The Chicago Transit Authority is pursuing the Red Line Extension Project, a 5.6-mile extension starting from the existing terminal at 95th/Dan Ryan and terminating at 130th Street, subject to the availability of funding. The RLE Transit-Supportive Development (TSD) Plan is a proactive effort to create a guide for future development in communities located near the RLE project area. The TSD Plan is being led by the CTA and in partnership with the City of Chicago's Department of Planning and Development. At the heart of the TSD Plan will be the community's vision for each of the station areas which seeks to promote development without the displacement of existing residents and achieve community-focused benefits such as affordable housing, local economic development, and environmental sustainability. This presentation is for informational purposes with the goal of adoption at a future Plan Commission hearing.
