses as it does not reflect any potential changes in other adjustments to the quantitative calculation, which would also be influenced by the judgment management applies to the modeled lifetime loss estimates to reflect the uncertainty and imprecision of these modeled lifetime loss estimates based on then-current circumstances and conditions.

Recognizing that forecasts of macroeconomic conditions are inherently uncertain, particularly in light of the recent economic conditions, the Firm believes that its process to consider the available information and associated risks and uncertainties is appropriately governed and that its estimates of expected credit losses were reasonable and appropriate for the period ended December 31, 2022.

## Fair value

JPMorgan Chase carries a portion of its assets and liabilities at fair value. The majority of such assets and liabilities are measured at fair value on a recurring basis, including derivatives, structured note products and certain securities financing agreements. Certain assets and liabilities are measured at fair value on a nonrecurring basis, including certain mortgage, home equity and other loans, where the carrying value is based on the fair value of the underlying collateral.

## Assets measured at fair value

The following table includes the Firm's assets measured at fair value and the portion of such assets that are classified within level 3 of the fair value hierarchy. Refer to Note 2 for further information.

| December 31, 2022 <br> (in millions, except ratios) | Total assets at fair value | Total level 3 assets |
| :---: | :---: | :---: |
| Federal funds sold and securities purchased under resale agreements | \$ 311,883 | \$ - |
| Securities borrowed | 70,041 | - |
| Trading assets: |  |  |
| Trading-debt and equity instruments | 382,876 | 2,909 |
| Derivative receivables ${ }^{(a)}$ | 70,880 | 10,682 |
| Total trading assets | 453,756 | 13,591 |
| AFS securities | 205,857 | 239 |
| Loans | 42,079 | 1,418 |
| MSRs | 7,973 | 7,973 |
| Other | 14,014 | 405 |
| Total assets measured at fair value on a recurring basis | 1,105,603 | 23,626 |
| Total assets measured at fair value on a nonrecurring basis | 2,658 | 1,979 |
| Total assets measured at fair value | \$ 1,108,261 | \$ 25,605 |
| Total Firm assets | \$ 3,665,743 |  |
| Level 3 assets at fair value as a percentage of total Firm assets ${ }^{(\text {a })}$ |  | 0.7\% |
| Level 3 assets at fair value as a percentage of total Firm assets at fair value ${ }^{(\mathrm{a})}$ |  | 2.3\% |

(a) For purposes of the table above, the derivative receivables total reflects the impact of netting adjustments; however, the $\$ 10.7$ billion of derivative receivables classified as level 3 does not reflect the netting adjustment as such netting is not relevant to a presentation based on the transparency of inputs to the valuation of an asset. The level 3 balances would be reduced if netting were applied, including the netting benefit associated with cash collateral.

## Valuation

Details of the Firm's processes for determining fair value are set out in Note 2. Estimating fair value requires the application of judgment. The type and level of judgment required is largely dependent on the amount of observable market information available to the Firm. For instruments valued using internally developed valuation models and other valuation techniques that use significant unobservable inputs and are therefore classified within level 3 of the fair value hierarchy, judgments used to estimate fair value are more significant than those required when estimating the fair value of instruments classified within levels 1 and 2.

In arriving at an estimate of fair value for an instrument within level 3, management must first determine the appropriate valuation model or other valuation technique to use. Second, the lack of observability of certain significant inputs requires management to assess relevant empirical data in deriving valuation inputs including, for example, transaction details, yield curves, interest rates, prepayment speed, default rates, volatilities, correlations, prices (such as commodity, equity or debt prices), valuations of comparable instruments, foreign exchange rates and credit curves. Refer to Note 2 for a further discussion of the valuation of level 3 instruments, including unobservable inputs used.
For instruments classified in levels 2 and 3, management judgment must be applied to assess the appropriate level of valuation adjustments to reflect counterparty credit quality, the Firm's creditworthiness, market funding rates, liquidity considerations, unobservable parameters, and for portfolios that meet specified criteria, the size of the net open risk position. The judgments made are typically affected by the type of product and its specific contractual terms, and the level of liquidity for the product or within the market as a whole. In periods of heightened market volatility and uncertainty judgments are further affected by the wider variation of reasonable valuation estimates, particularly for positions that are less liquid. Refer to Note 2 for a further discussion of valuation adjustments applied by the Firm.

Imprecision in estimating unobservable market inputs or other factors can affect the amount of gain or loss recorded for a particular position. Furthermore, while the Firm believes its valuation methods are appropriate and consistent with those of other market participants, the methods and assumptions used reflect management judgment and may vary across the Firm's businesses and portfolios.

The Firm uses various methodologies and assumptions in the determination of fair value. The use of methodologies or assumptions different than those used by the Firm could result in a different estimate of fair value at the reporting date. Refer to Note 2 for a detailed discussion of the Firm's valuation process and hierarchy, and its determination of fair value for individual financial instruments.

Goodwill impairment
Under U.S. GAAP, goodwill must be allocated to reporting units and tested for impairment at least annually. The Firm's process and methodology used to conduct goodwill impairment testing is described in Note 15.
Management applies significant judgment when testing goodwill for impairment. The goodwill associated with each business combination is allocated to the related reporting units for goodwill impairment testing.

For the year ended December 31, 2022, the Firm reviewed current economic conditions, estimated market cost of equity, as well as actual business results and projections of business performance. Based on such reviews, the Firm has concluded that goodwill was not impaired as of December 31, 2022. For each of the reporting units, fair value exceeded carrying value by at least $10 \%$ and there was no indication of a significant risk of goodwill impairment based on current projections and valuations.

The projections for the Firm's reporting units are consistent with management's current business outlook assumptions in the short term, and the Firm's best estimates of longterm growth and return on equity in the longer term. Where possible, the Firm uses third-party and peer data to benchmark its assumptions and estimates.
Refer to Note 15 for additional information on goodwill, including the goodwill impairment assessment as of December 31, 2022.

## Credit card rewards liability

JPMorgan Chase offers credit cards with various rewards programs which allow cardholders to earn rewards points based on their account activity and the terms and conditions of the rewards program. Generally, there are no limits on the points that an eligible cardholder can earn, nor do the points expire, and the points can be redeemed for a variety of rewards, including cash (predominantly in the form of account credits), gift cards and travel. The Firm maintains a rewards liability which represents the estimated cost of rewards points earned and expected to be redeemed by cardholders. The liability is accrued as the cardholder earns the benefit and is reduced when the cardholder redeems points. This liability was $\$ 11.3$ billion and $\$ 9.8$ billion at December 31, 2022 and 2021, respectively, and is recorded in accounts payable and other liabilities on the Consolidated balance sheets. The increase in the liability was driven by continued growth in rewards points earned on increased cardholder spending and promotional offers outpacing redemptions throughout 2022.

The rewards liability is sensitive to redemption rate ("RR") and cost per point ("CPP") assumptions. The RR assumption is used to estimate the number of points earned by customers that will be redeemed over the life of the account. The CPP assumption is used to estimate the cost of future point redemptions. These assumptions are evaluated periodically considering historical actuals, cardholder redemption behavior and management judgment. Updates

## Management's discussion and analysis

to these assumptions will impact the rewards liability. As of December 31, 2022, a combined increase of 25 basis points in RR and 1 basis point in CPP would increase the rewards liability by approximately $\$ 315$ million.

## Income taxes

JPMorgan Chase is subject to the income tax laws of the various jurisdictions in which it operates, including U.S. federal, state and local, and non-U.S. jurisdictions. These laws are often complex and may be subject to different interpretations. To determine the financial statement impact of accounting for income taxes, including the provision for income tax expense and unrecognized tax benefits, JPMorgan Chase must make assumptions and judgments about how to interpret and apply these complex tax laws to numerous transactions and business events, as well as make judgments regarding the timing of when certain items may affect taxable income in the U.S. and non-U.S. tax jurisdictions.
JPMorgan Chase's interpretations of tax laws around the world are subject to review and examination by the various taxing authorities in the jurisdictions where the Firm operates, and disputes may occur regarding its view on a tax position. These disputes over interpretations with the various taxing authorities may be settled by audit, administrative appeals or adjudication in the court systems of the tax jurisdictions in which the Firm operates. JPMorgan Chase regularly reviews whether it may be assessed additional income taxes as a result of the resolution of these matters, and the Firm records additional unrecognized tax benefits, as appropriate. In addition, the Firm may revise its estimate of income taxes due to changes in income tax laws, legal interpretations, and business strategies. It is possible that revisions in the Firm's estimate of income taxes may materially affect the Firm's results of operations in any reporting period.
Deferred taxes arise from differences between assets and liabilities measured for financial reporting versus income tax return purposes. Deferred tax assets are recognized if, in management's judgment, their realizability is determined to be more likely than not. Deferred taxes are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred taxes of a change in tax rates is recognized within the provision for income taxes in the period enacted.

The Firm has also recognized deferred tax assets in connection with certain tax attributes, including net operating loss ("NOL") carryforwards and foreign tax credit ("FTC") carryforwards. The Firm performs regular reviews to ascertain whether its deferred tax assets are realizable. These reviews include management's estimates and assumptions regarding future taxable income, including foreign source income, and may incorporate various tax planning strategies, including strategies that may be available to utilize NOLs and FTCs before they expire. In connection with these reviews, if it is determined that a deferred tax asset is not realizable, a valuation allowance is
established. The valuation allowance may be reversed in a subsequent reporting period if the Firm determines that, based on revised estimates of future taxable income or changes in tax planning strategies, it is more likely than not that all or part of the deferred tax asset will become realizable. As of December 31, 2022, management has determined it is more likely than not that the Firm will realize its deferred tax assets, net of the existing valuation allowance.

The Firm adjusts its unrecognized tax benefits as necessary when new information becomes available, including changes in tax law and regulations, and interactions with taxing authorities. Uncertain tax positions that meet the more-likely-than-not recognition threshold are measured to determine the amount of benefit to recognize. An uncertain tax position is measured at the largest amount of benefit that management believes is more likely than not to be realized upon settlement. It is possible that the reassessment of JPMorgan Chase's unrecognized tax benefits may have a material impact on its effective income tax rate in the period in which the reassessment occurs. Although the Firm believes that its estimates are reasonable, the final tax amount could be different from the amounts reflected in the Firm's income tax provisions and accruals. To the extent that the final outcome of these amounts is different than the amounts recorded, such differences will generally impact the Firm's provision for income taxes in the period in which such a determination is made.

The Firm's provision for income taxes is composed of current and deferred taxes. The current and deferred tax provisions are calculated based on estimates and assumptions that could differ from the actual results reflected in income tax returns filed during the subsequent year. Adjustments based on filed returns are generally recorded in the period when the tax returns are filed and the global tax implications are known, which could impact the Firm's effective tax rate.

Refer to Note 25 for additional information on income taxes.

Litigation reserves
Refer to Note 30 for a description of the significant estimates and judgments associated with establishing litigation reserves.

Financial Accounting Standards Board ("FASB") Standards Adopted since January 1, 2021

| Standard | Summary of guidance |  |

Issued March 2022

- Eliminates existing accounting and disclosure requirements for Troubled Debt Restructurings, including the requirement to measure the allowance using a discounted cash flow methodology.
- Requires disclosure of Ioan modifications for borrowers experiencing financial difficulty involving principal forgiveness, interest rate reduction, other-than-insignificant payment delay, term extension or a combination of these modifications.
- Requires disclosure of current period loan charge-off information by origination year.
- May be adopted prospectively, or by using a modified retrospective method wherein the effect of adoption is reflected as an adjustment to retained earnings at the effective date.
- Adopted January 1, 2023.
- This guidance was adopted using a modified retrospective method which resulted in a net decrease to the allowance for credit losses of approximately $\$ 600$ million and an increase to retained earnings of approximately $\$ 450$ million after-tax, predominantly driven by residential real estate and credit card. Refer to Note 1 for further information.

## Management's discussion and analysis

## FORWARD-LOOKING STATEMENTS

From time to time, the Firm has made and will make forward-looking statements. These statements can be identified by the fact that they do not relate strictly to historical or current facts. Forward-looking statements often use words such as "anticipate," "target," "expect," "estimate," "intend," "plan," "goal," "believe," or other words of similar meaning. Forward-looking statements provide JPMorgan Chase's current expectations or forecasts of future events, circumstances, results or aspirations. JPMorgan Chase's disclosures in this 2022 Form 10-K contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. The Firm also may make forward-looking statements in its other documents filed or furnished with the SEC. In addition, the Firm's senior management may make forward-looking statements orally to investors, analysts, representatives of the media and others.

All forward-looking statements are, by their nature, subject to risks and uncertainties, many of which are beyond the Firm's control. JPMorgan Chase's actual future results may differ materially from those set forth in its forward-looking statements. While there is no assurance that any list of risks and uncertainties or risk factors is complete, below are certain factors which could cause actual results to differ from those in the forward-looking statements:

- Local, regional and global business, economic and political conditions and geopolitical events, including the war in Ukraine;
- Changes in laws, rules, and regulatory requirements, including capital and liquidity requirements affecting the Firm's businesses, and the ability of the Firm to address those requirements;
- Heightened regulatory and governmental oversight and scrutiny of JPMorgan Chase's business practices, including dealings with retail customers;
- Changes in trade, monetary and fiscal policies and laws;
- Changes in the level of inflation;
- Changes in income tax laws, rules, and regulations;
- Securities and capital markets behavior, including changes in market liquidity and volatility;
- Changes in investor sentiment or consumer spending or savings behavior;
- Ability of the Firm to manage effectively its capital and liquidity;
- Changes in credit ratings assigned to the Firm or its subsidiaries;
- Damage to the Firm's reputation;
- Ability of the Firm to appropriately address social, environmental and sustainability concerns that may arise, including from its business activities;
- Ability of the Firm to deal effectively with an economic slowdown or other economic or market disruption, including, but not limited to, in the interest rate environment;
- Technology changes instituted by the Firm, its counterparties or competitors;
- The effectiveness of the Firm's control agenda;
- Ability of the Firm to develop or discontinue products and services, and the extent to which products or services previously sold by the Firm require the Firm to incur liabilities or absorb losses not contemplated at their initiation or origination;
- Acceptance of the Firm's new and existing products and services by the marketplace and the ability of the Firm to innovate and to increase market share;
- Ability of the Firm to attract and retain qualified and diverse employees;
- Ability of the Firm to control expenses;
- Competitive pressures;
- Changes in the credit quality of the Firm's clients, customers and counterparties;
- Adequacy of the Firm's risk management framework, disclosure controls and procedures and internal control over financial reporting;
- Adverse judicial or regulatory proceedings;
- Changes in applicable accounting policies, including the introduction of new accounting standards;
- Ability of the Firm to determine accurate values of certain assets and liabilities;
- Occurrence of natural or man-made disasters or calamities, including health emergencies, the spread of infectious diseases, epidemics or pandemics, an outbreak or escalation of hostilities or other geopolitical instabilities, the effects of climate change or extraordinary events beyond the Firm's control, and the Firm's ability to deal effectively with disruptions caused by the foregoing;
- Ability of the Firm to maintain the security of its financial, accounting, technology, data processing and other operational systems and facilities;
- Ability of the Firm to withstand disruptions that may be caused by any failure of its operational systems or those of third parties;
- Ability of the Firm to effectively defend itself against cyber attacks and other attempts by unauthorized parties to access information of the Firm or its customers or to disrupt the Firm's systems; and
- The other risks and uncertainties detailed in Part I, Item 1A: Risk Factors in JPMorgan Chase’s 2022 Form 10-K.

Any forward-looking statements made by or on behalf of the Firm speak only as of the date they are made, and JPMorgan Chase does not undertake to update any forward-looking statements. The reader should, however, consult any further disclosures of a forward-looking nature the Firm may make in any subsequent Form 10-Ks, Quarterly Reports on Form 10-Qs, or Current Reports on Form 8-K.

## Management's report on internal control over financial reporting

Management of JPMorgan Chase \& Co. ("JPMorgan Chase" or the "Firm") is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is a process designed by, or under the supervision of, the Firm's principal executive and principal financial officers, or persons performing similar functions, and effected by JPMorgan Chase's Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP").

JPMorgan Chase's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records, that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the Firm's assets; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. GAAP, and that receipts and expenditures of the Firm are being made only in accordance with authorizations of JPMorgan Chase's management and directors; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Firm's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. Management has completed an assessment of the effectiveness of the Firm's internal control over financial reporting as of December 31, 2022. In making the assessment, management used the "Internal Control - Integrated Framework" ("COSO 2013") promulgated by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO").

Based upon the assessment performed, management concluded that as of December 31, 2022, JPMorgan Chase's internal control over financial reporting was effective based upon the COSO 2013 framework. Additionally, based upon management's assessment, the Firm determined that there were no material weaknesses in its internal control over financial reporting as of December 31, 2022.

The effectiveness of the Firm's internal control over financial reporting as of December 31, 2022, has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which appears herein.

James Demon

Jeremy Barnum
Executive Vice President and Chief Financial Officer

February 21, 2023

## Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of JPMorgan Chase \& Co.:

## Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of JPMorgan Chase \& Co. and its subsidiaries (the "Firm") as of December 31, 2022 and 2021, and the related consolidated statements of income, comprehensive income, changes in stockholders' equity and cash flows for each of the three years in the period ended December 31, 2022, including the related notes (collectively referred to as the "consolidated financial statements"). We also have audited the Firm's internal control over financial reporting as of December 31, 2022, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Firm as of December 31, 2022 and 2021, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2022 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Firm maintained, in all material respects, effective internal control over financial reporting as of December 31, 2022, based on criteria established in Internal Control - Integrated Framework (2013) issued by the COSO.

## Change in Accounting Principle

As discussed in Note 1 to the consolidated financial statements, the Firm changed the manner in which it accounts for credit losses on certain financial instruments in 2020.

## Basis for Opinions

The Firm's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's report on internal control over financial reporting. Our responsibility is to express opinions on the Firm's consolidated financial statements and on the Firm's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Firm in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.
Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

## Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

[^136]
## Report of Independent Registered Public Accounting Firm

## Critical Audit Matters

The critical audit matters communicated below are matters arising from the current period audit of the consolidated financial statements that were communicated or required to be communicated to the audit committee and that (i) relate to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

## Allowance for Loan Losses - Portfolio-based component of Wholesale Loan and Credit Card Loan Portfolios

As described in Note 13 to the consolidated financial statements, the allowance for loan losses for the portfoliobased component of the wholesale and credit card loan portfolios was $\$ 17.0$ billion on total portfolio-based retained loans of $\$ 785.9$ billion at December 31, 2022. The Firm's allowance for loan losses represents management's estimate of expected credit losses over the remaining expected life of the Firm's Ioan portfolios and considers expected future changes in macroeconomic conditions. The portfolio-based component of the Firm's allowance for loan losses for the wholesale and credit card retained loan portfolios begins with a quantitative calculation of expected credit losses over the expected life of the loan by applying credit loss factors to the estimated exposure at default. The credit loss factors applied are determined based on the weighted average of five internally developed macroeconomic scenarios that take into consideration the Firm's economic outlook as derived through forecast macroeconomic variables, the most significant of which are U.S. unemployment and U.S. real gross domestic product. This quantitative calculation is further adjusted to take into consideration model imprecision, emerging risk assessments, trends and other subjective factors that are not yet otherwise reflected in the credit loss estimate.

The principal considerations for our determination that performing procedures relating to the allowance for loan losses for the portfolio-based component of the wholesale and credit card loan portfolios is a critical audit matter are (i) the significant judgment and estimation by management in the forecast of macroeconomic variables, specifically U.S. unemployment and U.S. real gross domestic product, as the Firm's forecasts of economic conditions significantly affect its estimate of expected credit losses at the balance sheet date, (ii) the significant judgment and estimation by management in determining the quantitative calculation utilized in their credit loss estimates and the adjustments to take into consideration model imprecision, emerging risk assessments, trends and other subjective factors that are not yet otherwise reflected in the credit loss estimate, which both in turn led to a high degree of auditor judgment, subjectivity, and effort in performing procedures and in
evaluating audit evidence obtained relating to the credit loss estimates and the appropriateness of the adjustments to the credit loss estimates, and (iii) the audit effort involved the use of professionals with specialized skill and knowledge.
Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the Firm's allowance for Ioan losses, including controls over model validation and generation of macroeconomic scenarios. These procedures also included, among others, testing management's process for estimating the allowance for loan losses, which involved (i) evaluating the appropriateness of the models and methodologies used in quantitative calculations; (ii) evaluating the reasonableness of forecasts of U.S. unemployment and U.S. real gross domestic product; (iii) testing the completeness and accuracy of data used in the estimate; and (iv) evaluating the reasonableness of management's adjustments to the quantitative output for the impacts of model imprecision, emerging risk assessments, trends and other subjective factors that are not yet otherwise reflected in the credit loss estimate. These procedures also included the use of professionals with specialized skill and knowledge to assist in evaluating the appropriateness of certain models, methodologies and macroeconomic variables.

## Fair Value of Certain Level 3 Financial Instruments

As described in Notes 2 and 3 to the consolidated financial statements, the Firm carries \$1.1 trillion of its assets and $\$ 453.7$ billion of its liabilities at fair value on a recurring basis. Included in these balances are $\$ 13.6$ billion of trading assets and $\$ 37.8$ billion of liabilities measured at fair value on a recurring basis, collectively financial instruments, which are classified as level 3 as they contain one or more inputs to valuation which are unobservable and significant to their fair value measurement. The Firm utilized internally developed valuation models and unobservable inputs to estimate fair value of the level 3 financial instruments. The unobservable inputs used by management to estimate the fair value of certain of these financial instruments include volatility relating to interest rates, correlation relating to interest rates, equity prices, credit and foreign exchange rates, and Bermudan switch values.

The principal considerations for our determination that performing procedures relating to the fair value of certain level 3 financial instruments is a critical audit matter are (i) the significant judgment and estimation by management in determining the inputs to estimate fair value, which in turn led to a high degree of auditor judgment, subjectivity, and effort in performing procedures and in evaluating audit evidence obtained related to the fair value of these financial instruments, and (ii) the audit effort involved the use of professionals with specialized skill and knowledge.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the Firm's determination of the fair value, including controls over models, inputs, and data. These procedures also included, among others, the involvement of professionals with specialized skill and knowledge to assist in developing an independent estimate of fair value for a sample of these financial instruments and comparing management's estimate to the independently developed estimate of fair value. Developing the independent estimate involved testing the completeness and accuracy of data provided by management, developing independent inputs and, as appropriate, evaluating and utilizing management's aforementioned unobservable inputs.

February 21, 2023
We have served as the Firm's auditor since 1965.

(a) The following table presents information on assets and liabilities related to VIEs that are consolidated by the Firm at December 31, 2022 and 2021. The assets of the consolidated VIEs are used to settle the liabilities of those entities. The holders of the beneficial interests do not have recourse to the general credit of JPMorgan Chase. The assets and liabilities in the table below include third-party assets and liabilities of consolidated VIEs and exclude intercompany balances that eliminate in consolidation. Refer to Note 14 for a further discussion.

The Notes to Consolidated Financial Statements are an integral part of these statements.

## Notes to consolidated financial statements

## Note 1 - Basis of presentation

JPMorgan Chase \& Co. ("JPMorgan Chase" or the "Firm"), a financial holding company incorporated under Delaware law in 1968, is a leading financial services firm based in the U.S., with operations worldwide. The Firm is a leader in investment banking, financial services for consumers and small businesses, commercial banking, financial transaction processing and asset management. Refer to Note 32 for a further discussion of the Firm's business segments.

The accounting and financial reporting policies of JPMorgan Chase and its subsidiaries conform to U.S. GAAP. Additionally, where applicable, the policies conform to the accounting and reporting guidelines prescribed by regulatory authorities.

Certain amounts reported in prior periods have been revised to conform with the current presentation.

## Consolidation

The Consolidated Financial Statements include the accounts of JPMorgan Chase and other entities in which the Firm has a controlling financial interest. All material intercompany balances and transactions have been eliminated.

Assets held for clients in an agency or fiduciary capacity by the Firm are not assets of JPMorgan Chase and are not included on the Consolidated balance sheets.

The Firm determines whether it has a controlling financial interest in an entity by first evaluating whether the entity is a voting interest entity or a variable interest entity.

## Voting interest entities

Voting interest entities are entities that have sufficient equity and provide the equity investors voting rights that enable them to make significant decisions relating to the entity's operations. For these types of entities, the Firm's determination of whether it has a controlling interest is primarily based on the amount of voting equity interests held. Entities in which the Firm has a controlling financial interest, through ownership of the majority of the entities' voting equity interests, or through other contractual rights that give the Firm control, are consolidated by the Firm.

Investments in companies in which the Firm has significant influence over operating and financing decisions (but does not own a majority of the voting equity interests) are accounted for (i) in accordance with the equity method of accounting, or (ii) at fair value if the fair value option was elected. These investments are generally included in other assets, with income or loss included in noninterest revenue.

Certain Firm-sponsored asset management funds are structured as limited partnerships or limited liability companies. For many of these entities, the Firm is the general partner or managing member, but the nonaffiliated partners or members have the ability to remove the Firm as the general partner or managing member without cause (i.e., kick-out rights), based on a simple majority vote, or the non-affiliated partners or members
have rights to participate in important decisions. Accordingly, the Firm does not consolidate these voting interest entities. However, in the limited cases where the non-managing partners or members do not have substantive kick-out or participating rights, the Firm evaluates the funds as VIEs and consolidates the funds if the Firm is the general partner or managing member and has both power and a potentially significant interest.

The Firm's investment companies and asset management funds have investments in both publicly-held and privatelyheld entities, including investments in buyouts, growth equity and venture opportunities. These investments are accounted for under investment company guidelines and, accordingly, irrespective of the percentage of equity ownership interests held, are carried on the Consolidated balance sheets at fair value, and are recorded in other assets, with income or loss included in noninterest revenue. If consolidated, the Firm retains the accounting under such specialized investment company guidelines.

## Variable interest entities

VIEs are entities that, by design, either (1) lack sufficient equity to permit the entity to finance its activities without additional subordinated financial support from other parties, or (2) have equity investors that do not have the ability to make significant decisions relating to the entity's operations through voting rights, or do not have the obligation to absorb the expected losses, or do not have the right to receive the residual returns of the entity.

The most common type of VIE is an SPE. SPEs are commonly used in securitization transactions in order to isolate certain assets and distribute the cash flows from those assets to investors. The basic SPE structure involves a company selling assets to the SPE; the SPE funds the purchase of those assets by issuing securities to investors. The legal documents that govern the transaction specify how the cash earned on the assets must be allocated to the SPE's investors and other parties that have rights to those cash flows. SPEs are generally structured to insulate investors from claims on the SPE's assets by creditors of other entities, including the creditors of the seller of the assets.

The primary beneficiary of a VIE (i.e., the party that has a controlling financial interest) is required to consolidate the assets and liabilities of the VIE. The primary beneficiary is the party that has both (1) the power to direct the activities of the VIE that most significantly impact the VIE's economic performance; and (2) through its interests in the VIE, the obligation to absorb losses or the right to receive benefits from the VIE that could potentially be significant to the VIE.

To assess whether the Firm has the power to direct the activities of a VIE that most significantly impact the VIE's economic performance, the Firm considers all the facts and circumstances, including its role in establishing the VIE and its ongoing rights and responsibilities. This assessment
includes, first, identifying the activities that most significantly impact the VIE's economic performance; and second, identifying which party, if any, has power over those activities. In general, the parties that make the most significant decisions affecting the VIE (such as asset managers, collateral managers, servicers, or owners of call options or liquidation rights over the VIE's assets) or have the right to unilaterally remove those decision-makers are deemed to have the power to direct the activities of a VIE.

To assess whether the Firm has the obligation to absorb losses of the VIE or the right to receive benefits from the VIE that could potentially be significant to the VIE, the Firm considers all of its economic interests, including debt and equity investments, servicing fees, and derivatives or other arrangements deemed to be variable interests in the VIE. This assessment requires that the Firm apply judgment in determining whether these interests, in the aggregate, are considered potentially significant to the VIE. Factors considered in assessing significance include: the design of the VIE, including its capitalization structure; subordination of interests; payment priority; relative share of interests held across various classes within the VIE's capital structure; and the reasons why the interests are held by the Firm.

The Firm performs on-going reassessments of: (1) whether entities previously evaluated under the majority votinginterest framework have become VIEs, based on certain events, and are therefore subject to the VIE consolidation framework; and (2) whether changes in the facts and circumstances regarding the Firm's involvement with a VIE cause the Firm's consolidation conclusion to change.

Refer to Note 14 for further discussion of the Firm's VIEs.

## Revenue recognition

## Interest income

The Firm recognizes interest income on loans, debt securities, and other debt instruments, generally on a levelyield basis, based on the underlying contractual rate. Refer to Note 7 for further information.

## Revenue from contracts with customers

JPMorgan Chase recognizes noninterest revenue from certain contracts with customers, in investment banking fees, deposit-related fees, asset management administration and commissions, and components of card income, when the Firm's related performance obligations are satisfied. Refer to Note 6 for further discussion of the Firm's revenue from contracts with customers.

## Principal transactions revenue

JPMorgan Chase carries a portion of its assets and liabilities at fair value. Changes in fair value are reported primarily in principal transactions revenue. Refer to Notes 2 and 3 for further discussion of fair value measurement. Refer to Note 6 for further discussion of principal transactions revenue.

Use of estimates in the preparation of consolidated financial statements
The preparation of the Consolidated Financial Statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, revenue and expense, and disclosures of contingent assets and liabilities. Actual results could be different from these estimates.

## Foreign currency translation

JPMorgan Chase revalues assets, liabilities, revenue and expense denominated in non-U.S. currencies into U.S. dollars using applicable exchange rates.

Gains and losses relating to translating functional currency financial statements for U.S. reporting are included in the Consolidated statements of comprehensive income. Gains and losses relating to nonfunctional currency transactions, including non-U.S. operations where the functional currency is the U.S. dollar, are reported in the Consolidated statements of income.

## Offsetting assets and liabilities

U.S. GAAP permits entities to present derivative receivables and derivative payables with the same counterparty and the related cash collateral receivables and payables on a net basis on the Consolidated balance sheets when a legally enforceable master netting agreement exists. U.S. GAAP also permits securities sold and purchased under repurchase agreements and securities borrowed or loaned under securities loan agreements to be presented net when specified conditions are met, including the existence of a legally enforceable master netting agreement. The Firm has elected to net such balances where it has determined that the specified conditions are met.

The Firm uses master netting agreements to mitigate counterparty credit risk in certain transactions, including derivative contracts, resale, repurchase, securities borrowed and securities loaned agreements. A master netting agreement is a single agreement with a counterparty that permits multiple transactions governed by that agreement to be terminated or accelerated and settled through a single payment in a single currency in the event of a default (e.g., bankruptcy, failure to make a required payment or securities transfer or deliver collateral or margin when due). Upon the exercise of derivatives termination rights by the non-defaulting party (i) all transactions are terminated, (ii) all transactions are valued and the positive values of "in the money" transactions are netted against the negative values of "out of the money" transactions and (iii) the only remaining payment obligation is of one of the parties to pay the netted termination amount. Upon exercise of default rights under repurchase agreements and securities loan agreements in general (i) all transactions are terminated and accelerated, (ii) all values of securities or cash held or to be delivered are calculated, and all such sums are netted against each other and (iii) the only remaining payment obligation is of one of the parties to pay the netted termination amount.

## Notes to consolidated financial statements

Typical master netting agreements for these types of transactions also often contain a collateral/margin agreement that provides for a security interest in, or title transfer of, securities or cash collateral/margin to the party that has the right to demand margin (the "demanding party"). The collateral/margin agreement typically requires a party to transfer collateral/margin to the demanding party with a value equal to the amount of the margin deficit on a net basis across all transactions governed by the master netting agreement, less any threshold. The collateral/margin agreement grants to the demanding party, upon default by the counterparty, the right to set-off any amounts payable by the counterparty against any posted collateral or the cash equivalent of any posted collateral/margin. It also grants to the demanding party the right to liquidate collateral/margin and to apply the proceeds to an amount payable by the counterparty.
Refer to Note 5 for further discussion of the Firm's derivative instruments. Refer to Note 11 for further discussion of the Firm's securities financing agreements.

## Statements of cash flows

For JPMorgan Chase's Consolidated statements of cash flows, cash is defined as those amounts included in cash and due from banks and deposits with banks on the Consolidated balance sheets.

## Accounting standard adopted January 1, 2023 Financial Instruments - Credit Losses: Troubled Debt Restructurings ("TDRs")

The adoption of this guidance eliminates the accounting and disclosure requirements for TDRs, including the requirement to measure the allowance using a discounted cash flow ("DCF") methodology, and allows the option of a non-DCF portfolio-based approach for modified loans to troubled borrowers. If a DCF methodology is still applied for these modified loans, the discount rate must be the postmodification effective interest rate, instead of the premodification effective interest rate.
The Firm elected to apply its non-DCF, portfolio-based allowance approach for modified loans to troubled borrowers for all portfolios except modified nonaccrual risk-rated loans which the Firm elected to continue applying a DCF methodology. See Note 13 for a description of the portfolio-based allowance approach and the asset-specific allowance approach.

This guidance was adopted on January 1, 2023 under the modified retrospective method which resulted in a net decrease to the allowance for credit losses of approximately $\$ 600$ million and an increase to retained earnings of approximately $\$ 450$ million, after-tax predominantly driven by residential real estate and credit card.

## Accounting standard adopted January 1, 2020

## Financial Instruments - Credit Losses ("CECL")

The adoption of this guidance established a single allowance framework for all financial assets measured at amortized cost and certain off-balance sheet credit exposures. This framework requires that management's estimate reflects credit losses over the instrument's remaining expected life and considers expected future changes in macroeconomic conditions. Prior to the adoption of the CECL accounting guidance, the Firm's allowance for credit losses represented management's estimate of probable credit losses inherent in the Firm's retained loan portfolios and certain lending-related commitments.

Significant accounting policies The following table identifies JPMorgan Chase's other significant accounting policies and the Note and page where a detailed description of each policy can be found.

## Note 2 - Fair value measurement

JPMorgan Chase carries a portion of its assets and liabilities at fair value. These assets and liabilities are predominantly carried at fair value on a recurring basis (i.e., assets and liabilities that are measured and reported at fair value on the Firm's Consolidated balance sheets). Certain assets, liabilities and unfunded lending-related commitments are measured at fair value on a nonrecurring basis; that is, they are not measured at fair value on an ongoing basis but are subject to fair value adjustments only in certain circumstances (for example, when there is evidence of impairment).
Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value is based on quoted market prices or inputs, where available. If prices or quotes are not available, fair value is based on valuation models and other valuation techniques that consider relevant transaction characteristics (such as maturity) and use, as inputs, observable or unobservable market parameters, including yield curves, interest rates, volatilities, prices (such as commodity, equity or debt prices), correlations, foreign exchange rates and credit curves. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value, as described below.

The level of precision in estimating unobservable market inputs or other factors can affect the amount of gain or loss recorded for a particular position. Furthermore, while the Firm believes its valuation methods are appropriate and consistent with those of other market participants, the methods and assumptions used reflect management judgment and may vary across the Firm's businesses and portfolios.
The Firm uses various methodologies and assumptions in the determination of fair value. The use of different methodologies or assumptions by other market participants compared with those used by the Firm could result in the Firm deriving a different estimate of fair value at the reporting date.

## Valuation process

Risk-taking functions are responsible for providing fair value estimates for assets and liabilities carried on the Consolidated balance sheets at fair value. The Firm's Valuation Control Group ("VCG"), which is part of the Firm's Finance function and independent of the risk-taking functions, is responsible for verifying these estimates and determining any fair value adjustments that may be required to ensure that the Firm's positions are recorded at fair value. In addition, the Firm's Valuation Governance Forum ("VGF"), which is composed of senior finance and risk executives, is responsible for overseeing the management of risks arising from valuation activities conducted across the Firm. The Firmwide VGF is chaired by the Firmwide head of the VCG (under the direction of the Firm's Controller), and includes sub-forums covering the

CIB, CCB, CB, AWM and certain corporate functions including Treasury and CIO.

## Price verification process

The VCG verifies fair value estimates provided by the risktaking functions by leveraging independently derived prices, valuation inputs and other market data, where available. Where independent prices or inputs are not available, the VCG performs additional review to ensure the reasonableness of the estimates. The additional review may include evaluating the limited market activity including client unwinds, benchmarking valuation inputs to those used for similar instruments, decomposing the valuation of structured instruments into individual components, comparing expected to actual cash flows, reviewing profit and loss trends, and reviewing trends in collateral valuation. There are also additional levels of management review for more significant or complex positions.
The VCG determines any valuation adjustments that may be required to the estimates provided by the risk-taking functions. No adjustments to quoted prices are applied for instruments classified within level 1 of the fair value hierarchy (refer to the discussion below for further information on the fair value hierarchy). For other positions, judgment is required to assess the need for valuation adjustments to appropriately reflect liquidity considerations, unobservable parameters, and, for certain portfolios that meet specified criteria, the size of the net open risk position. The determination of such adjustments follows a consistent framework across the Firm:

- Liquidity valuation adjustments are considered where an observable external price or valuation parameter exists but is of lower reliability, potentially due to lower market activity. Liquidity valuation adjustments are made based on current market conditions. Factors that may be considered in determining the liquidity adjustment include analysis of: (1) the estimated bidoffer spread for the instrument being traded; (2) alternative pricing points for similar instruments in active markets; and (3) the range of reasonable values that the price or parameter could take.
- The Firm manages certain portfolios of financial instruments on the basis of net open risk exposure and, as permitted by U.S. GAAP, has elected to estimate the fair value of such portfolios on the basis of a transfer of the entire net open risk position in an orderly transaction. Where this is the case, valuation adjustments may be necessary to reflect the cost of exiting a larger-than-normal market-size net open risk position. Where applied, such adjustments are based on factors that a relevant market participant would consider in the transfer of the net open risk position, including the size of the adverse market move that is likely to occur during the period required to reduce the net open risk position to a normal market-size.

## Notes to consolidated financial statements

- Uncertainty adjustments related to unobservable parameters may be made when positions are valued using prices or input parameters to valuation models that are unobservable due to a lack of market activity or because they cannot be implied from observable market data. Such prices or parameters must be estimated and are, therefore, subject to management judgment. Adjustments are made to reflect the uncertainty inherent in the resulting valuation estimate.
- Where appropriate, the Firm also applies adjustments to its estimates of fair value in order to appropriately reflect counterparty credit quality (CVA), the Firm's own creditworthiness (DVA) and the impact of funding (FVA), using a consistent framework across the Firm. Refer to Credit and funding adjustments on page 184 of this Note for more information on such adjustments.

## Valuation model review and approval

If prices or quotes are not available for an instrument or a similar instrument, fair value is generally determined using valuation models that consider relevant transaction terms such as maturity and use as inputs market-based or independently sourced parameters. Where this is the case the price verification process described above is applied to the inputs in those models.
Under the Firm's Estimations and Model Risk Management Policy, MRGR reviews and approves new models, as well as material changes to existing models, prior to implementation in the operating environment. In certain circumstances exceptions may be granted to the Firm's policy to allow a model to be used prior to review or approval. MRGR may also require the user to take appropriate actions to mitigate the model risk if it is to be used in the interim. These actions will depend on the model and may include, for example, limitation of trading activity.

## Fair value hierarchy

A three-level fair value hierarchy has been established under U.S. GAAP for disclosure of fair value measurements. The fair value hierarchy is based on the observability of inputs to the valuation of an asset or liability as of the measurement date. The three levels are defined as follows.

- Level 1 - inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.
- Level 2 - inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.
- Level 3 - one or more inputs to the valuation methodology are unobservable and significant to the fair value measurement.
A financial instrument's categorization within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

The following table describes the valuation methodologies generally used by the Firm to measure its significant products/ instruments at fair value, including the general classification of such instruments pursuant to the fair value hierarchy.

|  |  | Classifications in the fair value |
| :--- | :---: | :--- |
| Product/instrument | Valuation methodology | hierarchy |

## Notes to consolidated financial statements

| Product/instrument | Valuation methodology | Classifications in the fair value <br> hierarchy |
| :--- | :--- | :--- |
| Derivatives | Actively traded derivatives, e.g., exchange-traded derivatives, that are <br> valued using quoted prices. | Level 1 |
|  | Derivatives that are valued using models such as the Black-Scholes <br> option pricing model, simulation models, or a combination of models <br> that may use observable or unobservable valuation inputs as well as <br> considering the contractual terms. | Level 2 or 3 |

(a) Excludes certain investments that are measured at fair value using the net asset value per share (or its equivalent) as a practical expedient.

| Product/instrument | Valuation methodology | Classification in the fair value <br> hierarchy |
| :--- | :--- | :--- |
| Structured notes (included in <br> deposits, short-term <br> borrowings and long-term <br> debt) | Valuations are based on discounted cash flow analyses that consider the <br> embedded derivative and the terms and payment structure of the note. | Level 2 or 3 <br> The embedded derivative features are considered using models such as <br> the Black-Scholes option pricing model, simulation models, or a <br> combination of models that may use observable or unobservable <br> valuation inputs, depending on the embedded derivative. The specific <br> inputs used vary according to the nature of the embedded derivative <br> features, as described in the discussion above regarding derivatives <br> valuation. Adjustments are then made to this base valuation to reflect <br> the Firm's own credit risk (DVA). Refer to page 184 of this Note. |

## Notes to consolidated financial statements

The following table presents the assets and liabilities reported at fair value as of December 31, 2022 and 2021, by major product category and fair value hierarchy.

(a) At December 31, 2022 and 2021, included total U.S. GSE obligations of $\$ 73.8$ billion and $\$ 73.9$ billion, respectively, which were mortgage-related.
(b) Physical commodities inventories are generally accounted for at the lower of cost or net realizable value. "Net realizable value" is a term defined in U.S. GAAP as not exceeding fair value less costs to sell ("transaction costs"). Transaction costs for the Firm's physical commodities inventories are either not applicable or immaterial to the value of the inventory. Therefore, net realizable value approximates fair value for the Firm's physical commodities inventories. When fair value hedging has been applied (or when net realizable value is below cost), the carrying value of physical commodities approximates fair value, because under fair value hedge accounting, the cost basis is adjusted for changes in fair value. Refer to Note 5 for a further discussion of the Firm's hedge accounting relationships. To provide consistent fair value disclosure information, all physical commodities inventories have been included in each period presented.
(c) Balances reflect the reduction of securities owned (long positions) by the amount of identical securities sold but not yet purchased (short positions).

## Notes to consolidated financial statements

(d) Certain investments that are measured at fair value using the net asset value per share (or its equivalent) as a practical expedient are not required to be classified in the fair value hierarchy. At December 31, 2022 and 2021, the fair values of these investments, which include certain hedge funds, private equity funds, real estate and other funds, were $\$ 950$ million and $\$ 801$ million, respectively. Included in these balances at December 31, 2022 and 2021 , were trading assets of $\$ 43$ million and $\$ 51$ million, respectively, and other assets of $\$ 907$ million and $\$ 750$ million, respectively.
(e) At December 31, 2022 and 2021, included $\$ 9.7$ billion and $\$ 26.2$ billion, respectively, of residential first-lien mortgages, and $\$ 6.8$ billion and $\$ 8.2$ billion, respectively, of commercial first-lien mortgages. Residential mortgage loans include conforming mortgage loans originated with the intent to sell to U.S. GSEs and government agencies of $\$ 2.4$ billion and $\$ 13.6$ billion, respectively.
(f) As permitted under U.S. GAAP, the Firm has elected to net derivative receivables and derivative payables and the related cash collateral received and paid when a legally enforceable master netting agreement exists. The level 3 balances would be reduced if netting were applied, including the netting benefit associated with cash collateral.

## Level 3 valuations

The Firm has established well-structured processes for determining fair value, including for instruments where fair value is estimated using significant unobservable inputs (level 3). Refer to pages 167-171 of this Note for further information on the Firm's valuation process and a detailed discussion of the determination of fair value for individual financial instruments.

Estimating fair value requires the application of judgment. The type and level of judgment required is largely dependent on the amount of observable market information available to the Firm. For instruments valued using internally developed valuation models and other valuation techniques that use significant unobservable inputs and are therefore classified within level 3 of the fair value hierarchy, judgments used to estimate fair value are more significant than those required when estimating the fair value of instruments classified within levels 1 and 2.
In arriving at an estimate of fair value for an instrument within level 3, management must first determine the appropriate valuation model or other valuation technique to use. Second, due to the lack of observability of significant inputs, management must assess relevant empirical data in deriving valuation inputs including transaction details, yield curves, interest rates, prepayment speed, default rates, volatilities, correlations, prices (such as commodity, equity or debt prices), valuations of comparable instruments, foreign exchange rates and credit curves.
The following table presents the Firm's primary level 3 financial instruments, the valuation techniques used to measure the fair value of those financial instruments, the significant unobservable inputs, the range of values for those inputs and the weighted or arithmetic averages of such inputs. While the determination to classify an instrument within level 3 is based on the significance of the unobservable inputs to the overall fair value measurement, level 3 financial instruments typically include observable components (that is, components that are actively quoted and can be validated to external sources) in addition to the unobservable components. The level 1 and/or level 2 inputs are not included in the table. In addition, the Firm manages the risk of the observable components of level 3 financial instruments using securities and derivative positions that are classified within levels 1 or 2 of the fair value hierarchy.

The range of values presented in the table is representative of the highest and lowest level input used to value the significant groups of instruments within a product/instrument classification. Where provided, the weighted averages of the input values presented in the table are calculated based on the fair value of the instruments that the input is being used to value.

In the Firm's view, the input range, weighted and arithmetic average values do not reflect the degree of input uncertainty or an assessment of the reasonableness of the Firm's estimates and assumptions. Rather, they reflect the characteristics of the various instruments held by the Firm and the relative distribution of instruments within the range of characteristics. For example, two option contracts may have similar levels of market risk exposure and valuation uncertainty, but may have significantly different implied volatility levels because the option contracts have different underlyings, tenors, or strike prices. The input range and weighted average values will therefore vary from period-toperiod and parameter-to-parameter based on the characteristics of the instruments held by the Firm at each balance sheet date.

(a) The categories presented in the table have been aggregated based upon the product type, which may differ from their classification on the Consolidated balance sheets. Furthermore, the inputs presented for each valuation technique in the table are, in some cases, not applicable to every instrument valued using the technique as the characteristics of the instruments can differ.
(b) Comprises U.S. GSE and government agency securities of $\$ 752$ million, nonagency securities of $\$ 5$ million and non-trading loans of $\$ 892$ million.
(c) Comprises U.S. GSE and government agency securities of $\$ 7$ million, nonagency securities of $\$ 7$ million, trading loans of $\$ 40$ million and non-trading loans of $\$ 369$ million.
(d) Comprises trading loans of $\$ 719$ million and non-trading loans of $\$ 157$ million.
(e) Long-term debt, short-term borrowings and deposits include structured notes issued by the Firm that are financial instruments that typically contain embedded derivatives. The estimation of the fair value of structured notes includes the derivative features embedded within the instrument. The significant unobservable inputs are broadly consistent with those presented for derivative receivables.
(f) Includes equity securities of $\$ 880$ million including $\$ 216$ million in Other assets, for which quoted prices are not readily available and the fair value is generally based on internal valuation techniques such as EBITDA multiples and comparable analysis. All other level 3 assets and liabilities are insignificant both individually and in aggregate.
(g) Price is a significant unobservable input for certain instruments. When quoted market prices are not readily available, reliance is generally placed on pricebased internal valuation techniques. The price input is expressed assuming a par value of $\$ 100$.
(h) Forward equity price is expressed as a percentage of the current equity price.
(i) Amounts represent weighted averages except for derivative related inputs where arithmetic averages are used.

Changes in and ranges of unobservable inputs
The following discussion provides a description of the impact on a fair value measurement of a change in each unobservable input in isolation, and the interrelationship between unobservable inputs, where relevant and significant. The impact of changes in inputs may not be independent, as a change in one unobservable input may give rise to a change in another unobservable input. Where relationships do exist between two unobservable inputs, those relationships are discussed below. Relationships may also exist between observable and unobservable inputs (for example, as observable interest rates rise, unobservable prepayment rates decline); such relationships have not been included in the discussion below. In addition, for each of the individual relationships described below, the inverse relationship would also generally apply.
The following discussion also provides a description of attributes of the underlying instruments and external market factors that affect the range of inputs used in the valuation of the Firm's positions.
Yield - The yield of an asset is the interest rate used to discount future cash flows in a discounted cash flow calculation. An increase in the yield, in isolation, would result in a decrease in a fair value measurement.

Credit spread - The credit spread is the amount of additional annualized return over the market interest rate that a market participant would demand for taking exposure to the credit risk of an instrument. The credit spread for an instrument forms part of the discount rate used in a discounted cash flow calculation. Generally, an increase in the credit spread would result in a decrease in a fair value measurement.

The yield and the credit spread of a particular mortgagebacked security primarily reflect the risk inherent in the instrument. The yield is also impacted by the absolute level of the coupon paid by the instrument (which may not correspond directly to the level of inherent risk). Therefore, the range of yield and credit spreads reflects the range of risk inherent in various instruments owned by the Firm. The risk inherent in mortgage-backed securities is driven by the subordination of the security being valued and the characteristics of the underlying mortgages within the collateralized pool, including borrower FICO scores, LTV ratios for residential mortgages and the nature of the property and/or any tenants for commercial mortgages. For corporate debt securities, obligations of U.S. states and municipalities and other similar instruments, credit spreads reflect the credit quality of the obligor and the tenor of the obligation.
Prepayment speed - The prepayment speed is a measure of the voluntary unscheduled principal repayments of a prepayable obligation in a collateralized pool. Prepayment speeds generally decline as borrower delinquencies rise. An increase in prepayment speeds, in isolation, would result in a decrease in a fair value measurement of assets valued at a premium to par and an increase in a fair value measurement of assets valued at a discount to par.

Prepayment speeds may vary from collateral pool to collateral pool, and are driven by the type and location of the underlying borrower, and the remaining tenor of the obligation as well as the level and type (e.g., fixed or floating) of interest rate being paid by the borrower. Typically collateral pools with higher borrower credit quality have a higher prepayment rate than those with lower borrower credit quality, all other factors being equal.

Conditional default rate - The conditional default rate is a measure of the reduction in the outstanding collateral balance underlying a collateralized obligation as a result of defaults. While there is typically no direct relationship between conditional default rates and prepayment speeds, collateralized obligations for which the underlying collateral has high prepayment speeds will tend to have lower conditional default rates. An increase in conditional default rates would generally be accompanied by an increase in loss severity and an increase in credit spreads. An increase in the conditional default rate, in isolation, would result in a decrease in a fair value measurement. Conditional default rates reflect the quality of the collateral underlying a securitization and the structure of the securitization itself. Based on the types of securities owned in the Firm's marketmaking portfolios, conditional default rates are most typically at the lower end of the range presented.
Loss severity - The loss severity (the inverse concept is the recovery rate) is the expected amount of future realized losses resulting from the ultimate liquidation of a particular loan, expressed as the net amount of loss relative to the outstanding loan balance. An increase in loss severity is generally accompanied by an increase in conditional default rates. An increase in the loss severity, in isolation, would result in a decrease in a fair value measurement.

The loss severity applied in valuing a mortgage-backed security investment depends on factors relating to the underlying mortgages, including the LTV ratio, the nature of the lender's lien on the property and other instrumentspecific factors.

## Notes to consolidated financial statements

Correlation - Correlation is a measure of the relationship between the movements of two variables. Correlation is a pricing input for a derivative product where the payoff is driven by one or more underlying risks. Correlation inputs are related to the type of derivative (e.g., interest rate, credit, equity, foreign exchange and commodity) due to the nature of the underlying risks. When parameters are positively correlated, an increase in one parameter will result in an increase in the other parameter. When parameters are negatively correlated, an increase in one parameter will result in a decrease in the other parameter. An increase in correlation can result in an increase or a decrease in a fair value measurement. Given a short correlation position, an increase in correlation, in isolation, would generally result in a decrease in a fair value measurement.

The level of correlation used in the valuation of derivatives with multiple underlying risks depends on a number of factors including the nature of those risks. For example, the correlation between two credit risk exposures would be different than that between two interest rate risk exposures. Similarly, the tenor of the transaction may also impact the correlation input, as the relationship between the underlying risks may be different over different time periods.
Furthermore, correlation levels are very much dependent on market conditions and could have a relatively wide range of levels within or across asset classes over time, particularly in volatile market conditions.

Volatility - Volatility is a measure of the variability in possible returns for an instrument, parameter or market index given how much the particular instrument, parameter or index changes in value over time. Volatility is a pricing input for options, including equity options, commodity options, and interest rate options. Generally, the higher the volatility of the underlying, the riskier the instrument. Given a long position in an option, an increase in volatility, in isolation, would generally result in an increase in a fair value measurement.

The level of volatility used in the valuation of a particular option-based derivative depends on a number of factors, including the nature of the risk underlying the option (e.g., the volatility of a particular equity security may be significantly different from that of a particular commodity index), the tenor of the derivative as well as the strike price of the option.

Bermudan switch value - The switch value is the difference between the overall value of a Bermudan swaption, which can be exercised at multiple points in time, and its most expensive European swaption and reflects the additional value that the multiple exercise dates provide the holder. Switch values are dependent on market conditions and can vary greatly depending on a number of factors, such as the tenor of the underlying swap as well as the strike price of the option. An increase in switch value, in isolation, would generally result in an increase in a fair value measurement.

Interest rate curve - represents the relationship of interest rates over differing tenors. The interest rate curve is used to set interest rate and foreign exchange derivative cash flows and is also a pricing input used in the discounting of any derivative cash flow.
Forward price - Forward price is the price at which the buyer agrees to purchase the asset underlying a forward contract on the predetermined future delivery date, and is such that the value of the contract is zero at inception.
The forward price is used as an input in the valuation of certain derivatives and depends on a number of factors including interest rates, the current price of the underlying asset, and the expected income to be received and costs to be incurred by the seller as a result of holding that asset until the delivery date. An increase in the forward can result in an increase or a decrease in a fair value measurement.

Changes in level 3 recurring fair value measurements The following tables include a rollforward of the Consolidated balance sheets amounts (including changes in fair value) for financial instruments classified by the Firm within level 3 of the fair value hierarchy for the years ended December 31, 2022, 2021 and 2020. When a determination is made to classify a financial instrument within level 3 , the determination is based on the significance of the unobservable inputs to the overall fair value measurement. However, level 3 financial instruments typically include, in addition to the unobservable or level 3 components, observable components (that is, components that are actively quoted and can be validated to external sources); accordingly, the gains and losses in the table below include changes in fair value due in part to observable factors that are part of the valuation methodology. Also, the Firm riskmanages the observable components of level 3 financial instruments using securities and derivative positions that are classified within level 1 or 2 of the fair value hierarchy; as these level 1 and level 2 risk management instruments are not included below, the gains or losses in the following tables do not reflect the effect of the Firm's risk management activities related to such level 3 instruments.

Notes to consolidated financial statements

| Year ended December 31, 2021 (in millions) | Fair value measurements using significant unobservable inputs |  |  |  |  |  |  |  |  | Change in unrealized gains/(losses) related to financial instruments held at Dec. 31, 2021 |

## Notes to consolidated financial statements

(a) Level 3 assets at fair value as a percentage of total Firm assets at fair value (including assets measured at fair value on a nonrecurring basis) were $2 \%$ at both December 31, 2022 and December 31, 2021 and $1 \%$ at December 31, 2020. Level 3 liabilities at fair value as a percentage of total Firm liabilities at fair value (including liabilities measured at fair value on a nonrecurring basis) were $8 \%, 10 \%$ and $9 \%$ at December 31, 2022, 2021 and 2020 , respectively.
(b) All level 3 derivatives are presented on a net basis, irrespective of the underlying counterparty.
(c) Predominantly reported in principal transactions revenue, except for changes in fair value for CCB mortgage loans and lending-related commitments originated with the intent to sell, and mortgage loan purchase commitments, which are reported in mortgage fees and related income.
(d) Realized gains/(losses) on AFS securities are reported in investment securities gains/(losses). Unrealized gains/(losses) are reported in OCI. Realized and unrealized gains/(losses) recorded on AFS securities were not material for the years ended December 31, 2022, 2021 and 2020.
(e) Changes in fair value for MSRs are reported in mortgage fees and related income.
(f) Realized (gains)/losses due to DVA for fair value option elected liabilities are reported in principal transactions revenue, and were not material for the years ended December 31, 2022, 2021 and 2020. Unrealized (gains)/losses are reported in OCI, and they were $\$(529$ ) million, $\$ 258$ million and $\$ 221$ million for the years ended December 31, 2022, 2021 and 2020, respectively.
(g) Loan originations are included in purchases.
(h) Includes financial assets and liabilities that have matured, been partially or fully repaid, impacts of modifications, deconsolidations associated with beneficial interests in VIEs and other items.

## Level 3 analysis

## Consolidated balance sheets changes

The following describes significant changes to level 3 assets since December 31, 2021, for those items measured at fair value on a recurring basis. Refer to Assets and liabilities measured at fair value on a nonrecurring basis on page 185 for further information on changes impacting items measured at fair value on a nonrecurring basis.

For the year ended December 31, 2022
Level 3 assets were $\$ 23.6$ billion at December 31, 2022, reflecting an increase of $\$ 6.1$ billion from December 31, 2021.

The increase for the year ended December 31, 2022 was predominantly driven by:

- $\$ 3.4$ billion increase in gross derivative receivables due to gains and purchases partially offset by settlements.
- $\$ 2.5$ billion increase in MSRs.

Refer to Note 15 for information on MSRs.
Refer to the sections below for additional information.
Transfers between levels for instruments carried at fair value on a recurring basis
During the year ended December 31, 2022, significant transfers from level 2 into level 3 included the following:

- \$2.4 billion of total debt and equity instruments, predominantly due to equity securities of $\$ 1.1$ billion driven by a decrease in observability predominantly as a result of restricted access to certain markets and trading loans of $\$ 925$ million driven by a decrease in observability.
- $\$ 1.6$ billion of gross interest rate derivative receivables and $\$ 878$ million of gross interest rate derivative payables as a result of a decrease in observability and an increase in the significance of unobservable inputs.
- $\$ 1.6$ billion of gross equity derivative receivables and $\$ 2.3$ billion of gross equity derivative payables as a result of a decrease in observability and an increase in the significance of unobservable inputs.
- \$1.1 billion of non-trading loans driven by a decrease in observability.
- \$793 million of long-term debt driven by a decrease in observability and an increase in the significance of unobservable inputs for structured notes.

During the year ended December 31, 2022, significant transfers from level 3 into level 2 included the following:

- $\$ 1.2$ billion of total debt and equity instruments, largely due to trading loans, driven by an increase in observability.
- $\$ 1.2$ billion of gross interest rate derivative receivables and $\$ 807$ million of gross interest rate derivative payables as a result of an increase in observability and a decrease in the significance of unobservable inputs.
- $\$ 2.2$ billion of gross equity derivative receivables and $\$ 2.3$ billion of gross equity derivative payables as a result of an increase in observability and a decrease in the significance of unobservable inputs.
- \$831 million of non-trading loans driven by an increase in observability.
- $\$ 1.0$ billion of long-term debt driven by an increase in observability and a decrease in the significance of unobservable inputs for structured notes.
During the year ended December 31, 2021, significant transfers from level 2 into level 3 included the following:
- \$1.0 billion of total debt and equity instruments, largely due to trading loans, driven by a decrease in observability.
- \$1.5 billion of gross equity derivative receivables and $\$ 1.2$ billion of gross equity derivative payables as a result of a decrease in observability and an increase in the significance of unobservable inputs.
- $\$ 1.3$ billion of non-trading loans driven by a decrease in observability.

During the year ended December 31, 2021, significant transfers from level 3 into level 2 included the following:

- \$1.4 billion of total debt and equity instruments, largely due to trading loans, driven by an increase in observability.
- $\$ 1.9$ billion of gross equity derivative receivables and $\$ 2.1$ billion of gross equity derivative payables as a result of an increase in observability and a decrease in the significance of unobservable inputs.
- \$794 million of non-trading loans driven by an increase in observability.
- $\$ 809$ million of long-term debt driven by an increase in observability and a decrease in the significance of unobservable inputs for structured notes.

During the year ended December 31, 2020, significant transfers from level 2 into level 3 included the following:

- $\$ 1.8$ billion of total debt and equity instruments, predominantly equity securities and trading loans, driven by a decrease in observability.
- $\$ 2.6$ billion of gross equity derivative receivables and $\$ 3.5$ billion of gross equity derivative payables as a result of a decrease in observability and an increase in the significance of unobservable inputs.
- $\$ 880$ million of gross interest rate derivative payables as a result of a decrease in observability and an increase in the significance of unobservable inputs.
- \$2.6 billion of non-trading loans driven by a decrease in observability.
- $\$ 1.2$ billion of long-term debt driven by a decrease in observability and an increase in the significance of unobservable inputs for structured notes.
During the year ended December 31, 2020, significant transfers from level 3 into level 2 included the following:
- $\$ 2.0$ billion of total debt and equity instruments, predominantly due to corporate debt and trading loans, driven by an increase in observability
- \$2.4 billion of gross equity derivative receivables and $\$ 2.4$ billion of gross equity derivative payables as a result of an increase in observability and a decrease in the significance of unobservable inputs.
- \$943 million of deposits as a result of an increase in observability and a decrease in the significance of unobservable inputs.
- $\$ 1.3$ billion of long-term debt driven by an increase in observability and a decrease in the significance of unobservable inputs for structured notes.
All transfers are based on changes in the observability and/or significance of the valuation inputs and are assumed to occur at the beginning of the quarterly reporting period in which they occur.

## Gains and losses

The following describes significant components of total realized/unrealized gains/(losses) for instruments measured at fair value on a recurring basis for the years ended December 31, 2022, 2021 and 2020. These amounts exclude any effects of the Firm's risk management activities where the financial instruments are classified as level 1 and 2 of the fair value hierarchy. Refer to Changes in level 3 recurring fair value measurements rollforward tables on pages 178-182 for further information on these instruments.

## 2022

- $\$ 7.7$ billion of net gains on assets, predominantly driven by gains in net equity derivative receivables due to market movements and gains in MSRs reflecting lower prepayment speeds on higher rates.
- $\$ 4.6$ billion of net gains on liabilities, predominantly driven by a decline in the fair value of long-term debt due to market movements.

## 2021

- $\$ 495$ million of net gains on assets, driven by gains in net interest rate derivative receivables due to market movements, partially offset by losses in net equity derivative receivables and net commodity derivative receivables due to market movements.
- \$1.1 billion of net gains on liabilities, driven by gains in short-term borrowings due to market movements.

## 2020

- $\$ 10$ million of net gains on assets driven by gains in net interest rate derivative receivables due to market movements largely offset by losses in MSRs reflecting faster prepayment speeds on lower rates.
- \$102 million of net gains on liabilities driven by market movements in short-term borrowings.
Refer to Note 15 for information on MSRs.

## Notes to consolidated financial statements

Credit and funding adjustments - derivatives
Derivatives are generally valued using models that use as their basis observable market parameters. These market parameters generally do not consider factors such as counterparty nonperformance risk, the Firm's own credit quality, and funding costs. Therefore, it is generally necessary to make adjustments to the base estimate of fair value to reflect these factors.

CVA represents the adjustment, relative to the relevant benchmark interest rate, necessary to reflect counterparty nonperformance risk. The Firm estimates CVA using a scenario analysis to estimate the expected positive credit exposure across all of the Firm's existing positions with each counterparty, and then estimates losses based on the probability of default and estimated recovery rate as a result of a counterparty credit event considering contractual factors designed to mitigate the Firm's credit exposure, such as collateral and legal rights of offset. The key inputs to this methodology are (i) the probability of a default event occurring for each counterparty, as derived from observed or estimated CDS spreads; and (ii) estimated recovery rates implied by CDS spreads, adjusted to consider the differences in recovery rates as a derivative creditor relative to those reflected in CDS spreads, which generally reflect senior unsecured creditor risk.
FVA represents the adjustment to reflect the impact of funding and is recognized where there is evidence that a market participant in the principal market would incorporate it in a transfer of the instrument. The Firm's FVA framework, applied to uncollateralized (including partially collateralized) over-the-counter ("OTC") derivatives incorporates key inputs such as: (i) the expected funding requirements arising from the Firm's positions with
each counterparty and collateral arrangements; and (ii) the estimated market funding cost in the principal market which, for derivative liabilities, considers the Firm's credit risk (DVA). For collateralized derivatives, the fair value is estimated by discounting expected future cash flows at the relevant overnight indexed swap rate given the underlying collateral agreement with the counterparty, and therefore a separate FVA is not necessary.

The following table provides the impact of credit and funding adjustments on principal transactions revenue in the respective periods, excluding the effect of any associated hedging activities. The FVA presented below includes the impact of the Firm's own credit quality on the inception value of liabilities as well as the impact of changes in the Firm's own credit quality over time.

| Year ended December 31, <br> (in millions) | $\mathbf{2 0 2 2}$ | 2021 | 2020 |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: |
| Credit and funding adjustments: |  |  |  |  |  |
| Derivatives CVA | $\$$ | 22 | $\$$ | 362 | $\$$ |
| (337) |  |  |  |  |  |
| Derivatives FVA |  | 42 |  | 47 | $(64)$ |

Valuation adjustments on fair value option elected liabilities
The valuation of the Firm's liabilities for which the fair value option has been elected requires consideration of the Firm's own credit risk. DVA on fair value option elected liabilities reflects changes (subsequent to the issuance of the liability) in the Firm's probability of default and LGD, which are estimated based on changes in the Firm's credit spread observed in the bond market. Realized (gains)/losses due to DVA for fair value option elected liabilities are reported in principal transactions revenue. Unrealized (gains)/Iosses are reported in OCI. Refer to page 182 in this Note and Note 24 for further information.

## Assets and liabilities measured at fair value on a nonrecurring basis

The following tables present the assets and liabilities held as of December 31, 2022 and 2021, for which nonrecurring fair value adjustments were recorded during the years ended December 31, 2022 and 2021, by major product category and fair value hierarchy.

| December 31, 2022 (in millions) | Fair value hierarchy |  |  |  |  |  |  | Total fair value |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Level 1 |  | Level 2 |  | Level 3 |  |  |  |  |
| Loans | \$ | - | \$ | 643 | \$ | 627 | (b) | \$ | 1,270 |
| Other assets ${ }^{(a)}$ |  | - |  | 36 |  | 1,352 |  |  | 1,388 |
| Total assets measured at fair value on a nonrecurring basis | \$ | - | \$ | 679 | \$ | 1,979 |  | \$ | 2,658 |
| Accounts payable and other liabilities |  | - |  | - |  | 84 |  |  | 84 |
| Total liabilities measured at fair value on a nonrecurring basis | \$ | - | \$ | - | \$ | 84 |  | \$ | 84 |
|  |  |  | air | hierarch |  |  |  |  |  |
| (in millions) |  | Level 1 |  | Level 2 |  | Level 3 |  |  | r value |
| Loans | \$ | - | \$ | 1,006 | \$ | 856 |  | \$ | 1,862 |
| Other assets |  | - |  | 4 |  | 1,612 |  |  | 1,616 |
| Total assets measured at fair value on a nonrecurring basis | \$ | - | \$ | 1,010 | \$ | 2,468 |  | \$ | 3,478 |
| Accounts payable and other liabilities |  | - |  | - |  | 3 |  |  | 3 |
| Total liabilities measured at fair value on a nonrecurring basis | \$ | - | \$ | - | \$ | 3 |  | \$ | 3 |

(a) Primarily includes equity securities without readily determinable fair values that were adjusted based on observable price changes in orderly transactions from an identical or similar investment of the same issuer (measurement alternative). Of the $\$ 1.4$ billion in level 3 assets measured at fair value on a nonrecurring basis as of December 31, 2022, $\$ 1.2$ billion related to equity securities adjusted based on the measurement alternative. These equity securities are classified as level 3 due to the infrequency of the observable prices and/or the restrictions on the shares.
(b) Of the $\$ 627$ million in level 3 assets measured at fair value on a nonrecurring basis as of December 31, 2022, \$83 million related to residential real estate loans carried at the net realizable value of the underlying collateral (e.g., collateral-dependent loans). These amounts are classified as level 3 as they are valued using information from broker's price opinions, appraisals and automated valuation models and discounted based upon the Firm's experience with actual liquidation values. These discounts ranged from $9 \%$ to $56 \%$ with a weighted average of $23 \%$.

## Nonrecurring fair value changes

The following table presents the total change in value of assets and liabilities for which fair value adjustments have been recognized for the years ended December 31, 2022, 2021 and 2020, related to assets and liabilities held at those dates.

| December 31, (in millions) | 2022 | 2021 | 2020 |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: |
| Loans | $\$$ | $(55)$ | $\$$ | $(72)$ | $\$$ |
| Other assets ${ }^{(\text {a) }}$ |  |  |  |  |  |

(a) Included $\$(338)$ million, $\$ 379$ million and $\$(134)$ million for the years ended December 31, 2022, 2021 and 2020, respectively, of net gains/(losses) as a result of the measurement alternative.

Refer to Note 12 for further information about the measurement of collateral-dependent loans.

## Notes to consolidated financial statements

## Equity securities without readily determinable fair values

The Firm measures certain equity securities without readily determinable fair values at cost less impairment (if any), plus or minus observable price changes from an identical or similar investment of the same issuer (i.e., measurement alternative), with such changes recognized in other income.
In its determination of the new carrying values upon observable price changes, the Firm may adjust the prices if deemed necessary to arrive at the Firm's estimated fair values. Such adjustments may include adjustments to reflect the different rights and obligations of similar securities, and other adjustments that are consistent with the Firm's valuation techniques for private equity direct investments.
The following table presents the carrying value of equity securities without readily determinable fair values held as of December 31, 2022 and 2021, that are measured under the measurement alternative and the related adjustments recorded during the periods presented for those securities with observable price changes. These securities are included in the nonrecurring fair value tables when applicable price changes are observable.

| As of or for the year ended December 31, <br> (in millions) | $\mathbf{2 0 2 2}$ | 2021 |  |
| :--- | ---: | ---: | ---: |
| Other assets | $\$$ | $\mathbf{4 , 0 9 6}$ | $\$$ |
| Carrying value $^{(\text {a) }}$ | $\mathbf{4 8 8}$ | 3,642 |  |
| Upward carrying value changes ${ }^{(b)}$ | $\mathbf{( 8 2 6 )}$ | 432 |  |
| Downward carrying value changes/impairment ${ }^{(\mathrm{C})}$ |  | $(53)$ |  |

(a) The period-end carrying values reflect cumulative purchases and sales in addition to upward and downward carrying value changes.
(b) The cumulative upward carrying value changes between January 1, 2018 and December 31, 2022 were $\$ 1.4$ billion.
(c) The cumulative downward carrying value changes/impairment between January 1, 2018 and December 31, 2022 were $\$(918)$ million.

Included in other assets above is the Firm's interest in Visa Class B common shares ("Visa B shares") recorded at a nominal carrying value. In November 2022, the Firm sold approximately 3 million Visa B shares, resulting in a net pretax gain of \$914 million recorded in other income. Visa B shares are subject to certain transfer restrictions and are convertible into Visa Class A common shares ("Visa A shares") at a specified conversion rate upon final resolution of certain litigation matters involving Visa. In connection with the sale, and consistent with the Firm's sale of 20 million Visa B shares in 2013, the Firm entered into a derivative instrument with the purchaser of the shares, under which the Firm retains the risk associated with changes in the conversion rate.
Under the terms of the derivative instrument, the Firm will (a) make or receive payments based on subsequent changes in the conversion rate and (b) make periodic interest payments to the purchaser of the Visa B shares. The payments under the derivative continue as long as the Visa B shares remain subject to transfer restrictions. The derivative is accounted for at fair value using a discounted cash flow methodology based upon the Firm's estimate of the timing and magnitude of final resolution of the litigation matters. The derivative is recorded in trading liabilities and changes in fair value are recognized in other income. As of December 31, 2022, the Firm held derivative instruments associated with the 23 million Visa B shares that it has sold, which are all subject to similar terms and conditions.
As of December 31, 2022, the Firm's remaining interest in Visa B shares was approximately 37 million shares. On January 5, 2023, Visa filed a Current Report on Form 8-K with the SEC indicating that the conversion rate of Visa B shares to Visa A shares decreased from 1.6059 to 1.5991 effective December 29, 2022. The conversion rate may be further adjusted by Visa depending on developments related to the litigation matters. The outcome of those litigation matters, and the effect that the resolution of those matters may have on the conversion rate, is unknown, and accordingly, as of December 31, 2022, there is significant uncertainty regarding the date of the termination of transfer restrictions and the value of the final conversion rate. As a result of this, as well as differences in voting rights, Visa B shares are not considered to be similar to Visa A shares, and they continue to be held at their nominal carrying value.

Additional disclosures about the fair value of financial instruments that are not carried on the Consolidated balance sheets at fair value
U.S. GAAP requires disclosure of the estimated fair value of certain financial instruments, which are included in the following table. However, this table does not include other items, such as nonfinancial assets, intangible assets, certain financial instruments, and customer relationships. In the opinion of management, these items, in the aggregate, add significant value to JPMorgan Chase, but their fair value is not disclosed in this table.

Financial instruments for which carrying value approximates fair value
Certain financial instruments that are not carried at fair value on the Consolidated balance sheets are carried at amounts that approximate fair value, due to their shortterm nature and generally negligible credit risk. These instruments include cash and due from banks, deposits with banks, federal funds sold, securities purchased under resale agreements and securities borrowed, short-term receivables and accrued interest receivable, short-term borrowings, federal funds purchased, securities loaned and sold under repurchase agreements, accounts payable, and
accrued liabilities. In addition, U.S. GAAP requires that the fair value of deposit liabilities with no stated maturity (i.e., demand, savings and certain money market deposits) be
equal to their carrying value; recognition of the inherent funding value of these instruments is not permitted.

The following table presents, by fair value hierarchy classification, the carrying values and estimated fair values at December 31, 2022 and 2021, of financial assets and liabilities, excluding financial instruments that are carried at fair value on a recurring basis, and their classification within the fair value hierarchy.

(a) Fair value is typically estimated using a discounted cash flow model that incorporates the characteristics of the underlying loans (including principal, contractual interest rate and contractual fees) and other key inputs, including expected lifetime credit losses, interest rates, prepayment rates, and primary origination or secondary market spreads. For certain loans, the fair value is measured based on the value of the underlying collateral. Carrying value of the loan takes into account the loan's allowance for loan losses, which represents the loan's expected credit losses over its remaining expected life. The difference between the estimated fair value and carrying value of a loan is generally attributable to changes in market interest rates, including credit spreads, market liquidity premiums and other factors that affect the fair value of a loan but do not affect its carrying value.
(b) Prior-period amounts have been revised to conform with the current presentation.

The majority of the Firm's lending-related commitments are not carried at fair value on a recurring basis on the Consolidated balance sheets. The carrying value and the estimated fair value of these wholesale lending-related commitments were as follows for the periods indicated.

| (in billions) | December 31, 2022 |  |  |  |  |  |  |  |  | December 31, 2021 |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Estimated fair value hierarchy |  |  |  |  |  |  |  |  | Estimated fair value hierarchy |  |  |  |  |  |  |  |  |  |
|  | Carrying value ${ }^{(\mathrm{a})(\mathrm{b})}$ | Level 1 |  | Level 2 |  | Level 3 |  | Total estimated fair value |  | Carrying value ${ }^{(\mathrm{a})(\mathrm{b})}$ |  | Level 1 |  | Level 2 |  | Level 3 |  | Total estimated fair value |  |
| Wholesale lendingrelated commitments | \$ 2.3 | \$ | - \$ | \$ | - | \$ | 3.2 | \$ | 3.2 | \$ | 2.1 | \$ | - | \$ | - | \$ | 2.9 | \$ | 2.9 |

(a) Excludes the current carrying values of the guarantee liability and the offsetting asset, each of which is recognized at fair value at the inception of the guarantees.
(b) Includes the wholesale allowance for lending-related commitments.

The Firm does not estimate the fair value of consumer off-balance sheet lending-related commitments. In many cases, the Firm can reduce or cancel these commitments by providing the borrower notice or, in some cases as permitted by law, without notice. Refer to page 169 of this Note for a further discussion of the valuation of lending-related commitments.

## Note 3 - Fair value option

The fair value option provides an option to elect fair value for selected financial assets, financial liabilities, unrecognized firm commitments, and written loan commitments.
The Firm has elected to measure certain instruments at fair value for several reasons including to mitigate income statement volatility caused by the differences between the measurement basis of elected instruments (e.g., certain instruments that otherwise would be accounted for on an accrual basis) and the associated risk management arrangements that are accounted for on a fair value basis, as well as to better reflect those instruments that are managed on a fair value basis.

The Firm's election of fair value includes the following instruments:

- Loans purchased or originated as part of securitization warehousing activity, subject to bifurcation accounting, or managed on a fair value basis, including lendingrelated commitments
- Certain securities financing agreements
- Owned beneficial interests in securitized financial assets that contain embedded credit derivatives, which would otherwise be required to be separately accounted for as a derivative instrument
- Structured notes and other hybrid instruments, which are predominantly financial instruments that contain embedded derivatives, that are issued or transacted as part of client-driven activities
- Certain long-term beneficial interests issued by CIB’s consolidated securitization trusts where the underlying assets are carried at fair value

Changes in fair value under the fair value option election
The following table presents the changes in fair value included in the Consolidated statements of income for the years ended December 31, 2022, 2021 and 2020, for items for which the fair value option was elected. The profit and loss information presented below only includes the financial instruments that were elected to be measured at fair value; related risk management instruments, which are required to be measured at fair value, are not included in the table.

| December 31, (in millions) | 2022 |  |  | 2021 |  |  | 2020 |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

(a) Unrealized gains/(losses) due to instrument-specific credit risk (DVA) for liabilities for which the fair value option has been elected are recorded in OCI, while realized gains/(losses) are recorded in principal transactions revenue. Realized gains/(losses) due to instrument-specific credit risk recorded in principal transactions revenue were not material for the years ended December 31, 2022, 2021 and 2020.
(b) Long-term debt measured at fair value predominantly relates to structured notes. Although the risk associated with the structured notes is actively managed, the gains/(losses) reported in this table do not include the income statement impact of the risk management instruments used to manage such risk.
(c) Reported in mortgage fees and related income.
(d) Reported in other income.
(e) Changes in fair value exclude contractual interest, which is included in interest income and interest expense for all instruments other than certain hybrid financial instruments in CIB. Refer to Note 7 for further information regarding interest income and interest expense.

Determination of instrument-specific credit risk for items for which the fair value option was elected
The following describes how the gains and losses that are attributable to changes in instrument-specific credit risk, were determined.

- Loans and lending-related commitments: For floatingrate instruments, all changes in value are attributed to instrument-specific credit risk. For fixed-rate instruments, an allocation of the changes in value for the period is made between those changes in value that are interest rate-related and changes in value that are credit-related. Allocations are generally based on an analysis of borrower-specific credit spread and recovery
information, where available, or benchmarking to similar entities or industries.
- Long-term debt: Changes in value attributable to instrument-specific credit risk were derived principally from observable changes in the Firm's credit spread as observed in the bond market.
- Securities financing agreements: Generally, for these types of agreements, there is a requirement that collateral be maintained with a market value equal to or in excess of the principal amount loaned; as a result, there would be no adjustment or an immaterial adjustment for instrument-specific credit risk related to these agreements.

## Notes to consolidated financial statements

Difference between aggregate fair value and aggregate remaining contractual principal balance outstanding The following table reflects the difference between the aggregate fair value and the aggregate remaining contractual principal balance outstanding as of December 31, 2022 and 2021, for loans, long-term debt and long-term beneficial interests for which the fair value option has been elected.

|  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

(a) These balances are excluded from nonaccrual loans as the loans are insured and/or guaranteed by U.S. government agencies.
(b) There were no performing loans that were ninety days or more past due as of December 31, 2022 and 2021.
(c) Remaining contractual principal is not applicable to nonprincipal-protected structured notes and long-term beneficial interests. Unlike principal-protected structured notes and long-term beneficial interests, for which the Firm is obligated to return a stated amount of principal at maturity, nonprincipalprotected structured notes and long-term beneficial interests do not obligate the Firm to return a stated amount of principal at maturity, but for structured notes to return an amount based on the performance of an underlying variable or derivative feature embedded in the note. However, investors are exposed to the credit risk of the Firm as issuer for both nonprincipal-protected and principal-protected notes.
(d) Where the Firm issues principal-protected zero-coupon or discount notes, the balance reflects the contractual principal payment at maturity or, if applicable, the contractual principal payment at the Firm's next call date.
(e) Prior-period amounts have been revised to conform with the current presentation.

At December 31, 2022 and 2021, the contractual amount of lending-related commitments for which the fair value option was elected was $\$ 7.6$ billion and $\$ 11.9$ billion, respectively, with a corresponding fair value of $\$ 24$ million and $\$ 10$ million, respectively. Refer to Note 28 for further information regarding off-balance sheet lending-related financial instruments.

Structured note products by balance sheet classification and risk component
The following table presents the fair value of structured notes, by balance sheet classification and the primary risk type.

|  | December 31, 2022 |  |  |  |  |  |  |  |  | December 31, 2021 |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

(a) Excludes deposits linked to precious metals for which the fair value option has not been elected of $\$ 602$ million and $\$ 692$ million for the years ended December 31, 2022 and 2021, respectively.

## Notes to consolidated financial statements

## Note 4 - Credit risk concentrations

Concentrations of credit risk arise when a number of clients, counterparties or customers are engaged in similar business activities or activities in the same geographic region, or when they have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic conditions.

JPMorgan Chase regularly monitors various segments of its credit portfolios to assess potential credit risk concentrations and to obtain additional collateral when deemed necessary and permitted under the Firm's agreements. Senior management is significantly involved in the credit approval and review process, and risk levels are adjusted as needed to reflect the Firm's risk appetite.

In the Firm's consumer portfolio, concentrations are managed primarily by product and by U.S. geographic region, with a key focus on trends and concentrations at the portfolio level, where potential credit risk concentrations can be remedied through changes in underwriting policies and portfolio guidelines. Refer to Note 12 for additional information on the geographic composition of the Firm's consumer loan portfolios. In the wholesale portfolio, credit risk concentrations are evaluated primarily by industry and monitored regularly on both an aggregate portfolio level and on an individual client or counterparty basis.

The Firm's wholesale exposure is managed through loan syndications and participations, loan sales, securitizations, credit derivatives, master netting agreements, collateral and other risk-reduction techniques. Refer to Note 12 for additional information on loans.
The Firm does not believe that its exposure to any particular loan product or industry segment results in a significant concentration of credit risk.

Terms of loan products and collateral coverage are included in the Firm's assessment when extending credit and establishing its allowance for loan losses.

The table below presents both on-balance sheet and off-balance sheet consumer and wholesale credit exposure by the Firm's three credit portfolio segments as of December 31, 2022 and 2021. The wholesale industry of risk category is generally based on the client or counterparty's primary business activity.

| December 31, (in millions) | 2022 |  |  |  |  | 2021 |  |  |  |  |  |

| Receivables from customers ${ }^{(f)}$ | 49,257 | - |  | - | - | 59,645 | - |  |  |  | - |
| Total wholesale | 1,231,214 | 639,097 |  | 70,880 | 471,980 | 1,203,283 | 600,112 |  |  | 57,081 | 486,445 |
| Total exposure ${ }^{(\mathrm{g})(\mathrm{h})}$ | \$ 2,582,566 | \$1,135,647 |  | \$ 70,880 | \$1,326,782 | \$ 2,456,753 | \$1,077,714 |  | \$ | 57,081 | \$1,262,313 |

(a) Also includes commercial card lending-related commitments primarily in CB and CIB.
(b) The industry rankings presented in the table as of December 31, 2021, are based on the industry rankings of the corresponding exposures at December 31, 2022, not actual rankings of such exposures at December 31, 2021.
(c) Individuals and Individual Entities predominantly consists of Global Private Bank clients within AWM and J.P. Morgan Wealth Management within CCB, and includes exposure to personal investment companies and personal and testamentary trusts.
(d) In addition to the credit risk exposure to states and municipal governments (both U.S. and non-U.S.) at December 31, 2022 and 2021 , noted above, the Firm held: $\$ 6.6$ billion and $\$ 7.1$ billion, respectively, of trading assets; $\$ 6.8$ billion and $\$ 15.9$ billion, respectively, of AFS securities; and $\$ 19.7$ billion and $\$ 14.0$ billion, respectively, of HTM securities, issued by U.S. state and municipal governments. Refer to Note 2 and Note 10 for further information.
(e) All other includes: SPEs and Private education and civic organizations, representing approximately 95\% and 5\%, respectively, at December 31, 2022 and $94 \%$ and $6 \%$, respectively, at December 31, 2021. Refer to Note 14 for more information on exposures to SPEs.
(f) Receivables from customers reflect held-for-investment margin loans to brokerage clients in CIB, CCB and AWM that are collateralized by assets maintained in the clients' brokerage accounts (e.g., cash on deposit, liquid and readily marketable debt or equity securities). Because of this collateralization, no allowance for credit losses is generally held against these receivables. To manage its credit risk the Firm establishes margin requirements and monitors the required margin levels on an ongoing basis, and requires clients to deposit additional cash or other collateral, or to reduce positions, when appropriate. These receivables are reported within accrued interest and accounts receivable on the Firm's Consolidated balance sheets.
(g) Excludes cash placed with banks of $\$ 556.6$ billion and $\$ 729.6$ billion, at December 31, 2022 and 2021, respectively, which is predominantly placed with various central banks, primarily Federal Reserve Banks.
(h) Credit exposure is net of risk participations and excludes the benefit of credit derivatives used in credit portfolio management activities held against derivative receivables or loans and liquid securities and other cash collateral held against derivative receivables.
(i) At December 31, 2022 and 2021, included $\$ 350$ million and $\$ 5.4$ billion of loans in Business Banking under the PPP, respectively. PPP loans are guaranteed by the SBA. Other than in certain limited circumstances, the Firm typically does not recognize charge-offs, classify as nonaccrual nor record an allowance for loan losses on these loans.
(j) Represents lending-related financial instruments.

## Notes to consolidated financial statements

## Note 5 - Derivative instruments

Derivative contracts derive their value from underlying asset prices, indices, reference rates, other inputs or a combination of these factors and may expose counterparties to risks and rewards of an underlying asset or liability without having to initially invest in, own or exchange the asset or liability. JPMorgan Chase makes markets in derivatives for clients and also uses derivatives to hedge or manage its own risk exposures. Predominantly all of the Firm's derivatives are entered into for marketmaking or risk management purposes.

## Market-making derivatives

The majority of the Firm's derivatives are entered into for market-making purposes. Clients use derivatives to mitigate or modify interest rate, credit, foreign exchange, equity and commodity risks. The Firm actively manages the risks from its exposure to these derivatives by entering into other derivative contracts or by purchasing or selling other financial instruments that partially or fully offset the exposure from client derivatives.

## Risk management derivatives

The Firm manages certain market and credit risk exposures using derivative instruments, including derivatives in hedge accounting relationships and other derivatives that are used to manage risks associated with specified assets and liabilities.
The Firm generally uses interest rate derivatives to manage the risk associated with changes in interest rates. Fixed-rate assets and liabilities appreciate or depreciate in market value as interest rates change. Similarly, interest income and expense increase or decrease as a result of variablerate assets and liabilities resetting to current market rates, and as a result of the repayment and subsequent origination or issuance of fixed-rate assets and liabilities at current market rates. Gains and losses on the derivative instruments related to these assets and liabilities are expected to substantially offset this variability.
Foreign currency derivatives are used to manage the foreign exchange risk associated with certain foreign currency-denominated (i.e., non-U.S. dollar) assets and liabilities and forecasted transactions, as well as the Firm's net investments in certain non-U.S. subsidiaries or branches whose functional currencies are not the U.S. dollar. As a result of fluctuations in foreign currencies, the U.S. dollarequivalent values of the foreign currency-denominated assets and liabilities or the forecasted revenues or expenses increase or decrease. Gains or losses on the derivative instruments related to these foreign currency-denominated assets or liabilities, or forecasted transactions, are expected to substantially offset this variability.

Commodities derivatives are used to manage the price risk of certain commodities inventories. Gains or losses on these derivative instruments are expected to substantially offset the depreciation or appreciation of the related inventory.

Credit derivatives are used to manage the counterparty credit risk associated with loans and lending-related commitments. Credit derivatives compensate the purchaser when the entity referenced in the contract experiences a credit event, such as bankruptcy or a failure to pay an obligation when due. Credit derivatives primarily consist of CDS. Refer to the Credit derivatives section on pages 205-207 of this Note for a further discussion of credit derivatives.

Refer to the risk management derivatives gains and losses table on page 205 and the hedge accounting gains and losses tables on pages 202-204 of this Note for more information about risk management derivatives.
Derivative counterparties and settlement types
The Firm enters into OTC derivatives, which are negotiated and settled bilaterally with the derivative counterparty. The Firm also enters into, as principal, certain ETD such as futures and options, and OTC-cleared derivative contracts with CCPs. ETD contracts are generally standardized contracts traded on an exchange and cleared by the CCP, which is the Firm's counterparty from the inception of the transactions. OTC-cleared derivatives are traded on a bilateral basis and then novated to the CCP for clearing.

## Derivative clearing services

The Firm provides clearing services for clients in which the Firm acts as a clearing member at certain exchanges and clearing houses. The Firm does not reflect the clients' derivative contracts in its Consolidated Financial Statements. Refer to Note 28 for further information on the Firm's clearing services.

## Accounting for derivatives

All free-standing derivatives that the Firm executes for its own account are required to be recorded on the Consolidated balance sheets at fair value.
As permitted under U.S. GAAP, the Firm nets derivative assets and liabilities, and the related cash collateral receivables and payables, when a legally enforceable master netting agreement exists between the Firm and the derivative counterparty. Refer to Note 1 for further discussion of the offsetting of assets and liabilities. The accounting for changes in value of a derivative depends on whether or not the transaction has been designated and qualifies for hedge accounting. Derivatives that are not designated as hedges are reported and measured at fair value through earnings. The tabular disclosures on pages 198-205 of this Note provide additional information on the amount of, and reporting for, derivative assets, liabilities, gains and losses. Refer to Notes 2 and 3 for a further discussion of derivatives embedded in structured notes.

## Derivatives designated as hedges

The Firm applies hedge accounting to certain derivatives executed for risk management purposes - generally interest rate, foreign exchange and commodity derivatives. However, JPMorgan Chase does not seek to apply hedge accounting to all of the derivatives associated with the Firm's risk management activities. For example, the Firm does not apply hedge accounting to purchased CDS used to manage the credit risk of loans and lending-related commitments, because of the difficulties in qualifying such contracts as hedges. For the same reason, the Firm does not apply hedge accounting to certain interest rate, foreign exchange, and commodity derivatives used for risk management purposes.
To qualify for hedge accounting, a derivative must be highly effective at reducing the risk associated with the exposure being hedged. In addition, for a derivative to be designated as a hedge, the risk management objective and strategy must be documented. Hedge documentation must identify the derivative hedging instrument, the asset or liability or forecasted transaction and type of risk to be hedged, and how the effectiveness of the derivative is assessed prospectively and retrospectively. To assess effectiveness, the Firm uses statistical methods such as regression analysis, nonstatistical methods such as dollar-value comparisons of the change in the fair value of the derivative to the change in the fair value or cash flows of the hedged item, and qualitative comparisons of critical terms and the evaluation of any changes in those terms. The extent to which a derivative has been, and is expected to continue to be, highly effective at offsetting changes in the fair value or cash flows of the hedged item must be assessed and documented at least quarterly. If it is determined that a derivative is not highly effective at hedging the designated exposure, hedge accounting is discontinued.
There are three types of hedge accounting designations: fair value hedges, cash flow hedges and net investment hedges. JPMorgan Chase uses fair value hedges primarily to hedge fixed-rate long-term debt, AFS securities and certain commodities inventories. For qualifying fair value hedges, the changes in the fair value of the derivative, and in the value of the hedged item for the risk being hedged, are recognized in earnings. Certain amounts excluded from the assessment of effectiveness are recorded in OCl and recognized in earnings over the life of the derivative. If the hedge relationship is terminated, then the adjustment to the hedged item continues to be reported as part of the basis of the hedged item, and for benchmark interest rate hedges, is amortized to earnings as a yield adjustment. Derivative amounts affecting earnings are recognized consistent with the classification of the hedged item primarily net interest income and principal transactions revenue.
JPMorgan Chase uses cash flow hedges primarily to hedge the exposure to variability in forecasted cash flows from floating-rate assets and liabilities and foreign currencydenominated revenue and expense. For qualifying cash flow hedges, changes in the fair value of the derivative are
recorded in OCl and recognized in earnings as the hedged item affects earnings. Derivative amounts affecting earnings are recognized consistent with the classification of the hedged item - primarily noninterest revenue, net interest income and compensation expense. If the hedge relationship is terminated, then the change in value of the derivative recorded in AOCl is recognized in earnings when the cash flows that were hedged affect earnings. For hedge relationships that are discontinued because a forecasted transaction is expected to not occur according to the original hedge forecast, any related derivative values recorded in AOCl are immediately recognized in earnings.
JPMorgan Chase uses net investment hedges to protect the value of the Firm's net investments in certain non-U.S. subsidiaries or branches whose functional currencies are not the U.S. dollar. For qualifying net investment hedges, changes in the fair value of the derivatives due to changes in spot foreign exchange rates are recorded in OCl as translation adjustments. Amounts excluded from the assessment of effectiveness are recorded directly in earnings.

## Notes to consolidated financial statements

The following table outlines the Firm's primary uses of derivatives and the related hedge accounting designation or disclosure category.

| Type of Derivative | Use of Derivative | Designation and disclosure | Affected segment or unit | Page reference |
| :---: | :---: | :---: | :---: | :---: |
| Manage specifically identified risk exposures in qualifying hedge accounting relationships: |  |  |  |  |
| - Interest rate | Hedge fixed rate assets and liabilities | Fair value hedge | Corporate | 202-203 |
| - Interest rate | Hedge floating-rate assets and liabilities | Cash flow hedge | Corporate | 204 |
| - Foreign exchange | Hedge foreign currency-denominated assets and liabilities | Fair value hedge | Corporate | 202-203 |
| - Foreign exchange | Hedge foreign currency-denominated forecasted revenue and expense | Cash flow hedge | Corporate | 204 |
| - Foreign exchange | Hedge the value of the Firm's investments in non-U.S. dollar functional currency entities | Net investment hedge | Corporate | 204 |
| - Commodity | Hedge commodity inventory | Fair value hedge | CIB, AWM | 202-203 |
| Manage specifically identified risk exposures not designated in qualifying hedge accounting relationships: |  |  |  |  |
| - Interest rate | Manage the risk associated with mortgage commitments, warehouse loans and MSRs | Specified risk management | CCB | 205 |
| - Credit | Manage the credit risk associated with wholesale lending exposures | Specified risk management | CIB | 205 |
| - Interest rate and foreign exchange | Manage the risk associated with certain other specified assets and liabilities | Specified risk management | Corporate | 205 |
| Market-making derivatives and other activities: |  |  |  |  |
| - Various | Market-making and related risk management | Market-making and other | CIB | 205 |

Notional amount of derivative contracts
The following table summarizes the notional amount of free-standing derivative contracts outstanding as of December 31, 2022 and 2021.

| December 31, (in billions) | Notional amounts ${ }^{(\mathrm{b})}$ |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 2022 |  | 2021 |  |
| Interest rate contracts |  |  |  |  |
| Swaps | \$ | 24,491 | \$ | 24,075 |
| Futures and forwards |  | 2,636 |  | 2,520 |
| Written options |  | 3,047 |  | 3,018 |
| Purchased options |  | 2,992 |  | 3,188 |
| Total interest rate contracts |  | 33,166 |  | 32,801 |
| Credit derivatives ${ }^{(a)}$ |  | 1,132 |  | 1,053 |
| Foreign exchange contracts |  |  |  |  |
| Cross-currency swaps |  | 4,196 |  | 4,112 |
| Spot, futures and forwards |  | 7,017 |  | 7,679 |
| Written options |  | 775 |  | 741 |
| Purchased options |  | 759 |  | 727 |
| Total foreign exchange contracts |  | 12,747 |  | 13,259 |
| Equity contracts |  |  |  |  |
| Swaps |  | 618 |  | 612 |
| Futures and forwards |  | 110 |  | 139 |
| Written options |  | 636 |  | 654 |
| Purchased options |  | 580 |  | 598 |
| Total equity contracts |  | 1,944 |  | 2,003 |
| Commodity contracts |  |  |  |  |
| Swaps |  | 136 |  | 185 |
| Spot, futures and forwards |  | 136 |  | 188 |
| Written options |  | 117 |  | 135 |
| Purchased options |  | 98 |  | 111 |
| Total commodity contracts |  | 487 |  | 619 |
| Total derivative notional amounts | \$ | 49,476 | \$ | 49,735 |

(a) Refer to the Credit derivatives discussion on pages 205-207 for more information on volumes and types of credit derivative contracts.
(b) Represents the sum of gross long and gross short third-party notional derivative contracts.

While the notional amounts disclosed above give an indication of the volume of the Firm's derivatives activity, the notional amounts significantly exceed, in the Firm's view, the possible losses that could arise from such transactions. For most derivative contracts, the notional amount is not exchanged; it is simply a reference amount used to calculate payments.

## Notes to consolidated financial statements

Impact of derivatives on the Consolidated balance sheets
The following table summarizes information on derivative receivables and payables (before and after netting adjustments) that are reflected on the Firm's Consolidated balance sheets as of December 31, 2022 and 2021, by accounting designation (e.g., whether the derivatives were designated in qualifying hedge accounting relationships or not) and contract type.

Free-standing derivative receivables and payables ${ }^{(a)}$

(a) Balances exclude structured notes for which the fair value option has been elected. Refer to Note 3 for further information.
(b) As permitted under U.S. GAAP, the Firm has elected to net derivative receivables and derivative payables and the related cash collateral receivables and payables when a legally enforceable master netting agreement exists.

Derivatives netting
The following tables present, as of December 31, 2022 and 2021, gross and net derivative receivables and payables by contract and settlement type. Derivative receivables and payables, as well as the related cash collateral from the same counterparty, have been netted on the Consolidated balance sheets where the Firm has obtained an appropriate legal opinion with respect to the master netting agreement. Where such a legal opinion has not been either sought or obtained, amounts are not eligible for netting on the Consolidated balance sheets, and those derivative receivables and payables are shown separately in the tables below.

In addition to the cash collateral received and transferred that is presented on a net basis with derivative receivables and payables, the Firm receives and transfers additional collateral (financial instruments and cash). These amounts mitigate counterparty credit risk associated with the Firm's derivative instruments, but are not eligible for net presentation:

- collateral that consists of liquid securities and other cash collateral held at third-party custodians, which are shown separately as "Collateral not nettable on the Consolidated balance sheets" in the tables below, up to the fair value exposure amount. For the purpose of this disclosure, the definition of liquid securities is consistent with the definition of high quality liquid assets as defined in the LCR rule;
- the amount of collateral held or transferred that exceeds the fair value exposure at the individual counterparty level, as of the date presented, which is excluded from the tables below; and
- collateral held or transferred that relates to derivative receivables or payables where an appropriate legal opinion has not been either sought or obtained with respect to the master netting agreement, which is excluded from the tables below.

| December 31, (in millions) | 2022 |  |  |  |  | 2021 |  |  |  |

| Derivative payables with appropriate legal opinion |  | 624,756 | $(586,372)$ |  | 38,384 | (d) |  | 518,487 | $(484,928)$ |  | 33,559 | (d) |
| Derivative payables where an appropriate legal opinion has not been either sought or obtained |  | 12,757 |  |  | 12,757 |  |  | 16,557 |  |  | 16,557 |  |
| Total derivative payables recognized on the Consolidated balance sheets | \$ | 637,513 |  | \$ | 51,141 | \$ | \$ | 535,044 |  |  | 50,116 |  |
| Collateral not nettable on the Consolidated balance sheets ${ }^{(b)(c)}$ |  |  |  |  | $(3,318)$ |  |  |  |  |  | $(5,872)$ |  |
| Net amounts |  |  |  | \$ | 47,823 |  |  |  |  |  | 44,244 |  |

(a) Exchange-traded derivative balances that relate to futures contracts are settled daily.
(b) Includes liquid securities and other cash collateral held at third-party custodians related to derivative instruments where an appropriate legal opinion has been obtained. For some counterparties, the collateral amounts of financial instruments may exceed the derivative receivables and derivative payables balances. Where this is the case, the total amount reported is limited to the net derivative receivables and net derivative payables balances with that counterparty.
(c) Derivative collateral relates only to OTC and OTC-cleared derivative instruments.
(d) Net derivatives receivable included cash collateral netted of $\$ 51.5$ billion and $\$ 67.6$ billion at December 31, 2022 and 2021, respectively. Net derivatives payable included cash collateral netted of $\$ 69.2$ billion and $\$ 64.3$ billion at December 31, 2022 and 2021, respectively. Derivative cash collateral relates to OTC and OTC-cleared derivative instruments.

## Liquidity risk and credit-related contingent features

In addition to the specific market risks introduced by each derivative contract type, derivatives expose JPMorgan Chase to credit risk - the risk that derivative counterparties may fail to meet their payment obligations under the derivative contracts and the collateral, if any, held by the Firm proves to be of insufficient value to cover the payment obligation. It is the policy of JPMorgan Chase to actively pursue, where possible, the use of legally enforceable master netting arrangements and collateral agreements to mitigate derivative counterparty credit risk inherent in derivative receivables.

While derivative receivables expose the Firm to credit risk, derivative payables expose the Firm to liquidity risk, as the derivative contracts typically require the Firm to post cash or securities collateral with counterparties as the fair value of the contracts moves in the counterparties' favor or upon specified downgrades in the Firm's and its subsidiaries' respective credit ratings. Certain derivative contracts also provide for termination of the contract, generally upon a downgrade of either the Firm or the counterparty, at the fair value of the derivative contracts. The following table shows the aggregate fair value of net derivative payables related to OTC and OTC-cleared derivatives that contain contingent collateral or termination features that may be triggered upon a ratings downgrade, and the associated collateral the Firm has posted in the normal course of business, at December 31, 2022 and 2021.

OTC and OTC-cleared derivative payables containing downgrade triggers

| (in millions) | December 31,2022 | December 31, 2021 |  |
| :--- | :---: | :---: | :---: |
| Aggregate fair value of net derivative payables | $\$$ | $\mathbf{1 6 , 0 2 3}$ | $\$$ |
| Collateral posted | $\mathbf{1 5 , 5 0 5}$ | 20,114 |  |

The following table shows the impact of a single-notch and two-notch downgrade of the long-term issuer ratings of JPMorgan Chase \& Co. and its subsidiaries, predominantly JPMorgan Chase Bank, N.A., at December 31, 2022 and 2021, related to OTC and OTC-cleared derivative contracts with contingent collateral or termination features that may be triggered upon a ratings downgrade. Derivatives contracts generally require additional collateral to be posted or terminations to be triggered when the predefined rating threshold is breached. A downgrade by a single rating agency that does not result in a rating lower than a preexisting corresponding rating provided by another major rating agency will generally not result in additional collateral (except in certain instances in which additional initial margin may be required upon a ratings downgrade), nor in termination payment requirements. The liquidity impact in the table is calculated based upon a downgrade below the lowest current rating of the rating agencies referred to in the derivative contract.

## Liquidity impact of downgrade triggers on OTC and OTC-cleared derivatives

| (in millions) | December 31, 2022 |  |  |  | December 31, 2021 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Single-notch downgrade |  | Two-notch downgrade |  | Single-notch downgrade |  | Two-notch downgrade |  |
| Amount of additional collateral to be posted upon downgrade ${ }^{(\mathrm{a})}$ | \$ | 128 | \$ | 1,293 | \$ | 219 | \$ | 1,577 |
| Amount required to settle contracts with termination triggers upon downgrade ${ }^{(\text {b) }}$ |  | 88 |  | 925 |  | 98 |  | 787 |

(a) Includes the additional collateral to be posted for initial margin.
(b) Amounts represent fair values of derivative payables, and do not reflect collateral posted.

## Derivatives executed in contemplation of a sale of the underlying financial asset

In certain instances the Firm enters into transactions in which it transfers financial assets but maintains the economic exposure to the transferred assets by entering into a derivative with the same counterparty in contemplation of the initial transfer. The Firm generally accounts for such transfers as collateralized financing transactions as described in Note 11, but in limited circumstances they may qualify to be accounted for as a sale and a derivative under U.S. GAAP. The amount of such transfers accounted for as a sale where the associated derivative was outstanding was not material at both December 31, 2022 and 2021.

## Notes to consolidated financial statements

Impact of derivatives on the Consolidated statements of income
The following tables provide information related to gains and losses recorded on derivatives based on their hedge accounting designation or purpose.

## Fair value hedge gains and losses

The following tables present derivative instruments, by contract type, used in fair value hedge accounting relationships, as well as pre-tax gains/(losses) recorded on such derivatives and the related hedged items for the years ended December 31, 2022, 2021 and 2020, respectively. The Firm includes gains/(losses) on the hedging derivative in the same line item in the Consolidated statements of income as the related hedged item.

(a) Primarily consists of hedges of the benchmark (e.g., Secured Overnight Financing Rate ("SOFR"), London Interbank Offered Rate ("LIBOR")) interest rate risk of fixed-rate long-term debt and AFS securities. Gains and losses were recorded in net interest income.
(b) Effective January 1, 2022, the Firm updated its presentation in the tables above to include the amortization of income/expense associated with the inception hedge accounting adjustment applied to the hedged item; prior-period amounts have been revised to conform with the current presentation. Excludes the accrual of interest on interest rate swaps and the related hedged items.
(c) Primarily consists of hedges of the foreign currency risk of long-term debt and AFS securities for changes in spot foreign currency rates. Gains and losses related to the derivatives and the hedged items due to changes in foreign currency rates and the income statement impact of excluded components were recorded primarily in principal transactions revenue and net interest income.
(d) Consists of overall fair value hedges of physical commodities inventories that are generally carried at the lower of cost or net realizable value (net realizable value approximates fair value). Gains and losses were recorded in principal transactions revenue.
(e) The assessment of hedge effectiveness excludes certain components of the changes in fair values of the derivatives and hedged items such as forward points on foreign exchange forward contracts, time values and cross-currency basis spreads. Excluded components may impact earnings either through amortization of the initial amount over the life of the derivative or through fair value changes recognized in the current period.
(f) Represents the change in value of amounts excluded from the assessment of effectiveness under the amortization approach, predominantly crosscurrency basis spreads. The amount excluded at inception of the hedge is recognized in earnings over the life of the derivative.

As of December 31, 2022 and 2021, the following amounts were recorded on the Consolidated balance sheets related to certain cumulative fair value hedge basis adjustments that are expected to reverse through the income statement in future periods as an adjustment to yield.

| December 31, 2022 (in millions) | Carrying amount of the hedged items ${ }^{(\mathrm{a})(\mathrm{b})}$ |  | Cumulative amount of fair value hedging adjustments included in the carrying amount of hedged items: |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | Active hedging relationships |  | Discontinued hedging relationships ${ }^{(d)(e)}$ |  | Total |  |
| Assets |  |  |  |  |  |  |  |  |  |
| Investment securities - AFS | \$ | 84,073 | (c) | \$ | $(4,149)$ | \$ | $(1,542)$ \$ | \$ | $(5,691)$ |
| Liabilities |  |  |  |  |  |  |  |  |  |
| Long-term debt | \$ | 175,257 |  | \$ | $(11,879)$ | \$ | $(3,313) \$$ | \$ | $(15,192)$ |
| Beneficial interests issued by consolidated VIEs |  | - |  |  | - |  | - |  | - |
| December 31, 2021 (in millions) | Carrying amount of the hedged items ${ }^{(\mathrm{a})(\text { () }}$ |  | Cumulative amount of fair value hedging adjustments included in the carrying amount of hedged items: |  |  |  |  |  |  |
|  |  |  |  |  | hedging nships |  | $\begin{aligned} & \text { hedging } \\ & \text { os }{ }^{(d)} \text { (e) } \end{aligned}$ |  | tal |
| Assets |  |  |  |  |  |  |  |  |  |
| Investment securities - AFS | \$ | 65,746 | (c) | \$ | 417 | \$ | 661 \$ | \$ | 1,078 |
| Liabilities |  |  |  |  |  |  |  |  |  |
| Long-term debt | \$ | 195,642 |  | \$ | $(1,999)$ | \$ | 8,834 \$ | \$ | 6,835 |
| Beneficial interests issued by consolidated VIEs |  | 749 |  |  | - |  | (1) |  | (1) |

(a) Excludes physical commodities with a carrying value of $\$ 26.0$ billion and $\$ 25.7$ billion at December 31, 2022 and 2021, respectively, to which the Firm applies fair value hedge accounting. As a result of the application of hedge accounting, these inventories are carried at fair value, thus recognizing unrealized gains and losses in current periods. Since the Firm exits these positions at fair value, there is no incremental impact to net income in future periods.
(b) Excludes hedged items where only foreign currency risk is the designated hedged risk, as basis adjustments related to foreign currency hedges will not reverse through the income statement in future periods. At December 31, 2022 and 2021, the carrying amount excluded for AFS securities is $\$ 20.3$ billion and $\$ 14.0$ billion, respectively, and for long-term debt is $\$ 221$ million and $\$ 9.7$ billion, respectively. Prior-period amount has been revised to conform with the current presentation.
(c) Carrying amount represents the amortized cost, net of allowance if applicable. Refer to Note 10 for additional information.
(d) Positive (negative) amounts related to assets represent cumulative fair value hedge basis adjustments that will reduce (increase) net interest income in future periods. Positive (negative) amounts related to liabilities represent cumulative fair value hedge basis adjustments that will increase (reduce) net interest income in future periods.
(e) Represents basis adjustments existing on the balance sheet date associated with hedged items that have been de-designated from qualifying fair value hedging relationships.

## Notes to consolidated financial statements

## Cash flow hedge gains and losses

The following tables present derivative instruments, by contract type, used in cash flow hedge accounting relationships, and the pre-tax gains/(losses) recorded on such derivatives, for the years ended December 31, 2022, 2021 and 2020, respectively. The Firm includes the gains/(losses) on the hedging derivative in the same line item in the Consolidated statements of income as the change in cash flows on the related hedged item.

(a) Primarily consists of hedges of SOFR-indexed and LIBOR-indexed floating-rate assets. Gains and losses were recorded in net interest income.
(b) Primarily consists of hedges of the foreign currency risk of non-U.S. dollar-denominated revenue and expense. The income statement classification of gains and losses follows the hedged item - primarily noninterest revenue and compensation expense.
The Firm did not experience any forecasted transactions that failed to occur for the years ended 2022, 2021 and 2020.
Over the next 12 months, the Firm expects that approximately $\$(1.5)$ billion (after-tax) of net losses recorded in AOCI at December 31,2022 , related to cash flow hedges will be recognized in income. For cash flow hedges that have been terminated, the maximum length of time over which the derivative results recorded in AOCI will be recognized in earnings is approximately seven years, corresponding to the timing of the originally hedged forecasted cash flows. For open cash flow hedges, the maximum length of time over which forecasted transactions are hedged is approximately seven years. The Firm's longer-dated forecasted transactions relate to core lending and borrowing activities.

## Net investment hedge gains and losses

The following table presents hedging instruments, by contract type, that were used in net investment hedge accounting relationships, and the pre-tax gains/(losses) recorded on such instruments for the years ended December 31, 2022, 2021 and 2020.

| Year ended December 31, (in millions) | 2022 |  | 2021 |  | 2020 |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Amounts recorded in income ${ }^{(a)(b)}$ | Amounts recorded in OCl | Amounts recorded in income ${ }^{(a)(b)}$ | Amounts recorded in OCI | Amounts recorded in income ${ }^{\text {(a)(b) }}$ | Amounts recorded in OCI |
| Foreign exchange derivatives | \$(123) | \$3,591 | \$(228) | \$2,452 | \$(122) | \$ $(1,408)$ |

(a) Certain components of hedging derivatives are permitted to be excluded from the assessment of hedge effectiveness, such as forward points on foreign exchange forward contracts. The Firm elects to record changes in fair value of these amounts directly in other income.
(b) Excludes amounts reclassified from AOCI to income on the sale or liquidation of hedged entities. The Firm reclassified net pre-tax gains of $\$ 38$ million and $\$ 3$ million to other income/expense related to the liquidation of certain legal entities during the years ended December 31, 2022 and 2020, respectively. The amount reclassified for the year ended December 31, 2021 was not material. Refer to Note 24 for further information.

## Gains and losses on derivatives used for specified risk

 management purposesThe following table presents pre-tax gains/(losses) recorded on a limited number of derivatives, not designated in hedge accounting relationships, that are used to manage risks associated with certain specified assets and liabilities, including certain risks arising from mortgage commitments, warehouse loans, MSRs, wholesale lending exposures, and foreign currency denominated assets and liabilities.

| Year ended December 31, (in millions) | Derivatives gains/(losses) recorded in income |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 2022 |  | 2021 |  | 2020 |  |
| Contract type |  |  |  |  |  |  |
| Interest rate ${ }^{\text {(a) }}$ | \$ | (827) | \$ | 1,078 | \$ | 2,994 |
| Credit ${ }^{(b)}$ |  | 51 |  | (94) |  | (176) |
| Foreign exchange ${ }^{(c)}$ |  | (48) |  | 94 |  | 43 |
| Total | \$ | (824) | \$ | 1,078 | \$ | 2,861 |

(a) Primarily represents interest rate derivatives used to hedge the interest rate risk inherent in mortgage commitments, warehouse loans and MSRs, as well as written commitments to originate warehouse loans. Gains and losses were recorded predominantly in mortgage fees and related income.
(b) Relates to credit derivatives used to mitigate credit risk associated with lending exposures in the Firm's wholesale businesses. These derivatives do not include credit derivatives used to mitigate counterparty credit risk arising from derivative receivables, which is included in gains and losses on derivatives related to market-making activities and other derivatives. Gains and losses were recorded in principal transactions revenue.
(c) Primarily relates to derivatives used to mitigate foreign exchange risk of specified foreign currency-denominated assets and liabilities. Gains and losses were recorded in principal transactions revenue.

Gains and losses on derivatives related to market-making activities and other derivatives
The Firm makes markets in derivatives in order to meet the needs of customers and uses derivatives to manage certain risks associated with net open risk positions from its market-making activities, including the counterparty credit risk arising from derivative receivables. All derivatives not included in the hedge accounting or specified risk management categories above are included in this category. Gains and losses on these derivatives are primarily recorded in principal transactions revenue. Refer to Note 6 for information on principal transactions revenue.

## Credit derivatives

Credit derivatives are financial instruments whose value is derived from the credit risk associated with the debt of a third-party issuer (the reference entity) and which allow one party (the protection purchaser) to transfer that risk to another party (the protection seller). Credit derivatives expose the protection purchaser to the creditworthiness of the protection seller, as the protection seller is required to make payments under the contract when the reference entity experiences a credit event, such as a bankruptcy, a failure to pay its obligation or a restructuring. The seller of credit protection receives a premium for providing protection but has the risk that the underlying instrument referenced in the contract will be subject to a credit event.
The Firm is both a purchaser and seller of protection in the credit derivatives market and uses these derivatives for two primary purposes. First, in its capacity as a market-maker, the Firm actively manages a portfolio of credit derivatives by purchasing and selling credit protection, predominantly on corporate debt obligations, to meet the needs of customers. Second, as an end-user, the Firm uses credit derivatives to manage credit risk associated with lending exposures (loans and unfunded commitments) in its wholesale and consumer businesses and derivatives counterparty exposures in its wholesale businesses, and to manage the credit risk arising from certain financial instruments in the Firm's market-making businesses. Following is a summary of various types of credit derivatives.

## Notes to consolidated financial statements

## Credit default swaps

Credit derivatives may reference the credit of either a single reference entity ("single-name"), broad-based index or portfolio. The Firm purchases and sells protection on both single- name and index-reference obligations. Single-name CDS and index CDS contracts are either OTC or OTC-cleared derivative contracts. Single-name CDS are used to manage the default risk of a single reference entity, while index CDS contracts are used to manage the credit risk associated with the broader credit markets or credit market segments. Like the S\&P 500 and other market indices, a CDS index consists of a portfolio of CDS across many reference entities. New series of CDS indices are periodically established with a new underlying portfolio of reference entities to reflect changes in the credit markets. If one of the reference entities in the index experiences a credit event, then the reference entity that defaulted is removed from the index. CDS can also be referenced against specific portfolios of reference names or against customized exposure levels based on specific client demands: for example, to provide protection against the first $\$ 1$ million of realized credit losses in a $\$ 10$ million portfolio of exposure. Such structures are commonly known as tranche CDS.

For both single-name CDS contracts and index CDS contracts, upon the occurrence of a credit event, under the terms of a CDS contract neither party to the CDS contract has recourse to the reference entity. The protection purchaser has recourse to the protection seller for the difference between the face value of the CDS contract and the fair value of the reference obligation at settlement of the credit derivative contract, also known as the recovery value. The protection purchaser does not need to hold the debt instrument of the underlying reference entity in order to receive amounts due under the CDS contract when a credit event occurs.

## Credit-related notes

A credit-related note is a funded derivative with a credit risk component where the issuer of the credit-related note purchases from the note investor credit protection on a reference entity or an index. Under the contract, the investor pays the issuer the par value of the note at the inception of the transaction, and in return, the issuer pays periodic payments to the investor, based on the credit risk of the referenced entity. The issuer also repays the investor the par value of the note at maturity unless the reference entity (or one of the entities that makes up a reference index) experiences a specified credit event. If a credit event occurs, the issuer is not obligated to repay the par value of the note, but rather, the issuer pays the investor the difference between the par value of the note and the fair value of the defaulted reference obligation at the time of settlement. Neither party to the credit-related note has recourse to the defaulting reference entity.
The following tables present a summary of the notional amounts of credit derivatives and credit-related notes the Firm sold and purchased as of December 31, 2022 and 2021. Upon a credit event, the Firm as a seller of protection would typically pay out only a percentage of the full notional amount of net protection sold, as the amount actually required to be paid on the contracts takes into account the recovery value of the reference obligation at the time of settlement. The Firm manages the credit risk on contracts to sell protection by purchasing protection with identical or similar underlying reference entities. Other purchased protection referenced in the following tables includes credit derivatives bought on related, but not identical, reference positions (including indices, portfolio coverage and other reference points) as well as protection purchased by CIB through credit-related notes primarily in its market-making businesses. In addition, the Firm obtains credit protection against certain loans in the retained consumer portfolio through the issuance of credit-related notes. Since these credit-related notes are not part of the market-making businesses they are not included in the table below.

The Firm does not use notional amounts of credit derivatives as the primary measure of risk management for such derivatives, because the notional amount does not take into account the probability of the occurrence of a credit event, the recovery value of the reference obligation, or related cash instruments and economic hedges, each of which reduces, in the Firm's view, the risks associated with such derivatives.
Total credit derivatives and credit-related notes

| December 31, 2022 (in millions) | Maximum payout/Notional amount |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Protection sold |  | Protection purchased with identical underlyings ${ }^{\text {(c) }}$ |  | Net protection (sold)/ purchased ${ }^{(d)}$ |  | Other protection purchased ${ }^{(\text {e) }}$ |  |
| Credit derivatives |  |  |  |  |  |  |  |  |
| Credit default swaps | \$ | $(495,557)$ | \$ | 509,846 | \$ | 14,289 | \$ | 2,917 |
| Other credit derivatives ${ }^{\left({ }^{(a)}\right.}$ |  | $(47,165)$ |  | 65,029 |  | 17,864 |  | 11,746 |
| Total credit derivatives |  | $(542,722)$ |  | 574,875 |  | 32,153 |  | 14,663 |
| Credit-related notes ${ }^{(b)}$ |  | - |  | - |  | - |  | 7,863 |
| Total | \$ | $(542,722)$ | \$ | 574,875 | \$ | 32,153 | \$ | 22,526 |
|  |  |  |  |  |  |  |  |  |
|  | Maximum payout/Notional amount |  |  |  |  |  |  |  |
| December 31, 2021 (in millions) | Protection sold |  | Protection purchased with identical underlyings ${ }^{(\mathrm{c}}$ |  | Net protection (sold)/ purchased ${ }^{(d)}$ |  | Other protection purchased ${ }^{(\text {e) }}$ |  |
| Credit derivatives |  |  |  |  |  |  |  |  |
| Credit default swaps | \$ | $(443,481)$ | \$ | 458,180 | \$ | 14,699 | \$ | 2,269 |
| Other credit derivatives ${ }^{\left({ }^{(2)}\right.}$ |  | $(56,130)$ |  | 79,586 |  | 23,456 |  | 13,435 |
| Total credit derivatives |  | $(499,611)$ |  | 537,766 |  | 38,155 |  | 15,704 |
| Credit-related notes ${ }^{(b)}$ |  | - |  | - |  | - |  | 9,437 |
| Total | \$ | $(499,611)$ | \$ | 537,766 | \$ | 38,155 | \$ | 25,141 |

(a) Other credit derivatives predominantly consist of credit swap options and total return swaps.
(b) Represents Other protection purchased by CIB, primarily in its market-making businesses.
(c) Represents the total notional amount of protection purchased where the underlying reference instrument is identical to the reference instrument on protection sold; the notional amount of protection purchased for each individual identical underlying reference instrument may be greater or lower than the notional amount of protection sold.
(d) Does not take into account the fair value of the reference obligation at the time of settlement, which would generally reduce the amount the seller of protection pays to the buyer of protection in determining settlement value.
(e) Represents protection purchased by the Firm on referenced instruments (single-name, portfolio or index) where the Firm has not sold any protection on the identical reference instrument.

The following tables summarize the notional amounts by the ratings, maturity profile, and total fair value, of credit derivatives as of December 31, 2022 and 2021, where JPMorgan Chase is the seller of protection. The maturity profile is based on the remaining contractual maturity of the credit derivative contracts. The ratings profile is based on the rating of the reference entity on which the credit derivative contract is based. The ratings and maturity profile of credit derivatives where JPMorgan Chase is the purchaser of protection are comparable to the profile reflected below.
Protection sold - credit derivatives ratings ${ }^{(a)} /$ maturity profile

| December 31, 2022 (in millions) | <1 year |  | 1-5 years |  | $>5$ years |  | tal notional amount | Fair value of receivables ${ }^{(b)}$ |  | Fair value of payables ${ }^{(0)}$ |  | Net fair value |  |

| Total | \$ $(123,330)$ | \$ | $(339,957)$ | \$ | $(36,324)$ |  | $(499,611)$ | \$ | 6,275 | \$ | $(2,626)$ |  | \$ 3,649 |

(a) The ratings scale is primarily based on external credit ratings defined by S\&P and Moody's.
(b) Amounts are shown on a gross basis, before the benefit of legally enforceable master netting agreements including cash collateral netting.

## Notes to consolidated financial statements

## Note 6 - Noninterest revenue and noninterest expense

## Noninterest revenue

The Firm records noninterest revenue from certain contracts with customers in investment banking fees, deposit-related fees, asset management, administration, and commissions, and components of card income. The related contracts are often terminable on demand and the Firm has no remaining obligation to deliver future services. For arrangements with a fixed term, the Firm may commit to deliver services in the future. Revenue associated with these remaining performance obligations typically depends on the occurrence of future events or underlying asset values, and is not recognized until the outcome of those events or values are known.

## Investment banking fees

This revenue category includes debt and equity underwriting and advisory fees. As an underwriter, the Firm helps clients raise capital via public offering and private placement of various types of debt and equity instruments. Underwriting fees are primarily based on the issuance price and quantity of the underlying instruments, and are recognized as revenue typically upon execution of the client's transaction. The Firm also manages and syndicates Ioan arrangements. Credit arrangement and syndication fees, included within debt underwriting fees, are recorded as revenue after satisfying certain retention, timing and yield criteria.
The Firm also provides advisory services, by assisting its clients with mergers and acquisitions, divestitures, restructuring and other complex transactions. Advisory fees are recognized as revenue typically upon execution of the client's transaction.
The following table presents the components of investment banking fees.

| Year ended December 31, <br> (in millions) | $\mathbf{2 0 2 2}$ | 2021 | 2020 |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: |
| Underwriting | $\mathbf{\$}$ | $\mathbf{9 7 5}$ | $\$$ | 3,969 | $\$$ |
| Equity | $\mathbf{2 , 7 3 2}$ | 4,853 | 4,362 |  |  |
| Debt | $\mathbf{3 , 7 0 7}$ | 8,822 | 7,121 |  |  |
| Total underwriting | $\mathbf{2 , 9 7 9}$ | 4,394 | 2,365 |  |  |
| Advisory | $\mathbf{6}$ | $\mathbf{6 , 6 8 6}$ | $\$ 13,216$ | $\$$ | 9,486 |

Investment banking fees are earned primarily by CIB. Refer to Note 32 for segment results.

## Principal transactions

Principal transactions revenue is driven by many factors, including:

- the bid-offer spread, which is the difference between the price at which a market participant is willing and able to sell an instrument to the Firm and the price at which another market participant is willing and able to buy it from the Firm, and vice versa; and
- realized and unrealized gains and losses on financial instruments and commodities transactions, including those accounted for under the fair value option, primarily used in client-driven market-making activities, and on private equity investments.
- Realized gains and losses result from the sale of instruments, closing out or termination of transactions, or interim cash payments.
- Unrealized gains and losses result from changes in valuation.
In connection with its client-driven market-making activities, the Firm transacts in debt and equity instruments, derivatives and commodities, including physical commodities inventories and financial instruments that reference commodities.
Principal transactions revenue also includes realized and unrealized gains and losses related to:
- derivatives designated in qualifying hedge accounting relationships, primarily fair value hedges of commodity and foreign exchange risk;
- derivatives used for specific risk management purposes, primarily to mitigate credit, foreign exchange and interest rate risks.
Refer to Note 5 for further information on the income statement classification of gains and losses from derivatives activities.
In the financial commodity markets, the Firm transacts in OTC derivatives (e.g., swaps, forwards, options) and ETD that reference a wide range of underlying commodities. In the physical commodity markets, the Firm primarily purchases and sells precious and base metals and may hold other commodities inventories under financing and other arrangements with clients.
The following table presents all realized and unrealized gains and losses recorded in principal transactions revenue. This table excludes interest income and interest expense on trading assets and liabilities, which are an integral part of the overall performance of the Firm's client-driven marketmaking activities in CIB and fund deployment activities in Treasury and CIO. Refer to Note 7 for further information on interest income and interest expense.
Trading revenue is presented primarily by instrument type. The Firm's client-driven market-making businesses generally utilize a variety of instrument types in connection with their market-making and related risk-management activities; accordingly, the trading revenue presented in the table below is not representative of the total revenue of any individual LOB.

| Year ended December 31, (in millions) | 2022 |  | 2021 |  | 2020 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Trading revenue by instrument type |  |  |  |  |  |
| Interest rate ${ }^{(\mathrm{a})}$ | \$ 3,010 | \$ | \$ 1,646 | \$ | 2,575 |
| Credit ${ }^{(b)}$ | 1,412 | (c) | 2,691 |  | 2,753 |
| Foreign exchange | 5,119 |  | 2,787 |  | 4,253 |
| Equity | 8,068 |  | 7,773 |  | 6,171 |
| Commodity | 2,348 |  | 1,428 |  | 2,088 |
| Total trading revenue | 19,957 |  | 16,325 |  | 17,840 |
| Private equity gains/(losses) | (45) |  | (21) |  | 181 |
| Principal transactions | \$ 19,912 |  | \$ 16,304 | \$ | 18,021 |

(a) Includes the impact of changes in funding valuation adjustments on derivatives.
(b) Includes the impact of changes in credit valuation adjustments on derivatives, net of the associated hedging activities.
(c) Includes net markdowns on held-for-sale positions, primarily unfunded commitments, in the bridge financing portfolio.

Principal transactions revenue is earned primarily by CIB. Refer to Note 32 for segment results.

Lending- and deposit-related fees
Lending-related fees include fees earned from loan commitments, standby letters of credit, financial guarantees, and other loan-servicing activities. Depositrelated fees include fees earned from providing overdraft and other deposit account services, and from performing cash management activities. Lending- and deposit-related fees in this revenue category are recognized over the period in which the related service is provided.
The following table presents the components of lendingand deposit-related fees.

| Year ended December 31, (in millions) | $\mathbf{2 0 2 2}$ | 2021 | 2020 |
| :--- | ---: | ---: | ---: |
| Lending-related fees | $\mathbf{\$ 1 , 4 6 8}$ | $\$ 1,472$ | $\$ 1,271$ |
| Deposit-related fees | $\mathbf{5 , 6 3 0}$ | 5,560 | 5,240 |
| Total lending- and deposit-related fees | $\mathbf{\$ 7 , 0 9 8}$ | $\$ 7,032$ | $\$ 6,511$ |

Lending- and deposit-related fees are earned by CCB, CIB, CB, and AWM. Refer to Note 32 for segment results.

## Asset management, administration and commissions

 This revenue category includes fees from investment management and related services, custody, brokerage services and other products. The Firm manages assets on behalf of its clients, including investors in Firm-sponsored funds and owners of separately managed investment accounts. Management fees are typically based on the value of assets under management and are collected and recognized at the end of each period over which the management services are provided and the value of the managed assets is known. The Firm also receives performance-based management fees, which are earned based on exceeding certain benchmarks or other performance targets and are accrued and recognized when the probability of reversal is remote, typically at the end of the related billing period. The Firm has contractual arrangements with third parties to provide distribution and other services in connection with its asset management activities. Amounts paid to these third-party serviceproviders are generally recorded in professional and outside services expense.
The following table presents the components of Firmwide asset management, administration and commissions.

| Year ended December 31, (in millions) | 2022 | 2021 | 2020 |
| :---: | :---: | :---: | :---: |
| Asset management fees |  |  |  |
| Investment management fees ${ }^{(\mathrm{a})}$ | \$ 13,765 | \$ 14,027 | \$ 11,694 |
| All other asset management fees ${ }^{(\text {b }}$ | 331 | 378 | 338 |
| Total asset management fees | 14,096 | 14,405 | 12,032 |
| Total administration fees ${ }^{(c)}$ | 2,348 | 2,554 | 2,249 |
| Commissions and other fees |  |  |  |
| Brokerage commissions ${ }^{(\mathrm{d})}$ | 2,831 | 3,046 | 2,959 |
| All other commissions and fees ${ }^{(\mathrm{e})}$ | 1,402 | 1,024 | 937 |
| Total commissions and fees | 4,233 | 4,070 | 3,896 |

## Total asset management,

administration and commissions \$ 20,677 \$ 21,029 \$ 18,177
(a) Represents fees earned from managing assets on behalf of the Firm's clients, including investors in Firm-sponsored funds and owners of separately managed investment accounts.
(b) Represents fees for services that are ancillary to investment management services, such as commissions earned on the sales or distribution of mutual funds to clients. These fees are recorded as revenue at the time the service is rendered or, in the case of certain distribution fees based on the underlying fund's asset value and/or investor redemption, recorded over time as the investor remains in the fund or upon investor redemption.
(c) Predominantly includes fees for custody, securities lending, funds services and securities clearance. These fees are recorded as revenue over the period in which the related service is provided.
(d) Represents commissions earned when the Firm acts as a broker, by facilitating its clients' purchases and sales of securities and other financial instruments. Brokerage commissions are collected and recognized as revenue upon occurrence of the client transaction. The Firm reports certain costs paid to third-party clearing houses and exchanges net against commission revenue.
(e) Includes travel-related and annuity sales commissions, depositary receipt-related service fees, as well as other service fees, which are recognized as revenue when the services are rendered.
Asset management, administration and commissions are earned primarily by AWM, CIB and CCB. Refer to Note 32 for segment results.

## Mortgage fees and related income

This revenue category reflects CCB's Home Lending production and net mortgage servicing revenue.
Production revenue includes fees and income recognized as earned on mortgage loans originated with the intent to sell, and the impact of risk management activities associated with the mortgage pipeline and warehouse loans. Production revenue also includes gains and losses on sales and lower of cost or fair value adjustments on mortgage loans held-for-sale (excluding certain repurchased loans insured by U.S. government agencies), and changes in the fair value of financial instruments measured under the fair value option. Net mortgage servicing revenue includes operating revenue earned from servicing third-party mortgage loans, which is recognized over the period in which the service is provided; changes in the fair value of MSRs; the impact of risk management activities associated

## Notes to consolidated financial statements

with MSRs; and gains and losses on securitization of excess mortgage servicing. Net mortgage servicing revenue also includes gains and losses on sales and lower of cost or fair value adjustments of certain repurchased loans insured by U.S. government agencies.

Refer to Note 15 for further information on risk management activities and MSRs.
Net interest income from mortgage loans is recorded in interest income.

## Card income

This revenue category includes interchange and other income from credit and debit card transactions; and fees earned from processing card transactions for merchants, both of which are recognized when purchases are made by a cardholder and presented net of certain transactionrelated costs. Card income also includes account origination costs and annual fees, which are deferred and recognized on a straight-line basis over a 12-month period.

Certain credit card products offer the cardholder the ability to earn points based on account activity, which the cardholder can choose to redeem for cash and non-cash rewards. The cost to the Firm related to these proprietary rewards programs varies based on multiple factors including the terms and conditions of the rewards programs, cardholder activity, cardholder reward redemption rates and cardholder reward selections. The Firm maintains a liability for its obligations under its rewards programs and reports the current-period cost as a reduction of card income.

## Credit card revenue sharing agreements

The Firm has contractual agreements with numerous cobrand partners that grant the Firm exclusive rights to issue co-branded credit card products and market them to the customers of such partners. These partners endorse the cobrand credit card programs and provide their customer or member lists to the Firm. The partners may also conduct marketing activities and provide rewards redeemable under their own loyalty programs that the Firm will grant to cobrand credit cardholders based on account activity. The terms of these agreements generally range from five to ten years.

The Firm typically makes payments to the co-brand credit card partners based on the cost of partners' marketing activities and loyalty program rewards provided to credit cardholders, new account originations and sales volumes. Payments to partners based on marketing efforts undertaken by the partners are expensed by the Firm as incurred and reported as marketing expense. Payments for partner loyalty program rewards are reported as a reduction of card income when incurred. Payments to partners based on new credit card account originations are accounted for as direct loan origination costs and are deferred and recognized as a reduction of card income on a straight-line basis over a 12-month period. Payments to partners based on sales volumes are reported as a reduction of card income when the related interchange
income is earned.
The following table presents the components of card income:

| Year ended December 31, (in millions) |  | 2022 |  | 2021 |  | 2020 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Interchange and merchant processing income | \$ | 28,085 | \$ | 23,592 | \$ | 18,563 |
| Reward costs and partner payments |  | $(22,162)$ |  | $(17,868)$ |  | $(13,637)$ |
| Other card income ${ }^{(\mathrm{a})}$ |  | $(1,503)$ |  | (622) |  | (491) |
| Total card income | \$ | 4,420 | \$ | 5,102 | \$ | 4,435 |

(a) Predominantly represents the amortization of account origination costs and annual fees, which are deferred and recognized on a straight-line basis over a 12-month period.

Card income is earned primarily by CCB, CIB and CB. Refer to Note 32 for segment results.

Other income
This revenue category includes operating lease income, as well as losses associated with the Firm's tax-oriented investments, predominantly alternative energy equitymethod investments in CIB.
The following table presents certain components of other income:

| Year ended December 31, <br> (in millions) | $\mathbf{2 0 2 2}$ | 2021 | 2020 |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: |
| Operating lease income | $\$$ | $\mathbf{3 , 6 5 4}$ | $\$$ | 4,914 | $\$$ |
| 5,539 |  |  |  |  |  |
| Losses on tax-oriented <br> investments | $\mathbf{( 1 , 4 9 1 )}$ | $(1,570)$ | $(1,280)$ |  |  |
| Gain on sale of Visa B shares | $\mathbf{9 1 4}$ | - | - |  |  |

(a) The losses associated with these tax-oriented investments are more than offset by lower income tax expense from the associated tax credits.

Refer to Note 2 and 18 for additional information on Visa B shares and operating leases, respectively.

## Noninterest expense

Other expense
Other expense on the Firm's Consolidated statements of income included:

| Year ended December 31, <br> (in millions) |  | 2022 |  | 2021 | 2020 |  |
| :--- | ---: | ---: | ---: | ---: | ---: | :---: |
| Legal expense | $\$$ | $\mathbf{2 6 6}$ | $\$$ | 426 | $\$$ | 1,115 |

## Note 7 - Interest income and Interest expense

Interest income and interest expense are recorded in the Consolidated statements of income and classified based on the nature of the underlying asset or liability.
The following table presents the components of interest income and interest expense:

| Year ended December 31, (in millions) |  | 2022 |  | 2021 |  | 2020 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Interest income |  |  |  |  |  |  |
| Loans ${ }^{\text {(a) }}$ | \$ | 52,736 | \$ | 41,537 | \$ | 43,758 |
| Taxable securities |  | 10,372 |  | 6,460 |  | 7,843 |
| Non-taxable securities ${ }^{(b)}$ |  | 975 |  | 1,063 |  | 1,184 |
| Total investment securities ${ }^{(\mathrm{a})}$ |  | 11,347 |  | 7,523 |  | 9,027 |
| Trading assets - debt instruments |  | 9,053 |  | 6,825 |  | 7,832 |
| Federal funds sold and securities <br> purchased under resale <br> agreements $4,632$ <br> 958 <br> 2,436 |  |  |  |  |  |  |
| Securities borrowed ${ }^{(c)}$ |  | 2,237 |  | (385) |  | (302) |
| Deposits with banks |  | 9,039 |  | 512 |  | 749 |
| All other interest-earning assets ${ }^{(d)}$ |  | 3,763 |  | 894 |  | 1,023 |
| Total interest income | \$ | 92,807 | \$ | 57,864 | \$ | 64,523 |
| Interest expense |  |  |  |  |  |  |
| Interest bearing deposits | \$ | 10,082 | \$ | 531 | \$ | 2,357 |
| Federal funds purchased and securities loaned or sold under <br> repurchase agreements $\begin{array}{lll} 3.721 & 274 & 1.058 \end{array}$ |  |  |  |  |  |  |
| Short-term borrowings ${ }^{(\text {e })}$ |  | 747 |  | 126 |  | 372 |
| Trading liabilities - debt and all other interest-bearing liabilities ${ }^{(f)}$ |  | 3,246 |  | 257 |  | 195 |
| Long-term debt |  | 8,075 |  | 4,282 |  | 5,764 |
| Beneficial interest issued by consolidated VIEs |  | 226 |  | 83 |  | 214 |
| Total interest expense | \$ | 26,097 | \$ | 5,553 | \$ | 9,960 |
| Net interest income | \$ | 66,710 | \$ | 52,311 | \$ | 54,563 |
| Provision for credit losses |  | 6,389 |  | $(9,256)$ |  | 17,480 |
| Net interest income after provision for credit losses | \$ | 60,321 | \$ | 61,567 | \$ | 37,083 |

(a) Includes the amortization/accretion of unearned income (e.g., purchase premiums/discounts and net deferred fees/costs).
(b) Represents securities that are tax-exempt for U.S. federal income tax purposes.
(c) Negative interest and rates reflect the net impact of interest earned offset by fees paid on client-driven prime brokerage securities borrowed transactions.
(d) Includes interest earned on brokerage-related held-for-investment customer receivables, which are classified in accrued interest and accounts receivable, and all other interest-earning assets, which are classified in other assets on the Consolidated balance sheets.
(e) Includes commercial paper.
(f) All other interest-bearing liabilities includes interest expense on brokerage-related customer payables.

Interest income and interest expense includes the currentperiod interest accruals for financial instruments measured at fair value, except for derivatives and financial instruments containing embedded derivatives that would be separately accounted for in accordance with U.S. GAAP, absent the fair value option election; for those instruments, all changes in fair value including any interest elements, are primarily reported in principal transactions revenue. For financial instruments that are not measured at fair value, the related interest is included within interest income or interest expense, as applicable. Refer to Notes 12, 10, 11 and 20 for further information on accounting for interest income and interest expense related to loans, investment securities, securities financing activities (i.e., securities purchased or sold under resale or repurchase agreements; securities borrowed; and securities loaned) and long-term debt, respectively.

## Notes to consolidated financial statements

## Note 8 - Pension and other postretirement employee benefit plans

The Firm has various defined benefit pension plans and OPEB plans that provide benefits to its employees in the U.S. and certain non-U.S. locations. Substantially all the defined benefit pension plans are closed to new participants. The principal defined benefit pension plan in the U.S., which covered substantially all U.S. employees, was closed to new participants and frozen for existing participants on January 1, 2020, (and January 1, 2019 for new hires on or after December 2, 2017). Interest credits continue to accrue to participants' accounts based on their accumulated balances.

The Firm maintains funded and unfunded postretirement benefit plans that provide medical and life insurance for certain eligible employees and retirees as well as their
dependents covered under these programs. None of these plans have a material impact on the Firm's Consolidated Financial Statements.
The Firm also provides a qualified defined contribution plan in the U.S. and maintains other similar arrangements in certain non-U.S. locations. The most significant of these plans is the JPMorgan Chase 401(k) Savings Plan ("the 401(k) Savings Plan"), which covers substantially all U.S. employees. Employees can contribute to the 401(k) Savings Plan on a pretax and/or Roth 401(k) after-tax basis. The Firm makes an annual matching contribution as well as an annual profit-sharing contribution to the 401(k) Savings Plan on behalf of eligible participants.

The following table presents the pretax benefit obligations, plan assets, the net funded status, and the amounts recorded in AOCI on the Consolidated balance sheets for the Firm's significant defined benefit pension and OPEB plans.

| As of or for the year ended December 31, (in millions) | Defined benefit pension and OPEB plans |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 2022 |  | 2021 |  |
| Projected benefit obligations | \$ | $(13,545)$ | \$ | $(18,046)$ |
| Fair value of plan assets |  | 19,890 |  | 25,692 |
| Net funded status |  | 6,345 |  | 7,646 |
| Accumulated other comprehensive income/(loss) |  | $(1,916)$ |  | (453) |

The weighted-average discount rate used to value the benefit obligations as of December 31, 2022 and 2021, was $5.14 \%$ and $2.54 \%$, respectively.

Gains and losses
Gains or losses resulting from changes in the benefit obligation and the fair value of plan assets are recorded in OCI. Amortization of net gains or losses are recognized as part of the net periodic benefit cost over subsequent periods, if, as of the beginning of the year, the net gain or loss exceeds $10 \%$ of the greater of the projected benefit obligation or the fair value of the plan assets. Amortization is generally over the average expected remaining lifetime of plan participants, given the frozen status of most plans. During the year ended December 31, 2022, a remeasurement of the Firm's U.S. principal defined benefit plan in the third quarter, was required as a result of a
pension settlement. The remeasurement resulted in a reduction in the fair value of the Firm's U.S. principal defined benefit plan assets, reflecting market conditions at the time of remeasurement, and a reduction in the plan's projected benefit obligation totaling $\$ 4.0$ billion and $\$ 2.6$ billion, respectively, resulting in a net decrease of $\$ 1.4$ billion in pre-tax AOCI. For the year ended December 31, 2021, the net gain was predominantly attributable to market-driven increases in the fair value of plan assets and the discount rate.

The following table presents the net periodic benefit costs reported in the Consolidated statements of income for the Firm's defined benefit pension, defined contribution and OPEB plans, and in other comprehensive income for the defined benefit pension and OPEB plans.

|  | Pension and OPEB plans |  |  |
| :--- | :---: | :---: | :---: |
| Year ended December 31, (in millions) | $\mathbf{2 0 2 2}$ | 2021 |  |
| Total net periodic defined benefit plan cost/(credit) ${ }^{(\mathrm{a})}$ | $\mathbf{2 0 2 0}$ |  |  |
| Total defined contribution plans | $\mathbf{( 1 9 2 )}$ | $\$$ | $(201) \$$ |
| Total pension and OPEB cost included in noninterest expense | $\mathbf{1 , 4 0 8}$ | 1,333 |  |
| Total recognized in other comprehensive (income)/loss | $\mathbf{1 , 3 3 2}$ |  |  |

[^137]The following table presents the weighted-average actuarial assumptions used to determine the net periodic benefit costs for the defined benefit pension and OPEB plans.

|  | Defined benefit pension and OPEB plans |  |
| :--- | :---: | :---: |
| Year ended December 31, | 2022 | 2021 |
| Discount rate | $2.54 \%$ | $2.17 \%$ |
| Expected long-term rate of return on plan assets | $\mathbf{2 . 9 3} \%$ |  |

## Plan assumptions

The Firm's expected long-term rate of return is a blended weighted average, by asset allocation of the projected longterm returns for the various asset classes, taking into consideration local market conditions and the specific allocation of plan assets. Returns on asset classes are developed using a forward-looking approach and are not strictly based on historical returns, with consideration given to current market conditions and the portfolio mix of each plan.

The discount rates used in determining the benefit obligations are generally provided by the Firm's actuaries, with the Firm's principal defined benefit pension plan using a rate that was selected by reference to the yields on portfolios of bonds with maturity dates and coupons that closely match each of the plan's projected cash flows.

## Investment strategy and asset allocation

The assets of the Firm's defined benefit pension plans are held in various trusts and are invested in well-diversified portfolios of equity and fixed income securities, cash and cash equivalents, and alternative investments. The Firm regularly reviews the asset allocations and asset managers, as well as other factors that could impact the portfolios, which are rebalanced when deemed necessary. The approved asset allocation ranges by asset class for the Firm's principal defined benefit plan are 42-100\% debt securities, 0-40\% equity securities, 0-3\% real estate, and $0-12 \%$ alternatives as of December 31, 2022.

As of December 31, 2022, assets held by the Firm's defined benefit pension and OPEB plans do not include securities issued by JPMorgan Chase or its affiliates, except through indirect exposures through investments in exchange traded funds, mutual funds and collective investment funds managed by third-parties. The defined benefit pension and OPEB plans hold investments that are sponsored or managed by affiliates of JPMorgan Chase in the amount of $\$ 1.7$ billion and $\$ 2.5$ billion, as of December 31, 2022 and 2021, respectively.

Fair value measurement of the plans' assets and liabilities
Refer to Note 2 for information on fair value measurements, including descriptions of level 1,2 , and 3 of the fair value hierarchy and the valuation methods employed by the Firm.

Pension plan assets and liabilities measured at fair value

| December 31, (in millions) | Defined benefit pension and OPEB plans |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 2022 |  |  |  |  |  |  | 2021 |  |  |  |  |  |  |  |
|  | Level $1^{(a)}$ | Level ${ }^{(b)}$ |  | Level $3^{(c)}$ |  | Total fair value |  | Level ${ }^{(\mathrm{a})}$ |  | Level $2^{\text {(b) }}$ |  | Level $3^{(c)}$ |  | Total fair value |  |
| Assets measured at fair value classified in fair value hierarchy | \$ 5,308 | \$ | 9,617 | \$ | 2,613 | \$ | 17,538 | \$ | 6,541 | \$ | 12,315 | \$ | 3,172 | \$ | 22,028 |
| Assets measured at fair value using NAV as practical expedient not classified in fair value hierarchy |  |  |  |  |  |  | 2,593 |  |  |  |  |  |  |  | 3,960 |
| Net defined benefit pension plan payables not classified in fair value hierarchy |  |  |  |  |  |  | (241) |  |  |  |  |  |  |  | (296) |
| Total fair value of plan assets |  |  |  |  |  | \$ | 19,890 |  |  |  |  |  |  | \$ | 25,692 |

[^138]Changes in level 3 fair value measurements using significant unobservable inputs Investments classified in level 3 of the fair value hierarchy decreased in 2022 to $\$ 2.6$ billion, due to $\$ 501$ million in unrealized losses and $\$ 54$ million in settlements, and increased in 2021 to $\$ 3.2$ billion, predominantly due to $\$ 332$ million in unrealized gains, partially offset by $\$ 94$ million in settlements.

Estimated future benefit payments
The following table presents benefit payments expected to be paid for the defined benefit pension and OPEB plans for the years indicated.

| Year ended December 31, <br> (in millions) | Defined benefit <br> pension and OPEB <br> plans |  |
| :--- | ---: | ---: |
| 2023 | $\$$ | 1,022 |
| 2024 | 1,016 |  |
| 2025 | 1,007 |  |
| 2026 | 980 |  |
| 2027 | 977 |  |
| Years 2028-2032 | 4,720 |  |

## Note 9 - Employee share-based incentives

## Employee share-based awards

In 2022, 2021 and 2020, JPMorgan Chase granted longterm share-based awards to certain employees under its LTIP, as amended and restated effective May 15, 2018, and subsequently amended effective May 18, 2021. Under the terms of the LTIP, as of December 31, 2022, 69 million shares of common stock were available for issuance through May 2025. The LTIP is the only active plan under which the Firm is currently granting share-based incentive awards. In the following discussion, the LTIP, plus prior Firm plans and plans assumed as the result of acquisitions, are referred to collectively as the "LTI Plans," and such plans constitute the Firm's share-based incentive plans.
RSUs are awarded at no cost to the recipient upon their grant. Generally, RSUs are granted annually and vest at a rate of $50 \%$ after two years and $50 \%$ after three years and are converted into shares of common stock as of the vesting date. In addition, RSUs typically include full-career eligibility provisions, which allow employees to continue to vest upon voluntary termination based on age and/or service-related requirements, subject to post-employment and other restrictions. All RSU awards are subject to forfeiture until vested and contain clawback provisions that may result in cancellation under certain specified circumstances. Predominantly all RSUs entitle the recipient to receive cash payments equivalent to any dividends paid on the underlying common stock during the period the RSUs are outstanding.
Performance share units ("PSUs") are granted annually, and approved by the Firm's Board of Directors, to members of the Firm's Operating Committee under the variable compensation program. PSUs are subject to the Firm's achievement of specified performance criteria over a threeyear period. The number of awards that vest can range from zero to $150 \%$ of the grant amount. In addition, dividends that accrue during the vesting period are reinvested in dividend equivalent share units. PSUs and the related dividend equivalent share units are converted into shares of common stock after vesting.

Once the PSUs and dividend equivalent share units have vested, the shares of common stock that are delivered, after applicable tax withholding, must be retained for an additional holding period, for a total combined vesting and holding period of approximately five to eight years from the grant date depending on regulations in certain countries.
Under the LTI Plans, stock appreciation rights ("SARs") and stock options have generally been granted with an exercise price equal to the fair value of JPMorgan Chase's common stock on the grant date. SARs and stock options generally expire ten years after the grant date. In 2021, the Firm awarded its Chairman and CEO and its President and Chief Operating Officer 1.5 million and 750,000 SARs, respectively. There were no grants of SARs or stock options in 2022 and grants in 2020 were not material.

The Firm separately recognizes compensation expense for each tranche of each award, net of estimated forfeitures, as if it were a separate award with its own vesting date. Generally, for each tranche granted, compensation expense is recognized on a straight-line basis from the grant date until the vesting date of the respective tranche, provided that the employees will not become full-career eligible during the vesting period. For awards with full-career eligibility provisions and awards granted with no future substantive service requirement, the Firm accrues the estimated value of awards expected to be awarded to employees as of the grant date without giving consideration to the impact of post-employment restrictions. For each tranche granted to employees who will become full-career eligible during the vesting period, compensation expense is recognized on a straight-line basis from the grant date until the earlier of the employee's full-career eligibility date or the vesting date of the respective tranche.
The Firm's policy for issuing shares upon settlement of employee share-based incentive awards is to issue either new shares of common stock or treasury shares. During 2022, 2021 and 2020, the Firm settled all of its employee share-based awards by issuing treasury shares.
Refer to Note 23 for further information on the classification of share-based awards for purposes of calculating earnings per share.

## Notes to consolidated financial statements

RSUs, PSUs, SARs and stock options activity
Generally, compensation expense for RSUs and PSUs is measured based on the number of units granted multiplied by the stock price at the grant date, and for SARs and stock options, is measured at the grant date using the Black-Scholes valuation model. Compensation expense for these awards is recognized in net income as described previously. The following table summarizes JPMorgan Chase's RSUs, PSUs, SARs and stock options activity for 2022.

| Year ended December 31, 2022 <br> (in thousands, except weighted-average data, and where otherwise stated) | RSUs/PSUs |  |  | SARs/Options |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Number of units | Weightedaverage grant date fair value |  | Number of awards |  | eighted- <br> verage <br> xercise <br> price | Weighted-average remaining contractual life (in years) |  | gregate ntrinsic value |
| Outstanding, January 1 | 45,405 | \$ | 126.32 | 3,369 | \$ | 116.62 |  |  |  |
| Granted | 23,729 |  | 147.17 | - |  | - |  |  |  |
| Exercised or vested | $(19,517)$ |  | 117.06 | (858) |  | 44.70 |  |  |  |
| Forfeited | $(1,891)$ |  | 141.74 | - |  | - |  |  |  |
| Canceled | NA |  | NA | - |  | - |  |  |  |
| Outstanding, December 31 | 47,726 | \$ | 139.90 | 2,511 | \$ | 141.19 | 7.8 | \$ | 22,695 |
| Exercisable, December 31 | NA |  | NA | 261 |  | 46.58 | 0.1 |  | 22,695 |

The total fair value of RSUs that vested during the years ended December 31, 2022, 2021 and 2020, was $\$ 3.2$ billion, $\$ 2.9$ billion and $\$ 2.8$ billion, respectively. The total intrinsic value of options exercised during the years ended December 31, 2022, 2021 and 2020, was $\$ 75$ million, $\$ 232$ million and $\$ 182$ million, respectively.

## Compensation expense

The Firm recognized the following noncash compensation expense related to its various employee share-based incentive plans in its Consolidated statements of income.

| Year ended December 31, (in millions) | 2022 | 2021 | 2020 |
| :--- | :---: | :---: | :---: | :---: |
| Cost of prior grants of RSUs, PSUs, SARs <br> and stock options that are amortized <br> over their applicable vesting periods | $\$ 1,253$ | $\$ 1,161$ | $\$ 1,101$ |
| Accrual of estimated costs of share- <br> based awards to be granted in future <br> periods, predominantly those to full- <br> career eligible employees | $\mathbf{1 , 5 4 1}$ | 1,768 | 1,350 |
| Total noncash compensation expense <br> related to employee share-based <br> incentive plans | $\$ 2,794$ | $\$ 2,929$ | $\$ 2,451$ |

At December 31, 2022, approximately $\$ 1.0$ billion (pretax) of compensation expense related to unvested awards had not yet been charged to net income. That cost is expected to be amortized into compensation expense over a weighted-average period of 1.8 years. The Firm does not capitalize any compensation expense related to sharebased compensation awards to employees.

## Tax benefits

Income tax benefits (including tax benefits from dividends or dividend equivalents) related to share-based incentive arrangements recognized in the Firm's Consolidated statements of income for the years ended December 31, 2022, 2021 and 2020, were $\$ 901$ million, $\$ 957$ million and $\$ 837$ million, respectively.

## Note 10 - Investment securities

Investment securities consist of debt securities that are classified as AFS or HTM. Debt securities classified as trading assets are discussed in Note 2. Predominantly all of the Firm's AFS and HTM securities are held by Treasury and CIO in connection with its asset-liability management activities.

AFS securities are carried at fair value on the Consolidated balance sheets. Unrealized gains and losses, after any applicable hedge accounting adjustments or allowance for credit losses, are reported in AOCI. The specific identification method is used to determine realized gains and losses on AFS securities, which are included in investment securities gains/(losses) on the Consolidated statements of income. HTM securities, which the Firm has the intent and ability to hold until maturity, are carried at amortized cost, net of allowance for credit losses, on the Consolidated balance sheets.

For both AFS and HTM securities, purchase discounts or premiums are generally amortized into interest income on a level-yield basis over the contractual life of the security. However, premiums on certain callable debt securities are amortized to the earliest call date.

During 2022 and 2021, the Firm transferred $\$ 78.3$ billion and $\$ 104.5$ billion of investment securities, respectively, from AFS to HTM for capital management purposes. AOCI included pretax unrealized gains/(losses) of \$(4.8) billion and $\$ 425$ million, respectively, on the securities at the dates of transfer.

Unrealized gains or losses at the date of transfer of these securities continue to be reported in AOCI and are amortized into interest income on a level-yield basis over the remaining life of the securities. This amortization will offset the effect on interest income of the amortization of the premium or discount resulting from the transfer recorded at fair value.
Transfers of securities from AFS to HTM are non-cash transactions and are recorded at fair value.

## Notes to consolidated financial statements

The amortized costs and estimated fair values of the investment securities portfolio were as follows for the dates indicated.

| December 31, (in millions) | 2022 |  |  |  |  | 2021 |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

(a) The Firm purchased $\$ 33.7$ billion, $\$ 111.8$ billion and $\$ 12.4$ billion of HTM securities for the years ended December 31, 2022, 2021 and 2020, respectively.
(b) The amortized cost of investment securities is reported net of allowance for credit losses of $\$ 96$ million and $\$ 42$ million at December 31 , 2022 and 2021 , respectively.
(c) Excludes $\$ 2.5$ billion and $\$ 1.9$ billion of accrued interest receivable at December 31, 2022 and 2021, respectively, included in accrued interest and accounts receivable on the Consolidated balance sheets. The Firm generally does not recognize an allowance for credit losses on accrued interest receivable, consistent with its policy to write them off no later than 90 days past due by reversing interest income. The Firm did not reverse through interest income any accrued interest receivable for the years ended December 31, 2022 and 2021.

At December 31, 2022, the investment securities portfolio consisted of debt securities with an average credit rating of AA+ (based upon external ratings where available, and where not available, based primarily upon internal risk ratings). Risk ratings are used to identify the credit quality of securities and differentiate risk within the portfolio. The Firm's internal risk ratings generally align with the qualitative characteristics (e.g., borrower capacity to meet financial commitments and vulnerability to changes in the economic environment) defined by S\&P and Moody's,
however the quantitative characteristics (e.g., probability of default ("PD") and loss given default ("LGD")) may differ as they reflect internal historical experiences and assumptions. Risk ratings are assigned at acquisition, reviewed on a regular and ongoing basis by Credit Risk Management and adjusted as necessary over the life of the investment for updated information affecting the issuer's ability to fulfill its obligations.

AFS securities impairment
The following tables present the fair value and gross unrealized losses by aging category for AFS securities at December 31, 2022 and 2021. The tables exclude U.S. Treasury and government agency securities and U.S. GSE and government agency MBS with unrealized losses of $\$ 9.6$ billion and $\$ 2.2$ billion, at December 31, 2022 and 2021, respectively; changes in the value of these securities are generally driven by changes in interest rates rather than changes in their credit profile given the explicit or implicit guarantees provided by the U.S. government.

## Notes to consolidated financial statements

AFS securities are considered impaired if the fair value is less than the amortized cost.

The Firm recognizes impairment losses in earnings if the Firm has the intent to sell the debt security, or if it is more likely than not that the Firm will be required to sell the debt security before recovery of its amortized cost. In these circumstances the impairment loss is recognized in investment securities gains/(losses) in the Consolidated Statements of Income and is equal to the full difference between the amortized cost (net of allowance if applicable) and the fair value of the security.

For impaired debt securities that the Firm has the intent and ability to hold, the securities are evaluated to determine if a credit loss exists. If it is determined that a credit loss exists, that loss is recognized as an allowance for credit losses through the provision for credit losses in the Consolidated Statements of Income, limited by the amount of impairment. Any impairment on debt securities that the Firm has the intent and ability to hold not due to credit losses is recorded in OCI.

Factors considered in evaluating credit losses include adverse conditions specifically related to the industry, geographic area or financial condition of the issuer or underlying collateral of a security; and payment structure of the security.

When assessing securities issued in a securitization for credit losses, the Firm estimates cash flows considering relevant market and economic data, underlying loan-level data, and structural features of the securitization, such as subordination, excess spread, overcollateralization or other forms of credit enhancement, and compares the losses projected for the underlying collateral ("pool losses") against the level of credit enhancement in the securitization structure to determine whether these features are sufficient to absorb the pool losses, or whether a credit loss exists.

For beneficial interests in securitizations that are rated below "AA" at their acquisition, or that can be contractually prepaid or otherwise settled in such a way that the Firm would not recover substantially all of its recorded investment, the Firm evaluates impairment for credit losses when there is an adverse change in expected cash flows.

## HTM securities - credit risk

## Allowance for credit losses

The allowance for credit losses represents expected credit losses over the remaining expected life of HTM securities.

The allowance for credit losses on HTM obligations of U.S. states and municipalities and commercial mortgage-backed securities is calculated by applying statistical credit loss factors (estimated PD and LGD) to the amortized cost. The credit loss factors are derived using a weighted average of five internally developed eight-quarter macroeconomic scenarios, followed by a single year straight-line interpolation to revert to long run historical information for periods beyond the forecast period. Refer to Note 13 for further information on the eight-quarter macroeconomic forecast.

The allowance for credit losses on HTM collateralized loan obligations and U.S. residential mortgage-backed securities is calculated as the difference between the amortized cost and the present value of the cash flows expected to be collected, discounted at the security's effective interest rate. These cash flow estimates are developed based on expectations of underlying collateral performance derived using the eight-quarter macroeconomic forecast and the single year straight-line interpolation, as well as considering the structural features of the security.

The application of different inputs and assumptions into the calculation of the allowance for credit losses is subject to significant management judgment, and emphasizing one input or assumption over another, or considering other inputs or assumptions, could affect the estimate of the allowance for credit losses on HTM securities.

## Credit quality indicator

The primary credit quality indicator for HTM securities is the risk rating assigned to each security. At both December 31, 2022 and 2021, all HTM securities were rated investment grade and were current and accruing, with approximately 98\% rated at least AA+.

Allowance for credit losses on investment securities The allowance for credit losses on investment securities was $\$ 96$ million, $\$ 42$ million and $\$ 78$ million as of December 31, 2022, 2021 and 2020, respectively.

(a) Average yield is computed using the effective yield of each security owned at the end of the period, weighted based on the amortized cost of each security. The effective yield considers the contractual coupon, amortization of premiums and accretion of discounts, and the effect of related hedging derivatives. Taxable-equivalent amounts are used where applicable. The effective yield excludes unscheduled principal prepayments; and accordingly, actual maturities of securities may differ from their contractual or expected maturities as certain securities may be prepaid. However, for certain callable debt securities, the average yield is calculated to the earliest call date.
(b) Substantially all of the Firm's U.S. residential MBS and collateralized mortgage obligations are due in 10 years or more, based on contractual maturity. The estimated weighted-average life, which reflects anticipated future prepayments, is approximately eight years for agency residential MBS, and six years for both agency residential collateralized mortgage obligations and nonagency residential collateralized mortgage obligations.

## Notes to consolidated financial statements

## Note 11 - Securities financing activities

JPMorgan Chase enters into resale, repurchase, securities borrowed and securities loaned agreements (collectively, "securities financing agreements") primarily to finance the Firm's inventory positions, acquire securities to cover short sales, accommodate customers' financing needs, settle other securities obligations and to deploy the Firm's excess cash.

Securities financing agreements are treated as collateralized financings on the Firm's Consolidated balance sheets. Where appropriate under applicable accounting guidance, securities financing agreements with the same counterparty are reported on a net basis. Refer to Note 1 for further discussion of the offsetting of assets and liabilities. Fees received and paid in connection with securities financing agreements are recorded over the life of the agreement in interest income and interest expense on the Consolidated statements of income.

The Firm has elected the fair value option for certain securities financing agreements. Refer to Note 3 for further information regarding the fair value option. The securities financing agreements for which the fair value option has been elected are reported within securities purchased under resale agreements, securities loaned or sold under repurchase agreements, and securities borrowed on the Consolidated balance sheets. Generally, for agreements carried at fair value, current-period interest accruals are recorded within interest income and interest expense, with changes in fair value reported in principal transactions revenue. However, for financial instruments containing embedded derivatives that would be separately accounted for in accordance with accounting guidance for hybrid instruments, all changes in fair value, including any interest elements, are reported in principal transactions revenue.
Securities financing agreements not elected under the fair value option are measured at amortized cost. As a result of the Firm's credit risk mitigation practices described below, the Firm did not hold any allowance for credit losses with respect to resale and securities borrowed arrangements as of December 31, 2022 and 2021.

Credit risk mitigation practices
Securities financing agreements expose the Firm primarily to credit and liquidity risk. To manage these risks, the Firm monitors the value of the underlying securities (predominantly high-quality securities collateral, including government-issued debt and U.S. GSEs and government agencies MBS) that it has received from or provided to its counterparties compared to the value of cash proceeds and exchanged collateral, and either requests additional collateral or returns securities or collateral when appropriate. Margin levels are initially established based upon the counterparty, the type of underlying securities, and the permissible collateral, and are monitored on an ongoing basis.
In resale and securities borrowed agreements, the Firm is exposed to credit risk to the extent that the value of the securities received is less than initial cash principal advanced and any collateral amounts exchanged. In repurchase and securities loaned agreements, credit risk exposure arises to the extent that the value of underlying securities advanced exceeds the value of the initial cash principal received, and any collateral amounts exchanged.
Additionally, the Firm typically enters into master netting agreements and other similar arrangements with its counterparties, which provide for the right to liquidate the underlying securities and any collateral amounts exchanged in the event of a counterparty default. It is also the Firm's policy to take possession, where possible, of the securities underlying resale and securities borrowed agreements. Refer to Note 29 for further information regarding assets pledged and collateral received in securities financing agreements.

The table below summarizes the gross and net amounts of the Firm's securities financing agreements, as of December 31, 2022 and 2021. When the Firm has obtained an appropriate legal opinion with respect to a master netting agreement with a counterparty and where other relevant netting criteria under U.S. GAAP are met, the Firm nets, on the Consolidated balance sheets, the balances outstanding under its securities financing agreements with the same counterparty. In addition, the Firm exchanges securities and/or cash collateral with its counterparty to reduce the economic exposure with the counterparty, but such collateral is not eligible for net Consolidated balance sheet presentation. Where the Firm has obtained an appropriate legal opinion with respect to the counterparty master netting agreement, such collateral, along with
securities financing balances that do not meet all these relevant netting criteria under U.S. GAAP, is presented in the table below as "Amounts not nettable on the Consolidated balance sheets," and reduces the "Net amounts" presented. Where a legal opinion has not been either sought or obtained, the securities financing balances are presented gross in the "Net amounts" below. In transactions where the Firm is acting as the lender in a securities-for-securities lending agreement and receives securities that can be pledged or sold as collateral, the Firm recognizes the securities received at fair value within other assets and the obligation to return those securities within accounts payable and other liabilities on the Consolidated balance sheets.

(a) Includes securities-for-securities lending agreements of $\$ 7.0$ billion and $\$ 5.6$ billion at December 31, 2022 and 2021, respectively, accounted for at fair value, where the Firm is acting as lender.
(b) In some cases, collateral exchanged with a counterparty exceeds the net asset or liability balance with that counterparty. In such cases, the amounts reported in this column are limited to the related net asset or liability with that counterparty.
(c) Includes securities financing agreements that provide collateral rights, but where an appropriate legal opinion with respect to the master netting agreement has not been either sought or obtained. At December 31, 2022 and 2021, included $\$ 6.0$ billion and $\$ 13.9$ billion, respectively, of securities purchased under resale agreements; $\$ 49.0$ billion and $\$ 46.4$ billion, respectively, of securities borrowed; $\$ 29.1$ billion and $\$ 21.6$ billion, respectively, of securities sold under repurchase agreements. At December 31, 2021 included $\$ 198$ million of securities loaned and other, and the amount was not material at December 31, 2022.

## Notes to consolidated financial statements

The tables below present as of December 31, 2022 and 2021 the types of financial assets pledged in securities financing agreements and the remaining contractual maturity of the securities financing agreements.

|  |  |  | Gross liability balance |
| :--- | :--- | :--- | :--- | :--- |

## Transfers not qualifying for sale accounting

At December 31, 2022 and 2021, the Firm held $\$ 692$ million and $\$ 440$ million, respectively, of financial assets for which the rights have been transferred to third parties; however, the transfers did not qualify as a sale in accordance with U.S. GAAP. These transfers have been recognized as collateralized financing transactions. The transferred assets are recorded in trading assets and loans, and the corresponding liabilities are recorded predominantly in short-term borrowings on the Consolidated balance sheets.

## Note 12 - Loans

Loan accounting framework
The accounting for a loan depends on management's strategy for the loan. The Firm accounts for loans based on the following categories:

- Originated or purchased loans held-for-investment (i.e., "retained")
- Loans held-for-sale
- Loans at fair value

The following provides a detailed accounting discussion of the Firm's loans by category:

## Loans held-for-investment

Originated or purchased loans held-for-investment, including PCD, are recorded at amortized cost, reflecting the principal amount outstanding, net of the following: unamortized deferred loan fees, costs, premiums or discounts; charge-offs; collection of cash; and foreign exchange. Credit card loans also include billed finance charges and fees.

## Interest income

Interest income on performing loans held-for-investment is accrued and recognized as interest income at the contractual rate of interest. Purchase price discounts or premiums, as well as net deferred loan fees or costs, are amortized into interest income over the contractual life of the loan as an adjustment of yield.
The Firm classifies accrued interest on loans, including accrued but unbilled interest on credit card loans, in accrued interest and accounts receivables on the Consolidated balance sheets. For credit card loans, accrued interest once billed is then recognized in the loan balances, with the related allowance recorded in the allowance for credit losses. Changes in the allowance for credit losses on accrued interest on credit card loans are recognized in the provision for credit losses and charge-offs are recognized by reversing interest income. For other loans, the Firm generally does not recognize an allowance for credit losses on accrued interest receivables, consistent with its policy to write them off no later than 90 days past due by reversing interest income.

## Nonaccrual loans

Nonaccrual loans are those on which the accrual of interest has been suspended. Loans (other than credit card loans and certain consumer loans insured by U.S. government agencies) are placed on nonaccrual status and considered nonperforming when full payment of principal and interest is not expected, regardless of delinquency status, or when principal and interest has been in default for a period of 90 days or more, unless the loan is both well-secured and in the process of collection. A loan is determined to be past due when the minimum payment is not received from the borrower by the contractually specified due date or for certain loans (e.g., residential real estate loans), when a monthly payment is due and unpaid for 30 days or more.

Finally, collateral-dependent loans are typically maintained on nonaccrual status.
On the date a loan is placed on nonaccrual status, all interest accrued but not collected is reversed against interest income. In addition, the amortization of deferred amounts is suspended. Interest income on nonaccrual loans may be recognized as cash interest payments are received (i.e., on a cash basis) if the recorded loan balance is deemed fully collectible; however, if there is doubt regarding the ultimate collectibility of the recorded loan balance, all interest cash receipts are applied to reduce the carrying value of the loan (the cost recovery method). For consumer loans, application of this policy typically results in the Firm recognizing interest income on nonaccrual consumer loans on a cash basis.

A loan may be returned to accrual status when repayment is reasonably assured and there has been demonstrated performance under the terms of the loan or, if applicable, the terms of the restructured loan.
As permitted by regulatory guidance, credit card loans are generally exempt from being placed on nonaccrual status; accordingly, interest and fees related to credit card loans continue to accrue until the loan is charged off or paid in full.

## Allowance for loan losses

The allowance for loan losses represents the estimated expected credit losses in the held-for-investment loan portfolio at the balance sheet date and is recognized on the balance sheet as a contra asset, which brings the amortized cost to the net carrying value. Changes in the allowance for Ioan losses are recorded in the provision for credit losses on the Firm's Consolidated statements of income. Refer to Note 13 for further information on the Firm's accounting policies for the allowance for loan losses.

## Charge-offs

Consumer loans are generally charged off or charged down to the lower of the amortized cost or the net realizable value of the underlying collateral (i.e., fair value less estimated costs to sell), with an offset to the allowance for Ioan losses, upon reaching specified stages of delinquency in accordance with standards established by the FFIEC. Residential real estate loans, unmodified credit card loans and scored business banking loans are generally charged off no later than 180 days past due. Scored auto and modified credit card loans are charged off no later than 120 days past due.
Certain consumer loans are charged off or charged down to their net realizable value earlier than the FFIEC charge-off standards in the following circumstances:

- Loans modified in a TDR that are determined to be collateral-dependent.
- Loans to borrowers who have experienced an event that suggests a loss is either known or highly certain are subject to accelerated charge-off standards (e.g.,

## Notes to consolidated financial statements

residential real estate and auto loans are charged off or charged down within 60 days of receiving notification of a bankruptcy filing).

- Auto loans upon repossession of the automobile.

Other than in certain limited circumstances, the Firm typically does not recognize charge-offs on the governmentguaranteed portion of loans.

Wholesale loans are charged off when it is highly certain that a loss has been realized. The determination of whether to recognize a charge-off includes many factors, including the prioritization of the Firm's claim in bankruptcy, expectations of the workout/restructuring of the Ioan and valuation of the borrower's equity or the loan collateral.

When a loan is charged down to the lower of its amortized cost or the estimated net realizable value of the underlying collateral, the determination of the fair value of the collateral depends on the type of collateral (e.g., securities, real estate). In cases where the collateral is in the form of liquid securities, the fair value is based on quoted market prices or broker quotes. For illiquid securities or other financial assets, the fair value of the collateral is generally estimated using a discounted cash flow model.

For residential real estate loans, collateral values are based upon external valuation sources. When it becomes likely that a borrower is either unable or unwilling to pay, the Firm utilizes a broker's price opinion, appraisal and/or an automated valuation model of the home based on an exterior-only valuation ("exterior opinions"), which is then updated at least every 12 months, or more frequently depending on various market factors. As soon as practicable after the Firm receives the property in satisfaction of a debt (e.g., by taking legal title or physical possession), the Firm generally obtains an appraisal based on an inspection that includes the interior of the home ("interior appraisals"). Exterior opinions and interior appraisals are discounted based upon the Firm's experience with actual liquidation values as compared with the estimated values provided by exterior opinions and interior appraisals, considering statespecific factors.
For commercial real estate loans, collateral values are generally based on appraisals from internal and external valuation sources. Collateral values are typically updated every six to twelve months, either by obtaining a new appraisal or by performing an internal analysis, in accordance with the Firm's policies. The Firm also considers both borrower- and market-specific factors, which may result in obtaining appraisal updates or broker price opinions at more frequent intervals.

## Loans held-for-sale

Loans held-for-sale are measured at the lower of cost or fair value, with valuation changes recorded in noninterest revenue. For consumer loans, the valuation is performed on a portfolio basis. For wholesale loans, the valuation is performed on an individual loan basis.
Interest income on loans held-for-sale is accrued and recognized based on the contractual rate of interest.

Loan origination fees or costs and purchase price discounts or premiums are deferred in a contra loan account until the related loan is sold. The deferred fees or costs and discounts or premiums are an adjustment to the basis of the loan and therefore are included in the periodic determination of the lower of cost or fair value adjustments and/or the gain or loss recognized at the time of sale.

Because these loans are recognized at the lower of cost or fair value, the Firm's allowance for loan losses and chargeoff policies do not apply to these loans. However, loans held-for-sale are subject to the nonaccrual policies described above.

## Loans at fair value

Loans for which the fair value option has been elected are measured at fair value, with changes in fair value recorded in noninterest revenue.

Interest income on these loans is accrued and recognized based on the contractual rate of interest. Changes in fair value are recognized in noninterest revenue. Loan origination fees are recognized upfront in noninterest revenue. Loan origination costs are recognized in the associated expense category as incurred.

Because these loans are recognized at fair value, the Firm's allowance for loan losses and charge-off policies do not apply to these loans. However, loans at fair value are subject to the nonaccrual policies described above.
Refer to Note 3 for further information on the Firm's elections of fair value accounting under the fair value option. Refer to Note 2 and Note 3 for further information on loans carried at fair value and classified as trading assets.

Loan classification changes
Loans in the held-for-investment portfolio that management decides to sell are transferred to the held-forsale portfolio at the lower of cost or fair value on the date of transfer. Credit-related losses are charged against the allowance for loan losses; non-credit related losses such as those due to changes in interest rates or foreign currency exchange rates are recognized in noninterest revenue.

In the event that management decides to retain a Ioan in the held-for-sale portfolio, the loan is transferred to the held-for-investment portfolio at amortized cost on the date of transfer. These loans are subsequently assessed for impairment based on the Firm's allowance methodology. Refer to Note 13 for a further discussion of the methodologies used in establishing the Firm's allowance for Ioan losses.

Loan modifications
The Firm seeks to modify certain loans in conjunction with its loss mitigation activities. Through the modification, JPMorgan Chase grants one or more concessions to a borrower who is experiencing financial difficulty in order to minimize the Firm's economic loss and avoid foreclosure or repossession of the collateral, and to ultimately maximize payments received by the Firm from the borrower. The concessions granted vary by program and by borrowerspecific characteristics, and may include interest rate reductions, term extensions, payment delays, principal forgiveness, or the acceptance of equity or other assets in lieu of payments. Such modifications are accounted for and reported as TDRs. Loans with short-term and other insignificant modifications that are not considered concessions are not TDRs.

Loans, except for credit card loans, modified in a TDR are generally placed on nonaccrual status, although in many cases such loans were already on nonaccrual status prior to modification. These loans may be returned to performing status (the accrual of interest is resumed) if the following criteria are met: (i) the borrower has performed under the modified terms for a minimum of six months and/or six payments, and (ii) the Firm has an expectation that repayment of the modified Ioan is reasonably assured based on, for example, the borrower's debt capacity and level of future earnings, collateral values, LTV ratios, and other current market considerations. In certain limited and welldefined circumstances in which the loan is current at the modification date, such loans are not placed on nonaccrual status at the time of modification.

Loans modified in TDRs are generally measured for impairment using the Firm's established asset-specific allowance methodology, which considers the expected redefault rates for the modified loans. A loan modified in a TDR generally remains subject to the asset-specific component of the allowance throughout its remaining life, regardless of whether the loan is performing and has been returned to accrual status. Refer to Note 13 for further discussion of the methodology used to estimate the Firm's asset-specific allowance.

## Foreclosed property

The Firm acquires property from borrowers through loan restructurings, workouts, and foreclosures. Property acquired may include real property (e.g., residential real estate, land, and buildings) and commercial and personal property (e.g., automobiles, aircraft, railcars, and ships).

The Firm recognizes foreclosed property upon receiving assets in satisfaction of a loan (e.g., by taking legal title or physical possession). For loans collateralized by real property, the Firm generally recognizes the asset received at foreclosure sale or upon the execution of a deed in lieu of foreclosure transaction with the borrower. Foreclosed assets are reported in other assets on the Consolidated balance sheets and initially recognized at fair value less estimated costs to sell. Each quarter the fair value of the acquired property is reviewed and adjusted, if necessary, to the lower of cost or fair value. Subsequent adjustments to fair value are charged/credited to noninterest revenue. Operating expense, such as real estate taxes and maintenance, are charged to other expense.

## Notes to consolidated financial statements

## Loan portfolio

The Firm's loan portfolio is divided into three portfolio segments, which are the same segments used by the Firm to determine the allowance for Ioan losses: Consumer, excluding credit card; Credit card; and Wholesale. Within each portfolio segment the Firm monitors and assesses the credit risk in the following classes of loans, based on the risk characteristics of each loan class.

| Consumer, excluding <br> credit card |
| :---: |
| - Residential real estate ${ }^{(\mathrm{a})}$ |
| - Auto and other ${ }^{(b)}$ |

| Credit card |
| :---: |
| • Credit card loans |
|  |

| Wholesale |
| :--- |
| (c)(d) |
| - Secured by real estate |
| - Commercial and industrial |
| - Other ${ }^{(e)}$ |

(a) Includes scored mortgage and home equity loans held in CCB and AWM, and scored mortgage loans held in CIB and Corporate.
(b) Includes scored auto and business banking loans and overdrafts.
(c) Includes loans held in CIB, CB, AWM, Corporate, as well as risk-rated BWM and auto dealer loans held in CCB, for which the wholesale methodology is applied when determining the allowance for loan losses.
(d) The wholesale portfolio segment's classes align with loan classifications as defined by the bank regulatory agencies, based on the loan's collateral, purpose, and type of borrower.
(e) Includes loans to financial institutions, states and political subdivisions, SPEs, nonprofits, personal investment companies and trusts, as well as loans to individuals and individual entities (predominantly Global Private Bank clients within AWM and J.P. Morgan Wealth Management within CCB). Refer to Note 14 for more information on SPEs.

The following tables summarize the Firm's loan balances by portfolio segment.

| December 31, 2022 (in millions) | Consumer, excluding credit card |  | Credit card |  | Wholesale |  | Total ${ }^{(\mathrm{a})(\mathrm{b})}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Retained | \$ | 300,753 | \$ | 185,175 | \$ | 603,670 | \$ 1,089,598 |
| Held-for-sale |  | 618 |  | - |  | 3,352 | 3,970 |
| At fair value |  | 10,004 |  | - |  | 32,075 | 42,079 |
| Total | \$ | 311,375 | \$ | 185,175 | \$ | 639,097 | \$ 1,135,647 |
| December 31, 2021 (in millions) | Consumer, excluding credit card |  | Credit card |  | Wholesale |  | Total ${ }^{(a)(\text { b })}$ |
| Retained | \$ | 295,556 | \$ | 154,296 | \$ | 560,354 | \$ 1,010,206 |
| Held-for-sale |  | 1,287 |  | - |  | 7,401 | 8,688 |
| At fair value |  | 26,463 |  | - |  | 32,357 | 58,820 |
| Total | \$ | 323,306 | \$ | 154,296 | \$ | 600,112 | \$ 1,077,714 |

(a) Excludes $\$ 5.2$ billion and $\$ 2.7$ billion of accrued interest receivable at December 31, 2022 and 2021, respectively. The Firm wrote off accrued interest receivable of $\$ 39$ million and $\$ 56$ million for the years ended December 31, 2022 and 2021, respectively.
(b) Loans (other than those for which the fair value option has been elected) are presented net of unamortized discounts and premiums and net deferred loan fees or costs. These amounts were not material as of December 31, 2022 and 2021.
The following tables provide information about the carrying value of retained loans purchased, sold and reclassified to held-for-sale during the periods indicated. Loans that were reclassified to held-for-sale and sold in a subsequent period are excluded from the sales line of this table.

| Year ended December 31, (in millions) | 2022 |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Consumer, excluding credit card |  |  | Credit card |  | Wholesale |  | Total |  |
| Purchases | \$ | 1,625 | (b)(c) | \$ | - | \$ | 1,088 | \$ | 2,713 |
| Sales |  | 2,884 |  |  | - |  | 41,934 |  | 44,818 |
| Retained loans reclassified to held-for-sale ${ }^{(a)}$ |  | 229 |  |  | - |  | 1,055 |  | 1,284 |
|  | 2021 |  |  |  |  |  |  |  |  |
| Year ended December 31, (in millions) | Consumer, excluding credit card |  |  | Credit card |  | Wholesale |  | Total |  |
| Purchases | \$ | 515 |  | \$ | - | \$ | 1,122 | \$ | 1,637 |
| Sales |  | 799 |  |  | - |  | 31,022 |  | 31,821 |
| Retained loans reclassified to held-for-sale ${ }^{(a)}$ |  | 1,225 |  |  | - |  | 2,178 |  | 3,403 |

| Year ended December 31, (in millions) | 2020 |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Consumer, excluding credit card |  |  | Credit card |  | Wholesale |  | Total |  |
| Purchases | \$ | 3,474 | ${ }^{\text {(b)(c) }}$ | \$ | - | \$ | 1,159 | \$ | 4,633 |
| Sales |  | 352 |  |  | - |  | 17,916 |  | 18,268 |
| Retained loans reclassified to held-for-sale ${ }^{(2)}$ |  | 2,084 |  |  | 787 |  | 1,580 |  | 4,451 |

(a) Reclassifications of loans to held-for-sale are non-cash transactions.
(b) Predominantly includes purchases of residential real estate loans, including the Firm's voluntary repurchases of certain delinquent loans from loan pools as permitted by Government National Mortgage Association ("Ginnie Mae") guidelines for the years ended December 31, 2022 , 2021 and 2020 . The Firm typically elects to repurchase these delinquent loans as it continues to service them and/or manage the foreclosure process in accordance with applicable requirements of Ginnie Mae, FHA, RHS, and/or VA.
(c) Excludes purchases of retained loans of $\$ 12.4$ billion, $\$ 25.8$ billion and $\$ 16.3$ billion for the years ended December 31, 2022, 2021 and 2020, respectively, which are predominantly sourced through the correspondent origination channel and underwritten in accordance with the Firm's standards. The amount of purchases of retained loans at December 31, 2020 has been revised to conform with the current presentation.

Gains and losses on sales of loans
Net gains/(losses) on sales of loans and lending-related commitments (including adjustments to record loans and lendingrelated commitments held-for-sale at the lower of cost or fair value) recognized in noninterest revenue was $\$(186)$ million for the year ended December 31, 2022 of which $\$(48)$ million was related to loans. Net gains/(losses) on sales of loans and lending-related commitments was $\$ 261$ million for the year ended December 31, 2021 of which $\$ 253$ million was related to loans. Net losses on sales of loans was $\$$ (36) million for the year ended December 31, 2020. In addition, the sale of loans may also result in write downs, recoveries or changes in the allowance recognized in the provision for credit losses.

## Notes to consolidated financial statements

## Consumer, excluding credit card loan portfolio

Consumer loans, excluding credit card loans, consist primarily of scored residential mortgages, home equity loans and lines of credit, auto and business banking loans, with a focus on serving the prime consumer credit market. The portfolio also includes home equity loans secured by junior liens, prime mortgage loans with an interest-only payment period, and certain payment-option loans that may result in negative amortization.

The following table provides information about retained consumer loans, excluding credit card, by class.

| December 31, (in millions) | 2022 | 2021 |  |
| :--- | ---: | ---: | ---: |
| Residential real estate | $\$ 237,561$ | $\$$ | 224,795 |
| Auto and other $^{(\mathrm{a})}$ | $\mathbf{6 3 , 1 9 2}$ | 70,761 |  |
| Total retained loans | $\$ 300,753$ | $\$$ | 295,556 |

(a) At December 31, 2022 and 2021, included $\$ 350$ million and $\$ 5.4$ billion of loans, respectively, in Business Banking under the PPP.

Delinquency rates are the primary credit quality indicator for consumer loans. Loans that are more than 30 days past due provide an early warning of borrowers who may be experiencing financial difficulties and/or who may be unable or unwilling to repay the loan. As the loan continues to age, it becomes more clear whether the borrower is likely to be unable or unwilling to pay. In the case of residential real estate loans, late-stage delinquencies (greater than 150 days past due) are a strong indicator of loans that will ultimately result in a foreclosure or similar liquidation transaction. In addition to delinquency rates, other credit quality indicators for consumer loans vary based on the class of loan, as follows:

- For residential real estate loans, the current estimated LTV ratio, or the combined LTV ratio in the case of junior lien loans, is an indicator of the potential loss severity in the event of default. Additionally, LTV or combined LTV ratios can provide insight into a borrower's continued willingness to pay, as the delinquency rate of high-LTV loans tends to be greater than that for loans where the borrower has equity in the collateral. The geographic distribution of the loan collateral also provides insight as to the credit quality of the portfolio, as factors such as the regional economy, home price changes and specific events such as natural disasters, will affect credit quality. The borrower's current or "refreshed" FICO score is a secondary credit quality indicator for certain loans, as FICO scores are an indication of the borrower's credit payment history. Thus, a Ioan to a borrower with a low FICO score (less than 660) is considered to be of higher risk than a loan to a borrower with a higher FICO score. Further, a loan to a borrower with a high LTV ratio and a low FICO score is at greater risk of default than a loan to a borrower that has both a high LTV ratio and a high FICO score.
- For scored auto and business banking loans, geographic distribution is an indicator of the credit performance of the portfolio. Similar to residential real estate loans, geographic distribution provides insights into the portfolio performance based on regional economic activity and events.

## Residential real estate

The following tables provide information on delinquency, which is the primary credit quality indicator for retained residential real estate loans.

(a) Individual delinquency classifications include mortgage loans insured by U.S. government agencies which were not material at December 31, 2022 and 2021.
(b) At December 31, 2022 and 2021, loans under payment deferral programs offered in response to the COVID-19 pandemic which are still within their deferral period and performing according to their modified terms are generally not considered delinquent.
(c) Excludes mortgage loans that are 30 or more days past due insured by U.S. government agencies which were not material at December 31, 2022 and 2021. These amounts have been excluded based upon the government guarantee.
(d) Purchased loans are included in the year in which they were originated.

Approximately $37 \%$ of the total revolving loans are senior lien loans; the remaining balance are junior lien loans. The lien position the Firm holds is considered in the Firm's allowance for credit losses. Revolving loans that have been converted to term loans have higher delinquency rates than those that are still within the revolving period. That is primarily because the fully-amortizing payment that is generally required for those products is higher than the minimum payment options available for revolving loans within the revolving period.

## Notes to consolidated financial statements

## Nonaccrual Ioans and other credit quality indicators

The following table provides information on nonaccrual and other credit quality indicators for retained residential real estate loans.

| (in millions, except weighted-average data) | December 31, 2022 |  | December 31, 2021 |  |
| :---: | :---: | :---: | :---: | :---: |
| Nonaccrual loans ${ }^{(\mathrm{a})(\mathrm{b})(\mathrm{c})(\mathrm{d})(\mathrm{e})}$ | \$ | 3,745 | \$ | 4,759 |
| Current estimated LTV ratios ${ }^{(f)(\mathrm{g})(\mathrm{h})}$ |  |  |  |  |
| Greater than 125\% and refreshed FICO scores: |  |  |  |  |
| Equal to or greater than 660 | \$ | 2 | \$ | 2 |
| Less than 660 |  | - |  | 2 |
| 101\% to $125 \%$ and refreshed FICO scores: |  |  |  |  |
| Equal to or greater than 660 |  | 174 |  | 37 |
| Less than 660 |  | 6 |  | 15 |
| 80\% to 100\% and refreshed FICO scores: |  |  |  |  |
| Equal to or greater than 660 |  | 12,034 |  | 2,701 |
| Less than 660 |  | 184 |  | 89 |
| Less than 80\% and refreshed FICO scores: |  |  |  |  |
| Equal to or greater than 660 |  | 215,096 |  | 209,295 |
| Less than 660 |  | 8,659 |  | 9,658 |
| No FICO/LTV available |  | 1,360 |  | 2,930 |
| U.S. government-guaranteed |  | 46 |  | 66 |
| Total retained loans | \$ | 237,561 | \$ | 224,795 |
| Weighted average LTV ratio ${ }^{(f)(\text { (i) }}$ |  | 51 \% |  | 50 \% |
| Weighted average FICO ${ }^{(\mathrm{g})(\mathrm{i})}$ |  | 769 |  | 765 |
| Geographic region ${ }^{(\mathrm{j})}$ |  |  |  |  |
| California | \$ | 73,111 | \$ | 71,383 |
| New York |  | 34,469 |  | 32,545 |
| Florida |  | 18,868 |  | 16,182 |
| Texas |  | 14,961 |  | 13,865 |
| Illinois |  | 11,293 |  | 11,565 |
| Colorado |  | 9,968 |  | 8,885 |
| Washington |  | 9,059 |  | 8,292 |
| New Jersey |  | 7,106 |  | 6,832 |
| Massachusetts |  | 6,379 |  | 6,105 |
| Connecticut |  | 5,432 |  | 5,242 |
| All other |  | 46,915 |  | 43,899 |
| Total retained loans | \$ | 237,561 | \$ | 224,795 |

(a) Includes collateral-dependent residential real estate loans that are charged down to the fair value of the underlying collateral less costs to sell. The Firm reports, in accordance with regulatory guidance, residential real estate loans that have been discharged under Chapter 7 bankruptcy and not reaffirmed by the borrower ("Chapter 7 loans") as collateral-dependent nonaccrual TDRs, regardless of their delinquency status. At December 31, 2022, approximately $5 \%$ of Chapter 7 residential real estate loans were 30 days or more past due.
(b) Nonaccrual loans exclude mortgage loans insured by U.S. government agencies which were not material at December 31, 2022 and 2021.
(c) Generally, all consumer nonaccrual loans have an allowance. In accordance with regulatory guidance, certain nonaccrual loans that are considered collateral-dependent have been charged down to the lower of amortized cost or the fair value of their underlying collateral less costs to sell. If the value of the underlying collateral improves subsequent to charge down, the related allowance may be negative.
(d) Interest income on nonaccrual loans recognized on a cash basis was $\$ 175$ million and $\$ 172$ million for the years ended December 31, 2022 and 2021, respectively.
(e) Generally excludes loans under payment deferral programs offered in response to the COVID-19 pandemic.
(f) Represents the aggregate unpaid principal balance of loans divided by the estimated current property value. Current property values are estimated, at a minimum, quarterly, based on home valuation models using nationally recognized home price index valuation estimates incorporating actual data to the extent available and forecasted data where actual data is not available. Current estimated combined LTV for junior lien home equity loans considers all available lien positions, as well as unused lines, related to the property.
(g) Refreshed FICO scores represent each borrower's most recent credit score, which is obtained by the Firm on at least a quarterly basis.
(h) Includes residential real estate loans, primarily held in LLCS in AWM that did not have a refreshed FICO score. These loans have been included in a FICO band based on management's estimation of the borrower's credit quality.
(i) Excludes loans with no FICO and/or LTV data available.
(j) The geographic regions presented in the table are ordered based on the magnitude of the corresponding loan balances at December 31, 2022.

## Loan modifications

Modifications of residential real estate loans, where the Firm grants concessions to borrowers who are experiencing financial difficulty are generally accounted for and reported as TDRs. Loans with short-term or other insignificant modifications that are not considered concessions are not TDRs. The carrying value of new TDRs was $\$ 362$ million, $\$ 866$ million and $\$ 819$ million for the years ended December 31, 2022, 2021 and 2020, respectively. There were no additional commitments to lend to borrowers whose residential real estate loans have been modified in TDRs.

## Nature and extent of modifications

The Firm's proprietary modification programs as well as government programs, including U.S. GSE programs, generally provide various concessions to financially troubled borrowers including, but not limited to, interest rate reductions, term or payment extensions and delays of principal and/or interest payments that would otherwise have been required under the terms of the original agreement. The following table provides information about how residential real estate loans were modified in TDRs under the Firm's loss mitigation programs described above during the periods presented. This table excludes Chapter 7 loans where the sole concession granted is the discharge of debt and loans with short-term or other insignificant modifications that are not considered concessions.

| Year ended December 31, | 2022 | 2021 | 2020 |
| :---: | :---: | :---: | :---: |
| Number of loans approved for a trial modification | 3,902 | 6,246 | 5,522 |
| Number of loans permanently modified | 4,182 | 4,588 | 6,850 |
| Concession granted: ${ }^{(a)}$ |  |  |  |
| Interest rate reduction | 54 \% | 74 \% | 50 \% |
| Term or payment extension | 67 | 53 | 49 |
| Principal and/or interest deferred | 10 | 23 | 14 |
| Principal forgiveness | 1 | 2 | 2 |
| Other ${ }^{(b)}$ | 37 | 36 | 66 |

(a) Represents concessions granted in permanent modifications as a percentage of the number of loans permanently modified. The sum of the percentages exceeds $100 \%$ because predominantly all of the modifications include more than one type of concession. Concessions offered on trial modifications are generally consistent with those granted on permanent modifications.
(b) Includes variable interest rate to fixed interest rate modifications and payment delays that meet the definition of a TDR.

## Financial effects of modifications and redefaults

The following table provides information about the financial effects of the various concessions granted in modifications of residential real estate loans under the loss mitigation programs described above and about redefaults of certain loans modified in TDRs for the periods presented. The following table presents only the financial effects of permanent modifications and do not include temporary concessions offered through trial modifications. This table also excludes Chapter 7 loans where the sole concession granted is the discharge of debt and loans with short-term or other insignificant modifications that are not considered concessions.

| Year ended December 31, (in millions, except weighted - average data) |  | 2022 |  | 2021 |  | 2020 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Weighted-average interest rate of loans with interest rate reductions - before TDR |  | 4.75 \% |  | 4.54 \% |  | 5.09 \% |
| Weighted-average interest rate of loans with interest rate reductions - after TDR |  | 3.35 |  | 2.92 |  | 3.28 |
| Weighted-average remaining contractual term (in years) of loans with term or payment extensions - before TDR |  | 22 |  | 23 |  | 22 |
| Weighted-average remaining contractual term (in years) of loans with term or payment extensions - after TDR |  | 38 |  | 38 |  | 39 |
| Charge-offs recognized upon permanent modification | \$ | 1 | \$ | - | \$ | 5 |
| Principal deferred |  | 16 |  | 28 |  | 16 |
| Principal forgiven |  | 2 |  | 1 |  | 5 |
| Balance of loans that redefaulted within one year of permanent modification ${ }^{(\mathrm{a})}$ | \$ | 147 | \$ | 160 | \$ | 199 |

(a) Represents loans permanently modified in TDRs that experienced a payment default in the periods presented, and for which the payment default occurred within one year of the modification. The dollar amounts presented represent the balance of such loans at the end of the reporting period in which such loans defaulted. For residential real estate loans modified in TDRs, payment default is deemed to occur when the loan becomes two contractual payments past due. In the event that a modified loan redefaults, it will generally be liquidated through foreclosure or another similar type of liquidation transaction. Redefaults of loans modified within the last twelve months may not be representative of ultimate redefault levels.

At December 31, 2022, the weighted-average estimated remaining lives of residential real estate loans permanently modified in TDRs were six years. The estimated remaining lives of these loans reflect estimated prepayments, both voluntary and involuntary (i.e., foreclosures and other forced liquidations).

## Notes to consolidated financial statements

## Active and suspended foreclosure

At December 31, 2022 and 2021, the Firm had residential real estate loans, excluding those insured by U.S. government agencies, with a carrying value of $\$ 565$ million and $\$ 619$ million, respectively, that were not included in REO, but were in the process of active or suspended foreclosure.

## Auto and other

The following tables provide information on delinquency, which is the primary credit quality indicator for retained auto and other consumer loans.

(a) At December 31, 2022 and 2021, auto and other loans excluded $\$ 153$ million and $\$ 667$ million, respectively, of PPP loans guaranteed by the SBA that are 30 or more days past due. These amounts have been excluded based upon the SBA guarantee.
(b) Includes $\$ 252$ million of loans originated in 2021 and $\$ 98$ million of loans originated in 2020 in Business Banking under the PPP. PPP loans are guaranteed by the SBA. Other than in certain limited circumstances, the Firm typically does not recognize charge-offs, classify as nonaccrual nor record an allowance for loan losses on these loans.
(c) Includes $\$ 4.4$ billion of loans originated in 2021 and $\$ 1.0$ billion of loans originated in 2020 in Business Banking under the PPP.
(d) Prior-period amount has been revised to conform with the current presentation.

## Nonaccrual and other credit quality indicators

The following table provides information on nonaccrual and other credit quality indicators for retained auto and other consumer loans.

| (in millions) | Total Auto and other |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | $\begin{array}{r} \text { December } \\ 31,2022 \\ \hline \end{array}$ |  | $\begin{array}{r} \text { December } \\ 31,2021 \\ \hline \end{array}$ |  |
| Nonaccrual loans ${ }^{(\mathrm{a})(\mathrm{b})(\mathrm{c})}$ | \$ | 129 | \$ | 119 |
| Geographic region ${ }^{(d)}$ |  |  |  |  |
| California | \$ | 9,689 | \$ | 11,163 |
| Texas |  | 7,216 |  | 7,859 |
| Florida |  | 4,847 |  | 4,901 |
| New York |  | 4,345 |  | 5,848 |
| Illinois |  | 2,839 |  | 2,930 |
| New Jersey |  | 2,219 |  | 2,355 |
| Pennsylvania |  | 1,822 |  | 2,004 |
| Georgia |  | 1,708 |  | 1,748 |
| Ohio |  | 1,603 |  | 1,843 |
| Louisiana |  | 1,576 |  | 1,801 |
| All other |  | 25,328 |  | 28,309 |
| Total retained loans | \$ | 63,192 | \$ | 70,761 |

(a) At December 31, 2022 and 2021, nonaccrual loans excluded $\$ 101$ million and $\$ 506$ million, respectively, of PPP loans 90 or more days past due and guaranteed by the SBA, of which $\$ 76$ million and $\$ 35$ million, respectively, were no longer accruing interest based on the guidelines set by the SBA. Typically the principal balance of the loans is insured and interest is guaranteed at a specified reimbursement rate subject to meeting the guidelines set by the SBA. There were no loans that were not guaranteed by the SBA that are 90 or more days past due and still accruing interest at December 31, 2022 and 2021.
(b) Generally, all consumer nonaccrual loans have an allowance. In accordance with regulatory guidance, certain nonaccrual loans that are considered collateral-dependent have been charged down to the lower of amortized cost or the fair value of their underlying collateral less costs to sell. If the value of the underlying collateral improves subsequent to charge down, the related allowance may be negative.
(c) Interest income on nonaccrual loans recognized on a cash basis was not material for the years ended December 31, 2022 and 2021.
(d) The geographic regions presented in this table are ordered based on the magnitude of the corresponding loan balances at December 31, 2022.

## Loan modifications

Certain auto and other loan modifications are considered to be TDRs as they provide various concessions to borrowers who are experiencing financial difficulty. Loans with short-term or other insignificant modifications that are not considered concessions are not TDRs.

The impact of these modifications, as well as new TDRs, were not material to the Firm for the years ended December 31, 2022, 2021 and 2020. Additional commitments to lend to borrowers whose loans have been modified in TDRs as of December 31, 2022 and 2021 were not material.

## Notes to consolidated financial statements

## Credit card loan portfolio

The credit card portfolio segment includes credit card loans originated and purchased by the Firm. Delinquency rates are the primary credit quality indicator for credit card loans as they provide an early warning that borrowers may be experiencing difficulties ( 30 days past due); information on those borrowers that have been delinquent for a longer period of time ( 90 days past due) is also considered. In addition to delinquency rates, the geographic distribution of the loans provides insight as to the credit quality of the portfolio based on the regional economy.

While the borrower's credit score is another general indicator of credit quality, the Firm does not view credit scores as a primary indicator of credit quality because the borrower's credit score tends to be a lagging indicator. The
distribution of such scores provides a general indicator of credit quality trends within the portfolio; however, the score does not capture all factors that would be predictive of future credit performance. Refreshed FICO score information, which is obtained at least quarterly, for a statistically significant random sample of the credit card portfolio is indicated in the following table. FICO is considered to be the industry benchmark for credit scores.

The Firm generally originates new credit card accounts to prime consumer borrowers. However, certain cardholders' FICO scores may decrease over time, depending on the performance of the cardholder and changes in the credit score calculation.

The following tables provide information on delinquency, which is the primary credit quality indicator for retained credit card loans.

| (in millions, except ratios) | December 31, 2022 |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Less than 660 |  | 13.0 |  | 11.3 |
| No FICO available |  | 0.2 |  | 0.2 |

(a) The geographic regions presented in the table are ordered based on the magnitude of the corresponding loan balances at December $31,2022$.

## Loan modifications

The Firm may offer Ioan modification programs granting concessions to credit card borrowers who are experiencing financial difficulty. The Firm grants concessions for most of the credit card loans under long-term programs. These modifications involve placing the customer on a fixed payment plan, generally for 60 months, and typically include reducing the interest rate on the credit card. Substantially all modifications under the Firm's long-term programs are considered to be TDRs. Loans with short-term or other insignificant modifications that are not considered concessions are not TDRs.

If the cardholder does not comply with the modified payment terms, then the credit card loan continues to age and will ultimately be charged-off in accordance with the Firm's standard charge-off policy. In most cases, the Firm does not reinstate the borrower's line of credit.

## Financial effects of modifications and redefaults

The following table provides information about the financial effects of the concessions granted on credit card loans modified in TDRs and redefaults for the periods presented. For all periods disclosed, new enrollments were less than $1 \%$ of total retained credit card loans.

| Year ended December 31, (in millions, except weighted-average data) |  | 2022 |  | 2021 |  | 2020 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Balance of new TDRs ${ }^{(a)}$ | \$ | 418 | \$ | 393 | \$ | 818 |
| Weighted-average interest rate of loans - before TDR |  | 19.86 \% |  | 17.75 \% |  | 18.04 \% |
| Weighted-average interest rate of loans - after TDR |  | 4.13 |  | 5.14 |  | 4.64 |
| Balance of loans that redefaulted within one year of modification ${ }^{(b)}$ | \$ | 34 | \$ | 57 | \$ | 110 |

(a) Represents the outstanding balance prior to modification.
(b) Represents loans modified in TDRs that experienced a payment default in the periods presented, and for which the payment default occurred within one year of the modification. The amounts presented represent the balance of such loans as of the end of the quarter in which they defaulted.
For credit card loans modified in TDRs, payment default is deemed to have occurred when the borrower misses two consecutive contractual payments. Defaulted modified credit card loans remain in the modification program and continue to be charged off in accordance with the Firm's standard charge-off policy.

## Notes to consolidated financial statements

## Wholesale loan portfolio

Wholesale loans include loans made to a variety of clients, ranging from large corporate and institutional clients to high-net-worth individuals.

The primary credit quality indicator for wholesale loans is the internal risk rating assigned to each loan. Risk ratings are used to identify the credit quality of loans and differentiate risk within the portfolio. Risk ratings on loans consider the PD and the LGD. The PD is the likelihood that a loan will default. The LGD is the estimated loss on the loan that would be realized upon the default of the borrower and takes into consideration collateral and structural support for each credit facility.

Management considers several factors to determine an appropriate internal risk rating, including the obligor's debt capacity and financial flexibility, the level of the obligor's earnings, the amount and sources for repayment, the level and nature of contingencies, management strength, and the industry and geography in which the obligor operates. The Firm's internal risk ratings generally align with the qualitative characteristics (e.g., borrower capacity to meet financial commitments and vulnerability to changes in the economic environment) defined by S\&P and Moody's, however the quantitative characteristics (e.g., PD and LGD) may differ as they reflect internal historical experiences and assumptions. The Firm generally considers internal ratings with qualitative characteristics equivalent to BBB-/Baa3 or higher as investment grade, and these ratings have a lower PD and/or lower LGD than non-investment grade ratings.

Noninvestment-grade ratings are further classified as noncriticized and criticized, and the criticized portion is further subdivided into performing and nonaccrual loans, representing management's assessment of the collectibility of principal and interest. Criticized loans have a higher PD than noncriticized loans. The Firm's definition of criticized aligns with the U.S. banking regulatory definition of criticized exposures, which consist of special mention, substandard and doubtful categories.

Risk ratings are reviewed on a regular and ongoing basis by Credit Risk Management and are adjusted as necessary for updated information affecting the obligor's ability to fulfill its obligations.

As noted above, the risk rating of a loan considers the industry in which the obligor conducts its operations. As part of the overall credit risk management framework, the Firm focuses on the management and diversification of its industry and client exposures, with particular attention paid to industries with an actual or potential credit concern. Refer to Note 4 for further detail on industry concentrations.

The following tables provide information on internal risk rating, which is the primary credit quality indicator for retained wholesale loans.

| December 31, (in millions, except ratios) | Secured by real estate |  |  |  | Commercial and industrial |  |  |  | Other ${ }^{(b)}$ |  |  |  | Total retained loans |  |  |  |

## Notes to consolidated financial statements

(a) At December 31, 2022, $\$ 139$ million of the $\$ 140$ million total PPP loans in the wholesale portfolio were commercial and industrial. Of the $\$ 139$ million, $\$ 58$ million were originated in 2021, and $\$ 81$ million were originated in 2020. PPP loans are guaranteed by the SBA and considered investment-grade. Other than in certain limited circumstances, the Firm typically does not recognize charge-offs, classify as nonaccrual nor record an allowance for loan losses on these loans.
(b) At December 31, 2021, $\$ 1.1$ billion of the $\$ 1.3$ billion total PPP loans in the wholesale portfolio were commercial and industrial. Of the $\$ 1.1$ billion, $\$ 698$ million were originated in 2021 and $\$ 396$ million were originated in 2020.

(a) Includes loans to financial institutions, states and political subdivisions, SPEs, nonprofits, personal investment companies and trusts, as well as loans to individuals and individual entities (predominantly Global Private Bank clients within AWM and J.P. Morgan Wealth Management within CCB). Refer to Note 14 for more information on SPEs.

The following table presents additional information on retained loans secured by real estate within the Wholesale portfolio, which consists of loans secured wholly or substantially by a lien or liens on real property at origination. Multifamily lending includes financing for acquisition, leasing and construction of apartment buildings. Other commercial lending largely includes financing for acquisition, leasing and construction, largely for office, retail and industrial real estate. Included in secured by real estate loans is $\$ 6.4$ billion and $\$ 5.7$ billion as of December 31, 2022 and 2021, respectively, of construction and development loans made to finance land development and on-site construction of commercial, industrial, residential, or farm buildings.

| Loans by geographic distribution ${ }^{(a)}$ |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| Total U.S. | \$ | 123,740 | \$ | 115,732 | \$ | 125,324 | \$ | 106,449 | \$ | 230,525 | \$ | 215,750 | \$ | 479,589 | \$ | 437,931 |
| Total non-U.S. |  | 2,992 |  | 3,103 |  | 42,336 |  | 39,242 |  | 78,753 |  | 80,078 |  | 124,081 |  | 122,423 |
| Total retained loans | \$ | 126,732 | \$ | 118,835 | \$ | 167,660 | \$ | 145,691 | \$ | 309,278 | \$ | 295,828 | \$ | 603,670 | \$ | 560,354 |
| Loan delinquency |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| Current and less than 30 days past due and still accruing | \$ | 126,083 | \$ | 118,163 | \$ | 165,415 | \$ | 143,459 | \$ | 307,511 | \$ | 293,358 | \$ | 599,009 | \$ | 554,980 |
| 30-89 days past due and still accruing |  | 402 |  | 331 |  | 1,127 |  | 1,193 |  | 1,015 |  | 1,590 |  | 2,544 |  | 3,114 |
| 90 or more days past due and still accruing ${ }^{(b)}$ |  | 1 |  | 15 |  | 100 |  | 70 |  | 53 |  | 121 |  | 154 |  | 206 |
| Criticized nonaccrual ${ }^{(\mathrm{c})}$ |  | 246 |  | 326 |  | 1,018 |  | 969 |  | 699 |  | 759 |  | 1,963 |  | 2,054 |
| Total retained loans | \$ | 126,732 | \$ | 118,835 | \$ | 167,660 | \$ | 145,691 | \$ | 309,278 | \$ | 295,828 | \$ | 603,670 | \$ | 560,354 |

(a) The U.S. and non-U.S. distribution is determined based predominantly on the domicile of the borrower.
(b) Represents loans that are considered well-collateralized and therefore still accruing interest.
(c) At December 31, 2021 nonaccrual loans excluded $\$ 127$ million of PPP loans 90 or more days past due and guaranteed by the SBA, predominantly in commercial and industrial. At December 31, 2022 the amount excluded was not material.

## Nonaccrual loans

The following table provides information on retained wholesale nonaccrual loans.

| December 31, (in millions) | Secured by real estate |  |  |  | Commercial and industrial |  |  |  | Other |  |  |  | Total retained loans |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 2022 |  | 2021 |  | 2022 |  | 2021 |  | 2022 |  | 2021 |  | 2022 |  | 2021 |  |
| Nonaccrual loans |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| With an allowance | \$ | 172 | \$ | 254 | \$ | 686 | \$ | 604 | \$ | 487 | \$ | 286 | \$ | 1,345 | \$ | 1,144 |
| Without an allowance ${ }^{\left({ }^{(a)}\right.}$ |  | 74 |  | 72 |  | 332 |  | 365 |  | 212 |  | 473 |  | 618 |  | 910 |
| Total nonaccrual loans ${ }^{(b)}$ | \$ | 246 | \$ | 326 | \$ | 1,018 | \$ | 969 | \$ | 699 | \$ | 759 | \$ | 1,963 | \$ | 2,054 |

(a) When the discounted cash flows or collateral value equals or exceeds the amortized cost of the loan, the loan does not require an allowance. This typically occurs when the loans have been partially charged off and/or there have been interest payments received and applied to the loan balance.
(b) Interest income on nonaccrual loans recognized on a cash basis were not material for the years ended December 31, 2022 and 2021.

## Loan modifications

Certain loan modifications are considered to be TDRs as they provide various concessions to borrowers who are experiencing financial difficulty. Loans with short-term or other insignificant modifications that are not considered concessions are not TDRs nor are loans for which the Firm has elected to suspend TDR accounting guidance under the option provided by the CARES Act. New TDRs during the years ended December 31, 2022, 2021 and 2020 were $\$ 801$ million, $\$ 881$ million and $\$ 734$ million, respectively. New TDRs during the years ended December 31, 2022, 2021 and 2020 reflected the extension of maturity dates, covenant waivers, receipt of assets in partial satisfaction of the loan and deferral of principal and interest payments, predominantly in the Commercial and Industrial and Other loan classes. The impact of these modifications resulting in new TDRs was not material to the Firm for the years ended December 31, 2022, 2021 and 2020.

The carrying value of TDRs was $\$ 936$ million and $\$ 607$ million as of December 31, 2022 and 2021, respectively.

## Notes to consolidated financial statements

## Note 13 - Allowance for credit losses

The Firm's allowance for credit losses represents management's estimate of expected credit losses over the remaining expected life of the Firm's financial assets measured at amortized cost and certain off-balance sheet lending-related commitments. The allowance for credit losses comprises:

- the allowance for loan losses, which covers the Firm's retained loan portfolios (scored and risk-rated) and is presented separately on the Consolidated balance sheets,
- the allowance for lending-related commitments, which is presented on the Consolidated balance sheets in accounts payable and other liabilities, and
- the allowance for credit losses on investment securities, which is reflected in investment securities on the Consolidated balance sheets.

The income statement effect of all changes in the allowance for credit losses is recognized in the provision for credit losses.
Determining the appropriateness of the allowance for credit losses is complex and requires significant judgment by management about the effect of matters that are inherently uncertain. At least quarterly, the allowance for credit losses is reviewed by the CRO, the CFO and the Controller of the Firm. Subsequent evaluations of credit exposures, considering the macroeconomic conditions, forecasts and other factors then prevailing, may result in significant changes in the allowance for credit losses in future periods. The Firm's policies used to determine its allowance for loan losses and its allowance for lending-related commitments are described in the following paragraphs. Refer to Note 10 for a description of the policies used to determine the allowance for credit losses on investment securities.

Methodology for allowances for loan losses and lendingrelated commitments
The allowance for loan losses and allowance for lendingrelated commitments represents expected credit losses over the remaining expected life of retained loans and lending-related commitments that are not unconditionally cancellable. The Firm does not record an allowance for future draws on unconditionally cancellable lending-related commitments (e.g., credit cards). Expected losses related to accrued interest on credit card loans are considered in the Firm's allowance for loan losses. However, the Firm does not record an allowance on other accrued interest receivables, due to its policy to write these receivables off no later than 90 days past due by reversing interest income.

The expected life of each instrument is determined by considering its contractual term, expected prepayments, cancellation features, and certain extension and call options. The expected life of funded credit card loans is generally estimated by considering expected future payments on the credit card account, and determining how much of those amounts should be allocated to repayments of the funded Ioan balance (as of the balance sheet date)
versus other account activity. This allocation is made using an approach that incorporates the payment application requirements of the Credit Card Accountability Responsibility and Disclosure Act of 2009, generally paying down the highest interest rate balances first.

The estimate of expected credit losses includes expected recoveries of amounts previously charged off or expected to be charged off, even if such recoveries result in a negative allowance.

## Collective and Individual Assessments

When calculating the allowance for loan losses and the allowance for lending-related commitments, the Firm assesses whether exposures share similar risk characteristics. If similar risk characteristics exist, the Firm estimates expected credit losses collectively, considering the risk associated with a particular pool and the probability that the exposures within the pool will deteriorate or default. The assessment of risk characteristics is subject to significant management judgment. Emphasizing one characteristic over another or considering additional characteristics could affect the allowance.

- Relevant risk characteristics for the consumer portfolio include product type, delinquency status, current FICO scores, geographic distribution, and, for collateralized loans, current LTV ratios.
- Relevant risk characteristics for the wholesale portfolio include risk rating, delinquency status, tenor, level and type of collateral, LOB, geography, industry, credit enhancement, product type, facility purpose, and payment terms.
The majority of the Firm's credit exposures share risk characteristics with other similar exposures, and as a result are collectively assessed for impairment ("portfolio-based component"). The portfolio-based component covers consumer loans, performing risk-rated loans and certain lending-related commitments.

If an exposure does not share risk characteristics with other exposures, the Firm generally estimates expected credit losses on an individual basis, considering expected repayment and conditions impacting that individual exposure ("asset-specific component"). The asset-specific component covers modified PCD loans, loans modified or reasonably expected to be modified in a TDR, collateraldependent loans, as well as, risk-rated loans that have been placed on nonaccrual status.

## Portfolio-based component

The portfolio-based component begins with a quantitative calculation that considers the likelihood of the borrower changing delinquency status or moving from one risk rating to another. The quantitative calculation covers expected credit losses over an instrument's expected life and is estimated by applying credit loss factors to the Firm's estimated exposure at default. The credit loss factors incorporate the probability of borrower default as well as loss severity in the event of default. They are derived using
a weighted average of five internally developed macroeconomic scenarios over an eight-quarter forecast period, followed by a single year straight-line interpolation to revert to long run historical information for periods beyond the eight-quarter forecast period. The five macroeconomic scenarios consist of a central, relative adverse, extreme adverse, relative upside and extreme upside scenario, and are updated by the Firm's central forecasting team. The scenarios take into consideration the Firm's macroeconomic outlook, internal perspectives from subject matter experts across the Firm, and market consensus and involve a governed process that incorporates feedback from senior management across LOBs, Corporate Finance and Risk Management.
The quantitative calculation is adjusted to take into consideration model imprecision, emerging risk assessments, trends and other subjective factors that are not yet reflected in the calculation. These adjustments are accomplished in part by analyzing the historical loss experience, including during stressed periods, for each major product or model. Management applies judgment in making this adjustment, including taking into account uncertainties associated with the economic and political conditions, quality of underwriting standards, borrower behavior, credit concentrations or deterioration within an industry, product or portfolio, as well as other relevant internal and external factors affecting the credit quality of the portfolio. In certain instances, the interrelationships between these factors create further uncertainties.
The application of different inputs into the quantitative calculation, and the assumptions used by management to adjust the quantitative calculation, are subject to significant management judgment, and emphasizing one input or assumption over another, or considering other inputs or assumptions, could affect the estimate of the allowance for Ioan losses and the allowance for lending-related commitments.

## Asset-specific component

To determine the asset-specific component of the allowance, collateral-dependent loans (including those loans for which foreclosure is probable) and larger, nonaccrual risk-rated loans in the wholesale portfolio segment are generally evaluated individually, while smaller loans (both scored and risk-rated) are aggregated for evaluation using factors relevant for the respective class of assets.

The Firm generally measures the asset-specific allowance as the difference between the amortized cost of the loan and the present value of the cash flows expected to be collected, discounted at the loan's original effective interest rate. Subsequent changes in impairment are generally recognized as an adjustment to the allowance for loan losses. For collateral-dependent loans, the fair value of collateral less estimated costs to sell is used to determine the charge-off amount for declines in value (to reduce the amortized cost of the loan to the fair value of collateral) or the amount of negative allowance that should be
recognized (for recoveries of prior charge-offs associated with improvements in the fair value of collateral).
The asset-specific component of the allowance for loans that have been or are expected to be modified in TDRs incorporates the effect of the modification on the loan's expected cash flows (including forgone interest, principal forgiveness, as well as other concessions), and also the potential for redefault. For residential real estate loans modified in or expected to be modified in TDRs, the Firm develops product-specific probability of default estimates, which are applied at a loan level to compute expected losses. In developing these probabilities of default, the Firm considers the relationship between the credit quality characteristics of the underlying loans and certain assumptions about housing prices and unemployment, based upon industry-wide data. The Firm also considers its own historical loss experience to-date based on actual redefaulted modified loans. For credit card loans modified in or expected to be modified in TDRs, expected losses incorporate projected delinquencies and charge-offs based on the Firm's historical experience by type of modification program. For wholesale loans modified or expected to be modified in TDRs, expected losses incorporate management's expectation of the borrower's ability to repay under the modified terms.
Estimating the timing and amounts of future cash flows is highly judgmental as these cash flow projections rely upon estimates such as loss severities, asset valuations, default rates (including redefault rates on modified loans), the amounts and timing of interest or principal payments (including any expected prepayments) or other factors that are reflective of current and expected market conditions. These estimates are, in turn, dependent on factors such as the duration of current overall economic conditions, industry, portfolio, or borrower-specific factors, the expected outcome of insolvency proceedings as well as, in certain circumstances, other economic factors. All of these estimates and assumptions require significant management judgment and certain assumptions are highly subjective.

## Notes to consolidated financial statements

## Allowance for credit losses and related information

The table below summarizes information about the allowances for credit losses, and includes a breakdown of loans and lending-related commitments by impairment methodology. Refer to Note 10 for further information on the allowance for credit losses on investment securities.

| Total lending-related commitments | \$ | 20,423 | \$ | - | \$ | 462,143 | \$ | 482,566 |

(a) Represents the impact to allowance for credit losses upon the adoption of CECL on January 1, 2020. Refer to Note 1 for further information.
(b) At December 31, 2022 excludes an allowance for credit losses associated with certain accounts receivable in CIB of $\$ 21$ million.
(c) Includes collateral dependent loans, including those considered TDRs and those for which foreclosure is deemed probable, modified PCD loans and noncollateral dependent loans that have been modified or are reasonably expected to be modified in a TDR. Also includes risk-rated loans that have been placed on nonaccrual status for the wholesale portfolio segment. The asset-specific credit card allowance for loans modified, or reasonably expected to be modified, in a TDR is calculated based on the loans' original contractual interest rates and does not consider any incremental penalty rates.
(d) The allowance for lending-related commitments is reported in accounts payable and other liabilities on the Consolidated balance sheets.
(e) At December 31, 2022, 2021 and 2020, lending-related commitments excluded $\$ 13.1$ billion, $\$ 15.7$ billion and $\$ 19.5$ billion, respectively, for the consumer, excluding credit card portfolio segment; $\$ 821.3$ billion, $\$ 730.5$ billion and $\$ 658.5$ billion, respectively, for the credit card portfolio segment; and $\$ 9.8$ billion, $\$ 32.1$ billion and $\$ 25.3$ billion, respectively, for the wholesale portfolio segment, which were not subject to the allowance for lending-
related commitments. Prior-period amount for wholesale lending-related commitments, including the amount not subject to allowance, has been revised to conform with the current presentation.

## Notes to consolidated financial statements

## Discussion of changes in the allowance

The allowance for credit losses as of December 31, 2022 was $\$ 22.2$ billion, reflecting a net addition of $\$ 3.5$ billion from December 31, 2021, consisting of:

- $\$ 2.3$ billion in wholesale, driven by deterioration in the Firm's macroeconomic outlook and loan growth, predominantly in CB and CIB, and
- \$1.2 billion in consumer, predominantly driven by Card Services, reflecting higher outstanding balances and deterioration in the Firm's macroeconomic outlook, partially offset by a reduction in the allowance related to a decrease in uncertainty associated with borrower behavior as the effects of the pandemic gradually recede.
Deterioration in the Firm's macroeconomic outlook included both updates to the central scenario in the fourth quarter of 2022, which now reflects a mild recession, as well as the impact of the increased weight placed on the adverse scenarios beginning in the first quarter of 2022 due to the effects associated with higher inflation, changes in monetary policy, and geopolitical risks, including the war in Ukraine.
The Firm's allowance for credit losses is estimated using a weighted average of five internally developed macroeconomic scenarios. The adverse scenarios incorporate more punitive macroeconomic factors than the central case assumptions provided in the table below, resulting in a weighted average U.S. unemployment rate peaking at $5.6 \%$ in the second quarter of 2024, and a $1.2 \%$ lower U.S. real GDP exiting the second quarter of 2024.

The Firm's central case assumptions reflected U.S. unemployment rates and U.S. real GDP as follows:

|  | Assumptions at December 31, 2022 |  |  |
| :---: | :---: | :---: | :---: |
|  | 2Q23 | 4Q23 | 2Q24 |
| U.S. unemployment rate ${ }^{(\mathrm{a})}$ | 3.8 \% | 4.3 \% | 5.0 \% |
| YoY growth in U.S. real GDP ${ }^{(b)}$ | 1.5 \% | 0.4 \% | - \% |
|  | Assumptions at December 31, 2021 |  |  |
|  | 2Q22 | 4Q22 | 2Q23 |
| U.S. unemployment rate ${ }^{(\mathrm{a})}$ | 4.2 \% | 4.0 \% | 3.9 \% |
| YoY growth in U.S. real GDP ${ }^{(b)}$ | 3.1 \% | 2.8 \% | 2.1 \% |

(a) Reflects quarterly average of forecasted U.S. unemployment rate.
(b) The year over year growth in U.S. real GDP in the forecast horizon of the central scenario is calculated as the percentage change in U.S. real GDP levels from the prior year.

Subsequent changes to this forecast and related estimates will be reflected in the provision for credit losses in future periods.

Refer to Critical Accounting Estimates Used by the Firm on pages 149-152 for further information on the allowance for credit losses and related management judgments. Refer to Consumer Credit Portfolio on pages 110-115, Wholesale Credit Portfolio on pages 116-126 for additional information on the consumer and wholesale credit portfolios.

## Note 14 - Variable interest entities

Refer to Note 1 on page 164 for a further description of JPMorgan Chase's accounting policies regarding consolidation of VIEs. The following table summarizes the most significant types of Firm-sponsored VIEs by business segment. The Firm considers a "Firm-sponsored" VIE to include any entity where: (1) JPMorgan Chase is the primary beneficiary of the structure; (2) the VIE is used by JPMorgan Chase to securitize Firm assets; (3) the VIE issues financial instruments with the JPMorgan Chase name; or (4) the entity is a JPMorgan Chase-administered asset-backed commercial paper conduit.

| Line of Business | Transaction Type | Activity | 2022 Form 10-K <br> page references |
| :--- | :--- | :--- | :--- |
| CCB | Credit card securitization trusts | Securitization of originated credit card receivables | pages 247-248 |
|  | Mortgage securitization trusts | Servicing and securitization of both originated and <br> purchased residential mortgages | pages 248-250 |

The Firm's other business segments are also involved with VIEs (both third-party and Firm-sponsored), but to a lesser extent, as follows:

- Asset \& Wealth Management: AWM sponsors and manages certain funds that are deemed VIEs. As asset manager of the funds, AWM earns a fee based on assets managed; the fee varies with each fund's investment objective and is competitively priced. For fund entities that qualify as VIEs, AWM's interests are, in certain cases, considered to be significant variable interests that result in consolidation of the financial results of these entities.
- Commercial Banking: CB provides financing and lending-related services to a wide spectrum of clients, including certain third-party-sponsored entities that may meet the definition of a VIE. CB does not control the activities of these entities and does not consolidate these entities. CB's maximum loss exposure, regardless of whether the entity is a VIE, is generally limited to loans and lending-related commitments which are reported and disclosed in the same manner as any other thirdparty transaction.
- Corporate: Corporate is involved with entities that may meet the definition of VIEs; however these entities are generally subject to specialized investment company accounting, which does not require the consolidation of investments, including VIEs. In addition, Treasury and CIO invest in securities generally issued by third parties which may meet the definition of VIEs (e.g., issuers of asset-backed securities). In general, the Firm does not have the power to direct the significant activities of these entities and therefore does not consolidate these entities. Refer to Note 10 for further information on the Firm's investment securities portfolio.

In addition, CIB also invests in and provides financing and other services to VIEs sponsored by third parties. Refer to pages 251-252 of this Note for more information on consolidated VIE assets and liabilities as well as the VIEs sponsored by third parties.

## Significant Firm-sponsored variable interest entities

## Credit card securitizations

CCB’s Card Services business may securitize originated credit card loans, primarily through the Chase Issuance Trust (the "Trust"). The Firm's continuing involvement in credit card securitizations includes servicing the receivables, retaining an undivided seller's interest in the receivables, retaining certain senior and subordinated securities and maintaining escrow accounts.
The Firm consolidates the assets and liabilities of its sponsored credit card trusts as it is considered to be the primary beneficiary of these securitization trusts based on the Firm's ability to direct the activities of these VIEs through its servicing responsibilities and other duties, including making decisions as to the receivables that are transferred into those trusts and as to any related modifications and workouts. Additionally, the nature and extent of the Firm's other continuing involvement with the
trusts, as indicated above, obligates the Firm to absorb losses and gives the Firm the right to receive certain benefits from these VIEs that could potentially be significant.
The underlying securitized credit card receivables and other assets of the securitization trusts are available only for payment of the beneficial interests issued by the securitization trusts; they are not available to pay the Firm's other obligations or the claims of the Firm's creditors.
The agreements with the credit card securitization trusts require the Firm to maintain a minimum undivided interest in the credit card trusts (generally 5\%). As of December 31, 2022 and 2021, the Firm held undivided interests in Firm-sponsored credit card securitization trusts of $\$ 6.1$ billion and $\$ 7.1$ billion, respectively. The Firm maintained an average undivided interest in principal

## Notes to consolidated financial statements

receivables owned by those trusts of approximately 62\% and 57\% for the years ended December 31, 2022 and 2021, respectively. The Firm did not retain any senior securities and retained $\$ 1.5$ billion of subordinated securities in certain of its credit card securitization trusts at both December 31, 2022 and 2021. The Firm's undivided interests in the credit card trusts and securities retained are eliminated in consolidation.

Firm-sponsored mortgage and other securitization trusts
The Firm securitizes (or has securitized) originated and purchased residential mortgages, commercial mortgages and other consumer loans primarily in its CCB and CIB businesses. Depending on the particular transaction, as well as the respective business involved, the Firm may act as the servicer of the loans and/or retain certain beneficial interests in the securitization trusts.

The following tables present the total unpaid principal amount of assets held in Firm-sponsored private-label securitization entities, including those in which the Firm has continuing involvement, and those that are consolidated by the Firm. Continuing involvement includes servicing the loans, holding senior interests or subordinated interests (including amounts required to be held pursuant to credit risk retention rules), recourse or guarantee arrangements, and derivative contracts. In certain instances, the Firm's only continuing involvement is servicing the loans. The Firm's maximum loss exposure from retained and purchased interests is the carrying value of these interests.

(a) Excludes U.S. GSEs and government agency securitizations and re-securitizations, which are not Firm-sponsored.
(b) Consists of securities backed by commercial real estate loans and non-mortgage-related consumer receivables.
(c) Excludes the following: retained servicing; securities retained from loan sales and securitization activity related to U.S. GSEs and government agencies; interest rate and foreign exchange derivatives primarily used to manage interest rate and foreign exchange risks of securitization entities; senior securities of $\$ 134$ million and $\$ 145$ million at December 31, 2022 and 2021,respectively, and subordinated securities which were not material at both December 31, 2022 and 2021, which the Firm purchased in connection with CIB's secondary market-making activities.
(d) Includes interests held in re-securitization transactions.
(e) As of December 31, 2022 and 2021, $84 \%$ and $79 \%$, respectively, of the Firm's retained securitization interests, which are predominantly carried at fair value and include amounts required to be held pursuant to credit risk retention rules, were risk-rated "A" or better, on an S\&P-equivalent basis. The retained interests in prime residential mortgages consisted of $\$ 2.6$ billion and $\$ 1.6$ billion of investment-grade retained interests at December 31 , 2022 and 2021, respectively, and $\$ 131$ million of noninvestment-grade retained interests at December 31, 2021; noninvestment-grade retained interests were not material at December 31, 2022. The retained interests in commercial and other securitization trusts consisted of $\$ 5.8$ billion and $\$ 3.5$ billion of investment-grade retained interests, and $\$ 1.1$ billion and $\$ 929$ million of noninvestment-grade retained interests at December 31, 2022 and 2021, respectively.
(f) Prior-period amount has been revised to conform with the current presentation.

## Residential mortgage

The Firm securitizes residential mortgage loans originated by CCB, as well as residential mortgage loans purchased from third parties by either CCB or CIB. CCB generally retains servicing for all residential mortgage loans it originated or purchased, and for certain mortgage loans purchased by CIB. For securitizations of loans serviced by CCB, the Firm has the power to direct the significant activities of the VIE because it is responsible for decisions related to loan modifications and workouts. CCB may also retain an interest upon securitization.

In addition, CIB engages in underwriting and trading activities involving securities issued by Firm-sponsored securitization trusts. As a result, CIB at times retains senior and/or subordinated interests (including residual interests and amounts required to be held pursuant to credit risk retention rules) in residential mortgage securitizations at the time of securitization, and/or reacquires positions in the secondary market in the normal course of business. In certain instances, as a result of the positions retained or reacquired by CIB or held by Treasury and CIO or CCB, when considered together with the servicing arrangements entered into by CCB, the Firm is deemed to be the primary beneficiary of certain securitization trusts.
The Firm does not consolidate residential mortgage securitizations (Firm-sponsored or third-party-sponsored) when it is not the servicer (and therefore does not have the power to direct the most significant activities of the trust) or does not hold a beneficial interest in the trust that could potentially be significant to the trust.

Commercial mortgages and other consumer securitizations CIB originates and securitizes commercial mortgage loans, and engages in underwriting and trading activities involving the securities issued by securitization trusts. CIB may retain unsold senior and/or subordinated interests (including amounts required to be held pursuant to credit risk retention rules) in commercial mortgage securitizations at the time of securitization but, generally, the Firm does not service commercial loan securitizations. Treasury and CIO may choose to invest in these securitizations as well. For commercial mortgage securitizations the power to direct the significant activities of the VIE generally is held by the servicer or investors in a specified class of securities ("controlling class"). The Firm generally does not retain an interest in the controlling class in its sponsored commercial mortgage securitization transactions.

## Re-securitizations

The Firm engages in certain re-securitization transactions in which debt securities are transferred to a VIE in exchange for new beneficial interests. These transfers occur in connection with both U.S. GSEs and government agency sponsored VIEs, which are backed by residential mortgages. The Firm's consolidation analysis is largely dependent on the Firm's role and interest in the re-securitization trusts.

The following table presents the principal amount of securities transferred to re-securitization VIEs.

| Year ended December 31, <br> (in millions) | $\mathbf{2 0 2 2}$ | 2021 | 2020 |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Transfers of securities to VIEs |  |  |  |  |  |
| U.S. GSEs and government <br> agencies | $\mathbf{\$ 1 6 , 1 2 8}$ | $\$$ | 53,923 | $\$$ | 46,123 |

Most re-securitizations with which the Firm is involved are client-driven transactions in which a specific client or group of clients is seeking a specific return or risk profile. For these transactions, the Firm has concluded that the decision-making power of the entity is shared between the Firm and its clients, considering the joint effort and decisions in establishing the re-securitization trust and its assets, as well as the significant economic interest the client holds in the re-securitization trust; therefore the Firm does not consolidate the re-securitization VIE.
The Firm did not transfer any private label securities to resecuritization VIEs during 2022, 2021 and 2020, and retained interests in any such Firm-sponsored VIEs as of December 31, 2022 and 2021 were not material.
Additionally, the Firm may invest in beneficial interests of third-party-sponsored re-securitizations and generally purchases these interests in the secondary market. In these circumstances, the Firm does not have the unilateral ability to direct the most significant activities of the resecuritization trust, either because it was not involved in the initial design of the trust, or the Firm was involved with an independent third-party sponsor and demonstrated shared power over the creation of the trust; therefore, the Firm does not consolidate the re-securitization VIE.

## Notes to consolidated financial statements

The following table presents information on the Firm's interests in nonconsolidated re-securitization VIEs.

|  | Nonconsolidated <br> re-securitization VIEs |  |  |
| :--- | :--- | :--- | :--- |
| December 31, <br> (in millions) | $\mathbf{2 0 2 2}$ | 2021 |  |
| U.S. GSEs and government agencies |  |  |  |
| Interest in VIEs | $\mathbf{\$}$ | $\mathbf{2 , 5 8 0}$ | $\$$ |

As of December 31, 2022 and 2021, the Firm did not consolidate any U.S. GSE and government agency resecuritization VIEs or any Firm-sponsored private-label resecuritization VIEs.

## Multi-seller conduits

Multi-seller conduit entities are separate bankruptcy remote entities that provide secured financing, collateralized by pools of receivables and other financial assets, to customers of the Firm. The conduits fund their financing facilities through the issuance of highly rated commercial paper. The primary source of repayment of the commercial paper is the cash flows from the pools of assets. In most instances, the assets are structured with dealspecific credit enhancements provided to the conduits by the customers (i.e., sellers) or other third parties. Dealspecific credit enhancements are generally structured to cover a multiple of historical losses expected on the pool of assets, and are typically in the form of overcollateralization provided by the seller. The deal-specific credit enhancements mitigate the Firm's potential losses on its agreements with the conduits.
To ensure timely repayment of the commercial paper, and to provide the conduits with funding to provide financing to customers in the event that the conduits do not obtain funding in the commercial paper market, each asset pool financed by the conduits has a minimum $100 \%$ dealspecific liquidity facility associated with it provided by JPMorgan Chase Bank, N.A. JPMorgan Chase Bank, N.A. also provides the multi-seller conduit vehicles with uncommitted program-wide liquidity facilities and program-wide credit enhancement in the form of standby letters of credit. The amount of program-wide credit enhancement required is based upon commercial paper issuance and approximates $10 \%$ of the outstanding balance of commercial paper.
The Firm consolidates its Firm-administered multi-seller conduits, as the Firm has both the power to direct the significant activities of the conduits and a potentially significant economic interest in the conduits. As administrative agent and in its role in structuring transactions, the Firm makes decisions regarding asset types and credit quality, and manages the commercial paper funding needs of the conduits. The Firm's interests that could potentially be significant to the VIEs include the fees received as administrative agent and liquidity and program-wide credit enhancement provider, as well as the potential exposure created by the liquidity and credit enhancement facilities provided to the conduits.

In the normal course of business, JPMorgan Chase makes markets in and invests in commercial paper issued by the Firm-administered multi-seller conduits. The Firm held $\$ 13.8$ billion and $\$ 13.7$ billion of the commercial paper issued by the Firm-administered multi-seller conduits at December 31, 2022 and 2021, respectively, which have been eliminated in consolidation. The Firm's investments reflect the Firm's funding needs and capacity and were not driven by market illiquidity. Other than the amounts required to be held pursuant to credit risk retention rules, the Firm is not obligated under any agreement to purchase the commercial paper issued by the Firm-administered multi-seller conduits.

Deal-specific liquidity facilities, program-wide liquidity and credit enhancement provided by the Firm have been eliminated in consolidation. The Firm or the Firmadministered multi-seller conduits provide lending-related commitments to certain clients of the Firm-administered multi-seller conduits. The unfunded commitments were $\$ 10.6$ billion and $\$ 13.4$ billion at December 31, 2022 and 2021, respectively, and are reported as off-balance sheet lending-related commitments in other unfunded commitments to extend credit. Refer to Note 28 for more information on off-balance sheet lending-related commitments.

## Municipal bond vehicles

Municipal bond vehicles or tender option bond ("TOB") trusts allow institutions to finance their municipal bond investments at short-term rates. In a typical TOB transaction, the trust purchases highly rated municipal bond(s) of a single issuer and funds the purchase by issuing two types of securities: (1) puttable floating-rate certificates ("floaters") and (2) inverse floating-rate residual interests ("residuals"). The floaters are typically purchased by money market funds or other short-term investors and may be tendered, with requisite notice, to the TOB trust. The residuals are retained by the investor seeking to finance its municipal bond investment. TOB transactions where the residual is held by a third-party investor are typically known as customer TOB trusts, and non-customer TOB trusts are transactions where the Residual is retained by the Firm. Customer TOB trusts are sponsored by a third party. The Firm serves as sponsor for all non-customer TOB transactions. The Firm may provide various services to a TOB trust, including remarketing agent, liquidity or tender option provider, and/or sponsor.
J.P. Morgan Securities LLC may serve as a remarketing agent on the floaters for TOB trusts. The remarketing agent is responsible for establishing the periodic variable rate on the floaters, conducting the initial placement and remarketing tendered floaters. The remarketing agent may, but is not obligated to, make markets in floaters. Floaters held by the Firm were not material during 2022 and 2021.

JPMorgan Chase Bank, N.A. or J.P. Morgan Securities LLC often serves as the sole liquidity or tender option provider for the TOB trusts. The liquidity provider's obligation to perform is conditional and is limited by certain events
("Termination Events"), which include bankruptcy or failure to pay by the municipal bond issuer or credit enhancement provider, an event of taxability on the municipal bonds or the immediate downgrade of the municipal bond to below investment grade. In addition, the liquidity provider's exposure is typically further limited by the high credit quality of the underlying municipal bonds, the excess collateralization in the vehicle, or, in certain transactions, the reimbursement agreements with the Residual holders.
Holders of the floaters may "put," or tender, their floaters to the TOB trust. If the remarketing agent cannot successfully remarket the floaters to another investor, the
liquidity provider either provides a loan to the TOB trust for the TOB trust's purchase of the floaters, or it directly purchases the tendered floaters.
TOB trusts are considered to be variable interest entities. The Firm consolidates non-customer TOB trusts because as the Residual holder, the Firm has the right to make decisions that significantly impact the economic performance of the municipal bond vehicle, and it has the right to receive benefits and bear losses that could potentially be significant to the municipal bond vehicle.

## Consolidated VIE assets and liabilities

The following table presents information on assets and liabilities related to VIEs consolidated by the Firm as of December 31, 2022 and 2021.

(a) Includes residential mortgage securitizations.
(b) Primarily includes purchased supply chain finance receivables and purchased auto loan securitizations in CIB.
(c) Includes assets classified as cash and other assets on the Consolidated balance sheets.
(d) The assets of the consolidated VIEs included in the program types above are used to settle the liabilities of those entities. The assets and liabilities include third-party assets and liabilities of consolidated VIEs and exclude intercompany balances that eliminate in consolidation.
(e) The interest-bearing beneficial interest liabilities issued by consolidated VIEs are classified in the line item on the Consolidated balance sheets titled, "Beneficial interests issued by consolidated VIEs". The holders of these beneficial interests generally do not have recourse to the general credit of JPMorgan Chase. Included in beneficial interests in VIE assets are long-term beneficial interests of $\$ 2.1$ billion and $\$ 2.6$ billion at December 31 , 2022 and 2021, respectively.
(f) Includes liabilities classified as accounts payable and other liabilities on the Consolidated balance sheets.

## Notes to consolidated financial statements

## VIEs sponsored by third parties

The Firm enters into transactions with VIEs structured by other parties. These include, for example, acting as a derivative counterparty, liquidity provider, investor, underwriter, placement agent, remarketing agent, trustee or custodian. These transactions are conducted at arm'slength, and individual credit decisions are based on the analysis of the specific VIE, taking into consideration the quality of the underlying assets. Where the Firm does not have the power to direct the activities of the VIE that most significantly impact the VIE's economic performance, or a variable interest that could potentially be significant, the Firm generally does not consolidate the VIE, but it records and reports these positions on its Consolidated balance sheets in the same manner it would record and report positions in respect of any other third-party transaction.

## Tax credit vehicles

The Firm holds investments in unconsolidated tax credit vehicles, which are limited partnerships and similar entities that own and operate affordable housing, energy, and other projects. These entities are primarily considered VIEs. A third party is typically the general partner or managing member and has control over the significant activities of the tax credit vehicles, and accordingly the Firm does not consolidate tax credit vehicles. The Firm generally invests in these partnerships as a limited partner and earns a return primarily through the receipt of tax credits allocated to the projects. The maximum loss exposure, represented by equity investments and funding commitments, was $\$ 30.2$ billion and $\$ 26.8$ billion, of which $\$ 10.6$ billion and $\$ 9.4$ billion was unfunded at December 31, 2022 and 2021, respectively. The Firm assesses each project and to reduce the risk of loss, may withhold varying amounts of its capital investment until the project qualifies for tax credits. Refer to Note 25 for further information on affordable housing tax credits and Note 28 for more information on off-balance sheet lending-related commitments.

Customer municipal bond vehicles (TOB trusts) The Firm may provide various services to customer TOB trusts, including remarketing agent, liquidity or tender option provider. In certain customer TOB transactions, the Firm, as liquidity provider, has entered into a reimbursement agreement with the Residual holder. In those transactions, upon the termination of the vehicle, the Firm has recourse to the third-party Residual holders for any shortfall. The Firm does not have any intent to protect Residual holders from potential losses on any of the underlying municipal bonds. The Firm does not consolidate customer TOB trusts, since the Firm does not have the power to make decisions that significantly impact the economic performance of the municipal bond vehicle. The Firm's maximum exposure as a liquidity provider to customer TOB trusts at December 31, 2022 and 2021, was $\$ 5.8$ billion and $\$ 6.8$ billion, respectively. The fair value of assets held by such VIEs at December 31, 2022 and 2021 was $\$ 8.2$ billion and $\$ 10.5$ billion respectively.

## Loan securitizations

The Firm has securitized and sold a variety of loans, including residential mortgages, credit card receivables, commercial mortgages and other consumer loans. The purposes of these securitization transactions were to satisfy investor demand and to generate liquidity for the Firm.
For loan securitizations in which the Firm is not required to consolidate the trust, the Firm records the transfer of the loan receivable to the trust as a sale when all of the following accounting criteria for a sale are met: (1) the transferred financial assets are legally isolated from the Firm's creditors; (2) the transferee or beneficial interest holder can pledge or exchange the transferred financial assets; and (3) the Firm does not maintain effective control over the transferred financial assets (e.g., the Firm cannot repurchase the transferred assets before their maturity and it does not have the ability to unilaterally cause the holder to return the transferred assets).
For loan securitizations accounted for as a sale, the Firm recognizes a gain or loss based on the difference between the value of proceeds received (including cash, beneficial interests, or servicing assets received) and the carrying value of the assets sold. Gains and losses on securitizations are reported in noninterest revenue.

## Securitization activity

The following table provides information related to the Firm's securitization activities for the years ended December 31, 2022, 2021 and 2020, related to assets held in Firm-sponsored securitization entities that were not consolidated by the Firm, and where sale accounting was achieved at the time of the securitization.

| Year ended December 31, (in millions) | 2022 |  |  |  | 2021 |  |  |  | 2020 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Residential mortgage ${ }^{\text {(d }}$ |  | Commercial and other ${ }^{(\mathrm{e})}$ |  | Residential mortgage ${ }^{\text {(d) }}$ |  | Commercial and other ${ }^{(\mathrm{e})}$ |  | Residential mortgage ${ }^{\text {(d) }}$ |  | Commercial and other ${ }^{(\text {e })}$ |  |
| Principal securitized | \$ | 10,218 | \$ | 9,036 | \$ | 23,876 | \$ | 14,917 | \$ | 7,103 | \$ | 6,624 |

| Proceeds received from loan sales as financial instruments ${ }^{(b)(C)}$ | \$ | 9,783 | \$ | 8,921 | \$ | 24,450 | \$ | 15,044 | \$ | 7,321 | \$ | 6,865 |
| Servicing fees collected |  | 62 |  | 2 |  | 153 |  | 1 |  | 211 |  | 1 |
| Cash flows received on interests |  | 489 |  | 285 |  | 578 |  | 273 |  | 801 |  | 239 |

(a) Excludes re-securitization transactions.
(b) Predominantly includes Level 2 assets.
(c) The carrying value of the loans accounted for at fair value approximated the proceeds received upon loan sale.
(d) Represents prime mortgages. Excludes Ioan securitization activity related to U.S. GSEs and government agencies.
(e) Includes commercial mortgage and other consumer loans.

Key assumptions used to value retained interests originated during the year are shown in the table below.

| Year ended December 31, | 2022 | 2021 | 2020 |
| :--- | :--- | :--- | :--- |
| Residential mortgage retained interest: |  |  |  |
| Weighted-average life (in years) | $\mathbf{1 0 . 8}$ | 3.9 | 4.7 |
| Weighted-average discount rate | $\mathbf{4 . 0} \%$ | $3.3 \%$ | $8.2 \%$ |
| Commercial mortgage retained interest: |  |  |  |
| Weighted-average life (in years) | $\mathbf{5 . 9}$ | 6.0 | 6.9 |
| Weighted-average discount rate | $\mathbf{2 . 9} \%$ | $1.2 \%$ | $3.0 \%$ |

Loans and excess MSRs sold to U.S. governmentsponsored enterprises and loans in securitization transactions pursuant to Ginnie Mae guidelines In addition to the amounts reported in the securitization activity tables above, the Firm, in the normal course of business, sells originated and purchased mortgage loans and certain originated excess MSRs on a nonrecourse basis, predominantly to U.S. GSEs. These loans and excess MSRs are sold primarily for the purpose of securitization by the U.S. GSEs, who provide certain guarantee provisions (e.g., credit enhancement of the loans). The Firm also sells loans into securitization transactions pursuant to Ginnie Mae guidelines; these loans are typically insured or guaranteed by another U.S. government agency. The Firm does not consolidate the securitization vehicles underlying these transactions as it is not the primary beneficiary. For a limited number of loan sales, the Firm is obligated to share a portion of the credit risk associated with the sold loans with the purchaser. Refer to Note 28 for additional information about the Firm's loan sales- and securitizationrelated indemnifications and Note 15 for additional information about the impact of the Firm's sale of certain excess MSRs.

## Notes to consolidated financial statements

The following table summarizes the activities related to loans sold to the U.S. GSEs, and loans in securitization transactions pursuant to Ginnie Mae guidelines.

| Year ended December 31, (in millions) | 2022 |  | 2021 |  | 2020 |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Carrying value of loans sold | \$ | 48,891 | \$ | 105,035 | \$ | 81,153 |
| Proceeds received from Ioan sales as cash | \$ | 22 | \$ | 161 | \$ | 45 |
| Proceeds from loan sales as securities ${ }^{(\mathrm{a})(\mathrm{b})}$ |  | 48,096 |  | 103,286 |  | 80,186 |
| Total proceeds received from loan sales ${ }^{(c)}$ | \$ | 48,118 | \$ | 103,447 | \$ | 80,231 |
| Gains/(losses) on loan sales ${ }^{(d)(e)}$ | \$ | (25) | \$ | 9 | \$ | 6 |

(a) Includes securities from U.S. GSEs and Ginnie Mae that are generally sold shortly after receipt or retained as part of the Firm's investment securities portfolio.
(b) Included in level 2 assets.
(c) Excludes the value of MSRs retained upon the sale of loans.
(d) Gains/(losses) on loan sales include the value of MSRs.
(e) The carrying value of the loans accounted for at fair value approximated the proceeds received upon loan sale.

## Options to repurchase delinquent loans

In addition to the Firm's obligation to repurchase certain loans due to material breaches of representations and warranties as discussed in Note 28, the Firm also has the option to repurchase delinquent loans that it services for Ginnie Mae loan pools, as well as for other U.S. government agencies under certain arrangements. The Firm typically
elects to repurchase delinquent loans from Ginnie Mae Ioan pools as it continues to service them and/or manage the foreclosure process in accordance with the applicable requirements, and such loans continue to be insured or guaranteed. When the Firm's repurchase option becomes exercisable, such loans must be reported on the Consolidated balance sheets as a loan with a corresponding liability. Refer to Note 12 for additional information.
The following table presents loans the Firm repurchased or had an option to repurchase, real estate owned, and foreclosed government-guaranteed residential mortgage loans recognized on the Firm's Consolidated balance sheets as of December 31, 2022 and 2021. Substantially all of these loans and real estate are insured or guaranteed by U.S. government agencies.

| December 31, <br> (in millions) |  | $\mathbf{2 0 2 2}$ | 2021 |  |
| :--- | ---: | ---: | ---: | ---: |
| Loans repurchased or option to repurchase $^{(\mathrm{a})}$ | $\mathbf{\$}$ | $\mathbf{8 3 9}$ | $\$$ | 1,022 |
| Real estate owned |  |  |  |  |

(a) Predominantly all of these amounts relate to loans that have been repurchased from Ginnie Mae loan pools.
(b) Relates to voluntary repurchases of loans, which are included in accrued interest and accounts receivable.

## Loan delinquencies and liquidation losses

The table below includes information about components of and delinquencies related to nonconsolidated securitized financial assets held in Firm-sponsored private-label securitization entities, in which the Firm has continuing involvement as of December 31, 2022 and 2021.

| As of or for the year ended December 31, (in millions) | Securitized assets |  |  |  |  | 90 days past due |  |  |  |  | Net liquidation losses / (recoveries) |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 2022 |  | 2021 |  | 2022 |  |  | 2021 |  |  | 2022 |  | 2021 |  |  |
| Securitized loans |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| Residential mortgage: |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| Prime/ Alt-A \& option ARMs | \$ | 37,058 | \$ | 42,522 | (a) | \$ | 511 | \$ | 1,937 | (a) | \$ | (29) | \$ | 16 | (a) |
| Subprime |  | 1,743 |  | 10,115 |  |  | 212 |  | 1,609 |  |  | (1) |  | 16 |  |
| Commercial and other |  | 127,037 |  | 93,698 |  |  | 948 |  | 1,456 |  |  | 50 |  | 288 |  |
| Total loans securitized | \$ | 165,838 | \$ | 146,335 |  | \$ | 1,671 | \$ | 5,002 |  | \$ | 20 | \$ | 320 |  |

(a) Prior-period amounts have been revised to conform with the current presentation.

## Note 15 - Goodwill and Mortgage servicing rights

## Goodwill

Goodwill is recorded upon completion of a business combination as the difference between the purchase price and the fair value of the net assets acquired, and can be adjusted up to one year from the acquisition date as more information is obtained about the fair value of assets acquired and liabilities assumed. Subsequent to initial recognition, goodwill is not amortized but is tested for impairment during the fourth quarter of each fiscal year, or more often if events or circumstances, such as adverse changes in the business climate, indicate that there may be an impairment.
The goodwill associated with each business combination is allocated to the related reporting units, which are generally determined based on how the Firm's businesses are managed and how they are reviewed. The following table presents goodwill attributed to the reportable business segments and Corporate.

| December 31, (in millions) | $\mathbf{2 0 2 2}$ | 2021 | 2020 |
| :--- | ---: | ---: | ---: |
| Consumer \& Community Banking | $\mathbf{\$ 3 2 , 1 2 1}$ | $\$ 31,474$ | $\$ 31,311$ |
| Corporate \& Investment Bank | $\mathbf{8 , 0 0 8}$ | 7,906 | 7,913 |
| Commercial Banking | $\mathbf{2 , 9 8 5}$ | 2,986 | 2,985 |
| Asset \& Wealth Management | $\mathbf{7 , 9 0 2}$ | 7,222 | 7,039 |
| Corporate $^{(\mathrm{a})}$ | $\mathbf{6 4 6}$ | 727 | - |
| Total goodwill | $\$ \mathbf{5 1 , 6 6 2}$ | $\$ 50,315$ | $\$ 49,248$ |

(a) For goodwill in Corporate acquired in the third quarter of 2021, the Firm elected to perform a qualitative impairment assessment, as permitted under U.S. GAAP.
The following table presents changes in the carrying amount of goodwill.

| Year ended December 31, (in millions) | 2022 | 2021 | 2020 |
| :---: | :---: | :---: | :---: |
| Balance at beginning of period | \$ 50,315 | \$ 49,248 | \$ 47,823 |
| Changes during the period from: |  |  |  |
| Business combinations ${ }^{(\mathrm{a})}$ | 1,426 | 1,073 (c) | 1,412 |
| Other ${ }^{(b)}$ | (79) | (6) ${ }^{(c)}$ | 13 |
| Balance at December 31, | \$ 51,662 | \$ 50,315 | \$ 49,248 |

(a) For 2022, represents estimated goodwill associated with the acquisitions of Global Shares PLC in AWM, Frosch Travel Group, LLC and Figg, Inc. in CCB, and Renovite Technologies, Inc. and Volkswagen Payments S.A. in CIB. For 2021, represents goodwill associated with the acquisitions of Nutmeg in Corporate, OpenInvest and Campbell Global in AWM, and Frank and The Infatuation in CCB. For 2020, represents goodwill associated with the acquisitions of cxLoyalty in CCB and 55ip in AWM.
(b) Predominantly foreign currency adjustments.
(c) Prior-period amounts have been revised to conform with the current presentation.

## Goodwill impairment testing

The Firm's goodwill was not impaired at December 31, 2022, 2021 and 2020.
The goodwill impairment test is generally performed by comparing the current fair value of each reporting unit with its carrying value. If the fair value is in excess of the carrying value, then the reporting unit's goodwill is considered not to be impaired. If the fair value is less than the carrying value, then an impairment charge is recognized
for the amount by which the reporting unit's carrying value exceeds its fair value, up to the amount of goodwill allocated to that reporting unit.
The Firm uses the reporting units' allocated capital plus goodwill and other intangible assets as a proxy for the carrying values of equity for the reporting units in the goodwill impairment testing. Reporting unit equity is determined on a similar basis as the allocation of capital to the LOBS which takes into consideration a variety of factors including capital levels of similarly rated peers and applicable regulatory capital requirements. Proposed LOB capital levels are incorporated into the Firm's annual budget process, which is reviewed by the Firm's Board of Directors and Operating Committee. Allocated capital is further reviewed at least annually and updated as needed.
The primary method the Firm uses to estimate the fair value of its reporting units is the income approach. This approach projects cash flows for the forecast period and uses the perpetuity growth method to calculate terminal values. These cash flows and terminal values, which are based on the reporting units' annual budgets and forecasts are then discounted using an appropriate discount rate. The discount rate used for each reporting unit represents an estimate of the cost of equity for that reporting unit and is determined considering the Firm's overall estimated cost of equity (estimated using the Capital Asset Pricing Model), as adjusted for the risk characteristics specific to each reporting unit (for example, for higher levels of risk or uncertainty associated with the business or management's forecasts and assumptions). To assess the reasonableness of the discount rates used for each reporting unit, management compares the discount rate to the estimated cost of equity for publicly traded institutions with similar businesses and risk characteristics. In addition, the weighted average cost of equity (aggregating the various reporting units) is compared with the Firm's overall estimated cost of equity to ensure reasonableness. The valuations derived from the discounted cash flow analysis are then compared with market-based trading and transaction multiples for relevant competitors. Trading and transaction comparables are used as general indicators to assess the overall reasonableness of the estimated fair values, although precise conclusions generally cannot be drawn due to the differences that naturally exist between the Firm's businesses and competitor institutions.
The Firm also takes into consideration a comparison between the aggregate fair values of the Firm's reporting units and JPMorgan Chase's market capitalization. In evaluating this comparison, the Firm considers several factors, including (i) a control premium that would exist in a market transaction, (ii) factors related to the level of execution risk that would exist at the Firmwide level that do not exist at the reporting unit level and (iii) short-term market volatility and other factors that do not directly affect the value of individual reporting units.

## Notes to consolidated financial statements

Unanticipated declines in business performance, increases in credit losses, increases in capital requirements, as well as deterioration in economic or market conditions, adverse regulatory or legislative changes or increases in the estimated market cost of equity, could cause the estimated fair values of the Firm's reporting units to decline in the future, which could result in a material impairment charge to earnings in a future period related to some portion of the associated goodwill.

Mortgage servicing rights
MSRs represent the fair value of expected future cash flows for performing servicing activities for others. The fair value considers estimated future servicing fees and ancillary revenue, offset by estimated costs to service the loans, and generally declines over time as net servicing cash flows are received, effectively amortizing the MSR asset against contractual servicing and ancillary fee income. MSRs are either purchased from third parties or recognized upon sale or securitization of mortgage loans if servicing is retained.

As permitted by U.S. GAAP, the Firm has elected to account for its MSRs at fair value. The Firm treats its MSRs as a single class of servicing assets based on the availability of market inputs used to measure the fair value of its MSR asset and its treatment of MSRs as one aggregate pool for risk management purposes. The Firm estimates the fair value of MSRs using an option-adjusted spread ("OAS") model, which projects MSR cash flows over multiple interest rate scenarios in conjunction with the Firm's prepayment model, and then discounts these cash flows at risk-adjusted rates. The model considers portfolio characteristics, contractually specified servicing fees, prepayment assumptions, delinquency rates, costs to service, late charges and other ancillary revenue, and other economic factors. The Firm compares fair value estimates and assumptions to observable market data where available, and also considers recent market activity and actual portfolio experience.

The fair value of MSRs is sensitive to changes in interest rates, including their effect on prepayment speeds. MSRs typically decrease in value when interest rates decline because declining interest rates tend to increase prepayments and therefore reduce the expected life of the net servicing cash flows that comprise the MSR asset. Conversely, securities (e.g., mortgage-backed securities), and certain derivatives (e.g., those for which the Firm
receives fixed-rate interest payments) increase in value when interest rates decline. JPMorgan Chase uses combinations of derivatives and securities to manage the risk of changes in the fair value of MSRs. The intent is to offset any interest-rate related changes in the fair value of MSRs with changes in the fair value of the related risk management instruments.

The following table summarizes MSR activity for the years ended December 31, 2022, 2021 and 2020.

| As of or for the year ended December 31, (in millions, except where otherwise noted) | 2022 |  | 2021 |  | 2020 |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Fair value at beginning of period | \$ | 5,494 | \$ | 3,276 | \$ | 4,699 |
| MSR activity: |  |  |  |  |  |  |
| Originations of MSRs |  | 798 |  | 1,659 |  | 944 |
| Purchase of MSRs |  | 1,400 |  | 1,363 |  | 248 |
| Disposition of MSRs ${ }^{(a)}$ |  | (822) |  | (114) |  | (176) |
| Net additions/(dispositions) |  | 1,376 |  | 2,908 |  | 1,016 |
| Changes due to collection/realization of expected cash flows |  | (936) |  | (788) |  | (899) |
| Changes in valuation due to inputs and assumptions: |  |  |  |  |  |  |
| Changes due to market interest rates and other ${ }^{(b)}$ |  | 2,022 |  | 404 |  | $(1,568)$ |
| Changes in valuation due to other inputs and assumptions: |  |  |  |  |  |  |
| Projected cash flows (e.g., cost to service) |  | 14 |  | 109 |  | (54) |
| Discount rates |  | - |  | - |  | 199 |
| Prepayment model changes and other ${ }^{(c)}$ |  | 3 |  | (415) |  | (117) |
| Total changes in valuation due to other inputs and assumptions |  | 17 |  | (306) |  | 28 |
| Total changes in valuation due to inputs and assumptions |  | 2,039 |  | 98 |  | $(1,540)$ |
| Fair value at December 31, | \$ | 7,973 | \$ | 5,494 | \$ | 3,276 |
| Change in unrealized gains/(losses) included in income related to MSRs held at December 31, | \$ | 2,039 | \$ | 98 | \$ | $(1,540)$ |
| Contractual service fees, late fees and other ancillary fees included in income |  | 1,535 |  | 1,298 |  | 1,325 |
| Third-party mortgage loans serviced at December 31, (in billions) |  | 584 |  | 520 |  | 448 |
| Servicer advances, net of an allowance for uncollectible amounts, at December 31, (in billions) ${ }^{\text {(d) }}$ |  | 0.8 |  | 1.6 |  | 1.8 |

(a) Includes excess MSRs transferred to agency-sponsored trusts in exchange for stripped mortgage backed securities ("SMBS") for the years ended December 31, 2022 and 2020. In each transaction, a portion of the SMBS was acquired by third parties at the transaction date; the Firm acquired the remaining balance of those SMBS as trading securities.
(b) Represents both the impact of changes in estimated future prepayments due to changes in market interest rates, and the difference between actual and expected prepayments.
(c) Represents changes in prepayments other than those attributable to changes in market interest rates.
(d) Represents amounts the Firm pays as the servicer (e.g., scheduled principal and interest, taxes and insurance), which will generally be reimbursed within a short period of time after the advance from future cash flows from the trust or the underlying loans. The Firm's credit risk associated with these servicer advances is minimal because reimbursement of the advances is typically senior to all cash payments to investors. In addition, the Firm maintains the right to stop payment to investors if the collateral is insufficient to cover the advance. However, certain of these servicer advances may not be recoverable if they were not made in accordance with applicable rules and agreements.

## Notes to consolidated financial statements

The following table presents the components of mortgage fees and related income (including the impact of MSR risk management activities) for the years ended December 31, 2022, 2021 and 2020.

| Year ended December 31, (in millions) |  | 2022 | 2021 | 2020 |
| :---: | :---: | :---: | :---: | :---: |
| CCB mortgage fees and related income |  |  |  |  |
| Production revenue | \$ | 497 | \$ 2,215 | \$ 2,629 |
| Net mortgage servicing revenue: Operating revenue: |  |  |  |  |
|  |  |  |  |  |
| Loan servicing revenue |  | 1,582 | 1,257 | 1,367 |
| Changes in MSR asset fair value due to collection/realization of expected cash flows |  | (936) | (788) | (899) |
| Total operating revenue |  | 646 | 469 | 468 |
| Risk management: |  |  |  |  |
| Changes in MSR asset fair value due to market interest rates and other ${ }^{(a)}$ |  | 2,022 | 404 | $(1,568)$ |
| Other changes in MSR asset fair value due to other inputs and assumptions in model ${ }^{(b)}$ |  | 17 | (306) | 28 |
| Change in derivative fair value and other |  | $(1,946)$ | (623) | 1,522 |
| Total risk management |  | 93 | (525) | (18) |
| Total net mortgage servicing revenue |  | 739 | (56) | 450 |
| Total CCB mortgage fees and related income |  | 1,236 | 2,159 | 3,079 |
| All other |  | 14 | 11 | 12 |
| Mortgage fees and related income | \$ | 1,250 | \$ 2,170 | \$ 3,091 |

(a) Represents both the impact of changes in estimated future prepayments due to changes in market interest rates, and the difference between actual and expected prepayments.
(b) Represents the aggregate impact of changes in model inputs and assumptions such as projected cash flows (e.g., cost to service), discount rates and changes in prepayments other than those attributable to changes in market interest rates (e.g., changes in prepayments due to changes in home prices).

Changes in fair value based on variations in assumptions generally cannot be easily extrapolated, because the relationship of the change in the assumptions to the change in fair value are often highly interrelated and may not be linear. In the following table, the effect that a change in a particular assumption may have on the fair value is calculated without changing any other assumption. In reality, changes in one factor may result in changes in another, which would either magnify or counteract the impact of the initial change.

The table below outlines the key economic assumptions used to determine the fair value of the Firm's MSRs at December 31, 2022 and 2021, and outlines the sensitivities of those fair values to immediate adverse changes in those assumptions, as defined below.

| December 31, (in millions, except rates) | 2022 |  | 2021 |  |
| :---: | :---: | :---: | :---: | :---: |
| Weighted-average prepayment speed assumption (constant prepayment rate) |  | 6.12 \% |  | 9.90 \% |
| Impact on fair value of 10\% adverse change |  | (183) |  | (210) |
| Impact on fair value of 20\% adverse change |  | (356) |  | (404) |
| Weighted-average option adjusted spread ${ }^{(a)}$ |  | 5.77 \% |  | 6.44 \% |
| Impact on fair value of 100 basis points adverse change | \$ | (341) | \$ | (225) |
| Impact on fair value of 200 basis points adverse change |  | (655) |  | (433) |

(a) Includes the impact of operational risk and regulatory capital.

## Note 16 - Premises and equipment

Premises and equipment, including leasehold improvements, are carried at cost less accumulated depreciation and amortization. JPMorgan Chase computes depreciation using the straight-line method over the estimated useful life of an asset. For leasehold improvements, the Firm uses the straight-line method computed over the lesser of the remainder of the lease term, or estimated useful life of the improvements.

JPMorgan Chase capitalizes certain costs associated with the acquisition or development of internal-use software. Once the software is ready for its intended use, these costs are amortized on a straight-line basis over the software's expected useful life.

Impairment is assessed periodically when events or changes in circumstances indicate that the carrying value of an asset may not be fully recoverable.

## Note 17 - Deposits

At December 31, 2022 and 2021, noninterest-bearing and interest-bearing deposits were as follows.

| December 31, (in millions) | 2022 | 2021 |
| :---: | :---: | :---: |
| U.S. offices |  |  |
| Noninterest-bearing (included \$26,363 and $\$ 8,115$ at fair value) ${ }^{(a)}$ | \$ 644,902 | \$ 711,525 |
| Interest-bearing (included \$586 and $\$ 629$ at fair value $)^{(\mathrm{a})}$ | 1,276,346 | 1,359,932 |
| Total deposits in U.S. offices | 1,921,248 | 2,071,457 |
| Non-U.S. offices |  |  |
| Noninterest-bearing (included \$1,398 and $\$ 2,420$ at fair value) ${ }^{(\mathrm{a})}$ | 27,005 | 26,229 |
| Interest-bearing (included \$273 and $\$ 169$ at fair value $)^{(a)}$ | 391,926 | 364,617 |
| Total deposits in non-U.S. offices | 418,931 | 390,846 |
| Total deposits | \$2,340,179 | \$2,462,303 |

(a) Includes structured notes classified as deposits for which the fair value option has been elected. Refer to Note 3 for further discussion.
(b) Prior-period amounts have been revised to conform with the current presentation.

At December 31, 2022 and 2021, time deposits in denominations that met or exceeded the insured limit were as follows.

| December 31, (in millions) | 2022 | 2021 |
| :--- | ---: | ---: |
| U.S. offices | $\$ \mathbf{6 4 , 6 2 2}$ | $\$ 38,970$ |
| Non-U.S. offices |  |  |
| (a) | $\mathbf{7 7 , 9 0 7}$ | 54,535 |
| Total | $\mathbf{\$ 1 4 2 , 5 2 9}$ | $\$ 93,505$ |

(a) Represents all time deposits in non-U.S. offices as these deposits typically exceed the insured limit.

At December 31, 2022, the remaining maturities of interest-bearing time deposits were as follows.

| December 31, 2022 <br> (in millions) | U.S. | Non-U.S. | Total |
| :--- | ---: | ---: | ---: |
| 2023 | $\$ 75,606$ | $\$ 75,088$ | $\$ 150,694$ |
| 2024 | 1,335 | 358 | 1,693 |
| 2025 | 300 | 17 | 317 |
| 2026 | 178 | 30 | 208 |
| 2027 | 131 | 897 | 1,028 |
| After 5 years | 572 | 109 | 681 |
| Total | $\$ 78,122$ | $\$ 76,499$ | $\$ 154,621$ |

## Notes to consolidated financial statements

## Note 18 - Leases

## Firm as lessee

At December 31, 2022, JPMorgan Chase and its subsidiaries were obligated under a number of noncancellable leases, predominantly operating leases for premises and equipment used primarily for business purposes. These leases generally have terms of 20 years or less, determined based on the contractual maturity of the lease, and include periods covered by options to extend or terminate the lease when the Firm is reasonably certain that it will exercise those options. All leases with lease terms greater than twelve months are reported as a lease liability with a corresponding right-of-use ("ROU") asset. None of these lease agreements impose restrictions on the Firm's ability to pay dividends, engage in debt or equity financing transactions or enter into further lease agreements. Certain of these leases contain escalation clauses that will increase rental payments based on maintenance, utility and tax increases, which are non-lease components. The Firm elected not to separate lease and non-lease components of a contract for its real estate leases. As such, real estate lease payments represent payments on both lease and non-lease components.

Operating lease liabilities and ROU assets are recognized at the lease commencement date based on the present value of the future minimum lease payments over the lease term. The future lease payments are discounted at a rate that estimates the Firm's collateralized borrowing rate for financing instruments of a similar term and are included in accounts payable and other liabilities. The operating lease ROU asset, included in premises and equipment, also includes any lease prepayments made, plus initial direct costs incurred, less any lease incentives received. Rental expense associated with operating leases is recognized on a straight-line basis over the lease term, and generally included in occupancy expense in the Consolidated statements of income.

The following tables provide information related to the Firm's operating leases:

| December 31, <br> (in millions, except where otherwise noted) | 2022 |  | 2021 |  |
| :---: | :---: | :---: | :---: | :---: |
| Right-of-use assets | \$ | 7,782 | \$ | 7,888 |
| Lease liabilities |  | 8,183 |  | 8,328 |
| Weighted average remaining lease term (in years) |  | 8.4 |  | 8.5 |

The following table presents future payments under operating leases as of December 31, 2022:

| Year ended December 31, (in millions) |  |  |
| :--- | ---: | ---: |
| 2023 | $\$$ | 1,572 |
| 2024 | 1,433 |  |
| 2025 | 1,273 |  |
| 2026 | 1,034 |  |
| 2027 | 887 |  |
| After 2027 | 3,382 |  |
| Total future minimum lease payments | 9,581 |  |
| Less: Imputed interest | $(1,398)$ |  |
| Total | $\$$ | 8,183 |

In addition to the table above, as of December 31, 2022, the Firm had additional future operating lease commitments of $\$ 588$ million that were signed but had not yet commenced. These operating leases will commence between 2023 and 2026 with lease terms up to 21 years.

## Firm as lessor

The Firm provides auto and equipment lease financing to its customers through lease arrangements with lease terms that may contain renewal, termination and/or purchase options. The Firm's lease financings are predominantly auto operating leases. These assets subject to operating leases are recognized in other assets on the Firm's Consolidated balance sheets and are depreciated on a straight-line basis over the lease term to reduce the asset to its estimated residual value. Depreciation expense is included in technology, communications and equipment expense in the Consolidated statements of income. The Firm's lease income is generally recognized on a straight-line basis over the lease term and is included in other income in the Consolidated statements of income.

On a periodic basis, the Firm assesses leased assets for impairment, and if the carrying amount of the leased asset exceeds the undiscounted cash flows from the lease payments and the estimated residual value upon disposition of the leased asset, an impairment loss is recognized.
The risk of loss on auto and equipment leased assets relating to the residual value of the leased assets is monitored through projections of the asset residual values at lease origination and periodic review of residual values, and is mitigated through arrangements with certain manufacturers or lessees.

The following table presents the carrying value of assets subject to leases reported on the Consolidated balance sheets:

| December 31, <br> (in millions) | $\mathbf{2 0 2 2}$ | 2021 |  |

| After 2027 | 15 |  |
| Total future minimum lease receipts | 3,806 |  |

## Notes to consolidated financial statements

## Note 19 - Accounts payable and other liabilities

Accounts payable and other liabilities consist of brokerage payables, which include payables to customers and payables related to security purchases that did not settle, as well as other accrued expenses, such as compensation accruals, credit card rewards liability, operating lease liabilities, income tax payables, and litigation reserves.

The following table details the components of accounts payable and other liabilities.

| December 31, (in millions) | 2022 |  | 2021 |  |
| :--- | ---: | ---: | ---: | ---: |
| Brokerage payables | $\$$ | $\mathbf{1 8 8 , 6 9 2}$ | $\$$ | 169,172 |
| Other payables and liabilities ${ }^{(\mathrm{a})}$ | $\mathbf{1 1 1 , 4 4 9}$ |  | 93,583 |  |
| Total accounts payable and other | $\$$ | $\mathbf{3 0 0 , 1 4 1}$ | $\$$ | 262,755 |

(a) Includes credit card rewards liability of $\$ 11.3$ billion and $\$ 9.8$ billion at December 31, 2022 and 2021, respectively.

## Note 20 - Long-term debt

JPMorgan Chase issues long-term debt denominated in various currencies, predominantly U.S. dollars, with both fixed and variable interest rates. Included in senior and subordinated debt below are various equity-linked or other indexed instruments, which the Firm has elected to measure at fair value. Changes in fair value are recorded in principal transactions revenue in the Consolidated statements of income, except for unrealized gains/(losses) due to DVA which are recorded in OCI. The following table is a summary of long-term debt carrying values (including unamortized premiums and discounts, issuance costs, valuation adjustments and fair value adjustments, where applicable) by remaining contractual maturity as of December 31, 2022.

| By remaining maturity at December 31, <br> (in millions, except rates) |  | 2022 |  |  |  |  |  |  |  | 2021 |

|  | Variable rate |  | - |  | 373 |  | 925 |  | 1,298 | 1,297 |
|  | Interest rates ${ }^{(e)}$ |  | - \% |  | 5.03 \% |  | 6.67 \% |  | 6.33 \% | 3.20 \% |
|  | Subtotal | \$ | - | \$ | 373 | \$ | 1,475 | \$ | 1,848 | 1,975 |
| Total long-term debt ${ }^{(\mathrm{a})(\mathrm{b})(\mathrm{c})}$ |  | \$ | 32,163 | \$ | 129,666 | \$ | 134,036 | \$ | 295,865 | 301,005 |
| Long-term beneficial interests: | Fixed rate | \$ | 1,000 | \$ | 999 | \$ | - | \$ | 1,999 | 1,747 |
|  | Variable rate |  | - |  | - |  | 143 |  | 143 | 829 |
|  | Interest rates ${ }^{(e)}$ |  | 1.53 \% |  | 3.97 \% |  | 3.60 \% |  | 2.81 \% | 1.57 \% |
| Total long-term beneficial interests ${ }^{\text {(d) }}$ |  | \$ | 1,000 | \$ | 999 | \$ | 143 | \$ | 2,142 | 2,576 |

(a) Included Iong-term debt of $\$ 13.8$ billion and $\$ 14.1$ billion secured by assets totaling $\$ 208.3$ billion and $\$ 170.6$ billion at December 31, 2022 and 2021 , respectively. The amount of long-term debt secured by assets does not include amounts related to hybrid instruments.
(b) Included $\$ 72.3$ billion and $\$ 74.9$ billion of long-term debt accounted for at fair value at December 31, 2022 and 2021, respectively.
(c) Included $\$ 10.3$ billion and $\$ 15.8$ billion of outstanding zero-coupon notes at December 31, 2022 and 2021, respectively. The aggregate principal amount of these notes at their respective maturities is $\$ 45.3$ billion and $\$ 46.4$ billion, respectively. The aggregate principal amount reflects the contractual principal payment at maturity, which may exceed the contractual principal payment at the Firm's next call date, if applicable.
(d) Included on the Consolidated balance sheets in beneficial interests issued by consolidated VIEs. Also included $\$ 5$ million and $\$ 12$ million accounted for at fair value at December 31, 2022 and 2021, respectively. Excluded short-term commercial paper and other short-term beneficial interests of $\$ 10.5$ billion and $\$ 8.2$ billion at December 31, 2022 and 2021, respectively.
(e) The interest rates shown are the weighted average of contractual rates in effect at December 31, 2022 and 2021, respectively, including non-U.S. dollar fixed- and variable-rate issuances, which excludes the effects of the associated derivative instruments used in hedge accounting relationships, if applicable. The interest rates shown exclude structured notes accounted for at fair value.
(f) At December 31, 2022, long-term debt in the aggregate of $\$ 194.9$ billion was redeemable at the option of JPMorgan Chase, in whole or in part, prior to maturity, based on the terms specified in the respective instruments.
(g) The aggregate carrying values of debt that matures in each of the five years subsequent to 2022 is $\$ 32.2$ billion in 2023 , $\$ 40.1$ billion in 2024 , $\$ 34.3$ billion in 2025, \$32.5 billion in 2026 and $\$ 22.8$ billion in 2027.

## Notes to consolidated financial statements

The weighted-average contractual interest rates for total long-term debt excluding structured notes accounted for at fair value were $3.26 \%$ and $2.67 \%$ as of December 31, 2022 and 2021, respectively. In order to modify exposure to interest rate and currency exchange rate movements, JPMorgan Chase utilizes derivative instruments, primarily interest rate and cross-currency interest rate swaps, in conjunction with some of its debt issuances. The use of these instruments modifies the Firm's interest expense on the associated debt. The modified weighted-average interest rates for total long-term debt, including the effects of related derivative instruments, were $4.89 \%$ and $1.43 \%$ as of December 31, 2022 and 2021, respectively.

JPMorgan Chase \& Co. has guaranteed certain long-term debt of its subsidiaries, including structured notes. These guarantees rank on parity with the Firm's other unsecured and unsubordinated indebtedness. The amount of such guaranteed long-term debt and structured notes was $\$ 28.2$ billion and $\$ 16.4$ billion at December 31, 2022 and 2021, respectively.

The Firm's unsecured debt does not contain requirements that would call for an acceleration of payments, maturities or changes in the structure of the existing debt, provide any limitations on future borrowings or require additional collateral, based on unfavorable changes in the Firm's credit ratings, financial ratios, earnings or stock price.

## Note 21 - Preferred stock

At December 31, 2022 and 2021, JPMorgan Chase was authorized to issue 200 million shares of preferred stock, in one or more series, with a par value of $\$ 1$ per share. In the event of a liquidation or dissolution of the Firm, JPMorgan Chase's preferred stock then outstanding takes precedence over the Firm's common stock with respect to the payment of dividends and the distribution of assets.

The following is a summary of JPMorgan Chase's non-cumulative preferred stock outstanding as of December 31, 2022 and 2021, and the quarterly dividend declarations for the years ended December 31, 2022, 2021 and 2020.

|  | Shares ${ }^{(a)}$ |  | Carrying value (in millions) |  |  |  | Issue date | Contractual rate in effect at December 31, 2022 | Earliest redemption date ${ }^{(\text {b })}$ | Floatingannualizedand rate ${ }^{(c)}$ | Dividend declared per share ${ }^{(\mathrm{d})}$ |  |  |  |  |  |  |

(a) Represented by depositary shares.
(b) Fixed-to-floating rate notes convert to a floating rate at the earliest redemption date.
(c) Floating annualized rate includes three-month LIBOR, three-month term SOFR or five-year Constant Maturity Treasury ("CMT") rate, as applicable, plus the spreads noted above.
(d) Dividends on preferred stock are discretionary and non-cumulative. When declared, dividends are declared quarterly. Dividends are payable quarterly on fixed-rate preferred stock. Dividends are payable semiannually on fixed-to-floating-rate preferred stock while at a fixed rate, and payable quarterly after converting to a floating rate.
(e) The initial dividend declared is prorated based on the number of days outstanding for the period. Dividends were declared quarterly thereafter at the contractual rate.
(f) The dividend rate for Series CC preferred stock became floating and payable quarterly starting on November 1, 2022; prior to which the dividend rate was fixed at $4.625 \%$ or $\$ 231.25$ per share payable semiannually.

Each series of preferred stock has a liquidation value and redemption price per share of $\$ 10,000$, plus accrued but unpaid dividends. The aggregate liquidation value was $\$ 27.7$ billion at December 31, 2022.

## Notes to consolidated financial statements

## Redemptions

On October 31, 2022, the Firm redeemed all $\$ 2.93$ billion of its fixed to floating rate non-cumulative perpetual preferred stock, Series I.

On October 3, 2022, the Firm redeemed all $\$ 2.5$ billion of its fixed-to-floating rate non-cumulative preferred stock, Series V.
On February 1, 2022, the Firm redeemed all $\$ 2.0$ billion of its fixed-to-floating rate non-cumulative preferred stock, Series $Z$.
On June 1, 2021, the Firm redeemed all $\$ 1.43$ billion of its $6.10 \%$ non-cumulative preferred stock, Series AA and all $\$ 1.15$ billion of its $6.15 \%$ non-cumulative preferred stock, Series BB.
Redemption rights
Each series of the Firm's preferred stock may be redeemed on any dividend payment date on or after the earliest redemption date for that series. All outstanding preferred stock series may also be redeemed following a "capital treatment event," as described in the terms of each series. Any redemption of the Firm's preferred stock is subject to non-objection from the Board of Governors of the Federal Reserve System (the "Federal Reserve").

## Note 22 - Common stock

At December 31, 2022 and 2021, JPMorgan Chase was authorized to issue 9.0 billion shares of common stock with a par value of $\$ 1$ per share.
Common shares issued (reissuances from treasury) by JPMorgan Chase during the years ended December 31, 2022, 2021 and 2020 were as follows.

| Year ended December 31, (in millions) | 2022 | 2021 | 2020 |
| :---: | :---: | :---: | :---: |
| Total issued - balance at January 1 | 4,104.9 | 4,104.9 | 4,104.9 |
| Treasury - balance at January 1 | $(1,160.8)$ | $(1,055.5)$ | $(1,020.9)$ |
| Repurchase | (23.1) | (119.7) | (50.0) |
| Reissuance: |  |  |  |
| Employee benefits and compensation plans | 12.0 | 13.5 | 14.2 |
| Employee stock purchase plans | 1.2 | 0.9 | 1.2 |
| Total reissuance | 13.2 | 14.4 | 15.4 |
| Total treasury - balance at December 31 | $(1,170.7)$ | $(1,160.8)$ | $(1,055.5)$ |
| Outstanding at December 31 | 2,934.2 | 2,944.1 | 3,049.4 |

Effective May 1, 2022, the Firm is authorized to purchase up to $\$ 30$ billion of common shares under its common share repurchase program, which superseded the previously approved repurchase program under which the Firm was authorized to purchase up to $\$ 30$ billion of common shares. In the second half of 2022, as a result of the expected increases in regulatory capital requirements, the Firm temporarily suspended share repurchases. In the first quarter of 2023, the Firm resumed repurchasing shares under its common share repurchase program.

The following table sets forth the Firm's repurchases of common stock for the years ended December 31, 2022, 2021 and 2020.

| Year ended December 31, <br> (in millions) | 2022 | 2021 | 2020 |
| :--- | :---: | :---: | :---: |
| Total number of shares of common <br> stock repurchased | $\mathbf{2 3 . 1}$ | 119.7 | 50.0 |
| Aggregate purchase price of <br> common stock repurchases | $\mathbf{\$ 3 , 1 2 2}$ | $\$ 18,448$ | $\$ 6,397$ |

(a) As directed by the Federal Reserve, total net repurchases and common stock dividends in the first and second quarter of 2021 were restricted and could not exceed the average of the Firm's net income for the four preceding calendar quarters. Effective July 1, 2021, the Firm became subject to the normal capital distribution restrictions provided under the regulatory capital framework.
(b) On March 15, 2020, in response to the economic disruptions caused by the COVID-19 pandemic, the Firm temporarily suspended repurchases of its common stock. Subsequently, the Federal Reserve directed all large banks, including the Firm, to discontinue net share repurchases through the end of 2020.

The Board of Directors' authorization to repurchase common shares is utilized at management's discretion, and the timing of purchases and the exact amount of common shares that may be repurchased is subject to various factors, including market conditions; legal and regulatory considerations affecting the amount and timing of repurchase activity; the Firm's capital position (taking into account goodwill and intangibles); internal capital generation; and alternative investment opportunities. The $\$ 30$ billion common share repurchase program approved by the Board does not establish specific price targets or timetables. The repurchase program may be suspended by management at any time; and may be executed through open market purchases or privately negotiated transactions, or utilizing Rule 10b5-1 plans, which are written trading plans that the Firm may enter into from time to time under Rule 10b5-1 of the Securities Exchange Act of 1934 and which allow the Firm to repurchase its common shares during periods when it may otherwise not be repurchasing common shares - for example, during internal trading blackout periods.
As of December 31, 2022, approximately 58.9 million shares of common stock were reserved for issuance under various employee incentive, compensation, option and stock purchase plans, and directors' compensation plans.

## Notes to consolidated financial statements

## Note 23 - Earnings per share

Basic earnings per share ("EPS") is calculated using the two-class method. Under the two-class method, all earnings (distributed and undistributed) are allocated to common stock and participating securities. JPMorgan Chase grants RSUs under its share-based compensation programs, predominantly all of which entitle recipients to receive nonforfeitable dividends during the vesting period on a basis equivalent to dividends paid to holders of the Firm's common stock. These unvested RSUs meet the definition of participating securities based on their respective rights to receive nonforfeitable dividends, and they are treated as a separate class of securities in computing basic EPS. Participating securities are not included as incremental shares in computing diluted EPS; refer to Note 9 for additional information.
Diluted EPS incorporates the potential impact of contingently issuable shares, including awards which require future service as a condition of delivery of the underlying common stock. Diluted EPS is calculated under both the two-class and treasury stock methods, and the more dilutive amount is reported. For each of the periods presented in the table below, diluted EPS calculated under the two-class method was more dilutive.
The following table presents the calculation of net income applicable to common stockholders and basic and diluted EPS for the years ended December 31, 2022, 2021 and 2020.

| Year ended December 31, (in millions, except per share amounts) | 2022 | 2021 | 2020 |
| :---: | :---: | :---: | :---: |
| Basic earnings per share |  |  |  |
| Net income | \$ 37,676 | \$ 48,334 | \$ 29,131 |
| Less: Preferred stock dividends | 1,595 | 1,600 | 1,583 |
| Net income applicable to common equity | 36,081 | 46,734 | 27,548 |
| Less: Dividends and undistributed earnings allocated to participating securities | 189 | 231 | 138 |
| Net income applicable to common stockholders | \$ 35,892 | \$ 46,503 | \$ 27,410 |
| Total weighted-average basic shares outstanding | 2,965.8 | 3,021.5 | 3,082.4 |
| Net income per share | \$ 12.10 | \$ 15.39 | \$ 8.89 |
| Diluted earnings per share |  |  |  |
| Net income applicable to common stockholders | \$ 35,892 | \$ 46,503 | \$ 27,410 |
| Total weighted-average basic shares outstanding | 2,965.8 | 3,021.5 | 3,082.4 |
| Add: Dilutive impact of SARs and employee stock options, unvested PSUs and nondividend-earning RSUS | 4.2 | 5.1 | 5.0 |
| Total weighted-average diluted shares outstanding | 2,970.0 | 3,026.6 | 3,087.4 |
| Net income per share | \$ 12.09 | \$ 15.36 | \$ 8.88 |

## Note 24 - Accumulated other comprehensive income/(Ioss)

AOCI includes the after-tax change in unrealized gains and losses on investment securities, foreign currency translation adjustments (including the impact of related derivatives), fair value changes of excluded components on fair value hedges, cash flow hedging activities, net gain/(loss) related to the Firm's defined benefit pension and OPEB plans, and fair value option-elected liabilities arising from changes in the Firm's own credit risk (DVA).
