The 2010 U.S. Census data shows the median age of housing stock in the assessment area was 39 years old, with 22.7% of the stock built before 1950. The oldest housing stock was in Cabell and Boyd counties with a median age of 47 and 43 years, respectively, while the newest was 17 years in Boone County. However, within the assessment area, the median age of housing stock was 59 years in low-income tracts and 53 years in moderate-income tracts. In addition, a community contact stated that Cabell County has a large aging housing stock and infrastructure that includes a significant number of vacant, dilapidated properties. Therefore, there appears to be ample opportunity for Fifth Third to provide home improvement and rehabilitation loans in these lower-income areas.

According to 2010 U.S. Census data, the median housing value in the assessment area was $95,820, with an affordability ratio of 39.98. The affordability ratio is derived by dividing the median household income by the median housing value. The higher the affordability ratio, the more affordable a home is considered. While median housing values fluctuated between 2010 and 2011-2015, housing generally became less affordable across the assessment area. During the evaluation period, the most affordable housing was in Greenup County and the least affordable was in Cabell County. Median gross rents increased at a fairly substantial rate across the assessment area, with renters in Boyd, Lawrence, and Putnam counties experiencing the largest increase in rental rates and renters in Lincoln County experiencing the smallest increase in gross rental rates. The table below presents housing characteristics from the U.S. Census data between 2010 and 2015 in the assessment area Kentucky, Ohio, and West Virginia.

County	2010 Median Housing Value	2010 Affordability Ratio	2011-2015 Median Housing Value	2011-2015 Affordability Ratio	2010 Median Gross Rent	2011-2015 Median Gross Rent	Percent of Change
Boyd	$93,200	41.63	$99,700	42.45	$533	$625	17.3%
Greenup	$88,400	47.94	$97,700	46.44	$550	$629	14.4%
Kentucky	**$116,800**	**35.60**	**$123,200**	**35.50**	**$601**	**$675**	**12.3%**
Lawrence	$92,300	39.50	$98,900	43.35	$556	$652	17.3%
Ohio	**$136,400**	**34.72**	**$129,900**	**38.05**	**$678**	**$730**	**7.7%**
Cabell	$97,500	35.38	$112,800	33.99	$590	$653	10.7%
Lincoln	$65,100	47.42	$81,000	44.20	$485	$524	8.0%
Putnam	$135,200	38.92	$148,600	38.21	$626	$731	16.8%
Wayne	$85,500	41.03	$82,800	43.86	$525	$589	12.2%
West Virginia	**$94,500**	**40.61**	**$103,800**	**40.22**	**$549**	**$643**	**17.1%**

According to Bankrate.com,[58] Ohio ranked eighth, Indiana ranked 15th, and Kentucky ranked 43rd for foreclosure filings in November 2016. The national average for foreclosure filings was one in every 1,533 housing units. The following table contains information about foreclosure filings in the assessment area, according to Realtytrac:[59]

Geography Name	Ratio of Properties Receiving Foreclosure Filings in November 2016
Boyd	1:1,484
Greenup	1:1,182
Kentucky	**1:4,270**
Lawrence	1:985
Ohio	**1:1,053**
Cabell	1:7,371
Lincoln	NA
Putnam	1:3,130
Wayne	1:5,210
West Virginia	**1:8,311**
U.S.	**1:1,533**

In November 2016, Cabell County had the highest rate of foreclosure and Lawrence County had the lowest rates of foreclosure in the assessment area.

Building permits for this MSA, Indiana, Kentucky, Ohio, and the nation are included in the following table for 2014, 2015, and 2016.[60]

Geography	2014	2015	Percent of Change 2014-2015	2016	Percent of Change 2015-2016
MSA	359	291	-18.9%	154	-47.1%
Kentucky	**9,421**	**10,566**	**12.2%**	**12,798**	**21.1%**
Ohio	**19,965**	**20,047**	**0.4%**	**22,269**	**11.1%**
West Virginia	**2,686**	**2,814**	**4.8%**	**2,525**	**-10.3%**
U.S.	**1,052,124**	**1,182,582**	**12.4%**	**1,190,191**	**0.6%**

While the MSA experienced a decrease in the number of housing permits issued between 2014 and 2015 and between 2015 and 2016. The decrease in the number of permits could indicate there is not a strong demand for home purchase loans in the MSA during the evaluation period. Also, two community contacts mentioned a reduced demand for new housing construction and home refinance and home improvement lending in the area.

Labor, Employment, and Economic Characteristics

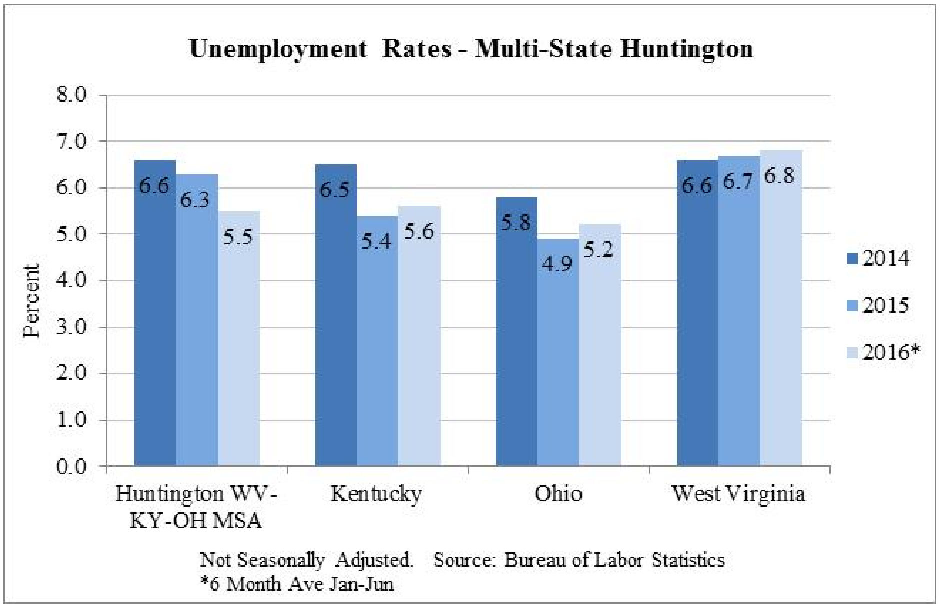
According to Moody's Analytics, the Huntington-Ashland area economy is at risk due to over exposure to coal and steel industries. The recent merger of Cabell Huntington Hospital and St. Mary's Medical Center may result in healthcare job losses and the area's declining population may reduce patient volumes at local hospitals. Currently, rebounding coal production should boost the rail industry's prospects. This area is a hub for rail and water transport.

According to Ashland Alliance[61] and The Huntington Area Development Council,[62] the top 12 employers in the MSA in 2015/2016 were:

Company	Number of Employees
King's Daughters Medical Center	3,753
St. Mary's Medical Center	2,600
Cabell Huntington Hospital	2,300
Marshall University	2,000
Marathon Petroleum	1,554
Our Lady of Bellefonte Hospital	1,259
Toyota Motor Manufacturing	1,200
CSX, Huntington Division	1,100
VA Medical Center	1,078
Special Metals	996
AK Steel	937
University Physicians & Surgeons	850
Also:	
Steel of West Virginia	527

The following table illustrates the average unemployment rates for 2014, 2015, and 2016 for the MSA, Kentucky, Ohio, and West Virginia.

61 http://ashlandalliance.com/economic-development/top-employers/
62 http://www.hadco.org/community-profile/business-and-industry/



Unemployment rates declined each year in the MSA and area unemployment was slightly higher than Kentucky's and considerably below West Virginia's during this time period.

According to the *West Virginia Record*, eight months after Cabell Huntington Hospital announced an agreement to acquire St. Mary's Medical Center (November 2014), the attorney general announced a deal to ensure the acquisition is in compliance with the West Virginia Antitrust Act and all other applicable state and federal laws. This highly contested acquisition represents the combination of two of the largest employers in West Virginia. St. Mary's Medical Center represents the seventh largest private employer and Cabell Huntington Hospital represents the 11th largest private employer in the state.[63] According to WCHS TV, Steel of West Virginia dropped its attempt to block the merger (October 2016). After dismissing its appeal, the president and chief executive officer of Steel of West Virginia expressed his ongoing concern that this merger will create a monopoly and lead to higher cost and lower quality of care. He noted the Federal Trade Commission expressed similar concerns when it dismissed its complaint against the merger. According to the CEO, not enough people stepped forward to stop the monopoly from forming. The merger has been approved by the West Virginia Healthcare Authority, the state, and the attorney general.[64]

According to the *Courier-Journal*, Kings Daughters Medical Center (Ashland, WV), agreed to pay $40.9 million to the government to settle claims for falsely billing Medicaid and Medicare for unnecessary (heart) surgeries. It is described as the largest ever settlement involving a hospital in the state's eastern district.[65]

2016 FFIEC Census Data and 2015 D&B Information

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE HUNTINGTON-ASHLAND WV-KY-OH MSA

Lending Test

Fifth Third's performance under the lending test in this assessment area is rated "Low Satisfactory." Fifth Third has demonstrated an adequate responsiveness to the credit needs of the community. In addition, Fifth Third originated one community development loan totaling $1.0 million in the area. Fifth Third has an adequate geographic distribution of loans and moderate lending gaps. Fifth Third has a good distribution among borrowers of different income levels and an adequate distribution of loans to businesses of different revenue sizes. Fifth Third exhibits an adequate record of serving the credit needs of highly economically disadvantaged areas, low-income individuals, and businesses with gross annual revenues of $1 million or less. The extensive use of flexible lending practices augmented Fifth Third's performance in this assessment area.

Greatest consideration was given to the evaluation of home purchase lending based on the overall volume of lending, followed by refinance, small business, and home improvement lending. Details of Fifth Third's residential mortgage and small business lending, as well as information regarding lending by peers, can be found in Appendix E.

Lending Activity

Lending activity reflects an adequate responsiveness to the credit needs within the assessment area. Fifth Third originated 306 home purchase, 275 refinance, 68 home improvement, 75 small business loans, and one community development loan during the evaluation period. The percentage of Fifth Third's total lending at 0.5% is greater than the percentage of total deposits at 0.2% in this area.

In addition to lending, Fifth Third modified existing loans to borrowers. Below shows the distribution of other real-estate secured modifications within the assessment area by borrower income.

	Distribution by Borrower Income							
	Low		Mod		Middle		Upper	
	#	%	#	%	#	%	#	%
Other Real Estate Secured Modifications	7	20.0%	8	22.9%	9	25.7%	10	28.6%
Percentage of Families by Family Income		***22.1%***		***17.6%***		***20.4%***		***39.9%***

The percentage of HAMP and other modifications by geography was not considered in evaluating Fifth Third's lending activity due to lack of volume. The percentage of other modifications made to low-income borrowers was comparable to the percentage of low-income families in the assessment area and the percentage of other modifications to moderate-income borrowers exceeded the percentage of moderate-income families. Therefore, other modifications enhanced Fifth Third's ability to reach low- and moderate-income borrowers.

Geographic Distribution of Loans

Fifth Third's overall distribution of lending among geographies is adequate. Refinance lending, which was the largest loan category, is good, while performance for home purchase and home improvement lending is adequate. Small business lending is excellent. Further, there is a moderate level of lending gaps. The following lending gaps were noted in the assessment area:

Tract Income Levels	Number of Tracts	Tracts with No Loans	Penetration
Low	5	1	80.0%
Moderate	23	5	78.3%
Middle	48	1	97.9%
Upper	17	0	100.0%
Total	**93**	**7**	**92.5%**

Overall, lending gaps are considered reasonable. Fifth Third had minimal lending gaps in low-income tracts and reasonable lending gaps in moderate-income tracts, as there is a higher owner-occupancy rate in these tracts.

Refinance Loans

Fifth Third made one refinance loan totaling $58,000 in low-income tracts. This represents 0.4% of refinance loans by volume and 0.2% by dollar amount, which is below the percentage of owner-occupied units at 1.2%. The percentage of loans by volume exceeded the 2014 aggregate at 0.8% and in 2015 was below the 2015 aggregate at 1.1%. Given that only 23.0% of housing units are owner-occupied and 77.0% are either rental or vacant, the geographic distribution of refinance loans in low-income tracts is adequate.

Fifth Third made 23 refinance loans totaling $2.2 million in moderate-income tracts. This represents 8.4% of refinance loans by volume, which is less than the owner-occupied units in these tracts at 14.9%. The percentage of loans by dollar amount at 6.9% is significantly below proxy. The percentage of loans by volume was below the 2014 aggregate at 10.2% and was below the 2015 aggregate at 8.9%. Given that Fifth Third's performance was below proxy and slightly below the aggregate of all lenders and nearly half the housing units are either rental or vacant, the geographic distribution of refinance loans in moderate-income tracts is good.

Fifth Third made 159 refinance loans totaling $16.9 million in middle-income tracts. This represents 57.8% of refinance loans by volume, which is comparable to the owner-occupied units in these tracts at 59.9%. The percentage of refinance loans by dollar amount (54.1%) is comparable to proxy. The percentage of loans by volume exceeded the 2014 aggregate at 59.9% and was comparable to the 2015 aggregate at 58.4%.

Fifth Third made 92 refinance loans totaling $12.1 million in upper-income tracts. This represents 33.5% of refinance loans by volume, which exceeds the owner-occupied units in these tracts at 24.0%, and the dollar amount at 38.8% exceeds proxy. The percentage of loans by volume below the 2014 aggregate at 29.6% and exceeded the 2015 aggregate at 31.6%.

Overall, the geographic distribution of refinance loans is good.

Home Purchase Loans

Fifth Third made three home purchase loans totaling $228,000 in low-income tracts. This represents 1.0% of home purchase loans by volume, which is comparable to the percentage of owner-occupied units in these tracts at 1.2%, and 0.4% by dollar amount, which is below the percentage of owner-occupied units in these geographies. The percentage of loans was comparable to the 2014 aggregate at 0.8% and exceeded the 2015 aggregate at 0.9%. Given that Fifth Third's performance was comparable to the aggregate of all lenders and the percentage of owner-occupied units in these geographies, the geographic distribution of home purchase loans in low-income tracts is good.

Fifth Third made 16 home purchase loans totaling $1.5 million in moderate-income tracts. This represents 5.2% of its home purchase loans by volume, which is significantly less than the percentage of owner-occupied units in these tracts at 14.9%, and 2.9% by dollar amount, which was also less than the percentage of owner-occupied units in these geographies. The percentage of loans by volume was below the 2014 aggregate at 9.4% and was below the 2015 aggregate at 9.4%. Since Fifth Third performance was below proxy and the aggregate of all lenders, the geographic distribution of home purchase loans in moderate-income tracts is adequate.

Fifth Third made 134 home purchase loans totaling $20.9 million in middle-income tracts. This represents 43.8% of home purchase loans by volume, which is less than the percentage of owner-occupied units in these tracts at 59.9%, and 41.1% by dollar amount, which is less than the percentage of owner-occupied units in these geographies. The percentage of loans by volume was below the 2014 aggregate of 55.4% and was below the 2015 aggregate of 55.5%.

Fifth Third made 153 home purchase loans totaling $28.3 million in upper-income tracts. This represents 50.0% of home purchase loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 24.0%, but comparable at 55.5% by dollar amount, which exceeds the percentage of owner-occupied units in these geographies. The percentage of loans by volume exceeded the 2014 aggregate of 34.5% and exceeded the 2015 aggregate of 34.3%.

Overall, the geographic distribution of home purchase loans is adequate.

Home Improvement Loans

Fifth Third made no home improvement loans in low-income tracts. The percentage of owner-occupied properties in these tracts is 1.2%. The aggregate made 0.8% of home improvement loans in these tracts in 2014 and 0.9% in 2015. Therefore, the geographic distribution of home improvement loans in low-income tracts is poor.

Fifth Third made six home improvement loans totaling $272,000 in moderate-income tracts. This represents 8.8% of home improvement loans by volume, which is below the percentage of owner-occupied units in these tracts at 14.9% and 6.0% by dollar amount and is below proxy. The percentage of loans by volume was below the 2014 aggregate of 14.0% and in 2015 was below the 2015 aggregate of 12.1%. Given that Fifth Third's performance was below proxy and the aggregate of all lenders, the geographic distribution of home improvement loans in moderate-income tracts is adequate.

Fifth Third made 46 home improvement loans totaling $3.3 million in middle-income tracts. This represents 67.6% of home improvement loans by volume, which significantly exceeds the percentage of owner-occupied units in these tracts at 59.9%, and 72.3% by dollar amount, which significantly exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 57.6% and exceeded the 2015 aggregate of 60.1%.

Fifth Third made 16 home improvement loans totaling $987,000 in upper-income tracts. This represents 23.5% of home improvements loans by volume, which is comparable to the percentage of owner-occupied units in these tracts at 24.0%, and 21.7% by dollar amount, which is comparable to the percentage of owner-occupied units in these geographies. The percentage of loans by volume was comparable to the 2014 aggregate of 27.6% and was below the 2015 aggregate of 26.8%.

Overall, the geographic distribution of home improvement loans is adequate.

Small Business Loans

Fifth Third made five small business loans totaling $1.6 million in low-income tracts. This represents 6.7% of business loans by volume, which exceeds the percentage of businesses in these tracts at 6.3%, and 12.5% by dollar amount, which exceeds proxy in these geographies. The percentage of loans by volume exceeds the 2014 aggregate of 6.3% and exceeded the 2015 aggregate of 5.9%. Given that Fifth Third's performance exceeded the aggregate of all lenders and proxy, the geographic distribution of small business loans in low-income tracts is excellent.

Fifth Third made 16 small business loans totaling $3.1 million in moderate-income tracts. This represents 21.3% of small business loans by volume, which exceeds the percentage of businesses in these tracts at 19.5%, and 23.5% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 14.6% and was below the 2015 aggregate of 16.0%. Given that Fifth Third's performance exceeded the aggregate of all lenders and proxy, the geographic distribution of small business loans in moderate-income tracts is excellent.

Fifth Third made 31 small business loans totaling $3.0 million in middle-income tracts. This represents 41.3% of small business loans by volume, which is less than the percentage of businesses in these tracts at 47.1%, and 22.7% by dollar amount, which is less than the percentage of businesses in these geographies. The percentage of loans by volume was below the 2014 aggregate of 42.7% and exceeded the 2015 aggregate of 39.9%.

Fifth Third made 23 small business loans totaling $5.4 million in upper-income tracts. This represents 30.7% of small business loans by volume, which exceeds the percentage of businesses in these tracts at 27.1%, and 41.3% by dollar amount, which is above proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 29.9% and was comparable to the 2015 aggregate of 31.0%.

Overall, the geographic distribution of small business loans is excellent.

Distribution by Borrower Income and Revenue Size of the Business

Overall, the distribution of loans is good based on borrower income and adequate for businesses of different revenue sizes. Borrower distribution is good for refinance, home purchase, and home improvement loans.

Refinance Loans

Fifth Third made ten loans totaling $800,000 to low-income borrowers. This represents 3.6% of refinance loans by volume, which is significantly below the percentage of low-income families at 22.1%. The percentage of loans by dollar amount in these geographies at 2.6% is also significantly below proxy. The percentage of loans by volume was below the 2014 aggregate of 6.8% and below the 2015 aggregate of 6.7%. Given that Fifth Third's performance was significantly below the aggregate of all lenders and proxy, the borrower distribution of refinance loans to low-income borrowers is poor.

Fifth Third made 56 loans totaling $4.0 million to moderate-income borrowers. This represents 20.4% of refinance loans by volume, which exceeded the percentage of moderate-income families at 17.6%, and 12.8% by dollar volume, which is below proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 15.4% and exceeded the 2015 aggregate of 13.4%. Given that Fifth Third's performance exceeded proxy and the aggregate of all lenders, the borrower distribution of refinance loans to moderate-income borrowers is excellent.

Fifth Third made 66 loans totaling $6.1 million to middle-income borrowers. This represents 24.0% of refinance loans by volume, which exceeds the percentage of middle-income families at 20.4%, and 19.4% by dollar amount, which is comparable to proxy. The percentage of loans by volume exceeded the 2014 aggregate of 22.3% and exceeded the 2015 aggregate of 20.1%.

Fifth Third made 137 loans totaling $19.7 million to upper-income borrowers. This represents 49.8% of refinance loans by volume, which exceeds the percentage of upper-income families at 39.9%, and the percentage of loans by dollar amount at 62.8% significantly exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 45.2% and exceeded the 2015 aggregate of 43.6%.

Overall, the borrower distribution of refinance loans is good.

Home Purchase Loans

Fifth Third made seven loans totaling $472,000 to low-income borrowers. This represents 2.3% of home purchase loans by volume, which is significantly below the percentage of low-income families at 22.1%, and 0.9% by dollar amount, which is significantly below proxy. The percentage of loans by volume was below the 2014 aggregate of 5.6% and in 2015 was below the 2015 aggregate of 6.1%. Given that Fifth Third's performance was significantly below proxy and below the aggregate of all lenders, the borrower distribution of home purchase loans to low-income borrowers is poor.

Fifth Third made 58 loans totaling $6.1million to moderate-income borrowers. This represents 19.0% of home purchase loans by volume, which exceeds the percentage of moderate-income families at 17.6%, and 11.9% of loans by dollar amount, which is below proxy. The percentage of loans by volume was comparable to the 2014 aggregate of all lenders at 17.7% and exceeded the 2015 aggregate of 17.7%. Given that Fifth Third's performance exceeded proxy and the aggregate of all lenders, the borrower distribution of home purchase loans to moderate-income borrowers is excellent.

Fifth Third made 80 loans totaling $10.7 million to middle-income borrowers. This represents 26.1% of home purchase loans by volume, which exceeds the percentage of middle-income families at 20.4%, and 21.0% by dollar amount, which slightly exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 24.0% and was comparable to the 2015 aggregate of 23.2%.

Fifth Third made 158 loans totaling $33.1 million to upper-income borrowers. This represents 51.6% of home purchase loans by volume, which exceeds the percentage of upper-income families at 39.9%, but below the dollar amount at 65.0%, exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 39.9% and exceeded the 2015 aggregate of 38.2%.

A community contact indicated there would be more demand for mortgage lending with an improved job market. Overall, the borrower distribution of home purchase loans is good.

Home Improvement Loans

Fifth Third made four loans totaling $70,000 to low-income borrowers. This represents 5.9% of home improvement loans by volume, which is significantly below the percentage of low-income families at 22.1%, and 1.5% by dollar amount, which is also significantly below proxy. The percentage of loans by volume was significantly below the 2014 aggregate of 10.4% and exceeded the 2015 aggregate of 6.7%. Given that Fifth Third's performance was below proxy and the aggregate of all lenders, the borrower distribution of home improvement loans to low-income borrowers is adequate.

Fifth Third made 13 loans totaling $675,000 to moderate-income borrowers. This represents 19.1% of its home improvement loans by volume, which exceeded the percentage of moderate-income families at 17.6%, and 14.8% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate of 19.1% and exceeded the 2015 aggregate of 19.4%. Given that Fifth Third's performance exceeded proxy and the aggregate of all lenders, the borrower distribution of home improvement loans to moderate-income borrowers is good.

Fifth Third made 18 loans totaling $1.1 million to middle-income borrowers. This represents 26.5% of home improvement loans by volume, which exceeds the percentage of middle-income families at 20.4%, and 24.8% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 21.0% and was below the 2015 aggregate of 22.7%.

Fifth Third made 33 loans totaling $2.7 million to upper-income borrowers. This represents 48.5% of home improvement loans by volume, which exceeded the percentage of upper-income families at 39.9%, and 58.9% by dollar amount, which was below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 43.9% and exceeded the 2015 aggregate of 48.9%.

The overall borrower distribution of home improvement loans is good.

Small Business Loans

The distribution of small business loans to businesses of different sizes is adequate, considering Fifth Third's performance relative to the aggregate of all lenders. Fifth Third was able to make 46.7% of small business loans to businesses with revenues of $1 million or less. Fifth Third's performance was below the 2014 aggregate of 40.9% and the 2015 aggregate of 44.6% and was significantly below the percentage of small businesses in the assessment area at 90.5%. Fifth Third made an acceptable percentage of small-dollar loans (68.0%) up to $100,000, indicating a willingness to lend in smaller amounts typically requested by small businesses. Further, the need for these small-dollar loans for small businesses was expressed by a community contact.

Community Development Loans

Fifth Third originated one community development loan totaling approximately $1.0 million during the evaluation period. The loan was a working capital loan to promote economic development by financing a small business to support retention of jobs for low- and moderate-income workers.

Community development lending in the assessment area represents 0.02% of the total dollar volume of community development loans originated during the evaluation period. This was Fifth Third's smallest market of community development lending. As such, Fifth Third made few, if any community development loans in the assessment area.

Flexible Lending Programs

Fifth Third had 155 flexible lending loans in this assessment area: 135 government loans, two down payment assistance loans, and 18 flexible lending programs. The following tables show the percentage by volume and by dollar amount of the three types of flexible lending programs made in this assessment area during the evaluation period and the distribution of Fifth Third's flexible lending programs within the assessment area by census tract income and borrower income.

Flexible Loan Programs												
	Geographic Distribution											
	Low			Moderate			Middle			Upper		
	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units
Government Loan Programs	1.5%	0.8%	1.2%	5.2%	3.1%	14.9%	51.1%	45.7%	59.9%	42.2%	50.4%	24.0%

Other Flexible Lending Programs	5.6%	2.2%	21.1%	22.2%	16.9%	17.6%	9.8%	20.4%	20.4%	50.0%	68.8%	39.9%
Total	**3.9%**	**1.8%**	**21.1%**	**25.8%**	**18.7%**	**17.6%**	**28.4%**	**27.5%**	**20.4%**	**34.8%**	**44.6%**	**39.9%**

*Unknown tract data is not included in the above table.

Fifth Third's lending in low-income tracts, by number and dollar amount, was equivalent to the percentage of owner-occupied units in these tracts for government loan programs. The percentage of lending by volume and dollar in moderate-income tracts was below the percentage of owner-occupied units in these geographies.

Fifth Third's lending by volume and dollar amount to low-income borrowers was significantly below the percentage of low-income families in the assessment area. The percentage of lending by volume to moderate-income borrowers exceeded the percentage of moderate-income families, especially for government loan and other flexible lending programs.

Therefore, Fifth Third made extensive use of flexible lending practices is serving assessment area credit needs, since lending through flexible loan programs in low-income tracts was good and lending in moderate-income tracts and borrowers was adequate and excellent, respectively.

Investment Test

Fifth Third's performance relative to the investment test in the assessment area is rated 'Outstanding.'

Fifth Third made an excellent level of qualified community development investments and grants, particularly those not routinely provided by private investors. As such, Fifth Third was often in a leadership position. Fifth Third has 92 qualified investments totaling $12.6 million during the evaluation period. Shown in the table below are the total current period investments:

Affordable Housing		Economic Development		Community Services	
#	*$*	*#*	*$*	*#*	*$*
27	8,224,523	10	10,600	45	60,775

Also included in the total number of qualified investments are ten prior period investments totaling $4.3 million. Overall, Fifth Third made 0.8% of its total community development investments in this assessment area, which is greater than the percentage of total deposits at 0.2% and greater than percentage of branch offices at 0.5%.

Fifth Third exhibits an excellent responsiveness to credit and community development needs in the assessment area, including investments in several affordable housing projects and credit counseling throughout the assessment area, which were needs expressed by several community contacts. Included in total investments are 56 donations totaling $73,375 that supported United Way, local schools, small businesses, recreation centers, food banks, churches, and affordable housing.

Service Test

Fifth Third's performance under the service test in this assessment area is rated "Outstanding." Retail services are accessible and Fifth Third is a leader in providing community development services.

Retail Services

Fifth Third's record of opening and closing offices has not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and to low- and moderate-income households. The one banking center closed since the previous evaluation period was in a moderate-income tract. Delivery services are accessible to Fifth Third's geographies and individuals of different income levels.

Business hours and services provided do not vary in a way that inconveniences certain portions of the assessment area, including low- and moderate-income geographies or households and are consistent with the services and hours discussed in the "Institution" assessment.

Fifth Third maintains seven banking centers within this assessment area, including one in low-, one in moderate-, two in middle-, and three in upper-income census tracts. Fifth Third's banking centers in this assessment area represent 0.5% of all its banking centers.

Fifth Third has a total of nine full-service ATMs within this assessment area, including one in low-, three in moderate-, two in middle-, and three in upper-income census tracts.

The following table illustrates the percentage of banking centers and ATMs in low-, moderate-, middle-, and upper-income census tracts in comparison to the number and percentage of census tracts and the percentage of households and businesses in those tracts.

Geographic Distribution of Branches & ATMS

Assessment Area: Multi Huntington

Tract Category	Branches: Total Branches #	Total Branches %	Open #	Closed #	Stand Alone ATMs: Total ATMs	#	%	Full Service ATMs #	Full Service ATMs %	Cash only ATMs #	Cash only ATMs %	Demographics: Census Tracts #	Census Tracts %	House holds %	Total Businesses %
Low	1	14.3%	0	0	Total	1	7.7%	1	11.1%	0	0.0%	5	5.4%	3.0%	6.7%
Moderate	1	14.3%	0	1	Total	7	53.8%	3	33.3%	4	100.0%	23	24.7%	18.2%	20.2%

2016 FFIEC Census Data, 2010 ACS Data, and 2015 D&B Information
Closed branches/ATMs are only included in "closed" columns and are not included in any other totals.
DTO - Drive thru only is a subset of total branches
SA = Stand Alone ATM is a subset of total ATMs

Branch distribution within low-income tracts was considered excellent, as the distribution of branches exceeded the percentage of census tracts and households in these tracts. The branch distribution within moderate-income tracts was considered good.

Community Development Services

Fifth Third is a leader in providing community development services in this assessment area. During the evaluation period, Fifth Third employees provided 1,459 hours of community development service to local organizations serving low- and moderate-income individuals, which represents 1.2% of all community development services provided and equates to 0.7 annualized persons (ANP).

Affordable Housing	Economic Development	Community Services
# of Hours	***# of Hours***	***# of Hours***
37	10	1,412

Employees provided financial expertise through leadership positions in multiple community organizations that provide affordable housing and promote community and economic development.

Community development services include 971 hours of providing financial literacy through local nonprofits and school programs, 428 hours serving on boards and committees, 44 hours providing technical assistance to non-profits, and 16 hours participating in foreclosure prevention outreach.

Fifth Third is considered particularly responsive with regard to hours dedicated to financial literacy activities. Several community contacts mentioned the need for financial literacy training to provide debt counseling and assist first-time homebuyers and affordable housing support.

MULTI-STATE METROPOLITAN AREA
(Full-scope Review)

CRA RATING for Louisville-Jefferson County KY-IN MSA #31140: Satisfactory
The lending test is rated: High Satisfactory
The investment test is rated: Outstanding
The service test is rated: High Satisfactory

The major factors supporting this rating include:

- A good responsiveness to credit needs;
- A good geographic distribution of loans throughout the assessment area;
- An excellent distribution of loans among borrowers of different income levels and adequate to businesses of different revenue sizes;
- Exhibits a good record of serving the credit needs of low-income individuals and areas and very small businesses;
- A relatively high level of making community development loans;
- An extensive use of flexible lending practices in serving the assessment area’s credit needs;
- An excellent level of qualified community development investments and grants;
- Often in a leadership position in providing community development investments and grants;
- Retail delivery systems are accessible to all geographies and individuals of different income levels and businesses of different revenue sizes;
- A record of opening and closing banking centers that has not adversely affected the accessibility of delivery systems;
- Banking services and hours that do not vary in a way that inconveniences any portions of the assessment areas; and,
- A relatively high level of providing community development services.

SCOPE OF EXAMINATION

A full-scope review was conducted for the Louisville-Jefferson County multistate assessment area. The time period, products, and affiliates evaluated for this assessment area are consistent with the scope discussed in the “Institution” section of this report.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE LOUISVILLE-JEFFERSON COUNTY KY-IN MSA

The Louisville-Jefferson County KY-IN MSA consists of Clark, Floyd, and Harrison counties in Indiana and Bullitt, Jefferson, Oldham, and Shelby counties in Kentucky. Fifth Third's assessment area excludes Scott and Washington counties in Indiana and Henry, Spencer, and Trimble counties in Kentucky. The assessment area is comprised of 35 low-, 57 moderate-, 105 middle-, and 85 upper-income tracts. There are also two tracts with no income designation that are primarily composed of correctional institutions, military establishments, education facilities, or medical establishments that do not report income information.

As of June 30, 2016, Fifth Third ranked third out of 35 institutions with 9.8% of the deposit market share. PNC Bank had the majority of the market share 23.6% of deposits and JPMorgan Chase Bank ranked second with 16.6% of the market share. Deposits in this assessment area accounted for 2.3% of the Fifth Third's total deposits. This was the tenth-highest percentage of deposits within Fifth Third's CRA footprint.

From January 1, 2014 through June 30, 2016, Fifth Third originated 3,711 HMDA loans and 982 CRA loans, which represented 3.6% and 2.5% of the total loans originated during the evaluation period, respectively. This was the eighth-largest HMDA market and 12th largest CRA market for loans originated during the evaluation period.

In 2015, Fifth Third Mortgage Company ranked fifth among 424 HMDA reporters in the assessment area and Fifth Third ranked 36th. Wells Fargo Bank, Century Lending Company, PNC Bank, and Commonwealth Bank and Trust Company were the top four HMDA lenders in the assessment area. Fifth Third ranked 11th of 93 CRA reporters in the assessment area in 2015. The top four CRA lenders in the assessment area were American Express, PNC Bank, Chase Bank USA, and US Bank. These lenders are mostly issuers of credit cards and their CRA loans primarily consist of commercial credit card accounts.

Two community contact interviews were conducted to provide additional information regarding the assessment area. The first contact, representing a small business development in Jefferson County, stated that while the area is experiencing some growth with franchises, there are not many small businesses coming into the area. The contact noted while overall employment is stable, there are a large number of low- and moderate-income individuals within the community, and it is difficult for these individuals to find good jobs that pay a living wage. The contact believed there are opportunities for area banks to work with developers and local organizations that deal with affordable housing needs in the community. Also, banks could make access to credit more obtainable for small business owners, as most banks do not make small-dollar loans up to $100,000, which small businesses sometimes need. In general, the contact believed banks in the area are fairly responsive to the credit needs of the community.

The second contact, representing a community development organization in the Clark, Floyd and Scott counties, stated there are not many high-tech jobs in the area and many of the (new) jobs do not pay a livable wage, when factoring in rising housing costs.

The contact stated there is a need for more transitional housing to assist homeless individuals and families in stabilizing and eventually securing permanent housing outside the shelter. The contact believed there are opportunities for banks to participate in housing blight eradication/redevelopment projects and to provide financing for local infrastructure projects. Often, local governments have to rely on more expensive financing options because banks seem unwilling to fund these longer-term types of projects.

Population Characteristics

According to 2010 U.S. Census data, the population in the assessment area was 1.1 million. About 26.2% of the population lived in low- and moderate-income tracts. In addition, 76.3% of the population was 18 years of age or older, the legal age to enter into a contract.

As of July 1, 2015, the Louisville-Jefferson County MSA is the 43rd largest in terms of population in the nation.[66] Jefferson County is the largest county in the assessment area and the most populous county in Kentucky.[67] Louisville is the largest city in the MSA and the 30th most populous city in the U.S. Louisville has 615,366 residents and its population growth increased by 11.0% between 2000 and 2015.[68] According to Moody's Analytics, in 2015, the migration flow into Louisville was 32,599 residents, with a positive annual net migration from 2012 through 2015. In contrast, the largest cities in the MSA in Kentucky are Jeffersontown and Lyndon, which have 26,946 and 11,372 residents, respectively. The largest cities in Indiana are Jeffersonville, New Albany, and Clarksville, which have 46,960, 36,732, and 21,866 residents, respectively.[69]

The following table shows the population in the assessment area by county for 2010 and 201, with the percentage of the population increase.[70] The population within the MSA experienced positive growth between 2010 and 2015, with Shelby County experiencing the greatest growth and Harrison County experiencing the least growth in population during this time period. Moody's Analytics cited favorable population trends as an economic strength for the area.

Shelby, KY	42,074	45,632	8.5%
Total	**1,141,979**	**1,184,559**	**3.7%**

Income Characteristics

In 2010 the MSA median family income was greater ($60,164) than Kentucky and Indiana at $52,046 and $58,944, respectively. The MSA's median family income increased in 2014, 2015, and 2016.

Borrower Income Levels
Louisville-Jefferson County, KY-IN MSA

FFIEC Estimated Median Family Income		Low	Moderate	Middle	Upper
		0 - 49.99%	50% - 79.99%	80% - 119.99%	120% - & above
2014	**$64,200**	0 - $32,099	$32,100 - $51,359	$51,360 - $77,039	$77,040 - & above

2016	**$66,800**	0 - $33,399	$33,400 - $53,439	$53,440 - $80,159	$80,160 - & above

Poverty rates increased in each county in the assessment area from 1999 to 2015.[71] Oldham County had the lowest poverty rates and Jefferson County had the highest poverty rates in 1999 and 2015. In 2015, all of the counties in the assessment area had poverty rates below the state-level poverty rates of Indiana and Kentucky. Harrison County experienced the largest increase in poverty rates during this period. In 2015, Indiana's and Kentucky's poverty rates exceeded the national poverty rate. According to the U.S. Census Bureau, the national poverty rate in 2015 was 13.5%, down 1.3 percentage points from 14.8% in 2014. For most demographic groups, the 2015 poverty rates and number of people in poverty decreased from 2014.[72] The following table shows the poverty rates for 1999[73] and 2015.

[71] U.S. Department of Agriculture Economic Research Service Poverty Rates (for 1999 and 2015): https://data.ers.usda.gov/reports.aspx?ID=17826
[72] 2015 National Poverty: http://www.census.gov/library/publications/2016/demo/p60-256.html
[73] 1999 National Poverty Rate: http://www.census.gov/prod/2000pubs/p60-210.pdf

County	1999 Poverty Rate	2015 Poverty Rate	Change
Clark	8.1%	10.4%	28.4%
Floyd	8.7%	11.3%	29.9%
Harrison	6.4%	11.2%	75.0%
Indiana	**9.5%**	**14.4%**	**51.6%**
Bullitt	7.9%	9.6%	21.5%
Jefferson	12.4%	15.4%	24.2%
Oldham	4.1%	6.2%	51.2%
Shelby	9.9%	11.5%	16.2%
Kentucky	**15.8%**	**18.3%**	**15.8%**
U.S.	**11.8%**	**13.5%**	**14.4%**

Housing Characteristics

According to 2010 U.S. Census data, there are 494,618 housing units and 292,245 families in the assessment area. From an income perspective, 28.7% of housing units, 18.5% of owner-occupied units, and 23.7% of families are located in low- or moderate-income tracts. Nearly three-quarters of the housing units in the low-income census tracts are either rental or vacant (72.5%) and 27.5% are owner-occupied. In the moderate-income census tracts, over half of the housing units are either rental or vacant (52.5%) and 47.5% are owner-occupied. Therefore, based on the number of housing units compared to the number of families in low- and moderate-income census tracts, there appear to be credit-related opportunities for Fifth Third to provide various aspects of affordable housing in the assessment area.

The 2010 U.S. Census data shows the median age of housing stock in the assessment area was 39 years old, with 20.8% of the stock built before 1950. The oldest housing stock was in Jefferson County with a median age of 43 years, while the newest was 20 years in Bullitt County. However, within the assessment area, the median age of housing stock was 61 years in low-income tracts and 49 years in moderate-income tracts. Therefore, there appears to be ample opportunity for Fifth Third to provide home improvement and rehabilitation loans in these lower-income areas. In addition, the community contacts said there are opportunities for banks to fund affordable housing needs in the community (e.g., more transitional housing and assistance in eradicating housing blight).

According to 2010 U.S. Census data, the median housing value in the assessment area was $146,556 with an affordability ratio of 32.79. The affordability ratio is derived by dividing the median household income by the median housing value. The higher the affordability ratio, the more affordable a home is considered. While median housing values fluctuated between 2010 and 2011-2015, housing generally became more affordable across the assessment area due to increased median household incomes. During the evaluation period, the most affordable housing was in Harrison County and the least affordable was in Jefferson County. Median gross rents increased at a fairly substantial rate across the assessment area, with renters in Oldham and Shelby counties experiencing the largest increase in rental rates and renters in Harrison County experiencing the smallest increase in gross rental rates.

The following table presents housing characteristics from the U.S. Census data between 2010 and 2015 in the assessment area, Indiana, and Kentucky. According to Moody's Analytics, housing has picked up with price appreciation accelerating to match the national pace and starts climbing.

County	2010 Median Housing Value	2010 Affordability Ratio	2011-2015 Median Housing Value	2011-2015 Affordability Ratio	2010 Median Gross Rent	2011-2015 Median Gross Rent	Percent of Change
Clark	$125,800	37.65	$129,000	40.08	$692	$755	9.1%
Floyd	$147,100	35.64	$156,300	35.13	$683	$723	5.9%
Harrison	$124,200	41.28	$129,300	40.32	$638	$669	4.9%
Indiana	**$123,000**	**38.78**	**$124,200**	**39.66**	**$683**	**$747**	**9.4%**
Bullitt	$143,000	36.03	$144,700	38.68	$701	$769	9.7%
Jefferson	$145,900	31.08	$150,400	32.38	$667	$749	12.3%
Oldham	$234,400	33.88	$247,500	34.53	$671	$833	24.1%
Shelby	$169,500	32.62	$175,700	34.33	$674	$796	18.1%
Kentucky	**$116,800**	**35.60**	**$123,200**	**35.50**	**$601**	**$675**	**12.3%**

According to Bankrate.com,[74] Indiana ranked 15th and Kentucky ranked 43rd for foreclosure filings in November 2016. The national average for foreclosure filings was one in every 1,533 housing units. The following table contains information about foreclosure filings in the assessment area, according to Realtytrac:[75]

Geography Name	Ratio of Properties Receiving Foreclosure Filings in November 2016
Clark	1:863
Floyd	1:1,766
Harrison	1:1,741
Indiana	**1:1,590**
Bullitt	1:2,590
Jefferson	1:2,723
Oldham	1:7,252
Shelby	1:3,553
Kentucky	**1:4,270**
U.S.	**1:1,533**

In November 2016, Clark County had the highest rate of foreclosure and Oldham County had the lowest rates of foreclosure in the assessment area.

Building permits for this MSA, Indiana, Kentucky, and the nation are included in the following table for 2014, 2015, and 2016.[76]

Geography	2014	2015	Percent of Change 2014-2015	2016	Percent of Change 2015-2016
MSA	4,035	3,979	-1.4%	5,001	25.7%
Indiana	**17,813**	**18,483**	**3.8%**	**18,317**	**-0.9%**
Kentucky	**9,421**	**10,566**	**12.2%**	**12,798**	**21.1%**
U.S.	**1,052,124**	**1,182,582**	**12.4%**	**1,190,191**	**0.6%**

While the MSA experienced a slight decrease in the number of housing permits issued between 2014 and 2015, it experienced a significant increase between 2015 and 2016. The increase in the number of permits could indicate there is a growing demand for home purchase loans in the MSA and Kentucky during the evaluation period. According to Moody's Analytics, the demand for new housing starts has increased.

Labor, Employment, and Economic Characteristics

According to Moody's Analytics, the Louisville-Jefferson County area economy is in expansion due to competitive business costs and favorable population trends. Contributing to the area's economic strengths is the large insurance industry in a state with Medicaid expansion, a major shipping hub, the presence of a large research university, and low business costs (especially office rents). Economic weaknesses include below-average educational attainment despite the presence of the University of Louisville, few high-tech jobs, and below-average per capita income. Both community contacts commented on jobs not providing a living wage for lower-income workers. However, according to Moody's Analytics, job creation has been strong enough to absorb a surge in new labor market entrants and put downward pressure on the jobless rate.

According to Insider Louisville,[77] the Louisville MSA is home to three Fortune 500 companies in 2016. Other Fortune 500 firms with strong ties to Louisville include: General Electric, Ford Motor, Kroger, Comcast, UPS, and Time Warner Cable.

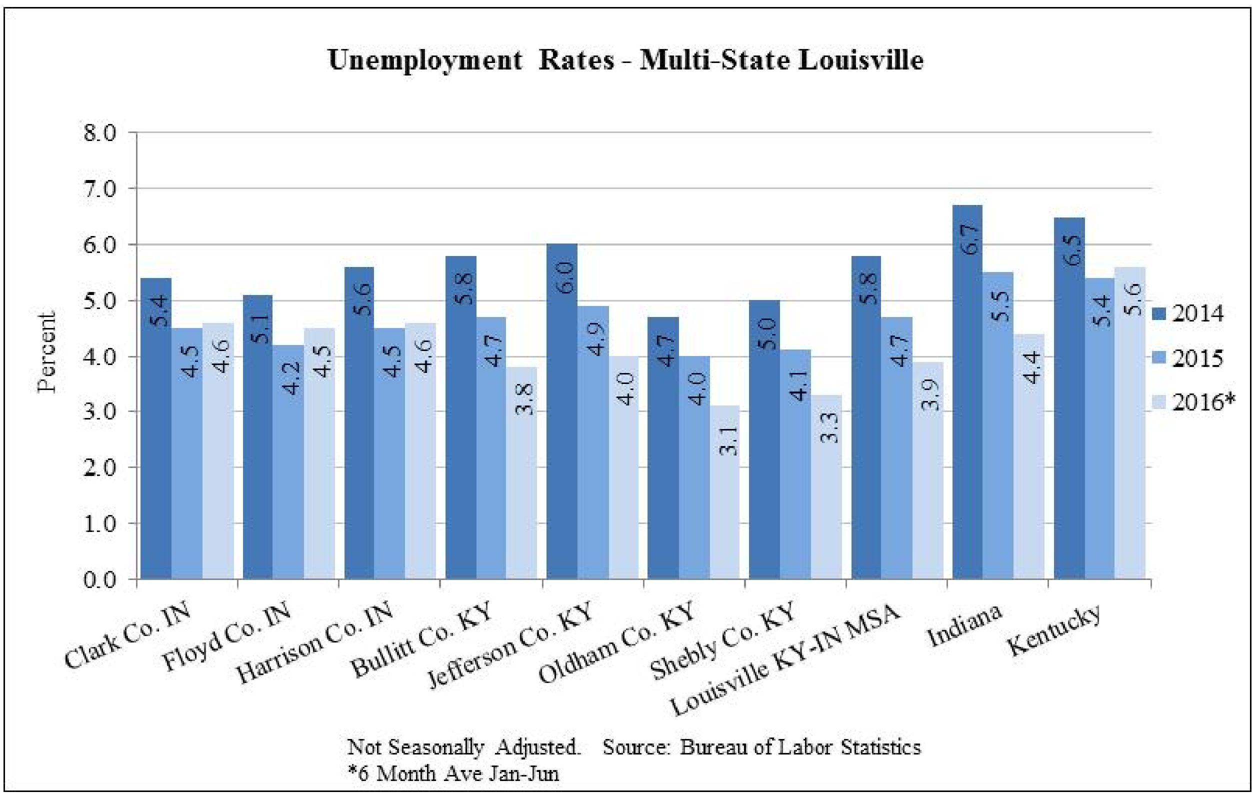
Louisville Fortune 500 Companies (2016)[78]		
Rank	**Company**	**Annual Revenue**
52	Humana	$54.3 billion
218	Yum! Brands	$13.3 billion
372	Kindred Healthcare	$5.3 billion

[76] U.S. Census Bureau Building Permits Survey: http://www.census.gov/construction/bps/
[77] Insider Louisville: http://insiderlouisville.com/business/fortune-500-three-louisville-based-firms-make-list-along-many-firms-strong-louisville-ties/
[78] All three companies experienced an appreciable improvement from the prior year's rankings (58th, 228th, 491st)

According to the Greater Louisville Chamber of Commerce,[79] the top 15 employers in the MSA in 2016 were:

Company	Number of Employees
United Parcel Service (UPS)	22,080
Ford Motor Co. (2 plants)	12,990
Humana Inc.	12,500
Norton Healthcare	11,389
Amazon.com	6,000
GE Appliances	6,000
KentuckyOne Health Inc.	6,000
Baptist Healthcare Systems Inc.	4,995
Kroger Co.	4,626
Manna Inc.	3,120
ResCare Inc.	2,435
Kindred Healthcare Inc.	2,381
LG&E and KU Energy	2,211
PNC Bank	1,500
Yum! Brands	1,343

The following table illustrates the average unemployment rates for 2014, 2015, and 2016 for the MSA, Indiana, and Kentucky.



[79] GLI: https://www.greaterlouisville.com/talent/major-employers/

The unemployment rates declined each year in the MSA and were considerably below Indiana's or Kentucky's during this time period.

According to *Reuters*, on January 23, 2017 a U.S. judge blocked health insurer Aetna Inc.'s proposed $34 billion acquisition of Humana Inc. The U.S. Justice Department filed a lawsuit in July 2016 to block Aetna's acquisition of Humana and Anthem's acquisition of Cigna, arguing that these two deals would substantially lessen competition and lead to higher prices.[80] According to Business First of Louisville (as reported to *WDRB News),* Humana is the area's largest corporate headquarters in Kentucky, second-largest private employer, and third-largest employer overall in the 12-county metropolitan area. Humana is the single-largest source of taxes withheld from paychecks, despite having fewer employees than UPS and Jefferson County Public Schools. According to a University of Louisville finance professor, part of the justification for corporate mergers is reducing expenses through eliminating duplicate positions; so, despite what officials say, there will be layoffs.[81]

2016 FFIEC Census Data and 2015 D&B Information

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE LOUISVILLE-JEFFERSON COUNTY KY-IN MSA

Lending Test

Fifth Third's performance under the lending test in this assessment area is rated "High Satisfactory." Fifth Third has demonstrated a good responsiveness to the credit needs of the community. In addition, Fifth Third originated 33 community development loans totaling $187.1 million. Fifth Third has a good geographic distribution of loans and minimal lending gaps in the assessment area. Fifth Third has an excellent distribution among borrowers of different income levels and an adequate distribution of loans to businesses of different revenue sizes. Fifth Third exhibits a good record of serving the credit needs of highly economically disadvantaged areas in its assessment area, low-income individuals, and businesses with gross annual revenues of $1 million or less. The good level of community development loans and extensive use of flexible lending practices augmented Fifth Third's performance in this assessment area.

Greatest consideration was given to the evaluation of home purchase lending based on the overall volume of lending, followed by refinance, small business, and home improvement lending. Details of Fifth Third's residential mortgage and small business lending, as well as information regarding aggregate lending, can be found in Appendix E.

Lending Activity

Fifth Third's lending activity reflects good responsiveness to the credit needs within the assessment area. Fifth Third originated 1,836 home purchase, 1,717 refinance, 158 home improvement, 982 small business, and 33 community development loans during the evaluation period. The percentage of Fifth Third's total lending at 3.3% is greater than the percentage of total deposits at 2.3% in this area.

Fifth Third made 95.7% of the HMDA and 98.8% of the CRA lending within this designated assessment area. There was no concentration of loans identified in any of the excluded counties within the assessment area.

In addition to lending, Fifth Third modified existing loans to borrowers. Refer to the distribution of HAMP and other real-estate secured modifications within the assessment area by census tract income and by borrower income.

	Distribution by Census Tract Income							
	Low		Mod		Middle		Upper	
	#	%	#	%	#	%	#	%
Other Real Estate Secured Modifications	8	4.4%	30	16.6%	102	56.4%	41	22.7%
Percentage of Owner Occupied Units		***4.7%***		***13.8%***		***45.0%***		***36.6%***

*Unknown tract data is not included in the above table.

	Distribution by Borrower Income							
	Low		Mod		Middle		Upper	
	#	%	#	%	#	%	#	%
Other Real Estate Secured Modifications	69	38.1%	50	27.6%	36	19.9%	26	14.4%
Percentage of Families by Family Income		***21.0%***		***17.4%***		***20.7%***		***40.8%***

*Unknown tract data is not included in the above table.

There were not enough HAMP loans for a meaningful analysis. The percentage of other modifications in low-income tracts was slightly below the percentage of owner-occupied units in these geographies, and the other modifications in moderate-income tracts exceeded the percentage of owner-occupied units. Therefore, modifications helped to expand lending activities in these areas.

The percentage of other modifications made to low- and moderate-income borrowers exceeded the percentage of low- and moderate-income families in the assessment area. Therefore, modifications enhanced Fifth Third's ability to reach low- and moderate-income borrowers.

Geographic Distribution of Loans

Fifth Third's overall distribution of lending among geographies is good. Home purchase lending, the largest loan category, is good. Performance is also good for refinance and home improvement loans. Small business lending is good. There is also an overall low level of lending gaps. The following gaps in lending were noted in the assessment area:

Tract Income Levels	Number of Tracts	Tracts with No Loans	Penetration
Low	35	3	91.4%
Moderate	57	1	98.3%
Middle	105	0	100.0%
Upper	85	0	100.0%
Unknown	2	2	0.0%
Total	**284**	**6**	**97.9%**

Overall, lending gaps are considered minimal, because there is a 90+ percent penetration rate in all tract income levels.

Home Purchase Loans

Fifth Third made 48 home purchase loans totaling $4.8 million in low-income tracts. This represents 2.6% of home purchase loans by volume, which is less than the percentage of owner-occupied units in these tracts at 4.7%, and 1.5% by dollar amount, which is also less than the percentage of owner-occupied units in these geographies. The percentage of loans by volume was below the 2014 aggregate at 2.1% and exceeded the 2015 aggregate at 2.0%. As Fifth Third's performance exceeded the aggregate of all lenders, but was below the percentage of owner-occupied units in these geographies, the geographic distribution is good.

Fifth Third made 254 home purchase loans totaling $26.2 million in moderate-income tracts. This represents 13.8% of its home purchase loans by volume, which is comparable to the percentage of owner-occupied units in these tracts at 13.8%, and 8.5% by dollar amount, which was below the percentage of owner-occupied units in these geographies. The percentage of loans by volume was comparable to the 2014 aggregate at 12.2% and exceeded the 2015 aggregate at 11.6%. As Fifth Third's performance exceeded the aggregate of all lenders and comparable to proxy, the geographic distribution is good.

Fifth Third made 702 home purchase loans totaling $87.4 million in middle-income tracts. This represents 38.2% of home purchase loans by volume, which is below the percentage of owner-occupied units in these tracts at 45.0%, and 28.4% by dollar amount, which is less than the percentage of owner-occupied units in these geographies. The percentage of loans by volume was below the 2014 aggregate of 43.7% and below the 2015 aggregate of 44.4%.

Fifth Third made 832 home purchase loans totaling $189.2 million in upper-income tracts. This represents 45.3% of home purchase loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 36.6%, and 61.5% by dollar amount, which exceeds the percentage of owner-occupied units in these geographies. The percentage of loans by volume exceeded the 2014 aggregate of 42.0% and exceeded the 2015 aggregate of 42.0%.

The geographic distribution of home purchase loans is considered good.

Refinance Loans

Fifth Third made 71 refinance loans totaling $4.1 million in low-income tracts. This represents 4.1% of refinance loans by volume and 1.7% by dollar amount, which is below the percentage of owner-occupied units at 4.7%. The percentage of loans by volume exceeded the 2014 aggregate at 3.7% and was comparable to the 2015 aggregate at 2.4%. As Fifth Third's performance was below proxy and exceeded the aggregate of all lenders and with only 27.5% of the housing units being owner-occupied, the geographic distribution of refinance loans in low-income tracts is good.

Fifth Third made 235 refinance loans totaling $20.5 million in moderate-income tracts. This represents 13.7% of refinance loans by volume, which is below the owner-occupied units in these tracts at 17.4%. The percentage of loans by dollar amount at 8.6% is significantly below proxy. The percentage of loans by volume was comparable to the 2014 aggregate at 13.8% and significantly exceeded the 2015 aggregate at 8.6%. As Fifth Third's performance was below proxy and exceeded the aggregate of all lenders, the geographic distribution of refinance loans in moderate-income tracts is good.

Fifth Third made 730 refinance loans totaling $76.8 million in middle-income tracts. This represents 42.5% of refinance loans by volume, which is comparable to the owner-occupied units in these tracts at 45.0%. However, refinance loans by dollar amount (32.3%) was below proxy. The percentage of loans by volume at 44.8% was below the 2014 aggregate and was comparable to the 2015 aggregate at 42.9%.

Fifth Third made 681 refinance loans totaling $136.2 million in upper-income tracts. This represents 39.7% of refinance loans by volume, which exceeds the owner-occupied units in these tracts at 36.6%, and also exceeded proxy by dollar amount at 57.3%. The percentage of loans by volume was comparable to the 2014 aggregate at 39.5% and was below the 2015 aggregate at 44.1%.

Overall, the geographic distribution of refinance loans is good.

Home Improvement Loans

Fifth Third made three home improvement loans totaling $183,000 in low-income tracts. This represents 1.9% of home improvement loans by volume, which is less than the percentage of owner-occupied units in these tracts at 4.7%, and 1.4% by dollar amount, which is significantly less than the percentage of owner-occupied units in these geographies. The percentage of loans by volume exceeded the 2014 aggregate of 3.2% and was below the 2015 aggregate of 4.5%. Given the median age of housing in low-income tracts at 61 years, which may indicate the need for home improvement loans and Fifth Third's lending performance in these tracts, the geographic distribution is considered adequate.

Fifth Third made 29 home improvement loans totaling $1.6 million in moderate-income tracts. This represents 18.4% of home improvement loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 13.8%, and 12.4% by dollar amount, which is slightly below the percentage of owner-occupied units in these geographies. The percentage of loans by volume was below the 2014 aggregate of 15.4% and exceeded the 2015 aggregate of 13.1%. Given that Fifth Third's performance exceeded proxy and the aggregate of all lenders, the geographic distribution of home improvement loans in moderate-income tracts is excellent.

Fifth Third made 64 home improvement loans totaling $4.0 million in middle-income tracts. This represents 40.5% of home improvement loans by volume, which is below the percentage of owner-occupied units in these tracts at 45.0%, and 30.3% by dollar amount and below the percentage of owner-occupied units in these geographies. Also, the percentage of loans by volume was below the 2014 aggregate of 44.6% and was below the 2015 aggregate of 43.0%.

Fifth Third made 62 home improvement loans totaling $7.3 million in upper-income tracts. This represents 39.2% of home improvements loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 36.6%, and 55.9% by dollar amount, which also exceeds the percentage of owner-occupied units in these geographies. The percentage of loans by volume exceeded the 2014 aggregate of 36.8% and was below the 2015 aggregate of 39.4%.

Overall, the geographic distribution of home improvement loans is good.

Small Business Loans

Fifth Third made 123 small business loans totaling $21.3 million in low-income tracts. This represents 12.5% of small business loans by volume, which exceeds the percentage of businesses in these tracts at 9.3%, and 17.0% by dollar amount, which also exceeds the percentage of businesses in these geographies. The percentage of loans by volume exceeded the 2014 aggregate of 8.7% and exceeded the 2015 aggregate of 10.2%. Given that Fifth Third's performance exceeded proxy and the aggregate of all lenders, the geographic distribution of small business loans in low-income tracts is excellent.

Fifth Third made 140 small business loans totaling $19.3 million in moderate-income tracts. This represents 14.3% of small business loans by volume, which is comparable to the percentage of businesses in these tracts at 14.7%. This also represents 15.4% small business loans by dollar amount, which exceeds the percentage of small businesses in these tracts. The percentage of loans by volume was below the 2014 aggregate of 15.8% and was comparable to the 2015 aggregate of 15.4%. Given that Fifth Third's performance was comparable to proxy and the aggregate of all lenders, the geographic distribution of small business loans in moderate-income tracts is good.

Fifth Third made 273 small business loans totaling $37.9 million in middle-income tracts. This represents 27.8% of small business loans by volume, which is less than the percentage of businesses in these tracts at 34.6%, and 30.3% by dollar amount, which is comparable to the percentage of businesses in these tracts. The percentage of loans by volume was below the 2014 aggregate of 31.5% and was below the 2015 aggregate of 31.0%.

Fifth Third made 446 small business loans totaling $46.7 million in upper-income tracts. This represents 45.4% of small business loans by volume, which exceeds the percentage of businesses in these tracts at 41.3%, and 37.3% by dollar amount, which is below the percentage of businesses in these geographies. The percentage of loans by volume exceeded the 2014 aggregate of 42.4% and exceeded the 2015 aggregate of 42.0%.

Overall, the geographic distribution of small business loans is good.

Distribution by Borrower Income and Revenue Size of the Business

The distribution of loans is excellent based on borrower income and adequate for businesses of different revenue sizes. Borrower distribution is excellent for home purchase and refinance, and good for home improvement loans.

Home Purchase Loans

Fifth Third made 338 loans totaling $30.7 million to low-income borrowers. This represents 18.4% of home purchase loans by volume, which is comparable to the percentage of low-income families at 21.0%. The percentage of loans by dollar amount in these geographies at 10.0% is significantly below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 10.5% and substantially exceeded the 2015 aggregate of 10.4%.

Given that Fifth Third's performance was substantially above the aggregate of all lenders and comparable to proxy, the borrower distribution of home purchase loans to low-income borrowers is excellent.

Fifth Third made 450 loans totaling $51.5 million to moderate-income borrowers. This represents 24.5% of home purchase loans by volume, which exceeds the percentage of moderate-income families at 17.4%, and 16.7% by dollar volume, which is comparable to proxy. The percentage of loans by volume exceeded the 2014 aggregate of 22.2% and was comparable to the 2015 aggregate of 22.7%. As Fifth Third's performance in home purchase lending to moderate-income borrowers exceeded proxy and the aggregate of all lenders, borrower distribution to moderate-income borrowers is excellent.

Fifth Third made 347 loans totaling $52.0 million to middle-income borrowers. This represents 18.9% of home purchase loans by volume, which is comparable to the percentage of middle-income families at 20.7%, and 16.9% by dollar amount, which is below proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 20.6% and was comparable to the 2015 aggregate of 20.1%.

Fifth Third made 639 loans totaling $160.9 million to upper-income borrowers. This represents 34.8% of home purchase loans by volume, which is below the percentage of upper-income families at 40.8%, while the percentage of loans by dollar amount at 52.3% significantly exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 30.7% and exceeded the 2015 aggregate of 30.9%.

Overall, the borrower distribution of home purchase loans is excellent.

Refinance Loans

Fifth Third made 260 loans totaling $20.4 million to low-income borrowers. This represents 15.1% of refinance loans by volume, which is below the percentage of low-income families at 21.0%, and 8.6% of loans by dollar amount, which is significantly below proxy. The percentage of loans by volume significantly exceeded the 2014 aggregate of 9.4% and significantly exceeded the 2015 aggregate of 7.0%. Because Fifth Third's performance significantly exceeded the aggregate of all lenders, but was below proxy, the borrower distribution of refinance loans to low-income borrowers is good.

Fifth Third made 389 loans totaling $37.7 million to moderate-income borrowers. This represents 22.7% of refinance loans by volume, which exceeds the percentage of moderate-income families at 17.4%, and 15.9% of loans by dollar amount, which is comparable to proxy. The percentage of loans by volume exceeded the 2014 aggregate of 16.6% and exceeded the 2015 aggregate of 15.7%. Given that Fifth Third's performance exceeded proxy and the aggregate of all lenders, the borrower distribution of home purchase loans to moderate-income borrowers is excellent.

Fifth Third made 436 loans totaling $48.1 million to middle-income borrowers. This represents 25.4% of refinance loans by volume, which exceeds the percentage of middle-income families at 20.7%, and 20.2% by dollar amount, which is comparable to proxy. The percentage of loans by volume exceeded the 2014 aggregate of 20.3% and exceeded the 2015 aggregate of 18.8%.

Fifth Third made 576 loans totaling $122.4 million to upper-income borrowers. This represents 33.5% of refinance loans by volume, which is below the percentage of upper-income families at 40.8%, and 51.5% of loans by dollar amount, which exceeded proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 32.0% and was comparable to the 2015 aggregate of 34.0%.

A community contact stated there are a large number of low- and moderate-income individuals within the community; however, it is difficult for these individuals to find good jobs that will support their needs; additionally, the area has a high cost of living. With Fifth Third's excellent performance in refinance lending to low- and moderate-income borrowers that exceeded the aggregate of all lenders, the overall borrower distribution for refinance loans is excellent.

Home Improvement Loans

Fifth Third made 29 loans totaling $1.6 million to low-income borrowers. This represents 18.4% of home improvement loans by volume, which is comparable to the percentage of low-income families at 21.0%, and 12.2% by dollar, which is significantly below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 11.7% and exceeded the 2015 aggregate of 10.6%. Given that Fifth Third's performance exceeded the aggregate of all lenders and was comparable to proxy, the borrower distribution of home improvement loans to low-income borrowers is good.

Fifth Third made 43 loans totaling $2.6 million to moderate-income borrowers. This represents 27.2% of its home improvement loans by volume, which substantially exceeded the percentage of moderate-income families at 17.4%, and 20.0% by dollar amount, which also exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 19.2% and the 2015 aggregate of 21.1%. Given that Fifth Third's performance exceeded the aggregate of all lenders and proxy, the borrower distribution of home improvement loans to moderate-income borrowers is excellent.

Fifth Third made 36 loans totaling $2.9 million to middle-income borrowers. This represents 22.8% of home improvement loans by volume, which exceeded the percentage of middle-income families at 20.7%, and 22.0% by dollar amount, which also exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 21.7% and was below the 2015 aggregate of 21.7%.

Fifth Third made 50 loans totaling $6.0 million to upper-income borrowers. This represents 31.6% of home improvement loans by volume, which was below the percentage of upper-income families at 40.8%, and 45.8% by dollar amount, which exceeds proxy. The percentage of loans by volume was below 2014 aggregate of 37.1% and was below the 2015 aggregate of 40.9%.

The overall borrower distribution of home improvement loans is good.

Small Business Loans

The distribution of small business loans to businesses of different sizes is adequate, considering Fifth Third's performance relative to the aggregate of all lenders. Fifth Third was able to make 53.6% of small business loans to businesses with revenues of $1 million or less. Fifth Third's performance exceeded the 2014 aggregate of 42.9% and the 2015 aggregate of 47.4%, but was significantly below the percentage of small businesses in the assessment area at 91.5%. Also, Fifth Third made an acceptable percentage of small-dollar loans (73.2%) up to $100,000, indicating a willingness to lend in smaller amounts typically requested by small businesses. A community contact indicated there is a need for small-dollar loans to small businesses.

Community Development Loans

Fifth Third originated 33 community development loans totaling $187.1 million during the evaluation period as shown in the table below:

Affordable Housing		Economic Development		Revitalization and Stabilization		Community Services	
#	$	#	$	#	$	#	$
1	1,150,000	3	38,250,000	16	143,700,000	13	3,958,290

Community development lending in the assessment area represents 3.1% of the total dollar volume of community development loans originated during the evaluation period. This ranks as Fifth Third's tenth-highest percentage of community development lending during the evaluation period. Fifth Third's deposit market share is 9.8% and has high competition for community development loans from a number of large national banks in the area. As such, Fifth Third has a relatively high level of community development lending.

Examples of community development lending include, but are not limited to:

- A new loan to help fund a new markets tax credit that allows a nonprofit community development organization to continue to build and refurbish low-income rental housing and transitional shelter for homeless families and provide home repair assistance and financial empowerment education to low- and moderate-income individuals
- Working capital loans that promote economic development by financing businesses to support job retention, create new jobs, and promote growth to continue operations in low- and moderate-income geographies
- Multiple working capital loans supporting nonprofits that provide a multitude of services to low- and moderate-income individuals and families

Flexible Lending Programs

Fifth Third had 858 flexible lending loans in this assessment area: 547 loans were government loans, 46 were down payment assistance loans, and 265 were other flexible lending programs. The following tables show the percentage by volume and by dollar amount of the three types of flexible lending programs made in this assessment area during the evaluation period and the distribution of Fifth Third's flexible lending programs within the assessment area by census tract income and by borrower income.

Flexible Loan Programs

*Unknown tract data is not included in the above table.

Fifth Third's lending in low-income tracts by number exceeded the percentage of owner-occupied units in these tracts, particularly for the various down payment assistance programs. The percentage of lending by volume in moderate-income tracts exceeded the percentage of owner-occupied units. Flexible lending in low- and moderate-income geographies by dollar amount was slightly below proxy.

Fifth Third's lending by volume to low-income borrowers was below the percentage of low-income families in the assessment area and lending by dollar amount was significantly below proxy. The percentage of lending by volume and dollar amount to moderate-income borrowers exceeded the percentage of moderate-income families, especially for government loan programs. Therefore, Fifth Third made extensive use of flexible lending practices is serving the assessment area's credit needs since lending through flexible loan programs to low-income borrowers was good, while the lending to low- and moderate-income tracts and moderate-income borrowers was excellent.

Investment Test

Fifth Third's performance relative to the investment test in the assessment area is rated "Outstanding."

Fifth Third made an excellent level of qualified community development investments and grants, particularly those not routinely provided by private investors. As such, Fifth Third was often in a leadership position. Fifth Third has 168 investments totaling $36.4 million during the evaluation period. Shown in the table below are the total current period investments:

Affordable Housing		Economic Development		Community Services	
#	*$*	*#*	*$*	*#*	*$*
59	22,803,710	10	52,031	79	474,519

Also included in the total number of qualified investments are 20 prior period investments totaling $13.1 million. Overall, Fifth Third made 2.2% of its total community development investments in this assessment area, which is comparable to the percentage of total deposits at 2.3% and branch offices at 3.2%, respectively.

Fifth Third exhibits an excellent responsiveness to credit and community development needs in the assessment area, including investments in several affordable/transitional housing projects and small business funding, which was an important need expressed by community contacts. Included in the total investments are 98 donations totaling $553,310 that supported United Way, chamber of commerce, local schools, small businesses, churches, food banks, and affordable housing.

Service Test

Fifth Third's performance under the service test in this assessment area is rated "High Satisfactory." Retail services are accessible and Fifth Third provides a relatively high level of community development services.

Retail Services

Fifth Third's record of opening and closing offices has not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and to low- and moderate-income households. One banking center was opened and two were closed since the previous evaluation period, resulting in no net change in the number of banking centers in low- and moderate-income tracts. Delivery services are accessible to Fifth Third's geographies and individuals of different income levels.

Business hours and services provided do not vary in a way that inconveniences certain portions of the assessment area, including low- and moderate-income geographies or households and are consistent with the services and hours discussed in the "Institution" assessment.

Fifth Third maintains 42 banking centers within this assessment area, including six in low-, one in moderate-, 18 in middle-, and 15 in upper-income census tracts. There are also two branches located in unknown income tracts. Fifth Third's banking centers in this assessment area represent 3.2% of all its banking centers.

Fifth Third has a total of 59 full-service ATMs within this assessment area, including nine in low-, four in moderate-, 23 in middle-, and 23 in upper-income census tracts.

The following table illustrates the percentage of banking centers and ATMs in low-, moderate-, middle-, and upper-income census tracts in comparison to the number and percentage of census tracts and the percentage of households and businesses in those tracts.

Geographic Distribution of Branches & ATMS

Assessment Area: Multi Louisville

Tract Category	Branches: Total Branches #	Branches: Total Branches %	Branches: Open #	Branches: Closed #	Stand Alone ATMs: Total ATMs	Stand Alone ATMs: Total ATMs #	Stand Alone ATMs: Total ATMs %	Full Service ATMs #	Full Service ATMs %	Cash only ATMs #	Cash only ATMs %	Demographics: Census Tracts #	Demographics: Census Tracts %	Demographics: House holds %	Demographics: Total Businesses %

Unknown	2	4.8%	1	1	Total	1	1.4%	0	0.0%	1	9.1%	2	0.7%	0.0%	0.2%
Total	42	100.0%	1	2	Total	70	100.0%	59	100.0%	11	100.0%	284	100.0%	100.0%	100.0%

2016 FFIEC Census Data, 2010 ACS Data, and 2015 D&B Information
Closed branches/ATMs are only included in "closed" columns and are not included in any other totals.
DTO - Drive thru only is a subset of total branches
SA = Stand Alone ATM is a subset of total ATMs

Branch distribution within low-income tracts was considered excellent, as the distribution of branches exceeded the percentage of census tracts and households in these tracts. However, the branch distribution within moderate-income tracts was considered poor.

Community Development Services

Fifth Third provides a relatively high level of community development services in this assessment area. During the evaluation period, Fifth Third employees provided 2,617 hours of community development service to local organizations serving low- and moderate-income individuals, which represents 2.2% of all community development services provided and equates to 0.13 annualized persons (ANP).

Affordable Housing	Economic Development	Revitalization and Stabilization	Community Services
# of Hours	***# of Hours***	***# of Hours***	***# of Hours***
459	48	143	1,967

Employees provided financial expertise through leadership positions in multiple community organizations that provide affordable housing and promote community and economic development and area revitalization and stabilization. Community development services include 1,779 hours serving on boards and committees, 453 hours of providing financial literacy through local nonprofits and school programs, 313 hours providing technical assistance to non-profits and local business, and 72 hours participating in foreclosure prevention outreach.

Fifth Third is considered particularly responsive with regard to hours dedicated to affordable housing activities, as a community contact noted the need for this type of service.

MULTI-STATE METROPOLITAN AREA
(Full-scope Review)

CRA RATING for South Bend-Elkhart-Mishawaka IN-MI CSA #515: Satisfactory

The lending test is rated:	**High Satisfactory**
The investment test is rated:	**Outstanding**
The service test is rated:	**High Satisfactory**

The major factors supporting this rating include:

- A good responsiveness to credit needs;
- A good geographic distribution of loans throughout the assessment area;
- A good distribution of loans among borrowers of different income levels and adequate to businesses of different revenue sizes;
- Exhibits a good record of serving the credit needs of low-income individuals and areas and very small businesses;
- A relatively high level of community development loans;
- Extensive use of flexible lending practices in serving the assessment area's credit needs;
- An excellent level of qualified community development investments and grants;
- Often in a leadership position in providing community development investments and grants;
- Retail delivery systems are readily accessible to all geographies and individuals of different income levels and businesses of different revenue sizes;
- A record of opening and closing banking centers that has not adversely affected the accessibility of delivery systems;
- Banking services and hours that do not vary in a way that inconveniences any portions of the assessment areas; and,
- A relatively high level of providing community development services.

SCOPE OF EXAMINATION

A full-scope review was conducted for the South Bend-Elkhart-Mishawaka multistate assessment area. The time period, products, and affiliates evaluated for this assessment area are consistent with the scope discussed in the "Institution" section of this report.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE SOUTH BEND-ELKHART-MISHAWAKA IN-MI CSA

The South Bend-Elkhart-Mishawaka IN-MI CSA consists of the following three MSAs:

- Elkhart-Goshen IN MSA #21140, consisting of Elkhart County in Indiana
- Niles-Benton MI MSA #35660, consisting of Berrien County in Michigan
- South Bend-Mishawaka IN-MI MSA #43780, consisting of St. Joseph County in Indiana and Cass County in Michigan

The assessment area is comprised of 14 low-, 41 moderate-, 72 middle-, and 43 upper-income tracts. There is also one tract with no income designation that does not report income information.

As of June 30, 2016, Fifth Third ranked fourth out of 24 institutions with 9.1% of the deposit market share. 1st Source Bank had the majority of the market share with 27.1% of deposits, followed by JP Morgan Chase and Lake City Bank with 13.3% and 9.7% of the market share, respectively. Deposits in this assessment area accounted for 0.8% of Fifth Third's total deposits, which was the 24th highest percentage of deposits within Fifth Third's CRA footprint.

From January 1, 2014 through June 30, 2016, Fifth Third originated 777 HMDA loans and 416 CRA loans, which represented 0.7% and 1.1% of the total loans originated during the evaluation period, respectively. This was the 28th largest HMDA market and 20th largest CRA market for loans originated during the evaluation period.

In 2015, Fifth Third Mortgage Company ranked 21st among 392 HMDA reporters in the assessment area, Fifth Third Mortgage Company-Michigan ranked 28th, and Fifth Third ranked 50th. Wells Fargo Bank, Ruoff Mortgage Company, Horizon Bank, and 1st Source Bank were the top four HMDA lenders in the assessment area. Fifth Third ranked 16th of 81 CRA reporters in the assessment area in 2015. The top four CRA lenders in the assessment area were American Express, 1st Source Bank, Capital One, and U.S. Bank. These lenders are mostly issuers of credit cards and their CRA loans primarily consist of commercial credit card accounts.

Three community contact interviews were conducted to provide additional information regarding the assessment area. The first contact, representing an affordable housing organization, stated there is currently a construction project underway that will provide housing to low-income elderly individuals, funding for which primarily comes from Housing and Urban Development (HUD). The contact indicated there is a need for financial institutions to offer low-income individuals and families fee-free banking products and products that encourage a minimum balance be maintained. There is also a need for more programs to help low-income individuals obtain (first-time) mortgages. The contact stated this organization partners with financial institutions to conduct financial literacy workshops for low- and moderate-income individuals and transportation is provided. The contact specifically mentioned Fifth Third as being active in the community.

The second contact, representing a community development organization, stated the economy is improving due to increased manufacturing. The contact believed area banks have an opportunity to develop more deposit products targeted toward the unbanked (i.e., fee-free banking). The contact specifically mentioned 1st Source Bank and Centier Bank as being active in the community.

The final contact, representing a community development organization, stated that Berrien County has sufficient access to banking facilities and businesses generally have good relationships with area banks. The contact believed there is an ongoing need for small business owners and entrepreneurs to increase their financial and business planning expertise. The contact noted that financial institutions are well-represented on the organization's board and that Fifth Third, 1st Source Bank, and United Federal Credit Union are particularly involved and supportive of the organization's mission.

Population Characteristics

According to 2010 U.S. Census data, the population in the assessment area was 673,596. About 25.0% of the population lived in low- and moderate-income tracts. In addition, 74.6% of the population was 18 years of age or older, the legal age to enter into a contract.

As of July 1, 2015, the South Bend-Mishawaka MSA is the 155th largest in terms of population in the nation, while the Elkhart-Goshen MSA is the 217th and the Niles-Benton Harbor MSA is the 264th largest.[82] St. Joseph is the largest county in the assessment area and the fifth-most populous county in Indiana.[83] South Bend (located in St. Joseph County) is the largest city in assessment area and is the 296th most populous city in the U.S. South Bend has 320,098 residents, its population growth decreasing by 6.3% between 2000 and 2015. In contrast, the next largest cities in the assessment area are Elkhart, MI and Mishawaka, IN, which have 52,348 and 48,261 respectively; Niles Township, MI only has 13,895 residents.[84]

The following table shows the population in the assessment area by county for 2010 and 2015 with the percentage of the population increase or decrease.[85] The population within the assessment area experienced positive growth between 2010 and 2015, with Elkhart County experiencing the greatest growth and Berrien County experiencing the least growth in population during this time period. Moody's Analytics noted positive population growth and net migration trends for Elkhart, IN could indicate an increased demand in prospective homebuyers. Conversely, negative net migration trends in South Bend, IN and Niles, MI could indicate a decreased demand in prospective homebuyers in those metropolitan areas.

[85] Population Estimates derived from U.S. Census Data (April 1, 2010 – July 1, 2015): http://www.census.gov/quickfacts/table/PST045216/00

County	2010 Population	2015 Population	Population Percent Change
Elkhart, IN	197,559	203,474	3.0%
St. Joseph, IN	266,931	268,441	0.6%
Berrien, MI	156,813	154,636	-1.4%
Cass, MI	52,293	51,657	-1.2%
Total	**673,596**	**678,208**	**0.7%**

Income Characteristics

In 2010, the assessment area median family income was less ($55,071) than Indiana and Michigan at $58,944 and $60,341, respectively. Between 2014 and 2016, the median family income generally decreased in the Elkhart and South Bend MSAs and increased in the Niles MSA. Moody's Analytics noted exceptionally low household incomes as an economic weakness in the Elkhart MSA; however, Moody's also noted affordable cost of living and doing business as an economic strength in the Elkhart MSA and Niles MSA.

Poverty rates increased in each county in the assessment area from 1999 to 2015.[86] Elkhart County had the lowest poverty rates and Berrien County had the highest poverty rates in 1999 and 2015. In 2015, only Elkhart County and Cass County had poverty rates below those of Indiana and Michigan. Elkhart County experienced the largest increase in poverty rates during this period. In 2015, Indiana's and Michigan's poverty rates exceeded the national poverty rate. According to the U.S. Census Bureau, the national poverty rate in 2015 was 13.5%, down 1.3 percentage points from 14.8% in 2014. For most demographic groups, the 2015 poverty rates and number of people in poverty decreased from 2014.[87] The following table shows the poverty rates for 1999[88] and 2015.

County	1999 Poverty Rate	2015 Poverty Rate	Change
Elkhart	7.8%	14.0%	79.5%
St. Joseph	10.4%	16.7%	60.6%
Indiana	**9.5%**	**14.4%**	**51.6%**
Berrien	12.7%	17.1%	34.6%
Cass	9.9%	14.8%	49.5%
Michigan	**10.5%**	**15.7%**	**49.5%**
U.S.	**11.8%**	**13.5%**	**14.4%**

Housing Characteristics

According to 2010 U.S. Census data, there are 294,119 housing units and 171,632 families in the assessment area. From an income perspective, 26.9% of housing units, 19.0% of owner-occupied units, and 23.0% of families are located in low- or moderate-income tracts. Nearly three quarters of the housing units in the low-income census tracts are either rental or vacant (72.9%) and 27.1% are owner-occupied. In the moderate-income census tracts, over half of the housing units are either rental or vacant (52.1%) and 47.9% are owner-occupied.

[86] U.S. Department of Agriculture Economic Research Service Poverty Rates (for 1999 and 2015): https://data.ers.usda.gov/reports.aspx?ID=17826
[87] 2015 National Poverty: http://www.census.gov/library/publications/2016/demo/p60-256.html
[88] 1999 National Poverty Rate: http://www.census.gov/prod/2000pubs/p60-210.pdf

Therefore, based on the number of housing units compared to the number of families in low- and moderate-income census tracts, there appear to be credit-related opportunities for Fifth Third to provide various aspects of affordable housing in the assessment area.

The 2010 U.S. Census data shows the median age of housing stock in the assessment area was 44 years old, with 28.1% of the stock built before 1950. The oldest housing stock was in Berrien and St. Joseph counties with a median age of 48 and 47 years, respectively. The newest housing stock was 35 years in Elkhart County. However, within the assessment area, the median age of housing stock was 61 years in low-income tracts and 57 years in moderate-income tracts. Therefore, there appears to be ample opportunity for Fifth Third to provide home improvement and rehabilitation loans in these lower-income areas.

According to 2010 U.S. Census data, the median housing value in the assessment area was $125,451 with an affordability ratio of 35.75. The affordability ratio is derived by dividing the median household income by the median housing value. The higher the affordability ratio, the more affordable a home is considered. Median housing values decreased between 2010 and 2011-2015, along with median family incomes. As a result, housing generally became more affordable across the assessment area. During the evaluation period, the most affordable housing was in St. Joseph County and the least affordable was in Berrien County. Median gross rents increased across the assessment area, with renters in Berrien County experiencing the largest increase in rental rates and renters in Elkhart County experiencing the smallest increase in gross rental rates. The table below presents housing characteristics from the U.S. Census data between 2010 and 2015 in the assessment area, Indiana, and Michigan. According to Moody's Analytics, overall housing prices are sluggish in this assessment area and below-average job and income gains and rising interest rates may hold back prospective homebuyers in 2017. However, in the Elkhart metropolitan area, Moody's Analytics indicated that gross median rents (as a share of median household income) are below average, so potential homebuyers may be better able to save for a down payment for a home.

County	2010 Median Housing Value	2010 Affordability Ratio	2011-2015 Median Housing Value	2011-2015 Affordability Ratio	2010 Median Gross Rent	2011-2015 Median Gross Rent	Percent of Change
Elkhart	$128,000	36.92	$124,000	38.64	$695	$719	3.5%
St. Joseph	$116,300	38.39	$114,800	39.61	$683	$719	5.3%
Indiana	**$123,000**	**38.78**	**$124,200**	**39.66**	**$683**	**$747**	**9.4%**
Berrien	$135,600	31.43	$132,600	33.93	$592	$674	13.9%
Cass	$133,700	33.79	$122,800	37.92	$634	$698	10.1%
Michigan	**$144,200**	**33.59**	**$122,400**	**40.50**	**$723**	**$783**	**8.3%**

According to Bankrate.com,[89] Indiana ranked 15th and Michigan ranked 26th for foreclosure filings in November 2016. The national average for foreclosure filings was one in every 1,533 housing units. The following table contains information about foreclosure filings in the assessment area, according to Realtytrac:[90]

Geography Name	Ratio of Properties Receiving Foreclosure Filings in November 2016
Elkhart	1:4,073
St. Joseph	1:1,982
Indiana	**1:1,590**
Berrien	1:1,637
Cass	1:1,492
Michigan	**1:2,036**
U.S.	**1:1,533**

In November 2016, Cass County had the highest rate of foreclosure and Elkhart County had the lowest rate of foreclosure in the assessment area.

Building permits for these MSAs, Indiana, Michigan, and the nation are included in the following table for 2014, 2015, and 2016.[91]

Geography	2014	2015	Percent of Change 2014-2015	2016	Percent of Change 2015-2016
Elkhart-Goshen MSA	270	309	14.4%	287	-7.1%
Niles-Benton Harbor MSA	184	208	13.0%	15	-92.8%
South Bend-Mishawaka MSA	512	524	2.3%	293	-44.1%
Indiana	**17,813**	**18,483**	**3.8%**	**18,317**	**-0.9%**
Michigan	**15,836**	**18,226**	**15.1%**	**22,426**	**23.0%**
U.S.	**1,052,124**	**1,182,582**	**12.4%**	**1,190,191**	**0.6%**

The assessment area experienced increases in the number of housing permits issued between 2014 and 2015 and significant decreases between 2015 and 2016. The decrease in the number of permits could indicate there is a declining demand for home purchase loans within the assessment area during the evaluation period.

According to Moody's Analytics, the demand for new residential construction in the South Bend and Niles MSAs will remain sluggish throughout 2017; however, Moody's predicted an increase in new residential construction in the Elkhart area primarily based on eventual increases in housing values and below-average gross median rental rates that allow potential homebuyers to save for a down payment.

Labor, Employment, and Economic Characteristics

According to Moody's Analytics, the Niles and South Bend area economies are in recovery, primarily due to the expansion of the Whirlpool research center and stable job base at the University of Notre Dame, respectively. Meanwhile, Elkhart's economy is at risk, primarily due to an over-reliance on vehicle production and steep cutbacks in manufacturing; however, there are favorable prospects for the recreational vehicle industry and an increased demand in residential construction due to an above-average population growth.

According to *Crain's Detroit,*[92] the Niles-Benton Harbor MSA is home to one Fortune 500 company in 2016 (up 14 places from last year). Also, according to the *South Bend Tribune,*[93] two Elkhart-based recreational vehicle companies have been named to Fortune magazine's 2016 list of the country's 100 fastest-growing companies, Patrick Industries and Drew Industries. Both companies are suppliers of parts for the recreational vehicle and manufactured housing industries. Patrick ranked 41st and Drew ranked 79th on the list.

Niles-Benton Harbor Fortune 500 Companies (2016)		
Rank	**Company**	**Annual Revenue**
134	Whirlpool Corporation	$14.5 billion

According to Moody's Analytics the top 15 employers in the CSA in 2015/2016 were:

Company[94]	Number of Employees
Forest River Industries, Inc. (E-G)	10,245
Thor Industries Inc. (E-G)	9,000
University of Notre Dame (SB)	8,466
Drew Industries Inc. (E-G)	4,927
Lakeland Regional Health Systems (N-BH)	3,600
Beacon Health System (SB)	3,400
Whirlpool Corporation (N-BH)	3,362
St. Joseph's Regional Medical Center (SB)	3,000
Four Winds Casino (N-BH)	1,800
Indiana University Health Goshen (E-G)	1,634
Martin's Super Markets (SB)	1,555
Patrick Industries (E-G)	1,433
Indiana University (SB)	1,266
Indiana Michigan Power (N-BH)	1,200
1st Source Bank (SB)	1,160

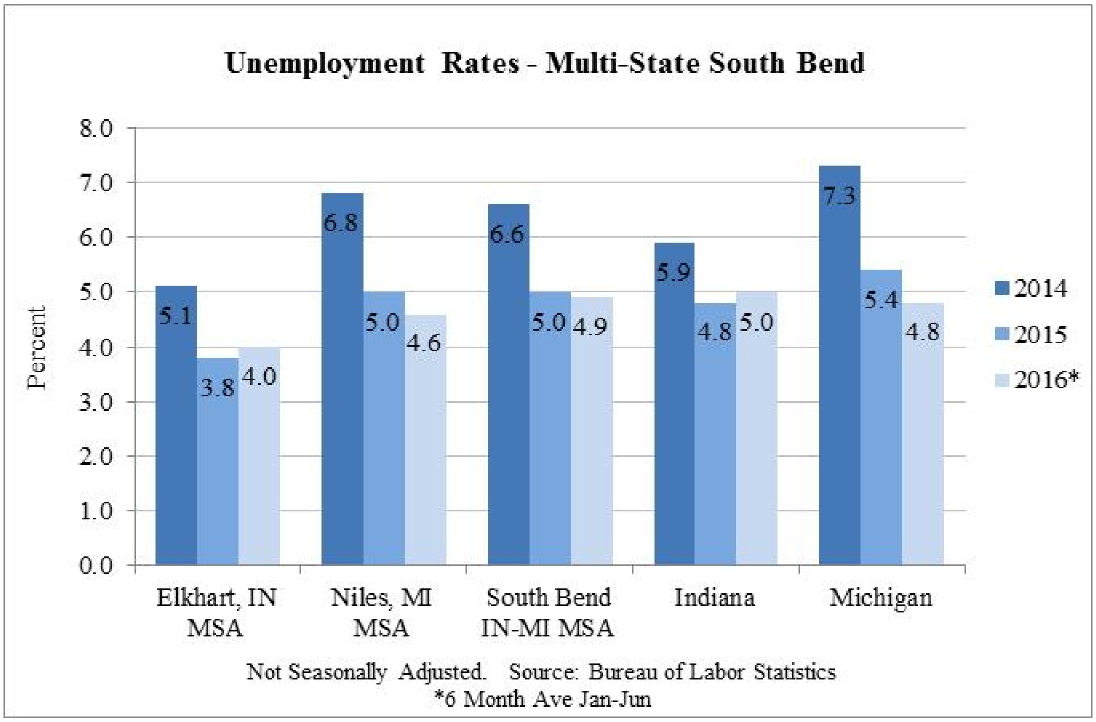
The following table illustrates the average unemployment rates for 2014, 2015, and 2016 for the three MSAs, Indiana, and Michigan.



The unemployment rates declined each year in the assessment area, except for a slight increase in 2016 in the Elkhart MSA. Assessment area unemployment rates were considerably below Michigan's during this time period. The Elkhart MSA had unemployment rates significantly below the other MSAs all three years.

According to the *South Bend Tribune*, CTS Corp. announced that it will phase out production at its Elkhart plant and turn the location into a research and development center. The transition will begin during the first quarter of 2017 and is expected to continue into the second quarter of 2018. The changes will affect about 230 workers, as production in Elkhart is moved to existing CTS locations in China, Mexico, and Taiwan. CTS designs and manufactures electronic components for the aerospace, defense, industrial, information technology, medical, and transportation markets.[95]

2016 FFIEC Census Data and 2015 D&B Information

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE SOUTH BEND-ELKHART-MISHAWAKA IN-MI CSA

Lending Test

Fifth Third's performance under the lending test in this assessment area is rated "High Satisfactory." Fifth Third has demonstrated good responsiveness to the credit needs of the community. In addition, Fifth Third originated 16 community development loans totaling $104.3 million. Fifth Third has a good geographic distribution of loans in the area with moderate lending gaps. Fifth Third has a good distribution among borrowers of different income levels and an adequate distribution of loans to businesses of different revenue sizes. Fifth Third exhibits a good record of serving the credit needs of highly economically disadvantaged areas in its assessment area, low-income individuals, and businesses with gross annual revenues of $1 million or less. A good level of community development loans and extensive use of flexible lending practices augmented Fifth Third's performance in this assessment area.

Greatest consideration was given to the evaluation of refinance lending based on the overall volume of lending, followed by small business, home purchase, and home improvement lending. Details of Fifth Third's residential mortgage and small business lending, as well as information regarding lending by peers, can be found in Appendix E.

Lending Activity

Fifth Third's lending activity reflects good responsiveness to the credit needs within the assessment area. Fifth Third originated 428 refinance, 287 home purchase, 62 home improvement, 416 small business, and 16 community development loans during the evaluation period. The percentage of Fifth Third's total lending at 0.8% equals the percentage of total deposits at 0.8% in this area.

In addition to lending, Fifth Third modified existing loans to borrowers. Refer to the distribution of HAMP and other real-estate secured modifications within the assessment area by census tract income and by borrower income.

	Distribution by Census Tract Income							
	Low		**Mod**		**Middle**		**Upper**	
	#	**%**	**#**	**%**	**#**	**%**	**#**	**%**
Other Real Estate Secured Modifications	1	1.8%	14	25.5%	28	50.9%	12	21.8%
Percentage of Owner Occupied Units		***1.9%***		***17.1%***		***47.9%***		***33.0%***

*Unknown tract data is not included in the above table.

	Distribution by Borrower Income							
	Low		Mod		Middle		Upper	
	#	%	#	%	#	%	#	%
Other Real Estate Secured Modifications	12	21.8%	21	38.2%	13	23.6%	8	14.5%
Percentage of Families by Family Income		***20.0%***		***18.6%***		***21.2%***		***40.2%***

There were not enough HAMP modifications for a meaningful analysis. The percentage of other modifications in low- and moderate-income tracts were comparable to or exceeded the percentage of owner-occupied units in these geographies; therefore, modifications helped to expand lending activities in these areas.

The percentage of other modifications made to low- and moderate-income borrowers exceeded the percentage of low- and moderate-income families in the assessment area; therefore, the modifications enhanced Fifth Third's ability to reach low- and moderate-income borrowers.

Geographic Distribution of Loans

Fifth Third's overall distribution of lending among geographies for refinance, home purchase, and small business lending is good. Home improvement lending is adequate. There is also an overall moderate level of lending gaps. The following gaps in lending were noted in the assessment area:

Tract Income Levels	Number of Tracts	Tracts with No Loans	Penetration
Low	14	8	42.9%
Moderate	41	13	68.3%
Middle	72	7	90.3%
Upper	43	4	90.7%
Unknown	1	1	0.0%
Total	**171**	**33**	**80.7%**

Overall, lending gaps are considered reasonable; however, there is a significant level of gaps in low- and moderate-income tracts. The relatively low owner-occupancy rates and high rental and vacancy rates in the low- and moderate-income tracts without lending are most likely contributing factors for not making loans in these areas.

Refinance Loans

Fifth Third made four refinance loans totaling $188,000 in low-income tracts. This represents 0.9% of refinance loans by volume, which is below the owner-occupied units in these tracts at 1.9%. The percentage of loans by dollar amount at 0.4% is also below proxy. The percentage of loans by volume exceeded the 2014 aggregate at 0.6% and exceeded the 2015 aggregate at 0.5%.

As Fifth Third's performance exceeded the aggregate of all lenders and the relatively low owner-occupancy rate of 27.1%, geographic distribution of refinance loans in low-income tracts is good.

Fifth Third made 60 refinance loans totaling $14.8 million in moderate-income tracts. This represents 14.0% of refinance loans by volume, which is below the owner-occupied units in these tracts at 17.1%. The percentage of loans by dollar amount at 9.4% is also below proxy. The percentage of loans by volume was comparable to the 2014 aggregate at 13.6% and was comparable to the 2015 aggregate at 11.5%. As Fifth Third's performance was slightly below proxy and comparable to the aggregate of all lenders, the geographic distribution of refinance loans in moderate-income tracts is good.

Fifth Third made 237 refinance loans totaling $28.9 million in middle-income tracts. This represents 55.4% of refinance loans by volume, which exceeds the owner-occupied units in these tracts at 47.9%. The percentage of refinance loans by dollar amount (56.6%) also exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate at 47.7% and exceeded the 2015 aggregate at 47.7%.

Fifth Third made 127 refinance loans totaling $17.1 million in upper-income tracts. This represents 29.7% of refinance loans by volume, which is comparable to the owner-occupied units in these tracts at 33.0%. Also, the percentage of refinance loans by dollar amount (33.6%) is comparable to proxy. The percentage of loans by volume was below the 2014 aggregate at 38.2% and was below the 2015 aggregate at 40.5%.

Overall, the geographic distribution of refinance loans is good.

Home Purchase Loans

Fifth Third made two home purchase loans totaling $244,000 in low-income tracts. This represents 0.7% of home purchase loans by volume, which is below the percentage of owner-occupied units in these tracts at 1.9%, and 0.6% by dollar amount, which is also less than the percentage of owner-occupied units in these geographies. The percentage of loans by volume exceeded the 2014 aggregate at 0.7% and was below the 2015 aggregate at 0.6%. As Fifth Third's performance exceeded the aggregate of all lenders, but was below proxy, the geographic distribution is good.

Fifth Third made 52 home purchase loans totaling $5.0 million in moderate-income tracts. This represents 18.1% of its home purchase loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 17.1%, and 12.1% by dollar amount, which was below the percentage of owner-occupied units in these geographies. The percentage of loans by volume exceeded the 2014 aggregate at 13.7% and exceeded the 2015 aggregate at 13.6%. As Fifth Third's performance significantly exceeded the aggregate of all lenders and exceeded proxy, the geographic distribution is excellent.

Fifth Third made 123 home purchase loans totaling $15.7 million in middle-income tracts. This represents 42.9% of home purchase loans by volume, which is below the percentage of owner-occupied units in these tracts at 47.9%, and 38.0% by dollar amount, which is also below proxy in these geographies. The percentage of loans by volume was below the 2014 aggregate of 46.1% and was below the 2015 aggregate of 46.2%.

Fifth Third made 110 home purchase loans totaling $20.3 million in upper-income tracts. This represents 38.3% of home purchase loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 33.0%, and 49.3% by dollar amount, which also exceeds proxy in these geographies. The percentage of loans by volume was comparable to the 2014 aggregate of 39.4% and was below the 2015 aggregate of 39.6%.

Overall, the geographic distribution of home purchase loans is good.

Home Improvement Loans

Fifth Third did not originate any home improvement loans in low-income tracts. The percentage of owner-occupied units in these tracts is 1.9%. The 2014 aggregate was 1.3% and the 2015 aggregate was aggregate was 1.4%. Because the aggregate was able to originate a percentage of home improvement loans comparable to proxy, the geographic distribution is considered poor.

Fifth Third made eight home improvement loans totaling $394,000 in moderate-income tracts. This represents 12.9% of home improvement loans by volume, which is below the percentage of owner-occupied units in these tracts at 17.1%, and 10.8% by dollar amount, which is also below proxy in these geographies. The percentage of loans by volume was below the 2014 aggregate of 13.2% and exceeded the 2015 aggregate of 15.9%. Given that Fifth Third's performance fell below proxy, but exceeded the aggregate of all lenders, the geographic distribution of home improvement loans in moderate-income tracts is good.

Fifth Third made 40 home improvement loans totaling $2.1 million in middle-income tracts. This represents 64.5% of home improvement loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 47.9%, and 56.4% by dollar amount, exceeding proxy in these geographies. The percentage of loans by volume exceeded the 2014 aggregate of 45.1% and exceeded the 2015 aggregate of 45.5%.

Fifth Third made 14 home improvement loans totaling $1.2 million in upper-income tracts. This represents 22.6% of home improvements loans by volume, which is less than the percentage of owner-occupied units in these tracts at 33.0%, and 32.9% by dollar amount, which is below proxy in these geographies. The percentage of loans by volume was substantially below the 2014 aggregate of 40.4% and was below the 2015 aggregate of 37.2%.

Overall, the geographic distribution of home improvement loans is adequate.

Small Business Loans

Fifth Third made 27 small business loans totaling $7.7 million in low-income tracts. This represents 6.5% of small business loans by volume, which is comparable to the percentage of businesses in these tracts at 5.2%, and 12.0% by dollar amount, which exceeds the percentage of businesses in these geographies. The percentage of loans by volume exceeded the 2014 aggregate of 5.2% and was comparable to 2015 aggregate of 5.1%. Given that Fifth Third's performance was comparable to proxy and exceeded the aggregate of all lenders, the geographic distribution of small business loans in low-income tracts is excellent.

Fifth Third made 64 small business loans totaling $10.9 million in moderate-income tracts. This represents 15.4% of small business loans by volume, which is slightly below the percentage of businesses in these tracts at 17.9%. This also represents 17.0% of small business loans by dollar amount, which is comparable to the percentage of businesses in these tracts. The percentage of loans by volume was below the 2014 aggregate of 16.7% and was comparable to the 2015 aggregate of 18.0%. Given that Fifth Third's performance was slightly below proxy and comparable to the aggregate of all lenders, the geographic distribution of small business loans in moderate-income tracts is good.

Fifth Third made 213 small business loans totaling $27.3 million in middle-income tracts. This represents 51.2% of small business loans by volume, which exceeds the percentage of businesses in these tracts at 44.8%, and 42.8% by dollar amount, which also exceeds the percentage of businesses in these tracts. The percentage of loans by volume exceeded the 2014 aggregate of 44.8% and the 2015 aggregate of 43.5%.

Fifth Third made 112 small business loans totaling $17.9 million in upper-income tracts. This represents 26.9% of small business loans by volume, which is less than the percentage of businesses in these tracts at 32.0%, and 28.1% by dollar amount, which is comparable to the percentage of businesses in these geographies. The percentage of loans by volume was below the 2014 aggregate of 32.1% and below the 2015 aggregate of 31.6%.

Overall, the geographic distribution of small business loans is good.

Distribution by Borrower Income and Revenue Size of the Business

Overall, the distribution of loans is good based on borrower income and adequate for businesses of different revenue sizes. Borrower distribution is excellent for home purchase loans and good for refinance and home improvement loans.

Refinance Loans

Fifth Third made 50 loans totaling $3.3 million to low-income borrowers. This represents 11.7% of refinance loans by volume, which is significantly below the percentage of low-income families at 20.0%. The percentage of loans by dollar amount in these geographies at 6.5% is also significantly below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 7.4% and exceeded the 2015 aggregate of 5.8%.

Given that Fifth Third's performance exceeded the aggregate of all lenders, the borrower distribution of refinance loans to low-income borrowers is good.

Fifth Third made 86 loans totaling $7.7 million to moderate-income borrowers. This represents 20.1% of refinance loans by volume, which exceeds the percentage of moderate-income families at 18.6% and 15.1% by dollar volume, below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 15.9% and in 2015 exceeded the 2015 aggregate of 15.1%. As Fifth Third's performance in refinance lending to moderate-income borrowers exceeded the aggregate and proxy, borrower distribution of refinance loans to moderate-income borrowers is excellent.

Fifth Third made 109 loans totaling $10.2 million to middle-income borrowers. This represents 25.5% of refinance loans by volume, which exceeds the percentage of middle-income families at 21.2%, and 19.9% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 20.7% and in 2015 was comparable to the 2015 aggregate of 20.5%.

Fifth Third made 171 loans totaling $28.8 million to upper-income borrowers. This represents 40.0% of refinance loans by volume, which is comparable to the percentage of upper-income families at 40.2%, while the percentage of loans by dollar amount at 56.4% exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 37.4% and in 2015 exceeded the 2015 aggregate of 39.8%.

Overall, the borrower distribution of refinance loans is good.

Home Purchase Loans

Fifth Third made 39 loans totaling $2.5 million to low-income borrowers. This represents 13.6% of home purchase loans by volume, which is below the percentage of low-income families at 20.0%, and 6.1% of loans by dollar amount, which is significantly below proxy. The percentage of loans by volume significantly exceeded the 2014 aggregate of 7.8% and significantly exceeded the 2015 aggregate of 7.4%. Because Fifth Third's performance significantly exceeded the aggregate of all lenders, the borrower distribution of home purchase loans to low-income borrowers is excellent.

Fifth Third made 62 loans totaling $5.5million to moderate-income borrowers. This represents 21.6% of home purchase loans by volume, which exceeds the percentage of moderate-income families at 18.6%, and 13.3% of loans by dollar amount, which is below proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 22.3% and the 2015 aggregate of 21.7%. Given that Fifth Third's performance exceeded proxy and was comparable to the aggregate of all lenders, the borrower distribution of home purchase loans to moderate-income borrowers is excellent.

Fifth Third made 61 loans totaling $7.7 million to middle-income borrowers. This represents 21.3% of home purchase loans by volume, which is comparable to the percentage of middle-income families at 21.2%, and 18.7% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate of 21.1% and was comparable the 2015 aggregate of 22.8%.

Fifth Third made 110 loans totaling $22.3 million to upper-income borrowers. This represents 38.3% of home purchase loans by volume, which is slightly below the percentage of upper-income families at 40.2%, and 54.3% of loans by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 32.9% and the 2015 aggregate of 33.6%.

With Fifth Third's excellent performance in home purchase lending to low- and moderate-income borrowers, its overall borrower distribution is considered excellent.

Home Improvement Loans

Fifth Third made four loans totaling $169,000 to low-income borrowers. This represents 6.5% of home improvement loans by volume, which is significantly below the percentage of low-income families at 20.0%, and 4.6% by dollar amount, which is also significantly below proxy. The percentage of loans by volume was below the 2014 aggregate of 8.7% and was below the 2015 aggregate of 10.8%. Given that Fifth Third's performance was significantly below the proxy and below the aggregate of all lenders, the borrower distribution of home improvement loans to low-income borrowers is adequate.

Fifth Third made 20 loans totaling $957,000 to moderate-income borrowers. This represents 32.3% of its home improvement loans by volume, which substantially exceeded the percentage of moderate-income families at 18.6%, and 26.2% by dollar amount, which also exceeded proxy. The percentage of loans by volume significantly exceeded the 2014 aggregate of 18.5% and exceeded the 2015 aggregate of 20.0%. Given that Fifth Third's performance exceeded the proxy and the aggregate of all lenders, the borrower distribution of home improvement loans to moderate-income borrowers is excellent.

Fifth Third made 13 loans totaling $682,000 to middle-income borrowers. This represents 21.0% of home improvement loans by volume, which is comparable to the percentage of middle-income families at 21.2%, and 18.7% by dollar amount, which is slightly below proxy. The percentage of loans by volume was slightly below the 2014 aggregate of 24.1% and exceeded the 2015 aggregate of 22.7%.

Fifth Third made 23 loans totaling $1.8 million to upper-income borrowers. This represents 37.1% of home improvement loans by volume, which was below the percentage of upper-income families at 40.2%, and 48.4% by dollar amount, which is above proxy. The percentage of loans by volume was below the 2014 aggregate of 40.8% and was below the 2015 aggregate of 40.4%.

The overall borrower distribution of home improvement loans is good.

Small Business Loans

The distribution of small business loans to businesses of different sizes is adequate, considering Fifth Third's performance relative to the aggregate of all lenders. Fifth Third was able to make 45.9% of small business loans to businesses with revenues of $1 million or less. Fifth Third's performance was comparable to the 2014 aggregate of 42.1% and exceeded the 2015 aggregate of 45.1%, but was significantly below the percentage of small businesses in the assessment area at 90.3%. Also, Fifth Third made an acceptable percentage of small-dollar loans (68.5%) up to $100,000, amounts typically requested by small businesses.

Community Development Loans

Fifth Third originated 16 community development loans totaling $104.3 million during the evaluation period as shown in the table below:

Economic Development		Revitalization and Stabilization		Community Services	
#	*$*	*#*	*$*	*#*	*$*
11	54,750,000	3	47,000,000	2	2,500,000

Community development lending in the assessment area represented 1.7% of the total dollar volume of community development loans originated by Fifth Third during the evaluation period. This ranks as Fifth Third's 17th highest percentage of community development lending during the evaluation period. Fifth Third has 9.1% of the deposit market share and has to compete for community development loans with a number of large national banks in the area. As such, Fifth Third is considered to have a relatively high level of community development lending in this assessment area.

Examples of community development lending include, but are not limited to:

- Multiple working capital loans that promote economic development by financing businesses to support job retention, add new jobs, and promote growth to continue operations in low- and moderate-income geographies.

- Working capital loans that support eligible activities in designated redevelopment areas.

- Renewal of a working capital line of credit that supports a college that serves low- and moderate-income students.

Flexible Lending Programs

Fifth Third had 249 flexible lending loans in this assessment area: 110 government loans, 15 down payment assistance loans, and 124 other flexible lending programs. The following tables show the percentage by volume and by dollar amount of the three types of flexible lending programs made in this assessment area during the evaluation period and the distribution of Fifth Third's flexible lending programs within the assessment area by census tract income and by borrower income.

Flexible Loan Programs												
	Geographic Distribution											
	Low			Moderate			Middle			Upper		
	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units

*Unknown tract data is not included in the above table.

Fifth Third's lending in low-income tracts, by number was comparable to the percentage of owner-occupied units, while the percentage of loans by dollar amount was below proxy. Overall, Fifth Third's lending in moderate-income tracts by number exceeded the percentage of owner-occupied units, while the percentage of loans by dollar amount was below proxy. In particular, the percentage of loans made through down payment assistance programs in low- and moderate-income tracts significantly exceeded proxy.

Fifth Third's lending to low-income borrowers by volume was comparable to the percentage of low-income families, while the percentage of lending by dollar amount was below proxy. In particular, the percentage of loans made through down payment assistance programs to low-income borrowers significantly exceeded proxy. Overall, the percentage of loans by volume and dollar amount to moderate-income borrowers significantly exceeded the percentage of moderate-income families.

Therefore, Fifth Third made extensive use of flexible lending practices in serving assessment area credit needs, since lending through flexible loan programs to moderate-income borrowers is excellent and lending to low-income borrowers and in moderate-income tracts is good. Lending in low-income tracts is adequate.

Investment Test

Fifth Third's performance relative to the investment test in the assessment area is rated "Outstanding."

Fifth Third made an excellent level of qualified community development investments and grants, particularly those not routinely provided by private investors. As such, Fifth Third was often in a leadership position. Fifth Third has 119 investments totaling $30.8 million during the evaluation period. Shown in the table below are the total current period investments:

Affordable Housing		Economic Development		Revitalization and Stabilization		Community Services	
#	*$*	*#*	*$*	*#*	*$*	*#*	*$*
60	17,424,877	22	77,390	1	7,500	23	64,405

Also included in the total number of qualified investments are 13 prior period investments totaling $13.3 million. Overall, Fifth Third made 1.9% of its total community development investments in this assessment area, which is greater than the percentage of total deposits at 0.8% and greater than the percentage of branch offices at 1.3%.

Fifth Third exhibits an excellent responsiveness to credit and community development needs in the assessment area, including investments in several affordable housing projects throughout the assessment area and programs to help low-income individuals obtain mortgages, which were needs expressed by a community contact. Included in total investments are 49 donations totaling $153,795 that supported chambers of commerce, small businesses, education, economic development, and affordable housing. The majority of Fifth Third's donations supported economic development and services to low- and moderate-income individuals.

Service Test

Fifth Third's performance under the service test in this assessment area is rated "High Satisfactory." Retail services are readily accessible and Fifth Third provides a relatively high level of community development services.

Retail Services

Fifth Third's record of opening and closing offices has not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and to low- and moderate-income households. No banking centers opened or closed since the previous evaluation period. Delivery services are readily accessible to Fifth Third's geographies and individuals of different income levels.

Business hours and services provided do not vary in a way that inconveniences certain portions of the assessment area, including low- and moderate-income geographies or households and are consistent with the services and hours discussed in the "Institution" assessment.

Fifth Third maintains 17 banking centers within this assessment area, including two in low-, six in moderate-, five in middle-, and four in upper-income census tracts. Fifth Third banking centers in this assessment area represent 1.3% of all its banking centers.

Fifth Third has a total of 18 full-service ATMs within this assessment area, including three in low-, six in moderate-, five in middle-, and four in upper-income census tracts.

The following table illustrates the percentage of banking centers and ATMs in low-, moderate-, middle-, and upper-income census tracts in comparison to the number and percentage of census tracts and the percentage of households and businesses in those tracts.

Geographic Distribution of Branches & ATMS

Assessment Area: Multi South Bend

Tract Category	Branches				Stand Alone ATMs							Demographics			
	Total Branches		Open	Closed	Total ATMs			Full Service ATMs		Cash only ATMs		Census Tracts		House holds	Total Businesses
	#	%	#	#		#	%	#	%	#	%	#	%	%	%
Low	2	11.8%	0	0	Total	3	13.0%	3	16.7%	0	0.0%	14	8.2%	3.7%	5.5%
Moderate	6	35.3%	0	0	Total	8	34.8%	6	33.3%	2	40.0%	41	24.0%	21.9%	18.2%
Middle	5	29.4%	0	0	Total	7	30.4%	5	27.8%	2	40.0%	72	42.1%	46.4%	44.7%
Upper	4	23.5%	0	0	Total	5	21.7%	4	22.2%	1	20.0%	43	25.1%	28.0%	31.6%
Unknown	0	0.0%	0	0	Total	0	0.0%	0	0.0%	0	0.0%	1	0.6%	0.0%	0.0%
Total	17	100.0%	0	0	Total	23	100.0%	18	100.0%	5	100.0%	171	100.0%	100.0%	100.0%

2016 FFIEC Census Data, 2010 ACS Data, and 2015 D&B Information
Closed branches/ATMs are only included in "closed" columns and are not included in any other totals.
DTO - Drive thru only is a subset of total branches
SA = Stand Alone ATM is a subset of total ATMs

Branch distribution within low-income tracts was considered excellent, because the distribution of branches substantially exceeded the percentage of census tracts and households in these tracts. The branch distribution within moderate-income tracts is also considered to be excellent.

Community Development Services

Fifth Third provides a relatively high level of community development services in this assessment area. During the evaluation period, Fifth Third employees provided 1,774 hours of community development service to local organizations serving low- and moderate-income individuals, which represents 1.5% of all community development services provided and equates to 0.85 annualized persons (ANP).

Affordable Housing	Economic Development	Community Services
# of Hours	***# of Hours***	***# of Hours***
129	858	787

Employees provided financial expertise through leadership positions in multiple community organizations that provide affordable housing and promote community and economic development. Community development services include 953 hours serving on boards and committees, 495 hours providing technical assistance to non-profits and local business, 318 hours of providing financial literacy through local nonprofits and school programs, and eight hours participating in foreclosure prevention outreach.

Fifth Third is considered particularly responsive with regard to hours dedicated to financial literacy and technical assistance to small businesses. The community contacts mentioned the need for financial literacy training and assistance to first-time homebuyers and the need to provide technical assistance and financial literacy training to small business owners.

STATE OF FLORIDA

CRA RATING for State of Florida: Outstanding
The lending test is rated: Outstanding
The investment test is rated: Outstanding
The service test is rated: High Satisfactory

The major factors supporting this rating include:

- An excellent responsiveness to credit needs;
- An excellent geographic distribution of loans throughout the assessment area;
- An excellent distribution of loans among borrowers of different income levels and good to businesses of different revenue sizes;
- Exhibits a good record of serving the credit needs of low-income individuals and areas and very small businesses;
- A leader in making community development loans;
- Use of flexible lending practices in serving the assessment area’s credit needs;
- An excellent level of qualified community development investments and grants;
- Often in a leadership position in providing community development investments and grants;
- Retail delivery systems are accessible to all geographies and individuals of different income levels and businesses of different revenue sizes;
- A record of opening and closing banking centers that has not adversely affected the accessibility of delivery systems;
- Banking services and hours that do not vary in a way that inconveniences any portions of the assessment areas; and,
- A leader in providing community development services.

SCOPE OF EXAMINATION

Full-scope reviews were conducted for two assessment areas in Florida: the Orlando-Deltona-Daytona Beach CSA and the Tampa-St. Petersburg-Clearwater MSA. Limited-scope reviews were performed on the remaining six assessment areas: the Cape Coral-Fort Myers MSA, Jacksonville MSA, Lakeland MSA, Miami-Fort Lauderdale-West Palm Beach MSA, Naples-Immokalee-Marco Island MSA, and the North Port-Sarasota CSA. The time period, products, and affiliates evaluated for this assessment area are consistent with the scope discussed in the “Institution” section of this report.

The Orlando-Deltona-Daytona Beach and the Tampa-St. Petersburg assessment areas received greater weight in determining the CRA rating for the state. These areas had the largest lending volumes and number of banking centers and ranked third and first, respectively, in this state's share of deposits during the evaluation period. Lastly, these areas represented 52.5% of the banking centers, 44.6% of deposits, and 50.8% of lending in Florida.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE STATE OF FLORIDA

Lending activity accounted for 8.8% of the Fifth Third's total lending activity, while deposits accounted for 9.8% of the Fifth Third's total deposits. HMDA-reportable lending in Florida represented 7.8% of the Fifth Third's total HMDA lending, while CRA-reportable lending represented 11.5% of the Fifth Third's total CRA lending. As of June 30, 2016, Fifth Third ranked 12th among 241 insured institutions and has a deposit market share of 1.9% and 158 banking center locations within Florida.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE STATE OF FLORIDA

Lending Test

Fifth Third's performance under the lending test within the assessment areas located in Florida is rated "Outstanding." Fifth Third's lending reflects an excellent responsiveness to the credit needs in the following two of its eight assessment areas: Orlando-Deltona-Daytona Beach and Tampa-St. Petersburg-Clearwater. Lending reflects a good responsiveness to credit needs in the Cape Coral-Fort Myers and the North Port-Sarasota assessment areas and an adequate responsiveness in the remaining four assessment areas: Jacksonville, Lakeland, Miami-Fort Lauderdale-West Palm Beach, and Naples-Immokalee-Marco Island.

Lending Activity

In Florida, Fifth Third originated 8,185 HMDA loans totaling $1.8 billion and 4,503 small business loans totaling $459.8 million during the evaluation period.

Lending activity in Florida is excellent. The Orlando-Deltona-Daytona Beach and Tampa-St. Petersburg-Clearwater assessment areas have excellent lending activity. Lending activity is good in the Cape Coral-Fort Myers and the North Port-Sarasota assessment areas and adequate in the remaining four assessment areas.

Geographic and Borrower Distribution

The distribution of loans among geographies is excellent in the assessment areas located in Florida. The geographic distribution is excellent in the Orlando-Deltona-Dayton Beach and the Tampa-St. Petersburg-Clearwater assessment areas. In the Cape Coral-Fort Myers and the Naples-Immokalee-Marco Island assessment areas, the geographic distribution is good and adequate in the remaining four assessment areas.

A low level of lending gaps was identified in five of eight assessment areas. There was a moderate level of lending gaps in the Jacksonville and Lakeland assessment areas and a high level of lending gaps in the Miami-Fort Lauderdale-West Palm Beach assessment area.

The distribution of loans among borrowers of different income levels is excellent and good to businesses of different revenue sizes in the assessment areas located in Florida. The borrower distribution is excellent in the Orlando-Deltona-Dayton Beach and the Tampa-St. Petersburg-Clearwater assessment areas and adequate in the Miami-Fort Lauderdale-West Palm Beach assessment area. Borrower distribution is good in the remaining five assessment areas. The distribution to businesses of different revenue sizes is adequate in the Jacksonville and Miami-Fort Lauderdale-West Palm Beach assessment areas and good in the remaining six assessment areas.

A detailed analysis for the geographic distribution and borrower-income distribution is provided with the analysis for each assessment area.

Community Development Loans

In Florida, Fifth Third originated 96 community development loans totaling $516.1 million, which represented 8.6% of the Fifth Third's community development lending by dollar volume. This is an outstanding level of community development lending in Florida. Fifth Third was a leader in providing community development loans in the Orlando-Deltona-Daytona Beach, Tampa-St. Petersburg-Clearwater, and Miami-Fort Lauderdale-West Palm Beach assessment areas. Fifth Third made a relatively high level of community development loans in the North Port-Sarasota assessment areas and an adequate level of community development loans in the remaining four assessment areas.

Flexible Lending

Overall, Fifth Third consistently makes use of flexible lending practices within assessment areas located in Florida.

Investment Test

Fifth Third's performance under the investment test within the assessment areas located in Florida is rated "Outstanding." Fifth Third funded $120.0 million in qualified community development investments in Florida during the current evaluation period and $76.5 million from prior periods. Fifth Third's level of qualified investments is excellent in the Orlando-Deltona-Dayton Beach, Tampa-St. Petersburg-Clearwater, Jacksonville, Lakeland, and Miami-Fort Lauderdale-West Palm Beach assessment areas. Fifth Third has a good level of qualified community development investments in the North Port-Sarasota assessment area and adequate levels in the remaining two assessment areas.

Fifth Third was considered responsive to the credit and community development needs in the state; therefore, investments without a purpose, mandate, or function of serving Fifth Third's assessment areas in Florida was considered to positively impact state performance. Fifth Third made $9.1 million in qualified investments, typically in the form of LIHTCs that benefited counties within the state but outside Fifth Third's delineated assessment areas within Florida.

Additional information regarding performance under the investment test is provided in the respective analyses for each assessment area.

Service Test

Fifth Third's performance under the service test within the assessment areas located in Florida is rated "High Satisfactory." The Fifth Third's performance is excellent in the Tampa-St. Petersburg-Clearwater assessment area, adequate in Naples-Immokalee-Marco Island assessment area, and good in the remaining six assessment areas.

For details regarding the institution's performance in the individual assessment areas, refer to the respective assessment area's "Service Test" section in this report.

Retail Services

Retail delivery systems are accessible to all geographies, including low- and moderate-income geographies, individuals of different income levels, and businesses of different revenue sizes in the institution's assessment areas. Retail service distribution is good in six assessment areas and adequate in the Orlando-Deltona-Daytona Beach and Naples-Immokalee-Marco Island assessment areas.

Fifth Third has 158 banking centers in Florida, which represents 12.2% of Fifth Third's total branches. Its record of opening and closing banking centers has not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and to low- and moderate-income individuals. One branch opened in a moderate-income tract during the evaluation period in the Jacksonville assessment area, whereas three branches closed in moderate-income tracts during the evaluation period: one in the Jacksonville assessment area and two in the Orlando-Deltona-Daytona Beach assessment area.

Banking services and business hours do not vary in a way that inconveniences any portions of the Fifth Third's assessment areas and are consistent with the services and hours discussed in the "Institution" assessment.

Community Development Services

Fifth Third is a leader in providing community development services in Florida. Fifth Third's performance is excellent in the Tampa-St. Petersburg-Clearwater, Jacksonville, Lakeland, and Miami-Fort Lauderdale-West Palm Beach assessment areas. The level of community development services is good in the remaining four assessment areas.

METROPOLITAN AREA
(Full-scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE ORLANDO-DELTONA-DAYTONA BEACH FL CSA # 422

The Orlando-Deltona-Daytona Beach FL CSA consists of the following two MSAs: the Deltona-Daytona Beach-Ormond Beach MSA #19660, consisting of Volusia County, but excluding Flagler County, and the Orlando-Kissimmee-Sanford MSA #36740, consisting of Lake, Orange, Osceola, and Seminole counties.

The assessment area is comprised of 13 low-, 128 moderate-, 213 middle-, and 147 upper-income tracts. There are also three tracts with no income designation that are primarily composed of correctional institutions, military establishments, education facilities, or medical establishments that do not report income information

As of June 30, 2016, Fifth Third ranked seventh out of 51 institutions with 3.6% of the deposit market share. SunTrust Bank had the majority of the market share 22.3% of deposits, followed by Bank of America, Wells Fargo Bank, JPMorgan Chase, Regions Bank, and BB&T with 20.8%, 16.0%, 6.7%, 3.7%, and 3.6% of the market share, respectively. Deposits in this assessment area accounted for 1.9% of the Fifth Third's total deposits. This was the third-highest percentage of deposits within the state and 14th highest within Fifth Third's CRA footprint.

From January 1, 2014 through June 30, 2016, Fifth Third originated 1,936 HMDA loans and 1,036 CRA loans, which represented 1.9% and 2.6% of the total loans originated during the evaluation period, respectively. This was the 14th largest HMDA market and 11th largest CRA market for loans originated during the evaluation period.

In 2015, Fifth Third Mortgage Company ranked 24th among 838 HMDA reporters in the assessment area and Fifth Third ranked 123rd. Wells Fargo Bank, Quicken Loans, FBC Mortgage, and Freedom Mortgage, and JPMorgan Chase were the top five HMDA lenders in the assessment area. Fifth Third ranked 16th of 145 CRA reporters in the assessment area in 2015. The top four CRA lenders in the assessment area were American Express, Bank of America, Capital One, and SunTrust Bank. These lenders are mostly issuers of credit cards and their CRA loans primarily consist of commercial credit card accounts.

Five community contact interviews were conducted to provide additional information regarding the assessment area. The first contact, representing the business community in the Deltona-Daytona Beach area stated the local economy is improving and new residential construction is increasing. While the area's unemployment is low, most jobs are low-paying, service-sector jobs. The contact stated there is a need for less rigid credit standards so that small businesses can obtain loans more easily.

The contact believed banks are trying to meet the credit needs of the business community despite increasing regulatory burdens. Because banks are required to obtain voluminous amounts of information, customers can find the application process to be overwhelming and time-consuming. The contact specifically mentioned Gateway Bank of Florida, SeaCoast Bank, SunTrust Bank, and TD Bank as being active within the community.

The second contact, representing an affordable housing organization serving the Deltona area, stated the emphasis on credit scores typically places lower-income individuals at a disadvantage. Fewer individuals are qualifying for mortgage loans and it is taking banks longer to qualify consumers. Overall, the contact believed bankers are not out in the community as much as before, which does not make banks seem less intimidating to the unbanked. The contact indicated there is a need for banks to offer fee-free products and services to lower-income individuals and attract the unbanked. The contact specifically mentioned Fifth Third, HomeBridge Mortgage, and PNC Bank as being responsive to meeting the credit needs in the community.

The third contact, representing a business development organization that serves Volusia County, stated that while there is a higher concentration of hospitality jobs, which are typically low-paying, there has been a rise in new residential construction. The contact stated a major issue facing the community is having enough facilities to house the increasing homeless population. In regards to banking needs, area banks need to find ways to extend credit to small startup businesses. Typically, banks do not want to lend to startup businesses because they are considered to be too risky. Larger financial institutions seem to have more stringent credit requirements that have forced small business owners/entrepreneurs to seek online business loan alternatives. The contact believed that regulatory burdens affect a bank’s ability to lend. The contact specifically mentioned SunTrust Bank, Bank of America, Intracoastal Bank, MainStreet Community Bank of Florida, and a few local credit unions as being particularly responsive to the credit needs in the area.

The fourth contact, representing a community development organization that serves Lake County, stated that the county is experiencing growth and consequently, there is demand for skilled labor construction. While this organization does not work directly with financial institutions, the contact stated there are several community development construction projects underway that financial institutions could support.

The fifth contact, representing an affordable housing organization in the Orlando area, stated housing prices are recovering, but are not back to pre-financial crisis levels. The contact stated there is a substantial shortage of affordable housing (i.e., rentals) for extremely low-income tenants in the Orlando-area. Increasing rental rates are making housing generally less affordable in the area. Affordable housing developers are seeing higher land prices from increased competition with luxury developers who want to convert low-cost rentals into higher-cost, luxury rentals. The contact also noted an increase in the number of unqualified homebuyers mostly due to banks’ rigid underwriting standards. The contact indicated about 10.0% of the population is unbanked and typically relies on alternative lenders to meet their credit needs.

The contact believed banks could be more responsive to the needs of low-income consumers and small business owners by offering small-dollar, minimal-fee loans in order to compete with payday lenders. The contact specifically mentioned Bank of America, Wells Fargo Bank, Seaside National Bank & Trust, and First Green Bank as being responsive to credit needs in the community.

Population Characteristics

According to 2010 U.S. Census data, the population in the assessment area was 673,596. About 25.0% of the population lived in low- and moderate-income tracts. In addition, 74.6% of the population was 18 years of age or older, the legal age to enter into a contract.

As of July 1, 2015, the Orlando-Kissimmee-Sanford MSA is the 24th largest in terms of population in the nation, while the Deltona-Daytona Beach-Ormond Beach MSA is the 90th largest.[96] Orange County is the largest county in the assessment area and the fifth most populous county in Florida.[97] Orlando (located in Orange County) is the largest city in assessment area and is the 73rd most populous city in the U.S. Orlando has 270,934 residents, its population growth increased by 39.1% between 2000 and 2015. In contrast, the next largest cities in the assessment area are Deltona, Daytona Beach, Sanford, Kissimmee, and Ormond Beach, which have 88,474; 64,736; 58,111; 69,152; and 40,970 residents, respectively.[98]

The following table shows the population in the assessment area by county for 2010 and 2015 with the percentage of the population increase.[99] The assessment area's population experienced positive growth between 2010 and 2015, with Osceola County experiencing the greatest growth and Volusia County experiencing the least growth in population during this time period. According to Moody's Analytics, the Orlando MSA is the only metropolitan area in Florida where the proportion of residents age 65 and over is less than the national average. As a result, the Orlando area can build on its large population of young adults and create job opportunities for skilled and unskilled labor. Overall, this assessment area has a robust domestic and foreign in-migration which contributes to an increasing demand for employment and housing.

County	2010 Population	2015 Population	Population Percent Change
Lake	297,052	325,875	9.7%
Orange	1,145,956	1,288,126	12.4%
Osceola	268,685	323,993	20.6%
Seminole	422,718	449,144	6.3%
Volusia	494,593	517,887	4.7%
Total	**2,629,004**	**2,905,025**	**10.5%**

[97] U.S. Places: http://us-places.com (main page – enter state, choose population by county)
[98] U.S. Census QuickFacts: https://www.census.gov/quickfacts/ (main page – enter state, county, city, town, or zip code)
[99] Population Estimates derived from U.S. Census Data (April 1, 2010 – July 1, 2015): http://www.census.gov/quickfacts/table/PST045216/00

Income Characteristics

In 2010, the assessment area's median family income was slightly greater ($57,708) than Florida at $57,204. Between 2014 and 2016, the median family income decreased in the Deltona MSA, with a slight increase in 2016. However, in the Orlando MSA, the median family income increased in 2015, but slightly decreased in 2016. Moody's Analytics noted low per capita income as an economic weakness in the Deltona MSA. In the Orlando MSA, Moody's noted about one-third of the jobs created in 2016 have been in the leisure-hospitality industry, which is nearly double the statewide and national levels. While many of these jobs are low paying, Moody's noted that average hourly earnings have risen at an above-average rate over the last year.

		0	-	49.99%	50%	-	79.99%	80%	-	119.99%	120%	-	& above
2014	**$54,800**	0	-	$27,399	$27,400	-	$43,839	$43,840	-	$65,759	$65,760	-	& above
2015	**$58,300**	0	-	$29,149	$29,150	-	$46,639	$46,640	-	$69,959	$69,960	-	& above
2016	**$57,800**	0	-	$28,899	$28,900	-	$46,239	$46,240	-	$69,359	$69,360	-	& above

Poverty rates increased in each county in the assessment area from 1999 to 2015.[100] Seminole County had the lowest poverty rates in 1999 and 2015. Orange County had the highest poverty rate in 1999, but Osceola County had the highest poverty rate in 2015. In 2015, Seminole, Lake, and Orange counties all had poverty rates below Florida's. Osceola County experienced the largest increase in poverty rates during this period. Florida's poverty rates exceeded the national poverty rates in 1999 and 2015. According to the U.S. Census Bureau, the national poverty rate in 2015 was 13.5%, down 1.3 percentage points from 14.8% in 2014. For most demographic groups, the 2015 poverty rates and number of people in poverty decreased from 2014.[101]

[100] U.S. Department of Agriculture Economic Research Service Poverty Rates (for 1999 and 2015): https://data.ers.usda.gov/reports.aspx?ID=17826
[101] 2015 National Poverty: http://www.census.gov/library/publications/2016/demo/p60-256.html

A community contact specifically mentioned an insufficient amount of housing options to support the increasing homeless population in the Deltona area. The following table shows the poverty rates for 1999[102] and 2015.

County	1999 Poverty Rate	2015 Poverty Rate	Change
Lake	9.6%	12.8%	33.3%
Orange	12.1%	15.6%	28.9%
Osceola	11.5%	18.5%	60.9%
Seminole	7.4%	11.5%	55.4%
Volusia	11.6%	16.3%	40.5%
Florida	**12.5%**	**15.8%**	**26.4%**
U.S.	**11.8%**	**13.5%**	**14.4%**

Housing Characteristics

According to 2010 U.S. Census data, there are 1.2 million housing units and 647,964 families in the assessment area. From an income perspective, 27.3% of housing units, 19.5% of owner-occupied units, and 24.9% of families are located in low- or moderate-income tracts. Three-quarters of the housing units in the low-income census tracts are either rental or vacant (75.1%) and 24.9% are owner-occupied. In the moderate-income census tracts, over half of the housing units are either rental or vacant (58.9%) and 41.1% are owner-occupied. Therefore, based on the number of housing units compared to the number of families in low- and moderate-income census tracts, there appear to be credit-related opportunities for Fifth Third to provide various aspects of affordable housing in the assessment area.

The 2010 U.S. Census data shows the median age of housing stock in the assessment area was only 24 years old and only 3.6% of the stock was built before 1950. However, within the assessment area, the median age of housing stock was 38 years in low-income tracts and 27 years in moderate-income tracts. Therefore, there appears to be limited opportunity for Fifth Third to provide home improvement and rehabilitation loans in these lower-income areas.

According to 2010 U.S. Census data, the median housing value in the assessment area was $134,073, with an affordability ratio of 23.25. The affordability ratio is derived by dividing the median household income by the median housing value. The higher the affordability ratio, the more affordable a home is considered. Median housing values decreased between 2010 and 2011-2015, along with median family incomes; as a result, housing generally became more affordable across the assessment area. During the evaluation period, the most affordable housing was in Osceola County and the least affordable was in Orange County. Median gross rents increased across the assessment area, with renters in Volusia County experiencing the largest increase in rental rates and renters in Osceola County experiencing the smallest increase in gross rental rates. In 2010, renters with rent costs greater than 30.0% of income was greatest in Osceola and Orange counties at 60.2% and 56.7%, respectively.

[102] 1999 National Poverty Rate: http://www.census.gov/prod/2000pubs/p60-210.pdf

According to a community contact, there is a substantial shortage of affordable rental housing for extremely low-income tenants in the Orlando-area due to increased competition from luxury developers who want to convert low-cost rentals into luxury rentals. With above-average rental rates in this assessment area, potential homebuyers may not be able to save enough for a down payment for a home. The table below presents housing characteristics from the U.S. Census data between 2010 and 2015 in the assessment area and Florida.

County	2010 Median Housing Value	2010 Affordability Ratio	2011-2015 Median Housing Value	2011-2015 Affordability Ratio	2010 Median Gross Rent	2011-2015 Median Gross Rent	Percent of Change
Lake	$178,400	26.05	$140,100	33.12	$904	$936	3.5%
Orange	$228,600	21.93	$163,800	29.27	$995	$1,033	3.8%
Osceola	$199,200	23.26	$132,100	33.50	$1,036	$1,049	1.3%
Seminole	$241,000	24.47	$176,100	32.37	$1,024	$1,077	5.2%
Volusia	$186,300	23.83	$131,600	31.24	$879	$918	4.4%
Florida	**$205,600**	**23.18**	**$159,000**	**29.88**	**$957**	**$1,002**	**4.7%**

According to Bankrate.com,[103] Florida ranked sixth for foreclosure filings in November 2016. The national average for foreclosure filings was one in every 1,533 housing units. The following table contains information about foreclosure filings in the assessment area, according to Realtytrac:[104]

Geography Name	Ratio of Properties Receiving Foreclosure Filings in November 2016
Lake	1:1,190
Orange	1:1,042
Osceola	1:789
Seminole	1:1,201
Volusia	1:1,090
Florida	**1:986**
U.S.	**1:1,533**

In November 2016, Osceola County had the highest rate of foreclosure and Seminole County had the lowest foreclosure rate in the assessment area.

Building permits for this CSA, Florida, and the nation are included in the following table for 2014, 2015, and 2016.[105]

[103] Bankrate.com: http://www.bankrate.com/finance/real-estate/foreclosures-by-state/default.aspx
[104] Realtytrac: http://www.realtytrac.com/statsandtrends/foreclosuretrends/
[105] U.S. Census Bureau Building Permits Survey: http://www.census.gov/construction/bps/

Geography	2014	2015	Percent of Change 2014-2015	2016	Percent of Change 2015-2016
Deltona-Daytona Beach-Ormond Beach MSA	1,921	2,047	6.6%	2,021	-1.3%
Orlando-Kissimmee-Sanford MSA	16,115	20,474	27.0%	23,251	13.6%
Florida	**84,084**	**109,924**	**30.7%**	**113,912**	**3.6%**
U.S.	**1,052,124**	**1,182,582**	**12.4%**	**1,190,191**	**0.6%**

The assessment area experienced an increase in the number of housing permits issued between 2014 and 2015 and to a lesser extent between 2015 and 2016. There was a small decrease between 2015 and 2016 in the Deltona area. The increase in the number of permits could indicate there is a stable demand for home purchase loans in the Deltona area and an increasing demand for home purchase loans in the Orlando area. According to Moody's Analytics, the housing revival occured sooner and is more powerful than expected in the Orlando MSA and residential construction and house prices are slower to rebound in the Deltona MSA.

Labor, Employment, and Economic Characteristics

According to Moody's Analytics, the Deltona and Orlando area economies are in recovery, primarily due to strong tourism and ample job opportunities in services, strong demographics due to in-migration, a large retiree population that supports a huge healthcare industry, and major colleges in the area. While the labor market is able to absorb an influx of entrants, poor job quality (i.e., low-paying service industry jobs and high employment volatility) remains an economic weakness, along with a stubbornly high foreclosure rate.

According to *Orlando Sentinel*,[106] Orlando is home to one Fortune 500 company in 2016 (fell 46 places from last year after selling Red Lobster). Nationwide, Darden Restaurants has about 150,000 employees at 1,500 restaurants and is the parent company of Olive Garden, LongHorn Steakhouse, Eddie V's, Bahama Breeze, Seasons 52, Yard House, and Capital Grille.

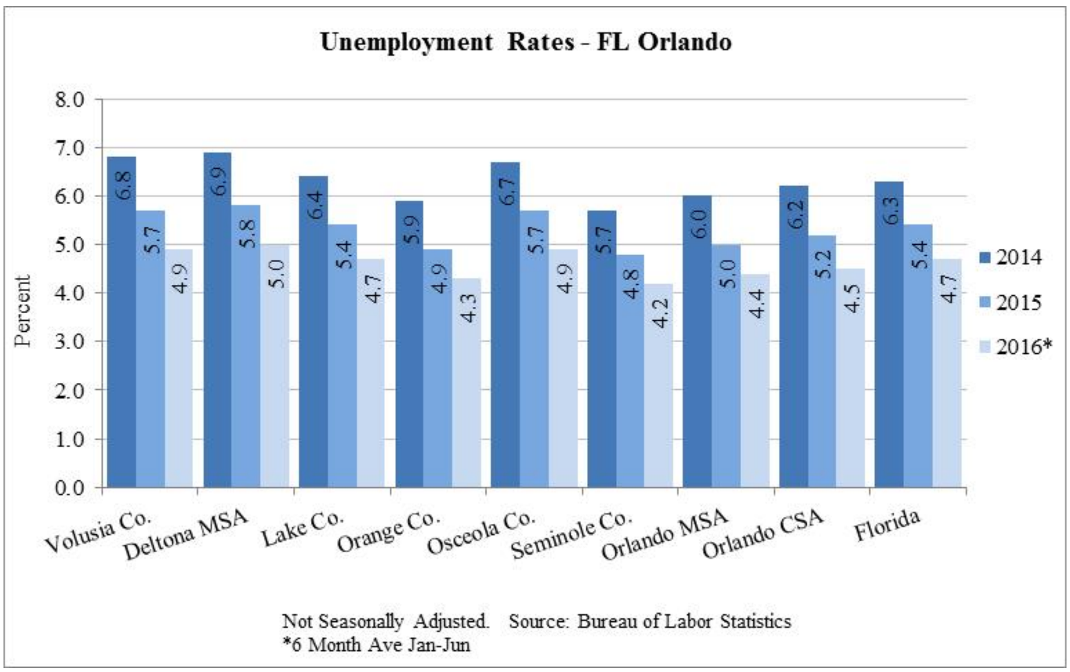
Orlando Fortune 500 Companies (2016)		
Rank	**Company**	**Annual Revenue**
371	Darden Restaurants	$710 million

According to Moody's Analytics the top 15 employers in the assessment area in 2015/2016 were:

[106] Orlando Sentinel: http://www.orlandosentinel.com/business/consumer/os-fortune-500-publix-darden-20160606-story.html

Company	Number of Employees
Walt Disney World Resort	74,000
Universal Orlando (Comcast)	20,000
Adventist Health System/Florida Hospital	19,304
Orlando Health	14,000
Lockheed Martin	7,000
Westgate Resorts	6,500
SeaWorld Parks & Entertainment	6,032
Darden Restaurants	5,221
Halifax Medical Center	4,709
Publix Super Markets Inc.	3,425
Florida Hospital Ormond Memorial	3,256
Wal-Mart Stores Inc.	3,194
National Association for Stock Car Racing	1,700
Vison HR Inc.	1,667
Daytona Beach Community College	1,568

The following table illustrates the average unemployment rates for 2014, 2015, and 2016 across the CSA and Florida.



Overall, the unemployment rates declined each year in the assessment area and Florida. Unemployment rates were fairly consistent across the assessment area during this time period.

According to the *Orlando Weekly*, SeaWorld announced 311 jobs will be eliminated in the second major layoff in two years. While some employees will be let go in San Diego and Tampa, the majority of layoffs will occur in Orlando due to the number of higher-paid corporate positions located in Orlando. These layoffs are part of a companywide $65 million cost-cutting initiative.[107]

[107] Pedicini, Sandra. “SeaWorld Entertainment eliminates hundreds of jobs.” *Orlando Sentinel.* December 6, 2016. - http://www.orlandosentinel.com/business/tourism/os-seaworld-layoffs-20161206-story.html

According to *WMFE 90.7*, 67 insurance and refund specialists will be laid off in 2017 from Florida Hospital Medical Group (the largest multi-specialty doctor's group in Central Florida), with more than 500 doctors and 2,000 employees due to outsourcing of the central billing function and new electronic medical records software.[108]

[108] Aboraya, Abe. "Florida Hospital Medical Group Will Lay Off Workers Next Year." *WMFE 90.7*. December 27, 2016. - http://www.wmfe.org/florida-hospital-medical-group-will-lay-off-workers-next-year/67837

2016 FFIEC Census Data and 2015 D&B Information

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE ORLANDO-DELTONA-DAYTONA BEACH FL CSA

Lending Test

Fifth Third's performance under the lending test in this assessment area is rated excellent. Fifth Third has demonstrated an excellent responsiveness to the credit needs of the community. In addition, Fifth Third originated 14 community development loans totaling $76.4 million. Fifth Third has an excellent geographic distribution of loans and minimal lending gaps. Fifth Third has an excellent distribution among borrowers of different income levels and a good distribution of loans to businesses of different revenue sizes. Fifth Third exhibits a good record of serving the credit needs of highly economically disadvantaged areas in its assessment area, low-income individuals, and businesses with gross annual revenues of $1 million or less. An excellent level of community development loans and use of flexible lending practices augmented Fifth Third's performance in this assessment area.

Greatest consideration was given to the evaluation of home purchase lending based on the overall volume of lending, followed by small business, refinance, and home improvement lending. Details of Fifth Third's residential mortgage and small business lending, as well as information regarding lending by peers, can be found in Appendix E.

Lending Activity

Fifth Third's lending activity reflects an excellent responsiveness to the credit needs within the assessment area. Fifth Third originated 1,190 home purchase, 662 refinance, 84 home improvement, 1,036 small business, and 14 community development loans during the evaluation period. The percentage of Fifth Third's total lending at 2.1% is greater than the percentage of total deposits at 1.9% in this area.

Fifth Third made 97.8% of HMDA and 99.8% of CRA lending within its designated assessment area. No concentrations of lending were identified in Flagler County, the only excluded county in this assessment area.

In addition to lending, Fifth Third modified existing loans to borrowers. The distribution of HAMP and other real-estate secured modifications within the assessment area by census tract income and by borrower income are presented below.

	Distribution by Census Tract Income							
	Low		Mod		Middle		Upper	
	#	%	#	%	#	%	#	%
Other Real Estate Secured Modifications	0	0.0%	20	19.8%	50	49.5%	31	30.7%
Percentage of Owner Occupied Units		***0.7%***		***18.8%***		***46.3%***		***34.2%***

*Unknown tract data is not included in the above table.

	Distribution by Borrower Income							
	Low		Mod		Middle		Upper	
	#	%	#	%	#	%	#	%
Other Real Estate Secured Modifications	11	10.9%	29	28.7%	21	20.8%	39	38.6%
Percentage of Families by Family Income		***20.1%***		***18.5%***		***21.0%***		***40.5%***

*Unknown tract data is not included in the above table.

There were not enough HAMP modifications for a meaningful analysis. The percentage of other real-estate secured modifications in moderate-income tracts exceeded the percentage of owner occupied units in these geographies. Therefore, modifications helped to expand lending activities in these areas.

The percentage of other modifications made to low-income borrowers was significantly less than the percentage of low-income families in the assessment area; however, the percentage of other modifications to moderate-income borrowers was substantially higher than the percentage of moderate-income families. Therefore, modifications enhanced Fifth Third's ability to reach low- and moderate-income borrowers.

Geographic Distribution of Loans

Fifth Third's overall distribution of lending among geographies is excellent. Home purchase, refinance, home improvement, and small business lending are all excellent. There is also an overall low level of lending gaps. The following gaps in lending were noted in the assessment area:

Tract Income Levels	Number of Tracts	Tracts with No Loans	Penetration
Low	13	3	76.9%
Moderate	128	12	90.6%
Middle	213	14	93.4%
Upper	147	6	95.9%
Unknown	3	3	0.0%
Total	**504**	**38**	**92.5%**

Lending gaps are considered minimal, due to the low number of lending gaps in moderate-, middle-, and upper-income tracts. The lower penetration rate in low-income tracts can be attributed to the limited number of owner-occupied units and small businesses located in these census tracts.

Home Purchase Loans

Fifth Third made 12 home purchase loans totaling $1.7 million in low-income tracts. This represents 1.0% of home purchase loans by volume, which exceeded the percentage of owner-occupied units in these tracts at 0.7% and 0.8% by dollar amount, which exceeded proxy. The percentage of loans by volume was comparable to the 2014 aggregate at 0.3% and in 2015 exceeded the 2015 aggregate at 0.3%. As Fifth Third's performance exceeded the proxy and aggregate of all lenders, the geographic distribution in low-income tracts is excellent.

Fifth Third made 268 home purchase loans totaling $34.2 million in moderate-income tracts. This represents 22.5% of its home purchase loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 18.8% and 15.9% by dollar amount, which was below proxy. The percentage of loans by volume exceeded the 2014 aggregate at 13.9% and in 2015 exceeded the 2015 aggregate at 14.4%. As Fifth Third's performance exceeded the proxy and aggregate of all lenders, the geographic distribution in moderate-income tracts is excellent.

Fifth Third made 511 home purchase loans totaling $80.2 million in middle-income tracts. This represents 42.9% of home purchase loans by volume, which is below the percentage of owner-occupied units in these tracts at 46.3% and 37.2% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate of 46.4% and in 2015 was below the 2015 aggregate of 46.0%.

Fifth Third made 399 home purchase loans totaling $99.4 million in upper-income tracts. This represents 33.5% of home purchase loans by volume, which is comparable to the percentage of owner-occupied units in these tracts at 34.2% and 46.1% by dollar amount, which exceeds the proxy. The percentage of loans by volume exceeded the 2014 aggregate of 39.4% and in 2015 was below the 2015 aggregate of 39.3%.

A community contact indicated the need for more affordable housing with fewer lending restrictions. Because Fifth Third effectively penetrated these tracts and performance in low- and moderate-income areas exceeded proxy and the aggregate of all lenders, the geographic distribution of home purchase loans is considered excellent.

Refinance Loans

Fifth Third made five refinance loans totaling $654,000 in low-income tracts. This represents 0.8% of refinance loans by volume which slightly exceeds the percentage of owner-occupied units in these tracts at 0.7% and 0.6% by dollar amount, which is comparable to proxy. The percentage of loans by volume exceeded the 2014 aggregate at 0.4% and in 2015 exceeded the 2015 aggregate at 0.4%. Since Fifth Third's performance exceeds proxy and the aggregate of all lenders, the geographic distribution of refinance loans in low-income tracts is excellent.

Fifth Third made 125 refinance loans totaling $14.4 million in moderate-income tracts. This represents 18.9% of refinance loans by volume, which slightly exceeds the owner-occupied units in these tracts at 18.8%. The percentage of loans by dollar amount at 12.7% is below proxy. The percentage of loans by volume was below the 2014 aggregate at 13.7% and in 2015 exceeded the 2015 aggregate at 12.7%. As Fifth Third's performance exceeded proxy and the aggregate of all lenders, the geographic distribution of refinance loans in moderate-income tracts is excellent.

Fifth Third made 292 refinance loans totaling $38.6 million in middle-income tracts. This represents 44.1% of refinance loans by volume, which is comparable to the owner-occupied units in these tracts at 46.3%. However, refinance loans by dollar amount (33.9%) was below proxy. The percentage of loans by volume exceeded the 2014 aggregate at 44.1% and in 2015 was below the 2015 aggregate at 43.2%.

Fifth Third made 240 refinance loans totaling $60.2 million in upper-income tracts. This represents 36.3% of refinance loans by volume, which exceeds the owner-occupied units in these tracts at 34.2% and the dollar amount at 52.9% also exceeds proxy. The percentage of loans by volume was below the 2014 aggregate at 41.8% and in 2015 was below the 2015 aggregate at 43.8%.

Overall, the geographic distribution of refinance loans is excellent.

Home Improvement Loans

Fifth Third made two home improvement loans totaling $198,000 in low-income tracts. This represents 2.4% of home improvement loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 0.7%, and 2.2% by dollar amount, which also exceeds proxy. The percentage of loans by volume substantially exceeded the 2014 aggregate of 0.8% and in 2015 substantially exceeded the 2015 aggregate of 0.8%. Given the high median age of housing in low-income tracts at 38 years and Fifth Third's lending performance in these tracts, the geographic distribution in low-income tracts is considered excellent.

Fifth Third made 18 home improvement loans totaling $1.6 million in moderate-income tracts. This represents 21.4% of home improvement loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 18.8%, and 18.2% by dollar amount, which is comparable to proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 16.2% and in 2015 exceeded the 2015 aggregate of 16.6%. Given that Fifth Third's lending performance exceeded proxy and the aggregate, the geographic distribution of home improvement loans in moderate-income tracts is excellent.

Fifth Third made 40 home improvement loans totaling $3.6 million in middle-income tracts. This represents 47.6% of home improvement loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 46.3% and 40.2% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 46.2% and in 2015 was comparable to the 2015 aggregate of 42.9%.

Fifth Third made 24 home improvement loans totaling $3.5 million in upper-income tracts. This represents 28.6% of home improvements loans by volume, which is less than the percentage of owner-occupied units in these tracts at 34.2% and 39.4% by dollar amount, which exceeds proxy.

The percentage of loans by volume was below the 2014 aggregate of 36.7% and in 2015 was below the 2015 aggregate of 39.7%.

Overall, the geographic distribution of home improvement loans is excellent.

Small Business Loans

Fifth Third made 23 small business loans totaling $2.3 million in low-income tracts. This represents 2.2% of small business loans by volume, which exceeds the percentage of businesses in these tracts at 1.1% and 2.0% by dollar amount, which also exceeds the percentage of businesses in these geographies. Fifth Third's lending by volume in 2014 exceeded the 2014 aggregate of 1.1% and in 2015 exceeded the 2015 aggregate of 1.2%. Given that Fifth Third's performance exceeded proxy and the aggregate of all lenders, the geographic distribution of small business loans in low-income tracts is excellent.

Fifth Third made 280 small business loans totaling $47.0 million in moderate-income tracts. This represents 27.0% of small business loans by volume, which exceeds the percentage of businesses in these tracts at 21.8%. This also represents 40.8% small business loans by dollar amount, which significantly exceeds the percentage of businesses in these tracts. The percentage of loans by volume exceeded the 2014 aggregate of 21.3% and in 2015 exceeded the 2015 aggregate of 20.7%. Given that Fifth Third's performance exceeded proxy and the aggregate of all lenders, the geographic distribution of small business loans in moderate-income tracts is excellent.

Fifth Third made 364 small business loans totaling $34.2 million in middle-income tracts. This represents 35.1% of small business loans by volume, which is less than the percentage of businesses in these tracts at 40.5%. Lending by dollar amount at 29.7% is also less than the percentage of businesses in these tracts. The percentage of loans by volume was below the 2014 aggregate of 37.6% and in 2015 was below the 2015 aggregate of 37.8%.

Fifth Third made 369 small business loans totaling $31.8 million in upper-income tracts. This represents 35.6% of small business loans by volume, which is comparable to the percentage of businesses in these tracts at 36.6%, and 27.6% by dollar amount, which is below proxy. The percentage of loans by volume was below to the 2014 aggregate of 38.7% and in 2015 was below the 2015 aggregate of 39.3%.

Overall, the geographic distribution of small business loans is excellent.

Distribution by Borrower Income and Revenue Size of the Business

Overall, the distribution of loans is excellent based on borrower income and good for businesses of different revenue sizes. Borrower distribution is excellent for home purchase, refinance, and home improvement loans.

Home Purchase Loans

Fifth Third made 195 loans totaling $19.0 million to low-income borrowers. This represents 16.4% of home purchase loans by volume, which is below the percentage of low-income families at 20.1%; however, the percentage of loans by dollar amount (8.8%) is significantly below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 3.4% and in 2015 significantly exceeded the 2015 aggregate of 3.9%. Because Fifth Third's performance significantly exceeded the aggregate of all lenders, the borrower distribution of home purchase loans to low-income borrowers is excellent.

Fifth Third made 227 loans totaling $28.1 million to moderate-income borrowers. This represents 19.1% of home purchase loans by volume, which exceeds the percentage of moderate-income families at 18.5% and 13.0% of loans by dollar amount, which is below proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 14.1% and in 2015 exceeded the 2015 aggregate of 15.6%. Given that Fifth Third's performance exceeded proxy and exceeded the aggregate of all lenders, the borrower distribution of home purchase loans to moderate-income borrowers is excellent.

Fifth Third made 192 loans totaling $29.1 million to middle-income borrowers. This represents 16.1% of home purchase loans by volume, which is less than the percentage of middle-income families at 21.0%, and 13.5% by dollar amount, which is also below proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 19.5% and in 2015 was below the 2015 aggregate of 20.3%.

Fifth Third made 413 loans totaling $109.0 million to upper-income borrowers. This represents 34.7% of home purchase loans by volume, which is below the percentage of upper-income families at 40.5% and 50.6% of loans by dollar amount, which exceeds proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 46.1% and in 2015 was below the 2015 aggregate of 44.1%.

A community contact stated since interest rates are so closely linked to one's credit score, low- and moderate-income individuals are typically at a disadvantage which impacts the ability of these individuals to qualify for loans and buy homes. With Fifth Third's excellent performance in home purchase lending to low- and moderate-income borrowers, the overall borrower distribution is considered excellent.

Refinance Loans

Fifth Third made 111 loans totaling $9.3 million to low-income borrowers. This represents 16.8% of refinance loans by volume, which is below the percentage of low-income families at 20.1%. The percentage of loans by dollar amount to low-income borrowers at 8.2% is significantly below proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 6.2% and in 2015 significantly exceeded the 2015 aggregate of 4.9%. Given Fifth Third's performance significantly exceeded the aggregate of all lenders, the borrower distribution of refinance loans to low-income borrowers is excellent.

Fifth Third made 119 loans totaling $13.3 million to moderate-income borrowers. This represents 18.0% of refinance loans by volume, which is comparable to the percentage of moderate-income families at 18.5% and 11.7% by dollar volume, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 11.8% and in 2015 significantly exceeded the 2015 aggregate of 11.2%. Since Fifth Third's performance significantly exceeded the aggregate of all lenders and was comparable to proxy, the borrower distribution to moderate-income borrowers is excellent.

Fifth Third made 118 loans totaling $14.6 million to middle-income borrowers. This represents 17.8% of refinance loans by volume, which is below the percentage of middle-income families at 21.0%, and 12.8% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 18.1% and in 2015 was comparable to the 2015 aggregate of 16.4%.

Fifth Third made 273 loans totaling $69.5 million to upper-income borrowers. This represents 41.2% of refinance loans by volume, which is comparable to the percentage of upper-income families at 40.5%, while the percentage of loans by dollar amount at 61.1% significantly exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 43.9% and in 2015 was below the 2015 aggregate of 42.3%.

Overall, the borrower distribution of refinance loans is excellent.

Home Improvement Loans

Fifth Third made 12 loans totaling $952,000 to low-income borrowers. This represents 14.3% of home improvement loans by volume, which is below the percentage of low-income families at 20.1%, and 10.6% by dollar amount, which is significantly below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 8.8% and in 2015 was comparable to the 2015 aggregate of 8.1%. Given that Fifth Third's performance significantly exceeded the aggregate of all lenders, the borrower distribution of home improvement loans to low-income borrowers is excellent.

Fifth Third made 20 loans totaling $1.6 million to moderate-income borrowers. This represents 23.8% of its home improvement loans by volume, which exceeds the percentage of moderate-income families at 18.5%, and 18.0% by dollar amount, which is comparable to proxy. The percentage of loans by volume substantially exceeded the 2014 aggregate of 16.7% and in 2015 was comparable to the 2015 aggregate of 15.8%. Given that Fifth Third's performance substantially exceeded the aggregate of all lenders and exceeded proxy, the borrower distribution of home improvement loans to moderate-income borrowers is excellent.

Fifth Third made 22 loans totaling $2.4 million to middle-income borrowers. This represents 26.2% of home improvement loans by volume, which exceeds the percentage of middle-income families at 21.0%, and the dollar amount at 27.2% also exceeds proxy. The percentage of loans by volume substantially exceeded the 2014 aggregate of 20.9% and in 2015 slightly exceeded the 2015 aggregate of 19.2%.

Fifth Third made 29 loans totaling $3.7 million to upper-income borrowers. This represents 34.5% of home improvement loans by volume, which was below the percentage of upper-income families at 40.5%, and 41.3% by dollar amount, which is above proxy. The percentage of loans by volume was below 2014 aggregate of 46.3% and in 2015 was below the 2015 aggregate of 52.0%.

Overall, the borrower distribution of home improvement loans is excellent.

Small Business Loans

The distribution of small business loans to businesses of different sizes is good considering Fifth Third's performance relative to the aggregate of all lenders. Fifth Third was able to make 60.0% of small business loans to businesses with revenues of $1 million or less. Fifth Third's performance in 2014 exceeded the 2014 aggregate of 48.8% and in 2015 exceeded the 2015 aggregate of 54.9%, but was significantly below the percentage of small businesses in the assessment area at 95.1%. Also, during the evaluation period Fifth Third was able to make a relatively high percentage of small-dollar loans (78.3%) up to $100,000, indicating a willingness to lend in smaller amounts typically requested by small businesses. In addition, several community contacts indicated the need for banks to extend credit to small businesses and make small-dollar loans.

Community Development Loans

Fifth Third originated 14 community development loans totaling $76.4 million during the evaluation period as shown in the table below:

Economic Development		Revitalization and Stabilization		Community Services	
#	$	#	$	#	$
4	12,000,000	4	36,700,000	6	27,669,555

Community development lending in the assessment area represents 1.3% of the total dollar volume of community development loans originated by Fifth Third during the evaluation period. This ranks as Fifth Third's 19th highest percentage of community development lending during the evaluation period. Given Fifth Third's deposit market share (3.6%) and the presence of several large financial institutions in the market and competition for community development loans, Fifth Third is a leader in community development lending in this assessment area.

Examples of community development lending include, but are not limited to:

- New loan to a university to purchase a multi-building complex to accommodate more low- and moderate-income college students
- Working capital loan that supports a nonprofit that provides a multitude of services to low- and moderate-income children and families
- Working capital loans that support a college that serves low- and moderate-income students
- Working capital loan that promotes economic development by financing businesses to support job retention of 50 jobs and adding 20 new jobs

The economic development loans aiding in retaining and expanding employment were deemed to be responsive, as a community contact indicated there is a need for small businesses to be able to obtain loans more easily in order to start up or expand operations. However, there were also no community development loans supporting affordable housing, which was an expressed need in this assessment area.

Flexible Lending Programs

Overall, Fifth Third had 339 flexible lending loans in this assessment area: 243 government loans, 14 down payment assistance loans, and 82 other flexible lending programs. The following tables show the percentage by volume and by dollar amount of the three types of flexible lending programs made in this assessment area during the evaluation period and the distribution of Fifth Third's flexible lending programs within the assessment area by census tract income and borrower income.

Flexible Loan Programs												
	Geographic Distribution											
	Low			Moderate			Middle			Upper		
	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units
Government Loan Programs	0.4%	0.5%	0.7%	16.0%	13.4%	18.8%	51.9%	48.8%	46.3%	31.7%	37.3%	34.2%
Down Payment Assistance Programs	14.3%	17.3%	0.7%	28.6%	26.6%	18.8%	42.9%	39.1%	46.3%	14.3%	16.9%	34.2%
Other Flexible Lending Programs	0.0%	0.0%	0.7%	13.4%	10.1%	18.8%	53.7%	46.1%	46.3%	32.9%	43.9%	34.2%
Total	**0.9%**	**0.9%**	**0.7%**	**15.9%**	**12.9%**	**18.8%**	**51.9%**	**47.8%**	**46.3%**	**31.3%**	**38.4%**	**34.2%**

*Unknown tract data is not included in the above table.

Flexible Loan Programs												
	Borrower Distribution											
	Low			Moderate			Middle			Upper		
	% - #	% - $	% Fam	% - #	% - $	% Fam	% - #	% - $	% Fam	% - #	% - $	% Fam
Government Loan Programs	8.2%	4.2%	20.1%	33.3%	26.5%	18.5%	25.9%	26.4%	21.0%	31.7%	41.4%	40.5%
Down Payment Assistance Programs	35.7%	23.4%	20.1%	28.6%	36.5%	18.5%	21.4%	22.9%	21.0%	14.3%	17.3%	40.5%
Other Flexible Lending Programs	12.2%	8.8%	20.1%	9.8%	5.4%	18.5%	24.4%	21.0%	21.0%	52.4%	63.7%	40.5%
Total	**10.3%**	**5.9%**	**20.1%**	**27.4%**	**21.4%**	**18.5%**	**25.4%**	**24.9%**	**21.0%**	**36.0%**	**46.3%**	**40.5%**

*Unknown tract data is not included in the above table.

Fifth Third's lending in low-income tracts by number and dollar amount exceeded the percentage of owner-occupied units in these tracts, particularly for the various down payment assistance programs that are offered. The percentage of lending by volume and dollar amount in moderate-income tracts was below the percentage of owner-occupied units.

Fifth Third's lending by volume to low-income borrowers was below the percentage of low-income families in the assessment area and lending by dollar amount was significantly below proxy. The percentage of lending by volume and dollar amount to moderate-income borrowers exceeded the percentage of moderate-income families, especially for government loan and down payment assistance programs.

Therefore, Fifth Third made use of flexible lending practices in serving assessment area credit needs, since lending through flexible loan programs in low-income tracts and to moderate-income borrowers was excellent and the lending in moderate-income tracts was good, while lending to low-income borrowers was adequate.

Investment Test

Fifth Third made an excellent level of qualified community development investments and grants, particularly those not routinely provided by private investors. As such, Fifth Third was often in a leadership position. Fifth Third has 96 qualified investments totaling $46.7 million during the evaluation period. Shown in the table below are the total current period investments:

Affordable Housing		Economic Development		Community Services	
#	*$*	*#*	*$*	*#*	*$*
29	30,461,896	15	529,189	44	279,852

Also included in the total number of investments are eight prior period investments totaling $15.4 million. Overall, Fifth Third made 2.9% of its total community development investments in this assessment area, which is greater than the percentage of total deposits at 1.9% and less than the percentage of branch offices at 3.1%.

Fifth Third exhibits an excellent responsiveness to credit and community development needs in the assessment area, including investments in several affordable housing projects throughout the assessment area, which was an important need expressed by several community contacts. Fifth Third made 64 donations totaling $397,021 that supported chambers of commerce, charitable organizations, small businesses, education, economic development, and affordable housing. The majority (70.4%) of Fifth Third's donations supported services to low- and moderate-income individuals, such as after-school programs and various charitable organizations.

Service Test

Fifth Third's performance under the service test in this assessment area is rated good. Retail services are reasonably accessible and Fifth Third provides a relatively high level of community development services.

Retail Services

Fifth Third's record of opening and closing offices has generally not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and to low- and moderate-income households. Since the previous evaluation, eight banking centers were closed. Two banking centers closed were located in moderate-income tracts. No banking centers were opened during the evaluation period. Delivery services are reasonably accessible to Fifth Third's geographies and individuals of different income levels.

Business hours and services provided do not vary in a way that inconveniences certain portions of the assessment area, including low- and moderate-income geographies or households, and are consistent with the services and hours discussed in the "Institution" assessment.

Fifth Third maintains 40 banking centers within this assessment area, including none in low-, nine in moderate-, 18 in middle-, and 13 in upper-income census tracts. Fifth Third banking centers represent 25.3% of its banking centers in Florida and 3.1% of all its banking centers.

Fifth Third has a total of 53 full-service ATMs within this assessment area, including none in low-, 12 in moderate-, 21 in middle-, and 20 in upper-income census tracts.

The following table illustrates the percentage of banking centers and ATMs in low-, moderate-, middle-, and upper-income census tracts in comparison to the number and percentage of census tracts and the percentage of households and businesses in those tracts.

Geographic Distribution of Branches & ATMS

Assessment Area: FL Orlando

Tract Category	Branches				Stand Alone ATMs							Demographics			
	Total Branches		Open	Closed	Total ATMs			Full Service ATMs		Cash only ATMs		Census Tracts		House holds	Total Businesses
	#	%	#	#		#	%	#	%	#	%	#	%	%	%

2016 FFIEC Census Data, 2010 ACS Data, and 2015 D&B Information
Closed branches/ATMs are only included in "closed" columns and are not included in any other totals.
DTO - Drive thru only is a subset of total branches
SA = Stand Alone ATM is a subset of total ATMs

Branch distribution within low-income tracts was considered poor, because of the distribution of branches was below the percentage of census tracts and households, plus no full-service ATMs in these tracts. The branch distribution within moderate-income tracts was considered good.

Community Development Services

Fifth Third provides a relatively high level of providing community development services in this assessment area. During the evaluation period, Fifth Third employees provided 2,920 hours of community development service to local organizations serving low- and moderate-income individuals, which represents 2.5% of all community development services provided and equates to 1.4 annualized persons (ANP).

Affordable Housing	Economic Development	Community Services
# of Hours	***# of Hours***	***# of Hours***
266	375	2,279

Employees provided financial expertise through leadership positions in multiple community organizations that provide affordable housing and promote community and economic development. Community development services include 1,357 hours serving on boards and committees, 1,255 hours of providing financial literacy through local nonprofits and school programs, 284 hours providing technical assistance to non-profits and local business, and 24 hours participating in foreclosure prevention outreach.

Fifth Third is considered particularly responsive with regard to hours dedicated to financial literacy activities. Several community contacts mentioned the need for financial literacy training to assist individuals with the loan application process and provide technical assistance to small business owners.

METROPOLITAN AREA
(Full-scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE TAMPA-ST. PETERRSBURG-CLEARWATER FL MSA #45300

The Tampa-St. Petersburg-Clearwater FL MSA includes Hillsborough, Pasco, and Pinellas counties, but Fifth Third's assessment area excludes Hernando County. The assessment area is comprised of 33 low-, 177 moderate-, 278 middle-, and 201 upper-income tracts. There are also 12 tracts with no income designation that are primarily composed of correctional institutions, military establishments, education facilities, or medical establishments that do not report income information

As of June 30, 2016, Fifth Third ranked sixth out of 61 institutions with 3.6% of the deposit market share. Raymond James Bank had the majority of the market share 19.4% of deposits, followed by Bank of America, Wells Fargo Bank, SunTrust Bank, and Regions Bank with 16.6%, 13.5%, 11.8%, and 6.7% of the market share, respectively. Deposits in this assessment area accounted for 2.5% of the Fifth Third's total deposits. This was the highest percentage of deposits within the state and the ninth highest within Fifth Third's CRA footprint.

From January 1, 2014 through June 30, 2016, Fifth Third originated 2,073 HMDA loans and 1,403 CRA loans, which represented 2.0% and 3.6% of the total loans originated during the evaluation period, respectively. This was the 12th largest HMDA market and eighth-largest CRA market for loans originated during the evaluation period.

In 2015, Fifth Third Mortgage Company ranked 25th among 897 HMDA reporters in the assessment area and Fifth Third ranked 129th. Wells Fargo Bank, Quicken Loans, JPMorgan Chase Bank, PennyMac Loan Services, and Bank of America were the top five HMDA lenders in the assessment area. Fifth Third ranked 16th of 145 CRA reporters in the assessment area in 2015. The top four CRA lenders in the assessment area were American Express, Bank of America, Wells Fargo Bank, and Capital One. These lenders are mostly issuers of credit cards and their CRA loans primarily consist of commercial credit card accounts.

Two community contact interviews were conducted to provide additional information regarding the assessment area. The first contact, representing a community development organization, stated the economic situation is improving in this area. There is an increased demand for small business lending and banks appear to be originating loans to small businesses. The contact stated area banks work closely with this organization and are aggressively looking for qualified small business owners. However, the contact indicated there is a need for specialized commercial loan products, which banks typically do not offer.

The second contact, representing an affordable housing organization, stated the Tampa housing market is improving, but foreclosure rates and unemployment rates remain high. The unemployment rate fell zero percentage points at the end of last year. The contact stated there is a need for more affordable housing, as lower-income individuals and families seeking affordable housing may be on waitlists for months.

Since the economic downturn, the contact stated it has been difficult for low- and moderate-income individuals to refinance or obtain loan modifications, because banks appear to be relying on pre-recession appraised values that are above current fair market values. The contact believed there are opportunities for banks to help meet the credit needs of this community by offering ongoing support instead of one-time donations, because these types of offerings do not have a sustainable, long-term impact on the community. Additionally, there is a need for financial institutions to offer financial education and explain ways to repair credit to lower-income individuals impacted by the economic downturn.

Population Characteristics

According to 2010 U.S. Census data, the population in the assessment area was 2.6 million. About 28.4% of the population lived in low- and moderate-income tracts. In addition, 78.7% of the population was 18 years of age or older, the legal age to enter into a contract.

As of July 1, 2015, the Tampa-St. Petersburg-Clearwater MSA is the 18th largest in terms of population in the nation.[109] Hillsborough County is the largest county in the assessment area and the fourth-most populous county in Florida.[110] Tampa (located in Hillsborough County) is the largest city in the assessment area and is the 53rd most populous city in the U.S. Tampa has 369,075 residents and its population growth increased by 21.3% between 2000 and 2015. The cities of St. Petersburg and Clearwater have 257,083 and 113,003 residents, respectively, with population growth around 3.2% between 2000 and 2015. In contrast, New Port Richey only has 15,842 residents.[111]

The following table shows the population in the assessment area by county for 2010 and 2015, with the percentage of the population increase.[112] The population within the assessment area experienced positive growth between 2010 and 2015, with Hillsborough County experiencing the greatest growth and Pinellas County experiencing the least growth in population during this time period. According to Moody's Analytics, domestic migration made up more than three-quarters of the growth and international migration accounted for nearly a quarter of the increase in 2015. This assessment area has a robust domestic and foreign in-migration, which contributes to an increasing demand for employment and housing.

County	2010 Population	2015 Population	Population Percent Change
Hillsborough	1,229,226	1,349,050	9.7%
Pasco	464,697	497,909	7.1%
Pinellas	916,542	949,827	3.6%
Total	**2,610,465**	**2,796,786**	**7.1%**

[109] MSA population data is derived from the U.S. Census Data 2015 Statistical Abstract: https://factfinder.census.gov/faces/tableservices/jsf/pages/productview.xhtml?src=bkmk

[112] Population Estimates derived from U.S. Census Data (April 1, 2010 – July 1, 2015): http://www.census.gov/quickfacts/table/PST045216/00

Income Characteristics

In 2010, the MSA median family income was slightly greater ($57,801) than Florida at $57,204. The median family income in the MSA increased between 2014 and 2016; however, Moody's Analytics noted high living costs relative to per capita income. Moody's also noted full employment and wage gains in the next year, primarily as a result of a rising number of high-wage jobs being created in the area's fledgling high-tech industry. These gains should support growing retail and housing markets.

Borrower Income Levels
Tampa-St. Petersburg-Clearwater, FL MSA

FFIEC Estimated Median Family Income		Low			Moderate			Middle			Upper		
		0	-	49.99%	50%	-	79.99%	80%	-	119.99%	120%	-	& above
2014	**$57,400**	0	-	$28,699	$28,700	-	$45,919	$45,920	-	$68,879	$68,880	-	& above
2015	**$59,000**	0	-	$29,499	$29,500	-	$47,199	$47,200	-	$70,799	$70,800	-	& above
2016	**$59,200**	0	-	$29,599	$29,600	-	$47,359	$47,360	-	$71,039	$71,040	-	& above

Poverty rates increased in each county in the assessment area from 1999 to 2015.[113] Pinellas County had the lowest poverty rate in 1999 and 2015 and Hillsborough County had the highest; however, Pasco County experienced the largest increase in poverty rate during the evaluation period. In 2015, Pasco and Pinellas counties had poverty rates below Florida's. The poverty rates for Hillsborough County and Florida were the same and exceeded the national poverty rates in 1999 and 2015. According to the U.S. Census Bureau, the national poverty rate in 2015 was 13.5%, down 1.3 percentage points from 14.8% in 2014. For most demographic groups, the 2015 poverty rates and number of people in poverty decreased from 2014.[114] The following table shows the poverty rates for 1999[115] and 2015.

County	1999 Poverty Rate	2015 Poverty Rate	Change
Hillsborough	12.5%	15.8%	26.4%
Pasco	10.7%	14.6%	36.4%
Pinellas	10.0%	13.6%	36.0%
Florida	**12.5%**	**15.8%**	**26.4%**
U.S.	**11.8%**	**13.5%**	**14.4%**

[115] 1999 National Poverty Rate: http://www.census.gov/prod/2000pubs/p60-210.pdf

Housing Characteristics

According to 2010 U.S. Census data, there are 1.3 million housing units and 649,472 families in the assessment area. From an income perspective, 29.1% of housing units, 23.3% of owner-occupied units, and 26.7% of families are located in low- or moderate-income tracts. Over two-thirds of the housing units in the low-income census tracts are either rental or vacant (68.7%). In the moderate-income census tracts, over half of the housing units are either rental or vacant (51.7%) and 48.3% are owner-occupied. Therefore, based on the number of housing units compared to the number of families in low- and moderate-income census tracts, there appear to be credit-related opportunities for Fifth Third to provide various aspects of affordable housing in the assessment area.

The 2010 U.S. Census data shows the median age of housing stock in the assessment area was only 30 years old and only 5.3% of the stock was built before 1950. However, within the assessment area, the median age of housing stock was 39 years in low-income tracts and 35 years in moderate-income tracts. Therefore, there appears to be opportunity for Fifth Third to provide home improvement and rehabilitation loans in these lower-income areas.

According to 2010 U.S. Census data, the median housing value in the assessment area was $185,296 with an affordability ratio of 25.24. The affordability ratio is derived by dividing the median household income by the median housing value. The higher the affordability ratio, the more affordable a home is considered. Median housing values decreased between 2010 and 2011-2015 and median family incomes increased; as a result, housing became more affordable across the assessment area. During the evaluation period, the most affordable housing was in Pasco County and the least affordable was in Pinellas County. A community contact stated it has been difficult for low- and moderate-income individuals to refinance or obtain loan modifications, because banks appear to be relying on pre-recession appraised values that are above current fair market values. Moody's Analytics noted that area house prices have slowed to the weakest six-month growth rate in more than a year. Median gross rents increased across the assessment area, with renters in Pasco County experiencing the largest increase in rental rates and renters in Pinellas County experiencing the smallest increase in gross rental rates. In 2010, about 53.0% of renters across the assessment area had rent costs greater than 30.0% of income. Increasing rental rates may make it more difficult for potential homebuyers to save for a down payment for a home. The table below presents housing characteristics from the U.S. Census data between 2010 and 2015 in the assessment area and Florida.

County	2010 Median Housing Value	2010 Affordability Ratio	2011-2015 Median Housing Value	2011-2015 Affordability Ratio	2010 Median Gross Rent	2011-2015 Median Gross Rent	Percent of Change
Hillsborough	$198,900	24.90	$159,200	31.77	$906	$965	6.5%
Pasco	$157,400	28.10	$117,800	38.25	$865	$930	7.5%
Pinellas	$185,700	24.37	$150,200	30.51	$904	$952	5.3%
Florida	**$205,600**	**23.18**	**$159,000**	**29.88**	**$957**	**$1,002**	**4.7%**

According to Bankrate.com,[116] Florida ranked 6th for foreclosure filings in November 2016. The national average for foreclosure filings was one in every 1,533 housing units. The following table contains information about foreclosure filings in the assessment area, according to Realtytrac:[117]

Geography Name	Ratio of Properties Receiving Foreclosure Filings in November 2016
Hillsborough	1:857
Pasco	1:694
Pinellas	1:926
Florida	**1:986**
U.S.	**1:1,533**

In November 2016, all three counties in this assessment area had higher rates of foreclosure than Florida. A community contact mentioned the continuing high rates of foreclosure in this area.

Building permits for this MSA, Florida, and the nation are included in the following table for 2014, 2015, and 2016.[118]

Geography	2014	2015	Percent of Change 2014-2015	2016	Percent of Change 2015-2016
Tampa-St. Petersburg-Clearwater MSA	12,386	15,653	26.4%	17,180	9.8%
Florida	**84,084**	**109,924**	**30.7%**	**113,912**	**3.6%**
U.S.	**1,052,124**	**1,182,582**	**12.4%**	**1,190,191**	**0.6%**

The assessment area experienced increases in the number of housing permits issued between 2014 and 2015 and to a lesser extent between 2015 and 2016. The increase in the number of permits could indicate there is an increasing demand for home purchase loans in this area.

Labor, Employment, and Economic Characteristics

According to Moody's Analytics, the Tampa metropolitan area economy is in recovery, primarily due to the increase in professional, scientific, and technical services over the next five years. The Tampa metropolitan area is the financial services capital of Florida and has grown into the hub for professional and management services in the state.

[118] U.S. Census Bureau Building Permits Survey: http://www.census.gov/construction/bps/

According to *Tampa Bay Times*,[119] the Tampa Bay area is home to four Fortune 500 companies in 2016.

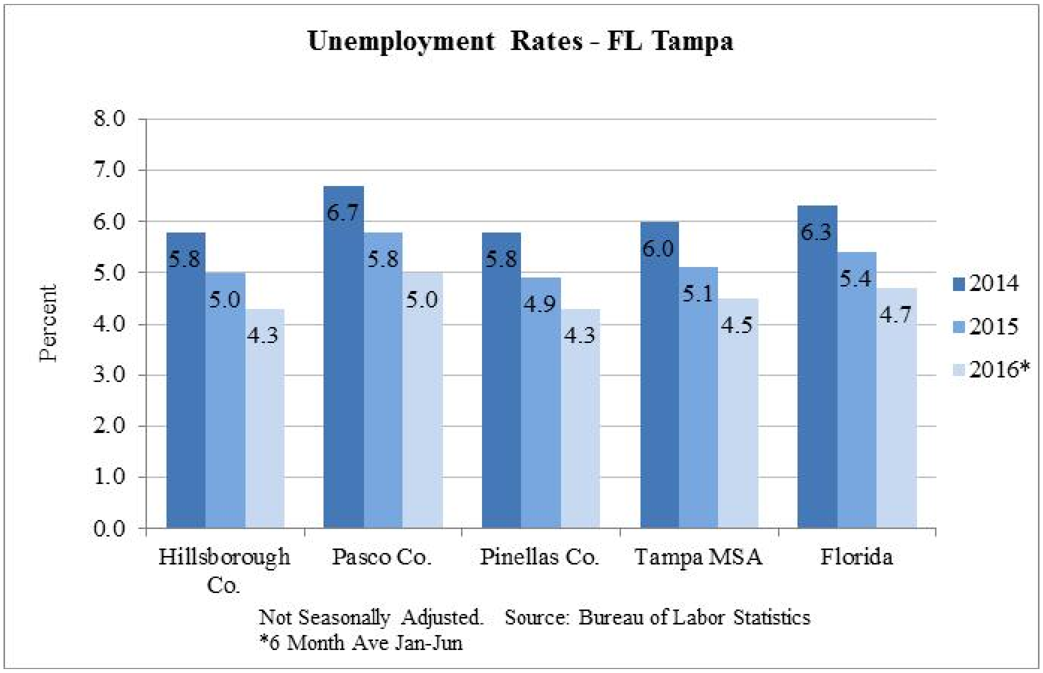
Tampa Bay Fortune 500 Companies (2016)		
Rank	**Company**	**Annual Revenue**
108	Tech Data Corp	$26.0 billion
158	Jabil Circuit Inc.	$17.9 billion
202	WellCare Health Plans	$13.9 billion
482	Raymond James Financial	$5.5 billion

According to Moody's Analytics the top 15 employers in the MSA in 2015/2016 were:

Company	Number of Employees
MacDill Air Force Base	19,000
Verizon Communications	14,000
University of South Florida	12,661
Tampa International Airport	7,060
Tampa General Hospital	6,600
Shriners Hospital for Children	5,378
St. Joseph's Hospital	5,242
JP Morgan Chase & Co.	5,237
Freedom Village	5,000
Publix Super Markets	4,630
TECO Energy Company	4,290
James A. Haley Veterans Hospital	4,240
Bay Pines VA Healthcare Center	3,800
Bank of America Corp.	3,754
Outback Steakhouse Corp.	3,625

The following table illustrates the average unemployment rates for 2014, 2015, and 2016 across the MSA and Florida.

[119] Tampa Bay Times: http://www.tampabay.com/news/business/corporate/st-petersburgs-raymond-james-financial-cracks-fortune-500-rankings/2280477



The unemployment rates declined each year in the assessment area and Florida, with Pasco County having the highest unemployment rates during this time period. A community contact stated the unemployment rate in this area remains high and that the unemployment rate fell zero percentage points at the end of last year. According to Moody's Analytics, unemployed workers are discouraged from entering a labor market that has not seen a reduction in the joblessness rate in last six months of last year, and employed workers have seen no wage increased during this time.

According to *Tampa Bay Times*, in 2016 regional layoffs under the Worker Adjustment & Retraining Notification (WARN) rules fell sharply (a 34.0% decrease from reported layoffs in 2015); this is the first significant drop in mass area layoffs in the past five years. In 2016, the most significant reported job cuts under WARN rules was announced by Ohio-based customer management firm, Convergys Corp, which eliminated 375 jobs at a call center located in Tampa Bay. In 2015, the biggest WARN cuts were by Tampa International Airport concessionaire HMS Host, which eliminated nearly 796 jobs. In 2014, the closing of an Express Scripts facility in Tampa resulted in the loss of 422 jobs.[120]

[120] Trigauz, Robert. "Mass layoffs in 2016 by Tampa Bay firms drop sharply after years of heavy job cuts." *Tampa Bay Times.* January 6, 2017. - http://www.tampabay.com/news/business/mass-layoffs-in-2016-by-tampa-bay-firms-drop-sharply-after-years-of-heavy/2308730

2016 FFIEC Census Data and 2015 D&B Information

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE TAMPA-ST. PETERSBURG-CLEARWATER FL MSA

Lending Test

Fifth Third's performance under the lending test in this assessment area is rated excellent. Fifth Third has demonstrated an excellent responsiveness to the credit needs of the community. In addition, Fifth Third originated 18 community development loans totaling $130.5 million. Fifth Third has an excellent geographic distribution of loans and a low level of lending gaps. Fifth Third has an excellent distribution among borrowers of different income levels and a good distribution of loans to businesses of different revenue sizes. Fifth Third exhibits a good record of serving the credit needs of highly economically disadvantaged areas in its assessment area, low-income individuals, and businesses with gross annual revenues of $1 million or less. The excellent level of community development loans and use of flexible lending practices augmented Fifth Third's performance in this assessment area.

Greatest consideration was given to the evaluation of small business lending based on the overall volume of lending, followed by home purchase, refinance, and home improvement lending. Details of Fifth Third's residential mortgage and small business lending, as well as information regarding lending by peers, can be found in Appendix E.

Lending Activity

Fifth Third's lending activity reflects a good responsiveness to the credit needs within the assessment area. Fifth Third originated 1,403 small business, 1,358 home purchase, 620 refinance, 95 home improvement, and 18 community development loans during the evaluation period. The percentage of Fifth Third's total lending at 2.4% is comparable to the percentage of total deposits at 2.5% in this area.

Fifth Third made 95.4% of the HMDA and 98.9% of the CRA lending within its designated assessment area. However, a concentration of HMDA lending was identified in Hernando County, which is excluded from the assessment area. During the evaluation period, Fifth Third originated 99 loans in Hernando County, which has 14 low- and moderate-income tracts.

In addition to lending, Fifth Third modified existing loans to borrowers. The following table shows the distribution of HAMP and other real-estate secured modifications within the assessment area by census tract income and by borrower income.

	Distribution by Census Tract Income							
	Low		Mod		Middle		Upper	
	#	%	#	%	#	%	#	%
Other Real Estate Secured Modifications	1	1.1%	16	17.6%	40	44.0%	34	37.4%
Percentage of Owner Occupied Units		***1.9%***		***21.4%***		***42.1%***		***34.6%***

*Unknown tract data is not included in the above table.

	Distribution by Borrower Income							
	Low		Mod		Middle		Upper	
	#	%	#	%	#	%	#	%
Other Real Estate Secured Modifications	13	14.3%	28	30.8%	19	20.9%	30	33.0%
Percentage of Families by Family Income		***20.6%***		***18.2%***		***19.6%***		***41.6%***

*Unknown tract data is not included in the above table.

There were not enough HAMP modifications in this assessment area for a meaningful analysis. The percentage of other modifications in low- and moderate-income tracts was comparable to the percentage of owner occupied units; therefore, modifications helped to expand lending activities in these areas.

The percentage of other modifications made to low-income borrowers was below the percentage of low-income families in the assessment and the percentage of other modifications to moderate-income borrowers was substantially higher than the percentage of moderate-income families. Therefore, modifications enhanced Fifth Third's ability to reach low- and moderate-income borrowers. In addition, a community contact indicated the need for loan modifications within this assessment area.

Geographic Distribution of Loans

Fifth Third's overall distribution of lending among geographies is excellent. Small business, the largest loan category, and home purchase are excellent. Refinance and home improvement are good. There is also a low level of lending gaps. The following gaps in lending were noted in the assessment area:

Tract Income Levels	Number of Tracts	Tracts with No Loans	Penetration
Low	33	6	81.8%
Moderate	177	23	87.0%
Middle	278	27	90.3%
Upper	201	6	97.0%
Unknown	12	12	0.0%
Total	**701**	**74**	**89.4%**

Lending gaps are considered minimal, due to the limited number of lending gaps in low- and moderate- income tracts and low amount of lending gaps in middle-, and upper-income tracts. The owner-occupancy rates in low- and moderate-income tracts are relatively low at 31.3% and 48.3%, respectively, which likely impacts the demand for loans in these areas.

Small Business Loans

Fifth Third made 47 small business loans totaling $5.3 million in low-income tracts. This represents 3.3% of small business loans by volume, which exceeds the percentage of businesses in these tracts at 2.7%, and 4.8% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 3.2% and was comparable to the 2015 aggregate of 3.3%. Given that Fifth Third's performance exceeded proxy and was comparable to the aggregate of all lenders, the geographic distribution of small business loans in low-income tracts is excellent.

Fifth Third made 313 small business loans totaling $30.8 million in moderate-income tracts. This represents 22.3% of small business loans by volume, which exceeds the percentage of businesses in these tracts at 20.2%. This also represents 28.2% small business loans by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 19.7% and was comparable to the 2015 aggregate of 19.0%. Given that Fifth Third's performance exceeded proxy and the aggregate of all lenders, the geographic distribution of small business loans in moderate-income tracts is excellent.

Fifth Third made 488 small business loans totaling $44.2 million in middle-income tracts. This represents 34.8% of small business loans by volume, which is slightly below the percentage of businesses in these tracts at 38.4%, and 40.5% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate of 37.2% and was comparable to the 2015 aggregate of 37.9%.

Fifth Third made 555 small business loans totaling $28.9 million in upper-income tracts. This represents 39.6% of small business loans by volume, which exceeds the percentage of businesses in these tracts at 38.7%, and 26.5% by dollar amount, which is below proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 38.7% and exceeded the 2015 aggregate of 38.8%.

Overall, the geographic distribution of small business loans is excellent.

Home Purchase Loans

Fifth Third made 30 home purchase loans totaling $3.4 million in low-income tracts. This represents 2.2% of home purchase loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 1.9%, and 1.3% by dollar amount, which is comparable to the percentage of owner-occupied units in these geographies. The percentage of loans by volume exceeded the 2014 aggregate at 1.0% and exceeded the 2015 aggregate at 1.2%. As Fifth Third's performance exceeded proxy and the aggregate of all lenders in these geographies, the geographic distribution in low-income tracts is excellent. Further, the owner-occupancy rate in low-income tracts is relatively low; therefore, Fifth Third's ability to penetrate these geographies is notable.

Fifth Third made 306 home purchase loans totaling $35.9 million in moderate-income tracts. This represents 22.5% of its home purchase loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 21.4%, and 14.0% by dollar amount, which was below proxy. The percentage of loans by volume was comparable to the 2014 aggregate at 13.5% and exceeded the 2015 aggregate at 14.3%. As Fifth Third's performance exceeded proxy and the aggregate of all lenders, the geographic distribution in moderate-income tracts is excellent.

Fifth Third made 478 home purchase loans totaling $73.5 million in middle-income tracts. This represents 35.2% of home purchase loans by volume, which is below the percentage of owner-occupied units in these tracts at 42.1%, and 28.6% by dollar amount, which is below proxy. The percentage of loans by volume was below to the 2014 aggregate of 41.3% and was below the 2015 aggregate of 41.0%.

Fifth Third made 544 home purchase loans totaling $143.9 million in upper-income tracts. This represents 40.1% of home purchase loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 34.6%, and 59.1% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 44.2% and was below the 2015 aggregate of 43.5%.

Overall, the geographic distribution of home purchase loans is excellent.

Refinance Loans

Fifth Third made 14 refinance loans totaling $1.2 million in low-income tracts. This represents 2.3% of refinance loans by volume, which exceeds the percentage of owner-occupied units at 1.9%, and 1.1% by dollar amount, which is below proxy. The percentage of loans by volume was comparable to the 2014 aggregate at 1.4% and exceeded the 2015 aggregate at 1.1%. As Fifth Third's performance exceeded proxy and the aggregate of all lenders, the geographic distribution of refinance loans in low-income tracts is excellent.

Fifth Third made 123 refinance loans totaling $12.4 million in moderate-income tracts. This represents 19.8% of refinance loans by volume, which is below the owner-occupied units in these tracts at 21.4%. Also, the percentage of loans by dollar amount at 11.5% is significantly below proxy. However, the percentage of loans by volume was comparable to the 2014 aggregate at 13.5% and exceeded the 2015 aggregate at 12.6%. As Fifth Third's performance significantly exceeded the aggregate of all lenders, but was below proxy, the geographic distribution of refinance loans in moderate-income tracts is good.

Fifth Third made 232 refinance loans totaling $30.2 million in middle-income tracts. This represents 37.4% of refinance loans by volume, which is below the owner-occupied units in these tracts at 42.1%. Refinance loans by dollar amount (28.1%) was also below proxy. The percentage of loans by volume was comparable to the 2014 aggregate at 40.2% and was comparable to the 2015 aggregate at 39.6%.

Fifth Third made 251 refinance loans totaling $63.9 million in upper-income tracts. This represents 40.5% of refinance loans by volume, which exceeds the owner-occupied units in these tracts at 34.6%. The percentage of loans by dollar amount at 59.3% also exceeded proxy. However, the percentage of loans by volume was comparable to the 2014 aggregate at 44.9% and was below the 2015 aggregate at 46.6%.

Overall, the geographic distribution of refinance loans is good.

Home Improvement Loans

There was no lending by Fifth Third in low-income tracts. The percentage of owner-occupied units in these tracts is 1.9%. The percentage of loans by volume for the 2014 aggregate is 1.4% and the 2015 aggregate is 1.9%. A community contact stated it has been difficult for low- and moderate-income individuals to obtain financing after the economic downturn due to inflated real estate values. Given the low amount of owner-occupied units and low aggregate lending in these tracts, the geographic distribution is considered adequate.

Fifth Third made 20 home improvement loans totaling $1.3 million in moderate-income tracts. This represents 21.1% of home improvement loans by volume, which is comparable to the percentage of owner-occupied units in these tracts at 21.4%, and 16.8% by dollar amount, which is less than the percentage of owner-occupied units in these geographies. The percentage of loans by volume was below the 2014 aggregate of 19.0% and exceeded the 2015 aggregate of 17.7%. Given that Fifth Third's performance was comparable to proxy and exceeded the aggregate of all lenders, the geographic distribution of home improvement loans in moderate-income tracts is excellent.

Fifth Third made 38 home improvement loans totaling $2.9 million in middle-income tracts. This represents 40.0% of home improvement loans by volume, which is comparable to the percentage of owner-occupied units in these tracts at 42.1%, and 37.3% by dollar amount, which is less than the percentage of owner-occupied units in these geographies. The percentage of loans by volume exceeded the 2014 aggregate of 39.9% and was below the 2015 aggregate of 40.4%.

Fifth Third made 37 home improvement loans totaling $3.5 million in upper-income tracts. This represents 38.9% of home improvements loans by volume, which is comparable to the percentage of owner-occupied units in these tracts at 34.6%, and 45.9% by dollar amount, which exceeds the percentage of owner-occupied units in these geographies. The percentage of loans by volume was comparable to the 2014 aggregate of 39.8% and was below the 2015 aggregate of 40.1%.

Overall, the geographic distribution of home improvement loans is good. While Fifth Third did not make any home improvement loans in low-income tracts, performance is excellent in moderate-income tracts.

Distribution by Borrower Income and Revenue Size of the Business

The distribution of loans is excellent based on borrower income and good for businesses of different revenue sizes. Borrower distribution is excellent for all three HMDA loan categories.

Small Business Loans

The distribution of small business loans to businesses of different sizes is good, considering Fifth Third's performance relative to the aggregate of all lenders. Fifth Third was able to make 58.0% of small business loans to businesses with revenues of $1 million or less. Fifth Third's performance in 2014 exceeded the 2014 aggregate of 48.2% and exceeded the 2015 aggregate of 54.7%, but was significantly below the percentage of small businesses in the assessment area at 94.6%. Also, during the evaluation period, Fifth Third was able to make a relatively high percentage of small-dollar loans (84.3%) up to $100,000, indicating a willingness to lend in smaller amounts typically requested by small businesses. In addition, a community contact indicated the need to make loans to small businesses.

Home Purchase Loans

Fifth Third made 219 loans totaling $18.9 million to low-income borrowers. This represents 16.1% of home purchase loans by volume, which is below the percentage of low-income families at 20.6%, and 7.4% of loans by dollar amount, which is significantly below proxy. However the percentage of loans by volume exceeded the 2014 aggregate of 4.0% and significantly exceeded the 2015 aggregate of 4.1%. Because Fifth Third's performance significantly exceeded the aggregate of all lenders, the borrower distribution of home purchase loans to low-income borrowers is excellent.

Fifth Third made 226 loans totaling $27.5 million to moderate-income borrowers. This represents 16.6% of home purchase loans by volume, which is below the percentage of moderate-income families at 18.2%, and 10.7% of loans by dollar amount, which is significantly below proxy. However, the percentage of loans by volume was comparable to the 2014 aggregate of 14.5% and exceeded the 2015 aggregate of 15.7%. Given that Fifth Third's performance was slightly below proxy and significantly exceeded the aggregate of all lenders, the borrower distribution of home purchase loans to moderate-income borrowers is excellent.

Fifth Third made 251 loans totaling $36.5 million to middle-income borrowers. This represents 18.5% of home purchase loans by volume, which is comparable to the percentage of middle-income families at 19.6%, and 14.2% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 19.7% and was below the 2015 aggregate of 19.4%.

Fifth Third made 604 loans totaling $161.8 million to upper-income borrowers. This represents 44.5% of home purchase loans by volume, which is greater than the percentage of upper-income families at 41.6%, and 63.0% of loans by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 46.4% and was below the 2015 aggregate of 44.1%.

A community contact indicated this area is still impacted by high unemployment, which could be a factor impacting the ability of lower-income individuals to purchase homes. With Fifth Third's strong performance in home purchase lending to low- and moderate-income borrowers, the overall borrower distribution is excellent.

Refinance Loans

Fifth Third made 113 loans totaling $9.0 million to low-income borrowers. This represents 18.2% of refinance loans by volume, which is comparable to the percentage of low-income families at 20.6%. The percentage of loans by dollar amount in these geographies at 8.4% is significantly below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 6.0% and significantly exceeded the 2015 aggregate of 4.7%. Given that Fifth Third's performance significantly exceeded the aggregate of all lenders and was comparable to proxy, the borrower distribution of refinance loans to low-income borrowers is excellent.

Fifth Third made 112 loans totaling $10.6 million to moderate-income borrowers. This represents 18.1% of refinance loans by volume, which is comparable to the percentage of moderate-income families at 18.2%, and 9.8% by dollar volume, which is significantly below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 11.3% and significantly exceeded the 2015 aggregate of 10.8%. As Fifth Third's performance was comparable to proxy and significantly exceeded the aggregate of all lenders, the borrower distribution of refinance loans to moderate-income borrowers is excellent.

Fifth Third made 107 loans totaling $14.1 million to middle-income borrowers. This represents 17.3% of refinance loans by volume, which is comparable to the percentage of middle-income families at 19.6%, and 13.1% by dollar amount, which is below proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 17.8% and was comparable to the 2015 aggregate of 16.2%.

Fifth Third made 246 loans totaling $65.3 million to upper-income borrowers. This represents 39.7% of refinance loans by volume, which is comparable to the percentage of upper-income families at 41.6%, while the percentage of loans by dollar amount at 60.6% significantly exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 43.4% and was below the 2015 aggregate of 42.7%.

A community contact indicated it has been difficult for low- and moderate-income borrowers to refinance. With Fifth Third's excellent performance in refinance lending to low- and moderate-income borrowers, the overall borrower distribution of refinance loans is excellent.

Home Improvement Loans

Fifth Third made 18 loans totaling $1.1 million to low-income borrowers. This represents 18.9% of home improvement loans by volume, which is comparable to the percentage of low-income families at 20.6%, and 14.7% by dollar amount, which is below proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 8.9% and significantly exceeded the 2015 aggregate of 7.5%.

Given that Fifth Third's performance significantly exceeded the aggregate of all lenders and was comparable to proxy, the borrower distribution of home improvement loans to low-income borrowers is excellent.

Fifth Third made 20 loans totaling $1.3 million to moderate-income borrowers. This represents 21.1% of its home improvement loans by volume, which exceeded the percentage of moderate-income families at 18.2%, and is comparable to the dollar amount at 17.3%. The percentage of loans by volume exceeded the 2014 aggregate of 16.4% and exceeded the 2015 aggregate of 16.1%. Given that Fifth Third's performance exceeded the aggregate of all lenders and proxy, the borrower distribution of home improvement loans to moderate-income borrowers is excellent.

Fifth Third made 23 loans totaling $2.0 million to middle-income borrowers. This represents 24.2% of home improvement loans by volume, which exceeds the percentage of middle-income families at 19.6%, and is comparable by dollar amount at 26.0%. The percentage of loans by volume exceeded the 2014 aggregate of 19.5% and exceeded the 2015 aggregate of 19.5%.

Fifth Third made 33 loans totaling $3.1 million to upper-income borrowers. This represents 34.7% of home improvement loans by volume, which was below the percentage of upper-income families at 41.6%, and 40.2% by dollar amount, which was also below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 50.4% and was below the 2015 aggregate of 52.1%.

The overall borrower distribution of home improvement loans is excellent.

Community Development Loans

Fifth Third originated 18 community development loans totaling $130.5 million during the evaluation period as shown in the table below:

Economic Development		Revitalization and Stabilization		Community Services	
#	$	#	$	#	$
2	15,500,000	11	108,354,952	5	6,652,644

Community development lending in the assessment area represents 2.2% of the total dollar volume of community development loans originated by Fifth Third during the evaluation period. This ranks as Fifth Third's 14th highest percentage of community development lending during the evaluation period.

Given Fifth Third's deposit market share (3.6%) and the presence of several large financial institutions in the market and competition for community development loans, Fifth Third is a leader in community development lending in this assessment area.

Examples of community development lending include, but are not limited to:

- Working capital loan that promotes economic development by financing a business so it can expand employment by being able to add five new jobs
- Construction loan to help build a domestic violence shelter offering a multitude of services to low- and moderate-income women and children who have experienced various forms of abuse
- Renewal of a line of credit to help rehabilitate a property located in a designated Brownfield area for commercial purposes
- Working capital loan that supports a nonprofit that provides a multitude of services to low- and moderate-income children and families
- Working capital loans that support a nonprofit that helps low- and moderate-income students successfully enter colleges and universities or the workforce through a variety of programs
- Working capital loan that supports a nonprofit that provides a multitude of healthcare services to low- and moderate-income senior citizens

The economic development loans that help to expand employment is deemed to be responsive, as a community contact indicated there is a need for small businesses to be able to obtain loans. However, there were also no community development loans supporting affordable housing which is an expressed need in this assessment area. Loans supporting services to low- and moderate income individuals are also responsive due to the area's higher poverty rates and unemployment rates.

Flexible Lending Programs

Fifth Third had 373 flexible lending loans in this assessment area: 278 government loans, 17 down payment assistance loans, and 78 were other flexible lending programs. The following tables show the percentage by volume and by dollar amount of the three types of flexible lending programs made in this assessment area during the evaluation period and the distribution of Fifth Third's flexible lending programs within the assessment area by census tract income and by borrower income.

Flexible Loan Programs												
	Geographic Distribution											
	Low			Moderate			Middle			Upper		
	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units

Total	**10.5%**	**5.7%**	**20.6%**	**21.2%**	**16.4%**	**18.2%**	**26.5%**	**25.5%**	**19.6%**	**39.9%**	**50.6%**	**41.6%**

*Unknown tract data is not included in the above table.

Fifth Third's lending in low-income tracts by number exceeded the percentage of owner-occupied units in these tracts, especially for the various down payment assistance programs, while the percentage by dollar was below proxy. The percentage of lending by volume in moderate-income tracts was slightly less than the percentage of owner-occupied units. The percentage by dollar was also below proxy.

Fifth Third's lending by volume to low-income borrowers was below the percentage of low-income families in the assessment area; however, various down payment assistance programs substantially exceeded proxy. Lending by dollar amount was significantly below the percentage of low-income families in the assessment area. The percentage of lending by volume to moderate-income borrowers exceeded the percentage of moderate-income families and lending by dollar amount was below proxy.

Fifth Third made use of flexible lending practices is serving assessment area credit needs, as lending through flexible loan programs to moderate-income borrowers and in low-income tracts was excellent, while lending in moderate-income tracts was good. Lending to low-income borrowers was adequate.

Investment Test

Fifth Third's performance relative to the investment test in the assessment area is rated excellent.

Fifth Third made an excellent level of qualified community development investments and grants, particularly those not routinely provided by private investors. As such, Fifth Third was often in a leadership position. Fifth Third has 95 qualified investments totaling $68.7 million during the evaluation period. Shown in the table below are the total current period investments:

Affordable Housing		Economic Development		Revitalization and Stabilization		Community Services	
#	*$*	*#*	*$*	*#*	*$*	*#*	*$*
23	43,017,424	17	119,495	5	38,000	45	262,305

Also included in the total number of investments are five prior period investments totaling $25.3 million. Fifth Third made 4.2% of its total community development investments in this assessment area, which is greater than the percentage of total deposits at 2.5% and greater than the percentage of branch offices at 3.3%.

Fifth Third exhibits an excellent responsiveness to credit and community development needs in the assessment area, including investments in several affordable housing projects throughout the assessment area, which was an important need expressed by a community contact. Fifth Third made 73 donations totaling $429,180 that supported charitable organizations, local schools, small businesses, food banks, churches, and affordable housing. The majority (61.0%) of Fifth Third's donations supported services to low- and moderate-income individuals. Due to high poverty rates and high unemployment, there is a need in the area to support services targeted to low- and moderate-income individuals.

Service Test

Fifth Third's performance under the service test in this assessment area is rated excellent. Retail services are accessible and Fifth Third is a leader in providing community development services.

Retail Services

Fifth Third's record of opening and closing offices has not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and to low- and moderate-income households. Since the previous evaluation, one banking center was closed and none were opened, resulting in no net change in the number of banking centers in low- and moderate-income tracts. Delivery services are accessible to Fifth Third's geographies and individuals of different income levels.

Business hours and services provided do not vary in a way that inconveniences certain portions of the assessment area, including low- and moderate-income geographies or households and are consistent with the services and hours discussed in the "Institution" assessment.

Fifth Third maintains 43 banking centers within this assessment area, including one in low-, 12 in moderate-, 10 in middle-, and 20 in upper-income census tracts. Fifth Third's banking centers in this assessment area represent 27.2% of its banking centers in Florida and 3.3% of all its banking centers.

Fifth Third has a total of 43 full-service ATMs within this assessment area, including two in low-, 10 in moderate-, 11 in middle-, and 20 in upper-income census tracts.

The following table illustrates the percentage of banking centers and ATMs in low-, moderate-, middle-, and upper-income census tracts in comparison to the number and percentage of census tracts and the percentage of households and businesses in those tracts.

Geographic Distribution of Branches & ATMS

Assessment Area: FL Tampa

Tract Category	Branches				Stand Alone ATMs							Demographics			
	Total Branches				Total ATMs			Full Service ATMs		Cash only ATMs		Census Tracts		House holds	Total Businesses
			Open	Closed											
	#	%	#	#		#	%	#	%	#	%	#	%	%	%

Total	43	100.0%	0	1	Total	74	100.0%	43	100.0%	31	100.0%	701	100.0%	100.0%	100.0%
DTO	0		0	0	SA	74		43		31					

2016 FFIEC Census Data, 2010 ACS Data, and 2015 D&B Information
Closed branches/ATMs are only included in "closed" columns and are not included in any other totals.
DTO - Drive thru only is a subset of total branches
SA = Stand Alone ATM is a subset of total ATMs

Branch distribution within low-income tracts was considered adequate, because the distribution of branches was below the percentage of census tracts and households in these tracts. However, the branch distribution within moderate-income tracts was considered excellent.

Community Development Services

Fifth Third is a leader in providing community development services in this assessment area. During the evaluation period, Fifth Third employees provided 2,534 hours of community development service to local organizations serving low- and moderate-income individuals, which represents 2.1% of all community development services provided and equates to 1.22 annualized persons (ANP).

Affordable Housing	Economic Development	Revitalization and Stabilization	Community Services
# of Hours	***# of Hours***	***# of Hours***	***# of Hours***
194	897	6	1,437

Employees provided financial expertise through leadership positions in multiple community organizations that provide affordable housing and promote community and economic development and area revitalization and stabilization.

Community development services include 1,307 hours serving on boards and committees, 1,081 hours of providing financial literacy through local nonprofits and school programs, 130 hours providing technical assistance to non-profits and local business, and 16 hours participating in foreclosure prevention outreach.

Fifth Third is considered particularly responsive with regard to hours dedicated to financial literacy, foreclosure outreach prevention, and affordable housing activities. A community contact mentioned the need for more affordable housing and financial literacy training to provide ways for low- and moderate-income individuals to repair their credit. Also, the rate of foreclosures remains significantly higher in multiple counties throughout this assessment area compared to the national foreclosure rate.

METROPOLITAN AREAS
(Limited-scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE STATE OF FLORIDA

- **Cape Coral-Fort Myers MSA**
  - As of June 30, 2016, Fifth Third operated 18 branches in the assessment area, representing 11.4% of its branches in Florida.
  - As of June 30, 2016, Fifth Third had $1.2 million in deposits in this assessment area, representing a market share of 7.6% and 11.0% of its statewide deposits.
- **Jacksonville MSA**
  - As of June 30, 2016, Fifth Third operated 11 branches in the assessment area, representing 7.0% of its branches in Florida.
  - As of June 30, 2016, Fifth Third had $477,311 in deposits in this assessment area, representing a market share of 0.8% and 4.6% of it statewide deposits.
- **Lakeland MSA**
  - As of June 30, 2016, Fifth Third operated four branches in the assessment area, representing 2.5% of its branches in Florida.
  - As of June 30, 2016, Fifth Third had $82,027 in deposits in this assessment area, representing a market share of 1.3% and 0.8% of it statewide deposits.
- **Miami-Fort Lauderdale-West Palm Beach MSA**
  - As of June 30, 2016, Fifth Third operated seven branches in the assessment area, representing 4.4% of its branches in Florida.
  - As of June 30, 2016, Fifth Third had $680,091 in deposits in this assessment area, representing a market share of 0.3% and 6.6% of it statewide deposits.
- **Naples-Immokalee-Marco Island MSA**
  - As of June 30, 2016, Fifth Third operated 17 branches in the assessment area, representing 10.8% of its branches in Florida.
  - As of June 30, 2016, Fifth Third had $2.5 million in deposits in this assessment area, representing a market share of 16.0% and 23.7% of it statewide deposits.
- **North Port-Sarasota CSA**
  - As of June 30, 2016, Fifth Third operated 18 branches in the assessment area, representing 11.4% of its branches in Florida.
  - As of June 30, 2016, Fifth Third had $905,725 in deposits in this assessment area, representing a market share of 4.0% and 8.7% of it statewide deposits.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE STATE OF FLORIDA

Through the use of available facts and data, including performance and demographic information, each assessment area's performance was evaluated and compared with Fifth Third's performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendix F for information regarding these areas.

Assessment Area	Lending Test	Investment Test	Service Test
Cape Coral-Fort Myers MSA	Below	Below	Consistent
Jacksonville MSA	Below	Consistent	Consistent
Lakeland MSA	Below	Consistent	Consistent
Miami-Fort Lauderdale-West Palm Beach MSA	Below	Consistent	Consistent
Naples-Immokalee-Marco Island MSA	Below	Below	Below
North Port-Sarasota CSA	Below	Below	Consistent

For the lending test, Fifth Third received an "Outstanding" rating in Florida. Performance in all six of the limited-scope assessment areas was below Fifth Third's performance for the state. Although below the state performance, lending levels were good or adequate for the geographic and borrower distribution of loans. There was an excellent level of community development loans in the Miami-Fort Lauderdale-West Palm Beach assessment area and a good level of community development loans in the North Port-Sarasota assessment area. There were adequate levels of community development loans in the remaining four limited-scope assessment areas. A high level of lending gaps was identified in the Miami-Fort Lauderdale-West Palm Beach assessment area and moderate gaps in lending identified in the Jacksonville and Lakeland assessment areas. Overall, a low level of lending gaps was noted in the remaining three assessment areas.

For the investment test, Fifth Third received an "Outstanding" rating in Florida. While the investment activity was consistent to the state in three of the six limited-scope assessment areas, the performance in the Cape Coral-Fort Myers, Naples-Immokalee-Marco Island, and North Port-Sarasota assessment area was below Fifth Third's performance for the state. Although below the state performance, investment activity was good in the North Port-Sarasota and adequate in the Cape Coral-Fort Myers and Naples-Immokalee-Marco Island assessment areas. The weaker performance was primarily due to a lower level of qualified investments and contributions relative to Fifth Third's operational presence in the assessment area.

For the service test, Fifth Third received a "High Satisfactory" rating in Florida. Performance was consistent with the state in five of six limited-scope assessment areas and services in the Naples-Immokalee-Marco Island assessment area were below Fifth Third's performance for the state. Retail services were adequate in the Naples-Immokalee-Marco Island assessment area and good in the remaining five limited-scope assessment areas. The weaker retail services performance in the Naples-Immokalee-Marco Island assessment area was primarily due to less accessibility of delivery systems in lower-income geographies. Qualified community development services were excellent in three limited-scope assessment areas and good in the Cape Coral-Fort Myers, Naples-Immokalee-Marco Island, and North Port-Sarasota assessment areas. The weaker community development services performance was primarily due to a lower level of hours dedicated to providing qualified services relative to Fifth Third's operational presence in these assessment areas.

The performance in the limited-scope assessment areas did not change the overall state rating.

STATE OF GEORGIA

CRA RATING for State of Georgia: Satisfactory
The lending test is rated: High Satisfactory
The investment test is rated: Outstanding
The service test is rated: High Satisfactory

The major factors supporting this rating include:

- A good responsiveness to credit needs;
- A good geographic distribution of loans throughout the assessment area;
- An adequate distribution of loans among borrowers of different income levels and good to businesses of different revenue sizes;
- Exhibits a good record of serving the credit needs of low-income individuals and areas and very small businesses;
- A relatively high level of community development loans;
- Limited use of flexible lending practices in serving the assessment area's credit needs;
- An excellent level of qualified community development investments and grants;
- Often in a leadership position in providing community development investments and grants;
- Retail delivery systems are accessible to all geographies and individuals of different income levels and businesses of different revenue sizes;
- A record of opening and closing banking centers that has not adversely affected the accessibility of delivery systems;
- Banking services and hours that do not vary in a way that inconveniences any portions of the assessment areas; and,
- A leader in providing community development services.

SCOPE OF EXAMINATION

A full-scope review was conducted the Atlanta-Sandy Springs-Roswell MSA. A limited-scope review was performed on Augusta-Richmond County MSA. The time period, products, and affiliates evaluated for this assessment area are consistent with the scope discussed in the "Institution" section of this report.

The Atlanta-Sandy Springs-Roswell assessment area received greater weight in determining the CRA rating for the state. The Atlanta-Sandy Springs-Roswell area had the largest lending volume, number of banking centers, and share of deposits during the evaluation period. Lastly, the Atlanta-Sandy Springs-Roswell area represented 90.6% of the banking centers, 88.7% of deposits, and 94.0% of lending in Georgia.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE STATE OF GEORGIA

Lending activity accounted for 1.7% of the Fifth Third's total lending activity, while deposits accounted for 1.0% of the Fifth Third's total deposits. HMDA-reportable lending in Georgia represented 1.8% of the Fifth Third's total HMDA lending, while CRA-reportable lending represented 1.3% of the Fifth Third's total CRA lending. As of June 30, 2016, Fifth Third ranked 22nd among 237 insured institutions and has a deposit market share of 0.5% and 32 banking center locations within Georgia.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE STATE OF GEORGIA

Lending Test

Fifth Third's performance under the lending test within the assessment areas located in Georgia is rated "High Satisfactory." Fifth Third's lending reflects a good responsiveness to the credit needs in the Atlanta-Sandy Springs-Roswell assessment area and an adequate responsiveness to the credit needs in the Augusta-Richmond County assessment area.

Lending Activity

In Georgia, Fifth Third originated 1,855 HMDA loans totaling $510.7 million and 521 small business loans totaling $65.7 million during the evaluation period.

Lending activity is adequate in the Atlanta-Sandy Springs-Roswell and Augusta-Richmond County assessment areas.

Geographic and Borrower Distribution

The distribution of loans among geographies is good. The geographic distribution is good in in the Atlanta-Sandy Springs-Roswell assessment area and adequate in the Augusta-Richmond County assessment area. Overall, moderate gaps in lending were identified in the assessment areas in Georgia.

The distribution of loans among borrowers of different income levels is adequate and good to businesses of different revenue sizes. Borrower distribution is adequate in in the Atlanta-Sandy Springs-Roswell assessment area and good in the Augusta-Richmond County assessment area. The distribution of loans to businesses of different revenue sizes is good in the Atlanta-Sandy Springs-Roswell assessment area and adequate in the Augusta-Richmond County assessment area.

A detailed analysis for the geographic distribution and borrower-income distribution is provided with the analysis for each assessment area.

Community Development Loans

In Georgia, Fifth Third originated 22 community development loans totaling $211.7 million, which represented 3.5% of the Fifth Third's community development lending by dollar volume. Fifth Third was a leader in providing community development loans in the Atlanta-Sandy Springs-Roswell assessment area; however, Fifth Third made no community development loans in the Augusta-Richmond County assessment area, which is considered to be a poor level of community development loans. Therefore, Fifth Third makes a relatively high level of community development loans in Georgia.

Flexible Lending

Overall, Fifth Third consistently makes limited use of flexible lending practices within assessment areas located in Georgia.

Investment Test

Fifth Third's performance under the investment test within the assessment areas located in Georgia is rated "Outstanding." Fifth Third funded $76.3 million in qualified community development investments in Georgia during the evaluation period, consisting of $40.8 million obtained from new investments made during the current review period and $35.5 million from prior period investments. The majority of investments were LIHTCs. Fifth Third's level of qualified investments is excellent in the Atlanta-Sandy Springs-Roswell and Augusta-Richmond County assessment areas.

Additional information regarding performance under the investment test is provided in the respective analyses for each assessment area.

Service Test

Fifth Third's performance under the service test with the assessment areas located in Georgia is rated "High Satisfactory." Its performance was good in the Atlanta-Sandy Springs-Roswell and Augusta-Richmond County assessment areas.

For details regarding the institution's performance in the individual assessment areas, refer to the respective assessment area's Service Test section in this report.

Retail Services

Retail delivery systems are accessible to all geographies, including low- and moderate-income geographies, individuals of different income levels, and businesses of different revenue sizes in the institution's assessment areas. Retail service distribution is good in Atlanta-Sandy Springs-Roswell and Augusta-Richmond County assessment areas.

Fifth Third's record of opening and closing banking centers has not adversely affected the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals. No branches were opened or closed in low- or moderate-income tracts in Georgia during the evaluation period.

Banking services and business hours do not vary in a way that inconveniences any portions of the bank's assessment areas and are consistent with the services and hours discussed in the "Institution" assessment.

Community Development Services

Fifth Third provides a relatively high level of community development services. Fifth Third's performance is excellent in the Atlanta-Sandy Springs-Roswell assessment area and good in the Augusta-Richmond County assessment area.

METROPOLITAN AREA
(Full-scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE ATLANTA-SANDY SPRINGS-ROSWELL GA MSA #12060

The Atlanta-Sandy Springs-Roswell GA MSA includes Clayton, Cobb, DeKalb, Douglas, Forsyth, Fulton, Gwinnett, Paulding, Rockdale, and Walton counties. Fifth Third's assessment area excludes Barrow, Bartow, Butts, Cherokee, Coweta, Dawson, Fayette, Haralson, Heard, Henry, Jasper, Lamar, Morgan, Meriwether, Newton, Pickens, Pike, and Spalding counties. The assessment area is comprised of 86 low-, 179 moderate-, 227 middle-, and 249 upper-income tracts. There are also five tracts with no income designation that are primarily composed of correctional institutions, military establishments, education facilities, or medical establishments that do not report income information.

As of June 30, 2016, Fifth Third ranked 16th out of 72 institutions with 0.7% of the deposit market share. SunTrust Bank had the majority of the market share with 30.1% of deposits, followed by Bank of America, Wells Fargo Bank, BB&T, and Synovus Bank with 19.6%, 19.1%, 5.0%, and 2.4% of the market share, respectively. Deposits in this assessment area accounted for 0.9% of the Fifth Third's total deposits, which was 88.7% of deposits within the state and the 22nd highest percentage of deposits within Fifth Third's CRA footprint.

From January 1, 2014 through June 30, 2016, Fifth Third originated 1,727 HMDA loans and 507 CRA loans, which represented 1.7% and 1.3% of the total loans originated during the evaluation period, respectively. This was the 16th largest HMDA market and 17th largest CRA market for loans originated during the evaluation period.

In 2015, Fifth Third Mortgage Company ranked 55th among 745 HMDA reporters in the assessment area and Fifth Third ranked 189th. Wells Fargo Bank, Quicken Loans, SunTrust Bank, JPMorgan Chase Bank, and Fidelity Bank were the top five HMDA lenders in the assessment area. Fifth Third ranked 29th of 175 CRA reporters in the assessment area in 2015. The top four CRA lenders in the assessment area were American Express, Wells Fargo Bank, Bank of America, and Capital One. These lenders are mostly issuers of credit cards and their CRA loans primarily consist of commercial credit card accounts.

Four community contact interviews were conducted to provide additional information regarding the assessment area. The first contact, representing a community development organization that serves Walton County, stated the local economy is improving. In the past 24 months, companies have invested $2.5 billion in new industry. The area is attracting new businesses that will be hiring several hundred employees in the next year; as a result, there is a need for new housing construction and construction-permanent loans. The contact stated there is also a need for banks to provide more small-dollar type loans for small businesses. The contact believed financial institutions are adequately meeting area credit needs.

The second contact, representing a community development organization that serves Cobb County, stated the county lost nearly 7,000 jobs during the recession (2008-2012). However, the contact believed that about 80.0% of the lost positions have been recovered. Several economic development initiatives are being executed along the I-75/I-285 corridor (e.g., new stadium and several planned office buildings). The contact stated there are opportunities for banks to ease credit standards for small businesses and startups and fund more small-dollar loans to these types of businesses. The contact believed banks are generally meeting the credit needs of the area, particularly community banks.

The third contact, representing a neighborhood development and affordable housing organization in the Atlanta area, stated Georgia's foreclosure rates have improved in the last year (by at least 15.0%) and housing values are on the rise. The contact stated the number of people who are seriously delinquent on their mortgages continues to decrease, but lower-income people continue to struggle to pay their mortgages because incomes have not bounced back. While banks have lessened some earlier restrictions, loan modification assistance requires a good deal of paperwork and takes about 90 days to get approved. It is an exhaustive process, thus many people procrastinate in starting the process. The contact believed housing markets in lower-income neighborhoods are not rebounding as quickly due to a lack of affordable, quality homes in the area. Housing that was previously affordable has increased 40.0% within the past several years, and gentrification has played a significant role in these extreme price increases. Gentrification tends to push low- and moderate-income people and families out of their neighborhoods and eventually prices them out being able to live there. The contact stated in addition to banks investing in LIHTC programs that support affordable rental-housing for lower-income individuals, banks could make it easier for lower-income individuals to get low-cost loans to either rehabilitate existing housing or construct new housing. Increased financial access for this purpose could be incredibly impactful in helping more lower-income people own their homes.

The final contact, representing an organization that provides services to low-income individuals within Atlanta, stated the majority of individuals in the community do not have credit or are unbanked. As a result, financial literacy is needed in this community. The contact indicated Fifth Third and Delta Community Credit Union provide financial literacy programs in the community. The contact also stated monetary donations are also important to this organization to help meet its obligations.

Population Characteristics

According to 2010 U.S. Census data, the population in the assessment area was 4.0 million. About 30.8% of the population lived in low- and moderate-income tracts. In addition, 73.6% of the population was 18 years of age or older, the legal age to enter into a contract.

As of July 1, 2015, the Atlanta-Sandy Springs-Roswell MSA is the ninth largest in terms of population in the nation.[121] Fulton County is the largest county in the assessment area and the most populous county in Georgia.[122] Atlanta (located in Fulton County) is the largest city in the MSA and is the 39th most populous city in the U.S. Atlanta has 463,878 residents, its population growth increased by 10.1% between 2000 and 2015. In contrast, the cities of Sandy Springs, Roswell, and Marietta only have 105,330; 94,501; and 59,067 residents, respectively.[123]

The following table shows the population in the assessment area by county for 2010 and 2015 with the percentage of the population increase.[124] The population within the assessment area experienced positive growth between 2010 and 2015, with Forsyth County experiencing the greatest growth and DeKalb County experiencing the least growth in population during this time period. According to Moody's Analytics, by 2020, the Atlanta MSA is forecasted to be the eighth largest metropolitan area in the county with a population of nearly 6.4 million. Net migration to the Atlanta MSA from 2015 to 2020 is projected to reach nearly 122,700 averaging nearly 25,000 annually. Overall, this assessment area has a very robust domestic and foreign in-migration, which contributes to an increasing demand for employment and housing.

County	2010 Population	2015 Population	Population Percent Change
Clayton	192,162	273,955	42.6%
Cobb	521,535	741,334	42.1%
DeKalb	537,119	734,871	36.8%
Douglas	95,883	140,733	46.8%
Forsyth	118,897	212,438	78.7%

Income Characteristics

In 2010 the MSA median family income was greater ($68,992) than Georgia's at $58,790. The median family income in the MSA increased between 2014 and 2015 and decreased by nearly 5.0% between 2015 and 2016. Moody's Analytics noted through 2020, Atlanta's median household income growth of 3.4% annually will outpace that of the U.S. and will place Atlanta in the top quartile for MSA income growth.

Borrower Income Levels
Atlanta-Sandy Springs-Roswell, GA MSA

Poverty rates increased in each county in the assessment area from 1999 to 2015.[125] Forsyth and Paulding counties had the lowest poverty rates in 1999 and 2015. Fulton County had the highest poverty rate in 1999 and Clayton County had the highest rate in 2015. Clayton County also experienced the largest increase in poverty rate during the evaluation period. In 2015, Clayton and DeKalb counties had poverty rates higher than Georgia's; in addition, poverty rates for Clayton, DeKalb, Fulton, Rockdale, and Douglas counties and Georgia all exceeded the national poverty rate. According to the U.S. Census Bureau, the national poverty rate in 2015 was 13.5%, down 1.3 percentage points from 14.8% in 2014. For most demographic groups, the 2015 poverty rates and number of people in poverty decreased from 2014.[126] The following table shows the poverty rates for 1999[127] and 2015.

[125] U.S. Department of Agriculture Economic Research Service Poverty Rates (for 1999 and 2015): https://data.ers.usda.gov/reports.aspx?ID=17826

[127] 1999 National Poverty Rate: http://www.census.gov/prod/2000pubs/p60-210.pdf

County	1999 Poverty Rate	2015 Poverty Rate	Change
Clayton	10.1%	23.3%	130.7%
Cobb	6.5%	11.4%	75.4%
DeKalb	10.8%	17.8%	64.8%
Douglas	7.8%	14.1%	80.8%
Forsyth	5.5%	6.3%	14.5%
Fulton	15.7%	16.0%	1.9%
Gwinnett	5.7%	12.6%	121.1%
Paulding	5.5%	8.8%	60.0%
Rockdale	8.2%	15.9%	93.9%
Walton	9.7%	12.7%	30.9%
Georgia	**13.0%**	**17.2%**	**32.3%**
U.S.	**11.8%**	**13.5%**	**14.4%**

Housing Characteristics

According to 2010 U.S. Census data, there are 1.6 million housing units and 942,615 families in the assessment area. From an income perspective, 33.2% of housing units, 20.8% of owner-occupied units, and 28.0% of families are located in low- or moderate-income tracts. Over three-quarters of the housing units in the low-income census tracts are either rental or vacant (78.0%) and only 22.0% are owner-occupied. In the moderate-income census tracts, well over half of the housing units are either rental or vacant (59.2%) and 40.8% are owner-occupied. Therefore, based on the number of housing units compared to the number of families in low- and moderate-income census tracts, there appear to be credit-related opportunities for Fifth Third to provide various aspects of affordable housing in the assessment area. Additionally, a community contact stated there is a need for banks to make it easier for lower-income individuals to obtain low-cost loans to either rehabilitate existing housing or construct new housing. Increased financial access for this purpose could be incredibly impactful in helping more lower-income people own their homes.

The 2010 U.S. Census data shows the median age of housing stock in the assessment area was only 24 years old and only 5.5% of the stock was built before 1950. However, within the assessment area, the median age of housing stock was 37 years in low-income tracts and 28 years in moderate-income tracts. Therefore, there appears to be opportunity for Fifth Third to provide home improvement and rehabilitation loans in these lower-income areas. As stated above, a community contact stated there is a need for home improvement loans and construction loans to build new housing in lower-income areas.

According to 2010 U.S. Census data, the median housing value in the assessment area was $196,860 with an affordability ratio of 29.60. The affordability ratio is derived by dividing the median household income by the median housing value. The higher the affordability ratio, the more affordable a home is considered. Median housing values decreased between 2010 and 2011-2015 and median family incomes increased; as a result, housing became more affordable across the assessment area. However, Moody's Analytics noted the eroding affordability hurts in-migration.

During the evaluation period, the most affordable housing was in Clayton County and the least affordable was in Fulton County. Median gross rents increased across the assessment area, with renters in Paulding County experiencing the largest increase in rental rates and renters in Rockdale County experiencing a slight decrease in gross rental rates. In 2010, about 49.1% of renters across the assessment area had rent costs greater than 30.0% of income. Increasing rental rates may make it harder for potential homebuyers to save for a down payment for a home. The table below presents housing characteristics from the U.S. Census data between 2010 and 2015 in the assessment area and Georgia.

County	2010 Median Housing Value	2010 Affordability Ratio	2011-2015 Median Housing Value	2011-2015 Affordability Ratio	2010 Median Gross Rent	2011-2015 Median Gross Rent	Percent of Change
Clayton	$127,800	33.89	$85,200	48.05	$865	$881	1.8%
Cobb	$211,000	31.05	$197,400	33.37	$933	$1,006	7.8%
DeKalb	$190,000	27.03	$163,000	31.52	$922	$991	7.5%
Douglas	$157,300	35.51	$121,300	44.42	$912	$949	4.1%
Forsyth	$276,700	31.66	$267,300	33.23	$1,078	$1,172	8.7%
Fulton	$253,100	22.41	$241,300	23.71	$929	$1,001	7.8%
Gwinnett	$194,200	32.55	$167,700	35.95	$954	$1,043	9.3%
Paulding	$149,600	41.68	$133,500	45.03	$907	$1,018	12.2%
Rockdale	$169,900	32.83	$140,000	36.04	$933	$916	-1.8%
Walton	$164,900	31.37	$152,900	35.61	$784	$845	7.8%
Georgia	**$161,400**	**30.57**	**$148,100**	**33.50**	**$808**	**$879**	**8.8%**

According to Bankrate.com,[128] Georgia ranked 16th in foreclosure filings in November 2016. The national average for foreclosure filings was one in every 1,533 housing units. The following table contains information about foreclosure filings in the assessment area, according to Realtytrac:[129]

[128] Bankrate.com: http://www.bankrate.com/finance/real-estate/foreclosures-by-state/default.aspx
[129] Realtytrac: http://www.realtytrac.com/statsandtrends/foreclosuretrends/

Geography Name	Ratio of Properties Receiving Foreclosure Filings in November 2016
Clayton	1:700
Cobb	1:1,865
DeKalb	1:1,549
Douglas	1:829
Forsyth	1:2,318
Fulton	1:1,643
Gwinnett	1:1,538
Paulding	1:1,500
Rockdale	1:1,121
Walton	1:1,252
Georgia	**1:1,645**
U.S.	**1:1,533**

In November 2016, Clayton and Douglas counties had the highest rates of foreclosure and Forsyth County had the lowest. In Fulton County, Atlanta had the fourth-highest foreclosure rate among municipalities at 1:1,686. A community contact mentioned the improving rates of foreclosure. As shown above, half the counties (including Fulton County) in this assessment area and Georgia have foreclosure rates that are below the nationwide foreclosure rate.

Building permits for this MSA, Georgia, and the nation are included in the following table for 2014, 2015, and 2016.[130]

Geography	2014	2015	Percent of Change 2014-2015	2016	Percent of Change 2015-2016
Atlanta-Sandy Springs-Roswell MSA	26,683	30,342	13.7%	36,121	19.0%
Georgia	**39,673**	**45,549**	**14.8%**	**51,052**	**12.1%**
U.S.	**1,052,124**	**1,182,582**	**12.4%**	**1,190,191**	**0.6%**

The assessment area experienced increases in the number of housing permits issued between 2014 and 2015 and, to a greater extent, between 2015 and 2016. The increase in the number of permits could indicate there is an increasing demand for home purchase loans in this area. Two community contacts mentioned the need for new housing construction and construction-permanent loans in the area to meet the growing in-migration of residents. Moody's Analytics noted that construction remains strong, as builders accommodate robust residential and commercial demand.

[130] U.S. Census Bureau Building Permits Survey: http://www.census.gov/construction/bps/

Labor, Employment, and Economic Characteristics

According to Moody's Analytics, the Atlanta metropolitan area economy is in expansion, primarily due to diverse economy, distribution and cultural center, business-friendly environment, and strong demographics. The Atlanta area has a large and well-educated workforce pool and low corporate tax rates that aid in attracting new businesses and residents to the area. Atlanta is considered to be a major logistics hub, as 80.0% of the U.S. population can be reached from Atlanta in two days by truck. Additionally, Atlanta has proximity to the Port of Savannah (one of the largest regional container ports on the eastern seaboard), which is a bonus for trade and is considered to be a leading U.S. railroad hub. Atlanta is also considered to be a hub for research and development in that partnerships with local researchers have been instrumental to attracting businesses to the metropolitan area.

According to the Metro Atlanta Chamber,[131] Metropolitan Atlanta ranks third among cities with the highest Fortune 500 concentration, behind New York and Houston. In 2016, this MSA was home to 16 headquarters, including 14 in Atlanta.

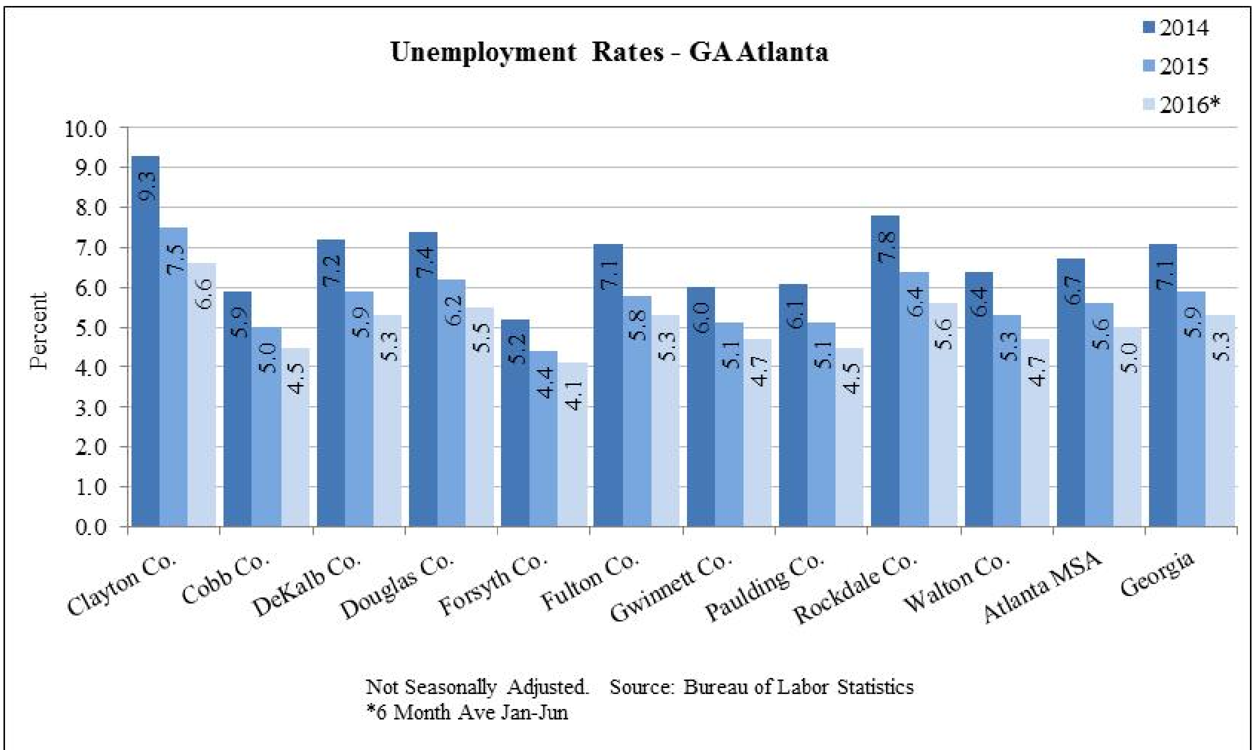
Atlanta MSA Fortune 500 Companies (2016)		
Rank	**Company**	**Annual Revenue**
28	Home Depot	$88.5 billion
48	United Parcel Service (UPS)	$58.4 billion
62	Coca-Cola Company	$44.3 billion
68	Delta Air Lines	$40.7 billion
162	The Southern Company	$17.5 billion
183	Genuine Parts Company (GPC)	$15.3 billion
249	First Data	$11.5 billion
320	HD Supply Holdings	$8.8 billion
323	**Veritiv Corporation**[132]	$8.7 billion
329	SunTrust Banks	$8.5 billion
360	AGCO Corporation	$7.5 billion
393	Asbury Automotive Group	$6.6 billion
397	Coca-Cola European Partners	$6.5 billion
409	NCR Corporation	$6.4 billion
433	PulteGroup, Inc.	$6.0 billion
434	Newell Brands	$5.9 billion

According to Moody's Analytics the top 15 employers in the MSA in 2016 were:

[131] Metro Atlanta Chamber: www.metroatlantachamber.com/resources/most-popular/fortune-500-fortune-1000-in-metro-atlanta
[132] Bold type indicates company new to the list in 2016. Veritiv was established in 2014 as a result of a merger within International Paper Company.

Company	Number of Employees
Delta Air Lines	29,970
Emory University	27,090
Wal-Mart Stores	26,000
AT&T	16,794
WellStar Health System	14,000
Piedmont Healthcare	11,000
Publix Supermarkets	9,819
Georgia Institute of Technology	9,564
Northside Hospital	9,467
Children's Healthcare of Atlanta	9,200
Home Depot	9,000
Emory Healthcare	8,648
Centers for Disease Control	8,639
Coca-Cola Company	8,000
Coreslab Structures	7,571

The following table illustrates the average unemployment rates for 2014, 2015, and 2016 across the MSA and Georgia.



Unemployment rates declined each year in the assessment area and Georgia, with Clayton County having the highest and Forsyth County having the lowest unemployment rates during this time period. Two community contacts stated that since the recession, about 80.0% of the lost jobs in this area have been recovered; however, lower-income people continue to struggle to pay their mortgages because incomes have not rebounded to pre-recession levels.

According to *WSB-TV Atlanta*, in 2015 Coca-Cola Company announced 1,800 layoffs in North America and internationally; about 500 jobs are in Atlanta. The layoffs are to streamline and simply the company's structure and accelerate the growth of its global business. An economics professor stated while 500 local layoffs is a significant number of people, Atlanta has more than 2.5 million people working here and added nearly 60,000 jobs to payrolls over the past 12 months.[133] According to *The Atlanta Journal-Constitution*, even as Georgia's unemployment rate declines, companies continue to shut down or shed operations in moves impacting thousands of employees. The annual job cut total has risen steadily in recent years, from 6,820 in 2012 to 10,683 in 2015. However, by other measures Georgia's job market has vastly improved. Unemployment is falling, employers are adding tens of thousands of jobs, and pay is rising at a modest pace. The rising job cuts could reflect the trend in the large firms, as the law requires them to report job cuts and large firms have been hit harder by weakness in overseas markets and mergers. Filed layoff notices with Worker Adjustment and Retraining Notification Act (WARN) in 2016 include notices from the following companies warning of job cuts:

- Georgia Power (Atlanta) – 270 employees , layoff
- WellStar Health Systems (Marietta) – 521 employees, layoff
- Concentrix Corp. (Norcross/Gwinnett County) – 454 employees, facility closure
- MARTA (Atlanta) – 371 employees, layoff
- Delta Global Services (Atlanta) – 275 employees, contract.[134]

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE ATLANTA-SANDY SPRINGS-ROSWELL GA MSA

Lending Test

Fifth Third's performance under the lending test in this assessment area is rated good. Fifth Third has demonstrated a good responsiveness to the credit needs of the community. In addition, Fifth Third originated 22 community development loans totaling $211.7 million. Fifth Third has a good geographic distribution of loans and moderate lending gaps. Fifth Third has a good distribution among borrowers of different income levels and to businesses of different revenue sizes. Fifth Third exhibits a good record of serving the credit needs of highly economically disadvantaged areas in its assessment area, low-income individuals, and businesses with gross annual revenues of $1 million or less. The excellent level of community development loans and limited use of flexible lending practices augmented Fifth Third's performance in this assessment area.

Greatest consideration was given to the evaluation of home purchase lending based on the overall volume of lending, followed by refinance and small business lending. There were an insufficient number of home improvement loans to analyze performance. Details of Fifth Third's residential mortgage and small business lending, as well as information regarding lending by peers, can be found in Appendix E.

Lending Activity

Fifth Third's lending activity reflects an adequate responsiveness to the credit needs within the assessment area. Fifth Third originated 974 home purchase, 721 refinance, 30 home improvement, 507 small business, and 22 community development loans during the evaluation period. The percentage of Fifth Third's total lending at 1.6% exceeded the percentage of total deposits at 0.9% in this area.

Fifth Third made 82.8% of the HMDA and 90.4% of the CRA lending within its designated assessment area. However, while the majority of loans were made within the assessment area, a concentration of lending was identified in the excluded Cherokee County with 132 loans. No concentrations of lending were identified in other excluded counties within the assessment area.

In addition to lending, Fifth Third modified existing loans to borrowers. Refer to the distribution of HAMP and other real-estate secured modifications within the assessment area by census tract income and by borrower income.

	Distribution by Borrower Income							
	Low		Mod		Middle		Upper	
	#	%	#	%	#	%	#	%
Other Real Estate Secured Modifications	11	21.2%	16	30.8%	13	25.0%	12	23.1%
Percentage of Families by Family Income		***21.8%***		***16.6%***		***18.7%***		***42.9%***

*Unknown tract data is not included in the above table.

There were not enough HAMP modifications in this assessment area for a meaningful analysis. Also, there was an insufficient volume of other modifications to analyze the distribution of modifications by census tract income. However, the percentage of other modifications made to low-income borrowers was comparable to the percentage of low-income families in the assessment area and the percentage of other modifications to moderate-income borrowers was substantially higher than the percentage of moderate-income families. Therefore, modifications helped Fifth Third's ability to reach low- and moderate-income borrowers.

Geographic Distribution of Loans

Fifth Third's overall distribution of lending among geographies is good. Home purchase and refinance lending are adequate. Small business lending is excellent. Further, moderate lending gaps were noted for the assessment area, as shown in the following table.

Tract Income Levels	Number of Tracts	Tracts with No Loans	Penetration
Low	86	56	34.9%
Moderate	179	58	67.6%
Middle	227	39	82.8%
Upper	249	13	94.8%
Unknown	5	5	0.0%
Total	**746**	**171**	**77.1%**

While overall lending gaps are considered reasonable, there was a significant level of lending gaps in low-income tracts. However, most of the low-income tracts with no loans are located in Atlanta, and these tracts have low owner-occupancy rates (22.0%) and high rental/vacancy rates (78.0%).

Home Purchase Loans

Fifth Third made 17 home purchase loans totaling $1.9 million in low-income tracts. This represents 1.7% of home purchase loans by volume, which is significantly below the percentage of owner-occupied units in these tracts at 3.4%, and 0.7% by dollar amount, which is substantially below proxy. The percentage of loans by volume was below the 2014 aggregate at 2.0% and slightly exceeded the 2015 aggregate at 2.0%. Since Fifth Third's performance was below proxy, but exceeded the aggregate of all lenders, the geographic distribution of home purchase loans in low-income tracts is good.

Fifth Third made 95 home purchase loans totaling $14.1 million in moderate-income tracts. This represents 9.8% of home purchase loans by volume, which is significantly below the percentage of owner-occupied units in these tracts at 17.4%, and 5.2% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate at 12.7% and was below the 2015 aggregate at 13.4%. Given that Fifth Third's performance was below proxy and the aggregate of all lenders, the geographic distribution of home purchase loans in moderate-income tracts is adequate.

Fifth Third made 301 home purchase loans totaling $64.1 million in middle-income tracts. This represents 30.9% of home purchase loans by volume, which is below the percentage of owner-occupied units in these tracts at 37.5%, and 23.5% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate of 35.6% and was below the 2015 aggregate of 37.0%.

Fifth Third made 561 home purchase loans totaling $192.2 million in upper-income tracts. This represents 57.6% of home purchase loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 41.7%, and 70.6% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 49.7% and exceeded the 2015 aggregate of 47.6%.

Overall, the geographic distribution of home purchase loans is adequate.

Refinance Loans

Fifth Third made 11 refinance loans totaling $1.9 million in low-income tracts. This represents 1.5% of refinance loans by volume and 0.9% by dollar amount, which is below the percentage of owner-occupied units at 3.4%. The percentage of loans by volume was below the 2014 aggregate at 1.9% and exceeded the 2015 aggregate at 1.8%. As Fifth Third's performance exceeded the aggregate of all lenders and only 22.0% of the housing units in low-income tracts are owner occupied, the geographic distribution of refinance loans in low-income tracts is good.

Fifth Third made 49 refinance loans totaling $6.4 million in moderate-income tracts. This represents 6.8% of refinance loans by volume and 3.2% by dollar amount, which is significantly below than the owner-occupied units at 17.4%. The percentage of loans by volume was significantly below the 2014 aggregate at 14.0% and was significantly below the 2015 aggregate at 11.4%. As Fifth Third's lending was significantly below proxy and the aggregate of all lenders, the geographic distribution of refinance loans in moderate-income tracts is considered poor.

Fifth Third made 204 refinance loans totaling $38.7 million in middle-income tracts. This represents 28.3% of refinance loans by volume, which is less than the owner-occupied units in these tracts at 37.5%. Refinance loans by dollar amount (19.3%) was also below proxy. The percentage of loans by volume was below the 2014 aggregate at 35.7% and was below the 2015 aggregate at 33.7%.

Fifth Third made 457 refinance loans totaling $153.5 million in upper-income tracts. This represents 63.4% of refinance loans by volume, which exceeds the owner-occupied units in these tracts at 41.7%, and 76.6% by dollar amount, which exceeded proxy. The percentage of loans by volume also exceeded the 2014 aggregate at 48.4% and exceeded the 2015 aggregate at 53.2%.

Overall, the geographic distribution of refinance loans is adequate.

Small Business Loans

Fifth Third made 23 small business loans totaling $2.6 million in low-income tracts. This represents 4.5% of small business loans by volume, which is comparable to the percentage of businesses in these tracts at 5.0%, and 3.9% by dollar amount, which is comparable to proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 4.6% and was comparable to the 2015 aggregate of 4.7%. Given that Fifth Third's performance was comparable to proxy and the aggregate of all lenders, the geographic distribution of small business loans in low-income tracts is good.

Fifth Third made 126 small business loans totaling $20.8 million in moderate-income tracts. This represents 24.9% of small business loans by volume, which exceeds the percentage of businesses in these tracts at 20.0%, and 32.1% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 17.6% and exceeded the 2015 aggregate of 18.0%. Given that Fifth Third's performance exceeded the aggregate of all lenders and proxy, the geographic distribution of small business loans in moderate-income tracts is excellent.

Fifth Third made 132 small business loans totaling $11.0 million in middle-income tracts. This represents 26.0% of small business loans by volume, which is below the percentage of businesses in these tracts at 33.0%, and 16.9% by dollar amount, which is below proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 28.7% and was below the 2015 aggregate of 28.9%.

Fifth Third made 226 small business loans totaling $30.5 million in upper-income tracts. This represents 44.6% of small business loans by volume, which exceeded the percentage of businesses in these tracts at 42.0%, and 47.0% by dollar amount, which exceeded proxy. The percentage of loans by volume was below the 2014 aggregate of 48.0% and was below the 2015 aggregate of 47.4%.

Overall, the geographic distribution of small business loans is excellent.

Distribution by Borrower Income and Revenue Size of the Business

The distribution of loans is adequate based on borrower income and good for businesses of different revenue sizes. The borrower distribution is poor for home purchase loans and adequate for refinance loans.

Home Purchase Loans

Fifth Third made 36 loans totaling $3.4 million to low-income borrowers. This represents 3.7% of home purchase loans by volume and 1.2% by dollar amount, which is significantly below the percentage of low-income families at 21.8%. The percentage of loans by volume was below the 2014 aggregate of 8.1% and was below the 2015 aggregate of 7.4%. Given that Fifth Third's performance was significantly below proxy and below the aggregate of all lenders, the borrower distribution of home purchase loans to low-income borrowers is poor.

Fifth Third made 78 loans totaling $10.7 million to moderate-income borrowers. This represents 8.0% of home purchase loans by volume and 3.9% by dollar amount, which is significantly below the percentage of moderate-income families at 16.6%. The percentage of loans by volume was significantly below the 2014 aggregate of 16.5% and was significantly below the 2015 aggregate of 16.9%. Given that Fifth Third's performance was significantly below proxy and aggregate of all lenders, the borrower distribution of home purchase loans to moderate-income borrowers is poor.

Fifth Third made 97 loans totaling $18.1 million to middle-income borrowers. This represents 10.0% of home purchase loans by volume, which is less than the percentage of middle-income families at 18.7%, and 6.6% by dollar amount, which is significantly below proxy. The percentage of loans by volume was below the 2014 aggregate of 17.1% and was below the 2015 aggregate of 17.3%.

Fifth Third made 475 loans totaling $177.1 million to upper-income borrowers. This represents 48.8% of home purchase loans by volume, which exceeds the percentage of upper-income families at 42.9%, and 65.0% of loans by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 38.0% and was below the 2015 aggregate of 37.6%.

Overall, the borrower distribution of home purchase loans is poor.

Refinance Loans

Fifth Third made 31 loans totaling $3.2 million to low-income borrowers. This represents 4.3% of refinance loans by volume, which is significantly below percentage of low-income families at 21.8%. The percentage of loans by dollar amount in these geographies at 1.6% is also significantly below proxy. The percentage of loans by volume was below the 2014 aggregate of 6.9% and was below the 2015 aggregate of 5.0%. Given that Fifth Third's performance was significantly below proxy and the aggregate of all lenders, the borrower distribution of refinance loans to low-income borrowers is adequate.

Fifth Third made 49 loans totaling $6.7 million to moderate-income borrowers. This represents 6.8% of refinance loans by volume, which is significantly below the percentage of moderate-income families at 16.9%, and 3.4% by dollar amount, which is also significantly below proxy. The percentage of loans by volume was below the 2014 aggregate of 12.3% and the 2015 aggregate of 10.7%. Given that Fifth Third's performance was significantly below proxy and below the aggregate of all lenders, the borrower distribution of refinance loans to moderate-income borrowers is adequate.

Fifth Third made 104 loans totaling $16.4 million to middle-income borrowers. This represents 14.4% of refinance loans by volume, which is below the percentage of middle-income families at 18.7%, and 8.2% by dollar amount, which is also below proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 15.7% and was below the 2015 aggregate of 15.6%.

Fifth Third made 342 loans totaling $132.2 million to upper-income borrowers. This represents 47.4% of refinance loans by volume, which exceeds the percentage of upper-income families at 42.9%. The percentage of loans by dollar amount at 66.0% significantly exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 40.0% and was slightly below the 2015 aggregate of 42.5%.

Overall, the borrower distribution of refinance loans is adequate.

Small Business Loans

The distribution of small business loans to businesses of different sizes is good considering Fifth Third's performance relative to the aggregate of all lenders. Fifth Third was able to make 57.4% of small business loans to businesses with revenues of $1 million or less. Fifth Third's performance in 2014 exceeded the 2014 aggregate of 51.9% and was comparable to the 2015 aggregate of 56.6%, but was significantly below the percentage of small businesses in the assessment area at 93.2%. Also, Fifth Third made a reasonable percentage of small-dollar loans (74.6%) up to $100,000, indicating a willingness to lend in smaller amounts typically requested by small businesses. In addition, several community contacts indicated there is a need for small-dollar loans to small businesses.

Community Development Loans

Fifth Third originated 22 community development loans totaling $211.7 million during the evaluation period as shown in the table below:

Affordable Housing		Economic Development		Revitalization and Stabilization		Community Services	
#	$	#	$	#	$	#	$
2	23,003,998	9	52,920,000	10	134,926,984	1	800,000

Community development lending in the assessment area represents 3.5% of the total dollar volume of community development loans originated by Fifth Third during the evaluation period. This ranks as Fifth Third's seventh-highest percentage of community development lending during the evaluation period. Fifth Third's performance is especially strong because of the high competition for community development loans and a number of large national banks in the area. Fifth Third only has 0.7% of the deposit market share. As such, Fifth Third is considered a leader in community development lending.

Examples of community development lending include, but are not limited to:

- Loan to a private equity firm that partners with developers and investors who develop affordable housing and expand renewable energy through the use of state tax credits
- Multiple working capital loans that promote economic development by financing businesses to support job retention, add new jobs, and promote growth to continue operations, such as one company was able to add 17 new jobs and retain 206 jobs in a low-income geography
- Loan that supports eligible activities in a designated Empowerment Zone

- Working capital loan that supports a nonprofit that provides creative arts activities to low- and moderate-income students to encourage innovation

The affordable housing loans were deemed to be responsive, as community contacts specifically mentioned the need for these types of loans. The economic development loans were also considered to be responsive, since job creation is a significant need in this assessment area.

Flexible Lending Programs

Fifth Third had 170 flexible lending loans in this assessment area: 119 government loans, nine down payment assistance loans, and 42 other flexible lending programs. The following tables show the percentage by volume and by dollar amount of the three types of flexible lending programs made in this assessment area during the evaluation period and the distribution of Fifth Third's flexible lending programs within the assessment area by census tract income and by borrower income.

Flexible Loan Programs												
	Geographic Distribution											
	Low			Moderate			Middle			Upper		
	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units
Government Loan Programs	0.8%	0.5%	3.4%	10.1%	7.1%	17.4%	51.3%	43.5%	37.5%	37.8%	48.9%	41.7%

Other Flexible Lending Programs	0.0%	0.0%	3.4%	11.9%	8.9%	17.4%	42.9%	40.0%	37.5%	45.2%	51.1%	41.7%
Total	**2.4%**	**1.5%**	**3.4%**	**12.4%**	**8.2%**	**17.4%**	**47.1%**	**41.8%**	**37.5%**	**38.2%**	**48.5%**	**41.7%**

*Unknown tract data is not included in the above table.

Flexible Loan Programs												
	Borrower Distribution											
	Low			Moderate			Middle			Upper		
	% - #	% - $	% Fam	% - #	% - $	% Fam	% - #	% - $	% Fam	% - #	% - $	% Fam
Government Loan Programs	15.1%	8.5%	21.8%	21.8%	15.9%	16.6%	25.2%	23.5%	18.7%	36.1%	51.1%	42.9%
Down Payment Assistance Programs	44.4%	36.0%	21.8%	22.2%	20.7%	16.6%	11.1%	11.6%	18.7%	22.2%	31.7%	42.9%
Other Flexible Lending Programs	21.4%	14.9%	21.8%	11.9%	7.7%	16.6%	21.4%	19.6%	18.7%	42.9%	54.0%	42.9%
Total	**18.2%**	**10.9%**	**21.8%**	**19.4%**	**14%**	**16.6%**	**23.5%**	**22.2%**	**18.7%**	**37.1%**	**51.3%**	**42.9%**

*Unknown tract data is not included in the above table.

Fifth Third's lending in low-income tracts, by number and dollar amount, was below the percentage of owner-occupied units in these tracts; however, down payment assistance programs in these tracts significantly exceeded proxy. The percentage of lending in moderate-income tracts, by volume and dollar amount, was below the percentage of owner-occupied units; however, down payment assistance programs in these tracts significantly exceeded proxy.

Fifth Third's lending by volume and dollar amount to low-income borrowers was below the percentage of low-income families in the assessment area. The percentage of lending by volume to moderate-income borrowers exceeded the percentage of moderate-income families for government loan and down payment assistance programs. The percentage of dollar amount to moderate-income borrowers was slightly below the moderate-income families in the assessment area.

Fifth Third made limited use of flexible lending practices is serving assessment area credit needs, as lending through flexible loan programs to moderate-income borrowers was excellent. Lending in moderate-income geographies and to low-income borrowers was good and adequate in low-income geographies.

Investment Test

Fifth Third's performance relative to the investment test in the assessment area is rated excellent.

Fifth Third made an excellent level of qualified community development investments and grants, particularly those not routinely provided by private investors. As such, Fifth Third was often in a leadership position. Fifth Third has 142 qualified investments totaling $73.6 million during the evaluation period. Shown in the table below are the total current period investments:

Affordable Housing		Economic Development		Revitalization and Stabilization		Community Services	
#	$	#	$	#	$	#	$
30	39,681,392	33	121,993	4	7,175	68	248,066

Also included in the total number of investments are seven prior period investments totaling $33.5 million. Overall, Fifth Third made 4.5% of its total community development investments in this assessment area, which is greater than the percentage of total deposits at 0.9% and greater than the percentage of branch offices at 2.2%.

Fifth Third exhibits an excellent responsiveness to credit and community development needs in the assessment area, including investments in several affordable housing projects throughout the assessment area, which was an important need expressed by several community contacts. Fifth Third made 116 donations totaling $422,124 that supported charitable organizations, local schools, small businesses, food banks, churches, and affordable housing. The majority (58.0%) of Fifth Third's donations supported services to low- and moderate-income individuals. Due to the high poverty and unemployment rates, services to low- and moderate-income individuals are deemed to be responsive to needs in the assessment area.

Service Test

Fifth Third's performance under the service test in this assessment area is rated good. Retail services are accessible and Fifth Third is a leader in providing community development services.

Retail Services

Fifth Third's record of opening and closing offices has not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and to low- and moderate-income households. Since the previous evaluation, no banking centers were opened or closed. Delivery services are accessible to Fifth Third's geographies and individuals of different income levels.

Business hours and services provided do not vary in a way that inconveniences certain portions of the assessment area, including low- and moderate-income geographies or households and are consistent with the services and hours discussed in the "Institution" assessment.

Fifth Third maintains 29 banking centers within this assessment area, including one in low-, six in moderate-, 11 in middle-, and 11 in upper-income census tracts. Fifth Third banking centers in this assessment area represent 2.2% of all its banking centers.

Fifth Third has a total of 39 full-service ATMs within this assessment area, including two in low-, 11 in moderate-, 14 in middle-, and 12 in upper-income census tracts.

The following table illustrates the percentage of banking centers and ATMs in low-, moderate-, middle-, and upper-income census tracts in comparison to the number and percentage of census tracts and the percentage of households and businesses in those tracts.

Geographic Distribution of Branches & ATMS

Assessment Area: GA Atlanta

2016 FFIEC Census Data, 2010 ACS Data, and 2015 D&B Information
Closed branches/ATMs are only included in "closed" columns and are not included in any other totals.
DTO - Drive thru only is a subset of total branches
SA = Stand Alone ATM is a subset of total ATMs

Branch distribution within low-income tracts was considered poor, as the distribution of branches was below the percentage of census tracts and households in these tracts. However, Fifth Third's branch distribution within moderate-income tracts was considered good.

Community Development Services

Fifth Third is a leader in providing community development services in this assessment area. During the evaluation period, Fifth Third employees provided 2,932 hours of community development service to local organizations serving low- and moderate-income individuals, which represents 2.5% of all community development services provided and equates to 1.41 annualized persons (ANP).

Affordable Housing	Economic Development	Community Services
# of Hours	***# of Hours***	***# of Hours***
58	668	2,206

Employees provided financial expertise through leadership positions in multiple community organizations that provide affordable housing and promote community and economic development. Community development services include 1,418 hours of providing financial literacy through local nonprofits and school programs, 1,148 hours serving on boards and committees, 334 hours providing technical assistance to non-profits and local business, and 32 hours participating in foreclosure prevention outreach.

Fifth Third is considered particularly responsive with regard to hours dedicated to financial literacy and other community services to low- and moderate-income individuals. Several community contacts mentioned the need for financial literacy training to provide assistance with establishing or re-establishing access to credit.

METROPOLITAN AREA
(Limited-scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE STATE OF GEORGIA

- Augusta-Richmond County GA-SC MSA
  - As of June 30, 2016, Fifth Third operated three branches in the assessment area, representing 9.4% of its branches in Georgia.
  - As of June 30, 2016, Fifth Third had $120,106 in deposits in this assessment area, representing a market share of 2.3% and 11.3% of its statewide deposits.

Since there are no branches in the South Carolina portion of the MSA and Fifth Third only takes the counties in Georgia that are part of this MSA, the Augusta-Richmond County GA-SC MSA is evaluated under Georgia and not as a separate MSA.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE STATE OF GEORGIA

Through the use of available data, including performance and demographic information, the assessment area's performance was evaluated and compared with Fifth Third's performance, resulting in a weaker performance in the assessment area. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendix F for information regarding these areas.

Assessment Area	Lending Test	Investment Test	Service Test
Augusta-Richmond County MSA	Below	Consistent	Consistent

For the lending test, Fifth Third received a "High Satisfactory" rating in Georgia. Performance in the Augusta-Richmond County assessment area was below Fifth Third's performance for the state. A lesser geographic distribution of loans and no community development loans contributed to weaker performance in the Augusta-Richmond County assessment area. The Augusta-Richmond County assessment area had a moderate level of lending gaps, which was consistent to the performance for the state.

For the investment test, Fifth Third received an "Outstanding" rating for Georgia. The investment activity in the Augusta-Richmond County assessment area was consistent to the performance for the state.

For the service test, Fifth Third received a "High Satisfactory" rating for Georgia. Overall, performance in the Augusta-Richmond County assessment area was consistent with Fifth Third's performance for the state. Retail services were consistent with performance for the state. Qualified community development services were good. The weaker community development services performance was primarily due to a lower level of hours dedicated to providing qualified services relative to Fifth Third's operational presence in this assessment area.

The performance in the limited-scope assessment area did not change the overall state rating.

STATE OF ILLINOIS

CRA RATING for State of Illinois:[135] Satisfactory
The lending test is rated: Low Satisfactory
The investment test is rated: High Satisfactory
The service test is rated: Low Satisfactory

The major factors supporting this rating include:

- A adequate responsiveness to credit needs;
- An adequate geographic distribution of loans throughout the assessment area;
- A good distribution of loans among borrowers of different income levels and an adequate distribution to businesses of different revenue sizes;
- Exhibits adequate record of serving the credit needs of low-income individuals and areas and very small businesses;
- An adequate level of community development loans;
- A significant level of qualified community development investments and grants;
- Occasionally in a leadership position in providing community development investments and grants;
- Retail delivery systems are reasonably accessible to all geographies and individuals of different income levels and businesses of different revenue sizes;
- A record of opening and closing banking centers that generally has not adversely affected the accessibility of delivery systems;
- Banking services and hours that do not vary in a way that inconveniences any portions of the assessment areas; and,
- An adequate level of community development services.

SCOPE OF EXAMINATION

A full-scope review was conducted for non-metropolitan Southern Illinois and limited-scope reviews were performed on the remaining three assessment areas: the Carbondale-Marion MSA, the Rockford MSA and non-metropolitan Northern Illinois. The time period, products, and affiliates evaluated for this assessment area are consistent with the scope discussed in the "Institution" section of this report.

[135] For institutions with branches in two or more states in a multi-state metropolitan area, this statewide evaluation is adjusted and does not reflect performance in the parts of those states contained within the multi-state metropolitan area. Refer to the multi-state metropolitan area rating and discussion for the rating and evaluation of the institution's performance in that area.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE STATE OF ILLINOIS

Lending activity accounted for 0.4% of Fifth Third's total lending activity, while deposits accounted for 0.4% of its total deposits. HMDA-reportable lending in Illinois represented 0.4% of the bank's total HMDA lending, while CRA-reportable lending represented 0.4% of the bank's total CRA lending. Due to Fifth Third's extensive CRA footprint in the Chicago multi-state assessment area, Fifth Third collectively ranks ninth among 550 insured institutions in Illinois. For the purpose of this evaluation, Fifth Third only has 12 banking centers in Illinois.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE STATE OF ILLINOIS

Lending Test

Fifth Third's performance under the lending test within the assessment areas located in Illinois is rated "Low Satisfactory." Fifth Third's lending reflects an adequate responsiveness to the credit needs in all four of the following assessment areas in Illinois: non-metropolitan Southern Illinois, Carbondale-Marion, non-metropolitan Northern Illinois, and Rockford.

Lending Activity

In Illinois, Fifth Third originated 432 HMDA loans totaling $41.0 million and 172 small business loans totaling $17.7 million during the evaluation period.

Lending activity in all four assessment areas is adequate in Illinois.

Geographic and Borrower Distribution

The distribution of loans among geographies is adequate. The geographic distribution is good in non-metropolitan Southern Illinois and adequate in the remaining three assessment areas.

A low level of lending gaps was identified. There was a low level of lending gaps in non-metropolitan Southern Illinois and the Carbondale-Marion assessment areas and a low level of lending gaps in non-metropolitan Northern Illinois. The Rockford assessment area had a moderate level of lending gaps.

The distribution of loans among borrowers of different income levels is good and adequate to businesses of different revenue sizes. Borrower distribution is good in non-metropolitan Southern Illinois and adequate in the remaining three assessment areas. The distribution of loans to businesses of different revenue sizes is adequate in all four assessment areas.

A detailed analysis for the geographic distribution and borrower-income distribution is provided with the analysis for each assessment area.

Community Development Loans

In Illinois, Fifth Third originated five community development loans totaling $52.8 million, which represented 0.9% of the Fifth Third's community development lending by dollar volume and resulted in an adequate level of community development lending in Illinois. Fifth Third made an adequate level of community development loans in non-metropolitan Southern Illinois, non-metropolitan Northern Illinois, and the Rockford assessment area. Fifth Third did not make any community development loans in Carbondale-Marion assessment area, which is considered to be a poor level of community development lending.

Investment Test

Fifth Third's performance under the investment test within the assessment areas located in Illinois is rated "High Satisfactory." Fifth Third funded $13.7 million in qualified community development investments in Illinois during the evaluation period, consisting of $3.1 million obtained from new investments made during the current review period and $10.6 million from prior period investments. The majority of investments were LIHTCs. Fifth Third's level of qualified investments is excellent in non-metropolitan Northern Illinois and good in the Carbondale-Marion assessment area. The level of qualified investments is adequate in the remaining two assessment areas.

Fifth Third was considered responsive to the credit and community development needs in the state; therefore, investments without a purpose, mandate, or function of serving Fifth Third's assessment areas in Illinois were considered to positively impact state performance. Fifth Third made $301,240 in qualified investments, typically in the form of LIHTCs that benefited counties within the state, but outside Fifth Third's delineated assessment areas within Illinois.

Additional information regarding performance under the investment test is provided in the respective analyses for each assessment area.

Service Test

Fifth Third's performance under the service test with the assessment areas located in Illinois is rated "Low Satisfactory." Fifth Third's performance is adequate in non-metropolitan Southern Illinois and in the Carbondale-Marion assessment areas and good in the remaining two assessment areas.

For details regarding the institution's performance in the individual assessment areas, refer to the respective assessment area's "Service Test" section in this report.

Retail Services

Retail delivery systems are reasonably accessible to all geographies, including low- and moderate-income geographies, individuals of different income levels, and businesses of different revenue sizes in the institution's assessment areas. Retail service distribution is adequate in non-metropolitan Southern Illinois and the Rockford assessment area and good in the remaining two assessment areas.

Fifth Third's record of opening and closing banking centers has improved the accessibility of its delivery systems, particularly to low- and moderate-income geographies and individuals. No branches were opened or closed in low – or moderate-income tracts during the evaluation period.

Banking services and business hours do not vary in a way that inconveniences any portions of the bank's assessment areas and are consistent with the services and hours discussed in the "Institution" assessment.

Community Development Services

Fifth Third provides an adequate level of community development services. Fifth Third's performance is excellent in the Rockford assessment area and good in non-metropolitan Northern Illinois. The level of community development services is adequate in the remaining two assessment areas.

NON-METROPOLITAN AREA
(Full-scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN NON-METROPOLITAN SOUTHERN ILLINOIS

Non-metropolitan Southern Illinois consists of Effingham and Jefferson counties. The assessment area is comprised of one low-, two moderate-, 12 middle-, and four upper-income tracts. There were no distressed/underserved middle-income tracts in the assessment area during the evaluation period.

As of June 30, 2016, Fifth Third ranked eighth out of 20 institutions with 5.2% of the deposit market share. Midland States Bank had the majority of the market share 18.8% of deposits, followed by JP Morgan Chase Bank, Dieterich Bank, and Washington Savings Bank with 15.0%, 12.9%, and 8.6% of the market share, respectively. Deposits in this assessment area accounted for 0.1% of the Fifth Third's total deposits. This was 34.8% of deposits within the state and the 41st highest percentage of deposits within Fifth Third's CRA footprint.

From January 1, 2014 through June 30, 2016, Fifth Third originated 158 HMDA loans and 73 CRA loans, which represented 0.2% and 0.2% of the total loans originated during the evaluation period, respectively. This was the 50th largest HMDA market and 48th largest CRA market for loans originated during the evaluation period.

In 2015, Fifth Third ranked ninth among 118 HMDA reporters in the assessment area and Fifth Third Mortgage Company ranked 12th. First National Bank of Dieterich, U.S. Bank, Peoples National Bank, State Bank of Lincoln, and Midland States Bank, and JPMorgan Chase Bank, were the top six HMDA lenders in the assessment area. Fifth Third ranked 19th of 45 CRA reporters in the assessment area in 2015. The top four CRA lenders in the assessment area were American Express, Chase Bank USA, PNC Bank, and Capital One. These lenders are mostly issuers of credit cards and their CRA loans primarily consist of commercial credit card accounts.

Four community contact interviews were conducted to provide additional information regarding the assessment area. The first contact, representing an economic development organization, stated the economy is still struggling in Southern Illinois area. Unemployment and poverty rates remain high and property values have not rebounded. The contact stated financial institutions serving this area tend to be smaller community banks or larger regional or multi-regional institutions actively competing for bankable loans and engaged in business development and outreach. The contact believed while Illinois' ongoing fiscal problems are a major obstacle to getting large-scale infrastructure and economic development projects funded in this region, there are opportunities for financial institutions and other private sector businesses to partner with the public sector and invest in small scale public works projects. Generally, lenders are trying to meet the credit needs in this community and to work with borrowers having financial difficulties.

The second contact, representing a community action agency that assists lower-income individuals, stated the local economy varies by county; some counties are faring better than others. The contact believed financial institutions are actively involved in the community. The contact specifically mentioned Midland State Bank and Fifth Third as being particularly active within the community.

The third contact, representing an organization that offers regional economic, research-based information, stated the economic situation differs from county to county in this area. For example, some counties in this area have lower unemployment rates, while others have unemployment rates above state and national averages. The contact believed low- and moderate-income individuals are still not able to buy homes and the need for a sufficient supply of quality, affordable, and stable rental housing is increasingly important. The contact stated that community banks appear to be actively involved in the community.

The fourth contact, representing an organization that provides services to entrepreneurs and small business owners, stated the economic conditions in Southern Illinois are still in recovery. The contact believed there is a need for financial institutions to fund smaller-dollar loans for start-up businesses and established small businesses. The contact indicated that there is also a need for financial literacy programs to help children become better-informed consumers and more prudent borrowers in the future.

Population Characteristics

According to 2010 U.S. Census data, the population in the assessment area was 73,069. Less than 10.0% the population lived in the three low- and moderate-income tracts. In addition, 76.7% of the population was 18 years of age or older, the legal age to enter into a contract.

As of July 1, 2015, Effingham is the largest city in Effingham County, which has 12,604 residents, a 2.2% increase in population since April 1, 2010. Mount Vernon is the largest city in Jefferson County and has 15,087 residents, a 1.3% decrease in population since April 1, 2010.[136]

The following table shows the population in the assessment area by county for 2010 and 2015 with the percentage of the population increase and decrease.[137] The population within the assessment area experienced overall negative growth between 2010 and 2015, with Effingham County experiencing slight positive growth in population during this time period. Overall, this assessment area's population appears to be fairly steady; however, according to multiple community contacts, economic conditions contributed to a decreasing demand for home purchase loans.

[137] Population Estimates derived from U.S. Census Data (April 1, 2010 – July 1, 2015): http://www.census.gov/quickfacts/table/PST045216/00

County	2010 Population	2015 Population	Population Percent Change
Effingham	34,242	34,371	0.4%
Jefferson	38,827	38,358	-1.2%
Total	**73,069**	**72,729**	**-0.5%**

Income Characteristics

In 2010 the assessment area's median family income was less ($55,777) than Illinois' at $68,236. The median family income in the assessment area increased between 2014 and 2015 and decreased slightly between 2015 and 2016.

Borrower Income Levels
Illinois State Non-Metropolitan Area

FFIEC Estimated Median Family Income		Low	Moderate	Middle	Upper
		0 - 49.99%	50% - 79.99%	80% - 119.99%	120% - & above
2014	**$58,600**	0 - $29,299	$29,300 - $46,879	$46,880 - $70,319	$70,320 - & above
2015	**$60,100**	0 - $30,049	$30,050 - $48,079	$48,080 - $72,119	$72,120 - & above
2016	**$58,000**	0 - $28,999	$29,000 - $46,399	$46,400 - $69,599	$69,600 - & above

Poverty rates increased in the assessment area from 1999 to 2015.[138] Jefferson County had the highest poverty rates in 1999 and 2015 and experienced the largest increase in poverty rates during the evaluation period. In 2015, Jefferson County and Illinois poverty rates exceeded the national poverty rate. According to the U.S. Census Bureau, the national poverty rate in 2015 was 13.5%, down 1.3 percentage points from 14.8% in 2014. A community contact stated the economic situation differs from county to county in this area and that poverty rates remain high. The following table shows the poverty rates for 1999[139] and 2015.

County	1999 Poverty Rate	2015 Poverty Rate	Change
Effingham	8.1%	9.8%	21.0%
Jefferson	12.3%	16.7%	35.8%
Illinois	**10.7%**	**13.6%**	**27.1%**
U.S.	**11.8%**	**13.5%**	**14.4%**

[138] U.S. Department of Agriculture Economic Research Service Poverty Rates (for 1999 and 2015): https://data.ers.usda.gov/reports.aspx?ID=17826
[139] 1999 National Poverty Rate: http://www.census.gov/prod/2000pubs/p60-210.pdf

Housing Characteristics

According to 2010 U.S. Census data, there are 31,637 housing units and 19,315 families in the assessment area. From an income perspective, 10.8% of housing units, 7.5% of owner-occupied units, and 8.6% of families are located in low- or moderate-income tracts. Three-quarters of the housing units in the low-income census tracts are either rental or vacant (75.0%) and 25.1% are owner-occupied. In the moderate-income census tracts, 44.7% of the housing units are either rental or vacant and 55.4% are owner-occupied. Therefore, based on the number of housing units compared to the number of families in low- and moderate-income census tracts, there appear to be limited credit-related opportunities for Fifth Third to provide various aspects of affordable housing in the assessment area.

The 2010 U.S. Census data shows the median age of housing stock in the assessment area was 37 years old and 22.3% of the stock was built before 1950. However, within the assessment area, the median age of housing stock was 57 years in low- and moderate-income tracts. Therefore, there appears to be opportunity for Fifth Third to provide home improvement and rehabilitation loans in these lower-income areas.

According to 2010 U.S. Census data, the median housing value in the assessment area was $95,758 with an affordability ratio of 46.51. The affordability ratio is derived by dividing the median household income by the median housing value. The higher the affordability ratio, the more affordable a home is considered. Median housing values increased between 2010 and 2011-2015, as did median family incomes; as a result, housing became more affordable in Effingham County and slightly less affordable in Jefferson County during the evaluation period. Median gross rents increased across the assessment area, with renters in Jefferson County experiencing the largest increase in rental rates. In 2010, about 39.8% of renters across the assessment area had rent costs greater than 30.0% of income. Increasing rental rates may make it more difficult for potential homebuyers to save for a down payment for a home. A community contact stated that low- and moderate-income individuals are still not able to buy homes, which means the need for a sufficient supply of quality, affordable, and stable rental housing has become increasingly important. The table below presents housing characteristics from the U.S. Census data between 2010 and 2015 in the assessment area and Illinois.

County	2010 Median Housing Value	2010 Affordability Ratio	2011-2015 Median Housing Value	2011-2015 Affordability Ratio	2010 Median Gross Rent	2011-2015 Median Gross Rent	Percent of Change
Effingham	$106,500	46.49	$128,200	40.74	$541	$581	7.4%
Jefferson	$85,800	47.97	$87,300	49.54	$546	$590	8.1%
Illinois	**$202,500**	**27.52**	**$173,800**	**31.01**	**$834**	**$907**	**8.8%**

According to Bankrate.com,[140] Illinois ranked seventh for foreclosure filings in November 2016. The national average for foreclosure filings was one in every 1,533 housing units. The following table contains information about foreclosure filings in the assessment area, according to Realtytrac:[141]

Geography Name	Ratio of Properties Receiving Foreclosure Filings in November 2016
Effingham	1:3,045
Jefferson	1:995
Illinois	**1:1,036**
U.S.	**1:1,533**

In November 2016, Jefferson County had the highest rate of foreclosure. In addition, the Jefferson County rate of foreclosure exceeded Illinois and nationwide foreclosure rates.

Labor, Employment, and Economic Characteristics

According to Effingham Regional Alliance,[142] the top ten employees represent a diverse set of industries:

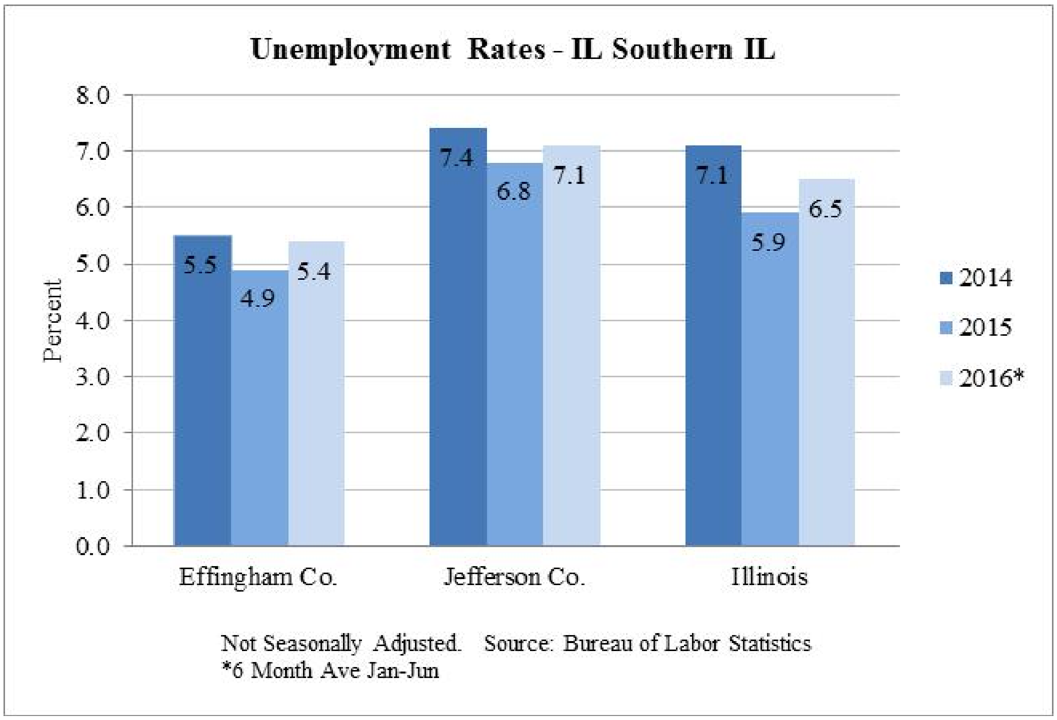
Effingham County Major Employers	
Company	**Number of Employees**
Quad Graphics (manufacturing)	826
HSHA St. Anthony's Memorial Hospital (health care)	784
Sherwin-Williams Company (paint products/distribution)	451
Patterson Companies, Inc. (dental software)	440
Stevens Industries, Inc. (manufacturing)	400
Three Z Printing (commercial printing)	375
Heartland Dental Care (professional services)	343
Effingham Equity (agriculture)	338
FedEx (distribution)	320
Martin's IGA (grocery store)	285

According to Jefferson County Development Corporation,[143] the employee base for business is regional and is drawn from eight surrounding counties. The economic strength, stability, and growth of Jefferson County have significant impact on the Southern Illinois region. Jefferson County is home to three of the largest employers in Southern Illinois:

[140] Bankrate.com: http://www.bankrate.com/finance/real-estate/foreclosures-by-state/default.aspx
[141] Realtytrac: http://www.realtytrac.com/statsandtrends/foreclosuretrends/
[142] Effingham Regional Alliance: http://www.effinghamregionalalliance.com/regional-employers/
[143] Jefferson County Development Corporation: http://www.jeffcodev.org/profile_jeffersoncounty.html

Jefferson County Major Employers	
Company	**Number of Employees**
Continental Tire the Americas	3,200
Walgreens Distribution Center	1,385
Good Samaritan Regional Health Center	1,108

The following table illustrates the average unemployment rates for 2014, 2015, and 2016 across the assessment area and Illinois.



Effingham County had unemployment rates below Jefferson County and Illinois, while Jefferson County's unemployment rate was above Illinois' and Effingham County's rates. Three community contacts stated the economic situation differs from county to county, as some counties in this area have lower unemployment rates, while other counties have unemployment rates above state and national averages. These comments are reflected in the table above.

No major layoffs were noted in this assessment area during the evaluation period.

2016 FFIEC Census Data and 2015 D&B Information

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN NON-METROPOLITAN SOUTHERN ILLINOIS

Lending Test

Fifth Third's performance under the lending test in this assessment area is rated adequate. Fifth Third has demonstrated an adequate responsiveness to the credit needs of the community. In addition, Fifth Third originated one community development loan totaling $28.3 million in the area. Fifth Third has a good geographic distribution of loans, with no lending gaps. Fifth Third has a good distribution among borrowers of different income levels and adequate to businesses of different revenue sizes and exhibits an adequate record of serving the credit needs of highly economically disadvantaged areas in its assessment area, low-income individuals, and businesses with gross annual revenues of $1 million or less.

Greatest consideration was given to the evaluation of refinance lending based on the overall volume of lending, followed by small business, and home purchase lending. There were an insufficient number of home improvement loans to analyze performance. Details of Fifth Third's residential mortgage and small business lending, as well as information regarding aggregate lending, can be found in Appendix E.

Lending Activity

Fifth Third's lending activity reflects an adequate responsiveness to the credit needs within the assessment area. Fifth Third originated 77 refinance, 56 home purchase, 25 home improvement, 73 small business, and one community development loans during the evaluation period. The percentage of Fifth Third's total lending at 0.2% is slightly greater than the percentage of total deposits at 0.1% in this area.

Geographic Distribution of Loans

Overall, the geographic distribution of loans is good. Refinance lending, which is the largest loan category, is good, while performance for home purchase is adequate. Small business lending is good. Further, no lending gaps were noted for the assessment area, as shown in the following table.

Tract Income Levels	Number of Tracts	Tracts with No Loans	Penetration
Low	1	0	100.0%
Moderate	2	0	100.0%
Middle	12	0	100.0%
Upper	4	0	100.0%
Total	**19**	**0**	**100.0%**

Fifth Third's excellent penetration of loans throughout the assessment area helped to enhance performance, resulting in an overall good loan penetration throughout the assessment area.

Refinance Loans

Fifth Third did not originate any loans in the one low-income tract in the assessment area and there were no loans made by the aggregate of all lenders. However, only 2.0% of the population in this assessment area lives in the low-income census tracts. Also, only 0.8% of the owner-occupied housing units are located in the low-income tract, leaving little opportunity for home mortgage lending. Therefore, the geographic distribution of refinance loans in low-income tracts is considered adequate.

Fifth Third made four refinance loans totaling $173,000 in moderate-income tracts. This represents 5.2% of refinance loans by volume, which is comparable to the owner-occupied units in these tracts at 6.7%. The percentage of loans by dollar amount at 2.7% is significantly below proxy. The percentage of loans by volume exceeded the 2014 aggregate at 3.9% and the 2015 aggregate at 2.4%. As Fifth Third's performance exceeded the aggregate of all lenders and was comparable to proxy, the geographic distribution of refinance loans in moderate-income tracts is excellent.

Fifth Third made 47 refinance loans totaling $3.6 million in middle-income tracts. This represents 61.0% of refinance loans by volume, which is below the owner-occupied units in these tracts at 65.4%. Also, refinance loans by dollar amount (56.1%) was below proxy. The percentage of loans by volume was below the 2014 aggregate at 67.1% and w the 2015 aggregate at 64.8%.

Fifth Third made 26 refinance loans totaling $2.6 million in upper-income tracts. This represents 33.8% of refinance loans by volume, which exceeds the owner-occupied units in these tracts at 27.1%, and 41.2% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate at 29.1% and the 2015 aggregate at 31.9%.

Overall, the geographic distribution of refinance loans is good.

Home Purchase Loans

Fifth Third made one home purchase loan totaling $22,000 in the low-income tract. This represents 1.8% of home purchase loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 0.8%, and 0.3% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate at 0.5% and the 2015 aggregate at 0.1%. While Fifth Third's performance exceeded the proxy, the volume of loans was small; therefore, the geographic distribution of home purchase loans in low-income tracts is good.

Fifth Third made one home purchase loan totaling $21,000 in moderate-income tracts. This represents 1.8% of its home purchase loans by volume, which is significantly below the percentage of owner-occupied units in these tracts at 6.7%, and 0.3% by dollar amount, which was significantly below proxy. The percentage of loans by volume was below the 2014 aggregate at 4.9% and was below the 2015 aggregate at 3.1%. As Fifth Third's performance was significantly below proxy and the aggregate of all lenders, the geographic distribution of home purchase loans in moderate-income tracts is poor.

Fifth Third made 35 home purchase loans totaling $4.4 million in middle-income tracts. This represents 62.5% of home purchase loans by volume, which is below the percentage of owner-occupied units in these tracts at 65.4%, and 63.2% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 60.9% and exceeded the 2015 aggregate of 68.4%.

Fifth Third made 19 home purchase loans totaling $2.5 million in upper-income tracts. This represents 33.9% of home purchase loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 27.1%, and 36.2% by dollar amount, which exceeds proxy. The percentage of loans by volume was below the 2014 aggregate of 33.7% and was below the 2015 aggregate of 31.6%.

Overall, the geographic distribution of home purchase loans is adequate.

Small Business Loans

Fifth Third made one small business loans totaling $5,000 in the low-income tract. This represents 1.4% of small business loans by volume, which is below the percentage of businesses in these tracts at 6.0%, and <0.1% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate of 5.8% and was below the 2015 aggregate of 6.1%. A community contact indicated the economic conditions in Southern Illinois as generally adverse with limited opportunities due to high unemployment and poverty. Financial institutions are actively competing for bankable loans and are engaged in business development. Therefore, the geographic distribution of small business loans in low-income tracts is adequate.

Fifth Third made four small business loans totaling $66,000 in moderate-income tracts, which represents 5.5% of small business loans by volume, which slightly exceeds the percentage of businesses in these tracts at 5.0%. This also represents 0.5% small business loans by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 6.2% and was below the 2015 aggregate of 5.2%. Given that Fifth Third's performance slightly exceeded proxy and the aggregate of all lenders, the geographic distribution of small business loans in moderate-income tracts is good.

Fifth Third made 50 small business loans totaling $10.3 million in middle-income tracts. This represents 68.5% of small business loans by volume, which exceeds the percentage of businesses in these tracts at 63.0%, and 83.2% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 62.0% and exceeded the 2015 aggregate of 63.9%.

Fifth Third made 18 small business loans totaling $2.0 million in upper-income tracts. This represents 24.7% of small business loans by volume, which is below the percentage of businesses in these tracts at 26.0%, and 16.3% by dollar amount, which is significantly below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 20.4% and slightly exceeded the 2015 aggregate of 21.2%.

Overall, the geographic distribution of small business loans is good.

Distribution by Borrower Income and Revenue Size of the Business

The distribution of loans is good based on borrower income and adequate for businesses of different revenue sizes. Borrower distribution is good for refinance and excellent for home purchase loans.

Refinance Loans

Fifth Third made nine loans totaling $445,000 to low-income borrowers. This represents 11.7% of refinance loans by volume, which is below the percentage of low-income families at 19.4%. The percentage of loans by dollar amount in these geographies at 6.9% is significantly below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 7.0% and the 2015 aggregate of 7.3%. Given that Fifth Third's performance exceeded the aggregate of all lenders, but was below proxy, the borrower distribution of refinance loans to low-income borrowers is good.

Fifth Third made 20 loans totaling $1.2 million to moderate-income borrowers. This represents 26.0% of refinance loans by volume, which significantly exceeds the percentage of moderate-income families at 16.6%, and 19.3% by dollar volume, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 12.8% and significantly exceeded the 2015 aggregate of 17.3%. As Fifth Third's performance significantly exceeded proxy and the aggregate of all lenders, the borrower distribution of refinance loans to moderate-income borrowers is excellent.

Fifth Third made 19 loans totaling $1.5 million to middle-income borrowers. This represents 24.7% of refinance loans by volume, which exceeds the percentage of middle-income families at 23.0%, and 23.1% by dollar amount, which is comparable to proxy. The percentage of loans by volume was below the 2014 aggregate of 24.5% and was comparable to the 2015 aggregate of 24.8%.

Fifth Third made 27 loans totaling $3.0 million to upper-income borrowers. This represents 35.1% of refinance loans by volume, which is below the percentage of upper-income families at 41.0%, while the percentage of loans by dollar amount at 47.0% exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 46.5% and was below the 2015 aggregate of 39.8%.

Overall, the borrower distribution of refinance loans is good.

Home Purchase Loans

Fifth Third made eight loans totaling $538,000 to low-income borrowers. This represents 14.3% of home purchase loans by volume, which is below the percentage of low-income families at 19.4%, and 7.7% of loans by dollar amount, which is significantly below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 6.9% and significantly exceeded the 2015 aggregate of 8.3%. Because Fifth Third's performance significantly exceeded the aggregate of all lenders and was below proxy, the borrower distribution of home purchase loans to low-income borrowers is good.

Fifth Third made ten loans totaling $641,000 to moderate-income borrowers. This represents 17.9% of home purchase loans by volume, which exceeds the percentage of moderate-income families at 16.6%, and 9.2% of loans by dollar amount, which is significantly below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 22.8% and was below the 2015 aggregate of 19.3%. Because Fifth Third's performance exceeded proxy, the borrower distribution of home purchase loans to moderate-income borrowers is good.

Fifth Third made 20 loans totaling $2.4 million to middle-income borrowers. This represents 35.7% of home purchase loans by volume, which significantly exceeds the percentage of middle-income families at 23.0%, and 34.1% by dollar amount, which exceeds proxy. The percentage of loans by volume significantly exceeded the 2014 aggregate of 22.2% and exceeded the 2015 aggregate of 21.4%.

Fifth Third made 17 loans totaling $3.2 million to upper-income borrowers. This represents 30.4% of home purchase loans by volume, which is less than the percentage of upper-income families at 41.0%, and 45.9% of loans by dollar amount, which exceeds proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 24.3% and exceeded the 2015 aggregate of 28.8%.

A community contact indicated low-and moderate-income individuals are not able to buy homes due to the high percentage of rentals in more affordable areas; therefore, Fifth Third's strong performance in home purchase lending to low- and moderate-income borrowers compared to proxy and the aggregate of all lenders is excellent.

Small Business Loans

The distribution of small business loans to businesses of different sizes is adequate, considering Fifth Third's performance relative to the aggregate of all lenders. Fifth Third was able to make 27.4% of small business loans to businesses with revenues of $1 million or less. Fifth Third's performance in 2014 was below the 2014 aggregate of 35.9% and was below the 2015 aggregate of 39.8% and was significantly below the percentage of small businesses in the assessment area at 89.2%. Also, during the evaluation period, Fifth Third was able to make an acceptable percentage of small-dollar loans (56.2%) up to $100,000, indicating a willingness to lend in smaller amounts typically requested by small businesses.

Community Development Loans

Fifth Third originated one community development loan totaling $28.3 million during the evaluation period. The loan was a working capital loan to promote economic development by financing a small business to support retention of jobs for low- and moderate-income workers.

Community development lending in this assessment area represents 0.5% of the total dollar volume of community development loans originated during the evaluation period. This ranks as Fifth Third's 36th highest percentage of community development lending during the evaluation period. As such, Fifth Third made an adequate level of community development loans.

Investment Test

Fifth Third's performance relative to the investment test in the assessment area is rated adequate.

Fifth Third made an adequate level of qualified community development investments and grants. Fifth Third has 20 qualified investments totaling $330,256 during the evaluation period. Shown in the table below are the total current period investments:

Economic Development		Community Services	
#	$	#	$
9	18,010	10	9,700

Also included in the total number of qualified investments is one prior period investment totaling $302,546. Fifth Third made less than 0.1% of its total community development investments in this assessment area, which is slightly less than the percentage of total deposits at 0.1% and less than the percentage of branch offices at 0.2%.

Fifth Third exhibited an adequate responsiveness to credit and community development needs in the assessment area. Included in total investments are 19 donations totaling $27,710 that supported local chambers of commerce, charitable organizations, small businesses, and churches. The majority of Fifth Third's donations (65.0%) supported economic development, which is an important need expressed by several community contacts due to the high unemployment and poverty rates in portions of the assessment area.

Service Test

Fifth Third's performance under the service test in the assessment area is rated adequate. Retail services are reasonably accessible to essentially all of Fifth Third's assessment areas and Fifth Third provides an adequate level of community development services.

Retail Services

Fifth Third's record of opening and closing offices has generally not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and to low- and moderate-income households. Since the previous evaluation period, no banking centers were opened or closed.
Delivery services are reasonably accessible to Fifth Third's geographies and individuals of different income levels.

Business hours and services provided do not vary in a way that inconveniences certain portions of the assessment area, including low- and moderate-income geographies or households, and are consistent with the services and hours discussed in the "Institution" assessment.

Fifth Third maintains two banking centers within this assessment area, including none in low-, none in moderate-, one in middle-, and one in upper-income census tracts. Fifth Third banking centers in this assessment area represent 0.2% of all its banking centers.

Fifth Third has a total of two full-service ATMs within this assessment area, including none in low-, none in moderate-, one in middle-, and one in upper-income census tracts.

The following table illustrates the percentage of banking centers and ATMs in low-, moderate-, middle-, and upper-income census tracts in comparison to the number and percentage of census tracts and the percentage of households and businesses in those tracts.

Assessment Area: IL Southern IL

Tract Category	Branches				Stand Alone ATMs							Demographics			
	Total Branches		Open	Closed		Total ATMs		Full Service ATMs		Cash only ATMs		Census Tracts		House holds	Total Businesses
	#	%	#	#		#	%	#	%	#	%	#	%	%	%
Low	0	0.0%	0	0	Total	0	0.0%	0	0.0%	0	0.0%	1	5.3%	1.9%	6.6%

2016 FFIEC Census Data, 2010 ACS Data, and 2015 D&B Information
Closed branches/ATMs are only included in "closed" columns and are not included in any other totals.
DTO - Drive thru only is a subset of total branches
SA = Stand Alone ATM is a subset of total ATMs

Branch distribution within low- and moderate-income tracts was considered poor, as the distribution of branches was below the percentage of census tracts and households in these tracts. However, these tracts have low population levels.

Community Development Services

Fifth Third provides an adequate level of providing community development services in this assessment area. During the evaluation period, Fifth Third employees provided 126 hours of community development service to local organizations serving low- and moderate-income individuals, which represents 0.1% of all community development services provided and equates to 0.06 annualized persons (ANP).

Economic Development	Community Services
# of Hours	***# of Hours***
72	54

Employees provided financial expertise through leadership positions in several community organizations that promote community and economic development. Community development services include 94 hours serving on boards and committees, 24 hours providing technical assistance to local business, and eight hours participating in foreclosure prevention outreach.

METROPOLITAN and NON-METROPOLITAN AREAS
(Limited-scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE STATE OF ILLINOIS

- **Carbondale-Marion MSA**
  - As of June 30, 2016, Fifth Third operated two branches in the assessment area, representing 16.7% of its branches in Illinois.
  - As of June 30, 2016, Fifth Third had $56,462 in deposits in this assessment area, representing a market share of 4.8% and 14.9% of its statewide deposits.
- **Non-metropolitan Northern Illinois**
  - As of June 30, 2016, Fifth Third operated five branches in the assessment area, representing 41.7% of its branches in Illinois.
  - As of June 30, 2016, Fifth Third had $133,311 in deposits in this assessment area, representing a market share of 3.8% and 35.1% of it statewide deposits.
- **Rockford MSA**
  - As of June 30, 2016, Fifth Third operated three branches in the assessment area, representing 25.0% of its branches in Illinois.
  - As of June 30, 2016, Fifth Third had $58,217 in deposits in this assessment area, representing a market share of 1.0% and 15.3% of it statewide deposits.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE STATE OF ILLINOIS

Through the use of available facts and data, including performance and demographic information, each assessment area's performance was evaluated and compared with Fifth Third's performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendix F for information regarding these areas.

Assessment Area	Lending Test	Investment Test	Service Test
Carbondale-Marion MSA	Consistent	Consistent	Consistent
Non-metropolitan Northern Illinois	Consistent	Above	Above
Rockford MSA	Consistent	Below	Above

For the lending test, Fifth Third received a "Low Satisfactory" rating for Illinois. Performance in all three limited-scope assessment areas was consistent with Fifth Third's performance for the state. Lending levels were adequate for the geographic and borrower distribution of loans. Non-metropolitan Northern Illinois and the Rockford assessment area had adequate levels of community development loans. No community development lending was noted in the Carbondale-Marion assessment area. A high level of lending gaps was identified in the Rockford assessment area and a moderate level of lending gaps was identified in non-metropolitan Northern Illinois. There were no gaps in lending in the Carbondale-Marion assessment area.

For the investment test, Fifth Third received a "High Satisfactory" rating for Illinois. While performance in the Carbondale-Marion assessment area was consistent to the state, performance in the non-metropolitan Northern Illinois assessment area was stronger. The stronger performance was primarily attributable to several low-income housing tax credit investments in the assessment area. Although below the state's performance, investment activity in the Rockford assessment area was adequate.

For the service test, Fifth Third received a "Low Satisfactory" rating for Illinois. Performance in the Carbondale-Marion assessment area was consistent to the state, while performance in non-metropolitan Northern Illinois and the Rockford assessment areas was stronger. The stronger performance in the non-metropolitan Northern Illinois and the Rockford assessment areas was primarily due higher levels of hours dedicated to providing qualified community development services relative to Fifth Third's operational presence in these assessment areas. Retail services were good in the Carbondale-Marion and non-metropolitan Northern Illinois assessment areas and adequate in the Rockford assessment area. The stronger retail services performance in the Carbondale-Marion and non-metropolitan Northern Illinois assessment areas was primarily due to greater accessibility of delivery systems in lower-income geographies.

The performance in the limited-scope assessment areas did not change the overall state rating.

STATE OF INDIANA

CRA RATING for State of Indiana:[144] **Outstanding**
The lending test is rated: Outstanding
The investment test is rated: Outstanding
The service test is rated: Outstanding

The major factors supporting this rating include:

- An excellent responsiveness to credit needs;
- An excellent geographic distribution of loans throughout the assessment area;
- An excellent distribution of loans among borrowers of different income levels and good to businesses of different revenue sizes;
- Exhibits a good record of serving the credit needs of low-income individuals and areas and very small businesses;
- A leader in making community development loans;
- Extensive use of flexible lending practices in serving the assessment area's credit needs;
- An excellent level of qualified community development investments and grants;
- Often in a leadership position in providing community development investments and grants;
- Retail delivery systems are accessible to all geographies and individuals of different income levels and businesses of different revenue sizes;
- A record of opening and closing banking centers that has not adversely affected the accessibility of delivery systems;
- Banking services and hours that do not vary in a way that inconveniences any portions of the assessment areas; and,
- A leader in providing community development services.

SCOPE OF EXAMINATION

Full-scope reviews were conducted for two assessment areas in Indiana: the Indianapolis-Carmel-Muncie CSA and non-metropolitan Southern Indiana. Limited-scope reviews were performed on the remaining five assessment areas: the Bloomington MSA, Fort Wayne MSA, Lafayette-W. Lafayette MSA, non-metropolitan Northern Indiana, and the Terre Haute MSA.

[144] For institutions with branches in two or more states in a multi-state metropolitan area, this statewide evaluation is adjusted and does not reflect performance in the parts of those states contained within the multi-state metropolitan area. Refer to the multi-state metropolitan area rating and discussion for the rating and evaluation of the institution's performance in that area.

The time period, products, and affiliates evaluated for this assessment area are consistent with the scope discussed in the "Institution" section of this report.

The Indianapolis-Carmel-Muncie and non-metropolitan Southern Indiana assessment areas received greater weight in determining the CRA rating for the state. These areas had the largest lending volumes and number of banking centers and ranked first and second, respectively, in the state's share of deposits during the evaluation period. Lastly, these areas represented 70.6% of the banking centers, 86.4% of deposits, and 74.8% of lending in Indiana.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE STATE OF INDIANA

Lending activity accounted for 7.2% of Fifth Third's total lending activity, while deposits accounted for 6.6% of Fifth Third's total deposits. HMDA-reportable lending in Indiana represented 8.0% of Fifth Third's total HMDA lending, while CRA-reportable lending represented 5.2% of Fifth Third's total CRA lending. As of June 30, 2016, Fifth Third ranked third among 155 insured institutions and has a deposit market share of 7.2% and 128 banking center locations within Indiana.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE STATE OF INDIANA

Lending Test

Fifth Third's performance under the lending test within the assessment areas located in Indiana is rated "Outstanding." Fifth Third's lending reflects an excellent responsiveness to the credit needs in the following two of seven assessment areas: Indianapolis-Carmel-Muncie and non-metropolitan Southern Indiana. Lending reflects a good responsiveness to credit needs in the Fort Wayne assessment area and an adequate responsiveness in the remaining four assessment areas: Bloomington, Lafayette-W. Lafayette, non-metropolitan Northern Indiana, and Terre Haute.

Lending Activity

In Indiana, Fifth Third originated 8,304 HMDA loans totaling $1.1 billion and 2,051 small business loans totaling $256.4 million during the evaluation period.

Lending activity in Indiana is excellent. The Indianapolis-Carmel-Muncie and non-metropolitan Southern Indiana assessment areas have excellent lending activity. Lending activity is good in the Bloomington, Fort Wayne, and Terre Haute assessment areas and adequate in the remaining two assessment areas.

Geographic and Borrower Distribution

The distribution of loans among geographies is excellent in the assessment areas located in Indiana. The geographic distribution is excellent in the Indianapolis-Carmel-Muncie and non-metropolitan Southern Indiana assessment areas. In the Fort Wayne assessment area, the geographic distribution is good and adequate in the remaining four assessment areas.

A low level of lending gaps was identified in five of the seven assessment areas. There were no gaps in lending in either the Terre Haute or the non-metropolitan Northern Indiana assessment areas.

The distribution of loans among borrowers of different income levels is excellent and good to businesses of different revenue sizes in the assessment areas located in Indiana. The borrower distribution is excellent in the Indianapolis-Carmel-Muncie, non-metropolitan Southern Indiana, and the remaining five assessment areas. The distribution to businesses of different revenue sizes is excellent in the Bloomington and Fort Wayne assessment areas, good in the Indianapolis-Carmel-Muncie and non-metropolitan Southern Indiana assessment areas, and adequate in the remaining three assessment areas.

A detailed analysis for the geographic distribution and borrower-income distribution is provided with the analysis for each assessment area.

Community Development Loans

In Indiana, Fifth Third originated 47 community development loans totaling $427.0 million, which represents 7.1% of the Fifth Third's community development lending by dollar volume. This is an outstanding level of community development lending in Indiana. Fifth Third was a leader in providing community development loans in the Indianapolis-Carmel-Muncie assessment area. Fifth Third made a relatively high level of community development loans in non-metropolitan Southern Indiana and the Fort Wayne assessment areas and an adequate level of community development loans in the remaining four assessment areas.

Flexible Lending

Fifth Third consistently made an extensive use of flexible lending practices within assessment areas located in Indiana.

Investment Test

Fifth Third's performance under the investment test within the assessment areas located in Indiana is rated "Outstanding." Fifth Third funded $155.3 million in qualified community development investments in Indiana during the evaluation period, consisting of $102.0 million obtained from new investments made during the current review period and $53.3 million from prior period investments. The majority of investments were LIHTCs. Fifth Third's level of qualified investments is excellent in four of seven assessment areas. The level of qualified investments is good in the Lafayette-W. Lafayette and Terre Haute assessment areas and adequate in non-metropolitan Northern Indiana.

Fifth Third was considered responsive to the credit and community development needs in the state; therefore, investments without a purpose, mandate, or function of serving Fifth Third's assessment areas in Indiana was considered to positively impact state performance. Fifth Third made $1.9 million in qualified investments, typically in the form of LIHTCs that benefited counties within the state, but outside Fifth Third's delineated assessment areas within Indiana. Additional information regarding performance under the investment test is provided in the respective analyses for each assessment area.

Service Test

Fifth Third's performance under the service test within the assessment areas located in Indiana is rated "Outstanding." Fifth Third's performance is excellent in the Indianapolis-Carmel-Muncie assessment area, adequate in the non-metropolitan Southern Indiana assessment area, and poor in the Bloomington assessment area. Fifth Third's performance was good in the remaining four assessment areas.

For details regarding the institution's performance in the individual assessment areas, refer to the respective assessment area's "Service Test" section in this report.

Retail Services

Retail delivery systems are accessible to all geographies, including low- and moderate-income geographies, individuals of different income levels, and businesses of different revenue sizes in Fifth Third's assessment areas. Retail service distribution is good in six assessment areas and adequate in the Bloomington assessment area.

Fifth Third has 226 banking centers in Indiana, which represents 17.4% of Fifth Third's total branches. Fifth Third's record of opening and closing banking centers has not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and to low- and moderate-income individuals. One branch closed in a moderate-income tract during the evaluation period in the Indianapolis-Carmel-Muncie assessment area.

Banking services and business hours do not vary in a way that inconveniences any portions of the Fifth Third's assessment areas and are consistent with the services and hours discussed in the "Institution" assessment.

Community Development Services

Fifth Third is a leader in providing community development services in Indiana. Fifth Third's performance is excellent in the Indianapolis-Carmel-Muncie, Lafayette-W. Lafayette, and non-metropolitan Northern Indiana assessment areas. The level of community development services is adequate in non-metropolitan Southern Indiana and poor in the Bloomington assessment area. Fifth Third's performance is good in the remaining two assessment areas.

METROPOLITAN AREA
(Full-scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN INDIANAPOLIS-CARMEL-MUNCIE IN CSA #294

The Indianapolis-Carmel-Muncie IN CSA consists of the following two MSAs: Columbus IN MSA #18020, consisting of Bartholomew County, and Indianapolis-Carmel-Anderson IN MSA #26900, consisting of Boone, Brown, Hamilton, Hancock, Hendricks, Johnson, Madison, Marion, Morgan, Putnam, and Shelby counties.

The assessment area is comprised of 51 low-, 111 moderate-, 159 middle-, and 90 upper-income tracts. There is also one tract with no income designation that does not report income information.

As of June 30, 2016, Fifth Third ranked third out of 50 institutions with 9.2% of the deposit market share. JP Morgan Chase Bank had the majority of the market share 23.3% of deposits, followed by PNC Bank with 16.3% of the market share, respectively. Deposits in this assessment area accounted for 4.0% of the Fifth Third's total deposits. This was 73.0% of deposits within the state and the seventh-highest within Fifth Third's CRA footprint.

From January 1, 2014 through June 30, 2016, Fifth Third originated 4,925 HMDA loans and 1,359 CRA loans, which represented 4.7% and 3.5% of the total loans originated during the evaluation period, respectively. This was the seventh-largest HMDA market and ninth-largest CRA market for loans originated during the evaluation period.

In 2015, Fifth Third Mortgage Company ranked 21st among 587 HMDA reporters in the assessment area, Fifth Third Mortgage Company ranked sixth, and Fifth Third ranked 80th. Wells Fargo Bank, Union Savings Bank, Caliber Home Loans, JP Morgan Chase Bank, and Huntington Bank were the top five HMDA lenders in the assessment area. Fifth Third ranked 19th of 118 CRA reporters in the assessment area in 2015. The top five CRA lenders in the assessment area were American Express, Chase Bank USA, PNC Bank, Capital One, and Synchrony Bank. These lenders are mostly issuers of credit cards and their CRA loans primarily consist of commercial credit card accounts.

Four community contact interviews were conducted to provide additional information regarding the assessment area. The first contact, representing an organization that provides economic development services for local businesses and government, stated the economy is strong and expanding. However, the contact believed banks make it difficult for individuals with poor credit history to obtain financing for car loans and other types consumer loans; therefore, there is an opportunity for banks to counsel and provide financial literacy training to consumers with poor credit history to assist them in gaining and restoring access to credit.

The second contact, representing an organization that advocates for various neighborhood development projects, stated one of the most significant needs in the community is to garner more support for neighborhoods to become more economically diverse by helping them attract businesses that are connected to nearby economic engines and to develop more affordable housing. The primary challenge in the area of housing is that while there is available capital for home purchase loans for new houses, there is not as much available capital for renovating existing homes, particularly in lower-income neighborhoods. As a result, there are an increasing number of older homes that require renovation and there is an opportunity for banks to originate home improvement loans. The contact believed local community banks do not have the resources to invest in large community development projects and larger financial institutions prefer to support programs that can be implemented across their entire footprint, which may not benefit the local economy. The contact stated that small businesses need access to small-dollar loans up to $100,000. Without access to these types of loans, area businesses might find it difficult to grow or expand.

The third contact, representing an organization that supports services to low- and moderate-income individuals, stated about 12.0% of area households are below the poverty level, which makes it difficult to participate in the growing economy. The contact believed there is a need for banks to participate in financial literacy programs to help lower-income individuals feel less financially excluded. The contact mentioned the following banks as being active in participating in financial literacy education: Main Source Bank, 1st Financial Bank, PNC Bank, Old National Bank, and Central Credit Union.

The fourth contact, representing a government housing agency that provides low-income families, seniors, and individuals with disabilities access to affordable housing, stated the local economy is favorable and the housing market is rebounding since the recession and housing is mostly affordable; however, there are opportunities for financial institutions to offer financial literacy classes targeted to lower-income individuals and the unbanked, since a lack of economic opportunities makes it difficult to start or grow a business or own a home.

Population Characteristics

According to 2010 U.S. Census data, the population in the assessment area was 2.0 million. About 30.7% of the population lived in low- and moderate-income tracts. In addition, 74.1% of the population was 18 years of age or older, the legal age to enter into a contract.

As of July 1, 2015, the Indianapolis-Carmel-Anderson MSA is the 34th largest in terms of population in the nation, while the Columbus MSA is the 375th largest.[145] Marion County is the largest county in the assessment area and Indiana.[146] Indianapolis (located in Marion County) is the largest city in assessment area and is the 14th most populous city in the U.S. Indianapolis has 853,173 residents and its population increased by 9.0% between 2000 and 2015.

[145] MSA population data is derived from the U.S. Census Data 2015 Statistical Abstract: https://factfinder.census.gov/faces/tableservices/jsf/pages/productview.xhtml?src=bkmk
[146] U.S. Places: http://us-places.com (main page – enter state, choose population by county)

In contrast, the next largest cities in the CSA are Carmel, Anderson, and Columbus, which have 88,713, 55,305, and 46,690 residents, respectively.[147]

The following table shows the population in the assessment area by county for 2010 and 2015, with the percentage of the population increase or decrease.[148] The population within the assessment area experienced positive growth between 2010 and 2015, with Hamilton County experiencing the greatest growth and Brown County experiencing the least growth in population during this time period. Moody's Analytics noted positive population growth and steady in-migration trends in the Indianapolis and the Columbus MSAs. These trends could indicate an increased demand in prospective homebuyers in those metropolitan areas.

County	2010 Population	2015 Population	Population Percent Change
Bartholomew	76,794	81,162	5.7%
Boone	56,640	63,344	11.8%
Brown	15,242	14,977	-1.7%
Hamilton	274,569	309,697	12.8%
Hancock	70,002	72,520	3.6%
Hendricks	145,448	158,192	8.8%
Johnson	139,654	149,633	7.1%
Madison	131,636	129,723	-1.5%
Marion	903,393	939,020	3.9%
Morgan	68,894	69,648	1.1%
Putnam	37,963	37,585	-1.0%
Shelby	44,436	44,478	0.1%
Total	**1,964,671**	**2,069,979**	**5.4%**

Income Characteristics

In 2010 the assessment area median family income was greater ($64,596) than Indiana at $58,944. Between 2014 and 2016, in spite of a slight decrease in 2015, the median family income generally increased in the Columbus MSA. In the Indianapolis MSA, median family income increased in 2014 and 2015, but decreased by nearly 5.0% between 2015 and 2016. Moody's Analytics noted high affordability for residents and businesses, strong population growth, and sturdy job market induces more residents to relocate to the metropolitan area.

Poverty rates increased in each county in the assessment area from 1999 to 2015.[149] Hamilton County had the lowest poverty rate and Marion County had the highest poverty rate in 1999 and 2015. In 2015, only Marion County and Madison County had poverty rates greater than Indiana. Hancock County and Marion County experienced the largest increase in poverty rates during this period. In 2015, Indiana's poverty rate exceeded the national rate. According to the U.S. Census Bureau, the national poverty rate in 2015 was 13.5%, down 1.3 percentage points from 14.8% in 2014. For most demographic groups, the 2015 poverty rates and number of people in poverty decreased from 2014.[150] A community contact indicated that about 12.0% of area households are below the poverty level, which makes it difficult to participate in the growing economy. The contact believed there is a need for banks to participate in financial literacy programs to help lower-income individuals feel less financially excluded. According to 2010 U.S. Census data, 11.5% of households in the assessment area were below the poverty level and Marion County and Madison County had the highest levels of households below the poverty at 15.4% and 13.7%, respectively. The following table shows the poverty rates for 1999[151] and 2015.

[149] U.S. Department of Agriculture Economic Research Service Poverty Rates (for 1999 and 2015): https://data.ers.usda.gov/reports.aspx?ID=17826

Housing Characteristics

According to 2010 U.S. Census data, there are 839,990 housing units and 493,743 families in the assessment area. From an income perspective, 35.0% of housing units, 23.0% of owner-occupied units, and 28.0% of families are located in low- or moderate-income tracts. Over two-thirds of the housing units in the low-income census tracts are either rental or vacant (68.9%) and 31.1% are owner-occupied. In the moderate-income census tracts, over half of the housing units are either rental or vacant (56.6%) and 43.4% are owner-occupied. Therefore, based on the number of housing units compared to the number of families in low- and moderate-income census tracts, there appear to be credit-related opportunities for Fifth Third to provide various aspects of affordable housing in the assessment area.

The 2010 U.S. Census data shows the median age of housing stock in the assessment area was 36 years old, with 19.5% of the stock built before 1950. The oldest housing stock was in Madison County with a median age of 48 years. The newest housing stock was 16 years in Hamilton County. However, within the assessment area, the median age of housing stock was 58 years in low-income tracts and 46 years in moderate-income tracts. A community contact stated there is an increasing number of older homes in lower-income neighborhoods requiring renovation; therefore, there appears to be a need and ample opportunity for Fifth Third to provide home improvement and rehabilitation loans in these lower-income neighborhoods.

According to 2010 U.S. Census data, the median housing value in the assessment area was $139,808, with an affordability ratio of 37.33. The affordability ratio is derived by dividing the median household income by the median housing value. The higher the affordability ratio, the more affordable a home is considered. Median housing values varied between 2010 and 2011-2015, along with median family incomes; as a result, housing became slightly more affordable in the Columbus MSA (Bartholomew County) and slightly less affordable in half the counties in the Indianapolis MSA, whereas housing affordability in Marion County (the most populous county in assessment area) remained stable. During the evaluation period, the most affordable housing was in Madison County and the least affordable was in Brown County. Median gross rents increased across the assessment area, with renters in Brown County experiencing the largest increase in rental rates and renters in Putnam County experiencing the smallest increase in gross rental rates. The table below presents housing characteristics from the U.S. Census data between 2010 and 2015 in the assessment area and Indiana. According to Moody's Analytics, housing is highly affordable for residents in the Columbus MSA and Indianapolis MSA. Above-average job and income gains and stable housing market may lead to a growth in prospective homebuyers in 2017. According to 2010 U.S. Census data, 45.5% of renters in the assessment area had rent costs greater than 30.0% of their income and combined with increased rental rates across the assessment area, potential homebuyers may not be able to save for a down payment for a home.

County	2010 Median Housing Value	2010 Affordability Ratio	2011-2015 Median Housing Value	2011-2015 Affordability Ratio	2010 Median Gross Rent	2011-2015 Median Gross Rent	Percent of Change
Bartholomew	$133,100	39.63	$136,000	40.48	$731	$818	11.9%

Indiana	**$123,000**	**38.78**	**$124,200**	**39.66**	**$683**	**$747**	**9.4%**

According to Bankrate.com,[152] Indiana ranked 15th for foreclosure filings in November 2016. The national average for foreclosure filings was one in every 1,533 housing units. The following table contains information about foreclosure filings in the assessment area, according to Realtytrac:[153]

Geography Name	Ratio of Properties Receiving Foreclosure Filings in November 2016
Bartholomew	1:2,412
Boone	1:1,291
Brown	1:3,933
Hamilton	1:10,038
Hancock	1:1,653
Hendricks	1:1,829
Johnson	1:2,876
Madison	1:1,261
Marion	1:2,050
Morgan	1:896
Putnam	1:788
Shelby	1:1,887
Indiana	**1:1,590**
U.S.	**1:1,533**

In November 2016, Putnam County had the highest rate of foreclosure and Hamilton County had the lowest foreclosure rate in the assessment area. In Marion County (Indianapolis MSA), Indianapolis has the highest foreclosure rate at 1:2,044. In Bartholomew County (Columbus MSA), Columbus has the second highest foreclosure rate at 1:2,685, but according to Moody's Analytics, the Columbus MSA has a stable housing market with few foreclosures.

Building permits for this assessment area, Indiana, and the nation are included in the following table for 2014, 2015, and 2016.[154]

Geography	2014	2015	Percent of Change 2014-2015	2016	Percent of Change 2015-2016
Columbus MSA	254	233	-8.3%	300	28.8%
Indianapolis-Carmel-Anderson MSA	8,005	8,735	9.1%	7,554	-13.5%
Indiana	**17,813**	**18,483**	**3.8%**	**18,317**	**-0.9%**
U.S.	**1,052,124**	**1,182,582**	**12.4%**	**1,190,191**	**0.6%**

[152] Bankrate.com: http://www.bankrate.com/finance/real-estate/foreclosures-by-state/default.aspx
[153] Realtytrac: http://www.realtytrac.com/statsandtrends/foreclosuretrends/
[154] U.S. Census Bureau Building Permits Survey: http://www.census.gov/construction/bps/

The Columbus MSA experienced a decrease in the number of housing permits issued between 2014 and 2015 and significant increase between 2015 and 2016. While the Indianapolis MSA experienced an increase in the number of housing permits issued between 2014 and 2015 and decrease between 2015 and 2016. The decrease in the number of permits could indicate there is a declining demand for home purchase loans in the Indianapolis MSA and an increasing demand for single-family residential homes in the Columbus MSA.

Labor, Employment, and Economic Characteristics

According to Moody's Analytics, the Columbus and Indianapolis assessment area economies are in expansion, primarily due to their large manufacturing base, strong population growth, flourishing high-tech industry, highly skilled workforce, and low business costs. Overall, the area's central location makes it a natural logistics hub (within a day's drive of over half of the country) and rising workforce skill level attracts more business investments.

According to *Inside Indiana*,[155] seven Indiana-based corporations are among the 500 largest in the country. Indiana gained two Fortune 500 companies and lost one in 2016. Indianapolis-based Calumet Specialty Product Partners dropped out of the Fortune 500 in 2016 after being ranked 457th in 2015. All four companies increased their standing in the past year.

Indianapolis Metro Fortune 500 Companies (2016)[156]		
Rank	**Company**	**Annual Revenue**
33	Anthem Inc.	$79.2 billion
141	Eli Lilly and Company (Columbus-based)	$20.0 billion
148	Cummins Engine Co. Inc.	$1.4 billion
488	**Simon Property Group Inc**.	$5.3 billion

According to Moody's Analytics the top 15 employers in the CSA in 2015/2016 were:

Company[157]	**Number of Employees**
Indiana University Health	21,712
St. Vincent Hospitals & Health Services	15,285
Purdue University	14,558
Community Health Network	11,245

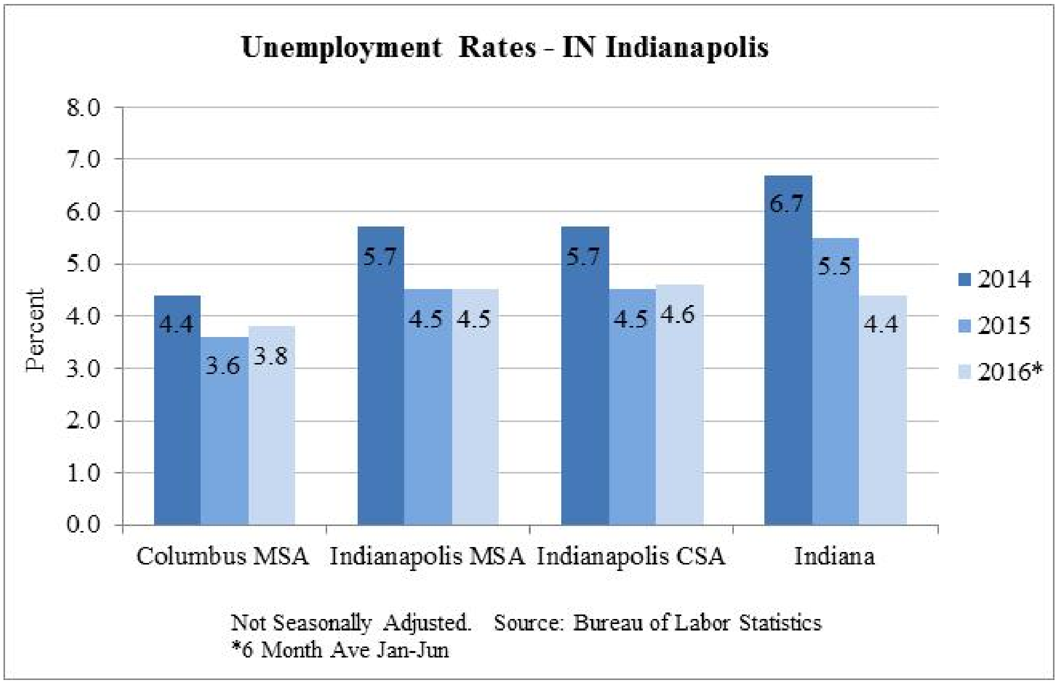
[157] (Col) Columbus MSA

The following table illustrates the average unemployment rates for 2014, 2015, and 2016 for the two MSAs, the CSA, and Indiana.



The unemployment rates declined from 2014 to 2015 and remained steady from 2014 to 2015 in the assessment area. The Columbus MSA unemployment rates were considerably below the Indianapolis MSA's rates. Overall, the CSA had unemployment rates significantly below Indiana's all three years.

According to *USA Today*, Cummins, a manufacturer of diesel and natural-gas engines, plans to cut 2,000 employees, or about 4.0% of its global workforce, by the end of 2016 due to weakening sales of engines and power generators around the world. The job eliminations are expected to save the company around $200 million in ongoing expenses, consisting mostly of professional employees, not those on the factory floor. Up to 500 job eliminations could occur in Indiana, where Cummins employs 8,000 people. Cummins global workforce tops 54,000. [158] According to *IndyStar*, Elli Lilly and Co. announced it will eliminate 485 sales jobs nationwide due to the failure of a drug aimed to treat Alzheimer's disease effective March 31, 2017. The company said 75 employees in Indiana will be affected.[159]

2016 FFIEC Census Data and 2015 D&B Information

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE INDIANAPOLIS-CARMEL-MUNCIE IN CSA

Fifth Third's performance under the lending test in this assessment area is rated excellent. Fifth Third has demonstrated an excellent responsiveness to the credit needs of the community. In addition, Fifth Third originated 23 community development loans totaling $293.4 million. Fifth Third has an excellent geographic distribution of loans and minimal lending gaps in the assessment area. Fifth Third has an excellent distribution among borrowers of different income levels and a good distribution of loans to businesses of different revenue sizes. Fifth Third exhibits a good record of serving the credit needs of highly economically disadvantaged areas in its assessment area, low-income individuals, and businesses with gross annual revenues of $1 million or less. The excellent level of community development loans and extensive use of flexible lending practices augmented Fifth Third's performance in this assessment area.

Greatest consideration was given to the evaluation of home purchase lending based on the overall volume of lending, followed by refinance, small business, and home improvement lending. Details of Fifth Third's residential mortgage and small business lending, as well as information regarding lending by peers, can be found in Appendix E.

Lending Activity

Fifth Third's lending activity reflects an excellent responsiveness to the credit needs within the assessment area. Fifth Third originated 2,556 home purchase, 2,219 refinance, 149 home improvement, 1,359 small business, and 23 community development loans during the evaluation period. The percentage of Fifth Third's total lending at 4.4% is greater than the percentage of total deposits at 4.0% in this area.

In addition to lending, Fifth Third modified existing loans to borrowers. Refer to the distribution of HAMP and other real-estate secured modifications within the assessment area by census tract income and by borrower income.

	Distribution by Census Tract Income							
	Low		**Mod**		**Middle**		**Upper**	
	#	**%**	**#**	**%**	**#**	**%**	**#**	**%**
Other Real Estate Secured Modifications	12	5.3%	43	18.9%	114	50.2%	58	25.6%
Percentage of Owner Occupied Units		***4.8%***		***18.3%***		***43.7%***		***33.3%***

*Unknown tract data is not included in the above table.

	Distribution by Borrower Income							
	Low		Mod		Middle		Upper	
	#	%	#	%	#	%	#	%
Other Real Estate Secured Modifications	69	30.4%	82	36.1%	54	23.8%	21	9.3%
Percentage of Families by Family Income		*21.0%*		*17.5%*		*20.9%*		*40.6%*

*Unknown tract data is not included in the above table.

There were not enough HAMP modifications to conduct an analysis. The percentage of other modifications in low- and moderate-income tracts exceeded the percentage of owner-occupied units in these geographies; therefore, modifications helped to expand lending activities in these areas. The percentage of other modifications made to low- and moderate-income income borrowers exceeded the percentage of low- and moderate-income income families in the assessment area; therefore, modifications enhanced Fifth Third's ability to reach low- and moderate-income borrowers.

Geographic Distribution of Loans

Fifth Third's overall distribution of lending among geographies is excellent. Home purchase lending, which was the largest loan category, is excellent. Home improvement lending is also excellent. Refinance and small business lending are good. There is also an overall low level of lending gaps. The following gaps in lending were noted in the assessment area:

Tract Income Levels	Number of Tracts	Tracts with no Loans	Penetration
Low	51	4	92.2%
Moderate	111	1	99.1%
Middle	159	1	99.4%
Upper	90	0	100.0%
Unknown	1	0	100.0%
Total	**412**	**6**	**98.5%**

Lending gaps are considered minimal, because of the low number of lending gaps in low,-moderate-, and middle-income tracts and no lending gaps in upper-income tracts.

Home Purchase Loans

Fifth Third made 106 home purchase loans totaling $9.5 million in low-income tracts. This represents 4.1% of home purchase loans by volume, which is comparable to the percentage of owner-occupied units in these tracts at 4.8% and 2.2% by dollar amount, which is below proxy. The percentage of loans by volume was comparable to the 2014 aggregate at 1.5% and significantly exceeded the 2015 aggregate at 1.8%. As Fifth Third's performance exceeded the aggregate of all lenders and was comparable to proxy, the geographic distribution in low-income tracts is good.

Fifth Third made 519 home purchase loans totaling $54.3 million in moderate-income tracts. This represents 20.3% of home purchase loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 18.3%, and 12.8% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate at 12.5% and significantly exceeded the 2015 aggregate at 13.4%. As Fifth Third's performance exceeded the aggregate of all lenders and proxy, the geographic distribution in moderate-income tracts is excellent.

Fifth Third made 1,030 home purchase loans totaling $142.9 million in middle-income tracts. This represents 40.3% of home purchase loans by volume, which is below the percentage of owner-occupied units in these tracts at 43.7%, and 33.6% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 42.7% and was below the 2015 aggregate of 42.4%.

Fifth Third made 901 home purchase loans totaling $219.1 million in upper-income tracts. This represents 35.3% of home purchase loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 33.3%, and 51.5% by dollar amount, which significantly exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 43.3%, but was below the 2015 aggregate of 42.4%.

Overall, geographic distribution of home purchase loans is excellent.

Refinance Loans

Fifth Third made 76 refinance loans totaling $5.1 million in low-income tracts. This represents 3.4% of refinance loans by volume and 1.6% by dollar amount, which is below the percentage of owner-occupied units at 4.8%. The percentage of loans by volume was below the 2014 aggregate at 2.3% and exceeded the 2015 aggregate at 1.6%. As Fifth Third's performance was below proxy and exceeded the aggregate of all lenders, the geographic distribution of refinance loans in low-income tracts is good.

Fifth Third made 379 refinance loans totaling $32.4 million in moderate-income tracts. This represents 17.1% of refinance loans by volume, which is comparable to the percentage of owner-occupied units at 18.3%, and 10.2% by dollar amount, which is significantly below proxy. The percentage of loans by volume was comparable to the 2014 aggregate at 13.4% and exceeded the 2015 aggregate at 11.2%. As Fifth Third's performance exceeded the aggregate of all lenders and was comparable to proxy, the geographic distribution of refinance loans in moderate-income tracts is excellent.

Fifth Third made 925 refinance loans totaling $104.9 million in middle-income tracts. This represents 41.7% of refinance loans by volume, which is below the owner-occupied units in these tracts at 43.7%, and 33.2% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate at 44.3% and was below the 2015 aggregate at 41.1%.

Fifth Third made 839 refinance loans totaling $174.0 million in upper-income tracts. This represents 37.8% of refinance loans by volume, which exceeds the owner-occupied units in these tracts at 33.3%, and 55.0% by dollar amount, which exceeds proxy. The percentage of loans by volume was below the 2014 aggregate at 40.0% and was below the 2015 aggregate at 46.1%.

Overall, the geographic distribution of refinance loans is good.

Home Improvement Loans

Fifth Third made 10 home improvement loans totaling $423,000 in low-income tracts. This represents 6.7% of home improvement loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 4.8%, and 4.1% by dollar amount, which is below proxy. The percentage of loans by volume significantly exceeded the 2014 aggregate of 2.4% and exceeded the 2015 aggregate of 2.4%. Given the high median age of housing in low-income tracts at 58 years, which may indicate the need for home improvement loans, and since Fifth Third's performance exceeded proxy and the aggregate of all lenders, the geographic distribution of home improvement loans in low-income tracts is excellent.

Fifth Third made 36 home improvement loans totaling $1.7 million in moderate-income tracts. This represents 24.2% of home improvement loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 18.3%, and 16.0% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 13.4% and the 2015 aggregate of 13.4%. Given that Fifth Third's performance exceeded the proxy and aggregate of all lenders, the geographic distribution of home improvement loans in moderate-income tracts is excellent.

Fifth Third made 60 home improvement loans totaling $3.6 million in middle-income tracts. This represents 40.3% of home improvement loans by volume, which is below the percentage of owner-occupied units in these tracts at 43.7%, and 35.0% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 46.9%, but was below the 2015 aggregate of 44.4%.

Fifth Third made 43 home improvement loans totaling $4.7 million in upper-income tracts. This represents 28.9% of home improvements loans by volume, which is below the percentage of owner-occupied units in these tracts at 33.3%, and 45.0% by dollar amount, which exceeds proxy. The percentage of loans by volume was below the 2014 aggregate of 37.2% and was below the 2015 aggregate of 39.9%.

Overall, the geographic distribution of home improvement loans is excellent.

Small Business Loans

Fifth Third made 57 small business loans totaling $9.0 million in low-income tracts. This represents 4.2% of small business loans by volume, which is comparable to the percentage of businesses in these tracts at 4.7%, and 4.8% by dollar amount, which is comparable to proxy. The percentage of loans by volume was below the 2014 aggregate of 4.5% and was comparable to the 2015 aggregate of 5.1%. As Fifth Third's performance is comparable to proxy and the aggregate of all lenders, the geographic distribution of small business loans in low-income tracts is good.

Fifth Third made 224 small business loans totaling $37.8 million in moderate-income tracts. This represents 16.5% of small business loans by volume, which is below the percentage of businesses in these tracts at 18.7%, and 20.1% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 16.6% and was comparable to the 2015 aggregate of 16.9%. Given that Fifth Third's performance exceeded the aggregate of all lenders, but was below proxy, the geographic distribution of small business loans in moderate-income tracts is good.

Fifth Third made 588 small business loans totaling $80.4 million in middle-income tracts. This represents 43.3% of small business loans by volume, which exceeds the percentage of businesses in these tracts at 41.2%, and 42.6% by dollar amount, which is comparable to proxy. The percentage of loans by volume exceeded the 2014 aggregate of 39.9% and exceeded the 2015 aggregate of 39.3%.

Fifth Third made 489 small business loans totaling $61.3 million in upper-income tracts. This represents 36.0% of small business loans by volume, which is comparable with the percentage of businesses in these tracts at 35.3%, and 32.5% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate of 37.5% and was comparable to the 2015 aggregate of 37.6%.

Overall, the geographic distribution of small business loans is good.

Distribution by Borrower Income and Revenue Size of the Business

The distribution of loans is excellent based on borrower income and good for businesses of different revenue sizes. Borrower distribution is excellent for home purchase, refinance, and home improvement loans.

Home Purchase Loans

Fifth Third made 565 loans totaling $50.8 million to low-income borrowers. This represents 22.1% of home purchase loans by volume, which is comparable to the percentage of low-income families at 21.0%, and 11.9% of loans by dollar amount, which is significantly below proxy. The percentage of loans by volume significantly exceeded the 2014 aggregate of 9.3% and the 2015 aggregate of 10.5%.

Given that Fifth Third's performance significantly exceeded the aggregate of all lenders and was comparable to proxy, the borrower distribution of home purchase loans to low-income borrowers is excellent.

Fifth Third made 538 loans totaling $61.3 million to moderate-income borrowers. This represents 21.0% of home purchase loans by volume, which exceeds the percentage of moderate-income families at 17.5%, and 14.4% of loans by dollar amount, which is below proxy. The percentage of loans by volume was comparable with the 2014 aggregate of 21.5% and was below the 2015 aggregate of 21.4%. Given that Fifth Third's performance exceeded proxy and was comparable to the aggregate of all lenders, the borrower distribution of home purchase loans to moderate-income borrowers is excellent.

Fifth Third made 451 loans totaling $66.9 million to middle-income borrowers. This represents 17.6% of home purchase loans by volume, which is below the percentage of middle-income families at 20.9%, and 15.7% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 19.5% and was below the 2015 aggregate of 19.6%.

Fifth Third made 802 loans totaling $212.9 million to upper-income borrowers. This represents 31.4% of home purchase loans by volume, which is significantly below the percentage of upper-income families at 40.6%, and 50.0% of loans by dollar amount, which significantly exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 32.0% and was below the 2015 aggregate of 31.6%.

A community contact indicated that low- and moderate-income individuals have difficulty qualifying for home purchase homes. Since Fifth Third's lending to low- and moderate-income borrowers was at an excellent level, the borrower distribution of home purchase loans is excellent.

Refinance Loans

Fifth Third made 397 loans totaling $31.2 million to low-income borrowers. This represents 17.9% of refinance loans by volume, which is slightly below the percentage of low-income families at 21.0%. The percentage of loans by dollar amount in these geographies at 9.9% is significantly below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 8.8% and significantly exceeded the 2015 aggregate of 6.8%. Given that Fifth Third's performance was slightly below proxy and significantly exceeded the aggregate of all lenders, the borrower distribution of refinance loans to low-income borrowers is excellent.

Fifth Third made 462 loans totaling $42.5 million to moderate-income borrowers. This represents 20.8% of refinance loans by volume, which exceeds the percentage of moderate-income families at 17.5%, and 13.4% by dollar volume, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 17.2% and exceeded the 2015 aggregate of 14.7%. Given that Fifth Third's performance exceeded proxy and the aggregate of all lenders, the borrower distribution of refinance loans to moderate-income borrowers is excellent.

Fifth Third made 466 loans totaling $55.7 million to middle-income borrowers. This represents 21.0% of refinance loans by volume, which is comparable to the percentage of middle-income families at 20.9%, and 17.6% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 19.5% and exceeded the 2015 aggregate of 17.7%.

Fifth Third made 758 loans totaling $166.7 million to upper-income borrowers. This represents 34.2% of refinance loans by volume, which is below the percentage of upper-income families at 40.6%, while the percentage of loans by dollar amount at 52.7% significantly exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 32.8% and was below the 2015 aggregate of 35.4%.

Overall, the borrower distribution of refinance loans is excellent.

Home Improvement Loans

Fifth Third made 33 loans totaling $1.6 million to low-income borrowers. This represents 22.1% of home improvement loans by volume, which slightly exceeds the percentage of low-income families at 21.0%, and 15.2% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 8.7% and in 2015 significantly exceeded the 2015 aggregate of 9.6%. Given that Fifth Third's performance exceeded proxy and significantly exceeded the aggregate of all lenders, the borrower distribution of home improvement loans to low-income borrowers is excellent.

Fifth Third made 29 loans totaling $1.6 million to moderate-income borrowers. This represents 19.5% of its home improvement loans by volume, which exceeds the percentage of moderate-income families at 17.5%, and 15.1% by dollar amount, which is below proxy. The percentage of loans by volume exceeds the 2014 aggregate of 19.5% and was below the 2015 aggregate of 18.5%. Given that Fifth Third's performance exceeded proxy and the aggregate of all lenders, the borrower distribution of home improvement loans to moderate-income borrowers is excellent.

Fifth Third made 37 loans totaling $2.3 million to middle-income borrowers. This represents 24.8% of home improvement loans by volume, which exceeds the percentage of middle-income families at 20.9%, and 22.1% by dollar amount, which also exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 23.9% and was below the 2015 aggregate of 23.7%.

Fifth Third made 49 loans totaling $4.9 million to upper-income borrowers. This represents 32.9% of home improvement loans by volume, which is below the percentage of upper-income families at 40.6%, and 47.0% by dollar amount, which exceeds proxy. The percentage of loans by volume was below the 2014 aggregate of 43.3% and the 2015 aggregate of 45.5%.

The overall borrower distribution of home improvement loans is excellent.

Small Business Loans

The distribution of small business loans to businesses of different sizes is good, considering Fifth Third's performance relative to the aggregate of all lenders. Fifth Third was able to make 51.8% of small business loans to businesses with revenues of $1 million or less. Fifth Third's performance exceeded the 2014 aggregate of 40.3% and the 2015 aggregate of 41.9%, but was significantly below the percentage of small businesses in the assessment area at 91.3%. Also, during the evaluation period, Fifth Third was able to make an acceptable percentage of small-dollar loans (70.9%) up to $100,000, indicating a willingness to lend in smaller amounts typically requested by small businesses. In addition, a community contact indicated small businesses need access to small-dollar loans. Without access to these types of loans, area businesses might find it difficult to grow and expand.

Community Development Loans

Fifth Third originated 23 community development loans totaling $293.4 million during the evaluation period as shown in the table below:

Affordable Housing		Economic Development		Revitalization and Stabilization	
#	*$*	*#*	*$*	*#*	*$*
5	210,000,000	3	28,132,178	15	55,300,000

Community development lending in the assessment area represent 4.9% of the total dollar volume of community development loans originated during the evaluation period. This ranks as Fifth Third's fifth-highest percentage of community development lending during the evaluation period. Fifth Third's performance is especially strong because of the high competition for community development loans and several large national banks in the area. Fifth Third only has 9.2% of the deposit market share. As such, Fifth Third is considered a leader in community development lending.

Examples of community development lending include, but are not limited to:

- A new loan and several renewals of a revolving line of credit to a city real estate advisors group that provides loans to LIHTC projects and commercial real estate developments in target communities
- Multiple working capital loans that promote economic development by financing businesses to support job retention, add new jobs, and promote growth to continue operations in low- and moderate-income geographies or for low- and moderate-income workers
- Multiple working capital loans to help retain and expand businesses located in designated areas specifically designated by the city to promote revitalization and economic development

The economic development and revitalization loans were deemed to be responsive, as a community contact indicated the need for these types of loans. Additionally, a community contact stated one of the most significant needs in the community is to garner more support for neighborhoods to become more economically diverse by helping them attract businesses.

Flexible Lending Programs

Fifth Third had 988 flexible lending loans in the assessment area: 557 loans were government loan programs, 41 were down payment assistance programs, and 390 were other flexible lending programs. The following tables show the percentage by volume and by dollar amount of the three types of flexible lending programs made in the assessment area during the evaluation period and the distribution of Fifth Third's flexible lending programs within the assessment area by census tract income and by borrower income.

Flexible Loan Programs												
	Geographic Distribution

*Unknown tract data is not included in the above table.

Overall, Fifth Third's lending in low-income tracts by number and dollar amount was below the percentage of owner-occupied units in these tracts; however, the number and dollar amount of down payment assistance programs significantly exceeded proxy. The percentage of lending by volume and dollar amount was below the percentage of owner-occupied units in moderate-income tracts.

Fifth Third's lending by volume and dollar amount to low-income borrowers was below the percentage of low-income families in the assessment area. The percentage of lending by volume and dollar amount to moderate-income borrowers exceeded the percentage of moderate-income families, particularly for government loan programs.

Fifth Third made extensive use of flexible lending practices is serving assessment area credit needs, as lending through flexible loan programs to moderate-income borrowers was excellent and lending in low- and moderate-income tracts and to low-income borrowers was good.

Investment Test

Fifth Third's performance relative to the investment test in the assessment area is rated excellent. Fifth Third made an excellent level of qualified community development investments and grants, particularly those not routinely provided by private investors. As such, Fifth Third was often in a leadership position. Fifth Third has 284 qualified investments totaling $93.9 million during the evaluation period. Shown in the table below are the total current period investments:

Affordable Housing		Economic Development		Community Services	
#	$	#	$	#	$
120	59,829,606	12	63,150	116	600,469

Also included in the total number of qualified investments are 36 prior period investments totaling $33.4 million. Overall, Fifth Third made 5.8% of its total community development investments in this assessment area, which is greater than the percentage of total deposits at 4.0% and greater than the percentage of branch offices at 3.4%.

Fifth Third exhibits an excellent responsiveness to credit and community development needs in the assessment area, including investments in affordable housing projects throughout the assessment area, which was an important need expressed by a community contact along with the need for a variety of services to lower-income individuals and families. Fifth Third made 140 donations totaling $801,369 that supported local schools, small businesses, churches, food banks, health care, and affordable housing. The majority of Fifth Third's donations (74.9%) supported services to low- and moderate-income individuals. Additionally 14.0% of the donation money supported an organization dedicated to affordable housing, better schools, safer streets, growing businesses and programs improving financial stability, which are all needs expressed by several community contacts.

Service Test

Fifth Third's performance under the service test in this assessment area is rated excellent. Retail services are accessible and Fifth Third is a leader in providing community development services in this assessment area.

Retail Services

Fifth Third's record of opening and closing offices has not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and to low- and moderate-income households. Since the previous evaluation period, no banking centers were opened and four were closed. One of the closed banking centers was located in a moderate-income tract. Delivery services are accessible to Fifth Third's geographies and individuals of different income levels.

Business hours and services provided do not vary in a way that inconveniences certain portions of the assessment area, including low- and moderate-income geographies or households, and are consistent with the services and hours discussed in the "Institution" assessment.

Fifth Third maintains 44 banking centers within this assessment area, including one in low-, 17 in moderate-, 12 in middle-, and 14 in upper-income census tracts. Fifth Third's banking centers in this assessment area represent 3.4% of all its banking centers.

Fifth Third has a total of 51 full-service ATMs within this assessment area, including one in low-,17 in moderate-, 18 in middle-, and 15 in upper-income census tracts.

The following table illustrates the percentage of banking centers and ATMs in low-, moderate-, middle-, and upper-income census tracts in comparison to the number and percentage of census tracts and the percentage of households and businesses in those tracts.

Geographic Distribution of Branches & ATMS

Assessment Area: IN Indianapolis

Tract Category	Branches				Stand Alone ATMs							Demographics			
	Total Branches				Total ATMs			Full Service ATMs		Cash only ATMs		Census Tracts		House holds	Total Businesses
	#	%	Open #	Closed #		#	%	#	%	#	%	#	%	%	%
Low	1	2.3%	0	0	Total	2	3.7%	1	2.0%	1	33.3%	51	12.4%	7.8%	4.9%
Moderate	17	38.6%	0	1	Total	18	33.3%	17	33.3%	1	33.3%	111	26.9%	24.7%	18.9%
Middle	12	27.3%	0	0	Total	19	35.2%	18	35.3%	1	33.3%	159	38.6%	40.3%	41.7%
Upper	14	31.8%	0	3	Total	15	27.8%	15	29.4%	0	0.0%	90	21.8%	27.3%	34.5%
Unknown	0	0.0%	0	0	Total	0	0.0%	0	0.0%	0	0.0%	1	0.2%	0.0%	0.0%
Total	44	100.0%	0	4	Total	54	100.0%	51	100.0%	3	100.0%	412	100.0%	100.0%	100.0%

2016 FFIEC Census Data, 2010 ACS Data, and 2015 D&B Information
Closed branches/ATMs are only included in "closed" columns and are not included in any other totals.
DTO - Drive thru only is a subset of total branches
SA = Stand Alone ATM is a subset of total ATMs

Branch distribution within low-income tracts was considered poor, as the distribution of branches was below the percentage of census tracts and households in these tracts. However, the branch distribution within moderate-income tracts was considered excellent.

Community Development Services

Fifth Third is a leader in providing community development services in this assessment area. During the evaluation period, Fifth Third employees provided 4,550 hours of community development service to local organizations serving low- and moderate-income individuals, which represents 3.8% of all community development services provided and equates to 2.19 annualized persons (ANP).

Affordable Housing	Economic Development	Revitalization and Stabilization	Community Services
# of Hours	***# of Hours***	***# of Hours***	***# of Hours***
158	472	54	3,866

Employees provided financial expertise through leadership positions in multiple community organizations that provide affordable housing and promote community and economic development and area revitalization and stabilization. Community development services include 2,781 hours of providing financial literacy through local nonprofits and school programs, 1,514 hours serving on boards and committees, 143 hours providing technical assistance to non-profits and local business, and 112 hours participating in foreclosure prevention outreach.

Fifth Third is considered particularly responsive with regard to hours dedicated to financial literacy activities. Several community contacts mentioned the need for banks to provide financial literacy training to consumers with poor credit history in order for them to restore and gain access to credit and help lower-income individuals feel less financially excluded.

NON-METROPOLITAN AREA
(Full-scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN NON-METROPOLITAN SOUTHERN INDIANA

Non-metropolitan Southern Indiana consists of Decatur, Dubois, Fayette, Franklin, Gibson, Knox, Orange, Parke, Perry, Pike, Ripley, Rush, and Spencer counties. The assessment area is comprised of 13 moderate-, 52 middle-, and 12 upper-income tracts. There are no low-income tracts or tracts with no-income designation in this assessment area. In 2014, 2015, and 2016, there were two[160] underserved/remote rural, middle-income tracts in Spencer County.

As of June 30, 2016, Fifth Third ranked third out of 34 institutions with 12.6% of the deposit market share. German American Bancorp had the majority of the market share with 17.2% of deposits, followed by Old National Bank with 13.7% of the market share. Deposits in this assessment area accounted for 0.7% of the Fifth Third's total deposits. This was 13.4% of deposits within the state and the 26th highest percentage of deposits within Fifth Third's CRA footprint.

From January 1, 2014 through June 30, 2016, Fifth Third originated 1,126 HMDA loans and 339 CRA loans, which represented 1.1% and 0.9% of the total loans originated during the evaluation period, respectively. This was the 23rd largest HMDA market and 27th largest CRA market for loans originated during the evaluation period.

In 2015, Fifth Third Mortgage Company ranked fourth among 295 HMDA reporters in the assessment area and Fifth Third ranked 19th. German American Bancorp, MainSource Bank, and BB&T were the top three HMDA lenders in the assessment area. Fifth Third ranked 14th of 61 CRA reporters in the assessment area in 2015. The top four CRA lenders in the assessment area were German American Bank, U.S. Bank, Old National Bank, and Capital One. These lenders are mostly issuers of credit cards and their CRA loans primarily consist of commercial credit card accounts.

Three community contact interviews were conducted to provide additional information regarding the assessment area. The first contact, representing an organization focused on economic development in a rural county in Southern Indiana, stated this area has one of the strongest local economies in the state; therefore, unemployment is not a major issue. The contact also stated area builders are focused on constructing more expensive homes that generate higher profit margins, resulting in opportunities for banks to fund affordable housing projects. Otherwise, the contact believed banks are meeting the credit needs of the community.

The second contact, representing an organization that works to improve the quality of life in rural America, stated the job market and unemployment rates are stable. The contact stated that area banks are adequately involved and meeting credit needs in the community. The contact specifically mentioned Old National, Owen Community Bank, and Home Bank as being active working partners with the organization.

[160] Tracts 9529.00 and 9531.00

The third contact, representing a chamber of commerce in rural Southern Indiana, stated the local economy is growing and has an above-average rate of employment. The contact believed the level of banking competition in Southern Indiana is high and possibly overbanked. The contact specifically mentioned Heritage State Bank and German American Bancorp as being particularly active in the community.

Population Characteristics

According to 2010 U.S. Census data, the population in the assessment area was 323,460. Less than 14.6% the population lived in moderate-income tracts. In addition, 75.9% of the population was 18 years of age or older, the legal age to enter into a contract.

Vincennes, located in Knox County, is the largest city in the assessment area. As of July 1, 2015, Vincennes had 18,012 residents and experienced a 2.2% decrease in population since April 1, 2010.[161] The following table shows the population in the assessment area by county for 2010 and 2015, with the percentage of the population increase and decrease.[162] The population within the assessment area experienced slight negative growth between 2010 and 2015, with Decatur County experiencing the largest increase and Rush County experiencing the largest decrease in population during this time period. Overall, this assessment area's population appears to be fairly steady.

County	2010 Population	2015 Population	Population Percent Change
Decatur	25,740	26,521	3.0%
Dubois	41,889	42,461	1.4%
Fayette	24,277	23,434	-3.5%
Franklin	23,087	22,872	-0.9%
Gibson	33,503	33,775	0.8%
Knox	38,440	37,927	-1.3%
Orange	19,840	19,605	-1.2%
Parke	17,339	16,901	-2.5%
Perry	19,338	19,347	0.0%
Pike	12,845	12,594	-2.0%
Ripley	28,818	28,701	-0.4%
Rush	17,392	16,672	-4.1%
Spencer	20,952	20,715	-1.1%
Total	**323,460**	**321,525**	**-0.6%**

162 Population Estimates derived from U.S. Census Data (April 1, 2010 – July 1, 2015): http://www.census.gov/quickfacts/table/PST045216/00

Income Characteristics

In 2010 the assessment area's median family income was less ($55,148) than Indiana's at $58,944. The median family income in the assessment area increased each year during the evaluation period.

Borrower Income Levels
Indiana State Non-Metropolitan Area

FFIEC Estimated Median Family Income		Low			Moderate			Middle			Upper		
		0	-	49.99%	50%	-	79.99%	80%	-	119.99%	120%	-	& above
2014	**$56,100**	0	-	$28,049	$28,050	-	$44,879	$44,880	-	$67,319	$67,320	-	& above
2015	**$56,700**	0	-	$28,349	$28,350	-	$45,359	$45,360	-	$68,039	$68,040	-	& above
2016	**$57,100**	0	-	$28,549	$28,550	-	$45,679	$45,680	-	$68,519	$68,520	-	& above

Poverty rates increased in the assessment area from 1999 to 2015.[163] Knox County had the highest and Dubois County had the lowest poverty rate in 1999 and 2015 and Fayette County experienced the largest increase in poverty rate during this time period. In 2015, poverty rates for Knox, Parke, Fayette, Orange, and Rush counties and Indiana exceeded the national poverty rate. According to the U.S. Census Bureau, the national poverty rate in 2015 was 13.5%, down 1.3 percentage points from 14.8% in 2014. The following table shows the poverty rates for 1999[164] and 2015.

County	1999 Poverty Rate	2015 Poverty Rate	Change
Decatur	9.3%	13.0%	39.8%
Dubois	5.3%	7.6%	43.4%
Fayette	7.9%	16.2%	105.1%
Franklin	7.1%	9.9%	39.4%
Gibson	8.2%	11.0%	34.1%
Knox	16.0%	19.1%	19.4%
Orange	12.4%	15.7%	26.6%
Parke	11.5%	17.2%	49.6%
Perry	9.4%	13.2%	40.4%
Pike	8.0%	11.1%	38.8%
Ripley	7.5%	10.6%	41.3%
Rush	7.3%	13.9%	90.4%
Spencer	6.9%	9.4%	36.2%
Indiana	**9.5%**	**14.4%**	**51.6%**
U.S.	**11.8%**	**13.5%**	**14.4%**

[163] U.S. Department of Agriculture Economic Research Service Poverty Rates (for 1999 and 2015): https://data.ers.usda.gov/reports.aspx?ID=17826
[164] 1999 National Poverty Rate: http://www.census.gov/prod/2000pubs/p60-210.pdf

Housing Characteristics

According to 2010 U.S. Census data, there are 124,706 housing units and 87,079 families in the assessment area. From an income perspective, 14.6% of housing units, 11.5% of owner-occupied units, and 12.4% of families are located in moderate-income tracts. In the moderate-income census tracts, 46.1% of the housing units are either rental or vacant and 53.9% are owner-occupied. Therefore, based on the number of housing units compared to the number of families in moderate-income census tracts, there appears to be limited credit-related opportunities for Fifth Third to provide various aspects of affordable housing in the assessment area.

The 2010 U.S. Census data shows the median age of housing stock in the assessment area was 42 years old and 30.6% of the stock was built before 1950. However, within the assessment area, the median age of housing stock was 57 years in moderate-income tracts; therefore, there appears to be opportunity for Fifth Third to provide home improvement and rehabilitation loans in moderate-income areas.

According to 2010 U.S. Census data, the median housing value in the assessment area was $106,393 with an affordability ratio of 42.25. The affordability ratio is derived by dividing the median household income by the median housing value. The higher the affordability ratio, the more affordable a home is considered. Overall, median housing values decreased between 2010 and 2011-2015 and median family incomes increased; as a result, housing became more affordable in eight counties and slightly less affordable in five counties in this assessment area during the evaluation period. Median gross rents increased across the assessment area, with renters in Perry and Decatur counties experiencing the largest increase in rental rates. In 2010, about 35.1% of renters across the assessment area had rent costs greater than 30.0% of income. Increasing rental rates may make it harder for potential homebuyers to save up enough money toward a down payment for a home. A community contact stated there are opportunities for banks to fund affordable housing projects in Southern Indiana. The table below presents housing characteristics from the U.S. Census data between 2010 and 2015 in the assessment area and Indiana.

County	2010 Median Housing Value	2010 Affordability Ratio	2011-2015 Median Housing Value	2011-2015 Affordability Ratio	2010 Median Gross Rent	2011-2015 Median Gross Rent	Percent of Change
Decatur	$118,500	39.57	$115,100	43.27	$610	$739	21.1%
Dubois	$129,600	40.80	$137,700	38.86	$613	$605	-1.3%
Fayette	$84,900	43.63	$81,900	48.08	$592	$648	9.5%
Franklin	$144,500	35.74	$147,600	35.06	$615	$649	5.5%
Gibson	$99,100	47.30	$103,000	46.90	$561	$658	17.3%
Knox	$84,700	46.66	$84,700	50.44	$549	$623	13.5%
Orange	$90,500	41.02	$89,400	44.53	$535	$580	8.4%
Parke	$91,600	44.23	$88,200	46.24	$541	$579	7.0%
Perry	$93,600	48.19	$100,800	47.09	$466	$608	30.5%
Pike	$80,700	51.08	$88,400	50.23	$528	$620	17.4%
Ripley	$138,200	34.80	$129,800	39.42	$659	$678	2.9%
Rush	$106,800	43.71	$100,700	44.81	$566	$630	11.3%
Spencer	$111,600	46.69	$116,100	47.59	$521	$587	12.7%
Indiana	**$123,000**	**38.78**	**$124,200**	**39.66**	**$683**	**$747**	**9.4%**

According to Bankrate.com,[165] Indiana ranked 15th for foreclosure filings in November 2016. The national average for foreclosure filings was one in every 1,533 housing units. The following table contains information about foreclosure filings in the assessment area, according to Realtytrac:[166]

Geography Name	Ratio of Properties Receiving Foreclosure Filings in November 2016
Decatur	1:4,590
Dubois	1:1,863
Fayette	1:1,751
Franklin	1:402
Gibson	1:1,040
Knox	1:987
Orange	1:1,089
Parke	1:1,533
Perry	1:1,410
Pike	1:491
Ripley	1:1,600
Rush	1:4,956
Spencer	1:672
Indiana	**1:1,590**
U.S.	**1:1,533**

In November 2016, Franklin, Pike, Spencer, and Knox counties had the highest rates of foreclosure and Rush and Decatur counties had the lowest. In addition, seven counties had higher rates of foreclosure than Indiana and the nation.

Labor, Employment, and Economic Characteristics

According to the Indiana Department of Workforce Development,[167] manufacturing plays a prominent role in Southern Indiana's economy, but research and development, financial services, medical sector, and educational institutions also play a role. Below are some of the major employers in this assessment area:

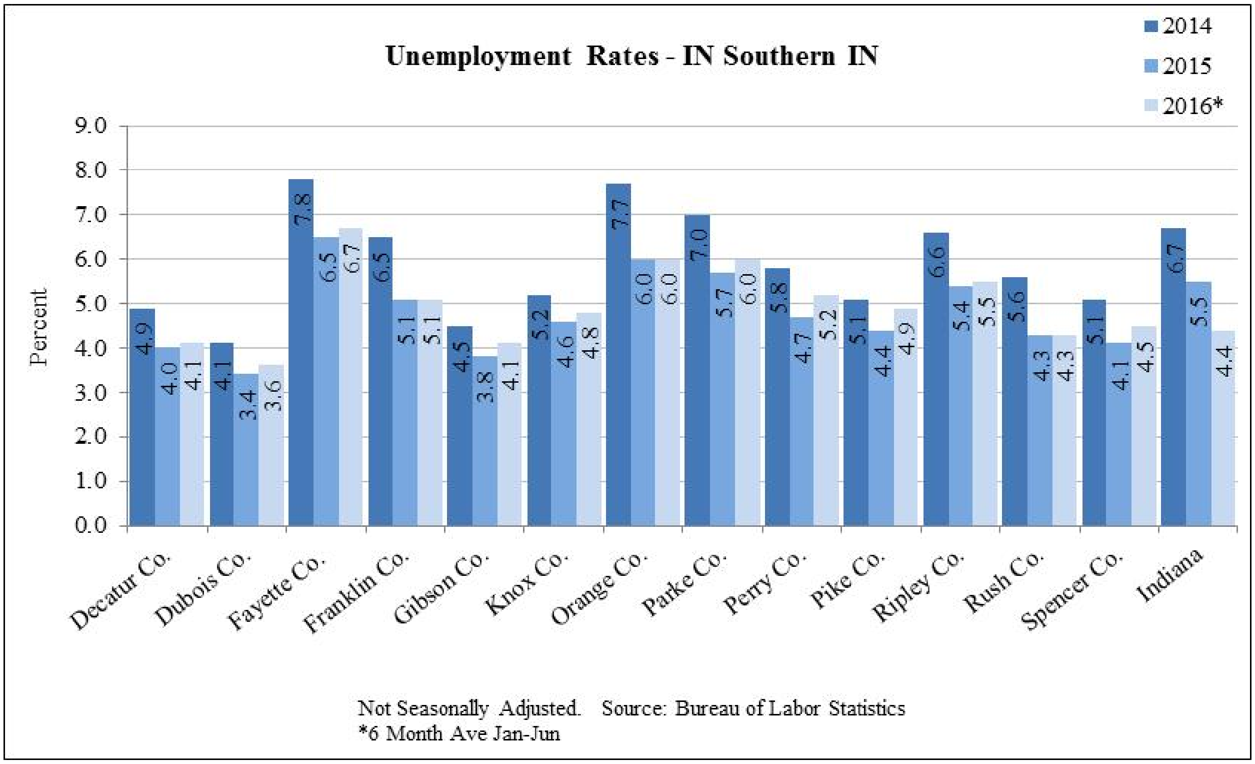
The following table illustrates the average unemployment rates for 2014, 2015, and 2016 across the assessment area and Indiana.



Overall, Dubois County had the lowest and Fayette County had the highest unemployment rates during the evaluation period. In 2014 and 2015, only three counties (Fayette, Orange, Parke) had unemployment rates higher than Indiana's; however, in 2016, only four counties (Decatur, Dubois, Gibson, Rush) had unemployment rates below Indiana's. However, three community contacts stated that unemployment rates are stable and that Southern Indiana has above-average rates of employment.

According to *NewsNow Dubois County*,[168] Toyota Motor Manufacturing announced the investment of $600 million into the Gibson County plant and adding 400 jobs in the process. Officials said the plant's workforce will approach 6,000. Most of the funds will be applied to improving technology and infrastructure. The production of the new Highlanders will begin in the fall of 2019. Application for 400 new jobs will likely begin in early 2019. Toyota is a major employer in Gibson, Vanderburgh, and Knox counties.

2016 FFIEC Census Data and 2015 D&B Information

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN NON-METROPOLITAN SOUTHERN INDIANA

Lending Test

Fifth Third's performance under the lending test in this assessment area is rated excellent. Fifth Third has demonstrated an excellent responsiveness to the credit needs of the community. In addition, Fifth Third originated nine community development loans totaling $59.2 million. Fifth Third has an excellent geographic distribution of loans and no gaps in lending. Fifth Third has an excellent distribution among borrowers of different income levels and a good distribution of loans to businesses of different revenue sizes. Fifth Third exhibits a good record of serving the credit needs of highly economically disadvantaged areas in its assessment area, low-income individuals, and businesses with gross annual revenues of $1 million or less. The good level of community development loans and extensive use of flexible lending practices augmented Fifth Third's performance in this assessment area.

Greatest consideration was given to the evaluation of refinance and home purchase lending based on the equal overall volume of lending, followed by small business, and home improvement lending. Details of Fifth Third's residential mortgage and small business lending, as well as information regarding aggregate lending, can be found in Appendix E.

Lending Activity

Fifth Third's lending activity reflects an excellent responsiveness to the credit needs within the assessment area. Fifth Third originated 513 refinance, 513 home purchase, 100 home improvement, 339 small business, and nine community development loans during the evaluation period. The percentage of Fifth Third's total lending at 1.0% is greater than the percentage of total deposits at 0.7% in this area.

In addition to lending, Fifth Third modified existing loans to borrowers. Refer to the distribution of Home Affordable Modification Program and other real-estate secured modifications within the assessment area by census tract income and by borrower income.

	Distribution by Census Tract Income							
	Low		Mod		Middle		Upper	
	#	%	#	%	#	%	#	%
Other Real Estate Secured Modifications	0	0.0%	7	13.0%	42	77.8%	5	9.3%
Percentage of Owner Occupied Units		***0.0%***		***11.5%***		***66.5%***		***22.0%***
*Unknown tract data is not included in the above table.								

	Distribution by Census Tract Income							
	Low		Mod		Middle		Upper	
	#	%	#	%	#	%	#	%
Other Real Estate Secured Modifications	10	18.5%	20	37.0%	16	29.6%	3	5.6%
Percentage of Families by Family Income		***17.6%***		***17.7%***		***22.9%***		***41.8%***

*Unknown tract data is not included in the above table.

There were not enough HAMP modifications for a meaningful analysis. The percentage of other modifications in moderate-income tracts exceeded the percentage of owner occupied units in these geographies. Therefore, modifications helped to expand lending activities in these areas.

The percentage of other modifications made to low- and moderate-income borrowers exceeded the percentage of low- and moderate-income families in the assessment area. Therefore, modifications enhanced Fifth Third's ability to reach low- and moderate-income borrowers.

Geographic Distribution of Loans

Fifth Third's overall distribution of lending among geographies is excellent. Refinance and home purchase lending had an equal number of originations. Refinance lending is excellent and home purchase lending is good. Performance for home improvement loans is also excellent. Small business lending is good. There were also no gaps in lending in the assessment area as shown in the table below:

Tract Income Levels	Number of Tracts	Tracts with No Loans	Penetration
Moderate	13	0	100.0%
Middle	52	0	100.0%
Upper	12	0	100.0%
Total	**77**	**0**	**100.0%**

Refinance Loans

Fifth Third made 61 refinance loans totaling $4.1 million in moderate-income tracts. This represents 11.5% of refinance loans by volume, which is comparable to the owner-occupied units in these tracts at 11.5%. The percentage of loans by dollar amount at 8.2% is below proxy. The percentage of loans by volume exceeded the 2014 aggregate at 11.9% and was comparable to the 2015 aggregate at 10.0%. As Fifth Third's performance was comparable to proxy and exceeded the aggregate of all lenders, the geographic distribution of refinance loans in moderate-income tracts is excellent.

Fifth Third made 328 refinance loans totaling $30.9 million in middle-income tracts. This represents 63.9% of refinance loans by volume, which is below the owner-occupied units in these tracts at 66.5%. The percentage of refinance loans by dollar amount (61.2%) was below proxy. The percentage of loans by volume was below the 2014 aggregate at 68.7% and was below the 2015 aggregate at 67.3%.

Fifth Third made 124 refinance loans totaling $15.4 million in upper-income tracts. This represents 24.2% of refinance loans by volume, which exceeds the owner-occupied units in these tracts at 22.0% and the dollar amount at 30.6% exceeded proxy. The percentage of loans by volume exceeded the 2014 aggregate at 19.0% and the 2015 aggregate at 22.6%.

Overall, the geographic distribution of refinance loans is excellent.

Home Purchase Loans

Fifth Third made 53 home purchase loans totaling $4.6 million in moderate-income tracts. This represents 10.3% of its home purchase loans by volume, which is comparable to the percentage of owner-occupied units in these tracts at 11.5%, and 7.8% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate at 10.3% and was below the 2015 aggregate at 10.8%. As Fifth Third's performance was comparable to proxy and exceeded the aggregate of all lenders, the geographic distribution of home purchase loans in moderate-income tracts is good.

Fifth Third made 284 home purchase loans totaling $30.1 million in middle-income tracts. This represents 55.4% of home purchase loans by volume, which is below the percentage of owner-occupied units in these tracts at 66.5%, and 51.1% by dollar amount, which is also below proxy. The percentage of loans by volume was below the 2014 aggregate of 65.8% and was below the 2015 aggregate of 66.0%.

Fifth Third made 176 home purchase loans totaling $24.2 million in upper-income tracts. This represents 34.3% of home purchase loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 22.0%, and 41.1% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 23.6% and exceeded the 2015 aggregate of 23.1%.

A community contact indicated the need for affordable housing since there are not many lower-cost housing options being constructed in the area. Because Fifth Third effectively penetrated moderate-income tracts, the overall geographic distribution of home purchase loans is good.

Home Improvement Loans

Fifth Third made 18 home improvement loans totaling $593,000 in moderate-income tracts. This represents 18.0% of home improvement loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 11.5%, and 13.8% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 10.1% and the 2015 aggregate of 12.9%. As Fifth Third's performance exceeded the proxy and the aggregate of all lenders, the geographic distribution of home improvement loans in moderate-income tracts is excellent.

Fifth Third made 66 home improvement loans totaling $2.5 million in middle-income tracts. This represents 66.0% of home improvement loans by volume, which is comparable to the percentage of owner-occupied units in these tracts at 66.5%, and 58.7% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate of 73.3% and was below the 2015 aggregate of 70.3%.

Fifth Third made 16 home improvement loans totaling $1.2 million in upper-income tracts. This represents 16.0% of home improvements loans by volume, which is below the percentage of owner-occupied units in these tracts at 22.0%, and 27.5% by dollar amount, which exceeds proxy. The percentage of loans by volume was below the 2014 aggregate of 16.5% and was below the 2015 aggregate of 16.7%.

Based on the median age of housing stock in moderate-income tracts (57 years), there appears to be opportunities for Fifth Third to provide home improvement and rehabilitation loans. Because Fifth Third's level of penetration in moderate-income tracts was excellent, the overall geographic distribution of home improvement loans is excellent.

Small Business Loans

Fifth Third made 32 small business loans totaling $6.3 million in moderate-income tracts. This represents 9.4% of small business loans by volume, which is below the percentage of businesses in these tracts at 14.2%. This also represents 19.0% of business loans by dollar amount, which exceeds the percentage of businesses in these tracts. The percentage of loans by volume was below the 2014 aggregate of 12.2% and the 2015 aggregate of 11.7%. Given that Fifth Third's performance was slightly below the aggregate of all lenders and proxy, the geographic distribution of small business loans in moderate-income tracts is good.

Fifth Third made 188 small business loans totaling $18.6 million in middle-income tracts. This represents 55.5% of small business loans by volume, which is below the percentage of businesses in these tracts at 63.0%, and 56.3% by dollar amount, also below proxy. The percentage of loans by volume was below the 2014 aggregate of 60.2% and the 2015 aggregate of 60.6%.

Fifth Third made 119 small business loans totaling $8.2 million in upper-income tracts. This represents 35.1% of small business loans by volume, which exceeds the percentage of businesses in these tracts at 22.8%, and 24.7% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 24.1% and exceeded the 2015 aggregate of 25.4%.

Overall, the geographic distribution of small business loans is good.

Distribution by Borrower Income and Revenue Size of the Business

Overall, the distribution of loans is excellent based on borrower income and good for businesses of different revenue sizes. Borrower distribution is excellent for refinance, home purchase, and home improvement loans.

Refinance Loans

Fifth Third made 68 loans totaling $4.2 million to low-income borrowers. This represents 13.3% of refinance loans by volume, which is below the percentage of low-income families in these tracts at 17.6%. The percentage of loans by dollar amount at 8.3% is below proxy. The percentage of loans by volume significantly exceeded the 2014 aggregate of 9.7% and the 2015 aggregate of 7.3%. Given Fifth Third's performance significantly exceeded the aggregate of all lenders and was slightly below proxy, the borrower distribution of refinance loans to low-income borrowers is excellent.

Fifth Third made 131 loans totaling $9.9 million to moderate-income borrowers. This represents 25.5% of refinance loans by volume, which exceeds the percentage of moderate-income families in these tracts at 17.7%, and 19.6% by dollar volume, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 17.0% and exceeded the 2015 aggregate of 17.0%. As Fifth Third's performance in refinance lending to moderate-income borrowers exceeded proxy and the aggregate of all borrowers, borrower distribution to moderate-income borrowers is excellent.

Fifth Third made 122 loans totaling $11.3 million to middle-income borrowers. This represents 23.8% of refinance loans by volume, which exceeds the percentage of middle-income families at 22.9%, and 22.4% by dollar amount, which is comparable to the proxy. The percentage of loans by volume exceeded the 2014 aggregate of 23.3% and was comparable to the 2015 aggregate of 20.7%.

Fifth Third made 173 loans totaling $22.6 million to upper-income borrowers. This represents 33.7% of refinance loans by volume, which is below the percentage of upper-income families at 41.8%, while the percentage of loans by dollar amount at 44.8% exceeds proxy. The percentage of loans by volume was below the 2014 aggregate of 32.6% and was comparable to the 2015 aggregate of 35.5%.

Overall, the borrower distribution of refinance loans is excellent.

Home Purchase Loans

Fifth Third made 78 loans totaling $5.7 million to low-income borrowers. This represents 15.2% of home purchase loans by volume, which is below the percentage of low-income families at 17.6%, and 9.7% by dollar amount, which is also below proxy. The percentage of loans by volume significantly exceeded the 2014 aggregate of 7.7% and the 2015 aggregate of 8.8%. Because Fifth Third's performance significantly exceeded the aggregate of all lenders and was slightly below proxy, the borrower distribution of home purchase loans to low-income borrowers is excellent.

Fifth Third made 160 loans totaling $15.3 million to moderate-income borrowers. This represents 31.2% of home purchase loans by volume, which significantly exceeds the percentage of moderate-income families at 17.7%, and 26.0% of loans by dollar amount, which also exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 21.1% and exceeded the 2015 aggregate of 23.4%.

Because Fifth Third's performance significantly exceeded proxy and exceeded the aggregate of all borrowers, the borrower distribution of home purchase loans to moderate-income borrowers is excellent.

Fifth Third made 136 loans totaling $16.0 million to middle-income borrowers. This represents 26.5% of home purchase loans by volume, which exceeds the percentage of middle-income families at 22.9%, and 27.2% by dollar amount, which also exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 19.9% and exceeded the 2015 aggregate of 21.2%.

Fifth Third made 127 loans totaling $20.4 million to upper-income borrowers. This represents 24.8% of home purchase loans by volume, which is significantly below the percentage of upper-income families at 41.8%, and 34.6% of loans by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate of 28.4% andwas slightly below the 2015 aggregate of 26.4%.

Overall, the borrower distribution of home purchase loans is excellent.

Home Improvement Loans

Fifth Third made 16 loans totaling $567,000 to low-income borrowers. This represents 16.0% of home improvement loans by volume, which is comparable to the percentage of low-income families at 17.6%, and 13.2% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 12.6% and in 2015 was below the 2015 aggregate of 12.3%. Given that Fifth Third's performance exceeded the aggregate of all lenders and was comparable to proxy, the borrower distribution of home improvement loans to low-income borrowers is excellent.

Fifth Third made 31 loans totaling $1.1 million to moderate-income borrowers. This represents 31.0% of home improvement loans by volume, which significantly exceeded the percentage of moderate-income families at 17.7%, and 25.1% by dollar amount, which also exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 21.3% and the 2015 aggregate of 20.2%. Given that Fifth Third's performance exceeded the aggregate of all lenders and significantly exceeded proxy, the borrower distribution of home improvement loans to moderate-income borrowers is excellent.

Fifth Third made 25 loans totaling $1.1 million to middle-income borrowers. This represents 25.0% of home improvement loans by volume, which exceeds the percentage of middle-income families at 22.9%, and 24.6% by dollar amount, which also exceeds proxy. The percentage of loans by volume was below the 2014 aggregate of 26.9% and was comparable to the 2015 aggregate of 27.1%.

Fifth Third made 27 loans totaling $1.6 million to upper-income borrowers. This represents 27.0% of home improvement loans by volume, which is significantly below the percentage of upper-income families at 41.8%, and 37.0% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate of 35.5% and was below the 2015 aggregate of 37.5%.

The overall borrower distribution of home improvement loans is excellent.

Small Business Loans

The distribution of small business loans to businesses of different sizes is good considering Fifth Third's performance relative to the aggregate of all lenders. Fifth Third was able to make 61.1% of small business loans to businesses with revenues of $1 million or less. Fifth Third's performance in 2014 exceeded the 2014 aggregate of 42.8% and the 2015 aggregate of 46.9%, but was significantly below the percentage of small businesses in the assessment area at 91.7%. Also, during the evaluation period, Fifth Third was able to makes a relatively high percentage of small-dollar loans (80.5%) up to $100,000, indicating a willingness to lend in smaller amounts typically requested by small businesses.

Community Development Loans

Fifth Third originated nine community development loans totaling $59.2 million during the review period as shown in the table below:

Economic Development		Revitalization and Stabilization	
#	**$**	**#**	**$**
5	34,000,000	4	25,227,366

Community development lending in the assessment area represents 1.0% of the total dollar volume of community development loans originated by Fifth Third during the review period. This ranks as Fifth Third's 26th highest percentage of community development lending during the evaluation period, as there are fewer opportunities to originate community development loans in a non-metropolitan assessment area and there is significant competition in the area. As such, Fifth Third's makes a relatively high level of community development loans in this assessment area.

Examples of community development lending include, but are not limited to:

- Working capital loans to promote economic development by financing small businesses to support retention of low- and moderate-income workers
- Working capital loans to help retain and expand businesses located in areas specifically designated to promote revitalization and economic development

Flexible Lending Programs

Fifth Third had 425 flexible lending loans in this assessment area: 328 government loans, ten down payment assistance loans, and 87 other flexible lending programs. The following tables show the percentage by volume and by dollar amount of the three types of flexible lending programs made in this assessment area during the evaluation period and the distribution of Fifth Third's flexible lending programs within the assessment area by census tract income and by borrower income.

*Unknown tract data is not included in the above table.

Overall, Fifth Third's lending in moderate-income tracts by number and dollar amount exceeded the percentage of owner-occupied units for government loans and other flexible lending programs. There were no down payment assistance loans made in the moderate-income tracts.

Fifth Third's lending by volume and dollar amount to low-income borrowers was slightly below percentage of low-income families and exceeded the percentage of moderate-income families in the assessment area.

Fifth Third made extensive use of flexible lending practices is serving the assessment area's credit needs, as lending through flexible loan programs to moderate-income borrowers and in moderate-income tracts was excellent, while lending to low-income borrowers was good.

Investment Test

Fifth Third's performance relative to the investment test in the assessment area is rated excellent.

Fifth Third made an excellent level of qualified community development investments and grants, particularly those not routinely provided by private investors. As such, Fifth Third was often in a leadership position. Fifth Third has 84 qualified investments totaling $20.6 million during the evaluation period. Shown in the table below are the total current period investments:

Affordable Housing		Economic Development		Community Services	
#	$	#	$	#	$
20	15,109,539	29	49,038	27	36,900

Also included in the total number of qualified investments are eight prior period investments totaling $5.4 million. Overall, Fifth Third made 1.3% of its total community development investments in this assessment area, which is greater than the percentage of total deposits at 0.7% and slightly greater than the percentage of branch offices at 1.2%.

Fifth Third exhibits an excellent responsiveness to credit and community development needs in the assessment area, including investments in several affordable housing projects throughout the assessment area, which was an important need expressed by a community contact. Fifth Third made 57 donations totaling $87,438 that supported chambers of commerce, charitable organizations, and small businesses. The majority of Fifth Third's donations (56.1%) supported economic development, particularly to various local chambers of commerce.

Service Test

Fifth Third's performance under the service test in this assessment area is rated adequate. Retail services are accessible and Fifth Third provided an adequate level of community development services in the assessment area.

Retail Services

Fifth Third's record of opening and closing offices has not adversely affected the accessibility of its delivery systems, particularly in moderate-income geographies and to low- and moderate-income households. Since the previous evaluation period, no banking centers were opened or closed. Delivery services are accessible to Fifth Third's geographies and individuals of different income levels.

Business hours and services provided do not vary in a way that inconveniences certain portions of the assessment area, including low- and moderate-income geographies or households, and are consistent with the services and hours discussed in the "Institution" assessment.

Fifth Third maintains 16 banking centers within this assessment area, including four in moderate-, six in middle-, and six in upper-income census tracts. Fifth Third's banking centers in this assessment area represent 1.2% of all its banking centers. Fifth Third has a total of 21 full-service ATMs within this assessment area, including four in moderate-, ten in middle-, and seven in upper-income census tracts.

The following table illustrates the percentage of banking centers and ATMs in moderate-, middle-, and upper-income census tracts in comparison to the number and percentage of census tracts and the percentage of households and businesses in those tracts. There are no low-income geographies in this assessment area.

2016 FFIEC Census Data, 2010 ACS Data, and 2015 D&B Information
Closed branches/ATMs are only included in "closed" columns and are not included in any other totals.
DTO - Drive thru only is a subset of total branches
SA = Stand Alone ATM is a subset of total ATMs

Branch distribution within moderate-income tracts was considered excellent, as the distribution of branches exceeded the percentage of census tracts and households in these tracts.

Community Development Services

Fifth Third provided an adequate level of community development services in this assessment area. During the evaluation period, Fifth Third employees provided 813 hours of community development service to local organizations serving low- and moderate-income individuals, which represents 0.7% of all community development services provided and equates to 0.39 annualized persons (ANP).

Economic Development	Community Services
# of Hours	***# of Hours***
221	592

Employees provided financial expertise through leadership positions in multiple community organizations that promote community and economic development. Community development services include 705 hours serving on boards and committees, 42 hours of providing financial literacy through local nonprofits and school programs, 38 hours participating in foreclosure prevention outreach, and 28 hours providing technical assistance to non-profits.

METROPOLITAN and NON-METROPOLITAN AREAS
(Limited-scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE STATE OF INDIANA

- **Bloomington MSA**
  - As of June 30, 2016, Fifth Third operated three branches in the assessment area, representing 3.5% of its branches in Indiana.
  - As of June 30, 2016, Fifth Third had $194,432 in deposits in this assessment area, representing a market share of 7.8% and 3.3% of its statewide deposits.
- **Fort Wayne MSA**
  - As of June 30, 2016, Fifth Third operated eight branches in the assessment area, representing 9.4% of its branches in Indiana.
  - As of June 30, 2016, Fifth Third had $211,105 in deposits in this assessment area, representing a market share of 3.1% and 3.6% of it statewide deposits.
- **Lafayette-W. Lafayette MSA**
  - As of June 30, 2016, Fifth Third operated four branches in the assessment area, representing 4.7% of its branches in Indiana.
  - As of June 30, 2016, Fifth Third had $106,469 in deposits in this assessment area, representing a market share of 4.0% and 1.8% of it statewide deposits.
- **Terre Haute MSA**
  - As of June 30, 2016, Fifth Third operated seven branches in the assessment area, representing 8.2% of its branches in Indiana.
  - As of June 30, 2016, Fifth Third had $224,805 in deposits in this assessment area, representing a market share of 8.9% and 3.9% of it statewide deposits.
- **Non-metropolitan Northern Indiana**
  - As of June 30, 2016, Fifth Third operated three branches in the assessment area, representing 3.5% of its branches in Indiana.
  - As of June 30, 2016, Fifth Third had $57,127 in deposits in this assessment area, representing a market share of 4.9% and 1.0% of it statewide deposits.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE STATE OF INDIANA

Through the use of available facts and data, including performance and demographic information, each assessment area's performance was evaluated and compared with Fifth Third's performance in the state. The conclusions regarding performance are provided in the following table. Please refer to the tables in Appendix F for information regarding these areas.

Assessment Area	Lending Test	Investment Test	Service Test
Bloomington MSA	Below	Consistent	Below
Fort Wayne MSA	Below	Consistent	Below
Lafayette-W. Lafayette MSA	Below	Below	Below
Non-metropolitan Northern Indiana	Below	Below	Below
Terre Haute MSA	Below	Below	Below

For the lending test, Fifth Third received an "Outstanding" rating in Indiana. Performance in all five of the limited-scope assessment areas was below Fifth Third's performance for the state. Although below the state performance, lending levels were good or adequate for the geographic distribution of loans and good for the borrower geographic distribution of loans in all five limited-scope assessment areas. There was a good level of community development loans in the Fort Wayne assessment area and adequate levels of community development loans in the remaining four limited-scope assessment areas. A low level of lending gaps was noted in three limited-scope assessment areas and no gaps in lending were identified the Terre Haute and non-metropolitan Northern Indiana assessment areas.

For the investment test, Fifth Third received an "Outstanding" rating in Indiana. While investment activity was consistent with the state in two of the five limited-scope assessment areas, performance in the Lafayette-W. Lafayette, Terre Haute, and non-metropolitan Northern Indiana assessment areas was below Fifth Third's performance for the state. Although below the state performance, investment activity was good in the Lafayette-W. Lafayette, Terre Haute, and non-metropolitan Northern Indiana assessment areas. The weaker performance was primarily due to a lower level of qualified investments and contributions relative to Fifth Third's operational presence in the assessment area.

For the service test, Fifth Third received an "Outstanding" rating in Indiana. Performance in all five of the limited-scope assessment areas was below Fifth Third's performance for the state. Retail services were good in four limited-scope assessment areas and adequate in the Bloomington assessment area. The weaker retail services performance in the Bloomington assessment area was primarily due to less accessibility of delivery systems in lower-income geographies. Qualified community development services were good in the Fort Wayne and Terre Haute assessment areas and poor in the Bloomington assessment area. The weaker community development services performance was primarily due to a lower level of hours dedicated to providing qualified services relative to Fifth Third's operational presence in these assessment areas. Qualified community development services were excellent in the remaining two limited-scope assessment areas.

The performance in the limited-scope assessment areas did not change the overall state rating.

COMMONWEALTH OF KENTUCKY

CRA RATING for Commonwealth of Kentucky:[169] Satisfactory
The lending test is rated: High Satisfactory
The investment test is rated: High Satisfactory
The service test is rated: High Satisfactory

The major factors supporting this rating include:

- A good responsiveness to credit needs;
- An excellent geographic distribution of loans throughout the assessment area;
- An excellent distribution of loans among borrowers of different income levels and good to businesses of different revenue sizes;
- Exhibits a good record of serving the credit needs of low-income individuals and areas and very small businesses;
- An adequate level of community development loans;
- Extensive use of flexible lending practices in serving the assessment area's credit needs;
- A significant level of qualified community development investments and grants;
- Occasionally in a leadership position in providing community development investments and grants;
- Retail delivery systems are accessible to all geographies and individuals of different income levels and businesses of different revenue sizes;
- A record of opening and closing banking centers that has not adversely affected the accessibility of delivery systems;
- Banking services and hours that do not vary in a way that inconveniences any portions of the assessment areas; and,
- A relatively high level of community development services.

SCOPE OF EXAMINATION

A full-scope review was conducted the Lexington-Fayette MSA. Limited-scope reviews were performed on the remaining three assessment areas, the Owensboro MSA, and non-metropolitan Eastern and Western Kentucky. The time period, products, and affiliates evaluated for this assessment area are consistent with the scope discussed in the "Institution" section of this report.

[169] For institutions with branches in two or more states in a multi-state metropolitan area, this statewide evaluation is adjusted and does not reflect performance in the parts of those states contained within the multi-state metropolitan area. Refer to the multi-state metropolitan area rating and discussion for the rating and evaluation of the institution's performance in that area.

The Lexington-Fayette assessment area received greater weight in determining the CRA rating for Kentucky, as it had the largest lending volumes and number of banking centers and ranked first in Kentucky's share of deposits during the evaluation period. Lastly, the Lexington-Fayette assessment area represented 46.4% of the banking centers, 70.5% of deposits, and 62.5% of lending in Kentucky.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE COMMONWEALTH OF KENTUCKY

Lending activity accounted for 1.9% of the Fifth Third's total lending activity, while deposits accounted for 1.5% of the Fifth Third's total deposits. HMDA-reportable lending in Kentucky represented 1.9% of the Fifth Third's total HMDA lending, while CRA-reportable lending represented 1.6% of the Fifth Third's total CRA lending. As of June 30, 2016, Fifth Third ranked fourth among 190 insured institutions and has a deposit market share of 7.3% and 28 banking center locations within Kentucky.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE COMMONWEALTH OF KENTUCKY

Lending Test

Fifth Third's performance under the lending test within the assessment areas located in Kentucky is rated "High Satisfactory." Fifth Third's lending reflects a good responsiveness to the credit needs in the Lexington-Fayette assessment area. Lending reflects an adequate responsiveness to credit needs in non-metropolitan Eastern, non-metropolitan Western Kentucky, and the Owensboro assessment area.

Lending Activity

In Kentucky, Fifth Third originated 8,304 HMDA loans totaling $1.1 billion and 2,051 small business loans totaling $256.4 million during the evaluation period.

Lending activity in Kentucky is good. Lending activity in the Lexington-Fayette assessment area is good and adequate in the remaining three assessment areas.

Geographic and Borrower Distribution

The distribution of loans among geographies is excellent in the assessment areas located in Kentucky. The geographic distribution is excellent in the Lexington-Fayette assessment area and good in non-metropolitan Western Kentucky and the Owensboro assessment area. The geographic distribution is adequate in non-metropolitan Eastern Kentucky.

Further, a low level of lending gaps was identified within all four assessment areas located in Kentucky.

Overall, the distribution of loans among borrowers of different income levels is excellent and good to businesses of different revenue sizes is good in the assessment areas located in Kentucky. The borrower distribution is excellent in the Lexington-Fayette assessment area and good in the remaining three assessment areas. The distribution to businesses of different revenue sizes is good in the Lexington-Fayette and non-metropolitan Eastern Kentucky assessment areas and adequate in the remaining two assessment areas.

A detailed analysis for the geographic distribution and borrower-income distribution is provided with the analysis for each assessment area.

Community Development Loans

In Kentucky, Fifth Third originated 13 community development loans totaling $91.0 million, which represented 1.5% of its community development lending by dollar volume. This represents an adequate level of community development lending in Kentucky. Fifth Third made an adequate level of community development loans in the Lexington-Fayette assessment area and a good level of community development loans in non-metropolitan Eastern Kentucky. Fifth Third did not make any community development loans in non-metropolitan Western Kentucky or the Owensboro assessment area, which is considered to be a poor level of community development lending.

Flexible Lending

Fifth Third made extensive use of flexible lending practices within the assessment areas in Kentucky.

Investment Test

Fifth Third's performance under the investment test within the assessment areas located in Kentucky is rated "Outstanding." Fifth Third funded $25.2 million in qualified community development investments in Kentucky during the evaluation period that consisted of $15.9 million obtained from new investments made during the current review period and $9.3 million from prior period investments. The majority of investments were LIHTCs. Fifth Third's level of qualified investments is excellent in the Owensboro assessment area. The level of qualified investments is considered good in the Lexington-Fayette and non-metropolitan Eastern Kentucky assessment areas and poor in non-metropolitan Western Kentucky.

Fifth Third was considered responsive to the credit and community development needs in the state; therefore, investments without a purpose, mandate, or function of serving Fifth Third's assessment areas in Kentucky was considered to positively impact state performance. Fifth Third made $16.1 million in qualified investments, typically in the form of LIHTCs that benefited counties within Kentucky, but outside Fifth Third's delineated assessment areas.

Additional information regarding performance under the investment test is provided in the respective analyses for each assessment area.

Service Test

Fifth Third's performance under the service test within the assessment areas located in Kentucky is rated "High Satisfactory." Its performance is good in the Lexington-Fayette and Owensboro assessment areas and adequate in non-metropolitan Eastern Kentucky and non-metropolitan Western Kentucky.

For details regarding the institution's performance in the individual assessment areas, refer to the respective assessment area's "Service Test" section in this report.

Retail Services

Retail delivery systems are accessible to all geographies, including low- and moderate-income geographies, individuals of different income levels, and businesses of different revenue sizes in the institution's assessment areas. Retail service distribution is good in all four assessment areas.

Fifth Third's record of opening and closing banking centers has not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and to low- and moderate-income individuals. No branches opened or closed in low- or moderate-income tracts during the evaluation period.

Banking services and business hours do not vary in a way that inconveniences any portions of Fifth Third's assessment areas and are consistent with the services and hours discussed in the "Institution" assessment.

Community Development Services

Fifth Third provides a relatively high level of community development services in Kentucky. Fifth Third's performance is excellent in non-metropolitan Western Kentucky and good in the Lexington-Fayette assessment area. The level of community development services is adequate in non-metropolitan Eastern Kentucky and poor in the Owensboro assessment area.

METROPOLITAN AREA
(Full-scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN LEXINGTON-FAYETTE KY MSA #30460

The Lexington-Fayette KY MSA consists of Bourbon, Clark, Fayette, Jessamine, Scott, and Woodford counties. The assessment area is comprised of 12 low-, 32 moderate-, 47 middle-, and 38 upper-income tracts.

As of June 30, 2016, Fifth Third ranked third out of 37 institutions with 11.9% of the deposit market share. Central Bank & Trust Company had the majority of the market share 16.6% of deposits, and JPMorgan Chase ranked second with 14.8% of the market share. Deposits in this assessment area accounted for 1.1% of the Fifth Third's total deposits. This was 70.5% of deposits within the state and 19th highest percentage of deposits within Fifth Third's CRA footprint.

From January 1, 2014 through June 30, 2016, Fifth Third originated 1,220 HMDA loans and 441 CRA loans, which represented 1.2% and 1.1% of the total loans originated during the evaluation period, respectively. This was the 21st largest HMDA market and 20th largest CRA market for loans originated during the evaluation period.

In 2015, Fifth Third Mortgage Company ranked eighth among 318 HMDA reporters in the assessment area and Fifth Third ranked 47th. Wells Fargo Bank, Central Bank & Trust Company, Guardian Savings Bank, and JPMorgan Chase Bank were the top four HMDA lenders in the assessment area. Fifth Third ranked 11th of 65 CRA reporters in the assessment area in 2015. The top four CRA lenders in the assessment area were American Express, Central Bank & Trust Company, Chase Bank USA, and Synchrony Bank. These lenders are mostly issuers of credit cards and their CRA loans primarily consist of commercial credit card accounts.

Two community contact interviews were conducted to provide additional information regarding the assessment area. The first contact, representing a philanthropic health legacy foundation that awards grants to nonprofits that address social determinants related to health, particularly in urban areas, stated there is a significant need for financial institutions to fund small businesses and entrepreneurs with small-dollar loans to promote economic development in the community. The contact also believed there is a large unbanked population in the area, who do not have access to credit, making them invisible to the mainstream financial system. These individuals tend to be lower-income and because they do not have access to financial services are typically unable to buy homes or build businesses. Financial institutions have an opportunity to attract the unbanked by conducting community outreach and offering financial literacy training and fee-free banking products. Lastly, the contact indicated smaller banks experience difficulties in competing with larger banks, which have more resources to deal with increasing regulatory burdens.

The second contact, representing a micro-lender who extends small-dollar loans to support entrepreneurship, stated the economic conditions are improving and the regional economy is attracting more advanced manufacturing jobs with higher average wages. The contact believed area banks could be more proactive in working with and providing financial literacy training to individuals with poor or no credit, as a good credit score allows people to save money with lower interest rates, be approved for loans (personal and business) and rentals more easily, obtain better insurance rates, and avoid security deposits on cell phones and utilities.

Population Characteristics

According to 2010 U.S. Census data, the population in the assessment area was 472,099. About 35.3% of the population lived in low- and moderate-income tracts. In addition, 77.3% of the population was 18 years of age or older, the legal age to enter into a contract.

As of July 1, 2015, the Lexington-Fayette MSA is the 106th largest in terms of population in the nation.[170] Fayette County is the largest county in the assessment area and the second-most populous county in Kentucky.[171] Lexington (located in Fayette County) is the largest city in assessment area and is the 61st most populous city in the U.S. Lexington has 314,488 residents and its population growth increased by 20.4% between 2000 and 2015.[172] According to Moody's Analytics, in 2015, the migration flow into Lexington was 2,844 residents, with a positive annual net migration from 2012 through 2015. In contrast, the next largest cities in the assessment area are Georgetown, Nicholasville, Winchester, Paris, and Versailles, which have 32,356, 29,754, 18,446, 9,870, and 9,146, respectively.[173]

The following table shows the population in the assessment area by county for 2010 and 2015 with the percentage of the population increase.[174] The population within the assessment area experienced positive growth between 2010 and 2015, with Scott County experiencing the greatest growth and Clark County experiencing the least growth in population during this time period. Moody's Analytics cited strong population trends are supporting housing demand.

County	2010 Population	2015 Population	Population Percent Change
Bourbon	19,985	20,116	0.7%
Clark	35,613	35,757	0.4%
Fayette	295,803	314,488	6.3%
Jessamine	48,586	51,961	6.9%
Scott	47,173	52,420	11.1%

174 Population Estimates derived from U.S. Census Data (April 1, 2010 – July 1, 2015): http://www.census.gov/quickfacts/table/PST045216/00

In 2010 the MSA median family income was greater ($62,624) than Kentucky's at $52,046. The MSA median family income increased in 2014, 2015, and declined slightly in 2016.

Borrower Income Levels
Lexington-Fayette, KY MSA

FFIEC Estimated Median Family Income		Low 0 - 49.99%	Moderate 50% - 79.99%	Middle 80% - 119.99%	Upper 120% - & above
2014	**$67,800**	0 - $33,899	$33,900 - $54,239	$54,240 - $81,359	$81,360 - & above
2015	**$68,200**	0 - $34,099	$34,100 - $54,559	$54,560 - $81,839	$81,840 - & above
2016	**$66,100**	0 - $33,049	$33,050 - $52,879	$52,880 - $79,319	$79,320 - & above

Poverty rates increased in each county in the assessment area from 1999 to 2015.[175] Woodford County had the lowest poverty rates in 1999 and 2015, while Bourbon County had highest poverty rate in 1999 and Fayette County had the highest poverty rate in 2015. Jessamine County experienced the largest increase in poverty rates during this period. In 2015, Fayette County's poverty rate exceeded and Jessamine County's poverty rate was equivalent to the state-level poverty rate of Kentucky. In 2015, Kentucky's poverty rates exceeded the national poverty rate. According to the U.S. Census Bureau, the national poverty rate in 2015 was 13.5%, down 1.3 percentage points from 14.8% in 2014. For most demographic groups, the 2015 poverty rates and number of people in poverty decreased from 2014.[176] The following table shows the poverty rates for 1999[177] and 2015.

County	1999 Poverty Rate	2015 Poverty Rate	Change
Bourbon	14.0%	14.8%	5.7%
Clark	10.6%	15.4%	45.3%
Fayette	12.9%	19.1%	48.1%
Jessamine	10.5%	18.3%	74.3%
Scott	8.8%	13.1%	48.9%
Woodford	7.3%	11.6%	58.9%
Kentucky	**15.8%**	**18.3%**	**15.8%**
U.S.	**11.8%**	**13.5%**	**14.4%**

176 2015 National Poverty: http://www.census.gov/library/publications/2016/demo/p60-256.html
177 1999 National Poverty Rate: http://www.census.gov/prod/2000pubs/p60-210.pdf

Housing Characteristics

According to 2010 U.S. Census data, there are 205,317 housing units and 118,564 families in the assessment area. From an income perspective, 36.8% of housing units, 25.9% of owner-occupied units, and 31.3% of families are located in low- or moderate-income tracts. Nearly three-quarters of the housing units in the low-income census tracts are either rental or vacant (72.6%). In the moderate-income census tracts, over half of the housing units are either rental or vacant (57.8%) and 42.2% are owner-occupied. Therefore, based on the number of housing units compared to the number of families in low- and moderate-income census tracts, there appear to be credit-related opportunities for Fifth Third to provide various aspects of affordable housing in the assessment area.

The 2010 U.S. Census data shows the median age of housing stock in the assessment area was 32 years old, with 13.0% of the stock built before 1950. The oldest housing stock was in Bourbon County with a median age of 40 years, while the newest was 19 years in Scott County. Within the assessment area, the median age of housing stock was 40 years in low-income tracts and 37 years in moderate-income tracts. Therefore, there appears to be some opportunity for Fifth Third to provide home improvement and rehabilitation loans in these lower-income areas.

According to 2010 U.S. Census data, the median housing value in the assessment area was $156,580 with an affordability ratio of 30.98. The affordability ratio is derived by dividing the median household income by the median housing value. The higher the affordability ratio, the more affordable a home is considered. While median housing values increased between 2010 and 2011-2015, housing affordability varied across the assessment area due to median household incomes. During the evaluation period, the most affordable housing was in Scott County and the least affordable was in Fayette County. Overall, median gross rents increased at a fairly substantial rate across the assessment area, with renters in Bourbon and Jessamine counties experiencing the largest increase in rental rates and renters in Woodford County experiencing the smallest increase in gross rental rates. The table below presents housing characteristics from the U.S. Census data between 2010 and 2015 in the assessment area and Kentucky. According to Moody's Analytics, households are forming more quickly, and house prices in the Lexington area have appreciated more over the last year than in any other part of the state. Continued population growth will keep demand for single-family housing high.

County	2010 Median Housing Value	2010 Affordability Ratio	2011-2015 Median Housing Value	2011-2015 Affordability Ratio	2010 Median Gross Rent	2011-2015 Median Gross Rent	Percent of Change
Bourbon	$137,700	29.67	$139,600	32.38	$581	$690	18.8%
Clark	$134,500	34.63	$142,700	33.61	$631	$698	10.6%
Fayette	$159,200	29.82	$168,100	29.61	$693	$778	12.3%
Jessamine	$150,200	31.62	$160,400	31.52	$670	$771	15.1%
Scott	$158,700	36.56	$164,600	38.29	$684	$760	11.1%
Woodford	$180,800	31.27	$181,300	32.40	$724	$725	0.1%
Kentucky	**$116,800**	**35.60**	**$123,200**	**35.50**	**$601**	**$675**	**12.3%**

According to Bankrate.com,[178] Kentucky ranked 43rd for foreclosure filings in November 2016. The national average for foreclosure filings was one in every 1,533 housing units. The following table contains information about foreclosure filings in the assessment area, according to Realtytrac:[179]

Geography Name	Ratio of Properties Receiving Foreclosure Filings in November 2016
Bourbon	N/A
Clark	N/A
Fayette	1:3,790
Jessamine	1:1,366
Scott	N/A
Woodford	N/A
Kentucky	**1:4,270**
U.S.	**1:1,533**

In November 2016, Jessamine County had the highest rate of foreclosure in the assessment area and the third highest rate in Kentucky. According to Moody's Analytics, a 2015 state law allowing foreclosures to clear the housing market more quickly is benefiting Lexington disproportionately, as foreclosures have plummeted and home price increases no longer lag the U.S. pace. As shown above, the foreclosure rate in Fayette County is far below the national rate, but is still higher than Kentucky's rate of foreclosure.

Building permits for this MSA, Kentucky, and the nation are included in the following table for 2014, 2015, and 2016.[180]

Geography	2014	2015	Percent of Change 2014-2015	2016	Percent of Change 2015-2016
Lexington-Fayette MSA	1,888	2,206	16.8%	2,732	23.8%
Kentucky	**9,421**	**10,566**	**12.2%**	**12,798**	**21.1%**
U.S.	**1,052,124**	**1,182,582**	**12.4%**	**1,190,191**	**0.6%**

The MSA experienced a significant increase in the number of housing permits issued between 2014 and 2016. The increase in the number of permits could indicate there is a growing demand for home purchase loans in the MSA and in Kentucky during the evaluation period. According to Moody's Analytics, demand for new housing starts has increased and projected population growth will keep demand high for single-family housing in the Lexington area.

Labor, Employment, and Economic Characteristics

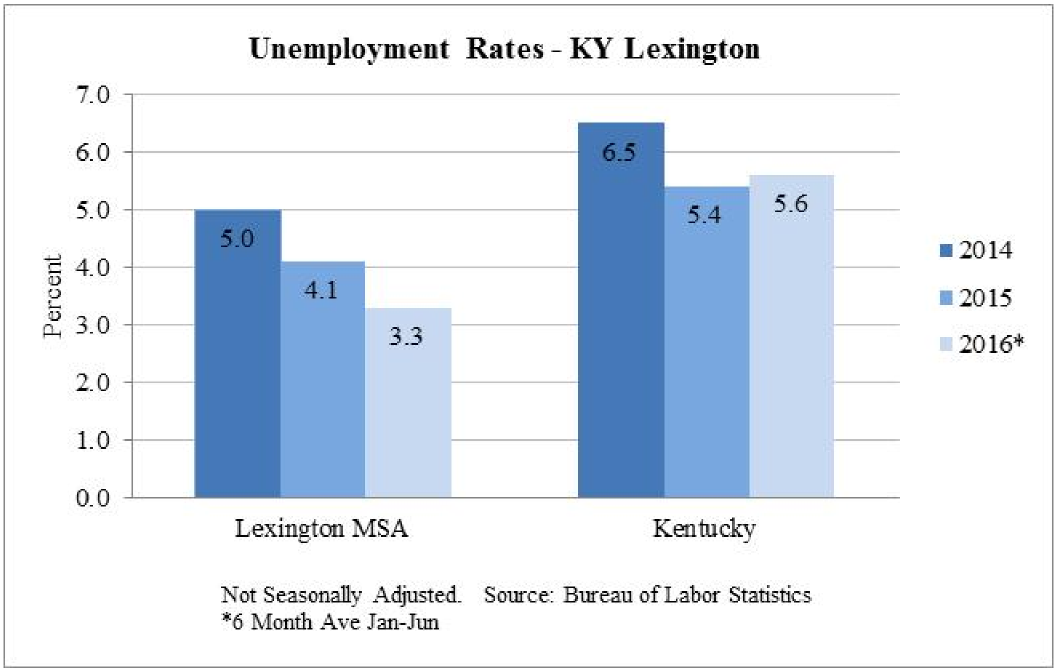
According to Moody's Analytics, the Lexington area economy is in expansion due to a strong healthcare industry, competitive business costs, favorable population trends, and a highly educated workforce. Contributing to the area's economic strengths is the large insurance industry in Kentucky, which benefits from Medicaid expansion, low business costs (especially office rents), and the presence of a large research university. Economic weaknesses include a nationwide push to close coal power plants, rising energy costs, and high tuition rates limit students' disposable incomes. A community contact stated the regional economy is attracting more advanced manufacturing jobs with higher average wages. According to Moody's Analytics, machinery manufacturing, the second largest factory segment, is well-positioned to rebound in 2017. The prominent auto industry has been adding jobs and construction equipment manufacturing is benefiting from increased nationwide residential construction.

According to Commerce Lexington Economic Development[181] the top 15 employers in the MSA in 2016 were:

Company (County)	Number of Employees
University of Kentucky (Fayette)	12,500
Toyota Motor Manufacturing (Scott)	7,900
Kentucky Health & Family Services Cabinet (Franklin)	7,444
Fayette County Public Schools	5,172
Transportation Cabinet of Kentucky (Franklin)	4,848
Conduent (Fayette)	3,100
Lexington-Fayette Urban County Government (Fayette)	2,837
Eastern Kentucky University (Madison)	2,240
Lexmark International Inc.[182] (Fayette)	2,200
Wal-Mart (Fayette)	2,027
KentuckyOne Health (Fayette)	1,757
Scott County Public Schools	1,655
Veterans Medical Center (Fayette)	1,565
Baptist Health (Fayette)	1,558
Kentucky Department of Education (Franklin)	1,475

The following table illustrates the average unemployment rates for 2014, 2015, and 2016 for the MSA and Kentucky.

[181] Commerce Lexington ED: http://www.locateinlexington.com/Data-Facts-Figures-Major-Employers.aspx
[182] In the Fortune 1000 are Lexmark International (#638)and Tempur Sealy International (#699) with 420 employees - https://www.geolounge.com/fortune-1000-companies-list-2016/



The unemployment rates declined each year in the MSA and were considerably lower than Kentucky's during this time period.

According to *WKYT News*, in February 2016, Lexmark International, Inc. announced it was cutting 500 jobs (4.0% of its workforce), at least 143 employees in Lexington will be affected by the layoffs. The company said the layoffs, affecting part of its worldwide workforce, are part of a 12-month restructuring plan expected to save the company $67 million in 2016 and $100 million in 2017. According to a University of Kentucky professor of economics, even if all 500 layoffs happened at Lexmark's headquarters, it would impact less than 1.0% of employment in the Lexington area.[183]

183 WKYT News Staff. "Lexmark to layoff 143 Lexington employees." *WKYT News*. March 23, 2016. - http://www.wkyt.com/content/news/373219481.html

2016 FFIEC Census Data and 2015 D&B Information

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE LEXINGTON-FAYETTE KY MSA

Lending Test

Fifth Third's performance under the lending test in this assessment area is rated good. Fifth Third has demonstrated good responsiveness to the credit needs of the community. In addition, Fifth Third originated 11 community development loans totaling $44.6 million. Fifth Third has an excellent geographic distribution of loans and minimal lending gaps in the assessment area. Fifth Third has an excellent distribution among borrowers of different income levels and a good distribution to businesses of different revenue sizes. Fifth Third exhibits a good record of serving the credit needs of highly economically disadvantaged areas in its assessment area, low-income individuals, and businesses with gross annual revenues of $1 million or less. The adequate level of community development loans and extensive use of flexible lending practices supported Fifth Third's performance in this assessment area.

Greatest consideration was given to the evaluation of home purchase, based on the overall volume of lending, followed by refinance, and small business. There were an insufficient number of home improvement loans to analyze performance. Details of Fifth Third's residential mortgage and small business lending, as well as information regarding lending by peers, can be found in Appendix E.

Lending Activity

Fifth Third's lending activity reflects good responsiveness to the credit needs within the assessment area. Fifth Third originated 611 home purchase, 570 refinance, 39 home improvement, 441 small business, and 11 community development loans during the evaluation period. The percentage of Fifth Third's total lending at 1.2% is greater than the percentage of total deposits at 1.1% in this area.

Geographic Distribution of Loans

Fifth Third's overall distribution of lending among geographies is excellent. Home purchase, the largest loan category, is good. Refinance lending is also good. Small business lending is excellent. In addition, there is a low level of lending gaps as shown in the following table:

Tract Income Levels	Number of Tracts	Tracts with No Loans	Penetration
Low	12	0	100.0%
Moderate	32	1	96.9%
Middle	47	0	100.0%
Upper	38	0	100.0%
Total	**129**	**1**	**99.2%**

Lending gaps are considered minimal, as there was only one tract in the entire assessment area in which there were no loans.

Home Purchase Loans

Fifth Third made 13 home purchase loans totaling $1.3 million in low-income tracts. This represents 2.1% of home purchase loans by volume, which is significantly below the percentage of owner-occupied units in these tracts at 4.0%, and 1.2% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate at 2.8% and was below the 2015 aggregate at 3.3%. As Fifth Third's performance was significantly below proxy and below the aggregate of all lenders, the geographic distribution of home purchase loans in low-income tracts is adequate.

Fifth Third made 88 home purchase loans totaling $9.5 million in moderate-income tracts. This represents 14.4% of its home purchase loans by volume, which is below the percentage of owner-occupied units in these tracts at 21.9%, and 8.4% by dollar volume, which is significantly below proxy. The percentage of loans by volume exceeded the 2014 aggregate at 16.5% and was below the 2015 aggregate at 16.5%. As Fifth Third's performance was below proxy and exceeded the aggregate of all lenders, the geographic distribution of home purchase loans in moderate-income tracts is good.

Fifth Third made 235 home purchase loans totaling $36.6 million in middle-income tracts. This represents 38.5% of home purchase loans by volume, which is comparable to the percentage of owner-occupied units in these tracts at 40.5%, and 32.4% by dollar amount, which is below proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 41.1% and the 2015 aggregate of 39.9%.

Fifth Third made 275 home purchase loans totaling $65.5 million in upper-income tracts. This represents 45.0% of home purchase loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 33.7%, and 58.0% by dollar amount, which also exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 39.5%% and exceeded the 2015 aggregate of 40.3%.

Overall, geographic distribution of home purchase loans is good.

Refinance Loans

Fifth Third made 18 refinance loans totaling $1.8 million in low-income tracts. This represents 3.2% of refinance loans by volume and 2.0% by dollar amount, which is below the percentage of owner-occupied units at 4.0%. The percentage of loans by volume was comparable to the 2014 aggregate at 4.1% and the 2015 aggregate at 3.2%. As Fifth Third's performance was slightly below proxy and was comparable to the aggregate of all lenders, the geographic distribution of refinance loans in low-income tracts is good.

Fifth Third made 103 refinance loans totaling $10.5 million in moderate-income tracts. This represents 18.1% of refinance loans by volume, which is slightly below the owner-occupied units in these tracts at 21.9%. The percentage of loans by dollar amount at 11.7% is significantly below proxy. The percentage of loans by volume was comparable to the 2014 aggregate at 20.8% and slightly exceeded the 2015 aggregate at 17.8%.

As Fifth Third's performance was slightly below proxy and slightly exceeded the aggregate of all lenders, the geographic distribution of refinance loans in moderate-income tracts is good.

Fifth Third made 198 refinance loans totaling $26.4 million in middle-income tracts. This represents 34.7% of refinance loans by volume, which is below the owner-occupied units in these tracts at 40.5%. However, the percentage of refinance loans by dollar amount (29.4%) was significantly below proxy. The percentage of loans by volume was below the 2014 aggregate at 38.9% and was below the 2015 aggregate at 38.9%.

Fifth Third made 251 refinance loans totaling $51.4 million in upper-income tracts. This represents 44.0% of refinance loans by volume, which significantly exceeds the owner-occupied units in these tracts at 33.7%, and 57.0% by dollar volume, which also exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate at 36.2% and exceeded the 2015 aggregate at 40.1%.

Overall, the geographic distribution of refinance loans is good.

Small Business Loans

Fifth Third made 31 small business loans totaling $4.5 million in low-income tracts. This represents 7.0% of small business loans by volume, which exceeds the percentage of businesses in these tracts at 5.8%, and 8.1% by dollar amount, which also exceeds proxy. The percentage of loans by volume was below the 2014 aggregate of 7.5% and exceeded the 2015 aggregate of 7.4%. Given that Fifth Third's performance exceeded proxy and slightly exceeded the aggregate of all lenders, the geographic distribution of small business loans in low-income tracts is good.

Fifth Third made 106 small business loans totaling $18.3 million in moderate-income tracts. This represents 24.0% of small business loans by volume, which exceeds the percentage of businesses in these tracts at 23.7%, and 32.9% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 20.3% and was below the 2015 aggregate of 20.3%. Given that Fifth Third's performance exceeded the aggregate of all lenders and proxy, the geographic distribution of small business loans in moderate-income tracts is excellent.

Fifth Third made 149 small business loans totaling $18.7 million in middle-income tracts. This represents 33.8% of small business loans by volume, which is below the percentage of businesses in these tracts at 38.1%, and 33.6% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate of 37.9% and the 2015 aggregate of 37.9%.

Fifth Third made 155 small business loans totaling $14.1 million in upper-income tracts. This represents 35.1% of small business loans by volume, which exceeds the percentage of businesses in these tracts at 32.3%, and 25.4% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate of 33.2% and exceeded the 2015 aggregate of 33.3%.

Overall, the geographic distribution of small business loans is excellent, primarily due to the strong performance in moderate-income tracts.

Distribution by Borrower Income and Revenue Size of the Business

Overall, the distribution of loans is excellent based on borrower income and good for businesses of different revenue sizes. Borrower distribution is excellent for home purchase loans and refinances.

Home Purchase Loans

Fifth Third made 83 loans totaling $8.0 million to low-income borrowers. This represents 13.6% of home purchase loans by volume, which is below the percentage of low-income families at 23.3%, and 7.1% of loans by dollar amount, which is significantly below proxy. The percentage of loans by volume significantly exceeded the 2014 aggregate of 8.6% and exceeded the 2015 aggregate of 8.4%. Given that Fifth Third's performance was below proxy, but significantly exceeded the aggregate of all lenders, the borrower distribution of home purchase loans to low-income borrowers is good.

Fifth Third made 146 loans totaling $19.2 million to moderate-income borrowers. This represents 23.9% of home purchase loans by volume, which exceeds the percentage of moderate-income families at 16.3% and 17.0% of loans by dollar amount, which also exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 21.1% and exceeded the 2015 aggregate of 20.6%. Given that Fifth Third's performance exceeded proxy and the aggregate of all lenders, the borrower distribution of home purchase loans to moderate-income borrowers is excellent.

Fifth Third made 128 loans totaling $18.8 million to middle-income borrowers. This represents 20.9% of home purchase loans by volume, which exceeds the percentage of middle-income families at 20.1%, and 16.6% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 20.4% and was comparable to the 2015 aggregate of 19.9%.

Fifth Third made 239 loans totaling $63.8 million to upper-income borrowers. This represents 39.1% of home purchase loans by volume, which is comparable to the percentage of upper-income families at 40.3%, and 56.4% of loans by dollar amount, which also exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 31.3% and the 2015 aggregate of 32.2%.

Overall, the borrower distribution of home purchase loans is excellent.

Refinance Loans

Fifth Third made 78 loans totaling $6.7 million to low-income borrowers. This represents 13.7% of refinance loans by volume, which is below percentage of low-income families at 23.3%. The percentage of loans by dollar amount at 7.4% is significantly below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 8.6% and exceeded the 2015 aggregate of 8.3%. Given that Fifth Third's performance exceeded the aggregate of all lenders, the borrower distribution of refinance loans to low-income borrowers is good.

Fifth Third made 122 loans totaling $11.8 million to moderate-income borrowers. This represents 21.4% of refinance loans by volume, which exceeds the percentage of moderate-income families at 16.3%, and 13.1% by dollar volume, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 16.0% and the 2015 aggregate of 15.2%. As Fifth Third's performance exceeded proxy and aggregate of all lenders, the borrower distribution to moderate-income borrowers is excellent.

Fifth Third made 147 loans totaling $20.0 million to middle-income borrowers. This represents 25.8% of refinance loans by volume, which exceeds the percentage of middle-income families at 20.1%, and 22.2% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 19.9% and the 2015 aggregate of 19.2%.

Fifth Third made 197 loans totaling $47.0 million to upper-income borrowers. This represents 34.6% of refinance loans by volume, which is below the percentage of upper-income families at 40.3, and 52.2% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 32.9% and was below the 2015 aggregate of 35.4%.

Overall, the borrower distribution of refinance loans is excellent.

Small Business Loans

The distribution of small business loans to businesses of different sizes is good, considering Fifth Third's performance relative to the aggregate of all lenders. Fifth Third was able to make 58.3% of small business loans to businesses with revenues of $1 million or less. Fifth Third's performance exceeded the 2014 aggregate of 47.2% and exceeded the 2015 aggregate of 49.9%, but was significantly below the percentage of small businesses in the assessment area at 92.6%. Also, during the evaluation period, Fifth Third was able to make an acceptable percentage of small-dollar loans (71.9%) up to $100,000, indicating a willingness to lend in smaller amounts typically requested by small businesses. In addition, a community contact indicated a need for small-dollar loans to small businesses.

Community Development Loans

Fifth Third originated 11 community development loans totaling $44.6 million during the evaluation period. These loans were primarily working capital loans to help retain and expand businesses located in areas specifically designated to promote revitalization and economic development. In particular, several loans supported businesses located in the downtown core area designated by Lexington to revitalize 17 specific neighborhoods.

Community development lending in this assessment area represents 0.7% of the total dollar volume of community development loans originated by Fifth Third during the evaluation period. This ranks as Fifth Third's 31st highest percentage of community development lending during the evaluation period. In this assessment area, Fifth Third ranks third with 11.9% of the deposit market share and deposits accounting for 1.1% of the Fifth Third's total deposits; therefore, Fifth Third's performance is adequate in community development lending.

Flexible Lending Programs

Fifth Third had 338 flexible lending loans in this assessment area: 222 government loans, 15 down payment assistance loans, and 101 other flexible lending programs. The following tables show the percentage by volume and by dollar amount of the three types of flexible lending programs made in this assessment area during the evaluation period and distribution of Fifth Third's flexible lending programs within the assessment area by census tract income and borrower income.

Flexible Loan Programs												
	Geographic Distribution											
	Low			Moderate			Middle			Upper		
	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units

Other Flexible Lending Programs	24.8%	22.5%	23.3%	33.7%	28.7%	16.3%	18.8%	21.2%	20.1%	22.8%	27.7%	40.3%
Total	**19.5%**	**15%**	**23.3%**	**33.4%**	**29.5%**	**16.3%**	**26%**	**27.9%**	**20.1%**	**20.1%**	**26.4%**	**40.3%**

*Unknown tract data is not included in the above table.

Fifth Third's lending in low-income tracts by number and dollar amount exceeded the percentage of owner-occupied units in these tracts, especially for various down payment assistance programs. The percentage of lending by volume in moderate-income tracts exceeded the percentage of owner-occupied units, while the percentage of lending by dollar amount was slightly below proxy.

Fifth Third's lending to low-income borrowers by volume and dollar amount was below the percentage of low-income families in the assessment area; however, lending for various down payment assistance programs significantly exceeded the percentage of low-income families. The percentage of lending to moderate-income borrowers by volume and dollar amount significantly exceeded the percentage of moderate-income families.

Therefore, Fifth Third made extensive use of flexible lending practices and is serving the assessment area's credit needs, as lending through flexible loan programs to moderate-income borrowers was good and lending in low-and moderate-income tracts and to low-income borrowers was excellent.

Investment Test

Fifth Third's performance relative to the investment test in the assessment area is rated good.

Fifth Third made significant level of qualified community development investments and grants, particularly those not routinely provided by private investors. As such, Fifth Third was occasionally in a leadership position. Fifth Third has 115 qualified investments totaling $17.8 million during the evaluation period. Shown in the table below are the total current period investments:

Affordable Housing		Economic Development		Revitalization and Stabilization		Community Services	
#	*$*	*#*	*$*	*#*	*$*	*#*	*$*
36	10,722,003	17	77,554	1	5,000	52	143,319

Also included in the total number of qualified investments are nine prior period investments totaling $6.9 million. Fifth Third made 1.1% of its total community development investments in this assessment area, which is comparable to the percentage of total deposits at 1.1% and slightly greater than the percentage of branch offices at 1.0%.

Fifth Third exhibits a good responsiveness to credit and community development needs in the assessment area. Fifth Third made 75 donations totaling $238,373 that supported local schools, small businesses, churches, food banks, health care, and affordable housing. The majority of Fifth Third's donations (60.1%) supported services to low- and moderate-income individuals, which is an important need based on the excessive poverty rates present in several counties within the assessment area.

Service Test

Fifth Third's performance under the service test in this assessment area is rated good. Retail services are accessible and Fifth Third provided a relatively high level of community development services in the assessment area.

Retail Services

Fifth Third's record of opening and closing offices has not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and to low- and moderate-income households. Since the previous evaluation, two banking centers were closed, resulting in no net change in the number of banking centers in low- and moderate-income tracts. Delivery services are accessible to Fifth Third's geographies and individuals of different income levels.

Business hours and services provided do not vary in a way that inconveniences certain portions of the assessment area, including low- and moderate-income geographies or households, and are consistent with the services and hours discussed in the "Institution" assessment.

Fifth Third maintains 13 banking centers within this assessment area, including none in low-, six in moderate-, three in middle-, and four in upper-income census tracts. Fifth Third's banking centers in this assessment area represent 1.0% of all its banking centers.

Fifth Third has a total of 15 full-service ATMs within this assessment area, including none in low-, eight in moderate-, three in middle-, and four in upper-income census tracts.

The following table illustrates the percentage of banking centers and ATMs in low-, moderate-, middle-, and upper-income census tracts in comparison to the number and percentage of census tracts and the percentage of households and businesses in those tracts.

Geographic Distribution of Branches & ATMS

Assessment Area: KY Lexington

Tract Category	Branches				Stand Alone ATMs							Demographics			
	Total Branches		Open	Closed	Total ATMs			Full Service ATMs		Cash only ATMs		Census Tracts		House holds	Total Businesses
	#	%	#	#		#	%	#	%	#	%	#	%	%	%
Low	0	0.0%	0	0	Total	3	12.0%	0	0.0%	3	30.0%	12	9.3%	7.6%	6.2%
Moderate	6	46.2%	0	0	Total	11	44.0%	8	53.3%	3	30.0%	32	24.8%	28.3%	24.0%
Middle	3	23.1%	0	2	Total	5	20.0%	3	20.0%	2	20.0%	47	36.4%	37.0%	38.1%
Upper	4	30.8%	0	0	Total	6	24.0%	4	26.7%	2	20.0%	38	29.5%	27.1%	31.7%
Unknown	0	0.0%	0	0	Total	0	0.0%	0	0.0%	0	0.0%	0	0.0%	0.0%	0.0%

2016 FFIEC Census Data, 2010 ACS Data, and 2015 D&B Information
Closed branches/ATMs are only included in "closed" columns and are not included in any other totals.
DTO - Drive thru only is a subset of total branches
SA = Stand Alone ATM is a subset of total ATMs

Branch distribution within low-income tracts was considered poor, because Fifth Third has no branches in these tracts and the distribution of branches was below the percentage of census tracts and households in these tracts. However, the branch distribution within moderate-income tracts was considered excellent.

Community Development Services

Fifth Third provided a relatively high level of community development services in the assessment area. During the evaluation period, Fifth Third employees provided 1,175 hours of community development service to local organizations serving low- and moderate-income individuals, which represents 1.0% of all community development services provided and equates to 0.56 annualized persons (ANP).

Affordable Housing	Economic Development	Revitalization and Stabilization	Community Services
# of Hours	***# of Hours***	***# of Hours***	***# of Hours***
6	66	45	1,058

Employees provided financial expertise through leadership positions in multiple community organizations that provide affordable housing and promote community and economic development and area revitalization and stabilization. Community development services include 493 hours of providing financial literacy through local nonprofits and school programs, 441 hours serving on boards and committees, 153 hours providing technical assistance to non-profits and local business, and 88 hours participating in foreclosure prevention outreach.

METROPOLITAN and NON-METROPOLITAN AREAS
(Limited-scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE COMMONWEALTH OF KENTUCKY

- **Non-metropolitan Eastern Kentucky**
  - As of June 30, 2016, Fifth Third operated four branches in the assessment area, representing 14.3% of its branches in Kentucky.
  - As of June 30, 2016, Fifth Third had $177,096 in deposits in this assessment area, representing a market share of 6.5% and 11.2% of it statewide deposits.
- **Owensboro MSA**
  - As of June 30, 2016, Fifth Third operated three branches in the assessment area, representing 10.7% of its branches in Kentucky.
  - As of June 30, 2016, Fifth Third had $55,982 in deposits in this assessment area, representing a market share of 1.8% and 3.5% of it statewide deposits.
- **Non-metropolitan Western Kentucky**
  - As of June 30, 2016, Fifth Third operated eight branches in the assessment area, representing 28.6% of its branches in Kentucky.
  - As of June 30, 2016, Fifth Third had $233,213 in deposits in this assessment area, representing a market share of 19.1% and 14.8% of it statewide deposits.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE COMMONWEALTH OF KENTUCKY

Through the use of available facts and data, including performance and demographic information, each assessment area's performance was evaluated and compared with Fifth Third's performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendix F for information regarding these areas.

Assessment Area	Lending Test	Investment Test	Service Test
Non-metropolitan Eastern Kentucky	Below	Consistent	Below
Owensboro MSA	Below	Above	Consistent
Non-metropolitan Western Kentucky	Below	Below	Below

For the lending test, Fifth Third received a "High Satisfactory" rating in Kentucky. Performance in all three of the limited-scope assessment areas was below Fifth Third's performance for Kentucky. Although below the commonwealth's performance, lending levels were good or adequate for the geographic and borrower distribution of loans. Non-metropolitan Eastern Kentucky had a good level of community development loans. No community development lending was noted in the Owensboro or non-metropolitan Western Kentucky assessment areas. A low level of lending gaps was noted in all three of the limited-scope assessment areas.

For the investment test, Fifth Third received a "High Satisfactory" rating in Kentucky. Investment activity was consistent with the commonwealth in non-metropolitan Eastern Kentucky. However, investment activity was above Fifth Third's performance for the commonwealth in the Owensboro assessment area and below performance for the commonwealth in the non-metropolitan Western Kentucky assessment area. The stronger performance in the Owensboro assessment area was primarily attributable to several LIHTC investments in the assessment area. The weaker performance in non-metropolitan Western Kentucky was primarily due to a lower level of qualified investments and contributions relative to Fifth Third's operational presence in the assessment area.

For the service test, Fifth Third received a "High Satisfactory" rating in Kentucky. Performance was consistent to the state in the Owensboro assessment area and below Fifth Third's performance for Kentucky in the remaining two limited-scope assessment areas. Retail services performance was consistent with performance for Kentucky in all three assessment areas. Qualified community development services were adequate and poor in the non-metropolitan Eastern and Western Kentucky assessment areas, respectively. The weaker community development services performance was primarily due to a lower level of hours dedicated to providing qualified services relative to Fifth Third's operational presence in these assessment areas. Qualified community development services were excellent in the Owensboro assessment area. The stronger performance was due to a higher level of hours dedicated to providing qualified services.

The performance in the limited-scope assessment areas did not change the overall rating for the commonwealth.

STATE OF MICHIGAN

CRA RATING for State of Michigan:[184] Outstanding
The lending test is rated: Outstanding
The investment test is rated: Outstanding
The service test is rated: Outstanding

The major factors supporting this rating include:

- An excellent responsiveness to credit needs;
- An excellent geographic distribution of loans throughout the assessment area;
- A good distribution of loans among borrowers of different income levels and to businesses of different revenue sizes;
- Exhibits an excellent record of serving the credit needs of low-income individuals and areas and very small businesses;
- A leader in making community development loans;
- Use of flexible lending practices in serving the assessment area's credit needs;
- An excellent level of qualified community development investments and grants;
- Often in a leadership position in providing community development investments and grants;
- Retail delivery systems are accessible to all geographies and individuals of different income levels and businesses of different revenue sizes;
- A record of opening and closing banking centers that has not adversely affected the accessibility of delivery systems;
- Banking services and hours that do not vary in a way that inconveniences any portions of the assessment areas; and,
- A leader in providing community development services.

SCOPE OF EXAMINATION

Full-scope reviews were conducted for two assessment areas in Michigan: the Detroit-Warren-Ann Arbor CSA and the Grand Rapids-Wyoming-Muskegon CSA. Limited-scope reviews were performed on the remaining seven assessment areas: the Battle Creek MSA, Jackson MSA, Kalamazoo-Portage MSA, Lansing-East Lansing MSA, non-metropolitan Northern Michigan, non-metropolitan Southern Michigan, and Saginaw-Midland-Bay City CSA. The time period,

[184] For institutions with branches in two or more states in a multi-state metropolitan area, this statewide evaluation is adjusted and does not reflect performance in the parts of those states contained within the multi-state metropolitan area. Refer to the multi-state metropolitan area rating and discussion for the rating and evaluation of the institution's performance in that area.

products, and affiliates evaluated for this assessment area are consistent with the scope discussed in the "Institution" section of this report.
The Detroit-Warren-Ann Arbor and Grand Rapids-Wyoming-Muskegon assessment areas received greater weight in determining the CRA rating for the state. These areas had the largest lending volumes and number of banking centers and ranked first and second, respectively, in this state's share of deposits during the evaluation period. Lastly, these areas represented 67.3% of the banking centers, 75.5% of deposits, and 70.2% of lending in Michigan.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE STATE OF MICHIGAN

Lending activity accounted for 23.1% of the Fifth Third's total lending activity, while deposits accounted for 14.6% of Fifth Third's total deposits. HMDA-reportable lending in Michigan represented 22.9% of Fifth Third's total HMDA lending, while CRA-reportable lending represented 23.5% of Fifth Third's total CRA lending. As of June 30, 2016, Fifth Third ranked fifth among 136 insured institutions and has a deposit market share of 8.0% and 215 banking center locations within Michigan.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE STATE OF MICHIGAN

Lending Test

Fifth Third's performance under the lending test within the assessment areas located in Michigan is rated "Outstanding." Fifth Third's lending reflects an excellent responsiveness to the credit needs in the following two of nine assessment areas: Detroit-Warren-Ann Arbor and Grand Rapids-Wyoming-Muskegon assessment areas. Lending reflects a good responsiveness to credit needs in the Jackson, Kalamazoo-Portage, Lansing-East Lansing, and Saginaw-Midland-Bay City assessment areas and an adequate responsiveness in the remaining three assessment areas: Battle Creek, non-metropolitan Northern Michigan, and non-metropolitan Southern Michigan.

Lending Activity

In Michigan, Fifth Third originated 23,911 HMDA loans totaling $3.4 billion and 9,217 small business loans totaling $1.5 billion during the evaluation period.

Lending activity in Michigan is excellent. The Detroit-Warren-Ann Arbor and Grand Rapids-Wyoming-Muskegon assessment areas have excellent lending activity. Lending activity is adequate in the Battle Creek, non-metropolitan Northern Michigan, and non-metropolitan Southern Michigan assessment areas, and good in the remaining four assessment areas.

Geographic and Borrower Distribution

The distribution of loans among geographies is excellent in Michigan. The geographic distribution is excellent in the Detroit-Warren-Ann Arbor and Grand Rapids-Wyoming-Muskegon assessment areas. The geographic distribution is adequate in the Lansing-East Lansing and non-metropolitan Northern Michigan assessment areas and good in the remaining five assessment areas.

A low level of lending gaps was identified in five of the nine assessment areas. There was a moderate level of lending gaps in the Detroit-Warren-Ann Arbor and Saginaw-Midland-Bay City assessment areas, and no lending gaps in the Grand Rapids-Wyoming-Muskegon and Battle Creek assessment areas.

The distribution of loans among borrowers of different income levels and to businesses of different revenue sizes is good in the assessment areas located in Michigan. The borrower distribution is excellent in the Detroit-Warren-Ann Arbor and Grand Rapids-Wyoming-Muskegon assessment areas and adequate in the Saginaw-Midland-Bay City assessment area. Borrower distribution is good in the remaining six assessment areas. The distribution to businesses of different revenue sizes is good in the Grand Rapids-Wyoming-Muskegon, Lansing-East Lansing, and Saginaw-Midland-Bay City assessment areas and adequate in the Detroit-Warren-Ann Arbor, non-metropolitan Northern Michigan, and non-metropolitan Southern Michigan assessment areas. The distribution to businesses of different revenue sizes is poor in the Battle Creek and Jackson assessment areas.

A detailed analysis for the geographic distribution and borrower-income distribution is provided with the analysis for each assessment area.

Community Development Loans

In Michigan, Fifth Third originated 248 community development loans totaling $1.2 billion, which represents 19.9% of the Fifth Third's community development lending by dollar volume, representing an outstanding level of community development lending in Michigan. Fifth Third was a leader in providing community development loans in the Detroit-Warren-Ann Arbor, Grand Rapids-Wyoming-Muskegon, and Lansing-East Lansing assessment areas. Fifth Third made a relatively high level of community development loans in the Saginaw-Midland-Bay City assessment area and an adequate level of community development loans in the remaining five assessment areas.

Flexible Lending

Fifth Third consistently makes use of flexible lending practices within assessment areas located in Michigan.

Investment Test

Fifth Third's performance under the investment test within the assessment areas located in Michigan is rated "Outstanding." Fifth Third funded $257.3 million in qualified community development investments in Michigan during the evaluation period, consisting of $155.2 million obtained from new investments made during the current review period and $102.1 million from prior period investments. The majority of investments were LIHTCs.

Fifth Third's level of qualified investments is excellent in the Detroit-Warren-Ann Arbor, Battle Creek, Kalamazoo-Portage, non-metropolitan Northern Michigan, non-metropolitan Southern Michigan, and Saginaw-Midland-Bay City assessment areas and adequate in the Jackson assessment area. The remaining three assessment areas had good levels of qualified community development investments.

Additional information regarding performance under the investment test is provided in the respective analyses for each assessment area.

Service Test

Fifth Third's performance under the service test within the assessment areas located in Michigan is rated "Outstanding." The Fifth Third's performance is excellent in the Detroit-Warren-Ann Arbor, Grand Rapids-Wyoming-Muskegon, and Lansing-East Lansing assessment areas. Performance is good in the remaining six assessment areas.

For details regarding the institution's performance in the individual assessment areas, refer to the respective assessment area's "Service Test" section in this report.

Retail Services

Retail delivery systems are accessible to all geographies, including low- and moderate-income geographies, individuals of different income levels, and businesses of different revenue sizes in Michigan. Retail service distribution is good in eight assessment areas and adequate in non-metropolitan Northern Michigan.

Fifth Third has 226 banking centers in Michigan, which represents 17.4% of Fifth Third's total branches. Fifth Third's record of opening and closing banking centers has not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and to low- and moderate-income individuals. No branches in Michigan opened or closed in low- or moderate-income tracts during the evaluation period.

Banking services and business hours do not vary in a way that inconveniences any portion of Fifth Third's assessment areas and are consistent with the services and hours discussed in the "Institution" assessment.

Community Development Services

Fifth Third is a leader in providing community development services in Michigan. Fifth Third's performance is excellent in the Detroit-Warren-Ann Arbor, Grand Rapids-Wyoming-Muskegon, Jackson, Lansing-East Lansing, non-metropolitan Northern Michigan, non-metropolitan Southern Michigan, and Saginaw-Midland-Bay City assessment areas. The level of community development services is good in the remaining two assessment areas.

METROPOLITAN AREA
(Full-scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE DETROIT-WARREN-ANN ARBOR MI CSA #220

The Detroit-Warren-Ann Arbor MI CSA consists of the following four MSAs:

- Ann Arbor MI MSA #11460, consisting of Washtenaw County
- Detroit-Warren-Dearborn MI MSA #19820, consists of the following two MDs:
  - Detroit-Livonia-Dearborn MI MD #19804, consisting of Wayne County
  - Warren-Farmington Hills-Troy MI MD #47644, consisting of Livingston, Macomb, Oakland, and St. Clair counties, but excluding Lapeer County
- Flint MI MSA #22420, consisting of Genesee County
- Monroe MI MSA #33780, consisting of Monroe County

The assessment area is comprised of 174 low-, 362 moderate-, 565 middle-, and 422 upper-income tracts. There are also 24 tracts with no income designation that are primarily composed of correctional institutions, military establishments, education facilities, or medical establishments that do not report income information.

As of June 30, 2016, Fifth Third ranked sixth out of 53 institutions with 5.1% of the deposit market share. JPMorgan Chase had the majority of the market share with 27.8% of deposits. The next four largest institutions, Comerica Bank, Bank of America, PNC Bank, and Flagstar Bank, had 18.2%, 11.2%, 9.4%, and 5.5% of the market share, respectively. Deposits in this assessment area accounted for 6.5% of the Fifth Third's total deposits. This was 44.9% of deposits within the state and the third-highest percentage of deposits within Fifth Third's CRA footprint.

From January 1, 2014 through June 30, 2016, Fifth Third originated 9,435 HMDA loans and 3,659 CRA loans, which represented 9.0% and 9.3% of the total loans originated during the evaluation period, respectively. This was the third-largest HMDA and CRA markets for loans originated during the evaluation period.

In 2015, Fifth Third Mortgage Company ranked sixth among 624 HMDA reporters in the assessment area, while Fifth Third Mortgage Company-Michigan ranked 17th and Fifth Third ranked 71st. Quicken Loans, Wells Fargo Bank, JPMorgan Chase, and Flagstar Bank were the top four HMDA lenders in the assessment area. Fifth Third ranked 12th of 139 CRA reporters in the assessment area in 2015. The top four CRA lenders in the assessment area were American Express, U.S. Bank, Chase Bank USA, and Capital One. These lenders are mostly issuers of credit cards and their CRA loans primarily consist of commercial credit card accounts.

Eight community contact interviews were conducted to provide additional information regarding the assessment area. The first contact, representing an economic development organization, stated the Detroit economy is recovering at a slow, but steady pace. The contact indicated that banks are working to originate needed small business and mortgage loans in this market and there are a number of down-payment assistance programs in place to assist low- and moderate-income individuals with becoming first-time homebuyers. The contact believed there is a substantial need for financial literacy education within the community and specifically mentioned Chase Bank USA, FirstMerit, and Chemical Bank as consistently participating in community development projects.

The second contact, representing an organization that provides technical assistance to nonprofit community development organizations, stated that housing is a priority for the city. Detroit is working hard to demolish dilapidated homes in blighted areas, as demolishing these blighted homes can raise property values. The contact indicated banks are performing adequately and believes the new housing market analysis will generate opportunities for financial institutions to support affordable housing endeavors.

The third contact, representing a financial intermediary that provides grant monies to area non-profits, stated the most significant needs for lower-income individuals and in lower-income neighborhoods are blight removal, home improvement, home rehabilitation, home weatherization, access to healthy foods, and financial literacy. The contact indicated that area banks are adequately meeting the credit needs of the community.

The fourth contact, representing an organization that works to attract new businesses to the area, stated start-up businesses are in need of small-dollar loans up to $100,000 to help with operating costs and working capital. The contact believed banks could improve upon originating these types of loans. The contact specifically mentioned Chase Bank USA, Wells Fargo Bank, and Bank of America as being responsive to the credit needs of the small businesses in the community.

The fifth contact, representing an organization that provides affordable housing, stated Detroit has experienced a 25.0% loss in population from 2000 to 2010. Unemployment rose continuously from 2000 to 2010, reaching a high of 14.2% in August 2009; however, in December 2014, the unemployment rate reached a low of 6.3%. Although housing prices across metropolitan Detroit continue to regain lost ground, rising about 4.0% in the last year, prices remain off by approximately 20.0% from their peak in early 2006 and late 2015. Rental vacancy rates remain high in the Detroit market due to the loss of population, along with a large number of single-family homes for rent. The contact indicated that decent, affordable housing and eliminating blight are major needs in the Detroit metropolitan area. The contact believed banks are not actively participating in the community and are not supporting community development programs or implementing lending-assistance programs to low-income individuals. On the other hand, the contact indicated credit unions are more involved in supporting the credit needs of the community.

The sixth contact, representing an economic development organization, stated incomes have been stagnant, but are beginning to trend upwards. Unemployment rates are beginning to decline due to the creation of new higher-paying jobs in advanced manufacturing. The contact specifically mentioned Goldman Sachs and Quicken Loans as investing in the community and creating jobs in the area.

The seventh contact, representing an economic development organization, stated there is no shortage of small businesses seeking loans; therefore, there are opportunities for banks to finance small businesses in the community. Overall, the contact believed area banks are actively involved in the community, as they donate time and money to a multitude of organizations.

The final contact, representing a non-profit organization that attracts and retains businesses to the area, stated there are opportunities for banks to participate in more financial educational programs targeted to entrepreneurs. The contact believed that business owners, management, and staff need to better understand financial statements and business planning, as many companies went out of business during the recession because they did not have the right skill set to adapt and survive.

Population Characteristics

According to 2010 U.S. Census data, the population in the assessment area was 5.1 million. Less than a third (30.0%) of the population lived in low- and moderate-income tracts. In addition, 75.9% of the population was 18 years of age or older, the legal age to enter into a contract.

As of July 1, 2015, the Detroit MSA is the 14th largest in terms of population in the nation, while the Flint MSA is the 131st, the Ann Arbor MSA is the 146th, and the Monroe MSA is the 278th largest.[185] Wayne County is the most populous county in the assessment area and in Michigan. Oakland County is the second most populous, while Macomb, Oakland, and Genesee counties are the third, fourth, and fifth most populous counties in Michigan, respectively. However, according to *The Detroit News*, Washtenaw County (sixth most populous county), led southeastern Michigan in population growth, outpacing Macomb, Oakland, and Wayne counties. Like Washtenaw, Macomb and Oakland experienced increases in population, while Wayne County continued to experience a decline in population, although it was the smallest decline in population in Wayne County since 2004. According to 2016 U.S. Census data, Wayne County lost about 7,696 people, bringing its total population to 1.74 million, and Detroit lost 3,107 residents in the last year. Meanwhile, Washtenaw County grew nearly 5.5%, or 19,141 residents, in the past year. For the second year, Wayne County was second in the nation in the largest population decline, behind Illinois' Cook County, home of Chicago.[186]

[185] MSA population data is derived from the U.S. Census Data 2015 Statistical Abstract: https://factfinder.census.gov/faces/tableservices/jsf/pages/productview.xhtml?src=bkmk

[186] MacDonald, Christine. "Census: Washtenaw leads region in population growth." *The Detroit News*. March 23, 2017. - http://www.detroitnews.com/story/news/local/michigan/2017/03/23/census-washtenaw-leads-region-population-growth/99519598/

Detroit is the largest city in Michigan and is the 19th most populous city in the U.S. with 677,116 residents. Despite being the largest city in Michigan, Detroit's population growth declined by 28.3% between 2000 and 2015, but only declined by 5.1% from April 1, 2010 to July 1, 2015. According to 2015 U.S. Census data,[187] Warren is the third-largest city in Michigan, with 135,358 residents. Ann Arbor is the fifth-largest city in the state with 117,070 residents.

Flint is seventh-largest in Michigan with 98,310 residents, followed by Dearborn (eighth), Livonia (ninth), Troy (10th), and Farmington Hills (12th) with 95,171, 94,635, 83,280, and 81,330 residents, respectively. In contrast, Monroe had only 20,092 residents, representing a 3.1% decline in population since April 1, 2010.

The following table shows the population in the assessment area by county for 2010 and 2015, with the percentage of the population increase or decrease.[188] For the most part, the population within the assessment remained relatively stable between 2010 and 2015, with Washtenaw County experiencing the greatest growth and Genesee and Wayne counties experiencing the greatest declines in population.

County	2010 Population	2015 Population	Population Percent Change
Genesee	425,790	410,849	-3.5%
Livingston	180,967	187,316	3.5%
Macomb	840,978	864,840	2.8%
Monroe	152,021	149,568	-1.6%
Oakland	1,202,362	1,242,304	3.3%
St. Clair	163,040	159,875	-1.9%
Washtenaw	344,791	358,880	4.1%
Wayne	1,820,584	1,759,335	-3.4%
Total	**5,130,533**	**5,132,967**	**0.0%**

According to Moody's Analytics, from 2012 and 2015, Detroit's population growth remained negative and weak, but the rate of decline appears to be slowing. The uptick in growth can be attributed to an increase in foreign in-migration and a slight reduction in domestic out-migration. Flint's population growth also remains negative and weak, but the rate of decline has progressively slowed, primarily due to decreasing domestic out-migration. Monroe's population growth also remains negative with a slowing rate of decline. Conversely, Ann Arbor experienced overall positive net migration, primarily due to growing foreign in-migration.

[188] Population Estimates derived from U.S. Census Data (April 1, 2010 – July 1, 2015): http://www.census.gov/quickfacts/table/PST045216/00

Income Characteristics

The 2010 assessment area median family income was significantly higher ($65,426) than Michigan at $60,341. As shown in the table below, since 2010, the median family income increased across all assessment area, except in the Flint MSA. Between 2014 and 2015, the median family income increased in all areas, except the Ann Arbor MSA. However, between 2015 and 2016, the median family income only increased in the Ann Arbor MSA and the Monroe MSA and decreased in all other areas within the assessment area.

FFIEC Estimated Median Family Income	2010	2014	2015	2016
Ann Arbor MI MSA	$82,184	$87,400	$84,300	$91,600
Detroit-Dearborn-Livonia MI MD	$52,946	$51,000	$53,700	$53,500
Warren-Troy-Farmington Hills MI MD	$75,314	$73,800	$77,300	$77,000
Flint MI MSA	$54,072	$53,300	$53,800	$52,200
Monroe MI MSA	$66,549	$63,800	$65,000	$69,200

Poverty rates increased in each county in the assessment area from 1999 to 2015.[189] Wayne and Genesee counties had the highest poverty rates in 1999 and 2015 and Livingston County had the lowest poverty rates. In 2015, Wayne and Genesee counties had poverty rates higher than Michigan and, in addition to Washtenaw County, had poverty rates that exceeded the national rate. However, Macomb County experienced the largest increase in poverty rate during this period. According to the U.S. Census Bureau, the national poverty rate in 2015 was 13.5%, down 1.3 percentage points from 14.8% in 2014. For most demographic groups, the 2015 poverty rates and number of people in poverty decreased from 2014.[190] The following table shows the poverty rates for 1999[191] and 2015.

County	1999 Poverty Rate	2015 Poverty Rate	Change
Genesee	13.1%	20.5%	56.5%
Livingston	3.4%	6.5%	91.2%
Macomb	5.6%	11.7%	108.9%
Monroe	7.0%	10.6%	51.4%
Oakland	5.5%	9.3%	69.1%
St. Clair	7.8%	12.8%	64.1%
Washtenaw	11.1%	14.2%	27.9%
Wayne	16.4%	24.8%	51.2%
Michigan	**10.5%**	**15.7%**	**49.5%**
U.S.	**11.8%**	**13.5%**	**14.4%**

[189] U.S. Department of Agriculture Economic Research Service Poverty Rates (for 1999 and 2015): https://data.ers.usda.gov/reports.aspx?ID=17826
[190] 2015 National Poverty: http://www.census.gov/library/publications/2016/demo/p60-256.html
[191] 1999 National Poverty Rate: http://www.census.gov/prod/2000pubs/p60-210.pdf

Housing Characteristics

According to 2010 U.S. Census data, there are 2.3 million housing units and 1.3 million families in the assessment area. From an income perspective, 33.5% of housing units, 23.4% of owner-occupied units, and 27.7% of families are located in low- or moderate-income tracts.

Over two-thirds of the housing units in the low-income census tracts are either rental or vacant (69.5%). In the moderate-income census tracts, nearly half (49.2%) of the housing units are either rental or vacant and 50.8% are owner-occupied. Therefore, based on the number of housing units compared to the number of families in low- and moderate-income census tracts, there appear to be credit-related opportunities for Fifth Third to provide various aspects of affordable housing in the assessment area.

The 2010 U.S. Census data shows the median age of housing stock in the assessment area was 46 years old, with 24.2% of the stock built before 1950. The oldest housing stock was in Wayne County with a median age of 56 years, while the newest was 24 years in Livingston County. However, within the assessment area, the median age of housing stock was 58 years in low-income tracts and 55 years in moderate-income tracts, which indicates that there is ample opportunity for Fifth Third to make home improvement and rehabilitation loans. Three community contacts indicated there is a need for revitalizing blighted neighborhoods and providing home improvement and rehabilitation loans in lower-income areas and felt there are ample opportunities for banks to make these types of loans. Lastly, one contact believed banks could improve upon implementing lending-assistance programs to low-income individuals.

According to 2010 U.S. Census data, the median housing value in the assessment area was $156,989, with an affordability ratio of 33.13. The affordability ratio is derived by dividing the median household income by the median housing value. The higher the affordability ratio, the more affordable a home is considered. The median housing value decreased between 2010 and 2011-2015 and household incomes increased; as a result, housing became more affordable across the assessment area. During the evaluation period, the most affordable housing was in Genesee County, with the least affordable in Washtenaw County. Median gross rents increased at a substantial rate across the assessment area, with renters in Macomb County experiencing the largest increase in rental rates and renters in Wayne County experiencing the smallest increase. In 2010, about 50.3% of renters across the assessment area had rent costs greater than 30.0% of income. Increasing rental rates may make it harder for potential homebuyers to save up enough money toward a down payment for a home. According to Moody’s Analytics, residential real estate prices will appreciate in 2017 before weaker demand slows growth. Sales of single-family homes have been steadily rising over the last two years, spurring new construction. The table below presents housing characteristics from the U.S. Census data between 2010 and 2015 in the assessment area and Michigan.

County	2010 Median Housing Value	2010 Affordability Ratio	2011-2015 Median Housing Value	2011-2015 Affordability Ratio	2010 Median Gross Rent	2011-2015 Median Gross Rent	Percent of Change
Genesee	$118,200	36.85	$88,500	47.83	$662	$715	8.0%
Livingston	$216,400	33.33	$192,500	39.07	$860	$917	6.6%
Macomb	$157,000	34.39	$126,000	43.32	$752	$861	14.5%
Monroe	$161,800	34.22	$137,200	40.56	$733	$784	7.0%
Oakland	$204,300	32.50	$178,900	37.71	$871	$942	8.2%
St. Clair	$150,300	32.68	$120,800	41.17	$691	$736	6.5%
Washtenaw	$216,200	27.32	$208,200	29.30	$866	$953	10.0%
Wayne	$121,100	34.88	$83,000	49.64	$759	$794	4.6%
Michigan	**$144,200**	**33.59**	**$122,400**	**40.50**	**$723**	**$783**	**8.3%**

According to the Washtenaw Office of Community and Economic Development, the Ann Arbor area was ranked as the eighth most economically segregated metropolitan area in the nation. The agency describes the disparity as economically dangerous and is looking at housing affordability issues as a way to combat the disparity.[192]

According to Bankrate.com,[193] Michigan ranked 26th for foreclosure filings in November 2016. The national average for foreclosure filings was one in every 1,533 housing units. The following table contains information about foreclosure filings in the assessment area, according to Realtytrac:[194]

Geography Name	Ratio of Properties Receiving Foreclosure Filings in November 2016
Genesee	1:987
Livingston	1:2,102
Macomb	1:1,766
Monroe	1:1,823
Oakland	1:1,871
St. Clair	1:1,683
Washtenaw	1:4,669
Wayne	1:1,325
Michigan	**1:2,036**
U.S.	**1:1,533**

[192] http://www.detroitnews.com/story/news/local/michigan/2017/03/23/census-washtenaw-leads-region-population-growth/99519598/
[193] Bankrate.com: http://www.bankrate.com/finance/real-estate/foreclosures-by-state/default.aspx
[194] Realtytrac: http://www.realtytrac.com/statsandtrends/foreclosuretrends/

In November 2016, Genesee County had the highest rate of foreclosure in the assessment area and Michigan; Wayne County had the fourth highest foreclosure rate in the state. Washtenaw County had the lowest foreclosure rate within the assessment area.

Building permits in the four MSAs, Michigan, and the nation are included in the following table for 2014, 2015, and 2016.[195]

Geography	2014	2015	Percent of Change 2014-2015	2016	Percent of Change 2015-2016
Ann Arbor MSA	570	420	-26.3%	216	-48.6%
Detroit-Warren-Dearborn MSA	6,295	7,304	16.0%	7,536	3.2%
Flint MSA	343	413	20.4%	174	-57.9%
Monroe MSA	240	291	21.3%	13	-95.5%
Michigan	**15,836**	**18,226**	**15.1%**	**22,426**	**23.0%**
U.S.	**1,052,124**	**1,182,582**	**12.4%**	**1,190,191**	**0.6%**

The Monroe, Flint, and Detroit MSAs experienced the greatest increase in housing permits between 2014 and 2015. However, between 2015 and 2016, there was a significant decline in the number of housing permits in the Monroe and Flint MSAs, although the Detroit MSA experienced a slight increase in housing permits. Population losses, in addition to the decrease in the number of permits could indicate a softening in demand for home purchase loans across the assessment area.

Labor, Employment, and Economic Characteristics

According to Moody's Analytics, the Detroit area economy is in recovery, but seems to be losing momentum. Job growth is lagging behind the rest of Michigan and residential construction has eased. The auto industry employs approximately 80.0% more workers than in mid-2009, when employment bottomed; however, auto employment has waned. Outside of the auto industry, healthcare and green and advanced manufacturing hold the most promise for the area's economic recovery. Nonetheless, population losses may limit the area's ability to make a full recovery. Monroe's economy is also in recovery primarily due to less reliance on auto parts manufacturing and more reliance on non-auto machinery manufacturing, shipping, and wholesale industries. However, Monroe's economic recovery may be limited by its weakening demographics and inadequately educated workforce. Flint's economy is at risk primarily due to the water crisis, which prompted a surge of out-migration. Declining population trends are weakening healthcare demand and consumer spending. While Flint has experienced job gains in professional/business services and construction, it suffers from low labor force participation and an inadequately educated workforce.

[195] U.S. Census Bureau Building Permits Survey: http://www.census.gov/construction/bps/

Conversely, Ann Arbor's economy is performing better than other parts of Michigan. Ann Arbor's economic expansion is primarily due to a highly educated workforce, low living and business costs, and the strong presence of the University of Michigan and Eastern Michigan University. Ann Arbor is also becoming a technology center for alternative energy and automotive battery industries.

The Detroit metropolitan area is home to six Fortune 500 headquarters:[196]

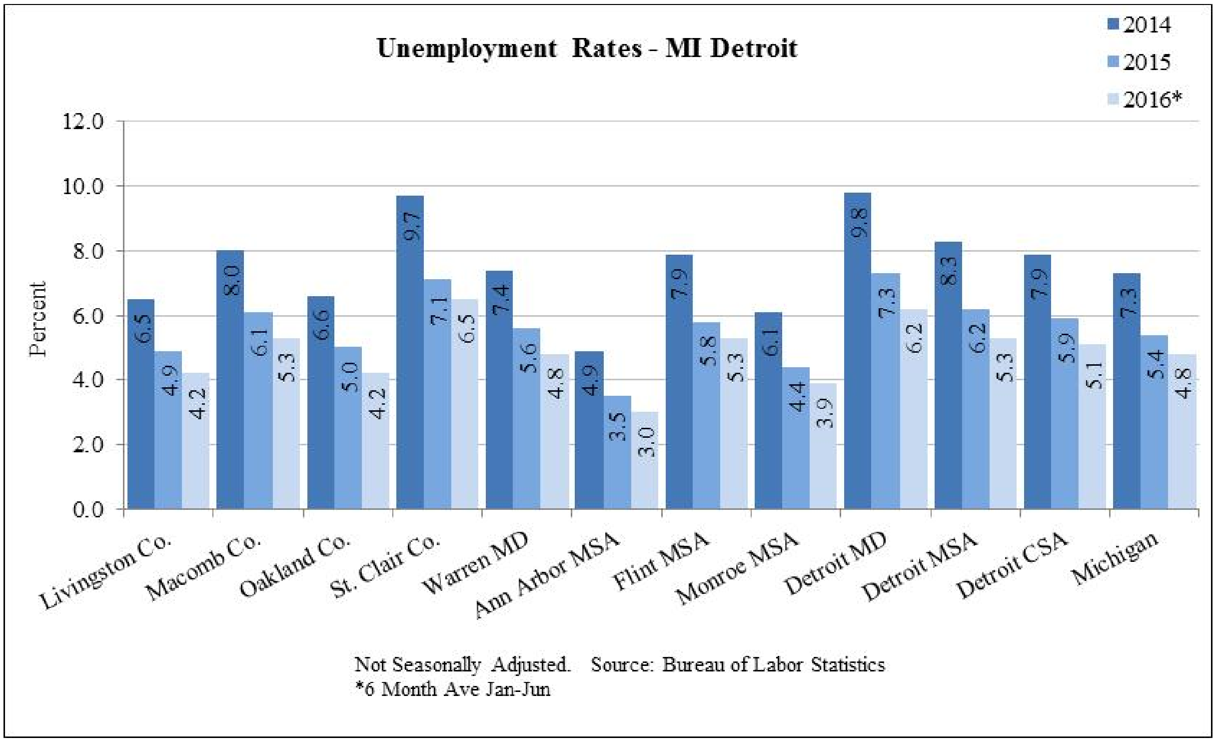
Detroit Metro Fortune 500 Companies (2016)		
Rank	**Company**	**Location**
8	General Motors	Detroit, MI
9	Ford Motor	Dearborn, MI
274	DTE Energy	Detroit, MI
298	Ally Financial	Detroit, MI
467	Kelly Services	Troy, MI
470	Visteon	Monroe, MI

According to Moody's Analytics, the top 15 employers in the CSA in 2015/2016 were:

Company	Number of Employees
Ford Motor Co.	43,977
Chrysler Group LLC	32,106
General Motors Corp.	30,570
University of Michigan Medical Center	18,191
Henry Ford Health System	17,492
CHE Trinity Health	14,341
Detroit Medical Center	13,458
Beaumont Health System	13,228
Rock Ventures	11,563
St. John Providence Health System	11,337
University of Michigan	10,877
Quicken Loans	9,424
Trinity Health Corp.	5,834
Genesys Regional Medical Center	3,000
Hurley Medical Center	2,500

The following table illustrates the average unemployment rates for 2014, 2015, and June 2016 for the counties in the CSA and Michigan.

[196] www.crainsdetroit.com/article/20160606/NEWS/160609759/southeast-michigan-representation-on-furtune-500-shrinks



Unemployment rates have declined each year. The Ann Arbor MSA and Monroe MSA had the lowest unemployment rates all three years and these rates were lower than the state rate. The Detroit MSA and Flint MSA had the highest unemployment rates all three years and these rates were higher than the state rate.

According to an article in *CNN Money*, another sign of slowing auto sales, the Detroit-Hamtramck plant will eliminate its second shift and approximately 1,300 of its 3,000 jobs. The layoffs will take place in March 2017. The Detroit facility is the third GM plant to eliminate the second shift. Plants in Lansing, Michigan and Lordstown, Ohio announced layoffs in November (2016), the first permanent cuts by GM at its U.S. plants since 2010. In total, GM will eliminate about 3,300 jobs at all three plants.[197] According to an article in *The Detroit News*, about 1,420 production workers face indefinite layoffs at the Sterling Heights Assembly (Fiat Chrysler Automobiles) plant that build the Chrysler 200 mid-size sedan, largely due to changing consumer preference from cars to SUVs and trucks.[198]

[197] Isidore, Chris. "GM cutting 1,300 jobs at only plant inside Detroit." *CNN Money*. December 20, 2016. - http://money.cnn.com/2016/12/20/news/companies/gm-plant-layoff/index.html

2016 FFIEC Census Data and 2015 D&B Information

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE DETROIT-WARREN-ANN ARBOR MI CSA

Lending Test

Fifth Third's performance under the lending test in this assessment area is rated excellent. Fifth Third has demonstrated an excellent responsiveness to the credit needs of the community. In addition, Fifth Third originated 92 community development loans totaling $574.1 million. Fifth Third has an excellent geographic distribution of loans and a moderate level of lending gaps. Fifth Third has an excellent distribution among borrowers of different income levels and an adequate distribution of loans to businesses of different revenue sizes. Fifth Third exhibits an excellent record of serving the credit needs of highly economically disadvantaged areas in its assessment area, low-income individuals, and businesses with gross annual revenues of $1 million or less. The excellent level of community development loans and use of flexible lending practices augments Fifth Third's performance in this assessment area.

Greatest consideration was given to the evaluation of home purchase lending, based on the overall volume of lending, followed by refinance, small business, and home improvement lending. Details of Fifth Third's residential mortgage and small business lending, as well as information regarding lending by peers, can be found in Appendix E.

Lending Activity

Fifth Third's lending activity reflects an excellent responsiveness to the credit needs within the assessment area. Fifth Third originated 4,798 home purchase, 4,180 refinance, 456 home improvement, 3,659 small business, and 92 community development loans during the evaluation period. The percentage of Fifth Third's total lending at 9.1% is greater than the percentage of total deposits at 6.5% in this area.

Fifth Third made 98.6% of the HMDA and 99.9% of the CRA lending within its designated assessment area. While a substantial majority of loans was made within the assessment area, a concentration of lending was noted in the excluded Lapeer County (137 HMDA loans).

In addition to lending, Fifth Third modified existing loans to borrowers. Below shows the distribution of HAMP and other real-estate secured modifications within the assessment area by census tract income and by borrower income.

	Distribution by Census Tract Income							
	Low		Mod		Middle		Upper	
	#	%	#	%	#	%	#	%
Other Real Estate Secured Modifications	9	3.3%	56	20.8%	118	43.9%	86	32.0%
Percentage of Owner Occupied Units		***4.5%***		***18.9%***		***42.0%***		***34.6%***

*Unknown tract data is not included in the above table.

	Distribution by Borrower Income							
	Low		Mod		Middle		Upper	
	#	%	#	%	#	%	#	%
Other Real Estate Secured Modifications	64	23.8%	83	30.9%	75	27.9%	46	17.1%
Percentage of Families by Family Income		***21.9%***		***17.2%***		***20.1%***		***40.9%***

*Unknown tract data is not included in the above table.

There were not enough HAMP modifications for a meaningful analysis. The percentage of other modifications made in low-income tracts was comparable to the percentage of owner-occupied units in these geographies and exceed proxy in moderate-income tracts; therefore, modifications helped to expand lending activities in these areas. The percentage of other modifications made to low- and moderate-income income borrowers exceeded the percentage of low- and moderate-income-income families in the assessment area; therefore, modifications enhanced Fifth Third's ability to reach low- and moderate-income borrowers.

Geographic Distribution of Loans

Fifth Third's overall distribution of lending among geographies is excellent. Home purchase lending, which was the largest loan category, is excellent. Refinance and small business lending are also excellent and home improvement lending is good. Moderate lending gaps were noted for the assessment area, as shown in the following table.

Tract Income Levels	Number of Tracts	Tracts with No Loans	Penetration
Low	174	85	51.2%
Moderate	362	96	73.5%
Middle	565	38	93.3%
Upper	422	5	98.8%
Unknown	24	19	20.8%
Total	**1,547**	**243**	**84.3%**

Lending gaps are considered reasonable. While there are a significant number of gaps in low-income tracts, the owner-occupancy rate is relatively low at 30.4% and the rental/vacancy rate is high at 69.5%. Additionally, only 6.1% of businesses are located in low-income tracts. These factors were considered in evaluating lending gaps, as they likely negatively impacted the demand for mortgage and business loans.

Home Purchase Loans

Fifth Third made 154 home purchase loans totaling $15.0 million in low-income tracts. This represents 3.2% of home purchase loans by volume, which is slightly below the percentage of owner-occupied units in these tracts at 4.5% and 1.9% by dollar amount, which is below proxy. The percentage of loans by volume was comparable to the 2014 aggregate at 1.2% and exceeded the 2015 aggregate at 1.2%.

As Fifth Third's performance exceeded the aggregate of all lenders and was slightly below proxy, the geographic distribution in low-income tracts is excellent. There is also limited opportunity to extend home purchase loans in low-income tracts due to the low owner-occupancy and high rental/vacancy rates.

Fifth Third made 930 home purchase loans totaling $100.5 million in moderate-income tracts. This represents 19.4% of its home purchase loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 18.9%, and 12.8% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate at 10.8% and significantly exceeded the 2015 aggregate at 12.1%. As Fifth Third's performance exceeded the aggregate of all lenders and proxy, the geographic distribution in moderate-income tracts is excellent.

Fifth Third made 2,043 home purchase loans totaling $279.7 million in middle-income tracts. This represents 42.6% of home purchase loans by volume, which slightly exceeds the percentage of owner-occupied units in these tracts at 42.0%, and 35.5% by dollar amount, which is below proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 44.5% and the 2015 aggregate of 44.4%.

Fifth Third made 1,671 home purchase loans totaling $391.7 million in upper-income tracts. This represents 34.8% of home purchase loans by volume, which slightly exceeds the percentage of owner-occupied units in these tracts at 34.6%, and 49.8% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 43.3% and was below the 2015 aggregate of 42.2%.

Due to the low owner-occupancy and high rental/vacancy rates in low- and moderate-income tracts and Fifth Third's excellent level of lending penetration in these tracts, the geographic distribution of home purchase loans is excellent.

Refinance Loans

Fifth Third made 73 refinance loans totaling $6.9 million in low-income tracts. This represents 1.7% of refinance loans by volume and 1.0% by dollar amount, which is significantly below the percentage of owner-occupied units at 4.5%. The percentage of loans by volume exceeded the 2014 aggregate at 1.2% and the 2015 aggregate at 0.9%. Although Fifth Third's performance was substantially below proxy, its performance exceeded the aggregate of all lenders. Further, the owner-occupancy rate in low-income tracts is only 30.4%, which would indicate less of a demand for refinance loans. Therefore, the geographic distribution in low-income tracts is good.

Fifth Third made 750 refinance loans totaling $79.6 million in moderate-income tracts. This represents 17.9% of refinance loans by volume, which is comparable to the owner-occupied units in these tracts at 18.9%. The percentage of loans by dollar amount at 11.7% is below proxy. The percentage of loans by volume was comparable to the 2014 aggregate at 10.1% and significantly exceeded the 2015 aggregate at 8.6%.

Given that Fifth Third's performance was comparable to proxy and exceeded the aggregate of all lenders and the relatively low owner-occupancy rate in moderate-income tracts at 50.8%, the geographic distribution in moderate-income tracts is excellent.

Fifth Third made 1,701 refinance loans totaling $223.5 million in middle-income tracts. This represents 40.7% of refinance loans by volume, which is comparable to the owner-occupied units in these tracts at 42.0%. However, refinance loans by dollar amount (32.9%) is below proxy. The percentage of loans by volume was comparable to the 2014 aggregate at 42.5% and was below the 2015 aggregate at 42.0%.

Fifth Third made 1,656 refinance loans totaling $368.7 million in upper-income tracts. This represents 39.6% of refinance loans by volume, which exceeds the owner-occupied units in these tracts at 34.6%, but the dollar amount at 54.3% is below proxy. The percentage of loans by volume was comparable to the 2014 aggregate at 46.1% and in 2015 was below the 2015 aggregate at 48.5%.

Overall, the geographic distribution of refinance loans is excellent. Fifth Third's performance in the moderate-income tracts was especially strong, considering the economic challenges that still persist in the Detroit area.

Home Improvement Loans

Fifth Third made eight home improvement loans totaling $482,000 in low-income tracts. This represents 1.8% of home improvement loans by volume, which is below the percentage of owner-occupied units in these tracts at 4.5%, and 1.3% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate of 2.4% and was comparable the 2015 aggregate of 2.5%. Given the need for these types of loans (as expressed by several community contacts), the median age of housing stock at 58 years, and Fifth Third's significant presence in this market, the geographic distribution of home improvements loans in low-income tracts is adequate.

Fifth Third made 103 home improvement loans totaling $6.8 million in moderate-income tracts. This represents 22.6% of home improvement loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 18.9%, and 17.8% by dollar amount, which is slightly below proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 14.3% and significantly exceeded the 2015 aggregate of 12.6%. Given that Fifth Third exceeded proxy significantly exceeded the aggregate of all lenders, the need for these types of loans expressed by several community contacts, and the median age of housing stock at 55 years, the geographic distribution of home improvement loans in moderate-income tracts is excellent.

Fifth Third made 206 home improvement loans totaling $15.3 million in middle-income tracts. This represents 45.2% of home improvement loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 42.0%, and 39.8% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 42.8% and was below the 2015 aggregate of 42.8%.

Fifth Third made 139 home improvement loans totaling $15.8 million in upper-income tracts. This represents 30.5% of home improvements loans by volume, which is below the percentage of owner-occupied units in these tracts at 34.6%, and 41.1% by dollar amount, which exceeds proxy. The percentage of loans by volume was below the 2014 aggregate of 40.4% and the 2015 aggregate of 42.1%.

Overall, Fifth Third's overall geographic distribution of home improvement loans is good, considering comments from three community contacts, who indicated there are ample opportunities for banks to make home improvement and rehabilitation loans in lower-income areas, as well as a need for revitalizing blighted neighborhoods,

Small Business Loans

Fifth Third made 226 small business loans totaling $57.3 million in low-income tracts. This represents 6.2% of small business loans by volume, which exceeds the percentage of small businesses in these tracts at 5.8%, and 9.2% by dollar amount, which also exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 5.1% and the 2015 aggregate of 5.2%. Given that Fifth Third's performance exceeded proxy and the aggregate of all lenders, the geographic distribution of small business loans in low-income tracts is excellent.

Fifth Third made 657 small business loans totaling $144.2 million in moderate-income tracts. This represents 18.0% of small business loans by volume, which exceeds the percentage of businesses in these tracts at 17.3%, and 23.2% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 16.2% and exceeded the 2015 aggregate of 16.8%. Given that Fifth Third's performance exceeded proxy and aggregate of all lenders, the geographic distribution of small business loans in moderate-income tracts is excellent.

Fifth Third made 1,420 small business loans totaling $201.3 million in middle-income tracts. This represents 38.8% of small business loans by volume, which is comparable to the percentage of businesses in these tracts at 39.2%, and 32.4% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 37.3% and was below the 2015 aggregate of 37.0%.

Fifth Third made 1,335 small business loans totaling $212.0 million in upper-income tracts. This represents 36.5% of small business loans by volume, which is comparable to the percentage of businesses in these tracts at 37.4%, and 34.1% by dollar amount, which is slightly below proxy. The percentage of loans by volume was below the 2014 aggregate of 39.9% and was comparable to the 2015 aggregate of 39.7%.

Overall, the geographic distribution of small business loans is excellent.

Distribution by Borrower Income and Revenue Size of the Business

Overall, the distribution of loans is excellent based on borrower income and adequate for businesses of different revenue sizes. Borrower distribution is excellent for home purchase, refinance, and home improvement loans.

Home Purchase Loans

Fifth Third made 1,058 loans totaling $97.8 million to low-income borrowers. This represents 22.1% of home purchase loans by volume, which is comparable to the percentage of low-income families at 21.9%, and 12.4% of loans by dollar amount, which is significantly below proxy. The percentage of loans by volume significantly exceeded the 2014 aggregate of 8.8% and significantly exceeded the 2015 aggregate of 9.6%. Given that Fifth Third's performance was comparable to proxy and significantly exceeded the aggregate of all lenders, the borrower distribution of home purchase loans to low-income borrowers is excellent.

Fifth Third made 1,197 loans totaling $143.3 million to moderate-income borrowers. This represents 24.9% of home purchase loans by volume, which exceeds the percentage of moderate-income families at 17.2%, and 18.2% of loans by dollar amount, which also exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 20.5% and exceeded the 2015 aggregate of 20.7%. Given that Fifth Third's performance exceeded proxy and the aggregate of all lenders, the borrower distribution of home purchase loans to moderate-income borrowers is excellent.

Fifth Third made 918 loans totaling $136.7 million to middle-income borrowers. This represents 19.1% of home purchase loans by volume, which is comparable to the percentage of middle-income families at 20.1%, and 17.4% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 21.9% and was below the 2015 aggregate of 22.5%.

Fifth Third made 1,364 loans totaling $356.4 million to upper-income borrowers. This represents 28.4% of home purchase loans by volume, which is significantly below the percentage of upper-income families at 40.9% and 45.3% of loans by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 34.4% and in 2015 was below the 2015 aggregate of 32.6%.

Fifth Third's excellent distribution to low- and moderate-income borrowers is noteworthy and the borrower distribution for home purchase loans is excellent, considering that a community contact indicated there are significant economic factors currently impacting the ability of lower-income individuals to buy homes.

Refinance Loans

Fifth Third made 698 loans totaling $62.9 million to low-income borrowers. This represents 16.7% of refinance loans by volume, which is below the percentage of low-income families at 21.9%. The percentage of loans by dollar amount at 9.3% is significantly below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 7.6% and significantly exceeded the 2015 aggregate of 6.1%. Given that Fifth Third's performance was below proxy and significantly exceeded the aggregate of all lenders, the borrower distribution of refinance loans to low-income borrowers is excellent.

Fifth Third made 757 loans totaling $78.3 million to moderate-income borrowers. This represents 18.1% of refinance loans by volume, which exceeds the percentage of moderate-income families at 17.2%, and 11.5% by dollar volume, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 15.0% and exceeded the 2015 aggregate of 14.0%. As Fifth Third's performance exceeded proxy and the aggregate of all lenders, the borrower distribution of refinance loans to moderate-income borrowers is excellent.

Fifth Third made 838 loans totaling $108.3 million to middle-income borrowers. This represents 20.0% of refinance loans by volume, which is comparable to the percentage of middle-income families at 20.1%, and 16.0% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 20.3% and was below the 2015 aggregate of 20.3%.

Fifth Third made 1,506 loans totaling $352.5 million to upper-income borrowers. This represents 36.0% of refinance loans by volume, which is below the percentage of upper-income families at 40.9%, and 51.9% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 41.9% and was below the 2015 aggregate of 40.5%.

Fifth Third's excellent distribution to low- and moderate-income borrowers is noteworthy and the borrower distribution for refinance loans is excellent, considering that a community contact indicated there are significant economic factors currently impacting the ability of lower-income individuals to buy homes.

Home Improvement Loans

Fifth Third made 92 loans totaling $6.0 million to low-income borrowers. This represents 20.2% of home improvement loans by volume, which is comparable to the percentage of low-income families at 21.9%, and 15.5% by dollar amount, which is below proxy. The percentage of loans by volume significantly exceeded the 2014 aggregate of 10.2% and the 2015 aggregate of 10.5%. Given that Fifth Third's performance significantly exceeded the aggregate of all lenders and was comparable to proxy, the borrower distribution of home improvement loans to low-income borrowers is excellent.

Fifth Third made 120 loans totaling $7.7 million to moderate-income borrowers. This represents 26.3% of its home improvement loans by volume, which substantially exceeds the percentage of moderate-income families at 17.2%, and 20.1% by dollar amount, which also exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 19.4% and exceeded the 2015 aggregate of 20.0%. Given that Fifth Third's performance exceeded the aggregate of all lenders and substantially exceeded proxy, the borrower distribution of home improvement loans to moderate-income borrowers is excellent.

Fifth Third made 106 loans totaling $8.4 million to middle-income borrowers. This represents 23.2% of home improvement loans by volume, which is exceeds the percentage of middle-income families at 20.1%, and 21.9% by dollar amount, which slightly exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 23.7% and was below the 2015 aggregate of 25.4%.

Fifth Third made 134 loans totaling $15.8 million to upper-income borrowers. This represents 29.4% of home improvement loans by volume, which is below the percentage of upper-income families at 40.9%, and 41.1% by dollar amount, which slightly exceeds proxy. The percentage of loans by volume was below the 2014 aggregate of 41.0% and was below the 2015 aggregate of 40.8%.

Overall, the borrower distribution of home improvement loans is excellent, based on the excellent distribution of loans among low- and moderate-income borrowers and the need for these types of loans expressed by several community contacts.

Small Business Loans

The distribution of small business loans to businesses of different sizes is adequate, considering Fifth Third's performance relative to the aggregate of all lenders. Fifth Third was able to make 48.3% of small business loans to businesses with revenues of $1 million or less. Fifth Third's performance exceeded the 2014 aggregate of 40.7% and the 2015 aggregate of 46.3%, but was significantly below the percentage of small businesses in the assessment area at 91.5%. Also, during the evaluation period, Fifth Third made an acceptable percentage of small-dollar loans (63.0%) in amounts of $100,000 or less, indicating a willingness to lend in smaller amounts typically requested by small businesses. In addition, several community contacts indicated a need for small-dollar loans to small businesses and that banks could improve upon originating these types of loans.

Community Development Loans

Fifth Third originated 92 community development loans totaling $574.1 million during the evaluation period as shown in the table below:

Affordable Housing		**Economic Development**		**Revitalization and Stabilization**		**Community Services**	
#	***$***	***#***	***$***	***#***	***$***	***#***	***$***
2	2,545,087	25	151,683,487	55	535,251,943	17	59,794,055

Community development lending in the assessment area represents 9.6% of the total dollar volume of community development loans originated by Fifth Third during the evaluation period. This ranks as Fifth Third's third-highest percentage of community development lending during the evaluation period. Fifth Third's performance is especially strong, considering the high competition for community development loans and the number of large national banks in the area. Fifth Third only has 5.1% of the deposit market share. As such, Fifth Third is considered a leader in community development lending.

Examples of community development lending include, but are not limited to:

- Renewal of revolving lines of credit to two local for-profit companies to rehabilitate existing apartment buildings to provide affordable rental housing to low- and moderate-income individuals and families. Over half of the occupants pay less than fair market rent as determined by HUD
- One SBA 504 loan that promotes economic development by financing a small business
- A renewal of a revolving line of credit to a Community Development Financial Institution (CDFI) that provides loans to LIHTC projects and commercial real estate developments in target communities or to small businesses that are unable to access traditional financing
- Multiple working capital loans that promote economic development by financing businesses to support job retention, add new jobs, and promote growth to continue operations in low- and moderate-income geographies. These loans helped to retain at least 50 jobs.
- Multiple working capital loans to help retain and expand businesses located in areas specifically designated by cities with master plans to promote revitalization and economic development
- Working capital loans that support two schools that serves low- and moderate-income students
- Working capital loans that support two nonprofits that provides services to developmentally disabled LMI individuals
- Loan to support an nonprofit that conducts a 30-week empowerment and mentoring program that teaches low- and moderate-income young adults life skills, financial literacy, college preparation, and community activism.
- Working capital loans to a nonprofit that provides job training to low- and moderate-income individuals
- Loan refinance a building to nonprofit located in an Empowerment Zone that provides a multitude of services to low- and moderate-income individuals in an extremely impoverished neighborhood in Detroit

These loans were deemed to be responsive, as community contacts specifically mentioned the need for these types of loans to help deal with affordable housing, financial literacy, high poverty rates, and high unemployment rates.

Flexible Lending Programs

Fifth Third had 1,469 flexible lending loans in this assessment area: 798 government loans, 107 down payment assistance loans, and 564 were other flexible lending programs. The following tables show the percentage by volume and by dollar amount of the three types of flexible lending programs made in this assessment area during the evaluation period and the distribution of Fifth Third's flexible lending programs within the assessment area by census tract income and by borrower income.

Flexible Loan Programs												
	Geographic Distribution											
	Low			Moderate			Middle			Upper		
	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units
Government Loan Programs	1.1%	0.8%	4.5%	12.2%	8.5%	18.9%	55.1%	53.8%	42.0%	31.6%	36.8%	34.6%
Down Payment Assistance Programs	16.8%	16.5%	4.5%	24.3%	18.4%	18.9%	40.2%	39.7%	42.0%	18.7%	25.5%	34.6%
Other Flexible Lending Programs	1.6%	0.9%	4.5%	18.3%	14.7%	18.9%	49.5%	49.1%	42.0%	30.7%	35.3%	34.6%
Total	**2.5%**	**1.5%**	**4.5%**	**15.4%**	**11.2%**	**18.9%**	**51.9%**	**51.5%**	**42.0%**	**30.3%**	**35.8%**	**34.6%**

*Unknown tract data is not included in the above table.

Flexible Loan Programs												
	Borrower Distribution											
	Low			Moderate			Middle			Upper		
	% - #	% - $	% Fam	% - #	% - $	% Fam	% - #	% - $	% Fam	% - #	% - $	% Fam
Government Loan Programs	12.9%	7.6%	21.9%	29.3%	25.2%	17.2%	31.5%	33.2%	20.1%	23.9%	31.4%	40.9%
Down Payment Assistance Programs	59.3%	57.0%	21.9%	28.7%	26.3%	17.2%	6.5%	8.7%	20.1%	3.7%	6.5%	40.9%

*Unknown tract data is not included in the above table.

Fifth Third's lending in low-income tracts, by number and dollar amount, was below the percentage of owner-occupied units in these tracts. However, down payment assistance programs significantly exceeded proxy. The percentage of lending, by volume and dollar amount, in moderate-income tracts was below the percentage of owner-occupied units.

Fifth Third's lending, by volume and dollar amount, to low-income borrowers was below the percentage of low-income families in the assessment area. However, down payment assistance programs significantly exceeded proxy. The percentage of lending, by volume and dollar amount, to moderate-income borrowers substantially exceeded the percentage of moderate-income families.

Despite the high foreclosure rates in this assessment area, Fifth Third was able to assist low- and moderate-income borrowers or borrowers in purchasing properties in a low- or moderate-income area to purchase homes through the use of several down payment assistance programs. Therefore, Fifth Third made use of flexible lending practices and is serving the assessment area's credit needs.

Lending through flexible loan programs to moderate-income borrowers was excellent and lending to low-income borrowers and in moderate-income tracts was good. Lending in low-income tracts was adequate. Flexible lending and other down-payment assistance programs to help low- and moderate-income individuals become first-time homebuyers was a need specifically identified by a community contact in the assessment area.

Investment Test

Fifth Third's performance relative to the investment test in the assessment area is rated excellent.

Fifth Third made an excellent level of qualified community development investments and grants, particularly those not routinely provided by private investors. As such, Fifth Third was often in a leadership position. Fifth Third has 662 qualified investments totaling $125.2 million during the evaluation period. Shown in the table below are the total current period investments:

Affordable Housing		Economic Development		Revitalization and Stabilization		Community Services	
#	$	#	$	#	$	#	$
335	80,496,531	63	319,918	11	1,546,198	192	1,138,739

Also included in the total number of qualified investments are 61 prior period investments totaling $41.7 million. Fifth Third made 7.7% of its total community development investments in this assessment area, which is greater than the percentage of total deposits at 6.5% and greater than the percentage of branch offices at 6.9%.

Fifth Third exhibits an excellent responsiveness to credit and community development needs in the assessment area, including investments in several affordable housing projects and services supporting low- and moderate-income individuals throughout the assessment area, which was an important need expressed by several community contacts. Fifth Third made 283 donations totaling $1.79 million that supported local schools, small businesses, churches, food banks, health care, and affordable housing. The majority of Fifth Third's donations (63.5%) supported services to low- and moderate-income individuals. Also, $150,000 of the donations supported Northwest Community Programs, a nonprofit that provides programs and activities that enhance the quality of life for low-income youth, families, and seniors in the Detroit community.

Service Test

Fifth Third's performance under the service test in this assessment area is rated excellent. Retail services are accessible and Fifth Third is a leader in providing community development services in this assessment area.

Retail Services

Fifth Third's record of opening and closing offices has not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and to low- and moderate-income households. Since the previous evaluation period, two banking centers were opened and four were closed, resulting in no net change in the number of banking centers in low- and moderate-income tracts. Delivery services are accessible to Fifth Third's geographies and individuals of different income levels.

Business hours and services provided do not vary in a way that inconveniences certain portions of the assessment area, including low- and moderate-income geographies or households, and are consistent with the services and hours discussed in the "Institution" assessment.

Fifth Third maintains 90 banking centers within this assessment area, including nine in low-, 11 in moderate-, 38 in middle-, and 32 in upper-income census tracts. Fifth Third banking centers in this assessment area represent 6.9% of all its banking centers.

Fifth Third has a total of 111 full-service ATMs within this assessment area, including six in low-, 22 in moderate-, 44 in middle-, and 37 in upper-income census tracts. There are also two full-service ATMs located in unknown-income tracts.

The following table illustrates the percentage of banking centers and ATMs in low-, moderate-, middle-, and upper-income census tracts in comparison to the number and percentage of census tracts and the percentage of households and businesses in those tracts.

Geographic Distribution of Branches & ATMS

Assessment Area: MI Detroit

Tract Category	Branches				Stand Alone ATMs							Demographics			
	Total Branches				Total ATMs			Full Service ATMs		Cash only ATMs		Census Tracts		House holds	Total Businesses
	#	%	Open #	Closed #		#	%	#	%	#	%	#	%	%	%
Low	9	10.0%	0	0	Total	6	5.1%	6	5.4%	0	0.0%	174	11.2%	8.1%	6.1%
Moderate	11	12.2%	0	0	Total	23	19.5%	22	19.8%	1	14.3%	362	23.4%	22.6%	17.4%
Middle	38	42.2%	0	0	Total	49	41.5%	44	39.6%	5	71.4%	565	36.5%	39.9%	38.9%
Upper	32	35.6%	2	4	Total	38	32.2%	37	33.3%	1	14.3%	422	27.3%	29.3%	37.1%
Unknown	0	0.0%	0	0	Total	2	1.7%	2	1.8%	0	0.0%	24	1.6%	0.0%	0.4%
Total	90	100.0%	2	4	Total	118	100.0%	111	100.0%	7	100.0%	1547	100.0%	100.0%	100.0%

2016 FFIEC Census Data, 2010 ACS Data, and 2015 D&B Information
Closed branches/ATMs are only included in "closed" columns and are not included in any other totals.
DTO - Drive thru only is a subset of total branches
SA = Stand Alone ATM is a subset of total ATMs

Branch distribution within low-income tracts was considered excellent, as the distribution of branches was comparable to the percentage of census tracts and exceeded households in these tracts. However, branch distribution within moderate-income tracts was considered adequate.

Community Development Services

Fifth Third is a leader in providing community development services in this assessment area. During the evaluation period, Fifth Third employees provided 11,412 hours of community development service to local organizations serving low- and moderate-income individuals, which represents 9.6% of all community development services provided and equates to 5.49 annualized persons (ANP).

Affordable Housing	**Economic Development**	**Revitalization and Stabilization**	**Community Services**
# of Hours	***# of Hours***	***# of Hours***	***# of Hours***
2,983	1,314	591	6,524

Employees provided financial expertise through leadership positions in multiple community organizations that provide affordable housing and promote community and economic development and area revitalization and stabilization. Community development services include 5,526 hours providing technical assistance to non-profits and local business, 2,833 hours serving on boards and committees, 2,817 hours of providing financial literacy through local nonprofits and school programs, and 236 hours participating in foreclosure prevention outreach.

Fifth Third is considered particularly responsive with regard to hours dedicated to financial literacy and foreclosure outreach prevention activities, as several community contacts mentioned the need for financial literacy training to provide debt counseling and assist first-time homebuyers and entrepreneurs. In addition, the foreclosure rate remains significantly higher in several counties in this assessment area compared to the foreclosure rates in Michigan and the nation.

METROPOLITAN AREA
(Full-scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE GRAND RAPIDS-WYOMING-MUSKEGON MI CSA #266

The Grand Rapids-Wyoming-Muskegon MI CSA consists of the following two MSAs: the Grand Rapids-Wyoming MI MSA #24340, consisting of Barry, Kent, Montcalm, and Ottawa counties, and the Muskegon MI MSA #34740, consisting of Muskegon County.

The assessment area is comprised of 15 low-, 56 moderate-, 123 middle-, and 53 upper-income tracts. There are also two tracts with no income designation that are primarily composed of correctional institutions, military establishments, education facilities, or medical establishments that do not report income information.

As of June 30, 2016, Fifth Third had the majority of the market share 21.5% of the deposits out of 32 institutions. The next three largest institutions, Huntington National Bank, JPMorgan Chase Bank, and Wells Fargo Bank had 11.9%, 9.7%, and 9.45% of the market share, respectively. Deposits in this assessment area accounted for 4.5% of the Fifth Third's total deposits. This was 30.6% of deposits within the state and the seventh-highest percentage of deposits within Fifth Third's CRA footprint.

From January 1, 2014 through June 30, 2016, Fifth Third originated 7,449 HMDA loans and 2,708 CRA loans, which represented 7.1% and 6.9% of the total loans originated during the evaluation period, respectively. This was the seventh-largest HMDA market and ninth-largest CRA market for loans originated during the evaluation period.

In 2015, Fifth Third Mortgage Company and Fifth Third Mortgage Company-Michigan ranked second and third, respectively among 420 HMDA reporters in the assessment area, while Fifth Third ranked 19th. Lake Michigan Credit Union ranked first among HMDA lenders in the assessment area. Fifth Third ranked seventh of 82 CRA reporters in the assessment area in 2015. The top four CRA lenders in the assessment area were American Express, Capital One, Chase Bank USA, and U.S. Bank. These lenders are mostly issuers of credit cards and their CRA loans primarily consist of commercial credit card accounts.

Four community contact interviews were conducted to provide additional information regarding the assessment area. The first contact, representing an organization that helps businesses recruit talent, stated the economic conditions in the area are very good and the area's diverse economy helped it through the recession better than other municipalities in the state. The contact indicated that unemployment is low the Grand Rapids area, particularly in Ottawa and Kent counties. However, there are areas with high unemployment, low median family incomes, and low educational attainment. The contact stated local area banks are actively involved in the community and regularly provide financial literacy training.

The second contact, representing an affordable housing agency, stated current economic conditions in the area are improving and area unemployment has steadily declined since the recession (2008). The contact noted that rental rates are rising, making it increasingly difficult for low-income individuals to find affordable housing. In addition, local financial institutions are actively involved in meeting the credit needs of the community; however, the contact believed there is an ongoing need for banks to extend low-cost (fee-free) credit to lower-income individuals to encourage them to work with banks to obtain necessary funding.

The third contact, representing an economic development organization, indicated there is an opportunity for banks and local government to fund infrastructure and transportation projects to boost the city's appeal. The contact believed the lack of cost-effective transportation is one of the primary factors limiting lower-income individuals from finding meaningful employment. The contact stated the competition among banks in the area translates into active support for the entrepreneurial community and a willingness to offer more innovative products.

The final contact, representing an agency that serves the needs of low- and moderate-income individuals and families, stated the agency has good partnerships with area financial institutions. The contact believed there is always a need to help the unbanked and underbanked (mostly lower-income households) gain access to mainstream financial systems. The contact specifically mentioned First General Credit Union and Fifth Third as being active agency partners.

Population Characteristics

According to 2010 U.S. Census data, the population in the assessment area was 1.2 million. One quarter (25.0%) of the population lived in low- and moderate-income tracts. In addition, 74.2% of the population was 18 years of age or older, the legal age to enter into a contract.

As of July 1, 2015, the Grand Rapids MSA is the 52nd largest in terms of population in the nation, while the Muskegon MSA is the 239th largest.[199] Among the most populous counties in Michigan, Barry County is 15th, Kent County is 81st, Montcalm County is 117th, Muskegon County is 121st, and Ottawa County is 139th.

According to 2015 U.S. Census data,[200] Grand Rapids is the second largest city in Michigan with 195,097 residents and is the 122nd largest city in the nation. Wyoming is the 14th largest city in the state with 75,275 residents and Muskegon is the 30th largest with 38,401 residents.[201] The following table shows the population in the assessment area by county for 2010 and 2015, with the percentage of the population increase or decrease.[202]

[199] MSA population data is derived from the U.S. Census Data 2015 Statistical Abstract: https://factfinder.census.gov/faces/tableservices/jsf/pages/productview.xhtml?src=bkmk
[200] US Census Bureau: http://www.census.gov/quickfacts/table/PST045216/00 (*main page – must enter state, county, city, town or zip code*)
[201] Michigan – 2015 City Populations: https://www.biggestuscities.com/mi
[202] Population Estimates derived from U.S. Census Data (April 1, 2010 – July 1, 2015): http://www.census.gov/quickfacts/table/PST045216/00

For the most part, the population within the CSA experienced positive growth between 2010 and 2015, with Ottawa and Kent counties experiencing the greatest growth and only Malcolm County experiencing a decline in population.

County	2010 Population	2015 Population	Population Percent Change
Barry	59,173	59,314	0.2%
Kent	602,622	636,369	5.6%
Montcalm	63,342	62,945	-0.6%
Muskegon	172,188	172,790	0.3%
Ottawa	263,801	279,955	6.1%
Total	**1,161,126**	**1,211,373**	**4.3%**

According to U.S. Census data, Grand Rapids and its surrounding area is the fastest-growing population center in Michigan. From July 2014 to July 2015, the rate of increase in the Grand Rapids metropolitan area was 15 times higher than the state as a whole (an increase of 9,621 people or 0.9%). The Muskegon metropolitan area grew 0.3% during this time period.[203]

According to Moody's Analytics, between 2012 and 2015, Grand Rapids' population growth remains positive and strong compared to other places in Michigan. Population growth can be attributed to a steady increase in domestic and foreign in-migration. Between 2012 and 2015, Muskegon's population growth was minimal.

Income Characteristics

The 2010 assessment area median family income was significantly lower ($59,489) than Michigan at $60,341. As shown in the table below, the median family income increased across the assessment area, except for a slight decrease in the Muskegon MSA between 2010 and 2014.

FFIEC Estimated Median Family Income	2010	2014	2015	2016
Grand Rapids-Wyoming MI MSA	$61,182	$64,600	$65,700	$65,800
Muskegon MI MSA	$50,101	$49,400	$51,900	$52,200

[203] Vande Bunte, Matt. "Michigan's fastest-growing metro area is Grand Rapids." *MLive*. March 24, 2016. - http://www.mlive.com/news/grand-rapids/index.ssf/2016/03/michigans_fastest-growing_metr.html

Poverty rates increased in each county in the assessment area from 1999 to 2015.[204] Muskegon County had the highest poverty rate in 1999 and Montcalm County had the highest poverty rate in 2015. Barry and Ottawa counties had the lowest poverty rates in 1999 and Ottawa County had the lowest poverty rate in 2015. In 2015, Muskegon and Montcalm counties had poverty rates higher than Michigan and these counties, in addition to Kent County, had poverty rates that exceeded the national rate. However, Barry County experienced the largest increase in poverty rates during this period. According to the U.S. Census Bureau, the national poverty rate in 2015 was 13.5%, down 1.3 percentage points from 14.8% in 2014. For most demographic groups, the 2015 poverty rates and number of people in poverty decreased from 2014.[205] The following table shows the poverty rates for 1999[206] and 2015.

County	1999 Poverty Rate	2015 Poverty Rate	Change
Barry	5.5%	9.3%	69.1%
Kent	8.9%	14.5%	62.9%
Montcalm	10.9%	17.9%	64.2%
Muskegon	11.4%	16.1%	41.2%
Ottawa	5.5%	8.6%	56.4%
Michigan	**10.5%**	**15.7%**	**49.5%**
U.S.	**11.8%**	**13.5%**	**14.4%**

Housing Characteristics

According to 2010 U.S. Census data, there are 475,649 housing units and 299,503 families in the assessment area. From an income perspective, 26.2% of housing units, 18.4% of owner-occupied units, and 21.8% of families are located in low- or moderate-income tracts. Nearly two-thirds of the housing units in the low-income census tracts are either rental or vacant (65.0%). In the moderate-income census tracts, nearly half (49.9%) of the housing units are either rental or vacant, and 50.1% are owner-occupied. Therefore, based on the number of housing units compared to the number of families in low- and moderate-income census tracts, there appear to be credit-related opportunities for Fifth Third to provide various aspects of affordable housing in the assessment area.

The 2010 U.S. Census data shows the median age of housing stock in the assessment area was 38 years old, with 23.3% of the stock built before 1950. The oldest housing stock was in Muskegon County with a median age of 45 years, while the newest was 29 years in Ottawa County. However, within the assessment area, the median age of housing stock was 61 years in low-income tracts and 54 years in moderate-income tracts, which indicates that there is ample opportunity.

[204] U.S. Department of Agriculture Economic Research Service Poverty Rates (for 1999 and 2015): https://data.ers.usda.gov/reports.aspx?ID=17826
[205] 2015 National Poverty: http://www.census.gov/library/publications/2016/demo/p60-256.html
[206] 1999 National Poverty Rate: http://www.census.gov/prod/2000pubs/p60-210.pdf

According to 2010 U.S. Census data, the median housing value in the assessment area was $144,427, with an affordability ratio of 33.91. The affordability ratio is derived by dividing the median household income by the median housing value. The higher the affordability ratio, the more affordable a home is considered. The median housing value decreased between 2010 and 2011-2015 and household incomes increased and as a result, housing became more affordable across the assessment area. During the evaluation period, the most affordable housing was in Montcalm County, with the least affordable in Ottawa County. Median gross rents increased at a substantial rate across the assessment area, with renters in Barry County experiencing the largest increase in rental rates and renters in Muskegon County experiencing the smallest increase. In 2010, about 48.9% of renters across the assessment area had rent costs greater than 30.0% of income. A contact noted rental rates are rising, thereby making it increasingly difficult for low income individuals to find affordable housing, as increasing rental rates may make it harder for potential homebuyers to save enough money for a down payment for a home. According to Moody's Analytics, houses prices in the Grand Rapids metropolitan area are rising faster than in any other Michigan metropolitan areas and are well above the pre-recession peak. The average price on a pending home sale has increased by 8.1%. In December 2016, Trulia.com concluded that Grand Rapids area was the fourth hottest real estate market in the nation due to its growing economy and affordable housing inventory. Rental rates also were on the rise in Grand Rapids, according to Trulia's report. The median rental rate was $1,200, an increase of 20.0% from one year ago (2016 to 2017), but down from its summer peak of $1,300.[207] The table below presents housing characteristics from the U.S. Census data between 2010 and 2015 in the assessment area and Michigan.

County	2010 Median Housing Value	2010 Affordability Ratio	2011-2015 Median Housing Value	2011-2015 Affordability Ratio	2010 Median Gross Rent	2011-2015 Median Gross Rent	Percent of Change
Barry	$147,300	35.21	$134,700	40.88	$652	$762	16.9%
Kent	$147,600	33.56	$139,300	38.09	$699	$767	9.7%
Montcalm	$112,700	35.29	$94,100	44.19	$618	$692	12.0%
Muskegon	$112,800	36.05	$99,000	43.33	$628	$673	7.2%
Ottawa	$161,200	34.18	$155,400	36.03	$726	$792	9.1%
Michigan	**$144,200**	**33.59**	**$122,400**	**40.50**	**$723**	**$783**	**8.3%**

According to Bankrate.com,[208] Michigan ranked 26th for foreclosure filings in November 2016. The national average for foreclosure filings was one in every 1,533 housing units. The following table contains information about foreclosure filings in the assessment area, according to Realtytrac:[209]

[207] Harger, Jim. "Housing market begins 2017 on a 'hot' note." *MLive*. January 13, 2017. – www.mlive.com/business/west-michigan/index.ssf/2017/01/west_michigan_housing_market_b.html
Isidore, Chris. "GM cutting 1,300 jobs at only plant inside Detroit." *CNN Money*. December 20, 2016. - http://money.cnn.com/2016/12/20/news/companies/gm-plant-layoff/index.html
[208] Bankrate.com: http://www.bankrate.com/finance/real-estate/foreclosures-by-state/default.aspx
[209] Realtytrac: http://www.realtytrac.com/statsandtrends/foreclosuretrends/

Geography Name	Ratio of Properties Receiving Foreclosure Filings in November 2016
Barry	1:2,493
Kent	1:4,747
Montcalm	1:1,998
Muskegon	1:1,791
Ottawa	1:3,331
Michigan	**1:2,036**
U.S.	**1:1,533**

In November 2016, Muskegon County had the highest rate of foreclosure and Kent County had the lowest foreclosure rate within the assessment area.

Building permits in the MSAs, Michigan, and the nation are included in the following table for 2014, 2015, and 2016.[210]

Geography	2014	2015	Percent of Change 2014-2015	2016	Percent of Change 2015-2016
Grand Rapids-Wyoming MSA	3,171	3,672	15.8%	3,655	-0.5%
Muskegon MSA	172	241	40.1%	16	-93.4%
Michigan	**15,836**	**18,226**	**15.1%**	**22,426**	**23.0%**
U.S.	**1,052,124**	**1,182,582**	**12.4%**	**1,190,191**	**0.6%**

The Muskegon MSA experienced the greatest increase of housing permits between 2014 and 2015 and the greatest decrease of housing permits between 2015 and 2016. In the Grand Rapids MSA, the percentage of housing permits mirrored Michigan's percentage between 2014 and 2015, but fell far below the state's percentage of housing permits between 2015 and 2016. Based on the high demand for permits between 2014 and 2015 and performance context indicating a strong housing market in 2017, this could indicate an increased demand for home purchase loans across the assessment area during the evaluation period.

Labor, Employment, and Economic Characteristics

According to Moody's Analytics, the Grand Rapids area economy is expanding due to growing biotech and healthcare, and a diverse manufacturing base. Personal income, industrial production, and home prices are on an upward trajectory. Population growth is exceeding expectations and the booming downtown and high-paying biotech jobs are helping Grand Rapids to retain more college graduates.

[210] U.S. Census Bureau Building Permits Survey: http://www.census.gov/construction/bps/

While job growth eased slightly, it is on pace to comfortably exceed the rest of the state and the nation. The Muskegon area economy is in recovery. The metropolitan area is adding jobs as a faster pace, but high-wage industry jobs represent less than 10.0% of total area employment. This unfavorable mix is preventing average hourly earnings from increasing; as a result, Muskegon area incomes lag the state and national averages. Weak population growth, low educational attainment, and a comparatively small working-age population constrain Muskegon's prospects for sustained economic growth.

The Grand Rapids metropolitan area is home to the headquarters of one Fortune 500 company:[211]

Grand Rapids Metro Fortune 500 Companies (2016)		
Rank	**Company**	**Revenue**
351	SpartanNash	$7.9 billion

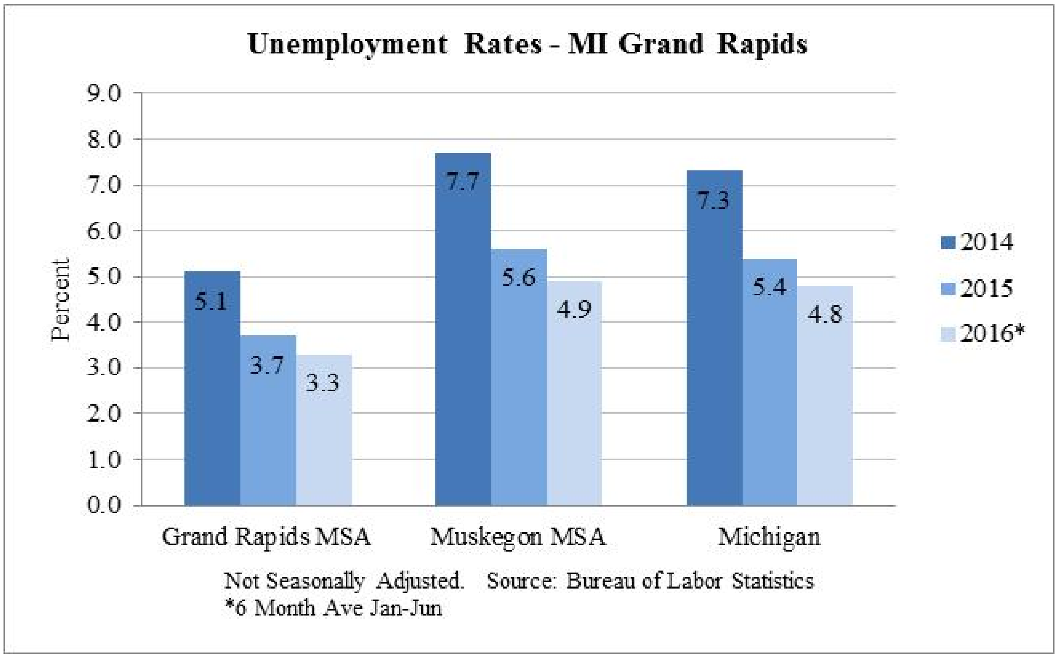
SpartanNash is a food distributor and grocery store retailer headquartered in Byron Center, Michigan. In terms of revenue, it is the largest food distributor serving military commissaries and exchanges in the U.S.

According to Moody's Analytics, the top 12 employers in the CSA in 2015/2016 were:

Company	Number of Employees
Spectrum Health	21,800
Meijer Inc.	20,686
Mercy Health	6,500
Axios Inc.	5,000
Amway Corp.	4,000
Johnson Controls Inc.	3,900
Centex Corp.	3,900
Grand Valley State University	3,306
SpartanNash	2,585
Alcoa Howmet	2,200
ADAC Automotive Inc.	1,000
Hines Corp.	690

The following table illustrates the average unemployment rates for 2014, 2015, and June 2016 for the counties in the CSA and Michigan.

[211] www.crainsdetroit.com/article/20160606/NEWS/160609759/southeast-michigan-representation-on-furtune-500-shrinks



Overall, unemployment rates in the assessment area declined each year. The Grand Rapids MSA had the lowest unemployment rates all three years and were below Michigan's rates of unemployment. The Muskegon MSA had the highest unemployment rates all three years and were above Michigan's.

According to MLive, GE Aviation says the company is laying off 74 employees from its Grand Rapids area operations after sales fell short in 2016. The majority of the employees being laid off were engineers, although the cuts were across several departments. In total, the company is laying off 107 workers, primarily in Grand Rapids and Clearwater, Florida.[212] News 8 also reported that SAF-Holland is shutting down two of its manufacturing plants in West Michigan as part of its restructuring efforts. The truck and trailer parts suppliers blamed the continued market weakness for its decision. SAF-Holland is not moving out of Muskegon, as the company indicated that it plans to use the site for its Americas region headquarters and corporate offices. SAF-Holland also plans to build a cutting-edge engineering and technology center in Muskegon and consolidate the Holland testing center and administrative officers. Production work handled by these plants will be moved to the company's other three sites in Ohio, Arkansas, and Texas. Around 97 employees are expected to lose their jobs at the Holland plant and it is unclear how many workers will be affected by the layoffs at the Muskegon plant.[213]

2016 FFIEC Census Data and 2015 D&B Information

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE GRAND RAPIDS-WYOMING-MUSKEGON MI CSA MI CSA

Lending Test

Fifth Third's performance under the lending test in this assessment area is rated excellent. Fifth Third has demonstrated an excellent responsiveness to the credit needs of the community. In addition, Fifth Third originated 74 community development loans totaling $230.7 million. Fifth Third has an excellent overall geographic distribution of loans and no gaps in lending were noted. Fifth Third has an excellent distribution of loans among borrowers of different income levels and a good distribution of loans to businesses of different revenue sizes. Fifth Third exhibits an excellent record of serving the credit needs of highly economically disadvantaged areas in its assessment area, low-income individuals, and businesses with gross annual revenues of $1 million or less. The excellent level of community development loans and extensive use of flexible lending practices augmented Fifth Third's performance in this assessment area.

Greatest consideration was given to the evaluation of refinance lending based on the overall volume of lending, followed by home purchase, small business, and home improvement lending. Details of Fifth Third's residential mortgage and small business lending, as well as information regarding lending by peers, can be found in Appendix E.

Lending Activity

Fifth Third's lending activity reflects an excellent responsiveness to the credit needs within the assessment area. Fifth Third originated 3,694 refinance, 3,447 home purchase, 305 home improvement, 2,708 small business, and 74 community development loans during the evaluation period. The percentage of Fifth Third's total lending at 7.1% is greater than the percentage of total deposits at 4.5% in this area.

In addition to lending, Fifth Third modified existing loans to borrowers. Refer to the distribution of HAMP and other real-estate secured modifications within the assessment area by census tract income and by borrower income.

	Distribution by Census Tract Income							
	Low		**Mod**		**Middle**		**Upper**	
	#	**%**	**#**	**%**	**#**	**%**	**#**	**%**

Percentage of Owner Occupied Units		***2.0%***		***16.4%***		***54.6%***		***27.0%***

*Unknown tract data is not included in the above table.

	Distribution by Borrower Income							
	Low		Mod		Middle		Upper	
	#	%	#	%	#	%	#	%
Other Real Estate Secured Modifications	67	27.1%	97	39.3%	53	21.5%	28	11.3%
Percentage of Families by Family Income		***19.8%***		***18.3%***		***22.3%***		***39.5%***

*Unknown tract data is not included in the above table.

There were not enough HAMP loans for a meaningful analysis. The percentage of other modifications was below the percentage of owner-occupied units in low-income tracts and exceeded proxy in moderate-income tracts. Therefore, modifications helped to expand lending activities in these areas. The percentage of other modifications made to low- and moderate-income borrowers exceeded the percentage of low- and moderate-income-income families in the assessment area. Therefore, modifications enhanced Fifth Third's ability to reach low- and moderate-income borrowers.

Geographic Distribution of Loans

Fifth Third's overall distribution of lending among geographies is excellent. Refinance lending, which was the largest loan category, is good. Home purchase lending is excellent and home improvement lending is good. Small business lending is excellent. Also, no lending gaps were noted in the assessment area, as shown in the following table.

Tract Income Levels	Number of Tracts	Tracts with No Loans	Penetration
Low	15	0	100.0%
Moderate	56	0	100.0%
Middle	123	0	100.0%
Upper	53	0	100.0%
Unknown	2	2	0.0%
Total	**249**	**2**	**99.2%**

There were no lending gaps in the low,-moderate,-middle,-and upper-income tracts. Although Fifth Third did not make any loans in the two unknown-income tracts, there is no population in these tracts and therefore, there is no demand for loans in these areas.

Refinance Loans

Fifth Third made 59 refinance loans totaling $3.8 million in low-income tracts. This represents 1.6% of refinance loans by volume, which is slightly below the percentage of owner-occupied units at 2.0%, and 0.8% by dollar amount, which is significantly below proxy. The percentage of loans by volume was comparable to the 2014 aggregate at 1.3% and was comparable to the 2015 aggregate at 1.1%. As Fifth Third's performance was slightly below proxy and comparable to the aggregate of all lenders, the geographic distribution of refinance loans in low-income tracts is good.

Fifth Third made 522 refinance loans totaling $45.4 million in moderate-income tracts. This represents 14.1% of refinance loans by volume, which is below the owner-occupied units in these tracts at 16.4%. The percentage of loans by dollar amount at 9.4% is significantly below proxy. The percentage of loans by volume was comparable to the 2014 aggregate at 12.9% and exceeded the 2015 aggregate at 11.3%. As Fifth Third's performance was below proxy and exceeded the aggregate of all lenders, the geographic distribution of refinance loans in moderate-income tracts is good.

Fifth Third made 1,925 refinance loans totaling $299.1 million in middle-income tracts. This represents 52.1% of refinance loans by volume, which is comparable to the owner-occupied units in these tracts at 54.6%. However, refinance loans by dollar amount (47.6%) was below proxy. The percentage of loans by volume exceeded the 2014 aggregate at 53.1% and exceeded the 2015 aggregate at 51.9%.

Fifth Third made 1,888 refinance loans totaling $203.4 million in upper-income tracts. This represents 32.2% of refinance loans by volume, which exceeds the owner-occupied units in these tracts at 27.0%, and the dollar amount at 42.2% also exceeds proxy. The percentage of loans by volume was comparable to the 2014 aggregate at 32.6% and was below the 2015 aggregate at 35.7%.

Overall, the geographic distribution of refinance loans is good.

Home Purchase Loans

Fifth Third made 74 home purchase loans totaling $6.5 million in low-income tracts. This represents 2.1% of home purchase loans by volume, which slightly exceeds the percentage of owner-occupied units in these tracts at 2.0%, and 1.3% by dollar amount, which is comparable proxy. The percentage of loans by volume was comparable to the 2014 aggregate at 1.2% and exceeded the 2015 aggregate at 1.6%. As Fifth Third's performance exceeded the aggregate of all lenders and slightly exceeded proxy, the geographic distribution of home purchase loans in low-income tracts is excellent.

Fifth Third made 573 home purchase loans totaling $52.5 million in moderate-income tracts. This represents 16.6% of its home purchase loans by volume, which slightly exceeds the percentage of owner-occupied units in these tracts at 16.4%, and 10.4% by dollar amount, which is below proxy. The percentage of loans by volume was comparable to the 2014 aggregate at 14.6% and exceeded the 2015 aggregate at 14.8%. As Fifth Third's performance exceeded the aggregate of all lenders and slightly exceeded proxy, the geographic distribution of home purchase loans in moderate-income tracts is excellent.

Fifth Third made 1,801 home purchase loans totaling $243.5 million in middle-income tracts. This represents 52.2% of home purchase loans by volume, which is comparable to the percentage of owner-occupied units in these tracts at 54.6% and 48.4% by dollar amount, which is below proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 53.9% and was comparable to the 2015 aggregate of 54.3%.

Fifth Third made 999 home purchase loans totaling $200.3 million in upper-income tracts. This represents 29.0% of home purchase loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 27.0%, and 39.8% by dollar amount, which exceeds proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 30.3% and was below the 2015 aggregate of 29.4%.

Overall, the geographic distribution of home purchase loans is excellent.

Home Improvement Loans

Fifth Third made three home improvement loans totaling $131,000 in low-income tracts. This represents 1.0% of home improvement loans by volume, which is below the percentage of owner-occupied units in these tracts at 2.0%, and 0.6% by loan amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 1.2% and was below the 2015 aggregate of 0.9%. Given the median age of housing in low-income tracts at 61 years, which is a likely indicator of the need for home improvement loans and Fifth Third's lending performance in these tracts; the geographic distribution of home improvement loans in low-income tracts is good.

Fifth Third made 76 home improvement loans totaling $3.8 million in moderate-income tracts. This represents 24.9% of home improvement loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 16.4%, and 18.7% by dollar amount, which also exceeded proxy. The percentage of loans by volume exceeded the 2014 aggregate of 15.7% and exceeded the 2015 aggregate of 15.9%. Given the age of the housing stock in the moderate-income tracts at 54 years, a likely indicator of the need for home improvement loans and Fifth Third's lending performance in these tracts, the geographic distribution of home improvement loans in moderate-income tracts is excellent.

Fifth Third made 140 home improvement loans totaling $9.4 million in middle-income tracts. This represents 45.9% of home improvement loans by volume, which is below the percentage of owner-occupied units in these tracts at 54.6%, and 45.7% by dollar amount, which is also below proxy. The percentage of loans by volume was below the 2014 aggregate of 53.9% and comparable to the 2015 aggregate of 52.5%.

Fifth Third made 86 home improvement loans totaling $7.2 million in upper-income tracts. This represents 28.2% of home improvements loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 27.0%, and 35.0% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 29.2% and was below the 2015 aggregate of 30.7%.

Overall, the geographic distribution of home improvement loans is good.

Small Business Loans

Fifth Third made 176 small business loans totaling $36.9 million in low-income tracts. This represents 6.5% of small business loans by volume, which exceeds the percentage of businesses in these tracts at 3.6%, and 9.5% by dollar amount, which also exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 4.5% and exceeded the 2015 aggregate of 4.5%. Given that Fifth Third's performance exceeded proxy and the aggregate of all lenders, the geographic distribution of small business loans in low-income tracts is excellent.

Fifth Third made 502 small business loans totaling $70.4 million in moderate-income tracts. This represents 18.5% of small business loans by volume, which slightly exceeds the percentage of businesses in these tracts at 18.3%. This also represents 18.2% small business loans by dollar amount, which is also comparable to proxy. However, the percentage of loans by volume exceeded the 2014 aggregate of 17.4% and was comparable to the 2015 aggregate of 17.2%. Given that Fifth Third's performance exceeded the aggregate of all lenders and slightly exceeded proxy, the geographic distribution of small business loans in moderate-income tracts is excellent.

Fifth Third made 1,197 small business loans totaling $174.1 million in middle-income tracts. This represents 44.2% of small business loans by volume, which is below the percentage of businesses in these tracts at 49.4%, and 44.9% by dollar amount, which is comparable to proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 45.8% and was below the 2015 aggregate of 46.2%.

Fifth Third made 833 small business loans totaling $106.0 million in upper-income tracts. This represents 30.8% of small business loans by volume, which exceeds the percentage of businesses in these tracts at 28.7%, and 27.4% by dollar amount, which is comparable to proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 31.0% and the 2015 aggregate of 31.1%.

Overall, the geographic distribution of small business loans is excellent.

Distribution by Borrower Income and Revenue Size of the Business

The distribution of loans is excellent based on borrower income and good for businesses of different revenue sizes. Borrower distribution is excellent for home purchase and home improvement loans and good for refinance loans.

Refinance Loans

Fifth Third made 507 loans totaling $38.9 million to low-income borrowers. This represents 13.7% of refinance loans by volume, which is below percentage of low-income families at 19.8%. The percentage of loans by dollar amount at 8.1% is significantly below proxy. The percentage of loans by volume significantly exceeded the 2014 aggregate of 8.7% and significantly exceeded the 2015 aggregate of 6.7%. Given Fifth Third's performance is below proxy, but significantly exceeded the aggregate of all lenders, the borrower distribution of refinance loans to low-income borrowers is good.

Fifth Third made 826 loans totaling $76.8 million to moderate-income borrowers. This represents 22.4% of refinance loans by volume, which exceeds the percentage of moderate-income families at 18.3% and 15.9% by dollar volume, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 17.8% and exceeded the 2015 aggregate of 17.6%. Given Fifth Third's performance in exceeded proxy and the aggregate of all lenders, borrower distribution is considered excellent.

Fifth Third made 878 loans totaling $97.9 million to middle-income borrowers. This represents 23.8% of refinance loans by volume, which slightly exceeds the percentage of middle-income families at 22.3%, and 20.3% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 21.2% and exceeded the 2015 aggregate of 20.7%.

Fifth Third made 1,271 loans totaling $234.6 million to upper-income borrowers. This represents 34.4% of refinance loans by volume, which is below the percentage of upper-income families at 39.5%, while the percentage of loans by dollar amount at 48.7% exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 32.7% and was comparable to the 2015 aggregate of 33.9%.

Overall, the borrower distribution of refinance loans is good.

Home Purchase Loans

Fifth Third made 629 loans totaling $51.9 million to low-income borrowers. This represents 18.2% of home purchase loans by volume, which is comparable to the percentage of low-income families at 19.8%, and 10.3% of loans by dollar amount, which is significantly below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 10.8% and exceeded the 2015 aggregate of 10.0%. Because Fifth Third's performance exceeded the aggregate of all lenders and was comparable to proxy, the borrower distribution of home purchase loans to low-income borrowers is excellent.

Fifth Third made 882 loans totaling $99.0 million to moderate-income borrowers. This represents 25.6% of home purchase loans by volume, which exceeds the percentage of moderate-income families at 18.3%, and 19.7% of loans by dollar amount, which also exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 21.9% and exceeded the 2015 aggregate of 23.8%. Given Fifth Third/s performance exceeded proxy and the aggregate of all lenders, the borrower distribution of home purchase loans to moderate-income borrowers is excellent.

Fifth Third made 654 loans totaling $91.8 million to middle-income borrowers. This represents 19.0% of home purchase loans by volume, which is below the percentage of middle-income families at 22.3%, and 18.3% by dollar amount, which is also below proxy. The percentage of loans by volume was below the 2014 aggregate of 21.5% and was below the 2015 aggregate of 21.0%.

Fifth Third made 1,015 loans totaling $217.7 million to upper-income borrowers. This represents 29.4% of home purchase loans by volume, which is below the percentage of upper-income families at 39.5%, and 43.3% of loans by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 28.4% and was below the 2015 aggregate of 28.6%.

A community contact and performance context indicate that rental rates are increasing, making it increasingly difficult for lower-income individuals to save enough for a down payment to purchase a home. Given Fifth Third's performance to low- and moderate-income borrowers exceeded proxy and all aggregate lenders, the overall borrower distribution of home purchase loans is excellent.

Home Improvement Loans

Fifth Third made 48 loans totaling $2.3 million to low-income borrowers. This represents 15.7% of home improvement loans by volume, which is below the percentage of low-income families at 19.8%, and 11.3% by dollar amount, which is also below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 10.9% and significantly exceeded the 2015 aggregate of 10.0%. Given that Fifth Third's performance significantly exceeded the aggregate of all lenders, the borrower distribution of home improvement loans to low-income borrowers is excellent.

Fifth Third made 91 loans totaling $4.9 million to moderate-income borrowers. This represents 29.8% of its home improvement loans by volume, which substantially exceeds the percentage of moderate-income families at 18.3%, and 23.7% by dollar amount, which also exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 22.1% and exceeded the 2015 aggregate of 21.5%. Given that Fifth Third's performance exceeded the aggregate of all lenders and substantially exceeded proxy, the borrower distribution of home improvement loans to moderate-income borrowers is excellent.

Fifth Third made 86 loans totaling $4.5 million to middle-income borrowers. This represents 28.2% of home improvement loans by volume, which exceeds the percentage of middle-income families at 22.3%, and 21.8% by dollar amount, which is slightly below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 26.8% and exceeded the 2015 aggregate of 24.9%.

Fifth Third made 73 loans totaling $8.2 million to upper-income borrowers. This represents 23.9% of home improvement loans by volume, which is below the percentage of upper-income families at 39.5%, and 40.0% by dollar amount, which is comparable to proxy. The percentage of loans by volume was below the 2014 aggregate of 35.6% and the 2015 aggregate of 40.9%.

The overall borrower distribution of home improvement loans is excellent.

Small Business Loans

The distribution of small business loans to businesses of different sizes is good, considering Fifth Third's performance relative to the aggregate of all lenders. Fifth Third was able to make 49.4% of small business loans to businesses with revenues of $1 million or less. Fifth Third's performance significantly exceeded the 2014 aggregate of 39.5% and exceeded the 2015 aggregate of 41.7%, but was significantly below the percentage of small businesses in the assessment area at 89.7%. Also, during the evaluation period, Fifth Third was able to make an acceptable percentage of small-dollar loans (69.7%) in amounts of $100,000 or less, indicating a willingness to lend in smaller amounts typically requested by small businesses. In addition, a community contact cited the lack infrastructure improvements and mass transportation options limit economic development prospects and small business lending opportunities.

Community Development Loans

Fifth Third originated 74 community development loans totaling $230.7 million during the evaluation period as shown in the table below:

Affordable Housing		Economic Development		Revitalization and Stabilization		Community Services	
#	$	#	$	#	$	#	$
4	16,895,000	35	118,928,407	14	65,703,658	21	29,185,614

Community development lending in the assessment area represents 3.8% of the total dollar volume of community development loans originated by Fifth Third during the evaluation period. This ranks as Fifth Third's sixth-highest percentage of community development lending during the evaluation period. Although Fifth Third has the majority of the market share with 21.5% of the deposits in this market, it must still compete with several large national banks in the area for community development loans. Deposits in this assessment area accounted for 4.5% of the Fifth Third's total deposits during the evaluation period. As such, Fifth Third is considered a leader in community development lending.

Examples of community development lending include, but are not limited to:

- Two new loans to support a federally subsidized public housing (Section 8) development project, where old buildings were demolished and replaced with 47 new apartments for low- and moderate-income individuals and families
- Renewal of a revolving line of credit to Habitat for Humanity to build and construct multiple single-family dwellings for low- and moderate-income individuals/families.
- Renewal of working capital loan to a community action partnership that provides a multitude of services low-income families, seniors and disabled persons
- Renewal of a revolving line of credit to continue operations for a university where 55.0% of the student body is considered low- or moderate-income
- Working capital loan to a nonprofit that provides emergency shelter to low- and moderate-income women and children

- Working capital loan to a nonprofit that provides transportation for low- and moderate-income individuals to linkages to other transit systems in order to gain access to employment opportunities
- Multiple working capital loans that promote economic development by financing businesses to support job retention, add new jobs, and promote growth to continue operations in low- and moderate-income geographies (162 jobs retained and 36 jobs added)
- Renewal of line of credit to a nonprofit that helps increase economic opportunities for small businesses in the area and provides start-up businesses with business literacy training
- Multiple working capital loans to help retain and expand businesses located in areas specifically designated by the city to promote revitalization and economic development

The loans that supported services to low- and moderate-income individuals, affordable housing, and, in particular, providing transportation to gain meaningful employment opportunities were deemed to be responsive, as community contacts specifically mentioned the need for these types of loans.

Flexible Lending Programs

Fifth Third had 1,682 flexible lending loans in this assessment area: 907 government loans, 128 were down payment assistance loans, and 647 other flexible lending programs. The following tables show the percentage by volume and by dollar amount of the three types of flexible lending programs made in this assessment area during the evaluation period and the distribution of Fifth Third's flexible lending programs within the assessment area by census tract income and by borrower income.

Flexible Loan Programs												
	Geographic Distribution											
	Low			Moderate			Middle			Upper		
	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units
Government Loan Programs	1.4%	1.0%	2.0%	20.6%	15.1%	16.4%	56.6%	55.8%	54.6%	21.4%	28.1%	27.0%
Down Payment Assistance Programs	19.5%	14.6%	2.0%	25.8%	23.4%	16.4%	44.5%	47.9%	54.6%	10.2%	14.1%	27.0%
Other Flexible Lending Programs	2.5%	1.2%	2.0%	16.5%	12.9%	16.4%	54.1%	51.2%	54.6%	26.9%	34.8%	27.0%
Total	**3.2%**	**1.8%**	**2.0%**	**19.4%**	**14.7%**	**16.4%**	**54.7%**	**53.6%**	**54.6%**	**22.7%**	**29.9%**	**27.0%**

*Unknown tract data is not included in the above table.

Flexible Loan Programs												
	Borrower Distribution											
	Low			Moderate			Middle			Upper		
	% - #	% - $	% Fam	% - #	% - $	% Fam	% - #	% - $	% Fam	% - #	% - $	% Fam
Government Loan Programs	21.1%	15.3%	19.8%	40.4%	38.0%	18.3%	21.6%	24.4%	22.3%	11.8%	16.3%	39.5%
Down Payment Assistance Programs	76.2%	72.5%	19.8%	11.9%	11.2%	18.3%	7.9%	10.8%	22.3%	3.2%	4.5%	39.5%
Other Flexible Lending Programs	19.7%	15.5%	19.8%	23.7%	20.5%	18.3%	21.7%	19.7%	22.3%	29.3%	39.2%	39.5%
Total	**25.0%**	**18.9%**	**19.8%**	**31.1%**	**28.9%**	**18.3%**	**20.5%**	**21.6%**	**22.3%**	**18.4%**	**25.4%**	**39.5%**

*Unknown tract data is not included in the above table.

Fifth Third's lending in low-income tracts by number and dollar amount exceeded the percentage of owner-occupied units in these tracts, especially for the various down payment assistance programs. The percentage of lending by volume in moderate-income tracts exceeded the percentage of owner-occupied units in tracts, while the percentage of lending by dollar amount was below proxy.

Fifth Third's lending by volume to low-income borrowers exceeded the percentage of low-income families, while lending by dollar amount was below proxy. The percentage of lending, by volume and dollar amount, to moderate-income borrowers exceeded the percentage of moderate-income families, especially for government loan programs.

Therefore, Fifth Third made extensive use of flexible lending practices in serving the assessment area's credit needs, as lending through flexible loan programs was excellent in moderate-income geographies and to low- and moderate-income borrowers. Lending through flexible loan programs was good in low-income geographies.

Investment Test

Fifth Third's performance relative to the investment test in the assessment area is rated good.

Fifth Third makes a significant level of qualified community development investments and grants, particularly those not routinely provided by private investors. As such, Fifth Third was occasionally in a leadership position. Fifth Third has 339 qualified investments totaling $47.7 million during the evaluation period. Shown in the table below are the total current period investments:

Affordable Housing		Economic Development		Revitalization and Stabilization		Community Services	
#	$	#	$	#	$	#	$
146	28,370,391	57	397,072	1	5,000	105	1,023,554

Also included in the total number of qualified investments are 30 prior period investments totaling $17.9 million. Fifth Third made 2.9% of its total community development investments in this assessment area, which is below the percentage of total deposits at 4.5% and the percentage of branch offices at 4.8%.

Fifth Third exhibits a good responsiveness to credit and community development needs in the assessment area, including investments in several affordable housing projects and community services throughout the assessment area, which are important needs expressed by several community contacts. Fifth Third made 168 donations totaling $1.4 million that supported local schools, small businesses, churches, food banks, health care, and affordable housing. The majority of Fifth Third's donations (71.0%) supported services to low- and moderate-income individuals.

Service Test

Fifth Third's performance under the service test in this assessment area is rated excellent. Retail services are accessible and Fifth Third is a leader in providing community development services.

Retail Services

Fifth Third's record of opening and closing offices has not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and to low- and moderate-income households. Since the previous evaluation, no branches were opened and four were closed, resulting in no net change in the number of banking centers in low- and moderate-income tracts. Delivery services are accessible to Fifth Third's geographies and individuals of different income levels.

Business hours and services provided do not vary in a way that inconveniences certain portions of the assessment area, including low- and moderate-income geographies or households, and are consistent with the services and hours discussed in the "Institution" assessment.

Fifth Third maintains 62 banking centers within this assessment area, including two in low-, 14 in moderate-, 30 in middle-, and 16 in upper-income census tracts. Fifth Third banking centers in this assessment area represent 4.8% of all its banking centers.

Fifth Third has a total of 91 full-service ATMs within this assessment area, including four in low-, 18 in moderate-, 47 in middle-, and 22 in upper-income census tracts.

The following table illustrates the percentage of banking centers and ATMs in low-, moderate-, middle-, and upper-income census tracts in comparison to the number and percentage of census tracts and the percentage of households and businesses in those tracts.

Geographic Distribution of Branches & ATMS

Assessment Area: MI Grand Rapids

	Total Branches				Total ATMs			Full Service ATMs		Cash only ATMs		Census Tracts		House holds	Total Businesses
	#	%	Open #	Closed #		#	%	#	%	#	%	#	%	%	%
Low	2	3.2%	0	0	Total	6	5.4%	4	4.4%	2	9.5%	15	6.0%	3.6%	4.1%
Moderate	14	22.6%	0	0	Total	30	26.8%	18	19.8%	12	57.1%	56	22.5%	21.3%	18.8%
Middle	30	48.4%	0	2	Total	49	43.8%	47	51.6%	2	9.5%	123	49.4%	52.2%	48.7%
Upper	16	25.8%	0	2	Total	27	24.1%	22	24.2%	5	23.8%	53	21.3%	22.8%	28.3%
Unknown	0	0.0%	0	0	Total	0	0.0%	0	0.0%	0	0.0%	2	0.8%	0.0%	0.0%
Total	62	100.0%	0	4	Total	112	100.0%	91	100.0%	21	100.0%	249	100.0%	100.0%	100.0%

2016 FFIEC Census Data, 2010 ACS Data, and 2015 D&B Information
Closed branches/ATMs are only included in "closed" columns and are not included in any other totals.
DTO - Drive thru only is a subset of total branches
SA = Stand Alone ATM is a subset of total ATMs

Branch distribution within low-income tracts was considered good, as the distribution of branches was comparable the percentage of census tracts and households in these tracts. However, the branch distribution within moderate-income tracts was considered excellent.

Community Development Services

Fifth Third a leader in providing community development services in this assessment area. During the evaluation period, Fifth Third employees provided 6,519 hours of community development service to local organizations serving low- and moderate-income individuals, which represents 5.5% of all community development services provided and equates to 3.13 annualized persons (ANP).

Affordable Housing	Economic Development	Revitalization and Stabilization	Community Services
# of Hours	*# of Hours*	*# of Hours*	*# of Hours*
363	1,073	11	5,072

Employees provided financial expertise through leadership positions in multiple community organizations that provide affordable housing and promote community and economic development and area revitalization and stabilization.

Community development services include 3,108 hours serving on boards and committees, 1,868 hours of providing financial literacy through local nonprofits and school programs, 1,504 hours providing technical assistance to non-profits and local business, and 39 hours participating in foreclosure prevention outreach.

Fifth Third is considered particularly responsive with regard to hours dedicated to financial literacy and affordable housing. A community contact indicated there is a need for financial literacy training to assist first-time homebuyers and lower-income individuals gain access to mainstream financial systems. Another community contact mentioned the need for more access to affordable housing, an increasing critical need in this assessment area.

METROPOLITAN AREAS and NON-METROPOLITAN AREAS
(Limited-scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE STATE OF MICHIGAN

- **Battle Creek MSA**
  - As of June 30, 2016, Fifth Third operated three branches in the assessment area, representing 1.3% of its branches in Michigan.
  - As of June 30, 2016, Fifth Third had $107,088 in deposits in this assessment area, representing a market share of 10.1% and 0.7% of its statewide deposits.
- **Jackson MSA**
  - As of June 30, 2016, Fifth Third operated two branches in the assessment area, representing 0.9% of its branches in Michigan.
  - As of June 30, 2016, Fifth Third had $82,622 in deposits in this assessment area, representing a market share of 4.5% and 0.5% of it statewide deposits.
- **Kalamazoo-Portage MSA**
  - As of June 30, 2016, Fifth Third operated 16 branches in the assessment area, representing 7.1% of its branches in Michigan.
  - As of June 30, 2016, Fifth Third had $799,943 in deposits in this assessment area, representing a market share of 21.5% and 5.2% of it statewide deposits.
- **Lansing-East Lansing MSA**
  - As of June 30, 2016, Fifth Third operated 16 branches in the assessment area, representing 7.1% of its branches in Michigan.
  - As of June 30, 2016, Fifth Third had $780,275 in deposits in this assessment area, representing a market share of 12.9% and 5.1% of it statewide deposits.
- **Non-metropolitan Northern Michigan**
  - As of June 30, 2016, Fifth Third operated 25 branches in the assessment area, representing 11.1% of its branches in Michigan.
  - As of June 30, 2016, Fifth Third had $1.3 million in deposits in this assessment area, representing a market share of 16.1% and 8.7% of it statewide deposits.
- **Saginaw-Midland-Bay City CSA**
  - As of June 30, 2016, Fifth Third operated four branches in the assessment area, representing 1.8% of its branches in Michigan.
  - As of June 30, 2016, Fifth Third had $109,419 in deposits in this assessment area, representing a market share of 2.3% and 0.7% of it statewide deposits.
- **Non-metropolitan Southern Michigan**
  - As of June 30, 2016, Fifth Third operated eight branches in the assessment area, representing 3.5% of its branches in Michigan.
  - As of June 30, 2016, Fifth Third had $553,899 in deposits in this assessment area, representing a market share of 15.7% and 3.6% of it statewide deposits.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE STATE OF MICHIGAN

Through the use of available facts and data, including performance and demographic information, each assessment area's performance was evaluated and compared with Fifth Third's performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendix F for information regarding these areas.

Assessment Area	Lending Test	Investment Test	Service Test
Battle Creek MSA	Below	Consistent	Below
Jackson MSA	Below	Below	Below
Kalamazoo-Portage MSA	Below	Consistent	Below
Lansing-East Lansing MSA	Below	Below	Consistent
Non-metropolitan Northern Michigan	Below	Below	Below
Saginaw-Midland-Bay City CSA	Below	Consistent	Below
Non-metropolitan Southern Michigan	Below	Consistent	Below

For the lending test, Fifth Third received an "Outstanding" rating in Michigan. Performance in all seven of the limited-scope assessment areas was below Fifth Third's performance for the state. Although below the state performance, lending levels for the geographic and borrower distribution of loans were good or adequate. There was an excellent level of community development loans in the Lansing-East Lansing assessment area and a good level in the Saginaw-Midland-Bay City assessment area. The remaining five assessment areas had adequate levels of community development loans. A moderate level of lending gaps was identified in the Saginaw-Midland-Bay City assessment area and no gaps in lending were identified in the Battle Creek assessment area. A low level of lending gaps was noted in the remaining five assessment areas.

For the investment test, Fifth Third received an "Outstanding" rating in Michigan. While the investment activity was consistent to the state in four of the seven limited-scope assessment areas, the performance in the Jackson, Lansing-East Lansing, and non-metropolitan Northern Michigan assessment areas was below Fifth Third's performance in the state. The weaker performance was primarily attributable to a lower level of qualified investments and contributions relative to Fifth Third's operational presence in the assessment area.

For the service test, Fifth Third received an "Outstanding" rating in Michigan. While performance was consistent to the state in the Lansing-East Lansing assessment area, performance was below Fifth Third's performance for the state in the remaining six limited-scope assessment areas. Retail services were adequate in non-metropolitan Northern Michigan and good in the remaining six assessment areas. The weaker retail services performance in the non-metropolitan Northern Michigan assessment area was primarily due to less accessibility of delivery systems in lower-income geographies. Qualified community development services were excellent in five of the limited-scope assessment areas. Qualified community development services were good in the Battle Creek and Kalamazoo-Portage assessment areas; the weaker performance was primarily due to a lower level of hours dedicated to providing qualified services relative to Fifth Third's operational presence in these assessment areas.

The performance in the limited-scope assessment areas did not change the overall state rating.

STATE OF MISSOURI

CRA RATING for State of Missouri: Satisfactory
The lending test is rated: High Satisfactory
The investment test is rated: Low Satisfactory
The service test is rated: Low Satisfactory

The major factors supporting this rating include:

- An adequate responsiveness to the credit needs of the community;
- A good geographic distribution of loans throughout the assessment area;
- A good distribution among borrowers of different income levels and to businesses of different revenue sizes;
- Exhibits an adequate record of serving the credit needs of low-income individuals and areas and very small businesses;
- A relatively high level of community development loans;
- An adequate level of qualified community development investments and grants;
- Retail delivery systems are reasonably accessible to all geographies and individuals of different income levels and businesses of different revenue sizes;
- Banking services and hours that do not vary in a way that inconveniences any portions of the assessment areas; and,
- An adequate level of providing community development services.

SCOPE OF EXAMINATION

A full-scope review was conducted for the St. Louis MSA assessment area, which represents Fifth Third's entire banking operations for Missouri. The time period, products, and affiliates evaluated for this assessment area are consistent with the scope discussed in the "Institution" section of this report.

METROPOLITAN AREA
(Full-scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE ST. LOUIS MO-IL MSA #41180

The St. Louis MO-IL MSA consists of St. Louis City, St. Louis County, and St Charles County in Missouri. Fifth Third's assessment area excludes Bond, Calhoun, Clinton, Jersey, Macoupin, Madison, Monroe, and St. Clair counties in Illinois and Franklin, Jefferson, Lincoln, and Warren counties in Missouri. The assessment area is comprised of 56 low-, 75 moderate-, 114 middle-, and 137 upper-income tracts. There are also two tracts with no income designation that are primarily composed of correctional institutions, military establishments, education facilities, or medical establishments that do not report income information.

Fifth Third exited the St. Louis market as of January 29, 2016; therefore, the summary of deposit information for 2015 was used to determine the appropriate deposit market share for this assessment area, along with the branches that were open during the evaluation period. As of June 30, 2015, Fifth Third ranked ninth out of 68 institutions with 2.1% of the deposit market share. Scottrade Bank had the majority of the market share 19.9% of deposits. The next four largest institutions, U.S. Bank, Bank of America, Commerce Bank, and Stifel Bank and Trust, had 17.5%, 13.8%, 7.9%, and 6.0% of the market share, respectively. Deposits in this assessment area accounted for 1.4% of the Fifth Third's total deposits. This was the 15th highest percentage of deposits within Fifth Third's CRA footprint.

From January 1, 2014 through June 30, 2016, Fifth Third originated 702 HMDA loans and 298 CRA loans, which represented 0.7% and 0.8% of the total loans originated during the evaluation period, respectively. This was the 28th largest HMDA market and 29th largest CRA market for loans originated during the evaluation period.

In 2015, Fifth Third Mortgage Company ranked 52nd among 514 HMDA reporters in the assessment area and Fifth Third ranked 148th. Wells Fargo Bank, DAS Acquisition, JPMorgan Chase Bank, and U.S. Bank were the top four HMDA lenders in the assessment area. Fifth Third ranked 27th of 128 CRA reporters in the assessment area in 2015. The top four CRA lenders in the assessment area were U.S. Bank, American Express, Bank of America, and Citibank. These lenders are mostly issuers of credit cards and their CRA loans primarily consist of commercial credit card accounts.

Three community contact interviews were conducted to provide additional information regarding the assessment area. The first contact, representing an economic development organization, stated that small businesses are doing well and start-up businesses appear to be able to obtain funding and to expand their businesses. The contact stated the St. Louis banking market is very competitive, which can benefit small business borrowers. Overall, the contact believed the credit needs of the area are being met.

The second contact, representing an economic development organization, stated the economic profile of the city has been slowly improving since the financial crisis, with an uptick in commercial development. Employment opportunities in the central city have been increasing and there has also been steady improvement in the residential real estate market. The contact stated that local financial institutions continue to show interest in subsidizing affordable housing and mixed-use real estate projects in economically distressed areas. The contact believed there are opportunities for financial institutions to continue to support community development projects in distressed areas and to increase their presence in lower-income neighborhoods with higher percentages of unbanked residents.

The third contact, representing an organization that helps revitalize communities and neighborhoods, stated the local economy is slowly improving, but still lags behind the national economy. The unemployment rate is declining; however, certain segments of the population, especially young African Americans, remain disproportionately unemployed or underemployed. Although the housing market is somewhat affordable, the contact noted there is a significant need for quality, affordable housing in the area. As the majority of affordable housing is substandard, the contact indicated there is a need for home improvement lending. The contact also believed even in this highly competitive market, it is becoming increasingly difficult for lower-income individuals with less-than-desirable credit to obtain permanent financing.

Population Characteristics

According to 2010 U.S. Census data, the population in the assessment area was 1.7 million. About 28.2% of the population lived in low- and moderate-income tracts. In addition, 76.5% of the population was 18 years of age or older, the legal age to enter into a contract.

As of July 1, 2015, the St. Louis MSA is the 20th largest in terms of population in the nation.[214] St. Louis County is the largest county in the assessment area and Missouri.[215] Florissant is the largest city in this county with 52,268 residents; its population decreased by 3.0% between 2000 and 2015.[216] St. Charles County is the third-largest county in Missouri. St. Charles is the largest city in the county with 68,796 residents; its population increased by 13.3% between 2000 and 2015. St. Louis City (considered to be a county unto itself) is the 60th largest city in the nation with 315,685 residents and its population decreased by 8.9% between 2000 and 2015. According to Moody's Analytics, the St. Louis MSA has struggled to retain population and continues to experience persistent out-migration. However, between 2012 and 2015, while the MSA experienced negative net migration, the rate of loss decreased each year.

[214] MSA population data is derived from the U.S. Census Data 2015 Statistical Abstract: https://factfinder.census.gov/faces/tableservices/jsf/pages/productview.xhtml?src=bkmk

[215] U.S. Places: http://us-places.com (main page – enter state, choose population by county)

[216] U.S. Census QuickFacts: https://www.census.gov/quickfacts/ (main page – enter state, county, city, town, or zip code)

The following table shows the population in the assessment area by county for 2010 and 2015, with the percentage of the population increase or decrease.[217] The population within the assessment area experienced positive growth between 2010 and 2015, with St. Charles County experiencing the greatest growth and St. Louis City experiencing the least growth in population during this time period.

County	2010 Population	2015 Population	Population Percent Change
St. Louis County	998,954	1,003,362	0.4%
St. Louis City	319,294	315,685	-1.1%
St. Charles County	360,485	385,590	7.0%
Total	**1,678,733**	**1,704,637**	**1.5%**

Income Characteristics

In 2010, the assessment area median family income was $70,408, which exceeded both the MSA median family income at $66,798 and Missouri's at $57,661. The MSA median family income substantially increased between 2010 and 2014. The median family income increased again in 2015 and declined to some extent in 2016.

Borrower Income Levels
St. Louis, MO-IL MSA

FFIEC Estimated Median Family Income		Low	Moderate	Middle	Upper
		0 - 49.99%	50% - 79.99%	80% - 119.99%	120% - & above
2014	**$71,000**	0 - $35,499	$35,500 - $56,799	$56,800 - $85,199	$85,200 - & above
2015	**$72,200**	0 - $36,099	$36,100 - $57,759	$57,760 - $86,639	$86,640 - & above
2016	**$70,000**	0 - $34,999	$35,000 - $55,999	$56,000 - $83,999	$84,000 - & above

Poverty rates increased in each county in the assessment area from 1999 to 2015.[218] St. Charles County had the lowest poverty rates in 1999 and 2015, while St. Louis City had the highest poverty rate in 1999 and 2015. In 2015, only St. Louis City's poverty rate exceeded Missouri's poverty rate. In 2015, Missouri's poverty rate exceeded the national poverty rate. According to the U.S. Census Bureau, the national poverty rate in 2015 was 13.5%, down 1.3 percentage points from 14.8% in 2014. For most demographic groups, the 2015 poverty rates and number of people in poverty decreased from 2014.[219] The following table shows the poverty rates for 1999[220] and 2015.

[217] Population Estimates derived from U.S. Census Data (April 1, 2010 – July 1, 2015): http://www.census.gov/quickfacts/table/PST045216/00
[218] U.S. Department of Agriculture Economic Research Service Poverty Rates (for 1999 and 2015): https://data.ers.usda.gov/reports.aspx?ID=17826
[219] 2015 National Poverty: http://www.census.gov/library/publications/2016/demo/p60-256.html
[220] 1999 National Poverty Rate: http://www.census.gov/prod/2000pubs/p60-210.pdf

County	1999 Poverty Rate	2015 Poverty Rate	Change
St. Louis County	6.9%	10.3%	49.3%
St. Louis City	24.6%	25.5%	3.7%
St. Charles County	4.0%	6.3%	57.5%
Missouri	**11.7%**	**14.8%**	**26.5%**
U.S.	**11.8%**	**13.5%**	**14.4%**

Housing Characteristics

According to 2010 U.S. Census data, there are 751,122 housing units and 427,738 families in the assessment area. From an income perspective, 31.3% of housing units, 21.5% of owner-occupied units, and 26.3% of families are located in low- or moderate-income tracts. About 70.5% of the housing units in the low-income census tracts are either rental or vacant and only 29.5% are owner-occupied. In the moderate-income census tracts, half of the housing units are either rental or vacant (50.5%) and 49.5% are owner-occupied. Therefore, based on the number of housing units compared to the number of families in low- and moderate-income census tracts, there appear to be more credit-related opportunities for Fifth Third to provide various aspects of affordable housing in the assessment area in moderate-income tracts than in low-income tracts.

The 2010 U.S. Census data shows the median age of housing stock in the assessment area was 45 years old, with 13.4% of the stock built before 1950. The oldest housing stock was in St. Louis City with a median age of 71 years. The oldest housing stock in St. Louis County was 43 years, while the median age of housing stock in St. Charles County was only 20 years. Within the assessment area, the median age of housing stock was 61 years in low-income tracts and 58 years in moderate-income tracts. Therefore, there appears to be opportunity for Fifth Third to provide home improvement and rehabilitation loans in these lower-income areas. In addition, a community contact stated there is a significant need for quality, affordable housing in the area. The majority of affordable housing is substandard and the contact believed there is a need for home improvement lending.

According to 2010 U.S. Census data, the median housing value in the assessment area was $175,312, with an affordability ratio of 30.91. The affordability ratio is derived by dividing the median household income by the median housing value. The higher the affordability ratio, the more affordable a home is considered. Median housing values decreased between 2010 and 2011-2015, and housing affordability became more affordable across the assessment area primarily due to median household incomes. During the evaluation period, the most affordable housing was in St. Charles County, with the least affordable in St. Louis City. According to Moody's Analytics, home prices are appreciating in line with those in the state, but lag the pace of growth nationally. Housing starts have more than doubled from their 2012 low, but are still 50% below their mid-2000s peak. Overall, median gross rents increased at a fairly substantial rate across the assessment area, with renters in St. Louis City and St. Charles County experiencing the largest increase in rental rates. The following table presents housing characteristics from the U.S. Census data between 2010 and 2015 in the assessment area and Missouri.

County	2010 Median Housing Value	2010 Affordability Ratio	2011-2015 Median Housing Value	2011-2015 Affordability Ratio	2010 Median Gross Rent	2011-2015 Median Gross Rent	Percent of Change
St. Louis County	$179,300	32.00	$173,400	34.46	$789	$882	11.8%
St. Louis City	$122,200	27.54	$120,400	29.57	$658	$748	13.7%
St. Charles County	$197,300	35.65	$188,200	38.48	$819	$931	13.7%
Missouri	**$137,700**	**33.60**	**$138,400**	**34.81**	**$667**	**$746**	**11.8%**

According to Bankrate.com,[221] Missouri ranked 32nd for foreclosure filings in November 2016. The national average for foreclosure filings was one in every 1,533 housing units. The following table contains information about foreclosure filings in the assessment area, according to Realtytrac:[222]

Geography Name	Ratio of Properties Receiving Foreclosure Filings in November 2016
St. Louis County	1:1,356
St. Louis City	1:1,651
St. Charles County	1:1,751
Missouri	**1:2,232**
U.S.	**1:1,533**

In November 2016, St. Louis County had the highest and St. Charles County had the lowest rate of foreclosure in the assessment. The foreclosure rate in Missouri is below the national rate.

Building permits for this MSA, Missouri, and the nation are included in the following table for 2014, 2015, and 2016.[223]

Geography	2014	2015	Percent of Change 2014-2015	2016	Percent of Change 2015-2016
St. Louis MSA	6,998	7,698	10.0%	7,943	3.2%
Missouri	**16,314**	**18,344**	**12.4%**	**19,004**	**3.6%**
U.S.	**1,052,124**	**1,182,582**	**12.4%**	**1,190,191**	**0.6%**

221 Bankrate.com: http://www.bankrate.com/finance/real-estate/foreclosures-by-state/default.aspx
222 Realtytrac: http://www.realtytrac.com/statsandtrends/foreclosuretrends/
223 U.S. Census Bureau Building Permits Survey: http://www.census.gov/construction/bps/

The MSA experienced a greater increase in the number of housing permits issued between 2014 and 2015, with a smaller increase between 2015 and 2016. The increase in the number of permits could indicate there is a growing demand for home purchase loans in the MSA and in Missouri during the evaluation period.

Labor, Employment, and Economic Characteristics

According to Moody's Analytics, the St. Louis area economy is in recovery and is growing at a modest pace. Aerospace accounts for around 15.0% of all local manufacturing jobs, compared with 4.0% nationally. While the area is favorable to businesses, office space costs are rising, making the Kansas City area is more attractive for new businesses. Persistent out-migration trends prevent the housing market from making a full recovery and reduce the labor force, making it more difficult for firms to find qualified workers.

According to *St. Louis Business Journal*,[224] the St. Louis metropolitan area is home to nine Fortune 500 headquarters. In the past year, the Centene Corporation jumped up 62 places on the list, while Peabody Energy fell 60 places.

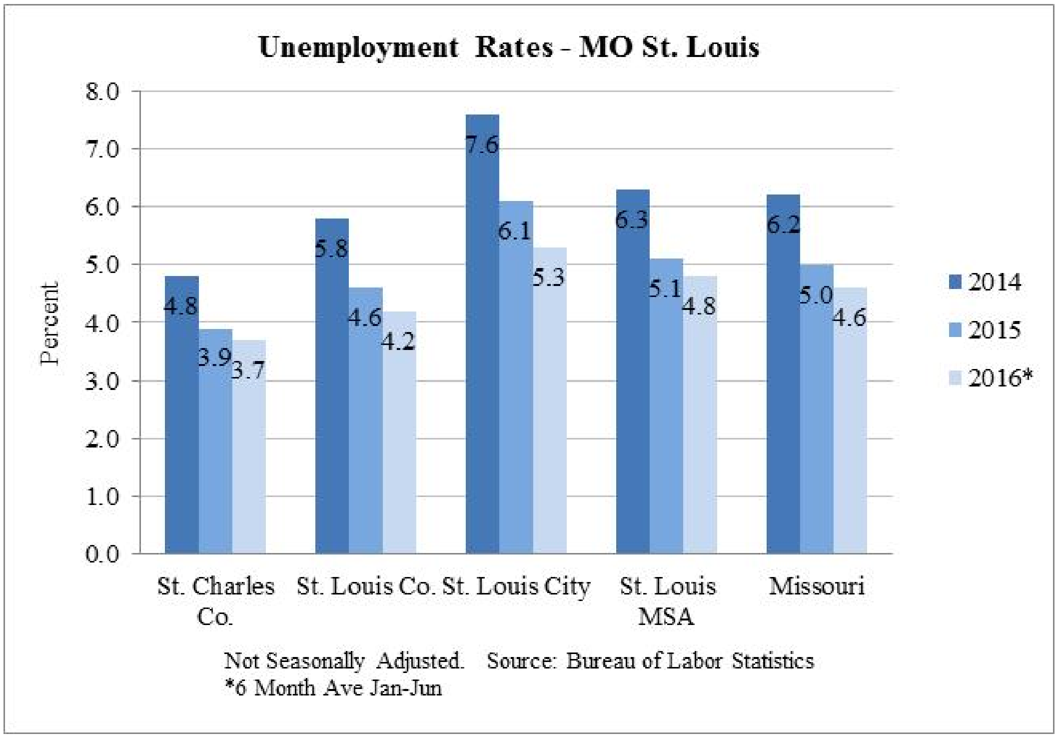
St. Louis Fortune 500 Companies (2016)		
Rank	**Company**	**Revenue**
22	Express Scripts	$100.7 billion
124	Centene Corporation	$22.7 billion
128	Emerson Electric Co.	$22.3 billion
189	Monsanto Company	$15.0 billion
271	Reinsurance Group of America	$10.4 billion
382	Jones Financial	$6.6 billion
423	Graybar Electric Company	$6.1 billion
425	Ameren Corporation	$6.0 billion
458	Peabody Energy	$5.6 billion

According to Moody's Analytics, the top ten employers in the St. Louis MSA in 2015 were:

Company	Number of Employees
Local Government	118,054
BJC Healthcare	24,182
Wal-Mart Stores, Inc.	22,006
SSM Health Care System	15,949
Washington University in St. Louis	14,692
Boeing Defense, Space & Security	14,617
Mercy Health Care	13,715
Scott Air Force Base	13,000
Schnuck Markets, Inc.	10,897
AT&T	10,015

The following table illustrates the average unemployment rates for 2014, 2015, and 2016 for the assessment area, MSA, and Missouri.

[224] St. Louis Business Journal: http://www.bizjournals.com/stlouis/blog/2016/06/9-st-louis-companies-make-fortune-500-list.html



The unemployment rates declined each year in the assessment area; however, St. Louis City's rates were higher than the MSA and state during this time period.

According to *St. Louis Business Journal*, Hazelwood-based GKN Aerospace plans to shut down its local Composites Department, which will leave 300 workers without jobs. GKN, which builds parts for Boeing, Lockheed Martin, and other aerospace manufacturers, is expected to move these jobs to Alabama. Speculation is that in order to save money, GKN has decided to ship jobs to plants in which workers are paid nearly half the wages of workers in St. Louis. GKN workers do not have a union and a means to demand fair wages and a safe work environment.[225]

[225] Feldt, Brian. "Hazelwood aerospace company to lay off 300." *St. Louis Business Journal*. October 26, 2016. - http://www.bizjournals.com/stlouis/news/2016/10/28/hazelwood-aerospace-company-to-layoff-300.html

2016 FFIEC Census Data and 2015 D&B Information

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE ST. LOUIS MO-IL MSA

Lending Test

Fifth Third's performance under the lending test in this assessment area is rated "High Satisfactory." Fifth Third has demonstrated an adequate responsiveness to the credit needs of the community. In addition, Fifth Third originated ten community development loans totaling $74.5 million. Fifth Third has a good geographic distribution of loans and a moderate level of lending gaps. Fifth Third has a good distribution among borrowers of different income levels and to businesses of different revenue sizes. Fifth Third exhibits an adequate record of serving the credit needs of highly economically disadvantaged areas in its assessment area, low-income individuals, and businesses with gross annual revenues of $1 million or less.

Greatest consideration was given to the evaluation of home purchase lending based on the overall volume of lending, followed by refinance and small business lending. There were an insufficient number of home improvement loans to analyze performance. Details of Fifth Third's residential mortgage and small business lending, as well as information regarding aggregate lending, can be found in Appendix E.

Lending Activity

Fifth Third's lending activity reflects an adequate responsiveness to the credit needs within the assessment area. Fifth Third originated 370 home purchase, 319 refinance, 12 home improvement, 298 small business, and ten community development loans during the evaluation period. The percentage of Fifth Third's total lending at 0.7% is less than the percentage of total deposits at 1.4% in this area.

Fifth Third made 85.9% of the HMDA and 85.6% of the CRA lending within its designated assessment area. No concentrations of lending where identified in any particular county. Therefore, a good amount of the loans was made within the defined assessment area.

Geographic Distribution of Loans

Fifth Third's overall distribution of lending among geographies is good. Home purchase lending, which was the largest loan category, is adequate. Refinance lending is adequate and small business lending is excellent. There is also a moderate level of lending gaps. The following gaps in lending were noted in the assessment area:

Tract Income Levels	Number of Tracts	Tracts with No Loans	Penetration
Low	56	39	30.4%
Moderate	75	36	52.0%
Middle	114	20	82.5%
Upper	137	13	90.5%
Unknown	2	2	0.0%
Total	**384**	**110**	**71.4%**

Overall, the lending gaps are considered reasonable; however, there are significant gaps in lending in low- and moderate-income income tracts. The gaps in low-income tracts can be attributed to an owner-occupancy rate of only 29.5% and a high percentage of rental and vacant units at 70.5%. To a lesser extent, lending gaps in moderate-income tracts can be attributed to an owner-occupancy rate of 49.5% and 50.5% of housing units being either rentals or vacancies. A community contact also mentioned a need for financial institutions to increase their presence in lower-income neighborhoods.

Home Purchase Loans

Fifth Third made four home purchase loans totaling $785,000 in low-income tracts. This represents 1.1% of home purchase loans by volume, which is below the percentage of owner-occupied units in these tracts at 5.1%, and 0.7% by dollar amount, which is also below proxy. The percentage of loans by volume was comparable to the 2014 aggregate at 1.9% and was below the 2015 aggregate at 2.1%. As Fifth Third's performance was below proxy and the aggregate of all lenders, the geographic distribution of home purchase loans in low-income tracts is adequate.

Fifth Third made 30 home purchase loans totaling $5.7 million in moderate-income tracts. This represents 8.1% of home purchase loans by volume, which is substantially below the percentage of owner-occupied units in these tracts at 16.4%, and 5.4% by dollar amount, which is also substantially below proxy. The percentage of loans by volume was below the 2014 aggregate at 10.6% and was comparable to the 2015 aggregate at 10.0%. As Fifth Third's performance was substantially below proxy and comparable to the aggregate of all lenders, the geographic distribution of home purchase loans in moderate-income tracts is adequate.

Fifth Third made 116 home purchase loans totaling $23.4 million in middle-income tracts. This represents 31.4% of home purchase loans by volume, which is comparable to the percentage of owner-occupied units in these tracts at 32.7%, and 22.1% by dollar amount, which is below proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 32.9% and was comparable to the 2015 aggregate of 34.5%.

Fifth Third made 220 home purchase loans totaling $76.2 million in upper-income tracts. This represents 59.5% of home purchase loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 45.9%, and 71.9% by dollar amount, which substantially exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 54.6% and the 2015 aggregate of 53.3%.

Overall, the geographic distribution of home purchase loans is adequate.

Refinance Loans

Fifth Third made seven refinance loans totaling $800,000 in low-income tracts. This represents 2.2% of refinance loans by volume and 1.0% by dollar amount, which is below the percentage of owner-occupied units at 5.1%. The percentage of loans by volume was below the 2014 aggregate at 2.4% and exceeded the 2015 aggregate at 1.6%. As Fifth Third's performance was below proxy and exceeded the aggregate of all lenders, plus the relatively low owner-occupancy rate of 29.5% (which likely prevents opportunities for refinance lending), the geographic distribution of refinance loans in low-income tracts is good.

Fifth Third made 24 refinance loans totaling $2.3 million in moderate-income tracts. This represents 7.5% of refinance loans by volume, which is below the owner-occupied units in these tracts at 16.4%. The percentage of loans by dollar amount at 2.8% is significantly below proxy. The percentage of loans by volume was comparable to the 2014 aggregate at 11.6% andwas below the 2015 aggregate at 8.8%. As Fifth Third's performance was below the aggregate of all lenders and proxy, the geographic distribution of refinance loans in moderate-income tracts is adequate.

Fifth Third made 66 refinance loans totaling $9.9 million in middle-income tracts. This represents 20.7% of refinance loans by volume, which is below the owner-occupied units in these tracts at 32.7%. The percentage of loans by dollar amount at 12.2% is also significantly below proxy. The percentage of loans by volume was comparable to the 2014 aggregate at 32.2% and was below the 2015 aggregate at 30.1%.

Fifth Third made 222 refinance loans totaling $68.4 million in upper-income tracts. This represents 69.6% of refinance loans by volume, which exceeds the owner-occupied units in these tracts at 45.9%, and 84.0% by dollar amount, which significantly exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate at 53.8% and exceeded the 2015 aggregate at 59.5%.

Overall, the geographic distribution of refinance loans is adequate.

Small Business Loans

Fifth Third made 33 small business loans totaling $9.5 million in low-income tracts. This represents 11.1% of small business loans by volume, which exceeds the percentage of small businesses in these tracts at 6.2%, and 19.9% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 5.3% and substantially exceeded the 2015 aggregate of 5.5%. Given that Fifth Third's performance exceeded proxy and the aggregate of all lenders, the geographic distribution of small business loans in low-income tracts is excellent.

Fifth Third made 45 small business loans totaling $5.9 million in moderate-income tracts. This represents 15.1% of small business loans by volume, which exceeds the percentage of businesses in these tracts at 14.7%. This also represents 12.4% of small business loans by dollar amount, which is comparable to proxy. The percentage of loans by volume exceeded the 2014 aggregate of 13.9% and was comparable to the 2015 aggregate of 14.4%. Given that Fifth Third's performance exceeded proxy and the aggregate of all lenders, the geographic distribution of small business loans in moderate-income tracts is excellent.

Fifth Third made 90 small business loans totaling $12.9 million in middle-income tracts. This represents 30.2% of small business loans by volume, which exceeds the percentage of businesses in these tracts at 28.6%, and 27.0% by dollar amount, which is comparable to proxy. The percentage of loans by volume exceeded the 2014 aggregate of 27.8% and the 2015 aggregate of 27.7%.

Fifth Third made 130 small business loans totaling $19.5 million in upper-income tracts. This represents 43.6% of small business loans by volume, which below the percentage of businesses in these tracts at 50.5%, and 40.7% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate of 52.2% and exceeded the 2015 aggregate of 51.7%.

Overall, the geographic distribution of small business loans is excellent.

Distribution by Borrower Income and Revenue Size of the Business

Overall, the distribution of loans is good based on borrower income and for businesses of different revenue sizes. Borrower distribution is adequate for home purchase lending and good for refinance lending.

Home Purchase Loans

Fifth Third made 17 loans totaling $1.4 million to low-income borrowers. This represents 4.6% of home purchase loans by volume, which is significantly below the percentage of low-income families at 20.1%, and 1.3% by dollar amount, which is significantly below proxy. The percentage of loans by volume was below the 2014 aggregate of 8.7% and was below the 2015 aggregate of 8.8%. As Fifth Third's performance was significantly below proxy and below the aggregate of all lenders, the borrower distribution of home purchase loans to low-income borrowers is poor.

Fifth Third made 81 loans totaling $13.6 million to moderate-income borrowers. This represents 21.9% of home purchase loans by volume, which exceeds the percentage of moderate-income families at 16.2%, and 12.8% by dollar amount, which is below proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 18.0% and substantially exceeded the 2015 aggregate of 16.9%. As Fifth Third's performance exceeded proxy and the aggregate of all lenders, the borrower distribution of home purchase loans to moderate-income borrowers is excellent.

Fifth Third made 46 loans totaling $7.8 million to middle-income borrowers. This represents 12.4% of home purchase loans by volume, which is below the percentage of middle-income families at 19.9%, and 7.4% by dollar amount, which exceeds proxy. The percentage of loans by volume was below the 2014 aggregate of 18.0% and was below the 2015 aggregate of 17.7%.

Fifth Third made 209 loans totaling $79.9 million to upper-income borrowers. This represents 56.5% of home purchase loans by volume, which exceeds the percentage of upper-income families at 43.8%, and 75.4% by dollar amount, which significantly exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 32.1% and the 2015 aggregate of 31.5%.

Overall, the borrower distribution of home purchase loans is adequate.

Refinance Loans

Fifth Third made 19 loans totaling $1.8 million to low-income borrowers. This represents 6.0% of refinance loans by volume, which is significantly below the percentage of low-income families at 20.1%. The percentage of loans by dollar amount at 2.2% is also significantly below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 7.0% and was below the 2015 aggregate of 5.2%. Given that Fifth Third's performance was significantly below proxy, but exceeded the aggregate of all lenders, the borrower distribution of refinance loans to low-income borrowers is adequate.

Fifth Third made 36 loans totaling $4.3 million to moderate-income borrowers. This represents 11.3% of refinance loans by volume, which is below the percentage of moderate-income families at 16.2%, and 5.3% by dollar volume, which is significantly below proxy. The percentage of loans by volume was below the 2014 aggregate of 13.4% and exceeded the 2015 aggregate of 11.6%. As Fifth Third's performance was below proxy, but exceeded the aggregate of all lenders, the borrower distribution of refinance loans to moderate-income borrowers is good.

Fifth Third made 65 loans totaling $10.0 million to middle-income borrowers. This represents 20.4% of refinance loans by volume, which exceeds the percentage of middle-income families at 19.9%, and 12.2% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 18.2% and the 2015 aggregate of 16.4%.

Fifth Third made 175 loans totaling $61.0 million to upper-income borrowers. This represents 54.9% of refinance loans by volume, which exceeds the percentage of upper-income families at 43.8%, while the percentage of loans by dollar amount at 74.9% significantly exceeds proxy. The percentage of loans by volume significantly exceeded the 2014 aggregate of 35.8% and the 2015 aggregate of 36.1%.

Overall, the borrower distribution of refinance loans is good.

Small Business Loans

The distribution of small business loans to businesses of different sizes is good, considering Fifth Third's performance relative to the aggregate of all lenders. Fifth Third was able to make 38.9% of small business loans to businesses with revenues of $1 million or less. Fifth Third's performance exceeded the 2014 aggregate of 43.2% and was below the 2015 aggregate of 45.4% and was significantly below the percentage of small businesses in the assessment area at 89.8%. Also, during the evaluation period, Fifth Third was able to make an acceptable percentage of small-dollar loans (64.1%) in amounts of $100,000 or less, indicating a willingness to lend in smaller amounts typically requested by small businesses. In addition, a community contact indicated there is a tremendous amount of competition for commercial loans in the area.

Community Development Loans

Fifth Third originated 10 community development loans totaling $74.5 million during the evaluation period as shown in the table below:

Economic Development		Revitalization and Stabilization		Community Services	
#	$	#	$	#	$
3	16,650,000	3	56,800,000	4	1,050,000

Community development lending in the assessment area represents 1.2% of the total dollar volume of community development loans originated by Fifth Third during the evaluation period. This ranks as Fifth Third's 20th highest percentage of community development lending during the evaluation period. Fifth Third's performance is relatively high in community development lending.

Examples of community development lending include, but are not limited to:

- Working capital loan to a not-for-profit that provides low- and moderate-income women with resources and support to create and sell hand-crafted items. The women receive 70-100% of the selling price, which allows the women to achieve financial independence and gain entrepreneurial job skills.
- Multiple working capital loans that promote economic development by financing businesses to support job retention, add new jobs, and promote growth to continue operations in low- and moderate-income geographies

Investment Test

Fifth Third's performance relative to the investment test in the assessment area is rated "Low Satisfactory."

Fifth Third made an adequate level of qualified community development investments and grants. Fifth Third made 100 qualified investments totaling $12.0 million during the evaluation period. Shown in the table below are the total current period investments:

Affordable Housing		Economic Development		Community Services	
#	$	#	$	#	$
46	11,791,159	7	39,095	47	182,616

Overall, Fifth Third made 0.7% of its total community development investments in this assessment area, which is less than the percentage of total deposits at 1.4% and less than the percentage of branch offices at 1.3%.

Fifth Third exhibited an adequate responsiveness to credit and community development needs in the assessment area. A community contact indicated there is a significant need for quality, affordable housing in the area. Fifth Third made 54 donations totaling $221,711 that supported local schools, small businesses, social and charitable organizations. The majority of Fifth Third's donations (82.4%) supported services to low- and moderate-income individuals. Additionally, $30,000 (13.5%) of the donations supported the Justine Petersen organization, which helps low- and moderate-income individuals and families buy homes and build financial assets for the long term.

Service Test

Fifth Third's performance under the service test in this assessment area is rated "Low Satisfactory." Retail services were reasonably accessible and Fifth Third provides an adequate level of community development services in this assessment area.

Retail Services

Although Fifth Third exited the St. Louis market as of January 29, 2016, the branches that were open during the evaluation period were evaluated. As a result, the following branching information is as of June 30, 2015 and Fifth Third's record of opening and closing banking centers during the evaluation period was not weighed.

Fifth Third maintained 17 banking centers within this assessment area, including two in low-, two in moderate-, two in middle-, and 11 in upper-income census tracts. Fifth Third banking centers in this assessment area represented 1.3% of all its banking centers.

Fifth Third had 33 ATMs within this assessment area, including seven in low-, six in moderate-, five in middle-, and 15 in upper-income census tracts.

The following table illustrates the percentage of banking centers in low-, moderate-, middle-, and upper-income census tracts in comparison to the percentage of tracts and the percentage of households and total businesses in those tracts.

Tract Category	Total Branches		Demographics			
			Census Tracts		Households	Total Businesses
	#	%	#	%	%	%
Low	2	11.8%	56	14.6%	9.2%	6.4%
Moderate	2	11.8%	75	19.5%	19.6%	15.0%
Middle	2	11.8%	114	29.7%	32.0%	28.5%
Upper	11	64.7%	137	35.7%	39.1%	49.9%
Unknown	0	0.0%	0	0.5%	0.1%	0.1%
Total	17	100.0%	382	100.0%	100.0%	100.0%

Branch distribution within low-income tracts was considered excellent, as the distribution of branches exceeded the percentage of census tracts and households in these tracts. However, the branch distribution within moderate-income tracts was considered adequate.

Community Development Services

Fifth Third provided an adequate level of community development services in this assessment area. During the evaluation period, Fifth Third employees provided 738 hours of community development service to local organizations serving low- and moderate-income individuals, which represents 0.6% of all community development services provided and equates to 0.35 annualized persons (ANP).

Affordable Housing	Community Services
# of Hours	***# of Hours***
50	688

Employees provided financial expertise through leadership positions in multiple community organizations that provide affordable housing and promote community development. Community development services include 462 hours of providing financial literacy through local nonprofits and school programs, 126 hours serving on boards and committees, 120 hours providing technical assistance to non-profits, and 30 hours participating in foreclosure prevention outreach.

STATE OF NORTH CAROLINA

CRA RATING for State of North Carolina: Outstanding
The lending test is rated: High Satisfactory
The investment test is rated: Outstanding
The service test is rated: Outstanding

The major factors supporting this rating include:

- A good responsiveness to credit needs;
- A good geographic distribution of loans throughout the assessment area;
- An excellent distribution of loans among borrowers of different income levels and to businesses of different revenue sizes;
- Exhibits a good record of serving the credit needs of low-income individuals and areas and very small businesses;
- A relatively high level of community development loans;
- Extensive use of flexible lending practices in serving the assessment area's credit needs;
- An excellent level of qualified community development investments and grants;
- Often in a leadership position in providing community development investments and grants;
- Retail delivery systems are accessible to all geographies and individuals of different income levels and businesses of different revenue sizes;
- A record of opening and closing banking centers that has not adversely affected the accessibility of delivery systems;
- Banking services and hours that do not vary in a way that inconveniences any portions of the assessment areas; and,
- A leader in providing community development services.

SCOPE OF EXAMINATION

A full-scope review was conducted for the Charlotte-Gastonia-Concord MSA in North Carolina. Limited-scope reviews were performed on the remaining four assessment areas: the Asheville MSA, Hickory-Lenoir-Morganton MSA, non-metropolitan Western North Carolina, and Raleigh-Cary MSA. The time period, products, and affiliates evaluated for this assessment area are consistent with the scope discussed in the "Institution" section of this report.

The Charlotte-Gastonia-Concord assessment areas received greater weight in determining the CRA rating for the state. This area had the largest lending volume and number of banking centers and ranked first in this state's share of deposits during the evaluation period. Lastly, this area represented 69.0% of the banking centers, 73.9% of deposits, and 75.1% of lending in North Carolina.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE STATE OF NORTH CAROLINA

Lending activity accounted for 4.4% of the Fifth Third's total lending activity, while deposits accounted for 3.0% of the Fifth Third's total deposits. HMDA-reportable lending in North Carolina represented 4.1% of the Fifth Third's total HMDA lending, while CRA-reportable lending represented 5.0% of the Fifth Third's total CRA lending. As of June 30, 2016, Fifth Third ranked tenth among 93 insured institutions and has a deposit market share of 0.9% and 58 banking center locations within North Carolina.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE STATE OF NORTH CAROLINA

Lending Test

Fifth Third's performance under the lending test within the assessment areas located in North Carolina is rated "High Satisfactory." Fifth Third's lending reflects a good responsiveness to the credit needs in the Charlotte-Gastonia-Concord and non-metropolitan Western North Carolina assessment areas. Lending reflects an adequate responsiveness in the remaining three assessment areas: Asheville, Hickory-Lenoir-Morganton, and Raleigh-Cary.

Lending Activity

In North Carolina, Fifth Third originated 4,317 HMDA loans totaling $756.8 million and 1,970 small business loans totaling $188.6 million during the evaluation period.

Lending activity in North Carolina is good. The Charlotte-Gastonia-Concord and non-metropolitan Western North Carolina assessment areas have good lending activity. Lending activity is adequate in the remaining three assessment areas.

Geographic and Borrower Distribution

The distribution of loans among geographies is good in the assessment areas located in North Carolina. The geographic distribution is good in the Charlotte-Gastonia-Concord assessment area and adequate in the remaining four assessment areas.

A low level of lending gaps was identified in North Carolina. There was a low level of lending gaps in the Charlotte-Gastonia-Concord and non-metropolitan Western North Carolina assessment areas and a moderate level of lending gaps in the remaining three assessment areas.

Overall, the distribution of loans is excellent among borrowers of different income levels and to businesses of different revenue sizes in the assessment areas located in North Carolina. The borrower distribution is excellent in the Charlotte-Gastonia-Concord assessment area and good in non-metropolitan Western North Carolina.

Borrower distribution is adequate in the remaining three assessment areas. The distribution to businesses of different revenue sizes is excellent in the Charlotte-Gastonia-Concord assessment area and non-metropolitan Western North Carolina and adequate in remaining three assessment areas.

A detailed analysis for the geographic distribution and borrower-income distribution is provided with the analysis for each assessment area.

Community Development Loans

In North Carolina, Fifth Third originated 49 community development loans totaling $327.7 million, which represents 5.5% of the Fifth Third's community development lending by dollar volume. This is a relatively high level of community development lending in North Carolina. Fifth Third made a relatively high level of community development loans in the Charlotte-Gastonia-Concord, Asheville, Hickory-Lenoir-Morganton, and Raleigh-Cary assessment areas and an adequate level of community development loans in non-metropolitan Western North Carolina.

Flexible Lending

Fifth Third consistently made extensive use of flexible lending practices within assessment areas located in North Carolina.

<u>Investment Test</u>

Fifth Third's performance under the investment test within the assessment areas located in North Carolina is rated "Outstanding." Fifth Third funded $66.2 million in qualified community development investments in North Carolina during the evaluation period, consisting of $48.2 million obtained from new investments made during the current review period and $18.0 million from prior period investments. The majority of investments were LIHTCs. Fifth Third's level of qualified investments is excellent in the Charlotte-Gastonia-Concord assessment area and good in the remaining four assessment areas.

Fifth Third was considered responsive to the credit and community development needs in the state; therefore, investments without a purpose, mandate, or function of serving Fifth Third's assessment areas in North Carolina were considered to positively impact state performance. Fifth Third made $1.1 million in qualified investments, typically in the form of LIHTCs that benefited counties within the state, but were outside Fifth Third's delineated assessment areas within North Carolina.

Additional information regarding performance under the investment test is provided in the respective analyses for each assessment area.

Service Test

Fifth Third's performance under the service test within the assessment areas located in North Carolina is rated "Outstanding." The Fifth Third's performance is excellent in the Charlotte-Gastonia-Concord assessment area, adequate in Raleigh-Cary assessment area, and good in the remaining three assessment areas.

For details regarding the institution's performance in the individual assessment areas, refer to the respective assessment area's "Service Test" section in this report.

Retail Services

Retail delivery systems are accessible to all geographies, including low- and moderate-income geographies, individuals of different income levels, and businesses of different revenue sizes in Fifth Third's assessment areas. Retail service distribution is good in the Charlotte-Gastonia-Concord, non-metropolitan Western North Carolina, and Raleigh-Cary assessment areas and adequate in the remaining two assessment areas.

Fifth Third has 58 banking centers in North Carolina, which represents 4.5% of Fifth Third's total branches. Fifth Third's record of opening and closing banking centers has not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and to low- and moderate-income individuals. One branch closed in a moderate-income tract during the evaluation period in the Charlotte-Gastonia-Concord assessment area.

Banking services and business hours do not vary in a way that inconveniences any portions of the Fifth Third's assessment areas and are consistent with the services and hours discussed in the "Institution" assessment.

Community Development Services

Fifth Third is a leader in providing community development services in North Carolina. Fifth Third's performance is excellent in the Charlotte-Gastonia-Concord, Asheville, and Hickory-Lenoir-Morganton assessment areas The level of community development services is good in the non-metropolitan Western North Carolina and poor in the Raleigh-Cary assessment areas.

METROPOLITAN AREA
(Full-scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN CHARLOTTE-GASTONIA-CONCORD NC-SC MSA #16740

The Charlotte-Concord-Gastonia NC-SC MSA consists of Cabarrus, Gaston, Iredell, Lincoln, Mecklenburg, Rowan, and Union counties in North Carolina. Fifth Third's assessment area excludes Chester, Lancaster, and York counties in South Carolina. Since there are no branches in the South Carolina portion of the multi-state MSA and Fifth Third only takes the counties in North Carolina that are part of this multi-state MSA, the Charlotte NC-SC MSA is evaluated under North Carolina and not as a separate multi-state MSA. The assessment area is comprised of 42 low-, 109 moderate-, 165 middle-, and 148 upper-income tracts. There are also four tracts with no income designation that are primarily composed of correctional institutions, military establishments, education facilities, or medical establishments that do not report income information.

As of June 30, 2016, Fifth Third ranked fourth out of 36 institutions with 1.2% of the deposit market share. Bank of America had the majority of the market share 75.5% of deposits. The next two largest institutions, Wells Fargo Bank and BB&T, had 15.1% and 2.8% of the market share, respectively. Deposits in this assessment area accounted for 2.2% of Fifth Third's total deposits. This was 73.9% of deposits within the state and the 12th highest percentage of deposits within Fifth Third's CRA footprint.

From January 1, 2014 through June 30, 2016, Fifth Third originated 3,201 HMDA loans and 1,520 CRA loans, which represented 3.1% and 3.9% of the total loans originated during the evaluation period, respectively. This was the ninth-largest HMDA market and seventh largest CRA market for loans originated during the evaluation period.

In 2015, Fifth Third Mortgage Company ranked 12th among 649 HMDA reporters in the assessment area and Fifth Third ranked 65th. Wells Fargo Bank, Movement Mortgage, Quicken Loans, and Bank of America were the top four HMDA lenders in the assessment area. Fifth Third ranked 16th of 135 CRA reporters in the assessment area in 2015. The top four CRA lenders in the assessment area were American Express, Wells Fargo Bank, Bank of America, and BB&T. These lenders are mostly issuers of credit cards and their CRA loans primarily consist of commercial credit card accounts.

Two community contact interviews were conducted to provide additional information regarding the assessment area. The first contact, representing a nonprofit housing development corporation, stated the organization is currently participating in a mixed-use development project that will help to revitalize the central city corridor. The mixed-use facility will include market-rate apartments, condominiums, single-family homes and townhomes, and commercial properties. This project offers local financial institutions opportunities to fund community development and small business projects. The contact mentioned strong relationships with most of the local financial institutions, including Bank of America, Fifth Third, Wells Fargo, BB&T, and PNC.

The second contact, representing a small business development center, believed that even in the growing economy, small business owners can still experience difficulties obtaining financing from local banks due to strict underwriting criteria. Therefore, there are opportunities for financial institutions to provide small-dollar loans and financial education for small business owners.

Population Characteristics

According to the 2010 U.S. Census data, the population in the assessment area was 1.9 million. About 29.0% of the population lived in low- and moderate-income tracts. In addition, 74.3% of the population was 18 years of age or older, the legal age to enter into a contract.

As of July 1, 2015, the Charlotte MSA is the 22nd largest in terms of population in the nation.[226] Mecklenburg County is the largest county in the assessment area and in North Carolina.[227] Charlotte is the largest city in Mecklenburg County and North Carolina and the 17th largest city in the nation with 827,097 residents; its population increased by 45.1% between 2000 and 2015. Concord is the largest city in Cabarrus County with 87,696 residents; its population increased by 54.8% between 2000 and 2015. Gastonia is the largest city in Gaston County with 74,543 residents; its population increased by 10.2% between 2000 and 2015.[228]

According to Carolina Population Center University of North Carolina,[229] North Carolina's population is projected to increase by nearly 11.0% and gain more than 1 million new residents and reach a population of nearly 10.6 million by 2020. Virtually all of North Carolina's growth is projected to occur in counties within metropolitan areas; 33.0% of the state's growth is projected to occur in the greater Charlotte region. Growth rates of more than 20.0% are projected by 2020 in Mecklenburg, Union, and Cabarrus counties.

The following table shows the population in the assessment area by county for 2010 and 2015 with the percentage of the population increase.[230] The population within the assessment area experienced positive growth between 2010 and 2015, with Mecklenburg County experiencing the greatest growth and Rowan County experiencing the least growth in population during this time period.

[230] Population Estimates derived from U.S. Census Data (April 1, 2010 – July 1, 2015): http://www.census.gov/quickfacts/table/PST045216/00

County	2010 Population	2015 Population	Population Percent Change
Cabarrus	178,011	196,762	10.5%
Gaston	206,086	213,442	3.6%
Iredell	159,437	169,866	6.5%
Lincoln	78,265	81,035	3.5%
Mecklenburg	919,628	1,034,070	12.4%
Rowan	138,428	139,142	0.5%
Union	201,292	222,742	10.7%
Total	**1,881,147**	**2,057,059**	**9.4%**

Income Characteristics

In 2010, the assessment area median family income was $62,777, which exceeded both the MSA median family income at $61,974 and North Carolina's at $56,153. The MSA's median family income substantially increased between 2010 and 2014. The median family income increased again in 2015 and declined to some extent in 2016.

Borrower Income Levels
Charlotte-Concord-Gastonia, NC-SC MSA

FFIEC Estimated Median Family Income		Low			Moderate			Middle			Upper		
		0	-	49.99%	50%	-	79.99%	80%	-	119.99%	120%	-	& above

Poverty rates increased in each county in the assessment area from 1999 to 2015.[231] Cabarrus County had the lowest poverty rate in 1999 and Union County had the lowest poverty rate in 2015. Gaston and Rowan counties had highest poverty rates in 1999 and 2015. In 2015, Gaston and Rowan counties' poverty rates were higher than North Carolina's poverty rate and in 2015, North Carolina's poverty rate exceeded that of the nation. According to the U.S. Census Bureau, the national poverty rate in 2015 was 13.5%, down 1.3 percentage points from 14.8% in 2014. For most demographic groups, the 2015 poverty rates and number of people in poverty decreased from 2014.[232] The following table shows the poverty rates for 1999[233] and 2015.

[231] United States Department of Agriculture Economic Research Service Poverty Rates (for 1999 and 2015): https://data.ers.usda.gov/reports.aspx?ID=17826
[232] 2015 National Poverty: http://www.census.gov/library/publications/2016/demo/p60-256.html
[233] 1999 National Poverty Rate: http://www.census.gov/prod/2000pubs/p60-210.pdf

County	1999 Poverty Rate	2015 Poverty Rate	Change
Cabarrus	7.1%	10.8%	52.1%
Gaston	10.9%	17.3%	58.7%
Iredell	8.2%	14.2%	73.2%
Lincoln	9.2%	13.4%	45.7%
Mecklenburg	9.2%	14.3%	55.4%
Rowan	10.6%	17.3%	63.2%
Union	8.1%	9.7%	19.8%
North Carolina	**12.3%**	**16.4%**	**33.3%**
United States	**11.8%**	**13.5%**	**14.4%**

Housing Characteristics

According to 2010 U.S. Census data, there are 697,360 housing units and 470,872 families in the assessment area. From an income perspective, 30.6% of housing units, 21.8% of owner-occupied units, and 27.6% of families are located in low- or moderate-income tracts. About 71.6% of the housing units in the low-income census tracts are either rental or vacant and 28.3% are owner-occupied. In the moderate-income census tracts, over half of the housing units are either rental or vacant (51.2%) and 48.8% are owner-occupied. Therefore, based on the number of housing units compared to the number of families in low- and moderate-income census tracts, there appear to be credit-related opportunities for Fifth Third to provide various aspects of affordable housing in the assessment area.

The 2010 U.S. Census data shows the median age of housing stock in the assessment area was only 24 years old, with 9.0% of the stock built before 1950. The oldest housing stock was in Gaston County with a median age of 33 years. Within the assessment area, the median age of housing stock was 42 years in low-income tracts and 34 years in moderate-income tracts. Therefore, there appears to be opportunity for Fifth Third to provide home improvement and rehabilitation loans in these lower-income areas.

According to the 2010 U.S. Census data, the median housing value in the assessment area was $166,768, with an affordability ratio of 31.47. The affordability ratio is derived by dividing the median household income by the median housing value. The higher the affordability ratio, the more affordable a home is considered. Overall, median housing values increased between 2010 and 2011-2015 and housing affordability became slightly less affordable across the assessment area, primarily due increased demand. During this review period, the most affordable housing was in Gaston County, with the least affordable in Mecklenburg County. According to Moody's Analytics, rising wages and a growing population support strong home price appreciation. Home prices in the metropolitan area are climbing faster than in the rest of the state and nation and year-over-year growth is the strongest since 2012.

Developers are also quickly adding supply, which will alleviate upward pressure on prices in 2017 and beyond. Median gross rents increased at a fairly substantial rate across the assessment area, with renters in Cabarrus County and Mecklenburg County experiencing the largest increase in rental rates. In 2010, about 43.8% of renters across the assessment area had rent costs greater than 30.0% of income. Increasing rental rates may make it harder for potential homebuyers to save enough for a down payment for a home. The table below presents housing characteristics from the U.S. Census data between 2010 and 2015 in the assessment area and North Carolina.

County	2010 Median Housing Value	2010 Affordability Ratio	2011-2015 Median Housing Value	2011-2015 Affordability Ratio	2010 Median Gross Rent	2011-2015 Median Gross Rent	Percent of Change
Cabarrus	$164,100	32.86	$167,100	32.75	$727	$823	13.2%
Gaston	$120,800	35.81	$125,100	33.92	$678	$731	7.8%
Iredell	$164,300	29.80	$166,300	31.45	$712	$796	11.8%
Lincoln	$146,700	32.34	$153,200	32.12	$631	$671	6.3%
Mecklenburg	$185,100	29.87	$184,800	30.77	$829	$938	13.1%
Rowan	$125,100	34.85	$128,300	33.57	$666	$722	8.4%
Union	$194,900	32.52	$197,400	33.39	$787	$868	10.3%
North Carolina	**$149,100**	**30.56**	**$154,900**	**30.26**	**$718**	**$797**	**11.0%**

According to Bankrate.com,[234] North Carolina ranked 31st for foreclosure filings in November 2016. The national average for foreclosure filings was 1 in every 1,533 housing units. The following table contains information about foreclosure filings in the assessment area, according to Realtytrac:[235]

Geography Name	Ratio of Properties Receiving Foreclosure Filings in November 2016
Cabarrus	1:2,368
Gaston	1:1,032
Iredell	1:1,848
Lincoln	1:8,112
Mecklenburg	1:1,270
Rowan	1:1,022
Union	1:3,321
North Carolina	**1:2,179**
United States	**1:1,533**

[234] Bankrate.com: http://www.bankrate.com/finance/real-estate/foreclosures-by-state/default.aspx
[235] Realtytrac: http://www.realtytrac.com/statsandtrends/foreclosuretrends/

In November 2016, Rowan County had the highest and Lincoln County had the lowest rate of foreclosure in the assessment area. Rowan and Gaston were two of the top five counties with highest foreclosure rates in the state in November 2016. The rate of foreclosure in North Carolina was below the national rate.

Building permits for this MSA, North Carolina, and the nation are included in the following table for 2014, 2015, and 2016.[236]

Geography	2014	2015	Percent of Change 2014-2015	2016	Percent of Change 2015-2016
Charlotte-Concord-Gastonia MSA	18,537	19,543	5.4%	20,574	5.3%
North Carolina	**49,913**	**54,754**	**9.7%**	**60,550**	**10.6%**
United States	**1,052,124**	**1,182,582**	**12.4%**	**1,190,191**	**0.6%**

The MSA experienced a consistent increase in the number of housing permits issued between 2014 and 2015 and 2015 and 2016. The increase in the number of permits indicates there is a growing demand for home purchase loans in the MSA and in North Carolina during the evaluation period. According to Moody's Analytics, residential housing permits jumped the most on record in the 3Q16 and are now back to where they were in the mid-2000s. Construction will add workers at an above-average rate through the end of the decade.

Labor, Employment, and Economic Characteristics

According to Moody's Analytics, the Charlotte metropolitan area economy is growing at a rapid pace. The area is experiencing rapid growth in high-wage areas such as financial activities, logistics, healthcare, and other professional services. The area is favorable to businesses, with low business costs and a highly skilled workforce that draws firms to the area. Competitive living costs support strong in-migration trends. Average hourly earnings in the Charlotte metropolitan area have surged and exceed those nationally by the most since 2012. Accelerating wage growth and an expanding pool of wage earners will drive healthy gains in consumer consumption and job additions in retail and leisure/hospitality will continue to be above average in 2017.

According to the *Charlotte Business Journal*,[237] the Charlotte metropolitan area is home to seven Fortune 500 headquarters. In the past year, Sonic Automotive moved up 18 places on the list, while Nucor Corporation fell 31 places from the previous year.

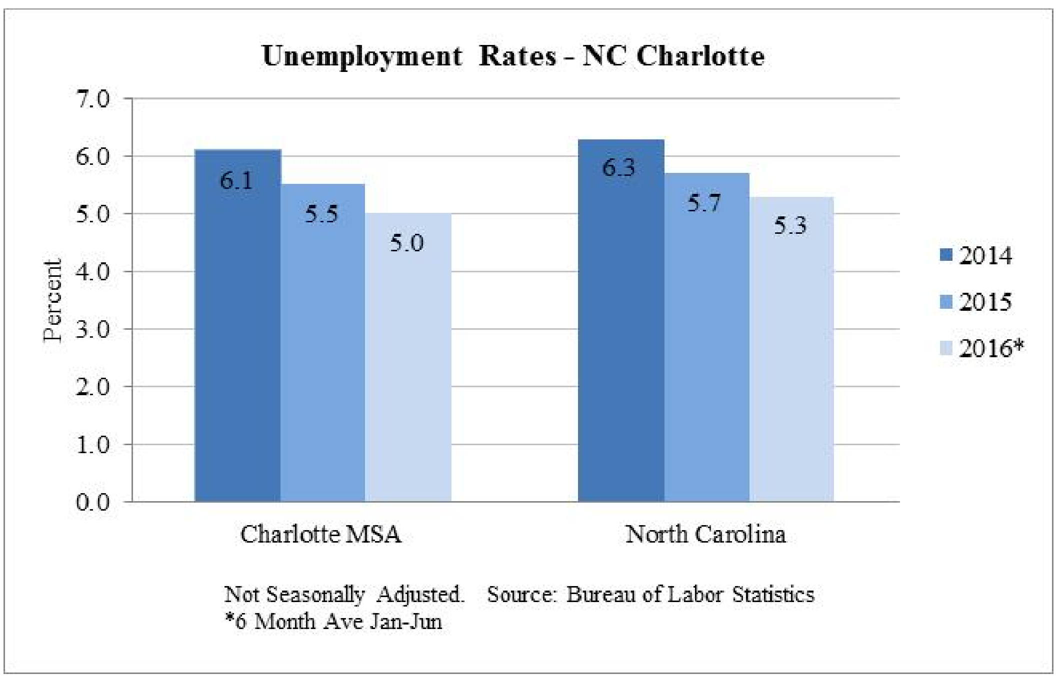
[236] U.S. Census Bureau Building Permits Survey: http://www.census.gov/construction/bps/
[237] Charlotte Business Journal: http://www.bizjournals.com/charlotte/news/2016/06/07/the-carolinas-lose-two-fortune-500-companies-this.html

Charlotte Metropolitan area Fortune 500 Companies (2016)		
Rank	**Company**	**Revenue**
26	Bank of America	$93.1 billion
47	Lowe's Companies	$59.1 billion
115	Duke Energy Corporation	$24.0 billion
170	Nucor Corporation	$16.4 billion
297	Sonic Automotive	$9.6 billion
375	Sealed Air Corporation	$7.0 billion
489	Domtar Corporation	$5.3 billion

According to Moody's Analytics, the top ten employers in the Charlotte MSA in 2015 were:

Company	Number of Employees
Carolinas HealthCare System	35,000
Wells Fargo	22,100
Wal-Mart Stores, Inc.	16,100
Bank of America	15,000
Lowe's Companies	12,960
Novant Health, Inc.	11,000
Presbyterian Regional Healthcare	10,676
American Airlines	9,900
Ruddick/Harris Teeter Inc.	8,239
The Timken Co.	8,000

The following table illustrates the average unemployment rates for 2014, 2015, and 2016 for the MSA and North Carolina.



The unemployment rates declined each year in MSA and were lower than North Carolina's each year. No major layoffs were noted in this assessment area during the evaluation period.

2016 FFIEC Census Data and 2015 D&B Information

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE CHARLOTTE-GASTONIA-CONCORD NC-SC MSA

Lending Test

Fifth Third's performance under the lending test in this assessment area is rated good. Fifth Third has demonstrated a good responsiveness to the credit needs of the community. In addition, Fifth Third originated 33 community development loans totaling $170.5 million. Fifth Third has a good geographic distribution of loans and a low level of lending gaps. Fifth Third has an excellent distribution among borrowers of different income levels and to businesses of different revenue sizes. Fifth Third exhibits a good record of serving the credit needs of highly economically disadvantaged areas in its assessment area, low-income individuals, and businesses with gross annual revenues of $1 million or less. The good level of community development loans and extensive use of flexible lending practices augmented Fifth Third's performance in this assessment area.

Greatest consideration was given to the evaluation of refinance lending based on the overall volume of lending, followed by small business, home purchase, and home improvement lending. Details of Fifth Third's residential mortgage and small business lending, as well as information regarding lending by peers, can be found in Appendix E.

Lending Activity

Fifth Third's lending activity reflects a good responsiveness to the credit needs within the assessment area. Fifth Third originated 1,536 refinance, 1,494 home purchase, 171 home improvement, 1,520 small business, and 33 community development loans during the evaluation period. The percentage of Fifth Third's total lending at 3.3% is greater than the percentage of total deposits at 2.2% in this area.

Fifth Third made 93.2% of the HMDA lending and 98.3% of the CRA lending within its designated assessment area. While a concentration of lending was noted in York County, South Carolina with 164 HMDA loans, the majority of loans were made within North Carolina. Fifth Third does not have a physical presence in South Carolina.

In addition to lending, Fifth Third modified existing loans to borrowers. Refer to the distribution of HAMP and other real-estate secured modifications within the assessment area by census tract income and by borrower income.

	Distribution by Census Tract Income							
	Low		Mod		Middle		Upper	
	#	%	#	%	#	%	#	%
Other Real Estate Secured Modifications	4	2.9%	31	22.8%	52	38.2%	49	36.0%
Percentage of Owner Occupied Units		***3.4%***		***18.4%***		***39.9%***		***38.3%***

*Unknown tract data is not included in the above table.

	Distribution by Borrower Income							
	Low		Mod		Middle		Upper	
	#	%	#	%	#	%	#	%
Other Real Estate Secured Modifications	40	29.4%	32	23.5%	31	22.8%	32	23.5%
Percentage of Families by Family Income		***21.0%***		***17.3%***		***20.4%***		***41.4%***

*Unknown tract data is not included in the above table.

There were not enough HAMP modifications for a meaningful analysis. The percentage of other modifications in low-income tracts was slightly below the percentage of owner occupied units in these geographies and the percentage of other modifications in moderate-income tracts exceeded proxy. Therefore, modifications helped to expand lending activities in these areas. The percentage of other modifications made to low- and moderate-income borrowers exceeded the percentage of low- and moderate-income families in the assessment area. Therefore, modifications enhanced Fifth Third's ability to reach low- and moderate-income borrowers.

Geographic Distribution of Loans

Fifth Third's overall distribution of lending among geographies is good. Refinance lending, which was the largest loan category, is good. Home improvement lending is also good, and home purchase lending is excellent. Small business lending is good. There is also an overall low level of lending gaps. The following gaps in lending were noted in the assessment area:

Tract Income Levels	Number of Tracts	Tracts with No Loans	Penetration
Low	42	5	88.1%
Moderate	109	4	96.3%
Middle	165	2	98.8%
Upper	148	2	98.7%
Unknown	4	1	75.0%
Total	**468**	**14**	**97.0%**

Lending gaps are considered minimal due to the low number of lending gaps in moderate-, middle-, and upper-income tracts. The gaps in low-income tracts can be attributed to the low level of owner-occupied units (28.3%) and small businesses (7.4%) located in these census tracts.

Refinance Loans

Fifth Third made 45 refinance loans totaling $5.5 million in low-income tracts. This represents 2.9% of refinance loans by volume and 2.2% by dollar amount, which is below the percentage of owner-occupied units at 3.4%. The percentage of loans by volume was below the 2014 aggregate at 2.6% and exceeded the 2015 aggregate at 1.8%. As Fifth Third's performance exceeded the aggregate of all lenders, but was below proxy, the geographic distribution of refinance loans in low-income tracts is good.

Fifth Third made 256 refinance loans totaling $27.5 million in moderate-income tracts. This represents 16.7% of refinance loans by volume, which is below the owner-occupied units in these tracts at 18.4%. The percentage of loans by dollar amount at 11.0% is significantly below proxy. The percentage of loans by volume was below the 2014 aggregate at 13.5% and exceeded the 2015 aggregate at 11.6%. As Fifth Third's performance was below proxy and exceeded the aggregate of all lenders, the geographic distribution of refinance loans in moderate-income tracts is excellent.

Fifth Third made 570 refinance loans totaling $71.8 million in middle-income tracts. This represents 37.1% of refinance loans by volume, which is below the owner-occupied units in these tracts at 39.9%, and 28.7% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate at 37.5% and the 2015 aggregate at 33.8%.

Fifth Third made 663 refinance loans totaling $144.6 million in upper-income tracts. This represents 43.2% of refinance loans by volume, which exceeds the owner-occupied units in these tracts at 38.3%, and 57.9% by dollar amount, which exceeds proxy. The percentage of loans by volume was below the 2014 aggregate at 46.3% and was below the 2015 aggregate at 52.8%.

Overall, the geographic distribution of refinance loans is good.

Home Purchase Loans

Fifth Third made 69 home purchase loans totaling $9.2 million in low-income tracts. This represents 4.6% of home purchase loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 3.4%, and 3.3% by dollar amount, which is comparable to proxy. The percentage of loans by volume exceeded the 2014 aggregate at 2.1% and significantly exceeded the 2015 aggregate at 2.8%. As Fifth Third's performance significantly exceeded the aggregate of all lenders and exceeded proxy, the geographic distribution in low-income tracts is excellent.

Fifth Third made 267 home purchase loans totaling $31.0 million in moderate-income tracts. This represents 17.9% of home purchase loans by volume, which is comparable to the percentage of owner-occupied units in these tracts at 18.4%, and 11.2% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate at 12.8% and exceeded the 2015 aggregate at 13.4%. As Fifth Third's performance exceeded the aggregate of all lenders and was comparable to proxy, the geographic distribution in moderate-income tracts is excellent.

Fifth Third made 547 home purchase loans totaling $78.5 million in middle-income tracts. This represents 36.6% of home purchase loans by volume, which is below the percentage of owner-occupied units in these tracts at 39.9%, and 28.4% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 34.4% and was comparable to the 2015 aggregate of 35.2%.

Fifth Third made 610 home purchase loans totaling $156.9 million in upper-income tracts. This represents 40.8% of home purchase loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 38.3%, and 56.9% by dollar amount, which exceeds proxy. The percentage of loans by volume was below the 2014 aggregate of 50.5% and the 2015 aggregate of 48.6%.

Overall, the geographic distribution of home purchase loans is excellent.

Home Improvement Loans

Fifth Third made four home improvement loans totaling $203,000 in low-income tracts. This represents 2.3% of home improvement loans by volume, which is below the percentage of owner-occupied units in these tracts at 3.4%, and 1.4% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate of 3.6% and was comparable to the 2015 aggregate of 2.4%. Given the high median age of housing in low-income areas at 42 years, which may indicate the need for home improvement lending and Fifth Third's lending performance in these tracts, the geographic distribution of home improvement loans in low-income tracts is good.

Fifth Third made 31 home improvement loans totaling $2.0 million in moderate-income tracts. This represents 18.1% of home improvement loans by volume, which is comparable to the percentage of owner-occupied units in these tracts at 18.4%, and 14.5% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate of 17.2% and exceeded the 2015 aggregate of 16.5%. As Fifth Third's performance was comparable to proxy and exceeded the aggregate of all lenders, the geographic distribution of home improvement loans in moderate-income tracts is good.

Fifth Third made 79 home improvement loans totaling $5.5 million in middle-income tracts. This represents 46.2% of home improvement loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 39.9%, and 38.7% by dollar amount and is comparable to proxy. The percentage of loans by volume exceeded the 2014 aggregate of 36.7% and exceeded the 2015 aggregate of 35.9%.

Fifth Third made 57 home improvement loans totaling $6.4 million in upper-income tracts. This represents 33.3% of home improvements loans by volume, which is below the percentage of owner-occupied units in these tracts at 38.3%, and 45.4% by dollar amount, which exceeds proxy. The percentage of loans by volume was below the 2014 aggregate of 42.5% and was below the 2015 aggregate of 45.2%.

Overall, the geographic distribution of home improvement loans is good.

Small Business Loans

Fifth Third made 100 small business loans totaling $15.6 million in low-income tracts. This represents 6.6% of small business loans by volume, which is comparable to the percentage of businesses in these tracts at 6.9%, and 10.8% by dollar amount, which exceeds proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 8.2% and was below the 2015 aggregate of 8.4%. Give that Fifth Third's performance was comparable to proxy and the aggregate of all lenders, the geographic distribution of small business loans in low-income tracts is good.

Fifth Third made 238 small business loans totaling $27.5 million in moderate-income tracts. This represents 15.7% of small business loans by volume, which is below the percentage of businesses in these tracts at 17.5%. Small business loans by dollar amount at 19.1% exceed proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 14.6% and exceeded the 2015 aggregate of 14.8%. Given that Fifth Third's performance exceeded the aggregate of all lenders, but was below proxy, the geographic distribution of small business loans in moderate-income tracts is good.

Fifth Third made 530 small business loans totaling $46.3 million in middle-income tracts. This represents 34.9% of small business loans by volume, which exceeds the percentage of businesses in these tracts at 33.5%, and 32.2% by dollar amount, which is comparable to proxy. The percentage of loans by volume exceeded the 2014 aggregate of 31.6% and exceeded the 2015 aggregate of 31.7%.

Fifth Third made 637 small business loans totaling $50.8 million in upper-income tracts. This represents 41.9% of small business loans by volume, which is comparable to the percentage of businesses in these tracts at 41.4%, and 35.2% by dollar amount, which is below proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 42.7% and was comparable to the 2015 aggregate of 42.6%.

Overall, the geographic distribution of small business loans is good.

Distribution by Borrower Income and Revenue Size of the Business

Overall, the distribution of loans is excellent based on borrower income and for businesses of different revenue sizes. Borrower distribution is excellent for refinance, home purchase, and home improvement loans.

Refinance Loans

Fifth Third made 189 loans totaling $17.1 million to low-income borrowers. This represents 12.3% of refinance loans by volume, which is below the percentage of low-income families at 21.0%. Also, the percentage of loans by dollar amount in these geographies at 6.8% is significantly below proxy. The percentage of loans by volume significantly exceeded the 2014 aggregate of 6.7% and the 2015 aggregate of 5.0%. Given Fifth Third's performance significantly exceeded the aggregate of all lenders, the borrower distribution of refinance loans to low-income borrowers is excellent.

Fifth Third made 303 loans totaling $31.2 million to moderate-income borrowers. This represents 19.7% of refinance loans by volume, which exceeds the percentage of moderate-income families at 17.3%, and 12.5% by dollar volume, which is below proxy. The percentage of loans by volume substantially exceeded the 2014 aggregate of 13.9% and 5 substantially exceeded the 2015 aggregate of 11.9%. As Fifth Third's performance exceeded proxy and substantially exceeded the aggregate of all lenders, the borrower distribution of refinance loans to moderate-income borrowers is excellent.

Fifth Third made 314 loans totaling $39.0 million to middle-income borrowers. This represents 20.4% of refinance loans by volume, which is comparable to the percentage of middle-income families at 20.4%, and 15.6% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 17.0% and exceeded the 2015 aggregate of 16.5%.

Fifth Third made 581 loans totaling $131.8 million to upper-income borrowers. This represents 37.8% of refinance loans by volume, which is below the percentage of upper-income families at 41.4%, and 52.8% by dollar amount, which exceeds proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 37.7% and was below the 2015 aggregate of 41.0%.

Overall, the borrower distribution of refinance loans is excellent.

Home Purchase Loans

Fifth Third made 307 loans totaling $28.6 million to low-income borrowers. This represents 20.5% of home purchase loans by volume, which is comparable to the percentage of low-income families at 21.0%, and 10.4% by dollar amount, which is significantly below proxy. The percentage of loans by volume significantly exceeded the 2014 aggregate of 6.3% and significantly exceeded the 2015 aggregate of 6.1%. As Fifth Third's performance significantly exceeded the aggregate of all lenders and was comparable to proxy, the borrower distribution of home purchase loans to low-income borrowers is excellent.

Fifth Third made 348 loans totaling $42.9 million to moderate-income borrowers. This represents 23.3% of home purchase loans by volume, which exceeds the percentage of moderate-income families at 17.3%, and 15.6% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 17.6% and the 2015 aggregate of 18.5%. As Fifth Third's performance exceeded proxy and the aggregate of all lenders, the borrower distribution of home purchase loans to moderate-income borrowers is excellent.

Fifth Third made 223 loans totaling $35.8 million to middle-income borrowers. This represents 14.9% of home purchase loans by volume, which is below the percentage of middle-income families at 20.4%, and 13.0% by dollar amount, which is also below proxy. The percentage of loans by volume was below the 2014 aggregate of 17.7% and the 2015 aggregate of 18.8%.

Fifth Third made 494 loans totaling $132.3 million to upper-income borrowers. This represents 33.1% of home purchase loans by volume, which is below the percentage of upper-income families at 41.4%, and 49.8% by dollar amount, which exceeds proxy. The percentage of loans by volume was below the 2014 aggregate of 38.5% and was below the 2015 aggregate of 38.7%.

Overall, the borrower distribution of home purchase loans is excellent.

Home Improvement Loans

Fifth Third made 37 loans totaling $1.7 million to low-income borrowers. This represents 21.6% of home improvement loans by volume, which is comparable to the percentage of low-income families at 21.0%, and 12.4% by dollar amount, which is significantly below proxy. The percentage of loans by volume significantly exceeded the 2014 aggregate of 9.7% and the 2015 aggregate of 7.6%. Given that Fifth Third's performance significantly exceeded the aggregate of all lenders and was comparable to proxy, the borrower distribution of home improvement loans to low-income borrowers is excellent.

Fifth Third made 42 loans totaling $2.4 million to moderate-income borrowers. This represents 24.6% of its home improvement loans by volume, which exceeds the percentage of moderate-income families at 17.3%, and 16.8% by dollar amount, which is comparable to proxy. The percentage of loans by volume exceeded the 2014 aggregate of 17.1% and exceeded the 2015 aggregate of 16.3%. Given that Fifth Third's performance exceeded the aggregate of all lenders and proxy, the borrower distribution of home improvement loans to moderate-income borrowers is excellent.

Fifth Third made 42 loans totaling $3.6 million to middle-income borrowers. This represents 24.6% of home improvement loans by volume, which exceeds the percentage of middle-income families at 20.4%, and 25.7% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 20.3% and exceeded the 2015 aggregate of 19.9%.

Fifth Third made 50 loans totaling $6.4 million to upper-income borrowers. This represents 29.2% of home improvement loans by volume, which is significantly below the percentage of upper-income families at 41.4%, and 45.1% by dollar amount, which exceeds proxy. The percentage of loans by volume was below the 2014 aggregate of 43.8% and the 2015 aggregate of 47.8%.

Given Fifth Third's strong performance to low- and moderate-income borrowers, the overall borrower distribution of home improvement loans is excellent.

Small Business Loans

The distribution of small business loans to businesses of different sizes is excellent, considering Fifth Third's performance relative to the aggregate of all lenders. Fifth Third was able to make 62.8% of small business loans to businesses with revenues of $1 million or less. Fifth Third's performance exceeded the 2014 aggregate of 47.0% and the 2015 aggregate of 52.3%, but was significantly below the percentage of small businesses in the assessment area at 92.3%.

Also, during the evaluation period, Fifth Third was able to make a relatively high percentage of small-dollar loans (81.1%) up to $100,000, indicating a willingness to lend in smaller amounts typically requested by small businesses. In addition, a community contact indicated the need for small-dollar loans to small businesses.

Community Development Loans

Fifth Third originated 33 community development loans totaling $170.5 million during the evaluation period as shown in the table below:

Affordable Housing		Economic Development		Revitalization and Stabilization		Community Services	
#	$	#	$	#	$	#	$
2	14,285,000	9	52,282,258	17	89,200,000	5	14,708,253

Community development lending in the assessment area represents 2.8% of the total dollar volume of community development loans originated during the evaluation period. This ranks as Fifth Third's 11th highest percentage of community development lending during the evaluation period. Fifth Third's performance is notable because of the high competition for community development loans and a number of large national banks in the area. Fifth Third only has 1.2% of the deposit market share. As such, Fifth Third is considered to have a relatively high level of community development lending.

Examples of community development lending include, but are not limited to:

- Construction loans to a development corporation that supports affordable housing in a HUD Choice Neighborhood that helped to build new, affordable housing. Families pay 30.0% of their income toward the rent in these Section 8 housing developments.
- Multiple working capital loans that promote economic development by financing businesses to support job retention, add new jobs, and promote growth to continue operations in low- and moderate-income geographies
- Loan to support a solar energy financing in a low- and moderate-income area

Flexible Lending Programs

Fifth Third had 701 flexible lending loans in this assessment area: 503 government loans, 66 down payment assistance loans, and 132 other flexible lending programs. The following tables show the percentage by volume and by dollar amount of the three types of flexible lending programs made in this assessment area during the evaluation period and the distribution of Fifth Third's flexible lending programs within the assessment area by census tract income and by borrower income.

Flexible Loan Programs												
	Geographic Distribution

*Unknown tract data is not included in the above table.

Fifth Third's lending in low-income tracts by number was comparable to the percentage of owner-occupied units in these tracts and slightly below proxy by dollar amount. The percentage of lending by volume and dollar amount in moderate-income tracts exceeded the percentage of owner-occupied units in these geographies.

Fifth Third's lending by volume to low-income borrowers exceeded the percentage of low-income families, especially for down payment assistance programs, but was below proxy by dollar amount. The percentage of lending by volume and dollar amount to moderate-income borrowers exceeded the percentage of moderate-income families, especially for down payment assistance and government loan programs.

Fifth Third made extensive use of flexible lending practices in serving the assessment area's credit needs, as lending through flexible loan programs in low-income tracts was good and flexible lending in the lending in moderate-income tracts and to low- and moderate-income borrowers was excellent.

Investment Test

Fifth Third's performance relative to the investment test in the assessment area is rated excellent.

Fifth Third made an excellent level of qualified community development investments and grants, particularly those not routinely provided by private investors. As such, Fifth Third was often in a leadership position. Fifth Third has 150 qualified investments totaling $51.5 million during the evaluation period. Shown in the table below are the total current period investments:

Affordable Housing		Economic Development		Revitalization and Stabilization		Community Services	
#	$	#	$	#	$	#	$
23	18,716,709	2	550	3	20,651,233	113	531,808

Also included in the total number of qualified investments are nine prior period investments totaling $11.6 million. Overall, Fifth Third made 3.2% of its total community development investments in this assessment area, which is greater than the percentage of total deposits at 2.2% and equal to the percentage of branch offices at 3.1%.

Fifth Third exhibits an excellent responsiveness to credit and community development needs in the assessment area through investments in several affordable housing projects and community services throughout the assessment area. These were identified as important needs in the assessment area based on increasing housing prices and accelerating rent costs and higher-than-average poverty rates in multiple counties within the assessment area. Fifth Third made 125 donations totaling $578,858 that supported local schools, churches, small businesses, and social and charitable organizations. The majority of Fifth Third's donations (92.0%) supported services to low- and moderate-income individuals.

Service Test

Fifth Third's performance under the service test in this assessment area is rated excellent. Retail services are accessible and Fifth Third is a leader in providing community development services.

Retail Services

Fifth Third's record of opening and closing offices has not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and to low- and moderate-income households. Since the previous evaluation, no banking centers were opened. One banking center closed was located in a low- and moderate-income tract. Delivery services are accessible to Fifth Third's geographies and individuals of different income levels.

Business hours and services provided do not vary in a way that inconveniences certain portions of the assessment area, including low- and moderate-income geographies or households, and are consistent with the services and hours discussed in the "Institution" assessment.

Fifth Third maintains 40 banking centers within this assessment area, including two in low-, 10 in moderate-, eight in middle-, and 20 in upper-income census tracts. Fifth Third's banking centers in this assessment area represent 1.2% of all of its banking centers.

Fifth Third has a total of 51 full-service ATMs within this assessment area, including two in low-, 12 in moderate-, 13 in middle-, and 24 in upper-income census tracts.

The following table illustrates the percentage of banking centers and ATMs in low-, moderate-, middle-, and upper-income census tracts in comparison to the number and percentage of census tracts and the percentage of households and businesses in those tracts.

Geographic Distribution of Branches & ATMS

Assessment Area: NC Charlotte

Tract Category	Branches				Stand Alone ATMs								Demographics			
	Total Branches		Open	Closed	Total ATMs			Full Service ATMs		Cash only ATMs			Census Tracts		House holds	Total Businesses
	#	%	#	#		#	%	#	%	#	%		#	%	%	%
Low	2	5.0%	0	0	Total	9	13.0%	2	3.9%	7	38.9%		42	9.0%	6.9%	7.5%
Moderate	10	25.0%	0	1	Total	15	21.7%	12	23.5%	3	16.7%		109	23.3%	22.5%	17.4%
Middle	8	20.0%	0	0	Total	14	20.3%	13	25.5%	1	5.6%		165	35.3%	37.0%	33.1%
Upper	20	50.0%	0	0	Total	28	40.6%	24	47.1%	4	22.2%		148	31.6%	33.5%	41.1%
Unknown	0	0.0%	0	0	Total	3	4.3%	0	0.0%	3	16.7%		4	0.9%	0.0%	0.9%
Total	40	100.0%	0	1	Total	69	100.0%	51	100.0%	18	100.0%		468	100.0%	100.0%	100.0%

2016 FFIEC Census Data, 2010 ACS Data, and 2015 D&B Information
Closed branches/ATMs are only included in "closed" columns and are not included in any other totals.
DTO - Drive thru only is a subset of total branches
SA = Stand Alone ATM is a subset of total ATMs

Branch distribution within low-income tracts was considered adequate, as the distribution of branches was below the percentage of census tracts and households in these tracts. However, the branch distribution within moderate-income tracts was considered excellent.

Community Development Services

Fifth Third is a leader in providing community development services in this assessment area. During the evaluation period, Fifth Third employees provided 4,817 hours of community development service to local organizations serving low- and moderate-income individuals, which represents 4.1% of all community development services provided and equates to 2.32 annualized persons (ANP).

Affordable Housing	**Economic Development**	**Revitalization and Stabilization**	**Community Services**
# of Hours	***# of Hours***	***# of Hours***	***# of Hours***
357	45	140	4,275

Employees provided financial expertise through leadership positions in multiple community organizations that provide affordable housing and promote community and economic development and area revitalization and stabilization. Community development services include 3,302 hours of providing financial literacy through local nonprofits and school programs, 1,032 hours serving on boards and committees, 429 hours providing technical assistance to non-profits and local business, and 54 hours participating in foreclosure prevention outreach.

Fifth Third is considered particularly responsive with regard to hours dedicated to financial literacy based on the need to elevate low- and moderate-income individuals out of poverty and help them to acquire skills to alleviate debt and save money. A community contact noted the need for financial education for small business owners, which is reflected in the hours providing technical assistance to non-profits and local business and serving on various boards and committees.

METROPOLITAN and NON-METROPOLITAN AREAS
(Limited-scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE STATE OF NORTH CAROLINA

- **Asheville MSA**
  - As of June 30, 2016, Fifth Third operated one branches in the assessment area, representing 1.7% of its branches in North Carolina.
  - As of June 30, 2016, Fifth Third had $26,719 in deposits in this assessment area, representing a market share of 0.6% and 0.8% of its statewide deposits.
- **Hickory-Lenoir-Morganton MSA**
  - As of June 30, 2016, Fifth Third operated one branches in the assessment area, representing 1.7% of its branches in North Carolina.
  - As of June 30, 2016, Fifth Third had $40,082 in deposits in this assessment area, representing a market share of 1.2% and 1.3% of it statewide deposits.
- **Raleigh-Cary MSA**
  - As of June 30, 2016, Fifth Third operated five branches in the assessment area, representing 8.6% of its branches in North Carolina.
  - As of June 30, 2016, Fifth Third had $484,585 in deposits in this assessment area, representing a market share of 1.9% and 15.4% of it statewide deposits.
- **Non-metropolitan Western North Carolina**
  - As of June 30, 2016, Fifth Third operated 11 branches in the assessment area, representing 19.0% of its branches in North Carolina.
  - As of June 30, 2016, Fifth Third had $271,303 in deposits in this assessment area, representing a market share of 6.2% and 8.6% of it statewide deposits.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE STATE OF NORTH CAROLINA

Through the use of available facts and data, including performance and demographic information, each assessment area's performance was evaluated and compared with Fifth Third's performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendix F for information regarding these areas.

Assessment Area	Lending Test	Investment Test	Service Test
Asheville MSA	Below	Below	Below
Hickory-Lenoir-Morganton MSA	Below	Below	Below
Raleigh-Cary MSA	Below	Below	Below
Non-metropolitan Western North Carolina	Below	Below	Below

For the lending test, Fifth Third received a “High Satisfactory” rating in North Carolina. Lending performance was below Fifth Third’s performance for the state in all four assessment areas. Although below the state performance, the geographic distribution of loans was adequate and the borrower distribution of loans was either adequate or good. There were good levels of community development loans in the Asheville, Hickory-Lenoir-Morganton, and Raleigh-Cary assessment areas and an adequate level of community development loans in non-metropolitan Western North Carolina. A low level of lending gaps was identified in non-metropolitan Western North Carolina and a moderate level of lending gaps was noted in the remaining three assessment areas.

For the investment test, Fifth Third received an “Outstanding” rating in North Carolina. Performance in all five of the limited-scope assessment areas was below Fifth Third’s performance for the state. The weaker performance was primarily due to a lower level of qualified investments and contributions relative to Fifth Third’s operational presence in the assessment area.

For the service test, Fifth Third received an “Outstanding” rating in North Carolina. Performance was below Fifth Third’s performance for the state in all five limited-scope assessment areas. Although below the state’s performance, overall community development services were adequate in the Raleigh-Cary assessment area and good in the remaining three assessment areas. Retail services were good in non-metropolitan Western North Carolina and in the Raleigh-Cary assessment area and adequate in the Asheville and Hickory-Lenoir-Morganton assessment areas. The weaker retail services performance was primarily due to less accessibility of delivery systems in lower-income geographies. Qualified community development services were excellent in two limited-scope assessment areas and good in non-metropolitan Western North Carolina. The Raleigh-Cary assessment area had a poor level of qualified community development services. The weaker community development services performance was primarily due to a lower level of hours dedicated to providing qualified services relative to Fifth Third’s operational presence in these assessment areas.

The performance in the limited-scope assessment areas did not change the overall state rating.

STATE OF OHIO

CRA RATING for State of Ohio:[238] Outstanding
The lending test is rated: Outstanding
The investment test is rated: Outstanding
The service test is rated: High Satisfactory

The major factors supporting this rating include:

- An excellent responsiveness to credit needs;
- An excellent geographic distribution of loans throughout the assessment area;
- An excellent distribution of loans among borrowers of different income levels and good to businesses of different revenue sizes;
- Exhibits an excellent record of serving the credit needs of low-income individuals and areas and very small businesses;
- A relatively high level of community development loans;
- Extensive use of flexible lending practices in serving the assessment area's credit needs;
- An excellent level of qualified community development investments and grants;
- Often in a leadership position in providing community development investments and grants;
- Retail delivery systems are reasonably accessible to all geographies and individuals of different income levels and businesses of different revenue sizes;
- A record of opening and closing banking centers that has not adversely affected the accessibility of delivery systems;
- Banking services and hours that do not vary in a way that inconveniences any portions of the assessment areas; and,
- A leader in providing community development services.

SCOPE OF EXAMINATION

Full-scope reviews were conducted for two assessment areas in Ohio: the Cleveland-Akron-Canton CSA and the Columbus MSA. Limited-scope reviews were performed on the remaining five assessment areas: the Dayton-Springfield-Sidney CSA, Lima MSA, non-metropolitan Northwest Ohio, non-metropolitan Southwest Ohio, and Toledo MSA. The time period, products, and affiliates evaluated for this assessment area are consistent with the scope discussed in the "Institution" section of this report.

[238] For institutions with branches in two or more states in a multi-state metropolitan area, this statewide evaluation is adjusted and does not reflect performance in the parts of those states contained within the multi-state metropolitan area. Refer to the multi-state metropolitan area rating and discussion for the rating and evaluation of the institution's performance in that area.

The Cleveland-Akron-Canton and Columbus assessment areas received greater weight in determining the CRA rating for the state. These areas had the largest lending volumes and number of banking centers and ranked first and second, respectively, in the state's share of deposits during the evaluation period. Lastly, these areas represented 56.7% of the banking centers, 58.7% of deposits, and 59.8% of lending in Ohio.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE STATE OF OHIO

Lending activity accounted for 20.5% of the Fifth Third's total lending activity, while deposits accounted for 16.6% of the Fifth Third's total deposits. HMDA-reportable lending in Ohio represented 21.7% of the Fifth Third's total HMDA lending, while CRA-reportable lending represented 17.3% of the Fifth Third's total CRA lending. As of June 30, 2016, Fifth Third ranked second among 232 insured institutions and has a deposit market share of 14.1% and 335 banking center locations within Ohio.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE STATE OF OHIO

Lending Test

Fifth Third's performance under the lending test within the assessment areas located in Ohio is rated "Outstanding." Fifth Third's lending reflects an excellent responsiveness to the credit needs in the Cleveland-Akron-Canton and Columbus assessment areas. Lending reflects a good responsiveness to credit needs in the remaining five assessment areas: Dayton-Springfield-Sidney, Lima, non-metropolitan Northwest Ohio, non-metropolitan Southwest Ohio, and Toledo.

Lending Activity

In Ohio, Fifth Third originated 22,684 HMDA loans totaling $3.0 billion and 6,790 small business loans totaling $975.2 million during the evaluation period.

Lending activity in Ohio is excellent. The Cleveland-Akron-Canton, Columbus, and Dayton-Springfield-Sidney assessment areas have excellent lending activity. Lending activity is good in the remaining four assessment areas.

Geographic and Borrower Distribution

The distribution of loans among geographies is excellent in the assessment areas located in Ohio. The geographic distribution is excellent in the Cleveland-Akron-Canton, Columbus, and Dayton-Springfield-Sidney assessment areas. The geographic distribution is good in the remaining four assessment areas.

A low level of lending gaps was identified in six of the seven assessment areas. Of particular note, there were no gaps in lending in the Cleveland-Akron-Canton assessment area.
The distribution of loans among borrowers of different income levels is excellent and good to businesses of different revenue sizes in the assessment areas located in Ohio. The borrower

distribution is excellent in the Cleveland-Akron-Canton, Columbus, Dayton-Springfield-Sidney, and Toledo assessment areas. The borrower distribution is good in the remaining three assessment areas. The distribution to businesses of different revenue sizes is excellent in the Columbus assessment area and good in the Cleveland-Akron-Canton and Toledo assessment areas and in non-metropolitan Northwest Ohio and non-metropolitan Southwest Ohio. The distribution to businesses of different revenue sizes was adequate in the remaining two assessment areas.

A detailed analysis for the geographic distribution and borrower-income distribution is provided with the analysis for each assessment area.

Community Development Loans

In Ohio, Fifth Third originated 188 community development loans totaling $823.9 million, which represents 13.8% of the Fifth Third's community development lending by dollar volume. This is a relatively high level of community development lending in Ohio. Fifth Third was a leader in providing community development loans in the Columbus assessment area and made a relatively high level of community development loans in the Cleveland-Akron-Canton, Dayton-Springfield-Sidney, and Toledo assessment areas and an adequate level of community development loans in the remaining three assessment areas.

Flexible Lending

Overall, Fifth Third consistently makes extensive use of flexible lending practices within assessment areas located in Ohio.

Investment Test

Fifth Third's performance under the investment test within the assessment areas located in Ohio is rated "Outstanding." Fifth Third funded $260.6 in qualified community development investments in Ohio during the evaluation period, consisting of $117.5 million obtained from new investments made during the current review period and $143.1 million from prior period investments. The majority of investments were LIHTCs. Fifth Third's level of qualified investments is excellent in the Columbus assessment area and in non-metropolitan Southwest Ohio. The level of qualified investments is adequate in the Toledo assessment area and good in the remaining three assessment areas.

Fifth Third was considered responsive to the credit and community development needs in the state; therefore, investments without a purpose, mandate, or function of serving Fifth Third's assessment areas in Ohio was considered to positively impact state performance. Fifth Third made $3.3 million in qualified investments, typically in the form of LIHTCs that benefited counties within the state, but were outside Fifth Third's delineated assessment areas within Ohio.

Additional information regarding performance under the investment test is provided in the respective analyses for each assessment area.

Service Test

Fifth Third's performance under the service test within the assessment areas located in Ohio is rated "High Satisfactory." Fifth Third's performance is adequate in the Dayton-Springfield-Sidney assessment area and good in the remaining six assessment areas.

For details regarding the institution's performance in the individual assessment areas, refer to the respective assessment area's "Service Test" section in this report.

Retail Services

Retail delivery systems are reasonably accessible to all geographies, including low- and moderate-income geographies, individuals of different income levels, and businesses of different revenue sizes in Fifth Third's assessment areas. Retail service distribution is good in four assessment areas and adequate in the Cleveland-Akron-Canton, Dayton-Springfield-Sidney, and Lima assessment areas.

Fifth Third has 245 banking centers in Ohio which represents 18.9% of Fifth Third's total branches. Fifth Third's record of opening and closing banking centers has not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and to low- and moderate-income individuals. One branch opened and one branch closed in a moderate-income tract during the evaluation period in the Dayton assessment area during the evaluation period.

Banking services and business hours do not vary in a way that inconveniences any portions of the Fifth Third's assessment areas and are consistent with the services and hours discussed in the "Institution" assessment.

Community Development Services

Fifth Third is a leader in providing community development services in Ohio. Fifth Third's performance is excellent in the Cleveland-Akron-Canton, non-metropolitan Northwest Ohio, non-metropolitan Southwest Ohio, and Toledo assessment areas. The level of community development services is good in the remaining three assessment areas.

METROPOLITAN AREA
(Full-scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE CLEVELAND-AKRON-CANTON OH CSA #184

The Cleveland-Akron-Canton OH CSA consists of the following three MSAs:

- Akron OH MSA #10420, consisting of Portage and Summit counties
- Canton-Massillon OH MSA #15940, consisting of Stark County, but excluding Carroll County
- Cleveland-Elyria OH MSA #17460, consisting of Cuyahoga, Geauga, Lake, Lorain, and Medina counties

The assessment area is comprised of 136 low-, 185 moderate-, 341 middle-, and 225 upper-income tracts. There are also seven tracts with no income designation that are primarily composed of correctional institutions, military establishments, education facilities, or medical establishments that do not report income information.

As of June 30, 2016, Fifth Third ranked eighth out of 47 institutions with 5.6% of the deposit share. KeyBank had the majority of the market share with 19.7% of deposits, followed by PNC Bank, FirstMerit Bank, Citizens Bank, and Huntington Bank with 12.7%, 11.9%, 10.4%, and 8.9% of the market share, respectively. Deposits in this assessment area accounted for 4.6% of the institution's total deposits. This was 27.5% of deposits within the state and the fifth-highest percentage of deposits within Fifth Third's CRA footprint.

From January 1, 2014 through June 30, 2016, Fifth Third originated 8,332 HMDA loans and 2,296 CRA loans, which represented 8.0% and 5.9% of the total loans originated during the evaluation period, respectively. This was the fourth-largest HMDA market and fifth-largest CRA market for loans originated during the evaluation period.

In 2015, Fifth Third Mortgage Company ranked seventh among 522 HMDA reporters in the assessment area, while Fifth Third ranked 33rd. The top four HMDA lenders in the assessment area were Quicken Loans, Wells Fargo Bank, Huntington Bank, and Third Federal Savings & Loan. Fifth Third ranked 12th of 125 CRA reporters in the assessment area in 2015. The top four CRA lenders in the assessment area were American Express, PNC Bank, Chase Bank USA, and Capital One. These lenders are mostly issuers of credit cards and their CRA loans primarily consist of commercial credit card accounts.

Three community contact interviews were conducted to provide additional information regarding the assessment area. The first contact, representing an organization that works to empower low-income individuals, stated that portions of the Akron metropolitan area are doing well, while other parts are not. There are significant areas of blight that have had an immense negative economic impact on the city. The contact believed while Akron has done a good job of building and marketing itself as a great place to work and play, it has done less to boost itself as a good place to live. The contact stated the city needs more quality, affordable housing to attract middle-class families and others to live in the city center.

Because employment has grown more steadily in the areas surrounding the city than in the city center, workers who live downtown and rely on public transit are very limited in terms of employment. The city is hoping to extend transit lines throughout the greater Akron region and encourage more economic development in the city center. The contact stated this organization receives its funding from private contributors; thus, they are not familiar with the degree of involvement of the local financial industry in the community. However, the contact stated they have a strong relationship with their own bank, whose employees occasionally provide needed financial literacy training to their clients.

The second contact, representing an organization that works to strengthen neighborhoods in Northeast Ohio, stated home prices have increased across most of Cleveland. Single-family home prices have been increasing slowly, but steadily since 2015; however, prices vary among neighborhoods. Several neighborhoods have median prices that exceed $100,000. The contact believed the reason for the higher prices is due to newer homes returning to the market after going through foreclosure and increasing employment opportunities. However, across most of the city, home prices are still lower than they were in 2007 before the area's housing market experienced sharp declines. The contact noted there are opportunities for financial institutions to originate small-dollar loans for home improvements/revitalization of older housing stock within the city limits. The contact also mentioned the need for homeownership and foreclosure prevention counseling for first-time homebuyers and lower-income individuals.

The third contact, representing an organization that provides services to help connect people to jobs in the Northeast Ohio area, stated that since 2015, economic growth has been improving at a moderate pace. The contact stated the gradually improving economy has meant consumers are able to buy more goods, particularly automobiles. As a result, the region's assembly plants have experienced an increase in production and employment. The contact stated that fewer Clevelanders are living in poverty than at any time since 2008, perhaps due to individuals with higher-incomes moving into pockets of the city; however, poverty has spread into surrounding communities. The contact stated the need is not gone in the central city; there is just more need in surrounding communities for food banks and other basic kinds of assistance. The contact specifically mentioned KeyBank and Fifth Third as being actively involved with this organization and in the community.

Population Characteristics

According to the 2010 U.S. Census data, the population in the assessment area was 3.2 million. Over one-quarter (27.0%) of the population lived in low- and moderate-income tracts. In addition, 77.0% of the population was 18 years of age or older, the legal age to enter into a contract.

As of July 1, 2015, the Cleveland MSA is the 32nd largest in terms of population in the nation, while the Akron MSA and Canton-Massillon MSA are the 80th and 134th largest, respectively.[239] On the list of Ohio's most populous counties, Cuyahoga County is the most, while Summit County is fourth, Stark County is seventh, Lorain County is ninth, Lake County is 11th, Medina County is 16th, Portage County is 19th, and Geauga County is 29th.[240]

As of July 1, 2016, Franklin County surpassed Cuyahoga County as Ohio's most populous county. Cuyahoga County has been losing population for more than four decades. Some of Cuyahoga County's loss has been a boon for surrounding counties, such as Lorain and Medina. Lorain County's population has grown by a rate of 1.7% between 2010 and 2016, which is higher than the 0.7% growth rate for the state. Medina County's population has grown by a rate of 2.8%, which makes it the 11th fastest-growing county in the state. Regardless of these growth rates, Lorain County and Medina County remain the ninth- and 16th most populous counties in Ohio, respectively. Cuyahoga County is not the only urban county in Ohio losing residents, as Summit County's population declined by a rate of 0.3% between 2010 and 2016. Ohio's modest population growth is due to immigrants coming from other countries, which explains Ohio's 0.7% population growth since 2010.[241]

According to 2015 U.S. Census data;[242] Cleveland is the second-largest city in Ohio with 388,072 residents and is the 51st largest city in the nation. Akron is the fifth-largest city in the state with 197,542 residents, and Canton is the eighth-largest city in Ohio with 71,885 residents. Between 2010 and 2015, Cleveland, Akron, and Canton experienced declines in population of 18.5%, 8.9%, and 11.1%, respectively.[243] The following table shows the population in the assessment area by county for 2010 and 2015 with the percentage of the population increase or decrease.[244] For the most part, the population within the assessment area remained stable between 2010 and 2015, with Medina and Lorain counties experiencing the greatest growth and Cuyahoga County experiencing the greatest decline in population.

[244] Population Estimates derived from U.S. Census Data (April 1, 2010 – July 1, 2015): http://www.census.gov/quickfacts/table/PST045216/00

County	2010 Population	2015 Population	Population Percent Change
Cuyahoga	1,280,122	1,255,921	-1.9%
Geauga	93,389	94,102	0.8%
Lake	230,041	229,245	-0.3%
Lorain	301,356	305,147	1.3%
Medina	172,332	176,395	2.4%
Portage	161,419	162,275	0.5%
Stark	375,586	375,165	-0.1%
Summit	541,781	541,968	0.0%
Total	**3,156,026**	**3,140,218**	**-0.5%**

Income Characteristics

The 2010 assessment area median family income was higher ($61,630) than Ohio's at $59,680. As shown in the table below, the median family income increased between 6.0-9.0% across the assessment area since 2010.

Borrower Income Levels
Cleveland-Akron-Canton OH CSA

FFIEC Estimated Median Family Income	2010	2014	2015	2016
Akron OH MSA	$62,882	$62,100	$66,700	$66,900
Canton-Massillon OH MSA	$55,645	$56,000	$58,900	$61,100
Cleveland-Elyria OH MSA	$62,627	$62,600	$66,100	$66,600

Poverty rates increased in each county in the assessment area from 1999 to 2015.[245] Cuyahoga County had the highest poverty rates in 1999 and 2015. Geauga and Medina counties had the lowest poverty rates in 1999 and 2015. In 2015, only Cuyahoga County had a poverty rate higher than Ohio. Cuyahoga, Summit, and Portage counties had poverty rates that exceeded the national rate. However, Lake County experienced the largest increase in poverty rate during this period. According to the U.S. Census Bureau, the national poverty rate in 2015 was 13.5%, down 1.3 percentage points from 14.8% in 2014. For most demographic groups, the 2015 poverty rates and number of people in poverty decreased from 2014.[246] The following table shows the poverty rates for 1999[247] and 2015.

[245] United States Department of Agriculture Economic Research Service Poverty Rates (for 1999 and 2015): https://data.ers.usda.gov/reports.aspx?ID=17826
[246] 2015 National Poverty: http://www.census.gov/library/publications/2016/demo/p60-256.html
[247] 1999 National Poverty Rate: http://www.census.gov/prod/2000pubs/p60-210.pdf

County	1999 Poverty Rate	2015 Poverty Rate	Change
Cuyahoga	13.1%	18.2%	38.9%
Geauga	4.6%	6.7%	45.7%
Lake	5.1%	8.3%	62.7%
Lorain	9.0%	13.5%	50.0%
Medina	4.6%	7.0%	52.2%
Portage	9.3%	13.6%	46.2%
Stark	9.2%	13.4%	45.7%
Summit	9.9%	14.4%	45.5%
Ohio	**10.6%**	**14.8%**	**39.6%**
United States	**11.8%**	**13.5%**	**14.4%**

While a community contact indicated that fewer Clevelanders are living in poverty than at any time since 2008, as shown above, Cuyahoga County still had the highest poverty rate within the assessment area. The contact also stated there is an increasing need for assistance to lower-income individuals in the surrounding communities, as illustrated above by Summit and Portage counties having poverty rates that exceeded the national rate in 2015 and Lake County experiencing the greatest change in poverty rates in the assessment area in the last 16 years.

Housing Characteristics

According to 2010 U.S. Census data, there are 1.4 million housing units and 820,144 families in the assessment area. From an income perspective, 30.7% of housing units, 19.6% of owner-occupied units, and 24.8% of families are located in low- or moderate-income tracts. Nearly three-quarters of the housing units in the low-income census tracts are either rental or vacant (71.8%), and only 28.2% are owner-occupied. In the moderate-income census tracts, over half (54.1%) of the housing units are either rental or vacant, and 45.9% are owner-occupied. Therefore, based on the number of housing units compared to the number of families in low- and moderate-income census tracts, there appear to be more credit-related opportunities for Fifth Third to provide various aspects of affordable housing in moderate-income tracts compared to low-income tracts.

The 2010 U.S. Census data shows the median age of housing stock in the assessment area was 52 years old, with 32.3% of the stock built before 1950. The oldest housing stock was in Cuyahoga County with a median age of 56 years, while the newest was 31 years in Medina County. However, within the assessment area, the median age of housing stock was 61 years in low-income tracts and 60 years in moderate-income tracts, which indicates that there is ample opportunity to make home improvement loans. In addition, a community contact stated there is a need for small-dollar loans for home improvements/revitalization of older housing stock within the city limits, in addition to the need for homeownership and foreclosure prevention counseling for first-time homebuyers and lower-income individuals.

According to the 2010 U.S. Census data, the median housing value in the assessment area was $145,758, with an affordability ratio of 32.93. The affordability ratio is derived by dividing the median household income by the median housing value. The higher the affordability ratio, the more affordable a home is considered. The median housing value decreased and household incomes increased between 2010 and 2011-2015; as a result, housing became more affordable across the assessment area. During the review period, the most affordable housing was in Lake, Stark, Lorain, and Summit counties and the least affordable in Geauga County. Median gross rents increased across the assessment area, with renters in Stark County experiencing the largest increase in rental rates and renters in Summit County experiencing the smallest increase. In 2010, about 46.9% of renters across the assessment area had rent costs greater than 30.0% of income. Rising rental rates could make it more difficult for lower-income individuals to find affordable housing, as increasing rental rates may make it more difficult for potential homebuyers to save for a down payment for a home. According to Moody's Analytics, low population growth is hurting consumer industries and housing and continues to put constraints on the long-term potential of basic service industries. The table below presents housing characteristics from the U.S. Census data between 2010 and 2015 in the assessment area and Ohio.

County	2010 Median Housing Value	2010 Affordability Ratio	2011-2015 Median Housing Value	2011-2015 Affordability Ratio	2010 Median Gross Rent	2011-2015 Median Gross Rent	Percent of Change
Cuyahoga	$137,200	31.78	$121,800	36.28	$698	$730	4.6%
Geauga	$230,900	28.44	$218,800	33.10	$751	$800	6.5%
Lake	$158,100	34.72	$147,900	39.24	$757	$814	7.5%
Lorain	$147,400	35.32	$137,400	38.18	$681	$741	8.8%
Medina	$184,900	35.80	$179,500	37.30	$784	$824	5.1%
Portage	$157,100	32.11	$150,900	34.83	$748	$802	7.2%
Stark	$128,000	35.11	$122,900	38.35	$622	$680	9.3%
Summit	$141,200	33.94	$133,500	38.03	$719	$744	3.5%
Ohio	**$136,400**	**34.72**	**$129,900**	**38.05**	**$678**	**$730**	**7.7%**

According to Bankrate.com,[248] Ohio ranked eighth for foreclosure filings in November 2016. The national average for foreclosure filings was 1 in every 1,533 housing units. The following table contains information about foreclosure filings in the assessment area, according to Realtytrac:[249]

[248] Bankrate.com: http://www.bankrate.com/finance/real-estate/foreclosures-by-state/default.aspx
[249] Realtytrac: http://www.realtytrac.com/statsandtrends/foreclosuretrends/

Geography Name	Ratio of Properties Receiving Foreclosure Filings in November 2016
Cuyahoga	1:1,053
Geauga	1:915
Lake	1:687
Lorain	1:782
Medina	1:914
Portage	1:1,203
Stark	1:926
Summit	1:887
Ohio	**1:1,055**
United States	**1:1,533**

In November 2016, Lake County had the highest rate of foreclosure (fifth highest foreclosure rate in Ohio) and Portage County had the lowest foreclosure rate within the assessment area. According to Moody's Analytics, the above-average foreclosure inventory in the Cleveland metropolitan area has a major impact on home prices. Foreclosures have a tendency to add to the supply of homes that are on the market and may translate into lower prices, longer wait times for pending sales, and diminished desirability of surrounding homes.

Building permits in the MSAs, Ohio, and the nation are included in the following table for 2014, 2015, and 2016.[250]

Geography	2014	2015	Percent of Change 2014-2015	2016	Percent of Change 2015-2016
Akron MSA	764	967	26.6%	909	-6.0%
Canton-Massillon MSA	551	558	1.3%	554	-0.7%
Cleveland-Elyria MSA	2,926	2,938	0.4%	3,053	3.9%
Ohio	**19,965**	**20,047**	**0.4%**	**22,816**	**13.8%**
United States	**1,052,124**	**1,182,582**	**12.4%**	**1,190,191**	**0.6%**

The Akron MSA experienced the greatest increase of housing permits between 2014 and 2015 and the greatest decrease of housing permits between 2015 and 2016. The Canton MSA experienced an increase in housing permits between 2014 and 2015 and a slight decrease between 2015 and 2016. On the other hand, the Cleveland MSA experienced a slight increase in housing permits between 2014 and 2015 and a larger increase between 2015 and 2016. Based on the overall demand for permits and performance context indicating a moderately improving housing market, this could indicate an increased demand for home purchase loans across the assessment area during the evaluation period, particularly in the greater Cleveland and Canton areas.

250 U.S. Census Bureau Building Permits Survey: http://www.census.gov/construction/bps/

Labor, Employment, and Economic Characteristics

According to Moody's Analytics, the Cleveland and Akron area economies are in recovery due to growing healthcare and professional services; however, the factory sector is the lowest it has been since early 2011. In the long-term, the contracting population is hurting consumer industries and housing. On the other hand, Canton's economic prospects will depend on its ability to capitalize on the shale gas industry. Nonetheless, the Canton metropolitan area will remain a below-average performer because of its weak population growth and dearth of high-tech jobs.

According to the *Columbus Business Journal*,[251] the Cleveland metropolitan area is home to seven Fortune 500 headquarters. In the past year, the Progressive Corporation (insurance) climbed 16 places on the list, while TravelCenters of America (full-service travel center/truck stop centers) fell 74 places.

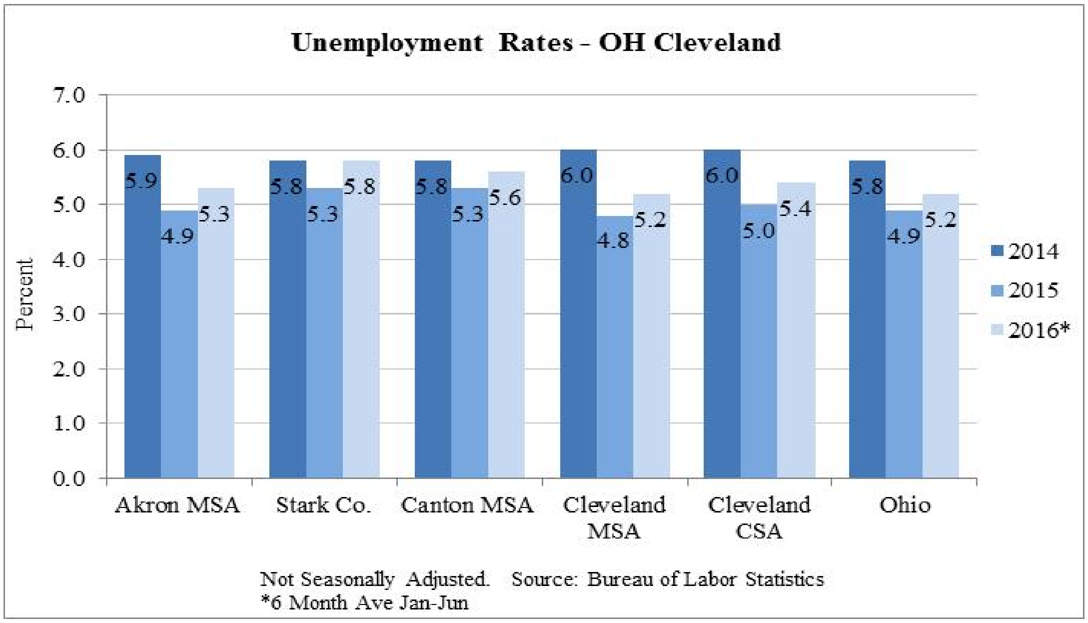
Northeast Ohio Fortune 500 Companies (2016)		
Rank	**Company**	**Revenue**
137	Progressive Corporation	$19.4 billion
169	Goodyear Tire & Rubber Company	$18.1 billion
188	FirstEnergy Corp.	$15.1 billion
224	Parker-Hannifin Corporation	$13.2 billion
253	Sherwin-Williams Company	$11.1 billion
439	TravelCenters of America	$7.8 billion
452	J.M. Smucker Company	$5.6 billion

According to Moody's Analytics, the top 12 employers in the CSA in 2015/2016 were:

Company	Number of Employees
Cleveland Clinic Foundation	35,291
University Hospitals	19,907
Progressive Corporation	9,330
Giant Eagle, Inc.	9,016
Group Management Services	6,506
Summa Health System	5,526
Kent State University	5,372
FirstEnergy Corp.	5,167
Aultman Hospital	4,288
The Timken Co.	4,112
Mercy Medical Center	2,013
Diebold Inc.	1,700

The following table illustrates the average unemployment rates for 2014, 2015, and June 2016 for the counties in the CSA and Ohio.

[251] Columbus Business First: http://www.bizjournals.com/columbus/news/2016/06/06/fortune-500-includes-24-ohio-companies-and-big.html



Overall, unemployment rates declined in 2015 and slightly increased in 2016, but to levels below 2014 unemployment rates. The slight increases in unemployment rates were comparable across the assessment area.

According to *Cleveland.com*, the University of Akron eliminated 213 full-time positions in order to resolve a $60 million deficit.[252] According to the *Cleveland Plain Dealer*, defense contractor Lockheed Martin consolidated and closed most of its Akron, Ohio operations in 2015. As a result, Akron lost about 500 jobs. The company employed about 600 people in the Akron area and the cutback leaves only the Akron Airdock in operation, which only employs 60 individuals. Lockheed Martin also closed or reduced operations not only in Akron, but also in Pennsylvania, Arizona, and Texas as part of a corporate-wide consolidation.[253] According to *Fox8 News*, workers at U.S. Steel Tubular Operations received layoff notices in March 2015. The layoff affects all operations and units at the plant and affects 614 jobs. According to a company spokesperson, the layoffs were a result of a decline in market demand for tubular steel in the gas, oil, and petrochemical industries. While the layoffs are expected to be temporary, there was no indication as to the length of these layoffs.[254]

2016 FFIEC Census Data and 2015 D&B Information

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE CLEVELAND-AKRON-CANTON OH CSA

Lending Test

Fifth Third's performance under the lending test in this assessment area is rated excellent. Fifth Third has demonstrated an excellent responsiveness to the credit needs of the community. In addition, Fifth Third originated 49 community development loans totaling $199.1 million. Fifth Third has an excellent overall geographic distribution of loans and there were no gaps in lending. Fifth Third has an excellent distribution among borrowers of different income levels and a good distribution of loans to businesses of different revenue sizes. Fifth Third exhibits a good record of serving the credit needs of highly economically disadvantaged areas in its assessment area, low-income individuals, and businesses with gross annual revenues of $1 million or less. The good level of community development loans and extensive use of flexible lending practices augmented Fifth Third's performance in this assessment area.

Greatest consideration was given to the evaluation of home purchase lending, based on the overall volume of lending, followed by refinance, small business, and home improvement lending. Details of Fifth Third's residential mortgage and small business lending, as well as information regarding lending by peers, can be found in Appendix E.

Lending Activity

Fifth Third's lending activity reflects an excellent responsiveness to the credit needs within the assessment area. Fifth Third originated 5,008 home purchase, 2,953 refinance, 366 home improvement, 2,296 small business, and 49 community development loans during the evaluation period. The percentage of Fifth Third's total lending at 7.4% is greater than the percentage of total deposits at 4.6% in this area.

Fifth Third made 99.7% of the HMDA and 99.8% of the CRA lending within its designated assessment area. Therefore, no concentration of lending was identified in Carroll County, the only excluded county in this assessment area.

In addition to lending, Fifth Third modified existing loans to borrowers. Refer to the distribution of HAMP and other real-estate secured modifications within the assessment area by census tract income and by borrower income.

	Distribution by Census Tract Income							
	Low		Mod		Middle		Upper	
	#	%	#	%	#	%	#	%
HAMP Modifications	4	10.0%	6	15.0%	19	47.5%	11	27.5%
Other Real Estate Secured Modifications	19	5.8%	56	17.2%	167	51.2%	84	25.8%
Percentage of Owner Occupied Units		***5.2%***		***14.4%***		***44.0%***		***36.4%***

*Unknown tract data is not included in the above table.

	Distribution by Borrower Income							
	Low		Mod		Middle		Upper	
	#	%	#	%	#	%	#	%
Other Real Estate Secured Modifications	93	28.5%	110	33.7%	88	27.0%	34	10.4%
Percentage of Families by Family Income		***21.2%***		***17.6%***		***21.1%***		***40.1%***

The percentage of HAMP and other modifications in low- and moderate-income tracts exceeded the percentage of owner-occupied units in these geographies. Therefore, modifications helped to expand lending activities in these areas. Most of the borrower incomes for HAMP modifications were unknown; therefore, it would not be meaningful to review the income distribution for these modifications. The percentage of other modifications made to low- and moderate-income borrowers exceeded the percentage of low- and moderate-income families in the assessment area. Therefore, modifications enhanced Fifth Third's ability to reach low- and moderate-income borrowers. Also, several community contacts mentioned the need to help homeowners avoid foreclosure.

Geographic Distribution of Loans

Fifth Third's overall distribution of lending among geographies is excellent. Home purchase lending, which was the largest loan category, is good. Refinance lending is excellent, and home improvement lending is adequate. Small business lending is good. Additionally, there are no gaps in lending as shown in the table below:

Tract Income Levels	Number of Tracts	Tracts with No Loans	Penetration
Low	62	0	100.0%
Moderate	97	0	100.0%
Middle	131	0	100.0%
Upper	121	0	100.0%
Unknown	3	0	100.0%
Total	**414**	**0**	**100.0%**

There are no lending gaps which is particularly noteworthy due to competition from several other large financial institutions with a significant presence in this market.

Home Purchase Loans

Fifth Third made 136 home purchase loans totaling $10.6 million in low-income tracts. This represents 2.7% of home purchase loans by volume, which is below the percentage of owner-occupied units in these tracts at 5.2%, and 1.5% by dollar amount, which is significantly below proxy. The percentage of loans by volume was below the 2014 aggregate at 1.6% and exceeded the 2015 aggregate at 2.0%. As Fifth Third's performance exceeded the aggregate of all lenders, but was below proxy, the geographic distribution in low-income tracts is good.

Fifth Third made 703 home purchase loans totaling $57.2 million in moderate-income tracts. This represents 14.0% of its home purchase loans by volume, which is comparable to the percentage of owner-occupied units in these tracts at 14.4%, and 8.1% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate at 9.5% and exceeded the 2015 aggregate at 10.2%. As Fifth Third's performance was comparable to proxy and exceeded the aggregate of all lenders, the geographic distribution in moderate-income tracts is excellent.

Fifth Third made 2,072 home purchase loans totaling $231.1 million in middle-income tracts. This represents 41.4% of home purchase loans by volume, which is below the percentage of owner-occupied units in these tracts at 44.0%, and 32.6% by dollar amount, which is below proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 44.4% and was below the 2015 aggregate of 44.0%.

Fifth Third made 2,097 home purchase loans totaling $410.8 million in upper-income tracts. This represents 41.9% of home purchase loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 36.4%, and 57.9% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 44.5% and was below the 2015 aggregate of 43.9%.

Overall, the geographic distribution of home purchase loans is good.

Refinance Loans

Fifth Third made 89 refinance loans totaling $6.1 million in low-income tracts. This represents 3.0% of refinance loans by volume and 1.6% by dollar amount, which is below the percentage of owner-occupied units at 5.2%. The percentage of loans by volume was below the 2014 aggregate at 2.1% and exceeded the 2015 aggregate at 1.8%. Given that the owner-occupancy rate in low-income tracts is only 28.2%, which likely impacts the demand for refinance loans and Fifth Third's performance exceeding the aggregate of lenders, the geographic distribution in low-income tracts is excellent.

Fifth Third made 394 refinance loans totaling $28.4 million in moderate-income tracts. This represents 13.3% of refinance loans by volume, which is comparable to the owner-occupied units in these tracts at 14.4%. The percentage of loans by dollar amount at 7.6% is significantly below proxy. The percentage of loans by volume exceeded the 2014 aggregate at 10.1% and substantially exceeded the 2015 aggregate at 8.9%. Given the relatively low owner-occupancy rate at 45.9% and Fifth Third's performance exceeding the aggregate of all lenders; the geographic distribution in moderate-income tracts is excellent.

Fifth Third made 1,228 refinance loans totaling $124.8 million in middle-income tracts. This represents 41.6% of refinance loans by volume, which is below the owner-occupied units in these tracts at 44.0%. The percentage of loans by dollar amount at 33.4% is below proxy. The percentage of loans by volume was below the 2014 aggregate at 44.8% and was comparable to the 2015 aggregate at 42.4%.

Fifth Third made 1,242 refinance loans totaling $214.7 million in upper-income tracts. This represents 42.1% of refinance loans by volume, which exceeds the owner-occupied units in these tracts at 36.4%, and 57.4% by dollar amount, which exceeds proxy. The percentage of loans by volume was comparable to the 2014 aggregate at 43.0% and was below the 2015 aggregate at 46.9%.

Overall, the geographic distribution of refinance loans is excellent.

Home Improvement Loans

Fifth Third made five home improvement loans totaling $420,000 in low-income tracts. This represents 1.4% of home improvement loans by volume, which is below the percentage of owner-occupied units in these tracts at 5.2%, and 1.6% by dollar amount, which is also below proxy. The percentage of loans by volume was below the 2014 aggregate of 5.6% and was below the 2015 aggregate of 4.4%. Given the median age of housing stock at 61 years in low-income tracts, which typically indicates the need for home improvement loans, and Fifth Third's performance, which was significantly below proxy and the aggregate of all lenders, the geographic distribution of home improvement loans in low-income tracts is poor.

Fifth Third made 42 home improvement loans totaling $1.9 million in moderate-income tracts. This represents 11.5% of home improvement loans by volume, which is below the percentage of owner-occupied units in these tracts at 14.4%, and 7.0% by dollar amount, which is significantly below proxy. The percentage of loans by volume was below the 2014 aggregate of 14.7% and was comparable to the 2015 aggregate of 14.3%. Given that Fifth Third's performance was below proxy and comparable to the aggregate of all lenders, the geographic distribution of home improvement loans in moderate-income tracts is good.

Fifth Third made 166 home improvement loans totaling $9.7 million in middle-income tracts. This represents 45.4% of home improvement loans by volume, which slightly exceeds the percentage of owner-occupied units in these tracts at 44.0%, and 36.5% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 43.3% and exceeded the 2015 aggregate of 42.2%.

Fifth Third made 153 home improvement loans totaling $14.6 million in upper-income tracts. This represents 41.8% of home improvements loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 36.4%, and 54.9% by dollar amount, which significantly exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 36.4% and was comparable to the 2015 aggregate of 39.1%.

Overall, the geographic distribution of home improvement loans is adequate.

Small Business Loans

Fifth Third made 163 small business loans totaling $32.0 million in low-income tracts. This represents 7.1% of small business loans by volume, which exceeds the percentage of small businesses in these tracts at 6.9%, and 9.2% by dollar amount, which exceeds proxy.

The percentage of loans by volume was below the 2014 aggregate of 6.0% and exceeded the 2015 aggregate of 6.4%. As Fifth Third's performance exceeded the proxy and aggregate of all lenders, the geographic distribution of small business loans in low-income tracts is excellent.

Fifth Third made 217 small business loans totaling $45.0 million in moderate-income tracts. This represents 9.5% of small business loans by volume, which is below the percentage of businesses in these tracts at 12.6%, and 12.9% by dollar amount, which is comparable to proxy. The percentage of loans by volume was slightly below the 2014 aggregate of 11.7% and was slightly below the 2015 aggregate of 11.7%. Given that Fifth Third's performance was slightly below the aggregate of all lenders and proxy, the geographic distribution of small business loans in moderate-income tracts is good.

Fifth Third made 856 small business loans totaling $138.0 million in middle-income tracts. This represents 37.3% of small business loans by volume, which is comparable to the percentage of businesses in these tracts at 39.8%, and 39.6% by dollar amount, which is comparable to the percentage of businesses in these tracts. The percentage of loans by volume was below the 2014 aggregate of 38.0% and was comparable the 2015 aggregate of 37.9%.

Fifth Third made 1,058 small business loans totaling $133.5 million in upper-income tracts. This represents 46.1% of small business loans by volume, which exceeds the percentage of businesses in these tracts at 40.5%, and 38.3% by dollar amount, which is comparable to the percentage of businesses in these geographies. The percentage of loans by volume exceeded the 2014 aggregate of 43.1% and exceeded the 2015 aggregate of 43.0%.

Overall, the geographic distribution of small business loans is good.

Distribution by Borrower Income and Revenue Size of the Business

The distribution of loans is excellent based on borrower income and good for businesses of different revenue sizes. Borrower distribution is excellent for home purchase and refinance lending, and good for home improvement lending.

Home Purchase Loans

Fifth Third made 908 loans totaling $65.7 million to low-income borrowers. This represents 18.1% of home purchase loans by volume, which is below the percentage of low-income families at 21.2%, and 9.3% by dollar amount, which is significantly below proxy. The percentage of loans by volume significantly exceeded the 2014 aggregate of 7.6% and significantly exceeded the 2015 aggregate of 9.2%. Because Fifth Third's performance significantly exceeded the aggregate of all lenders, the borrower distribution of home purchase loans to low-income borrowers is excellent.

Fifth Third made 1,209 loans totaling $119.3 million to moderate-income borrowers. This represents 24.1% of home purchase loans by volume, which exceeds the percentage of moderate-income families at 17.6%, and 16.8% by dollar amount, which is comparable to proxy. The percentage of loans by volume exceeded the 2014 aggregate of 21.0% and exceeded the 2015 aggregate of 20.8%. As Fifth Third's performance exceeded the aggregate of all lenders and proxy, the borrower distribution of home purchase loans to moderate-income borrowers is excellent.

Fifth Third made 1,152 loans totaling $150.6 million to middle-income borrowers. This represents 23.0% of home purchase loans by volume, which exceeds the percentage of middle-income families at 21.1%, and 21.2% by dollar amount, which is comparable to proxy. The percentage of loans by volume exceeded the 2014 aggregate of 21.3% and exceeded the 2015 aggregate of 21.5%.

Fifth Third made 1,665 loans totaling $361.3 million to upper-income borrowers. This represents 33.2% of home purchase loans by volume, which is below the percentage of upper-income families at 40.1%, and 50.9% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 35.3% and was below the 2015 aggregate of 32.1%.

Overall, the borrower distribution of home purchase loans is excellent.

Refinance Loans

Fifth Third made 428 loans totaling $31.8 million to low-income borrowers. This represents 14.5% of refinance loans by volume, which is below the percentage of low-income families in tracts at 21.2%, and 8.5% by dollar amount, which is significantly below proxy. The percentage of loans by volume significantly exceeded the 2014 aggregate of 7.0% and significantly exceeded the 2015 aggregate of 6.6%. Given Fifth Third's performance significantly exceeded the aggregate of all lenders, the borrower distribution of refinance loans to low-income borrowers is excellent.

Fifth Third made 560 loans totaling $49.2 million to moderate-income borrowers. This represents 19.0% of refinance loans by volume, which exceeds the percentage of moderate-income families at 17.6%, and 13.1% by dollar volume, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 15.4% and exceeded the 2015 aggregate of 14.3%. As Fifth Third's performance exceeded proxy and the aggregate of other lenders, the borrower distribution for refinance loans to moderate-income borrowers is excellent.

Fifth Third made 772 loans totaling $82.3 million to middle-income borrowers. This represents 26.1% of refinance loans by volume, which exceeds the percentage of middle-income families at 21.1%, and 22.0% by dollar amount, which slightly exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 21.5% and the 2015 aggregate of 20.3%.

Fifth Third made 1,077 loans totaling $193.7 million to upper-income borrowers. This represents 36.5% of refinance loans by volume, which is below the percentage of upper-income families at 40.1%, and 51.8% by dollar amount, which exceeds proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 41.3% and was below the 2015 aggregate of 38.4%.

Overall, the borrower distribution of refinance loans is excellent.

Home Improvement Loans

Fifth Third made 50 loans totaling $2.6 million to low-income borrowers. This represents 13.7% of home improvement loans by volume, which is below the percentage of low-income families at 21.2%, and 9.8% by dollar amount, which is significantly below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 10.1% and exceeded the 2015 aggregate of 11.2%. Given that Fifth Third's performance exceeded the aggregate of all lenders but was below proxy, the borrower distribution of home improvement loans to low-income borrowers is good.

Fifth Third made 74 loans totaling $3.7 million to moderate-income borrowers. This represents 20.2% of its home improvement loans by volume, which exceeds the percentage of moderate-income families at 17.6%, and 14.0% by dollar amount, which also exceeds proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 20.4% and was below the 2015 aggregate of 19.7%. Given that Fifth Third's performance was comparable to the aggregate of all lenders and exceeded proxy, the borrower distribution of home improvement loans to moderate-income borrowers is good.

Fifth Third made 102 loans totaling $5.4 million to middle-income borrowers. This represents 27.9% of home improvement loans by volume, which exceeds the percentage of middle-income families at 21.1%, and 20.3% by dollar amount, which is comparable to proxy. The percentage of loans by volume exceeded the 2014 aggregate of 23.3% and exceeded the 2015 aggregate of 22.8%.

Fifth Third made 138 loans totaling $14.6 million to upper-income borrowers. This represents 37.7% of home improvement loans by volume, which is below the percentage of upper-income families at 40.1%, and 54.6% by dollar amount, which exceeds proxy. The percentage of loans by volume was below the 2014 aggregate of 41.1% and was below the 2015 aggregate of 42.4%.

The overall borrower distribution of home improvement loans is good.

Small Business Loans

The distribution of small business loans to businesses of different sizes is good, considering Fifth Third's performance relative to the aggregate of all lenders. Fifth Third was able to make 52.4% of small business loans to businesses with revenues of $1 million or less.

Fifth Third's performance exceeded the 2014 aggregate of 41.5% and exceeded the 2015 aggregate of 45.5%, but was significantly below the percentage of small businesses in the assessment area at 90.6%. Also, during the evaluation period, Fifth Third was able to make an acceptable percentage of small-dollar loans (67.7%) up to $100,000, indicating a willingness to lend in smaller amounts typically requested by small businesses.

Community Development Loans

Fifth Third originated 49 community development loans totaling $199.1 million during the evaluation period as shown in the table below:

Affordable Housing		Economic Development		Revitalization and Stabilization		Community Services	
#	$	#	$	#	$	#	$
5	24,750,000	16	79,269,935	18	66,144,000	10	28,955,446

Community development lending in the assessment represents 3.3% of the total dollar volume of community development loans originated by Fifth Third during the evaluation period. This ranks as Fifth Third's ninth-highest percentage of community development lending during the evaluation period. Given that there is high competition for community development loans with a number of large national banks in the area and that Fifth Third only has 5.6% of the deposit market share, Fifth Third has a relatively high level of community development lending.

Examples of community development lending include, but are not limited to:

- Working capital loan to a retirement living community for seniors that provides a multitude of services including, but not limited to, affordable housing to low- and moderate-income senior citizens and other in-need individuals
- A renewal of a revolving line of credit to a nonprofit that advocates for decent, affordable housing for the homeless and low- and moderate-individuals with disabilities and special needs. The nonprofit owns multiple affordable housing facilities and administers multiple affordable housing programs; however, this loan supports a permanent supportive housing facility that will provide housing to 500 chronically homeless individuals.
- A working capital loan that supports a nonprofit that helps repair and rehabilitate homes for low- and moderate-income senior citizens, veterans, and the disabled
- A working capital loan that supports a nonprofit that provides pregnancy care to low- and moderate-income women facing unexpected pregnancies
- A working capital loan to a nonprofit that provides a multitude of services to ex-offenders to promote successful reintegration into the community
- Multiple working capital loans to promote economic development by financing a small business to support retention of low- and moderate-income workers (six companies retained about 35 workers)
- Multiple working capital loans to help retain and expand seven businesses located in areas specifically designated by the city to promote revitalization and economic development

The affordable housing loans and loans providing services to low- and moderate-income areas were deemed to be responsive, as community contacts specifically mentioned the need for these types of loans.

Flexible Lending Programs

Fifth Third had 2,003 flexible lending loans in this assessment area: 1,407 government loans, 98 down payment assistance loans, and 498 other flexible lending programs. The following tables show the percentage by volume and by dollar amount of the three types of flexible lending programs made in this assessment area during the evaluation period and the distribution of Fifth Third's flexible lending programs within the assessment area by census tract income and by borrower income.

Flexible Loan Programs

	Geographic Distribution											
	Low			Moderate			Middle			Upper		
	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units

*Unknown tract data is not included in the above table.

Overall, Fifth Third's lending in low-income tracts, by number and dollar amount, was below the percentage of owner-occupied units in these tracts. However, the percentage of lending in the down payment assistance programs significantly exceeded the percentage of owner-occupied units in low-income tracts. The percentage of lending in moderate-income tracts by volume and dollar amount exceeded the percentage of owner-occupied units in these geographies.

Fifth Third's lending to low-income borrowers by number and dollar amount was below the percentage of low-income families. The percentage of lending to moderate-income borrowers by volume and dollar amount exceeded the percentage of moderate-income families, especially for government loan programs.

Despite the high foreclosure rates in this assessment area, Fifth Third was able to assist low- and moderate-income borrowers or borrowers purchasing properties in a low- or moderate-income area to purchase homes through the use of several down payment assistance programs. Fifth Third made extensive use of flexible lending practices is serving assessment area credit needs, as lending through flexible loan programs in low- and moderate-income tracts and to low-income borrowers was good, while flexible lending to moderate-income borrowers was excellent.

Investment Test

Fifth Third's performance relative to the investment test in the assessment area is rated excellent.

Fifth Third made an excellent level of qualified community development investments and grants, particularly those not routinely provided by private investors. As such, Fifth Third was often in a leadership position. Fifth Third has 389 qualified investments totaling $124 million during the evaluation period. Shown in the table below are the total current period investments:

Affordable Housing		Economic Development		Community Services	
#	$	#	$	#	$
232	50,680,057	10	936,086	85	451,047

Also included in the total number of qualified investments are 62 prior period investments totaling $72.0 million. Fifth Third made 7.6% of its total community development investments in this assessment area, which is greater than the percentage of total deposits at 4.6% and greater than the percentage of branch offices at 6.4%.

Fifth Third exhibits an excellent responsiveness to credit and community development needs in the assessment area, including investments in affordable housing and community services to combat poverty throughout the assessment area, which were important needs expressed by community contacts. Fifth Third made 98 donations totaling $1.4 million that supported local schools, small businesses, social and charitable organizations. The majority of Fifth Third's donations supported economic development, 57.1% of which went to MWV Pinnacle Capital Fund, an economic development organization that invests in high-growth businesses that are owned, controlled, or managed by minorities. Activities that help retain and create jobs were an important need expressed by a community contact.

Service Test

Fifth Third's performance under the service test in this assessment area is rated good. Retail services are reasonably accessible and Fifth Third is a leader in providing community development services.

Retail Services

Fifth Third's record of opening and closing offices has not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and to low- and moderate-income households. Since the previous evaluation, one banking center was opened and three were closed, resulting in no net change in the number of banking centers in low- and moderate-income tracts. Delivery services are reasonably accessible to Fifth Third's geographies and individuals of different income levels.

Business hours and services provided do not vary in a way that inconveniences certain portions of the assessment area, including low- and moderate-income geographies or households and are consistent with the services and hours discussed in the "Institution" assessment.

Fifth Third maintains 83 banking centers within this assessment area, including six in low-, eight in moderate-, 40 in middle-, and 29 in upper-income census tracts. Fifth Third's banking centers in this assessment area represent 6.4% of all of its banking centers.

Fifth Third has a total of 114 full-service ATMs within this assessment area, including 11 in low-, 12 in moderate-, 57 in middle-, and 34 in upper-income census tracts.

The following table illustrates the percentage of banking centers and ATMs in low-, moderate-, middle-, and upper-income census tracts in comparison to the number and percentage of census tracts and the percentage of households and businesses in those tracts.

Geographic Distribution of Branches & ATMS

Assessment Area: OH Cleveland

Tract Category	Branches				Stand Alone ATMs							Demographics			
	Total Branches				Total ATMs			Full Service ATMs		Cash only ATMs		Census Tracts		House holds	Total Businesses

Total	83	100.0%	1	3	Total	126	100.0%	114	100.0%	12	100.0%	894	100.0%	100.0%	100.0%

2016 FFIEC Census Data, 2010 ACS Data, and 2015 D&B Information

Closed branches/ATMs are only included in "closed" columns and are not included in any other totals.

DTO - Drive thru only is a subset of total branches

SA = Stand Alone ATM is a subset of total ATMs

Branch distribution within low-income tracts was considered adequate, as the distribution of branches was below the percentage of census tracts and households in these tracts. However, the branch distribution within moderate-income tracts was considered poor.

Community Development Services

Fifth Third is a leader in providing community development services in this assessment area. During the evaluation period, Fifth Third employees provided 6,825 hours of community development service to local organizations serving low- and moderate-income individuals, which represents 5.7% of all community development services provided and equates to 3.28 annualized persons (ANP).

Affordable Housing	Economic Development	Revitalization and Stabilization	Community Services
# of Hours	***# of Hours***	***# of Hours***	***# of Hours***
384	1,964	276	4,201

Employees provided financial expertise through leadership positions in multiple community organizations that provide affordable housing and promote community and economic development and area revitalization and stabilization.

Community development services include 5,525 hours serving on boards and committees, 909 hours of providing financial literacy through local nonprofits and school programs, 198 hours participating in foreclosure prevention outreach, and 193 hours providing technical assistance to non-profits and local businesses.

Fifth Third is considered particularly responsive with regard to hours dedicated to financial literacy and foreclosure outreach prevention activities. Several community contacts mentioned the need for financial literacy training to provide debt counseling and assist first-time homebuyers. Also, the rates of foreclosure remain significantly higher in seven of eight counties throughout this assessment area compared to the foreclosure rates in Ohio and the nation and Ohio ranked eighth for foreclosure filings in November 2016.

METROPOLITAN AREA
(Full-scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE COLUMBUS OH MSA #18140

The Columbus OH MSA consists of Delaware, Fairfield, Franklin, Licking, Madison, Pickaway, and Union counties. Fifth Third's assessment area excludes Hocking, Morrow, and Perry counties. The assessment area is comprised of 62 low-, 97 moderate-, 131 middle-, and 121 upper-income tracts. There are also three tracts with no income designation that are primarily composed of correctional institutions, military establishments, education facilities, or medical establishments that do not report income information.

As of June 30, 2016, Fifth Third ranked fourth out of 51 institutions with 8.7% of the deposit share. Huntington Bank had the majority of the market share with 31.4% of deposits, followed by JPMorgan Chase Bank and PNC Bank with 22.5% and 9.7% of the market share, respectively. Deposits in this assessment area accounted for 5.2% of the institution's total deposits. This was 31.2% of deposits within the state and the fourth-highest percentage of deposits within Fifth Third's CRA footprint.

From January 1, 2014 through June 30, 2016, Fifth Third originated 5,391 HMDA loans and 1,593 CRA loans, which represented 5.2% and 4.1% of the total loans originated during the evaluation period, respectively. This was the sixth-largest HMDA market and sixth-largest CRA market for loans originated during the evaluation period.

In 2015, Fifth Third Mortgage Company ranked sixth among 519 HMDA reporters in the assessment area, while Fifth Third ranked 47th. The top four HMDA lenders in the assessment area were Huntington Bank, Wells Fargo Bank, Union Savings Bank, and JPMorgan Chase Bank. Fifth Third ranked 10th of 109 CRA reporters in the assessment area in 2015. The top four CRA lenders in the assessment area were PNC Bank, American Express, Chase Bank USA, and U.S. Bank. These lenders are mostly issuers of credit cards and their CRA loans primarily consist of commercial credit card accounts.

Five community contact interviews were conducted to provide additional information regarding the assessment area. The first contact, representing an organization that helps attract and maintain local businesses and generate affordable housing, stated that economic conditions in the Columbus area are strong and home prices have returned to pre-economic crisis values. While financial institutions are actively involved in the community, the contact believed there are opportunities for banks to do a better job promoting affordable housing assistance program options. Education on down payments and closing costs, mortgage credit certificates, and homebuyer education are needed, along with other assistance programs that can help qualified lower-income homebuyers achieve successful home ownership.

The second contact, representing an affordable housing agency, stated that while central Ohio's economy is improving, the availability of affordable, decent housing for lower-income residents is not keeping pace. The contact indicated the market-rate rent in central Ohio is $811 a month, which is likely not affordable for two people earning minimum wages. In addition, homelessness continues to increase in Franklin County. The contact noted several institutions, including local area banks, are involved in developing affordable housing in neighborhoods that have struggled with blight for years. The contact believed that area banks are actively involved in the community and recognize the need for decent affordable housing and specifically mentioned Nationwide and Huntington Bank as being actively involved with this organization.

The third contact, representing a Community Development Corporation (CDC), a nonprofit, community-based organization focused on revitalizing low-income, underserved neighborhoods in the Columbus area, stated that financial institutions in the area are open to making potential investments to the organization. The contact stated there are opportunities for financial institutions to receive CRA credit and provide tax credit financing that helps support various community development initiatives.

The fourth contact, representing an organization that works to create a better quality of life for local residents through housing and economic development, stated business economic development is a main area of focus. There are opportunities for financial institutions to provide assistance in the form of financial literacy training and low-cost small-dollar loans to individuals who would like to start a small business. Affordable housing is another key area of need in the community, as the contact stated that in older parts of Columbus, approximately 44.0% of the housing stock is 40 years or older. Therefore, there is a need for low-cost loans to help rehabilitate dilapidated housing stock within the city.

The last contact, representing an organization focusing on the needs of low- and moderate-income families, stated there is an increasing number of families in the greater Columbus area in need of assistance with paying their utility bills and rent and buying food and clothing. The contact noted there are more people in need of temporary housing through the Emergency Food and Shelter Program. The contact also stated that there are opportunities for banks to participate within the community by providing financial expertise on local boards or supporting community service projects. Overall, the contact believed area banks are doing an excellent job participating in the community.

<u>Population Characteristics</u>

According to the 2010 U.S. Census data, the population in the assessment area was 1.8 million, of which 30.3% lived in low- and moderate-income tracts. In addition, 75.3% of the population was 18 years of age or older, the legal age to enter into a contract.

As of July 1, 2016, Franklin County surpassed Cuyahoga County as Ohio's most populous county for the first time. According to the *Columbus Underground*, the data indicates that Franklin County has an estimated population of 1,264,518, with Cuyahoga County at 1,249,352.

Since 2011, Franklin Country has steadily grown at an average rate of almost 17,000 persons per year, while Cuyahoga County has declined by an average of 4,000 persons per year. In 2015, the Columbus MSA surpassed the two-million population mark and is expected to surpass the Cleveland MSA population when the next set of population estimates becomes available.[255]

According to 2016 U.S. Census estimates,[256] the Columbus MSA remains the third largest MSA in Ohio behind the Cincinnati and the Cleveland MSAs, respectively. The Columbus MSA is the 33rd largest MSA in the country. From 2010 to 2016, the Columbus MSA experienced a 7.3% increase in population. The Cincinnati MSA also experienced an increase in population of 2.4%, while the Cleveland MSA experienced a 1.0% drop in population during this timeframe.

According to 2015 U.S. Census data,[257] Columbus (located in Franklin County) is the largest city in Ohio with 850,106 residents and the 15th largest city in the nation. From 2010 to 2015, Columbus experienced an 18.7% increase in population. The following table shows the population in the assessment area by county for 2010 and 2015, with the percentage of the population increase.[258] The population within the assessment area increased between 2010 and 2015, with Delaware and Franklin counties experiencing the greatest growth and Licking, Madison, and Pickaway counties' population remaining stable. According to Moody's Analytics, robust population growth will continue to bolster private services and enable Columbus to continue to perform better than other parts of Ohio and the nation.

County	2010 Population	2015 Population	Population Percent Change
Delaware	174,214	193,013	10.8%
Fairfield	146,156	151,408	3.6%
Franklin	1,163,414	1,251,722	7.6%
Licking	166,492	166,492	0.0%
Madison	43,435	43,435	0.0%
Pickaway	55,698	55,698	0.0%
Union	52,300	54,277	3.8%
Total	**1,801,709**	**1,916,045**	**6.3%**

Income Characteristics

The 2010 assessment area median family income was higher ($65,998) than Ohio at $59,680. As shown in the table below, the median family income increased between 4.0-7.0% across the assessment area since 2010.

Poverty rates increased in each county in the assessment area from 1999 to 2015.[259] Franklin County had the highest poverty rate in 1999 and 2015. Delaware County had the lowest poverty rate in 1999 and 2015. In 2015, only Franklin County had a poverty rate higher than Ohio and Franklin County and Ohio had poverty rates that exceeded the national rate. However, Licking and Union counties experienced the largest increase in poverty rates during this period. According to the U.S. Census Bureau, the national poverty rate in 2015 was 13.5%, down 1.3 percentage points from 14.8% in 2014. For most demographic groups, the 2015 poverty rates and number of people in poverty decreased from 2014.[260] The following table shows the poverty rates for 1999[261] and 2015.

County	1999 Poverty Rate	2015 Poverty Rate	Change
Delaware	3.8%	4.4%	15.8%
Fairfield	5.9%	9.1%	54.2%
Franklin	11.6%	17.1%	47.4%
Licking	7.5%	12.6%	68.0%
Madison	7.8%	9.3%	19.2%
Pickaway	9.5%	12.4%	30.5%
Union	4.6%	7.6%	65.2%
Ohio	**10.6%**	**14.8%**	**39.6%**
United States	**11.8%**	**13.5%**	**14.4%**

Two community contacts stated that homelessness is increasing and more families are in need of assistance in the Columbus area. As shown above, Franklin County has the highest poverty rate within the assessment area. Also, the surrounding more rural counties (Licking, Union, and Fairfield) experienced the greatest change in poverty rates in the assessment area in the last 16 years.

[259] United States Department of Agriculture Economic Research Service Poverty Rates (for 1999 and 2015): https://data.ers.usda.gov/reports.aspx?ID=17826
[260] 2015 National Poverty: http://www.census.gov/library/publications/2016/demo/p60-256.html
[261] 1999 National Poverty Rate: http://www.census.gov/prod/2000pubs/p60-210.pdf

Housing Characteristics

According to 2010 U.S. Census data, there are 770,131 housing units and 439,901 families in the assessment area. From an income perspective, 33.8% of housing units, 22.2% of owner-occupied units, and 27.7% of families are located in low- or moderate-income tracts. Over three-quarters of the housing units in the low-income census tracts are either rental or vacant (76.7%), and only 23.3% are owner-occupied. In the moderate-income census tracts, over half (54.5%) of the housing units are either rental or vacant, and 45.5% are owner-occupied. Therefore, based on the number of housing units compared to the number of families in low- and moderate-income census tracts, there appear to be more credit-related opportunities for Fifth Third to provide various aspects of affordable housing in moderate-income tracts compared to low-income tracts.

The 2010 U.S. Census data shows the median age of housing stock in the assessment area was 36 years old, with 18.3% of the stock built before 1950. The oldest housing stock was in Franklin County with a median age of 38 years, while the newest was 15 years in Delaware County. However, within the assessment area, the median age of housing stock was 54 years in low-income tracts and 46 years in moderate-income tracts, which indicates that there is ample opportunity to make home improvement loans. In addition, a community contact stated there is a need for small-dollar loans for home improvements/revitalization of older housing stock within the city limits, in addition to the need for homeownership and foreclosure prevention counseling for first-time homebuyers and lower-income individuals.

According to the 2010 U.S. Census data, the median housing value in the assessment area was $163,938, with an affordability ratio of 32.23. The affordability ratio is derived by dividing the median household income by the median housing value. The higher the affordability ratio, the more affordable a home is considered. The median housing values decreased in four counties and increased in three counties between 2010 and 2011-2015, while household incomes increased. As a result, housing became more affordable across the assessment area. During the review period, the most affordable housing was in Union, Pickaway, and Madison counties and the least affordable in Franklin County. Median gross rents substantially increased across most of the assessment area, with renters in Delaware County experiencing the largest increase in rental rates and renters in Union County experiencing the smallest increase. In 2010, about 45.2% of renters across the assessment area had rent costs greater than 30.0% of income. Rising rental rates could make it more difficult for lower income individuals to find affordable housing, as increasing rental rates may make it more difficult for potential homebuyers to save enough for a down payment for a home. In addition, a community contact indicated that the market –rate rent ($811) is likely not affordable for two people earning minimum wages. Several community contacts stated the level of decent, affordable housing for lower-income residents is not keeping pace with the area's growing needs. Contacts also specifically mentioned the need for banks to do more to promote affordable housing assistance program options to assist qualified lower-income homebuyers achieve successful homeownership and provide low-cost loans to help rehabilitate aged, dilapidated housing stock in the older parts of the city. The table below presents housing characteristics from the U.S. Census data between 2010 and 2015 in the assessment area and Ohio.

County	2010 Median Housing Value	2010 Affordability Ratio	2011-2015 Median Housing Value	2011-2015 Affordability Ratio	2010 Median Gross Rent	2011-2015 Median Gross Rent	Percent of Change
Delaware	$252,700	34.79	$256,800	35.81	$781	$953	22.0%
Fairfield	$167,200	33.97	$163,100	37.13	$733	$799	9.0%
Franklin	$155,300	31.61	$150,600	34.75	$764	$845	10.6%
Licking	$152,600	34.92	$152,200	37.15	$682	$760	11.4%
Madison	$146,800	34.42	$149,200	38.48	$660	$734	11.2%
Pickaway	$144,800	34.02	$147,700	38.89	$702	$747	6.4%
Union	$174,800	39.16	$171,200	39.36	$762	$805	5.6%
Ohio	**$136,400**	**34.72**	**$129,900**	**38.05**	**$678**	**$730**	**7.7%**

According to Bankrate.com,[262] Ohio ranked eighth for foreclosure filings in November 2016. The national average for foreclosure filings was 1 in every 1,533 housing units. The following table contains information about foreclosure filings in the assessment area, according to Realtytrac:[263]

Geography Name	Ratio of Properties Receiving Foreclosure Filings in November 2016
Delaware	1:1,769
Fairfield	1:1,900
Franklin	1:1,032
Licking	1:943
Madison	1:1,206
Pickaway	1:975
Union	1:1,283
Ohio	**1:1,055**
United States	**1:1,533**

In November 2016, Pickaway County had the highest rate of foreclosure and Fairfield County had the lowest foreclosure rate within the assessment area.

Building permits in the MSA, Ohio, and the nation are included in the following table for 2014, 2015, and 2016.[264]

[262] Bankrate.com: http://www.bankrate.com/finance/real-estate/foreclosures-by-state/default.aspx
[263] Realtytrac: http://www.realtytrac.com/statsandtrends/foreclosuretrends/
[264] U.S. Census Bureau Building Permits Survey: http://www.census.gov/construction/bps/

Geography	2014	2015	Percent of Change 2014-2015	2016	Percent of Change 2015-2016
Columbus MSA	7,052	7,555	7.1%	8,637	14.3%
Ohio	**19,965**	**20,047**	**0.4%**	**22,816**	**13.8%**
United States	**1,052,124**	**1,182,582**	**12.4%**	**1,190,191**	**0.6%**

The MSA experienced an increase in housing permits between 2014 and 2015 and a larger increase between 2015 and 2016. Based on the overall demand for permits and performance context indicating an improving housing market, this could indicate an increased demand for home purchase loans across the assessment area during the evaluation period. According to Moody's Analytics, housing starts in Columbus grew much faster than those in the rest of Ohio and the U.S in 2016.

Labor, Employment, and Economic Characteristics

According to Moody's Analytics, the Columbus area economy is in expansion and its economy is performing better than nearly all of its state peers and the nation. Professional services, healthcare, and the public sector continue to drive above-average gains in employment and income. Due to the stable presence of The Ohio State University (top area employer), Columbus' workforce is the most educated of any Ohio metropolitan area and one of the most educated in the Midwest. The Ohio State University also serves as a magnet for out-of-area businesses and an incubator for startups due to its extensive research facilities. Additionally, low business costs in addition to a highly educated workforce also help Columbus to attract more out-of-area companies.

According to *Columbus Business First*,[265] the Columbus metropolitan area is home to four Fortune 500 headquarters. In the past year, L Brands climbed 28 places, American Electric Company 19 places, followed by Nationwide climbing 15 places, and Cardinal Health climbing five places on the list.

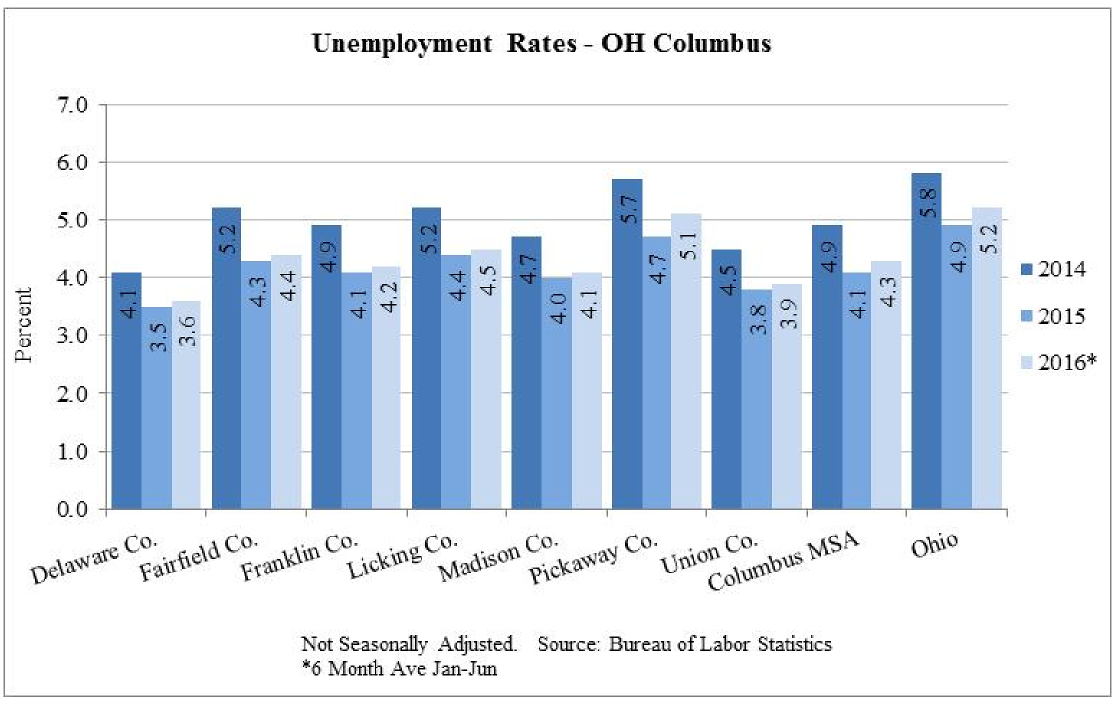
Central Ohio Fortune 500 Companies (2016)		
Rank	**Company**	**Revenue**
21	Cardinal Health	$102.1 billion
69	Nationwide Mutual Insurance Co.	$40.1 billion
165	American Electric Power Company	$16.4 billion
234	L Brands Inc.	$12.5 billion

[265] Columbus Business First: http://www.bizjournals.com/columbus/news/2017/06/07/25-ohio-companies-make-new-fortune-500-list-with.html

According to Moody's Analytics, top employers in the assessment area in 2015/2016 were:

Company	Number of Employees
The Ohio State University	27,656
JPMorgan Chase & Co.	20,475
OhioHealth	19,182
The Kroger Co.	17,397
Nationwide	12,433
Honda of America Manufacturing Inc.	10,701
Mount Carmel Health System	8,410
Nationwide Children's Hospital	7,822
McDonald's Corp.	7,622
L Brands Inc.	7,100
Huntington Bancshares Inc.	5,500
Giant Eagle Inc.	4,600
Cardinal Health Inc.	4,318
American Electric Power Company	3,578

The following table illustrates the average unemployment rates for 2014, 2015, and June 2016 for the counties in the assessment area, MSA, and Ohio.



Overall, unemployment rates declined in 2015 and slightly increased in 2016, but to levels below 2014 unemployment rates across the assessment area. The assessment area had overall lower unemployment rates than Ohio during this period.

According to *The Toledo Blade*, The Andersons Inc. (Lucas County-based agribusiness) filed its official notice with the state of Ohio that it will close its two Toledo area and two Columbus area general stores. The company's closings will affect 1,050 retail workers; 363 jobs will end at the company's Brice and Sawmill general stores in Columbus. The company announced that its retail business lost $20 million in the past eight years and it would shutter the (retail) stores no later than early June.[266]

[266] Blade Staff. "Andersons files official notice of store layoffs." *The Toledo Blade*. February 11, 2017. - https://www.toledoblade.com/Retail/2017/02/11/Andersons-files-official-notice-of-store-layoffs.html

2016 FFIEC Census Data and 2015 D&B Information

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE COLUMBUS OH MSA

Lending Test

Fifth Third's performance under the lending test in this assessment area is rated excellent. Fifth Third has demonstrated an excellent responsiveness to the credit needs of the community. Additionally, Fifth Third originated 61 community development loans totaling $313.5 million. Fifth Third has an excellent geographic distribution of loans and minimal lending gaps. Fifth Third has an excellent distribution among borrowers of different income levels and to businesses of different revenue sizes. Fifth Third exhibits an excellent record of serving the credit needs of highly economically disadvantaged areas in its assessment area, low-income individuals, and businesses with gross annual revenues of $1 million or less. The excellent level of community development loans and extensive use of flexible lending practices augmented Fifth Third's performance in this assessment area.

Greatest consideration was given to the evaluation of home purchase lending based on the overall volume of lending, followed by refinance, small business, and home improvement lending. Details of Fifth Third's residential mortgage and small business lending, as well as information regarding lending by peers, can be found in Appendix E.

Lending Activity

Fifth Third's lending activity reflects an excellent responsiveness to the credit needs within the assessment area. Fifth Third originated 2,853 home purchase, 2,339 refinance, 195 home improvement, 1,593 small business, and 61 community development loans during the evaluation period. The percentage of Fifth Third's total lending at 4.9% is less than the percentage of total deposits at 5.2% in this area.

Fifth Third made 98.4% of the HMDA and 99.5% of the CRA lending within its designated assessment area. No concentrations of lending were identified in any of the excluded counties within the assessment area.

In addition to lending, Fifth Third modified existing loans to borrowers. Refer to the distribution of HAMP and other real-estate secured modifications within the assessment area by census tract income and by borrower income.

	Distribution by Census Tract Income							
	Low		Mod		Middle		Upper	
	#	%	#	%	#	%	#	%
Other Real Estate Secured Modifications	18	6.3%	72	25.1%	130	45.3%	67	23.3%
Percentage of Owner Occupied Units		***5.1%***		***17.1%***		***37.2%***		***40.7%***

*Unknown tract data is not included in the above table.

	Distribution by Borrower Income							
	Low		Mod		Middle		Upper	
	#	%	#	%	#	%	#	%
Other Real Estate Secured Modifications	75	26.1%	96	33.4%	81	28.2%	33	11.5%
Percentage of Families by Family Income		***21.0%***		***16.9%***		***20.4%***		***41.7%***

*Unknown tract data is not included in the above table.

There were not enough HAMP modifications for a meaningful analysis. The percentage of other modifications in low- and moderate-income tracts exceeded the percentage of owner-occupied units in these geographies. Therefore, modifications helped to expand lending activities in these areas. The percentage of other modifications made to low- and moderate-income borrowers exceeded the percentage of low- and moderate-income families. Therefore, modifications enhanced Fifth Third's ability to reach low- and moderate-income borrowers.

Geographic Distribution of Loans

Fifth Third's overall distribution of lending among geographies is excellent. Home purchase lending, the largest loan category, is excellent. Refinance and home improvement lending are also excellent. Small business lending is good. There is also an overall low level of lending gaps. The following gaps in lending were noted in the assessment area:

Tract Income Levels	Number of Tracts	Tracts with No Loans	Penetration
Low	62	3	95.2%
Moderate	97	0	100.0%
Middle	131	0	100.0%
Upper	121	0	100.0%
Unknown	3	2	33.3%
Total	**414**	**5**	**98.8%**

Lending gaps are considered minimal. The penetration rate in low-income tracts is 95.2% and there are no lending gaps in moderate-, middle-, and upper-income tracts.

Home Purchase Loans

Fifth Third made 171 home purchase loans totaling $16.9 million in low-income tracts. This represents 6.0% of home purchase loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 5.1%, and 3.4% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate at 2.6% and significantly exceeded the 2015 aggregate at 2.9%. As Fifth Third's performance exceeded proxy and the aggregate of all lenders, the geographic distribution of home purchase loans in low-income tracts is excellent.

Fifth Third made 539 home purchase loans totaling $56.5 million in moderate-income tracts. This represents 18.9% of home purchase loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 17.1%, and 11.3% by dollar amount, which is below proxy. The percentage of loans by volume was comparable to the 2014 aggregate at 12.8% and exceeded the 2015 aggregate at 13.3%. As Fifth Third's performance exceeded the aggregate of all lenders and proxy, the geographic distribution of home purchase loans in moderate-income tracts is excellent.

Fifth Third made 905 home purchase loans totaling $126.6 million in middle-income tracts. This represents 31.7% of home purchase loans by volume, which is below the percentage of owner-occupied units in these tracts at 37.2%, and 25.3% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate of 35.9% and was below the 2015 aggregate of 35.6%.

Fifth Third made 1,238 home purchase loans totaling $300.9 million in upper-income tracts. This represents 43.4% of home purchase loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 40.7%, and 60.1% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 48.8% and was below the 2015 aggregate of 48.2%.

Overall, the geographic distribution of home purchase loans is excellent.

Refinance Loans

Fifth Third made 138 refinance loans totaling $10.7 million in low-income tracts. This represents 5.9% of refinance loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 5.1%, and 2.9% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate at 3.5% and exceeded the 2015 aggregate at 2.5%. Since Fifth Third's performance exceeded the aggregate of all lenders and proxy, the geographic distribution of refinance loans in low-income tracts is excellent.

Fifth Third made 381 refinance loans totaling $35.3 million in moderate-income tracts. This represents 16.3% of refinance loans by volume, which is comparable to the owner-occupied units in these tracts at 17.1%, and 9.6% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate at 14.2% and exceeded the 2015 aggregate at 11.6%. As Fifth Third's performance exceeded the aggregate of all lenders and was comparable to proxy, the geographic distribution of refinance loans in moderate-income tracts is excellent.

Fifth Third made 740 refinance loans totaling $89.6 million in middle-income tracts. This represents 31.6% of refinance loans by volume, which is below the owner-occupied units in these tracts at 37.2%, and 24.3% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate at 36.8% and was below the 2015 aggregate at 34.1%.

Fifth Third made 1,080 refinance loans totaling $232.6 million in upper-income tracts. This represents 46.2% of refinance loans by volume, which exceeds the owner-occupied units in these tracts at 40.7%, and 63.2% by dollar amount, which significantly exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate at 45.5% and was below the 2015 aggregate at 51.9%.

Overall, the geographic distribution of refinance loans is excellent.

Home Improvement Loans

Fifth Third made 14 home improvement loans totaling $458,000 in low-income tracts. This represents 7.2% of home improvement loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 5.1%, and 2.5% by dollar amount, which is significantly below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 4.0% and exceeded the 2015 aggregate of 3.6%. Given the median age of housing stock at 54 years in low-income tracts, which typically indicates the need for home improvement loans and Fifth Third's performance, which exceeded proxy and the aggregate of all lenders, the geographic distribution of home improvement loans in low-income tracts is excellent.

Fifth Third made 33 home improvement loans totaling $1.6 million in moderate-income tracts. This represents 16.9% of home improvement loans by volume, which is comparable to the percentage of owner-occupied units in these tracts at 17.1%, and 8.8% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 14.9% and the 2015 aggregate of 15.3%. As Fifth Third's performance was comparable to proxy and exceeded the aggregate of all lenders, the geographic distribution of home improvement loans in moderate-income tracts is excellent.

Fifth Third made 68 home improvement loans totaling $4.8 million in middle-income tracts. This represents 34.9% of home improvement loans by volume, which is below the percentage of owner-occupied units in these tracts at 37.2%, and 26.8% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate of 38.5% and exceeded the 2015 aggregate of 37.5%.

Fifth Third made 80 home improvement loans totaling $11.2 million in upper-income tracts. This represents 41.0% of home improvements loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 40.7%, and 61.8%, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 42.6% and was below the 2015 aggregate of 43.6%.

Overall, the geographic distribution of home improvement loans is excellent.

Small Business Loans

Fifth Third made 117 small business loans totaling $19.6 million in low-income tracts. This represents 7.3% of small business loans by volume, which is comparable to the percentage of businesses in these tracts at 7.6%, and 12.5% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 6.8% and was below the 2015 aggregate of 7.5%. Given that Fifth Third's performance was comparable to proxy, the geographic distribution of small business loans in low-income tracts is good.

Fifth Third made 196 small business loans totaling $31.6 million in moderate-income tracts. This represents 12.3% of small business loans by volume, which is below the percentage of businesses in these tracts at 17.9%, and 20.1% by dollar volume, which exceeds proxy. The percentage of loans by volume was significantly below the 2014 aggregate of 21.6% and was significantly below the 2015 aggregate of 22.8%. Given that Fifth Third's performance was significantly below the aggregate of all lenders and below proxy, the geographic distribution of small business loans in moderate-income tracts is adequate.

Fifth Third made 442 small business loans totaling $45.3 million in middle-income tracts. This represents 27.7% of small business loans by volume, which is below the percentage of businesses in these tracts at 32.3%, and 28.8% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate of 28.0% and exceeded the 2015 aggregate of 27.5%.

Fifth Third made 835 small business loans totaling $60.4 million in upper-income tracts. This represents 52.4% of small business loans by volume, which exceeds the percentage of businesses in these tracts at 42.1%, and 38.5% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 42.4% and exceeded the 2015 aggregate of 41.0%.

Overall, the geographic distribution of small business loans is good.

Distribution by Borrower Income and Revenue Size of the Business

The distribution of loans is excellent based on borrower income and for businesses of different revenue sizes. Borrower distribution is excellent for home purchase and home improvement lending, and borrower distribution is good for refinance lending.

Home Purchase Loans

Fifth Third made 577 loans totaling $51.1 million to low-income borrowers. This represents 20.2% of home purchase loans by volume, which is comparable to the percentage of low-income families at 21.0%, and 10.2% by dollar amount, which is significantly below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 7.0% and significantly exceeded the 2015 aggregate of 8.2%. Because Fifth Third's performance significantly exceeded the aggregate of all lenders and was comparable to proxy, the borrower distribution of home purchase loans to low-income borrowers is excellent.

Fifth Third made 628 loans totaling $75.3 million to moderate-income borrowers. This represents 22.0% of home purchase loans by volume, which exceeds the percentage of moderate-income families at 16.9%, and 15.0% by dollar amount, which is comparable to proxy. The percentage of loans by volume exceeded the 2014 aggregate of 18.7% and exceeded the 2015 aggregate of 18.8%. As Fifth Third's performance exceeded proxy and the aggregate of all lenders, the borrower distribution of home purchase loans to moderate-income borrowers is excellent.

Fifth Third made 515 loans totaling $79.4 million to middle-income borrowers. This represents 18.1% of home purchase loans by volume, which is below the percentage of middle-income families at 20.4%, and 15.9% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 19.6% and was below the 2015 aggregate of 20.4%.

Fifth Third made 1,024 loans totaling $276.3 million to upper-income borrowers. This represents 35.9% of home purchase loans by volume, which is below the percentage of upper-income families at 41.7%, and 55.2% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 34.2% and was below the 2015 aggregate of 33.9%.

The overall borrower distribution of home purchase loans is excellent.

Refinance Loans

Fifth Third made 322 loans totaling $28.4 million to low-income borrowers. This represents 13.8% of refinance loans by volume, which is below percentage of low-income families at 21.0%, and 7.7% by dollar volume, which is significantly below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 7.4% and significantly exceeded the 2015 aggregate of 5.6%. Given Fifth Third's performance significantly exceeded the aggregate of all lenders, but was below proxy, the borrower distribution of refinance loans to low-income borrowers is good.

Fifth Third made 445 loans totaling $43.9 million to moderate-income borrowers. This represents 19.0% of refinance loans by volume, which exceeds the percentage of moderate-income families at 16.9%, and 11.9% by dollar volume, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 15.1% and exceeded the 2015 aggregate of 12.6%. As Fifth Third's performance exceeded proxy and aggregate lenders, borrower distribution of refinance loans to moderate-income borrowers is excellent.

Fifth Third made 516 loans totaling $63.7 million to middle-income borrowers. This represents 22.1% of refinance loans by volume, which exceeds the percentage of middle-income families at 20.4%, and 17.3% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 19.3% and exceeded the 2015 aggregate of 18.9%.

Fifth Third made 953 loans totaling $213.5 million to upper-income borrowers. This represents 40.7% of refinance loans by volume, which is comparable to the percentage of upper-income families at 41.7%, while the percentage of loans by dollar amount at 58.0% significantly exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 38.2% and exceeded the 2015 aggregate of 39.3%.

Overall, the borrower distribution of refinance loans is good.

Home Improvement Loans

Fifth Third made 37 loans totaling $2.4 million to low-income borrowers. This represents 19.0% of home improvement loans by volume, which is comparable to the percentage of low-income families at 21.0%, and 13.2% by dollar amount, which is below proxy. The percentage of loans by volume significantly exceeded the 2014 aggregate of 9.9% and significantly exceeded the 2015 aggregate of 8.6%. Given that Fifth Third's performance significantly exceeded the aggregate of all lenders and was comparable to proxy, the borrower distribution of home improvement loans to low-income borrowers is excellent.

Fifth Third made 47 loans totaling $2.3 million to moderate-income borrowers. This represents 24.1% of its home improvement loans by volume, which substantially exceeds the percentage of moderate-income families at 16.9%, and 12.8% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 18.8% and exceeded the 2015 aggregate of 18.2%. Given that Fifth Third's performance exceeds the aggregate of all lenders and proxy, the borrower distribution of home improvement loans to moderate-income borrowers is excellent.

Fifth Third made 43 loans totaling $3.4 million to middle-income borrowers. This represents 22.1% of home improvement loans by volume, which exceeds the percentage of middle-income families at 20.4%, and 18.7% by dollar amount, which is slightly below proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 20.5% and exceeded the 2015 aggregate of 20.7%.

Fifth Third made 67 loans totaling $9.9 million to upper-income borrowers. This represents 34.4% of home improvement loans by volume, which is significantly below the percentage of upper-income families at 41.7%, and 54.6% by dollar amount, which exceeds proxy. The percentage of loans by volume was below 2014 aggregate of 44.2% and was below the 2015 aggregate of 45.0%.

Overall, the borrower distribution of home improvement loans is excellent.

Small Business Loans

The distribution of small business loans to businesses of different sizes is excellent, considering Fifth Third's performance relative to the aggregate of all lenders. Fifth Third was able to make 62.9% of small business loans to businesses with revenues of $1 million or less.

Fifth Third's performance exceeded the 2014 aggregate of 36.4% and exceeded the 2015 aggregate of 39.5%, but was significantly below the percentage of small businesses in the assessment area at 91.9%. Also, during the evaluation period, Fifth Third was able to make a relatively high percentage of small-dollar loans (79.0%) up to $100,000, indicating a willingness to lend in smaller amounts typically requested by small businesses. In addition, a community contact indicated there is a need to assist entrepreneurs in starting businesses.

Community Development Loans

Fifth Third originated 61 community development loans totaling $313.5 million during the evaluation period as shown in the table below:

Affordable Housing		Economic Development		Revitalization and Stabilization		Community Services	
#	$	#	$	#	$	#	$
8	60,049,891	14	91,250,000	35	160,592,816	4	1,615,066

Community development lending in the assessment area represents 5.2% of the total dollar volume of community development loans originated Fifth Third during the evaluation period. This ranks as Fifth Third's fourth highest percentage of community development lending during the evaluation period. Fifth Third's performance is especially strong because of the high competition for community development loans and a number of large national banks in the area. As such, Fifth Third is considered a leader in community development lending.

Examples of community development lending include, but are not limited to:

- A renewal of line of credit for Habitat for Humanity Mid-Ohio
- A renewal of a revolving line of credit to a limited housing partnership that provides 72 units of affordable housing for the elderly earning less than 60.0% of the area median income/Medicaid eligible
- Multiple working capital loans that promote economic development by financing businesses to support job retention, add new jobs, and promote growth to continue operations in low- and moderate-income geographies (20 jobs added and over 50 jobs saved)
- Multiple working capital loans to help retain and expand businesses located in areas specifically designated by the city to promote revitalization and economic development

The affordable housing and revitalization loans and loans that provide services to low- and moderate-income areas were deemed to be responsive, as community contacts specifically mentioned the need for these types of loans. A community contact also mentioned the need to revitalize the blighted areas of Columbus.

Flexible Lending Programs

Fifth Third had 1,155 flexible lending loans in this assessment area: 656 government loans, 72 down payment assistance loans, and 427 other flexible lending programs. The following tables show the percentage by volume and by dollar amount of the three types of flexible lending programs made in this assessment area during the evaluation period and the distribution of Fifth Third's flexible lending programs within the assessment area by census tract income and by borrower income.

Flexible Loan Programs												
	Geographic Distribution											
	Low			Moderate			Middle			Upper		
	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units

Total	**18.3%**	**12.9%**	**21.0%**	**29.3%**	**25.1%**	**16.9%**	**21.1%**	**21.7%**	**20.4%**	**25.0%**	**34.3%**	**41.7%**

Fifth Third's lending in low-income tracts, by number exceeded the percentage of owner-occupied units in these tracts; however, lending by dollar amount was below proxy. The number and dollar amount of down payment assistance programs significantly exceeded the overall percentage of lending in low-income tracts. The percentage of lending by volume in moderate-income tracts exceeded the percentage of owner-occupied units in these geographies, while the percentage of lending by dollar amount was below proxy. The number and dollar amounts of down payment assistance programs exceeded the overall percentage of lending in moderate-income tracts.

Fifth Third's lending by volume and dollar amount to low-income borrowers was below percentage of low-income families in the assessment area.

The percentage of lending by volume and dollar amount to moderate-income borrowers exceeded the percentage of moderate-income families, especially for government loan programs.

Fifth Third made extensive use of flexible lending practices is serving assessment area credit needs, as lending through flexible loan programs to moderate-income borrowers was good and lending in low- and moderate-income tracts and to low-income borrowers was excellent. In addition, a community contact indicated the need for down payment and closing cost assistance programs to assist qualified lower-income homebuyers achieve successful homeownership.

Investment Test

Fifth Third's performance relative to the investment test in the assessment area is rated good.

Fifth Third made a relatively high level of qualified community development investments and grants, particularly those not routinely provided by private investors. As such, Fifth Third was occasionally in a leadership position. Fifth Third has 411 qualified investments totaling $61.5 million during the evaluation period. Shown in the table below are the total current period investments:

Affordable Housing		Economic Development		Revitalization and Stabilization		Community Services	
#	$	#	$	#	$	#	$
221	25,417,612	9	26,100	3	12,500	122	676,378

Also included in the total number of qualified investments are 56 prior period investments totaling $35.4 million. Fifth Third made 3.8% of its total community development investments in this assessment area, which is less than the percentage of total deposits at 5.2% and less than the percentage of branch offices at 4.3%.

Fifth Third exhibits a good responsiveness to credit and community development needs in the assessment area, including investments in affordable housing throughout the assessment area, which was an important need expressed by several community contacts. Fifth Third made 148 donations totaling $830,278 that supported chambers of commerce, small businesses, churches, social and charitable organizations. The majority of Fifth Third's donations (81.5%) supported services to low- and moderate-income individuals, in particular to the United Way of Central Ohio. A community contact indicated there are an increasing number of families in need of various types of assistance in the Columbus area.

Service Test

Fifth Third's performance under the service test in this assessment area is rated good. Retail services are accessible and Fifth Third a relatively high level of providing community development services.

Retail Services

Fifth Third's record of opening and closing offices has not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and to low- and moderate-income households. Since the previous evaluation, no banking centers were opened and two were closed, resulting in no net change in the number of banking centers in low- and moderate-income tracts. Delivery services are accessible to Fifth Third's geographies and individuals of different income levels.

Business hours and services provided do not vary in a way that inconveniences certain portions of the assessment area, including low- and moderate-income geographies or households, and are consistent with the services and hours discussed in the "Institution" assessment.

Fifth Third maintains 56 banking centers within this assessment area, including three in low-, 15 in moderate-, 15 in middle-, and 23 in upper-income census tracts. Fifth Third banking centers in this assessment area represent 4.3% of all its banking centers.

Fifth Third has a total of 90 full-service ATMs within this assessment area, including four in low-, 30 in moderate-, 22 in middle-, and 31 in upper-income census tracts. There are also three full-service ATMs located in unknown income tracts.

The following table illustrates the percentage of banking centers and ATMs in low-, moderate-, middle-, and upper-income census tracts in comparison to the number and percentage of census tracts and the percentage of households and businesses in those tracts.

Geographic Distribution of Branches & ATMS

Assessment Area: OH Columbus

Tract Category	Branches				Stand Alone ATMs							Demographics			
	Total Branches		Open	Closed	Total ATMs			Full Service ATMs		Cash only ATMs		Census Tracts		House holds	Total Businesses
	#	%	#	#		#	%	#	%	#	%	#	%	%	%
Low	3	5.4%	0	0	Total	5	4.5%	4	4.4%	1	4.8%	62	15.0%	10.7%	7.8%
Moderate	15	26.8%	0	0	Total	33	29.7%	30	33.3%	3	14.3%	97	23.4%	20.7%	18.0%
Middle	15	26.8%	0	0	Total	25	22.5%	22	24.4%	3	14.3%	131	31.6%	36.1%	31.9%
Upper	23	41.1%	0	2	Total	42	37.8%	31	34.4%	11	52.4%	121	29.2%	32.5%	42.0%
Unknown	0	0.0%	0	0	Total	6	5.4%	3	3.3%	3	14.3%	3	0.7%	0.0%	0.3%
Total	56	100.0%	0	2	Total	111	100.0%	90	100.0%	21	100.0%	414	100.0%	100.0%	100.0%

2016 FFIEC Census Data, 2010 ACS Data, and 2015 D&B Information
Closed branches/ATMs are only included in "closed" columns and are not included in any other totals.
DTO - Drive thru only is a subset of total branches
SA = Stand Alone ATM is a subset of total ATMs

Branch distribution within low-income tracts was considered adequate, as the distribution of branches was below the percentage of census tracts and households in these tracts. However, the branch distribution within moderate-income tracts was considered excellent.

Community Development Services

Fifth Third has a relatively high level of providing community development services in this assessment area. During the evaluation period, Fifth Third employees provided 5,397 hours of community development service to local organizations serving low- and moderate-income individuals, which represents 4.5% of all community development services provided and equates to 2.59 annualized persons (ANP).

Affordable Housing	Economic Development	Revitalization and Stabilization	Community Services
# of Hours	***# of Hours***	***# of Hours***	***# of Hours***
294	289	290	4,524

Employees provided financial expertise through leadership positions in multiple community organizations that provide affordable housing and promote community and economic development and area revitalization and stabilization. Community development services include 3,213 hours of providing financial literacy through local nonprofits and school programs, 1,813 hours serving on boards and committees, 191 hours providing technical assistance to non-profits, and 180 hours participating in foreclosure prevention outreach.

Fifth Third is considered particularly responsive with regard to hours dedicated to financial literacy, as several community contacts mentioned the need for financial literacy training to assist first-time homebuyers and support for affordable housing.

METROPOLITAN and NON-METROPOLITAN AREAS
(Limited-scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE STATE OF OHIO

- **Dayton-Springfield-Sidney CSA**
  - As of June 30, 2016, Fifth Third operated 43 branches in the assessment area, representing 17.6% of its branches in Ohio.
  - As of June 30, 2016, Fifth Third had $3.1 million in deposits in this assessment area, representing a market share of 24.5% and 17.5% of it statewide deposits.
- **Lima MSA**
  - As of June 30, 2016, Fifth Third operated three branches in the assessment area, representing 1.2% of its branches in Ohio.
  - As of June 30, 2016, Fifth Third had $144,302 in deposits in this assessment area, representing a market share of 8.0% and 0.8% of it statewide deposits.
- **Non-metropolitan Northwest Ohio**
  - As of June 30, 2016, Fifth Third operated 18 branches in the assessment area, representing 7.3% of its branches in Ohio.
  - As of June 30, 2016, Fifth Third had $1.1 million in deposits in this assessment area, representing a market share of 8.6% and 6.0% of it statewide deposits.
- **Non-metropolitan Southwest Ohio**
  - As of June 30, 2016, Fifth Third operated 15 branches in the assessment area, representing 6.1% of its branches in Ohio.
  - As of June 30, 2016, Fifth Third had $627,041 in deposits in this assessment area, representing a market share of 9.4% and 3.6% of it statewide deposits.
- **Toledo MSA**
  - As of June 30, 2016, Fifth Third operated 27 branches in the assessment area, representing 11.0% of its branches in Ohio.
  - As of June 30, 2016, Fifth Third had $2.4 million in deposits in this assessment area, representing a market share of 23.5% and 13.5% of it statewide deposits.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE STATE OF OHIO

Through the use of available facts and data, including performance and demographic information, each assessment area's performance was evaluated and compared with Fifth Third's performance in the state. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendix F for information regarding these areas.

Assessment Area	Lending Test	Investment Test	Service Test
Dayton-Springfield-Sidney CSA	Below	Below	Below
Lima MSA	Below	Below	Consistent
Non-metropolitan Northwest Ohio	Below	Below	Consistent
Non-metropolitan Southwest Ohio	Below	Consistent	Consistent
Toledo MSA	Below	Below	Consistent

For the lending test, Fifth Third received an "Outstanding" rating in Ohio. Performance in all five limited-scope assessment areas was below Fifth Third's performance for the state. Although below the state performance, the geographic and borrower distribution of loans was excellent in the Dayton-Springfield-Sidney assessment area and good in the remaining four assessment areas. The level of community development loans was good in the Dayton-Springfield-Sidney and Toledo assessment areas and adequate in the remaining three assessment areas. Overall, a low level of lending gaps was noted in all five limited-scope assessment areas.

For the investment test, Fifth Third received an "Outstanding" rating in Ohio. While the investment activity was below the performance for the state in all five limited-scope assessment areas, investment activity was adequate in the Lima assessment area and good in the remaining four assessment areas. The weaker performance was primarily due to a lower level of qualified investments and contributions relative to Fifth Third's operational presence in the assessment area.

For the service test, Fifth Third received a "High Satisfactory" rating in Ohio. Performance was consistent with Fifth Third's performance for the state in four of the five limited-scope assessment areas, while services performance in the Dayton-Springfield-Sidney assessment area was below performance for the state. Retail services were good in the non-metropolitan Northwest Ohio, non-metropolitan Southwest Ohio, and the Toledo assessment areas and adequate in the remaining two assessment areas. The stronger retail services performance in the non-metropolitan areas and in the Toledo assessment areas was primarily due to greater accessibility of delivery systems in lower-income geographies. Qualified community development services were excellent in three limited-scope assessment areas and good in the Dayton-Springfield and non-metropolitan Southwest Ohio assessment areas. The weaker community development services performance was primarily due to a lower level of hours dedicated to providing qualified services relative to Fifth Third's operational presence in these assessment areas.

The performance in the limited-scope assessment areas did not change the overall state rating.

COMMONWEALTH OF PENNSYLVANIA

CRA RATING for Commonwealth of Pennsylvania: Satisfactory
The lending test is rated: High Satisfactory
The investment test is rated: Outstanding
The service test is rated: Low Satisfactory

The major factors supporting this rating include:

- An adequate responsiveness to the credit needs of the community;
- A good geographic distribution of loans throughout the assessment area;
- An adequate distribution among borrowers of different income levels and to businesses of different revenue sizes;
- Exhibits a good record of serving the credit needs of low-income individuals and areas and very small businesses;
- A relatively high level of community development loans;
- An excellent level of qualified community development investments and grants;
- Often in a leadership position in providing community development investments and grants;
- Retail delivery systems are accessible to all geographies and individuals of different income levels and businesses of different revenue sizes;
- Banking services and hours that do not vary in a way that inconveniences any portions of the assessment areas; and,
- An adequate level of community development services.

SCOPE OF EXAMINATION

A full-scope review was conducted for the Pittsburgh MSA assessment area, which represents Fifth Third's entire banking operations for Pennsylvania. The time period, products, and affiliates evaluated for this assessment area are consistent with the scope discussed in the Institution section of this report.

METROPOLITAN AREA
(Full-scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE PITTSBURGH PA MSA #38300

The Pittsburgh PA MSA consists of Allegheny County and portions of Washington and Westmoreland counties. Fifth Third's assessment area excludes Armstrong, Beaver, Butler, and Fayette counties. The assessment area is comprised of 38 low-, 104 moderate-, 174 middle-, and 122 upper-income tracts. There are also 13 tracts with no income designation that are primarily composed of correctional institutions, military establishments, education facilities, or medical establishments that do not report income information.

Fifth Third exited the Pittsburgh market as of April 22, 2016; therefore, 2015 Summary of Deposit information was used to determine the appropriate deposit market share for this assessment area. Additionally, the branches that were open during this review period were evaluated. As of June 30, 2015, Fifth Third ranked 15th out of 45 institutions with 0.7% of the deposit share. PNC Bank had the majority of the market share 50.9% of deposits, followed by The Bank of New York Mellon, Citizens Bank of Pennsylvania, BNY Mellon (PA), and Dollar Bank FSB with 9.9%, 7.8%, 7.2%, and 3.5% of the market share, respectively. Deposits in this assessment area accounted for 0.7% of the institution's total deposits. This was the 26th highest percentage of deposits within Fifth Third's CRA footprint.

From January 1, 2014 through June 30, 2016, Fifth Third originated 458 HMDA loans and 140 CRA loans, which represented 0.4% of the total loans originated during the evaluation period, respectively. This was the 35th largest HMDA market and 35th largest CRA market for loans originated during the evaluation period.

In 2015, Fifth Third Mortgage Company ranked 47th among 447 HMDA reporters in the assessment area, while Fifth Third ranked 100th. The top four HMDA lenders in the assessment area were Wells Fargo Bank, Dollar Bank FSB, PNC Bank, and Howard Hanna Financial Services. Fifth Third ranked 26th of 102 CRA reporters in the assessment area in 2015. The top four CRA lenders in the assessment area were PNC Bank, American Express, Capital One, and Synchrony Bank. These lenders are mostly issuers of credit cards and their CRA loans primarily consist of commercial credit card accounts.

Three community contact interviews were conducted to provide additional information regarding the assessment area. The first contact, representing a small business development corporation, stated that one of the overall challenges facing Westmoreland County is its rapidly aging population. Approximately 28.0% of population is projected to be age 65 or older in 2020. The effects of a larger elderly population are a decline in consumer spending, a shrinking tax base, and an increased demand for services. The contact stated that while there is an active banking community in the area, small businesses are still finding it challenging to obtain loans as a result of the current regulatory environment to which banks are bound. The contact indicated there is a need for businesses to be able to obtain small-dollar loans with minimal fees in order to better meet daily operational needs.

The second contact, representing an organization that provides workforce development, stated there are opportunities for financial institutions to participate in economic development initiatives to help create jobs. More available jobs are being posted online for the Pittsburgh region; openings for heavy and tractor-trailer drivers, sales representatives, and registered nurses topped the list for occupations wanted. Nearly half the available jobs require a bachelor's degree and over a quarter require high school and career training.

The third contact, representing an economic development organization, indicated the Pittsburgh area is well-served by a multitude of community banks and larger financial institutions. Overall, community development initiatives are being supported. The contact believed local banks seem more willing and able to lend and provide services in the community than the larger regional financial institutions.

Population Characteristics

According to the 2010 U.S. Census data, the population in the assessment area was 1.4 million. Less than a quarter (23.4%) of the population lived in low- and moderate-income tracts. In addition, 80.0% of the population was 18 years of age or older, the legal age to enter into a contract. According to Moody's Analytics, the Pittsburgh MSA has an older-than-average population. The share of the population age 65 and older in Pennsylvania is four percentage points higher than the U.S. average. A community contact also mentioned the aging population in Westmoreland County as becoming an increasing concern from an economic perspective.

As of July 1, 2015, the Pittsburgh MSA is the 26th largest in terms of population in the nation.[267] Allegheny County is the largest county in the assessment area and the second-largest county in Pennsylvania.[268] Pittsburgh is the largest city in this county with 304,391 residents and the second-most populous city in Pennsylvania. Pittsburgh is the 63rd largest city in the United States; its population decreased by 8.7% between 2000 and 2015.[269] Washington County is the tenth-largest county in Pennsylvania and Greensburg is the largest city in the county, with 14,495 residents. Westmoreland County is the 18th largest county in Pennsylvania and Washington is the largest city in the county with 13,497 residents. According to Moody's Analytics, the Pittsburgh MSA has struggled to retain population and continues to experience weak and worsening out-migration trends in spite of increasing foreign immigration.

The following table shows the population in the assessment area by county for 2010 and 2015, with the percentage of the population increase or decrease.[270] The population within the assessment area remained relatively stable between 2010 and 2015, with Westmoreland County experiencing negative growth in population during this time period.

---

267 MSA population data is derived from the U.S. Census Data 2015 Statistical Abstract: https://factfinder.census.gov/faces/tableservices/jsf/pages/productview.xhtml?src=bkmk

270 Population Estimates derived from U.S. Census Data (April 1, 2010 – July 1, 2015): http://www.census.gov/quickfacts/table/PST045216/00

County	2010 Population	2015 Population	Population Percent Change
Allegheny	1,223,348	1,230,459	0.6%
Washington	207,820	208,261	0.2%
Westmoreland	365,169	357,956	-2.0%
Total	**1,796,337**	**1,796,676**	**0.0%**

Income Characteristics

The 2010 assessment area median family income was higher ($65,364) than Pennsylvania at $63,364. As shown in the table below, the median family income increased across the assessment area since 2010.

Borrower Income Levels
Pittsburgh, PA MSA

FFIEC Estimated Median Family Income		Low 0 - 49.99%	Moderate 50% - 79.99%	Middle 80% - 119.99%	Upper 120% - & above
2014	**$65,600**	0 - $32,799	$32,800 - $52,479	$52,480 - $78,719	$78,720 - & above
2015	**$69,700**	0 - $34,849	$34,850 - $55,759	$55,760 - $83,639	$83,640 - & above
2016	**$70,600**	0 - $35,299	$35,300 - $56,479	$56,480 - $84,719	$84,720 - & above

Poverty rates increased in each county in the assessment area from 1999 to 2015.[271] Allegheny County had the highest poverty rate in 1999 and 2015. Westmoreland County had the lowest poverty rate in 1999 and Washington County had the lowest poverty rate in 2015. In 2015, the poverty rates of the assessment area and Pennsylvania were lower than the national rate. Westmoreland County experienced the largest increase in poverty rate during this period. According to the U.S. Census Bureau, the national poverty rate in 2015 was 13.5%, down 1.3 percentage points from 14.8% in 2014. For most demographic groups, the 2015 poverty rates and number of people in poverty decreased from 2014.[272] The following table shows the poverty rates for 1999[273] and 2015.

County	1999 Poverty Rate	2015 Poverty Rate	Change
Allegheny	11.2%	12.2%	8.9%
Washington	9.8%	10.1%	3.1%
Westmoreland	8.6%	11.3%	31.4%
Pennsylvania	**11.0%**	**13.1%**	**19.1%**
United States	**11.8%**	**13.5%**	**14.4%**

[271] United States Department of Agriculture Economic Research Service Poverty Rates (for 1999 and 2015): https://data.ers.usda.gov/reports.aspx?ID=17826
[272] 2015 National Poverty: http://www.census.gov/library/publications/2016/demo/p60-256.html
[273] 1999 National Poverty Rate: http://www.census.gov/prod/2000pubs/p60-210.pdf

Housing Characteristics

According to 2010 U.S. Census data, there are 670,057 housing units and 355,640 families in the assessment area. From an income perspective, 27.1% of housing units, 18.5% of owner-occupied units, and 21.4% of families are located in low- or moderate-income tracts. Nearly three-quarters of the housing units in the low-income census tracts are either rental or vacant (73.0%), and 27.1% are owner-occupied. In the moderate-income census tracts, over half (54.3%) of the housing units are either rental or vacant, and 45.7% are owner-occupied. Therefore, based on the number of housing units compared to the number of families in low- and moderate-income census tracts, there appear to be more credit-related opportunities for Fifth Third to provide various aspects of affordable housing in moderate-income tracts compared to low-income tracts.

The 2010 U.S. Census data shows the median age of housing stock in the assessment area was 57 years old, with 41.8% of the stock built before 1950. Within the assessment area, the median age of housing stock was 61 years in low- and moderate-income tracts, which indicates that there is ample opportunity to make home improvement loans.

According to the 2010 U.S. Census data, the median housing value in the assessment area was $118,494, with an affordability ratio of 40.84. The affordability ratio is derived by dividing the median household income by the median housing value. The higher the affordability ratio, the more affordable a home is considered.

The median housing values increased in all three counties between 2010 and 2011-2015 and household incomes increased; however, housing only became slightly more affordable in Westmoreland County. During the review period, the most affordable housing was in Allegheny County. Median gross rents substantially increased across most of the assessment area, with renters in Washington County experiencing the largest increase in rental rates. In 2010, about 44.3% of renters across the assessment area had rent costs greater than 30.0% of income. Rising rental rates could make it more difficult for lower-income individuals to find affordable housing, as increasing rental rates may make it more difficult for potential homebuyers to save enough for a down payment for a home. According to Moody's Analytics, the growing demand for single-family homes is apparent, as these prices increased by 5.6% in 2015, which is above average for Pennsylvania. The table below presents housing characteristics from the U.S. Census data between 2010 and 2015 in the assessment area and Pennsylvania.

County	2010 Median Housing Value	2010 Affordability Ratio	2011-2015 Median Housing Value	2011-2015 Affordability Ratio	2010 Median Gross Rent	2011-2015 Median Gross Rent	Percent of Change
Allegheny	$115,200	41.63	$129,600	40.93	$688	$780	13.4%
Washington	$130,300	38.13	$152,400	37.04	$563	$675	19.9%
Westmoreland	$126,800	37.61	$138,500	37.72	$578	$654	13.1%
Pennsylvania	**$159,300**	**31.64**	**$166,000**	**32.29**	**$739**	**$840**	**13.7%**

According to Bankrate.com,[274] Pennsylvania ranked tenth for foreclosure filings in November 2016. The national average for foreclosure filings was 1 in every 1,533 housing units. The following table contains information about foreclosure filings in the assessment area, according to Realtytrac:[275]

Geography Name	Ratio of Properties Receiving Foreclosure Filings in November 2016
Allegheny	1:1,178
Washington	1:2,522
Westmoreland	1:1,197
Pennsylvania	**1:1,246**
United States	**1:1,533**

In November 2016, Allegheny County had the highest rate of foreclosure and Washington County had the lowest foreclosure rate within the assessment area.

Building permits in the MSA, Pennsylvania, and the nation are included in the following table for 2014, 2015, and 2016.[276]

Geography	2014	2015	Percent of Change 2014-2015	2016	Percent of Change 2015-2016
Pittsburgh MSA	4,199	5,264	25.4%	4,403	-16.4%
Pennsylvania	**25,108**	**22,854**	**-9.0%**	**23,303**	**2.0%**
United States	**1,052,124**	**1,182,582**	**12.4%**	**1,190,191**	**0.6%**

The MSA experienced a significant increase in housing permits between 2014 and 2015 and a major decrease between 2015 and 2016, not reflecting the trends in either Pennsylvania or the nation. The reduced demand for permits could indicate a weakening housing market and a decreased demand for home purchase loans across the assessment area.

Labor, Employment, and Economic Characteristics

According to Moody's Analytics, the Pittsburgh area economy is at risk. Natural resources mining and manufacturing are not experiencing much growth. While gains made from the Marcellus Shale boom have subsided, strong gains in high tech and healthcare have countered the losses and kept the economy on track.

[274] Bankrate.com: http://www.bankrate.com/finance/real-estate/foreclosures-by-state/default.aspx
[275] Realtytrac: http://www.realtytrac.com/statsandtrends/foreclosuretrends/
[276] U.S. Census Bureau Building Permits Survey: http://www.census.gov/construction/bps/

Renowned higher education and research institutions and the low cost of living relative to other large northeastern metropolitan areas continue to be economic strengths for the metropolitan area. However, Pittsburgh's weak and worsening demographics and aging infrastructure will cause the Pittsburgh metropolitan area to underperform the nation.

According to *Pittsburgh Business First*,[277] the Pittsburgh metropolitan area is home to six Fortune 500 headquarters. In the past year, Kraft Heinz climbed 119 places, due to the merger of H.J Heinz and Kraft Foods Group in 2015, making it the fifth-largest food and beverage company in the world. PNC climbed 21 places, PPG climbed 16 places, and WESCO and Dick's climbed three and 28 places, respectively. On the other hand, United States Steel dropped 68 places since 2015.

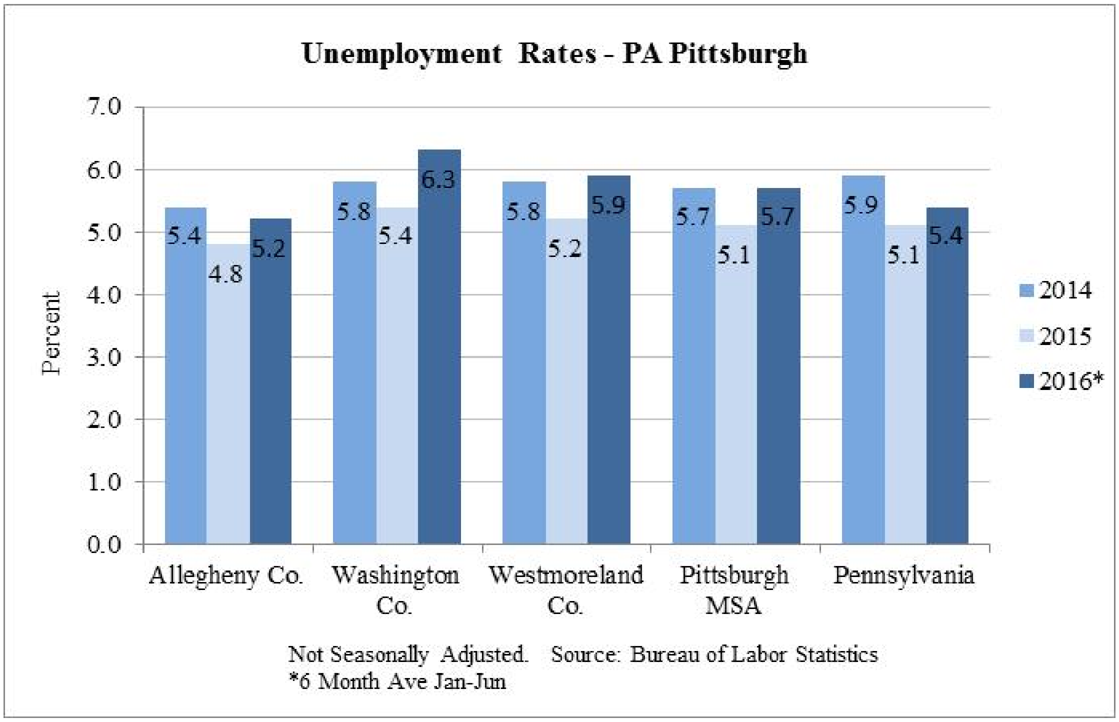
Pittsburgh Fortune 500 Companies (2016)		
Rank	**Company**	**Revenue**
153	The Kraft Heinz Company	$18.2 billion
171	PNC Financial Services Group	$16.4 billion
182	PPG Industries	$15.2 billion
244	United States Steel Corporation	$10.3 billion
357	WESCO International	$7.3 billion
365	Dick's Sporting Goods	$6.2 billion

According to Moody's Analytics, the top ten employers in the assessment area in 2015/2016 were:

Company	Number of Employees
University of Pittsburgh Medical Center	43,000
University of Pittsburgh	12,116
Giant Eagle Inc.	11,119
PNC Financial Services Group	10,030
West Penn Allegheny Health System	9,998
The Bank of New York Mellon	7,600
Wal-Mart Stores Inc.	6,200
Westinghouse Electric Co.	5,600
Highmark Inc.	6,200
United States Steel Corp.	5,000

The following table illustrates the average unemployment rates for 2014, 2015, and June 2016 for the counties in the assessment area, MSA, and Pennsylvania.

[277] Pittsburgh Business First: http://www.bizjournals.com/pittsburgh/news/2016/06/06/here-are-the-pittsburgh-companies-that-are-among.html



Overall, unemployment rates declined in 2015 and increased in 2016 to levels above 2014 unemployment rates in Washington and Westmoreland counties. Allegheny County had overall lower unemployment rates than Pennsylvania during this period, while the MSA exceeded Pennsylvania's rate of unemployment in 2016.

According to the *Pittsburgh Post-Gazette*, Macy's announced it will close several stores in the Pittsburgh region in spring 2017 to cut costs and cope with a shifting retail environment. The three store closures will affect 214 workers. This shutdown is part of the company's decision to close approximately 100 stores over the next few years and eliminate 3,900 jobs. The company is pleased with the performance of its digital business, with double-digit gains at both Macys.com and Bloomingdale.com; however, store sales continue to be impacted by changing customer behavior. The steps to streamline operations are estimated to generate about $550 million in savings beginning in 2017.[278]

[278] Ritenbaugh, Stephanie. "Macy's to close several Pittsburgh-area stores." *Pittsburgh Post- Gazette*. January 4, 2017. - http://www.post-gazette.com/business/pittsburgh-company-news/2017/01/04/Macy-s-will-close-78-stores-including-several-in-Western-Pennsylvania-by-spring/stories/201701040226

Combined Demographics Report

2016 FFIEC Census Data and 2015 D&B Information

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE PITTSBURGH PA MSA

Lending Test

Fifth Third's performance under the lending test in this assessment area is rated "High Satisfactory." Fifth Third has demonstrated an adequate responsiveness to the credit needs of the community. In addition, Fifth Third originated ten community development loans totaling $67.9 million. Fifth Third has a good geographic distribution of loans and a high level of lending gaps and an adequate distribution among borrowers of different income levels and to businesses of different revenue sizes. Fifth Third exhibits a good record of serving the credit needs of highly economically disadvantaged areas in its assessment area, low-income individuals, and businesses with gross annual revenues of $1 million or less.

Greatest consideration was given to the evaluation of home purchase lending based on the overall volume of lending, followed by refinance, and small business lending. There were an insufficient number of home improvement loans to analyze performance. Details of Fifth Third's residential mortgage and small business lending, as well as information regarding aggregate lending, can be found in Appendix E.

Lending Activity

Fifth Third's lending activity reflects an adequate responsiveness to the credit needs within the assessment area. Fifth Third originated 289 home purchase, 154 refinance, 14 home improvement, 140 small business, and ten community development loans during the evaluation period. The percentage of Fifth Third's total lending at 0.4% is less than the percentage of total deposits at 0.7% in this area.

Fifth Third made 77.2% of the HMDA and 71.1% of the CRA lending within its designated assessment area. A concentration of HMDA lending was noted in the excluded tracts in Westmoreland County. Fifth Third made 56 HMDA loans in these excluded tracts. Nonetheless, the majority of the loans were made within the defined assessment area.

Geographic Distribution of Loans

Fifth Third's overall distribution of lending among geographies is good. Home purchase lending, which was the largest loan category, is good. Refinance lending is good. Small business lending is excellent. However, there is also a high level of lending gaps. The following gaps in lending were noted in the assessment area:

Tract Income Levels	Number of Tracts	Tracts with No Loans	Penetration
Low	30	30	21.0%
Moderate	63	104	39.4%
Middle	75	174	56.9%
Upper	19	122	84.4%
Unknown	12	13	7.7%
Total	**199**	**451**	**55.9%**

Lending gaps are considered significant due to the number of gaps in low-, moderate-, and middle-income tracts. Lending gaps are low in upper-income tracts. The high level of gaps in low- and moderate-income tracts can be somewhat attributed to the low levels of owner-occupied units in 29.5% and 45.7% of these tracts, respectively, and high levels of rentals/vacancies in 73.0% and 54.3% of these tracts. Fifth Third was not able to penetrate at least half of the low- and moderate-income tracts; as a result, Fifth Third's lending penetration is particularly weak in this assessment area.

Home Purchase Loans

Fifth Third made five home purchase loans totaling $1.3 million in low-income tracts. This represents 1.7% of home purchase loans by volume, which is below the percentage of owner-occupied units in these tracts at 2.7%, and 1.8% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate at 1.4% and the 2015 aggregate at 1.3%. As Fifth Third's performance exceeded the aggregate of all lenders and was below the percentage of owner-occupied units in these geographies, the geographic distribution of home purchase loans in low-income tracts is good.

Fifth Third made 31 home purchase loans totaling $3.6 million in moderate-income tracts. This represents 10.7% of its home purchase loans by volume, which is below the percentage of owner-occupied units in these tracts at 15.8%, and 5.0% by dollar amount, which was below the proxy. The percentage of loans by volume was below the 2014 aggregate at 10.1% and was comparable to the 2015 aggregate at 9.9%. As Fifth Third's performance exceeded the aggregate of all lenders and was below proxy, the geographic distribution of home purchase loans in moderate-income tracts is good.

Fifth Third made 94 home purchase loans totaling $16.0 million in middle-income tracts. This represents 32.5% of home purchase loans by volume, which is below the percentage of owner-occupied units in these tracts at 42.5%, and 22.3% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate of 40.3% and was below the 2015 aggregate of 40.0%.

Fifth Third made 159 home purchase loans totaling $50.8 million in upper-income tracts. This represents 55.0% of home purchase loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 39.0%, and 70.9% by dollar amount, which exceeds the proxy. The percentage of loans by volume exceeded the 2014 aggregate of 48.2% and exceeded the 2015 aggregate of 48.7%.

Overall, the geographic distribution of home purchase loans is good.

Refinance Loans

Fifth Third made one refinance loan totaling $43,000 in low-income tracts. This represents 0.6% of refinance loans by volume and 0.2% by dollar amount, which is below the percentage of owner-occupied units at 2.7%. The percentage of loans by volume exceeded the 2014 aggregate at 1.3% and was below the 2015 aggregate at 1.3%. Given that Fifth Third's performance was below proxy and slightly exceeded the aggregate of all lenders and only 27.1% of housing units are owner-occupied, the geographic distribution of refinance loans in low-income tracts is adequate.

Fifth Third made 15 refinance loans totaling $1.0 million in moderate-income tracts. This represents 9.7% of refinance loans by volume, which is below the owner-occupied units in these tracts at 15.8%. The percentage of loans by dollar amount at 4.3% is significantly below proxy. The percentage of loans by volume exceeded the 2014 aggregate at 11.1% and was below the 2015 aggregate at 9.1%. As Fifth Third's performance exceeded the aggregate of all lenders and was below proxy, the geographic distribution of refinance loans in moderate-income tracts is good.

Fifth Third made 66 refinance loans totaling $6.8 million in middle-income tracts. This represents 42.9% of refinance loans by volume, which slightly exceeds the owner-occupied units in these tracts at 42.5%. However, refinance loans by dollar amount (29.0%) is below proxy. The percentage of loans by volume was below the 2014 aggregate at 40.9% and exceeded the 2015 aggregate at 38.9%.

Fifth Third made 72 refinance loans totaling $15.6 million in upper-income tracts. This represents 46.8% of refinance loans by volume, which exceeds the owner-occupied units in these tracts at 39.0%, and 66.5% by dollar amount, which exceeds proxy. The percentage of loans by volume was comparable to the 2014 aggregate at 46.6% and was below the 2015 aggregate at 50.7%.

Overall, the geographic distribution of refinance loans is good.

Small Business Loans

Fifth Third made 13 small business loans totaling $1.5 million in low-income tracts. This represents 9.3% of small business loans by volume, which significantly exceeds the percentage of businesses in these tracts at 4.5% and 4.6% by dollar amount, which slightly exceeds proxy. The percentage of loans by volume slightly exceeded the 2014 aggregate of 4.1% and significantly exceeded the 2015 aggregate of 4.7%. As Fifth Third's performance significantly exceeded proxy and the aggregate of all lenders, the geographic distribution of small business loans in low-income tracts is excellent.

Fifth Third made 24 small business loans totaling $7.4 million in moderate-income tracts. This represents 17.1% of small business loans by volume, which exceeds the percentage of businesses in these tracts at 13.1%. This also represents 23.1% small business loans by dollar amount, which exceeds proxy.

The percentage of loans by volume significantly exceeded the 2014 aggregate of 11.8% and exceeded the 2015 aggregate of 13.5%. Given that Fifth Third's performance exceeded proxy and the aggregate of all lenders, the geographic distribution of small business loans in moderate-income tracts is excellent.

Fifth Third made 49 small business loans totaling $14.0 million in middle-income tracts. This represents 35.0% of small business loans by volume, which is below the percentage of businesses in these tracts at 41.0%, and 43.7% by dollar amount, which exceeds proxy. The percentage of loans by volume was below the 2014 aggregate of 40.2% and was below the 2015 aggregate of 39.1%.

Fifth Third made 53 small business loans totaling $9.0 million in upper-income tracts. This represents 37.9% of small business loans by volume, which is below the percentage of businesses in these tracts at 40.9%, and 28.1% by dollar amount, which is significantly below proxy. The percentage of loans by volume was below the 2014 aggregate of 42.8% and was below the 2015 aggregate of 41.6%.

Overall, the geographic distribution of small business loans is excellent.

Distribution by Borrower Income and Revenue Size of the Business

The distribution of loans is adequate based on borrower income and for businesses of different revenue sizes. Borrower distribution is adequate for home purchase and good for refinance loans.

Home Purchase Loans

Fifth Third made 12 loans totaling $956,000 to low-income borrowers. This represents 4.2% of home purchase loans by volume, which is significantly below the percentage of low-income families at 19.2%, and 1.3% by dollar amount, which is also significantly below proxy. The percentage of loans by volume was below the 2014 aggregate of 6.0% and was below the 2015 aggregate of 7.0%. Because Fifth Third's performance was below the aggregate of all lenders and significantly below proxy, the borrower distribution of home purchase loans to low-income borrowers is adequate.

Fifth Third made 54 loans totaling $6.6 million to moderate-income borrowers. This represents 18.7% of home purchase loans by volume, which exceeds the percentage of moderate-income families at 17.0%, and 9.1% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate of 18.8% and was below the 2015 aggregate of 19.5%. As Fifth Third's performance exceeded proxy and was below the aggregate of all lenders, the borrower distribution of home purchase loans to moderate-income borrowers is good.

Fifth Third made 38 loans totaling $5.3 million to middle-income borrowers. This represents 13.1% of home purchase loans by volume, which is below the percentage of middle-income families at 20.8%, and 7.4% by dollar amount, which is also below proxy. The percentage of loans by volume was below the 2014 aggregate of 20.9% and was below the 2015 aggregate of 20.2%.

Fifth Third made 178 loans totaling $57.9 million to upper-income borrowers. This represents 61.6% of home purchase loans by volume, which significantly exceeds the percentage of upper-income families at 43.0%, and 80.7% by dollar amount, which significantly exceeds proxy. The percentage of loans by volume significantly exceeded the 2014 aggregate of 40.8% and exceeded the 2015 aggregate of 38.5%.

Overall, the borrower distribution of home purchase loans is adequate.

Refinance Loans

Fifth Third made six loans totaling $459,000 to low-income borrowers. This represents 3.9% of refinance loans by volume, which is significantly below the percentage of low-income families at 19.2%, and 2.0% by dollar amount, which is significantly below proxy. The percentage of loans by volume was below the 2014 aggregate of 6.3% and was below the 2015 aggregate of 5.6%. As Fifth Third's performance was significantly below proxy and the aggregate of all lenders, the borrower distribution of refinance loans to low-income borrowers is adequate.

Fifth Third made 35 loans totaling $2.9 million to moderate-income borrowers. This represents 22.7% of refinance loans by volume, which exceeds the percentage of moderate-income families at 17.0%, and 12.5% by dollar volume, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 15.1% and exceeded the 2015 aggregate of 14.2%. As Fifth Third's performance exceeded proxy and the aggregate of all lenders, the borrower distribution of refinance loans to moderate-income borrowers is excellent.

Fifth Third made 35 loans totaling $4.2 million to middle-income borrowers. This represents 22.7% of refinance loans by volume, which exceeds the percentage of middle-income families at 20.8%, and 17.9% by dollar amount, which is below proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 21.1% and exceeded the 2015 aggregate of 20.3%.

Fifth Third made 67 loans totaling $14.1 million to upper-income borrowers. This represents 43.5% of refinance loans by volume, which slightly exceeds the percentage of upper-income families at 43.0%, and 60.1% by dollar amount, which significantly exceeds proxy. The percentage of loans by volume was below the 2014 aggregate of 46.6% and was below the 2015 aggregate of 45.8%.

Overall, the borrower distribution of refinance loans is good.

Small Business Loans

The distribution of small business loans to businesses of different sizes is adequate, considering Fifth Third's performance relative to the aggregate of all lenders. Fifth Third was able to make 33.6% of small business loans to businesses with revenues of $1 million or less. Fifth Third's performance was below the 2014 aggregate of 46.4% and was below the 2015 aggregate of 50.5% but was significantly below the percentage of small businesses in the assessment area at 90.2%. Also, during the evaluation period, Fifth Third was able to make an acceptable percentage of small-dollar loans (53.6%) up to $100,000, indicating a willingness to lend in smaller amounts typically requested by small businesses.

Community Development Loans

Fifth Third originated ten community development loans totaling $67.9 million during the evaluation period as shown in the table below:

Affordable Housing		Economic Development		Revitalization and Stabilization		Community Services	
#	$	#	$	#	$	#	$
1	50,000	2	8,500,000	3	37,595,573	4	21,802,000

Community development lending in the assessment area represents 1.1% of the total dollar volume of community development loans originated during the evaluation period. This ranks as Fifth Third's 22nd highest percentage of community development lending during the evaluation period. As such, Fifth Third's performance is relatively high in community development lending.

Examples of community development lending include, but are not limited to:

- A renewal of a revolving line of credit to a nonprofit housing development coalition that helps to preserve affordable housing in Pittsburgh's Northside communities and advocates for tenants' rights
- Working capital loans to several nonprofit organizations that provide a multitude of services to low- and moderate-income individuals and families and individuals with disabilities
- Multiple working capital loans that promote economic development by financing businesses to support job retention, add new jobs, and promote growth to continue operations in low- and moderate-income geographies

Fifth Third was considered responsive to the community credit needs in the state; therefore, two community development loans without a purpose, mandate, or function of serving Fifth Third's assessment areas in Pennsylvania were considered to positively impact state performance. Fifth Third originated two qualified community development loans totaling $7.0 million that supported the revitalization of an industrial park that received a grant from Pennsylvania's redevelopment assistance capital program. These loans were within the Commonwealth, but outside of Fifth Third's delineated assessment areas within Pennsylvania.

Investment Test

Fifth Third's performance relative to the investment test in the assessment area is rated "Outstanding."

Fifth Third made an excellent level of qualified community development investments and grants, particularly those not routinely provided by private investors. As such, Fifth Third was often in a leadership position. Fifth Third has 49 qualified investments totaling $18.7 million during the evaluation period. Shown in the table below are the total current period investments:

Affordable Housing		Economic Development		Revitalization and Stabilization		Community Services	
#	$	#	$	#	$	#	$
18	16,897,760	2	5,350	2	53,300	26	254,174

Also included in the total number of qualified investments is one prior period investment totaling $1.5 million. Fifth Third made 1.1% of its total community development investments in this assessment area, which is greater than the percentage of total deposits at 0.7% and less than the percentage of branch offices at 1.3%.

Fifth Third exhibits an excellent responsiveness to credit and community development needs in the assessment area, including investments in several affordable housing projects throughout the assessment area, which is a growing need in the area based on increasing housing prices and rent rates. Fifth Third made 33 donations totaling $397,234 that supported chambers of commerce, small businesses, social and charitable organizations. The majority of Fifth Third's donations (64.0%) supported services to low- and moderate-income individuals. A community contact highlighted the growing elderly population in the area who have an increased demand for services.

Service Test

Fifth Third's performance under the service test in this assessment area is rated "Low Satisfactory." Retail services are accessible and Fifth Third provided an adequate level of community development services.

Retail Services

Although Fifth Third exited the Pittsburgh market as of April 22, 2016, the branches that were open during the evaluation period were evaluated. As a result, the following branching information is as of June 30, 2015 and the record of opening and closing branches was not weighed.

Fifth Third maintained 17 banking centers within this assessment area, including two in low-, five in moderate-, two in middle-, and eight in upper-income census tracts. Fifth Third's banking centers in this assessment area represented 1.2% of all its banking centers.

Fifth Third had 25 ATMs within this assessment area, including two in low-, six in moderate-, six in middle-, and one in upper-income census tracts. The ATMs in this assessment area represented 1.1% of all of Fifth Third's ATMs.

The following table illustrates the percentage of banking centers in low-, moderate-, middle-, and upper-income census tracts in comparison to the percentage of tracts, and the percentage of households and total businesses in those tracts.

Tract Category	Total Branches		Demographics			
			Census Tracts		Households	Total Businesses
	#	%	#	%	%	%
Low	2	11.8%	38	8.4%	5.1%	4.7%
Moderate	5	29.4%	104	23.1%	19.4%	13.0%
Middle	2	11.8%	174	38.6%	42.1%	41.0%
Upper	8	47.1%	122	27.1%	33.3%	40.6%
Unknown	0	0.0%	13	2.9%	0.0%	0.7%
Total	17	100.0%	451	100.0%	100.0%	100.0%

Branch distribution within low- and moderate-income tracts was considered excellent, as the distribution of branches exceeded the percentage of census tracts and households in these tracts.

Community Development Services

Fifth Third provides an adequate level of community development services in this assessment area. During the evaluation period, Fifth Third employees provided 832 hours of community development service to local organizations serving low- and moderate-income individuals, which represents 0.7% of all community development services provided and equates to 0.4 annualized persons (ANP).

Affordable Housing	Revitalization and Stabilization	Community Services
# of Hours	***# of Hours***	***# of Hours***
4	458	370

Employees provided financial expertise through leadership positions in multiple community organizations that provide affordable housing, promote community development, and area revitalization and stabilization. Community development services include 584 hours serving on boards and committees, 162 hours of providing financial literacy through local nonprofits and school programs, 78 hours providing technical assistance to non-profits, and 8 hours participating in foreclosure prevention outreach.

STATE OF TENNESSEE

CRA RATING for State of Tennessee: Outstanding
The lending test is rated: High Satisfactory
The investment test is rated: Outstanding
The service test is rated: Outstanding

The major factors supporting this rating include:

- A good responsiveness to credit needs;
- A good geographic distribution of loans throughout the assessment area;
- A good distribution of loans among borrowers of different income levels and excellent to businesses of different revenue sizes;
- Exhibits a good record of serving the credit needs of low-income individuals and areas and very small businesses;
- A relatively high level of community development loans;
- Use of flexible lending practices in serving the assessment area's credit needs;
- An excellent level of qualified community development investments and grants;
- Often in a leadership position in providing community development investments and grants;
- Retail delivery systems are accessible to all geographies and individuals of different income levels and businesses of different revenue sizes;
- A record of opening and closing banking centers has not adversely affected the accessibility of delivery systems;
- Banking services and hours that do not vary in a way that inconveniences any portions of the assessment areas; and,
- A leader in providing community development services.

SCOPE OF EXAMINATION

A full-scope review was conducted for the Nashville-Davidson-Murfreesboro-Franklin MSA. A limited-scope review was performed on the Knoxville MSA. The time period, products, and affiliates evaluated for this assessment area are consistent with the scope discussed in the Institution section of this report.

The Nashville-Davidson-Murfreesboro-Franklin assessment area received greater weight in determining the CRA rating for the state. This assessment area represented 91.7% of the banking centers, 96.1% of deposits, and 92.6% of lending in Tennessee.

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE STATE OF TENNESSEE

Lending activity accounted for 1.9% of the Fifth Third's total lending activity, while deposits accounted for 1.5% of Fifth Third's total deposits. HMDA-reportable lending in Tennessee represented 1.9% of Fifth Third's total HMDA lending, while CRA-reportable lending represented 2.1% of Fifth Third's total CRA lending. As of June 30, 2016, Fifth Third ranked 13th among 207 insured institutions and has a deposit market share of 1.1% and 36 banking center locations within Tennessee.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE STATE OF TENNESSEE

Lending Test

Fifth Third's performance under the lending test within the assessment areas located in Tennessee is rated "High Satisfactory." Fifth Third's lending reflects a good responsiveness to the credit needs in the Nashville-Davidson-Murfreesboro-Franklin assessment area and an adequate responsiveness in the Knoxville assessment area.

Lending Activity

In Tennessee, Fifth Third originated 1,964 HMDA loans totaling $407.1 million and 819 small business loans totaling $59.2 million during the evaluation period.

Lending activity in Tennessee is good. Lending activity is good in the Nashville-Davidson-Murfreesboro-Franklin assessment area and adequate in the Knoxville assessment area.

Geographic and Borrower Distribution

The geographic distribution is good in the Nashville-Davidson-Murfreesboro-Franklin assessment area and adequate in the Knoxville assessment area.

There was a low level of lending gaps in the Nashville-Davidson-Murfreesboro-Franklin assessment area and a high level of lending gaps in the Knoxville assessment area.

The borrower distribution is good in the Nashville-Davidson-Murfreesboro-Franklin assessment area and adequate in the Knoxville assessment area. The distribution to businesses of different revenue sizes is excellent in the Nashville-Davidson-Murfreesboro-Franklin assessment area and good in the Knoxville assessment area.

A detailed analysis for the geographic distribution and borrower-income distribution is provided with the analysis for each assessment area.

Community Development Loans

In Tennessee, Fifth Third originated 26 community development loans totaling $265.0 million, which represents 4.2% of the Fifth Third's community development lending by dollar volume. This is a relatively high level of community development lending in Tennessee. Fifth Third made a relatively high level of community development loans in the Nashville-Davidson-Murfreesboro-Franklin and Knoxville assessment areas.

Fifth Third was considered responsive to the community credit needs in the state; therefore, a community development loan without a purpose, mandate, or function of serving Fifth Third's assessment areas in Tennessee was considered to positively impact state performance. Fifth Third originated a qualified community development loan totaling $1.5 million that supported economic development in a county within the state, but outside Fifth Third's delineated assessment areas within Tennessee.

Additional information regarding community development lending is provided in the respective analyses for each assessment area.

Flexible Lending

Overall, Fifth Third consistently makes use of flexible lending practices within assessment areas located in Tennessee.

Investment Test

Fifth Third's performance under the investment test within the assessment areas located in Tennessee is rated "Outstanding." Fifth Third funded $32.9 million in qualified community development investments in Tennessee during the evaluation period, consisting of $18.6 million obtained from new investments made during the current review period and $14.3 million from prior period investments. The majority of investments were LIHTCs. Fifth Third's level of qualified investments is excellent in the Nashville-Davidson-Murfreesboro-Franklin and Knoxville assessment areas.

Additional information regarding performance under the investment test is provided in the respective analyses for each assessment area.

Service Test

Fifth Third's performance under the service test within the assessment areas located in Tennessee is rated "Outstanding." The Fifth Third's performance is excellent in the Nashville-Davidson-Murfreesboro-Franklin assessment area and good in the Knoxville assessment area.

For details regarding the institution's performance in the individual assessment areas, refer to the respective assessment area's "Service Test" section in this report.

Retail Services

Retail delivery systems are accessible to all geographies, including low- and moderate-income geographies, individuals of different income levels, and businesses of different revenue sizes in the institution's assessment areas. Retail service distribution is good in the Nashville-Davidson-Murfreesboro-Franklin assessment area and adequate in the Knoxville assessment area.

Fifth Third has 36 banking centers in Tennessee which represents 2.8% of Fifth Third's total branches. Fifth Third's record of opening and closing banking centers has not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and to low- and moderate-income individuals. No branches opened or closed in Tennessee during the evaluation period.

Banking services and business hours do not vary in a way that inconveniences any portions of Fifth Third's assessment areas and are consistent with the services and hours discussed in the "Institution" assessment.

Community Development Services

Fifth Third is a leader in providing community development services in Tennessee. Fifth Third's performance is excellent in the Nashville-Davidson-Murfreesboro-Franklin and Knoxville assessment areas.

METROPOLITAN AREA
(Full-scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE NASHVILLE-DAVIDSON-MURFREESBORO-FRANKLIN TN MSA #34980

The Nashville-Davidson-Murfreesboro-Franklin TN MSA consists of Davidson, Rutherford, Sumner, Williamson, and Wilson counties. Fifth Third's assessment area excludes Cannon, Cheatham, Dickson, Hickman, Macon, Maury, Robertson, Smith, and Trousdale counties. The assessment area is comprised of 31 low-, 58 moderate-, 117 middle-, and 100 upper-income tracts. There are also four tracts with no income designation that are primarily composed of correctional institutions, military establishments, education facilities, or medical establishments that do not report income information.

As of June 30, 2016, Fifth Third ranked ninth out of 59 institutions with 3.2% of the deposit share. Bank of America had the majority of the market share 17.8% of deposits, followed by Regions Bank, SunTrust Bank, Pinnacle Bank, and First Tennessee Bank with 14.6%, 12.7%, 10.8%, and 6.8% of the market share, respectively. Deposits in this assessment area accounted for 1.4% of Fifth Third's total deposits. This was 96.1% of deposits within the state and the 15th highest percentage of deposits within Fifth Third's CRA footprint.

From January 1, 2014 through June 30, 2016, Fifth Third originated 1,836 HMDA loans and 742 CRA loans, which represented 1.8% and 1.9% of the total loans originated during the evaluation period, respectively. This was the 15th largest HMDA market and 15th largest CRA market for loans originated during the evaluation period.

In 2015, Fifth Third Mortgage Company ranked 26th among 637 HMDA reporters in the assessment area, while Fifth Third ranked 86th. The top five HMDA lenders in the assessment area were Wells Fargo Bank, Franklin American Mortgage, U.S. Bank, JPMorgan Chase Bank, and Quicken Loans. Fifth Third ranked 17th of 129 CRA reporters in the assessment area in 2015. The top four CRA lenders in the assessment area were American Express, U.S. Bank, Chase Bank USA, and Pinnacle Bank. These lenders are mostly issuers of credit cards and their CRA loans primarily consist of commercial credit card accounts.

Two community contact interviews were conducted to provide additional information regarding the assessment area. The first contact, representing an affordable housing agency, stated that the economy is booming, but the real estate boom is making it unaffordable for lower-income individuals to find and retain housing. The contact stated there is a growing housing crisis in Nashville primarily due to gentrification. The contact indicated there are opportunities for banks to help with the area's most pressing needs, affordable housing and financial education. Overall, the contact believed that local lenders try to work with and help first-time homebuyers by providing assistance and education.

The second contact, representing an organization that provides support to businesses owned by women, stated that their organization has strong partnerships with area banks. The contract mentioned that despite the fact that more women are becoming business owners, women still face challenges when it comes to securing financing; therefore, there are opportunities for banks to increase financing to female entrepreneurs. The contact specifically mentioned Regions, Pinnacle, and INSBANK as leading banks in the area.

Population Characteristics

According to the 2010 U.S. Census data, the population in the assessment area was 1.4 million. Approximately a quarter (26.1%) of the population lived in low- and moderate-income tracts. In addition, 75.7% of the population was 18 years of age or older, the legal age to enter into a contract.

As of July 1, 2015, the Nashville MSA is the 36th largest in terms of population in the nation.[279] Davidson County is the largest county.[280] Nashville-Davidson is the largest city in this county with 654,610 residents and the second-most populous city in Tennessee. Nashville-Davidson is also the 25th largest city in the United States; its population increased by 19.9% between 2000 and 2015.[281] Rutherford County is the sixth-largest county in Tennessee. Murfreesboro is the largest city in the county with 126,118 residents; its population increased by 77.9% between 2000 and 2015. Williamson County is the seventh-largest county in Tennessee. Franklin is the largest city in the county with 72,639 residents; its population increased by 56.6% between 2000 and 2015. The following table shows the population in the assessment area by county for 2010 and 2015 and the percentage of the population.[282]

According to study by The University of Tennessee, over the next 25 years, Tennessee's demographic profile is expected to follow national trends as the population continues to age and become more racially and ethnically diverse and more urbanized. The Center for Business and Economic Research projects Tennessee's population will reach 8.5 million by 2040, compared to 6.3 million in 2010. The most significant changes in county population will occur primarily in metropolitan areas. Middle Tennessee is expected to lead the state in population growth, as five of the ten counties with the highest projected growth through 2040 are Williamson, Rutherford, Wilson, Robertson, and Sumner. The proportion of senior citizens and elderly is also expected to increase in Tennessee, due to the aging of baby boomers and increased life expectancy. The number of individuals 85 and older in Tennessee is expected to triple to more than 330,000 by 2040.[283]

[283] Study: Tennessee on Track for Steady Population Growth: http://tntoday.utk.edu/2015/08/27/study-tennessee-track-steady-population-growth/ (August 27, 2015)

The assessment area's population increased by nearly 11.0% from 2010 to 2015 and Williamson County experienced the greatest increase in population during this time period.

County	2010 Population	2015 Population	Population Percent Change
Davidson	626,681	678,889	8.3%
Rutherford	262,604	298,612	13.7%
Sumner	160,645	175,989	9.6%
Williamson	183,182	211,672	15.6%
Wilson	113,993	128,911	13.1%
Total	**1,347,105**	**1,494,073**	**10.9%**

Income Characteristics

The 2010 assessment area median family income was higher ($64,894) than Tennessee at $53,246. As shown in the table below, the median family income increased across the assessment area since 2010, whereas the median family income fell slightly in 2016, but remained above the median family income in 2010.

Borrower Income Levels
Nashville-Davidson-Murfreesboro-Franklin, TN MSA

FFIEC Estimated Median Family Income		Low 0 - 49.99%	Moderate 50% - 79.99%	Middle 80% - 119.99%	Upper 120% - & above
2014	**$65,600**	0 - $32,799	$32,800 - $52,479	$52,480 - $78,719	$78,720 - & above
2015	**$67,100**	0 - $33,549	$33,550 - $53,679	$53,680 - $80,519	$80,520 - & above
2016	**$66,600**	0 - $33,299	$33,300 - $53,279	$53,280 - $79,919	$79,920 - & above

Poverty rates increased in each county in the assessment area from 1999 to 2015.[284] Davidson County had the highest poverty rate in 1999 and 2015 and Williamson County had the lowest poverty rate in 1999 and 2015. In 2015, Davidson County's and Tennessee's poverty rates were above than the national rate. Davidson County experienced the largest increase in poverty rate during this period. According to the U.S. Census Bureau, the national poverty rate in 2015 was 13.5%, down 1.3 percentage points from 14.8% in 2014. For most demographic groups, the 2015 poverty rates and number of people in poverty decreased from 2014.[285] The following table shows the poverty rates for 1999[286] and 2015.

[284] United States Department of Agriculture Economic Research Service Poverty Rates (for 1999 and 2015): https://data.ers.usda.gov/reports.aspx?ID=17826
[285] 2015 National Poverty: http://www.census.gov/library/publications/2016/demo/p60-256.html
[286] 1999 National Poverty Rate: http://www.census.gov/prod/2000pubs/p60-210.pdf

County	1999 Poverty Rate	2015 Poverty Rate	Change
Davidson	13.0%	17.1%	31.5%
Rutherford	9.0%	11.1%	23.3%
Sumner	8.1%	10.1%	24.7%
Williamson	4.7%	5.0%	6.4%
Wilson	6.7%	8.4%	25.4%
Tennessee	**13.5%**	**16.7%**	**23.7%**
United States	**11.8%**	**13.5%**	**14.4%**

Housing Characteristics

According to 2010 U.S. Census data, there are 553,503 housing units and 331,085 families in the assessment area. From an income perspective, 28.0% of housing units, 17.7% of owner-occupied units, and 23.2% of families are located in low- or moderate-income tracts. Nearly three-quarters of the housing units in the low-income census tracts are either rental or vacant (72.2%) and 27.8% are owner-occupied. In the moderate-income census tracts, over half (56.6%) of the housing units are either rental or vacant and 43.5% are owner-occupied. Therefore, based on the number of housing units compared to the number of families in low- and moderate-income census tracts, there appear to be more credit-related opportunities for Fifth Third to provide various aspects of affordable housing in moderate-income tracts compared to low-income tracts.

The 2010 U.S. Census data shows the median age of housing stock in the assessment area was 28 years old, with only 9.1% of the stock built before 1950. Within the assessment area, the median age of housing stock was 43 years in low-income and 36 years old in moderate-income tracts, which indicates that there is opportunity to make home improvement loans in these lower-income areas.

According to the 2010 U.S. Census data, the median housing value in the assessment area was $178,409, with an affordability ratio of 29.61. The affordability ratio is derived by dividing the median household income by the median housing value. The higher the affordability ratio, the more affordable a home is considered.

The median housing values increased in all five counties between 2010 and 2011-2015 and household incomes increased, making housing only became slightly more affordable in Davidson, Rutherford, and Williamson counties. During the review period, the most affordable housing was in Rutherford County. Median gross rents substantially increased across most of the assessment area, with renters in Sumner County experiencing the largest increase in rental rates. In 2010, about 46.0% of renters across the assessment area had rent costs greater than 30.0% of income. Rising rental rates could make it more difficult for lower-income individuals to find affordable housing, because increasing rental rates may make it more difficult for potential homebuyers to save enough for a down payment for a home.

According to Moody's Analytics, Nashville has an exceptionally strong housing market. Housing is contributing more to growth as a result of above-average rising incomes. However, a community contact indicated there is a growing affordable housing crisis in Nashville and there are opportunities for banks to help with affordable housing and provide financial education for first-time homebuyers. The table below presents housing characteristics from the U.S. Census data between 2010 and 2015 in the assessment area and Tennessee.

County	2010 Median Housing Value	2010 Affordability Ratio	2011-2015 Median Housing Value	2011-2015 Affordability Ratio	2010 Median Gross Rent	2011-2015 Median Gross Rent	Percent of Change
Davidson	$164,700	27.73	$169,600	28.52	$776	$874	12.6%
Rutherford	$157,100	34.23	$160,700	34.98	$801	$890	11.1%
Sumner	$169,100	32.48	$178,000	32.24	$748	$885	18.3%
Williamson	$335,800	26.16	$348,600	27.70	$1,045	$1,181	13.0%
Wilson	$187,500	32.36	$200,300	30.49	$750	$871	16.1%
Tennessee	**$134,000**	**32.30**	**$142,100**	**31.82**	**$678**	**$764**	**12.7%**

According to Bankrate.com,[287] Tennessee ranked 28th for foreclosure filings in November 2016. The national average for foreclosure filings was 1 in every 1,533 housing units. The following table contains information about foreclosure filings in the assessment area, according to Realtytrac:[288]

Geography Name	Ratio of Properties Receiving Foreclosure Filings in November 2016
Davidson	1:2,593
Rutherford	1:2,225
Sumner	1:2,199
Williamson	1:8,528
Wilson	1:3,362
Tennessee	**1:2,136**
United States	**1:1,533**

In November 2016, Sumner County had the highest rate of foreclosure and Williamson County had the lowest foreclosure rate within the assessment area.

Building permits in the MSA, Tennessee, and the nation are included in the following table for 2014, 2015, and 2016.[289]

287 Bankrate.com: http://www.bankrate.com/finance/real-estate/foreclosures-by-state/default.aspx
288 Realtytrac: http://www.realtytrac.com/statsandtrends/foreclosuretrends/
289 U.S. Census Bureau Building Permits Survey: http://www.census.gov/construction/bps/

Geography	2014	2015	Percent of Change 2014-2015	2016	Percent of Change 2015-2016
Nashville-Davidson-Murfreesboro-Franklin MSA	15,040	18,291	21.6%	20,182	10.3%
Tennessee	**28,263**	**32,219**	**14.0%**	**36,157**	**12.2%**
United States	**1,052,124**	**1,182,582**	**12.4%**	**1,190,191**	**0.6%**

The MSA experienced a significant increase in housing permits between 2014 and 2015 and a smaller increase between 2015 and 2016, surpassing the trends in Tennessee and the nation between 2014 and 2015 and more in line with Tennessee between 2015 and 2016. Overall, the MSA and Tennessee surpassed the national demand for building permits. Based on the overall demand for permits, this tends to indicate there is a strong housing market and an ongoing demand for home purchase loans across the assessment area during the evaluation period.

Labor, Employment, and Economic Characteristics

According to Moody's Analytics, the Nashville area economy is in expansion and the Nashville metropolitan area is outperforming Tennessee's other metropolitan areas. Hiring is broad-based and incomes are rising at an above-average rate. The housing market is exceptionally strong and demand continues to increase. The area has a favorable business tax-structure and an educated workforce; however, a weak global recovery and strong dollar hamper goods exports.

According to *WATE 6*,[290] the Nashville metropolitan area is home to two Fortune 500 companies. In the past year, Hospital Corporation of America (HCA), the nation's largest hospital chain climbed 12 places on the list, and Community Health Systems (Franklin, TN) climbed ten places on the list.

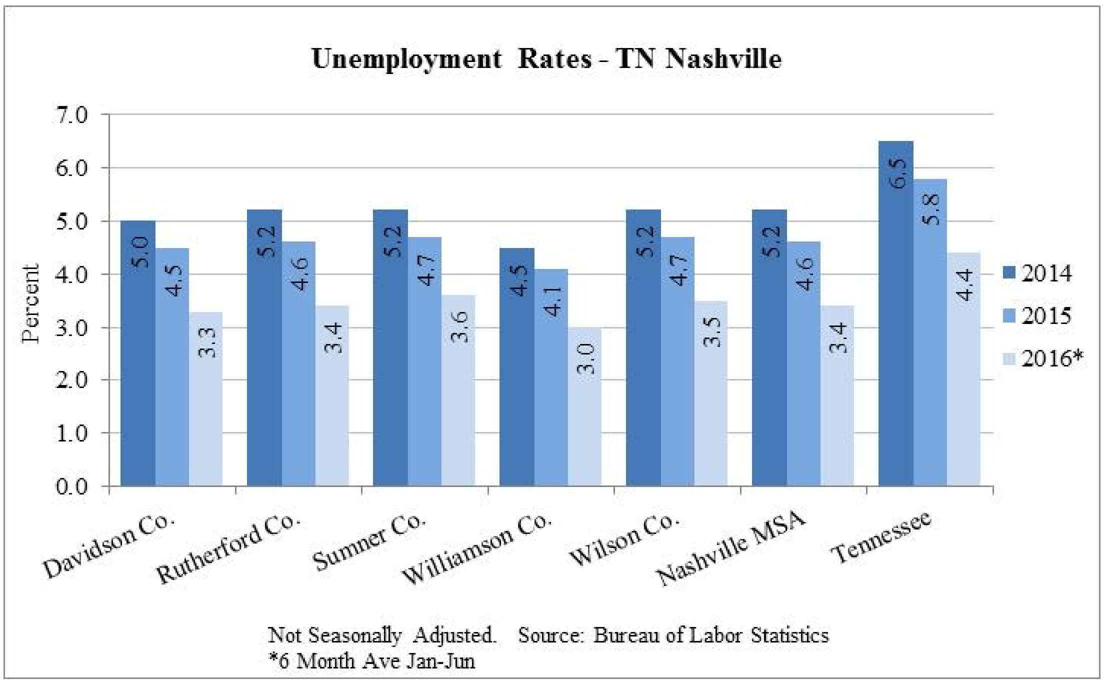
Nashville Fortune 500 Companies (2016)		
Rank	**Company**	**Revenue**
63	HCA Holdings	$41.5 billion
125	Community Health Systems	$22.4 million

According to Moody's Analytics, top employers in the assessment area in 2015/2016 were:

[290] WATE 6: http://wate.com/2016/06/06/eight-tennessee-companies-make-2016-fortune-500/

Company	Number of Employees
Vanderbilt University & Medical Center	22,105
Nissan North America Inc.	10,050
HCA Holdings	7,000
Wal-Mart Stores	4,500
Randstad Work Solutions	3,785
Dell Corporation	3,200
Shoney's Inc.	3,000
Electrolux Home Products North America	2,900
Community Health Systems	2,800
The Tennessean	2,577

The following table illustrates the average unemployment rates for 2014, 2015, and June 2016 for the counties in the assessment area, MSA, and Tennessee.



Overall, unemployment rates declined each year across the assessment area. Williamson County had the lowest overall unemployment rate in the assessment area and the assessment area and MSA was lower than Tennessee's rate of unemployment each year.

According to *WKRN-News 2*, the insurance company AIG announced layoffs due to a restructuring of AIG Financial Network. The company is moving financial professionals from the financial network group to the AIG Partners Group; 128 employees were notified their positions would be eliminated immediately. AIG still employs more than 900 people who support life insurance operations for the company.[291] According to *The Tennessean*, Dell, Inc. closed a customer support unit in Nashville that serves clients with global operations. Dell employs 1,400 people in the Nashville area, but 96 employees in the Murfreesboro and Donelson Pikes customer contact centers were laid off. The layoffs did not affect company employees that provide support for customers across North America. Several years ago, Dell ceased assembling computers in Nashville, outsourcing that work to Ceva Logistics.[292]

2016 FFIEC Census Data and 2015 D&B Information

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE NASHVILLE-DAVIDSON-MURFREESBORO-FRANKLIN TN MSA

Lending Test

Fifth Third's performance under the lending test in this assessment area is rated good. Fifth Third has demonstrated a good responsiveness to the credit needs of the community. In addition, Fifth Third originated 21 community development loans totaling $203.0 million. Fifth Third has a good geographic distribution of loans and low lending gaps. Fifth Third has a good distribution among borrowers of different income levels and an excellent distribution of loans to businesses of different revenue sizes. Fifth Third exhibits a good record of serving the credit needs of highly economically disadvantaged areas in its assessment area, low-income individuals, and businesses with gross annual revenues of $1 million or less. The good level of community development loans and use of flexible lending practices augmented Fifth Third's performance in this assessment area.

Greatest consideration was given to the evaluation of home purchase lending, based on the overall volume of lending, followed by refinance, small business, and home improvement lending. Details of Fifth Third's residential mortgage and small business lending, as well as information regarding lending by peers, can be found in Appendix E.

Lending Activity

Fifth Third's lending activity reflects a good responsiveness to the credit needs within the assessment area. Fifth Third originated 902 home purchase, 820 refinance, 114 home improvement, 742 small business, and 22 community development loans during the evaluation period. The percentage of Fifth Third's total lending at 1.8% is greater than the percentage of total deposits at 1.4% in this area.

Fifth Third made 90.3% of the HMDA and 94.3% of the CRA lending within its designated assessment area. A concentration of HMDA loans was noted in the excluded Maury County. There were 80 HMDA loans made in this county during the evaluation period. Nonetheless, the majority of loans were made in the assessment area.

In addition to lending, Fifth Third modified existing loans to borrowers. Refer to the distribution of HAMP and other real-estate secured modifications within the assessment area by census tract income and by borrower income.

	Distribution by Census Tract Income							
	Low		**Mod**		**Middle**		**Upper**	
	#	**%**	**#**	**%**	**#**	**%**	**#**	**%**
Other Real Estate Secured Modifications	1	2.3%	10	23.3%	18	41.9%	14	32.6%
Percentage of Owner Occupied Units		***3.9%***		***13.8%***		***41.1%***		***41.2%***

*Unknown tract data is not included in the above table.

	Distribution by Borrower Income							
	Low		Mod		Middle		Upper	
	#	%	#	%	#	%	#	%
Other Real Estate Secured Modifications	12	27.9%	17	39.5%	5	11.6%	9	20.9%
Percentage of Families by Family Income		***19.7%***		***16.9%***		***20.6%***		***42.7%***

*Unknown tract data is not included in the above table.

There were not enough HAMP modifications for a meaningful analysis. The percentage of other modifications in low-income tracts was below the percentage of owner-occupied units in these geographies and exceeded the percentage of owner-occupied units in moderate-income tracts. Therefore, modifications helped to expand lending activities in these areas. The percentage of other modifications made to low- and moderate-income borrowers exceeded the percentage of low- and moderate-income families in the assessment area. Therefore, modifications enhanced Fifth Third's ability to reach low- and moderate-income borrowers.

Geographic Distribution of Loans

Fifth Third's overall distribution of lending among geographies is good. Home purchase lending, which was the largest loan category, is good. Refinance lending is good, as is small business lending. Home improvement lending is adequate. There is also an overall low level of lending gaps. The following gaps in lending were noted in the assessment area.

Tract Income Levels	Number of Tracts	Tracts with no Loans	Penetration
Low	31	6	80.7%
Moderate	58	3	94.8%
Middle	117	2	98.3%
Upper	100	2	98.0%
Unknown	4	2	50.0%
Total	**310**	**15**	**95.2%**

Lending gaps are considered minimal due to the low number of lending gaps in moderate-, middle-, and upper-income tracts. The lending gaps in the low-income tracts can be attributed to the low-level of owner-occupied units at 27.8% and high level of rentals and vacancies at 72.2% in these census tracts.

Home Purchase Loans

Fifth Third made 37 home purchase loans totaling $7.1 million in low-income tracts. This represents 4.1% of home purchase loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 3.9%, and 3.5% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate at 3.7% and was comparable to the 2015 aggregate at 3.8%.

As Fifth Third's performance exceeded the aggregate of all lenders and proxy, the geographic distribution of home purchase loans in low-income tracts is excellent.

Fifth Third made 110 home purchase loans totaling $18.9 million in moderate-income tracts. This represents 12.2% of its home purchase loans by volume, which is below the percentage of owner-occupied units in these tracts at 13.8%, and 9.2% by dollar amount, which is significantly below proxy. The percentage of loans by volume was comparable to the 2014 aggregate at 11.9% and was comparable to the 2015 aggregate at 11.8%. As Fifth Third's performance was comparable to the aggregate of all lenders and was below proxy, the geographic distribution of home purchase loans in moderate-income tracts is good.

Fifth Third made 319 home purchase loans totaling $54.8 million in middle-income tracts. This represents 35.4% of home purchase loans by volume, which is below the percentage of owner-occupied units in these tracts at 41.1%, and 26.8% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate of 38.2% and was below the 2015 aggregate of 39.0%.

Fifth Third made 436 home purchase loans totaling $123.5 million in upper-income tracts. This represents 48.3% of home purchase loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 41.2%, and 60.5% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 46.2% and exceeded the 2015 aggregate of 45.5%.

Overall, the geographic distribution of home purchase loans is good.

Refinance Loans

Fifth Third made 30 refinance loans totaling $3.5 million in low-income tracts. This represents 3.7% of refinance loans by volume, which is comparable to the percentage of owner-occupied units in these tracts at 3.9%, and 2.2% by dollar amount, which is below proxy. The percentage of loans by volume was comparable of the 2014 aggregate at 3.7% and slightly exceeded the 2015 aggregate at 3.0%. The owner-occupancy rate in low-income tracts is only 27.8%; thus, the demand for refinance loans is likely to be lower in these areas. Given that Fifth Third's performance was comparable to the aggregate of lenders and proxy, the geographic distribution of refinance loans in low-income tracts is excellent.

Fifth Third made 81 refinance loans totaling $9.2 million in moderate-income tracts. This represents 9.9% of refinance loans by volume, which is below the percentage of owner-occupied units in these tracts at 13.8%, and 5.7% by dollar amount, which is significantly below proxy. The percentage of loans by volume exceeded the 2014 aggregate at 12.3% and exceeded the 2015 aggregate at 10.4%. As Fifth Third's performance was below proxy and exceeded the aggregate of all lenders, the geographic distribution of refinance loans in moderate-income tracts is good.

Fifth Third made 312 refinance loans totaling $45.2 million in middle-income tracts. This represents 38.0% of refinance loans by volume, which is below the percentage of owner-occupied units in these tracts at 41.1%, and 28.2% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate at 40.0% and exceeded the 2015 aggregate at 37.5%.

Fifth Third made 397 refinance loans totaling $102.8 million in upper-income tracts. This represents 48.4% of refinance loans by volume, which exceeds the owner-occupied units in these tracts at 41.2%, and 63.9% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate at 44.0% and was below the 2015 aggregate at 49.1%.

Overall, the geographic distribution of refinance loans is good.

Home Improvement Loans

Fifth Third made two home improvement loans totaling $67,000 in low-income tracts. This represents 1.8% of home improvement loans by volume, which is below the percentage of owner-occupied units in these tracts at 3.9%, and 0.5% by dollar amount, which significantly below proxy. The percentage of loans by volume was below the 2014 aggregate of 6.3% and was below the 2015 aggregate of 4.7%. Given the median age of housing in low-income tracts at 43 years, which tends to indicate the need for home improvement loans, and Fifth Third's lending performance in these tracts, the geographic distribution of home improvement loans in low-income tracts is considered poor.

Fifth Third made 15 home improvement loans totaling $1.3 million in moderate-income tracts. This represents 13.2% of home improvement loans by volume, which is comparable to the percentage of owner-occupied units in these tracts at 13.8%, and 10.8% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate of 15.3% and exceeded the 2015 aggregate of 12.8%. As Fifth Third's performance was comparable to proxy and exceeded the aggregate of all lenders, the geographic distribution of home improvement loans in moderate-income tracts is good.

Fifth Third made 43 home improvement loans totaling $3.5 million in middle-income tracts. This represents 37.7% of home improvement loans by volume, which is below the percentage of owner-occupied units in these tracts at 41.1%, and 28.2% by dollar amount, which significantly below proxy. The percentage of loans by volume was below the 2014 aggregate of 42.0% and exceeded the 2015 aggregate of 41.5%.

Fifth Third made 54 home improvement loans totaling $7.4 million in upper-income tracts. This represents 47.4% of home improvements loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 41.2%, and 60.5% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 36.4% and exceeded the 2015 aggregate of 42.3%.

Overall, the geographic distribution of home improvement loans is adequate.

Small Business Loans

Fifth Third made 50 small business loans totaling $1.5 million in low-income tracts. This represents 6.7% of small business loans by volume, which is slightly below the percentage of businesses in these tracts at 7.5%, and 2.8% by dollar amount, which is below proxy. The percentage of loans by volume was slightly below the 2014 aggregate of 8.3% and was slightly below the 2015 aggregate of 7.7%. Given Fifth Third's performance was slightly below the aggregate of all lenders and proxy and the limited number of businesses in these tracts (7.7%), the geographic distribution of small business loans in low-income tracts is good.

Fifth Third made 101 small business loans totaling $8.5 million in moderate-income tracts. This represents 13.6% of small business loans by volume, which is slightly below the percentage of businesses in these tracts at 16.8%, and 15.8% by dollar amount, which is comparable to proxy. The percentage of loans by volume was below the 2014 aggregate of 17.4% and was below the 2015 aggregate of 17.0%. Given that Fifth Third's performance was slightly below the proxy and below the aggregate of all lenders and the limited number of businesses in these tracts (17.3%), the geographic distribution of small business loans in moderate-income tracts is good.

Fifth Third made 207 small business loans totaling $16.6 million in middle-income tracts. This represents 27.9% of small business loans by volume, which is below the percentage of businesses in these tracts at 32.3%, and 30.9% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 27.5% and was below the 2015 aggregate of 27.4%.

Fifth Third made 369 small business loans totaling $19.5 million in upper-income tracts. This represents 49.7% of small business loans by volume, which exceeds the percentage of businesses in these tracts at 42.9%, and 36.2% by dollar amount, which is below the percentage of businesses in these geographies. The percentage of loans by volume exceeded the 2014 aggregate of 44.9% and exceeded the 2015 aggregate of 46.1%.

Overall, the geographic distribution of small business loans is good.

Distribution by Borrower Income and Revenue Size of the Business

The distribution of loans is good based on borrower income and excellent to businesses of different revenue sizes. Borrower distribution is excellent for home purchase lending and good for refinance and home improvement lending.

Home Purchase Loans

Fifth Third made 61 loans totaling $6.2 million to low-income borrowers. This represents 6.8% of home purchase loans by volume, which is significantly below the percentage of low-income families at 19.7%, and 3.0% by dollar amount, which is significantly below proxy.

The percentage of loans by volume exceeded the 2014 aggregate of 6.3% and was comparable to the 2015 aggregate of 5.8%. Given that Fifth Third's performance exceeded the aggregate of all lenders, but was below proxy, the borrower distribution of home purchase loans to low-income borrowers is good.

Fifth Third made 179 loans totaling $25.4 million to moderate-income borrowers. This represents 19.8% of home purchase loans by volume, which exceeds the percentage of moderate-income families at 16.9%, and 12.5% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 18.2% and exceeded the 2015 aggregate of 16.9%. Given that Fifth Third's performance exceeded the proxy and the aggregate of all lenders, the borrower distribution of home purchase loans to moderate-income borrowers is excellent.

Fifth Third made 166 loans totaling $32.9 million to middle-income borrowers. This represents 18.4% of home purchase loans by volume, which is below the percentage of middle-income families at 20.6%, and 16.1% by dollar amount, which is below proxy. The percentage of loans by volume was comparable to the 2014 aggregate of 18.1% and was comparable to the 2015 aggregate of 19.0%.

Fifth Third made 374 loans totaling $110.6 million to upper-income borrowers. This represents 41.5% of home purchase loans by volume, which is comparable to the percentage of upper-income families at 42.7%, and 54.1% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 36.6% and was below the 2015 aggregate of 37.2%.

A community contact indicated the lack of employment opportunities for low- and moderate-income individuals is a significant economic factor likely impacting the ability of these individuals to buy homes. Given that Fifth Third's performance lending to low- and moderate-income borrowers exceeded or was comparable to the aggregate of all lenders, the overall borrower distribution for home purchase loans is excellent.

Refinance Loans

Fifth Third made 56 loans totaling $5.7 million to low-income borrowers. This represents 6.8% of refinance loans by volume, which is significantly below the percentage of low-income families at 19.7%, and 3.5% by dollar amount, which is significantly below proxy. The percentage of loans by volume was below the 2014 aggregate of 6.3% and exceeded the 2015 aggregate of 4.9%. Given that Fifth Third's performance exceeded the aggregate of all lenders but was significantly below proxy, the borrower distribution of refinance loans to low-income borrowers is good.

Fifth Third made 163 loans totaling $18.0 million to moderate-income borrowers. This represents 19.9% of refinance loans by volume, which exceeds the percentage of moderate-income families at 16.9%, and 11.2% by dollar volume, which is below proxy.

The percentage of loans by volume exceeded the 2014 aggregate of 14.7% and exceeded the 2015 aggregate of 12.6%. As Fifth Third's performance exceeded proxy and the aggregate of all lenders, the borrower distribution of refinance loans to moderate-income borrowers is excellent.

Fifth Third made 162 loans totaling $24.2 million to middle-income borrowers. This represents 19.8% of refinance loans by volume, which is comparable to the percentage of middle-income families at 20.6%, and 15.1% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 16.9% and exceeded the 2015 aggregate of 17.1%.

Fifth Third made 349 loans totaling $91.1 million to upper-income borrowers. This represents 42.6% of refinance loans by volume, which is comparable to percentage of upper-income families at 42.7%, and 56.7% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 35.7% and was below the 2015 aggregate of 37.0%.

Overall, the borrower distribution of refinance loans is good.

Home Improvement Loans

Fifth Third made three loans totaling $165,000 to low-income borrowers. This represents 2.6% of home improvement loans by volume, which is significantly below the percentage of low-income families at 19.7%, and 1.3% by dollar amount, which is significantly below proxy. The percentage of loans by volume was significantly below the 2014 aggregate of 8.1% and was significantly below the 2015 aggregate of 8.2%. Given that Fifth Third's performance was significantly below proxy and the aggregate of all lenders, the borrower distribution of home improvement loans to low-income borrowers is poor.

Fifth Third made 29 loans totaling $2.1 million to moderate-income borrowers. This represents 25.4% of home improvement loans by volume, which exceeds the percentage of moderate-income families at 16.9%, and 17.0% by dollar amount, which is comparable to proxy. The percentage of loans by volume exceeded the 2014 aggregate of 20.3% and exceeded the 2015 aggregate of 17.4%. Given that Fifth Third's performance exceeded the aggregate of all lenders and proxy, the borrower distribution of home improvement loans to moderate-income borrowers is excellent.

Fifth Third made 34 loans totaling $3.4 million to middle-income borrowers. This represents 29.8% of home improvement loans by volume, which exceeds the percentage of middle-income families at 20.6%, and 27.7% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 20.8% and exceeded the 2015 aggregate of 22.7%.

Fifth Third made 43 loans totaling $5.7 million to upper-income borrowers. This represents 37.7% of home improvement loans by volume, which is below the percentage of upper-income families at 42.7%, and 46.9% by dollar amount, which exceeds proxy. The percentage of loans by volume was below the 2014 aggregate of 39.6% and was below the 2015 aggregate of 44.1%.

The borrower distribution of home improvement loans is good.

Small Business Loans

The distribution of small business loans to businesses of different sizes is excellent, considering Fifth Third's performance relative to the aggregate of all lenders. Fifth Third was able to make 70.5% of small business loans to businesses with revenues of $1 million or less. Fifth Third's performance exceeded the 2014 aggregate of 46.5% and the 2015 aggregate of 51.2%, but was significantly below the percentage of small businesses in the assessment area at 91.5%. Also, during the evaluation period, Fifth Third was able to make a relatively high percentage of small-dollar loans (87.9%) up to $100,000, indicating a willingness to lend in smaller amounts, which are typically requested by small businesses. In addition, a community contact indicated there are opportunities for banks to increase financing to entrepreneurs and noted that Fifth Third is responsive to this need.

Community Development Loans

Fifth Third originated 21 community development loans totaling $203.0 million during the evaluation period as shown in the table below:

Economic Development		Revitalization and Stabilization		Community Services	
#	$	#	$	#	$
3	24,600,000	16	178,350,000	2	60,000

Community development lending in the assessment area represents 3.4% of the total dollar volume of community development loans originated by Fifth Third during the evaluation period. This ranks as Fifth Third's eighth-highest percentage of community development lending during the evaluation period. Given Fifth Third's deposit market share of 3.2% and the presence of several large financial institutions in the market and competition for community development loans, Fifth Third has a relatively high level of community development lending in this assessment area.

Examples of community development lending include, but are not limited to:

- Renewal of working capital loans to a nonprofit providing a multitude of services to low- and moderate-income individuals and families
- Working capital loans to promote economic development by financing a small business to support retention of low- and moderate-income workers
- Working capital loans to help retain and expand small businesses located in specific city-designated areas to promote revitalization and economic development

Flexible Lending Programs

Fifth Third had 304 flexible lending loans in this assessment area: 196 government loans, 23 down payment assistance loans, and 85 other flexible lending programs. The following tables show the percentage by volume and by dollar amount of the three types of flexible lending programs made in this assessment area during the evaluation period and the distribution of Fifth Third's flexible lending programs within the assessment area by census tract income and borrower income.

Flexible Loan Programs												
	Geographic Distribution											
	Low			Moderate			Middle			Upper		
	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units	% - #	% - $	% O/O Units
Government Loan Programs	1.5%	2.1%	3.9%	17.9%	13.4%	13.8%	52.0%	47.6%	41.1%	28.6%	36.9%	41.2%

Other Flexible Lending Programs	5.9%	5.9%	3.9%	16.5%	14.8%	13.8%	47.1%	41.3%	41.1%	30.6%	38.0%	41.2%
Total	**4.3%**	**5.4%**	**3.9%**	**17.4%**	**13.7%**	**13.8%**	**50.7%**	**45.4%**	**41.1%**	**27.6%**	**35.5%**	**41.2%**

*Unknown tract data is not included in the above table.

Flexible Loan Programs												
	Borrower Distribution											
	Low			Moderate			Middle			Upper		
	% - #	% - $	% Fam	% - #	% - $	% Fam	% - #	% - $	% Fam	% - #	% - $	% Fam
Government Loan Programs	8.2%	4.9%	19.7%	27.0%	20.9%	16.9%	30.6%	29.9%	20.6%	27.6%	37.9%	42.7%
Down Payment Assistance Programs	39.1%	30.1%	19.7%	43.5%	32.1%	16.9%	0.0%	0.0%	20.6%	13.0%	34.1%	42.7%
Other Flexible Lending Programs	16.5%	10.3%	19.7%	38.8%	34.6%	16.9%	22.4%	23.6%	20.6%	20.0%	28.8%	42.7%
Total	**12.8%**	**7.8%**	**19.7%**	**31.6%**	**25.0%**	**16.9%**	**26.0%**	**26.5%**	**20.6%**	**24.3%**	**35.4%**	**42.7%**

*Unknown tract data is not included in the above table.

Fifth Third's lending in low-income tracts by number and dollar amount exceeded the percentage of owner-occupied units in these tracts, especially for various down payment assistance programs. The percentage of lending by volume in moderate-income tracts exceeded the percentage of owner-occupied units in these geographies, while the percentage of lending by dollar amount was comparable to proxy.

Fifth Third's lending by volume and dollar amount to low-income borrowers was below the percentage of low-income families the assessment area. The percentage of lending by volume and dollar amount to moderate-income borrowers significantly exceeded the percentage of moderate-income families.

Therefore, Fifth Third made use of flexible lending practices and is serving the assessment area's credit needs, as lending through flexible loan programs to moderate-income borrowers was good, while the lending in low- and moderate-income tracts and to low-income borrowers was excellent.

Investment Test

Fifth Third's performance relative to the investment test in the assessment area is rated excellent.

Fifth Third made an excellent level of qualified community development investments and grants, particularly those not routinely provided by private investors. As such, Fifth Third was often in a leadership position. Fifth Third has 125 qualified investments totaling $26.5 million during the evaluation period. Shown in the table below are the total current period investments:

Affordable Housing		Economic Development		Revitalization and Stabilization		Community Services	
#	$	#	$	#	$	#	$
20	13,752,061	14	96,190	5	25,000	79	372,732

Also included in the total number of qualified investments are seven prior period investments totaling $12.3 million. Fifth Third made 1.6% of its total community development investments in this assessment area, which is greater than the percentage of total deposits at 1.4% and less than the percentage of branch offices at 2.5%.

Fifth Third exhibits an excellent responsiveness to credit and community development needs in the assessment area, including investments in affordable housing throughout the assessment area, which was an important need expressed by community contacts. Fifth Third made 107 donations totaling $522,422 that supported small businesses, and social and charitable organizations. The majority of Fifth Third's donations (71.0%) supported services to low- and moderate-income individuals. Based on the area's high poverty rates and accelerating elderly population, supporting community services that serve low- and moderate-income individuals is considered to be responsive.

Service Test

Fifth Third's performance under the service test in this assessment area is rated excellent. Retail services are accessible and Fifth Third is a leader in providing community development services.

Retail Services

Fifth Third's record of opening and closing offices has not adversely affected the accessibility of its delivery systems, particularly in low- and moderate-income geographies and to low- and moderate-income households. Since the previous evaluation, no banking centers were opened and two were closed, resulting in no net change in the number of banking centers in low- and moderate-income tracts. Delivery services are accessible to Fifth Third's geographies and individuals of different income levels.

Business hours and services provided do not vary in a way that inconveniences certain portions of the assessment area, including low- and moderate-income geographies or households and are consistent with the services and hours discussed in the "Institution" assessment.

Fifth Third maintains 33 banking centers within this assessment area, including two in low-, eight in moderate-, 10 in middle-, and 13 in upper-income census tracts. Fifth Third banking centers in this assessment area represent 2.5% of all its banking centers.

Fifth Third has a total of 38 full-service ATMs within this assessment area, including three in low-, nine in moderate-, eight in middle-, and 17 in upper-income census tracts. There is also one full-service ATM located in an unknown income tract.

The following table illustrates the percentage of banking centers and ATMs in low-, moderate-, middle-, and upper-income census tracts in comparison to the number and percentage of census tracts and the percentage of households and businesses in those tracts.

Geographic Distribution of Branches & ATMS

Assessment Area: TN Nashville

Total	33	100.0%	0	0	Total	145	100.0%	38	100.0%	107	100.0%	310	100.0%	100.0%	100.0%

2016 FFIEC Census Data, 2010 ACS Data, and 2015 D&B Information
Closed branches/ATMs are only included in "closed" columns and are not included in any other totals.
DTO - Drive thru only is a subset of total branches
SA = Stand Alone ATM is a subset of total ATMs

Branch distribution within low-income tracts was considered adequate, as the distribution of branches was below the percentage of census tracts and households in these tracts. However, the branch distribution within moderate-income tracts was considered excellent.

Community Development Services

Fifth Third is a leader in providing community development services in this assessment area. During the evaluation period, Fifth Third employees provided 2,854 hours of community development service to local organizations serving low- and moderate-income individuals, which represents 2.4% of all community development services provided and equates to 1.37 annualized persons (ANP).

Affordable Housing	Economic Development	Revitalization and Stabilization	Community Services
# of Hours	***# of Hours***	***# of Hours***	***# of Hours***
301	502	134	1,917

Employees provided financial expertise through leadership positions in multiple community organizations that provide affordable housing and promote community and economic development and area revitalization and stabilization. Community development services include 1,649 hours of providing financial literacy through local nonprofits and school programs, 889 hours serving on boards and committees, 268 hours providing technical assistance to non-profits and local business, and 48 hours participating in foreclosure prevention outreach.

Fifth Third is considered particularly responsive with regard to hours dedicated to financial literacy activities and hours providing technical assistance to small businesses, as community contacts mentioned the need for financial literacy training to help first-time homebuyers and increasing financing for small business entrepreneurs.

METROPOLITAN AREA
(Limited-scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE STATE OF TENNESSEE

- Knoxville MSA
  - As of June 30, 2016, Fifth Third operated three branches in the assessment area, representing 8.3% of its branches in Tennessee.
  - As of June 30, 2016, Fifth Third had $60,264 in deposits in this assessment area, representing a market share of 0.5% and 3.9% of its statewide deposits.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE STATE OF TENNESSEE

Through the use of available facts and data, including performance and demographic information, the assessment area's performance was evaluated and compared with Fifth Third's performance and contributed to weaker performance in the area. The conclusions regarding performance are provided in the table below. Please refer to the tables in Appendix F for information regarding these areas.

Assessment Area	Lending Test	Investment Test	Service Test
Knoxville MSA	Below	Consistent	Below

For the lending test, Fifth Third received a "High Satisfactory" rating in Tennessee. Performance in the Knoxville assessment area was below Fifth Third's performance for the state. A lesser geographic and borrower distribution of loans contributed to weaker performance in the Knoxville assessment area. The Knoxville assessment area had a consistent level of community development loans for the state but had a high level of lending gaps.

For the investment test, Fifth Third received an "Outstanding" rating for Tennessee. The investment activity in the Knoxville assessment area was consistent to the performance for the state.

For the service test, Fifth Third received an "Outstanding" rating for Tennessee. Service performance in the Knoxville assessment area was below Fifth Third's performance for the state. Retail services were adequate. The weaker retail services performance was primarily due to less accessibility of delivery systems in lower-income geographies. Qualified community development services were consistent with performance for the state.

The performance in the limited-scope assessment area did not change the overall state rating.

STATE OF WEST VIRGINIA

CRA RATING for State of West Virginia:[293] Satisfactory
The lending test is rated: High Satisfactory
The investment test is rated: High Satisfactory
The service test is rated: Outstanding

The major factors supporting this rating include:

- A good responsiveness to credit needs;
- A good geographic distribution of loans throughout the assessment area;
- A good distribution of loans among borrowers of different income levels and to businesses of different revenue sizes;
- Exhibits a good record of serving the credit needs of low-income individuals and areas and very small businesses;
- An adequate level of community development loans;
- An extensive use of flexible lending practices in serving the assessment area's credit needs;
- A significant level of qualified community development investments and grants;
- Occasionally in a leadership position in providing community development investments and grants;
- Retail delivery systems are readily accessible to all geographies and individuals of different income levels and businesses of different revenue sizes;
- A record of opening and closing banking centers has not adversely affected the accessibility of delivery systems;
- Banking services and hours that do not vary in a way that inconveniences any portions of the assessment areas; and,
- A leader in providing community development services.

SCOPE OF EXAMINATION

A full-scope review was conducted for the Charleston MSA, which represents Fifth Third's entire banking operations for West Virginia. The time period, products, and affiliates evaluated for this assessment area are consistent with the scope discussed in the Institution section of this report.

[293] For institutions with branches in two or more states in a multi-state metropolitan area, this statewide evaluation is adjusted and does not reflect performance in the parts of those states contained within the multi-state metropolitan area. Refer to the multi-state metropolitan area rating and discussion for the rating and evaluation of the institution's performance in that area.

METROPOLITAN AREA
(Full-scope Review)

DESCRIPTION OF INSTITUTION'S OPERATIONS IN THE CHARLESTON WV MSA #16620

The Charleston WV MSA consists of Kanawha, Boone, and Clay counties; however, Fifth Third's assessment area comprises Kanawha County only and excludes Boone and Clay counties. The assessment area is comprised of 12 moderate-, 30 middle-, and 11 upper-income tracts. There are no low-income tracts or tracts with no-income designation in this assessment area.

As of June 30, 2016, Fifth Third ranked ninth out of 13 institutions with 1.8% of the deposit share. BB&T had the majority of the market share 32.3% of deposits, followed by United Bank, Huntington National Bank, City National Bank of West Virginia, and JPMorgan Chase Bank with 17.7%, 11.9%, 11.2%, and 10.7% of the market share, respectively. Deposits in this assessment area accounted for 0.1% of Fifth Third's total deposits. This was the 41st highest level of deposits within Fifth Third's CRA footprint.

From January 1, 2014 through June 30, 2016, Fifth Third originated 184 (0.2%) HMDA loans and 62 (0.2%) CRA loans during the evaluation period. This was the 41st largest HMDA market and 40th largest CRA market for loans originated during the evaluation period.

In 2015, Fifth Third Mortgage Company ranked 15th among 149 HMDA reporters in the assessment area, while Fifth Third ranked 32nd. The top five HMDA lenders in the assessment area were City National Bank of West Virginia, Quicken Loans, BB&T, Huntington National Bank, and JPMorgan Chase Bank. Fifth Third ranked 17th of 46 CRA reporters in the assessment area in 2015. The top four CRA lenders in the assessment area were BB&T, American Express Bank, Synchrony Bank, and United Bank. These lenders are mostly issuers of credit cards and their CRA loans primarily consist of commercial credit card accounts.

Two community contact interviews were conducted to provide additional information regarding the assessment area. The first contact, representing a community development organization, stated Charleston's economy is stronger than other economies in West Virginia primarily due to the city being the base of state government. However, in recent years, the city and the state have been negatively impacted by coal companies closing and/or merging. Further, the price of natural gas has dropped, causing energy companies to leave or go out of business. The contact mentioned that there is a huge void with regards to new market tax credits and although downtown Charleston would be eligible for these tax credits, the community lacks the expertise on how to use and leverage them. The contact noted there are opportunities for local financial institutions to provide guidance and technical resources to help businesses and organizations navigate the tax credit process. Lastly, the contact believed financial institutions seem less involved in the community because they are not headquartered in the area; however, the contact specifically mentioned BB&T, JPMorgan Chase, and City National as being active in the community.

The second contact, representing a community action organization, stated that West Virginia must find its "next economy" because while natural gas may be making a small rebound, it will not overhaul West Virginia's economy. The contact indicated that unemployment is a serious economic concern for the state and this region, as fewer than half of working age adults are employed. Contributing to the decline in workers include West Virginia's aging population, the overall health of the state's residents, and mismatched skills among potential employees and available jobs. The contact stated there are opportunities for financial institutions to support job retraining programs and provide financial literacy education to help lower-income people get out of debt and save money. Lastly, the contact indicated that smaller community banks seem more willing to help and appear to have more flexible lending standards.

Population Characteristics

According to the 2010 U.S. Census data, the population in the assessment area was 193,063. About 17.0% of the population lived in moderate-income tracts. In addition, 79.4% of the population was 18 years of age or older, the legal age to enter into a contract.

As of July 1, 2015, the Charleston MSA is the 200th largest in terms of population in the nation.[294] Kanawha County is the largest county in the MSA and West Virginia.[295] Charleston is the largest city in the county and in West Virginia with 49,736 residents. Charleston is also the 757th largest city in the United States; however, its population decreased by 6.7% between 2000 and 2015.[296]

According to a study by West Virginia University's College of Business and Economics, West Virginia's population is expected to begin a sustained decline around 2016. The state may lose nearly 19,500 people (about 1.05%) between 2010 and 2030. Any future gains from net migration will be likely outweighed by the natural population decline; however, much uncertainty exists around population migration patterns, since public and business policies have the potential to significantly improve migration patterns. Kanawha County's population is expected to decrease between 2010 and 2030. West Virginia's population is expected to age at a rate that exceeding that of the nation, as the population group over age 65 is expected to grow by 22.9% by 2030 from 16.0% in 2010. Also, the share of the state's population that is of prime working age (age 25-44) is expected to decline to 22.3% by 2030, down from 24.7% in 2010.[297] Moody's Analytics noted that the retiree population is supporting the housing and services markets in the state.

The following table shows the population in Kanawha County, which decreased by 2.5% between 2010 and 2015.[298]

County	2010 Population	2015 Population	Population Percent Change
Kanawha	193,063	188,332	-2.5%
Total	**193,063**	**188,332**	**-2.5%**

Income Characteristics

The 2010 assessment area median family income was substantially higher ($54,203) than the MSA at $52,702 and West Virginia at $38,380. As shown in the table below, the median family income increased in the MSA since 2010. Although it fell in 2016, it remained above the median family income in 2010.

Borrower Income Levels
Charleston, WV MSA

FFIEC Estimated Median Family Income		Low			Moderate			Middle			Upper		
		0	-	49.99%	50%	-	79.99%	80%	-	119.99%	120%	-	& above
2014	**$57,500**	0	-	$28,749	$28,750	-	$45,999	$46,000	-	$68,999	$69,000	-	& above
2015	**$59,600**	0	-	$29,799	$29,800	-	$47,679	$47,680	-	$71,519	$71,520	-	& above
2016	**$57,100**	0	-	$28,549	$28,550	-	$45,679	$45,680	-	$68,519	$68,520	-	& above

Poverty rates increased in Kanawha County from 1999 to 2015.[299] In 2015, Kanawha County's and West Virginia's poverty rates were substantially above than the national rate. According to the U.S. Census Bureau, the national poverty rate in 2015 was 13.5%, down 1.3 percentage points from 14.8% in 2014. For most demographic groups, the 2015 poverty rates and number of people in poverty decreased from 2014.[300] The following table shows the poverty rates for 1999[301] and 2015.

County	1999 Poverty Rate	2015 Poverty Rate	Change
Kanawha	14.4%	16.5%	14.6%
West Virginia	**17.9%**	**18.0%**	**0.6%**
United States	**11.8%**	**13.5%**	**14.4%**

[299] United States Department of Agriculture Economic Research Service Poverty Rates (for 1999 and 2015): https://data.ers.usda.gov/reports.aspx?ID=17826
[300] 2015 National Poverty: http://www.census.gov/library/publications/2016/demo/p60-256.html
[301] 1999 National Poverty Rate: http://www.census.gov/prod/2000pubs/p60-210.pdf

Housing Characteristics

According to 2010 U.S. Census data, there are 93,063 housing units and 51,064 families in the assessment area. From an income perspective, 19.0% of housing units, 14.3% of owner-occupied units, and 15.2% of families are located in moderate-income tracts. In the moderate-income census tracts, over half (52.6%) of the housing units are either rental or vacant, and 47.4% are owner-occupied. Therefore, based on the number of housing units compared to the number of families in moderate-income census tracts, there appear to be credit-related opportunities for Fifth Third to provide various aspects of affordable housing in these tracts.

The 2010 U.S. Census data shows the median age of housing stock in the assessment area was 48 years old, with 27.9% of the stock built before 1950. Within the assessment area, the median age of housing stock was 57 years old in moderate-income tracts, which indicates that there is opportunity to make home improvement loans in this assessment area, particularly in moderate-income areas.

According to the 2010 U.S. Census data, the median housing value in the assessment area was $98,537, with an affordability ratio of 43.31. The affordability ratio is derived by dividing the median household income by the median housing value. The higher the affordability ratio, the more affordable a home is considered.

The median housing values and household incomes increased between 2010 and 2011-2015, making housing slightly more affordable overall. Median gross rents substantially decreased in the assessment area between 2010 and 2011-2015. In 2010, about 34.1% of renters across the assessment area had rent costs greater than 30.0% of income. Decreasing rental rates may make it easier for potential homebuyers to save for a down payment for a home. According to Moody's Analytics, there is a very high homeownership rate in the Charleston metropolitan area, which means that many households are benefiting from slowly rising house prices. The table below presents housing characteristics from the U.S. Census data between 2010 and 2015 in the assessment area and West Virginia.

County	2010 Median Housing Value	2010 Affordability Ratio	2011-2015 Median Housing Value	2011-2015 Affordability Ratio	2010 Median Gross Rent	2011-2015 Median Gross Rent	Percent of Change
Kanawha	$98,500	43.32	$103,100	44.50	$698	$589	-15.6%
West Virginia	**$94,500**	**40.61**	**$103,800**	**40.22**	**$643**	**$549**	**-14.6%**

According to Bankrate.com,[302] West Virginia ranked 48th for foreclosure filings in November 2016. The national average for foreclosure filings was 1 in every 1,533 housing units. The following table contains information about foreclosure filings in the assessment area, according to Realtytrac:[303]

[302] Bankrate.com: http://www.bankrate.com/finance/real-estate/foreclosures-by-state/default.aspx
[303] Realtytrac: http://www.realtytrac.com/statsandtrends/foreclosuretrends/

In November 2016, Kanawha County had a substantially higher rate of foreclosure than West Virginia's, but it was significantly lower than the nation's foreclosure rate.

Geography Name	Ratio of Properties Receiving Foreclosure Filings in November 2016
Kanawha	1:2,506
West Virginia	**1:8,311**
United States	**1:1,533**

Building permits in the MSA, West Virginia, and the nation are included in the following table for 2014, 2015, and 2016.[304]

Geography	2014	2015	Percent of Change 2014-2015	2016	Percent of Change 2015-2016
Charleston MSA	321	283	-11.8%	185	-34.6%
West Virginia	**2,686**	**2,814**	**4.8%**	**2,544**	**-9.6%**
United States	**1,052,124**	**1,182,582**	**12.4%**	**1,190,191**	**0.6%**

The MSA experienced a decrease in housing permits between 2014 and 2015 and a more significant decrease between 2015 and 2016, which was not representative of the trends in West Virginia or the nation during this timeframe. Additionally, the overall demand for permits tends to indicate a weak housing market and a decreased demand for home purchase loans in the assessment area during the evaluation period. However, according to Moody's Analytics, the demand for residential building permits in September and October 2016 was better than the prior three-month trend.

Labor, Employment, and Economic Characteristics

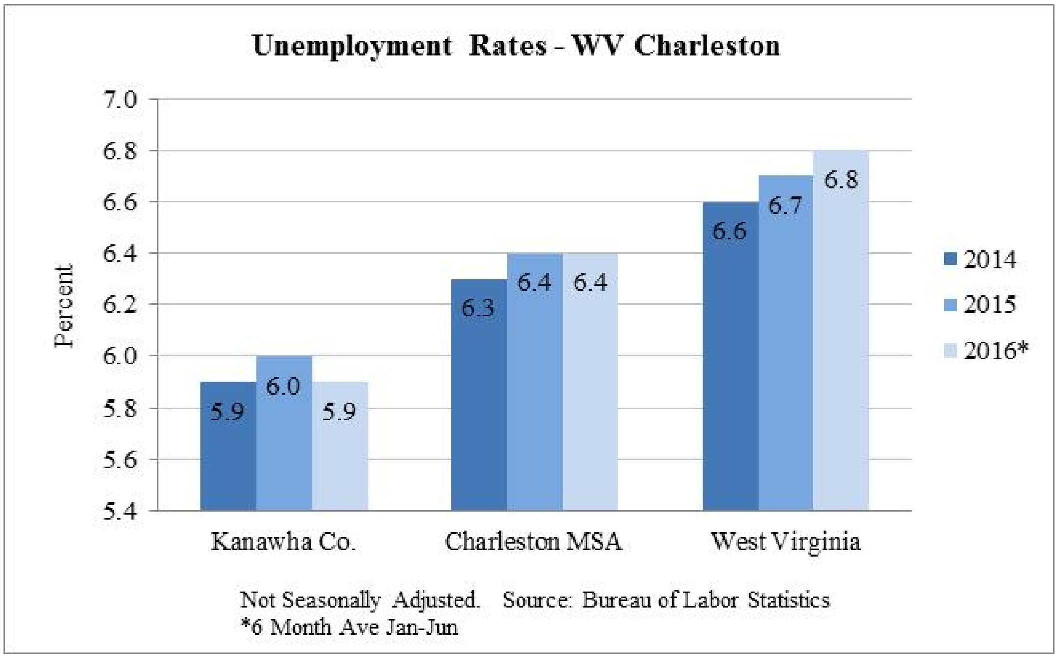
According to Moody's Analytics, the Charleston area economy is in recession, but is beginning to stabilize. While the rollback of environmental regulations may help boost the coal industry, but natural gas prices remain at historical lows, which hurts the demand for coal. As the industrial structure shifts, the lack of retraining and low educational attainment leads to more long-term unemployment. This metropolitan area will remain a below-average performer due to rapidly aging population and weak demographics.

According to Moody's Analytics, top employers in the assessment area in 2015/2016 were:

[304] U.S. Census Bureau Building Permits Survey: http://www.census.gov/construction/bps/

Company	Number of Employees
Charleston Area Medical Center	6,800
Herbert J. Thomas Memorial Hospital Association	1,300
Frontier Communications	1,250
MC Junking Corp.	>1,000
Wal-Mart Stores	>1,000
WVSR	>1,000
Wells Fargo	750
Walker Machinery Company	700
Capital Area Services	680
Bayer Crop Science	600

The following table illustrates the average unemployment rates for 2014, 2015, and June 2016 for the counties in the assessment area, MSA, and West Virginia.



Overall, unemployment rates remained fairly stable in the assessment area and were significantly lower than West Virginia's unemployment rates each year.

According to the *Charleston Gazette-Mail*, the Kanawha County Board of Education announced 72 personnel cuts due to lack of state funding and a decline of students. The loss of funding is due to a loss of 731 students in the county, as enrollment numbers from the current school year are used to set funding levels for the following school year. Forty-seven of the eliminated positions are professional (e.g., teachers and administrators) and 25 are service positions (e.g., custodians, cooks, and bus drivers).[305]

[305] Quinn, Ryan. "Kanawha: Schools losing funds for 72 positions." *Charleston Gazette-Mail*. January 9, 2017. - http://www.wvgazettemail.com/news-education/20170109/kanawha-schools-losing-funds-for-72-positions

Additionally, according to the *Associated Press*, Blackhawk Mining announced its plans to idle some coal operations in southern West Virginia and permanently lay off 146 workers. The Panther Creek mine in Kanawha County was part of Blackhawk Mining's purchase through an auction of a substantial amount of bankrupt Patriot Coal's assets last year. Blackhawk indicated that layoffs are expected to take place in March 2016 at Panther Creek's Winchester Underground Mine and Tom's Fork Prep Plant in Eskdale, although other operations at Panther Creek will remain active.[306]

2016 FFIEC Census Data and 2015 D&B Information

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN THE CHARLESTON WV MSA

Lending Test

Fifth Third's performance under the lending test in this assessment area is rated "High Satisfactory." Fifth Third has demonstrated a good responsiveness to the credit needs of the community. In addition, Fifth Third originated two community development loans totaling $4.0 million. Fifth Third has a good geographic distribution of loans and a moderate level of lending gaps. Fifth Third has a good distribution among borrowers of different income levels and to businesses of different revenue sizes. Fifth Third also exhibits a good record of serving the credit needs of highly economically disadvantaged areas in its assessment area, low-income individuals, and businesses with gross annual revenues of $1 million or less. The adequate level of community development loans and extensive use of flexible lending practices augmented Fifth Third's performance in this assessment area.

Greatest consideration was given to the evaluation of home purchase lending based on the overall volume of lending, followed by refinance and small business. There were an insufficient number of home improvement loans to analyze performance. Details of Fifth Third's residential mortgage and small business lending, as well as information regarding aggregate lending, can be found in Appendix E.

Lending Activity

Fifth Third's lending activity reflects a good responsiveness to the credit needs within the assessment area. Fifth Third originated 93 home purchase, 69 refinance, 22 home improvement, 62 small business, and two community development loans during the evaluation period. The percentage of Fifth Third's total lending at 0.2% is greater than the percentage of total deposits at 0.1% in this area.

Fifth Third made 93.4% of the HMDA and 100.0% of the CRA lending within its designated assessment area. No concentration was identified in any of the excluded counties within the assessment area.

Geographic Distribution of Loans

Fifth Third's overall distribution of lending among geographies is good. Home purchase lending is poor. Refinance lending is excellent. Small business lending is excellent. There is also an overall moderate level of lending gaps. The following gaps in lending were noted in the assessment area.

Tract Income Levels	Number of Tracts	Tracts with No Loans	Penetration
Moderate	12	3	75.0%
Middle	30	2	93.3%
Upper	11	2	81.8%
Total	**53**	**7**	**86.8%**

Lending gaps are considered reasonable. The lower penetration rate in moderate-income tracts is primarily due to an owner-occupancy rate of 47.4% and a high percentage of rentals and vacancies of 52.6% in these areas. Middle-income tracts have a low level of lending gaps and upper-income tracts have a reasonable level of lending gaps.

Home Purchase Loans

Fifth Third made six home purchase loans totaling $611,000 in moderate-income tracts. This represents 6.5% of its home purchase loans by volume, which is below the percentage of owner-occupied units in these tracts at 14.3%, and 4.1% by dollar amount, which is significantly below proxy. The percentage of loans by volume was below the 2014 aggregate at 11.3% and was below the 2015 aggregate at 11.2%. As Fifth Third's performance was below proxy and the aggregate of all lenders, the geographic distribution of home purchase loans in low-income tracts is poor.

Fifth Third made 46 home purchase loans totaling $5.7 million in middle-income tracts. This represents 49.5% of home purchase loans by volume, which is below the percentage of owner-occupied units in these tracts at 61.7%, and 38.4% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate of 57.9% and was below the 2015 aggregate of 56.3%.

Fifth Third made 41 home purchase loans totaling $8.5 million in upper-income tracts. This represents 44.1% of home purchase loans by volume, which significantly exceeds the percentage of owner-occupied units in these tracts at 24.0%, and 57.5% by dollar amount, which significantly exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 30.8% and exceeded the 2015 aggregate of 31.2%.

Overall, the geographic distribution of home purchase loans is poor.

Refinance Loans

Fifth Third made eight refinance loans totaling $1.3 million in moderate-income tracts. This represents 11.6% of refinance loans by volume, which is below the owner-occupied units in these tracts at 14.3%, and 15.2%, which exceeds proxy. The percentage of loans by volume was comparable to the 2014 aggregate at 9.1% and significantly exceeded the 2015 aggregate at 9.0%. Because the owner-occupancy rate in moderate-income tracts is only 47.4% (which likely reduces the demand for refinance loans in these areas) and Fifth Third's performance was comparable in 2014 and significantly exceeded the aggregate of all lenders in 2015, the geographic distribution of refinance loans in moderate-income tracts is excellent.

Fifth Third made 38 refinance loans totaling $3.7 million in middle-income tracts. This represents 55.1% of refinance loans by volume, which is below the owner-occupied units in these tracts at 61.7%, and 44.1% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate at 60.5% and was below the 2015 aggregate at 59.0%.

Fifth Third made 23 refinance loans totaling $3.4 million in upper-income tracts. This represents 33.3% of refinance loans by volume, which exceeds the percentage of owner-occupied units in these tracts at 24.0%, and 40.8% by dollar amount, which significantly exceeds proxy. The percentage of loans by volume was below the 2014 aggregate at 30.4% and exceeded the 2015 aggregate at 32.0%.

Overall, the geographic distribution of refinance loans is excellent.

Small Business Loans

Fifth Third made 20 small business loans totaling $3.7 million in moderate-income tracts. This represents 32.3% of small business loans by volume, which exceeds the percentage of businesses in these tracts at 29.5%, and 34.5% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 26.1% and the 2015 aggregate of 27.6%. Given that Fifth Third's performance exceeded proxy and the aggregate of all lenders, the geographic distribution of small business loans in moderate-income tracts is excellent.

Fifth Third made 26 small business loans totaling $5.3 million in middle-income tracts. This represents 41.9% of small business loans by volume, which is below the percentage of businesses in these tracts at 45.7%, and 49.3% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 45.6% and was below the 2015 aggregate of 44.1%.

Fifth Third made 16 small business loans totaling $1.7 million in upper-income tracts. This represents 25.8% of small business loans by volume, which exceeds the percentage of businesses in these tracts at 24.8%, and 16.2% by dollar amount, which is below proxy. The percentage of loans by volume was below the 2014 aggregate of 25.5% and was below the 2015 aggregate of 25.7%.

Overall, the geographic distribution of small business loans is excellent.

Distribution by Borrower Income and Revenue Size of the Business

The distribution of loans is good based on borrower income and for businesses of different revenue sizes. Borrower distribution for home purchase and refinance lending is good.

Home Purchase Loans

Fifth Third made ten loans totaling $711,000 to low-income borrowers. This represents 10.8% of home purchase loans by volume, which is below the percentage of low-income families at 18.6%, and 4.8% by dollar amount, which is significantly below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 9.2% and was below the 2015 aggregate of 8.1%. Because Fifth Third's performance exceeded the aggregate of all lenders, but was below proxy, the borrower distribution of home purchase loans to low-income borrowers is good.

Fifth Third made 18 loans totaling $1.7 million to moderate-income borrowers. This represents 19.4% of home purchase loans by volume, which exceeds the percentage of moderate-income families at 18.0%, and 11.2% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 17.9% and was below the 2015 aggregate of 21.4%. As Fifth Third's performance exceeded proxy and the aggregate of all lenders, the borrower distribution of home purchase loans to moderate-income borrowers is excellent.

Fifth Third made 23 loans totaling $3.1 million to middle-income borrowers. This represents 24.7% of home purchase loans by volume, which exceeds the percentage of middle-income families at 21.2%, and 21.1% by dollar amount, which is comparable to proxy. The percentage of loans by volume was below the 2014 aggregate of 21.6% and exceeded the 2015 aggregate of 21.7%.

Fifth Third made 39 loans totaling $8.8 million to upper-income borrowers. This represents 41.9% of home purchase loans by volume, which is comparable to the percentage of upper-income families at 42.2%, and 59.6% by dollar amount, which exceeds proxy. The percentage of loans by volume exceeded the 2014 aggregate of 35.8% and exceeded the 2015 aggregate of 30.7%.

A community contact indicated that the lack of employment opportunities for low- and moderate-income individuals was a significant economic factor likely impacting the ability of these individuals to buy homes. Since Fifth Third was able to effectively reach these borrowers, the overall borrower distribution of home purchase loans is good.

Refinance Loans

Fifth Third made five loans totaling $375,000 to low-income borrowers. This represents 7.2% of refinance loans by volume, which is significantly below the percentage of low-income families at 18.6%, and 4.5% by dollar amount, which is significantly below proxy. The percentage of loans by volume was below the 2014 aggregate of 6.2% and exceeded the 2015 aggregate of 6.1%. Given that Fifth Third's performance exceeded the aggregate of all lenders, but was significantly below proxy, the borrower distribution of refinance loans to low-income borrowers is adequate.

Fifth Third made 13 loans totaling $968,000 to moderate-income borrowers. This represents 18.8% of refinance loans by volume, which exceeds the percentage of moderate-income families at 18.0%, and 11.5% by dollar volume, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 15.6% and exceeded the 2015 aggregate of 15.7%. As Fifth Third's performance exceeded the aggregate of all lenders and proxy, the borrower distribution of refinance loans to moderate-income borrowers is excellent.

Fifth Third made 14 loans totaling $1.2 million to middle-income borrowers. This represents 20.3% of refinance loans by volume, which is comparable to the percentage of middle-income families at 21.2%, and 14.2% by dollar amount, which is below proxy. The percentage of loans by volume exceeded the 2014 aggregate of 24.5% and was below the 2015 aggregate of 21.9%.

Fifth Third made 35 loans totaling $5.7 million to upper-income borrowers. This represents 50.7% of refinance loans by volume, which exceeds the percentage of upper-income families at 42.2%, and 67.6% by dollar amount, which significantly exceeds proxy. The percentage of loans by volume was below the 2014 aggregate of 41.5% and substantially exceeded the 2015 aggregate of 41.6%.

Overall, the borrower distribution of refinance loans is good.

Small Business Loans

The distribution of small business loans to businesses of different sizes is good, considering Fifth Third's performance relative to the aggregate of all lenders. Fifth Third was able to make 40.3% of small business loans to businesses with revenues of $1 million or less. Fifth Third's performance was below the 2014 aggregate of 38.0% and exceeded the 2015 aggregate of 44.0%; however, Fifth Third's performance was significantly below the percentage of small businesses in the assessment area at 88.7%. Also, during the evaluation period, Fifth Third was able to make an acceptable percentage of small-dollar loans (59.7%) up to $100,000, indicating a willingness to lend in smaller amounts that are requested by small businesses.

Community Development Loans

Fifth Third originated two community development loans totaling $4.0 million supporting economic development during the evaluation period.

Community development lending in the assessment area represents 0.1% of the total dollar volume of community development loans originated by Fifth Third during the evaluation period. This ranks as Fifth Third's 52nd highest percentage of community development lending during the evaluation period. As such, Fifth Third's performance is adequate in community development lending.

The community development loans were renewals of working capital to assist a small business retain employment for 14 low- and moderate-income workers.

Flexible Lending Programs

Fifth Third only originated 184 HMDA loans in this assessment area during the evaluation period, but originated 701 flexible lending loans consisting of 503 government loans, 66 down payment assistance loans, and 132 other flexible lending programs. The following tables show the percentage by volume and by dollar amount of the three types of flexible lending programs made in this assessment area during the evaluation period and the distribution of Fifth Third's flexible lending programs within the assessment area by census tract income and by borrower income.

*Unknown tract data is not included in the above table.

Overall, Fifth Third's lending in low-income tracts by number was comparable to the percentage of owner-occupied units in these tracts, while the dollar amount in the low-income tracts was slightly below proxy. However, down payment assistance loans, by number and dollar amount, exceeded the percentage of owner-occupied units in low-income tracts. The percentage of lending by volume and dollar amount in moderate-income tracts exceeded the percentage of owner-occupied units in these geographies.

Fifth Third's lending by volume to low-income borrowers exceeded the percentage of low-income families, and lending by dollar amount was below proxy. The percentage of lending by volume and dollar amount to moderate-income borrowers exceeded the percentage of moderate-income families, especially for down payment assistance and government loan programs.

Fifth Third made extensive use of flexible lending practices and is serving the assessment area's credit needs, as lending through flexible loan programs in low-income tracts was good and excellent in moderate-income tracts and to low- and moderate-income borrowers was excellent.

Investment Test

Fifth Third's performance relative to the investment test in the assessment area is rated "High Satisfactory."

Fifth Third made a significant level of qualified community development investments and grants. As such, Fifth Third was occasionally in a leadership position. Fifth Third has 35 qualified investments totaling $4.0 million during the evaluation period. Shown in the table below are the total current period investments:

Affordable Housing		Community Services	
#	*$*	*#*	*$*
11	1,543,486	20	46,471

Also included in the total number of qualified investments are four prior period investments totaling $2.4 million. Fifth Third made 0.3% of its total community development investments in this assessment area, which is greater than the percentage of total deposits at 0.1% and comparable to the percentage of branch offices at 0.2%.

Fifth Third exhibits a good responsiveness to credit and community development needs in the assessment area. Fifth Third made 25 donations totaling $51,221 that supported local schools, churches and social and charitable organizations. The majority of Fifth Third's donations (90.7%) supported services to low- and moderate-income individuals.

Service Test

Fifth Third's performance under the service test in this assessment area is rated "Outstanding." Retail services are readily accessible and Fifth Third provides an excellent level of community development services.

Retail Services

Fifth Third's record of opening and closing offices has not adversely affected the accessibility of its delivery systems, particularly in moderate-income geographies and to low- and moderate-income households. Since the previous evaluation, no banking centers were opened or closed and delivery services are readily accessible to Fifth Third's geographies and individuals of different income levels.

Business hours and services provided do not vary in a way that inconveniences certain portions of the assessment area, including moderate-income geographies or households, and are consistent with the services and hours discussed in the “Institution” assessment.

Fifth Third maintains three banking centers within this assessment area, including one in moderate-, two in middle-, and none in upper-income census tracts. Fifth Third banking centers in this assessment area represent 0.2% of all its banking centers.

Fifth Third has a total of three full-service ATMs within this assessment area, including one in moderate-, two in middle-, and none in upper-income census tracts.

The following table illustrates the percentage of banking centers and ATMs in moderate-, middle-, and upper-income census tracts in comparison to the number and percentage of census tracts and the percentage of households and businesses in those tracts. There are no low-income geographies in this assessment area.

Geographic Distribution of Branches & ATMS

2016 FFIEC Census Data, 2010 ACS Data, and 2015 D&B Information
Closed branches/ATMs are only included in "closed" columns and are not included in any other totals.
DTO - Drive thru only is a subset of total branches
SA = Stand Alone ATM is a subset of total ATMs

Branch distribution within moderate-income tracts was considered excellent, because the distribution of branches exceeded the percentage of census tracts and households and businesses in these tracts.

Community Development Services

Fifth Third is a leader in providing community development services in this assessment area. During the evaluation period, Fifth Third employees provided 625 hours of community development service to local organizations serving low- and moderate-income individuals, which represents 0.5% of all community development services provided and equates to 0.3 annualized persons (ANP).

Affordable Housing	Economic Development	Community Services
# of Hours	***# of Hours***	***# of Hours***
103	36	486

Employees provided financial expertise through leadership positions in multiple community organizations that provide affordable housing and promote community and economic development. Community development services include 381 hours of providing financial literacy through local nonprofits and school programs, 224 hours serving on boards and committees, and 20 hours providing technical assistance to non-profits.

Fifth Third was considered particularly responsive with regard to hours dedicated to financial literacy activities, as a community contact mentioned the need for financial literacy education to help lower-income individuals get out of debt and learn to save money. Based on the area's high poverty rates and accelerating elderly population, supporting community services that serve low- and moderate-income individuals is also considered to be responsive.

[307]There is a statutory requirement that the written evaluation of a multi-state institution's performance must list the individual banking centers examined in each state. Before the Consumer Financial Protection Bureau assumed responsibility over supervision of the majority of the consumer compliance regulation impacting Fifth Third, the institution was supervised under the Federal Reserve's continuous supervision process. Banking centers and/or the institution's processes for monitoring banking center performance are periodically evaluated under this continuous supervision process so no additional review of banking centers was necessary as part of this CRA performance evaluation.

2016 FFIEC Census Data and 2016 D&B Information

APPENDIX H

GLOSSARY OF TERMS

Aggregate lending: The number of loans originated and purchased by all reporting lenders in specified income categories as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the metropolitan area/assessment area.

Census tract: A small subdivision of metropolitan and other densely populated counties. Census tract boundaries do not cross county lines; however, they may cross the boundaries of metropolitan statistical areas. Census tracts usually have between 2,500 and 8,000 persons, and their physical size varies widely depending upon population density. Census tracts are designed to be homogeneous with respect to population characteristics, economic status, and living conditions to allow for statistical comparisons.

Community development: All Agencies have adopted the following language. Affordable housing (including multifamily rental housing) for low- or moderate-income individuals; community services targeted to low- or moderate-income individuals; activities that promote economic development by financing businesses or farms that meet the size eligibility standards of the Small Business Administration's Development Company or Small Business Investment Company programs (13 CFR 121.301) or have gross annual revenues of $1 million or less; or, activities that revitalize or stabilize low- or moderate-income geographies.

Effective September 1, 2005, the Board of Governors of the Federal Reserve System, Office of the Comptroller of the Currency, and the Federal Deposit Insurance Corporation have adopted the following additional language as part of the revitalize or stabilize definition of community development. Activities that revitalize or stabilize:

- (i) Low-or moderate-income geographies;
- (ii) Designated disaster areas; or
- (iii) Distressed or underserved Non-metropolitan middle-income geographies designated by the Board, Federal Deposit Insurance Corporation, and Office of the Comptroller of the Currency, based on-
  - a. Rates of poverty, unemployment, and population loss; or
  - b. Population size, density, and dispersion. Activities that revitalize and stabilize geographies designated based on population size, density, and dispersion if they help to meet essential community needs, including needs of low- and moderate-income individuals.

Consumer loan(s): A loan(s) to one or more individuals for household, family, or other personal expenditures. A consumer loan does not include a home mortgage, small business, or small farm loan. This definition includes the following categories: motor vehicle loans, credit card loans, home equity loans, other secured consumer loans, and other unsecured consumer loans.

Family: Includes a householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption. The number of family households always equals the number of families; however, a family household may also include non-relatives living with the family. Families are classified by type as either a married-couple family or other family, which is further classified into 'male householder' (a family with a male householder and no wife present) or 'female householder' (a family with a female householder and no husband present).

Full-scope review: Performance under the Lending, Investment, and Service Tests is analyzed considering performance context, quantitative factors (for example, geographic distribution, borrower distribution, and total number and dollar amount of investments), and qualitative factors (for example, innovativeness, complexity, and responsiveness).

Geography: A census tract delineated by the United States Bureau of the Census in the most recent decennial census.

Home Mortgage Disclosure Act (HMDA): The statute that requires certain mortgage lenders that do business or have banking offices in a metropolitan statistical area to file annual summary reports of their mortgage lending activity. The reports include such data as the race, gender, and the income of applications, the amount of loan requested, and the disposition of the application (for example, approved, denied, and withdrawn).

Home mortgage loans: Includes home purchase and home improvement loans as defined in the HMDA regulation. This definition also includes multifamily (five or more families) dwelling loans, loans for the purchase of manufactured homes and refinancings of home improvement and home purchase loans.

Household: Includes all persons occupying a housing unit. Persons not living in households are classified as living in group quarters. In 100 percent tabulations, the count of households always equals the count of occupied housing units.

Limited-scope review: Performance under the Lending, Investment, and Service Tests is analyzed using only quantitative factors (for example, geographic distribution, borrower distribution, total number and dollar amount of investments, and branch distribution).

Low-income: Individual income that is less than 50 percent of the area median income, or a median family income that is less than 50 percent, in the case of a geography.

Market share: The number of loans originated and purchased by the institution as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the metropolitan area/assessment area.

Metropolitan area (MA): A metropolitan statistical area (MSA) or a metropolitan division (MD) as defined by the Office of Management and Budget. A MSA is a core area containing at least one urbanized area of 50,000 or more inhabitants, together with adjacent communities having a high degree of economic and social integration with that core. A MD is a division of a MSA based on specific criteria including commuting patterns. Only a MSA that has a population of at least 2.5 million may be divided into MDs.

Middle-income: Individual income that is at least 80 percent and less than 120 percent of the area median income, or a median family income that is at least 80 percent and less than 120 percent, in the case of a geography.

Moderate-income: Individual income that is at least 50 percent and less than 80 percent of the area median income, or a median family income that is at least 50 percent and less than 80 percent, in the case of a geography.

Multifamily: Refers to a residential structure that contains five or more units**.**

Other products: Includes any unreported optional category of loans for which the institution collects and maintains data for consideration during a CRA examination. Examples of such activity include consumer loans and other loan data an institution may provide concerning its lending performance.

Owner-occupied units: Includes units occupied by the owner or co-owner, even if the unit has not been fully paid for or is mortgaged.

Qualified investment: A qualified investment is defined as any lawful investment, deposit, membership share, or grant that has as its primary purpose community development.

Rated area: A rated area is a state or multi-state metropolitan area. For an institution with domestic branches in only one state, the institution's CRA rating would be the state rating. If an institution maintains domestic branches in more than one state, the institution will receive a rating for each state in which those branches are located. If an institution maintains domestic branches in two or more states within a multi-state metropolitan area, the institution will receive a rating for the multi-state metropolitan area.

Small loan(s) to business(es): A loan included in 'loans to small businesses' as defined in the Consolidated Report of Condition and Income (Call Report) and the Thrift Financial Reporting (TFR) instructions. These loans have original amounts of $1 million or less and typically are either secured by nonfarm or nonresidential real estate or are classified as commercial and industrial loans. However, thrift institutions may also exercise the option to report loans secured by nonfarm residential real estate as "small business loans" if the loans are reported on the TFR as nonmortgage, commercial loans.

Small loan(s) to farm(s): A loan included in 'loans to small farms' as defined in the instructions for preparation of the Consolidated Report of Condition and Income (Call Report). These loans have original amounts of $500,000 or less and are either secured by farmland, or are classified as loans to finance agricultural production and other loans to farmers.

Upper-income: Individual income that is more than 120 percent of the area median income, or a median family income that is more than 120 percent, in the case of a geography.

Fifth Third Bancorp

2020 Annual Report

DEAR SHAREHOLDERS:

For 162 years, spanning a Civil War, two world wars, 34 recessions (including the Great Depression), 10 banking crises, and two severe global pandemics, Fifth Third Bank has stood firmly with our customers, communities and employees. We always rise to the occasion to help others and be a source of value and trust, especially in the most challenging times.

In that regard, this past year was no different—**we remain steadfast in our resolve to always be a pillar of strength, guidance, and assistance for all.** Yet in virtually every other way, 2020 was a unique and remarkably challenging year for many people, forever redefined by the fallout from the global COVID-19 pandemic that has reshaped the way many Americans bank, shop, work, communicate, and live. We have never witnessed anything like this in our lifetimes, and neither has our role as a business essential to the economy been so evident.

With the economic fallout and even more devastating health crisis, my sincerest thoughts are with the millions who have been affected by the virus, including all those who have lost a loved one.

RISING TO THE CHALLENGE

Several years of strong and steady financial results, combined with a diversified mix of fee revenues and a resilient balance sheet, give us the strength and capacity to serve our customers. As the pandemic began filling hospitals, shutting down businesses, and fundamentally changing life in the U.S. for many in early 2020, **we at Fifth Third took proactive steps to continue to be there for our customers, our employees, and our communities.**

GUIDANCE FOR OUR CUSTOMERS

For all of our customers, we were a leader among our peers in offering hardship relief programs, even before the federal government implemented relief as part of the CARES Act.

The relief we provided customers was one of the most valuable of assets—time—when, virtually overnight, the unprecedented economic sudden stop threatened the stability of both companies and households. We have provided various relief programs, including payment deferrals, covenant waivers, and other modifications in order to help our customers bridge the challenges of the pandemic, in

Greg D. Carmichael

addition to extending billions in total credit between consumer and commercial clients through 2020. Regulated banks like Fifth Third provide stability not only on an individual basis, but also on a macro level, acting as a massive shock absorber for the entire system. **As bankers, we are proud that we fulfilled this critical function to help stabilize the broader economy.**

Specifically, for our small and mid-sized business customers, we take great pride in knowing that Fifth Third has played an essential role by our lending through the Paycheck Protection Program (PPP) through last year and into 2021. We have made a positive, direct, and significant impact on nearly 40,000 businesses that has protected approximately 605,000 jobs.

We have stood resolute with our customers in order to help them get back on their feet, and we will continue to be there for them as a caring and trusted source of financial advice and capital. Their need was not dependent on their size or profitability, and neither was our service. As a result, 85% of the PPP loans we originated were less than $150,000.

Despite our balance sheet's skew toward larger, more resilient clients and our No. 53 SBA ranking prior to the pandemic, we became the No. 13 top PPP lender in 2020—a testament to the success we had in providing our existing customers with necessary funding and financial assistance. Our dedication to helping our customers through PPP lending has continued into 2021 with the latest round enacted in January. We are proud of the significant role Fifth Third continues to play in aiding small businesses throughout our footprint and will work diligently to remain a source of strength for our customers during this challenging time.

It is important to note that we invested a considerable amount of time, energy, and expense in our technology division to help our customers with the PPP process. These investments include technology solutions that help customers automate and streamline the process and minimize the time from application to funding, as well as helping clients with the forgiveness process. I am proud of our efforts to get it right for our customers in an efficient and operationally sound manner.

Additionally, as we navigated the fallout from COVID-19, **we developed cross-functional credit advisory forums in our Commercial business.** They included senior members in credit risk, the line of business, and others in the organization with in-depth industry knowledge to drive consistent credit decisions in a holistic manner, while also helping clients find the right solutions for their circumstances.

*As of and for the year ended December 31, 2020

For our consumer customers, we directly reached out to them by making over 3 million calls, proactively assessing their financial and even personal well-being throughout the pandemic.

As part of the CARES Act relief, we offered hardship assistance when requested by the customer, which was one of our many relief programs. In addition to the accommodative payment deferral programs I mentioned earlier,

ABOVE & BEYOND A FIFTH THIRD BETTER®

In March 2020, employees at the Fremont Banking Center in West Michigan were making outbound calls to check in with customers. As employees asked if they could help in any way, one customer, a 98-year-old woman, burst into tears. She said she lived alone and that her caregiver was unable to deliver her groceries.

Employees at the banking center sprang into action. They investigated solutions only to learn that all resources were too overwhelmed to respond quickly. Employees pitched in their own money and personal time to shop for groceries and deliver supplies to the customer's home. They also provided a list of local contact numbers that the customer could call for help in the future.

This is stepping up and delivering a customer experience *above and beyond* a Fifth Third better.®

Congratulations to Kyleigh Juska, Heather Youngs, Briana Oatis, and Jason Stalbaum for being recognized as Fifth Third 2020 Summit Award winners. *Nomination submitted by Shawn Niehaus.*

we also provided relief to our customers by halting vehicle repossessions and home foreclosure evictions and by waiving late fees and overdraft charges. Since the inception of our consumer hardship assistance programs, we processed more than 150,000 hardship requests, which represent approximately $3 billion in Fifth Third loan balances in addition to approximately $6 billion in our mortgage servicing portfolio.

Additionally, since the onset of the pandemic, **we have kept approximately 99% of our branches open for business and fully operational,** with modified health protocols to ensure the safety of our customers and branch employees and amended hours as appropriate. Our banking centers are the face of our company for many customers, so making sure they know we are there for them has meant a lot to many customers as a beacon of stability in uncertain times.

We quickly mobilized so our customers could easily schedule appointments with our bankers for complex financial matters by calling their financial center, via our mobile app, or through our internet banking platform. For many of their banking needs, **we continue to encourage our customers to use our highly rated digital platforms** in addition to our network of approximately 52,000 fee-free ATMs.

STRENGTH FOR OUR EMPLOYEES

For our employees, starting in early February 2020, our executive team and Board of Directors began actively planning and prioritizing our pandemic response efforts, which led us to **quickly mobilize our workforce to accommodate remote access for a large number of employees.** At our peak, over 95% of those working in non-customer facing roles were doing so remotely. As I mentioned, for employees who have not been able to do their job remotely, we acted quickly to adapt our safety measures.

We continue to emphasize remote working arrangements for our employees wherever it is feasible and efficient to do so. The timing of a larger-scale return to our corporate offices will commence only when it is safe, and we may ultimately allow a more flexible work arrangement for certain employees going forward.

> ***Taking care of our employees' health and safety has always been a top priority. We strictly follow guidelines of U.S. CDC officials regarding enhanced social distancing and protective measures and have improved our cleaning measures to safeguard employees and customers.***

Although we have taken precautions to mitigate health risks through our enhanced safety measures, **we recognize the unavoidable risk being taken by our front-line employees given their role in providing essential banking services.** To that end, we provided special payments of up to $1,000 per impacted employee. In addition to simply being the right thing to do, these measures also helped maintain call center operations and branch personnel at appropriate levels to serve our customers best.

We took additional action for our employees, including providing free meals, enhanced paid time off, and other benefits during the pandemic. We paid employees for non-worked PTO and reloaded their sick time midway through the year, so they didn't feel obligated to work if they were feeling ill.

We also refunded unused and purchased vacation days and provided most employees with extra PTO for 2021 in acknowledgment that most were not able to use vacation time during the pandemic.

ASSISTANCE TO OUR COMMUNITIES

For our communities, Fifth Third was very active with helping various local, state, and national groups to respond to the pandemic. We led task force groups throughout our markets, including the Cincinnati USA Regional Chamber of Commerce's RESTART task force, a collaboration of more than 20 CEOs to help businesses within the region tackle the collective challenges brought on by the pandemic.

Furthermore, we committed nearly $9 million in philanthropic funds to help address the effects of the COVID-19 pandemic.

Our COVID-19 response efforts were acknowledged externally. In July 2020, we were recognized by an independent third party as **the top-performing bank among the 12 largest U.S. retail banks, based on our pandemic response for our customers, communities, and employees.**

PREPARING IN THE GOOD TIMES FOR THE HARD TIMES TO COME

While our performance during and after the onset of the pandemic was inspiring, it is worth spending a moment to share with you some of the deliberate actions we took before the pandemic that enabled us to be in a significantly stronger position for our customers today.

> *Well before the current health crisis was upon us, we spent several years preparing for an eventual turn in the economic cycle by building a more resilient balance sheet.*

While we could not have predicted the specific catalyst that would put the global economy into a deep recession and the speed at which it unfolded, our actions before the downturn put us in a position of significant strength.

TAKING DELIBERATE ACTIONS

We repositioned and optimized our balance sheet, diversified our lending exposures, and enhanced the granularity of our loan portfolio through our 2019 acquisition of MB Financial. We have remained diligent with respect to client selection in our commercial business, focusing on generating relationships with clients who have more diversified and resilient balance sheets as well as multiple sources of repayment. We also reduced our highly monitored leveraged lending portfolio (which is centrally underwritten and well-diversified by industry and geography) by over 50% since 2015, and now this portfolio makes up just 3% of total loans.

Furthermore, we continue to be well positioned relative to peers in commercial real estate (CRE), an area that I believe is particularly vulnerable in the current economic environment. Thus we will maintain our relatively lower exposure versus peers and a focus on high-quality borrowers, predominantly on top-tier developers with a track record of resilience and significantly lower loan-to-value ratios compared to the last downturn.

Our portfolio is well diversified by geography (with no MSA weighting greater than 4% of the total CRE portfolio) and by property type, with a lower concentration of exposures to retail and hospitality. We also have the lowest concentration of CRE as a percentage of capital among our peers.

In consumer lending, we have maintained our strong underwriting and credit quality standards, focusing primarily on prime and super prime borrowers. As a result, before the pandemic, our balance-weighted FICO score for consumer loans was 755. Since the pandemic, we enhanced underwriting within most of our portfolios, further enhancing credit quality. Additionally, around 90% of our total consumer portfolio is secured, with approximately 85% of our residential real estate portfolio in a first lien position.

It is also worth noting that, across both our consumer and commercial portfolios, **we have focused on maintaining geographical diversification through several national businesses,** including our auto and residential mortgage businesses, as well as in our commercial and industrial and CRE loans.

Our credit risk is well diversified beyond our retail footprint through these national lending businesses. This will be instrumental in delivering a differentiated credit performance given the likelihood of an uneven economic recovery and uncertainties surrounding vaccine delivery.

In fact, strengthening our balance sheet has been a keystone of my tenure since becoming CEO in 2015. **While we clearly did not see this specific pandemic coming, we had been preparing for an eventual downturn in the economy for some time.** We have evaluated all of our businesses and exposures to ensure we perform well through-the-cycle, under various business and rate cycles, and not just when times are good.

Our approach has served us well, as demonstrated by our performance since the economic collapse in early 2020. This continues to be our guiding principle when assessing future growth opportunities today. **We have maintained our disciplined client selection, stuck to our conservative underwriting, and maintained an overall balance sheet management approach focused on a long-term performance horizon.**

STANDING BY OUR CORE VALUES

In times like these, it is just as important to note what Fifth Third does not do.

WE DO NOT:

- Engage in commodity trader lending.
- Facilitate margin trading in our Private Bank or Institutional businesses.
- Engage in mezzanine lending.
- Originate or hold any material land lot loans.
- Originate or hold student loan balances.
- Originate large-ticket indirect leases.
- Knowingly engage with businesses directly involved in bribery, child labor, illegal logging, and other prohibited activities listed in our Environmental and Social Policy.
- Do business with debt collectors, high interest rate lenders, or manufacturers and distributors of military-style firearms for non-law enforcement, non-military use without performing enhanced due diligence to ensure they are not in conflict with our Core Values and Code of Conduct.
- Do business with clients in sectors with elevated environmental and social risks without enhanced due diligence to ensure a comprehensive understanding, including, but not limited to, forestry, palm oil, coal mining, nuclear power, and Arctic drilling.

In addition to our balance sheet strength, we have also been deliberate about diversifying our fee revenues in areas with a lower correlation to key macroeconomic factors. This helps cushion the impact of lower rates and helps produce strong and steady results with lower volatility during economic downturns.

RESILIENT BALANCE SHEET

From a capital management perspective, we have taken action to ensure we continue to operate safely and soundly, with an ample cushion above the well capitalized regulatory levels.

In early 2020 we proactively paused share repurchases before most U.S. banks and well before the Federal Reserve mandated that all 34 of the largest financial institutions had to suspend share repurchases and common dividend increases.

Additionally, **in the span of 12 months, we ran six company-wide stress tests for management and our Board of Directors to evaluate our resilience under a range of different severely adverse macroeconomic scenarios,** assess additional shocks applied to idiosyncratic risks specific to Fifth Third, and evaluate additional areas of potential hidden risk in order to make forward-looking and data-driven decisions regarding our capital deployment plans.

Our regulatory capital ratios improved through 2020 despite the impacts of building our credit reserves, with our CET1 ratio currently at its highest level in over two years. It is worth noting that we do not include the unrealized gains from our securities or hedges in our regulatory capital, which, at $3.5 billion at year's end, equates to an incremental capital cushion of approximately 190 basis points. Our regulatory capital—combined with our allowance for credit losses and our accumulated other comprehensive income (AOCI)—remains best-in-class among peers.

> **We are also now carrying historic levels of excess liquidity, currently around 20 times our prepandemic average.**

The liquidity on our balance sheet primarily reflects our strong and long-standing client relationships, our customers' desire to remain extremely liquid in this dynamic environment, and the tepid investment and growth opportunities compared to 2019.

As a result, our loan-to-deposit ratio is also at a record low level. **We will continue to evaluate opportunities to deploy our excess liquidity with our through-the-cycle performance lens** to ensure we make the right decisions in order to improve our long-term financial performance.

We remain steadfast in our willingness to use the strength of our significant capital and liquidity position to provide maximum support to our customers and the overall economy. We believe that strength will serve us well over the long run.

2020 FINANCIAL PERFORMANCE

Our balance sheet strength stems from our ability to generate strong and steady financial results year in and year out, which we once again produced in 2020. **Here are some of the key highlights.**

> ***Full year net income was $1.4 billion, or $1.83 per diluted share. We delivered strong financial performance despite the challenging operating environment brought on by the pandemic.***

We continued to generate peer-leading consumer household growth of 3% in 2020, with outsized success in Chicago and our key Southeast markets. While nearly doubling our reserves, we generated strong returns for the full year and even stronger returns in the fourth quarter of 2020.

Additionally, **we navigated the unfavorable interest rate environment better than virtually all of our peers,** given the Federal Reserve's lowering short-term interest rates 150 basis points in a two-week period in early March 2020.

We benefited from several actions we have taken over the past several years, including the structural protection of our investment portfolio, our long duration cashflow hedge portfolio, which will continue to provide long-term net interest margin protection for several years, and the proactive measures we have taken to manage our borrowing costs during 2020.

Notwithstanding the significant rate pressures, we generated strong pre-provision net revenue, reflecting record revenue in commercial banking (including record capital markets revenue), and wealth and asset management. **We have achieved this even while maintaining our culture of expense discipline and demonstrating our commitment to consistent and solid through-the-cycle performance.**

STRATEGIC PRIORITIES

As always, generating long-term shareholder value requires long-term planning and discipline in executing our strategy. **Our key strategic priorities have not changed over the past several years, even since the onset of the pandemic.**

ACCELERATE DIGITAL TRANSFORMATION

In an increasingly digital-first world, we are committed to delivering a banking experience that is simple, seamless, and secure. The pandemic has accelerated our focus on leveraging technology in order to digitally enable our customers.

This requires investing in areas of the company that will also generate efficiencies and scale benefits in areas such as digitization and automation (for example: in call center automation and other improvements in our middle market and back-office functions, including enhancements in our commercial origination platform).

We also have introduced our digital mortgage application platform, which guides our borrowers through a self-service interface accessible on any device. With its launch in the third quarter, **approximately 75% of retail and direct applications now run through our digital channel.**

We are also focused on improving the resiliency of our technology infrastructure to achieve a world-class network structure as more and more customer interactions are shifting to digital products.

We will continue to use technology to generate efficiencies throughout the organization while also providing a differentiated customer and employee experience.

INVEST TO DRIVE ORGANIC GROWTH AND PROFITABILITY

We continue to invest in our businesses to drive profitable organic growth and to improve both the employee and customer experience. Over the past year, we have made several investments to support our growth plans and maximize productivity.

In our retail franchise, we continue to invest in our Next Generation branch design, which is approximately 40% smaller, highly automated, and more interactive than our legacy branches. **We currently have 50 next-gen banking centers in our network, with more to come in 2021 and beyond.** As we have continued to prioritize expanding our retail footprint in the Southeast, we opened our first location in South Carolina in September 2020.

Additionally, we continue to invest in expanding the reach of our middle market banking operations, adding key talent in the Southeast and in our newer middle market commercial banking markets in California and Texas.

In our corporate banking business, we continue to see positive outcomes from our ongoing investments in both our sales force and technology. We also expect significant growth in our commercial fee-based businesses going forward, particularly in treasury management and other managed account services.

Further, we are investing in adding fee-based capabilities, with a particular focus on supporting our commercial verticals. For instance, we recently upgraded the capabilities of our health care vertical, our largest and longest-standing vertical. The acquisition of Hammond Hanlon Camp, or H2C, provides investment banking and strategic advisory services for our health care clients. H2C strengthens our vertical and complements the capital markets capabilities provided by our Coker Capital team, which was added in 2018.

We continue to assess non-bank M&A opportunities where we believe we can generate strong returns and where it is additive to both our products and our service capabilities. This includes, but is not limited to, adding capabilities in areas such as wealth and asset management, payments, and capital markets.

EXPAND MARKET SHARE IN KEY GEOGRAPHIES

A strong retail branch network remains important in securing the primary customer relationship.

Therefore, we remain committed to generating smart scale in our retail network by expanding in our faster-growing, existing Southeast markets, where we see stronger deposit growth trends, higher expected population growth, and greater market vitality than in some of our legacy markets.

While we remain focused on expanding in high-growth markets where a top position is achievable to generate necessary scale, we also are optimizing our legacy network to meet evolving customer preferences. Over the past six years, we have reduced our number of branches at a rate of 2% per year with less than 1% incremental customer attrition and a 3:1 closure to opening ratio.

> *Moving forward, we will continue to evaluate carefully the optimal size of our branch network given customer engagement preferences.*

A good example of our ability to grow successfully while maintaining expense discipline is in our Chicago market. Over the past year, we generated 4% household growth while maintaining our top 3 retail deposit market share and No. 2 middle-market relationship share in Chicago. This was achieved while rationalizing staffing, vendors, and branches and delivering on all our expense commitments as part of our acquisition of MB Financial.

MAINTAIN DISCIPLINE

To paraphrase legendary football coach Nick Saban, either you face the pain of discipline or the pain of disappointment, and if you can handle the first you never have to worry about the second.

Over the past several years, we have maintained our culture of expense discipline. **In 2020, we generated an adjusted efficiency ratio, which was stable compared to the previous year despite the challenging environment.** It was near a decade-low level, even as we continued to invest for future growth.

That notwithstanding, we took proactive and decisive steps beginning in the fall of 2020 to right-size our expense base in the face of the revenue headwinds. We took action to reduce our staffing levels, renegotiated key vendor contracts, further optimized our branch network, realized non-branch real estate savings by reducing total corporate office space by 20%, and divested non-core businesses where we did not see a path forward to achieve the necessary scale to generate the appropriate returns. Those included our 401(k) record-keeping and our property and casualty insurance businesses.

Streamlining the organization enables us to focus on the areas where we do have the scale to generate better returns. **We will continue to prioritize areas where we see the highest probability of driving strong financial returns and generating long-term value for our shareholders.**

> *Our balance sheet strength, diversified revenues, and continued focus on disciplined expense management will serve us well as we navigate the environment in 2021 and beyond.*

FOCUSED ON ESG

While our financial performance and priorities are critically important, it is equally important to note that generating sustainable value means taking into consideration the long-term implications of our actions for all our stakeholders, including shareholders. As evidenced by our pandemic response, I firmly believe in the important role that Fifth Third plays in society.

It is a privilege to be in a position to earn our stakeholders' value and trust, and to improve the lives of customers and the well-being of our communities. It is a responsibility that we at Fifth Third do not take lightly. We strive always to do well by doing good. **To communicate properly much of the great work we have been doing to generate value for all, this past year we published our inaugural Environmental, Social, and Governance (ESG) report.**

We have made substantial progress as an organization to improve our ESG-related outcomes, disclosures, and strategies. We have highly engaged leadership in our Board of Directors, with 11 directors experienced in ESG matters. Additionally, **we created a management-level ESG Committee, which reports directly to the Nominating and Governance Committee of the Board, dedicated to focusing on Fifth Third's ESG practices and reporting across a wide array of topics.**

The details of the tremendous work we have done to improve our ESG outcomes can be found in our ESG report or on our dedicated ESG webpage, but here are some of our **key highlights at the Bank:**

- Became the first U.S. commercial bank to join the SASB Alliance in the GRI community.
- Aligned our ESG report to internationally recognized frameworks (SASB, GRI, TCFD, UN SDGs).
- Completed external stakeholder materiality assessment to prioritize ESG topics.
- **Reported 33% of the Fifth Third Bancorp's Directors are women** and earned recognition as a Winning "W" company for 2020 Women on Boards.
- Established an ESG Committee accountable to the Nominating and Corporate Governance Committee of the Board of Directors.
- **Exceeded our five-year $32 billion Community Commitment.**
- **Announced our $8 billion 2025 sustainable finance goal.**
- **Published Environmental & Social Policy.**
- Maintained an "A-" Leadership Band score in 2020 from CDP (as well as other ESG awards and accolades listed in the ESG Report).
- Published other important ESG materials, including a Human Rights Statement, Supplier Code of Conduct, and Commitment to Data Security and Privacy.
- Established an Executive Diversity Leadership Council and an Inclusion Toolkit.
- **Announced a $2.8 billion investment to accelerate racial equity, equality, and inclusion.**
- **Recognized by the Ethisphere Institute® as one of the World's Most Ethical Companies.**

- **Received a 100% on the Human Rights Campaign Foundation's Corporate Equality Index** for the sixth consecutive year.
- **Launched the first-ever digital version of the Fifth Third Young Bankers Club®,** our signature program developed in 2004 with nearly 30,000 students educated.
- **We are the first U.S. regional bank to be carbon neutral in our operations.**

> *"There's ESG in the banking sector, and then there's Fifth Third Bank. And that is why we are happy to call Fifth Third CleanTechnica's bank."*
>
> *—CleanTechnica, a leading source for cleantech news and analysis (Jan. 20, 2021)*

All members of the Fifth Third team—from every Board member to each and every employee—have a responsibility to contribute to generating sustainable value for our stake-holders. This includes understanding Fifth Third's ESG goals, as well as incorporating the consideration of ESG principles into Fifth Third's operations and businesses. **We will continue building on our momentum to provide enhanced ESG outcomes and disclosures going forward.**

IN CLOSING

We take our commitments to our customers, employees, communities, and shareholders very seriously, and we intend to continue delivering on those in the years ahead. None of that would be possible without the hard work and tremendous efforts by all of our employees across the Bank, and for that I am grateful and proud.

Our financial results continue to reflect our focused execution, discipline, and through-the-cycle principles. We remain committed to generating sustainable long-term value for our shareholders and anticipate that we will continue improving our relative performance as a top-performing regional bank.

> *Together, we are working to be the One Bank people most value and trust. Thank you for your continued support.*

GREG D. CARMICHAEL
Chairman and Chief Executive Officer, Fifth Third Bancorp

BRANCH BANKING

As our customers' banking journey evolves, so do our branches.

PERSONALIZED CUSTOMER EXPERIENCE

From handling complex service needs to providing advice on important financial decisions, **our financial centers enable customers to experience our company on a more personal level.** They remain critical to the future of the Bank.

At Fifth Third, we offer a complete suite of retail banking products and services through our localized, high-touch service model concentrated primarily in the Midwest and Southeast. While a brick-and-mortar presence remains important, **we also provide customers with superior, integrated experiences across branch and digital banking channels**—and we continue to expand our digital capabilities to adapt to evolving customer preferences.

A BLUEPRINT FOR MEETING CHANGING NEEDS

In 2018, we announced an initiative to optimize our retail network that is **repositioning our branch network to invest more in higher-growth markets,** even as we maintain a top market share in the Midwest. We also are redesigning our branches and digitizing our branch operations in an effort to meet ever-evolving customer preferences.

The financial centers themselves are evolving, too. **Our redesigned branches will improve the customer experience by providing a more open atmosphere with increased digital capabilities.** They will encompass approximately 40% less square footage, but these new branches will meet our customers' needs in fresh and exciting ways.

Our efforts to more effectively integrate digital technology in this rapidly changing environment will continue to create significant shareholder value. **The Fifth Third Mobile Banking app continues to average 4+ ratings in both the Apple App Store and Google Play Store.** We continue to enhance the customer experience by making everyday banking possible anywhere at any time.

With tech-enabled self-service capabilities that are human centered, customers can manage accounts, transfer funds, or pay bills online with ease. The seamless physical-digital integration provides innovative products and services that digitally equip our bankers to better serve and empower customers to attain their financial goals.

KEY BRANCH BANKING INITIATIVES

- Retail network optimization
- Branch redesign
- Digitizing branch operations

CONSUMER LENDING

Creating new possibilities and lasting relationships.

HELPING CUSTOMERS WITH MAJOR PURCHASES

In Consumer Lending, we are here to help customers with their major purchases—whether buying a first home or purchasing a new car.

Offering competitive rates and a variety of products, our Consumer Lending division helps customers reach their goals, whether they're short-term or long-term. That's just the beginning. Our goal is to create lasting value for our customers well beyond the life of an initial loan. We do this by striving to make the loan process as simple as possible, whether credit customers come to the Bank through auto, mortgage or other consumer lending areas.

AUTO & SPECIALTY LENDING

Fifth Third's auto business is an important component of lending to consumers. **Fifth Third is one of the largest bank originators of indirect auto loans in the country,** and we continue to value these relationships with an extensive dealer network across our more than 40-state indirect auto footprint. **Included is lending for RV, motorcycle, marine and power sport products.**

MORTGAGE LENDING

The mortgage business is one of the Bank's most cyclical. We managed well through the most recent cycle, in part due to **a business model that can be adjusted quickly in response to the changing environment.** Fifth Third is primarily an in-footprint retail lender, though we also have a broad-footprint direct channel and purchase loans through a correspondent channel.

ADDRESSING PRESENT AND FUTURE LENDING NEEDS

To drive profitable growth, meet our customers' changing needs and improve the customer experience, **we have focused on expanding our personal lending offerings.** We continue to explore ways to improve the financial well-being of our customers, while providing a holistic digital experience.

We believe lasting relationships start by working proactively with borrowers to explore options that make sense with their current financial situation. To that end, **we will always be committed to being better listeners and problem-solvers.**

COMMERCIAL BANKING

A strategic resource in our customers' financial success.

MAXIMIZING CLIENT VALUE

Fifth Third's Commercial Banking business is focused on building and deepening client relationships through a full-service platform that combines creative solutions with strategic insights in order to maximize client value.

The comprehensive offerings of the Commercial Bank span from traditional lending and treasury management to capital markets and advisory services, with a full suite of complementary products delivered through the One Bank service model. Our wide range of services and depth of experience enable the Commercial Bank to address clients' needs through **strategic capital and financing solutions,** as well as **advanced payments capabilities.**

Through focused segmentation and a broad range of solutions, the Commercial Bank targets clients in a wide range of industries, combining a national corporate banking and commercial real estate franchise, with a middle market banking group that primarily aligns with the Bank's **11-state footprint, as well as California and Texas.**

PLANNING FOR GREATER GROWTH AND MARKET SHARE

We continue to focus on strengthening our core middle market banking to expand market share and enhance profitability. In addition, we have been successful in using technology and analytical advancements, as well as leveraging the One Bank delivery model, to create strategic partnerships and generate higher returns.

EXPANDING OUR INDUSTRY EXPERTISE

Given the unique challenges our clients face in their respective industries, the **Commercial Bank has specialized verticals that provide industry-specific banking expertise and comprehensive financial solutions.** In addition to the renewable energy team expansion we initiated in 2019, we continue to provide our clients industry expertise in consumer & retail, healthcare, financial institutions, technology, media & telecommunications, entertainment, and lodging & leisure.

OFFERING ROBUST FINANCING SOLUTIONS AND STRATEGIC GUIDANCE

The Commercial Banking segment offers a wide range of solutions, including credit products, capital markets services and treasury management services.

- ***The credit products group*** *provides comprehensive specialized commercial financing solutions in asset based lending, equipment finance and traditional lending, which have been significantly enhanced with the addition of the strategic business from the MB Financial merger. We have materially strengthened our credit underwriting by adding experienced talent and by maintaining centralized credit and risk functions.*
- ***Capital markets*** *provide critical market analysis, strategic guidance and precise execution of capital solutions through M&A advisory services, debt capital markets and equity capital markets. Additionally, we offer a robust and state-of-the-art platform delivering financial risk management products.*
- ***Treasury management solutions*** *include integrated payables and receivables, risk management and liquidity solutions.*

At the Commercial Bank, we are committed to providing advisory-based services helping businesses adapt to a changing economy, drive innovation and growth, and assure access to the working capital they need to meet their goals.

*As of Dec. 31, 2020.

WEALTH & ASSET MANAGEMENT

Delivering expert guidance to clients and continued growth to shareholders.

By providing advice, guidance and platforms that are thoughtful and holistic—and by focusing on the unique needs of our clients—Wealth & Asset Management (W&AM) is poised to keep delivering strong results for shareholders.

2020 HIGHLIGHTS*

TOTAL REVENUE:
$665 MILLION

ASSETS UNDER MANAGEMENT:**
$54 BILLION

ASSETS UNDER CARE:**
$434 BILLION

TWO-PRONGED CLIENT APPROACH LEADS TO A YEAR OF INCREASED ASSETS

W&AM draws on the expertise of local advisors spanning the Bank's footprint with support from robust digital capabilities. This approach enables advisors to create a personalized wealth strategy for our clients and their families.

In 2020, total client assets under management grew to $54 billion. Additionally, the number of Private Bank households grew by 6 percent, with clients entrusting W&AM with more than an additional $2 billion in gross new assets under management, with more than $500 million of net new assets under management in the second half of the year.

DIGITAL TRANSFORMATION HELPS BOLSTER GROWTH

As our clients' needs and preferences evolve, investment in secure technology is also essential for continued growth.

Committed to the client experience, the business recently rolled out its digital and paperless client onboarding process. Today, the front, middle and back offices are all connected to eliminate what was once a manual process for client onboarding.

Further, as clients increasingly turned to Fifth Third amid the pandemic, advisors leveraged the Bank's Life360 platform to stay closely connected and help navigate the unprecedented levels of change and challenges in 2020.

ABOUT W&AM

Comprising two businesses, W&AM puts more than 100 years of experience to work for its individual and institutional clients:

Fifth Third Private Bank serves complex financial needs with teams of professionals dedicated to helping clients achieve their unique financial goals.

Fifth Third Institutional Services provides custody, investment and retirement plan services for corporations, financial institutions, foundations, endowments and not-for-profit organizations.

*As of Dec. 31, 2020. **Includes trust and brokerage assets.

No other information contained in this 2020 Annual Report to Shareholders shall be deemed to constitute any part of this Form 10-K nor shall any such information be incorporated into the Form 10-K and shall not be deemed "filed" as part of the registrant's Form 10-K.

10-K CROSS REFERENCE INDEX

FORWARD-LOOKING STATEMENTS

This report contains statements that we believe are "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Rule 175 promulgated thereunder, and Section 21E of the Securities Exchange Act of 1934, as amended, and Rule 3b-6 promulgated thereunder. These statements relate to our financial condition, results of operations, plans, objectives, future performance, capital actions or business. They usually can be identified by the use of forward-looking language such as "will likely result," "may," "are expected to," "is anticipated," "potential," "estimate," "forecast," "projected," "intends to," or may include other similar words or phrases such as "believes," "plans," "trend," "objective," "continue," "remain," or similar expressions, or future or conditional verbs such as "will," "would," "should," "could," "might," "can," or similar verbs. You should not place undue reliance on these statements, as they are subject to risks and uncertainties, including but not limited to the risk factors set forth in the Risk Factors section in Item 1A in this Annual Report on Form 10-K. When considering these forward-looking statements, you should keep in mind these risks and uncertainties, as well as any cautionary statements we may make. Moreover, you should treat these statements as speaking only as of the date they are made and based only on information then actually known to us. We undertake no obligation to release revisions to these forward-looking statements or reflect events or circumstances after the date of this document. There are a number of important factors that could cause future results to differ materially from historical performance and these forward-looking statements. Factors that might cause such a difference include, but are not limited to: (1) effects of the global COVID-19 pandemic; (2) deteriorating credit quality; (3) loan concentration by location or industry of borrowers or collateral; (4) problems encountered by other financial institutions; (5) inadequate sources of funding or liquidity; (6) unfavorable actions of rating agencies; (7) inability to maintain or grow deposits; (8) limitations on the ability to receive dividends from subsidiaries; (9) cyber-security risks; (10) Fifth Third's ability to secure confidential information and deliver products and services through the use of computer systems and telecommunications networks; (11) failures by third-party service providers; (12) inability to manage strategic initiatives and/or organizational changes; (13) inability to implement technology system enhancements; (14) failure of internal controls and other risk management systems; (15) losses related to fraud, theft, misappropriation or violence; (16) inability to attract and retain skilled personnel; (17) adverse impacts of government regulation; (18) governmental or regulatory changes or other actions; (19) failures to meet applicable capital requirements; (20) regulatory objections to Fifth Third's capital plan; (21) regulation of Fifth Third's derivatives activities; (22) deposit insurance premiums; (23) assessments for the orderly liquidation fund; (24) replacement of LIBOR; (25) weakness in the national or local economies; (26) global political and economic uncertainty or negative actions; (27) changes in interest rates; (28) changes and trends in capital markets; (29) fluctuation of Fifth Third's stock price; (30) volatility in mortgage banking revenue; (31) litigation, investigations, and enforcement proceedings by governmental authorities; (32) breaches of contractual covenants, representations and warranties; (33) competition and changes in the financial services industry; (34) changing retail distribution strategies, customer preferences and behavior; (35) difficulties in identifying, acquiring or integrating suitable strategic partnerships, investments or acquisitions; (36) potential dilution from future acquisitions; (37) loss of income and/or difficulties encountered in the sale and separation of businesses, investments or other assets; (38) results of investments or acquired entities; (39) changes in accounting standards or interpretation or declines in the value of Fifth Third's goodwill or other intangible assets; (40) inaccuracies or other failures from the use of models; (41) effects of critical accounting policies and judgments or the use of inaccurate estimates; (42) weather-related events, other natural disasters, or health emergencies (including pandemics); (43) the impact of reputational risk created by these or other developments on such matters as business generation and retention, funding and liquidity; and (44) changes in law or requirements imposed by Fifth Third's regulators impacting our capital actions, including dividend payments and stock repurchases.

PART I
ITEM 1. BUSINESS
General Information
Fifth Third Bancorp (the "Bancorp" or "Fifth Third"), an Ohio corporation organized in 1975, is a bank holding company ("BHC") as defined by the Bank Holding Company Act of 1956, as amended (the "BHCA"), and has elected to be treated as a financial holding company ("FHC") under the Gramm-Leach-Bliley Act of 1999 ("GLBA") and regulations of the Board of Governors of the Federal Reserve System (the "FRB").

The Bancorp is a diversified financial services company headquartered in Cincinnati, Ohio and is the indirect holding company of Fifth Third Bank, National Association (the "Bank"). As of December 31, 2020, Fifth Third had $205 billion in assets and operates 1,134 full-service Banking Centers and 2,397 Fifth Third branded ATMs in Ohio, Kentucky, Indiana, Michigan, Illinois, Florida, Tennessee, West Virginia, Georgia, North Carolina and South Carolina. The Bancorp operates four main businesses: Commercial Banking, Branch Banking, Consumer Lending and Wealth & Asset Management. Fifth Third is among the largest money managers in the Midwest and, as of December 31, 2020, had $434 billion in assets under care, of which it managed $54 billion for individuals, corporations and not-for-profit organizations. Investor information and press releases can be viewed at www.53.com. Information on or accessible through our website is not deemed to be incorporated into this Annual Report on Form 10-K. Website references in this Annual Report are merely textual references. Fifth Third's common stock is traded on the NASDAQ® Global Select Market under the symbol "FITB."

The Bancorp's subsidiaries provide a wide range of financial products and services to the commercial, financial, retail, governmental, educational, energy and healthcare sectors. This includes a variety of checking, savings and money market accounts, wealth management solutions, payments and commerce solutions, insurance services and credit products such as commercial loans and leases, mortgage loans, credit cards, installment loans and auto loans. These products and services are delivered through a variety of channels including the Company's Banking Centers, other offices, telephone sales, the internet and mobile applications. The Bank has deposit insurance provided by the Federal Deposit Insurance Corporation (the "FDIC") through the Deposit Insurance Fund (the "DIF"). Refer to Exhibit 21 filed as an attachment to this Annual Report on Form 10-K for a list of subsidiaries of the Bancorp as of February 15, 2021.

Additional information regarding the Bancorp's businesses is included in Management's Discussion and Analysis of Financial Condition and Results of Operations.

Availability of Financial Information
The Bancorp files reports with the SEC. Those reports include the annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and annual proxy statement, as well as any amendments to those reports. The SEC maintains an internet site that contains reports, proxy and information statements and other information regarding issuers that file electronically with the SEC at www.sec.gov. The Bancorp's annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, annual proxy statement and amendments to those reports filed or furnished pursuant to section 13(a) or 15(d) of the Exchange Act are accessible at no cost on the Bancorp's website at www.53.com on a same day basis after they are electronically filed with or furnished to the SEC.

Information about the Bancorp's Code of Business Conduct and Ethics (as amended from time to time), is available on Fifth Third's corporate website at www.53.com. In addition, any future waivers from a provision of the Fifth Third Code of Business Conduct and Ethics covering any of Fifth Third's directors or executive officers (including Fifth Third's principal executive officer, principal financial officer, and principal accounting officer or controller) will be posted at this internet address.

Competition
The Bancorp, primarily through the Bank, competes for deposits, loans and other banking services in its principal geographic markets as well as in selected national markets as opportunities arise. In addition to traditional financial institutions, the Bancorp competes with securities dealers, brokers, mortgage bankers, investment advisors, specialty finance, telecommunications, technology and insurance companies as well as large retailers. These companies compete across geographic boundaries and provide customers with meaningful alternatives to traditional banking services in nearly all significant products. The increasingly competitive environment is a result primarily of changes in regulation, changes in technology, product delivery systems and the accelerating pace of consolidation among financial service providers. These competitive trends are likely to continue.

Human Capital Resources
At December 31, 2020, the Bancorp had 19,872 full-time equivalent employees, compared to 19,869 at December 31, 2019. These employees support Fifth Third's Vision to be the One Bank people most value and trust by upholding the Company's four Core Values: Be Respectful & Inclusive, Take Accountability, Work as One Bank and Act with Integrity.

Inclusion and Diversity
Fifth Third strives to create an intentionally inclusive, diverse and thriving workplace where each person feels valued, respected and understood.

Our Human Capital programs are designed to attract, develop and retain a workforce that aims to reflect the communities we serve. As of December 31, 2020, the makeup of the Company's employees consisted of approximately 59% women and approximately 26% persons of color. Additionally, the Bancorp adopted in 2019 a footprint-wide ban on salary history (by not asking for or using an applicant's current salary as a factor in an employment offer) to immediately reduce historical gender or racial pay inequities.

To strengthen a sense of belonging for all employees, the Bancorp operates a number of inclusion councils at both enterprise and regional levels, as well as local Business Resource Groups (BRGs) in the following categories: African American, Asian & Pacific Islander, Individuals with Disabilities, Latino, LGBTQ+, Military, Women's and Young Professionals. Senior executives led eight virtual Enterprise BRGs in 2020 that enabled all employees to participate regardless of their work location—greatly expanding access for employees. In 2020, the Bancorp also launched a new Executive Diversity Leadership Council that is currently charged to develop and deliver strategic short- and long-term solutions to advance our diversity efforts relating to Black employees, communities and customers.

Employee Engagement
Fifth Third believes that an engaged workforce is one of its most valuable assets in sustaining its success. The Bancorp's Board of Directors and executive management oversee employee engagement on a regular basis by collecting employee feedback, primarily through employee viewpoints surveys. As further discussed later in this section, the Bancorp performed additional surveys in 2020 in response to the challenges of remote work and the COVID-19 pandemic.

Compensation and Benefits
The Bancorp is committed to providing competitive compensation and benefits programs that reward employees for delivering the right products to the right customers, in ways that consider shareholders' long-term interests, while also staying within the Bancorp's risk tolerance. These programs include an $18 per hour minimum wage, a 401(k) retirement program that pays a match up to 7% of an employee's compensation and other traditional benefits. The Bancorp also offers parental bonding leave, and several other health, wellness and financial benefits programs and services that assist employees in maintaining a healthy work-life balance.

Human Capital Response to COVID-19 Pandemic
The Bancorp took significant measures to provide employees with a sense of safety, security and certainty in response to the COVID-19 pandemic. Approximately 50% of employees were transitioned to remote work, supported through enhanced technology solutions, revised hiring and onboarding programs and increased communication. The Bancorp also rewarded specific employees who provided front-line, essential banking services during the pandemic with special one-time payments of up to $1,000.

To protect the health and safety of employees and customers and consistent with CDC, state and local guidance, Fifth Third established social distancing, hygiene and environmental safety protocols for on-site workers at the Bancorp's banking centers and offices. The Bancorp also provided free COVID-19 testing for employees enrolled in Fifth Third's medical coverage, provided backup child care solutions to address evolving needs and increased paid time away (including mid-year replenishment of sick days, providing additional vacation days to eligible employees to use in 2021 and reimbursing employees for unused vacation time in certain situations). The Bancorp also developed tracking and reporting solutions to monitor employee health and work situations related to the COVID-19 pandemic.

Fifth Third also conducted pulse surveys with employees in 2020 to collect feedback on employees' well-being and their perspective on the Bancorp's pandemic response.

Acquisitions and Investments
The Bancorp's strategy for growth includes strengthening its presence in core markets and broadening its product offerings while taking into account the integration and other risks of growth. The Bancorp evaluates strategic acquisition and investment opportunities and conducts due diligence activities in connection with possible transactions. As a result, discussions, and in some cases, negotiations regarding acquisitions and investments may take place and future transactions involving cash, debt or equity securities may occur. These typically involve the payment of a premium over book value and current market price, and therefore, some dilution of book value and net income per share may occur with any future transactions.

Regulation and Supervision
In addition to the generally applicable state and federal laws governing businesses and employers, the Bancorp and the Bank are subject to extensive regulation and supervision under federal and state laws and regulations applicable to financial institutions and their parent companies. Virtually all aspects of the business of the Bancorp and the Bank are subject to specific requirements or restrictions and general regulatory oversight. The principal objectives of state and federal banking laws and regulations and the supervision, regulation and examination of banks and their parent companies (such as the Bank and the Bancorp) by bank regulatory agencies are the maintenance of the safety and soundness of financial institutions, the maintenance of the federal deposit insurance system and the protection of consumers or classes of consumers, rather than the protection of shareholders or debtholders of a bank or the parent company of a bank. The Bancorp and its subsidiaries are subject to an extensive regulatory framework of complex and comprehensive federal and state laws and regulations addressing the provision of banking and other financial services and other aspects of the Bancorp's businesses and operations. The Dodd-Frank Wall Street Reform and Consumer Protection Act ("Dodd-Frank") and legislation modifying Dodd-Frank, the Economic Growth,

Regulatory Relief and Consumer Protection Act of 2018 ("EGRRCPA"), will continue to impact the Bancorp and the Bank. To the extent the following material describes statutory or regulatory provisions, it is qualified in its entirety by reference to the particular statute or regulation.

Both the scope of the laws and regulations and the intensity of the supervision to which the Bancorp and its subsidiaries are subject increased in response to the financial crisis, as well as other factors, such as technological and market changes. Regulatory enforcement and fines have also increased across the banking and financial services sector. Many of these changes have occurred as a result of Dodd-Frank and its implementing regulations, most of which are now in place. While the regulatory environment has recently been in a period of rebalancing the post financial crisis framework, the Bancorp expects that its business will remain subject to extensive regulation and supervision. It is possible that the intensity of regulation and supervision will be higher in the Biden Administration.

On May 24, 2018, the EGRRCPA was signed into law. Among other regulatory changes, the EGRRCPA amends various sections of Dodd-Frank, including section 165, which was revised to raise the asset thresholds for determining the application of enhanced prudential standards for BHCs. The EGRRCPA's increased asset thresholds took effect immediately for BHCs with total consolidated assets less than $100 billion, with the exception of risk committee requirements, which now apply to publicly-traded BHCs with $50 billion or more of consolidated assets. BHCs with consolidated assets between $100 billion and $250 billion, including the Bancorp, were subject to the enhanced prudential standards that applied to them before enactment of EGRRCPA until December 31, 2019, when rules adopted by the FRB that tailor the applicability of enhanced prudential standards and capital and liquidity requirements for BHCs with $100 billion or more in total consolidated assets became effective, as described in detail below.

On October 10, 2019, the FRB adopted a rule that adjusts the thresholds at which certain enhanced prudential standards ("EPS") apply to BHCs with $100 billion or more in total consolidated assets (the "EPS Tailoring Rule") and the FRB, the Office of the Comptroller of the Currency (the "OCC") and FDIC adopted a rule that similarly adjusts the thresholds at which certain other capital and liquidity standards apply to BHCs and banks with $100 billion or more in total consolidated assets (the "Capital and Liquidity Tailoring Rule" and, together with the EPS Tailoring Rule, the "Tailoring Rules"). The Tailoring Rules establish four risk-based categories of institutions, and the extent to which enhanced prudential standards and certain other capital and liquidity standards apply to these BHCs and banks depends on the banking organization's category. Under the Tailoring Rules, the Bancorp and the Bank each qualify as a Category IV banking organization subject to the least restrictive of the requirements applicable to firms with $100 billion or more in total consolidated assets.

Regulators

The Bancorp and/or the Bank are subject to regulation and supervision primarily by the FRB, the Consumer Financial Protection Bureau (the "CFPB") and the OCC and additionally by certain other functional regulators and self-regulatory organizations. The Bancorp is also subject to regulation by the SEC by virtue of its status as a public company and due to the nature of some of its businesses. The Bank is also subject to regulation by the FDIC, which insures the Bank's deposits as permitted by law.

The federal and state laws and regulations that are applicable to banks and to BHCs regulate, among other matters, the scope of the Bancorp's and the Bank's businesses, their activities, their investments, their capital and liquidity levels, their ability to make capital distributions (such as share repurchases and dividends), their reserves against deposits, the timing of the availability of deposited funds, the amount of loans to individual and related borrowers and the nature, the amount of and collateral for certain loans, and the amount of interest that may be charged on loans, as applicable. Various federal and state consumer laws and regulations also affect the services provided to consumers.

The Bancorp and the Bank are required to file various reports with and are subject to examination by various regulators, including the FRB and the OCC. The FRB, the OCC and the CFPB have the authority to issue orders for BHCs and banks to cease and desist from certain banking practices and violations of conditions imposed by, or violations of agreements with, the FRB, the OCC and the CFPB. Certain of the Bancorp's and the Bank's regulators are also empowered to assess civil money penalties against companies or individuals in certain situations, such as when there is a violation of a law or regulation. Applicable state and federal laws also grant certain regulators the authority to impose additional requirements and restrictions on the activities of the Bancorp and the Bank and, in some situations, the imposition of such additional requirements and restrictions will not be publicly available information.

The following discussion describes certain elements of the comprehensive regulatory framework applicable to the Bancorp and its subsidiaries. This discussion is not intended to describe all laws and regulations applicable to the Bancorp, the Bank, and the Bancorp's other subsidiaries.

Acquisitions

The BHCA requires the prior approval of the FRB for a BHC to acquire substantially all the assets of a bank or to acquire direct or indirect ownership or control of more than 5% of any class of the voting shares of any bank, BHC or savings association, or to increase any such non-majority ownership or control of any bank, BHC or savings association, or to merge or consolidate with any BHC.

The BHCA generally prohibits a BHC from acquiring a direct or indirect interest in or control of more than 5% of any class of the voting shares of a company that is not a bank or a BHC and from engaging directly or indirectly in activities other than those of banking, managing or controlling banks or furnishing services to its banking subsidiaries, except that it may engage in and may own shares of companies engaged in certain activities the FRB has determined to be so closely related to banking or managing or controlling banks as to be proper incident thereto.

Financial Holding Companies
The Bancorp is registered as a BHC with the FRB under the BHCA and qualifies for and has elected to become an FHC. An FHC is permitted to engage directly or indirectly in a broader range of activities than those permitted for a BHC under the BHCA. Permitted activities for an FHC include securities underwriting and dealing, insurance underwriting and brokerage, merchant banking and other activities that are declared by the FRB, in cooperation with the Treasury Department, to be "financial in nature or incidental thereto" or are declared by the FRB unilaterally to be "complementary" to financial activities. In addition, an FHC is allowed to conduct permissible new financial activities or acquire permissible non-bank financial companies with after-the-fact notice to the FRB. A BHC may elect to become an FHC if the BHC is well-capitalized and is well managed and each of its banking subsidiaries is well-capitalized, is well managed and has at least a "Satisfactory" rating under the Community Reinvestment Act ("CRA"). To maintain FHC status, a BHC must continue to meet these requirements. The failure to meet such requirements could result in material restrictions on the activities of the FHC and may also adversely affect the FHC's ability to enter into certain transactions (including mergers and acquisitions) or obtain necessary approvals in connection therewith, as well as loss of FHC status. If restrictions are imposed on the activities of an FHC, such information may not necessarily be available to the public.

Dividends
The Bancorp is a legal entity separate and distinct from its subsidiaries and depends in part upon dividends received from its direct and indirect subsidiaries, including the Bank, to fund its activities, including its ability to make capital distributions, such as paying dividends or repurchasing shares. Under federal law, there are various limitations on the extent to which the Bank can declare and pay dividends to the Bancorp, including those related to regulatory capital requirements, general regulatory oversight to prevent unsafe or unsound practices, and federal banking law requirements concerning the payment of dividends out of net profits, surplus, and available earnings. Certain contractual restrictions also may limit the ability of the Bank to pay dividends to the Bancorp. No assurances can be given that the Bank will, in any circumstances, pay dividends to the Bancorp.

The Bancorp's ability to declare and pay dividends is similarly limited by federal banking law and FRB regulations and policy. The FRB has authority to prohibit BHCs from making capital distributions if they would be deemed to be an unsafe or unsound practice. The FRB has indicated generally that it may be an unsafe or unsound practice for BHCs to pay dividends unless a BHC's net income is sufficient to fund the dividends and the expected rate of earnings retention is consistent with the organization's capital needs, asset quality and overall financial condition. In addition, the Bancorp's ability to make capital distributions, including paying dividends and repurchasing shares, is subject to the Bancorp complying with the automatic restrictions on capital distributions under the FRBs capital rules ("CCAR") process discussed below (see Regulatory Capital Requirements below).

In response to the uncertainty caused by the COVID-19 pandemic, certain large BHCs, including the Bancorp, were not permitted to make share repurchases, subject to certain limited exceptions, during the third and fourth quarters of 2020, but were permitted to make dividend payments subject to limits based on the amount of dividends paid in the second quarter and the firm's average net income for the four preceding quarters. For the first quarter of 2021, provided that a BHC does not increase its common stock dividends higher than the level paid in the second quarter of 2020, BHCs, including the Bancorp, are permitted to pay common dividends and make share repurchases that, in the aggregate, do not exceed an amount equal to the average of the firm's net income for the four preceding calendar quarters. BHCs may also make additional share repurchases up to the amount of share issuances related to expensed employee compensation. For further information on a subsequent event related to an accelerated share repurchase transaction, refer to Note 33 of the Notes to Consolidated Financial Statements.

Source of Strength
A BHC, including the Bancorp, is expected to act as a source of financial and managerial strength to each of its banking subsidiaries and to commit resources to their support. This support may be required at times when the BHC may not have the resources to provide it or when doing so is not otherwise in the interests of the Bancorp or its shareholders or creditors. The FRB may require a BHC to make capital injections into a troubled subsidiary bank and may charge the BHC with engaging in unsafe and unsound practices if the BHC fails to commit resources to such a subsidiary bank or if it undertakes actions that the FRB believes might jeopardize the BHC's ability to commit resources to such subsidiary bank.

Under these requirements, the Bancorp may in the future be required to provide financial assistance to the Bank should it experience financial distress. Capital loans by the Bancorp to the Bank would be subordinate in right of payment to deposits and certain other debts of the Bank. In the event of the Bancorp's bankruptcy, any commitment by the Bancorp to a federal bank regulatory agency to maintain the capital of the Bank would be assumed by the bankruptcy trustee and entitled to a priority of payment.

FDIC Assessments
The DIF provides insurance coverage for certain deposits, up to a standard maximum deposit insurance amount of $250,000 per depositor per account ownership category and is funded through assessments on insured depository institutions, based on the risk each institution poses to

the DIF. The Bank accepts customer deposits that are insured by the DIF and, therefore, must pay insurance premiums. The FDIC may increase the Bank's insurance premiums based on various factors, including the FDIC's assessment of its risk profile.

The FDIC has required that large insured depository institutions, including the Bank, enhance their deposit account record keeping and related information technology system capabilities to facilitate prompt payment of insured deposits if such an institution were to fail. The FDIC has established an initial compliance date of April 1, 2020 while granting institutions an optional extension of the compliance date for up to one year, to a date no later than April 1, 2021.

As of June 30, 2020, the DIF reserve ratio fell to 1.30%. The FDIC, as required under the Federal Deposit Insurance Act, established a plan on September 15, 2020 to restore the DIF reserve ratio to meet or exceed 1.35% within eight years. The FDIC's restoration plan projects the reserve ratio to exceed 1.35% without increasing the deposit insurance assessment rate, subject to ongoing monitoring over the next eight years. The FDIC could increase the deposit insurance assessments for certain insured depository institutions, including the Bank, if the DIF reserve ratio is not restored as projected.

Transactions with Affiliates

Federal banking laws restrict transactions between a bank and its affiliates, including a parent BHC. The Bank is subject to these restrictions, which include quantitative and qualitative limits on the amounts and types of transactions that may take place, including extensions of credit to affiliates, investments in the stock or securities of affiliates, purchases of assets from affiliates and certain other transactions with affiliates. These restrictions also require that credit transactions with affiliates be collateralized and that transactions with affiliates be on market terms or better for the bank. Generally, a bank's covered transactions with any affiliate are limited to 10% of the bank's capital stock and surplus and covered transactions with all affiliates are limited to 20% of the bank's capital stock and surplus. Dodd-Frank expanded the scope of these regulations, including by applying them to the credit exposure arising under derivative transactions, repurchase and reverse repurchase agreements, and securities borrowing and lending transactions. Federal banking laws also place similar restrictions on loans and other extensions of credit by FDIC-insured banks, such as the Bank, and their subsidiaries to their directors, executive officers, and principal shareholders.

Community Reinvestment Act

The CRA generally requires insured depository institutions, including the Bank, to identify the communities they serve and to make loans and investments and provide services that meet the credit needs of those communities. The CRA requires the OCC to evaluate the performance of national banks (including the Bank) with respect to these CRA obligations. Depository institutions must maintain comprehensive records of their CRA activities for purposes of these examinations. The OCC must take into account the institution's record of performance in meeting the credit needs of the entire community served, including low-and moderate-income neighborhoods. For purposes of CRA examinations, the OCC rates each institution's compliance with the CRA as "Outstanding," "Satisfactory," "Needs to Improve" or "Substantial Noncompliance." The FRB, which was responsible for CRA evaluations of the Bank prior to its conversion to a national bank charter, conducted a regularly scheduled examination covering 2014 through 2016 to determine the Bank's compliance with the CRA. This CRA examination resulted in a change in rating from "Needs to Improve" to "Outstanding."

The CRA requires the relevant federal bank regulatory agency to consider a bank's CRA assessment when considering the bank's application to conduct certain mergers or acquisitions or to open or relocate a branch office. The FRB also must consider the CRA record of each subsidiary bank of a BHC in connection with any acquisition or merger application filed by the BHC. An unsatisfactory CRA record could substantially delay or result in the denial of an approval or application by the Bancorp or the Bank.

In May 2020, the OCC finalized amendments to its CRA rules, which apply to national banks, including the Bank. The OCC's final rule clarifies and expands the types of activities that qualify for positive CRA consideration, updates how banks determine assessment areas in which they are evaluated, establishes objective performance standards to evaluate CRA performance and imposes more comprehensive CRA-related data collection and reporting requirements. The Bank must comply with most of these amended requirements by January 1, 2023.

The other federal banking agencies, the FDIC and FRB, are also in the process of proposing amendments to their respective CRA rules. While FDIC and FRB CRA rules do not apply to the Bank, future rulemaking to harmonize the CRA rules of the three federal banking agencies could result in changes to CRA requirements applicable to national banks, including the Bank.

Regulatory Capital Requirements

The Bancorp and the Bank are subject to certain risk-based capital and leverage ratio requirements under the capital adequacy rules (the "Final Capital Rules") adopted by the FRB, for the Bancorp, and by the OCC, for the Bank. These quantitative calculations are minimums, and the FRB and OCC may determine that a banking organization, based on its size, complexity, or risk profile, must maintain a higher level of capital in order to operate in a safe and sound manner. Failure to be well-capitalized or to meet minimum capital requirements could result in certain mandatory and possible additional discretionary actions by regulators that, if undertaken, could have an adverse material effect on the Bancorp's operations or financial condition. Failure to be well-capitalized or to meet minimum capital requirements could also result in restrictions on the Bancorp's or the Bank's ability to pay dividends or otherwise distribute capital or to receive regulatory approval of applications. Under the Final Capital Rules, the Bancorp's and the Bank's assets, exposures, and certain off-balance sheet items are subject to risk weights used to determine the institutions' risk-weighted assets pursuant to the federal banking agencies' Standardized Approach to risk-weighting of assets. These risk-weighted assets are used to calculate the following minimum capital ratios for the Bancorp and the Bank:

- Common Equity Tier 1 ("CET1") Risk-Based Capital Ratio, equal to the ratio of CET1 capital to risk-weighted assets. CET1 capital primarily includes common shareholders' equity subject to certain regulatory adjustments and deductions, including with respect to goodwill, intangible assets, certain deferred tax assets, and accumulated other comprehensive income ("AOCI"). In the first quarter of 2015, under the Final Capital Rules, the Bancorp made a one-time election to exclude certain AOCI components, with the result that those components are not recognized in the Bancorp's CET1. In July 2019, the FDIC, the FRB and the OCC issued final rules for institutions that do not apply advanced approaches to regulatory capital, including the Bancorp and the Bank. These rules simplified the capital treatment of certain items (including mortgage servicing assets, deferred tax assets and investments in the capital of unconsolidated financial institutions) and simplified the recognition and calculation of minority interests that are includable in regulatory capital. The advanced approaches to regulatory capital are generally required for large, internationally active banking organizations including those designated as global systemically important bank holding companies and those with total assets or cross-jurisdictional activity in excess of certain thresholds. Banking organizations were required to adopt these changes by April 1, 2020.
- Tier 1 Risk-Based Capital Ratio, equal to the ratio of Tier 1 capital to risk-weighted assets. Tier 1 capital is primarily comprised of CET1 capital, perpetual preferred stock and certain qualifying capital instruments.
- Total Risk-Based Capital Ratio, equal to the ratio of total capital, including CET1 capital, Tier 1 capital, and Tier 2 capital, to risk-weighted assets. Tier 2 capital primarily includes qualifying subordinated debt and qualifying allowance for loan and lease losses ("ALLL"). Tier 2 capital also includes, among other things, certain trust preferred securities.
- Tier 1 Leverage Ratio, equal to the ratio of Tier 1 capital to quarterly average assets (net of goodwill, certain other intangible assets, and certain other deductions).

In August 2020, the U.S. federal banking agencies adopted a final rule altering the definition of eligible retained income in their respective capital rules. Under the new rule, eligible retained income is the greater of a firm's (i) net income for the four preceding calendar quarters, net of any distributions and associated tax effects not already reflected in net income, and (ii) average net income over the preceding four quarters. An institution's eligible retained income, when considered in conjunction with capital ratios and the stress capital buffer, provides limitations on capital distributions (including dividends and share repurchases) and certain executive compensation arrangements for the quarter following the calculation. As of December 31, 2020, the Bancorp was permitted to use 100% of its eligible retained income for these purposes in the first quarter of 2021. This definition applies with respect to all of the Bancorp's capital requirements. In addition, in December 2018, the U.S. federal banking agencies finalized rules that would permit BHCs and banks to phase-in, for regulatory capital purposes, the day-one impact of ASU 2016-13 ("CECL") on retained earnings over a period of three years. As part of their response to the COVID-19 pandemic, the U.S. federal banking agencies issued another final rule for additional transitional relief to regulatory capital related to the impact of the adoption of CECL. The final rule provides banking organizations that adopt CECL in the 2020 calendar year with the option to delay for two years the estimated impact of CECL on regulatory capital, followed by the aforementioned three-year transition period to phase out the aggregate amount of benefit during the initial two-year delay for a total five-year transition. The estimated impact of CECL on regulatory capital (modified CECL transitional amount) is calculated as the sum of the day-one impact on retained earnings upon adoption of CECL (CECL transitional amount) and the calculated change in the ACL relative to the day-one ACL upon adoption of CECL multiplied by a scaling factor of 25%. The scaling factor is used to approximate the difference in the ACL under CECL relative to the incurred loss methodology. The modified CECL transitional amount will be calculated each quarter for the first two years of the five-year transition. The amount of the modified CECL transition amount will be fixed as of December 31, 2021 and that amount will be subject to the three-year phase out. For further discussion of CECL, see Note 1 of the Notes to Consolidated Financial Statements.

The Final Capital Rules also require banking organizations to maintain a capital conservation buffer of 2.5% or stress capital buffer, as applicable, to avoid becoming subject to restrictions on capital distributions and certain discretionary bonus payments to management (see Stress Buffer Requirements below). For more information related to the capital conservation buffer and stress capital buffer, refer to Note 30 of the Notes to Consolidated Financial Statements.

The total minimum regulatory capital ratios and well-capitalized minimum ratios are reflected in the table below. The FRB has not yet revised the well-capitalized standard for BHCs to reflect the higher capital requirements imposed under the Final Capital Rules. For purposes of the FRB's Regulation Y, including determining whether a BHC meets the requirements to be an FHC, BHCs, such as the Bancorp, must maintain a Tier 1 Risk-Based Capital Ratio of 6.0% or greater and a Total Risk-Based Capital Ratio of 10.0% or greater. If the FRB were to apply the same or a very similar well-capitalized standard to BHCs as that applicable to the Bank, the Bancorp's capital ratios as of December 31, 2020, would exceed such revised well-capitalized standard. The FRB may require BHCs, including the Bancorp, to maintain capital ratios substantially in excess of mandated minimum levels, depending upon general economic conditions and a BHC's particular condition, risk profile, and growth plans.

The following table presents the minimum regulatory capital ratios, minimum ratio plus capital conservation buffer, and well-capitalized minimums compared with the Bancorp's and the Bank's regulatory capital ratios as of December 31, 2020, calculated using the regulatory capital methodology applicable during 2020:

Regulatory Capital Ratios:

	Minimum Regulatory Capital Ratio	Minimum Ratio + Applicable Buffer[(a)]	Well-Capitalized Minimums[(b)]	Actual at December 31, 2020
CET1 risk-based capital ratio:				
Fifth Third Bancorp	4.50 %	7.00	N/A	10.34
Fifth Third Bank, National Association	4.50	7.00	6.50	12.28
Tier I risk-based capital ratio:				
Fifth Third Bancorp	6.00	8.50	6.00	11.83
Fifth Third Bank, National Association	6.00	8.50	8.00	12.28
Total risk-based capital ratio:				
Fifth Third Bancorp	8.00	10.50	10.00	15.08
Fifth Third Bank, National Association	8.00	10.50	10.00	14.17
Tier I leverage ratio:				
Fifth Third Bancorp	4.00	N/A	N/A	8.49
Fifth Third Bank, National Association	4.00	N/A	5.00	8.85

(a) *Reflects the capital conservation buffer of 2.5% applicable to the Bank during 2020 and to the Bancorp until September 30, 2020. As of October 1, 2020, the capital conservation buffer was replaced with a stress capital buffer of 2.5% for the Bancorp.*
(b) *Reflects the well-capitalized standard applicable to the Bancorp under FRB Regulation Y and the well-capitalized standard applicable to the Bank.*

Liquidity Regulation
As a result of the Tailoring Rules, the Bancorp, as a Category IV banking organization, is now exempt from the liquidity coverage ratio requirement, but remains subject to internal liquidity stress tests and standards.

Capital Planning and Stress Testing
BHCs with $100 billion or more in consolidated assets, including the Bancorp, generally must submit capital plans to the FRB on an annual basis. In March 2020, the FRB adopted a final rule to integrate the annual capital planning and stress testing requirements with certain ongoing regulatory capital requirements for large BHCs. As a result, the FRB's annual CCAR process is now used to calibrate the Bancorp's stress capital buffer requirement. Among other changes, the revised capital plan rule also eliminates the assumption that the Bancorp's balance sheet assets would increase over the planning horizon. In addition, provided that the Bancorp is otherwise in compliance with automatic restrictions on distributions under the Final Capital Rules, the Bancorp will no longer be required to seek prior approval to make capital distributions in excess of those included in its capital plan. The Bancorp is required to provide the FRB notice within 15 days after making any capital distributions in excess of those included in its capital plan.

Under its CCAR process, the FRB annually evaluates capital adequacy, internal capital adequacy, assessment processes and capital distribution plans of BHCs with $100 billion or more in total consolidated assets. The CCAR process is intended to help ensure that those BHCs have robust, forward-looking capital planning processes that account for each company's unique risks and that permit continued operations during times of economic and financial stress. The mandatory elements of the capital plan are an assessment of the expected uses and sources of capital over a nine-quarter planning horizon, a description of all planned capital actions over the planning horizon, a discussion of any expected changes to the BHC's business plan that are likely to have a material impact on its capital adequacy or liquidity, a detailed description of the BHC's process for assessing capital adequacy and the BHC's capital policy.

As a result of the EPS Tailoring Rule, the Bancorp is subject to a quantitative assessment of capital through supervisory stress tests every two years, with the next required submission due in 2022. These supervisory stress tests are forward-looking quantitative evaluations of the impact of stressful economic and financial market conditions on the Bancorp's capital. Additionally, under the EPS Tailoring Rule, the Bancorp is no longer required to file semi-annual, company-run stress tests with the FRB and publicly disclose the results.

Stress Buffer Requirements
In March 2020, the FRB issued a final rule amending regulatory capital rules, capital plan rules and stress test rules. Under the final rule, the capital conservation buffer is replaced with a stress capital buffer requirement. During each supervisory stress testing cycle, the FRB will use the Bancorp's supervisory stress test to determine its stress capital buffer, subject to a floor of 2.5%. Similar to the capital conservation buffer, the Bancorp must maintain capital ratios above the sum of its minimum risk-based capital ratios and the stress capital buffer to avoid restrictions on capital distributions and discretionary bonus payments to executive officers. The final rule is applicable to BHCs with $100 billion or more in total consolidated assets and was effective on October 1, 2020. The FRB provided the Bancorp with a stress capital buffer of 2.5% that was effective as of October 1, 2020. The FRB required large banking organizations, including the Bancorp, to resubmit their capital plans to reflect the stresses caused by the COVID-19 pandemic, and the FRB will notify the Bancorp by March 31, 2021 if it will elect to recalculate the Bancorp's stress capital buffer requirement.

Enhanced Prudential Standards
Pursuant to Title I of Dodd-Frank, certain U.S. BHCs are subject to enhanced prudential standards and early remediation requirements. As a result, the Bancorp is subject to more stringent standards, including liquidity and capital requirements, leverage limits, stress testing,

resolution planning, and risk management standards, than those applicable to smaller institutions. Certain larger banking organizations are subject to additional enhanced prudential standards.

As discussed above, under the EPS Tailoring Rule, the Bancorp, as a Category IV banking organization, is subject to the least restrictive enhanced prudential standards applicable to firms with $100 billion or more in total consolidated assets. As compared to enhanced prudential standards that were applicable to the Bancorp, under the EPS Tailoring Rule, the Bancorp is no longer subject to company-run stress testing requirements and is subject to less frequent supervisory stress tests, less frequent internal liquidity stress tests, and reduced liquidity risk management requirements.

Heightened Governance and Risk Management Standards
The OCC has published guidelines documenting expectations for the governance and risk management practices of certain large financial institutions, including the Bank. The guidelines require covered institutions to establish and adhere to a written governance framework in order to manage and control their risk-taking activities. In addition, the guidelines provide standards for the institutions' boards of directors to oversee the risk governance framework. The Bank currently has a written governance framework and associated controls.

Privacy and Data Security
The OCC, FRB, FDIC and other bank regulatory agencies have adopted guidelines (the "Guidelines") for safeguarding confidential, personal customer information. The Guidelines require each financial institution, under the supervision and ongoing oversight of its board of directors or an appropriate committee thereof, to create, implement and maintain a comprehensive written information security program designed to ensure the security and confidentiality of customer information, protect against any anticipated threats or hazards to the security or integrity of such information and protect against unauthorized access to or use of such information that could result in substantial harm or inconvenience to any customer. In addition, various U.S. regulators, including the OCC, FRB and the SEC, have increased their focus on cyber security through guidance, examinations and regulations. The Bancorp has adopted a customer information security program that has been approved by the Bancorp's Board of Directors.

The GLBA requires financial institutions to implement policies and procedures regarding the disclosure of nonpublic personal information about consumers to non-affiliated third parties. In general, the statute requires explanations to consumers on policies and procedures regarding the disclosure of such nonpublic personal information and, except as otherwise required by law, prohibits disclosing such information except as provided in the banking subsidiary's policies and procedures. The Bancorp's banking subsidiary has implemented a privacy policy.

States are also increasingly proposing or enacting legislation that relates to data privacy and data protection such as the California Consumer Privacy Act which went into effect on January 1, 2020. The Bancorp continues to assess the requirements of such laws and proposed legislation and their applicability to the Bancorp. Moreover, these laws, and proposed legislation, are still subject to revision or formal guidance and they may be interpreted or applied in a manner inconsistent with our understanding.

Like other lenders, the Bank and other of the Bancorp's subsidiaries use credit bureau data in their underwriting activities. Use of such data is regulated under the Fair Credit Reporting Act ("FCRA"), and the FCRA also regulates reporting information to credit bureaus, prescreening individuals for credit offers, sharing of information between affiliates, and using affiliate data for marketing purposes. Similar state laws may impose additional requirements on the Bancorp and its subsidiaries.

Anti-Money Laundering and Economic Sanctions
The Bancorp is subject to federal laws that are designed to counter money laundering and terrorist financing, and transactions with persons, companies or foreign governments sanctioned by the United States. These include the Bank Secrecy Act, the Money Laundering Control Act, the USA PATRIOT Act and regulations for the International Emergency Economic Powers Act and the Trading with the Enemy Act, as administered by the United States Treasury Department's Office of Foreign Assets Control. These laws obligate depository institutions and broker-dealers to verify their customers' identity, conduct customer due diligence, report on suspicious activity, file reports of transactions in currency and conduct enhanced due diligence on certain accounts. They also prohibit U.S. persons from engaging in transactions with certain designated restricted countries and persons. Depository institutions and broker-dealers are required by their federal regulators to maintain robust policies and procedures in order to ensure compliance with these obligations.

Failure to comply with these laws or maintain an adequate compliance program can lead to significant monetary penalties and reputational damage and federal regulators evaluate the effectiveness of an applicant in combating money laundering when determining whether to approve a proposed bank merger, acquisition, restructuring, or other expansionary activity. There have been a number of significant enforcement actions by regulators, as well as state attorneys general and the Department of Justice, against banks, broker-dealers and non-bank financial institutions with respect to these laws and some have resulted in substantial penalties, including criminal pleas. The Bancorp's Board has approved policies and procedures that the Bancorp believes comply with these laws.

Executive Compensation
Pursuant to Dodd-Frank, each public company must give its shareholders the opportunity to vote on the compensation of its executives at least once every three years. The SEC also adopted rules on disclosure and voting requirements for golden parachute compensation that is payable to named executive officers in connection with sale transactions.

The SEC's rules also direct the stock exchanges to prohibit listing classes of equity securities of a company if a company's compensation committee members are not independent. The rules also provide that a company's compensation committee may only select a compensation consultant, legal counsel or other advisor after taking into consideration factors to be identified by the SEC that affect the independence of a compensation consultant, legal counsel or other advisor.

The rules implementing the pay ratio provisions of Dodd-Frank require companies to disclose the ratio of the compensation of its chief executive officer to the median compensation of its employees. For a registrant with a fiscal year ending on December 31, such as the Bancorp, the pay ratio was first required as part of its executive compensation disclosure in its annual proxy statement or Form 10-K filed starting in 2018.

Dodd-Frank provides that the SEC must issue rules directing the stock exchanges to prohibit listing any security of a company unless the company develops and implements a policy providing for disclosure of the policy of the company on incentive-based compensation that is based on financial information required to be reported under the securities laws. In the event the company is required to prepare an accounting restatement due to the material noncompliance of the company with any financial reporting requirement under the securities laws, the company will recover from any current or former executive officer of the company who received incentive-based compensation during the three-year period preceding the date on which the company is required to prepare the restatement based on the erroneous data, any exceptional compensation above what would have been paid under the restatement.

Dodd-Frank required the SEC to adopt a rule to require that each company disclose in the proxy materials for its annual meetings whether an employee or board member is permitted to purchase financial instruments designed to hedge or offset decreases in the market value of equity securities granted as compensation or otherwise held by the employee or board member. The SEC adopted final rules requiring this disclosure on December 18, 2018. The Bancorp was required to comply with this new rule beginning July 1, 2019.

The Bancorp's compensation practices are also subject to oversight by the FRB. The scope and content of compensation regulation in the financial industry are continuing to develop, and the regulations and resulting market practices are expected to continue to evolve over a number of years. In June 2016, the SEC and the federal banking agencies issued a proposed rule to implement the incentive-based compensation provisions of section 956 of Dodd-Frank. The proposal would establish new requirements for incentive-based compensation at institutions with assets of at least $1 billion. No final rule has been issued, but the Biden Administration may revisit this proposal.

Debit Card Interchange Fees
Dodd-Frank includes a set of rules requiring that interchange transaction fees for electronic debit transactions be reasonable and proportional to certain costs associated with processing the transactions. Interchange fees for electronic debit transactions are limited to 21 cents plus 0.05% of the transaction, plus an additional one cent per transaction fraud adjustment. These fees impose requirements regarding routing and exclusivity of electronic debit transactions, and generally require that debit cards be usable in at least two unaffiliated networks.

Resolution Planning
In past years, the Bancorp was required to submit annually to the FRB and the FDIC a resolution plan for the orderly resolution of the Bancorp and its significant legal entities under the U.S. Bankruptcy Code or other applicable insolvency laws in a rapid and orderly fashion in the event of future material financial distress or failure. In October 2019, the FRB and the FDIC adopted amendments to their resolution planning rule to adjust the thresholds at which certain resolution planning requirements apply to BHCs with $100 billion or more in total consolidated assets, including the Bancorp. As a result of these amendments, the Bancorp is no longer required to submit an annual resolution plan to the FRB and the FDIC.

In addition, the Bank is required to periodically file a separate resolution plan with the FDIC. EGRRCPA did not change the FDIC's rules that require the Bank to periodically file a separate resolution plan. In April 2019, the FDIC released an advanced notice of proposed rulemaking with respect to the FDIC's bank resolution plan requirements that requested comments on how to better tailor bank resolution plans to a firm's size, complexity, and risk profile. Until the FDIC's revisions to its bank resolution plan requirement are finalized, no bank resolution plans will be required to be filed.

Proprietary Trading and Investing in Certain Funds
Dodd-Frank sets forth restrictions on banking organizations' ability to engage in proprietary trading and to have certain ownership interests in and relationships with certain covered funds, such as private equity and hedge funds (the "Volcker Rule"). The Volcker Rule generally prohibits any banking entity from engaging in short-term proprietary trading for its own account, but permits transactions in certain securities (such as securities of the U.S. government), transactions on behalf of customers and activities such as market making, underwriting and risk-mitigating hedging. In addition, the Volcker Rule limits the sponsorship of or investment in a covered fund by any banking entity. The Volcker Rule also prohibits certain types of transactions between a banking entity and any covered fund that is sponsored by the banking

entity or for which it serves as investment manager or investment advisor, similar to those transactions between banks and their affiliates that are limited as described above. The FRB granted extensions to banking entities, including the Bancorp, to conform to the requirements of the Volcker Rule with respect to “illiquid funds,” as defined in the Volcker Rule. The Bancorp is also required to maintain a satisfactory Volcker Rule compliance program.

As of October 2019, the FRB, OCC, FDIC, Commodity Futures Trading Commission (“CFTC”) and SEC finalized amendments to the Volcker Rule. These amendments tailor the Volcker Rule’s compliance requirements to the amount of a firm’s trading activity, revise the definition of trading account, clarify certain key provisions in the Volcker Rule, and modify the information companies are required to provide to federal agencies. These amendments to the Volcker Rule are not material to our investing and trading activities.

In June 2020, the five federal agencies finalized amendments to the Volcker Rule’s restrictions on ownership interests in and relationships with covered funds. Among other things, these amendments permit banking entities to have relationships with and offer additional financial services to additional types of funds and investment vehicles. These requirements are not expected to have a material impact on the Bancorp’s investing and trading activities

Derivatives
Title VII of Dodd-Frank imposes a regulatory structure on the over-the-counter derivatives market, including requirements for clearing, exchange trading, capital margin, segregation trade reporting, and recordkeeping. Title VII also requires certain persons to register as a swap dealer or a security-based swap dealer. The Bank is provisionally registered with the CFTC as a swap dealer. The CFTC and U.S. banking regulators have finalized most rules applicable to the over-the-counter derivatives markets and swap dealers, and the SEC has finalized most of its rules related to security-based swaps. The CFTC’s Title VII regulations are applicable to the Bank’s activity as a swap dealer and include rules related to internal and external business conduct standards, reporting and recordkeeping, mandatory clearing for certain swaps, and trade documentation and confirmation requirements. In addition, the U.S. banking regulators have finalized regulations applicable to the Bank regarding mandatory posting and collection of margin by certain swap counterparties and segregation of customer funds. The Bank is not currently subject to regulation as a security-based swap dealer.

Consumer Protection Regulation and Supervision
The Bancorp is subject to supervision and regulation by the CFPB with respect to federal consumer protection laws. The Bancorp is also subject to certain state consumer protection laws, and under Dodd-Frank, state attorneys general and other state officials are empowered to enforce certain federal consumer protection laws and regulations. State authorities have increased their focus on and enforcement of consumer protection rules. These federal and state consumer protection laws apply to a broad range of our activities and to various aspects of our business and include laws relating to interest rates, fair lending, disclosures of credit terms and estimated transaction costs to consumer borrowers, debt collection practices, the use of and the provision of information to consumer reporting agencies, and the prohibition of unfair, deceptive, or abusive acts or practices in connection with the offer, sale, or provision of consumer financial products and services.

The CFPB has promulgated many mortgage-related final rules since it was established under Dodd-Frank, including rules related to the ability to repay and qualified mortgage standards, mortgage servicing standards, loan originator compensation standards, high-cost mortgage requirements, Home Mortgage Disclosure Act requirements, and appraisal and escrow standards for higher priced mortgages. The mortgage-related final rules issued by the CFPB have materially restructured the origination, servicing, and securitization of residential mortgages in the United States. These rules have impacted, and will continue to impact, the business practices of mortgage lenders, including the Bancorp.

Future Legislative and Regulatory Initiatives
Federal and state legislators as well as regulatory agencies may introduce or enact new laws and rules, or amend existing laws and rules, that may affect the regulation of financial institutions and their holding companies. The impact of any future legislative or regulatory changes cannot be predicted. However, such changes could affect the Bancorp’s business, financial condition and results of operations.

ITEM 1A. RISK FACTORS

The risks and uncertainties listed below present risks that could have a material impact on the Bancorp's financial condition, the results of its operations or its business. Some of these risks and uncertainties are interrelated and the occurrence of one or more of them may exacerbate the effect of others. The risks and uncertainties described below are not the only ones Fifth Third faces. Additional risks and uncertainties not presently known to Fifth Third or that Fifth Third currently believes to be immaterial may also adversely affect its business. See "Cautionary Note Regarding Forward-Looking Statements" elsewhere in this Annual Report on Form 10-K for more information.

CREDIT RISKS

Deteriorating credit quality has adversely impacted Fifth Third in the past and may adversely impact Fifth Third in the future.

When Fifth Third lends money or commits to lend money, the Bancorp incurs credit risk or the risk of loss if borrowers do not repay their loans, leases, credit cards, derivative obligations, or other credit obligations. The performance of these credit portfolios significantly affects the Bancorp's financial results and condition. If the current economic environment were to deteriorate, more customers may have difficulty in repaying their credit obligations which could result in a higher level of credit losses and reserves for credit losses. Fifth Third reserves for credit losses by establishing reserves through a charge to earnings. The amount of these reserves is based on Fifth Third's assessment of credit losses inherent in the credit portfolios including unfunded credit commitments. The process for determining the amount of the ALLL and the reserve for unfunded commitments is critical to Fifth Third's financial results and condition. It requires difficult, subjective and complex judgments about the environment, including analysis of economic or market conditions that might impair the ability of borrowers to repay their loans.

Fifth Third might underestimate the credit losses inherent in its portfolios and have credit losses in excess of the amount reserved. Fifth Third might increase the reserve because of changing economic conditions, including falling home prices or higher unemployment, or other factors such as changes in borrower's behavior or changing protections in credit agreements. As an example, borrowers may "strategically default," or discontinue making payments on their real estate-secured loans if the value of the real estate is less than what they owe, even if they are still financially able to make the payments.

Fifth Third believes that both the ALLL and the reserve for unfunded commitments are adequate to cover inherent losses at December 31, 2020; however, there is no assurance that they will be sufficient to cover future credit losses, especially if housing and employment conditions decline. In the event of significant deterioration in economic conditions, Fifth Third may be required to increase reserves in future periods, which would reduce earnings.

For more information, refer to the Credit Risk Management subsection of the Risk Management section and the ALLL and Reserve for Unfunded Commitments subsections of the Critical Accounting Policies section of Management's Discussion and Analysis of Financial Condition and Results of Operations.

Fifth Third may have more credit risk and higher credit losses to the extent loans are concentrated by location or industry of the borrowers or collateral.

Fifth Third's credit risk and credit losses can increase if its loans are concentrated to borrowers engaged in the same or similar activities or to borrowers who as a group may be uniquely or disproportionately affected by economic or market conditions. Deterioration in economic conditions, housing conditions and commodity and real estate values in certain states or locations could result in materially higher credit losses if loans are concentrated in those locations. Fifth Third has significant exposures to businesses in certain economic sectors such as manufacturing, real estate, financial services, insurance and healthcare, and weaknesses in those businesses may adversely impact Fifth Third's business, results of operations or financial condition. Additionally, Fifth Third has a substantial portfolio of commercial and residential real estate loans and weaknesses in residential or commercial real estate markets may adversely impact Fifth Third's business, results of operations or financial condition.

The COVID-19 pandemic has caused certain industries to have experienced increased stress. These include consumer-driven industries that require gathering or congregation such as leisure and recreation (including casinos, restaurants, sports, fitness, hotels and other industries), non-essential retail and leisure travel (primarily including airlines and cruise lines). Certain segments of the healthcare industry (including skilled nursing, physician offices and surgery/outpatient centers, among others) have also been impacted by the pandemic given delays and restrictions on in-person visits and elective procedures.

Problems encountered by financial institutions larger than or similar to Fifth Third could adversely affect financial markets generally and have direct and indirect adverse effects on Fifth Third.

Fifth Third has exposure to counterparties in the financial services industry and other industries, and routinely executes transactions with such counterparties, including brokers and dealers, commercial banks, investment banks, mutual and hedge funds and other institutional clients. Many of Fifth Third's transactions with other financial institutions expose Fifth Third to credit risk in the event of default of a counterparty or client. In addition, Fifth Third's credit risk may be affected when the collateral it holds cannot be realized or is liquidated at prices not sufficient to recover the full amount of the loan or derivative exposure. The commercial soundness of many financial institutions may be closely interrelated as a result of credit, trading, clearing or other relationships between the institutions. As a result, concerns about, or a default or threatened default by, one institution could lead to significant market-wide liquidity and credit problems, losses or defaults by other institutions. This is sometimes referred to as "systemic risk" and may adversely affect financial intermediaries, such as clearing agencies, clearing houses, banks, securities firms and exchanges, with which the Bancorp interacts on a daily basis, and therefore could adversely affect Fifth Third.

LIQUIDITY RISKS

Fifth Third must maintain adequate sources of funding and liquidity.

Fifth Third must maintain adequate funding sources in the normal course of business to support its operations and fund outstanding liabilities, as well as meet regulatory expectations. Fifth Third primarily relies on bank deposits to be a low cost and stable source of funding for the loans Fifth Third makes and the operations of Fifth Third's business. Core deposits, which include transaction deposits and other time deposits, have historically provided Fifth Third with a sizeable source of relatively stable and low-cost funds (average core deposits funded 74% of average total assets for the year ending December 31, 2020). In addition to customer deposits, sources of liquidity include investments in the securities portfolio, Fifth Third's sale or securitization of loans in secondary markets and the pledging of loans and investment securities to access secured borrowing facilities through the FHLB and the FRB, and Fifth Third's ability to raise funds in domestic and international money and capital markets.

Fifth Third's liquidity and ability to fund and run its business could be materially adversely affected by a variety of conditions and factors, including financial and credit market disruptions and volatility or a lack of market or customer confidence in financial markets in general similar to what occurred during the financial crisis in 2008 and early 2009, which may result in a loss of customer deposits or outflows of cash or collateral and/or ability to access capital markets on favorable terms.

Other conditions and factors that could materially adversely affect Fifth Third's liquidity and funding include:

- a lack of market or customer confidence in Fifth Third or negative news about Fifth Third or the financial services industry generally, which also may result in a loss of deposits and/or negatively affect the ability to access the capital markets;
- the loss of customer deposits due to competition from other banks or due to alternative investments;
- inability to sell or securitize loans or other assets;
- increased regulatory requirements; and
- reductions in one or more of Fifth Third's credit ratings.

A reduced credit rating could adversely affect Fifth Third's ability to borrow funds and raise the cost of borrowings substantially and could cause creditors and business counterparties to raise collateral requirements or take other actions that could adversely affect Fifth Third's ability to raise liquidity or capital. Many of the above conditions and factors may be caused by events over which Fifth Third has little or no control such as what occurred during the financial crisis. There can be no assurance that significant disruption and volatility in the financial markets will not occur again in the future.

Regulatory changes relating to liquidity and risk management may also negatively impact Fifth Third's results of operations and competitive position. Various regulations have been adopted to impose more stringent liquidity requirements for large financial institutions, including Fifth Third. These regulations address, among other matters, liquidity stress testing and minimum liquidity requirements. The application of certain of these regulations to banking organizations, such as Fifth Third, have been modified, including in connection with the implementation of the EGRRCPA.

If Fifth Third is unable to continue to fund assets through customer bank deposits or access capital markets on favorable terms or if Fifth Third suffers an increase in borrowing costs or otherwise fails to manage liquidity effectively, then Fifth Third's liquidity, operating margins and financial results and condition may be materially adversely affected. Fifth Third may also need to raise additional capital and liquidity through the issuance of stock, which could dilute the ownership of existing stockholders, or reduce or even eliminate common stock dividends or share repurchases to preserve capital and liquidity.

Fifth Third and/or the holders of its securities could be adversely affected by unfavorable ratings from rating agencies.

Fifth Third's ability to access the capital markets is important to its overall funding profile. This access is affected by the ratings assigned by rating agencies to Fifth Third, certain of its subsidiaries and particular classes of securities they issue. The interest rates that Fifth Third pays on its securities are also influenced by, among other things, the credit ratings that it, its subsidiaries and/or its securities receive from recognized rating agencies. A downgrade to Fifth Third or its subsidiaries' credit rating could affect its ability to access the capital markets, increase its borrowing costs and negatively impact its profitability. A ratings downgrade to Fifth Third, its subsidiaries or their securities could also create obligations or liabilities of Fifth Third under the terms of its outstanding securities that could increase Fifth Third's costs or otherwise have a negative effect on its results of operations or financial condition.

Additionally, a downgrade of the credit rating of any particular security issued by Fifth Third or its subsidiaries could negatively affect the ability of the holders of that security to sell the securities and the prices at which any such securities may be sold.

On April 28, 2020, Fitch Ratings Inc. ("Fitch") revised Fifth Third Bancorp's Rating Outlook on its Long- and Short-Term Issuer Default Ratings to "Negative" from "Stable" as part of an ongoing horizontal review of all U.S. banks the agency is conducting as a result of concerns about significant operating environment challenges due to the disruption to economic activity and financial markets from the COVID-19 pandemic. On May 20, 2020, DBRS, Inc. ("DBRS") also revised the trend for all long-term ratings at Fifth Third Bancorp and Fifth Third Bank, National Association to "Negative" from "Stable." As of the date of this filing, Fifth Third is under review by Fitch and DBRS, and neither Fitch, nor DBRS, has changed its ratings. Accordingly, Fifth Third's Fitch and DBRS ratings are subject to change at any time.

Other rating agencies may also take actions to downgrade their ratings of the securities issued by Fifth Third or its subsidiaries. There can be no assurances that Fifth Third or its subsidiaries will retain any specific rating from any specific rating agency.

If Fifth Third is unable to maintain or grow its deposits, it may be subject to paying higher funding costs.
The total amount that Fifth Third pays for funding costs is dependent, in part, on Fifth Third's ability to maintain or grow its deposits. If Fifth Third is unable to sufficiently maintain or grow its deposits to meet liquidity objectives, it may be subject to paying higher funding costs. Fifth Third competes with banks and other financial services companies for deposits. If competitors raise the rates they pay on deposits, Fifth Third's funding costs may increase, either because Fifth Third raises rates to avoid losing deposits or because Fifth Third loses deposits and must rely on more expensive sources of funding. Also, customers typically move money from bank deposits to alternative investments during rising interest rate environments. Customers may also move noninterest-bearing deposits to interest-bearing accounts increasing the cost of those deposits. Checking and savings account balances and other forms of customer deposits may decrease when customers perceive alternative investments, such as the stock market, as providing a better risk/return trade-off. Fifth Third's bank customers could take their money out of the Bank and put it in alternative investments, causing Fifth Third to lose a lower cost source of funding. Higher funding costs reduce Fifth Third's net interest margin and net interest income.

The Bancorp's ability to receive dividends from its subsidiaries accounts for most of its revenue and could affect its liquidity and ability to pay dividends.
Fifth Third Bancorp is a separate and distinct legal entity from its subsidiaries. Fifth Third Bancorp typically receives substantially all of its revenue from dividends from its subsidiaries. These dividends are the principal source of funds to pay dividends on Fifth Third Bancorp's stock and interest and principal on its debt. Various federal and/or state laws and regulations, as well as regulatory expectations, limit the amount of dividends that the Bancorp's banking subsidiary and certain nonbank subsidiaries may pay to the Bancorp. Regulatory scrutiny of liquidity and capital levels at bank holding companies and insured depository institutions has resulted in increased regulatory focus on all aspects of capital planning, including dividends and other distributions to shareholders of banks such as the parent bank holding companies. In addition, Fifth Third Bancorp's right to participate in a distribution of assets upon a subsidiary's liquidation or reorganization is subject to the prior claims of that subsidiary's creditors.

Regulatory limitations on the Bancorp's ability to receive dividends from its subsidiaries could have a material adverse effect on its liquidity and ability to pay dividends on stock or interest and principal on its debt and to engage in share repurchases. For further information, refer to Regulation and Supervision and Note 4 of the Notes to Consolidated Financial Statements.

OPERATIONAL RISKS

Fifth Third is exposed to cyber security risks, including denial of service, hacking and identity theft, which could result in the disclosure, theft or destruction of confidential information.
Fifth Third relies heavily on communications and information systems to conduct its business. This includes the use of networks, the internet, digital applications and the telecommunications and computer systems of third party service providers to perform business activities. Additionally, digital and mobile technologies are leveraged to interact with customers, which increases the risk of information security breaches. Failures, interruptions or breaches in the security of these systems occur across Fifth Third's industry with some frequency and, if a material event of this nature affects Fifth Third, this could result in disruptions to Fifth Third's accounting, deposit, loan and other systems, and adversely affect its customer relationships. While Fifth Third has policies and procedures designed to prevent or limit the effect of these possible events, there can be no assurance that any such failure, interruption or security breach will not occur or, if any does occur, that it can be sufficiently remediated.

There have been increasing efforts on the part of threat actors, including through cyber-attacks, to breach data security at financial institutions or with respect to financial transactions. There have been several recent instances involving financial services, credit bureaus and consumer-based companies reporting the unauthorized disclosure of client or customer information or the destruction or theft of corporate data, by both private individuals and foreign governments. In addition, because the techniques used to cause such security breaches change frequently, often are not recognized until launched against a target and may originate from less regulated and remote areas around the world, Fifth Third may be unable to proactively address these techniques or to implement adequate preventative measures. Furthermore, there has been a well-publicized series of apparently related distributed denial of service attacks on large financial services companies and "ransom" attacks where hackers have requested payments in exchange for not disclosing customer information. The unintentional or willful acts or omissions of employees may also create or exacerbate cybersecurity risks.

Cyber threats are rapidly evolving and Fifth Third may not be able to anticipate or prevent all such attacks. Additionally, Fifth Third may be impacted by a breach where Fifth Third is not the primary target (i.e. SolarWinds event). These risks are heightened through the increasing use of digital and mobile solutions which allow for rapid money movement and increase the difficulty to detect and prevent fraudulent transactions. Across Fifth Third's industry, the cost of minimizing these risks and investigating incidents has continued to increase with the frequency and sophistication of these threats. Despite its efforts, the occurrence of any failure, interruption or security breach of Fifth Third's systems or third-party service providers (or providers to such third-party service providers), particularly if widespread or resulting in financial losses to customers, could also seriously damage Fifth Third's reputation, result in a loss of customer business, result in substantial remediation costs, additional cyber-security protection costs and increased insurance premiums, subject it to additional regulatory scrutiny, or expose it to civil litigation and financial liability. Fifth Third's insurance may be inadequate to compensate for losses from a cyber-attack.

Fifth Third relies on its systems and certain third-party service providers and certain failures could materially adversely affect operations.
Fifth Third's operations, including its financial and accounting systems, use computer systems and telecommunications networks operated by both Fifth Third and third-party service providers. Additionally, Fifth Third collects, processes and stores sensitive consumer data by utilizing those and other systems and networks. Fifth Third has security, backup and recovery systems in place, as well as a business continuity plan to ensure the systems will not be inoperable. Fifth Third also has security to prevent unauthorized access to the systems. In addition, Fifth Third requires its third-party service providers to maintain similar controls. However, Fifth Third cannot be certain that the measures will be successful.

A security breach in these systems or the loss or corruption of confidential information such as business results, transaction records and related information could adversely impact Fifth Third's ability to provide timely and accurate financial information in compliance with legal and regulatory requirements, which could result in sanctions from regulatory authorities, significant reputational harm and the loss of confidence in Fifth Third. Additionally, security breaches or the loss, theft or corruption of customer information such as social security numbers, credit card numbers, account balances or other information could result in losses by Fifth Third's customers, litigation, regulatory sanctions, lost customers and revenue, increased costs and significant reputational harm.

Fifth Third's necessary dependence upon automated systems to record and process its transaction volume poses the risk that technical system flaws or employee errors, tampering or manipulation of those systems will result in losses and may be difficult to detect. Fifth Third may also be subject to disruptions of its operating systems arising from events that are beyond its control (for example, computer viruses or electrical or telecommunications outages).

Third party service providers with which the Bancorp does business both domestically and offshore, as well as vendors and other third parties with which the Bancorp's customers do business, can also be sources of operational risk to the Bancorp, particularly where activities of customers are beyond the Bancorp's security and control systems, such as through the use of the internet, personal computers, tablets, smart phones and other mobile services. Security breaches affecting the Bancorp's customers, or systems breakdowns or failures, security breaches or employee misconduct affecting such other third party service providers, may require the Bancorp to take steps to protect the integrity of its own operational systems or to safeguard confidential information of the Bancorp or its customers, thereby increasing the Bancorp's operational costs and potentially diminishing customer satisfaction. If personal, confidential or proprietary information of customers or clients in the Bancorp's or such vendors' or other third parties' possession were to be mishandled or misused, the Bancorp could suffer significant regulatory consequences, reputational damage and financial loss. Such mishandling or misuse could include circumstances where, for example, such information was erroneously provided to parties who are not permitted to have the information, either through the fault of the Bancorp's systems, employees or counterparties, or where such information was intercepted or otherwise compromised by threat actors. The Bancorp may be subject to disruptions of its operating systems arising from events that are wholly or partially beyond the Bancorp's control, which may include, for example, security breaches; electrical or telecommunications outages; failures of computer components or servers or other damage to the Bancorp's property or assets; natural disasters or severe weather conditions; health emergencies; or events arising from local or larger-scale political events, including outbreaks of hostilities or terrorist acts. For example, it has been reported that there is a fundamental security flaw in computer chips found in many types of computing devices, including phones, tablets, laptops and desktops. While the Bancorp believes that its current resiliency plans are both sufficient and adequate, there can be no assurance that such plans will fully mitigate all potential business continuity risks to the Bancorp or its customers and clients.

Any failures or disruptions of the Bancorp's systems or operations could give rise to losses in service to customers and clients, adversely affect the Bancorp's business and results of operations by subjecting the Bancorp to losses or liability, or require the Bancorp to expend significant resources to correct the failure or disruption, as well as by exposing the Bancorp to reputational harm, litigation, regulatory fines or penalties or losses not covered by insurance. The Bancorp could also be adversely affected if it loses access to information or services from a third-party service provider as a result of a security breach or system or operational failure, or disruption affecting the third-party service provider. Fifth Third's insurance may be inadequate to compensate for failures by, or affecting third party service providers upon which Fifth Third relies.

Fifth Third may not be able to effectively manage organizational changes and implement key initiatives in a timely fashion, or at all, due to competing priorities which could adversely affect its business, results of operations, financial condition and reputation.
Fifth Third is subject to rapid changes in technology, regulation and product innovation, and faces intense competition for customers, sources of revenue, capital, services, qualified employees and other essential business resources. In order to meet these challenges, Fifth Third is or may be engaged in numerous critical strategic initiatives at the same time. Accomplishing these initiatives may be complex, time intensive and require significant financial, technological, management and other resources. These initiatives may consume management's attention and may compete for limited resources. In addition, organizational changes may need to be implemented throughout Fifth Third as a result of the

new products, services, partnerships and processes that arise from the execution of the various strategic initiatives. Fifth Third may have difficulty managing these organizational changes and executing these initiatives effectively in a timely fashion, or at all. Fifth Third's failure to do so could expose it to litigation or regulatory action and may damage Fifth Third's business, results of operations, financial condition and reputation.

Fifth Third may not be able to successfully implement future information technology system enhancements, which could adversely affect Fifth Third's business operations and profitability.
Fifth Third invests significant resources in information technology system enhancements in order to provide functionality and security at an appropriate level. Fifth Third may not be able to successfully implement and integrate future system enhancements, or may not be able to do so on a cost-effective basis. Such sanctions could include fines and result in reputational harm and have other negative effects. In addition, future system enhancements could have higher than expected costs and/or result in operating inefficiencies, which could increase the costs associated with the implementation as well as ongoing operations. Failure to properly utilize system enhancements that are implemented in the future could result in impairment charges that adversely impact Fifth Third's financial condition and results of operations and could result in significant costs to remediate or replace the defective components. In addition, Fifth Third may incur significant training, licensing, maintenance, consulting and amortization expenses during and after systems implementations, and any such costs may continue for an extended period of time.

Fifth Third's framework for managing risks may not be effective in mitigating its risk and loss.
Fifth Third's risk management framework seeks to mitigate risk and loss. Fifth Third has established processes and procedures intended to identify, measure, monitor, report and manage the types of risk to which it is subject, including liquidity risk, credit risk, interest rate risk, price risk, legal and regulatory compliance risk, strategic risk, reputational risk and operational risk related to its employees, systems and vendors, among others. Any system of control and any system to reduce risk exposure, however well designed and operated, is based in part on certain assumptions and can provide only reasonable, not absolute, assurances that the objectives of the system are met. A failure in Fifth Third's internal controls could have a significant negative impact not only on its earnings, but also on the perception that customers, regulators and investors may have of Fifth Third. Fifth Third continues to devote a significant amount of effort, time and resources to improving its controls and ensuring compliance with complex regulations.

Additionally, instruments, systems and strategies used to hedge or otherwise manage exposure to various types of interest rate, price, legal and regulatory compliance, credit, liquidity, operational and business risks and enterprise-wide risk could be less effective than anticipated. As a result, Fifth Third may not be able to effectively mitigate its risk exposures in particular market environments or against particular types of risk. If Fifth Third's risk management framework proves ineffective, Fifth Third could incur litigation, negative regulatory consequences, reputational damages among other adverse consequences and Fifth Third could suffer unexpected losses that may affect its financial condition or results of operations.

Fifth Third may experience losses related to fraud, theft or violence.
Fifth Third has experienced, and may experience again in the future, losses incurred due to customer or employee fraud, theft or physical violence. Additionally, physical violence may negatively affect Fifth Third's key personnel, facilities or systems. These losses may be material and negatively affect Fifth Third's results of operations, financial condition or prospects. These losses could also lead to significant reputational risks and other effects. The sophistication of external fraud actors continues to increase, and in some cases includes large criminal rings, which increases the resources and infrastructure needed to thwart these attacks. The industry fraud threat continues to evolve, including but not limited to card fraud, check fraud, social engineering and phishing attacks for identity theft and account takeover. Fifth Third continues to invest in fraud prevention in the forms of people and systems designed to prevent, detect and mitigate the customer and financial impacts.

Fifth Third could suffer if it fails to attract and retain skilled personnel.
Fifth Third's success depends, in large part, on its ability to attract and retain key individuals. Competition for qualified candidates in the activities and markets that Fifth Third serves is intense, which may increase Fifth Third's expenses and may result in Fifth Third not being able to hire candidates or retain them. If Fifth Third is not able to hire qualified candidates or retain its key personnel, Fifth Third may be unable to execute its business strategies and may suffer adverse consequences to its business, operations and financial condition.

Compensation paid by financial institutions such as Fifth Third is heavily regulated, particularly under Dodd-Frank, which affects the amount and form of compensation Fifth Third pays to hire and retain talented employees. If Fifth Third is unable to attract and retain qualified employees, or do so at rates necessary to maintain its competitive position, or if compensation costs required to attract and retain employees become more expensive, Fifth Third's performance, including its competitive position, could be materially adversely affected.

LEGAL AND REGULATORY COMPLIANCE RISKS

Fifth Third and/or its affiliates are or may become involved from time to time in information-gathering requests, investigations and litigation, regulatory or other enforcement proceedings by various governmental regulatory agencies and law enforcement authorities, as well as self-regulatory agencies which may lead to adverse consequences.

Fifth Third and/or its affiliates are or may become involved from time to time in information-gathering requests, reviews, investigations and proceedings (both formal and informal) by governmental regulatory agencies and law enforcement authorities, as well as self-regulatory agencies, regarding their respective customers and businesses, as well as their sales practices, data security, product offerings, compensation practices and other compliance issues. Also, a violation of law or regulation by another financial institution may give rise to an inquiry or investigation by regulators or other authorities of the same or similar practices by Fifth Third. In addition, the complexity of the federal and state regulatory and enforcement regimes in the U.S. means that a single event or topic may give rise to numerous and overlapping investigations and regulatory proceedings. Furthermore, Fifth Third and certain of its directors and officers have been named from time to time as defendants in various class actions and other litigation relating to Fifth Third's business and activities, as well as regulatory or other enforcement proceedings. Past, present and future litigation have included or could include claims for substantial compensatory and/or punitive damages or claims for indeterminate amounts of damages. Enforcement authorities may seek admissions of wrongdoing and, in some cases, criminal pleas as part of the resolutions of matters and any such resolution of a matter involving Fifth Third which could lead to increased exposure to private litigation, could adversely affect Fifth Third's reputation and could result in limitations on Fifth Third's ability to do business in certain jurisdictions.

Each of the matters described above may result in material adverse consequences, including without limitation, adverse judgments, settlements, fines, penalties, injunctions or other actions, amendments and/or restatements of Fifth Third's SEC filings and/or financial statements, as applicable, and/or determinations of material weaknesses in its disclosure controls and procedures. In addition, responding to information-gathering requests, reviews, investigations and proceedings, regardless of the ultimate outcome of the matter, could be time-consuming and expensive.

Like other large financial institutions and companies, Fifth Third is also subject to risk from potential employee misconduct, including non-compliance with policies and improper use or disclosure of confidential information. Substantial legal liability or significant regulatory or other enforcement action against Fifth Third could materially adversely affect its business, financial condition or results of operations and/or cause significant reputational harm to its business. The outcome of lawsuits and regulatory proceedings may be difficult to predict or estimate. Although Fifth Third establishes accruals for legal proceedings when information related to the loss contingencies represented by those matters indicates both that a loss is probable and that the amount of loss can be reasonably estimated, Fifth Third does not have accruals for all legal proceedings where it faces a risk of loss. In addition, due to the inherent subjectivity of the assessments and unpredictability of the outcome of legal proceedings, amounts accrued may not represent the ultimate loss to Fifth Third from the legal proceedings in question. Thus, Fifth Third's ultimate losses may be higher, and possibly significantly so, than the amounts accrued for legal loss contingencies, which could adversely affect Fifth Third's results of operations.

In addition, there has been a trend of public settlements with governmental agencies that may adversely affect other financial institutions, to the extent such settlements are used as a template for future settlements. The uncertain regulatory enforcement environment makes it difficult to estimate probable losses, which can lead to substantial disparities between legal reserves and actual settlements or penalties.

For further information on specific legal and regulatory proceedings, refer to Note 20 of the Notes to Consolidated Financial Statements.

Fifth Third may be required to repurchase residential mortgage loans or reimburse investors and others as a result of breaches in contractual representations and warranties.

Fifth Third sells residential mortgage loans to various parties, including government-sponsored enterprises ("GSE") and other financial institutions that purchase residential mortgage loans for investment or private label securitization. Fifth Third may be required to repurchase residential mortgage loans, indemnify the securitization trust, investor or insurer, or reimburse the securitization trust, investor or insurer, for credit losses incurred on loans in the event of a breach of contractual representations or warranties that is not remedied within a specified period (usually 60 days or less) after Fifth Third receives notice of the breach. Contracts for residential mortgage loan sales to the GSEs include various types of specific remedies and penalties that could be applied to inadequate responses to repurchase requests. If economic conditions and the housing market deteriorate or future investor repurchase demand and Fifth Third's success at appealing repurchase requests differ from past experience, Fifth Third could have increased repurchase obligations and increased loss severity on repurchases, requiring material additions to the repurchase reserve.

Fifth Third is subject to extensive governmental regulation which could adversely impact Fifth Third or the businesses in which Fifth Third is engaged.

Government regulation and legislation subject Fifth Third and other financial institutions to restrictions, oversight and/or costs that may have an impact on Fifth Third's business, financial condition, results of operations or the price of its common stock.

Fifth Third is subject to extensive state and federal regulation, supervision and legislation that govern almost all aspects of its operations and limit the businesses in which Fifth Third may engage. These laws and regulations may change from time to time and are primarily intended for the protection of consumers, borrowers and depositors and are not designed to protect security-holders. The impact of any changes to laws and regulations or other actions by regulatory agencies may negatively impact Fifth Third or its ability to increase the value of its business. Additionally, actions by regulatory agencies or significant litigation against Fifth Third could cause it to devote significant time and resources to defending itself and may lead to penalties that materially affect Fifth Third and its shareholders. Future changes in the laws, including tax laws, or regulations or their interpretations or enforcement may also be materially adverse to Fifth Third and its shareholders or may require Fifth Third to expend significant time and resources to comply with such requirements.

Fifth Third expects that the Biden Administration will seek to implement a regulatory reform agenda that is significantly different than that of the Trump Administration. This reform agenda could include a heightened focus on the regulation of loan portfolios and credit concentrations to borrowers impacted by climate change, heightened scrutiny on Bank Secrecy Act and anti-money laundering requirements, topics related to social equity, executive compensation, and increased capital and liquidity, as well as limits on share buybacks and dividends. In addition, mergers and acquisitions could be dampened by increased antitrust scrutiny. Reform proposals are also expected for the short-term wholesale markets. It is too early to assess which, if any of these policies, would be implemented and what their impact would be.

Fifth Third cannot predict whether any pending or future legislation will be adopted or the substance and impact of any such new legislation on Fifth Third. Changes in regulation could affect Fifth Third in a substantial way and could have an adverse effect on its business, financial condition and results of operations. Additionally, legislation or regulatory reform could affect the behaviors of third parties that Fifth Third deals with in the course of business, such as rating agencies, insurance companies and investors. The extent to which Fifth Third can adjust its strategies to offset such adverse impacts also is not known at this time.

In addition, changes in laws or regulations that affect Fifth Third's customers and business partners could negatively affect Fifth Third's revenues and expenses. Certain changes in laws such as tax law reforms that impose limitations on the deductibility of interest may decrease the demand for Fifth Third's products or services and could negatively affect its revenues and results of operations. Other changes in laws or regulations could cause Fifth Third's third-party service providers and other vendors to increase the prices they charge to Fifth Third and negatively affect Fifth Third's expenses and financial results.

Fifth Third could suffer from unauthorized use of intellectual property.
Fifth Third develops for itself, and licenses from others, intellectual property for use in conducting its business. This intellectual property has been, and may be, subject to misappropriation or infringement by third parties as well as claims that Fifth Third's use of certain technology or other intellectual property infringes on rights owned by others. Fifth Third has been, and may be, subject to disputes and/or litigation concerning these claims and could be held responsible for significant damages covering past activities and substantial fees to continue to engage in these activities in the future. Fifth Third may also be unable to acquire rights to use certain intellectual property that is important for its business and may be unable to effectively engage in critical business activities. If Fifth Third is unable to protect or acquire rights to use intellectual property it owns or licenses, it may lose certain competitive advantages, incur expenses and/or lose revenue and may suffer harm to its business results and financial condition.

Fifth Third is subject to various regulatory requirements that may limit its operations and potential growth.
Under federal and state laws and regulations pertaining to the safety and soundness of insured depository institutions and their holding companies, the FRB, the FDIC, the CFPB and the OCC have the authority to compel or restrict certain actions by the Bancorp and the Bank. The Bancorp and the Bank are subject to such supervisory authority and, more generally, must, in certain instances, obtain prior regulatory approval before engaging in certain activities or corporate decisions. There can be no assurance that such approvals, if required, would be forthcoming or that such approvals would be granted in a timely manner. Failure to receive any such approval, if required, could limit or impair the Bancorp's operations, restrict its growth, ability to compete, innovate or participate in industry consolidation and/or affect its dividend policy. Such actions and activities that may be subject to prior approval include, but are not limited to, increasing dividends or other capital distributions by the Bancorp or the Bank, entering into a merger or acquisition transaction, acquiring or establishing new branches, and entering into certain new businesses.

Failure by the Bancorp or the Bank to meet the applicable eligibility requirements for FHC status (including capital and management requirements and that the Bank maintain at least a "Satisfactory" CRA rating) may result in restrictions on certain activities of the Bancorp, including the commencement of new activities and mergers with or acquisitions of other financial institutions and could ultimately result in the loss of financial holding company status.

Fifth Third and other financial institutions are subject to scrutiny from government authorities, including bank regulatory authorities, stemming from broader systemic regulatory concerns, including with respect to stress testing, liquidity and capital levels, asset quality, provisioning, AML/BSA, consumer compliance and other prudential matters and efforts to ensure that financial institutions take steps to improve their risk management and prevent future crises.

In this regard, government authorities, including the bank regulatory agencies and law enforcement, are also pursuing aggressive enforcement actions with respect to compliance and other legal matters involving financial activities, which heightens the risks associated with actual and perceived compliance failures and may also adversely affect Fifth Third's ability to enter into certain transactions or engage in certain activities, or obtain necessary regulatory approvals in connection therewith. The government enforcement authority includes, among other things, the ability to assess significant civil or criminal monetary penalties, fines, or restitution; to issue cease and desist or removal orders; and to initiate injunctive actions against banking organizations and institution-affiliated parties. These enforcement actions may be initiated for violations of laws and regulations and unsafe or unsound practices.

In some cases, regulatory agencies may take supervisory actions that may not be publicly disclosed, which restrict or limit a financial institution. Finally, as part of Fifth Third's regular examination process, the Bancorp and the Bank's respective regulators may advise it and its banking subsidiary to operate under various restrictions as a prudential matter. Such supervisory actions or restrictions, if and in whatever manner imposed, could negatively affect Fifth Third's ability to engage in new activities and certain transactions, as well as have a material adverse effect on Fifth Third's business and results of operations and may not be publicly disclosed.

Fifth Third could face serious negative consequences if its third-party service providers, business partners or investments fail to comply with applicable laws, rules or regulations.

Fifth Third is expected to oversee the legal and regulatory compliance of its business endeavors, including those performed by third-party service providers, business partners, other vendors and certain companies in which Fifth Third has invested. Legal authorities and regulators could hold Fifth Third responsible for failures by these parties to comply with applicable laws, rules or regulations. These failures could expose Fifth Third to significant litigation or regulatory action that could limit its activities or impose significant fines or other financial losses. Additionally, Fifth Third could be subject to significant litigation from consumers or other parties harmed by these failures and could suffer significant losses of business and revenue, as well as reputational harm as a result of these failures.

As a regulated entity, the Bancorp is subject to certain capital requirements that may limit its operations, potential growth and ability to pay or increase dividends on its common stock or to repurchase its capital stock.

As a BHC and an FHC, the Bancorp is subject to the comprehensive, consolidated supervision and regulation of the FRB, including risk-based and leverage capital requirements, investment practices, dividend policy and growth. The Bancorp must maintain certain risk-based and leverage capital ratios as required by the FRB which can change depending upon general economic conditions and the Bancorp's particular condition, risk profile and growth plans. Compliance with the capital requirements, including leverage ratios, may limit operations that require the intensive use of capital and could adversely affect the Bancorp's ability to expand or maintain present business levels.

Failure by the Bank to meet applicable capital requirements could subject it to a variety of enforcement actions available to the federal regulatory authorities. These include limitations on the ability of the Bancorp to pay dividends and/or repurchase shares, the issuance by the regulatory authority of a capital directive to increase capital, loss of FHC status and the termination of deposit insurance by the FDIC.

In response to the uncertainty caused by the COVID-19 pandemic, certain large BHCs, including the Bancorp, were not permitted to make share repurchases, subject to certain limited exceptions, during the third and fourth quarters of 2020, but were permitted to make dividend payments subject to certain limitations. For the first quarter of 2021, provided that a BHC does not increase its common stock dividends higher than the level paid in the second quarter of 2020, BHCs, including the Bancorp, are permitted to pay common dividends and make share repurchases that, in the aggregate, do not exceed an amount equal to the average of the firm's net income for the four preceding calendar quarters. BHCs may also make additional share repurchases up to the amount of share issuances related to expensed employee compensation. For further information on a subsequent event related to an accelerated share repurchase transaction, refer to Note 33 of the Notes to Consolidated Financial Statements.

Regulation of Fifth Third by the Commodity Futures Trading Commission ("CFTC") imposes additional operational and compliance costs.

The CFTC and SEC are primarily responsible for regulation of the U.S. derivatives markets. While most of the provisions related to derivatives markets are now in effect, several additional requirements await final regulations from the relevant regulatory agencies for derivatives, including the CFTC and the SEC. As a result of this regulatory regime, the CFTC has a meaningful supervisory role with respect to some of Fifth Third's businesses. The Bank is provisionally registered as a swap dealer with the CFTC and is subject to certain requirements, including real time trade reporting and robust record keeping requirements, business conduct requirements (including daily valuations, disclosure of material risks associated with swaps and disclosure of material incentives and conflicts of interest) and mandatory clearing and exchange trading of certain swaps designated by the relevant regulatory agencies as required to be cleared. Fifth Third's derivatives activity is also subject to the U.S. banking regulators' margin and segregation requirements for uncleared swaps. These requirements collectively impose implementation and ongoing compliance burdens on Fifth Third and introduce additional legal risk, including as a result of antifraud and anti-manipulation provisions and private rights of action. These rules raise the costs and liquidity burden associated with Fifth Third's derivatives activities and could have an adverse effect on its business, financial condition and results of operations. For more information, refer to Regulation and Supervision—Derivatives.

Deposit insurance premiums levied against the Bank may increase if the number of bank failures increase or the cost of resolving failed banks increases.

The FDIC maintains a Deposit Insurance Fund ("DIF") to protect insured depositors in the event of bank failures. The DIF is funded by fees assessed on insured depository institutions including the Bank. Future deposit premiums paid by the Bank depend on FDIC rules, which are subject to change, the level of the DIF and the magnitude and cost of future bank failures. The Bank may be required to pay significantly higher FDIC premiums if market developments change such that the DIF balance is reduced or the FDIC changes its rules to require higher premiums.

If an orderly liquidation of a systemically important BHC or non-bank financial company were triggered, Fifth Third could face assessments for the Orderly Liquidation Fund.

Dodd-Frank created authority for the orderly liquidation of systemically important BHCs and non-bank financial companies and is based on the FDIC's bank resolution model. The Secretary of the U.S. Treasury may trigger liquidation under this authority only after consultation with the President of the United States and after receiving a recommendation from the board of the FDIC and the FRB upon a two-thirds vote. Liquidation proceedings will be funded by the Orderly Liquidation Fund established under Dodd-Frank, which will borrow from the U.S. Treasury and impose risk-based assessments on covered financial companies. Risk-based assessments would be made, first, on entities that received more in the resolution than they would have received in the liquidation to the extent of such excess and second, if necessary, on, among others, bank holding companies with total consolidated assets of $50 billion or more, such as Fifth Third. Any such assessments may adversely affect Fifth Third's business, financial condition or results of operations.

MARKET RISKS: INTEREST RATE RISKS AND PRICE RISKS

The replacement of LIBOR could adversely affect Fifth Third's revenue or expenses and the value of those assets or obligations.

LIBOR and certain other "benchmarks" are the subject of recent national, international and other regulatory guidance and proposals for reform. These reforms may cause such benchmarks to perform differently than in the past or have other consequences which cannot be predicted. On July 27, 2017, the United Kingdom's Financial Conduct Authority, which regulates LIBOR, publicly announced that it intends to stop persuading or compelling banks to submit LIBOR rates after 2021. The announcement indicates that the continuation of LIBOR on the current basis cannot be guaranteed after 2021. While there is no consensus on what rate or rates may become accepted alternatives to LIBOR, a group of large banks, the Alternative Reference Rate Committee ("ARRC"), selected and the Federal Reserve Bank of New York started in May 2018 to publish the Secured Overnight Finance Rate as an alternative to LIBOR. SOFR is a broad measure of the cost of borrowing cash overnight collateralized by Treasury securities, given the depth and robustness of the U.S. Treasury repurchase market. Furthermore, in 2018, the Bank of England commenced publication of a reformed Sterling Overnight Index Average ("SONIA"), comprised of a broader set of overnight Sterling money market transactions. The SONIA has been recommended as the alternative to Sterling LIBOR by the Working Group on Sterling Risk-Free Reference Rates. In the United States, it is likely that LIBOR-priced transactions and products will transfer to SOFR. On November 30, 2020, the FRB, OCC and FDIC issued a public statement that the administrator of LIBOR announced it will consult on an extension of publication of certain U.S. Dollar LIBOR tenors until June 30, 2023, which would allow additional legacy USD LIBOR contracts to mature before the succession of LIBOR. The administrator has not yet announced the results of its consultation.

The market transition away from LIBOR to an alternative reference rate, including SOFR or SONIA, is complex and subjects Fifth Third to financial, legal and operational risks. In particular, any such transition could:

- adversely affect the interest rates paid or received on, and the revenue and expenses associated with, the Bancorp's floating rate obligations, loans, deposits, derivatives and other financial instruments tied to LIBOR rates, or other securities or financial arrangements given LIBOR's role in determining market interest rates globally;
- adversely affect the value of the Bancorp's floating rate obligations, loans, deposits, derivatives and other financial instruments tied to LIBOR rates, or other securities or financial arrangements given LIBOR's role in determining market interest rates globally;
- prompt inquiries or other actions from regulators in respect of the Bancorp's preparation and readiness for the replacement of LIBOR with an alternative reference rate;
- result in certain LIBOR-based instruments such as the Bancorp's Series H, Series I and Series J preferred stock moving from floating-rate instruments to fixed-rate instruments if the fallback language is unable to be amended to adopt alternative rates;
- result in disputes, litigation or other actions with counterparties regarding the interpretation and enforceability of certain fallback language in LIBOR-based securities; and
- require the transition to or development of appropriate systems and analytics to effectively transition the Bancorp's risk management processes from LIBOR-based products to those based on the applicable alternative pricing benchmark, such as SOFR or reformed SONIA.

The manner and impact of this transition, as well as the effect of these developments on Fifth Third's funding costs, loan and investment and trading securities portfolios, asset-liability management, and business, is uncertain.

Weakness in the U.S. economy, including within Fifth Third's geographic footprint, has adversely affected Fifth Third in the past and may adversely affect Fifth Third in the future.

If the strength of the U.S. economy in general or the strength of the local economies in which Fifth Third conducts operations declines, this could result in, among other things, a decreased demand for Fifth Third's products and services, a deterioration in credit quality or a reduced demand for credit, including a resultant effect on Fifth Third's loan portfolio and ALLL and in the receipt of lower proceeds from the sale of loans and foreclosed properties. These factors could result in higher delinquencies, greater charge-offs and increased losses in future periods, which could materially adversely affect Fifth Third's financial condition and results of operations.

Financial disruption or a prolonged economic downturn could materially and adversely affect Fifth Third's business.
Worldwide financial markets have recently experienced periods of extraordinary disruption and volatility, which has been exacerbated by the COVID-19 pandemic, resulting in heightened credit risk, reduced valuation of investments and decreased economic activity. Moreover, many companies have experienced reduced liquidity and uncertainty as to their ability to raise capital during such periods of market disruption and volatility. In the event that these conditions recur or result in a prolonged economic downturn, Fifth Third's results of operations, financial position and/or liquidity could be materially and adversely affected. These market conditions may affect the Bancorp's ability to access debt and equity capital markets. In addition, as a result of recent financial events, Fifth Third may face increased regulation. Many of the other risk factors discussed in this Risk Factors section identify risks that result from, or are exacerbated by, financial economic downturn. These include risks related to Fifth Third's investments portfolio, the competitive environment and regulatory developments.

Global and domestic political, social and economic uncertainties and changes may adversely affect Fifth Third.
Global financial markets, including the United States, face political and economic uncertainties that may delay investment and hamper economic activity. International events such as trade disputes, separatist movements, leadership changes and political and military conflicts could adversely affect global financial activity and markets and could negatively affect the U.S. economy. Additionally, the FRB and other major central banks have begun the process of removing or reducing monetary accommodation, increasing the risk of recession and may also negatively impact asset values and credit spreads that were impacted by extraordinary monetary stimulus. These potential negative effects on financial markets and economic activity could lead to reduced revenues, increased costs, increased credit risks and volatile markets, and could negatively impact Fifth Third's businesses, results of operations and financial condition.

Changes in interest rates could affect Fifth Third's income and cash flows.
Fifth Third's income and cash flows depend to a great extent on the difference between the interest rates earned on interest-earning assets such as loans and investment securities and the interest rates paid on interest-bearing liabilities such as deposits and borrowings. These rates are highly sensitive to many factors that are beyond Fifth Third's control, including general economic conditions in the U.S. or abroad and the policies of various governmental and regulatory agencies (in particular, the FRB). Changes in monetary policy, including changes in interest rates, will influence the origination of loans, the prepayment speed of loans, the purchase of investments, the generation of deposits and the rates received on loans and investment securities and paid on deposits or other sources of funding as well as customers' ability to repay loans. The impact of these changes may be magnified if Fifth Third does not effectively manage the relative sensitivity of its assets and liabilities to changes in market interest rates. Fluctuations in these areas may adversely affect Fifth Third, its customers and its shareholders. In addition, in response to the outbreak of the COVID-19 pandemic and its economic consequences, the FRB lowered its target for the federal funds rate to a range of 0% to 0.25%. As a result of the high percentage of Fifth Third's assets and liabilities that are in the form of interest-bearing or interest-related instruments, this change in interest rates could adversely affect Fifth Third's profitability. Moreover, such low rates increase the risk in the U.S. of a negative interest rate environment in which interest rates drop below zero, either broadly or for some types of instruments. For example, yields on one-month and three-month Treasuries briefly dropped below zero in March 2020. Such an occurrence would likely further reduce the interest Fifth Third earns on loans and other earning assets. Fifth Third cannot predict the nature or timing of future changes in monetary policies in response to the COVID-19 pandemic or the precise effects that they may have on Fifth Third's activities and financial results.

Changes and trends in the capital markets may affect Fifth Third's income and cash flows.
Fifth Third enters into and maintains trading and investment positions in the capital markets on its own behalf and manages investment positions on behalf of its customers. These investment positions include derivative financial instruments. The revenues and profits Fifth Third derives from managing proprietary and customer trading and investment positions are dependent on market prices. Market changes and trends may result in a decline in wealth and asset management revenue or investment or trading losses that may impact Fifth Third. Losses on behalf of its customers could expose Fifth Third to reputational issues, litigation, credit risks or loss of revenue from those clients and customers. Additionally, losses in Fifth Third's trading and investment positions could lead to a loss with respect to those investments and may adversely affect Fifth Third's income, cash flows and funding costs.

Fifth Third's stock price is volatile.
Fifth Third's stock price has been volatile in the past and several factors could cause the price to fluctuate substantially in the future. These factors include, without limitation:
- actual or anticipated variations in earnings;
- changes in analysts' recommendations or projections;
- Fifth Third's announcements of developments related to its businesses;
- operating and stock performance of other companies deemed to be peers;
- actions by government regulators and changes in the regulatory regime;
- new technology used or services offered by traditional and non-traditional competitors;
- news reports of trends, concerns and other issues related to the financial services industry;
- U.S. and global economic conditions;
- natural disasters;
- geopolitical conditions such as acts or threats of terrorism, military conflicts and withdrawal from the EU by EU member countries.

The price for shares of Fifth Third's common stock may fluctuate significantly in the future, and these fluctuations may be unrelated to Fifth Third's performance. General market price declines or market volatility in the future could adversely affect the price for shares of Fifth Third's common stock and the current market price of such shares may not be indicative of future market prices.

Fifth Third's mortgage banking net revenue can be volatile from quarter to quarter.
Fifth Third earns revenue from the fees it receives for originating mortgage loans and for servicing mortgage loans. When rates rise, the demand for mortgage loans tends to fall, reducing the revenue Fifth Third receives from loan originations. At the same time, revenue from mortgage servicing rights ("MSR") can increase through increases in fair value. When rates fall, mortgage originations tend to increase and the value of MSRs tends to decline, also with some offsetting revenue effect. Even though the origination of mortgage loans can act as a "natural hedge," the hedge is not perfect, either in amount or timing. For example, the negative effect on revenue from a decrease in the fair value of residential MSRs is immediate, but any offsetting revenue benefit from more originations and the MSRs relating to the new loans would accrue over time. It is also possible that even if interest rates were to fall, mortgage originations may also fall or any increase in mortgage originations may not be enough to offset the decrease in the MSRs value caused by the lower rates.

Fifth Third typically uses derivatives and other instruments to hedge its mortgage banking interest rate risk. Fifth Third generally does not hedge all of its risks and the fact that Fifth Third attempts to hedge any of the risks does not mean Fifth Third will be successful. Hedging is a complex process, requiring sophisticated models and constant monitoring. Fifth Third may use hedging instruments tied to U.S. Treasury rates, LIBOR or Eurodollars that may not perfectly correlate with the value or income being hedged. Fifth Third could incur significant losses from its hedging activities. There may be periods where Fifth Third elects not to use derivatives and other instruments to hedge mortgage banking interest rate risk.

STRATEGIC RISKS

If Fifth Third does not respond to intense competition and rapid changes in the financial services industry or otherwise adapt to changing customer preferences, its financial performance may suffer.
Fifth Third's ability to deliver strong financial performance and returns on investment to shareholders will depend in part on its ability to expand the scope of available financial services to meet the needs and demands of its customers. In addition to the challenge of competing against other banks in attracting and retaining customers for traditional banking services, Fifth Third's competitors also include securities dealers, brokers, mortgage bankers, investment advisors and specialty finance, telecommunications, technology and insurance companies as well as large retailers who seek to offer one-stop financial services in addition to other products and services desired by consumers that may include services that banks have not been able or allowed to offer to their customers in the past or may not be currently able or allowed to offer. Many of these other firms may be significantly larger than Fifth Third and may have access to customers and financial resources that are beyond Fifth Third's capability. Fifth Third competes with these firms with respect to capital, access to capital, revenue generation, products, services, transaction execution, innovation, reputation, talent and price.

This increasingly competitive environment is primarily a result of changes in customer preferences, regulation, changes in technology and product delivery systems, as well as the accelerating pace of consolidation among financial service providers. Rapidly changing technology and consumer preferences may require Fifth Third to effectively implement new technology-driven products and services in order to compete and meet customer demands. Fifth Third may not be able to do so or be successful in marketing these products and services to its customers. As a result, Fifth Third's ability to effectively compete to retain or acquire new business may be impaired, and its business, financial condition or results of operations, may be adversely affected.

Fifth Third may make strategic investments and may expand an existing line of business or enter into new lines of business to remain competitive. If Fifth Third's chosen strategies are not appropriate to allow Fifth Third to effectively compete or Fifth Third does not execute them in an appropriate or timely manner, Fifth Third's business and results may suffer. Additionally, these strategies, products and lines of business may bring with them unforeseeable or unforeseen risks and may not generate the expected results or returns, which could adversely affect Fifth Third's results of operations or future growth prospects and cause Fifth Third to fail to meet its stated goals and expectations.

Changes in retail distribution strategies and consumer behavior may adversely impact Fifth Third's investments in its bank premises and equipment and other assets and may lead to increased expenditures to change its retail distribution channel.
Fifth Third has significant investments in bank premises and equipment for its branch network including its 1,134 full-service banking centers and 59 locations held for the development of future banking centers of which 44 locations are developed or in the process of being developed as branches, as well as its retail work force and other branch banking assets. Advances in technology such as e-commerce, telephone, internet and mobile banking, and in-branch self-service technologies including automatic teller machines and other equipment, as well as changing customer preferences for these other methods of accessing Fifth Third's products and services, could affect the value of Fifth Third's branch network or other retail distribution assets and may cause it to change its retail distribution strategy, close and/or sell certain branches or parcels of land held for development and restructure or reduce its remaining branches and work force. Further advances in technology and/or changes in customer preferences could have additional changes in Fifth Third's retail distribution strategy and/or branch network. These actions could lead to losses on these assets or could adversely impact the carrying value of other long-lived assets and may lead to increased expenditures to renovate and reconfigure remaining branches or to otherwise reform its retail distribution channel.

Difficulties in identifying suitable opportunities or combining the operations of acquired entities or assets with Fifth Third's own operations or assessing the effectiveness of businesses in which Fifth Third makes strategic investments or with which Fifth Third enters into strategic contractual relationships may prevent Fifth Third from achieving the expected benefits from these acquisitions, investments or relationships.

Inherent uncertainties exist when assessing, acquiring or integrating the operations of another business or investment or relationship opportunity. Fifth Third may not be able to fully achieve its strategic objectives and planned operating efficiencies relevant to an acquisition or strategic relationship. In addition, the markets and industries in which Fifth Third and its potential acquisition and investment targets operate are highly competitive. Acquisition or investment targets may lose customers or otherwise perform poorly or unprofitably, or in the case of an acquired business or strategic relationship, cause Fifth Third to lose customers or perform poorly or unprofitably. Future acquisition and investment activities and efforts to monitor newly acquired businesses or reap the benefits of a new strategic relationship may require Fifth Third to devote substantial time and resources and may cause these acquisitions, investments and relationships to be unprofitable or cause Fifth Third to be unable to pursue other business opportunities.

After completing an acquisition, Fifth Third may find that certain material information was not adequately disclosed during the due diligence process or that certain items were not accounted for properly in accordance with financial accounting and reporting standards. Fifth Third may also not realize the expected benefits of the acquisition due to lower financial results pertaining to the acquired entity or assets. For example, Fifth Third could experience higher charge-offs than originally anticipated related to the acquired loan portfolio. Additionally, acquired companies or businesses may increase Fifth Third's risk of regulatory action or restrictions related to the operations of the acquired business.

Future acquisitions may dilute current shareholders' ownership of Fifth Third and may cause Fifth Third to become more susceptible to adverse economic events.

Future business acquisitions could be material to Fifth Third and it may issue additional shares of stock to pay for those acquisitions, which would dilute current shareholders' ownership interests. Acquisitions also could require Fifth Third to use substantial cash or other liquid assets or to incur debt. In those events, Fifth Third could become more susceptible to economic downturns, dislocations in capital markets and competitive pressures.

Fifth Third may sell or consider selling one or more of its businesses or investments. Should it determine to sell such a business or investment, it may not be able to generate gains on sale or related increase in shareholders' equity commensurate with desirable levels. Moreover, if Fifth Third sold such businesses or investments, the loss of income could have an adverse effect on its earnings and future growth.

Fifth Third owns, or owns a minority stake in, as applicable, several non-strategic businesses, investments and other assets that are not significantly synergistic with its core financial services businesses or, in the future, may no longer be aligned with Fifth Third's strategic plans or regulatory expectations. If Fifth Third were to sell one or more of its businesses or investments, it would be subject to market forces that may affect the timing or pricing of such sale or result in an unsuccessful sale. If Fifth Third were to complete the sale of any of its businesses, investments and/or interests in third parties, it would lose the income from the sold businesses and/or interests, including those accounted for under the equity method of accounting, and such loss of income could have an adverse effect on its future earnings and growth. Additionally, Fifth Third may encounter difficulties in separating the operations of any businesses it sells, which may affect its business or results of operations.

GENERAL BUSINESS RISKS

Changes in accounting standards or interpretations could impact Fifth Third's reported earnings and financial condition.

The accounting standard setters, including the FASB, the SEC and other regulatory agencies, periodically change the financial accounting and reporting standards that govern the preparation of Fifth Third's consolidated financial statements. These changes can be hard to predict and can materially impact how Fifth Third records and reports its financial condition and results of operations. In some cases, Fifth Third could be required to apply a new or revised standard retroactively, which would result in the recasting of Fifth Third's prior period financial statements.

Fifth Third uses models for business planning purposes that may not adequately predict future results.

Fifth Third uses financial models to aid in its planning for various purposes including its capital and liquidity needs and other purposes. The models used may not accurately account for all variables, may fail to predict outcomes accurately, and/or may overstate or understate certain effects. As a result of these potential failures, Fifth Third may not adequately prepare for future events and may suffer losses or other setbacks due to these failures.

Also, information Fifth Third provides to the public or to its regulators based on models could be inaccurate or misleading due to inadequate design or implementation, for example. Decisions that its regulators make, including those related to capital distributions to its shareholders, could be affected adversely due to the perception that the models used to generate the relevant information are unreliable or inadequate.

The preparation of financial statements requires Fifth Third to make subjective determinations and use estimates that may vary from actual results and materially impact its results of operations or financial position.

The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make significant estimates that affect the financial statements. If new information arises that results in a material change to a reserve amount, such a change could result in a change to previously announced financial results. Refer to the Critical Accounting Policies section of Management's Discussion and Analysis of Financial Condition and Results of Operation for more information regarding management's significant estimates.

Weather-related events, other natural disasters, or health emergencies may have an effect on the performance of Fifth Third's loan portfolios, thereby adversely impacting its results of operations.

Fifth Third's footprint stretches from the upper Midwestern to lower Southeastern regions of the United States and it has offices in many other areas of the country. Some of these regions have experienced weather events including hurricanes, tornadoes, fires and other natural disasters. The nature and level of these events and the impact of global climate change upon their frequency and severity cannot be predicted. If large scale events occur, they may significantly impact its loan portfolios by damaging properties pledged as collateral as well as impairing its borrowers' ability to repay their loans.

Additionally, the impact of widespread health emergencies may adversely impact Fifth Third's results of operations, such as the potential impact from the COVID-19 pandemic. If its borrowers are adversely affected due to a widespread health emergency that impacts Fifth Third employees, vendors or economic growth generally, Fifth Third's financial condition and results of operations could be adversely affected.

Societal responses to climate change could adversely affect Fifth Third's business and performance, including indirectly through impacts on Fifth Third's customers.

Concerns over the long-term impacts of climate change have led and may continue to lead to governmental efforts around the world to mitigate those impacts. Consumers and businesses also may change their behavior on their own as a result of these concerns. Fifth Third and its customers will need to respond to new laws and regulations, as well as consumer and business preferences resulting from climate change concerns. Fifth Third and its customers may face cost increases, asset value reductions, operating process changes, and the like. The impact on Fifth Third's customers will likely vary depending on their specific attributes, including reliance on or role in carbon intensive activities. Fifth Third could experience a drop in demand for Fifth Third's products and services, particularly in certain sectors. In addition, Fifth Third could face reductions in creditworthiness on the part of some customers or in the value of assets securing loans. Fifth Third's efforts to take these risks into account in making lending and other decisions, including by increasing business relationships with climate-friendly companies, may not be effective in protecting Fifth Third from the negative impact of new laws and regulations or changes in consumer or business behavior.

Fifth Third is exposed to reputational risk.

Fifth Third's actual or alleged conduct in activities, such as certain sales and lending practices, data security, corporate governance and acquisitions, inappropriate behavior or misconduct of employees, association with particular customers, business partners, investments or vendors, as well as developments from any of the other risks described above, may result in negative public opinion at large (or with certain segments of the public) and may damage Fifth Third's reputation. Actions taken by government regulators, shareholder activists and community organizations may also damage Fifth Third's reputation. Additionally, whereas negative public opinion once was primarily driven by adverse news coverage in traditional media, the advent and expansion of social media facilitates the rapid dissemination of information or misinformation. Though Fifth Third monitors social media channels, the potential remains for rapid and widespread dissemination of inaccurate, misleading or false information or other negative information that could damage Fifth Third's reputation. Negative public opinion can adversely affect Fifth Third's ability to attract and keep customers and can increase the risk that it will be a target of litigation and regulatory action. Social activists are increasingly targeting financial firms with public criticism for their relationships with clients that are engaged in certain sensitive industries, including businesses whose products are or are perceived to be harmful to health, the environment or the social good. Activist criticism of Fifth Third's relationships with clients in sensitive industries could potentially engender dissatisfaction among clients, customers, investors, politicians, the government and employees with how Fifth Third addresses social concerns through business activities which could negatively affect its business or reputation.

Furthermore, investors have begun to consider how corporations are addressing environmental, social and governance matters, commonly known as "ESG matters," when making investment decisions. For example, certain investors are beginning to incorporate the business risks of climate change and the adequacy of companies' responses to climate change and other ESG matters as part of their investment theses. These shifts in investing priorities may result in adverse effects on the trading price of Fifth Third's common stock if investors determine that Fifth Third has not made sufficient progress on ESG matters.

Potential noncompliance with evolving federal and state laws governing cannabis-related businesses (CRBs) could subject Fifth Third to liabilities.

While a significant majority of states have legalized some form of marijuana, it remains a Schedule I controlled substance under federal law. Hemp is no longer classified as a Schedule I controlled substance under federal law; however, the regulatory scheme governing hemp has not been fully developed. Further, the "naked eye" cannot distinguish between legal hemp and illegal marijuana under federal law. There are a number of states where Fifth Third operates with laws permitting medicinal or recreational marijuana, which increases the probability of individuals or entities using bank products or services to sell, distribute, cultivate, manufacture or profit from marijuana. This, and the divergence and continued changes in laws governing CRBs results in challenges to us to maintain compliance with them, particularly in connection with Fifth Third's commercial and consumer lending and capital markets businesses. While Fifth Third monitors regulatory developments in this area to avoid noncompliance, Fifth Third cannot assure that it will be at all times fully compliant with CRB-related laws, which could result in significant fines, penalties or other losses.

The COVID-19 pandemic creates significant risks and uncertainties for Fifth Third's business.
In March 2020, the World Health Organization declared novel coronavirus disease 2019 (COVID-19) a global pandemic. The COVID-19 pandemic has negatively impacted the global economy, disrupted global supply chains, lowered equity market valuations, created significant volatility and disruption in financial markets, and increased unemployment levels, all of which may become heightened concerns upon subsequent waves of infection or future developments. In addition, the pandemic resulted in temporary closures of many businesses and the institution of social distancing and sheltering in place requirements in many states and communities, including those in major markets in which the Bancorp is located or does business.

As a result, the demand for the Bancorp's products and services has been, and is expected to continue to be, significantly impacted. Furthermore, the pandemic could influence the recognition of credit losses in the Bancorp's loan and lease portfolios and increase its allowance for credit losses as both businesses and consumers are negatively impacted by the economic downturn. In addition, governmental actions are meaningfully influencing the interest-rate environment, which could adversely affect the Bancorp's results of operations and financial condition. The business operations of subsidiaries of the Bancorp, such as Fifth Third Bank, National Association, have been, and may also be disrupted in the future, if significant portions of their workforce are unable to work effectively, including because of illness, quarantines, government actions, or other restrictions in connection with the pandemic, travel restrictions, technology limitations and/or disruptions. Furthermore, the business operations of subsidiaries of the Bancorp have been, and may again in the future be, disrupted due to vendors and third party service providers being unable to work or provide services effectively, including because of illness, quarantines, government actions, or other restrictions in connection with the pandemic. An increase in remote work force due to the COVID-19 pandemic and the potential for a long-term change in Fifth Third's remote work strategy may also increase risks related to cybersecurity and information security.

In response to the pandemic, the Bancorp provided financial hardship relief to borrowers that were negatively impacted by the pandemic and its related economic impacts. These programs included payment deferrals and forbearances for both commercial and retail borrowers. The Bancorp also temporarily suspended initiating any new repossession actions on vehicles and temporarily suspended all residential foreclosure activity. These actions are expected to negatively impact revenue and other results of operations of the Bancorp in the near term and, if not effective in mitigating the effect of the COVID-19 pandemic on the Bancorp's customers, may adversely affect the Bancorp's business and results of operations more substantially over a longer period of time.
