CITY OF CHICAGO
ECONOMIC DISCLOSURE STATEMENT
AND AFFIDAVIT

SECTION I -- GENERAL INFORMATION

A. Legal name of the Disclosing Party submitting this EDS. Include d/b/a/ if applicable:

Wells Fargo Bank, N.A.

Check ONE of the following three boxes:

Indicate whether the Disclosing Party submitting this EDS is:

1. [X] the Applicant

OR

2. [ ] a legal entity currently holding, or anticipated to hold within six months after City action on the contract, transaction or other undertaking to which this EDS pertains (referred to below as the "Matter"), a direct or indirect interest in excess of 7.5% in the Applicant. State the Applicant=s legal name: ______

OR

3. [ ] a legal entity with a direct or indirect right of control of the Applicant (see Section II(B)(1)) State the legal name of the entity in which the Disclosing Party holds a right of control:

______

B. Business address of the Disclosing Party: 7900 Xerxes Avenue South, Bloomington, MN 55431

C. Telephone: 612-316-3963 Fax: Not available.

Email: David.R.Offord@wellsfargo.com

D. Name of contact person: David Offord

E. Federal Employer Identification No. (if you have one): 94-1347393

F. Brief description of the Matter to which this EDS pertains. (Include project number and location of property, if applicable):

2024 Municipal Depository for City of Chicago and Chicago Board of Education Funds

G. Which City agency or department is requesting this EDS? Department of Finance

If the Matter is a contract being handled by the City's Department of Procurement Services, please complete the following:

Specification ______ and Contract # ______

SECTION II -- DISCLOSURE OF OWNERSHIP INTERESTS

A. NATURE OF THE DISCLOSING PARTY

1. Indicate the nature of the Disclosing Party:

[ ] Person
[ ] Publicly registered business corporation
[ ] Privately held business corporation
[ ] Sole proprietorship
[ ] General partnership
[ ] Limited partnership
[ ] Trust
[ ] Limited liability company
[ ] Limited liability partnership
[ ] Joint venture
[ ] Not-for-profit corporation
(Is the not-for-profit corporation also a 501(c)(3))?
[ ] Yes [ ] No
[X] Other (please specify)
National Banking Association

2. For legal entities, the state (or foreign country) of incorporation or organization, if applicable:

United States of America

3. For legal entities not organized in the State of Illinois: Has the organization registered to do business in the State of Illinois as a foreign entity?

[ ] Yes [X] No [ ] Organized in Illinois

B. IF THE DISCLOSING PARTY IS A LEGAL ENTITY:

1. List below the full names and titles, if applicable, of: (i) all executive officers and all directors of the entity; (ii) **for not-for-profit corporations**, all members, if any, which are legal entities (if there are no such members, write "no members which are legal entities"); (iii) **for trusts, estates or other similar entities**, the trustee, executor, administrator, or similarly situated party; (iv) **for general or limited partnerships, limited liability companies, limited liability partnerships or joint ventures**, each general partner, managing member, manager or any other person or legal entity that directly or indirectly controls the day-to-day management of the Applicant.

NOTE: Each legal entity listed below must submit an EDS on its own behalf.

Name Title

Please see Attachment A (eDocs# 25659835)

2. Please provide the following information concerning each person or legal entity having a direct or indirect, current or prospective (i.e. within 6 months after City action) beneficial interest (including ownership) in excess of 7.5% of the Applicant. Examples of such an interest include shares in a corporation, partnership interest in a partnership or joint venture, interest of a member or manager in a

limited liability company, or interest of a beneficiary of a trust, estate or other similar entity. If none, state None.

NOTE: Each legal entity listed below may be required to submit an EDS on its own behalf.

Name	Business Address	Percentage Interest in the Applicant
Please see Attachment B (eDocs# 25660037) and Attachment B.2 (eDocs# 25708606)		

SECTION III -- INCOME OR COMPENSATION TO, OR OWNERSHIP BY, CITY ELECTED OFFICIALS

Has the Disclosing Party provided any income or compensation to any City elected official during the 12-month period preceding the date of this EDS? [ ] Yes [X] No

Does the Disclosing Party reasonably expect to provide any income or compensation to any City elected official during the 12-month period following the date of this EDS? [ ] Yes [X] No

If yes to either of the above, please identify below the name(s) of such City elected official(s) and describe such income or compensation:
Please see Attachment C (eDocs#25708795)

Does any City elected official or, to the best of the Disclosing Party's knowledge after reasonable inquiry, any City elected official=s spouse or domestic partner, have a financial interest (as defined in Chapter 2-156 of the Municipal Code of Chicago (MCC)) in the Disclosing Party?
[ ] Yes [X] No

If "yes," please identify below the name(s) of such City elected official(s) and/or spouse(s)/domestic partner(s) and describe the financial interest(s).
Please see Attachment C (eDocs#25708795)

SECTION IV -- DISCLOSURE OF SUBCONTRACTORS AND OTHER RETAINED PARTIES

The Disclosing Party must disclose the name and business address of each subcontractor, attorney, lobbyist (as defined in MCC Chapter 2-156), accountant, consultant and any other person or entity whom the Disclosing Party has retained or expects to retain in connection with the Matter, as well as the nature of the relationship, and the total amount of the fees paid or estimated to be paid. The Disclosing Party is not required to disclose employees who are paid solely through the Disclosing Party's regular payroll. If the Disclosing Party is uncertain whether a disclosure is required under this Section, the Disclosing Party must either ask the City whether disclosure is required or make the disclosure.

Name (indicate whether retained or anticipated to be retained)	Business Address	Relationship to Disclosing Party (subcontractor, attorney, lobbyist, etc.)	Fees (indicate whether paid or estimated.) **NOTE:** hourly rate or t.b.d. is not an acceptable response.
None			

(Add sheets if necessary)

[X] Check here if the Disclosing Party has not retained, nor expects to retain, any such persons or entities.

SECTION V -- CERTIFICATIONS

A. COURT-ORDERED CHILD SUPPORT COMPLIANCE

Under MCC Section 2-92-415, substantial owners of business entities that contract with the City must remain in compliance with their child support obligations throughout the contract's term.

Has any person who directly or indirectly owns 10% or more of the Disclosing Party been declared in arrearage on any child support obligations by any Illinois court of competent jurisdiction?

[ ] Yes [ ] No [X] No person directly or indirectly owns 10% or more of the Disclosing Party.

If Yes, has the person entered into a court-approved agreement for payment of all support owed and is the person in compliance with that agreement?

[ ] Yes [ ] No

B. FURTHER CERTIFICATIONS

1. [This paragraph 1 applies only if the Matter is a contract being handled by the City's Department of Procurement Services.] In the 5-year period preceding the date of this EDS, neither the Disclosing Party nor any Affiliated Entity [see definition in (5) below] has engaged, in connection with the performance of any public contract, the services of an integrity monitor, independent private sector inspector general, or integrity compliance consultant (i.e., an individual or entity with legal, auditing, investigative, or other similar skills, designated by a public agency to help the agency monitor the activity of specified agency vendors as well as help the vendors reform their business practices so they can be considered for agency contracts in the future, or continue with a contract in progress).

2. The Disclosing Party and its Affiliated Entities are not delinquent in the payment of any fine, fee, tax or other source of indebtedness owed to the City of Chicago, including, but not limited to, water and sewer charges, license fees, parking tickets, property taxes and sales taxes, nor is the Disclosing Party delinquent in the payment of any tax administered by the Illinois Department of Revenue.

3. The Disclosing Party and, if the Disclosing Party is a legal entity, all of those persons or entities identified in Section II(B)(1) of this EDS:

a. are not presently debarred, suspended, proposed for debarment, declared ineligible or voluntarily excluded from any transactions by any federal, state or local unit of government;

b. have not, during the 5 years before the date of this EDS, been convicted of a criminal offense, adjudged guilty, or had a civil judgment rendered against them in connection with: obtaining, attempting to obtain, or performing a public (federal, state or local) transaction or contract under a public transaction; a violation of federal or state antitrust statutes; fraud; embezzlement; theft; forgery; bribery; falsification or destruction of records; making false statements; or receiving stolen property;

c. are not presently indicted for, or criminally or civilly charged by, a governmental entity (federal, state or local) with committing any of the offenses set forth in subparagraph (b) above;

d. have not, during the 5 years before the date of this EDS, had one or more public transactions (federal, state or local) terminated for cause or default; and

e. have not, during the 5 years before the date of this EDS, been convicted, adjudged guilty, or found liable in a civil proceeding, or in any criminal or civil action, including actions concerning environmental violations, instituted by the City or by the federal government, any state, or any other unit of local government.

4. The Disclosing Party understands and shall comply with the applicable requirements of MCC Chapters 2-56 (Inspector General) and 2-156 (Governmental Ethics).

5. Certifications (5), (6) and (7) concern:
- the Disclosing Party;
- any Contractor (meaning any contractor or subcontractor used by the Disclosing Party in connection with the Matter, including but not limited to all persons or legal entities disclosed under Section IV, Disclosure of Subcontractors and Other Retained Parties);
- any "Affiliated Entity" (meaning a person or entity that, directly or indirectly: controls the Disclosing Party, is controlled by the Disclosing Party, or is, with the Disclosing Party, under common control of another person or entity). Indicia of control include, without limitation: interlocking management or ownership; identity of interests among family members, shared facilities and equipment; common use of employees; or organization of a business entity following the ineligibility of a business entity to do business with federal or state or local government, including the City, using substantially the same management, ownership, or principals as the ineligible entity. With respect to Contractors, the term Affiliated Entity means a person or entity that directly or indirectly controls the Contractor, is controlled by it, or, with the Contractor, is under common control of another person or entity;
- any responsible official of the Disclosing Party, any Contractor or any Affiliated Entity or any other official, agent or employee of the Disclosing Party, any Contractor or any Affiliated Entity, acting pursuant to the direction or authorization of a responsible official of the Disclosing Party, any Contractor or any Affiliated Entity (collectively "Agents").

Neither the Disclosing Party, nor any Contractor, nor any Affiliated Entity of either the Disclosing Party or any Contractor, nor any Agents have, during the 5 years before the date of this EDS, or, with respect to a Contractor, an Affiliated Entity, or an Affiliated Entity of a Contractor during the 5 years before the date of such Contractor's or Affiliated Entity's contract or engagement in connection with the Matter:

a. bribed or attempted to bribe, or been convicted or adjudged guilty of bribery or attempting to bribe, a public officer or employee of the City, the State of Illinois, or any agency of the federal government or of any state or local government in the United States of America, in that officer's or employee's official capacity;

b. agreed or colluded with other bidders or prospective bidders, or been a party to any such agreement, or been convicted or adjudged guilty of agreement or collusion among bidders or prospective bidders, in restraint of freedom of competition by agreement to bid a fixed price or otherwise; or

c. made an admission of such conduct described in subparagraph (a) or (b) above that is a matter of record, but have not been prosecuted for such conduct; or

d. violated the provisions referenced in MCC Subsection 2-92-320(a)(4)(Contracts Requiring a Base Wage); (a)(5)(Debarment Regulations); or (a)(6)(Minimum Wage Ordinance).

6. Neither the Disclosing Party, nor any Affiliated Entity or Contractor, or any of their employees, officials, agents or partners, is barred from contracting with any unit of state or local government as a result of engaging in or being convicted of (1) bid-rigging in violation of 720 ILCS 5/33E-3; (2) bid-rotating in violation of 720 ILCS 5/33E-4; or (3) any similar offense of any state or of the United States of America that contains the same elements as the offense of bid-rigging or bid-rotating.

7. Neither the Disclosing Party nor any Affiliated Entity is listed on a Sanctions List maintained by the United States Department of Commerce, State, or Treasury, or any successor federal agency.

8. [FOR APPLICANT ONLY] (i) Neither the Applicant nor any controlling person [see MCC Chapter 1-23, Article I for applicability and defined terms] of the Applicant is currently indicted or charged with, or has admitted guilt of, or has ever been convicted of, or placed under supervision for, any criminal offense involving actual, attempted, or conspiracy to commit bribery, theft, fraud, forgery, perjury, dishonesty or deceit against an officer or employee of the City or any sister agency; and (ii) the Applicant understands and acknowledges that compliance with Article I is a continuing requirement for doing business with the City. NOTE: If MCC Chapter 1-23, Article I applies to the Applicant, that Article=s permanent compliance timeframe supersedes 5-year compliance timeframes in this Section V.

9. [FOR APPLICANT ONLY] The Applicant and its Affiliated Entities will not use, nor permit their subcontractors to use, any facility listed as having an active exclusion by the U.S. EPA on the federal System for Award Management (SAM).

10. [FOR APPLICANT ONLY] The Applicant will obtain from any contractors/subcontractors hired or to be hired in connection with the Matter certifications equal in form and substance to those in Certifications (2) and (9) above and will not, without the prior written consent of the City, use any such

contractor/subcontractor that does not provide such certifications or that the Applicant has reason to believe has not provided or cannot provide truthful certifications.

11. If the Disclosing Party is unable to certify to any of the above statements in this Part B (Further Certifications), the Disclosing Party must explain below:
Please see Attachment D (eDocs#25698781).

If the letters "NA," the word "None," or no response appears on the lines above, it will be conclusively presumed that the Disclosing Party certified to the above statements.

12. To the best of the Disclosing Party's knowledge after reasonable inquiry, the following is a complete list of all current employees of the Disclosing Party who were, at any time during the 12-month period preceding the date of this EDS, an employee, or elected or appointed official, of the City of Chicago (if none, indicate with N/A or none).
Victoria Howard, City Colleges of Chicago ; James Fitzpatrick, Supervisor Detective Division

13. To the best of the Disclosing Party's knowledge after reasonable inquiry, the following is a complete list of all gifts that the Disclosing Party has given or caused to be given, at any time during the 12-month period preceding the execution date of this EDS, to an employee, or elected or appointed official, of the City of Chicago. For purposes of this statement, a gift does not include: (i) anything made generally available to City employees or to the general public, or (ii) food or drink provided in the course of official City business and having a retail value of less than $25 per recipient, or (iii) a political contribution otherwise duly reported as required by law (if none, indicate with N/A or none). As to any gift listed below, please also list the name of the City recipient.
None

C. CERTIFICATION OF STATUS AS FINANCIAL INSTITUTION

1. The Disclosing Party certifies that the Disclosing Party (check one)
[X] is [ ] is not

a "financial institution" as defined in MCC Section 2-32-455(b).

2. If the Disclosing Party IS a financial institution, then the Disclosing Party pledges:

"We are not and will not become a predatory lender as defined in MCC Chapter 2-32. We further pledge that none of our affiliates is, and none of them will become, a predatory lender as defined in MCC Chapter 2-32. We understand that becoming a predatory lender or becoming an affiliate of a predatory lender may result in the loss of the privilege of doing business with the City."

If the Disclosing Party is unable to make this pledge because it or any of its affiliates (as defined in MCC Section 2-32-455(b)) is a predatory lender within the meaning of MCC Chapter 2-32, explain here (attach additional pages if necessary):

If the letters "NA," the word "None," or no response appears on the lines above, it will be conclusively presumed that the Disclosing Party certified to the above statements.

D. CERTIFICATION REGARDING FINANCIAL INTEREST IN CITY BUSINESS

Any words or terms defined in MCC Chapter 2-156 have the same meanings if used in this Part D.

1. In accordance with MCC Section 2-156-110: To the best of the Disclosing Party's knowledge after reasonable inquiry, does any official or employee of the City have a financial interest in his or her own name or in the name of any other person or entity in the Matter?

[ ] Yes [X] No

NOTE: If you checked "Yes" to Item D(1), proceed to Items D(2) and D(3). If you checked "No" to Item D(1), skip Items D(2) and D(3) and proceed to Part E.

2. Unless sold pursuant to a process of competitive bidding, or otherwise permitted, no City elected official or employee shall have a financial interest in his or her own name or in the name of any other person or entity in the purchase of any property that (i) belongs to the City, or (ii) is sold for taxes or assessments, or (iii) is sold by virtue of legal process at the suit of the City (collectively, "City Property Sale"). Compensation for property taken pursuant to the City's eminent domain power does not constitute a financial interest within the meaning of this Part D.

Does the Matter involve a City Property Sale?

[ ] Yes [X] No

3. If you checked "Yes" to Item D(1), provide the names and business addresses of the City officials or employees having such financial interest and identify the nature of the financial interest:

Name	Business Address	Nature of Financial Interest

4. The Disclosing Party further certifies that no prohibited financial interest in the Matter will be acquired by any City official or employee.

E. CERTIFICATION REGARDING SLAVERY ERA BUSINESS

Please check either (1) or (2) below. If the Disclosing Party checks (2), the Disclosing Party must disclose below or in an attachment to this EDS all information required by (2). Failure to comply with these disclosure requirements may make any contract entered into with the City in connection with the Matter voidable by the City.

____1. The Disclosing Party verifies that the Disclosing Party has searched any and all records of the Disclosing Party and any and all predecessor entities regarding records of investments or profits from slavery or slaveholder insurance policies during the slavery era (including insurance policies issued to slaveholders that provided coverage for damage to or injury or death of their slaves), and the Disclosing Party has found no such records.

_X_ 2. The Disclosing Party verifies that, as a result of conducting the search in step (1) above, the Disclosing Party has found records of investments or profits from slavery or slaveholder insurance policies. The Disclosing Party verifies that the following constitutes full disclosure of all such records, including the names of any and all slaves or slaveholders described in those records: Please see Attachment E (eDocs# 25766000)

SECTION VI -- CERTIFICATIONS FOR FEDERALLY FUNDED MATTERS

NOTE: If the Matter is federally funded, complete this Section VI. **If the Matter is not federally funded**, proceed to Section VII. For purposes of this Section VI, tax credits allocated by the City and proceeds of debt obligations of the City are not federal funding.

A. CERTIFICATION REGARDING LOBBYING – N/A

1. List below the names of all persons or entities registered under the federal Lobbying Disclosure Act of 1995, as amended, who have made lobbying contacts on behalf of the Disclosing Party with respect to the Matter: (Add sheets if necessary):

(If no explanation appears or begins on the lines above, or if the letters "NA" or if the word "None" appear, it will be conclusively presumed that the Disclosing Party means that NO persons or entities registered under the Lobbying Disclosure Act of 1995, as amended, have made lobbying contacts on behalf of the Disclosing Party with respect to the Matter.)

2. The Disclosing Party has not spent and will not expend any federally appropriated funds to pay any person or entity listed in paragraph A(1) above for his or her lobbying activities or to pay any person or entity to influence or attempt to influence an officer or employee of any agency, as defined by applicable federal law, a member of Congress, an officer or employee of Congress, or an employee

of a member of Congress, in connection with the award of any federally funded contract, making any federally funded grant or loan, entering into any cooperative agreement, or to extend, continue, renew, amend, or modify any federally funded contract, grant, loan, or cooperative agreement.

3. The Disclosing Party will submit an updated certification at the end of each calendar quarter in which there occurs any event that materially affects the accuracy of the statements and information set forth in paragraphs A(1) and A(2) above.

4. The Disclosing Party certifies that either: (i) it is not an organization described in section 501(c)(4) of the Internal Revenue Code of 1986; or (ii) it is an organization described in section 501(c)(4) of the Internal Revenue Code of 1986 but has not engaged and will not engage in "Lobbying Activities," as that term is defined in the Lobbying Disclosure Act of 1995, as amended.

5. If the Disclosing Party is the Applicant, the Disclosing Party must obtain certifications equal in form and substance to paragraphs A(1) through A(4) above from all subcontractors before it awards any subcontract and the Disclosing Party must maintain all such subcontractors' certifications for the duration of the Matter and must make such certifications promptly available to the City upon request.

B. CERTIFICATION REGARDING EQUAL EMPLOYMENT OPPORTUNITY – N/A

If the Matter is federally funded, federal regulations require the Applicant and all proposed subcontractors to submit the following information with their bids or in writing at the outset of negotiations.

Is the Disclosing Party the Applicant?
[ ] Yes [ ] No

If Yes, answer the three questions below:

1. Have you developed and do you have on file affirmative action programs pursuant to applicable federal regulations? (See 41 CFR Part 60-2.)
[ ] Yes [ ] No

2. Have you filed with the Joint Reporting Committee, the Director of the Office of Federal Contract Compliance Programs, or the Equal Employment Opportunity Commission all reports due under the applicable filing requirements?
[ ] Yes [ ] No [ ] Reports not required

3. Have you participated in any previous contracts or subcontracts subject to the equal opportunity clause?
[ ] Yes [ ] No

If you checked No to question (1) or (2) above, please provide an explanation:

SECTION VII -- FURTHER ACKNOWLEDGMENTS AND CERTIFICATION

The Disclosing Party understands and agrees that:

A. The certifications, disclosures, and acknowledgments contained in this EDS will become part of any contract or other agreement between the Applicant and the City in connection with the Matter, whether procurement, City assistance, or other City action, and are material inducements to the City's execution of any contract or taking other action with respect to the Matter. The Disclosing Party understands that it must comply with all statutes, ordinances, and regulations on which this EDS is based.

B. The City's Governmental Ethics Ordinance, MCC Chapter 2-156, imposes certain duties and obligations on persons or entities seeking City contracts, work, business, or transactions. The full text of this ordinance and a training program is available on line at www.cityofchicago.org/Ethics, and may also be obtained from the City's Board of Ethics, 740 N. Sedgwick St., Suite 500, Chicago, IL 60610, (312) 744-9660. The Disclosing Party must comply fully with this ordinance.

C. If the City determines that any information provided in this EDS is false, incomplete or inaccurate, any contract or other agreement in connection with which it is submitted may be rescinded or be void or voidable, and the City may pursue any remedies under the contract or agreement (if not rescinded or void), at law, or in equity, including terminating the Disclosing Party's participation in the Matter and/or declining to allow the Disclosing Party to participate in other City transactions. Remedies at law for a false statement of material fact may include incarceration and an award to the City of treble damages.

D. It is the City's policy to make this document available to the public on its Internet site and/or upon request. Some or all of the information provided in, and appended to, this EDS may be made publicly available on the Internet, in response to a Freedom of Information Act request, or otherwise. By completing and signing this EDS, the Disclosing Party waives and releases any possible rights or claims which it may have against the City in connection with the public release of information contained in this EDS and also authorizes the City to verify the accuracy of any information submitted in this EDS.

E. The information provided in this EDS must be kept current. In the event of changes, the Disclosing Party must supplement this EDS up to the time the City takes action on the Matter. If the Matter is a contract being handled by the City's Department of Procurement Services, the Disclosing Party must update this EDS as the contract requires. **NOTE:** With respect to Matters subject to MCC Chapter 1-23, Article I (imposing **PERMANENT INELIGIBILITY** for certain specified offenses), the information provided herein regarding eligibility must be kept current for a longer period, as required by MCC Chapter 1-23 and Section 2-154-020.

CERTIFICATION

Under penalty of perjury, the person signing below: (1) warrants that he/she is authorized to execute this EDS, and all applicable Appendices, on behalf of the Disclosing Party, and (2) warrants that all certifications and statements contained in this EDS, and all applicable Appendices, are true, accurate and complete as of the date furnished to the City.

APPENDIX A

FAMILIAL RELATIONSHIPS WITH ELECTED CITY OFFICIALS AND DEPARTMENT HEADS

This Appendix is to be completed only by (a) the Applicant, and (b) any legal entity which has a direct ownership interest in the Applicant exceeding 7.5%. It is not to be completed by any legal entity which has only an indirect ownership interest in the Applicant.

Under MCC Section 2-154-015, the Disclosing Party must disclose whether such Disclosing Party or any Applicable Party or any Spouse or Domestic Partner thereof currently has a familial relationship with any elected city official or department head. A familial relationship exists if, as of the date this EDS is signed, the Disclosing Party or any Applicable Party or any Spouse or Domestic Partner thereof is related to the mayor, any alderman, the city clerk, the city treasurer or any city department head as spouse or domestic partner or as any of the following, whether by blood or adoption: parent, child, brother or sister, aunt or uncle, niece or nephew, grandparent, grandchild, father-in-law, mother-in-law, son-in-law, daughter-in-law, stepfather or stepmother, stepson or stepdaughter, stepbrother or stepsister or half-brother or half-sister.

Applicable Party means (1) all executive officers of the Disclosing Party listed in Section II.B.1.a., if the Disclosing Party is a corporation; all partners of the Disclosing Party, if the Disclosing Party is a general partnership; all general partners and limited partners of the Disclosing Party, if the Disclosing Party is a limited partnership; all managers, managing members and members of the Disclosing Party, if the Disclosing Party is a limited liability company; (2) all principal officers of the Disclosing Party; and (3) any person having more than a 7.5% ownership interest in the Disclosing Party. Principal officers means the president, chief operating officer, executive director, chief financial officer, treasurer or secretary of a legal entity or any person exercising similar authority.

Does the Disclosing Party or any Applicable Party or any Spouse or Domestic Partner thereof currently have a familial relationship with an elected city official or department head?

[ ] Yes [X] No

If yes, please identify below (1) the name and title of such person, (2) the name of the legal entity to which such person is connected; (3) the name and title of the elected city official or department head to whom such person has a familial relationship, and (4) the precise nature of such familial relationship.

BUILDING CODE SCOFFLAW/PROBLEM LANDLORD CERTIFICATION

This Appendix is to be completed only by (a) the Applicant, and (b) any legal entity which has a direct ownership interest in the Applicant exceeding 7.5% (an "Owner"). It is not to be completed by any legal entity which has only an indirect ownership interest in the Applicant.

1. Pursuant to MCC Section 2-154-010, is the Applicant or any Owner identified as a building code scofflaw or problem landlord pursuant to MCC Section 2-92-416?

[ ] Yes [X] No

2. If the Applicant is a legal entity publicly traded on any exchange, is any officer or director of the Applicant identified as a building code scofflaw or problem landlord pursuant to MCC Section 2-92-416?

[ ] Yes [] No [X] The Applicant is not publicly traded on any exchange.

3. If yes to (1) or (2) above, please identify below the name of each person or legal entity identified as a building code scofflaw or problem landlord and the address of each building or buildings to which the pertinent code violations apply.

APPENDIX C

PROHIBITION ON WAGE & SALARY HISTORY SCREENING - CERTIFICATION

This Appendix is to be completed only by an Applicant that is completing this EDS as a "contractor" as defined in MCC Section 2-92-385. That section, which should be consulted (www.amlegal.com), generally covers a party to any agreement pursuant to which they: (i) receive City of Chicago funds in consideration for services, work or goods provided (including for legal or other professional services), or (ii) pay the City money for a license, grant or concession allowing them to conduct a business on City premises.

On behalf of an Applicant that is a contractor pursuant to MCC Section 2-92-385, I hereby certify that the Applicant is in compliance with MCC Section 2-92-385(b)(1) and (2), which prohibit: (i) screening job applicants based on their wage or salary history, or (ii) seeking job applicants' wage or salary history from current or former employers. I also certify that the Applicant has adopted a policy that includes those prohibitions.

[X] Yes

[ ] No

[ ] N/A – I am not an Applicant that is a "contractor" as defined in MCC Section 2-92-385.

This certification shall serve as the affidavit required by MCC Section 2-92-385(c)(1).

If you checked "no" to the above, please explain.

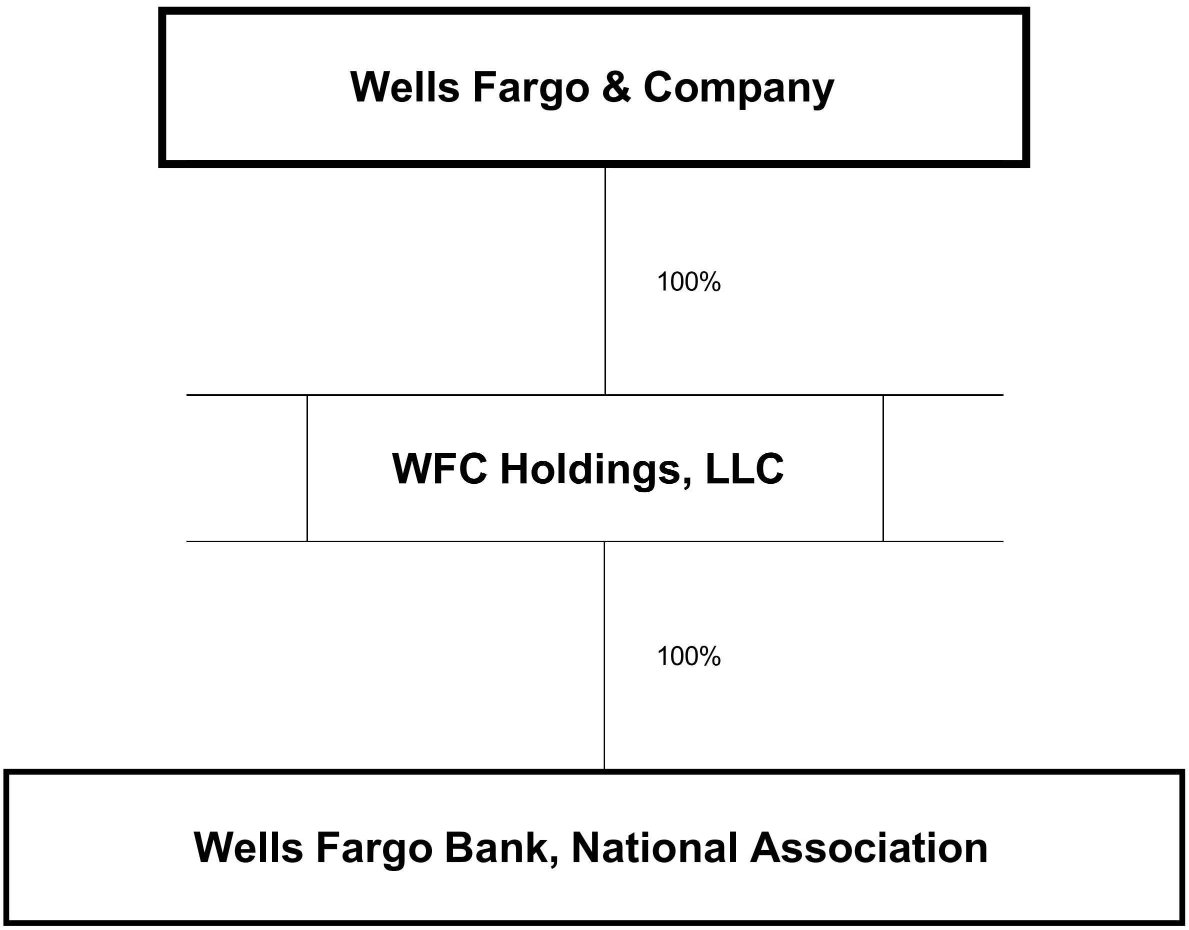
Ather Williams III	Senior Executive Vice President and Head of Strategy, Digital Platform, and Innovation

Ownership of Wells Fargo Bank, National Association



Attachment "B.2"

<u>Section II – Disclosure of Ownership Interests</u>

As disclosed in the Notice of Annual Meeting and Proxy Statement, dated March 15, 2023, of Wells Fargo & Company ("Wells Fargo"), The Vanguard Group, Inc. and certain entities controlled or under common control with The Vanguard Group, Inc. (collectively the "Reporting Persons") held approximately 8.78% of outstanding publicly traded common stock of Wells Fargo as of February 24, 2023. On information and belief, and in reliance on the statements made by The Vanguard Group, Inc. in a Schedule 13G filed with the SEC on February 9, 2023, the reported holdings represented shares of Wells Fargo's common stock acquired by the Reporting Persons as passive investors and held in the ordinary course of business, without any intent to acquire, change, or influence control of Wells Fargo. Wells Fargo does not know if the Reporting Persons currently hold more that 7.5% of its outstanding common stock. In any event, Wells Fargo has no authority or ability to require the Reporting Persons to file, and the Reporting Persons are under no obligation to assist or cooperate with Wells Fargo in filing, an EDS.

Attachment "C"

Section III – Income or Compensation to, or Ownership by, City Elected Officials

The undersigned warrants, to the best of his knowledge after due inquiry, that the Disclosing Party has not provided any income or compensation to any City elected official in 12 months before, nor does the undersigned reasonably expect to during the 12-month period following, the date the undersigned has signed this EDS. As the date of this filing, the undersigned is in the process of completing our due diligence on Independent Contracts, when completed we will update this response if needed.

Note that in the ordinary course of its business, Wells Fargo makes loans of various types with individuals and businesses. We have determined that these loans do not constitute a "business relationship" as defined in Chapter 2-156 of the Municipal Code.

Note further that the Disclosing Party has no way of identifying spouses or domestic partners of any City elected official, or the identities of any entities in which any city elected official or his or her spouse or domestic partner has a financial interest, and thus limits its certification to "City elected officials" as specially required by Section III. Specifically, we made due inquiry with respect to the City's Aldermen, the Mayor, the Treasurer and the City Clerk.

City of Chicago

Economic Disclosure Statement

Specification 1279244

Attachment D

To the extent any litigation or regulatory matters are required to be reported, they are disclosed in Wells Fargo's SEC filings and are matters of public record:

- Copies of the Legal Proceedings sections from Wells Fargo's recent public filings and most recent periodic reports are available at https://www.wellsfargo.com/invest_relations/filings.
- Wells Fargo's Annual Reports are available at https://www.wellsfargo.com/invest_relations/annual.

APPENDIX III

SLAVERY ERA BUSINESS SUMMARY

After years of research, Wells Fargo has found no records in its possession that indicate it – or any entities it acquired before the Wachovia merger – had ever financed slavery, held slaves as collateral, owned slaves, or profited from slavery.

Furthermore, Wells Fargo has found no records in its possession that entities it acquired after the Wachovia merger had financed slavery, held slaves as collateral, owned slaves, or profited from slavery.

With the Wachovia merger completed as of December 31, 2008, Wells Fargo inherited hundreds of Wachovia's predecessor financial institutions, including two that had extensive involvement in slavery. In 2005 Wachovia announced these findings and apologized for the role its predecessors played and renewed its commitment to preserve and promote the history of the African-American experience in our nation. Wells Fargo shares that commitment and affirms its long-standing opposition to slavery.

The following narrative summarizes the results of the research that has been performed regarding Wachovia Bank and its ties to slavery.

SUMMARY OF RESEARCH

External research has revealed that two predecessor institutions of the undersigned, the Georgia Railroad & Banking Company and the Bank of Charleston, owned slaves.

Due to incomplete records, the undersigned cannot determine exactly how many slaves either the Georgia Railroad and Banking Company or the Bank of Charleston owned. Through specific transactional records, researchers determined that the Georgia Railroad and Banking Company owned at least 162 slaves, and the Bank of Charleston accepted at least 529 slaves as collateral on mortgaged properties or loans and acquired an undetermined number of these individuals when customers defaulted on their loans.

The Georgia Railroad and Banking Company was founded in 1833 to complete a railroad line between the City of Augusta and the interior of the state of Georgia. The company relied on slave labor for the construction and maintenance of this railway. According to the existing and searchable bank records, 162 slaves were owned or authorized to be purchased by the Georgia Railroad and Banking Company between 1836 and 1842. In addition, the company awarded work to contractors who purchased at least 400 slaves to perform work on the railways.

The Bank of Charleston, founded in 1834, issued loans and mortgages where enslaved individuals were used as collateral. A review of the bank's account ledgers revealed a minimum of 24 transactions involving reference to 529 enslaved individuals being used

as collateral. In most cases, the loan was paid on schedule, and the bank never took possession of slaves that were pledged as collateral on the loan. In several documented instances, however, customers defaulted on their loans and the Bank of Charleston took actual possession of slaves. The total number of slaves of whom the bank took possession cannot be accurately tallied due to the lack of records.

In addition, eleven predecessor companies were determined to have profited more indirectly from slavery through the following means:

- Founders, directors, or account holders who owned slaves and/or profited directly from slavery;
- Investing in or transacting business with companies or individuals that owned slaves;
- Investing in the bonds of slave states and municipalities;
- Investing in U.S. government bonds during years when the United States permitted and profited from slave labor directly through taxation.

These institutions are:

- Bank of North America (Philadelphia, Pa.)
- Bank of Baltimore
- The Philadelphia Bank (later Philadelphia National Bank)
- Farmers' & Mechanics' Bank of Philadelphia
- Pennsylvania Company for Insurances on Lives and the Granting of Annuities
- State Bank of Elizabeth (Elizabeth, N.J.)
- State Bank of Newark (Newark, N.J.)
- Savings Bank of Baltimore
- Girard National Bank
- The Carswell Group (established in 1868, acquired by Palmer & Cay, Inc. in 1985)
- The Trenton Banking Company

CITY OF CHICAGO
ECONOMIC DISCLOSURE STATEMENT
AND AFFIDAVIT

SECTION I -- GENERAL INFORMATION

A. Legal name of the Disclosing Party submitting this EDS. Include d/b/a/ if applicable:

WFC Holdings, LLC

Check ONE of the following three boxes:

Indicate whether the Disclosing Party submitting this EDS is:

1. [ ] the Applicant

OR

2. [ ] a legal entity currently holding, or anticipated to hold within six months after City action on the contract, transaction or other undertaking to which this EDS pertains (referred to below as the "Matter"), a direct or indirect interest in excess of 7.5% in the Applicant. State the Applicant=s legal name: ______________________

OR

3. [X] a legal entity with a direct or indirect right of control of the Applicant (see Section II(B)(1)) State the legal name of the entity in which the Disclosing Party holds a right of control: Wells Fargo Bank, N.A.

B. Business address of the Disclosing Party: 420 Montgomery Street, San Francisco, CA 94163

C. Telephone: 612-316-3963 Fax: Not available

Email: David.R.Offord@wellsfargo.com

D. Name of contact person: David Offord

E. Federal Employer Identification No. (if you have one): 41-1921346

F. Brief description of the Matter to which this EDS pertains. (Include project number and location of property, if applicable):

2024 Municipal Depository for City of Chicago and Chicago Board of Education

G. Which City agency or department is requesting this EDS? Department of Finance

If the Matter is a contract being handled by the City's Department of Procurement Services, please complete the following:

Specification # ______________________ and Contract # ______________________

SECTION II -- DISCLOSURE OF OWNERSHIP INTERESTS

A. NATURE OF THE DISCLOSING PARTY

1. Indicate the nature of the Disclosing Party:

[ ] Person
[ ] Publicly registered business corporation
[ ] Privately held business corporation
[ ] Sole proprietorship
[ ] General partnership
[ ] Limited partnership
[ ] Trust
[X] Limited liability company
[ ] Limited liability partnership
[ ] Joint venture
[ ] Not-for-profit corporation
(Is the not-for-profit corporation also a 501(c)(3))?
[ ] Yes [ ] No
[ ] Other (please specify)

2. For legal entities, the state (or foreign country) of incorporation or organization, if applicable:

Delaware

3. For legal entities not organized in the State of Illinois: Has the organization registered to do business in the State of Illinois as a foreign entity?

[ ] Yes [X] No [ ] Organized in Illinois

B. IF THE DISCLOSING PARTY IS A LEGAL ENTITY:

1. List below the full names and titles, if applicable, of: (i) all executive officers and all directors of the entity; (ii) **for not-for-profit corporations**, all members, if any, which are legal entities (if there are no such members, write "no members which are legal entities"); (iii) **for trusts, estates or other similar entities**, the trustee, executor, administrator, or similarly situated party; (iv) **for general or limited partnerships, limited liability companies, limited liability partnerships or joint ventures**, each general partner, managing member, manager or any other person or legal entity that directly or indirectly controls the day-to-day management of the Applicant.

NOTE: Each legal entity listed below must submit an EDS on its own behalf.

Name Title

Please see Attachment A (eDocs#25733499)

2. Please provide the following information concerning each person or legal entity having a direct or indirect, current or prospective (i.e. within 6 months after City action) beneficial interest (including ownership) in excess of 7.5% of the Applicant. Examples of such an interest include shares in a corporation, partnership interest in a partnership or joint venture, interest of a member or manager in a

limited liability company, or interest of a beneficiary of a trust, estate or other similar entity. If none, state None.

NOTE: Each legal entity listed below may be required to submit an EDS on its own behalf.

Name	Business Address	Percentage Interest in the Applicant
Please see Attachment B.1 (eDocs#2573341) and Attachment B.2 (eDocs # 25708606)		

SECTION III -- INCOME OR COMPENSATION TO, OR OWNERSHIP BY, CITY ELECTED OFFICIALS

Has the Disclosing Party provided any income or compensation to any City elected official during the 12-month period preceding the date of this EDS? [ ] Yes [X] No

Does the Disclosing Party reasonably expect to provide any income or compensation to any City elected official during the 12-month period following the date of this EDS? [ ] Yes [X] No

If yes to either of the above, please identify below the name(s) of such City elected official(s) and describe such income or compensation:
Please see Attachment C (eDocs#25708795)

Does any City elected official or, to the best of the Disclosing Party's knowledge after reasonable inquiry, any City elected official's spouse or domestic partner, have a financial interest (as defined in Chapter 2-156 of the Municipal Code of Chicago (MCC)) in the Disclosing Party?
[ ] Yes [X] No

If "yes," please identify below the name(s) of such City elected official(s) and/or spouse(s)/domestic partner(s) and describe the financial interest(s).
Please see Attachment C (eDocs# 25708795)

SECTION IV -- DISCLOSURE OF SUBCONTRACTORS AND OTHER RETAINED PARTIES

The Disclosing Party must disclose the name and business address of each subcontractor, attorney, lobbyist (as defined in MCC Chapter 2-156), accountant, consultant and any other person or entity whom the Disclosing Party has retained or expects to retain in connection with the Matter, as well as the nature of the relationship, and the total amount of the fees paid or estimated to be paid. The Disclosing Party is not required to disclose employees who are paid solely through the Disclosing Party's regular payroll. If the Disclosing Party is uncertain whether a disclosure is required under this Section, the Disclosing Party must either ask the City whether disclosure is required or make the disclosure.

Name (indicate whether retained or anticipated to be retained)	Business Address	Relationship to Disclosing Party (subcontractor, attorney, lobbyist, etc.)	Fees (indicate whether paid or estimated.) **NOTE:** hourly rate or t.b.d. is not an acceptable response.
None			

(Add sheets if necessary)

[X] Check here if the Disclosing Party has not retained, nor expects to retain, any such persons or entities.

SECTION V -- CERTIFICATIONS

A. COURT-ORDERED CHILD SUPPORT COMPLIANCE

Under MCC Section 2-92-415, substantial owners of business entities that contract with the City must remain in compliance with their child support obligations throughout the contract's term.

Has any person who directly or indirectly owns 10% or more of the Disclosing Party been declared in arrearage on any child support obligations by any Illinois court of competent jurisdiction?

[ ] Yes [ ] No [X] No person directly or indirectly owns 10% or more of the Disclosing Party.

If Yes, has the person entered into a court-approved agreement for payment of all support owed and is the person in compliance with that agreement?

[ ] Yes [ ] No

B. FURTHER CERTIFICATIONS

1. [This paragraph 1 applies only if the Matter is a contract being handled by the City's Department of Procurement Services.] In the 5-year period preceding the date of this EDS, neither the Disclosing Party nor any Affiliated Entity [see definition in (5) below] has engaged, in connection with the performance of any public contract, the services of an integrity monitor, independent private sector inspector general, or integrity compliance consultant (i.e., an individual or entity with legal, auditing, investigative, or other similar skills, designated by a public agency to help the agency monitor the activity of specified agency vendors as well as help the vendors reform their business practices so they can be considered for agency contracts in the future, or continue with a contract in progress).

2. The Disclosing Party and its Affiliated Entities are not delinquent in the payment of any fine, fee, tax or other source of indebtedness owed to the City of Chicago, including, but not limited to, water and sewer charges, license fees, parking tickets, property taxes and sales taxes, nor is the Disclosing Party delinquent in the payment of any tax administered by the Illinois Department of Revenue.

3. The Disclosing Party and, if the Disclosing Party is a legal entity, all of those persons or entities identified in Section II(B)(1) of this EDS:

a. are not presently debarred, suspended, proposed for debarment, declared ineligible or voluntarily excluded from any transactions by any federal, state or local unit of government;

b. have not, during the 5 years before the date of this EDS, been convicted of a criminal offense, adjudged guilty, or had a civil judgment rendered against them in connection with: obtaining, attempting to obtain, or performing a public (federal, state or local) transaction or contract under a public transaction; a violation of federal or state antitrust statutes; fraud; embezzlement; theft; forgery; bribery; falsification or destruction of records; making false statements; or receiving stolen property;

c. are not presently indicted for, or criminally or civilly charged by, a governmental entity (federal, state or local) with committing any of the offenses set forth in subparagraph (b) above;

d. have not, during the 5 years before the date of this EDS, had one or more public transactions (federal, state or local) terminated for cause or default; and

e. have not, during the 5 years before the date of this EDS, been convicted, adjudged guilty, or found liable in a civil proceeding, or in any criminal or civil action, including actions concerning environmental violations, instituted by the City or by the federal government, any state, or any other unit of local government.

4. The Disclosing Party understands and shall comply with the applicable requirements of MCC Chapters 2-56 (Inspector General) and 2-156 (Governmental Ethics).

5. Certifications (5), (6) and (7) concern:
- the Disclosing Party;
- any Contractor (meaning any contractor or subcontractor used by the Disclosing Party in connection with the Matter, including but not limited to all persons or legal entities disclosed under Section IV, Disclosure of Subcontractors and Other Retained Parties);
- any "Affiliated Entity" (meaning a person or entity that, directly or indirectly: controls the Disclosing Party, is controlled by the Disclosing Party, or is, with the Disclosing Party, under common control of another person or entity). Indicia of control include, without limitation: interlocking management or ownership; identity of interests among family members, shared facilities and equipment; common use of employees; or organization of a business entity following the ineligibility of a business entity to do business with federal or state or local government, including the City, using substantially the same management, ownership, or principals as the ineligible entity. With respect to Contractors, the term Affiliated Entity means a person or entity that directly or indirectly controls the Contractor, is controlled by it, or, with the Contractor, is under common control of another person or entity;
- any responsible official of the Disclosing Party, any Contractor or any Affiliated Entity or any other official, agent or employee of the Disclosing Party, any Contractor or any Affiliated Entity, acting pursuant to the direction or authorization of a responsible official of the Disclosing Party, any Contractor or any Affiliated Entity (collectively "Agents").

Neither the Disclosing Party, nor any Contractor, nor any Affiliated Entity of either the Disclosing Party or any Contractor, nor any Agents have, during the 5 years before the date of this EDS, or, with respect to a Contractor, an Affiliated Entity, or an Affiliated Entity of a Contractor during the 5 years before the date of such Contractor's or Affiliated Entity's contract or engagement in connection with the Matter:

a. bribed or attempted to bribe, or been convicted or adjudged guilty of bribery or attempting to bribe, a public officer or employee of the City, the State of Illinois, or any agency of the federal government or of any state or local government in the United States of America, in that officer's or employee's official capacity;

b. agreed or colluded with other bidders or prospective bidders, or been a party to any such agreement, or been convicted or adjudged guilty of agreement or collusion among bidders or prospective bidders, in restraint of freedom of competition by agreement to bid a fixed price or otherwise; or

c. made an admission of such conduct described in subparagraph (a) or (b) above that is a matter of record, but have not been prosecuted for such conduct; or

d. violated the provisions referenced in MCC Subsection 2-92-320(a)(4)(Contracts Requiring a Base Wage); (a)(5)(Debarment Regulations); or (a)(6)(Minimum Wage Ordinance).

6. Neither the Disclosing Party, nor any Affiliated Entity or Contractor, or any of their employees, officials, agents or partners, is barred from contracting with any unit of state or local government as a result of engaging in or being convicted of (1) bid-rigging in violation of 720 ILCS 5/33E-3; (2) bid-rotating in violation of 720 ILCS 5/33E-4; or (3) any similar offense of any state or of the United States of America that contains the same elements as the offense of bid-rigging or bid-rotating.

7. Neither the Disclosing Party nor any Affiliated Entity is listed on a Sanctions List maintained by the United States Department of Commerce, State, or Treasury, or any successor federal agency.

8. [FOR APPLICANT ONLY] (i) Neither the Applicant nor any controlling person [see MCC Chapter 1-23, Article I for applicability and defined terms] of the Applicant is currently indicted or charged with, or has admitted guilt of, or has ever been convicted of, or placed under supervision for, any criminal offense involving actual, attempted, or conspiracy to commit bribery, theft, fraud, forgery, perjury, dishonesty or deceit against an officer or employee of the City or any sister agency; and (ii) the Applicant understands and acknowledges that compliance with Article I is a continuing requirement for doing business with the City. NOTE: If MCC Chapter 1-23, Article I applies to the Applicant, that Article=s permanent compliance timeframe supersedes 5-year compliance timeframes in this Section V.

9. [FOR APPLICANT ONLY] The Applicant and its Affiliated Entities will not use, nor permit their subcontractors to use, any facility listed as having an active exclusion by the U.S. EPA on the federal System for Award Management (SAM).

10. [FOR APPLICANT ONLY] The Applicant will obtain from any contractors/subcontractors hired or to be hired in connection with the Matter certifications equal in form and substance to those in Certifications (2) and (9) above and will not, without the prior written consent of the City, use any such

contractor/subcontractor that does not provide such certifications or that the Applicant has reason to believe has not provided or cannot provide truthful certifications.

11. If the Disclosing Party is unable to certify to any of the above statements in this Part B (Further Certifications), the Disclosing Party must explain below:
Please see EDOCS # 25698781 (Attachment D).

If the letters "NA," the word "None," or no response appears on the lines above, it will be conclusively presumed that the Disclosing Party certified to the above statements.

12. To the best of the Disclosing Party's knowledge after reasonable inquiry, the following is a complete list of all current employees of the Disclosing Party who were, at any time during the 12-month period preceding the date of this EDS, an employee, or elected or appointed official, of the City of Chicago (if none, indicate with N/A or none).
Victoria Howard, City Colleges of Chicago; James Fitzpatrick, Supervisor Detective Division

13. To the best of the Disclosing Party's knowledge after reasonable inquiry, the following is a complete list of all gifts that the Disclosing Party has given or caused to be given, at any time during the 12-month period preceding the execution date of this EDS, to an employee, or elected or appointed official, of the City of Chicago. For purposes of this statement, a gift does not include: (i) anything made generally available to City employees or to the general public, or (ii) food or drink provided in the course of official City business and having a retail value of less than $25 per recipient, or (iii) a political contribution otherwise duly reported as required by law (if none, indicate with N/A or none). As to any gift listed below, please also list the name of the City recipient.
None

C. CERTIFICATION OF STATUS AS FINANCIAL INSTITUTION

1. The Disclosing Party certifies that the Disclosing Party (check one)
[X] is [ ] is not

a "financial institution" as defined in MCC Section 2-32-455(b).

2. If the Disclosing Party IS a financial institution, then the Disclosing Party pledges:

"We are not and will not become a predatory lender as defined in MCC Chapter 2-32. We further pledge that none of our affiliates is, and none of them will become, a predatory lender as defined in MCC Chapter 2-32. We understand that becoming a predatory lender or becoming an affiliate of a predatory lender may result in the loss of the privilege of doing business with the City."

If the Disclosing Party is unable to make this pledge because it or any of its affiliates (as defined in MCC Section 2-32-455(b)) is a predatory lender within the meaning of MCC Chapter 2-32, explain here (attach additional pages if necessary):

____

____

If the letters "NA," the word "None," or no response appears on the lines above, it will be conclusively presumed that the Disclosing Party certified to the above statements.

D. CERTIFICATION REGARDING FINANCIAL INTEREST IN CITY BUSINESS

Any words or terms defined in MCC Chapter 2-156 have the same meanings if used in this Part D.

1. In accordance with MCC Section 2-156-110: To the best of the Disclosing Party's knowledge after reasonable inquiry, does any official or employee of the City have a financial interest in his or her own name or in the name of any other person or entity in the Matter?

[ ] Yes [X] No

NOTE: If you checked "Yes" to Item D(1), proceed to Items D(2) and D(3). If you checked "No" to Item D(1), skip Items D(2) and D(3) and proceed to Part E.

2. Unless sold pursuant to a process of competitive bidding, or otherwise permitted, no City elected official or employee shall have a financial interest in his or her own name or in the name of any other person or entity in the purchase of any property that (i) belongs to the City, or (ii) is sold for taxes or assessments, or (iii) is sold by virtue of legal process at the suit of the City (collectively, "City Property Sale"). Compensation for property taken pursuant to the City's eminent domain power does not constitute a financial interest within the meaning of this Part D.

Does the Matter involve a City Property Sale?

[ ] Yes [X] No

3. If you checked "Yes" to Item D(1), provide the names and business addresses of the City officials or employees having such financial interest and identify the nature of the financial interest:

Name	Business Address	Nature of Financial Interest

4. The Disclosing Party further certifies that no prohibited financial interest in the Matter will be acquired by any City official or employee.

E. CERTIFICATION REGARDING SLAVERY ERA BUSINESS

Please check either (1) or (2) below. If the Disclosing Party checks (2), the Disclosing Party must disclose below or in an attachment to this EDS all information required by (2). Failure to comply with these disclosure requirements may make any contract entered into with the City in connection with the Matter voidable by the City.

____1. The Disclosing Party verifies that the Disclosing Party has searched any and all records of the Disclosing Party and any and all predecessor entities regarding records of investments or profits from slavery or slaveholder insurance policies during the slavery era (including insurance policies issued to slaveholders that provided coverage for damage to or injury or death of their slaves), and the Disclosing Party has found no such records.

X 2. The Disclosing Party verifies that, as a result of conducting the search in step (1) above, the Disclosing Party has found records of investments or profits from slavery or slaveholder insurance policies. The Disclosing Party verifies that the following constitutes full disclosure of all such records, including the names of any and all slaves or slaveholders described in those records: Please see Attachment E (eDocs# 25766000)

SECTION VI -- CERTIFICATIONS FOR FEDERALLY FUNDED MATTERS

NOTE: If the Matter is federally funded, complete this Section VI. **If the Matter is not federally funded**, proceed to Section VII. For purposes of this Section VI, tax credits allocated by the City and proceeds of debt obligations of the City are not federal funding.

A. CERTIFICATION REGARDING LOBBYING – N/A

1. List below the names of all persons or entities registered under the federal Lobbying Disclosure Act of 1995, as amended, who have made lobbying contacts on behalf of the Disclosing Party with respect to the Matter: (Add sheets if necessary):

(If no explanation appears or begins on the lines above, or if the letters "NA" or if the word "None" appear, it will be conclusively presumed that the Disclosing Party means that NO persons or entities registered under the Lobbying Disclosure Act of 1995, as amended, have made lobbying contacts on behalf of the Disclosing Party with respect to the Matter.)

2. The Disclosing Party has not spent and will not expend any federally appropriated funds to pay any person or entity listed in paragraph A(1) above for his or her lobbying activities or to pay any person or entity to influence or attempt to influence an officer or employee of any agency, as defined by applicable federal law, a member of Congress, an officer or employee of Congress, or an employee

of a member of Congress, in connection with the award of any federally funded contract, making any federally funded grant or loan, entering into any cooperative agreement, or to extend, continue, renew, amend, or modify any federally funded contract, grant, loan, or cooperative agreement.

3. The Disclosing Party will submit an updated certification at the end of each calendar quarter in which there occurs any event that materially affects the accuracy of the statements and information set forth in paragraphs A(1) and A(2) above.

4. The Disclosing Party certifies that either: (i) it is not an organization described in section 501(c)(4) of the Internal Revenue Code of 1986; or (ii) it is an organization described in section 501(c)(4) of the Internal Revenue Code of 1986 but has not engaged and will not engage in "Lobbying Activities," as that term is defined in the Lobbying Disclosure Act of 1995, as amended.

5. If the Disclosing Party is the Applicant, the Disclosing Party must obtain certifications equal in form and substance to paragraphs A(1) through A(4) above from all subcontractors before it awards any subcontract and the Disclosing Party must maintain all such subcontractors' certifications for the duration of the Matter and must make such certifications promptly available to the City upon request.

B. CERTIFICATION REGARDING EQUAL EMPLOYMENT OPPORTUNITY – N/A

If the Matter is federally funded, federal regulations require the Applicant and all proposed subcontractors to submit the following information with their bids or in writing at the outset of negotiations.

Is the Disclosing Party the Applicant?
[ ] Yes [ ] No

If Yes, answer the three questions below:

1. Have you developed and do you have on file affirmative action programs pursuant to applicable federal regulations? (See 41 CFR Part 60-2.)
[ ] Yes [ ] No

2. Have you filed with the Joint Reporting Committee, the Director of the Office of Federal Contract Compliance Programs, or the Equal Employment Opportunity Commission all reports due under the applicable filing requirements?
[ ] Yes [ ] No [ ] Reports not required

3. Have you participated in any previous contracts or subcontracts subject to the equal opportunity clause?
[ ] Yes [ ] No

If you checked No to question (1) or (2) above, please provide an explanation:

SECTION VII -- FURTHER ACKNOWLEDGMENTS AND CERTIFICATION

The Disclosing Party understands and agrees that:

A. The certifications, disclosures, and acknowledgments contained in this EDS will become part of any contract or other agreement between the Applicant and the City in connection with the Matter, whether procurement, City assistance, or other City action, and are material inducements to the City's execution of any contract or taking other action with respect to the Matter. The Disclosing Party understands that it must comply with all statutes, ordinances, and regulations on which this EDS is based.

B. The City's Governmental Ethics Ordinance, MCC Chapter 2-156, imposes certain duties and obligations on persons or entities seeking City contracts, work, business, or transactions. The full text of this ordinance and a training program is available on line at www.cityofchicago.org/Ethics, and may also be obtained from the City's Board of Ethics, 740 N. Sedgwick St., Suite 500, Chicago, IL 60610, (312) 744-9660. The Disclosing Party must comply fully with this ordinance.

C. If the City determines that any information provided in this EDS is false, incomplete or inaccurate, any contract or other agreement in connection with which it is submitted may be rescinded or be void or voidable, and the City may pursue any remedies under the contract or agreement (if not rescinded or void), at law, or in equity, including terminating the Disclosing Party's participation in the Matter and/or declining to allow the Disclosing Party to participate in other City transactions. Remedies at law for a false statement of material fact may include incarceration and an award to the City of treble damages.

D. It is the City's policy to make this document available to the public on its Internet site and/or upon request. Some or all of the information provided in, and appended to, this EDS may be made publicly available on the Internet, in response to a Freedom of Information Act request, or otherwise. By completing and signing this EDS, the Disclosing Party waives and releases any possible rights or claims which it may have against the City in connection with the public release of information contained in this EDS and also authorizes the City to verify the accuracy of any information submitted in this EDS.

E. The information provided in this EDS must be kept current. In the event of changes, the Disclosing Party must supplement this EDS up to the time the City takes action on the Matter. If the Matter is a contract being handled by the City's Department of Procurement Services, the Disclosing Party must update this EDS as the contract requires. **NOTE:** With respect to Matters subject to MCC Chapter 1-23, Article I (imposing **PERMANENT INELIGIBILITY** for certain specified offenses), the information provided herein regarding eligibility must be kept current for a longer period, as required by MCC Chapter 1-23 and Section 2-154-020.

CERTIFICATION

Under penalty of perjury, the person signing below: (1) warrants that he/she is authorized to execute this EDS, and all applicable Appendices, on behalf of the Disclosing Party, and (2) warrants that all certifications and statements contained in this EDS, and all applicable Appendices, are true, accurate and complete as of the date furnished to the City.

CITY OF CHICAGO
ECONOMIC DISCLOSURE STATEMENT AND AFFIDAVIT
APPENDIX A

FAMILIAL RELATIONSHIPS WITH ELECTED CITY OFFICIALS AND DEPARTMENT HEADS

This Appendix is to be completed only by (a) the Applicant, and (b) any legal entity which has a direct ownership interest in the Applicant exceeding 7.5%. It is not to be completed by any legal entity which has only an indirect ownership interest in the Applicant.

Under MCC Section 2-154-015, the Disclosing Party must disclose whether such Disclosing Party or any Applicable Party or any Spouse or Domestic Partner thereof currently has a familial relationship with any elected city official or department head. A familial relationship exists if, as of the date this EDS is signed, the Disclosing Party or any Applicable Party or any Spouse or Domestic Partner thereof is related to the mayor, any alderman, the city clerk, the city treasurer or any city department head as spouse or domestic partner or as any of the following, whether by blood or adoption: parent, child, brother or sister, aunt or uncle, niece or nephew, grandparent, grandchild, father-in-law, mother-in-law, son-in-law, daughter-in-law, stepfather or stepmother, stepson or stepdaughter, stepbrother or stepsister or half-brother or half-sister.

Applicable Party means (1) all executive officers of the Disclosing Party listed in Section II.B.1.a., if the Disclosing Party is a corporation; all partners of the Disclosing Party, if the Disclosing Party is a general partnership; all general partners and limited partners of the Disclosing Party, if the Disclosing Party is a limited partnership; all managers, managing members and members of the Disclosing Party, if the Disclosing Party is a limited liability company; (2) all principal officers of the Disclosing Party; and (3) any person having more than a 7.5% ownership interest in the Disclosing Party. Principal officers means the president, chief operating officer, executive director, chief financial officer, treasurer or secretary of a legal entity or any person exercising similar authority.

Does the Disclosing Party or any Applicable Party or any Spouse or Domestic Partner thereof currently have a familial relationship with an elected city official or department head?

[ ] Yes [X] No

If yes, please identify below (1) the name and title of such person, (2) the name of the legal entity to which such person is connected; (3) the name and title of the elected city official or department head to whom such person has a familial relationship, and (4) the precise nature of such familial relationship.

BUILDING CODE SCOFFLAW/PROBLEM LANDLORD CERTIFICATION

This Appendix is to be completed only by (a) the Applicant, and (b) any legal entity which has a direct ownership interest in the Applicant exceeding 7.5% (an "Owner"). It is not to be completed by any legal entity which has only an indirect ownership interest in the Applicant.

1. Pursuant to MCC Section 2-154-010, is the Applicant or any Owner identified as a building code scofflaw or problem landlord pursuant to MCC Section 2-92-416?

[ ] Yes [X] No

2. If the Applicant is a legal entity publicly traded on any exchange, is any officer or director of the Applicant identified as a building code scofflaw or problem landlord pursuant to MCC Section 2-92-416?

[ ] Yes [] No [X] The Applicant is not publicly traded on any exchange.

3. If yes to (1) or (2) above, please identify below the name of each person or legal entity identified as a building code scofflaw or problem landlord and the address of each building or buildings to which the pertinent code violations apply.

APPENDIX C

PROHIBITION ON WAGE & SALARY HISTORY SCREENING - CERTIFICATION

This Appendix is to be completed only by an Applicant that is completing this EDS as a "contractor" as defined in MCC Section 2-92-385. That section, which should be consulted (www.amlegal.com), generally covers a party to any agreement pursuant to which they: (i) receive City of Chicago funds in consideration for services, work or goods provided (including for legal or other professional services), or (ii) pay the City money for a license, grant or concession allowing them to conduct a business on City premises.

On behalf of an Applicant that is a contractor pursuant to MCC Section 2-92-385, I hereby certify that the Applicant is in compliance with MCC Section 2-92-385(b)(1) and (2), which prohibit: (i) screening job applicants based on their wage or salary history, or (ii) seeking job applicants' wage or salary history from current or former employers. I also certify that the Applicant has adopted a policy that includes those prohibitions.

[ ] Yes

[ ] No

[X] N/A – I am not an Applicant that is a "contractor" as defined in MCC Section 2-92-385.

This certification shall serve as the affidavit required by MCC Section 2-92-385(c)(1).

If you checked "no" to the above, please explain.

WFC Holdings, LLC a legal entity with a direct or indirect right of control of Wells Fargo Bank, N.A. (the "Applicant").

WFC Holdings, LLC

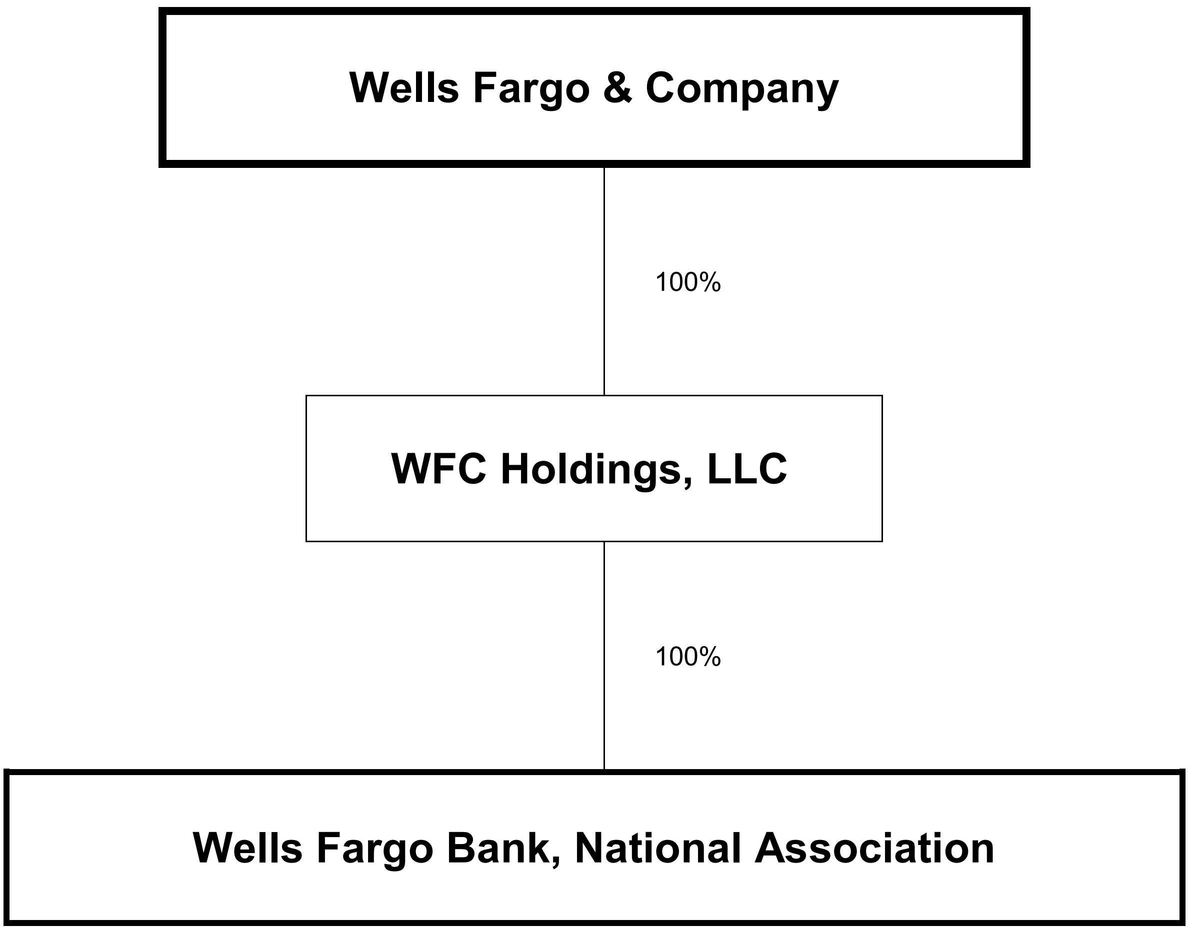
Executive Officer for Reg O purposes	Officer	Santomassimo, Michael P.	11/6/2020

Ownership of Wells Fargo Bank, National Association



Attachment "B.2"

Section II – Disclosure of Ownership Interests

As disclosed in the Notice of Annual Meeting and Proxy Statement, dated March 15, 2023, of Wells Fargo & Company ("Wells Fargo"), The Vanguard Group, Inc. and certain entities controlled or under common control with The Vanguard Group, Inc. (collectively the "Reporting Persons") held approximately 8.78% of outstanding publicly traded common stock of Wells Fargo as of February 24, 2023. On information and belief, and in reliance on the statements made by The Vanguard Group, Inc. in a Schedule 13G filed with the SEC on February 9, 2023, the reported holdings represented shares of Wells Fargo's common stock acquired by the Reporting Persons as passive investors and held in the ordinary course of business, without any intent to acquire, change, or influence control of Wells Fargo. Wells Fargo does not know if the Reporting Persons currently hold more that 7.5% of its outstanding common stock. In any event, Wells Fargo has no authority or ability to require the Reporting Persons to file, and the Reporting Persons are under no obligation to assist or cooperate with Wells Fargo in filing, an EDS.

Attachment "C"

Section III – Income or Compensation to, or Ownership by, City Elected Officials

The undersigned warrants, to the best of his knowledge after due inquiry, that the Disclosing Party has not provided any income or compensation to any City elected official in 12 months before, nor does the undersigned reasonably expect to during the 12-month period following, the date the undersigned has signed this EDS. As the date of this filing, the undersigned is in the process of completing our due diligence on Independent Contracts, when completed we will update this response if needed.

Note that in the ordinary course of its business, Wells Fargo makes loans of various types with individuals and businesses. We have determined that these loans do not constitute a "business relationship" as defined in Chapter 2-156 of the Municipal Code.

Note further that the Disclosing Party has no way of identifying spouses or domestic partners of any City elected official, or the identities of any entities in which any city elected official or his or her spouse or domestic partner has a financial interest, and thus limits its certification to "City elected officials" as specially required by Section III. Specifically, we made due inquiry with respect to the City's Aldermen, the Mayor, the Treasurer and the City Clerk.

Specification 1279244

Attachment D

To the extent any litigation or regulatory matters are required to be reported, they are disclosed in Wells Fargo's SEC filings and are matters of public record:

- Copies of the Legal Proceedings sections from Wells Fargo's recent public filings and most recent periodic reports are available at https://www.wellsfargo.com/invest_relations/filings.
- Wells Fargo's Annual Reports are available at https://www.wellsfargo.com/invest_relations/annual.

APPENDIX III

SLAVERY ERA BUSINESS SUMMARY

After years of research, Wells Fargo has found no records in its possession that indicate it – or any entities it acquired before the Wachovia merger – had ever financed slavery, held slaves as collateral, owned slaves, or profited from slavery.

Furthermore, Wells Fargo has found no records in its possession that entities it acquired after the Wachovia merger had financed slavery, held slaves as collateral, owned slaves, or profited from slavery.

With the Wachovia merger completed as of December 31, 2008, Wells Fargo inherited hundreds of Wachovia's predecessor financial institutions, including two that had extensive involvement in slavery. In 2005 Wachovia announced these findings and apologized for the role its predecessors played and renewed its commitment to preserve and promote the history of the African-American experience in our nation. Wells Fargo shares that commitment and affirms its long-standing opposition to slavery.

The following narrative summarizes the results of the research that has been performed regarding Wachovia Bank and its ties to slavery.

SUMMARY OF RESEARCH

External research has revealed that two predecessor institutions of the undersigned, the Georgia Railroad & Banking Company and the Bank of Charleston, owned slaves.

Due to incomplete records, the undersigned cannot determine exactly how many slaves either the Georgia Railroad and Banking Company or the Bank of Charleston owned. Through specific transactional records, researchers determined that the Georgia Railroad and Banking Company owned at least 162 slaves, and the Bank of Charleston accepted at least 529 slaves as collateral on mortgaged properties or loans and acquired an undetermined number of these individuals when customers defaulted on their loans.

The Georgia Railroad and Banking Company was founded in 1833 to complete a railroad line between the City of Augusta and the interior of the state of Georgia. The company relied on slave labor for the construction and maintenance of this railway. According to the existing and searchable bank records, 162 slaves were owned or authorized to be purchased by the Georgia Railroad and Banking Company between 1836 and 1842. In addition, the company awarded work to contractors who purchased at least 400 slaves to perform work on the railways.

The Bank of Charleston, founded in 1834, issued loans and mortgages where enslaved individuals were used as collateral. A review of the bank's account ledgers revealed a minimum of 24 transactions involving reference to 529 enslaved individuals being used

as collateral. In most cases, the loan was paid on schedule, and the bank never took possession of slaves that were pledged as collateral on the loan. In several documented instances, however, customers defaulted on their loans and the Bank of Charleston took actual possession of slaves. The total number of slaves of whom the bank took possession cannot be accurately tallied due to the lack of records.

In addition, eleven predecessor companies were determined to have profited more indirectly from slavery through the following means:

- Founders, directors, or account holders who owned slaves and/or profited directly from slavery;
- Investing in or transacting business with companies or individuals that owned slaves;
- Investing in the bonds of slave states and municipalities;
- Investing in U.S. government bonds during years when the United States permitted and profited from slave labor directly through taxation.

These institutions are:

- Bank of North America (Philadelphia, Pa.)
- Bank of Baltimore
- The Philadelphia Bank (later Philadelphia National Bank)
- Farmers' & Mechanics' Bank of Philadelphia
- Pennsylvania Company for Insurances on Lives and the Granting of Annuities
- State Bank of Elizabeth (Elizabeth, N.J.)
- State Bank of Newark (Newark, N.J.)
- Savings Bank of Baltimore
- Girard National Bank
- The Carswell Group (established in 1868, acquired by Palmer & Cay, Inc. in 1985)
- The Trenton Banking Company

CITY OF CHICAGO
ECONOMIC DISCLOSURE STATEMENT
AND AFFIDAVIT

SECTION I -- GENERAL INFORMATION

A. Legal name of the Disclosing Party submitting this EDS. Include d/b/a/ if applicable:

Wells Fargo & Company

Check ONE of the following three boxes:

Indicate whether the Disclosing Party submitting this EDS is:

1. [ ] the Applicant

   OR

2. [ ] a legal entity currently holding, or anticipated to hold within six months after City action on the contract, transaction or other undertaking to which this EDS pertains (referred to below as the "Matter"), a direct or indirect interest in excess of 7.5% in the Applicant. State the Applicant=s legal name: ____________________________________

   OR

3. [X] a legal entity with a direct or indirect right of control of the Applicant (see Section II(B)(1)) State the legal name of the entity in which the Disclosing Party holds a right of control: Wells Fargo Bank, N.A.

B. Business address of the Disclosing Party: 420 Montgomery Street, San Francisco, CA 94163

C. Telephone: 612-316-3963 Fax: Not available

Email: David.R.Offord@wellsfargo.com

D. Name of contact person: David Offord

E. Federal Employer Identification No. (if you have one): 41-0449260

F. Brief description of the Matter to which this EDS pertains. (Include project number and location of property, if applicable):

2024 Municipal Depository for City of Chicago and Chicago Board of Education

G. Which City agency or department is requesting this EDS? Department of Finance

If the Matter is a contract being handled by the City's Department of Procurement Services, please complete the following:

Specification ______________________________ and Contract # ______________________________

SECTION II -- DISCLOSURE OF OWNERSHIP INTERESTS

A. NATURE OF THE DISCLOSING PARTY

1. Indicate the nature of the Disclosing Party:

[ ] Person
[X] Publicly registered business corporation
[ ] Privately held business corporation
[ ] Sole proprietorship
[ ] General partnership
[ ] Limited partnership
[ ] Trust
[ ] Limited liability company
[ ] Limited liability partnership
[ ] Joint venture
[ ] Not-for-profit corporation
(Is the not-for-profit corporation also a 501(c)(3))?
[ ] Yes [ ] No
[ ] Other (please specify)

2. For legal entities, the state (or foreign country) of incorporation or organization, if applicable:

Delaware

3. For legal entities not organized in the State of Illinois: Has the organization registered to do business in the State of Illinois as a foreign entity?

[ ] Yes [X] No [ ] Organized in Illinois

B. IF THE DISCLOSING PARTY IS A LEGAL ENTITY:

1. List below the full names and titles, if applicable, of: (i) all executive officers and all directors of the entity; (ii) **for not-for-profit corporations**, all members, if any, which are legal entities (if there are no such members, write "no members which are legal entities"); (iii) **for trusts, estates or other similar entities**, the trustee, executor, administrator, or similarly situated party; (iv) **for general or limited partnerships, limited liability companies, limited liability partnerships or joint ventures**, each general partner, managing member, manager or any other person or legal entity that directly or indirectly controls the day-to-day management of the Applicant.

NOTE: Each legal entity listed below must submit an EDS on its own behalf.

Name Title

Please see Attachment A (eDocs#25739335)

2. Please provide the following information concerning each person or legal entity having a direct or indirect, current or prospective (i.e. within 6 months after City action) beneficial interest (including ownership) in excess of 7.5% of the Applicant. Examples of such an interest include shares in a corporation, partnership interest in a partnership or joint venture, interest of a member or manager in a

limited liability company, or interest of a beneficiary of a trust, estate or other similar entity. If none, state None.

NOTE: Each legal entity listed below may be required to submit an EDS on its own behalf.

Name | Business Address | Percentage Interest in the Applicant

Please see Attachments B.1 (eDocs # 25660037) and B.2 (eDocs # 25708606)

SECTION III -- INCOME OR COMPENSATION TO, OR OWNERSHIP BY, CITY ELECTED OFFICIALS

Has the Disclosing Party provided any income or compensation to any City elected official during the 12-month period preceding the date of this EDS? [ ] Yes [X] No

Does the Disclosing Party reasonably expect to provide any income or compensation to any City elected official during the 12-month period following the date of this EDS? [ ] Yes [X] No

If yes to either of the above, please identify below the name(s) of such City elected official(s) and describe such income or compensation:
Please see Attachment C (eDocs# 25708795)

Does any City elected official or, to the best of the Disclosing Party's knowledge after reasonable inquiry, any City elected official=s spouse or domestic partner, have a financial interest (as defined in Chapter 2-156 of the Municipal Code of Chicago (MCC)) in the Disclosing Party?
[ ] Yes [X] No

If "yes," please identify below the name(s) of such City elected official(s) and/or spouse(s)/domestic partner(s) and describe the financial interest(s).
Please see Attachment C (eDocs# 25708795)

SECTION IV -- DISCLOSURE OF SUBCONTRACTORS AND OTHER RETAINED PARTIES

The Disclosing Party must disclose the name and business address of each subcontractor, attorney, lobbyist (as defined in MCC Chapter 2-156), accountant, consultant and any other person or entity whom the Disclosing Party has retained or expects to retain in connection with the Matter, as well as the nature of the relationship, and the total amount of the fees paid or estimated to be paid. The Disclosing Party is not required to disclose employees who are paid solely through the Disclosing Party's regular payroll. If the Disclosing Party is uncertain whether a disclosure is required under this Section, the Disclosing Party must either ask the City whether disclosure is required or make the disclosure.

Name (indicate whether retained or anticipated to be retained)	Business Address	Relationship to Disclosing Party (subcontractor, attorney, lobbyist, etc.)	Fees (indicate whether paid or estimated.) **NOTE:** hourly rate or t.b.d. is not an acceptable response.
None			

(Add sheets if necessary)

[X] Check here if the Disclosing Party has not retained, nor expects to retain, any such persons or entities.

SECTION V -- CERTIFICATIONS

A. COURT-ORDERED CHILD SUPPORT COMPLIANCE

Under MCC Section 2-92-415, substantial owners of business entities that contract with the City must remain in compliance with their child support obligations throughout the contract's term.

Has any person who directly or indirectly owns 10% or more of the Disclosing Party been declared in arrearage on any child support obligations by any Illinois court of competent jurisdiction?

[ ] Yes [ ] No [X] No person directly or indirectly owns 10% or more of the Disclosing Party.

If Yes, has the person entered into a court-approved agreement for payment of all support owed and is the person in compliance with that agreement?

[ ] Yes [ ] No

B. FURTHER CERTIFICATIONS

1. [This paragraph 1 applies only if the Matter is a contract being handled by the City's Department of Procurement Services.] In the 5-year period preceding the date of this EDS, neither the Disclosing Party nor any Affiliated Entity [see definition in (5) below] has engaged, in connection with the performance of any public contract, the services of an integrity monitor, independent private sector inspector general, or integrity compliance consultant (i.e., an individual or entity with legal, auditing, investigative, or other similar skills, designated by a public agency to help the agency monitor the activity of specified agency vendors as well as help the vendors reform their business practices so they can be considered for agency contracts in the future, or continue with a contract in progress).

2. The Disclosing Party and its Affiliated Entities are not delinquent in the payment of any fine, fee, tax or other source of indebtedness owed to the City of Chicago, including, but not limited to, water and sewer charges, license fees, parking tickets, property taxes and sales taxes, nor is the Disclosing Party delinquent in the payment of any tax administered by the Illinois Department of Revenue.

3. The Disclosing Party and, if the Disclosing Party is a legal entity, all of those persons or entities identified in Section II(B)(1) of this EDS:

a. are not presently debarred, suspended, proposed for debarment, declared ineligible or voluntarily excluded from any transactions by any federal, state or local unit of government;

b. have not, during the 5 years before the date of this EDS, been convicted of a criminal offense, adjudged guilty, or had a civil judgment rendered against them in connection with: obtaining, attempting to obtain, or performing a public (federal, state or local) transaction or contract under a public transaction; a violation of federal or state antitrust statutes; fraud; embezzlement; theft; forgery; bribery; falsification or destruction of records; making false statements; or receiving stolen property;

c. are not presently indicted for, or criminally or civilly charged by, a governmental entity (federal, state or local) with committing any of the offenses set forth in subparagraph (b) above;

d. have not, during the 5 years before the date of this EDS, had one or more public transactions (federal, state or local) terminated for cause or default; and

e. have not, during the 5 years before the date of this EDS, been convicted, adjudged guilty, or found liable in a civil proceeding, or in any criminal or civil action, including actions concerning environmental violations, instituted by the City or by the federal government, any state, or any other unit of local government.

4. The Disclosing Party understands and shall comply with the applicable requirements of MCC Chapters 2-56 (Inspector General) and 2-156 (Governmental Ethics).

5. Certifications (5), (6) and (7) concern:

- the Disclosing Party;
- any Contractor (meaning any contractor or subcontractor used by the Disclosing Party in connection with the Matter, including but not limited to all persons or legal entities disclosed under Section IV, Disclosure of Subcontractors and Other Retained Parties);
- any "Affiliated Entity" (meaning a person or entity that, directly or indirectly: controls the Disclosing Party, is controlled by the Disclosing Party, or is, with the Disclosing Party, under common control of another person or entity). Indicia of control include, without limitation: interlocking management or ownership; identity of interests among family members, shared facilities and equipment; common use of employees; or organization of a business entity following the ineligibility of a business entity to do business with federal or state or local government, including the City, using substantially the same management, ownership, or principals as the ineligible entity. With respect to Contractors, the term Affiliated Entity means a person or entity that directly or indirectly controls the Contractor, is controlled by it, or, with the Contractor, is under common control of another person or entity;
- any responsible official of the Disclosing Party, any Contractor or any Affiliated Entity or any other official, agent or employee of the Disclosing Party, any Contractor or any Affiliated Entity, acting pursuant to the direction or authorization of a responsible official of the Disclosing Party, any Contractor or any Affiliated Entity (collectively "Agents").

Neither the Disclosing Party, nor any Contractor, nor any Affiliated Entity of either the Disclosing Party or any Contractor, nor any Agents have, during the 5 years before the date of this EDS, or, with respect to a Contractor, an Affiliated Entity, or an Affiliated Entity of a Contractor during the 5 years before the date of such Contractor's or Affiliated Entity's contract or engagement in connection with the Matter:

a. bribed or attempted to bribe, or been convicted or adjudged guilty of bribery or attempting to bribe, a public officer or employee of the City, the State of Illinois, or any agency of the federal government or of any state or local government in the United States of America, in that officer's or employee's official capacity;

b. agreed or colluded with other bidders or prospective bidders, or been a party to any such agreement, or been convicted or adjudged guilty of agreement or collusion among bidders or prospective bidders, in restraint of freedom of competition by agreement to bid a fixed price or otherwise; or

c. made an admission of such conduct described in subparagraph (a) or (b) above that is a matter of record, but have not been prosecuted for such conduct; or

d. violated the provisions referenced in MCC Subsection 2-92-320(a)(4)(Contracts Requiring a Base Wage); (a)(5)(Debarment Regulations); or (a)(6)(Minimum Wage Ordinance).

6. Neither the Disclosing Party, nor any Affiliated Entity or Contractor, or any of their employees, officials, agents or partners, is barred from contracting with any unit of state or local government as a result of engaging in or being convicted of (1) bid-rigging in violation of 720 ILCS 5/33E-3; (2) bid-rotating in violation of 720 ILCS 5/33E-4; or (3) any similar offense of any state or of the United States of America that contains the same elements as the offense of bid-rigging or bid-rotating.

7. Neither the Disclosing Party nor any Affiliated Entity is listed on a Sanctions List maintained by the United States Department of Commerce, State, or Treasury, or any successor federal agency.

8. [FOR APPLICANT ONLY] (i) Neither the Applicant nor any controlling person [see MCC Chapter 1-23, Article I for applicability and defined terms] of the Applicant is currently indicted or charged with, or has admitted guilt of, or has ever been convicted of, or placed under supervision for, any criminal offense involving actual, attempted, or conspiracy to commit bribery, theft, fraud, forgery, perjury, dishonesty or deceit against an officer or employee of the City or any sister agency; and (ii) the Applicant understands and acknowledges that compliance with Article I is a continuing requirement for doing business with the City. NOTE: If MCC Chapter 1-23, Article I applies to the Applicant, that Article=s permanent compliance timeframe supersedes 5-year compliance timeframes in this Section V.

9. [FOR APPLICANT ONLY] The Applicant and its Affiliated Entities will not use, nor permit their subcontractors to use, any facility listed as having an active exclusion by the U.S. EPA on the federal System for Award Management (SAM).

10. [FOR APPLICANT ONLY] The Applicant will obtain from any contractors/subcontractors hired or to be hired in connection with the Matter certifications equal in form and substance to those in Certifications (2) and (9) above and will not, without the prior written consent of the City, use any such

contractor/subcontractor that does not provide such certifications or that the Applicant has reason to believe has not provided or cannot provide truthful certifications.

11. If the Disclosing Party is unable to certify to any of the above statements in this Part B (Further Certifications), the Disclosing Party must explain below:
Please see Attachment D (eDocs# 25698781).

If the letters "NA," the word "None," or no response appears on the lines above, it will be conclusively presumed that the Disclosing Party certified to the above statements.

12. To the best of the Disclosing Party's knowledge after reasonable inquiry, the following is a complete list of all current employees of the Disclosing Party who were, at any time during the 12-month period preceding the date of this EDS, an employee, or elected or appointed official, of the City of Chicago (if none, indicate with N/A or none).
Victoria Howard, City Colleges of Chicago; James Fitzpatrick, Supervisor Detective Division

13. To the best of the Disclosing Party's knowledge after reasonable inquiry, the following is a complete list of all gifts that the Disclosing Party has given or caused to be given, at any time during the 12-month period preceding the execution date of this EDS, to an employee, or elected or appointed official, of the City of Chicago. For purposes of this statement, a gift does not include: (i) anything made generally available to City employees or to the general public, or (ii) food or drink provided in the course of official City business and having a retail value of less than $25 per recipient, or (iii) a political contribution otherwise duly reported as required by law (if none, indicate with N/A or none). As to any gift listed below, please also list the name of the City recipient.
None

C. CERTIFICATION OF STATUS AS FINANCIAL INSTITUTION

1. The Disclosing Party certifies that the Disclosing Party (check one)
[X] is [ ] is not

a "financial institution" as defined in MCC Section 2-32-455(b).

2. If the Disclosing Party IS a financial institution, then the Disclosing Party pledges:

"We are not and will not become a predatory lender as defined in MCC Chapter 2-32. We further pledge that none of our affiliates is, and none of them will become, a predatory lender as defined in MCC Chapter 2-32. We understand that becoming a predatory lender or becoming an affiliate of a predatory lender may result in the loss of the privilege of doing business with the City."

If the Disclosing Party is unable to make this pledge because it or any of its affiliates (as defined in MCC Section 2-32-455(b)) is a predatory lender within the meaning of MCC Chapter 2-32, explain here (attach additional pages if necessary):

____

____

If the letters "NA," the word "None," or no response appears on the lines above, it will be conclusively presumed that the Disclosing Party certified to the above statements.

D. CERTIFICATION REGARDING FINANCIAL INTEREST IN CITY BUSINESS

Any words or terms defined in MCC Chapter 2-156 have the same meanings if used in this Part D.

1. In accordance with MCC Section 2-156-110: To the best of the Disclosing Party's knowledge after reasonable inquiry, does any official or employee of the City have a financial interest in his or her own name or in the name of any other person or entity in the Matter?

[ ] Yes [X] No

NOTE: If you checked "Yes" to Item D(1), proceed to Items D(2) and D(3). If you checked "No" to Item D(1), skip Items D(2) and D(3) and proceed to Part E.

2. Unless sold pursuant to a process of competitive bidding, or otherwise permitted, no City elected official or employee shall have a financial interest in his or her own name or in the name of any other person or entity in the purchase of any property that (i) belongs to the City, or (ii) is sold for taxes or assessments, or (iii) is sold by virtue of legal process at the suit of the City (collectively, "City Property Sale"). Compensation for property taken pursuant to the City's eminent domain power does not constitute a financial interest within the meaning of this Part D.

Does the Matter involve a City Property Sale?

[ ] Yes [X] No

3. If you checked "Yes" to Item D(1), provide the names and business addresses of the City officials or employees having such financial interest and identify the nature of the financial interest:

Name	Business Address	Nature of Financial Interest

4. The Disclosing Party further certifies that no prohibited financial interest in the Matter will be acquired by any City official or employee.

E. CERTIFICATION REGARDING SLAVERY ERA BUSINESS

Please check either (1) or (2) below. If the Disclosing Party checks (2), the Disclosing Party must disclose below or in an attachment to this EDS all information required by (2). Failure to comply with these disclosure requirements may make any contract entered into with the City in connection with the Matter voidable by the City.

____1. The Disclosing Party verifies that the Disclosing Party has searched any and all records of the Disclosing Party and any and all predecessor entities regarding records of investments or profits from slavery or slaveholder insurance policies during the slavery era (including insurance policies issued to slaveholders that provided coverage for damage to or injury or death of their slaves), and the Disclosing Party has found no such records.

X 2. The Disclosing Party verifies that, as a result of conducting the search in step (1) above, the Disclosing Party has found records of investments or profits from slavery or slaveholder insurance policies. The Disclosing Party verifies that the following constitutes full disclosure of all such records, including the names of any and all slaves or slaveholders described in those records:
Please see Attachment E (eDocs# 25766000)

SECTION VI -- CERTIFICATIONS FOR FEDERALLY FUNDED MATTERS

NOTE: **If the Matter is federally funded**, complete this Section VI. **If the Matter is not federally funded**, proceed to Section VII. For purposes of this Section VI, tax credits allocated by the City and proceeds of debt obligations of the City are not federal funding.

A. CERTIFICATION REGARDING LOBBYING – N/A

1. List below the names of all persons or entities registered under the federal Lobbying Disclosure Act of 1995, as amended, who have made lobbying contacts on behalf of the Disclosing Party with respect to the Matter: (Add sheets if necessary):

(If no explanation appears or begins on the lines above, or if the letters "NA" or if the word "None" appear, it will be conclusively presumed that the Disclosing Party means that NO persons or entities registered under the Lobbying Disclosure Act of 1995, as amended, have made lobbying contacts on behalf of the Disclosing Party with respect to the Matter.)

2. The Disclosing Party has not spent and will not expend any federally appropriated funds to pay any person or entity listed in paragraph A(1) above for his or her lobbying activities or to pay any person or entity to influence or attempt to influence an officer or employee of any agency, as defined by applicable federal law, a member of Congress, an officer or employee of Congress, or an employee

of a member of Congress, in connection with the award of any federally funded contract, making any federally funded grant or loan, entering into any cooperative agreement, or to extend, continue, renew, amend, or modify any federally funded contract, grant, loan, or cooperative agreement.

3. The Disclosing Party will submit an updated certification at the end of each calendar quarter in which there occurs any event that materially affects the accuracy of the statements and information set forth in paragraphs A(1) and A(2) above.

4. The Disclosing Party certifies that either: (i) it is not an organization described in section 501(c)(4) of the Internal Revenue Code of 1986; or (ii) it is an organization described in section 501(c)(4) of the Internal Revenue Code of 1986 but has not engaged and will not engage in "Lobbying Activities," as that term is defined in the Lobbying Disclosure Act of 1995, as amended.

5. If the Disclosing Party is the Applicant, the Disclosing Party must obtain certifications equal in form and substance to paragraphs A(1) through A(4) above from all subcontractors before it awards any subcontract and the Disclosing Party must maintain all such subcontractors' certifications for the duration of the Matter and must make such certifications promptly available to the City upon request.

B. CERTIFICATION REGARDING EQUAL EMPLOYMENT OPPORTUNITY – N/A

If the Matter is federally funded, federal regulations require the Applicant and all proposed subcontractors to submit the following information with their bids or in writing at the outset of negotiations.

Is the Disclosing Party the Applicant?
[ ] Yes [ ] No

If Yes, answer the three questions below:

1. Have you developed and do you have on file affirmative action programs pursuant to applicable federal regulations? (See 41 CFR Part 60-2.)
[ ] Yes [ ] No

2. Have you filed with the Joint Reporting Committee, the Director of the Office of Federal Contract Compliance Programs, or the Equal Employment Opportunity Commission all reports due under the applicable filing requirements?
[ ] Yes [ ] No [ ] Reports not required

3. Have you participated in any previous contracts or subcontracts subject to the equal opportunity clause?
[ ] Yes [ ] No

If you checked No to question (1) or (2) above, please provide an explanation:

____

SECTION VII -- FURTHER ACKNOWLEDGMENTS AND CERTIFICATION

The Disclosing Party understands and agrees that:

A. The certifications, disclosures, and acknowledgments contained in this EDS will become part of any contract or other agreement between the Applicant and the City in connection with the Matter, whether procurement, City assistance, or other City action, and are material inducements to the City's execution of any contract or taking other action with respect to the Matter. The Disclosing Party understands that it must comply with all statutes, ordinances, and regulations on which this EDS is based.

B. The City's Governmental Ethics Ordinance, MCC Chapter 2-156, imposes certain duties and obligations on persons or entities seeking City contracts, work, business, or transactions. The full text of this ordinance and a training program is available on line at www.cityofchicago.org/Ethics, and may also be obtained from the City's Board of Ethics, 740 N. Sedgwick St., Suite 500, Chicago, IL 60610, (312) 744-9660. The Disclosing Party must comply fully with this ordinance.

C. If the City determines that any information provided in this EDS is false, incomplete or inaccurate, any contract or other agreement in connection with which it is submitted may be rescinded or be void or voidable, and the City may pursue any remedies under the contract or agreement (if not rescinded or void), at law, or in equity, including terminating the Disclosing Party's participation in the Matter and/or declining to allow the Disclosing Party to participate in other City transactions. Remedies at law for a false statement of material fact may include incarceration and an award to the City of treble damages.

D. It is the City's policy to make this document available to the public on its Internet site and/or upon request. Some or all of the information provided in, and appended to, this EDS may be made publicly available on the Internet, in response to a Freedom of Information Act request, or otherwise. By completing and signing this EDS, the Disclosing Party waives and releases any possible rights or claims which it may have against the City in connection with the public release of information contained in this EDS and also authorizes the City to verify the accuracy of any information submitted in this EDS.

E. The information provided in this EDS must be kept current. In the event of changes, the Disclosing Party must supplement this EDS up to the time the City takes action on the Matter. If the Matter is a contract being handled by the City's Department of Procurement Services, the Disclosing Party must update this EDS as the contract requires. **NOTE:** With respect to Matters subject to MCC Chapter 1-23, Article I (imposing **PERMANENT INELIGIBILITY** for certain specified offenses), the information provided herein regarding eligibility must be kept current for a longer period, as required by MCC Chapter 1-23 and Section 2-154-020.

CERTIFICATION

Under penalty of perjury, the person signing below: (1) warrants that he/she is authorized to execute this EDS, and all applicable Appendices, on behalf of the Disclosing Party, and (2) warrants that all certifications and statements contained in this EDS, and all applicable Appendices, are true, accurate and complete as of the date furnished to the City.

APPENDIX A

FAMILIAL RELATIONSHIPS WITH ELECTED CITY OFFICIALS AND DEPARTMENT HEADS

This Appendix is to be completed only by (a) the Applicant, and (b) any legal entity which has a direct ownership interest in the Applicant exceeding 7.5%. It is not to be completed by any legal entity which has only an indirect ownership interest in the Applicant.

Under MCC Section 2-154-015, the Disclosing Party must disclose whether such Disclosing Party or any Applicable Party or any Spouse or Domestic Partner thereof currently has a familial relationship with any elected city official or department head. A familial relationship exists if, as of the date this EDS is signed, the Disclosing Party or any Applicable Party or any Spouse or Domestic Partner thereof is related to the mayor, any alderman, the city clerk, the city treasurer or any city department head as spouse or domestic partner or as any of the following, whether by blood or adoption: parent, child, brother or sister, aunt or uncle, niece or nephew, grandparent, grandchild, father-in-law, mother-in-law, son-in-law, daughter-in-law, stepfather or stepmother, stepson or stepdaughter, stepbrother or stepsister or half-brother or half-sister.

Applicable Party means (1) all executive officers of the Disclosing Party listed in Section II.B.1.a., if the Disclosing Party is a corporation; all partners of the Disclosing Party, if the Disclosing Party is a general partnership; all general partners and limited partners of the Disclosing Party, if the Disclosing Party is a limited partnership; all managers, managing members and members of the Disclosing Party, if the Disclosing Party is a limited liability company; (2) all principal officers of the Disclosing Party; and (3) any person having more than a 7.5% ownership interest in the Disclosing Party. Principal officers means the president, chief operating officer, executive director, chief financial officer, treasurer or secretary of a legal entity or any person exercising similar authority.

Does the Disclosing Party or any Applicable Party or any Spouse or Domestic Partner thereof currently have a familial relationship with an elected city official or department head?

[ ] Yes [X] No

If yes, please identify below (1) the name and title of such person, (2) the name of the legal entity to which such person is connected; (3) the name and title of the elected city official or department head to whom such person has a familial relationship, and (4) the precise nature of such familial relationship.

APPENDIX B

BUILDING CODE SCOFFLAW/PROBLEM LANDLORD CERTIFICATION

This Appendix is to be completed only by (a) the Applicant, and (b) any legal entity which has a direct ownership interest in the Applicant exceeding 7.5% (an "Owner"). It is not to be completed by any legal entity which has only an indirect ownership interest in the Applicant.

1. Pursuant to MCC Section 2-154-010, is the Applicant or any Owner identified as a building code scofflaw or problem landlord pursuant to MCC Section 2-92-416?

[ ] Yes [] No

2. If the Applicant is a legal entity publicly traded on any exchange, is any officer or director of the Applicant identified as a building code scofflaw or problem landlord pursuant to MCC Section 2-92-416?

[ ] Yes [ ] No [] The Applicant is not publicly traded on any exchange.

3. If yes to (1) or (2) above, please identify below the name of each person or legal entity identified as a building code scofflaw or problem landlord and the address of each building or buildings to which the pertinent code violations apply.

APPENDIX C

PROHIBITION ON WAGE & SALARY HISTORY SCREENING - CERTIFICATION

This Appendix is to be completed only by an Applicant that is completing this EDS as a "contractor" as defined in MCC Section 2-92-385. That section, which should be consulted (www.amlegal.com), generally covers a party to any agreement pursuant to which they: (i) receive City of Chicago funds in consideration for services, work or goods provided (including for legal or other professional services), or (ii) pay the City money for a license, grant or concession allowing them to conduct a business on City premises.

On behalf of an Applicant that is a contractor pursuant to MCC Section 2-92-385, I hereby certify that the Applicant is in compliance with MCC Section 2-92-385(b)(1) and (2), which prohibit: (i) screening job applicants based on their wage or salary history, or (ii) seeking job applicants' wage or salary history from current or former employers. I also certify that the Applicant has adopted a policy that includes those prohibitions.

[ ] Yes

[ ] No

[X] N/A – I am not an Applicant that is a "contractor" as defined in MCC Section 2-92-385.

This certification shall serve as the affidavit required by MCC Section 2-92-385(c)(1).

If you checked "no" to the above, please explain.

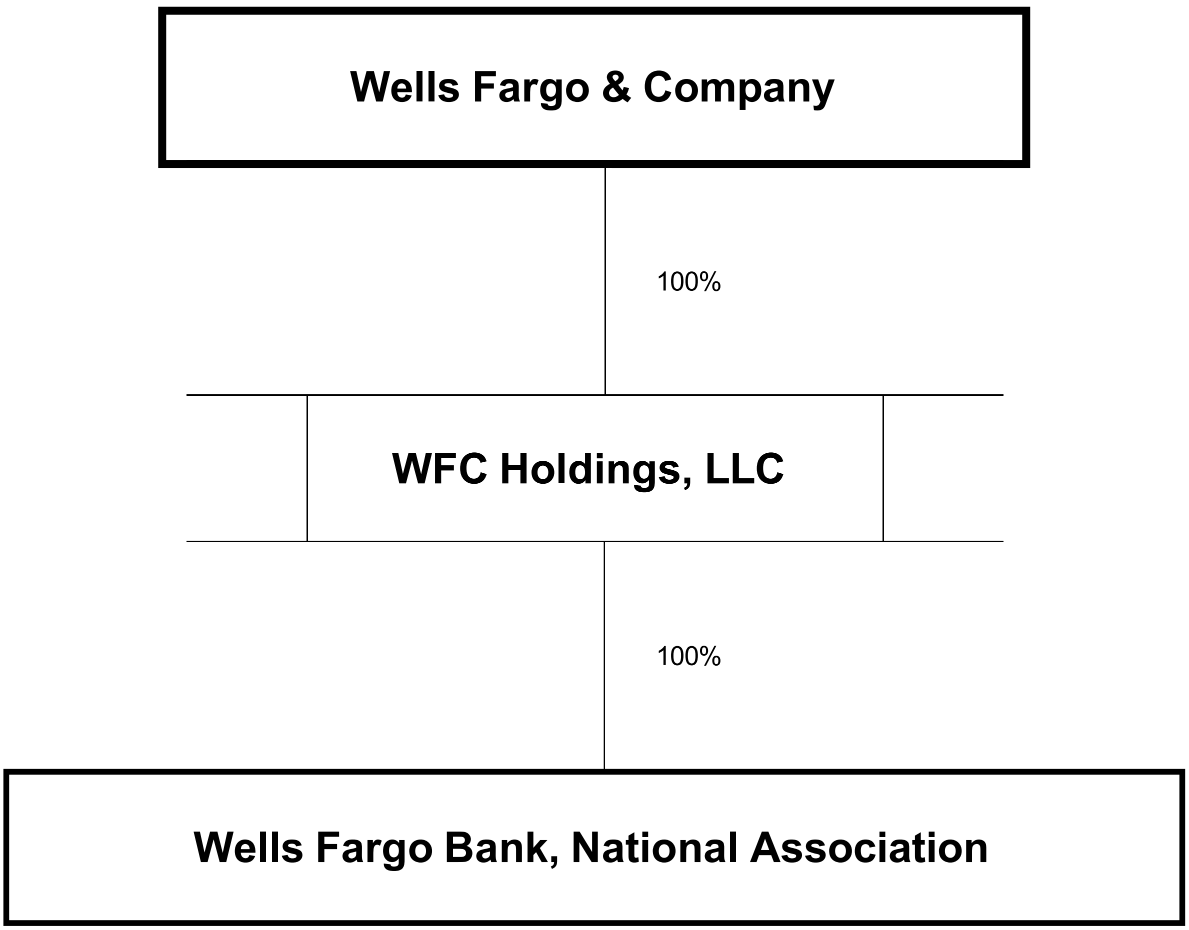
Ownership of Wells Fargo Bank, National Association



Attachment "B.2"

Section II – Disclosure of Ownership Interests

As disclosed in the Notice of Annual Meeting and Proxy Statement, dated March 15, 2023, of Wells Fargo & Company ("Wells Fargo"), The Vanguard Group, Inc. and certain entities controlled or under common control with The Vanguard Group, Inc. (collectively the "Reporting Persons") held approximately 8.78% of outstanding publicly traded common stock of Wells Fargo as of February 24, 2023. On information and belief, and in reliance on the statements made by The Vanguard Group, Inc. in a Schedule 13G filed with the SEC on February 9, 2023, the reported holdings represented shares of Wells Fargo's common stock acquired by the Reporting Persons as passive investors and held in the ordinary course of business, without any intent to acquire, change, or influence control of Wells Fargo. Wells Fargo does not know if the Reporting Persons currently hold more that 7.5% of its outstanding common stock. In any event, Wells Fargo has no authority or ability to require the Reporting Persons to file, and the Reporting Persons are under no obligation to assist or cooperate with Wells Fargo in filing, an EDS.

Attachment "C"

<u>Section III – Income or Compensation to, or Ownership by, City Elected Officials</u>

The undersigned warrants, to the best of his knowledge after due inquiry, that the Disclosing Party has not provided any income or compensation to any City elected official in 12 months before, nor does the undersigned reasonably expect to during the 12-month period following, the date the undersigned has signed this EDS. As the date of this filing, the undersigned is in the process of completing our due diligence on Independent Contracts, when completed we will update this response if needed.

Note that in the ordinary course of its business, Wells Fargo makes loans of various types with individuals and businesses. We have determined that these loans do not constitute a "business relationship" as defined in Chapter 2-156 of the Municipal Code.

Note further that the Disclosing Party has no way of identifying spouses or domestic partners of any City elected official, or the identities of any entities in which any city elected official or his or her spouse or domestic partner has a financial interest, and thus limits its certification to "City elected officials" as specially required by Section III. Specifically, we made due inquiry with respect to the City's Aldermen, the Mayor, the Treasurer and the City Clerk.

- Wells Fargo's Annual Reports are available at https://www.wellsfargo.com/invest_relations/annual.

APPENDIX III

SLAVERY ERA BUSINESS SUMMARY

After years of research, Wells Fargo has found no records in its possession that indicate it – or any entities it acquired before the Wachovia merger – had ever financed slavery, held slaves as collateral, owned slaves, or profited from slavery.

Furthermore, Wells Fargo has found no records in its possession that entities it acquired after the Wachovia merger had financed slavery, held slaves as collateral, owned slaves, or profited from slavery.

With the Wachovia merger completed as of December 31, 2008, Wells Fargo inherited hundreds of Wachovia's predecessor financial institutions, including two that had extensive involvement in slavery. In 2005 Wachovia announced these findings and apologized for the role its predecessors played and renewed its commitment to preserve and promote the history of the African-American experience in our nation. Wells Fargo shares that commitment and affirms its long-standing opposition to slavery.

The following narrative summarizes the results of the research that has been performed regarding Wachovia Bank and its ties to slavery.

SUMMARY OF RESEARCH

External research has revealed that two predecessor institutions of the undersigned, the Georgia Railroad & Banking Company and the Bank of Charleston, owned slaves.

Due to incomplete records, the undersigned cannot determine exactly how many slaves either the Georgia Railroad and Banking Company or the Bank of Charleston owned. Through specific transactional records, researchers determined that the Georgia Railroad and Banking Company owned at least 162 slaves, and the Bank of Charleston accepted at least 529 slaves as collateral on mortgaged properties or loans and acquired an undetermined number of these individuals when customers defaulted on their loans.

The Georgia Railroad and Banking Company was founded in 1833 to complete a railroad line between the City of Augusta and the interior of the state of Georgia. The company relied on slave labor for the construction and maintenance of this railway. According to the existing and searchable bank records, 162 slaves were owned or authorized to be purchased by the Georgia Railroad and Banking Company between 1836 and 1842. In addition, the company awarded work to contractors who purchased at least 400 slaves to perform work on the railways.

The Bank of Charleston, founded in 1834, issued loans and mortgages where enslaved individuals were used as collateral. A review of the bank's account ledgers revealed a minimum of 24 transactions involving reference to 529 enslaved individuals being used

as collateral. In most cases, the loan was paid on schedule, and the bank never took possession of slaves that were pledged as collateral on the loan. In several documented instances, however, customers defaulted on their loans and the Bank of Charleston took actual possession of slaves. The total number of slaves of whom the bank took possession cannot be accurately tallied due to the lack of records.

In addition, eleven predecessor companies were determined to have profited more indirectly from slavery through the following means:

- Founders, directors, or account holders who owned slaves and/or profited directly from slavery;
- Investing in or transacting business with companies or individuals that owned slaves;
- Investing in the bonds of slave states and municipalities;
- Investing in U.S. government bonds during years when the United States permitted and profited from slave labor directly through taxation.

These institutions are:

- Bank of North America (Philadelphia, Pa.)
- Bank of Baltimore
- The Philadelphia Bank (later Philadelphia National Bank)
- Farmers' & Mechanics' Bank of Philadelphia
- Pennsylvania Company for Insurances on Lives and the Granting of Annuities
- State Bank of Elizabeth (Elizabeth, N.J.)
- State Bank of Newark (Newark, N.J.)
- Savings Bank of Baltimore
- Girard National Bank
- The Carswell Group (established in 1868, acquired by Palmer & Cay, Inc. in 1985)
- The Trenton Banking Company

Anti-Predatory Lending Pledge*
for Municipal Depositories

We pledge that we are not and will not become a predatory lender as defined in Chapter 2-32 of the Municipal Code of Chicago. We further pledge that none of our affiliates is, and none of them will become, a predatory lender as defined in Chapter 2-32 of the Municipal Code of Chicago. We understand that becoming a predatory lender or becoming an affiliate of a predatory lender may result in the loss of our designation as a municipal depository.

*The definitions of certain terms set forth in Chapter 2-32 of the Municipal Code of Chicago and used in the Anti-Predatory Lending Pledge are reproduced on the attached pages.

Loan Policy Pledge for Municipal Depositories

We pledge not to arbitrarily reject mortgage loans for residential properties within a specific geographic area in Chicago because of the location and/or age of the property, or in the case of proposed borrower to arbitrarily vary the terms of those loans or the application procedures for those loans on the basis of race, color, religion, national origin, age, sex, marital status, ancestry, sexual orientation, parental status, source of income, disability or military discharge status. In addition, we pledge to make loans available to low- and moderate-income residential property in the neighborhoods of the City of Chicago within the limits of our legal restriction and prudent financial practices.

We understand that arbitrarily rejecting or varying the terms and/or application procedures of mortgage loans on the basis of the factors listed above may result in the lost of our designation as a municipal depository.

AFFIDAVIT OF COMMITMENT TO COMMUNITY REINVESTMENT, RESPONSIBILITY AND TRANSPARENCY
CITY OF CHICAGO OFFICE OF THE COMPTROLLER

I, David Offord a duly authorized representative of Wells Fargo Bank, N.A. represent and say as follows:

That for the purpose of becoming an eligible depository for active deposits of the City of Chicago, the undersigned Affiant states that it will use reasonable efforts to provide lending, financing, and banking opportunities as a commitment of community reinvestment to Chicago's low and moderate income (LMI) communities; Affiant states that such reasonable efforts shall include, but are not limited to:

A. Assignment of identifiable personnel to answer and respond to questions, concerns and inquiries by the citizens of Chicago, City Treasurer, City Comptroller, and the City Council regarding financial services, investment and lending products, services and related issues, including the Community Reinvestment Act (CRA) of 1977;

B. Cooperate with and support non-profit neighborhood development/redevelopment organizations in the implementation of "neighborhood economic development" strategies that focus on revitalization of communities that are more locally focused where an institution has a branch or market presence;

C. Commit to affirmatively market and make available banking services throughout Chicago's low and moderate income communities, by not meeting this commitment only through the installation of ATM distribution centers, but also by opening and/or maintaining branch locations within those communities;

D. Prepare an annual report of CRA activities, presented to the Comptroller, the Treasurer, and the City Council, that is made publicly available, demonstrating investment in all Chicago Communities, as well as reinvestment in LMI communities of Chicago, by community area that includes the number of loans and amount of loans in the following (6) categories:

   1. Home Purchase within LMI communities;
   2. Refinancing within LMI communities;
   3. Home Improvement;
   4. Small Business Loans (to companies with revenues under $1 Million);
   5. Community Development Loans including multi-family lending; and
   6. Community Development Investments to eligible Community Development Financial Institutions (CDFI) and other community intermediaries to further the goals of an institution to meet its obligations to the Community Reinvestment Act of 1977 and this Affidavit.

   Such a Municipal Depository annual CRA report will include, by community area, the number of mortgage loans originated and other strategies to minimize the impact of foreclosure and neighborhood instability.

E. An institution acknowledges that failure to comply with this Affidavit may result in discontinued status as a municipal depository.

Signed: [signature]

Dated: October 25, 2023

Print Name: David Offord

Title: Director

Government & Institutional Banking
10 South Wacker Drive, 16th Floor
Chicago, Illinois 60606

November 14, 2023

Chasse Rehwinkel
City Comptroller
Department of Finance- 7th Floor
Attention Steve Sakai
121 N. LaSalle
Chicago, IL 60602-1246

Dear Chasse Rehwinkel,

On behalf of Wells Fargo Bank, N.A., we are pleased to provide you with the accompanying response to the Request for Proposal ("RFP") for Designation as a 2024 Municipal Depository for the City of Chicago in fiscal year 2024. We appreciate the opportunity to demonstrate our commitment to the City of Chicago through our community support, lending, and economic development.

We acknowledge that all Addenda posted on the URL have been received. We intentionally provided a non-redacted response which we believe follows the requirements of this RFP.

As summarized in Section 18, Wells Fargo seeks to strengthen historically marginalized communities by investing in pathways to economic advancement and generational wealth. Since 2018, Wells Fargo has invested more than $32.5 million in Chicago focused on housing & affordability, financial health, small business growth, sustainability, climate resilience and community engagement.

I encourage you to review the Bank's Diversity, Equity and Inclusion report which is accessible via the following hyperlink:

Diversity, Equity, and Inclusion at Wells Fargo (wellsfargomedia.com)

We are committed to creating a company where we have diverse representation, perspectives, equity, and inclusion across the bank.

Community Investment

Wells Fargo invested approximately $8.5 million in grants from its Open for Business Fund to help the Chicago small business community pivot from surviving to thriving in 2021 and 2022. The funding helps increase access to capital with low-rate loans for women and diverse entrepreneurs and provides access to experts and other resources that help grow their businesses.

Five locally based Community Development Financial Institutions (CDFIs) and nonprofits that have been selected by the Open for Business Fund are the following:

Allies for Community Business
Chicago Community Loan Fund
Community Investment Corporation
Greater Chatham Initiative
Greenwood Archer Capital

- A $400,000 grant to Lawyers Committee for Better Housing from the Wells Fargo Foundation, which will enable the local organization to provide free or low-cost legal assistance for renters and representation for people in Chicago disproportionately affected by COVID-19 and at-risk of eviction.
- The U.S. Conference of Mayors and Wells Fargo awarded a $100,000 2020 CommunityWINS® grant to Neighborhood Housing Services of Chicago in support of the Preservation of Affordable Multi-Unit
- Properties Project. The program seeks to not only support existing landlords with 2 – 4-unit rental properties in keeping and fixing their affordable units, but also support and grow a next generation of small landlords that can carry the community-oriented tradition of homeownership.
- Wells Fargo is proud to be one of the largest providers of home purchase loans to Black and Hispanic borrowers in the Chicago area, according to HMDA data. In 2020-2021, Wells Fargo provided $154 million in equity and construction financing for approximately 850 affordable housing units in Chicago's Campbell Terrace Senior Living, Northpoint Apartments and Circle Park developments.
- Wells Fargo awarded a $3.15 million grant to Elevate Energy to accelerate the equitable decarbonization of Chicago's housing stock through adding solar power and energy retrofits to lower energy costs and improve health. This grant, funded from 2021-2023, will also engage contractors of color to make these upgrades.

CRA Rating

In May 2020, Wells Fargo received an "Outstanding" rating from the Office of the Comptroller of the Currency – the highest possible rating. Throughout our history – before, during and since this review period – Wells Fargo has worked diligently to demonstrate a strong commitment through lending to, investing in and providing service to low- and moderate-income communities across the country.

*"While Wells Fargo still has work to do to regain the trust of our customers, regulators and others, our strong commitment to lending to, investing in and providing service to low- and moderate-income communities across the country has not wavered, and this rating is proof that our work is making a difference," said **Wells Fargo CEO Charlie Scharf**.*

The CRA Performance Evaluation specifically notes the following:

- Is a "leader in making community development (CD) loans."
- Makes "significant use of innovative and/or flexible loan products" to meet credit needs.
- Provides retail banking options that are accessible in a majority of the areas surveyed.

The City is a top priority and we welcome the opportunity to provide commercial banking and deposit services to the City of Chicago. Wells Fargo is investing in Chicago. Our CEO, Charlie Scharf recently announced a $175 million Chicago-area commitment which targets the expansion of 23 additional retail branches by 2026. We believe that our commitment to Diversity, Equity and Inclusion, lending and philanthropy strengthens the Chicago community and helps drive economic development within the city. We look forward to establishing a commercial banking partnership which would deliver innovation, automation and help the City reach its financial goals.

Should you have any questions regarding our proposal or require further information, please do not hesitate to contact us. We look forward to continuing this conversation.

Sincerely,

David R. Offord

NM – Not meaningful

(1) In first quarter 2023, we adopted Financial Accounting Standards Board (FASB) Accounting Standards Update (ASU) 2018-12 – Financial Services – Insurance (Topic 944): *Targeted Improvements to the Accounting for Long-Duration Contracts*. We adopted ASU 2018-12 with retrospective application, which required revision of prior period financial statements. Prior period risk-based capital and certain other regulatory related metrics were not revised. For additional information, including the financial statement line items impacted by the adoption of ASU 2018-12, see Note 1 (Summary of Significant Accounting Policies) to Financial Statements in this Report.

(2) Pre-tax pre-provision profit (PTPP) is total revenue less noninterest expense. Management believes that PTPP is a useful financial measure because it enables investors and others to assess the Company's ability to generate capital to cover credit losses through a credit cycle.

(3) Includes provision for credit losses for loans, debt securities, and interest-earning deposits with banks.

(4) Book value per common share is common stockholders' equity divided by common shares outstanding. Tangible book value per common share is tangible common equity divided by common shares outstanding.

(5) Tangible common equity is a non-GAAP financial measure and represents total equity less preferred equity, noncontrolling interests, goodwill, certain identifiable intangible assets (other than mortgage servicing rights) and goodwill and other intangibles on investments in consolidated portfolio companies, net of applicable deferred taxes. The methodology of determining tangible common equity may differ among companies. Management believes that return on average tangible common equity and tangible book value per common share, which utilize tangible common equity, are useful financial measures because they enable management, investors, and others to assess the Company's use of equity. For additional information, including a corresponding reconciliation to generally accepted accounting principles (GAAP) financial measures, see the "Capital Management – Tangible Common Equity" section in this Report.

(6) Represents Wells Fargo net income divided by average assets.

(7) Represents Wells Fargo net income applicable to common stock divided by average common stockholders' equity.

(8) The efficiency ratio is noninterest expense divided by total revenue (net interest income and noninterest income).

(9) For additional information, see the "Capital Management" section and Note 21 (Regulatory Capital Requirements and Other Restrictions) to Financial Statements in this Report.

(10) Represents TLAC divided by RWAs, which is our binding TLAC ratio, determined by using the greater of RWAs under the Standardized and Advanced Approaches.

(11) Represents average high-quality liquid assets divided by average projected net cash outflows, as each is defined under the LCR rule.

This Quarterly Report, including the Financial Review and the Financial Statements and related Notes, contains forward-looking statements, which may include forecasts of our financial results and condition, expectations for our operations and business, and our assumptions for those forecasts and expectations. Do not unduly rely on forward-looking statements. Actual results may differ materially from our forward-looking statements due to several factors. Factors that could cause our actual results to differ materially from our forward-looking statements are described in this Report, including in the "Forward-Looking Statements" section, *and in the "Risk Factors" and "Regulation and Supervision" sections of our Annual Report on Form 10-K for the year ended December 31,* 2022 *(2022 Form 10-K).*

When we refer to "Wells Fargo," "the Company," "we," "our," or "us" in this Report, we mean Wells Fargo & Company and Subsidiaries (consolidated). When we refer to the "Parent," we mean Wells Fargo & Company. See the "Glossary of Acronyms" for definitions of terms used throughout this Report.

Financial Review

Overview

Wells Fargo & Company is a leading financial services company that has approximately $1.9 trillion in assets, proudly serves one in three U.S. households and more than 10% of small businesses in the U.S., and is a leading middle market banking provider in the U.S. We provide a diversified set of banking, investment and mortgage products and services, as well as consumer and commercial finance, through our four reportable operating segments: Consumer Banking and Lending, Commercial Banking, Corporate and Investment Banking, and Wealth and Investment Management. Wells Fargo ranked No. 47 on *Fortune's* 2023 rankings of America's largest corporations. We ranked fourth in assets and third in the market value of our common stock among all U.S. banks at June 30, 2023.

Wells Fargo's top priority remains building a risk and control infrastructure appropriate for its size and complexity. The Company is subject to a number of consent orders and other regulatory actions, which may require the Company, among other things, to undertake certain changes to its business, operations, products and services, and risk management practices. Addressing these regulatory actions is expected to take multiple years, and we are likely to continue to experience issues or delays along the way in satisfying their requirements. We are also likely to continue to identify more issues as we implement our risk and control infrastructure, which may result in additional regulatory actions. Issues or delays with one regulatory action could affect our progress on others, and regulators have indicated the potential for escalating consequences for banks that do not timely resolve open issues. Failure to satisfy the requirements of a regulatory action on a timely basis could result in additional penalties, business restrictions, limitations on subsidiary capital distributions, increased capital or liquidity requirements, enforcement actions, and other negative consequences, which could be significant. While we still have significant work to do and have not yet satisfied certain aspects of these regulatory actions, the Company is committed to devoting the resources necessary to operate with strong business practices and controls, maintain the highest level of integrity, and have an appropriate culture in place.

Federal Reserve Board Consent Order Regarding Governance Oversight and Compliance and Operational Risk Management

On February 2, 2018, the Company entered into a consent order with the Board of Governors of the Federal Reserve System (FRB). As required by the consent order, the Company's Board of Directors (Board) submitted to the FRB a plan to further enhance the Board's governance and oversight of the Company, and the Company submitted to the FRB a plan to further improve the Company's compliance and operational risk management program. The Company continues to engage with the FRB as the Company works to address the consent order provisions. The consent order also requires the Company, following the FRB's acceptance and approval of the plans and the Company's adoption and implementation of the plans, to complete an initial third-party review of the enhancements and improvements provided for in the plans. Until this third-party review is complete and the plans are approved and implemented to the satisfaction of the FRB, the Company's total consolidated assets as defined under the consent order will be limited to the level as of December 31, 2017. Compliance with this asset cap is measured on a two-quarter daily average basis to allow for management of temporary fluctuations. After removal of the asset cap, a second third-party review must also be conducted to assess the efficacy and sustainability of the enhancements and improvements.

Consent Orders with the Consumer Financial Protection Bureau and Office of the Comptroller of the Currency Regarding Compliance Risk Management Program, Automobile Collateral Protection Insurance Policies, and Mortgage Interest Rate Lock Extensions

On April 20, 2018, the Company entered into consent orders with the Consumer Financial Protection Bureau (CFPB) and the Office of the Comptroller of the Currency (OCC) to pay an aggregate of $1 billion in civil money penalties to resolve matters regarding the Company's compliance risk management program and past practices involving certain automobile collateral protection insurance (CPI) policies and certain mortgage interest rate lock extensions. As required by the consent orders, the Company submitted to the CFPB and OCC an enterprise-wide compliance risk management plan and a plan to enhance the Company's internal audit program with respect to federal consumer financial law and the terms of the consent orders. In addition, as required by the consent orders, the Company submitted for non-objection plans to remediate customers affected by the automobile collateral protection insurance and mortgage interest rate lock matters, as well as a plan for the management of remediation activities conducted by the Company. The Company continues to work to address the provisions of the consent orders. On September 9, 2021, the OCC assessed a $250 million civil money penalty against the Company related to insufficient progress in addressing requirements under the OCC's April 2018 consent order and loss mitigation activities in the Company's Home Lending business. On December 20, 2022, the CFPB modified its consent order to clarify how it would terminate.

Consent Order with the OCC Regarding Loss Mitigation Activities

On September 9, 2021, the Company entered into a consent order with the OCC requiring the Company to improve the execution, risk management, and oversight of loss mitigation activities in its Home Lending business. In addition, the consent order restricts the Company from acquiring certain third-party residential mortgage servicing and limits transfers of certain mortgage loans requiring customer remediation out of the Company's mortgage servicing portfolio until remediation is provided.

Consent Order with the CFPB Regarding Automobile Lending, Consumer Deposit Accounts, and Mortgage Lending

On December 20, 2022, the Company entered into a consent order with the CFPB requiring the Company to provide customer remediation for multiple matters related to automobile lending, consumer deposit accounts, and mortgage lending; maintain practices designed to ensure auto lending customers receive refunds for the unused portion of certain guaranteed automobile protection agreements; comply with certain business practice requirements related to consumer deposit accounts; and pay a $1.7 billion civil penalty to the CFPB. The required actions related to many of these matters were already substantially complete at the time we entered into the consent order, and the consent order lays out a path to termination after the Company completes the remainder of the required actions.

Retail Sales Practices Matters

In September 2016, we announced settlements with the CFPB, the OCC, and the Office of the Los Angeles City Attorney, and entered into related consent orders with the CFPB and the OCC, in connection with allegations that some of our retail customers received products and services they did not request. As a result, it remains a priority to rebuild trust through a comprehensive action plan that includes making things right for our customers, employees, and other stakeholders, and building a better Company for the future. On September 8, 2021, the CFPB consent order regarding retail sales practices expired.

For additional information regarding retail sales practices matters, including related legal and regulatory risk, see the "Risk Factors" section in our 2022 Form 10-K.

Customer Remediation Activities

Our priority of rebuilding trust has included an effort to identify areas or instances where customers may have experienced financial harm, provide remediation as appropriate, and implement additional operational and control procedures. We are working with our regulatory agencies in this effort.

We have accrued for the probable and estimable costs related to our customer remediation activities, which amounts may change based on additional facts and information, as well as ongoing reviews and communications with our regulators. As our ongoing reviews continue and as we continue to strengthen our risk and control infrastructure, we have identified and may in the future identify additional items or areas of potential concern. To the extent issues are identified, we will continue to assess any customer harm and provide remediation as appropriate. We have previously disclosed key areas of focus as part of these activities.

For additional information regarding these activities, including related legal and regulatory risk, see the "Risk Factors" section in our 2022 Form 10-K.

Recent Developments

Federal Deposit Insurance Corporation Special Assessment

In May 2023, the Federal Deposit Insurance Corporation (FDIC) proposed a rule to recover by special assessment losses to the FDIC deposit insurance fund as a result of recent bank failures. Under the proposed rule, the FDIC would collect a special assessment based on a calculation using an insured depository institution's estimated amount of uninsured deposits. As currently proposed, the amount of our special assessment may be up to $1.8 billion (pre-tax), and we expect to expense the entire amount upon the FDIC's finalization of the rule. The proposed rule may be changed prior to finalization and any changes may affect the timing or amount of the special assessment.

LIBOR Transition

The London Interbank Offered Rate (LIBOR) was a widely referenced benchmark rate that sought to estimate the cost at which banks could borrow on an unsecured basis from other banks. On March 5, 2021, the United Kingdom's Financial Conduct Authority and ICE Benchmark Administration, the administrator of LIBOR, announced that certain settings of LIBOR would no longer be published on a representative basis after December 31, 2021, and the most commonly used U.S. dollar (USD) LIBOR settings would no longer be published on a representative basis after June 30, 2023.

In first quarter 2022, the Adjustable Interest Rate (LIBOR) Act (the LIBOR Act) was enacted into U.S. federal law to provide a statutory framework to replace LIBOR with a benchmark rate based on the Secured Overnight Financing Rate (SOFR) in U.S. law contracts that do not have fallback provisions or that have fallback provisions resulting in a replacement rate based on LIBOR. The FRB adopted a final rule implementing the LIBOR Act on December 16, 2022, which became effective on February 27, 2023.

We no longer offer new contracts referencing LIBOR and legacy contracts indexed to USD LIBOR have transitioned to SOFR-based or other alternative reference rates in accordance with existing fallback provisions or the LIBOR Act.

For additional information regarding the risks and potential impact of LIBOR or any other referenced financial metric being significantly changed, replaced or discontinued, see the "Risk Factors" section in our 2022 Form 10-K.

Capital Matters

In June 2023, the Company completed the annual Comprehensive Capital Analysis and Review (CCAR) stress test process. On July 27, 2023, the FRB confirmed that our stress capital buffer for the period October 1, 2023, through September 30, 2024, will be 2.90%, which is lower than our current stress capital buffer of 3.20%.

On July 25, 2023, the Board approved an increase to the Company's third quarter 2023 common stock dividend to $0.35 per share and the Company announced that the Board authorized a new common stock repurchase program of up to $30 billion.

On July 27, 2023, federal banking regulators issued a proposed rule that would impact the way in which risk-based capital requirements are determined for certain banks. The proposed rule would eliminate the current Advanced Approach and replace it with a new expanded risk-based approach for the measurement of risk-weighted assets, including more granular risk weights for credit risk, a new market risk framework, and a new standardized approach for measuring operational risk. The new requirements would be phased in over a three-year period beginning July 1, 2025. The Company expects a significant increase in its risk-weighted assets and a net increase in its capital requirements based on a preliminary assessment of the proposed rule. The Company is considering a range of potential actions to address the impact of the proposed rule, including balance sheet and capital optimization strategies.

In July 2023, we issued $1.725 billion of our Preferred Stock, Series EE.

For additional information about capital planning, see the "Capital Management – Capital Planning and Stress Testing" section in this Report.

Financial Performance

Adoption of Accounting Standards Update 2018-12

In first quarter 2023, we adopted Financial Accounting Standards Board (FASB) Accounting Standards Update (ASU) 2018-12 – Financial Services – Insurance (Topic 944): *Targeted Improvements to the Accounting for Long-Duration Contracts.*

We adopted this ASU with retrospective application, which required revision of prior period financial statements. Prior period risk-based capital and certain other regulatory related metrics were not revised. For additional information, including the financial statement line items impacted by the adoption of ASU 2018-12, see Note 1 (Summary of Significant Accounting Policies) to Financial Statements in this Report.

NM – Not meaningful
(1) Includes provision for credit losses for loans, debt securities, and interest-earning deposits with banks.

In second quarter 2023, we generated $4.9 billion of net income and diluted earnings per common share (EPS) of $1.25, compared with $3.1 billion of net income and diluted EPS of $0.75 in the same period a year ago. Financial performance for second quarter 2023, compared with the same period a year ago, included the following:

- total revenue increased due to higher net interest income and higher noninterest income;
- provision for credit losses reflected increases for commercial real estate loans, primarily office loans, as well as for increases in credit card loan balances;
- noninterest expense increased due to higher personnel, technology and equipment, and advertising expense, partially offset by lower operating losses;
- average loans increased driven by loan growth across both our commercial and consumer loan portfolios; and
- average deposits decreased driven by reductions in all operating segments, partially offset by growth in Corporate.

In the first half of 2023, we generated $9.9 billion of net income and diluted EPS of $2.48, compared with $6.9 billion of net income and diluted EPS of $1.66 in the same period a year ago. Financial performance for the first half of 2023, compared with the same period a year ago, included the following:

- total revenue increased due to higher net interest income, partially offset by lower noninterest income;
- provision for credit losses reflected increases for commercial real estate loans, primarily office loans, as well as for increases in credit card loan balances;
- noninterest expense decreased due to lower operating losses, partially offset by higher personnel, technology and equipment, and advertising expense;
- average loans increased driven by loan growth across both our commercial and consumer loan portfolios; and
- average deposits decreased driven by reductions in all operating segments, partially offset by growth in Corporate.

Capital and Liquidity

We maintained a strong capital position in the first half of 2023, with total equity of $182.0 billion at June 30, 2023, compared with $182.2 billion at December 31, 2022. In addition, capital and liquidity at June 30, 2023, included the following:

- our Common Equity Tier 1 (CET1) ratio was 10.73% under the Standardized Approach (our binding ratio), which continued to exceed the regulatory minimum and buffers of 9.20%;
- our total loss absorbing capacity (TLAC) as a percentage of total risk-weighted assets was 23.12%, compared with the regulatory minimum of 21.50%; and
- our liquidity coverage ratio (LCR) was 123%, which continued to exceed the regulatory minimum of 100%.

See the "Capital Management" and the "Risk Management – Asset/Liability Management – Liquidity Risk and Funding" sections in this Report for additional information regarding our capital and liquidity, including the calculation of our regulatory capital and liquidity amounts.

Credit Quality
Credit quality reflected the following:
- The allowance for credit losses (ACL) for loans of $14.8 billion at June 30, 2023, increased $1.2 billion from December 31, 2022.
- Our provision for credit losses for loans was $3.0 billion in the first half of 2023, compared with $(197) million in the same period a year ago. The ACL for loans and the provision for credit losses for loans reflected increases for commercial real estate loans, primarily office loans, as well as for increases in credit card loan balances.
- The allowance coverage for total loans was 1.56% at June 30, 2023, compared with 1.42% at December 31, 2022.
- Commercial portfolio net loan charge-offs were $200 million, or 15 basis points of average commercial loans, in second quarter 2023, compared with net loan charge-offs of $23 million, or 2 basis points, in the same period a year ago, driven by higher losses across all commercial portfolios.
- Consumer portfolio net loan charge-offs were $564 million, or 58 basis points of average consumer loans, in second quarter 2023, compared with net loan charge-offs of $321 million, or 33 basis points, in the same period a year ago, driven by higher losses in all consumer portfolios, primarily in our credit card portfolio.
- Nonperforming assets (NPAs) of $7.0 billion at June 30, 2023, increased $1.3 billion, or 22%, from December 31, 2022, driven by higher commercial real estate nonaccrual loans, predominantly within the office property type, partially offset by lower residential mortgage nonaccrual loans. NPAs represented 0.74% of total loans at June 30, 2023.
- Criticized loans in the commercial portfolio were $29.0 billion at June 30, 2023, compared with $25.0 billion at December 31, 2022, primarily driven by an increase in criticized commercial real estate loans in the office property type.

Earnings Performance

Wells Fargo net income for second quarter 2023 was $4.9 billion ($1.25 diluted EPS), compared with $3.1 billion ($0.75 diluted EPS) in the same period a year ago. Net income increased in second quarter 2023, compared with the same period a year ago, predominantly due to a $3.0 billion increase in net interest income, partially offset by a $1.1 billion increase in provision for credit losses.

Net income for the first half of 2023 was $9.9 billion ($2.48 diluted EPS), compared with $6.9 billion ($1.66 diluted EPS) in the same period a year ago. Net income increased in the first half of 2023, compared with the same period a year ago, predominantly due to a $7.1 billion increase in net interest income, partially offset by a $3.1 billion increase in provision for credit losses and a $586 million decrease in noninterest income.

Net Interest Income
Net interest income and net interest margin increased in both the second quarter and first half of 2023, compared with the same periods a year ago, due to the impact of higher interest rates on earning assets and higher loan balances, partially offset by higher expenses for interest bearing deposits and long-term debt.

Table 1 presents the individual components of net interest income and net interest margin. Net interest income and net interest margin are presented on a taxable-equivalent basis in Table 1 to consistently reflect income from taxable and tax-exempt loans and debt and equity securities based on a 21% federal statutory tax rate for the periods ended June 30, 2023 and 2022.

For additional information about net interest income and net interest margin, see the “Earnings Performance – Net Interest Income” section in our 2022 Form 10-K.

Table 1: Average Balances, Yields and Rates Paid (Taxable-Equivalent Basis) (1)

						Quarter ended June 30,
			2023			2022
(in millions)	Average balance	Interest income/ expense	Interest rates	Average balance	Interest income/ expense	Interest rates

Net interest margin and net interest income on a taxable-equivalent basis (3)		$ **26,711**	**3.14 %**		$ 19,634	2.27 %

(1) The average balance amounts represent amortized costs, except for certain held-to-maturity (HTM) debt securities, which exclude unamortized basis adjustments related to the transfer of those securities from available-for-sale (AFS) debt securities. The interest rates are based on interest income or expense amounts for the period and are annualized. Interest rates and amounts include the effects of hedge and risk management activities associated with the respective asset and liability categories.

(2) Nonaccrual loans and any related income are included in their respective loan categories.

(3) Includes taxable-equivalent adjustments of $105 million and $108 million for the quarters ended June 30, 2023 and 2022, respectively, and $212 million and $215 million for the first half of 2023 and 2022, respectively, predominantly related to tax-exempt income on certain loans and securities.

Noninterest Income

NM – Not meaningful

Second quarter 2023 vs. second quarter 2022

Deposit-related fees decreased reflecting:
- our efforts to help customers avoid overdraft fees; and
- lower fees on commercial accounts driven by higher earnings credit rates due to an increase in interest rates.

Investment advisory and other asset-based fees decreased reflecting lower average market valuations.

Fees from the majority of Wealth and Investment Management (WIM) advisory assets are based on a percentage of the market value of the assets at the beginning of the quarter. For additional information on certain client investment assets, see the "Earnings Performance – Operating Segment Results – Wealth and Investment Management – WIM Advisory Assets" section in this Report.

Investment banking fees increased due to a $107 million write-down on unfunded leveraged finance commitments in second quarter 2022.

Net servicing income decreased driven by:
- lower servicing fees due to a lower balance of mortgage loans serviced for others, including the impact of mortgage servicing right (MSR) sales;

partially offset by:
- higher income from net favorable hedge results related to MSR valuations.

Net gains on mortgage loan originations/sales decreased due to lower residential mortgage origination volumes.

For additional information on servicing income and net gains on mortgage loan originations/sales, see Note 6 (Mortgage Banking Activities) to Financial Statements in this Report.

Net gains from trading activities increased driven by higher trading revenue in equities, structured products, credit products, rates, and foreign exchange.

Net gains from debt securities decreased due to lower gains on sales of asset-based securities and municipal bonds in our investment portfolio as a result of decreased sales volumes.

Net losses from equity securities decreased reflecting:
- lower impairment of equity securities; and
- higher unrealized gains on marketable equity securities;

partially offset by:
- lower unrealized gains on nonmarketable equity securities driven by our affiliated venture capital and private equity businesses.

Other income decreased driven by:
- higher amortization due to growth in renewable energy investments (offset by benefits and credits in income tax expense); and
- higher valuation losses related to the retained litigation risk associated with shares of Visa B common stock that we previously sold.

First half of 2023 vs. first half of 2022

Deposit-related fees decreased reflecting:
- the elimination of non-sufficient funds fees and our efforts to help customers avoid overdraft fees; and
- lower fees on commercial accounts driven by higher earnings credit rates due to an increase in interest rates.

Investment advisory and other asset-based fees decreased reflecting lower average market valuations.

Fees from the majority of WIM advisory assets are based on a percentage of the market value of the assets at the beginning of the quarter. For additional information on certain client investment assets, see the "Earnings Performance – Operating Segment Results – Wealth and Investment Management – WIM Advisory Assets" section in this Report.

Commissions and brokerage services fees increased due to higher service fee rates.

Net servicing income decreased driven by:

- lower servicing fees due to a lower balance of mortgage loans serviced for others, including the impact of MSR sales;

partially offset by:

- higher income from net favorable hedge results related to MSR valuations.

Net gains on mortgage loan originations/sales decreased driven by:

- lower residential mortgage origination volumes; and
- lower gains related to the resecuritization of loans we purchased from Government National Mortgage Association (GNMA) loan securitization pools.

For additional information on servicing income and net gains on mortgage loan originations/sales, see Note 6 (Mortgage Banking Activities) to Financial Statements in this Report.

Net gains from trading activities increased driven by higher trading results across all asset classes.

Net gains from debt securities decreased due to lower gains on sales of asset-based securities and municipal bonds in our investment portfolio as a result of decreased sales volumes.

Net losses from equity securities increased reflecting:

- lower unrealized and realized gains on nonmarketable equity securities driven by our affiliated venture capital and private equity businesses;

partially offset by:

- lower impairment of equity securities; and
- higher unrealized gains on marketable equity securities.

Other income decreased driven by the change in fair value of liabilities associated with our reinsurance business, which was recognized as a result of our adoption of ASU 2018-12 in first quarter 2023. For additional information on our adoption of ASU 2018-12, see Note 1 (Summary of Significant Accounting Policies) to Financial Statements in this Report.

Noninterest Expense

Table 3: Noninterest Expense

(in millions)		Quarter ended June 30, 2023	2022	$ Change	% Change		Six months ended June 30, 2023	2022	$ Change	% Change

Other		**827**	743	84	11		**1,626**	1,474	152	10
Total	$	**12,987**	12,862	125	1	$	**26,663**	26,713	(50)	—

(1) Represents expenses for assets we lease to customers.

Second quarter 2023 vs. second quarter 2022

Personnel expense increased driven by:
- higher salaries expense, including higher severance expense;

partially offset by:
- the impact of efficiency initiatives.

Technology, telecommunications and equipment expense increased due to higher expense for the amortization of internally developed software and higher expense for technology contracts.

Operating losses decreased driven by lower expense for customer remediation and litigation matters.

As previously disclosed, we have outstanding litigation, regulatory, and customer remediation matters that could impact operating losses in the coming quarters.

Advertising and promotion expense increased due to higher marketing and brand campaign volumes.

Other expense increased due to higher Federal Deposit Insurance Corporation (FDIC) deposit assessment expense driven by a higher assessment rate.

First half of 2023 vs. first half of 2022

Personnel expense increased driven by:
- higher salaries expense, including higher severance expense;

partially offset by:
- lower incentive compensation expense; and
- the impact of efficiency initiatives.

Technology, telecommunications and equipment expense increased due to higher expense for the amortization of internally developed software and higher expense for technology contracts.

Operating losses decreased driven by lower expense for customer remediation and litigation matters.

As previously disclosed, we have outstanding litigation, regulatory, and customer remediation matters that could impact operating losses in the coming quarters.

Professional and outside services expense decreased driven by efficiency initiatives to reduce our spending on consultants and contractors.

Advertising and promotion expense increased due to higher marketing and brand campaign volumes.

Other expense increased due to higher FDIC deposit assessment expense driven by a higher assessment rate.

We expect our FDIC deposit assessment expense will increase significantly as a result of the FDIC's proposed rule to charge a special assessment.

Income Tax Expense

Table 4: Income Tax Expense

(in millions)		Quarter ended June 30, 2023	2022	$ Change	% Change		Six months ended June 30, 2023	2022	$ Change	% Change
Income before income tax expense	$	**5,833**	3,598	2,235	62 %	$	**11,679**	8,262	3,417	41 %
Income tax expense		**930**	622	308	50		**1,896**	1,368	528	39
Effective income tax rate (1)		**15.8%**	16.5				**16.0%**	16.5		

(1) Represents Income tax expense (benefit) divided by Income (loss) before income tax expense (benefit) less Net income (loss) from noncontrolling interests.

For additional information on income taxes, see Note 22 (Income Taxes) to Financial Statements in our 2022 Form 10-K.

Operating Segment Results

Our management reporting is organized into four reportable operating segments: Consumer Banking and Lending; Commercial Banking; Corporate and Investment Banking; and Wealth and Investment Management. All other business activities that are not included in the reportable operating segments have been included in Corporate. For additional information, see Table 5. We define our reportable operating segments by type of product and customer segment, and their results are based on our management reporting process. The management reporting process measures the performance of the reportable operating segments based on the Company's management structure, and the results are regularly reviewed with our Chief Executive Officer and relevant senior management. The management reporting process is based on U.S. GAAP and includes specific adjustments, such as funds transfer pricing for asset/liability management, shared revenue and expenses, and taxable-equivalent adjustments to consistently reflect income from taxable and tax-exempt sources, which allows management to assess performance consistently across the operating segments.

Funds Transfer Pricing Corporate treasury manages a funds transfer pricing methodology that considers interest rate risk, liquidity risk, and other product characteristics. Operating segments pay a funding charge for their assets and receive a funding credit for their deposits, both of which are included in net interest income. The net impact of the funding charges or credits is recognized in corporate treasury.

Revenue and Expense Sharing When lines of business jointly serve customers, the line of business that is responsible for providing the product or service recognizes revenue or expense with a referral fee paid or an allocation of cost to the other line of business based on established internal revenue-sharing agreements.

When a line of business uses a service provided by another line of business or enterprise function (included in Corporate), expense is generally allocated based on the cost and use of the service provided.

Taxable-Equivalent Adjustments Taxable-equivalent adjustments related to tax-exempt income on certain loans and debt securities are included in net interest income, while taxable-equivalent adjustments related to income tax credits for low-income housing and renewable energy investments are included in noninterest income, in each case with corresponding impacts to income tax expense (benefit). Adjustments are included in Corporate, Commercial Banking, and Corporate and Investment Banking and are eliminated to reconcile to the Company's consolidated financial results.

Allocated Capital Reportable operating segments are allocated capital under a risk-sensitive framework that is primarily based on aspects of our regulatory capital requirements, and the assumptions and methodologies used to allocate capital are periodically assessed and revised. Effective January 1, 2023, management modified its capital allocation methodology to improve alignment of allocated capital with the binding regulatory constraints of the Company. Management believes that return on allocated capital is a useful financial measure because it enables management, investors, and others to assess a reportable operating segment's use of capital.

Selected Metrics We present certain financial and nonfinancial metrics that management uses when evaluating reportable operating segment results. Management believes that these metrics are useful to investors and others to assess the performance, customer growth, and trends of reportable operating segments or lines of business.

Table 5: Management Reporting Structure

Wells Fargo & Company				
Consumer Banking and Lending	**Commercial Banking**	**Corporate and Investment Banking**	**Wealth and Investment Management**	**Corporate**
• Consumer and Small Business Banking • Home Lending • Credit Card • Auto • Personal Lending	• Middle Market Banking • Asset-Based Lending and Leasing	• Banking • Commercial Real Estate • Markets	• Wells Fargo Advisors • The Private Bank	• Corporate Treasury • Enterprise Functions • Investment Portfolio • Affiliated venture capital and private equity businesses • Non-strategic businesses

Table 6 and the following discussion present our results by reportable operating segment. For additional information, see Note 16 (Operating Segments) to Financial Statements in this Report.

Net income (loss)	$	3,163	1,598	2,594	1,068	(1,493)	—	6,930

(1) All other business activities that are not included in the reportable operating segments have been included in Corporate. For additional information, see the "Corporate" section below.
(2) Taxable-equivalent adjustments related to tax-exempt income on certain loans and debt securities are included in net interest income, while taxable-equivalent adjustments related to income tax credits for low-income housing and renewable energy investments are included in noninterest income, in each case with corresponding impacts to income tax expense (benefit). Adjustments are included in Corporate, Commercial Banking, and Corporate and Investment Banking and are eliminated to reconcile to the Company's consolidated financial results.

Consumer Banking and Lending offers diversified financial products and services for consumers and small businesses with annual sales generally up to $10 million. These financial products and services include checking and savings accounts, credit and debit cards as well as home, auto, personal, and small business lending. Table 6a and Table 6b provide additional information for Consumer Banking and Lending.

(1) Return on allocated capital is segment net income (loss) applicable to common stock divided by segment average allocated capital. Segment net income (loss) applicable to common stock is segment net income (loss) less allocated preferred stock dividends.
(2) Efficiency ratio is segment noninterest expense divided by segment total revenue (net interest income and noninterest income).
(3) Digital and mobile active customers is the number of consumer and small business customers who have logged on via a digital or mobile device, respectively, in the prior 90 days. Digital active customers includes both online and mobile customers.
(4) Deposit spread is (i) the internal funds transfer pricing credit on segment deposits minus interest paid to customers for segment deposits, divided by (ii) average segment deposits.
(5) Debit card purchase volume and transactions reflect combined activity for both consumer and business debit card purchases.
(6) Excludes residential mortgage loans subserviced for others.
(7) Excludes residential mortgage loans insured by the Federal Housing Administration (FHA) or guaranteed by the Department of Veterans Affairs (VA) and loans held for sale.
(8) Excludes nonaccrual loans.

Second quarter 2023 vs. second quarter 2022

Revenue increased driven by:
- higher net interest income driven by higher interest rates and deposit spreads, partially offset by lower deposit balances;

partially offset by:
- lower deposit-related fees reflecting our efforts to help customers avoid overdraft fees; and
- lower mortgage banking noninterest income due to lower residential mortgage origination volumes.

Provision for credit losses increased due to higher net charge-offs driven by credit card loans.

Noninterest expense was stable, reflecting:
- lower personnel expense driven by lower revenue-related incentive compensation in Home Lending due to lower production, and the impact of efficiency initiatives; and
- lower operating losses reflecting lower expense for customer remediation and litigation matters;

partially offset by:
- higher operating costs, advertising expense, and FDIC assessments.

First half of 2023 vs. first half of 2022

Revenue increased driven by:
- higher net interest income driven by higher interest rates and deposit spreads, partially offset by lower deposit balances;

partially offset by:
- lower mortgage banking noninterest income due to lower residential mortgage origination volumes and lower revenue related to the resecuritization of loans we purchased from GNMA loan securitization pools; and
- lower deposit-related fees reflecting the elimination of non-sufficient funds fees and our efforts to help customers avoid overdraft fees.

Provision for credit losses included a $841 million increase in the allowance for credit losses reflecting a less favorable economic outlook and portfolio credit normalization, as well as higher net charge-offs driven by credit card loans.

Noninterest expense decreased driven by:
- lower operating losses reflecting lower expense for customer remediation and litigation matters; and
- lower personnel expense driven by lower revenue-related incentive compensation in Home Lending due to lower production, and the impact of efficiency initiatives;

partially offset by:
- higher operating costs, advertising expense, and FDIC assessments.

Second quarter 2023 vs. second quarter 2022

Total loans (average and period-end) increased driven by:
- higher point of sale volume and the impact of new product launches in our Credit Card business; and
- higher loan balances in our Personal Lending business due to higher origination volumes and slower payment rates;

partially offset by:
- a decline in loan balances in our Auto business due to lower origination volumes reflecting credit tightening actions and rising interest rates; and
- a decline in Paycheck Protection Program loans in Consumer and Small Business Banking.

Total deposits (average and period-end) decreased due to consumer deposit outflows on consumer spending, as well as customer migration to higher yielding alternatives.

First half of 2023 vs. first half of 2022

Total loans (average) increased driven by:
- higher point of sale volume and the impact of new product launches in our Credit Card business;
- higher loan balances in Home Lending; and
- higher loan balances in our Personal Lending business due to higher origination volumes and slower payment rates;

partially offset by:
- a decline in loan balances in our Auto business due to lower origination volumes reflecting credit tightening actions and rising interest rates; and
- a decline in Paycheck Protection Program loans in Consumer and Small Business Banking.

Total deposits (average) decreased due to consumer deposit outflows on consumer spending, as well as customer migration to higher yielding alternatives.

Commercial Banking provides financial solutions to private, family owned and certain public companies. Products and services include banking and credit products across multiple industry sectors and municipalities, secured lending and lease products, and treasury management. Table 6c and Table 6d provide additional information for Commercial Banking.

Efficiency ratio	**48**	59			**51**	62		

NM – Not meaningful

Second quarter 2023 vs. second quarter 2022

Revenue increased driven by:
- higher net interest income reflecting higher interest rates and deposit spreads as well as higher loan balances;

partially offset by:
- lower deposit-related fees driven by the impact of higher earnings credit rates, which result in lower fees for commercial customers.

Provision for credit losses increased reflecting higher net charge-offs driven by a small number of borrowers, with little signs of systemic weakness across the portfolio, partially offset by a $54 million decrease in the allowance for credit losses.

Noninterest expense increased primarily due to higher personnel expense and operating costs, partially offset by the impact of efficiency initiatives.

First half of 2023 vs. first half of 2022

Revenue increased driven by:
- higher net interest income reflecting higher interest rates and deposit spreads as well as higher loan balances;

partially offset by:
- lower deposit-related fees driven by the impact of higher earnings credit rates, which result in lower fees for commercial customers.

Provision for credit losses reflected loan growth.

Noninterest expense increased driven by higher operating costs and personnel expense, partially offset by the impact of efficiency initiatives.

Second quarter 2023 vs. second quarter 2022

Total loans (average and period-end) increased driven by new customer growth and higher line utilization.

Total deposits (average and period-end) decreased due to customer migration to higher yielding alternatives, partially offset by additions of deposits from new and existing customers.

First half of 2023 vs. first half of 2022

Total loans (average) increased driven by new customer growth and higher line utilization.

Total deposits (average) decreased due to customer migration to higher yielding alternatives, partially offset by additions of deposits from new and existing customers.

Corporate and Investment Banking delivers a suite of capital markets, banking, and financial products and services to corporate, commercial real estate, government and institutional clients globally. Products and services include corporate banking, investment banking, treasury management, commercial real estate lending and servicing, equity and fixed income solutions as well as sales, trading, and research capabilities. Table 6e and Table 6f provide additional information for Corporate and Investment Banking.

NM – Not meaningful

Second quarter 2023 vs. second quarter 2022

Revenue increased driven by:
- higher net gains from trading activities driven by higher trading revenue in equities, structured products, credit products, rates, and foreign exchange;
- higher net interest income reflecting higher interest rates; and
- higher investment banking fees, as second quarter 2022 included a $107 million write-down on unfunded leveraged finance commitments.

Provision for credit losses increased reflecting a $901 million increase in the allowance for credit losses driven by commercial real estate loans, primarily office loans, as well as higher net charge-offs.

Noninterest expense increased driven by higher operating costs and personnel expense, partially offset by the impact of efficiency initiatives.

First half of 2023 vs. first half of 2022

Revenue increased driven by:
- higher net gains from trading activities driven by higher trading results across all asset classes; and
- higher net interest income reflecting higher interest rates;

partially offset by:
- lower deposit-related fees driven by the impact of higher earnings credit rates, which result in lower fees for corporate banking customers; and
- lower investment banking fees due to lower market activity.

Provision for credit losses increased reflecting a $1.3 billion increase in the allowance for credit losses driven by commercial real estate loans, primarily office loans, as well as higher net charge-offs.

Noninterest expense increased driven by higher operating costs and personnel expense, partially offset by the impact of efficiency initiatives.

Second quarter 2023 vs. second quarter 2022

Total assets (average and period-end) decreased reflecting:
- lower loan balances driven by lower originations; and
- lower trading-related derivative assets due to declines in derivative balances for commodities and equities;

partially offset by:
- increased volume of reverse repurchase agreements; and
- higher trading account securities driven by higher mortgage-backed securities, equity, and bond trading balances.

Total deposits (average and period-end) decreased due to customer migration to higher yielding alternatives, partially offset by additions of deposits from new and existing customers.

First half of 2023 vs. first half of 2022

Total assets (average) decreased driven by lower trading-related derivative assets due to declines in derivative balances for commodities and equities.

Total deposits (average) decreased due to customer migration to higher yielding alternatives, partially offset by additions of deposits from new and existing customers.

Wealth and Investment Management provides personalized wealth management, brokerage, financial planning, lending, private banking, trust and fiduciary products and services to affluent, high-net worth and ultra-high-net worth clients. We operate through financial advisors in our brokerage and wealth offices, consumer bank branches, independent offices, and digitally through WellsTrade® and Intuitive Investor®. Table 6g and Table 6h provide additional information for Wealth and Investment Management (WIM).

Second quarter 2023 vs. second quarter 2022

Revenue decreased driven by:
- lower investment advisory and other asset-based fees due to lower average market valuations and net outflows of advisory assets;

partially offset by:
- higher net interest income reflecting higher interest rates, partially offset by lower deposit balances.

Noninterest expense increased driven by:
- higher operating costs;

partially offset by:
- lower personnel expense driven by lower revenue-related incentive compensation; and
- the impact of efficiency initiatives.

Total deposits (average and period-end) decreased due to customer migration to higher yielding alternatives.

First half of 2023 vs. first half of 2022

Revenue decreased driven by:
- lower investment advisory and other asset-based fees due to lower average market valuations and net outflows of advisory assets;

partially offset by:
- higher net interest income reflecting higher interest rates, partially offset by lower deposit balances; and
- higher commissions and brokerage services fees due to higher service fee rates.

Provision for credit losses included a $77 million increase in the allowance for credit losses reflecting a less favorable economic outlook and portfolio credit normalization.

Noninterest expense decreased driven by:
- lower personnel expense driven by lower revenue-related incentive compensation; and
- the impact of efficiency initiatives;

partially offset by:
- higher operating costs.

Total deposits (average) decreased due to customer migration to higher yielding alternatives.

WIM Advisory Assets In addition to transactional accounts, WIM offers advisory account relationships to brokerage customers. Fees from advisory accounts are based on a percentage of the market value of the assets as of the beginning of the quarter, which vary across the account types based on the distinct services provided, and are affected by investment performance as well as asset inflows and outflows. Advisory accounts include assets that are financial advisor-directed and separately managed by third-party managers as well as certain client-directed brokerage assets where we earn a fee for advisory and other services, but do not have investment discretion.

WIM also manages personal trust and other assets for high net worth clients, with fee income earned based on a percentage of the market value of these assets. Table 6h presents advisory assets activity by WIM line of business. Management believes that advisory assets is a useful metric because it allows management, investors, and others to assess how changes in asset amounts may impact the generation of certain asset-based fees.

For both second quarter 2023 and 2022, the average fee rate by account type ranged from 50 to 120 basis points.

Total WIM advisory assets	$ 912.4	32.6	(46.0)	(99.2)	799.8	$ 964.5	72.1	(88.8)	(148.0)	799.8

(1) Inflows include new advisory account assets, contributions, dividends and interest.
(2) Outflows include closed advisory account assets, withdrawals and client management fees.
(3) Market impact reflects gains and losses on portfolio investments.
(4) Investment advice and other services are provided to client, but decisions are made by the client and the fees earned are based on a percentage of the advisory account assets, not the number and size of transactions executed by the client.
(5) Professionally managed portfolios with fees earned based on respective strategies and as a percentage of certain client assets.
(6) Professional advisory portfolios managed by third-party asset managers. Fees are earned based on a percentage of certain client assets.
(7) Program with portfolios constructed of load-waived, no-load and institutional share class mutual funds. Fees are earned based on a percentage of certain client assets.
(8) Discretionary and non-discretionary portfolios held in personal trusts, investment agency, or custody accounts with fees earned based on a percentage of client assets.

Corporate includes corporate treasury and enterprise functions, net of allocations (including funds transfer pricing, capital, liquidity and certain expenses), in support of the reportable operating segments as well as our investment portfolio and affiliated venture capital and private equity businesses.

Corporate also includes certain lines of business that management has determined are no longer consistent with the long-term strategic goals of the Company as well as results for previously divested businesses. Table 6i and Table 6j provide additional information for Corporate.

Table 6i: Corporate – Income Statement

NM – Not meaningful

(1) Reflects results attributable to noncontrolling interests predominantly associated with the Company's consolidated venture capital investments.

Second quarter 2023 vs. second quarter 2022

Revenue increased driven by:
- higher net interest income reflecting higher interest rates; and
- lower impairments of equity securities and higher unrealized gains on marketable equity securities, partially offset by lower unrealized gains on nonmarketable equity securities from our affiliated venture capital and private equity businesses;

partially offset by:
- lower gains on the sales of debt securities in our investment portfolio.

Provision for credit losses reflected a decrease in allowance for credit losses.

Noninterest expense decreased driven by lower operating losses.

First half of 2023 vs. first half of 2022

Revenue increased driven by:
- higher net interest income reflecting higher interest rates;

partially offset by:
- lower unrealized and realized gains on nonmarketable equity securities from our affiliated venture capital and private equity businesses, partially offset by lower impairment of equity securities and higher unrealized gains on marketable equity securities.

Noninterest expense decreased driven by:
- the impact of divestitures; and
- lower operating losses.

Corporate includes our rail car leasing business, which had long-lived operating lease assets, net of accumulated depreciation, of $4.5 billion and $4.7 billion as of June 30, 2023, and December 31, 2022, respectively. The average age of our rail cars is 22 years and the rail cars are typically leased to customers under short-term leases of 3 to 5 years. Our four largest concentrations, which represented 67% of our rail car fleet as of June 30, 2023, were rail cars used for the transportation of cement/sand, agricultural grain, plastics, and coal products. We may incur impairment charges in the future based on changing economic and market conditions affecting the long-term demand and utility of specific types of rail cars. Our assumptions for impairment are sensitive to estimated utilization and rental rates as well as the estimated economic life of the leased asset. For additional information on the accounting for impairment of operating lease assets, see Note 1 (Summary of Significant Accounting Policies) and Note 8 (Leasing Activity) to Financial Statements in our 2022 Form 10-K.

Total deposits	**92,023**	21,563	70,460	327	**92,023**	21,563	70,460	327

(1) In first quarter 2023, we reclassified HTM debt securities with a fair value of $23.2 billion to AFS debt securities in connection with the adoption of ASU 2022-01 – Derivatives and Hedging (Topic 815): *Fair Value Hedging – Portfolio Layer Method*. For additional information, see Note 1 (Summary of Significant Accounting Policies) to Financial Statements in this Report.

Second quarter 2023 vs. second quarter 2022

Total assets (average and period-end) decreased reflecting:
- a decrease in average cash and due from banks, and interest-earning deposits with banks that are managed by corporate treasury as a result of a decrease in deposits in the operating segments and an increase in loans originated in the operating segments; and
- sales of and net unrealized losses on AFS debt securities.

Total deposits (average and period-end) increased driven by issuances of certificates of deposit (CDs).

First half of 2023 vs. first half of 2022

Total assets (average) decreased reflecting:
- a decrease in cash and due from banks, and interest-earning deposits with banks that are managed by corporate treasury as a result of a decrease in deposits in the operating segments and an increase in loans originated in the operating segments; and
- sales of and net unrealized losses on AFS debt securities.

Total deposits (average) increased driven by issuances of CDs.

Balance Sheet Analysis

At June 30, 2023, our assets totaled $1.88 trillion, down $4.7 billion from December 31, 2022.

The following discussion provides additional information about the major components of our consolidated balance sheet. See the "Capital Management" section in this Report for information on changes in our equity.

Available-for-Sale and Held-to-Maturity Debt Securities

Table 7: Available-for-Sale and Held-to-Maturity Debt Securities

				June 30, 2023				December 31, 2022
($ in millions)	Amortized cost, net (1)	Net unrealized gains (losses)	Fair value	Weighted average expected maturity (yrs)	Amortized cost, net (1)	Net unrealized gains (losses)	Fair value	Weighted average expected maturity (yrs)
Available-for-sale (2)	$ 142,283	(8,032)	134,251	4.9	$ 121,725	(8,131)	113,594	5.4
Held-to-maturity (3)	272,360	(38,524)	233,836	8.2	297,059	(41,538)	255,521	8.1
Total	$ 414,643	(46,556)	368,087	n/a	$ 418,784	(49,669)	369,115	n/a

(1) Represents amortized cost of the securities, net of the allowance for credit losses of $7 million and $6 million related to available-for-sale debt securities and $76 million and $85 million related to held-to-maturity debt securities at June 30, 2023, and December 31, 2022, respectively.
(2) Available-for-sale debt securities are carried on our consolidated balance sheet at fair value.
(3) Held-to-maturity debt securities are carried on our consolidated balance sheet at amortized cost, net of the allowance for credit losses.

Table 7 presents a summary of our portfolio of investments in available-for-sale (AFS) and held-to-maturity (HTM) debt securities. See the "Balance Sheet Analysis – Available-for-Sale and Held-to-Maturity Debt Securities" section in our 2022 Form 10-K for information on our investment management objectives and practices and the "Risk Management – Asset/ Liability Management" section in this Report for information on liquidity and interest rate risk.

The amortized cost, net of the allowance for credit losses, of AFS and HTM debt securities decreased from December 31, 2022. Purchases of AFS and HTM debt securities were more than offset by portfolio runoff and sales of AFS debt securities.

In addition, we transferred AFS debt securities with a fair value of $3.7 billion to HTM debt securities in the first half of 2023 due to actions taken to reposition the overall portfolio for capital management purposes. Debt securities transferred from AFS to HTM in the first half of 2023 had $320 million of pre-tax unrealized losses at the time of the transfers.

Additionally, in first quarter 2023, we also reclassified HTM debt securities with an aggregate fair value of $23.2 billion and amortized cost of $23.9 billion to AFS debt securities in connection with the adoption of ASU 2022-01, Derivatives and Hedging (Topic 815): *Fair Value Hedging – Portfolio Layer Method.* For additional information on our adoption of ASU 2022-01, see Note 1 (Summary of Significant Accounting Policies) to Financial Statements in this Report.

The total net unrealized losses on AFS and HTM debt securities decreased from December 31, 2022 due to changes in interest rates.

At June 30, 2023, 99% of the combined AFS and HTM debt securities portfolio was rated AA- or above. Ratings are based on external ratings where available and, where not available, based on internal credit grades. See Note 3 (Available-for-Sale and Held-to-Maturity Debt Securities) to Financial Statements in this Report for additional information on AFS and HTM debt securities, including a summary of debt securities by security type.

Loan Portfolios

Table 8 provides a summary of total outstanding loans by portfolio segment. Commercial loans decreased from December 31, 2022, predominantly due to a decrease in the commercial real estate loan portfolio as paydowns exceeded originations and advances. Consumer loans decreased from December 31, 2022, as increases in the credit card portfolio were more than offset by decreases in all other consumer loan portfolios, primarily the residential mortgage loan portfolio.

Table 8: Loan Portfolios

($ in millions)		Jun 30, 2023	Dec 31, 2022	$ Change	% Change
Commercial	$	555,621	557,516	(1,895)	— %
Consumer		392,339	398,355	(6,016)	(2)
Total loans	$	947,960	955,871	(7,911)	(1)

Average loan balances and a comparative detail of average loan balances is included in Table 1 under "Earnings Performance – Net Interest Income" earlier in this Report. Additional information on total loans outstanding by portfolio segment and class of financing receivable is included in the "Risk Management – Credit Risk Management" section in this Report. Period-end balances and other loan related information are in Note 5 (Loans and Related Allowance for Credit Losses) to Financial Statements in this Report.

See the "Balance Sheet Analysis – Loan Portfolios" section in our 2022 Form 10-K for additional information regarding contractual loan maturities and the distribution of loans to changes in interest rates.

Deposits

Deposits decreased from December 31, 2022, reflecting:

- customer migration to higher yielding alternatives; and
- consumer deposit outflows on consumer spending;

partially offset by:

- higher time deposits driven by issuances of certificates of deposit (CDs).

Table 9 provides additional information regarding deposit balances. Information regarding the impact of deposits on net interest income and a comparison of average deposit balances is provided in the "Earnings Performance – Net Interest Income" section and Table 1 earlier in this Report. In response to higher interest rates, our average deposit cost in second quarter 2023 increased to 1.13%, compared with 0.46% in fourth quarter 2022.

Table 9: Deposits

($ in millions)		Jun 30, 2023	% of total deposits		Dec 31, 2022	% of total deposits		$ Change	% Change
Noninterest-bearing demand deposits	$	402,322	30 %	$	458,010	33 %	$	(55,688)	(12)%

Savings deposits		376,538	28		410,139	30		(33,601)	(8)
Time deposits		126,387	9		66,197	5		60,190	91
Interest-bearing deposits in non-U.S. offices		22,178	2		20,762	1		1,416	7
Total deposits	$	1,344,584	100 %	$	1,383,985	100 %	$	(39,401)	(3)

Off-Balance Sheet Arrangements

In the ordinary course of business, we engage in financial transactions that are not recorded on our consolidated balance sheet, or may be recorded on our consolidated balance sheet in amounts that are different from the full contract or notional amount of the transaction. Our off-balance sheet arrangements include unfunded credit commitments, transactions with unconsolidated entities, guarantees, commitments to purchase debt and equity securities, derivatives, and other commitments. These transactions are designed to (1) meet the financial needs of customers, (2) manage our credit, market or liquidity risks, and/or (3) diversify our funding sources.

Unfunded Credit Commitments

Unfunded credit commitments are legally binding agreements to lend to customers with terms covering usage of funds, contractual interest rates, expiration dates, and any required collateral. The maximum credit risk for these commitments will generally be lower than the contractual amount because these commitments may expire without being used or may be cancelled at the customer's request. Our credit risk monitoring activities include managing the amount of commitments, both to individual customers and in total, and the size and maturity structure of these commitments. For additional information, see Note 5 (Loans and Related Allowance for Credit Losses) to Financial Statements in this Report.

Transactions with Unconsolidated Entities

In the normal course of business, we enter into various types of on- and off-balance sheet transactions with special purpose entities (SPEs), which are corporations, trusts, limited liability companies or partnerships that are established for a limited purpose. Generally, SPEs are formed in connection with securitization transactions and are considered variable interest entities (VIEs). For additional information, see Note 13 (Securitizations and Variable Interest Entities) to Financial Statements in this Report.

Guarantees and Other Arrangements

Guarantees are contracts that contingently require us to make payments to a guaranteed party based on an event or a change in an underlying asset, liability, rate or index. Guarantees are generally in the form of standby and direct pay letters of credit, written options, recourse obligations, exchange and clearing house guarantees, indemnifications, and other types of similar arrangements. For additional information, see Note 14 (Guarantees and Other Commitments) to Financial Statements in this Report.

Commitments to Purchase Debt and Equity Securities

We enter into commitments to purchase securities under resale agreements. We also may enter into commitments to purchase debt and equity securities to provide capital for customers' funding, liquidity or other future needs. For additional information, see Note 14 (Guarantees and Other Commitments) to Financial Statements in this Report.

Derivatives

We use derivatives to manage exposure to market risk, including interest rate risk, credit risk and foreign currency risk, and to assist customers with their risk management objectives. Derivatives are recorded on our consolidated balance sheet at fair value, and volume can be measured in terms of the notional amount, which is generally not exchanged, but is used only as the basis on which interest and other payments are determined. The notional amount is not recorded on our consolidated balance sheet and is not, when viewed in isolation, a meaningful measure of the risk profile of the instruments. For additional information, see Note 11 (Derivatives) to Financial Statements in this Report.

Wells Fargo manages a variety of risks that can significantly affect our financial performance and our ability to meet the expectations of our customers, shareholders, regulators and other stakeholders.

For additional information about how we manage risk, see the "Risk Management" section in our 2022 Form 10-K. The discussion that follows supplements our discussion of the management of certain risks contained in the "Risk Management" section in our 2022 Form 10-K.

Credit Risk Management

We define credit risk as the risk of loss associated with a borrower or counterparty default (failure to meet obligations in accordance with agreed upon terms). Credit risk exists with many of the Company's assets and exposures such as debt security holdings, certain derivatives, and loans.

The Board's Risk Committee has primary oversight responsibility for credit risk. A Credit Subcommittee of the Risk Committee assists the Risk Committee in providing oversight of credit risk. At the management level, Corporate Credit Risk, which is part of Independent Risk Management, has oversight responsibility for credit risk. Corporate Credit Risk reports to the Chief Risk Officer and supports periodic reports related to credit risk provided to the Board's Risk Committee or its Credit Subcommittee.

Loan Portfolio Our loan portfolios represent the largest component of assets on our consolidated balance sheet for which we have credit risk. Table 10 presents our total loans outstanding by portfolio segment and class of financing receivable.

Table 10: Total Loans Outstanding by Portfolio Segment and Class of Financing Receivable

(in millions)	Jun 30, 2023	Dec 31, 2022
Commercial and industrial	$ 386,011	386,806
Commercial real estate	154,276	155,802
Lease financing	15,334	14,908
Total commercial	555,621	557,516
Residential mortgage	265,085	269,117
Credit card	47,717	46,293
Auto	51,587	53,669
Other consumer	27,950	29,276
Total consumer	392,339	398,355
Total loans	$ 947,960	955,871

We manage our credit risk by establishing what we believe are sound credit policies for underwriting new business, while monitoring and reviewing the performance of our existing loan portfolios. We employ various credit risk management and monitoring activities to mitigate risks associated with multiple risk factors affecting loans we hold including:

- Loan concentrations and related credit quality;
- Counterparty credit risk;
- Economic and market conditions;
- Legislative or regulatory mandates;
- Changes in interest rates;
- Merger and acquisition activities; and
- Reputation risk.

In addition, the Company will continue to integrate climate considerations into its credit risk management activities.

Our credit risk management oversight process is governed centrally, but provides for direct management and accountability by our lines of business. Our overall credit process includes comprehensive credit policies, disciplined credit underwriting, frequent and detailed risk measurement and modeling, extensive credit training programs, and a continual loan review and audit process.

A key to our credit risk management is adherence to a well-controlled underwriting process, which we believe is appropriate for the needs of our customers as well as investors who purchase the loans or securities collateralized by the loans.

Credit Quality Overview Table 11 provides credit quality trends.

Table 11: Credit Quality Overview

($ in millions)	Jun 30, 2023	Dec 31, 2022
Nonaccrual loans		
Commercial loans	$ 3,429	1,823
Consumer loans	3,457	3,803
Total nonaccrual loans	$ 6,886	5,626
Nonaccrual loans as a % of total loans	0.73 %	0.59
Allowance for credit losses (ACL) for loans	$ 14,786	13,609
ACL for loans as a % of total loans	1.56 %	1.42
	Quarter ended June 30,	
	2023	2022

	2023	2022
Average commercial loans	0.10%	—
Average consumer loans	0.57	0.34

Additional information on our loan portfolios and our credit quality trends follows.

Significant Loan Portfolio Reviews Our credit risk monitoring process is designed to enable early identification of developing risk and to support our determination of an appropriate allowance for credit losses. The following discussion provides additional characteristics and analysis of our significant portfolios. See Note 5 (Loans and Related Allowance for Credit Losses) to Financial Statements in this Report for more analysis and credit metric information for each of the following portfolios.

COMMERCIAL AND INDUSTRIAL LOANS AND LEASE FINANCING

For purposes of portfolio risk management, we aggregate commercial and industrial loans and lease financing according to market segmentation and standard industry codes. We generally subject commercial and industrial loans and lease financing to individual risk assessment using our internal borrower and collateral quality ratings. Our ratings are aligned to regulatory definitions of pass and criticized categories with criticized segmented among special mention, substandard, doubtful and loss categories.

We had $13.0 billion of the commercial and industrial loans and lease financing portfolio internally classified as criticized in accordance with regulatory guidance at June 30, 2023, compared with $12.6 billion at December 31, 2022.

The majority of our commercial and industrial loans and lease financing portfolio is secured by short-term assets, such as accounts receivable, inventory and debt securities, as well as long-lived assets, such as equipment and other business assets. Generally, the primary source of repayment for this portfolio is the operating cash flows of customers, with the collateral securing this portfolio representing a secondary source of repayment.

The portfolio was stable at June 30, 2023, compared with December 31, 2022. Table 12 provides our commercial and industrial loans and lease financing by industry. The industry categories are based on the North American Industry Classification System.

Table 12: Commercial and Industrial Loans and Lease Financing by Industry

(1) Total commitments consist of loans outstanding plus unfunded credit commitments, excluding issued letters of credit. Effective first quarter 2023, unfunded credit commitments exclude discretionary amounts where our approval or consent is required prior to any loan funding or commitment increase. Prior period balances have been revised to conform with the current period presentation. For additional information on issued letters of credit, see Note 14 (Guarantees and Other Commitments) to Financial Statements in this Report.

(2) No other single industry had total loans in excess of $2.8 billion at June 30, 2023, and $3.4 billion at December 31, 2022, respectively.

Table 12a provides further loan segmentation for our largest industry category, financials except banks. This category includes loans to investment firms, financial vehicles, nonbank creditors, rental and leasing companies, securities firms, and investment banks. These loans are generally secured and have features to help manage credit risk, such as structural credit enhancements, collateral eligibility requirements, contractual re-margining of collateral supporting the loans, and loan amounts limited to a percentage of the value of the underlying assets considering underlying credit risk, asset duration, and ongoing performance.

Table 12a: Financials Except Banks Industry Category

Total	$ 10	148,643	16%	$ 232,177	44	147,171	15%	$ 229,822

(1) Total commitments consist of loans outstanding plus unfunded credit commitments. Effective first quarter 2023, unfunded credit commitments exclude discretionary amounts where our approval or consent is required prior to any loan funding or commitment increase. Prior period balances have been revised to conform with the current period presentation. For additional information on issued letters of credit, see Note 14 (Guarantees and Other Commitments) to Financial Statements in this Report.
(2) Includes loans for subscription or capital calls and loans to prime brokerage customers and securities firms.
(3) Includes asset-based lending and leasing, including loans to special purpose entities, loans to commercial leasing entities, structured lending facilities to commercial loan managers, and also includes collateralized loan obligations (CLOs) in loan form, all of which were rated AA or above, of $7.7 billion and $7.8 billion at June 30, 2023, and December 31, 2022, respectively.
(4) Includes originators or servicers of financial assets collateralized by consumer loans such as auto loans and leases, and credit cards.
(5) Includes originators or servicers of financial assets collateralized by commercial or residential real estate loans.

Our commercial and industrial loans and lease financing portfolio included non-U.S. loans of $75.8 billion and $79.7 billion at June 30, 2023, and December 31, 2022, respectively. Significant industry concentrations of non-U.S. loans at June 30, 2023, and December 31, 2022, respectively, included:

- $43.5 billion and $45.7 billion in the financials except banks industry;
- $11.1 billion and $14.1 billion in the banks industry; and
- $1.5 billion and $1.2 billion in the oil, gas and pipelines industry.

COMMERCIAL REAL ESTATE (CRE) Our CRE loan portfolio is comprised of CRE mortgage and CRE construction loans. The total CRE loan portfolio decreased $1.5 billion from December 31, 2022, as paydowns exceeded originations and advances. The portfolio is diversified both geographically and by property type. The largest geographic concentrations of CRE loans are in California, New York, Texas, and Florida, which represented a combined 48% of the total CRE portfolio. The largest property type concentrations are apartments at 26% and office at 21% of the portfolio. Unfunded credit commitments were $8.7 billion and $8.8 billion at June 30, 2023, and December 31, 2022, respectively, for CRE mortgage loans and $16.6 billion and $20.7 billion, respectively, for CRE construction loans.

We generally subject CRE loans to individual risk assessment using our internal borrower and collateral quality ratings. We had $14.9 billion of CRE mortgage loans classified as criticized at June 30, 2023, compared with $11.3 billion at December 31, 2022, and $1.1 billion of CRE construction loans classified as criticized at both June 30, 2023, and December 31, 2022. The increase in criticized CRE loans was primarily driven by the office property type. The credit quality of the office property type continued to be adversely affected as weakened demand for office space continued to drive higher vacancy rates and deteriorating operating performance. We continue to closely monitor this portfolio. At June 30, 2023, nearly one-third of the CRE loans in the office property type had recourse to a guarantor, typically through a repayment guarantee, in addition to the related collateral. Loans in California and New York represented approximately 40% of the office property type at June 30, 2023.

Table 13 provides our CRE loans by state and property type.

* Less than 1%.
(1) Total commitments consist of loans outstanding plus unfunded credit commitments, excluding issued letters of credit. For additional information on issued letters of credit, see Note 14 (Guarantees and Other Commitments) to Financial Statements in this Report.
(2) Includes 40 states and non-U.S. loans. No state in Other had loans in excess of $4.1 billion at both June 30, 2023, and December 31, 2022. Non-U.S. loans were $7.5 billion and $7.6 billion at June 30, 2023, and December 31, 2022, respectively.
(3) In second quarter 2023, we reclassified certain CRE loans to better align with regulatory reporting guidance, which resulted in a decrease in loans outstanding of approximately $2.0 billion to the office property type.

NON-U.S. LOANS Our classification of non-U.S. loans is based on whether the borrower's primary address is outside of the United States. At June 30, 2023, non-U.S. loans totaled $83.5 billion, representing approximately 9% of our total consolidated loans outstanding, compared with $87.5 billion, or approximately 9% of our total consolidated loans outstanding, at December 31, 2022. Non-U.S. loans were approximately 4% and 5% of our total consolidated assets at June 30, 2023, and December 31, 2022, respectively.

COUNTRY RISK EXPOSURE Our country risk monitoring process incorporates centralized monitoring of economic, political, social, legal, and transfer risks in countries where we do or plan to do business, along with frequent dialogue with our customers, counterparties and regulatory agencies. We establish exposure limits for each country through a centralized oversight process based on customer needs, and through consideration of the relevant and distinct risk of each country. We monitor exposures closely and adjust our country limits in response to changing conditions. We evaluate our individual country risk exposure based on our assessment of a borrower's ability to repay, which gives consideration for allowable transfers of risk, such as guarantees and collateral, and may be different from the reporting based on a borrower's primary address.

Our largest single country exposure outside the U.S. at June 30, 2023, was the United Kingdom, which totaled $28.6 billion, or approximately 2% of our total assets, and included $3.2 billion of sovereign claims. Our United Kingdom sovereign claims arise from deposits we have placed with the Bank of England pursuant to regulatory requirements in support of our London branch.

Table 14 provides information regarding our top 20 exposures by country (excluding the U.S.), based on our assessment of risk, which gives consideration to the country of any guarantors and/or underlying collateral. With respect to Table 14:

- Lending and deposits exposure includes outstanding loans, unfunded credit commitments (excluding discretionary amounts where our approval or consent is required prior to any loan funding or commitment increase), and deposits with non-U.S. banks. These balances are presented prior to the deduction of allowance for credit losses or collateral received under the terms of the credit agreements, if any.
- Securities exposure represents debt and equity securities of non-U.S. issuers. Long and short positions are netted, and net short positions are reflected as negative exposure.
- Derivatives and other exposure represents foreign exchange contracts, derivative contracts, securities resale agreements, and securities lending agreements.

(1) Total non-sovereign exposure comprised $45.6 billion exposure to financial institutions and $49.2 billion to non-financial corporations at June 30, 2023.

RESIDENTIAL MORTGAGE LOANS Our residential mortgage loan portfolio is comprised of 1–4 family first and junior lien mortgage loans. Residential mortgage – first lien loans comprised 95% of the total residential mortgage loan portfolio at both June 30, 2023, and December 31, 2022.

The residential mortgage loan portfolio includes loans with adjustable-rate features. We monitor the risk of default as a result of interest rate increases on adjustable-rate mortgage (ARM) loans, which may be mitigated by product features that limit the amount of the increase in the contractual interest rate. The default risk of these loans is considered in our ACL for loans. ARM loans were 7% of total loans at both June 30, 2023, and December 31, 2022, with an initial reset date in 2025 or later for the majority of this portfolio at June 30, 2023. We do not offer option ARM products, nor do we offer variable-rate mortgage products with fixed payment amounts, commonly referred to within the financial services industry as negative amortizing mortgage loans.

The residential mortgage – junior lien portfolio consists of residential mortgage lines of credit and loans that are subordinate in rights to an existing lien on the same property. These lines and loans may have draw periods, interest-only payments, balloon payments, adjustable rates and similar features. The outstanding balance of residential mortgage lines of credit was $16.4 billion at June 30, 2023, compared with $18.3 billion at December 31, 2022. The unfunded credit commitments for these lines of credit totaled $31.9 billion at June 30, 2023, compared with $35.5 billion at December 31, 2022. For additional information on our residential loan portfolio, see the "Risk Management – Credit Risk Management – Residential Mortgage Loans" section in our 2022 Form 10-K.

We monitor changes in real estate values and underlying economic or market conditions for all geographic areas of our residential mortgage portfolio as part of our credit risk management process. Our periodic review of this portfolio includes original appraisals adjusted for the change in Home Price Index (HPI) or estimates from automated valuation models (AVMs) to support property values. For additional information about our use of appraisals and AVMs, see Note 5 (Loans and Related Allowance for Credit Losses) to Financial Statements in this Report and the "Risk Management – Credit Risk Management – Residential Mortgage Loans" section in our 2022 Form 10-K.

Part of our credit monitoring includes tracking delinquency, current Fair Isaac Corporation (FICO) credit scores and loan/combined loan to collateral values (LTV/CLTV) on the entire residential mortgage loan portfolio. CLTV represents the ratio of the total loan balance of first and junior lien mortgages (including unused line amounts for credit line products) to property collateral value. For additional information regarding credit quality indicators, see Note 5 (Loans and Related Allowance for Credit Losses) to Financial Statements in this Report.

We continue to modify residential mortgage loans to assist homeowners and other borrowers experiencing financial difficulties. For additional information on loan modifications, see Note 5 (Loans and Related Allowance for Credit Losses) to Financial Statements in this Report and the "Risk Management – Credit Risk Management – Residential Mortgage Loans" section in our 2022 Form 10-K.

Residential Mortgage – First Lien Portfolio Our residential mortgage – first lien portfolio decreased $2.8 billion from December 31, 2022, due to loan paydowns, partially offset by originations.

Table 15 shows certain delinquency and loss information for the residential mortgage – first lien portfolio and lists the top five states by outstanding balance.

Other consumer (1)	**27,950**	**2.95**	29,276	3.06
Total	**$ 127,254**	**13.42%**	$ 129,238	13.51%

(1) Includes $17.9 billion and $19.4 billion at June 30, 2023, and December 31, 2022, respectively, of commercial and consumer securities-based loans originated by the WIM operating segment.

Credit Card The increase in the outstanding balance at June 30, 2023, compared with December 31, 2022, was due to higher purchase volume driven by new account growth.

Auto The decrease in the outstanding balance at June 30, 2023, compared with December 31, 2022, was due to lower origination volumes reflecting credit tightening actions and continued price competition due to rising interest rates.

Other Consumer The decrease in the outstanding balance at June 30, 2023, compared with December 31, 2022, was due to a decline in securities-based lending.

NONPERFORMING ASSETS (NONACCRUAL LOANS AND FORECLOSED ASSETS) For information about when we generally place loans on nonaccrual status, see Note 1 (Summary of Significant Accounting Policies) to Financial Statements in our 2022 Form 10-K. Table 18 summarizes nonperforming assets (NPAs).

Table 18: Nonperforming Assets (Nonaccrual Loans and Foreclosed Assets)

($ in millions)	Jun 30, 2023	Dec 31, 2022
Nonaccrual loans:		
Commercial and industrial	$ 845	746
Commercial real estate	2,507	958
Lease financing	77	119
Total commercial	3,429	1,823
Residential mortgage (1)	3,289	3,611
Auto	135	153
Other consumer	33	39
Total consumer	3,457	3,803
Total nonaccrual loans	$ 6,886	5,626
As a percentage of total loans	0.73 %	0.59
Foreclosed assets:		
Government insured/guaranteed (2)	$ 16	22
Non-government insured/guaranteed	117	115
Total foreclosed assets	133	137
Total nonperforming assets	$ 7,019	5,763
As a percentage of total loans	0.74 %	0.60

(1) Residential mortgage loans predominantly insured by the FHA or guaranteed by the VA are not placed on nonaccrual status because they are insured or guaranteed.
(2) Consistent with regulatory reporting requirements, foreclosed real estate resulting from government insured/guaranteed loans are classified as nonperforming. Both principal and interest related to these foreclosed real estate assets are collectible because the loans were predominantly insured by the FHA or guaranteed by the VA. Receivables related to the foreclosure of certain government guaranteed real estate mortgage loans are excluded from this table and included in Accounts receivable in Other Assets. For additional information on the classification of certain government-guaranteed mortgage loans upon foreclosure, see Note 1 (Summary of Significant Accounting Policies) to Financial Statements in our 2022 Form 10-K.

Commercial nonaccrual loans increased $1.6 billion from December 31, 2022, driven by an increase in commercial real estate nonaccrual loans, predominantly within the office property type. For additional information on commercial nonaccrual loans, see the "Risk Management – Credit Risk Management – Commercial and Industrial Loans and Lease Financing" and "Risk Management – Credit Risk Management – Commercial Real Estate" sections in this Report.

Consumer nonaccrual loans decreased $346 million from December 31, 2022, due to lower residential mortgage nonaccrual loans.

Table 19 provides an analysis of the changes in nonaccrual loans. Typically, changes to nonaccrual loans period-over-period represent inflows for loans that are placed on nonaccrual status in accordance with our policies, offset by reductions for loans that are paid down, charged off, sold, foreclosed, or are no longer classified as nonaccrual as a result of continued performance and an improvement in the borrower's financial condition and loan repayment capabilities.

Table 19: Analysis of Changes in Nonaccrual Loans

	Quarter ended June 30,		Six months ended June 30,	
(in millions)	**2023**	2022	**2023**	2022
Commercial nonaccrual loans				
Balance, beginning of period	$ **2,275**	1,953	$ **1,823**	2,376
Inflows	**1,761**	165	**2,807**	356
Outflows:				
Returned to accruing	**(61)**	(88)	**(207)**	(282)
Foreclosures	**—**	—	**—**	(19)
Charge-offs	**(215)**	(56)	**(330)**	(91)
Payments, sales and other	**(331)**	(255)	**(664)**	(621)
Total outflows	**(607)**	(399)	**(1,201)**	(1,013)
Balance, end of period	**3,429**	1,719	**3,429**	1,719
Consumer nonaccrual loans				
Balance, beginning of period	**3,735**	4,918	**3,803**	4,836
Inflows	**336**	408	**683**	1,002
Outflows:				
Returned to accruing	**(266)**	(729)	**(458)**	(915)
Foreclosures	**(25)**	(17)	**(51)**	(35)
Charge-offs	**(44)**	(70)	**(82)**	(144)
Payments, sales and other	**(279)**	(236)	**(438)**	(470)
Total outflows	**(614)**	(1,052)	**(1,029)**	(1,564)
Balance, end of period	**3,457**	4,274	**3,457**	4,274
Total nonaccrual loans	$ **6,886**	5,993	$ **6,886**	5,993

We considered the risk of losses on nonaccrual loans in developing our allowance for loan losses. We believe exposure to losses on nonaccrual loans is mitigated by the following factors at June 30, 2023:

- 98% of total commercial nonaccrual loans are secured, the majority of which are secured by real estate.
- 84% of commercial nonaccrual loans were current on interest and 67% of commercial nonaccrual loans were current on both principal and interest, but were on nonaccrual status because the full or timely collection of interest or principal had become uncertain.
- 99% of total consumer nonaccrual loans are secured, of which 95% are secured by real estate and 98% have a CLTV ratio of 80% or less.
- $533 million of the $676 million of consumer loans in bankruptcy or discharged in bankruptcy, and classified as nonaccrual, were current.

Table 20 provides a summary of foreclosed assets and an analysis of changes in foreclosed assets.

Table 20: Foreclosed Assets

(in millions)	**Jun 30, 2023**	Dec 31, 2022
Summary by loan segment		
Government insured/guaranteed	$ **16**	22
Commercial	**70**	65
Consumer	**47**	50
Total foreclosed assets	$ **133**	137

	Quarter ended June 30,		Six months ended June 30,	
(in millions)	**2023**	2022	**2023**	2022
Analysis of changes in foreclosed assets				
Balance, beginning of period	$ **132**	130	$ **137**	112
Net change in government insured/guaranteed (1)	**(2)**	3	**(6)**	3
Additions to foreclosed assets (2)	**135**	99	**258**	201
Reductions from sales and write-downs	**(132)**	(102)	**(256)**	(186)
Balance, end of period	$ **133**	130	$ **133**	130

(1) Foreclosed government insured/guaranteed loans are temporarily transferred to and held by us as servicer, until reimbursement is received from the FHA or the VA.
(2) Includes loans moved into foreclosed assets from nonaccrual status and repossessed autos.

TROUBLED DEBT RESTRUCTURINGS (TDRs) In January 2023, we adopted ASU 2022-02, which eliminated the accounting and reporting guidance for TDRs. For additional information, see Note 1 (Summary of Significant Accounting Policies) to Financial Statements in this Report.

At December 31, 2022, TDRs totaled $9.2 billion. The amount of our TDRs for COVID-related loan modification programs would have otherwise been higher without the TDR relief provided by the Coronavirus Aid, Relief, and Economic Security Act (CARES Act) and the *Interagency Statement on Loan Modifications and Reporting for Financial Institutions Working with Customers Affected by the Coronavirus (Revised)* (Interagency Statement). Customers who are unable to resume making their contractual loan payments upon exiting from these programs may require further assistance and may receive or be eligible to receive modifications. For additional information on customer accommodations, including loan modifications, in response to the COVID-19 pandemic, see Note 1 (Summary of Significant Accounting Policies) to Financial Statements in our 2022 Form 10-K.

NET CHARGE-OFFS Table 21 presents net loan charge-offs.

Table 21: Net Loan Charge-offs

	Quarter ended June 30,				Six months ended June 30,			
	2023		2022		**2023**		2022	
($ in millions)	**Net loan charge-offs**	**% of avg. loans (1)**	Net loan charge-offs	% of avg. loans (1)	**Net loan charge-offs**	**% of avg. loans (1)**	Net loan charge-offs	% of avg. loans (1)
Commercial and industrial	**$ 119**	**0.12 %**	$ 27	0.03 %	**$ 162**	**0.09 %**	$ 4	— %
Commercial real estate	**79**	**0.21**	(4)	(0.01)	**96**	**0.13**	(9)	(0.01)
Lease financing	**2**	**0.05**	—	—	**5**	**0.06**	(1)	(0.02)
Total commercial	**200**	**0.15**	23	0.02	**263**	**0.10**	(6)	—
Residential mortgage	**(12)**	**(0.02)**	(16)	(0.03)	**(23)**	**(0.02)**	(37)	(0.03)
Credit card	**396**	**3.39**	199	2.02	**740**	**3.22**	375	1.94
Auto	**89**	**0.68**	68	0.49	**210**	**0.81**	164	0.24
Other consumer	**91**	**1.31**	70	0.98	**178**	**1.26**	153	1.08
Total consumer	**564**	**0.58**	321	0.33	**1,105**	**0.57**	655	0.34
Total	**$ 764**	**0.32 %**	$ 344	0.15 %	**$ 1,368**	**0.29 %**	$ 649	0.14 %

(1) Net loan charge-offs as a percentage of average respective loans are annualized.

The increase in commercial net loan charge-offs in second quarter 2023, compared with the same period a year ago, was driven by higher losses across all commercial portfolios.

The increase in consumer net loan charge-offs in second quarter 2023, compared with the same period a year ago, was driven by higher losses in all consumer portfolios, primarily in our credit card portfolio.

ALLOWANCE FOR CREDIT LOSSES We maintain an allowance for credit losses (ACL) for loans, which is management's estimate of the expected lifetime credit losses in the loan portfolio and unfunded credit commitments, at the balance sheet date, excluding loans and unfunded credit commitments carried at fair value or held for sale. Additionally, we maintain an ACL for debt securities classified as either AFS or HTM, other financial assets measured at amortized cost, including deposits with banks, net investments in leases, and other off-balance sheet credit exposures.

The process for establishing the ACL for loans takes into consideration many factors, including historical and forecasted loss trends, loan-level credit quality ratings and loan grade-specific characteristics. The process involves subjective and complex judgments. In addition, we review a variety of credit metrics and trends. These credit metrics and trends, however, do not solely determine the amount of the allowance as we use several analytical tools. For additional information on our ACL, see the "Critical Accounting Policies – Allowance for Credit Losses" section and Note 1 (Summary of Significant Accounting Policies) to Financial Statements in our 2022 Form 10-K. For additional information on our ACL for loans, see Note 5 (Loans and Related Allowance for Credit Losses) to Financial Statements in this Report, and for additional information on our ACL for debt securities, see Note 3 (Available-for-Sale and Held-to-Maturity Debt Securities) to Financial Statements in this Report.

Table 22 presents the allocation of the ACL for loans by loan portfolio segment and class.

Table 22: Allocation of the ACL for Loans

	Jun 30, 2023			Dec 31, 2022		
($ in millions)	**ACL**	**ACL as % of loan class**	**Loans as % of total loans**	ACL	ACL as % of loan class	Loans as % of total loans
Commercial and industrial	**$ 4,266**	**1.11 %**	**41**	$ 4,507	1.17 %	40
Commercial real estate	**3,618**	**2.35**	**16**	2,231	1.43	16
Lease financing	**197**	**1.28**	**1**	218	1.46	2
Total commercial	**8,081**	**1.45**	**58**	6,956	1.25	58
Residential mortgage (1)	**734**	**0.28**	**28**	1,096	0.41	28
Credit card	**3,865**	**8.10**	**5**	3,567	7.71	5
Auto	**1,408**	**2.73**	**6**	1,380	2.57	6
Other consumer	**698**	**2.50**	**3**	610	2.08	3
Total consumer	**6,705**	**1.71**	**42**	6,653	1.67	42
Total	**$ 14,786**	**1.56 %**	**100**	$ 13,609	1.42 %	100
Components:						
Allowance for loan losses			**$ 14,258**			12,985
Allowance for unfunded credit commitments			**528**			624
Allowance for credit losses			**$ 14,786**			13,609
Ratio of allowance for loan losses to total net loan charge-offs (2)			**4.65x**			8.08
Ratio of allowance for loan losses to total nonaccrual loans			**2.07**			2.31
Allowance for loan losses as a percentage of total loans			**1.50 %**			1.36

(1) Includes negative allowance for expected recoveries of amounts previously charged off.
(2) Total net loan charge-offs are annualized for the quarter ended June 30, 2023.

The ratios for the allowance for loan losses and the ACL for loans presented in Table 22 may fluctuate from period to period due to such factors as the mix of loan types in the portfolio, borrower credit strength, and the value and marketability of collateral.

The ACL for loans increased $1.2 billion, or 9%, from December 31, 2022, reflecting increases for commercial real estate loans, primarily office loans, as well as for increases in credit card loan balances, partially offset by a decrease for residential mortgage loans related to the adoption of ASU 2022-02, Financial Instruments – Credit Losses (Topic 326): *Troubled Debt Restructurings and Vintage Disclosures*. For additional information on ASU 2022-02, see Note 1 (Summary of Significant Accounting Policies) to Financial Statements in this Report. The detail of the changes in the ACL for loans by portfolio segment (including charge-offs and recoveries by loan class) is included in Note 5 (Loans and Related Allowance for Credit Losses) to Financial Statements in this Report.

We consider multiple economic scenarios to develop our estimate of the ACL for loans, which generally include a base scenario, along with an optimistic (upside) and one or more pessimistic (downside) scenarios. We weighted the base scenario and the downside scenarios in our estimate of the ACL for loans at June 30, 2023. The base scenario assumed elevated inflation and economic contraction in the near term, reflecting declining property values and increased unemployment rates from historically low levels. The downside scenarios assumed a more substantial economic contraction due to declining property values, high inflation, and lower business and consumer confidence.

Additionally, we consider qualitative factors that represent the risk of limitations inherent in our processes and assumptions such as economic environmental factors, modeling assumptions and performance, and other subjective factors, including industry trends and emerging risk assessments.

The forecasted key economic variables used in our estimate of the ACL for loans at June 30, 2023, and March 31, 2023, are presented in Table 23.

Table 23: Forecasted Key Economic Variables

	4Q 2023	2Q 2024	4Q 2024
Weighted blend of economic scenarios:			
U.S. unemployment rate (1):			
June 30, 2023	**4.2 %**	**5.2**	**5.9**
March 31, 2023	4.7	5.6	6.0
U.S. real GDP (2):			
June 30, 2023	**(1.5)**	**(0.8)**	**1.0**
March 31, 2023	(0.3)	0.5	1.4
Home price index (3):			
June 30, 2023	**(4.3)**	**(5.9)**	**(6.4)**
March 31, 2023	(5.5)	(7.7)	(6.6)
Commercial real estate asset prices (3):			
June 30, 2023	**(12.4)**	**(12.6)**	**(7.2)**
March 31, 2023	(5.2)	(8.0)	(8.1)

(1) Quarterly average.
(2) Percent change from the preceding period, seasonally adjusted annualized rate.
(3) Percent change year over year of national average; outlook differs by geography and property type.

Future amounts of the ACL for loans will be based on a variety of factors, including loan balance changes, portfolio credit quality and mix changes, and changes in general economic conditions and expectations (including for unemployment and real GDP), among other factors.

We believe the ACL for loans of $14.8 billion at June 30, 2023, was appropriate to cover expected credit losses, including unfunded credit commitments, at that date. The entire allowance is available to absorb credit losses from the total loan portfolio. The ACL for loans is subject to change and reflects existing factors as of the date of determination, including economic or market conditions and ongoing internal and external examination processes. Due to the sensitivity of the ACL for loans to changes in the economic and business environment, it is possible that we will incur incremental credit losses not anticipated as of the balance sheet date. Our process for determining the ACL is discussed in the "Critical Accounting Policies – Allowance for Credit Losses" section and Note 1 (Summary of Significant Accounting Policies) to Financial Statements in our 2022 Form 10-K.

MORTGAGE BANKING ACTIVITIES We sell residential and commercial mortgage loans to various parties. In connection with our sales and securitization of residential mortgage loans, we have established a mortgage repurchase liability. For information on our repurchase liability, see the "Risk Management – Credit Risk Management – Mortgage Banking Activities" section in our 2022 Form 10-K.

In addition to servicing loans in our portfolio, we act as servicer and/or master servicer of residential and commercial mortgage loans included in GSE-guaranteed mortgage securitizations, GNMA-guaranteed mortgage securitizations of FHA-insured/VA-guaranteed mortgages and private label mortgage securitizations, as well as for unsecuritized loans owned by institutional investors.

As a servicer, we are required to advance certain delinquent payments of principal and interest on mortgage loans we service. The amount and timing of reimbursement for advances of delinquent payments vary by investor and the applicable servicing agreements. See Note 6 (Mortgage Banking Activities) to Financial Statements in this Report for additional information about residential and commercial servicing rights, servicer advances and servicing fees.

In accordance with applicable servicing guidelines, upon transfer as servicer, we retain the option to repurchase loans from GNMA loan securitization pools, which generally becomes exercisable when three scheduled loan payments remain unpaid by the borrower. We may repurchase these loans for cash and as a result, our total consolidated assets do not change. Repurchased loans that regain current status or are otherwise modified in accordance with applicable servicing guidelines may be included in future GNMA loan securitization pools. At June 30, 2023, and December 31, 2022, these loans, which we have repurchased or have the option to repurchase, were $8.5 billion and $9.8 billion, respectively, which included $7.8 billion and $8.6 billion, respectively, in loans held for investment, with the remainder in loans held for sale. See Note 13 (Securitizations and Variable Interest Entities) to Financial Statements in this Report for additional information about our involvement with mortgage loan securitizations.

For additional information about the risks related to our servicing activities, see the "Risk Management – Credit Risk Management – Mortgage Banking Activities" section in our 2022 Form 10-K. For additional information on mortgage banking activities, see Note 6 (Mortgage Banking Activities) to Financial Statements in this Report.

Asset/Liability Management

Asset/liability management involves evaluating, monitoring and managing interest rate risk, market risk, liquidity and funding. For information on our oversight of asset/liability risks, see the "Risk Management – Asset/Liability Management" section in our 2022 Form 10-K.

INTEREST RATE RISK Interest rate risk is the risk that market fluctuations in interest rates, credit spreads, or foreign exchange can cause a loss of the Company's earnings and capital stemming from mismatches in the Company's asset and liability cash flows primarily arising from customer-related activities such as lending and deposit-taking. We are subject to interest rate risk because:

- assets and liabilities may mature or reprice at different times. If assets reprice faster than liabilities and interest rates are generally rising, earnings will initially increase;
- assets and liabilities may reprice at the same time but by different amounts;
- short-term and long-term market interest rates may change by different amounts. For example, the shape of the yield curve may affect yield for new loans and funding costs differently;
- the remaining maturity for various assets or liabilities may shorten or lengthen as interest rates change. For example, if long-term mortgage interest rates increase sharply, mortgage-related products may pay down at a slower rate than anticipated, which could impact portfolio income; or
- interest rates may have a direct or indirect effect on loan demand, collateral values, credit losses, mortgage origination volume, and the fair value of MSRs and other financial instruments.

We assess interest rate risk by comparing outcomes under various net interest income simulations using many interest rate scenarios that differ in the direction of interest rate changes, the degree of change over time, the speed of change and the projected shape of the yield curve. These simulations require assumptions regarding drivers of earnings and balance sheet composition such as loan originations, prepayment rates on loans and debt securities, deposit flows and mix, as well as pricing strategies.

Our most recent simulations, as presented in Table 24, estimate net interest income sensitivity over the next 12 months using instantaneous movements across the yield curve with both lower and higher interest rates relative to our base scenario. Steeper and flatter scenarios measure non-parallel changes in the yield curve, with long-term interest rates defined as all tenors three years and longer and short-term interest rates defined as all tenors less than three years. Where applicable, U.S. dollar interest rates are floored at 0.00%. The following describes the simulation assumptions for the scenarios presented in Table 24:

- Simulations are dynamic and reflect anticipated changes to our assets and liabilities.
- Other macroeconomic variables that could be correlated with the changes in interest rates are held constant.
- Mortgage prepayment and origination assumptions vary across scenarios and reflect only the impact of the higher or lower interest rates.

- Our base scenario deposit forecast incorporates mix changes consistent with the base interest rate trajectory. Deposit mix is modeled to be the same in the base scenario and the alternative scenarios. In higher interest rate scenarios, customer deposit activity that shifts balances into higher yielding products could impact expected net interest income.
- The interest rate sensitivity of deposits is modeled using the historical behavior of our deposits portfolio and reflects the expectations of deposit products repricing as market interest rates change (referred to as deposit betas). Our actual experience in base and alternative scenarios may differ from expectations due to the lag or acceleration of deposit repricing, changes in consumer behavior, and other factors.
- We hold the size of the projected debt and equity securities portfolios constant across scenarios.

Table 24: Net Interest Income Sensitivity Over the Next 12 Months Using Instantaneous Movements

($ in billions)		Jun 30, 2023	Dec 31, 2022
Parallel shift:			
+100 bps shift in interest rates	$	**1.8**	2.3
-100 bps shift in interest rates		**(2.1)**	(1.7)
Steeper yield curve:			
+100 bps shift in long-term interest rates		**1.0**	0.8
-100 bps shift in short-term interest rates		**(1.1)**	(1.0)
Flatter yield curve:			
+100 bps shift in short-term interest rates		**0.8**	1.5
-100 bps shift in long-term interest rates		**(1.0)**	(0.7)

The changes in our interest rate sensitivity from December 31, 2022, to June 30, 2023, in Table 24 reflected updates to our base scenario, including expectations for balance sheet composition and interest rates. Our interest rate sensitivity indicates that we would expect to benefit from higher interest rates as our assets would reprice faster and to a greater degree than our liabilities, while in the case of lower interest rates, our assets would reprice downward and to a greater degree than our liabilities resulting in lower net interest income.

The sensitivity results above do not capture noninterest income or expense impacts. Our interest rate sensitive noninterest income and expense are impacted by mortgage banking activities that may have sensitivity impacts that move in the opposite direction of our net interest income. See the "Risk Management – Asset/Liability Management – Mortgage Banking Interest Rate and Market Risk" section in our 2022 Form 10-K for additional information.

Interest rate sensitive noninterest income is also impacted by changes in earnings credit for noninterest-bearing deposits that reduce treasury management deposit-related service fees on commercial accounts, and by trading assets. In addition, the impact to net interest income does not include the fair value changes of trading securities, which, along with the effects of related economic hedges, are recorded in noninterest income. In addition to changes in interest rates, net interest income and noninterest income from trading securities may be impacted by the actual composition of the trading portfolio. For additional information on our trading assets and liabilities, see Note 2 (Trading Activities) to Financial Statements in this Report.

We use the debt securities portfolio and exchange-traded and over-the-counter (OTC) interest rate derivatives to manage our interest rate exposures. As interest rates increase, changes in the fair value of AFS debt securities may negatively affect accumulated other comprehensive income (AOCI), which lowers the amount of our regulatory capital. AOCI also includes unrealized gains or losses related to the transfer of debt securities from AFS to HTM, which are subsequently amortized into earnings over the life of the security with no further impact from interest rate changes. See Note 1 (Summary of Significant Accounting Policies) and Note 3 (Available-for-Sale and Held-to-Maturity Debt Securities) to Financial Statements in this Report for additional information on the debt securities portfolios. We use derivatives for asset/liability management in the following main ways:

- to convert the cash flows from selected asset and/or liability instruments/portfolios including certain interest-earning deposits, commercial loans and long-term debt, from floating-rate payments to fixed-rate payments, or vice versa;
- to reduce AOCI sensitivity of our AFS debt securities portfolio; and
- to economically hedge our mortgage origination pipeline, funded mortgage loans, and MSRs.

Derivatives used to hedge our interest rate risk exposures are presented in Note 11 (Derivatives) to Financial Statements in this Report.

MORTGAGE BANKING INTEREST RATE AND MARKET RISK We originate, fund and service mortgage loans, which subjects us to various risks, including market, interest rate, credit, and liquidity risks that can be substantial. Based on market conditions and other factors, we reduce credit and liquidity risks by selling or securitizing mortgage loans. We determine whether mortgage loans will be held for investment or held for sale at the time of commitment, but may change our intent to hold loans for investment or sale as part of our corporate asset/liability management activities. We may also retain securities in our investment portfolio at the time we securitize mortgage loans.

Changes in interest rates may impact mortgage banking noninterest income, including origination and servicing fees, and the fair value of our residential MSRs, LHFS, and derivative loan commitments (interest rate "locks") extended to mortgage applicants. Interest rate changes will generally impact our mortgage banking noninterest income on a lagging basis due to the time it takes for the market to reflect a shift in customer demand, as well as the time required for processing a new application, providing the commitment, and securitizing and selling the loan. The amount and timing of the impact will depend on the magnitude, speed and duration of the changes in interest rates. For additional information on mortgage banking, including key assumptions and the sensitivity of the fair value of MSRs, see the "Risk Management – Asset/Liability Management – Mortgage Banking Interest Rate and Market Risk" section and Note 6 (Mortgage Banking Activities), Note 14 (Derivatives), and Note 15 (Fair Values of Assets and Liabilities) to Financial Statements in our 2022 Form 10-K.

MARKET RISK Market risk is the risk of possible economic loss from adverse changes in market risk factors such as interest rates, credit spreads, foreign exchange rates, equity and commodity prices, and the risk of possible loss due to counterparty exposure. This applies to implied volatility risk, basis risk, and market liquidity risk. It includes price risk in the trading book, mortgage servicing rights and the hedge effectiveness risk associated with mortgage loans held at fair value, and impairment of private equity investments. For information on our oversight of market risk, see the "Risk Management – Asset/Liability Management – Market Risk" section in our 2022 Form 10-K.

MARKET RISK – TRADING ACTIVITIES We engage in trading activities to accommodate the investment and risk management activities of our customers and to execute economic hedging to manage certain balance sheet risks. These trading activities predominantly occur within our CIB businesses and, to a lesser extent, other businesses of the Company. Debt securities held for trading, equity securities held for trading, trading loans and trading derivatives are financial instruments used in our trading activities, and all are carried at fair value. Income earned on the financial instruments used in our trading activities include net interest income, changes in fair value and realized gains and losses. Net interest income earned from our trading activities is reflected in the interest income and interest expense components of our consolidated statement of income. Changes in fair value of the financial instruments used in our trading activities are reflected in net gains from trading activities. For additional information on the financial instruments used in our trading activities and the income from these trading activities, see Note 2 (Trading Activities) to Financial Statements in this Report.

Value-at-risk (VaR) is a statistical risk measure used to estimate the potential loss from adverse moves in the financial markets. The Company uses VaR metrics complemented with sensitivity analysis and stress testing in measuring and monitoring market risk. For additional information on our monitoring activities, sensitivity analysis and stress testing, see the "Risk Management – Asset/Liability Management – Market Risk – Trading Activities" section in our 2022 Form 10-K.

Trading VaR is the measure used to provide insight into the market risk exhibited by the Company's trading positions. The Company calculates Trading VaR for risk management purposes to establish and monitor line of business and Company-wide risk limits. Trading VaR is calculated based on all trading positions on our consolidated balance sheet.

Table 25 shows the Company's Trading General VaR by risk category. The increase in average Company Trading General VaR for the quarter ended June 30, 2023, compared with the same period a year ago, was primarily driven by changes in portfolio composition.

Table 25: Trading 1-Day 99% General VaR by Risk Category

												Quarter ended
				June 30, 2023				March 31, 2023				June 30, 2022
(in millions)	**Period end**	**Average**	**Low**	**High**	Period end	Average	Low	High	Period end	Average	Low	High
Company Trading General VaR Risk Categories												
Credit	**50**	**39**	**21**	**51**	34	27	20	37	28	31	21	40
Interest rate	**42**	**44**	**29**	**65**	40	32	19	48	26	23	11	35
Equity	**19**	**19**	**13**	**24**	24	24	19	31	20	24	17	36
Commodity	**4**	**4**	**3**	**6**	3	4	3	8	5	5	4	7
Foreign exchange	**1**	**1**	**0**	**4**	0	1	0	3	1	1	0	1
Diversification benefit (1)	**(78)**	**(72)**			(67)	(49)			(44)	(52)		
Company Trading General VaR	**$ 38**	**35**			34	39			36	32		

(1) The period-end VaR was less than the sum of the VaR components described above, which is due to portfolio diversification. The diversification effect arises because the risks are not perfectly correlated causing a portfolio of positions to usually be less risky than the sum of the risks of the positions alone. The diversification benefit is not meaningful for low and high metrics since they may occur on different days.

MARKET RISK – EQUITY SECURITIES We are directly and indirectly affected by changes in the equity markets. We make and manage direct investments in start-up businesses, emerging growth companies, management buy-outs, acquisitions and corporate recapitalizations. We also invest in non-affiliated funds that make similar private equity investments. For additional information, see the "Risk Management – Asset/Liability Management – Market Risk – Equity Securities" section in our 2022 Form 10-K.

We also have marketable equity securities that include investments relating to our venture capital activities. The fair value changes in these marketable equity securities are recognized in net income. For additional information, see Note 4 (Equity Securities) to Financial Statements in this Report.

Changes in equity market prices may also indirectly affect our net income by (1) the value of third-party assets under management and, hence, fee income, (2) borrowers whose ability to repay principal and/or interest may be affected by the stock market, or (3) brokerage activity, related commission income and other business activities. Each business line monitors and manages these indirect risks.

LIQUIDITY RISK AND FUNDING Liquidity risk is the risk arising from the inability of the Company to meet obligations when they come due, or roll over funds at a reasonable cost, without incurring heightened costs. In the ordinary course of business, we enter into contractual obligations that may require future cash payments, including funding for customer loan requests, customer deposit maturities and withdrawals, debt service, leases for premises and equipment, and other cash commitments. Liquidity risk also considers the stability of deposits, including the risk of losing uninsured or non-operational deposits. The objective of effective liquidity management is to ensure that we can meet our contractual obligations and other cash commitments efficiently under both normal operating conditions and under periods of Wells Fargo-specific and/or market stress.

To help achieve this objective, the Board establishes liquidity guidelines that require sufficient asset-based liquidity to cover potential funding requirements and to avoid over-dependence on volatile, less reliable funding markets. These guidelines are monitored on a monthly basis by the management-level Corporate Asset/Liability Committee and on a quarterly basis by the Board. These guidelines are established and monitored for both the Company and the Parent on a stand-alone basis so that the Parent is a source of strength for its banking subsidiaries. For additional information on liquidity risk and funding management, see the “Risk Management – Liquidity Risk and Funding” section in our 2022 Form 10-K.

Liquidity Standards We are subject to a rule issued by the FRB, OCC and FDIC that establishes a quantitative minimum liquidity requirement consistent with the liquidity coverage ratio (LCR) established by the Basel Committee on Banking Supervision (BCBS). The rule requires a covered banking organization to hold high-quality liquid assets (HQLA) in an amount equal to or greater than its projected net cash outflows during a 30-day stress period. Our HQLA under the rule predominantly consists of central bank deposits, government debt securities, and mortgage-backed securities of federal agencies. The LCR applies to the Company and to our insured depository institutions (IDIs) with total assets of $10 billion or more. In addition, rules issued by the FRB impose enhanced liquidity risk management standards on large bank holding companies (BHCs), such as Wells Fargo.

We are also subject to a rule issued by the FRB, OCC and FDIC that establishes a stable funding requirement, known as the net stable funding ratio (NSFR), which requires a covered banking organization, such as Wells Fargo, to maintain a minimum amount of stable funding, including common equity, long-term debt and most types of deposits, in relation to its assets, derivative exposures and commitments over a one-year horizon period. The NSFR applies to the Company and to our IDIs with total assets of $10 billion or more. As of June 30, 2023, we were compliant with the NSFR requirement.

Liquidity Coverage Ratio As of June 30, 2023, the Company, Wells Fargo Bank, N.A., and Wells Fargo National Bank West exceeded the minimum LCR requirement of 100%.
Table 26 presents the Company’s quarterly average values for the daily-calculated LCR and its components calculated pursuant to the LCR rule requirements. The LCR represents average HQLA divided by average projected net cash outflows, as each is defined under the LCR rule.

Table 26: Liquidity Coverage Ratio

		Average for quarter ended	
(in millions, except ratio)	**Jun 30, 2023**	Mar 31, 2023	Jun 30, 2022
HQLA (1):			
Eligible cash	**$ 121,126**	108,725	137,147
Eligible securities (2)	**227,955**	239,123	232,815
Total HQLA	**349,081**	347,848	369,962
Projected net cash outflows (3)	**283,609**	284,290	305,212
LCR	**123%**	122	121

(1) Excludes excess HQLA at certain subsidiaries that are not transferable to other Wells Fargo entities.
(2) Net of applicable haircuts required under the LCR rule.
(3) Projected net cash outflows are calculated by applying a standardized set of outflow and inflow assumptions, defined by the LCR rule, to various exposures and liability types, such as deposits and unfunded loan commitments, which are prescribed based on a number of factors, including the type of customer and the nature of the account.

Liquidity Sources We maintain liquidity in the form of cash, interest-earning deposits with banks, and unencumbered high-quality, liquid debt securities. These assets make up our primary sources of liquidity. Our primary sources of liquidity are substantially the same in composition as HQLA under the LCR rule; however, our primary sources of liquidity will generally exceed HQLA calculated under the LCR rule due to the applicable haircuts to HQLA and the exclusion of excess HQLA at our subsidiary IDIs required under the LCR rule. Our primary sources of liquidity are presented in Table 27 at fair value, which also includes encumbered securities that are not included as available HQLA in the calculation of the LCR.

Table 27: Primary Sources of Liquidity

			June 30, 2023			December 31, 2022
(in millions)	**Total**	**Encumbered**	**Unencumbered**	Total	Encumbered	Unencumbered
Interest-earning deposits with banks (1)	**$ 122,503**	**—**	**122,503**	124,561	—	124,561
Debt securities of U.S. Treasury and federal agencies	**49,267**	**11,549**	**37,718**	59,570	12,080	47,490
Federal agency mortgage-backed securities (2)	**241,250**	**24,523**	**216,727**	230,881	34,151	196,730
Total	**$ 413,020**	**36,072**	**376,948**	415,012	46,231	368,781

(1) Excludes time deposits, which are included in interest-earning deposits with banks in our consolidated balance sheet.
(2) Encumbered securities at June 30, 2023, included securities with a fair value of $1.5 billion which were purchased in June 2023, but settled in July 2023.

Our interest-earning deposits with banks are mainly on deposit with the Federal Reserve. We believe the debt securities included in Table 27 provide quick and reliable sources of liquidity through sales or by pledging to obtain financing, regardless of market conditions. Debt securities within our HTM portfolio are not intended for sale but may be pledged to obtain financing.

As of June 30, 2023, we had approximately $438.1 billion of available borrowing capacity at various Federal Home Loan Banks and the Federal Reserve Discount Window, based on collateral pledged. Although available, we do not view this borrowing capacity as a primary source of liquidity.

In addition, liquidity is also available through the sale or financing of other debt securities, including trading and/or AFS debt securities, as well as through the sale, securitization, or financing of loans, to the extent such debt securities and loans are not encumbered.

Funding Sources The Parent acts as a source of funding for the Company through the issuance of long-term debt and equity. WFC Holdings, LLC (the “IHC”) is an intermediate holding company and subsidiary of the Parent, which provides funding support for the ongoing operational requirements of the Parent and certain of its direct and indirect subsidiaries. For additional information on the IHC, see the "Regulatory Matters – 'Living Will' Requirements and Related Matters" section in this Report. Additional subsidiary funding is provided by deposits, short-term borrowings and long-term debt.

Deposits have historically provided a sizable source of relatively low-cost funds. Deposits were 142% and 145% of total loans at June 30, 2023, and December 31, 2022, respectively.

Table 28 presents a summary of our short-term borrowings, which generally mature in less than 30 days. The balances of federal funds purchased and securities sold under agreements to repurchase may vary over time due to client activity, our own demand for financing, and our overall mix of liabilities. For additional information on the classification of our short-term borrowings, see Note 1 (Summary of Significant Accounting Policies) to Financial Statements in our 2022 Form 10-K. We pledge certain financial instruments that we own to collateralize repurchase agreements and other securities financings. For additional information, see the "Pledged Assets" section of Note 15 (Pledged Assets and Collateral) to Financial Statements in this Report.

Table 28: Short-Term Borrowings

(in millions)		Jun 30, 2023	Dec 31, 2022
Federal funds purchased and securities sold under agreements to repurchase	$	**67,602**	30,623
Other short-term borrowings (1)		**16,653**	20,522
Total	$	**84,255**	51,145

(1) Includes $2.0 billion and $7.0 billion of Federal Home Loan Bank (FHLB) advances at June 30, 2023, and December 31, 2022, respectively.

We access domestic and international capital markets for long-term funding through issuances of registered debt securities, private placements and asset-backed secured funding. We issue long-term debt in a variety of maturities and currencies to achieve cost-efficient funding and to maintain an appropriate maturity profile. Proceeds from securities issued were used for general corporate purposes unless otherwise specified in the applicable prospectus or prospectus supplement, and we expect the proceeds from securities issued in the future will be used for the same purposes. Depending on market conditions and our liquidity position, we may redeem or repurchase, and subsequently retire, our outstanding debt securities in privately negotiated or open market transactions, by tender offer, or otherwise. We issued $8.5 billion of long-term debt in July 2023. Table 29 provides the aggregate carrying value of long-term debt maturities (based on contractual payment dates) for the remainder of 2023 and the following years thereafter, as of June 30, 2023.

Table 29: Maturity of Long-Term Debt

							June 30, 2023
(in millions)	Remaining 2023	2024	2025	2026	2027	Thereafter	Total
Wells Fargo & Company (Parent Only)							
Senior notes	$ 2,099	8,536	14,185	23,463	7,510	56,341	112,134

Total long-term debt – Other consolidated subsidiaries	11	82	410	220	—	95	818
Total long-term debt	$ 11,464	28,631	17,733	26,852	11,043	74,909	170,632

(1) Includes $23.0 billion of FHLB advances.
(2) Primarily relates to unfunded commitments for low-income housing tax credit (LIHTC) investments. For additional information, see Note 16 (Securitizations and Variable Interest Entities) to Financial Statements in our 2022 Form 10-K.

Credit Ratings Investors in the long-term capital markets, as well as other market participants, generally will consider, among other factors, a company's debt rating in making investment decisions. Rating agencies base their ratings on many quantitative and qualitative factors, including capital adequacy, liquidity, asset quality, business mix, the level and quality of earnings, and rating agency assumptions regarding the probability and extent of federal financial assistance or support for certain large financial institutions. Adverse changes in these factors could result in a reduction of our credit rating; however, our debt securities do not contain credit rating covenants.

On May 18, 2023, DBRS Morningstar affirmed the Company's ratings and maintained the stable trend. On June 1, 2023, Fitch Ratings affirmed the Company's ratings and retained the stable ratings outlook. There were no other actions undertaken by the rating agencies with regard to our credit ratings during second quarter 2023.

See the "Risk Factors" section in our 2022 Form 10-K for additional information regarding our credit ratings and the potential impact a credit rating downgrade would have on our liquidity and operations as well as Note 11 (Derivatives) to Financial Statements in this Report for information regarding additional collateral and funding obligations required for certain derivative instruments in the event our credit ratings were to fall below investment grade.

The credit ratings of the Parent and Wells Fargo Bank, N.A., as of June 30, 2023, are presented in Table 30.

Table 30: Credit Ratings as of June 30, 2023

	Wells Fargo & Company		Wells Fargo Bank, N.A.	
	Senior debt	Short-term borrowings	Long-term deposits	Short-term borrowings
Moody's	A1	P-1	Aa1	P-1
S&P Global Ratings	BBB+	A-2	A+	A-1
Fitch Ratings	A+	F1	AA	F1+
DBRS Morningstar	AA (low)	R-1 (middle)	AA	R-1 (high)

Capital Management

We have an active program for managing capital through a comprehensive process for assessing the Company's overall capital adequacy. Our objective is to maintain capital at an amount commensurate with our risk profile and risk tolerance objectives, and to meet both regulatory and market expectations. We primarily fund our capital needs through the retention of earnings net of both dividends and share repurchases, as well as through the issuance of preferred stock and long- and short-term debt. Retained earnings at June 30, 2023, increased $7.2 billion from December 31, 2022, predominantly as a result of $9.9 billion of Wells Fargo net income, partially offset by $2.9 billion of common and preferred stock dividends. During the first half of 2023, we issued $860 million of common stock, substantially all of which was issued in connection with employee compensation and benefits. In the first half of 2023, we repurchased 187 million shares of common stock at a cost of $8.1 billion. For additional information about capital planning, see the "Capital Planning and Stress Testing" section below.

In July 2023, we issued $1.725 billion of our Preferred Stock, Series EE.

Regulatory Capital Requirements

The Company and each of our IDIs are subject to various regulatory capital adequacy requirements administered by the FRB and the OCC. Risk-based capital rules establish risk-adjusted ratios relating regulatory capital to different categories of assets and off-balance sheet exposures as discussed below.

RISK-BASED CAPITAL AND RISK-WEIGHTED ASSETS The Company is subject to rules issued by federal banking regulators to implement Basel III capital requirements for U.S. banking organizations. The rules contain two frameworks for calculating capital requirements, a Standardized Approach and an Advanced Approach applicable to certain institutions, including Wells Fargo, and we must calculate our risk-based capital ratios under both approaches. The Company is required to satisfy the risk-based capital ratio requirements to avoid restrictions on capital distributions and discretionary bonus payments.

On July 27, 2023, federal banking regulators issued a proposed rule that would impact the way in which risk-based capital requirements are determined for certain banks. The proposed rule would eliminate the current Advanced Approach and replace it with a new expanded risk-based approach for the measurement of risk-weighted assets, including more granular risk weights for credit risk, a new market risk framework, and a new standardized approach for measuring operational risk. The new requirements would be phased in over a three-year period beginning July 1, 2025. The Company expects a significant increase in its risk-weighted assets and a net increase in its capital requirements based on a preliminary assessment of the proposed rule. The Company is considering a range of potential actions to address the impact of the proposed rule, including balance sheet and capital optimization strategies.

Table 31 and Table 32 present the risk-based capital requirements applicable to the Company under the Standardized Approach and Advanced Approach, respectively, as of June 30, 2023.

Table 31: Risk-Based Capital Requirements – Standardized Approach

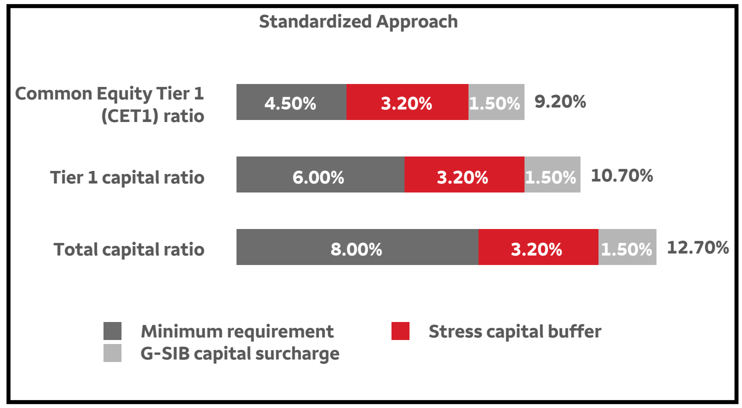

Table 32: Risk-Based Capital Requirements – Advanced Approach

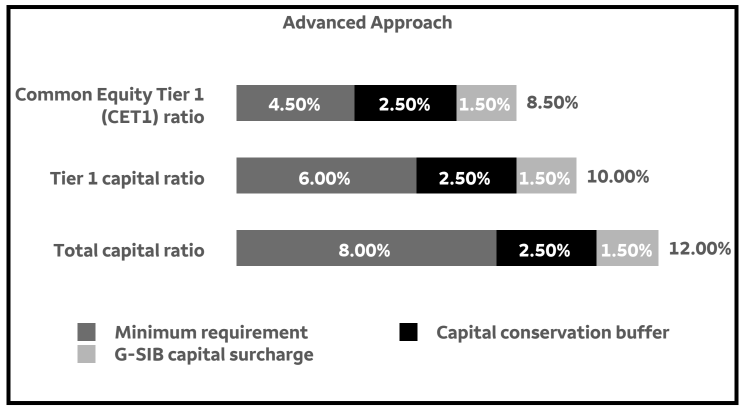

In addition to the risk-based capital requirements described in Table 31 and Table 32, if the FRB determines that a period of excessive credit growth is contributing to an increase in systemic risk, a countercyclical buffer of up to 2.50% could be added to the risk-based capital ratio requirements under federal banking regulations. The countercyclical buffer in effect at June 30, 2023, was 0.00%.

The capital conservation buffer is applicable to certain institutions, including Wells Fargo, under the Advanced Approach and is intended to absorb losses during times of economic or financial stress.

The stress capital buffer is calculated based on the decrease in a BHC's risk-based capital ratios under the severely adverse scenario in the FRB's annual supervisory stress test and related Comprehensive Capital Analysis and Review (CCAR), plus four quarters of planned common stock dividends. Because the stress capital buffer is calculated annually based on data that can differ over time, our stress capital buffer, and thus our risk-based capital ratio requirements under the Standardized Approach, are subject to change in future periods. Our stress capital buffer for the period October 1, 2022, through September 30, 2023, is 3.20%. On July 27, 2023, the FRB confirmed that the Company's stress capital buffer for the period October 1, 2023, through September 30, 2024, will be 2.90%.

As a global systemically important bank (G-SIB), we are also subject to the FRB's rule implementing an additional capital surcharge between 1.00-4.50% on the risk-based capital ratio requirements of G-SIBs. Under the rule, we must annually calculate our surcharge under two methods and use the higher of the two surcharges. The first method (method one) considers our size, interconnectedness, cross-jurisdictional activity, substitutability, and complexity, consistent with the methodology developed by the BCBS and the Financial Stability Board (FSB). The second method (method two) uses similar inputs, but replaces substitutability with use of short-term wholesale funding and will generally result in higher surcharges than under method one. Because the G-SIB capital surcharge is calculated annually based on data that can differ over time, the amount of the surcharge is subject to change in future years. If our annual calculation results in a decrease to our G-SIB capital surcharge, the decrease takes effect the next calendar year. If our annual calculation results in an increase to our G-SIB capital surcharge, the increase takes effect in two calendar years. Our G-SIB capital surcharge will continue to be 1.50% in 2023. On July 27, 2023, the FRB issued a proposed rule that would impact the methodology used to calculate the G-SIB capital surcharge.

Under the risk-based capital rules, on-balance sheet assets and credit equivalent amounts of derivatives and off-balance sheet items are assigned to one of several broad risk categories according to the obligor, or, if relevant, the guarantor or the nature of any collateral. The aggregate dollar amount in each risk category is then multiplied by the risk weight associated with that category. The resulting weighted values from each of the risk categories are aggregated for determining total risk-weighted assets (RWAs).

The tables that follow provide information about our risk-based capital and related ratios as calculated under Basel III capital rules. Table 33 summarizes our CET1, Tier 1 capital, total capital, RWAs and capital ratios.

Table 33: Capital Components and Ratios

($ in millions)		Standardized Approach: Required Capital Ratios (1)	Standardized Approach: Jun 30, 2023	Standardized Approach: Dec 31, 2022	Advanced Approach: Required Capital Ratios (1)	Advanced Approach: Jun 30, 2023	Advanced Approach: Dec 31, 2022
Common Equity Tier 1	(A)		$ **134,221**	133,527		**134,221**	133,527

Qualifying allowance for credit losses (4)			**4,473**	4,470
Other			**(429)**	(282)
Total Tier 2 capital under the Advanced Approach	(C)	$	**23,725**	24,691
Total qualifying capital under the Advanced Approach	(A)+(C)	$	**176,926**	177,258

(1) In first quarter 2023, we adopted ASU 2018-12. We adopted this ASU with retrospective application, which required revision of prior period financial statements. Prior period risk-based capital and certain other regulatory related metrics were not revised. For additional information, see Note 1 (Summary of Significant Accounting Policies) to Financial Statements in this Report.
(2) Determined by applying the combined federal statutory rate and composite state income tax rates to the difference between book and tax basis of the respective goodwill and intangible assets at period-end.
(3) In second quarter 2020, the Company elected to apply a modified transition provision issued by federal banking regulators related to the impact of the current expected credit loss accounting standard (CECL) on regulatory capital. The rule permits certain banking organizations to exclude from regulatory capital the initial adoption impact of CECL, plus 25% of the cumulative changes in the allowance for credit losses (ACL) under CECL for each period until December 31, 2021, followed by a three-year phase-out period in which the benefit is reduced by 25% in year one, 50% in year two and 75% in year three.
(4) Differences between the approaches are driven by the qualifying amounts of ACL includable in Tier 2 capital. Under the Advanced Approach, eligible credit reserves represented by the amount of qualifying ACL in excess of expected credit losses (using regulatory definitions) is limited to 0.60% of Advanced credit RWAs, whereas the Standardized Approach includes ACL in Tier 2 capital up to 1.25% of Standardized credit RWAs. Under both approaches, any excess ACL is deducted from the respective total RWAs.

Table 35 provides the composition of our RWAs under the Standardized and Advanced Approaches.

Table 35: Risk-Weighted Assets

Credit risk	$	**1,210,424**	1,218,006	**757,013**	757,436
Market risk		**40,266**	41,883	**40,266**	41,883
Operational risk		**—**	—	**321,100**	312,988
Total RWAs	$	**1,250,690**	1,259,889	**1,118,379**	1,112,307

(1) RWAs calculated under the Advanced Approach utilize a risk-sensitive methodology, which relies upon the use of internal credit models based upon our experience with internal rating grades. Advanced Approach also includes an operational risk component, which reflects the risk of loss resulting from inadequate or failed internal processes, people and systems, or from external events.

Table 36 provides an analysis of changes in CET1.

Table 36: Analysis of Changes in Common Equity Tier 1

(in millions)		
Common Equity Tier 1 at December 31, 2022	$	133,527
Cumulative effect from change in accounting policy (1)		323
Net income applicable to common stock		9,372
Common stock dividends		(2,253)
Common stock issued, repurchased, and stock compensation-related items		(7,400)
Changes in accumulated other comprehensive income (loss)		(79)
Goodwill		(2)
Certain identifiable intangible assets (other than MSRs)		7
Goodwill and other intangibles on investments in consolidated portfolio companies (included in other assets)		(84)
Applicable deferred taxes related to goodwill and other intangible assets (2)		15
CECL transition provision (3)		(60)
Other (4)		855
Change in Common Equity Tier 1		694
Common Equity Tier 1 at June 30, 2023	**$**	**134,221**

(1) Effective January 1, 2023, we adopted ASU 2022-02, Financial Instruments – Credit Losses (Topic 326): *Troubled Debt Restructurings and Vintage Disclosures*. For additional information, see Note 1 (Summary of Significant Accounting Policies) to Financial Statements in this Report.
(2) Determined by applying the combined federal statutory rate and composite state income tax rates to the difference between book and tax basis of the respective goodwill and intangible assets at period-end.
(3) In second quarter 2020, the Company elected to apply a modified transition provision issued by federal banking regulators related to the impact of CECL on regulatory capital. The rule permits certain banking organizations to exclude from regulatory capital the initial adoption impact of CECL, plus 25% of the cumulative changes in the allowance for credit losses (ACL) under CECL for each period until December 31, 2021, followed by a three-year phase-out period in which the benefit is reduced by 25% in year one, 50% in year two and 75% in year three.
(4) Includes $338 million related to our first quarter 2023 adoption of ASU 2018-12. For additional information, see Note 1 (Summary of Significant Accounting Policies) to Financial Statements in this Report.

Table 37 presents net changes in the components of RWAs under the Standardized and Advanced Approaches.

Table 37: Analysis of Changes in RWAs

(in millions)		Standardized Approach	Advanced Approach
Risk-weighted assets (RWAs) at December 31, 2022	$	1,259,889	1,112,307
Net change in credit risk RWAs		(7,582)	(423)
Net change in market risk RWAs		(1,617)	(1,617)
Net change in operational risk RWAs		—	8,112
Total change in RWAs		(9,199)	6,072
RWAs at June 30, 2023	**$**	**1,250,690**	**1,118,379**

TANGIBLE COMMON EQUITY We also evaluate our business based on certain ratios that utilize tangible common equity. Tangible common equity is a non-GAAP financial measure and represents total equity less preferred equity, noncontrolling interests, goodwill, certain identifiable intangible assets (other than MSRs) and goodwill and other intangibles on investments in consolidated portfolio companies, net of applicable deferred taxes. The ratios are (i) tangible book value per common share, which represents tangible common equity divided by common shares outstanding; and (ii) return on average tangible common equity (ROTCE), which represents our annualized earnings as a percentage of tangible common equity. The methodology of determining tangible common equity may differ among companies. Management believes that tangible book value per common share and return on average tangible common equity, which utilize tangible common equity, are useful financial measures because they enable management, investors, and others to assess the Company's use of equity.

Table 38 provides a reconciliation of these non-GAAP financial measures to GAAP financial measures.

Table 38: Tangible Common Equity

		Balance at period-end			Average balance				
		Quarter ended			Quarter ended			Six months ended	
(in millions, except ratios)		**Jun 30, 2023**	Mar 31, 2023	Jun 30, 2022	**Jun 30, 2023**	Mar 31, 2023	Jun 30, 2022	**Jun 30, 2023**	Jun 30, 2022

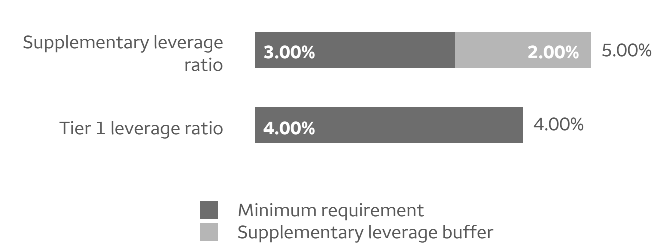
(1) In fourth quarter 2022, we redeemed all outstanding shares of our Employee Stock Ownership Plan (ESOP) Cumulative Convertible Preferred Stock in exchange for shares of the Company's common stock. For additional information, see Note 11 (Preferred Stock) to Financial Statements in our 2022 Form 10-K.

(2) Determined by applying the combined federal statutory rate and composite state income tax rates to the difference between book and tax basis of the respective goodwill and intangible assets at period-end.

LEVERAGE REQUIREMENTS As a BHC, we are required to maintain a supplementary leverage ratio (SLR) to avoid restrictions on capital distributions and discretionary bonus payments and maintain a minimum Tier 1 leverage ratio. Table 39 presents the leverage requirements applicable to the Company as of June 30, 2023.

Table 39: Leverage Requirements Applicable to the Company



In addition, our IDIs are required to maintain an SLR of at least 6.00% to be considered well capitalized under applicable regulatory capital adequacy rules and maintain a minimum Tier 1 leverage ratio of 4.00%.

The FRB and OCC have proposed amendments to the SLR rules. For information regarding the proposed amendments to the SLR rules, see the "Capital Management – Leverage Requirements" section in our 2022 Form 10-K.

Table 40 presents information regarding the calculation and components of the Company's SLR and Tier 1 leverage ratio. At June 30, 2023, each of our IDIs exceeded their applicable SLR requirements.

Table 40: Leverage Ratios for the Company

($ in millions)			Quarter ended June 30, 2023
Tier 1 capital	(A)	$	153,201
Total average assets			1,878,373
Less: Goodwill and other permitted Tier 1 capital deductions (net of deferred tax liabilities)			28,289
Total adjusted average assets			1,850,084
Plus adjustments for off-balance sheet exposures:			
Derivatives (1)			57,430
Repo-style transactions (2)			4,023
Other (3)			306,038
Total off-balance sheet exposures			367,491
Total leverage exposure	(B)	$	2,217,575
Supplementary leverage ratio	(A)/(B)		6.91%
Tier 1 leverage ratio (4)			8.28%

(1) Adjustment represents derivatives and collateral netting exposures as defined for supplementary leverage ratio determination purposes.
(2) Adjustment represents counterparty credit risk for repo-style transactions where Wells Fargo & Company is the principal counterparty facing the client.
(3) Adjustment represents credit equivalent amounts of other off-balance sheet exposures not already included as derivatives and repo-style transactions exposures.
(4) The Tier 1 leverage ratio consists of Tier 1 capital divided by total average assets, excluding goodwill and certain other items as determined under the rule.

TOTAL LOSS ABSORBING CAPACITY As a G-SIB, we are required to have a minimum amount of equity and unsecured long-term debt for purposes of resolvability and resiliency, often referred to as Total Loss Absorbing Capacity (TLAC). U.S. G-SIBs are required to have a minimum amount of TLAC (consisting of CET1 capital and additional Tier 1 capital issued directly by the top-tier or covered BHC plus eligible external long-term debt) to avoid restrictions on capital distributions and discretionary bonus payments as well as a minimum amount of eligible unsecured long-term debt. The components used to calculate our minimum TLAC and eligible unsecured long-term debt requirements as of June 30, 2023, are presented in Table 41.

Table 41: Components Used to Calculate TLAC and Eligible Unsecured Long-Term Debt Requirements

TLAC requirement

Greater of:

18.00% of RWAs + TLAC buffer (equal to 2.50% of RWAs + method one G-SIB capital surcharge + any countercyclical buffer)	7.50% of total leverage exposure (the denominator of the SLR calculation) + External TLAC leverage buffer (equal to 2.00% of total leverage exposure)

Minimum amount of eligible unsecured long-term debt

Greater of:

6.00% of RWAs + Greater of method one and method two G-SIB capital surcharge	4.50% of total leverage exposure

The FRB and OCC have proposed amendments to the TLAC and eligible unsecured long-term debt requirements. For information regarding these proposed amendments, see the "Capital Management – Total Loss Absorbing Capacity" section in our 2022 Form 10-K.

Table 42 provides our TLAC and eligible unsecured long-term debt and related ratios.

Table 42: TLAC and Eligible Unsecured Long-Term Debt

	June 30, 2023			
($ in millions)	TLAC (1)	Regulatory Minimum (2)	Eligible Unsecured Long-term Debt	Regulatory Minimum
Total eligible amount	$ 289,125		130,576	
Percentage of RWAs (3)	23.12 %	21.50	10.44	7.50
Percentage of total leverage exposure	13.04	9.50	5.89	4.50

(1) TLAC ratios are calculated using the CECL transition provision issued by federal banking regulators.
(2) Represents the minimum required to avoid restrictions on capital distributions and discretionary bonus payments.
(3) Our minimum TLAC and eligible unsecured long-term debt requirements are calculated based on the greater of RWAs determined under the Standardized and Advanced Approaches.

OTHER REGULATORY CAPITAL AND LIQUIDITY MATTERS For information regarding the U.S. implementation of the Basel III LCR and NSFR, see the "Risk Management – Asset/ Liability Management – Liquidity Risk and Funding – Liquidity Standards" section in this Report.

Our principal U.S. broker-dealer subsidiaries, Wells Fargo Securities, LLC, and Wells Fargo Clearing Services, LLC, are subject to regulations to maintain minimum net capital requirements. As of June 30, 2023, these broker-dealer subsidiaries were in compliance with their respective regulatory minimum net capital requirements.

Capital Planning and Stress Testing

Our planned long-term capital structure is designed to meet regulatory and market expectations. We believe that our long-term targeted capital structure enables us to invest in and grow our business, satisfy our customers' financial needs in varying environments, access markets, and maintain flexibility to return capital to our shareholders. Our long-term targeted capital structure also considers capital levels sufficient to exceed capital requirements, including the G-SIB capital surcharge and the stress capital buffer, as well as potential changes to regulatory requirements for our capital ratios, planned capital actions, changes in our risk profile and other factors. Accordingly, our long-term target capital levels are set above their respective regulatory minimums plus buffers.

The FRB capital plan rule establishes capital planning and other requirements that govern capital distributions, including dividends and share repurchases, by certain BHCs, including Wells Fargo. The FRB assesses, among other things, the overall financial condition, risk profile, and capital adequacy of BHCs when evaluating their capital plans.

As part of the annual Comprehensive Capital Analysis and Review, the FRB generates a supervisory stress test. The FRB reviews the supervisory stress test results as required under the Dodd-Frank Act using a common set of capital actions for all large BHCs and also reviews the Company's proposed capital actions. The FRB published its supervisory stress test results on June 28, 2023.

On July 25, 2023, the Board approved an increase to the Company's third quarter 2023 common stock dividend to $0.35 per share.

Federal banking regulators also require large BHCs and banks to conduct their own stress tests to evaluate whether the institution has sufficient capital to continue to operate during periods of adverse economic and financial conditions.

Securities Repurchases

From time to time the Board authorizes the Company to repurchase shares of our common stock. Although we announce when the Board authorizes share repurchases, we typically do not give any public notice before we repurchase our shares. Various factors determine the amount of our share repurchases, including our capital requirements, the number of shares we expect to issue for employee benefit plans and any acquisitions, market conditions (including the trading price of our stock), and regulatory and legal considerations, including under the FRB's capital plan rule. Due to the various factors that may impact the amount of our share repurchases and the fact that we tend to be in the market regularly to satisfy repurchase considerations under our capital plan, our share repurchases occur at various price levels. We may suspend share repurchase activity at any time.

At June 30, 2023, we had remaining Board authority to repurchase approximately 64 million shares, subject to regulatory and legal conditions. The Company publicly announced on July 25, 2023, that the Board authorized a new common stock repurchase program of up to $30 billion. Unless modified or revoked by the Board, this authorization does not expire and supersedes the prior share repurchase authority approved by the Board.

For additional information about share repurchases during second quarter 2023, see Part II, Item 2 in this Report.

Regulatory Matters

The U.S. financial services industry is subject to significant regulation and regulatory oversight initiatives. This regulation and oversight may continue to impact how U.S. financial services companies conduct business and may continue to result in increased regulatory compliance costs.

For a discussion of certain consent orders applicable to the Company, see the "Overview" section in this Report. The following supplements our discussion of other significant regulations and regulatory oversight initiatives that have affected or may affect our business contained in the "Regulatory Matters" and "Risk Factors" sections in our 2022 Form 10-K.

"Living Will" Requirements and Related Matters

Rules adopted by the FRB and the FDIC under the Dodd-Frank Act require large financial institutions, including Wells Fargo, to prepare and periodically submit resolution plans, also known as "living wills," that would facilitate their rapid and orderly resolution in the event of material financial distress or failure. Under the rules, rapid and orderly resolution means a reorganization or liquidation of the covered company under the U.S. Bankruptcy Code that can be accomplished in a reasonable period of time and in a manner that substantially mitigates the risk that failure would have serious adverse effects on the financial stability of the United States. In addition to the Company's resolution plan, our national bank subsidiary, Wells Fargo Bank, N.A. (the "Bank"), is also required to prepare and periodically submit a resolution plan. If the FRB and/or FDIC determine that our resolution plan has deficiencies, they may impose more stringent capital, leverage or liquidity requirements on us or restrict our growth, activities or operations until we adequately remedy the deficiencies. If the FRB and/or FDIC ultimately determine that we have been unable to remedy any deficiencies, they could require us to divest certain assets or operations. On June 27, 2023, we submitted our most recent resolution plan to the FRB and FDIC.

If Wells Fargo were to fail, it may be resolved in a bankruptcy proceeding or, if certain conditions are met, under the resolution regime created by the Dodd-Frank Act known as the "orderly liquidation authority." The orderly liquidation authority allows for the appointment of the FDIC as receiver for a systemically important financial institution that is in default or in danger of default if, among other things, the resolution of the institution under the U.S. Bankruptcy Code would have serious adverse effects on financial stability in the United States. If the FDIC is appointed as receiver for the Parent, then the orderly liquidation authority, rather than the U.S. Bankruptcy Code, would determine the powers of the receiver and the rights and obligations of our security holders. The FDIC's orderly liquidation authority requires that security holders of a company in receivership bear all losses before U.S. taxpayers are exposed to any losses. There are substantial differences in the rights of creditors between the orderly liquidation authority and the U.S. Bankruptcy Code, including the right of the FDIC to disregard the strict priority of creditor claims under the U.S. Bankruptcy Code in certain circumstances and the use of an administrative claims procedure instead of a judicial procedure to determine creditors' claims.

The strategy described in our most recent resolution plan is a single point of entry strategy, in which the Parent would be the only material legal entity to enter resolution proceedings. However, the strategy described in our resolution plan is not binding in the event of an actual resolution of Wells Fargo, whether conducted under the U.S. Bankruptcy Code or by the FDIC under the orderly liquidation authority. The FDIC has announced that a single point of entry strategy may be a desirable strategy under its implementation of the orderly liquidation authority, but not all aspects of how the FDIC might exercise this authority are known and additional rulemaking is possible.

To facilitate the orderly resolution of systemically important financial institutions in case of material distress or failure, federal banking regulations require that institutions, such as Wells Fargo, maintain a minimum amount of equity and unsecured debt to absorb losses and recapitalize operating subsidiaries. Federal banking regulators have also required measures to facilitate the continued operation of operating subsidiaries notwithstanding the failure of their parent companies, such as limitations on parent guarantees, and have issued guidance encouraging institutions to take legally binding measures to provide capital and liquidity resources to certain subsidiaries to facilitate an orderly resolution. In response to the regulators' guidance and to facilitate the orderly resolution of the Company, on June 28, 2017, the Parent entered into a support agreement, as amended and restated on June 26, 2019 (the "Support Agreement"), with WFC Holdings, LLC, an intermediate holding company and subsidiary of the Parent (the "IHC"), the Bank, Wells Fargo Securities, LLC ("WFS"), Wells Fargo Clearing Services, LLC ("WFCS"), and certain other subsidiaries of the Parent designated from time to time as material entities for resolution planning purposes (the "Covered Entities") or identified from time to time as related support entities in our resolution plan (the "Related Support Entities"). Pursuant to the Support Agreement, the

Parent transferred a significant amount of its assets, including the majority of its cash, deposits, liquid securities and intercompany loans (but excluding its equity interests in its subsidiaries and certain other assets), to the IHC and will continue to transfer those types of assets to the IHC from time to time. In the event of our material financial distress or failure, the IHC will be obligated to use the transferred assets to provide capital and/or liquidity to the Bank, WFS, WFCS, and the Covered Entities pursuant to the Support Agreement. Under the Support Agreement, the IHC will also provide funding and liquidity to the Parent through subordinated notes and a committed line of credit, which, together with the issuance of dividends, is expected to provide the Parent, during business as usual operating conditions, with the same access to cash necessary to service its debts, pay dividends, repurchase its shares, and perform its other obligations as it would have had if it had not entered into these arrangements and transferred any assets. If certain liquidity and/or capital metrics fall below defined triggers, or if the Parent's board of directors authorizes it to file a case under the U.S. Bankruptcy Code, the subordinated notes would be forgiven, the committed line of credit would terminate, and the IHC's ability to pay dividends to the Parent would be restricted, any of which could materially and adversely impact the Parent's liquidity and its ability to satisfy its debts and other obligations, and could result in the commencement of bankruptcy proceedings by the Parent at an earlier time than might have otherwise occurred if the Support Agreement were not implemented. The respective obligations under the Support Agreement of the Parent, the IHC, the Bank, and the Related Support Entities are secured pursuant to a related security agreement.

In addition to our resolution plans, we must also prepare and periodically submit to the FRB a recovery plan that identifies a range of options that we may consider during times of idiosyncratic or systemic economic stress to remedy any financial weaknesses and restore market confidence without extraordinary government support. Recovery options include the possible sale, transfer or disposal of assets, securities, loan portfolios or businesses. The Bank must also prepare and periodically submit to the OCC a recovery plan that sets forth the Bank's plan to remain a going concern when the Bank is experiencing considerable financial or operational stress, but has not yet deteriorated to the point where liquidation or resolution is imminent. If either the FRB or the OCC determines that our recovery plan is deficient, they may impose fines, restrictions on our business or ultimately require us to divest assets.

Critical Accounting Policies

Our significant accounting policies (see Note 1 (Summary of Significant Accounting Policies) to Financial Statements in our 2022 Form 10-K) are fundamental to understanding our results of operations and financial condition because they require that we use estimates and assumptions that may affect the value of our assets or liabilities and financial results. Six of these policies are critical because they require management to make difficult, subjective and complex judgments about matters that are inherently uncertain and because it is likely that materially different amounts would be reported under different conditions or using different assumptions. These policies govern:

- the allowance for credit losses;
- the valuation of residential MSRs;
- the fair value of financial instruments;
- income taxes;
- liability for contingent litigation losses; and
- goodwill impairment.

Management has discussed these critical accounting policies and the related estimates and judgments with the Board's Audit Committee. For additional information on these policies, see the "Critical Accounting Policies" section and Note 1 (Summary of Significant Accounting Policies) to Financial Statements in our 2022 Form 10-K and Note 1 (Summary of Significant Accounting Policies) to Financial Statements in this Report.

Current Accounting Developments

Table 43 provides the significant accounting updates applicable to us that have been issued by the Financial Accounting Standards Board (FASB) but are not yet effective.

Table 43: Current Accounting Developments – Issued Standards

Description and Effective Date	Financial statement impact
Accounting Standards Update (ASU) 2023-02 – Investments – Equity Method and Joint Ventures (Topic 323): ***Accounting for Investments in Tax Credit Structures Using the Proportional Amortization Method***	
The Update, effective January 1, 2024 (with early adoption permitted), permits entities to elect to account for additional tax credit investments using the proportional amortization method. The Update requires a separate accounting policy election for each tax credit program. For any tax credit program where the proportional amortization method is elected, all investments within that program that meet eligibility criteria are required to apply the proportional amortization method. The Update also requires additional disclosures for any tax credit program where the proportional amortization method is elected.	The Update eliminates the low-income housing tax credit (LIHTC)-only scope limitation of the proportional amortization method and permits entities to account for all tax credit investments made primarily for the purpose of receiving income tax credits and income tax benefits using a consistent accounting method. Under the proportional amortization method, tax credit investments are carried at amortized cost and amortized in proportion to the income tax credits and income tax benefits received. The amortization of the investment and the related income tax credits and income tax benefits are recorded in income tax expense. The Update may be adopted on either a full retrospective or modified retrospective basis and early adoption is permitted. Upon adoption of the Update, we will identify our tax credit programs and make a separate accounting policy election as to whether to apply the proportional amortization method for each program. For any investments that will apply the proportional amortization method upon adoption of the Update, the cumulative effect of the difference between the current carrying value and the carrying value under the proportional amortization method will be recorded as an adjustment to the opening balance of retained earnings, the period of which is dependent upon which transition method is selected. We are currently evaluating the impact of the Update on our consolidated financial statements.

Other Accounting Developments

The following Update is applicable to us but is not expected to have a material impact on our consolidated financial statements:

- ASU 2022-03 – Fair Value Measurement (Topic 820): *Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions*

Forward-Looking Statements

This document contains forward-looking statements. In addition, we may make forward-looking statements in our other documents filed or furnished with the Securities and Exchange Commission, and our management may make forward-looking statements orally to analysts, investors, representatives of the media and others. Forward-looking statements can be identified by words such as “anticipates,” “intends,” “plans,” “seeks,” “believes,” “estimates,” “expects,” “target,” “projects,” “outlook,” “forecast,” “will,” “may,” “could,” “should,” “can” and similar references to future periods. In particular, forward-looking statements include, but are not limited to, statements we make about: (i) the future operating or financial performance of the Company, including our outlook for future growth; (ii) our expectations regarding noninterest expense and our efficiency ratio; (iii) future credit quality and performance, including our expectations regarding future loan losses, our allowance for credit losses, and the economic scenarios considered to develop the allowance; (iv) our expectations regarding net interest income and net interest margin; (v) loan growth or the reduction or mitigation of risk in our loan portfolios; (vi) future capital or liquidity levels, ratios or targets; (vii) our expectations regarding our mortgage business and any related commitments or exposures; (viii) the expected outcome and impact of legal, regulatory and legislative developments, as well as our expectations regarding compliance therewith; (ix) future common stock dividends, common share repurchases and other uses of capital; (x) our targeted range for return on assets, return on equity, and return on tangible common equity; (xi) expectations regarding our effective income tax rate; (xii) the outcome of contingencies, such as legal proceedings; (xiii) environmental, social and governance related goals or commitments; and (xiv) the Company’s plans, objectives and strategies.

Forward-looking statements are not based on historical facts but instead represent our current expectations and assumptions regarding our business, the economy and other future conditions. Because forward-looking statements relate to the future, they are subject to inherent uncertainties, risks and changes in circumstances that are difficult to predict. Our actual results may differ materially from those contemplated by the forward-looking statements. We caution you, therefore, against relying on any of these forward-looking statements. They are neither statements of historical fact nor guarantees or assurances of future performance. While there is no assurance that any list of risks and uncertainties or risk factors is complete, important factors that could cause actual results to differ materially from those in the forward-looking statements include the following, without limitation:

- current and future economic and market conditions, including the effects of declines in housing prices, high unemployment rates, declines in commercial real estate prices, U.S. fiscal debt, budget and tax matters, geopolitical matters (including the conflict in Ukraine), and any slowdown in global economic growth;
- the effect of the COVID-19 pandemic, including on our credit quality and business operations, as well as its impact on general economic and financial market conditions;
- our capital and liquidity requirements (including under regulatory capital standards, such as the Basel III capital standards) and our ability to generate capital internally or raise capital on favorable terms;
- current, pending or future legislation or regulation that could have a negative effect on our revenue and businesses, including rules and regulations relating to bank products and financial services;
- developments in our mortgage banking business, including any negative effects relating to our mortgage servicing, loan modification or foreclosure practices, and any changes in industry standards, regulatory or judicial requirements, or our strategic plans for the business;
- our ability to realize any efficiency ratio or expense target as part of our expense management initiatives, including as a result of business and economic cyclicality, seasonality, changes in our business composition and operating environment, growth in our businesses and/or acquisitions, and unexpected expenses relating to, among other things, litigation and regulatory matters;
- the effect of the current interest rate environment or changes in interest rates or in the level or composition of our assets or liabilities on our net interest income, net interest margin and our mortgage originations, mortgage servicing rights and mortgage loans held for sale;
- significant turbulence or a disruption in the capital or financial markets, which could result in, among other things, reduced investor demand for mortgage loans, a reduction in the availability of funding or increased funding costs, and declines in asset values and/or recognition of impairments of securities held in our debt securities and equity securities portfolios;
- the effect of a fall in stock market prices on our investment banking business and our fee income from our brokerage and wealth management businesses;
- negative effects from the retail banking sales practices matter and from instances where customers may have experienced financial harm, including on our legal, operational and compliance costs, our ability to engage in certain business activities or offer certain products or services, our ability to keep and attract customers, our ability to attract and retain qualified employees, and our reputation;
- regulatory matters, including the failure to resolve outstanding matters on a timely basis and the potential impact of new matters, litigation, or other legal actions, which may result in, among other things, additional costs, fines, penalties, restrictions on our business activities, reputational harm, or other adverse consequences;
- a failure in or breach of our operational or security systems or infrastructure, or those of our third-party vendors or other service providers, including as a result of cyber attacks;
- the effect of changes in the level of checking or savings account deposits on our funding costs and net interest margin;
- fiscal and monetary policies of the Federal Reserve Board;
- changes to U.S. tax guidance and regulations as well as the effect of discrete items on our effective income tax rate;
- our ability to develop and execute effective business plans and strategies; and
- the other risk factors and uncertainties described under “Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2022.

In addition to the above factors, we also caution that the amount and timing of any future common stock dividends or repurchases will depend on the earnings, cash requirements and financial condition of the Company, market conditions, capital requirements (including under Basel capital standards), common stock issuance requirements, applicable law and regulations (including federal securities laws and federal banking regulations), and other factors deemed relevant by the Company, and may be subject to regulatory approval or conditions.

For additional information about factors that could cause actual results to differ materially from our expectations, refer to our reports filed with the Securities and Exchange Commission, including the discussion under "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2022, as filed with the Securities and Exchange Commission and available on its website at www.sec.gov.[1]

Any forward-looking statement made by us speaks only as of the date on which it is made. Factors or events that could cause our actual results to differ may emerge from time to time, and it is not possible for us to predict all of them. We undertake no obligation to publicly update any forward-looking statement, whether as a result of new information, future developments or otherwise, except as may be required by law.

Forward-looking Non-GAAP Financial Measures. From time to time management may discuss forward-looking non-GAAP financial measures, such as forward-looking estimates or targets for return on average tangible common equity. We are unable to provide a reconciliation of forward-looking non-GAAP financial measures to their most directly comparable GAAP financial measures because we are unable to provide, without unreasonable effort, a meaningful or accurate calculation or estimation of amounts that would be necessary for the reconciliation due to the complexity and inherent difficulty in forecasting and quantifying future amounts or when they may occur. Such unavailable information could be significant to future results.

Risk Factors

An investment in the Company involves risk, including the possibility that the value of the investment could fall substantially and that dividends or other distributions on the investment could be reduced or eliminated. For a discussion of risk factors that could adversely affect our financial results and condition, and the value of, and return on, an investment in the Company, we refer you to the "Risk Factors" section in our 2022 Form 10-K.

Controls and Procedures

Disclosure Controls and Procedures

The Company's management evaluated the effectiveness, as of June 30, 2023, of the Company's disclosure controls and procedures. The Company's chief executive officer and chief financial officer participated in the evaluation. Based on this evaluation, the Company's chief executive officer and chief financial officer concluded that the Company's disclosure controls and procedures were effective as of June 30, 2023.

Internal Control Over Financial Reporting

Internal control over financial reporting is defined in Rule 13a-15(f) promulgated under the Securities Exchange Act of 1934 as a process designed by, or under the supervision of, the Company's principal executive and principal financial officers and effected by the Company's Board, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles (GAAP) and includes those policies and procedures that:

- pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of assets of the Company;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. No change occurred during second quarter 2023 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

(1) In first quarter 2023, we adopted ASU 2018-12 – Financial Services – Insurance (Topic 944): *Targeted Improvements to the Accounting for Long-Duration Contracts*. For additional information, see Note 1 (Summary of Significant Accounting Policies).
(2) Includes Cash and due from banks and Interest-earning deposits with banks on our consolidated balance sheet and excludes time deposits, which are included in Interest-earning deposits with banks.

The accompanying notes are an integral part of these statements. See Note 1 (Summary of Significant Accounting Policies) for noncash activities.

Notes to Financial Statements

-See the "Glossary of Acronyms" at the end of this Report for terms used throughout the Financial Statements and related Notes.

Note 1: Summary of Significant Accounting Policies

Wells Fargo & Company is a diversified financial services company. We provide banking, investment and mortgage products and services, as well as consumer and commercial finance, through banking locations and offices, the internet and other distribution channels to individuals, businesses and institutions in all 50 states, the District of Columbia, and in countries outside the U.S. When we refer to "Wells Fargo," "the Company," "we," "our" or "us," we mean Wells Fargo & Company and Subsidiaries (consolidated). Wells Fargo & Company (the Parent) is a financial holding company and a bank holding company. We also hold a majority interest in a real estate investment trust, which has publicly traded preferred stock outstanding.

Our accounting and reporting policies conform with U.S. generally accepted accounting principles (GAAP) and practices in the financial services industry. For discussion of our significant accounting policies, see Note 1 (Summary of Significant Accounting Policies) in our Annual Report on Form 10-K for the year ended December 31, 2022 (2022 Form 10-K). There were no material changes to these policies in the first half of 2023.

To prepare the financial statements in conformity with GAAP, management must make estimates based on assumptions about future economic and market conditions (for example, unemployment, market liquidity, real estate prices, etc.) that affect the reported amounts of assets and liabilities at the date of the financial statements, income and expenses during the reporting period and the related disclosures. Although our estimates contemplate current conditions and how we expect them to change in the future, it is reasonably possible that actual conditions could be worse than anticipated in those estimates, which could materially affect our results of operations and financial condition. Management has made significant estimates in several areas, including:

- allowance for credit losses (Note 5 (Loans and Related Allowance for Credit Losses));
- valuations of residential mortgage servicing rights (MSRs) (Note 6 (Mortgage Banking Activities) and Note 13 (Securitizations and Variable Interest Entities));
- valuations of financial instruments (Note 12 (Fair Values of Assets and Liabilities));
- liabilities for contingent litigation losses (Note 10 (Legal Actions));
- income taxes; and
- goodwill impairment (Note 7 (Intangible Assets and Other Assets)).

Actual results could differ from those estimates.

These unaudited interim financial statements reflect all adjustments that are, in the opinion of management, necessary for a fair statement of the results for the periods presented. These adjustments are of a normal recurring nature, unless otherwise disclosed in this Form 10-Q. The results of operations in the interim financial statements do not necessarily indicate the results that may be expected for the full year. The interim financial information should be read in conjunction with our 2022 Form 10-K.

Accounting Standards Adopted in 2023

In 2023, we adopted the following new accounting guidance:

- Accounting Standards Update (ASU) 2022-02, Financial Instruments – Credit Losses (Topic 326): *Troubled Debt Restructurings and Vintage Disclosures*
- ASU 2022-01, Derivatives and Hedging (Topic 815): *Fair Value Hedging – Portfolio Layer Method*
- ASU 2021-08, Business Combinations (Topic 805): *Accounting for Contract Assets and Contract Liabilities from Contracts with Customers*
- ASU 2018-12, Financial Services – Insurance (Topic 944): *Targeted Improvements to the Accounting for Long-Duration Contracts* and subsequent related updates

ASU 2022-02 eliminates the accounting and reporting for troubled debt restructurings (TDRs) by creditors and introduces new required disclosures for loan modifications made to borrowers experiencing financial difficulty. The new required disclosures include information about modifications granted to borrowers experiencing financial difficulty in the form of principal forgiveness, interest rate reductions, other-than-insignificant payment delays, term extensions, or a combination of these modifications. The ASU also requires new disclosures for the financial effects of these modifications and for loan performance in the twelve months following the modification. The Update also amends the guidance for vintage disclosures to require disclosure of current period gross charge-offs by year of origination. See Note 5 (Loans and Related Allowance for Credit Losses) for additional information related to the new disclosures for loan modifications to borrowers experiencing financial difficulty and for gross charge-offs by year of origination, which are provided on a prospective basis.

The Update eliminates the requirement to use a discounted cash flow (DCF) approach to measure the allowance for credit losses (ACL) for TDRs and instead allows for the use of a current expected credit loss approach for all loans. Under a current expected credit loss approach, the impact of loan modifications and the subsequent performance of modified loans, including defaults, is reflected in the historical loss data used to calculate expected lifetime credit losses. Upon adoption on January 1, 2023, we discontinued utilizing a DCF approach to measure credit impairment for consumer loans and certain commercial loans previously modified in a TDR and we removed the interest concession component recognized in the ACL. We elected to apply the modified-retrospective transition approach method, resulting in a cumulative effect adjustment to retained earnings upon adoption, which reflects the difference between the pre-modification and post-modification effective interest rates that would have been recognized over the remaining life of the loans as interest income. Upon adoption, we recognized a decrease in our ACL of $429 million, pre-tax, and an increase to our retained earnings of $323 million, after tax. We continue to use a DCF approach for certain non-accruing, non-collateral dependent commercial loans.

ASU 2022-01 establishes the portfolio layer method, which expands an entity's ability to achieve fair value hedge accounting for interest rate risk hedges of closed portfolios of financial assets. The Update also provides guidance on the accounting for hedged item basis adjustments under the portfolio layer method.

We adopted ASU 2022-01 on January 1, 2023 on a prospective basis. No cumulative effect adjustment to the opening balance of stockholders' equity was required upon adoption, as impacts to us were reflected prospectively. The portfolio layer method improves our ability to use derivatives to hedge interest rate risk exposures associated with portfolios of financial assets, such as fixed-rate available-for-sale (AFS) debt securities and loans. The Update allows us to hedge a larger proportion of these portfolios by expanding the number and type of derivatives permitted as eligible hedges, as well as by increasing the scope of eligible hedged items to include both prepayable and nonprepayable assets. Unlike other fair value hedging relationships where basis adjustments adjust the carrying amount of the individual hedged item, basis adjustments related to active portfolio layer method hedges are maintained at a portfolio level and not allocated to the individual assets in the portfolio.

Upon adoption, any election to designate portfolio layer method hedges is applied prospectively. Additionally, the Update permits a one-time reclassification of debt securities from held-to-maturity (HTM) to AFS classification as long as the securities are designated in a portfolio layer method hedge no later than 30 days after the adoption date.

In January 2023, we reclassified fixed-rate debt securities with an aggregate fair value of $23.2 billion and amortized cost of $23.9 billion from HTM to AFS and designated interest rate swaps with notional amounts of $20.1 billion as fair value hedges using the portfolio layer method. The transfer of debt securities was recorded at fair value and resulted in approximately $566 million of unrealized losses associated with AFS debt securities being recorded to other comprehensive income, net of deferred taxes.

See Note 3 (Available-for-Sale and Held-to-Maturity Debt Securities) for additional information about the Company's portfolio layer method hedge basis adjustments and HTM to AFS transfers in connection with adoption of the Update and Note 11 (Derivatives) for disclosures regarding our portfolio layer method hedging relationships.

ASU 2021-08 amends Accounting Standards Codification (ASC) 805 – Business Combinations to require entities to recognize and measure contract assets and contract liabilities in a business combination in accordance with ASC 606 – Revenue Recognition. Prior to ASU 2021-08, there was diversity in practice related to recognition treatment, and acquirers generally measured such items at acquisition date fair value. We adopted this Update prospectively on January 1, 2023. This Update did not have a material impact to our consolidated financial statements.

ASU 2018-12 changes the accounting for long-duration insurance contracts or contract features that provide benefits to the policyholder in addition to the policyholder's account value. These features, which the ASU defines as market risk benefits, protect the policyholder to some degree from capital markets risk and expose the insurer or reinsurer to that risk. The ASU requires all market risk benefits to be measured at fair value through earnings with changes in fair value attributable to our own credit risk recognized in other comprehensive income. We reinsure certain variable annuity products for a limited number of insurance clients with guaranteed minimum benefits which are accounted for as market risk benefits under the ASU. Our reinsurance business is no longer entering into new contracts.

We utilize a discounted cash flow model to value our market risk benefits. Market risk benefits are level 3 fair value liabilities because they are valued using significant unobservable inputs. The fair value of our market risk benefits is sensitive to changes in fixed income and equity markets, as well as policyholder behavior (e.g., withdrawals, lapses, utilization rate) and changes in mortality assumptions. Beginning first quarter 2023, we use derivative instruments, where feasible, to economically hedge the interest rate and equity markets volatility. The fair value of market risk benefits is measured at the contract level and is recognized in accrued expenses and other liabilities. We recognize changes in fair value for our market risk benefits, excluding the change in fair value related to our own credit risk, in noninterest income along with the changes in fair value of economic hedges. Changes in fair value attributable to our own credit risk are recorded in other comprehensive income. Upon adoption on January 1, 2023, as required under the ASU, we implemented the accounting changes for market risk benefits retrospectively, to the earliest period presented, which resulted in an after-tax cumulative effect adjustment to reduce retained earnings and accumulated other comprehensive income by $176 million and $44 million, respectively, as of January 1, 2022.

The ASU also requires more frequent updates for insurance assumptions, mandates the use of a standardized discount rate for traditional long-duration contracts, and simplifies the amortization of deferred acquisition costs. The accounting changes for the liability of future policyholder benefits for traditional long-duration contracts (included in accrued expenses and other liabilities) and deferred acquisition costs (included in other assets) did not have a material impact upon adoption.

Table 1.1 presents the impact of adoption to prior period financial statement line items within our consolidated statement of income and consolidated balance sheet for the three and six months ended June 30, 2022, and as of December 31, 2022. These adjustments are also reflected in our consolidated statement of changes in equity and consolidated statement of cash flows.

Table 1.1: Impact of Adoption of ASU 2018-12

($ in millions, except per share amounts)	Quarter ended June 30, 2022 As reported	Effect of adoption	As revised	Six months ended June 30, 2022 As reported	Effect of adoption	As revised

Supplemental Cash Flow Information

Significant noncash activities are presented in Table 1.3.

Table 1.3: Supplemental Cash Flow Information

(in millions)	Six months ended June 30, **2023**	2022
Available-for-sale debt securities purchased from securitization of LHFS	**$ —**	1,506
Held-to-maturity debt securities purchased from securitization of LHFS	**48**	693
Transfers from loans to LHFS	**850**	4,970
Transfers from available-for-sale debt securities to held-to-maturity debt securities	**3,687**	43,041
Transfers from held-to-maturity debt securities to available-for-sale debt securities (1)	**23,919**	—

(1) In first quarter 2023, we reclassified HTM debt securities to AFS debt securities in connection with the adoption of ASU 2022-01.

Subsequent Events

We have evaluated the effects of events that have occurred subsequent to June 30, 2023, and except as disclosed in Note 9 (Preferred Stock), there have been no material events that would require recognition in our second quarter 2023 consolidated financial statements or disclosure in the Notes to the consolidated financial statements.

Note 2: Trading Activities

Table 2.1 presents a summary of our trading assets and liabilities measured at fair value through earnings.

Table 2.1: Trading Assets and Liabilities

(in millions)		Jun 30, 2023	Dec 31, 2022
Trading assets:			
Debt securities	$	**96,857**	86,155
Equity securities		**30,327**	26,910
Loans held for sale		**1,402**	1,466
Gross trading derivative assets		**67,120**	77,148
Netting (1)		**(49,435)**	(54,922)
Total trading derivative assets		**17,685**	22,226
Total trading assets		**146,271**	136,757
Trading liabilities:			
Short sale and other liabilities		**27,705**	20,304
Long-term debt		**1,600**	1,346
Gross trading derivative liabilities		**73,667**	77,698
Netting (1)		**(53,292)**	(59,232)
Total trading derivative liabilities		**20,375**	18,466
Total trading liabilities	$	**49,680**	40,116

(1) Represents balance sheet netting for trading derivative asset and liability balances, and trading portfolio level counterparty valuation adjustments.

Table 2.2 provides a summary of the net interest income earned from trading securities, and net gains and losses due to the realized and unrealized gains and losses from trading activities.

Net interest income also includes dividend income on trading securities and dividend expense on trading securities we have sold, but not yet purchased.

Table 2.2: Net Interest Income and Net Gains (Losses) from Trading Activities

		Quarter ended June 30,			Six months ended June 30,	
(in millions)		2023	2022		2023	2022
Interest income:						
Debt securities	$	**894**	549	$	**1,691**	1,097
Equity securities		**111**	139		**205**	259
Loans held for sale		**22**	9		**41**	20
Total interest income		**1,027**	697		**1,937**	1,376
Less: Interest expense		**161**	158		**304**	290
Net interest income		**866**	539		**1,633**	1,086
Net gains (losses) from trading activities (1):						
Debt securities		**(569)**	(3,103)		**902**	(6,751)
Equity securities		**1,650**	(3,606)		**3,339**	(4,430)
Loans held for sale		**13**	1		**25**	10
Long-term debt		**9**	11		**(21)**	23
Derivatives (2)		**19**	7,143		**(1,781)**	11,812
Total net gains from trading activities		**1,122**	446		**2,464**	664
Total trading-related net interest and noninterest income	$	**1,988**	985	$	**4,097**	1,750

(1) Represents realized gains (losses) from our trading activities and unrealized gains (losses) due to changes in fair value of our trading positions.
(2) Excludes economic hedging of mortgage banking and asset/liability management activities, for which hedge results (realized and unrealized) are reported with the respective hedged activities.

Note 3: Available-for-Sale and Held-to-Maturity Debt Securities

Table 3.1 provides the amortized cost, net of the allowance for credit losses (ACL) for debt securities, and fair value by major categories of available-for-sale (AFS) debt securities, which are carried at fair value, and held-to-maturity (HTM) debt securities, which are carried at amortized cost, net of the ACL. The net unrealized gains (losses) for AFS debt securities are reported as a component of accumulated other comprehensive income (AOCI), net of the ACL and applicable income taxes. Information on debt securities held for trading is included in Note 2 (Trading Activities).

Outstanding balances exclude accrued interest receivable on AFS and HTM debt securities, which are included in other assets. See Note 7 (Intangible Assets and Other Assets) for additional information on accrued interest receivable. Amounts considered to be uncollectible are reversed through interest income. The interest income reversed in the second quarter and first half of both 2023 and 2022 was insignificant.

Table 3.1: Available-for-Sale and Held-to-Maturity Debt Securities Outstanding

(in millions)		Amortized cost, net (1)	Gross unrealized gains	Gross unrealized losses	Net unrealized gains (losses)	Fair value
June 30, 2023

Other debt securities		1,727	—	(149)	(149)	1,578
Total held-to-maturity debt securities		297,059	39	(41,577)	(41,538)	255,521
Total	$	418,784	146	(49,815)	(49,669)	369,115

(1) Represents amortized cost of the securities, net of the ACL of $7 million and $6 million related to AFS debt securities at June 30, 2023, and December 31, 2022, respectively, and $76 million and $85 million related to HTM debt securities at June 30, 2023, and December 31, 2022, respectively.
(2) Includes investments in tax-exempt preferred debt securities issued by investment funds or trusts that predominantly invest in tax-exempt municipal securities. The amortized cost, net of the ACL, and fair value of these types of securities, was $4.9 billion at June 30, 2023, and $5.1 billion at December 31, 2022.
(3) Predominantly consists of commercial mortgage-backed securities at both June 30, 2023, and December 31, 2022.
(4) Represents fair value hedge basis adjustments related to active portfolio layer method hedges of AFS debt securities, which are not allocated to individual securities in the portfolio. For additional information, see Note 11 (Derivatives).

Table 3.2 details the breakout of purchases of and transfers to HTM debt securities by major category of security. The table excludes the transfer of HTM debt securities with a fair value of $23.2 billion to AFS debt securities in first quarter 2023 in connection with the adoption of ASU 2022-01, Derivatives and Hedging (Topic 815): *Fair Value Hedging – Portfolio Layer Method*. For additional information, see Note 1 (Summary of Significant Accounting Policies).

Table 3.2: Held-to-Maturity Debt Securities Purchases and Transfers

	Quarter ended June 30,		Six months ended June 30,	
(in millions)	**2023**	2022	**2023**	2022
Purchases of held-to-maturity debt securities (1):				
Securities of U.S. states and political subdivisions	$ **—**	9	$ **—**	843
Federal agency mortgage-backed securities	**—**	—	**4,225**	2,051
Non-agency mortgage-backed securities	**22**	55	**48**	159
Total purchases of held-to-maturity debt securities	**22**	64	**4,273**	3,053
Transfers from available-for-sale debt securities to held-to-maturity debt securities (2):				
Federal agency mortgage-backed securities	**—**	28,390	**3,687**	43,041
Total transfers from available-for-sale debt securities to held-to-maturity debt securities	$ **—**	28,390	$ **3,687**	43,041

(1) Inclusive of securities purchased but not yet settled and noncash purchases from securitization of loans held for sale (LHFS).
(2) Represents fair value as of the date of the transfers. Debt securities transferred from available-for-sale to held-to-maturity had pre-tax unrealized losses recorded in AOCI of $0 and $320 million in the second quarter and first half of 2023, respectively, and $3.5 billion and $3.9 billion in the second quarter and first half of 2022, respectively, at the time of the transfers.

Table 3.3 shows the composition of interest income, provision for credit losses, and gross realized gains and losses from sales and impairment write-downs included in earnings related to AFS and HTM debt securities (pre-tax).

Table 3.3: Income Statement Impacts for Available-for-Sale and Held-to-Maturity Debt Securities

Held-to-maturity	**(1)**	(1)	**(9)**	(14)
Total provision for credit losses	**(1)**	2	**(48)**	(10)
Realized gains and losses (2):				
Gross realized gains	**6**	247	**6**	249
Gross realized losses	**(2)**	(104)	**(2)**	(104)
Net realized gains	$ **4**	143	$ **4**	145

(1) Excludes interest income from trading debt securities, which is disclosed in Note 2 (Trading Activities).
(2) Realized gains and losses relate to AFS debt securities. There were no realized gains or losses from HTM debt securities in all periods presented.

Credit Quality

We monitor credit quality of debt securities by evaluating various attributes and utilize such information in our evaluation of the appropriateness of the ACL for debt securities. The credit quality indicators that we most closely monitor include credit ratings and delinquency status and are based on information as of our financial statement date.

CREDIT RATINGS Credit ratings express opinions about the credit quality of a debt security. We determine the credit rating of a security according to the lowest credit rating made available by national recognized statistical rating organizations (NRSROs). Debt securities rated investment grade, that is those with ratings similar to BBB-/Baa3 or above, as defined by NRSROs, are generally considered by the rating agencies and market participants to be low credit risk. Conversely, debt securities rated below investment grade, labeled as "speculative grade" by the rating agencies, are considered to be distinctively higher credit risk than investment grade debt securities. For debt securities not rated by NRSROs, we determine an internal credit grade of the debt securities (used for credit risk management purposes) equivalent to the credit ratings assigned by major credit agencies. Substantially all of our debt securities were rated by NRSROs at June 30, 2023, and December 31, 2022.

Table 3.4 shows the percentage of fair value of AFS debt securities and amortized cost of HTM debt securities determined to be rated investment grade, inclusive of securities rated based on internal credit grades.

Table 3.4: Investment Grade Debt Securities

		Available-for-Sale			Held-to-Maturity
($ in millions)		Fair value	% investment grade		Amortized cost	% investment grade
June 30, 2023					
Total portfolio (1)	**$**	**134,251**	**99%**	**$**	**272,436**	**99%**

December 31, 2022						
Total portfolio (1)	$	113,594	99%	$	297,144	99%
Breakdown by category:						
Securities of U.S. Treasury and federal agencies (2)	$	93,422	100%	$	233,169	100%
Securities of U.S. states and political subdivisions		10,445	99		31,000	100
Collateralized loan obligations (3)		3,981	100		29,972	100
All other debt securities (4)		5,746	89		3,003	63

(1) 99% were rated AA- and above at both June 30, 2023, and December 31, 2022.
(2) Includes federal agency mortgage-backed securities.
(3) 100% were rated AA- and above at both June 30, 2023, and December 31, 2022.
(4) Includes non-U.S. government, non-agency mortgage-backed, and all other debt securities.

DELINQUENCY STATUS AND NONACCRUAL DEBT SECURITIES Debt security issuers that are delinquent in payment of amounts due under contractual debt agreements have a higher probability of recognition of credit losses. As such, as part of our monitoring of the credit quality of the debt security portfolio, we consider whether debt securities we own are past due in payment of principal or interest payments and whether any securities have been placed into nonaccrual status.

Debt securities that are past due and still accruing or in nonaccrual status were insignificant at both June 30, 2023, and December 31, 2022. Net charge-offs on debt securities were insignificant in the second quarter and first half of both 2023 and 2022.

Purchased debt securities with credit deterioration (PCD) are not considered to be in nonaccrual status, as payments from issuers of these securities remain current. PCD securities were insignificant in the second quarter and first half of both 2023 and 2022.

Unrealized Losses of Available-for-Sale Debt Securities

Table 3.5 shows the gross unrealized losses and fair value of AFS debt securities by length of time those individual securities in each category have been in a continuous loss position. Debt securities on which we have recorded credit impairment are categorized as being "less than 12 months" or "12 months or more" in a continuous loss position based on the point in time that the fair value declined to below the amortized cost basis, net of allowance for credit losses.

Table 3.5: Gross Unrealized Losses and Fair Value – Available-for-Sale Debt Securities

	Less than 12 months		12 months or more		Total	
(in millions)	Gross unrealized losses (1)	Fair value	Gross unrealized losses (1)	Fair value	Gross unrealized losses (1)	Fair value

(1) Excludes portfolio level basis adjustments.

We have assessed each debt security with gross unrealized losses included in the previous table for credit impairment. As part of that assessment we evaluated and concluded that we do not intend to sell any of the debt securities, and that it is more likely than not that we will not be required to sell, prior to recovery of the amortized cost basis. We evaluate, where necessary, whether credit impairment exists by comparing the present value of the expected cash flows to the debt securities' amortized cost basis. Credit impairment is recorded as an ACL for debt securities.

For descriptions of the factors we consider when analyzing debt securities for impairment as well as methodology and significant inputs used to measure credit losses, see Note 1 (Summary of Significant Accounting Policies) in our 2022 Form 10-K.

Contractual Maturities

Table 3.6 and Table 3.7 show the remaining contractual maturities, amortized cost, net of the ACL, fair value and weighted average effective yields of AFS and HTM debt securities, respectively. The remaining contractual principal maturities for mortgage-backed securities (MBS) do not consider prepayments. Remaining expected maturities will differ from contractual maturities because borrowers may have the right to prepay obligations before the underlying mortgages mature.

Table 3.6: Contractual Maturities – Available-for-Sale Debt Securities

By remaining contractual maturity ($ in millions)	Total	Within one year	After one year through five years	After five years through ten years	After ten years

Total equity securities not held for trading		**37,144**	37,504
Total equity securities	$	**67,471**	64,414

(1) Represents securities economically hedged with equity derivatives.
(2) Represents securities held as part of our customer accommodation trading activities. For additional information on these activities, see Note 2 (Trading Activities).
(3) See Note 13 (Securitizations and Variable Interest Entities) for information about tax credit investments.
(4) Represents nonmarketable equity securities accounted for under the measurement alternative, which were predominantly securities associated with our affiliated venture capital business.
(5) Includes $3.5 billion of investments in Federal Reserve Bank stock at both June 30, 2023, and December 31, 2022, and $1.0 billion and $1.4 billion of investments in Federal Home Loan Bank stock at June 30, 2023, and December 31, 2022, respectively.

Net Gains and Losses Not Held for Trading

Table 4.2 provides a summary of the net gains and losses from equity securities not held for trading, which excludes equity method adjustments for our share of the investee's earnings or losses that are recognized in other noninterest income. Gains and losses for securities held for trading are reported in net gains from trading and securities.

Table 4.2: Net Gains (Losses) from Equity Securities Not Held for Trading

		Quarter ended June 30,			Six months ended June 30,	
(in millions)		**2023**	2022		**2023**	2022
Net gains (losses) from equity securities carried at fair value:						
Marketable equity securities	$	**63**	(226)	$	**26**	(228)
Nonmarketable equity securities		**(15)**	(16)		**(16)**	(38)
Total equity securities carried at fair value		**48**	(242)		**10**	(266)
Net gains (losses) from nonmarketable equity securities not carried at fair value (1):						
Impairment write-downs		**(175)**	(576)		**(665)**	(1,014)

Gross unrealized gains from observable price changes	**$ 7,225**	7,141
Gross unrealized losses from observable price changes	**(44)**	(14)
Impairment write-downs	**(3,435)**	(2,896)

Note 5: Loans and Related Allowance for Credit Losses

Table 5.1 presents total loans outstanding by portfolio segment and class of financing receivable. Outstanding balances include unearned income, net deferred loan fees or costs, and unamortized discounts and premiums. These amounts were less than 1% of our total loans outstanding at both June 30, 2023, and December 31, 2022.

Outstanding balances exclude accrued interest receivable on loans, except for certain revolving loans, such as credit card loans. See Note 7 (Intangible Assets and Other Assets) for additional information on accrued interest receivable. Amounts considered to be uncollectible are reversed through interest income. During the first half of 2023, we reversed accrued interest receivable of $19 million for our commercial portfolio segment and $118 million for our consumer portfolio segment, compared with $20 million and $65 million, respectively, for the same period a year ago.

Table 5.1: Loans Outstanding

(in millions)		Jun 30, 2023	Dec 31, 2022
Commercial and industrial	$	**386,011**	386,806
Commercial real estate		**154,276**	155,802
Lease financing		**15,334**	14,908
Total commercial		**555,621**	557,516
Residential mortgage		**265,085**	269,117
Credit card		**47,717**	46,293
Auto		**51,587**	53,669
Other consumer		**27,950**	29,276
Total consumer		**392,339**	398,355
Total loans	$	**947,960**	955,871

Our non-U.S. loans are reported by respective class of financing receivable in the table above. Substantially all of our non-U.S. loan portfolio is commercial loans. Table 5.2 presents total non-U.S. commercial loans outstanding by class of financing receivable.

Table 5.2: Non-U.S. Commercial Loans Outstanding

(in millions)		Jun 30, 2023	Dec 31, 2022
Commercial and industrial	$	**75,081**	78,981
Commercial real estate		**7,539**	7,619
Lease financing		**710**	670
Total non-U.S. commercial loans	$	**83,330**	87,270

Loan Purchases, Sales, and Transfers

Table 5.3 presents the proceeds paid or received for purchases and sales of loans and transfers from loans held for investment to mortgages/loans held for sale. The table excludes loans for which we have elected the fair value option and government insured/guaranteed residential mortgage – first lien loans because their loan activity normally does not impact the ACL.

Table 5.3: Loan Purchases, Sales, and Transfers

			2023			2022
(in millions)	Commercial	Consumer	Total	Commercial	Consumer	Total
Quarter ended June 30,						
Purchases	$ **195**	**301**	**496**	276	2	278
Sales and net transfers (to)/from LHFS	**(568)**	**(99)**	**(667)**	(751)	(14)	(765)
Six months ended June 30,						
Purchases	$ **611**	**304**	**915**	376	2	378
Sales and net transfers (to)/from LHFS	**(1,683)**	**(100)**	**(1,783)**	(1,312)	(23)	(1,335)

Unfunded Credit Commitments

Unfunded credit commitments are legally binding agreements to lend to customers with terms covering usage of funds, contractual interest rates, expiration dates, and any required collateral. Our commercial lending commitments include, but are not limited to, (i) commitments for working capital and general corporate purposes, (ii) financing to customers who warehouse financial assets secured by real estate, consumer, or corporate loans, (iii) financing that is expected to be syndicated or replaced with other forms of long-term financing, and (iv) commercial real estate lending. We also originate multipurpose lending commitments under which commercial customers have the option to draw on the facility in one of several forms, including the issuance of letters of credit, which reduces the unfunded commitment amounts of the facility.

The maximum credit risk for these commitments will generally be lower than the contractual amount because these commitments may expire without being used or may be cancelled at the customer's request. We may reduce or cancel lines of credit in accordance with the contracts and applicable law. Our credit risk monitoring activities include managing the amount of commitments, both to individual customers and in total, and the size and maturity structure of these commitments. We do not recognize an ACL for commitments that are unconditionally cancellable at our discretion.

We issue commercial letters of credit to assist customers in purchasing goods or services, typically for international trade. At June 30, 2023, and December 31, 2022, we had $1.2 billion and $1.8 billion, respectively, of outstanding issued commercial letters of credit. See Note 14 (Guarantees and Other Commitments) for additional information on issued standby letters of credit.

We may be a fronting bank, whereby we act as a representative for other lenders, and advance funds or provide for the issuance of letters of credit under syndicated loan or letter of credit agreements. Any advances are generally repaid in less than a week and would normally require default of both the customer and another lender to expose us to loss.

The contractual amount of our unfunded credit commitments, including unissued letters of credit, is summarized in Table 5.4. The table is presented net of commitments syndicated to others, including the fronting arrangements described above, and excludes issued letters of credit and discretionary amounts where our approval or consent is required prior to any loan funding or commitment increase.

Table 5.4: Unfunded Credit Commitments

(in millions)	Jun 30, 2023	Dec 31, 2022
Commercial and industrial (1)	$ **385,949**	388,504
Commercial real estate	**25,348**	29,518
Total commercial	**411,297**	418,022
Residential mortgage (2)	**34,668**	39,155
Credit card	**157,271**	145,526
Other consumer (3)	**78,032**	69,244
Total consumer	**269,971**	253,925
Total unfunded credit commitments	$ **681,268**	671,947

(1) Effective first quarter 2023, unfunded credit commitments exclude discretionary amounts where our approval or consent is required prior to any loan funding or commitment increase. Prior period balances have been revised to conform with the current period presentation.
(2) Includes lines of credit totaling $31.9 billion and $35.5 billion as of June 30, 2023, and December 31, 2022, respectively.
(3) Predominantly includes securities-based lines of credit.

Allowance for Credit Losses

Table 5.5 presents the allowance for credit losses (ACL) for loans, which consists of the allowance for loan losses and the allowance for unfunded credit commitments. The ACL for loans increased $1.2 billion from December 31, 2022, reflecting increases for commercial real estate loans, primarily office loans, as well as for increases in credit card loan balances, partially offset by a decrease for residential mortgage loans related to the adoption of ASU 2022-02, Financial Instruments – Credit Losses (Topic 326): *Troubled Debt Restructurings and Vintage Disclosures.*

Table 5.5: Allowance for Credit Losses for Loans

Credit Quality

We monitor credit quality by evaluating various attributes and utilize such information in our evaluation of the appropriateness of the ACL for loans. The following sections provide the credit quality indicators we most closely monitor. The credit quality indicators are generally based on information as of our financial statement date.

COMMERCIAL CREDIT QUALITY INDICATORS We manage a consistent process for assessing commercial loan credit quality. Commercial loans are generally subject to individual risk assessment using our internal borrower and collateral quality ratings, which is our primary credit quality indicator. Our ratings are aligned to regulatory definitions of pass and criticized categories with the criticized segmented among special mention, substandard, doubtful and loss categories.

Table 5.7 provides the outstanding balances of our commercial loan portfolio by risk category and credit quality information by origination year for term loans. Revolving loans may convert to term loans as a result of a contractual provision in the original loan agreement or if modified for a borrower experiencing financial difficulty. At June 30, 2023, we had $526.6 billion and $29.0 billion of pass and criticized commercial loans, respectively. Gross charge-offs by loan class are included in the following table for the six months ended June 30, 2023, which we monitor as part of our credit risk management practices; however, charge-offs are not a primary credit quality indicator for our loan portfolio.

CONSUMER CREDIT QUALITY INDICATORS We have various classes of consumer loans that present unique credit risks. Loan delinquency, Fair Isaac Corporation (FICO) credit scores and loan-to-value (LTV) for residential mortgage loans are the primary credit quality indicators that we monitor and utilize in our evaluation of the appropriateness of the ACL for the consumer loan portfolio segment. Gross charge-offs by loan class are included in the following tables for the six months ended June 30, 2023, which we monitor as part of our credit risk management practices; however, charge-offs are not a primary credit quality indicator for our loan portfolio.

Many of our loss estimation techniques used for the ACL for loans rely on delinquency-based models; therefore, delinquency is an important indicator of credit quality in the establishment of our ACL for consumer loans. Credit quality information is provided with the year of origination for term loans. Revolving loans may convert to term loans as a result of a contractual provision in the original loan agreement or if modified for a borrower experiencing financial difficulty.

We obtain FICO scores at loan origination and the scores are generally updated at least quarterly, except in limited circumstances, including compliance with the Fair Credit Reporting Act (FCRA). FICO scores are not available for certain loan types or may not be required if we deem it unnecessary due to strong collateral and other borrower attributes.

Table 5.9 provides the outstanding balances of our residential mortgage loans by our primary credit quality indicators.

LTV refers to the ratio comparing the loan's outstanding balance to the property's collateral value. Combined LTV (CLTV) refers to the combination of first lien mortgage and junior lien mortgage (including unused line amounts for credit line products) ratios. We obtain LTVs and CLTVs using a cascade approach which first uses values provided by automated valuation models (AVMs) for the property. If an AVM is not available, then the value is estimated using the original appraised value adjusted by the change in Home Price Index (HPI) for the property location. If an HPI is not available, the original appraised value is used. The HPI value is normally the only method considered for high value properties, generally with an original value of $1 million or more, as the AVM values have proven less accurate for these properties. Generally, we obtain available LTVs and CLTVs on a quarterly basis. Certain loans do not have an LTV or CLTV due to a lack of industry data availability and portfolios acquired from or serviced by other institutions.

(1) Government insured or guaranteed loans represent loans whose repayments are predominantly insured by the Federal Housing Administration (FHA) or guaranteed by the Department of Veterans Affairs (VA). Loans insured/guaranteed by the FHA/VA and 90+ DPD totaled $2.8 billion and $3.2 billion at June 30, 2023, and December 31, 2022, respectively.
(2) Reflects total loan balances with LTV/CLTV amounts in excess of 100%. In the event of default, the loss content would generally be limited to only the amount in excess of 100% LTV/CLTV.

Table 5.10 provides the outstanding balances of our credit card loan portfolio by primary credit quality indicators.

The revolving loans converted to term loans in the credit card loan category represent credit card loans with modified terms that require payment over a specific term.

For the six months ended June 30, 2023, we had gross charge-offs in the credit card portfolio of $861 million for revolving loans and $43 million for revolving loans converted to term loans.

(1) Nonaccrual loans may not have an allowance for credit losses if the loss expectations are zero given the related collateral value.

LOANS IN PROCESS OF FORECLOSURE Our recorded investment in consumer mortgage loans collateralized by residential real estate property that are in process of foreclosure was $883 million and $1.0 billion at June 30, 2023, and December 31, 2022, respectively, which included $656 million and $771 million, respectively, of loans that are government insured/guaranteed. Under the Consumer Financial Protection Bureau guidelines, we do not commence the foreclosure process on residential mortgage loans until after the loan is 120 days delinquent. Foreclosure procedures and timelines vary depending on whether the property address resides in a judicial or non-judicial state. Judicial states require the foreclosure to be processed through the state's courts while non-judicial states are processed without court intervention. Foreclosure timelines vary according to state law.

LOANS 90 DAYS OR MORE PAST DUE AND STILL ACCRUING Certain loans 90 days or more past due are still accruing, because they are (1) well-secured and in the process of collection or (2) residential mortgage or consumer loans exempt under regulatory rules from being classified as nonaccrual until later delinquency, usually 120 days past due.

Table 5.14 shows loans 90 days or more past due and still accruing by class for loans not government insured/guaranteed.

Table 5.14: Loans 90 Days or More Past Due and Still Accruing

(in millions)	**Jun 30, 2023**	Dec 31, 2022

(1) Represents loans whose repayments are predominantly insured by the FHA or guaranteed by the VA.

LOAN MODIFICATIONS TO BORROWERS EXPERIENCING FINANCIAL DIFFICULTY We may agree to modify the contractual terms of a loan to a borrower experiencing financial difficulty.

Our commercial loan modifications may include principal forgiveness, interest rate reductions, payment delays, term extensions, or a combination of these modifications. Commercial loan term extensions have terms that vary based on the borrower's request and are evaluated by our credit teams on an individual basis.

Our consumer loan modifications vary based upon the loan product and the modification program offered to the borrower, and may include interest rate reductions, payment delays, term extensions, principal forbearance or forgiveness, or a combination of these modifications. Generally, our consumer loan modification programs modify the loan terms to achieve payment terms that are more affordable to the borrower and, as a result, increase the likelihood of full repayment of principal and interest.

Our residential mortgage loan modification programs may offer a short-term payment deferral based upon the borrower's demonstrated hardship, up to 12 months. If additional assistance is needed after 12 months, the borrower may request another loan modification. Modifications may also include a trial payment period of three months to determine if the borrower can perform in accordance with the proposed permanent loan modification terms. Loans in a trial payment period continue to advance through delinquency status and accrue interest according to their original terms. Loans in a trial payment period are excluded from our loan modification disclosures until the borrower has successfully completed the trial period and the loan modification is formally executed. Residential mortgage loans in a trial payment period totaled $132 million at June 30, 2023.

Credit card loan modifications result in a reduction in the credit card interest rate and may be offered on a short-term or long-term basis. A short-term interest rate reduction program reduces the borrower's interest rate for 12 months. A long-term interest rate reduction program provides a reduction of the interest rate over a fixed five-year term. During the modification period, the borrower's revolving charge privileges are revoked.

Auto loan modifications generally include insignificant (e.g., three months or less) payment deferrals over the loan term.

The following disclosures provide information on loan modifications granted to borrowers experiencing financial difficulty in the form of principal forgiveness, interest rate reductions, other-than-insignificant (e.g., greater than three months) payment delays, term extensions or a combination of these modifications, as well as the financial effects of these modifications, and loan performance in the twelve months following the modification. Loans that both modify and are paid off or charged-off during the period, resulting in an amortized cost balance of zero at the end of the period, are not included in the disclosures below. Additionally, where amortized cost balances are presented below, accrued interest receivable is excluded. See Note 7 (Intangible Assets and Other Assets) for additional information on accrued interest receivable. Borrowers experiencing financial difficulty with modified terms mandated by a bankruptcy court are considered contractually modified loans and are included in these disclosures. These disclosures do not include loans discharged by a bankruptcy court as the only concession, which were insignificant for the second quarter and first half of 2023.

Table 5.15 presents the amortized cost of modified commercial loans by class of financing receivable and by modification type.

Table 5.15: Commercial Loan Modifications

		Modification type (1)						
($ in millions)		Interest rate reduction	Payment delay	Term extension	Term extension & payment delay	All other modifications and combinations	Total	Modifications as a % of loan class

Commercial real estate	0.71	34	7
Six months ended June 30, 2023			
Commercial and industrial	12.62 %	9	7
Commercial real estate	3.47	15	10

Note 5: Loans and Related Allowance for Credit Losses *(continued)*

Commercial loans that received a modification during the second quarter and first half of 2023, and subsequently defaulted were insignificant. Defaults that occur on commercial modifications are reported based on a payment default definition of 90 days past due.

Table 5.15b provides past due information for modified commercial loans. For loan modifications that include a payment deferral, payment performance is not included in the table below until the loan exits the deferral period and payments resume. The table also includes the amount of gross charge-offs that occurred during the second quarter and first half of 2023, inclusive of charge-offs to loans with no amortized cost remaining at period end.

Table 5.15b: Payment Performance of Commercial Loan Modifications

		By delinquency status				Gross charge-offs

Total consumer	$	245	476	41	36	54	53	3	908	0.23

(1) Includes residential mortgage loan modifications that defer a set amount of principal to the end of the loan term.
(2) Includes principal forgiveness and other combinations of modifications.

Table 5.16a presents the financial effects of modifications made to consumer loans by class of financing receivable.

Table 5.16a: Financial Effects of Consumer Loan Modifications (1)

	Weighted average interest rate reduction	Weighted average payments deferred (months)	Weighted average term extension (years)
Quarter ended June 30, 2023			
Residential mortgage (2)	1.55 %	4	9.4
Credit card	22.17	N/A	N/A
Auto	3.86	6	N/A
Other consumer	12.15	3	10.9
Six months ended June 30, 2023			
Residential mortgage (2)	1.57 %	4	9.8
Credit card	21.92	N/A	N/A
Auto	3.94	6	N/A
Other consumer	11.69	4	2.7

(1) Principal forgiven was insignificant for the quarter and six months ended June 30, 2023.
(2) Excludes the financial effects of residential mortgage loans with a set amount of principal deferred to the end of the loan term. The weighted average period of principal deferred was 26.8 years for the quarter ended June 30, 2023, and 27.0 years for the six months ended June 30, 2023.

Consumer loans that received a modification during the second quarter and first half of 2023, and subsequently defaulted during the respective period totaled $141 million and $158 million, respectively, and predominantly related to payment delay modifications in the residential mortgage loan portfolio. Defaults that occur on consumer modifications are reported based on a payment default definition of 60 days past due.

Table 5.16b provides past due information for modified consumer loans. For loan modifications that include a payment delay, payment performance is not included in the table below until the loan exits the deferral period and payments resume. The table also includes the amount of gross charge-offs that occurred during the second quarter and first half of 2023, inclusive of charge-offs to loans with no amortized cost remaining at period end.

Table 5.16b: Payment Performance of Consumer Loan Modifications

	By delinquency status				Gross charge-offs	
(in millions)	Current-29 days past due (DPD)	30-89 DPD	90+ DPD	Total	Quarter ended	Six months ended
June 30, 2023						
Residential mortgage (1)	$ 283	45	139	467	2	3
Credit card (2)	167	36	27	230	16	20
Auto	14	1	—	15	—	—
Other consumer	18	2	1	21	1	1
Total	$ 482	84	167	733	19	24

(1) Includes loans that were past due prior to entering a payment delay modification. Delinquency advancement is paused during the deferral period and resumes upon exit.
(2) Credit card loans that are past due at the time of the modification do not become current until they have three months of consecutive payment performance.

Commitments to lend additional funds on commercial loans that were modified during the six months ended June 30, 2023, were $82 million, substantially all of which were in the commercial and industrial portfolio. Commitments to lend additional funds on consumer loans that were modified during the six months ended June 30, 2023, were insignificant.

TROUBLED DEBT RESTRUCTURINGS (TDRs) In January 2023, we adopted ASU 2022-02, which eliminated the accounting and reporting guidance for TDRs. For additional information, see Note 1 (Summary of Significant Accounting Policies). The following disclosures present TDR information for the periods ended December 31, 2022, and June 30, 2022. When, for economic or legal reasons related to a borrower's financial difficulties, we grant a concession for other than an insignificant period of time to a borrower that we would not otherwise consider, the related loan is classified as a TDR, the balance of which totaled $9.2 billion at December 31, 2022. We do not consider loan resolutions such as foreclosure or short sale to be a TDR. In addition, COVID-19-related modifications are generally not classified as TDRs due to the relief under the CARES Act and the Interagency Statement. For additional information on the TDR relief, see Note 1 (Summary of Significant Accounting Policies) in our 2022 Form 10-K.

We may require some consumer borrowers experiencing financial difficulty to make trial payments, generally for a period of three to four months, according to the terms of a planned permanent modification, to determine if they can perform according to those terms. These arrangements represent trial modifications, which we classified and accounted for as TDRs through December 31, 2022, prior to the adoption of ASU 2022-02. While loans are in trial payment programs, their original terms are not considered modified and they continue to advance through delinquency status and accrue interest according to their original terms.

Commitments to lend additional funds on loans whose terms have been modified in a TDR amounted to $434 million at December 31, 2022.

Table 5.17 summarizes our TDR modifications by primary modification type and includes the financial effects of these modifications. For those loans that modify more than once, the table reflects each modification that occurred during the period. Loans that both modify and are paid off or written-off within the period, as well as changes in recorded investment during the period for loans modified in prior periods, are not included in the table.

Total commercial		—	24	214	238	—	5.27	24
Residential mortgage		1	195	686	882	3	1.58	195
Credit card		—	133	—	133	—	19.17	133
Auto		1	4	48	53	11	4.64	4
Other consumer		—	7	1	8	—	11.31	7
Trial modifications (5)		—	—	252	252	—	—	—
Total consumer		2	339	987	1,328	14	8.73	339
Total	$	2	363	1,201	1,566	14	8.50%	$ 363

(1) Amounts represent the recorded investment in loans after recognizing the effects of the TDR, if any. TDRs may have multiple types of concessions, but are presented only once in the first modification type based on the order presented in the table above. The reported amounts include loans remodified of $132 million for the quarter ended June 30, 2022, and $250 million for the first half of 2022.
(2) Other concessions include loans with payment (principal and/or interest) deferral, loans discharged in bankruptcy, loan renewals, term extensions and other interest and noninterest adjustments, but exclude modifications that also forgive principal and/or reduce the contractual interest rate. The reported amounts include loans that are new TDRs that may have COVID-19-related payment deferrals and exclude COVID-19-related payment deferrals on loans previously reported as TDRs given limited current financial effects other than payment deferral.
(3) Charge-offs include write-downs of the investment in the loan in the period it is contractually modified. The amount of charge-off will differ from the modification terms if the loan has been charged down prior to the modification based on our policies. In addition, there may be cases where we have a charge-off/down with no legal principal modification.
(4) Recorded investment related to interest rate reduction reflects the effect of reduced interest rates on loans with an interest rate concession as one of their concession types, which includes loans reported as a principal primary modification type that also have an interest rate concession.
(5) Trial modifications are granted a delay in payments due under the original terms during the trial payment period. However, these loans continue to advance through delinquency status and accrue interest according to their original terms. Any subsequent permanent modification generally includes interest rate related concessions; however, the exact concession type and resulting financial effect are usually not known until the loan is permanently modified. Trial modifications for the period are presented net of previously reported trial modifications that became permanent in the current period.

Table 5.18 summarizes permanent modification TDRs that defaulted during the period presented within 12 months of their permanent modification date. We are reporting these defaulted TDRs based on a payment default definition of 90 days past due for the commercial portfolio segment and 60 days past due for the consumer portfolio segment.

Table 5.18: Defaulted TDRs

		Recorded investment of defaults	
			June 30, 2022
(in millions)		Quarter ended	Six months ended

Other consumer		1	1
Total consumer		67	85
Total	$	78	147

Note 6: Mortgage Banking Activities

Mortgage banking activities consist of residential and commercial mortgage originations, sales and servicing.

We apply the amortization method to commercial MSRs and apply the fair value method to residential MSRs. The amortized cost of commercial MSRs was $1.1 billion and $1.2 billion, with an estimated fair value of $1.9 billion and $2.1 billion, at June 30, 2023 and 2022, respectively. Table 6.1 presents the changes in MSRs measured using the fair value method.

Table 6.1: Analysis of Changes in Fair Value MSRs

	Quarter ended June 30,		Six months ended June 30,	
(in millions)	**2023**	2022	**2023**	2022
Fair value, beginning of period	**$ 8,819**	8,511	**$ 9,310**	6,920
Originations/purchases	**47**	322	**95**	664
Sales and other (1)	**(606)**	(251)	**(599)**	(250)
Net additions	**(559)**	71	**(504)**	414
Changes in fair value:				
Due to valuation inputs or assumptions:				
Market interest rates (2)	**318**	949	**137**	2,648
Servicing and foreclosure costs (3)	**1**	(9)	**2**	(12)
Discount rates	**—**	31	**(25)**	86
Prepayment estimates and other (4)	**(3)**	(103)	**(23)**	(249)
Net changes in valuation inputs or assumptions	**316**	868	**91**	2,473
Changes due to collection/realization of expected cash flows (5)	**(325)**	(287)	**(646)**	(644)
Total changes in fair value	**(9)**	581	**(555)**	1,829
Fair value, end of period	**$ 8,251**	9,163	**$ 8,251**	9,163

(1) In second quarter 2022, MSRs decreased $244 million due to the sale of interest-only strips related to excess servicing cash flows from agency residential mortgage-backed securitizations.
(2) Includes prepayment rate changes as well as other valuation changes due to changes in market interest rates. To reduce exposure to changes in interest rates, MSRs are economically hedged with derivative instruments.
(3) Includes costs to service and unreimbursed foreclosure costs.
(4) Represents other changes in valuation model inputs or assumptions, including prepayment rate estimation changes that are independent of mortgage interest rate changes.
(5) Represents the reduction in the MSR fair value for the cash flows expected to be collected during the period, net of income accreted due to the passage of time.

Table 6.2 provides key weighted-average assumptions used in the valuation of residential MSRs and sensitivity of the current fair value of residential MSRs to immediate adverse changes in those assumptions. Amounts for residential MSRs include purchased servicing rights as well as servicing rights resulting from the transfer of loans. See Note 12 (Fair Values of Assets and Liabilities) for additional information on key assumptions for residential MSRs.

Table 6.2: Assumptions and Sensitivity of Residential MSRs

($ in millions, except cost to service amounts)	**Jun 30, 2023**	Dec 31, 2022
Fair value of interests held	**$ 8,251**	9,310
Expected weighted-average life (in years)	**6.2**	6.3
Key assumptions:		
Prepayment rate assumption (1)	**9.2 %**	9.4
Impact on fair value from 10% adverse change	**$ 249**	288
Impact on fair value from 25% adverse change	**595**	688
Discount rate assumption	**9.2 %**	9.1
Impact on fair value from 100 basis point increase	**$ 316**	368
Impact on fair value from 200 basis point increase	**608**	707
Cost to service assumption ($ per loan)	**102**	102
Impact on fair value from 10% adverse change	**159**	171
Impact on fair value from 25% adverse change	**397**	427

(1) Includes a blend of prepayment speeds and expected defaults. Prepayment speeds are influenced by mortgage interest rates as well as our estimation of drivers of borrower behavior.

The sensitivities in the preceding table are hypothetical and caution should be exercised when relying on this data. Changes in value based on variations in assumptions generally cannot be extrapolated because the relationship of the change in the assumption to the change in value may not be linear. Also, the effect of a variation in a particular assumption on the value of the other interests held is calculated independently without changing any other assumptions. In reality, changes in one factor may result in changes in others, which might magnify or counteract the sensitivities.

We present the components of our managed servicing portfolio in Table 6.3 at unpaid principal balance for loans serviced and subserviced for others and at carrying value for owned loans serviced.

Table 6.3: Managed Servicing Portfolio

(in billions)		Jun 30, 2023	Dec 31, 2022
Residential mortgage servicing:			
Serviced and subserviced for others	$	**637**	681
Owned loans serviced		**267**	273
Total residential servicing		**904**	954
Commercial mortgage servicing:			
Serviced and subserviced for others		**562**	577
Owned loans serviced		**131**	133
Total commercial servicing		**693**	710
Total managed servicing portfolio	$	**1,597**	1,664
Total serviced for others, excluding subserviced for others	$	**1,162**	1,246
MSRs as a percentage of loans serviced for others		**0.80 %**	0.84
Weighted average note rate (mortgage loans serviced for others)		**4.44**	4.30

At June 30, 2023, and December 31, 2022, we had servicer advances, net of an allowance for uncollectible amounts, of $2.1 billion and $2.5 billion, respectively. As the servicer of loans for others, we advance certain payments of principal, interest, taxes, insurance, and default-related expenses which are generally reimbursed within a short timeframe from cash flows from the trust, government-sponsored entities (GSEs), insurer or borrower.

The credit risk related to these advances is limited since the reimbursement is generally senior to cash payments to investors. We also advance payments of taxes and insurance for our owned loans which are collectible from the borrower. We maintain an allowance for uncollectible amounts for advances on loans serviced for others that may not be reimbursed if the payments were not made in accordance with applicable servicing agreements or if the insurance or servicing agreements contain limitations on reimbursements. Servicing advances on owned loans are written-off when deemed uncollectible.

Table 6.4 presents the components of mortgage banking noninterest income.

Table 6.4: Mortgage Banking Noninterest Income

		Quarter ended June 30,		Six months ended June 30,	
(in millions)		**2023**	2022	**2023**	2022
Contractually specified servicing fees, late charges and ancillary fees		**$ 547**	645	**$ 1,114**	1,280
Unreimbursed servicing costs (1)		**(45)**	(57)	**(78)**	(81)
Amortization for commercial MSRs		**(62)**	(64)	**(123)**	(123)
Changes due to collection/realization of expected cash flows (2)	(A)	**(325)**	(287)	**(646)**	(644)
Net servicing fees		**115**	237	**267**	432
Changes in fair value of MSRs due to valuation inputs or assumptions (3)	(B)	**316**	868	**91**	2,473
Net derivative gains (losses) from economic hedges (4)		**(331)**	(980)	**(146)**	(2,626)
Market-related valuation changes to MSRs, net of hedge results		**(15)**	(112)	**(55)**	(153)
Total net servicing income		**100**	125	**212**	279
Net gains on mortgage loan originations/sales (5)		**102**	162	**222**	701
Total mortgage banking noninterest income		**$ 202**	287	**$ 434**	980
Total changes in fair value of MSRs carried at fair value	(A)+(B)	**$ (9)**	581	**$ (555)**	1,829

(1) Includes costs associated with foreclosures, unreimbursed interest advances to investors, other interest costs and transaction costs associated with sales of MSRs.
(2) Represents the reduction in the MSR fair value for the cash flows expected to be collected during the period, net of income accreted due to the passage of time.
(3) Refer to the analysis of changes in fair value MSRs presented in Table 6.1 in this Note for more detail.
(4) See Note 11 (Derivatives) for additional information on economic hedges.
(5) Includes net gains (losses) of $89 million and $50 million in the second quarter and first half of 2023, respectively, and $710 million and $2.0 billion in the second quarter and first half of 2022, respectively, related to derivatives used as economic hedges of mortgage loans held for sale and derivative loan commitments.

Note 7: Intangible Assets and Other Assets

Table 7.1 presents the gross carrying value of intangible assets and accumulated amortization.

Table 7.1: Intangible Assets

			June 30, 2023			December 31, 2022
(in millions)	**Gross carrying value**	**Accumulated amortization**	**Net carrying value**	Gross carrying value	Accumulated amortization	Net carrying value
Amortized intangible assets:						
MSRs	**$ 4,989**	**(3,895)**	**1,094**	4,942	(3,772)	1,170
Customer relationship and other intangibles	**773**	**(628)**	**145**	754	(602)	152
Total amortized intangible assets	**$ 5,762**	**(4,523)**	**1,239**	5,696	(4,374)	1,322
Unamortized intangible assets:						
MSRs (carried at fair value)	**$ 8,251**			9,310		
Goodwill	**25,175**			25,173		

Table 7.2 provides the current year and estimated future amortization expense for amortized intangible assets. We based our projections of amortization expense shown below on existing asset balances at June 30, 2023. Future amortization expense may vary from these projections.

Table 7.2: Amortization Expense for Intangible Assets

(in millions)	Amortized MSRs	Customer relationship and other intangibles	Total
Six months ended June 30, 2023 (actual)	**$ 123**	**26**	**149**
Estimate for the remainder of 2023	**$ 117**	**26**	**143**
Estimate for year ended December 31,			
2024	213	43	256
2025	184	35	219
2026	148	29	177
2027	117	2	119
2028	97	2	99

Table 7.3 shows the allocation of goodwill to our reportable operating segments.

Table 7.3: Goodwill

(in millions)	Consumer Banking and Lending	Commercial Banking	Corporate and Investment Banking	Wealth and Investment Management	Corporate	Consolidated Company
December 31, 2022	$ 16,418	2,931	5,375	344	105	25,173
Foreign currency translation	—	2	—	—	—	2
June 30, 2023	**$ 16,418**	**2,933**	**5,375**	**344**	**105**	**25,175**

Table 7.4 presents the components of other assets.

Table 7.4: Other Assets

(in millions)	**Jun 30, 2023**	Dec 31, 2022
Corporate/bank-owned life insurance (1)	**$ 20,889**	20,807
Accounts receivable (2)	**30,599**	23,646
Interest receivable:		
AFS and HTM debt securities	**1,667**	1,572
Loans	**3,638**	3,470
Trading and other	**829**	767
Operating lease assets (lessor)	**5,510**	5,790
Operating lease ROU assets (lessee)	**3,659**	3,837
Other (3)(4)	**16,124**	15,949
Total other assets	**$ 82,915**	75,838

(1) Corporate/bank-owned life insurance is recorded at cash surrender value.
(2) Primarily includes derivatives clearinghouse receivables, trade date receivables, and servicer advances, which are recorded at amortized cost.
(3) Primarily includes income tax receivables, prepaid expenses, foreclosed assets, and private equity and venture capital investments in consolidated portfolio companies.
(4) In first quarter 2023, we adopted ASU 2018-12 – Financial Services – Insurance (Topic 944): *Targeted Improvements to the Accounting for Long-Duration Contracts*. For additional information, see Note 1 (Summary of Significant Accounting Policies).

Note 8: Leasing Activity

The information below provides a summary of our leasing activities as a lessor and lessee. See Note 8 (Leasing Activity) in our 2022 Form 10-K for additional information about our leasing activities.

As a Lessor

Noninterest income on leases, included in Table 8.1, is included in other noninterest income on our consolidated statement of income. Lease expense, included in other noninterest expense on our consolidated statement of income, was $180 million and $185 million for the quarters ended June 30, 2023 and 2022, respectively, and $357 million and $373 million for the first half of 2023 and 2022, respectively.

Table 8.1: Leasing Revenue

	Quarter ended June 30,		Six months ended June 30,	
(in millions)	**2023**	2022	**2023**	2022
Interest income on lease financing	**$ 176**	152	**$ 345**	304
Other lease revenue:				
Variable revenue on lease financing	**24**	27	**49**	57
Fixed revenue on operating leases	**245**	242	**494**	487
Variable revenue on operating leases	**13**	14	**24**	29
Other lease-related revenue (1)	**25**	50	**87**	87
Noninterest income on leases	**307**	333	**654**	660
Total leasing revenue	**$ 483**	485	**$ 999**	964

(1) Predominantly includes net gains (losses) on disposition of assets leased under operating leases or lease financings.

As a Lessee

Substantially all of our leases are operating leases. Table 8.2 presents balances for our operating leases.

Table 8.2: Operating Lease Right-of-Use (ROU) Assets and Lease Liabilities

(in millions)	**Jun 30, 2023**	Dec 31, 2022
ROU assets	**$ 3,659**	3,837
Lease liabilities	**4,262**	4,465

Table 8.3 provides the composition of our lease costs, which are predominantly included in net occupancy expense.

Table 8.3: Lease Costs

	Quarter ended June 30,		Six months ended June 30,	
(in millions)	**2023**	2022	**2023**	2022
Fixed lease expense – operating leases	**$ 248**	253	**$ 499**	506
Variable lease expense	**70**	70	**141**	143
Other (1)	**(10)**	(8)	**(26)**	(18)
Total lease costs	**$ 308**	315	**$ 614**	631

(1) Predominantly includes gains recognized from sale leaseback transactions and sublease rental income.

Note 9: Preferred Stock

We are authorized to issue 20 million shares of preferred stock, without par value. Outstanding preferred shares rank senior to common shares both as to the payment of dividends and liquidation preferences but have no general voting rights. All outstanding preferred stock with a liquidation preference value, except for Series L Preferred Stock, may be redeemed for the liquidation preference value, plus any accrued but unpaid dividends, on any dividend payment date on or after the earliest redemption date for that series. Additionally, these same series of preferred stock may be redeemed following a "regulatory capital treatment event", as described in the terms of each series. Capital actions, including redemptions of our preferred stock, may be subject to regulatory approval or conditions.

In addition, we are authorized to issue 4 million shares of preference stock, without par value. We have not issued any preference shares under this authorization. If issued, preference shares would be limited to one vote per share.

In July 2023, we issued $1.725 billion of our Preferred Stock, Series EE.

Table 9.1 summarizes information about our preferred stock.

Table 9.1: Preferred Stock

(in millions, except shares)	Earliest redemption date	June 30, 2023 Shares authorized and designated	Shares issued and outstanding	Liquidation preference value	Carrying value	December 31, 2022 Shares authorized and designated	Shares issued and outstanding	Liquidation preference value	Carrying value

(1) At the option of the holder, each share of Series L Preferred Stock may be converted at any time into 6.3814 shares of common stock, plus cash in lieu of fractional shares, subject to anti-dilution adjustments. If converted within 30 days of certain liquidation or change of control events, the holder may receive up to 16.5916 additional shares, or, at our option, receive an equivalent amount of cash in lieu of common stock. We may convert some or all of the Series L Preferred Stock into shares of common stock if the closing price of our common stock exceeds 130 percent of the conversion price of the Series L Preferred Stock for 20 trading days during any period of 30 consecutive trading days. We declared dividends of $74 million on Series L Preferred Stock for both quarters ended June 30, 2023, and June 30, 2022.

Note 10: Legal Actions

Wells Fargo and certain of our subsidiaries are involved in a number of judicial, regulatory, governmental, arbitration, and other proceedings or investigations concerning matters arising from the conduct of our business activities, and many of those proceedings and investigations expose Wells Fargo to potential financial loss or other adverse consequences. These proceedings and investigations include actions brought against Wells Fargo and/or our subsidiaries with respect to corporate-related matters and transactions in which Wells Fargo and/or our subsidiaries were involved. In addition, Wells Fargo and our subsidiaries may be requested to provide information to or otherwise cooperate with government authorities in the conduct of investigations of other persons or industry groups.

We establish accruals for legal actions when potential losses associated with the actions become probable and the costs can be reasonably estimated. For such accruals, we record the amount we consider to be the best estimate within a range of potential losses that are both probable and estimable; however, if we cannot determine a best estimate, then we record the low end of the range of those potential losses. There can be no assurance as to the ultimate outcome of legal actions, including the matters described below, and the actual costs of resolving legal actions may be substantially higher or lower than the amounts accrued for those actions.

AUTOMOBILE LENDING MATTERS On April 20, 2018, the Company entered into consent orders with the Office of the Comptroller of the Currency (OCC) and the Consumer Financial Protection Bureau (CFPB) to resolve, among other things, investigations by the agencies into the Company's compliance risk management program and its past practices involving certain automobile collateral protection insurance (CPI) policies and certain mortgage interest rate lock extensions. Shareholders filed a putative securities fraud class action against the Company and its executive officers alleging material misstatements and omissions of CPI-related information in the Company's public disclosures. In January 2020, the court dismissed this action as to all defendants except the Company and a former executive officer and limited the action to two alleged misstatements. On May 1, 2023, the court granted preliminary approval of an agreement pursuant to which the Company agreed to pay $300 million to resolve this action. Additionally, a number of other lawsuits were filed by non-governmental parties seeking damages or other remedies related to these CPI policies and related to the unused portion of guaranteed automobile protection (GAP) waiver or insurance agreements. As previously disclosed, the Company entered into various settlements to resolve these lawsuits, while others were dismissed. In addition, federal and state government agencies, including the CFPB, have undertaken formal or informal inquiries, investigations, or examinations regarding these and other issues related to the origination, servicing, and collection of consumer auto loans, including related insurance products. On December 20, 2022, the Company entered into a consent order with the CFPB to resolve the CFPB's investigations related to automobile lending, consumer deposit accounts, and mortgage lending. The consent order requires, among other things, remediation to customers and the payment of a $1.7 billion civil penalty to the CFPB. As previously disclosed, the Company entered into an agreement to resolve investigations by state attorneys general.

COMPANY 401(K) PLAN MATTERS Federal government agencies, including the United States Department of Labor (Department of Labor), have undertaken reviews of certain transactions associated with the Employee Stock Ownership Plan feature of the Company's 401(k) plan, including the manner in which the 401(k) plan purchased certain securities used in connection with the Company's contributions to the 401(k) plan. As previously disclosed, the Company entered into an agreement to resolve the Department of Labor's review. On September 26, 2022, participants in the Company's 401(k) plan filed a putative class action in the United States District Court for the District of Minnesota alleging that the Company violated the Employee Retirement Income Security Act of 1974 in connection with certain of these transactions.

CONSENT ORDER DISCLOSURE LITIGATION Wells Fargo shareholders have brought a putative securities fraud class action in the United States District Court for the Southern District of New York alleging that the Company and certain of its current and former executive officers and directors made false or misleading statements regarding the Company's efforts to comply with the February 2018 consent order with the Federal Reserve Board and the April 2018 consent orders with the CFPB and OCC. On May 16, 2023, the court granted preliminary approval of an agreement pursuant to which the Company agreed to pay $1.0 billion to resolve this action. Allegations related to the Company's efforts to comply with these three consent orders are also among the subjects of shareholder derivative lawsuits filed in California state and federal court.

HIRING PRACTICES MATTERS Government agencies, including the United States Department of Justice and the United States Securities and Exchange Commission, have undertaken formal or informal inquiries or investigations regarding the Company's hiring practices related to diversity. A putative securities fraud class action has also been filed in the United States District Court for the Northern District of California alleging that the Company and certain of its executive officers made false or misleading statements about the Company's hiring practices related to diversity. Allegations related to the Company's hiring practices related to diversity are also among the subjects of shareholder derivative lawsuits filed in the United States District Court for the Northern District of California and in California state court.

INTERCHANGE LITIGATION Plaintiffs representing a class of merchants have filed putative class actions, and individual merchants have filed individual actions, against Wells Fargo Bank, N.A., Wells Fargo & Company, Wachovia Bank, N.A., and Wachovia Corporation regarding the interchange fees associated with Visa and MasterCard payment card transactions. Visa, MasterCard, and several other banks and bank holding companies are also named as defendants in these actions. These actions have been consolidated in the United States District Court for the Eastern District of New York. The amended and consolidated complaint asserts claims against defendants based on alleged violations of federal and state antitrust laws and seeks damages as well as injunctive relief. Plaintiff merchants allege that Visa, MasterCard, and payment card issuing banks unlawfully colluded to set interchange rates. Plaintiffs also allege that enforcement of certain Visa and MasterCard rules and alleged tying and bundling of services offered to merchants are anticompetitive. Wells Fargo and Wachovia, along with other defendants and entities, are parties to Loss and Judgment Sharing Agreements, which provide that they, along with other entities, will share, based on a formula, in any losses from the Interchange Litigation. On July 13, 2012, Visa, MasterCard, and the financial institution defendants, including Wells Fargo, signed a memorandum of understanding with plaintiff merchants to resolve the consolidated class action and reached a separate settlement in principle of the consolidated individual actions. The settlement payments to be made by all defendants in the consolidated class and individual actions totaled approximately $6.6 billion before reductions applicable to certain merchants opting out of the settlement. The class settlement also provided for the distribution to class merchants of 10 basis points of default interchange across all credit rate categories for a period of eight consecutive months. The district court granted final approval of the settlement, which was appealed to the United States Court of Appeals for the Second Circuit by settlement objector merchants. Other merchants opted out of the settlement and are pursuing several individual actions. On June 30, 2016, the Second Circuit vacated the settlement agreement and reversed and remanded the consolidated action to the United States District Court for the Eastern District of New York for further proceedings. On November 23, 2016, prior class counsel filed a petition to the United States Supreme Court, seeking review of the reversal of the settlement by the Second Circuit, and the Supreme Court denied the petition on March 27, 2017. On November 30, 2016, the district court appointed lead class counsel for a damages class and an equitable relief class. The parties have entered into a settlement agreement to resolve the damages class claims pursuant to which defendants will pay a total of approximately $6.2 billion, which includes approximately $5.3 billion of funds remaining from the 2012 settlement and $900 million in additional funding. The Company's allocated responsibility for the additional funding is approximately $94.5 million. The court granted final approval of the settlement on December 13, 2019, which was appealed to the United States Court of Appeals for the Second Circuit by settlement objector merchants. On March 15, 2023, the Second Circuit affirmed the damages class settlement. Settlement objector merchants filed a petition for a rehearing by the Second Circuit en banc, which was denied. On September 27, 2021, the district court granted the plaintiffs' motion for class certification in the equitable relief case. Several of the opt-out and direct action litigations have been settled while others remain pending.

RECORD-KEEPING INVESTIGATIONS The United States Securities and Exchange Commission and the United States Commodity Futures Trading Commission have undertaken investigations regarding the Company's compliance with records retention requirements relating to business communications sent over unapproved electronic messaging channels. The Company is in resolution discussions with these agencies, although there can be no assurance as to the outcome of these discussions.

RMBS TRUSTEE LITIGATION In December 2014, Phoenix Light SF Limited (Phoenix Light) and certain related entities filed a complaint in the United States District Court for the Southern District of New York alleging claims against Wells Fargo Bank, N.A., in its capacity as trustee for a number of residential mortgage-backed securities (RMBS) trusts. Complaints raising similar allegations have been filed by Commerzbank AG in the Southern District of New York, IKB International and IKB Deutsche Industriebank in New York state court, and Park Royal I LLC and Park Royal II LLC in New York state court. In each case, the plaintiffs allege that Wells Fargo Bank, N.A., as trustee, caused losses to investors, and plaintiffs assert causes of action based upon, among other things, the trustee's alleged failure to notify and enforce repurchase obligations of mortgage loan sellers for purported breaches of representations and warranties, notify investors of alleged events of default, and abide by appropriate standards of care following alleged events of default. In July 2022, the district court dismissed Phoenix Light's claims and certain of the claims asserted by Commerzbank AG, and subsequently entered judgment in each case in favor of Wells Fargo Bank, N.A. In August 2022, Phoenix Light and Commerzbank AG each appealed the district court's decision to the United States Court of Appeals for the Second Circuit. Phoenix Light dismissed its appeal in May 2023, terminating its case. The Company previously settled two class actions filed by institutional investors and an action filed by the National Credit Union Administration with similar allegations.

SEMINOLE TRIBE TRUSTEE LITIGATION The Seminole Tribe of Florida filed a complaint in Florida state court alleging that Wells Fargo, as trustee, charged excess fees in connection with the administration of a minor's trust and failed to invest the assets of the trust prudently. The complaint was later amended to include three individual current and former beneficiaries as plaintiffs and to remove the Tribe as a party to the case.

OUTLOOK As described above, the Company establishes accruals for legal actions when potential losses associated with the actions become probable and the costs can be reasonably estimated. The high end of the range of reasonably possible losses in excess of the Company's accrual for probable and estimable losses was approximately $1.5 billion as of June 30, 2023. The outcomes of legal actions are unpredictable and subject to significant uncertainties, and it is inherently difficult to determine whether any loss is probable or even possible. It is also inherently difficult to estimate the amount of any loss and there may be matters for which a loss is probable or reasonably possible but not currently estimable. Accordingly, actual losses may be in excess of the established accrual or the range of reasonably possible loss. Based on information currently available, advice of counsel, available insurance coverage, and established reserves, Wells Fargo believes that the eventual outcome of the actions against Wells Fargo and/or its subsidiaries will not, individually or in the aggregate, have a material adverse effect on Wells Fargo's consolidated financial condition. However, it is possible that the ultimate resolution of a matter, if unfavorable, may be material to Wells Fargo's results of operations for any particular period.

Note 11: Derivatives

We use derivatives to manage exposure to market risk, including interest rate risk, credit risk and foreign currency risk, and to assist customers with their risk management objectives. We designate certain derivatives as hedging instruments in qualifying hedge accounting relationships (fair value or cash flow hedges). Our remaining derivatives consist of economic hedges that do not qualify for hedge accounting and derivatives held for customer accommodation trading or other purposes. For additional information on our derivatives activities, see Note 14 (Derivatives) in our 2022 Form 10-K.

Table 11.1 presents the total notional or contractual amounts and fair values for our derivatives. Derivative transactions can be measured in terms of the notional amount, but this amount is not recorded on our consolidated balance sheet and is not, when viewed in isolation, a meaningful measure of the risk profile of the instruments. The notional amount is generally not exchanged, but is used only as the basis on which derivative cash flows are determined.

Table 11.1: Notional or Contractual Amounts and Fair Values of Derivatives

(1) In first quarter 2023, we adopted ASU 2018-12 – Financial Services – Insurance (Topic 944): *Targeted Improvements to the Accounting for Long-Duration Contracts*. For additional information, see Note 1 (Summary of Significant Accounting Policies).

Balance Sheet Offsetting

We execute substantially all of our derivative transactions under master netting arrangements. Where legally enforceable, these master netting arrangements give the ability, in the event of default by the counterparty, to liquidate securities held as collateral and to offset receivables and payables with the same counterparty. We reflect all derivative balances and related cash collateral subject to enforceable master netting arrangements on a net basis on our consolidated balance sheet. We do not net non-cash collateral that we receive or pledge against derivative balances on our consolidated balance sheet.

For disclosure purposes, we present "Total Derivatives, net" which represents the aggregate of our net exposure to each counterparty after considering the balance sheet netting adjustments and any non-cash collateral. We manage derivative exposure by monitoring the credit risk associated with each counterparty using counterparty-specific credit risk limits, using master netting arrangements and obtaining collateral.

Table 11.2 provides information on the fair values of derivative assets and liabilities subject to enforceable master netting arrangements, the balance sheet netting adjustments and the resulting net fair value amount recorded on our consolidated balance sheet, as well as the non-cash collateral associated with such arrangements. In addition to the netting amounts included in the table, we also have balance sheet netting related to resale and repurchase agreements that are disclosed within Note 15 (Pledged Assets and Collateral).

(1) Represents amounts with counterparties subject to enforceable master netting arrangements that have been offset in our consolidated balance sheet, including portfolio level counterparty valuation adjustments related to customer accommodation and other trading derivatives. Counterparty valuation adjustments related to derivative assets were $305 million and $372 million and debit valuation adjustments related to derivative liabilities were $316 million and $331 million as of June 30, 2023, and December 31, 2022, respectively, and were primarily related to interest rate contracts.

(2) In first quarter 2023, we adopted ASU 2018-12 – Financial Services – Insurance (Topic 944): *Targeted Improvements to the Accounting for Long-Duration Contracts*. For additional information, see Note 1 (Summary of Significant Accounting Policies).

Fair Value and Cash Flow Hedges

For fair value hedges, we use interest rate swaps to convert certain of our fixed-rate long-term debt and time certificates of deposit to floating rates to hedge our exposure to interest rate risk. We also enter into cross-currency swaps, cross-currency interest rate swaps and forward contracts to hedge our exposure to foreign currency risk and interest rate risk associated with the issuance of non-U.S. dollar denominated long-term debt. We also enter into futures contracts, forward contracts, and swap contracts to hedge our exposure to the price risk of physical commodities included in Other Assets. In addition, we use interest rate swaps, cross-currency swaps, cross-currency interest rate swaps and forward contracts to hedge against changes in fair value of certain investments in available-for-sale (AFS) debt securities due to changes in interest rates, foreign currency rates, or both. For certain fair value hedges of interest rate risk, we use the portfolio layer method to hedge stated amounts of closed portfolios of AFS debt securities. For certain fair value hedges of foreign currency risk, changes in fair value of cross-currency swaps attributable to changes in cross-currency basis spreads are excluded from the assessment of hedge effectiveness and recorded in other comprehensive income (OCI). See Note 20 (Other Comprehensive Income) for the amounts recognized in other comprehensive income.

For cash flow hedges, we use interest rate swaps to hedge the variability in interest payments received on certain interest-earning deposits with banks and certain floating-rate commercial loans, and interest paid on certain floating-rate debt due to changes in the contractually specified interest rate. We also use cross-currency swaps to hedge variability in interest payments on fixed-rate foreign currency-denominated long-term debt due to changes in foreign exchange rates.

We estimate $947 million pre-tax of deferred net losses related to cash flow hedges in OCI at June 30, 2023, will be reclassified into net interest income during the next twelve months. For cash flow hedges as of June 30, 2023, we are hedging our interest rate and foreign currency exposure to the variability of future cash flows for all forecasted transactions for a maximum of 9 years. For additional information on our accounting hedges, see Note 1 (Summary of Significant Accounting Policies) in our 2022 Form 10-K.

Table 11.3 and Table 11.4 show the net gains (losses) related to derivatives in cash flow and fair value hedging relationships, respectively.

Table 11.5 shows the carrying amount and associated cumulative basis adjustment related to the application of hedge accounting that is included in the carrying amount of hedged assets and liabilities in fair value hedging relationships.

Table 11.5: Hedged Items in Fair Value Hedging Relationships

		Hedged items currently designated		Hedged items no longer designated	
(in millions)		Carrying amount of assets/ (liabilities) (1)(2)	Hedge accounting basis adjustment assets/(liabilities) (3)	Carrying amount of assets/ (liabilities) (2)	Hedge accounting basis adjustment assets/(liabilities)
June 30, 2023					
Available-for-sale debt securities (4)(5)	**$**	**52,703**	**(3,186)**	**15,113**	**602**
Other assets		**2,013**	**(49)**	**—**	**—**
Deposits		**(65,415)**	**374**	**(10)**	**—**
Long-term debt		**(129,708)**	**13,970**	**(34)**	**3**
December 31, 2022					
Available-for-sale debt securities (4)	$	39,423	(3,859)	16,100	722
Other assets		1,663	38	—	—
Deposits		(41,687)	205	(10)	—
Long-term debt		(130,997)	13,862	(5)	—

(1) Does not include the carrying amount of hedged items where only foreign currency risk is the designated hedged risk. The carrying amount excluded $673 million and $739 million for available-for-sale debt securities as of June 30, 2023, and December 31, 2022, respectively. There was no carrying amount related to long-term debt at both June 30, 2023, and December 31, 2022.
(2) Represents the full carrying amount of the hedged asset or liability item as of the balance sheet date, except for circumstances in which only a portion of the asset or liability was designated as the hedged item in which case only the portion designated is presented.
(3) The balance includes $35 million and $802 million of debt securities and long-term debt cumulative basis adjustments, respectively, as of June 30, 2023, and $39 million and $334 million of debt securities and long-term debt cumulative basis adjustments, respectively, as of December 31, 2022, on terminated hedges whereby the hedged items have subsequently been re-designated into existing hedges.
(4) Carrying amount represents the amortized cost.
(5) The balance includes cumulative basis adjustments of $(224) million for hedged items currently designated as of June 30, 2023, related to certain AFS debt securities designated as the hedged item in a fair value hedge using the portfolio layer method. At June 30, 2023, the aggregated designated hedged items using the portfolio layer method had a carrying amount of $23.0 billion from closed portfolios of financial assets totaling $26.1 billion.

Derivatives Not Designated as Hedging Instruments

Derivatives not designated as hedging instruments include economic hedges and derivatives entered into for customer accommodation trading purposes.

We use economic hedge derivatives to manage our exposure to interest rate risk, equity price risk, foreign currency risk, and credit risk. We also use economic hedge derivatives to mitigate the periodic earnings volatility caused by mismatches between the changes in fair value of the hedged item and hedging instrument recognized on our fair value accounting hedges. Changes in the fair values of derivatives used to economically hedge the deferred compensation plan are reported in personnel expense.

For additional information on our derivatives activities, see Note 14 (Derivatives) in our 2022 Form 10-K.

Table 11.6 shows the net gains (losses), recognized by income statement lines, related to derivatives not designated as hedging instruments.

(1) Mortgage banking amounts for the second quarter and first half of 2023 are comprised of gains (losses) of $(331) million and $(146) million, respectively, related to derivatives used as economic hedges of MSRs measured at fair value offset by gains (losses) of $89 million and $50 million, respectively, related to derivatives used as economic hedges of mortgage loans held for sale and derivative loan commitments. The corresponding amounts for the second quarter and first half of 2022 are comprised of gain (losses) of $(980) million and $(2.6) billion, respectively, offset by gains (losses) of $710 million and $2.0 billion, respectively.

(2) In first quarter 2023, we adopted ASU 2018-12 – Financial Services – Insurance (Topic 944): *Targeted Improvements to the Accounting for Long-Duration Contracts*. For additional information, see Note 1 (Summary of Significant Accounting Policies).

Credit Derivatives

Credit derivative contracts are arrangements whose value is derived from the transfer of credit risk of a reference asset or entity from one party (the purchaser of credit protection) to another party (the seller of credit protection). We generally use credit derivatives to assist customers with their risk management objectives by purchasing and selling credit protection on corporate debt obligations through the use of credit default swaps or through risk participation swaps to help manage counterparty exposure. We would be required to perform under the credit derivatives we sold in the event of default by the referenced obligors. Events of default include events such as bankruptcy, capital restructuring or lack of principal and/or interest payment.

Table 11.7 provides details of sold credit derivatives.

Table 11.7: Sold Credit Derivatives

		Notional amount	
(in millions)		Protection sold	Protection sold – non-investment grade
June 30, 2023			
Credit default swaps	**$**	**14,273**	**1,677**
Risk participation swaps		**6,460**	**6,250**
Total credit derivatives	**$**	**20,733**	**7,927**
December 31, 2022			
Credit default swaps	$	12,733	1,860
Risk participation swaps		6,728	6,518
Total credit derivatives	$	19,461	8,378

Protection sold represents the estimated maximum exposure to loss that would be incurred if, upon an event of default, the value of our interests and any associated collateral declined to zero, and does not take into consideration any of recovery value from the referenced obligation or offset from collateral held or any economic hedges.

The amounts under non-investment grade represent the notional amounts of those credit derivatives on which we have a higher risk of being required to perform under the terms of the credit derivative and are a function of the underlying assets.

We consider the credit risk to be low if the underlying assets under the credit derivative have an external rating that is investment grade. If an external rating is not available, we classify the credit derivative as non-investment grade.

Our maximum exposure to sold credit derivatives is managed through posted collateral and purchased credit derivatives with identical or similar reference positions in order to achieve our desired credit risk profile. The credit risk management is designed to provide an ability to recover a significant portion of any amounts that would be paid under sold credit derivatives.

Credit-Risk Contingent Features

Certain of our derivative contracts contain provisions whereby if the credit rating of our debt were to be downgraded by certain major credit rating agencies, the counterparty could demand additional collateral or require termination or replacement of derivative instruments in a net liability position. Table 11.8 illustrates our exposure to OTC bilateral derivative contracts with credit-risk contingent features, collateral we have posted, and the additional collateral we would be required to post if the credit rating of our debt was downgraded below investment grade.

Table 11.8: Credit-Risk Contingent Features

(in billions)		**Jun 30, 2023**	Dec 31, 2022
Net derivative liabilities with credit-risk contingent features	**$**	**23.2**	20.7
Collateral posted		**20.0**	17.4
Additional collateral to be posted upon a below investment grade credit rating (1)		**3.2**	3.3

(1) Any credit rating below investment grade requires us to post the maximum amount of collateral.

Note 12: Fair Values of Assets and Liabilities

We use fair value measurements to record fair value adjustments to certain assets and liabilities and to fulfill fair value disclosure requirements. Assets and liabilities recorded at fair value on a recurring basis, such as derivatives, residential MSRs, and trading or AFS debt securities, are presented in Table 12.1 in this Note. Additionally, from time to time, we record fair value adjustments on a nonrecurring basis. These nonrecurring adjustments typically involve application of lower of cost or fair value (LOCOM) accounting, write-downs of individual assets or application of the measurement alternative for nonmarketable equity securities. Assets recorded at fair value on a nonrecurring basis are presented in Table 12.4 in this Note. We provide in Table 12.9 estimates of fair value for financial instruments that are not recorded at fair value, such as loans and debt liabilities carried at amortized cost.

See Note 1 (Summary of Significant Accounting Policies) in our 2022 Form 10-K for discussion of how we determine fair value. For descriptions of the valuation methodologies we use for assets and liabilities recorded at fair value on a recurring or nonrecurring basis, see Note 15 (Fair Values of Assets and Liabilities) in our 2022 Form 10-K.

FAIR VALUE HIERARCHY We classify our assets and liabilities recorded at fair value as either Level 1, 2, or 3 in the fair value hierarchy. The highest priority (Level 1) is assigned to valuations based on unadjusted quoted prices in active markets and the lowest priority (Level 3) is assigned to valuations based on significant unobservable inputs. See Note 1 (Summary of Significant Accounting Policies) in our 2022 Form 10-K for a detailed description of the fair value hierarchy.

In the determination of the classification of financial instruments in Level 2 or Level 3 of the fair value hierarchy, we consider all available information, including observable market data, indications of market liquidity and orderliness, and our understanding of the valuation techniques and significant inputs used. This determination is ultimately based upon the specific facts and circumstances of each instrument or instrument category and judgments are made regarding the significance of the unobservable inputs to the instruments' fair value measurement in its entirety. If unobservable inputs are considered significant, the instrument is classified as Level 3.

We do not classify nonmarketable equity securities in the fair value hierarchy if we use the non-published net asset value (NAV) per share (or its equivalent) as a practical expedient to measure fair value. Marketable equity securities with published NAVs are classified in the fair value hierarchy.

Assets and Liabilities Recorded at Fair Value on a Recurring Basis

Table 12.1 presents the balances of assets and liabilities recorded at fair value on a recurring basis.

Table 12.1: Fair Value on a Recurring Basis

(1) All amounts represent net gains (losses) included in net income except for AFS debt securities and other liabilities which also included net gains (losses) in other comprehensive income. Net gains (losses) included in other comprehensive income for AFS debt securities were $(3) million and $(19) million for the second quarter and first half of 2023, respectively, and $(6) million and $(27) million for the second quarter and first half of 2022, respectively. Net gains (losses) included in other comprehensive income for other liabilities were $5 million for both the second quarter and first half of 2023, and $87 million and $101 million for the second quarter and first half of 2022, respectively.
(2) Includes originations of mortgage servicing rights and loans held for sale.
(3) All assets and liabilities transferred into Level 3 were previously classified within Level 2.
(4) All assets and liabilities transferred out of Level 3 are classified as Level 2. During first quarter 2022, we transferred $8.9 billion of non-marketable equity securities and $1.4 billion of related economic hedging derivative assets (equity contracts) out of Level 3 due to our election to measure fair value of these instruments as a portfolio. Under this election, the unit of valuation is the portfolio-level, rather than each individual instrument. The unobservable inputs previously significant to the valuation of the instruments individually are no longer significant, as those unobservable inputs offset under the portfolio election.
(5) All amounts represent net unrealized gains (losses) related to assets and liabilities held at period end included in net income except for AFS debt securities and other liabilities which also included net unrealized gains (losses) related to assets and liabilities held at period end in other comprehensive income. Net unrealized gains (losses) included in other comprehensive income for AFS debt securities were $(2) million and $(17) million for the second quarter and first half of 2023, respectively, and $0 for both the second quarter and first half of 2022. Net unrealized gains (losses) included in other comprehensive income for other liabilities were $5 million for both the second quarter and first half of 2023, and $87 million and $101 million for the second quarter and first half of 2022, respectively.
(6) Included in net gains from trading and securities on our consolidated statement of income.
(7) Included in mortgage banking income on our consolidated statement of income.
(8) For additional information on the changes in mortgage servicing rights, see Note 6 (Mortgage Banking Activities).
(9) Included in mortgage banking income, net gains from trading and securities, and other noninterest income on our consolidated statement of income.
(10) Included in other noninterest income on our consolidated statement of income.
(11) In first quarter 2023, we adopted ASU 2018-12 – Financial Services – Insurance (Topic 944): *Targeted Improvements to the Accounting for Long-Duration Contracts*. For additional information, see Note 1 (Summary of Significant Accounting Policies).

Table 12.3 provides quantitative information about the valuation techniques and significant unobservable inputs used in the valuation of our Level 3 assets and liabilities measured at fair value on a recurring basis.

The significant unobservable inputs for Level 3 assets inherent in the fair values obtained from third-party vendors are not included in the table, as the specific inputs applied are not provided by the vendor (for additional information on vendor-developed valuations, see Note 15 (Fair Values of Assets and Liabilities) in our 2022 Form 10-K).

Weighted averages of inputs are calculated using outstanding unpaid principal balance for cash instruments, such as loans and securities, and notional amounts for derivative instruments.

Insignificant Level 3 liabilities, net of assets (3)	(138)							
Total Level 3 assets, net of liabilities	$ 6,620 (4)							

(1) The high end of the range of inputs is for servicing modified loans. For non-modified loans, the range is \$52 - \$175 at June 30, 2023, and \$52 - \$178 at December 31, 2022.
(2) Includes a blend of prepayment speeds and expected defaults. Prepayment speeds are influenced by mortgage interest rates as well as our estimation of drivers of borrower behavior.
(3) In first quarter 2023, we adopted ASU 2018-12 – Financial Services – Insurance (Topic 944): *Targeted Improvements to the Accounting for Long-Duration Contracts*. For additional information, see Note 1 (Summary of Significant Accounting Policies).
(4) Consists of total Level 3 assets of \$9.9 billion and \$11.5 billion and total Level 3 liabilities of \$7.9 billion and \$4.9 billion, before netting of derivative balances, at June 30, 2023, and December 31, 2022, respectively.

For additional information on the valuation techniques and significant unobservable inputs used in the valuation of our Level 3 assets and liabilities, including how changes in these inputs affect fair value estimates, see Note 15 (Fair Values of Assets and Liabilities) in our 2022 Form 10-K.

Assets and Liabilities Recorded at Fair Value on a Nonrecurring Basis

We may be required, from time to time, to measure certain assets at fair value on a nonrecurring basis in accordance with GAAP. These adjustments to fair value usually result from application of LOCOM accounting, write-downs of individual assets, or application of the measurement alternative for certain nonmarketable equity securities.

Table 12.4 provides the fair value hierarchy and fair value at the date of the nonrecurring fair value adjustment for all assets that were still held as of June 30, 2023, and December 31, 2022, and for which a nonrecurring fair value adjustment was recorded during the six months ended June 30, 2023, and the year ended December 31, 2022.

Table 12.4: Fair Value on a Nonrecurring Basis

			June 30, 2023			December 31, 2022
(in millions)	Level 2	Level 3	Total	Level 2	Level 3	Total
Loans held for sale (1)	$ 1,268	315	1,583	838	554	1,392
Loans:						
Commercial	645	—	645	285	—	285
Consumer	68	—	68	512	—	512
Total loans	713	—	713	797	—	797
Mortgage servicing rights (commercial)	—	—	—	—	75	75
Nonmarketable equity securities	606	1,483	2,089	1,926	2,818	4,744
Other assets	2,063	49	2,112	1,862	296	2,158
Total assets at fair value on a nonrecurring basis	$ 4,650	1,847	6,497	5,423	3,743	9,166

(1) Consists of commercial mortgages and residential mortgage – first lien loans.

Table 12.5 presents the gains (losses) on certain assets held at the end of the reporting periods presented for which a nonrecurring fair value adjustment was recognized in earnings during the respective periods.

Table 12.5: Gains (Losses) on Assets with Nonrecurring Fair Value Adjustment

	Six months ended June 30,	
(in millions)	2023	2022
Loans held for sale	$ (40)	(66)
Loans:		
Commercial	(205)	(36)
Consumer	(368)	(358)
Total loans	(573)	(394)
Mortgage servicing rights (commercial)	—	4
Nonmarketable equity securities (1)	(526)	(95)
Other assets (2)	(102)	(176)
Total	$ (1,241)	(727)

(1) Includes impairment of nonmarketable equity securities and observable price changes related to nonmarketable equity securities accounted for under the measurement alternative.
(2) Includes impairment of operating lease ROU assets, valuation of physical commodities, valuation losses on foreclosed real estate and other collateral owned, and impairment of private equity and venture capital investments in consolidated portfolio companies.

Table 12.6 provides quantitative information about the valuation techniques and significant unobservable inputs used in the valuation of our Level 3 assets that are measured at fair value on a nonrecurring basis and determined using an internal model. The table is limited to financial instruments that had nonrecurring fair value adjustments during the periods presented. Weighted averages of inputs are calculated using outstanding unpaid principal balance for cash instruments, such as loans, and carrying value prior to the nonrecurring fair value measurement for nonmarketable equity securities and private equity and venture capital investments in consolidated portfolio companies.

Table 12.6: Valuation Techniques – Nonrecurring Basis

($ in millions)		Fair Value Level 3	Valuation Technique (1)	Significant Unobservable Input (1)		Range of Inputs Positive (Negative)			Weighted Average
June 30, 2023

		411	Market comparable pricing	Comparability adjustment		(8.2)	-	(0.9)	(4.3)
Mortgage servicing rights (commercial)		75	Discounted cash flow	Cost to service per loan	$	3,775	-	3,775	3,775
				Discount rate		5.2	-	5.2 %	5.2
				Prepayment rate		0.0	-	20.6	6.7
Nonmarketable equity securities		1,461	Market comparable pricing	Comparability adjustment		(100.0)	-	(4.0)	(30.1)
		1,352	Market comparable pricing	Multiples		0.8x	-	18.7x	9.9x
Other assets (2)		234	Market comparable pricing	Multiples		6.4	-	8.0	7.1
Insignificant Level 3 assets		67							
Total	$	3,743							

(1) See Note 15 (Fair Values of Assets and Liabilities) in our 2022 Form 10-K for additional information on the valuation technique(s) and significant unobservable inputs used in the valuation of Level 3 assets.
(2) Represents private equity and venture capital investments in consolidated portfolio companies.

Fair Value Option

The fair value option is an irrevocable election, generally only permitted upon initial recognition of financial assets or liabilities, to measure eligible financial instruments at fair value with changes in fair value reflected in earnings. We may elect the fair value option to align the measurement model with how the financial assets or liabilities are managed or to reduce complexity or accounting asymmetry. Following is a discussion of the portfolios for which we elected the fair value option. For additional information, including the basis for our fair value option elections, see Note 15 (Fair Values of Assets and Liabilities) in our 2022 Form 10-K.

Table 12.7 reflects differences between the fair value carrying amount of the assets and liabilities for which we have elected the fair value option and the contractual aggregate unpaid principal amount at maturity.

Table 12.7: Fair Value Option

			June 30, 2023			December 31, 2022
(in millions)	**Fair value carrying amount**	**Aggregate unpaid principal**	**Fair value carrying amount less aggregate unpaid principal**	Fair value carrying amount	Aggregate unpaid principal	Fair value carrying amount less aggregate unpaid principal
Loans held for sale (1)	**$ 2,974**	**3,238**	**(264)**	4,220	4,614	(394)
Long-term debt (2)	**(1,600)**	**(2,147)**	**547**	(1,346)	(1,775)	429

(1) Nonaccrual loans and loans 90 days or more past due and still accruing included in LHFS for which we have elected the fair value option were insignificant at June 30, 2023, and December 31, 2022.
(2) Includes zero coupon notes for which the aggregate unpaid principal amount reflects the contractual principal due at maturity.

Table 12.8 reflects amounts included in earnings related to initial measurement and subsequent changes in fair value, by income statement line item, for assets and liabilities for which the fair value option was elected. Amounts recorded in net interest income are excluded from the table below.

Table 12.8: Gains (Losses) on Changes in Fair Value Included in Earnings

			2023			2022
(in millions)	**Mortgage banking noninterest income**	**Net gains from trading and securities**	**Other noninterest income**	Mortgage banking noninterest income	Net gains from trading and securities	Other noninterest income
Quarter ended June 30,						
Loans held for sale	**$ 34**	**13**	**—**	(237)	1	—
Long-term debt	**—**	**9**	**—**	—	11	—
Six months ended June 30,						
Loans held for sale	**$ 131**	**25**	**(4)**	(603)	10	—
Long-term debt	**—**	**(21)**	**—**	—	23	—

For performing loans, instrument-specific credit risk gains or losses are derived principally by determining the change in fair value of the loans due to changes in the observable or implied credit spread. Credit spread is the market yield on the loans less the relevant risk-free benchmark interest rate. For nonperforming loans, we attribute all changes in fair value to instrument-specific credit risk. For LHFS accounted for under the fair value option, instrument-specific credit gains or losses were insignificant during the second quarter and first half of both 2023 and 2022.

For long-term debt, instrument-specific credit risk gains or losses represent the impact of changes in fair value due to changes in our credit spread and are derived using observable secondary bond market information. These impacts are recorded within the debit valuation adjustments (DVA) in OCI. See Note 20 (Other Comprehensive Income) for additional information.

Disclosures about Fair Value of Financial Instruments

Table 12.9 presents a summary of fair value estimates for financial instruments that are not carried at fair value on a recurring basis. Some financial instruments are excluded from the scope of this table, such as certain insurance contracts, certain nonmarketable equity securities, and leases. This table also excludes assets and liabilities that are not financial instruments such as the value of the long-term relationships with our deposit, credit card and trust customers, MSRs, premises and equipment, goodwill and deferred taxes.

Loan commitments, standby letters of credit and commercial and similar letters of credit are not included in Table 12.9. A reasonable estimate of the fair value of these instruments is the carrying value of deferred fees plus the allowance for unfunded credit commitments, which totaled $622 million and $737 million at June 30, 2023, and December 31, 2022, respectively.

The total of the fair value calculations presented does not represent, and should not be construed to represent, the underlying fair value of the Company.

Table 12.9: Fair Value Estimates for Financial Instruments

			Estimated fair value			
(in millions)		Carrying amount	Level 1	Level 2	Level 3	Total

(1) Amounts consist of financial instruments for which carrying value approximates fair value.
(2) Excludes lease financing with a carrying amount of $15.1 billion and $14.7 billion at June 30, 2023, and December 31, 2022, respectively.
(3) Excludes deposit liabilities with no defined or contractual maturity of $1.2 trillion and $1.3 trillion at June 30, 2023, and December 31, 2022, respectively.
(4) Excludes obligations under finance leases of $20 million and $22 million at June 30, 2023, and December 31, 2022, respectively.

Note 13: Securitizations and Variable Interest Entities

Involvement with Variable Interest Entities (VIEs)

In the normal course of business, we enter into various types of on- and off-balance sheet transactions with special purpose entities (SPEs), which are corporations, trusts, limited liability companies or partnerships that are established for a limited purpose. SPEs are often formed in connection with securitization transactions whereby financial assets are transferred to an SPE. SPEs formed in connection with securitization transactions are generally considered variable interest entities (VIEs). The VIE may alter the risk profile of the asset by entering into derivative transactions or obtaining credit support, and issues various forms of interests in those assets to investors. When we transfer financial assets from our consolidated balance sheet to a VIE in connection with a securitization, we typically receive cash and sometimes other interests in the VIE as proceeds for the assets we transfer. In certain transactions with VIEs, we may retain the right to service the transferred assets and repurchase the transferred assets if the outstanding balance of the assets falls below the level at which the cost to service the assets exceed the benefits. In addition, we may purchase the right to service loans transferred to a VIE by a third party.

In connection with our securitization or other VIE activities, we have various forms of ongoing involvement with VIEs, which may include:

- underwriting securities issued by VIEs and subsequently making markets in those securities;
- providing credit enhancement on securities issued by VIEs through the use of letters of credit or financial guarantees;
- entering into other derivative contracts with VIEs;
- holding senior or subordinated interests in VIEs;
- acting as servicer or investment manager for VIEs;
- providing administrative or trustee services to VIEs; and
- providing seller financing to VIEs.

Loan Sales and Securitization Activity

We periodically transfer consumer and commercial loans and other types of financial assets in securitization and whole loan sale transactions.

MORTGAGE LOANS SOLD TO U.S. GOVERNMENT SPONSORED ENTITIES AND TRANSACTIONS WITH GINNIE MAE In the normal course of business we sell originated and purchased residential and commercial mortgage loans to government-sponsored entities (GSEs). These loans are generally transferred into securitizations sponsored by the GSEs, which provide certain credit guarantees to investors and servicers. We also transfer mortgage loans into securitization pools pursuant to Government National Mortgage Association (GNMA) guidelines which are insured by the Federal Housing Administration (FHA) or guaranteed by the Department of Veterans Affairs (VA). Mortgage loans eligible for securitization with the GSEs or GNMA are considered conforming loans. The GSEs or GNMA design the structure of these securitizations, sponsor the involved VIEs, and have power over the activities most significant to the VIE.

We account for loans transferred in conforming mortgage loan securitization transactions as sales and do not consolidate the VIEs as we are not the primary beneficiary. In exchange for the transfer of loans, we typically receive securities issued by the VIEs which we sell to third parties for cash or hold for investment purposes as HTM or AFS securities. We also retain servicing rights on the transferred loans. As a servicer, we retain the option to repurchase loans from GNMA loan securitization pools, which becomes exercisable when three scheduled loan payments remain unpaid by the borrower. When we do not repurchase these loans, they are recorded on our consolidated balance sheet and pledged to the GNMA securitization. We repurchased loans of $99 million and $191 million, during the second quarter and first half of 2023, respectively, and $564 million and $1.5 billion during the second quarter and first half of 2022, respectively. In 2022, these predominantly represented repurchases of government insured loans. At June 30, 2023, and December 31, 2022, we recorded assets and related liabilities of $940 million and $743 million, respectively, where we did not exercise our option to repurchase eligible loans.

Upon transfers of loans, we also provide indemnification for losses incurred due to material breaches of contractual representations and warranties as well as other recourse arrangements. At June 30, 2023, and December 31, 2022, our liability for these repurchase and recourse arrangements was $162 million and $167 million, respectively, and the maximum exposure to loss was $13.8 billion at both June 30, 2023, and December 31, 2022.

Substantially all residential servicing activity is related to assets transferred to GSE and GNMA securitizations. See Note 6 (Mortgage Banking Activities) for additional information about residential and commercial servicing rights, advances and servicing fees.

NONCONFORMING MORTGAGE LOAN SECURITIZATIONS In the normal course of business, we sell nonconforming residential and commercial mortgage loans in securitization transactions that we design and sponsor. Nonconforming mortgage loan securitizations do not involve a government credit guarantee, and accordingly, beneficial interest holders are subject to credit risk of the underlying assets held by the securitization VIE. We typically originate the transferred loans and account for the transfers as sales. We also typically retain the right to service the loans and may hold other beneficial interests issued by the VIEs, such as debt securities held for investment purposes. Our servicing role related to nonconforming commercial mortgage loan securitizations is limited to primary or master servicer. We do not consolidate the VIE because the most significant decisions impacting the performance of the VIE are generally made by the special servicer or the controlling class security holder. For our residential nonconforming mortgage loan securitizations accounted for as sales, we either do not hold variable interests that we consider potentially significant or are not the primary servicer for a majority of the VIE assets.

WHOLE LOAN SALE TRANSACTIONS We may also sell whole loans to VIEs where we have continuing involvement in the form of financing. We account for these transfers as sales, and do not consolidate the VIEs as we do not have the power to direct the most significant activities of the VIEs.

Table 13.1 presents information about transfers of assets during the periods presented for which we recorded the transfers as sales and have continuing involvement with the transferred assets. In connection with these transfers, we received proceeds and recorded servicing assets and securities. Each of these interests are initially measured at fair value. Servicing rights are classified as Level 3 measurements, and generally securities are classified as Level 2. The majority of our transfers relate to residential mortgage securitizations with the GSEs or GNMA and generally result in no gain or loss because the loans are measured at fair value on a recurring basis. Additionally, we may transfer certain government insured loans that we previously repurchased. These loans are carried at the lower of cost or market, and we recognize gains on such transfers when the market value is greater than the carrying value of the loan when it is sold.

Table 13.1: Transfers with Continuing Involvement

		2023		2022
(in millions)	**Residential mortgages**	**Commercial mortgages**	Residential mortgages	Commercial mortgages
Quarter ended June 30,				
Assets sold	**$ 3,917**	**1,800**	23,817	4,345
Proceeds from transfer (1)	**3,917**	**1,823**	23,817	4,411
Net gains (losses) on sale	**—**	**23**	—	66
Continuing involvement (2):				
Servicing rights recognized	**$ 46**	**16**	313	41
Securities recognized (3)	**—**	**22**	475	33
Six months ended June 30,				
Assets sold	**$ 8,378**	**3,299**	49,991	8,378
Proceeds from transfer (1)	**8,378**	**3,363**	50,043	8,508
Net gains (losses) on sale	**—**	**64**	52	130
Continuing involvement (2):				
Servicing rights recognized	**$ 93**	**34**	640	70
Securities recognized (3)	**—**	**48**	2,062	137

(1) Represents cash proceeds and the fair value of non-cash beneficial interests recognized at securitization settlement.
(2) Represents assets or liabilities recognized at securitization settlement date related to our continuing involvement in the transferred assets.
(3) Represents debt securities obtained at securitization settlement held for investment purposes that are classified as available-for-sale or held-to-maturity. In 2022, these predominantly related to agency securities. Excludes trading debt securities held temporarily for market-marking purposes, which are sold to third parties at or shortly after securitization settlement, of $1.8 billion and $3.7 billion during the second quarter and first half of 2023, respectively, and $3.6 billion and $10.3 billion during the second quarter and first half of 2022, respectively.

In the normal course of business, we purchase certain non-agency securities at initial securitization or subsequently in the secondary market, which we hold for investment. We also provide seller financing in the form of loans. We received cash flows of $91 million and $141 million during the second quarter and first half of 2023, respectively, and $168 million and $304 million, during the second quarter and first half of 2022, respectively, related to principal and interest payments on these securities and loans, which exclude cash flows related to trading activities.

Table 13.2 presents the key weighted-average assumptions we used to initially measure residential MSRs recognized during the periods presented.

Table 13.2: Residential MSRs – Assumptions at Securitization Date

	2023	2022
Quarter ended June 30,		
Prepayment rate (1)	**16.4 %**	10.9
Discount rate	**9.4**	8.0
Cost to service ($ per loan)	**$ 176**	122
Six months ended June 30,		
Prepayment rate (1)	**17.5 %**	11.0
Discount rate	**9.6**	7.5
Cost to service ($ per loan)	**$ 185**	117

(1) Includes a blend of prepayment speeds and expected defaults. Prepayment speeds are influenced by mortgage interest rates as well as our estimation of drivers of borrower behavior.

See Note 12 (Fair Values of Assets and Liabilities) and Note 6 (Mortgage Banking Activities) for additional information on key assumptions for residential MSRs.

RESECURITIZATION ACTIVITIES We enter into resecuritization transactions as part of our trading activities to accommodate the investment and risk management activities of our customers. In resecuritization transactions, we transfer trading debt securities to VIEs in exchange for new beneficial interests that are sold to third parties at or shortly after securitization settlement. This activity is performed for customers seeking a specific return or risk profile. Substantially all of our transactions involve the resecuritization of conforming mortgage-backed securities issued by the GSEs or guaranteed by GNMA. We do not consolidate the resecuritization VIEs as we share in the decision-making power with third parties and do not hold significant economic interests in the VIEs other than for market-making activities. During the six months ended June 30, 2023 and 2022, we transferred securities of $6.1 billion and $12.6 billion, respectively, to resecuritization VIEs, and retained securities of $329 million and $525 million, respectively. These amounts are not included in Table 13.1. Related total VIE assets were $111.1 billion and $112.0 billion at June 30, 2023, and December 31, 2022, respectively. As of June 30, 2023, and December 31, 2022, we held $1.3 billion and $793 million of securities, respectively.

Sold or Securitized Loans Serviced for Others

Table 13.3 presents information about loans that we sold or securitized in which we have ongoing involvement as servicer. Delinquent loans include loans 90 days or more past due and loans in bankruptcy, regardless of delinquency status. For loans sold or securitized where servicing is our only form of continuing involvement, we generally experience a loss only if we were required to repurchase a delinquent loan or foreclosed asset due to a breach in representations and warranties associated with our loan sale or servicing contracts. Table 13.3 excludes mortgage loans sold to and held or securitized by GSEs or GNMA of $637.0 billion and $704.5 billion at June 30, 2023, and December 31, 2022, respectively. Delinquent loans and foreclosed assets related to loans sold to and held or securitized by GSEs or GNMA were $3.4 billion and $4.6 billion at June 30, 2023, and December 31, 2022, respectively.

Table 13.3: Sold or Securitized Loans Serviced for Others

						Net charge-offs	
		Total loans		Delinquent loans and foreclosed assets (1)		Six months ended June 30,	
(in millions)		**Jun 30, 2023**	Dec 31, 2022	**Jun 30, 2023**	Dec 31, 2022	**2023**	2022
Commercial	$	**66,082**	67,029	**849**	912	**67**	22
Residential		**8,789**	9,201	**433**	501	**8**	7
Total off-balance sheet sold or securitized loans	$	**74,871**	76,230	**1,282**	1,413	**75**	29

(1) Includes $213 million and $274 million of commercial foreclosed assets and $28 million and $25 million of residential foreclosed assets at June 30, 2023, and December 31, 2022, respectively.

Transactions with Unconsolidated VIEs

MORTGAGE LOAN SECURITIZATIONS Table 13.4 includes nonconforming mortgage loan securitizations where we originate and transfer the loans to the unconsolidated securitization VIEs that we sponsor. For additional information about these VIEs, see the "Loan Sales and Securitization Activity" section within this Note. Nonconforming mortgage loan securitizations also include commercial mortgage loan securitizations sponsored by third parties where we did not originate or transfer the loans but serve as master servicer and invest in securities that could be potentially significant to the VIE.

Conforming loan securitization and resecuritization transactions involving the GSEs and GNMA are excluded from Table 13.4 because we are not the sponsor or we do not have power over the activities most significant to the VIEs. Additionally, due to the nature of the guarantees provided by the GSEs and the FHA and VA, our credit risk associated with these VIEs is limited. For additional information about conforming mortgage loan securitizations and resecuritizations, see the "Loan Sales and Securitization Activity" and "Resecuritization Activities" sections within this Note.

COMMERCIAL REAL ESTATE LOANS We may transfer purchased industrial development bonds and GSE credit enhancements to VIEs in exchange for beneficial interests. We may also acquire such beneficial interests in transactions where we do not act as a transferor. We own all of the beneficial interests and may also service the underlying mortgages that serve as collateral to the bonds. The GSEs have the power to direct the servicing and workout activities of the VIE in the event of a default, therefore we do not have control over the key decisions of the VIEs.

OTHER VIE STRUCTURES We engage in various forms of structured finance arrangements with other VIEs, including asset-backed finance structures and other securitizations collateralized by asset classes other than mortgages. Collateral may include rental properties, asset-backed securities, student loans and mortgage loans. We may participate in structuring or marketing the arrangements as well as provide financing, service one or more of the underlying assets, or enter into derivatives with the VIEs. We may also receive fees for those services. We are not the primary beneficiary of these structures because we do not have power to direct the most significant activities of the VIEs.

Table 13.4 provides a summary of our exposure to the unconsolidated VIEs described above, which includes investments in securities, loans, guarantees, liquidity agreements, commitments and certain derivatives. We exclude certain transactions with unconsolidated VIEs when our continuing involvement is temporary or administrative in nature or insignificant in size.

In Table 13.4, "Total VIE assets" represents the remaining principal balance of assets held by unconsolidated VIEs using the most current information available. "Carrying value" is the amount in our consolidated balance sheet related to our involvement with the unconsolidated VIEs. "Maximum exposure to loss" is determined as the carrying value of our investment in the VIEs excluding the unconditional repurchase options that have not been exercised, plus the remaining undrawn liquidity and lending commitments, the notional amount of net written derivative contracts, and generally the notional amount of, or stressed loss estimate for, other commitments and guarantees.

Debt, guarantees and other commitments include amounts related to lending arrangements, liquidity agreements, and certain loss sharing obligations associated with loans originated, sold, and serviced under certain GSE programs.

"Maximum exposure to loss" represents estimated loss that would be incurred under severe, hypothetical circumstances, for which we believe the possibility is extremely remote, such as where the value of our interests and any associated collateral declines to zero, without any consideration of recovery or offset from any economic hedges. Accordingly, this disclosure is not an indication of expected loss.

Table 13.4: Unconsolidated VIEs

						Carrying value – asset (liability)	
(in millions)	**Total VIE assets**	**Loans**	**Debt securities (1)**	**Equity securities**	**All other assets (2)**	**Debt and other liabilities**	**Net assets**

Commercial real estate loans	5,627	5,611	—	—	16	—	5,627
Other	2,174	292	1	43	21	—	357
Total	$ 162,265	5,903	2,421	43	654	(13)	9,008
						Maximum exposure to loss	
		Loans	Debt securities (1)	Equity securities	All other assets (2)	Debt, guarantees, and other commitments	Total exposure
Nonconforming mortgage loan securitizations		$ —	2,420	—	617	13	3,050
Commercial real estate loans		5,611	—	—	16	705	6,332
Other		292	1	43	21	228	585
Total		$ 5,903	2,421	43	654	946	9,967

(1) Includes $170 million and $172 million of securities classified as trading at June 30, 2023, and December 31, 2022, respectively.
(2) All other assets includes mortgage servicing rights, derivative assets, and other assets (predominantly servicing advances).

INVOLVEMENT WITH TAX CREDIT VIES In addition to the unconsolidated VIEs in Table 13.4, we may invest in or provide funding to affordable housing, renewable energy or similar projects that are designed to generate a return primarily through the realization of federal tax credits and other tax benefits. The projects are typically managed by third-party sponsors who have the power over the VIE's assets, therefore, we do not consolidate the VIEs. The carrying value of our equity investments in tax credit VIEs was $19.0 billion and $18.7 billion at June 30, 2023, and December 31, 2022, respectively. We also had loans to tax credit VIEs with a carrying value of $2.0 billion at both June 30, 2023, and December 31, 2022.

Our maximum exposure to loss for tax credit VIEs at June 30, 2023, and December 31, 2022, was $29.7 billion and $28.0 billion, respectively. Our maximum exposure to loss included total unfunded equity and lending commitments of $8.8 billion and $7.3 billion at June 30, 2023, and December 31, 2022, respectively. See Note 14 (Guarantees and Other Commitments) for additional information about commitments to purchase equity securities.

Our affordable housing equity investments qualify for the low-income housing tax credit (LIHTC). For additional information on our LIHTC investments, see Note 16 (Securitizations and Variable Interest Entities) in our 2022 Form 10-K.

Consolidated VIEs

We consolidate VIEs where we are the primary beneficiary. We are the primary beneficiary of the following structure types:

COMMERCIAL AND INDUSTRIAL LOANS AND LEASES We may securitize dealer floor plan loans in a revolving master trust entity. As servicer and residual interest holder, we control the key decisions of the trust and consolidate the entity. The total VIE assets held by the master trust represent a majority of the total VIE assets presented for this category in Table 13.5. In a separate transaction structure, we may provide the majority of debt and equity financing to an SPE that engages in lending and leasing to specific vendors and service the underlying collateral.

OTHER VIE STRUCTURES Other VIEs are predominantly related to municipal tender option bond (MTOB) transactions. MTOBs are vehicles to finance the purchase of municipal bonds through the issuance of short-term debt to investors. Our involvement with MTOBs includes serving as the residual interest holder, which provides control over the key decisions of the VIE, as well as the remarketing agent or liquidity provider related to the debt issued to investors. We may also securitize nonconforming mortgage loans, in which our involvement includes servicer of the underlying assets and holder of subordinate or senior securities issued by the VIE. During second quarter 2022, we purchased the outstanding mortgage loans from the VIEs and extinguished the related debt associated with such securitizations.

Table 13.5 presents a summary of financial assets and liabilities of our consolidated VIEs. The carrying value represents assets and liabilities recorded on our consolidated balance sheet. "Total VIE assets" includes affiliate balances that are eliminated upon consolidation, and therefore in some instances will differ from the carrying value of assets.

On our consolidated balance sheet, we separately disclose (1) the consolidated assets of certain VIEs that can only be used to settle the liabilities of those VIEs, and (2) the consolidated liabilities of certain VIEs for which the VIE creditors do not have recourse to Wells Fargo.

Table 13.5: Transactions with Consolidated VIEs

			Carrying value – asset (liability)			
(in millions)		Total VIE assets	Loans	Debt securities	All other assets (1)	Liabilities (2)
June 30, 2023						
Commercial and industrial loans and leases	**$**	**7,345**	**4,947**	**—**	**204**	**(136)**
Other		**72**	**—**	**71**	**1**	**(72)**
Total consolidated VIEs	**$**	**7,417**	**4,947**	**71**	**205**	**(208)**
December 31, 2022						
Commercial and industrial loans and leases	$	7,148	4,802	—	190	(129)
Other		72	—	71	1	(72)
Total consolidated VIEs	$	7,220	4,802	71	191	(201)

(1) All other assets includes cash and due from banks, and other assets.
(2) Liabilities include short-term borrowings, and accrued expenses and other liabilities.

Other Transactions

In addition to the transactions included in the previous tables, we have used wholly-owned trust preferred security VIEs to issue debt securities or preferred equity exclusively to third-party investors. As the sole assets of the VIEs are receivables from us, we do not consolidate the VIEs even though we own all of the voting equity shares of the VIEs, have fully guaranteed the obligations of the VIEs, and may have the right to redeem the third-party securities under certain circumstances. On our consolidated balance sheet, we reported the debt securities issued to the VIEs as long-term junior subordinated debt with a carrying value of $407 million and $401 million at June 30, 2023, and December 31, 2022, respectively.

Note 14: Guarantees and Other Commitments

Guarantees are contracts that contingently require us to make payments to a guaranteed party based on an event or a change in an underlying asset, liability, rate or index. For additional descriptions of our guarantees, see Note 17 (Guarantees and Other Commitments) in our 2022 Form 10-K. Table 14.1 shows carrying value and maximum exposure to loss on our guarantees.

Table 14.1: Guarantees – Carrying Value and Maximum Exposure to Loss

						Maximum exposure to loss	
(in millions)	Carrying value of obligation	Expires in one year or less	Expires after one year through three years	Expires after three years through five years	Expires after five years	Total	Non-investment grade
June 30, 2023							
Standby letters of credit (1)	**$ 92**	**14,223**	**4,480**	**3,550**	**12**	**22,265**	**7,528**
Direct pay letters of credit (1)	**11**	**1,137**	**2,855**	**407**	**5**	**4,404**	**1,122**
Loans and LHFS sold with recourse (2)	**20**	**361**	**2,112**	**3,121**	**8,351**	**13,945**	**11,112**

Other guarantees and indemnifications (3)	**—**	**515**	**—**	**9**	**216**	**740**	**469**
Total guarantees	**$ 123**	**22,440**	**9,447**	**7,087**	**8,584**	**47,558**	**20,231**
December 31, 2022							
Standby letters of credit (1)	$ 112	14,014	4,694	3,058	53	21,819	7,071
Direct pay letters of credit (1)	13	1,593	2,734	465	5	4,797	1,283
Loans and LHFS sold with recourse (2)	16	322	1,078	3,408	8,906	13,714	11,399
Exchange and clearing house guarantees	—	4,623	—	—	—	4,623	—
Other guarantees and indemnifications (3)	—	548	1	10	201	760	515
Total guarantees	$ 141	21,100	8,507	6,941	9,165	45,713	20,268

(1) Standby and direct pay letters of credit are reported net of syndications and participations.
(2) Represents recourse provided, predominantly to the GSEs, on loans sold under various programs and arrangements.
(3) Includes indemnifications provided to certain third-party clearing agents. Estimated maximum exposure to loss was $172 million and $157 million with related collateral of $1.7 billion and $1.3 billion as of June 30, 2023, and December 31, 2022, respectively.

Maximum exposure to loss represents the estimated loss that would be incurred under an assumed hypothetical circumstance, despite what we believe is a remote possibility, where the value of our interests and any associated collateral declines to zero. Maximum exposure to loss estimates in Table 14.1 do not reflect economic hedges or collateral we could use to offset or recover losses we may incur under our guarantee agreements. Accordingly, these amounts are not an indication of expected loss. We believe the carrying value is more representative of our current exposure to loss than maximum exposure to loss. The carrying value represents the fair value of the guarantee, if any, and also includes an ACL for guarantees, if applicable. In determining the ACL for guarantees, we consider the credit risk of the related contingent obligation.

For our guarantees in Table 14.1, non-investment grade represents those guarantees on which we have a higher risk of performance under the terms of the guarantee, which is determined based on an external rating or an internal credit grade that is below investment grade.

WRITTEN OPTIONS We enter into written foreign currency options and over-the-counter written equity put options that are derivative contracts that have the characteristics of a guarantee. The fair value of written options represents our view of the probability that we will be required to perform under the contract. The fair value of these written options was an asset of $449 million and a liability of $15 million at June 30, 2023, and December 31, 2022, respectively. The fair value may be an asset as a result of deferred premiums on certain option trades. The maximum exposure to loss represents the notional value of these derivative contracts. At June 30, 2023, the maximum exposure to loss was $31.8 billion, with $29.3 billion expiring in three years or less compared with $23.4 billion and $21.3 billion, respectively, at December 31, 2022. See Note 11 (Derivatives) for additional information regarding written derivative contracts.

REPRESENTATIONS OR WARRANTIES We record a liability for mortgage loans that we expect to repurchase pursuant to various representations or warranties. See Note 13 (Securitizations and Variable Interest Entities) for further discussion and related amounts. Additionally, when we sell MSRs, we may provide indemnifications for losses incurred due to material breaches of contractual representations or warranties as well as other recourse arrangements. At June 30, 2023, our liability for these indemnification arrangements was $8 million and the maximum exposure to loss was $650 million, with $609 million expiring in three years or less.

MERCHANT PROCESSING SERVICES We provide debit and credit card transaction processing services through payment networks directly for merchants and as a sponsor for merchant processing servicers, including our joint venture with a third party that is accounted for as an equity method investment. In our role as the merchant acquiring bank, we have a potential obligation in connection with payment and delivery disputes between the merchant and the cardholder that are resolved in favor of the cardholder, referred to as a charge-back transaction. We estimate our potential maximum exposure to be the total merchant transaction volume processed in the preceding four months, which is generally the lifecycle for a charge-back transaction. As of June 30, 2023, our potential maximum exposure was approximately $789.5 billion, and related losses, including those from our joint venture entity, were insignificant.

GUARANTEES OF SUBSIDIARIES The Parent fully and unconditionally guarantees the payment of principal, interest, and any other amounts that may be due on securities that its 100% owned finance subsidiary, Wells Fargo Finance LLC, may issue. These securities are not guaranteed by any other subsidiary of the Parent. The guaranteed liabilities were $847 million and $948 million at June 30, 2023, and December 31, 2022, respectively. These guarantees rank on parity with all of the Parent's other unsecured and unsubordinated indebtedness.

OTHER COMMITMENTS To meet the financing needs of our customers, we may enter into commitments to purchase debt and equity securities to provide capital for their funding, liquidity or other future needs. As of both June 30, 2023, and December 31, 2022, we had commitments to purchase debt securities of $100 million and commitments to purchase equity securities of $5.0 billion and $3.8 billion, respectively.

As part of maintaining our memberships in certain clearing organizations, we are required to stand ready to provide liquidity to sustain market clearing activity in the event unforeseen events occur or are deemed likely to occur. Certain of these obligations are guarantees of other members' performance and accordingly are included in Table 14.1 in Other guarantees and indemnifications.

We have commitments to enter into resale and securities borrowing agreements as well as repurchase and securities lending agreements with certain counterparties, including central clearing organizations. The amount of our unfunded contractual commitments for resale and securities borrowing agreements was $16.6 billion and $19.9 billion as of June 30, 2023, and December 31, 2022, respectively. The amount of our unfunded contractual commitments for repurchase and securities lending agreements was $2.4 billion and $1.6 billion as of June 30, 2023, and December 31, 2022, respectively.

Given the nature of these commitments, they are excluded from Table 5.4 (Unfunded Credit Commitments) in Note 5 (Loans and Related Allowance for Credit Losses).

Note 15: Pledged Assets and Collateral

Pledged Assets

Table 15.1 provides the carrying amount of on-balance sheet pledged assets as well as the fair value of other pledged collateral not recognized on our consolidated balance sheet, which we have received from third parties, have the right to repledge and have repledged. These amounts include assets pledged in transactions accounted for as secured borrowings, which are presented parenthetically on our consolidated balance sheet.

TRADING RELATED ACTIVITY Our trading businesses may pledge debt and equity securities in connection with securities sold under agreements to repurchase (repurchase agreements) and securities lending arrangements. The collateral that we pledge related to our trading activities may include our own collateral as well as collateral that we have received from third parties and have the right to repledge. All of the collateral we pledge related to trading activity is eligible to be repledged or sold by the secured party.

NON-TRADING RELATED ACTIVITY As part of our liquidity management strategy, we may pledge loans, debt securities, and other financial assets to secure trust and public deposits, borrowings and letters of credit from Federal Home Loan Banks (FHLBs) and the Board of Governors of the Federal Reserve System (FRB) and for other purposes as required or permitted by law or insurance statutory requirements. Substantially all of the non-trading activity pledged collateral is not eligible to be repledged or sold by the secured party.

VIE RELATED We pledge assets in connection with various types of transactions entered into with VIEs. These pledged assets can only be used to settle the liabilities of those entities.

We also have loans recorded on our consolidated balance sheet which represent certain delinquent loans that are eligible for repurchase from GNMA loan securitizations. See Note 13 (Securitizations and Variable Interest Entities) for additional information on consolidated VIE assets.

Table 15.1: Pledged Assets

(in millions)		Jun 30, 2023	Dec 31, 2022
Related to trading activities:			
Off-balance sheet repledged third-party owned debt and equity securities	$	56,044	38,191
Trading debt securities and other		51,534	28,284
Equity securities		1,996	1,477
Total pledged assets related to trading activities		109,574	67,952
Related to non-trading activities:			
Loans		375,115	344,000
Debt securities:			
Available-for-sale		66,018	50,538
Held-to-maturity		247,754	17,477
Equity securities		178	141
Total pledged assets related to non-trading activities		689,065	412,156
Related to VIEs:			
Consolidated VIE assets		5,223	5,064
Loans eligible for repurchase from GNMA securitizations		946	749
Total pledged assets related to VIEs		6,169	5,813
Total pledged assets	$	804,808	485,921

Securities and Other Collateralized Financing Activities

We enter into resale and repurchase agreements and securities borrowing and lending agreements (collectively, "securities financing activities") typically to finance trading positions (including securities and derivatives), acquire securities to cover short trading positions, accommodate customers' financing needs, and settle other securities obligations. These activities are conducted through our broker-dealer subsidiaries and, to a lesser extent, through other bank entities. Our securities financing activities primarily involve high-quality, liquid securities such as U.S. Treasury securities and government agency securities and, to a lesser extent, less liquid securities, including equity securities, corporate bonds and asset-backed securities. We account for these transactions as collateralized financings in which we typically receive or pledge securities as collateral. We believe these financing transactions generally do not have material credit risk given the collateral provided and the related monitoring processes. We also enter into resale agreements involving collateral other than securities, such as loans, as part of our commercial lending business activities.

OFFSETTING OF SECURITIES AND OTHER COLLATERALIZED FINANCING ACTIVITIES Table 15.2 presents resale and repurchase agreements subject to master repurchase agreements (MRA) and securities borrowing and lending agreements subject to master securities lending agreements (MSLA). Where legally enforceable, these master netting arrangements give the ability, in the event of default by the counterparty, to liquidate securities held as collateral and to offset receivables and payables with the same counterparty. Collateralized financings, and those with a single counterparty, are presented net on our consolidated balance sheet, provided certain criteria are met that permit balance sheet netting. The majority of transactions subject to these agreements do not meet those criteria and thus are not eligible for balance sheet netting.

Collateral we pledged consists of non-cash instruments, such as securities or loans, and is not netted on our consolidated balance sheet against the related liability. Collateral we received includes securities or loans and is not recognized on our consolidated balance sheet. Collateral pledged or received may be increased or decreased over time to maintain certain contractual thresholds, as the assets underlying each arrangement fluctuate in value. Generally, these agreements require collateral to exceed the asset or liability recognized on the balance sheet. The following table includes the amount of collateral pledged or received related to exposures subject to enforceable MRAs or MSLAs. While these agreements are typically over-collateralized, U.S. GAAP requires disclosure in this table to limit the reported amount of such collateral to the amount of the related recognized asset or liability for each counterparty.

In addition to the amounts included in Table 15.2, we also have balance sheet netting related to derivatives that is disclosed in Note 11 (Derivatives).

Table 15.2: Offsetting – Securities and Other Collateralized Financing Activities

(in millions)		Jun 30, 2023	Dec 31, 2022
Assets:			
Resale and securities borrowing agreements			
Gross amounts recognized	$	**116,017**	114,729
Gross amounts offset in consolidated balance sheet (1)		**(27,246)**	(24,464)
Net amounts in consolidated balance sheet (2)		**88,771**	90,265
Collateral not recognized in consolidated balance sheet (3)		**(88,285)**	(89,592)
Net amount (4)	$	**486**	673
Liabilities:			
Repurchase and securities lending agreements			
Gross amounts recognized	$	**94,834**	55,054
Gross amounts offset in consolidated balance sheet (1)		**(27,246)**	(24,464)
Net amounts in consolidated balance sheet (5)		**67,588**	30,590
Collateral pledged but not netted in consolidated balance sheet (6)		**(67,478)**	(30,383)
Net amount (4)	$	**110**	207

(1) Represents recognized amount of resale and repurchase agreements with counterparties subject to enforceable MRAs that have been offset in our consolidated balance sheet.
(2) Includes $66.5 billion and $68.0 billion classified on our consolidated balance sheet in federal funds sold and securities purchased under resale agreements at June 30, 2023, and December 31, 2022, respectively. Also includes $22.3 billion and $22.3 billion classified on our consolidated balance sheet in loans at June 30, 2023, and December 31, 2022, respectively.
(3) Represents the fair value of collateral we have received under enforceable MRAs or MSLAs, limited in the table above to the amount of the recognized asset due from each counterparty. At June 30, 2023, and December 31, 2022, we have received total collateral with a fair value of $140.0 billion and $136.6 billion, respectively, all of which we have the right to sell or repledge. These amounts include securities we have sold or repledged to others with a fair value of $83.4 billion and $59.1 billion at June 30, 2023, and December 31, 2022, respectively.
(4) Represents the amount of our exposure (assets) or obligation (liabilities) that is not collateralized and/or is not subject to an enforceable MRA or MSLA.
(5) Amount is classified in short-term borrowings on our consolidated balance sheet.
(6) Represents the fair value of collateral we have pledged, related to enforceable MRAs or MSLAs, limited in the table above to the amount of the recognized liability owed to each counterparty. At June 30, 2023, and December 31, 2022, we have pledged total collateral with a fair value of $97.1 billion and $56.3 billion, respectively, substantially all of which may be sold or repledged by the counterparty.

REPURCHASE AND SECURITIES LENDING AGREEMENTS Securities sold under repurchase agreements and securities lending arrangements are effectively short-term collateralized borrowings. In these transactions, we receive cash in exchange for transferring securities as collateral and recognize an obligation to reacquire the securities for cash at the transaction's maturity. These types of transactions create risks, including (1) the counterparty may fail to return the securities at maturity, (2) the fair value of the securities transferred may decline below the amount of our obligation to reacquire the securities, and therefore create an obligation for us to pledge additional amounts, and (3) the counterparty may accelerate the maturity on demand, requiring us to reacquire the security prior to contractual maturity. We attempt to mitigate these risks in various ways. Our collateral primarily consists of highly liquid securities. In addition, we underwrite and monitor the financial strength of our counterparties, monitor the fair value of collateral pledged relative to contractually required repurchase amounts, and monitor that our collateral is properly returned through the clearing and settlement process in advance of our cash repayment. Table 15.3 provides the gross amounts recognized on our consolidated balance sheet (before the effects of offsetting) of our liabilities for repurchase and securities lending agreements disaggregated by underlying collateral type.

Table 15.3: Gross Obligations by Underlying Collateral Type

(in millions)		Jun 30, 2023	Dec 31, 2022
Repurchase agreements:			
Securities of U.S. Treasury and federal agencies	$	**34,235**	27,857
Securities of U.S. States and political subdivisions		**79**	83
Federal agency mortgage-backed securities		**42,968**	8,386
Non-agency mortgage-backed securities		**694**	682
Corporate debt securities		**6,617**	6,541
Asset-backed securities		**2,633**	1,529
Equity securities		**433**	711
Other		**245**	300
Total repurchases		**87,904**	46,089
Securities lending arrangements:			
Securities of U.S. Treasury and federal agencies		**284**	278
Federal agency mortgage-backed securities		**62**	58
Corporate debt securities		**210**	206
Equity securities (1)		**6,342**	8,356
Other		**32**	67
Total securities lending		**6,930**	8,965
Total repurchases and securities lending	$	**94,834**	55,054

(1) Equity securities are generally exchange traded and represent collateral received from third parties that has been repledged. We received the collateral through either margin lending agreements or contemporaneous securities borrowing transactions with other counterparties.

Table 15.4 provides the contractual maturities of our gross obligations under repurchase and securities lending agreements.

Table 15.4: Contractual Maturities of Gross Obligations

(in millions)		Overnight/ continuous	Up to 30 days	30-90 days	>90 days	Total gross obligation
June 30, 2023						
Repurchase agreements	**$**	**77,293**	**492**	**3,784**	**6,335**	**87,904**
Securities lending arrangements		**6,830**	**—**	**—**	**100**	**6,930**
Total repurchases and securities lending (1)	**$**	**84,123**	**492**	**3,784**	**6,435**	**94,834**
December 31, 2022						
Repurchase agreements	$	36,251	734	2,884	6,220	46,089
Securities lending arrangements		8,965	—	—	—	8,965
Total repurchases and securities lending (1)	$	45,216	734	2,884	6,220	55,054

(1) Securities lending is executed under agreements that allow either party to terminate the transaction without notice, while repurchase agreements have a term structure to them that technically matures at a point in time. The overnight/continuous repurchase agreements require election of both parties to roll the trade rather than the election to terminate the arrangement as in securities lending.

Note 16: Operating Segments

Our management reporting is organized into four reportable operating segments: Consumer Banking and Lending; Commercial Banking; Corporate and Investment Banking; and Wealth and Investment Management. All other business activities that are not included in the reportable operating segments have been included in Corporate. We define our reportable operating segments by type of product and customer segment, and their results are based on our management reporting process. The management reporting process measures the performance of the reportable operating segments based on the Company's management structure, and the results are regularly reviewed with our Chief Executive Officer and relevant senior management. The management reporting process is based on U.S. GAAP and includes specific adjustments, such as funds transfer pricing for asset/liability management, shared revenue and expenses, and taxable-equivalent adjustments to consistently reflect income from taxable and tax-exempt sources, which allows management to assess performance consistently across the operating segments.

Consumer Banking and Lending offers diversified financial products and services for consumers and small businesses with annual sales generally up to $10 million. These financial products and services include checking and savings accounts, credit and debit cards as well as home, auto, personal, and small business lending.

Commercial Banking provides financial solutions to private, family owned and certain public companies. Products and services include banking and credit products across multiple industry sectors and municipalities, secured lending and lease products, and treasury management.

Corporate and Investment Banking delivers a suite of capital markets, banking, and financial products and services to corporate, commercial real estate, government and institutional clients globally. Products and services include corporate banking, investment banking, treasury management, commercial real estate lending and servicing, equity and fixed income solutions as well as sales, trading, and research capabilities.

Wealth and Investment Management provides personalized wealth management, brokerage, financial planning, lending, private banking, trust and fiduciary products and services to affluent, high-net worth and ultra-high-net worth clients. We operate through financial advisors in our brokerage and wealth offices, consumer bank branches, independent offices, and digitally through WellsTrade® and Intuitive Investor®.

Corporate includes corporate treasury and enterprise functions, net of allocations (including funds transfer pricing, capital, liquidity and certain expenses), in support of the reportable operating segments as well as our investment portfolio and affiliated venture capital and private equity businesses. Corporate also includes certain lines of business that management has determined are no longer consistent with the long-term strategic goals of the Company as well as results for previously divested businesses.

Basis of Presentation

FUNDS TRANSFER PRICING Corporate treasury manages a funds transfer pricing methodology that considers interest rate risk, liquidity risk, and other product characteristics. Operating segments pay a funding charge for their assets and receive a funding credit for their deposits, both of which are included in net interest income. The net impact of the funding charges or credits is recognized in corporate treasury.

REVENUE AND EXPENSE SHARING When lines of business jointly serve customers, the line of business that is responsible for providing the product or service recognizes revenue or expense with a referral fee paid or an allocation of cost to the other line of business based on established internal revenue-sharing agreements.

When a line of business uses a service provided by another line of business or enterprise function (included in Corporate), expense is generally allocated based on the cost and use of the service provided.

TAXABLE-EQUIVALENT ADJUSTMENTS Taxable-equivalent adjustments related to tax-exempt income on certain loans and debt securities are included in net interest income, while taxable-equivalent adjustments related to income tax credits for low-income housing and renewable energy investments are included in noninterest income, in each case with corresponding impacts to income tax expense (benefit). Adjustments are included in Corporate, Commercial Banking, and Corporate and Investment Banking and are eliminated to reconcile to the Company's consolidated financial results.

Table 16.1 presents our results by operating segment.

Deposits (period-end)		892,373	183,145	162,439	165,633	21,563	—	1,425,153

(1) In first quarter 2023, we adopted ASU 2018-12 – Financial Services – Insurance (Topic 944): *Targeted Improvements to the Accounting for Long-Duration Contracts*. For additional information, see Note 1 (Summary of Significant Accounting Policies).

(2) Taxable-equivalent adjustments related to tax-exempt income on certain loans and debt securities are included in Net interest income, while taxable-equivalent adjustments related to income tax credits for low-income housing and renewable energy investments are included in Noninterest income, in each case with corresponding impacts to Income tax expense (benefit). Adjustments are included in Corporate, Commercial Banking, and Corporate and Investment Banking and are eliminated to reconcile to the Company's consolidated financial results.

(3) Net interest income is interest earned on assets minus the interest paid on liabilities to fund those assets. Segment interest earned includes actual interest income on segment assets as well as a funding credit for their deposits. Segment interest paid on liabilities includes actual interest expense on segment liabilities as well as a funding charge for their assets.

Note 17: Revenue and Expenses

Revenue

Our revenue includes net interest income on financial instruments and noninterest income. Table 17.1 presents our revenue by operating segment. For additional description of our operating segments, including additional financial information and the underlying management accounting process, see Note 16 (Operating Segments). For a description of our revenue from contracts with customers, see Note 20 (Revenue and Expenses) in our 2022 Form 10-K.

(1) Taxable-equivalent adjustments related to tax-exempt income on certain loans and debt securities are included in net interest income, while taxable-equivalent adjustments related to income tax credits for low-income housing and renewable energy investments are included in noninterest income, in each case with corresponding impacts to income tax expense (benefit). Adjustments are included in Corporate, Commercial Banking, and Corporate and Investment Banking and are eliminated to reconcile to the Company's consolidated financial results.
(2) These revenue types are related to financial assets and liabilities, including loans, leases, securities and derivatives, with additional details included in other footnotes to our financial statements.
(3) We earned trailing commissions of $227 million and $454 million for the second quarter and first half of 2023, respectively, and $245 million and $516 million for the second quarter and first half of 2022, respectively.
(4) The cost of credit card rewards and rebates of $628 million and $1.2 billion for the second quarter and first half of 2023, respectively, and $552 million and $1.0 billion for the second quarter and first half of 2022, respectively, are presented net against the related revenue.
(5) In first quarter 2023, we adopted ASU 2018-12 – Financial Services – Insurance (Topic 944): Targeted Improvements to the Accounting for Long-Duration Contracts. For additional information, see Note 1 (Summary of Significant Accounting Policies).

Expenses

OPERATING LOSSES Operating losses consist of litigation, regulatory matters, customer remediation activities, and losses from other business activities, such as fraud losses. Operating losses may have significant variability given the inherent and unpredictable nature of litigation, regulatory, and customer remediation matters. The timing and determination of the amount of any associated losses for these matters depends on a variety of factors, some of which are outside of our control. Our operating losses were $232 million and $499 million for the second quarter and first half of 2023, respectively, compared with $576 million and $1.2 billion in the same periods a year ago. See Note 10 (Legal Actions) for additional information on accruals for legal actions.

OTHER EXPENSES Regulatory Charges and Assessments expense, which is included in other noninterest expense, was $301 million and $572 million in the second quarter and first half of 2023, respectively, compared with $208 million and $433 million in the same periods a year ago, and primarily consisted of Federal Deposit Insurance Corporation (FDIC) deposit assessment expense.

In May 2023, the FDIC proposed a rule to recover by special assessment losses to the FDIC deposit insurance fund as a result of recent bank failures. Under the proposed rule, the FDIC would collect a special assessment based on a calculation using an insured depository institution's estimated amount of uninsured deposits. As currently proposed, the amount of our special assessment may be up to $1.8 billion (pre-tax), and we expect to expense the entire amount upon the FDIC's finalization of the rule. The proposed rule may be changed prior to finalization and any changes may affect the timing or amount of the special assessment.

Note 18: Employee Benefits

Pension and Postretirement Plans

We sponsor a frozen noncontributory qualified defined benefit retirement plan, the Wells Fargo & Company Cash Balance Plan (Cash Balance Plan), which covers eligible employees of Wells Fargo. The Cash Balance Plan was frozen on July 1, 2009, and no new benefits accrue after that date. For additional information on our pension and postretirement plans, including plan assumptions, investment strategy and asset allocation, projected benefit payments, and valuation methodologies used for assets measured at fair value, see Note 1 (Summary of Significant Accounting Policies) and Note 21 (Employee Benefits) in our 2022 Form 10-K.

Table 18.1 presents the components of net periodic benefit cost. Service cost is reported in personnel expense and all other components of net periodic benefit cost are reported in other noninterest expense on our consolidated statement of income.

Table 18.1: Net Periodic Benefit Cost

(1) Substantially all of the amounts for fair value hedges are foreign exchange contracts.
(2) Substantially all of the amounts for cash flow hedges are interest rate contracts.
(3) In first quarter 2023, we adopted ASU 2018-12 – Financial Services – Insurance (Topic 944): *Targeted Improvements to the Accounting for Long-Duration Contracts*. For additional information, see Note 1 (Summary of Significant Accounting Policies).
(4) AOCI related to debt securities includes after-tax unrealized gains or losses associated with the transfer of securities from AFS to HTM of $3.7 billion and $3.4 billion at June 30, 2023 and 2022, respectively. These amounts are subsequently amortized from AOCI into earnings over the same period as the related unamortized premiums and discounts.

Note 21: Regulatory Capital Requirements and Other Restrictions

Regulatory Capital Requirements

The Company and each of its subsidiary banks are subject to regulatory capital adequacy requirements promulgated by federal banking regulators. The FRB establishes capital requirements for the consolidated financial holding company, and the Office of the Comptroller of the Currency (OCC) has similar requirements for the Company's national banks, including Wells Fargo Bank, N.A. (the Bank).

Table 21.1 presents regulatory capital information for the Company and the Bank in accordance with Basel III capital requirements. We must calculate our risk-based capital ratios under both the Standardized and Advanced Approaches. The Standardized Approach applies assigned risk weights to broad risk categories, while the calculation of risk-weighted assets (RWAs) under the Advanced Approach differs by requiring applicable banks to utilize a risk-sensitive methodology, which relies upon the use of internal credit models, and includes an operational risk component.

At June 30, 2023, the Bank and our other insured depository institutions were considered well-capitalized under the requirements of the Federal Deposit Insurance Act.

Table 21.1: Regulatory Capital Information

	June 30, 2023	December 31, 2022	**June 30, 2023**	December 31, 2022
Regulatory leverage:				
Total leverage exposure (1)	**$ 2,217,575**	2,224,789	**2,005,228**	2,058,568
Supplementary leverage ratio (SLR) (1)	**6.91 %**	6.86	**7.10**	6.83
Tier 1 leverage ratio (2)	**8.28**	8.26	**8.62**	8.34
Required minimum leverage:				
Supplementary leverage ratio	**5.00**	5.00	**6.00**	6.00
Tier 1 leverage ratio	**4.00**	4.00	**4.00**	4.00

* Denotes the binding ratio under the Standardized and Advanced Approaches at June 30, 2023.

(1) The SLR consists of Tier 1 capital divided by total leverage exposure. Total leverage exposure consists of total average assets, less goodwill and other permitted Tier 1 capital deductions (net of deferred tax liabilities), plus certain off-balance sheet exposures.

(2) The Tier 1 leverage ratio consists of Tier 1 capital divided by total average assets, excluding goodwill and certain other items as determined under the rule.

At June 30, 2023, the Common Equity Tier 1 (CET1), Tier 1 and total capital ratio requirements for the Company included a global systemically important bank (G-SIB) surcharge of 1.50%. The G-SIB surcharge is not applicable to the Bank. In addition, the CET1, Tier 1 and total capital ratio requirements for the Company included a stress capital buffer of 3.20% under the Standardized Approach and a capital conservation buffer of 2.50% under the Advanced Approach. The capital ratio requirements for the Bank included a capital conservation buffer of 2.50% under both the Standardized and Advanced Approaches. The Company is required to maintain these risk-based capital ratios and to maintain an SLR of at least 5.00% (composed of a 3.00% minimum requirement plus a supplementary leverage buffer of 2.00%) to avoid restrictions on capital distributions and discretionary bonus payments. The Bank is required to maintain an SLR of at least 6.00% to be considered well-capitalized under applicable regulatory capital adequacy rules.

Capital Planning Requirements

The FRB's capital plan rule establishes capital planning and other requirements that govern capital distributions, including dividends and share repurchases, by certain large bank holding companies (BHCs), including Wells Fargo. The FRB conducts an annual Comprehensive Capital Analysis and Review exercise and has also published guidance regarding its supervisory expectations for capital planning, including capital policies regarding the process relating to common stock dividend and repurchase decisions in the FRB's SR Letter 15-18. The Parent's ability to make certain capital distributions is subject to the requirements of the capital plan rule and is also subject to the Parent meeting or exceeding certain regulatory capital minimums.

Loan and Dividend Restrictions

Federal law restricts the amount and the terms of both credit and non-credit transactions between a bank and its nonbank affiliates. Additionally, federal laws and regulations limit, and regulators can impose additional limitations on, the dividends that a national bank may pay.

Our nonbank subsidiaries are also limited by certain federal and state statutory provisions and regulations covering the amount of dividends that may be paid in any given year. In addition, under a Support Agreement dated June 28, 2017, as amended and restated on June 26, 2019, among Wells Fargo & Company, the parent holding company (Parent), WFC Holdings, LLC, an intermediate holding company and subsidiary of the Parent (IHC), the Bank, Wells Fargo Securities, LLC, Wells Fargo Clearing Services, LLC, and certain other subsidiaries of the Parent designated from time to time as material entities for resolution planning purposes or identified from time to time as related support entities in our resolution plan, the IHC may be restricted from making dividend payments to the Parent if certain liquidity and/or capital metrics fall below defined triggers or if the Parent's board of directors authorizes it to file a case under the U.S. Bankruptcy Code.

For additional information on loan and dividend restrictions, see Note 25 (Regulatory Capital Requirements and Other Restrictions) in our 2022 Form 10-K.

Cash Restrictions

Cash and cash equivalents may be restricted as to usage or withdrawal. Table 21.2 provides a summary of restrictions on cash and cash equivalents.

Glossary of Acronyms

ACL	Allowance for credit losses
AFS	Available-for-sale
AOCI	Accumulated other comprehensive income
ARM	Adjustable-rate mortgage
ASC	Accounting Standards Codification
ASU	Accounting Standards Update
AVM	Automated valuation model
BCBS	Basel Committee on Banking Supervision
BHC	Bank holding company
CCAR	Comprehensive Capital Analysis and Review
CD	Certificate of deposit
CECL	Current expected credit loss
CET1	Common Equity Tier 1
CFPB	Consumer Financial Protection Bureau
CLO	Collateralized loan obligation
CLTV	Combined loan-to-value
CPI	Collateral protection insurance
CRE	Commercial real estate
DPD	Days past due
ESOP	Employee Stock Ownership Plan
FASB	Financial Accounting Standards Board
FDIC	Federal Deposit Insurance Corporation
FHA	Federal Housing Administration
FHLB	Federal Home Loan Bank
FHLMC	Federal Home Loan Mortgage Corporation
FICO	Fair Isaac Corporation (credit rating)
FNMA	Federal National Mortgage Association
FRB	Board of Governors of the Federal Reserve System
GAAP	Generally accepted accounting principles
GNMA	Government National Mortgage Association
GSE	Government-sponsored entity
G-SIB	Global systemically important bank
HQLA	High-quality liquid assets
HTM	Held-to-maturity
LCR	Liquidity coverage ratio
LHFS	Loans held for sale
LIBOR	London Interbank Offered Rate
LIHTC	Low-income housing tax credit
LOCOM	Lower of cost or fair value
LTV	Loan-to-value
MBS	Mortgage-backed securities
MSR	Mortgage servicing right
NAV	Net asset value
NPA	Nonperforming asset
NSFR	Net stable funding ratio
OCC	Office of the Comptroller of the Currency
OCI	Other comprehensive income
OTC	Over-the-counter
PCD	Purchased credit-deteriorated
PTPP	Pre-tax pre-provision profit
RMBS	Residential mortgage-backed securities
ROA	Return on average assets
ROE	Return on average equity
ROTCE	Return on average tangible common equity
RWAs	Risk-weighted assets
SEC	Securities and Exchange Commission
S&P	Standard & Poor's Global Ratings
SLR	Supplementary leverage ratio
SOFR	Secured Overnight Financing Rate
SPE	Special purpose entity
TDR	Troubled debt restructuring
TLAC	Total Loss Absorbing Capacity
VA	Department of Veterans Affairs
VaR	Value-at-Risk
VIE	Variable interest entity
WIM	Wealth and Investment Management

PART II – OTHER INFORMATION

Item 1. Legal Proceedings

Information in response to this item can be found in Note 10 (Legal Actions) to Financial Statements in this Report which information is incorporated by reference into this item.

Item 1A. Risk Factors

Information in response to this item can be found under the "Financial Review – Risk Factors" section in this Report which information is incorporated by reference into this item.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table shows Company repurchases of its common stock for each calendar month in the quarter ended June 30, 2023.

Calendar month	Total number of shares repurchased (1)	Weighted average price paid per share	Maximum number of shares that may yet be repurchased under the authorization
April	29,637,759	$ 41.17	134,366,515
May	70,530,974	39.46	63,835,541
June	59,638	41.51	63,775,903
Total	100,228,371		

(1) All shares were repurchased under an authorization covering up to 500 million shares of common stock approved by the Board of Directors (Board) and publicly announced by the Company on January 15, 2021. The Company publicly announced on July 25, 2023, that the Board authorized a new common stock repurchase program of up to $30 billion. Unless modified or revoked by the Board, this authorization does not expire and supersedes the prior share repurchase authority approved by the Board.

Item 5. Other Information

Trading Plans

During the three months ended June 30, 2023, no director or officer (as defined in Rule 16a-1(f) under the Exchange Act) of the Company adopted or terminated a "Rule 10b5-1 trading arrangement" or "non-Rule 10b5-1 trading arrangement," as each term is defined in Item 408(a) of Regulation S-K.

Item 6. Exhibits

A list of exhibits to this Form 10-Q is set forth below.

The Company's SEC file number is 001-2979. On and before November 2, 1998, the Company filed documents with the SEC under the name Norwest Corporation. The former Wells Fargo & Company filed documents under SEC file number 001-6214.

Exhibit Number	Description	Location
3(a)	Restated Certificate of Incorporation, as amended and in effect on the date hereof.	Filed herewith.
3(b)	By-Laws.	Incorporated by reference to Exhibit 3.1 to the Company's Current Report on Form 8-K filed June 29, 2023.
4(a)	See Exhibits 3(a) and 3(b).	
4(b)	The Company agrees to furnish upon request to the Commission a copy of each instrument defining the rights of holders of senior and subordinated debt of the Company.	
10(a)	Amendment to Deferred Compensation Plan, effective July 1, 2023.	Filed herewith.
10(b)	Amendment to Supplemental 401(k) Plan, effective July 1, 2023.	Filed herewith.
10(c)	Amendment to Supplemental Cash Balance Plan, effective July 1, 2023.	Filed herewith.
10(d)	Amendment to the Wachovia Savings Restoration Plan, effective July 1, 2023.	Filed herewith.
22	Subsidiary guarantors and issuers of guaranteed securities and affiliates whose securities collateralize securities of the registrant.	Incorporated by reference to Exhibit 22 to the Company's Quarterly Report on Form 10-Q for the quarter ended March 31, 2023.
31(a)	Certification of principal executive officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.	Filed herewith.
31(b)	Certification of principal financial officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.	Filed herewith.
32(a)	Certification of Periodic Financial Report by Chief Executive Officer Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 and 18 U.S.C. § 1350.	Furnished herewith.
32(b)	Certification of Periodic Financial Report by Chief Financial Officer Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 and 18 U.S.C. § 1350.	Furnished herewith.
101.INS	Inline XBRL Instance Document	The instance document does not appear in the interactive data file because its XBRL tags are embedded within the inline XBRL document.
101.SCH	Inline XBRL Taxonomy Extension Schema Document	Filed herewith.
101.CAL	Inline XBRL Taxonomy Extension Calculation Linkbase Document	Filed herewith.
101.DEF	Inline XBRL Taxonomy Extension Definitions Linkbase Document	Filed herewith.
101.LAB	Inline XBRL Taxonomy Extension Label Linkbase Document	Filed herewith.
101.PRE	Inline XBRL Taxonomy Extension Presentation Linkbase Document	Filed herewith.
104	Cover Page Interactive Data File	Formatted as Inline XBRL and contained in Exhibit 101.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this Report to be signed on its behalf by the undersigned, thereunto duly authorized.

(1) In first quarter 2023, we adopted Financial Accounting Standards Board (FASB) Accounting Standards Update (ASU) 2018-12 – Financial Services – Insurance (Topic 944): *Targeted Improvements to the Accounting for Long-Duration Contracts*. We adopted ASU 2018-12 with retrospective application, which required revision of prior period financial statements. Prior period risk-based capital and certain other regulatory related metrics were not revised. For additional information, including the financial statement line items impacted by the adoption of ASU 2018-12, see Note 1 (Summary of Significant Accounting Policies) to Financial Statements in this Report.
(2) Pre-tax pre-provision profit (PTPP) is total revenue less noninterest expense. Management believes that PTPP is a useful financial measure because it enables investors and others to assess the Company's ability to generate capital to cover credit losses through a credit cycle.
(3) Includes provision for credit losses for loans, debt securities, and other financial assets.
(4) Book value per common share is common stockholders' equity divided by common shares outstanding. Tangible book value per common share is tangible common equity divided by common shares outstanding.
(5) Tangible common equity is a non-GAAP financial measure and represents total equity less preferred equity, noncontrolling interests, goodwill, certain identifiable intangible assets (other than mortgage servicing rights) and goodwill and other intangibles on investments in consolidated portfolio companies, net of applicable deferred taxes. The methodology of determining tangible common equity may differ among companies. Management believes that return on average tangible common equity and tangible book value per common share, which utilize tangible common equity, are useful financial measures because they enable management, investors, and others to assess the Company's use of equity. For additional information, including a corresponding reconciliation to generally accepted accounting principles (GAAP) financial measures, see the "Capital Management – Tangible Common Equity" section in this Report.
(6) Represents Wells Fargo net income divided by average assets.
(7) Represents Wells Fargo net income applicable to common stock divided by average common stockholders' equity.
(8) The efficiency ratio is noninterest expense divided by total revenue (net interest income and noninterest income).
(9) For additional information, see the "Capital Management" section and Note 21 (Regulatory Capital Requirements and Other Restrictions) to Financial Statements in this Report.
(10) Represents TLAC divided by RWAs, which is our binding TLAC ratio, determined by using the greater of RWAs under the Standardized and Advanced Approaches.
(11) Represents average high-quality liquid assets divided by average projected net cash outflows, as each is defined under the LCR rule.

This Quarterly Report, including the Financial Review and the Financial Statements and related Notes, contains forward-looking statements, which may include forecasts of our financial results and condition, expectations for our operations and business, and our assumptions for those forecasts and expectations. Do not unduly rely on forward-looking statements. Actual results may differ materially from our forward-looking statements due to several factors. Factors that could cause our actual results to differ materially from our forward-looking statements are described in this Report, including in the "Forward-Looking Statements" section, *and in the "Risk Factors" and "Regulation and Supervision" sections of our Annual Report on Form 10-K for the year ended December 31,* 2022 *(2022 Form 10-K).*

When we refer to "Wells Fargo," "the Company," "we," "our," or "us" in this Report, we mean Wells Fargo & Company and Subsidiaries (consolidated). When we refer to the "Parent," we mean Wells Fargo & Company. See the "Glossary of Acronyms" for definitions of terms used throughout this Report.

Financial Review

Overview

Wells Fargo & Company is a leading financial services company that has approximately $1.9 trillion in assets, proudly serves one in three U.S. households and more than 10% of small businesses in the U.S., and is a leading middle market banking provider in the U.S. We provide a diversified set of banking, investment and mortgage products and services, as well as consumer and commercial finance, through our four reportable operating segments: Consumer Banking and Lending, Commercial Banking, Corporate and Investment Banking, and Wealth and Investment Management. Wells Fargo ranked No. 47 on *Fortune's* 2023 rankings of America's largest corporations. We ranked fourth in assets and third in the market value of our common stock among all U.S. banks at September 30, 2023.

Wells Fargo's top priority remains building a risk and control infrastructure appropriate for its size and complexity. The Company is subject to a number of consent orders and other regulatory actions, which may require the Company, among other things, to undertake certain changes to its business, operations, products and services, and risk management practices. Addressing these regulatory actions is expected to take multiple years, and we are likely to continue to experience issues or delays along the way in satisfying their requirements. We are also likely to continue to identify more issues as we implement our risk and control infrastructure, which may result in additional regulatory actions. Issues or delays with one regulatory action could affect our progress on others, and regulators have indicated the potential for escalating consequences for banks that do not timely resolve open issues. Failure to satisfy the requirements of a regulatory action on a timely basis could result in additional penalties, business restrictions, limitations on subsidiary capital distributions, increased capital or liquidity requirements, enforcement actions, and other negative consequences, which could be significant. While we still have significant work to do and have not yet satisfied certain aspects of these regulatory actions, the Company is committed to devoting the resources necessary to operate with strong business practices and controls, maintain the highest level of integrity, and have an appropriate culture in place.

Federal Reserve Board Consent Order Regarding Governance Oversight and Compliance and Operational Risk Management

On February 2, 2018, the Company entered into a consent order with the Board of Governors of the Federal Reserve System (FRB). As required by the consent order, the Company's Board of Directors (Board) submitted to the FRB a plan to further enhance the Board's governance and oversight of the Company, and the Company submitted to the FRB a plan to further improve the Company's compliance and operational risk management program. The Company continues to engage with the FRB as the Company works to address the consent order provisions. The consent order also requires the Company, following the FRB's acceptance and approval of the plans and the Company's adoption and implementation of the plans, to complete an initial third-party review of the enhancements and improvements provided for in the plans. Until this third-party review is complete and the plans are approved and implemented to the satisfaction of the FRB, the Company's total consolidated assets as defined under the consent order will be limited to the level as of December 31, 2017. Compliance with this asset cap is measured on a two-quarter daily average basis to allow for management of temporary fluctuations. After removal of the asset cap, a second third-party review must also be conducted to assess the efficacy and sustainability of the enhancements and improvements.

Consent Orders with the Consumer Financial Protection Bureau and Office of the Comptroller of the Currency Regarding Compliance Risk Management Program, Automobile Collateral Protection Insurance Policies, and Mortgage Interest Rate Lock Extensions

On April 20, 2018, the Company entered into consent orders with the Consumer Financial Protection Bureau (CFPB) and the Office of the Comptroller of the Currency (OCC) to pay an aggregate of $1 billion in civil money penalties to resolve matters regarding the Company's compliance risk management program and past practices involving certain automobile collateral protection insurance (CPI) policies and certain mortgage interest rate lock extensions. As required by the consent orders, the Company submitted to the CFPB and OCC an enterprise-wide compliance risk management plan and a plan to enhance the Company's internal audit program with respect to federal consumer financial law and the terms of the consent orders. In addition, as required by the consent orders, the Company submitted for non-objection plans to remediate customers affected by the automobile collateral protection insurance and mortgage interest rate lock matters, as well as a plan for the management of remediation activities conducted by the Company. The Company continues to work to address the provisions of the consent orders. On September 9, 2021, the OCC assessed a $250 million civil money penalty against the Company related to insufficient progress in addressing requirements under the OCC's April 2018 consent order and loss mitigation activities in the Company's Home Lending business. On December 20, 2022, the CFPB modified its consent order to clarify how it would terminate.

Consent Order with the OCC Regarding Loss Mitigation Activities

On September 9, 2021, the Company entered into a consent order with the OCC requiring the Company to improve the execution, risk management, and oversight of loss mitigation activities in its Home Lending business. In addition, the consent order restricts the Company from acquiring certain third-party residential mortgage servicing and limits transfers of certain mortgage loans requiring customer remediation out of the Company's mortgage servicing portfolio until remediation is provided.

Consent Order with the CFPB Regarding Automobile Lending, Consumer Deposit Accounts, and Mortgage Lending

On December 20, 2022, the Company entered into a consent order with the CFPB requiring the Company to provide customer remediation for multiple matters related to automobile lending, consumer deposit accounts, and mortgage lending; maintain practices designed to ensure auto lending customers receive refunds for the unused portion of certain guaranteed automobile protection agreements; comply with certain business practice requirements related to consumer deposit accounts; and pay a $1.7 billion civil penalty to the CFPB. The required actions related to many of these matters were already substantially complete at the time we entered into the consent order, and the consent order lays out a path to termination after the Company completes the remainder of the required actions.

Retail Sales Practices Matters

In September 2016, we announced settlements with the CFPB, the OCC, and the Office of the Los Angeles City Attorney, and entered into related consent orders with the CFPB and the OCC, in connection with allegations that some of our retail customers received products and services they did not request. As a result, it remains a priority to rebuild trust through a comprehensive action plan that includes making things right for our customers, employees, and other stakeholders, and building a better Company for the future. On September 8, 2021, the CFPB consent order regarding retail sales practices expired.

For additional information regarding retail sales practices matters, including related legal and regulatory risk, see the "Risk Factors" section in our 2022 Form 10-K.

Customer Remediation Activities

Our priority of rebuilding trust has included an effort to identify areas or instances where customers may have experienced financial harm, provide remediation as appropriate, and implement additional operational and control procedures. We are working with our regulatory agencies in this effort.

We have accrued for the probable and estimable costs related to our customer remediation activities, which amounts may change based on additional facts and information, as well as ongoing reviews and communications with our regulators. We had approximately $1.5 billion and approximately $2.3 billion of accrued liabilities for customer remediation activities as of September 30, 2023, and December 31, 2022, respectively. As our ongoing reviews continue and as we continue to strengthen our risk and control infrastructure, we have identified and may in the future identify additional items or areas of potential concern. To the extent issues are identified, we will continue to assess any customer harm and provide remediation as appropriate. We have previously disclosed key areas of focus as part of these activities.

For additional information regarding these activities, including related legal and regulatory risk, see the "Risk Factors" section in our 2022 Form 10-K.

Recent Developments

Debit Card Interchange Fees

On October 25, 2023, the FRB issued a proposed rule that would reduce the amount of debit card interchange fees received by debit card issuers. In addition, the proposed rule would allow for an update to the debit card interchange fee cap every other year based on an analysis of certain costs incurred by debit card issuers. Based on a preliminary assessment, we expect a significant reduction to our debit card interchange fees, which are included in card fees, if the rule is adopted as currently proposed.

Federal Deposit Insurance Corporation Special Assessment

In May 2023, the Federal Deposit Insurance Corporation (FDIC) proposed a rule to recover by special assessment losses to the FDIC deposit insurance fund as a result of bank failures in the first half of 2023. Under the proposed rule, the FDIC would collect a special assessment based on a calculation using an insured depository institution's estimated amount of uninsured deposits. As currently proposed, the amount of our special assessment may be up to $1.8 billion (pre-tax). We expect to expense the entire amount upon the FDIC's finalization of the rule, which we expect to occur in fourth quarter 2023. The proposed rule may be changed prior to finalization and any changes may affect the timing or amount of the special assessment.

Capital Matters

On July 27, 2023, federal banking regulators issued a proposed rule that would impact the way in which risk-based capital requirements are determined for certain banks. The proposed rule would eliminate the current Advanced Approach and replace it with a new expanded risk-based approach for the measurement of risk-weighted assets, including more granular risk weights for credit risk, a new market risk framework, and a new standardized approach for measuring operational risk. The new requirements would be phased in over a three-year period beginning July 1, 2025. The Company expects a significant increase in its risk-weighted assets and a net increase in its capital requirements based on an assessment of the proposed rule. The Company is considering a range of potential actions to address the impact of the proposed rule, including balance sheet and capital optimization strategies.

For additional information about capital planning, see the "Capital Management – Capital Planning and Stress Testing" section in this Report.

Financial Performance

Adoption of Accounting Standards Update 2018-12

In first quarter 2023, we adopted Financial Accounting Standards Board (FASB) Accounting Standards Update (ASU) 2018-12 – Financial Services – Insurance (Topic 944): *Targeted Improvements to the Accounting for Long-Duration Contracts.*

We adopted this ASU with retrospective application, which required revision of prior period financial statements. Prior period risk-based capital and certain other regulatory related metrics were not revised. For additional information, including the financial statement line items impacted by the adoption of ASU 2018-12, see Note 1 (Summary of Significant Accounting Policies) to Financial Statements in this Report.

Consolidated Financial Highlights

($ in millions)	Quarter ended Sep 30, 2023	2022	$ Change	% Change	Nine months ended Sep 30, 2023	2022	$ Change	% Change

Wells Fargo net income	**5,767**	3,592	2,175	61	**15,696**	10,522	5,174	49
Wells Fargo net income applicable to common stock	**5,450**	3,313	2,137	65	**14,822**	9,685	5,137	53

(1) Includes provision for credit losses for loans, debt securities, and other financial assets.

In third quarter 2023, we generated $5.8 billion of net income and diluted earnings per common share (EPS) of $1.48, compared with $3.6 billion of net income and diluted EPS of $0.86 in the same period a year ago. Financial performance for third quarter 2023, compared with the same period a year ago, included the following:

- total revenue increased due to higher net interest income and higher noninterest income;
- provision for credit losses reflected increases for commercial real estate loans, primarily office loans, as well as for increases in credit card loan balances, partially offset by decreases for auto loans;
- noninterest expense decreased due to lower operating losses, partially offset by higher personnel expense and technology and equipment expense;
- average loans decreased driven by reductions in our consumer loan portfolio, partially offset by growth in our commercial loan portfolio; and
- average deposits decreased driven by reductions in Consumer Banking and Lending, Commercial Banking, and Wealth and Investment Management, partially offset by growth in Corporate.

In the first nine months of 2023, we generated $15.7 billion of net income and diluted EPS of $3.96, compared with $10.5 billion of net income and diluted EPS of $2.52 in the same period a year ago. Financial performance for the first nine months of 2023, compared with the same period a year ago, included the following:

- total revenue increased due to higher net interest income, partially offset by lower noninterest income;
- provision for credit losses reflected increases for commercial real estate loans, primarily office loans, as well as for increases in credit card loan balances;
- noninterest expense decreased due to lower operating losses, partially offset by higher personnel, technology and equipment, and advertising expense;
- average loans increased driven by loan growth in both our commercial and consumer loan portfolios; and
- average deposits decreased driven by reductions in all operating segments, partially offset by growth in Corporate.

Capital and Liquidity

We maintained a strong capital position in the first nine months of 2023, with total equity of $182.4 billion at September 30, 2023, compared with $182.2 billion at December 31, 2022. In addition, capital and liquidity at September 30, 2023, included the following:

- our Common Equity Tier 1 (CET1) ratio was 11.01% under the Standardized Approach (our binding ratio), which continued to exceed the regulatory minimum and buffers of 9.20%;
- our total loss absorbing capacity (TLAC) as a percentage of total risk-weighted assets was 23.98%, compared with the regulatory minimum of 21.50%; and
- our liquidity coverage ratio (LCR) was 123%, which continued to exceed the regulatory minimum of 100%.

See the “Capital Management” and the “Risk Management – Asset/Liability Management – Liquidity Risk and Funding” sections in this Report for additional information regarding our capital and liquidity, including the calculation of our regulatory capital and liquidity amounts.

Credit Quality

Credit quality reflected the following:

- The allowance for credit losses (ACL) for loans of $15.1 billion at September 30, 2023, increased $1.5 billion from December 31, 2022.
- Our provision for credit losses for loans was $4.1 billion in the first nine months of 2023, compared with $576 million in the same period a year ago. The ACL for loans and the provision for credit losses for loans reflected increases for commercial real estate loans, primarily office loans, as well as for increases in credit card loan balances.
- The allowance coverage for total loans was 1.60% at September 30, 2023, compared with 1.42% at December 31, 2022.
- Commercial portfolio net loan charge-offs were $188 million, or 13 basis points of average commercial loans, in third quarter 2023, compared with net loan charge-offs of $6 million in the same period a year ago, driven by higher losses in our commercial and industrial and commercial real estate portfolios.
- Consumer portfolio net loan charge-offs were $662 million, or 67 basis points of average consumer loans, in third quarter 2023, compared with net loan charge-offs of $393 million, or 40 basis points, in the same period a year ago, driven by higher losses in all consumer portfolios, primarily in our credit card portfolio.
- Nonperforming assets (NPAs) of $8.2 billion at September 30, 2023, increased $2.4 billion, or 42%, from

December 31, 2022, driven by higher commercial real estate nonaccrual loans, predominantly within the office property type, partially offset by lower residential mortgage nonaccrual loans. NPAs represented 0.87% of total loans at September 30, 2023.

- Criticized loans in the commercial portfolio were $31.9 billion at September 30, 2023, compared with $25.1 billion at December 31, 2022, primarily driven by an increase in criticized commercial real estate loans in the office and apartments property types.

Earnings Performance

Wells Fargo net income for third quarter 2023 was $5.8 billion ($1.48 diluted EPS), compared with $3.6 billion ($0.86 diluted EPS) in the same period a year ago. Net income increased in third quarter 2023, compared with the same period a year ago, predominantly due to a $1.0 billion increase in net interest income and a $1.2 billion decrease in noninterest expense.

Net income for the first nine months of 2023 was $15.7 billion ($3.96 diluted EPS), compared with $10.5 billion ($2.52 diluted EPS) in the same period a year ago. Net income increased in the first nine months of 2023, compared with the same period a year ago, predominantly due to a $8.1 billion increase in net interest income and a $1.2 billion decrease in noninterest expense, partially offset by a $3.5 billion increase in provision for credit losses.

Net Interest Income

Net interest income and net interest margin increased in both the third quarter and first nine months of 2023, compared with the same periods a year ago, due to the impact of higher interest rates on earning assets, partially offset by higher expenses for interest bearing deposits and long-term debt.

Table 1 presents the individual components of net interest income and net interest margin. Net interest income and net interest margin are presented on a taxable-equivalent basis in Table 1 to consistently reflect income from taxable and tax-exempt loans and debt and equity securities based on a 21% federal statutory tax rate for the periods ended September 30, 2023 and 2022.

For additional information about net interest income and net interest margin, see the “Earnings Performance – Net Interest Income” section in our 2022 Form 10-K.

Net interest margin and net interest income on a taxable-equivalent basis (3)		**$ 39,920**	**3.10%**		$ 31,837	2.46%

(1) The average balance amounts represent amortized costs, except for certain held-to-maturity (HTM) debt securities, which exclude unamortized basis adjustments related to the transfer of those securities from available-for-sale (AFS) debt securities. The average interest rates are based on interest income or expense amounts for the period and are annualized. Interest rates and amounts include the effects of hedge and risk management activities associated with the respective asset and liability categories.

(2) Nonaccrual loans and any related income are included in their respective loan categories.

(3) Includes taxable-equivalent adjustments of $104 million and $105 million for the quarters ended September 30, 2023 and 2022, respectively, and $316 million and $320 million for the first nine months of 2023 and 2022, respectively, predominantly related to tax-exempt income on certain loans and securities.

Noninterest Income

Table 2: Noninterest Income

($ in millions)	Quarter ended Sep 30, 2023	2022	$ Change	% Change	Nine months ended Sep 30, 2023	2022	$ Change	% Change

NM – Not meaningful

Third quarter 2023 vs. third quarter 2022

Deposit-related fees decreased reflecting our efforts to help customers avoid overdraft fees.

Investment advisory and other asset-based fees increased reflecting higher market valuations.

Fees from the majority of Wealth and Investment Management (WIM) advisory assets are based on a percentage of the market value of the assets at the beginning of the quarter. For additional information on certain client investment assets, see the "Earnings Performance – Operating Segment Results – Wealth and Investment Management – WIM Advisory Assets" section in this Report.

Investment banking fees increased due to increased activity across all products.

Net servicing income decreased driven by:
- lower servicing fees due to a lower balance of mortgage loans serviced for others, including the impact of mortgage servicing right (MSR) sales;

partially offset by:
- higher income from net favorable hedge results related to MSR valuations.

Net gains on mortgage loan originations/sales decreased due to lower residential mortgage origination volumes.

For additional information on servicing income and net gains on mortgage loan originations/sales, see Note 6 (Mortgage Banking Activities) to Financial Statements in this Report.

Net gains from trading activities increased driven by higher trading revenue in structured products and equities.

Net losses from equity securities decreased reflecting:
- lower impairment of equity securities;

partially offset by:
- lower realized gains on sales of nonmarketable equity securities.

First nine months of 2023 vs. first nine months of 2022

Deposit-related fees decreased reflecting:
- our efforts to help customers avoid overdraft fees; and
- lower fees on commercial accounts driven by higher earnings credit rates due to an increase in interest rates.

Investment advisory and other asset-based fees decreased reflecting lower market valuations.

Fees from the majority of WIM advisory assets are based on a percentage of the market value of the assets at the beginning of the quarter. For additional information on certain client investment assets, see the "Earnings Performance – Operating Segment Results – Wealth and Investment Management – WIM Advisory Assets" section in this Report.

Commissions and brokerage services fees increased due to higher service fee rates.

Net servicing income decreased driven by:
- lower servicing fees due to a lower balance of mortgage loans serviced for others, including the impact of MSR sales;

partially offset by:
- higher income from net favorable hedge results related to MSR valuations.

Net gains on mortgage loan originations/sales decreased due to lower residential mortgage origination volumes.

For additional information on servicing income and net gains on mortgage loan originations/sales, see Note 6 (Mortgage Banking Activities) to Financial Statements in this Report.

Net gains from trading activities increased driven by higher trading results across all asset classes.

Net gains from debt securities decreased due to lower gains on sales of asset-based securities and municipal bonds in our investment portfolio as a result of decreased sales volumes.

Net losses from equity securities increased reflecting:
- lower unrealized and realized gains on nonmarketable equity securities driven by our venture capital and private equity investments;

partially offset by:
- lower impairment of equity securities; and
- higher unrealized gains on marketable equity securities.

Other income decreased driven by the change in fair value of liabilities associated with our reinsurance business, which was recognized as a result of our adoption of ASU 2018-12 in first quarter 2023. For additional information on our adoption of ASU 2018-12, see Note 1 (Summary of Significant Accounting Policies) to Financial Statements in this Report.

Noninterest Expense

Table 3: Noninterest Expense

($ in millions)	Quarter ended Sep 30, 2023	2022	$ Change	% Change	Nine months ended Sep 30, 2023	2022	$ Change	% Change
Personnel	$ **8,627**	8,212	415	5%	$ **26,648**	25,925	723	3%

Occupancy	**724**	732	(8)	(1)	**2,144**	2,159	(15)	(1)
Operating losses (1)	**329**	2,218	(1,889)	(85)	**828**	3,467	(2,639)	(76)
Professional and outside services	**1,310**	1,235	75	6	**3,843**	3,831	12	—
Leases (2)	**172**	186	(14)	(8)	**529**	559	(30)	(5)
Advertising and promotion	**215**	126	89	71	**553**	327	226	69
Restructuring charges	**—**	—	—	—	**—**	5	(5)	(100)
Other	**761**	799	(38)	(5)	**2,387**	2,273	114	5
Total	$ **13,113**	14,306	(1,193)	(8)	$ **39,776**	41,019	(1,243)	(3)

(1) Includes expenses for legal actions of $175 million and $984 million for third quarter 2023 and 2022, respectively, and $115 million and $1.1 billion for the first nine months of 2023 and 2022, respectively, and expenses for customer remediation activities of $(30) million and $978 million for third quarter 2023 and 2022, respectively, and $133 million and $1.6 billion for the first nine months of 2023 and 2022, respectively.
(2) Represents expenses for assets we lease to customers.

Third quarter and first nine months of 2023 vs. Third quarter and first nine months of 2022

Personnel expense increased driven by:
- higher salaries expense, including higher severance expense; and
- higher incentive compensation expense;

partially offset by:
- the impact of efficiency initiatives.

Technology, telecommunications and equipment expense increased due to higher expense for the amortization of internally developed software and higher expense for technology contracts.

Operating losses decreased driven by:
- lower expense for legal actions, compared with third quarter 2022 that included amounts related to the December 2022 CFPB consent order. For additional information on legal actions, see Note 10 (Legal Actions) to Financial Statements in this Report; and
- lower expense for customer remediation activities, compared with higher expense in 2022 predominantly due to the further refinement of the scope of remediation for historical mortgage lending, automobile lending, and consumer deposit accounts matters. Expenses for customer remediation activities in the third quarter and first nine months of 2023 were lower primarily related to matters that had lower estimated costs and complexity than historical matters. For additional information on customer remediation activities, see the "Overview" section above.

As previously disclosed, we have outstanding legal actions and customer remediation activities that could impact operating losses in the coming quarters.

For additional information on operating losses, see Note 17 (Revenue and Expenses) to Financial Statements in this Report.

Advertising and promotion expense increased due to higher marketing and brand campaign volumes.

Other expense increased in the first nine months of 2023, compared with the same period a year ago, driven by higher FDIC deposit assessment expense driven by a higher assessment rate.

We expect to expense the entire amount of the FDIC's special assessment upon finalization of the proposed rule, which would result in a significant increase in our FDIC deposit assessment expense. For additional information on the FDIC's special assessment, see the "Overview – Recent Developments" section above.

Income Tax Expense

Table 4: Income Tax Expense

($ in millions)	Quarter ended Sep 30, 2023	2022	$ Change	% Change	Nine months ended Sep 30, 2023	2022	$ Change	% Change
Income before income tax expense	$ **6,547**	4,476	2,071	46%	$ **18,226**	12,738	5,488	43%
Income tax expense	**811**	912	(101)	(11)	**2,707**	2,280	427	19
Effective income tax rate (1)	**12.3%**	20.2			**14.7%**	17.8		

(1) Represents Income tax expense (benefit) divided by Income (loss) before income tax expense (benefit) less Net income (loss) from noncontrolling interests.

The effective income tax rate decreased in the third quarter and first nine months of 2023, compared with the same periods a year ago, primarily due to the impact of discrete tax benefits in third quarter 2023 related to the resolution of prior period tax matters and lower nondeductible accruals.

For additional information on income taxes, see Note 22 (Income Taxes) to Financial Statements in our 2022 Form 10-K.

Operating Segment Results

Our management reporting is organized into four reportable operating segments: Consumer Banking and Lending; Commercial Banking; Corporate and Investment Banking; and Wealth and Investment Management. All other business activities that are not included in the reportable operating segments have been included in Corporate. For additional information, see Table 5. We define our reportable operating segments by type of product and customer segment, and their results are based on our management reporting process. The management reporting process measures the performance of the reportable operating segments based on the Company's management structure, and the results are regularly reviewed with our Chief Executive Officer and relevant senior management. The management reporting process is based on U.S. GAAP and includes specific adjustments, such as funds transfer pricing for asset/liability management, shared revenue and expenses, and taxable-equivalent adjustments to consistently reflect income from taxable and tax-exempt sources, which allows management to assess performance consistently across the operating segments.

Funds Transfer Pricing Corporate treasury manages a funds transfer pricing methodology that considers interest rate risk, liquidity risk, and other product characteristics. Operating segments pay a funding charge for their assets and receive a funding credit for their deposits, both of which are included in net interest income. The net impact of the funding charges or credits is recognized in corporate treasury.

Revenue and Expense Sharing When lines of business jointly serve customers, the line of business that is responsible for providing the product or service recognizes revenue or expense with a referral fee paid or an allocation of cost to the other line of business based on established internal revenue-sharing agreements.

When a line of business uses a service provided by another line of business or enterprise function (included in Corporate), expense is generally allocated based on the cost and use of the service provided.

Taxable-Equivalent Adjustments Taxable-equivalent adjustments related to tax-exempt income on certain loans and debt securities are included in net interest income, while taxable-equivalent adjustments related to income tax credits for low-income housing and renewable energy investments are included in noninterest income, in each case with corresponding impacts to income tax expense (benefit). Adjustments are included in Corporate, Commercial Banking, and Corporate and Investment Banking and are eliminated to reconcile to the Company's consolidated financial results.

Allocated Capital Reportable operating segments are allocated capital under a risk-sensitive framework that is primarily based on aspects of our regulatory capital requirements, and the assumptions and methodologies used to allocate capital are periodically assessed and revised. Effective January 1, 2023, management modified its capital allocation methodology to improve alignment of allocated capital with the binding regulatory constraints of the Company. Management believes that return on allocated capital is a useful financial measure because it enables management, investors, and others to assess a reportable operating segment's use of capital.

Selected Metrics We present certain financial and nonfinancial metrics that management uses when evaluating reportable operating segment results. Management believes that these metrics are useful to investors and others to assess the performance, customer growth, and trends of reportable operating segments or lines of business.

Table 5: Management Reporting Structure

Wells Fargo & Company

Consumer Banking and Lending	Commercial Banking	Corporate and Investment Banking	Wealth and Investment Management	Corporate
• Consumer, Small and Business Banking • Home Lending • Credit Card • Auto • Personal Lending	• Middle Market Banking • Asset-Based Lending and Leasing	• Banking • Commercial Real Estate • Markets	• Wells Fargo Advisors • The Private Bank	• Corporate Treasury • Enterprise Functions • Investment Portfolio • Venture capital and private equity investments • Non-strategic businesses

Table 6 and the following discussion present our results by reportable operating segment. For additional information, see Note 16 (Operating Segments) to Financial Statements in this Report.

(1) All other business activities that are not included in the reportable operating segments have been included in Corporate. For additional information, see the "Corporate" section below.
(2) Taxable-equivalent adjustments related to tax-exempt income on certain loans and debt securities are included in net interest income, while taxable-equivalent adjustments related to income tax credits for low-income housing and renewable energy investments are included in noninterest income, in each case with corresponding impacts to income tax expense (benefit). Adjustments are included in Corporate, Commercial Banking, and Corporate and Investment Banking and are eliminated to reconcile to the Company's consolidated financial results.

Consumer Banking and Lending offers diversified financial products and services for consumers and small businesses with annual sales generally up to $10 million. These financial products and services include checking and savings accounts, credit and debit cards, as well as home, auto, personal, and small business lending. Table 6a and Table 6b provide additional information for Consumer Banking and Lending.

(1) Return on allocated capital is segment net income (loss) applicable to common stock divided by segment average allocated capital. Segment net income (loss) applicable to common stock is segment net income (loss) less allocated preferred stock dividends.
(2) Efficiency ratio is segment noninterest expense divided by segment total revenue (net interest income and noninterest income).
(3) Digital and mobile active customers is the number of consumer and small business customers who have logged on via a digital or mobile device, respectively, in the prior 90 days. Digital active customers includes both online and mobile customers.
(4) Deposit spread is (i) the internal funds transfer pricing credit on segment deposits minus interest paid to customers for segment deposits, divided by (ii) average segment deposits.
(5) Debit card purchase volume and transactions reflect combined activity for both consumer and business debit card purchases.
(6) Excludes residential mortgage loans subserviced for others.
(7) Excludes residential mortgage loans insured by the Federal Housing Administration (FHA) or guaranteed by the Department of Veterans Affairs (VA) and loans held for sale (LHFS).
(8) Excludes nonaccrual loans.

Third quarter 2023 vs. third quarter 2022

Revenue increased driven by:
- higher net interest income driven by higher interest rates and deposit spreads, partially offset by lower deposit balances;

partially offset by:
- lower mortgage banking noninterest income driven by lower residential mortgage origination volumes and lower servicing income, including the impact of MSR sales; and
- lower deposit-related fees reflecting our efforts to help customers avoid overdraft fees.

Provision for credit losses decreased due to:
- a $436 million decrease in the allowance for credit losses driven by a lower allowance for auto loans;

partially offset by:
- higher net charge-offs driven by our Credit Card and Personal Lending businesses.

Noninterest expense decreased due to:
- lower operating losses driven by lower expense for legal actions and customer remediation activities; and
- lower personnel expense driven by the impact of efficiency initiatives, as well as lower revenue-related incentive compensation in Home Lending due to lower production;

partially offset by:
- higher operating costs and advertising costs.

First nine months of 2023 vs. first nine months of 2022

Revenue increased driven by:
- higher net interest income driven by higher interest rates and deposit spreads, partially offset by lower deposit balances;

partially offset by:
- lower mortgage banking noninterest income due to lower residential mortgage origination volumes and lower servicing income, including the impact of MSR sales; and
- lower deposit-related fees reflecting our efforts to help customers avoid overdraft fees.

Provision for credit losses increased due to:
- a $405 million increase in the allowance for credit losses

driven by higher credit card loan balances, a less favorable economic outlook, and portfolio credit normalization, partially offset by a lower allowance for auto loans; and
- higher net charge-offs driven by our Credit Card, Personal Lending, and Auto businesses.

Noninterest expense decreased due to:
- lower operating losses driven by lower expense for legal actions and customer remediation activities; and
- lower personnel expense driven by the impact of efficiency initiatives, as well as lower revenue-related incentive compensation in Home Lending due to lower production;

partially offset by:
- higher operating costs, advertising costs, and FDIC assessments.

Table 6b: Consumer Banking and Lending – Balance Sheet

Total loans	$ **334,956**	337,352	(2,396)	(1)				
Total deposits	**798,897**	886,991	(88,094)	(10)				

Third quarter 2023 vs. third quarter 2022

Total loans (average and period-end) decreased driven by:
- a decline in loan balances in our Auto business due to lower origination volumes reflecting credit tightening actions and rising interest rates; and
- lower loan balances in Home Lending;

partially offset by:
- higher point of sale volume and the impact of new product launches in our Credit Card business; and
- higher loan balances in our Personal Lending business due to higher origination volumes and slower payment rates.

Total deposits (average and period-end) decreased due to consumer deposit outflows on consumer spending, as well as customer migration to higher yielding alternatives.

First nine months of 2023 vs. first nine months of 2022

Total loans (average) increased driven by:
- higher point of sale volume and the impact of new product launches in our Credit Card business;
- higher loan balances in Home Lending; and
- higher loan balances in our Personal Lending business due to higher origination volumes and slower payment rates;

partially offset by:
- a decline in loan balances in our Auto business due to lower origination volumes reflecting credit tightening actions and rising interest rates; and
- a decline in Paycheck Protection Program loans in Consumer, Small and Business Banking.

Total deposits (average) decreased due to consumer deposit outflows on consumer spending, as well as customer migration to higher yielding alternatives.

Commercial Banking provides financial solutions to private, family owned and certain public companies. Products and services include banking and credit products across multiple industry sectors and municipalities, secured lending and lease products, and treasury management. Table 6c and Table 6d provide additional information for Commercial Banking.

NM – Not meaningful

Third quarter 2023 vs. third quarter 2022

Revenue increased driven by:
- higher net interest income reflecting higher interest rates and higher loan balances, partially offset by lower deposit balances;

partially offset by:
- lower other noninterest income due to lower net gains from equity securities, partially offset by higher revenue from renewable energy investments.

Provision for credit losses reflected loan growth.

Noninterest expense increased due to higher operating costs and personnel expense, partially offset by lower operating losses and the impact of efficiency initiatives.

First nine months of 2023 vs. first nine months of 2022

Revenue increased driven by:
- higher net interest income reflecting higher interest rates and higher loan balances, partially offset by lower deposit balances;

partially offset by:
- lower deposit-related fees driven by the impact of higher earnings credit rates, which result in lower fees for commercial customers; and
- lower other noninterest income due to lower net gains from equity securities, partially offset by higher revenue from renewable energy investments.

Provision for credit losses reflected loan growth.

Noninterest expense increased due to higher operating costs and personnel expense, partially offset by the impact of efficiency initiatives.

Third quarter 2023 vs. third quarter 2022

Revenue increased driven by:
- higher net gains from trading activities driven by higher trading revenue in structured products and equities;
- higher investment banking fees due to increased activity across all products;
- higher net interest income reflecting higher interest rates; and
- higher other noninterest income driven by higher foreign exchange revenue, as well as higher revenue in our low-income housing business.

Provision for credit losses increased reflecting a $171 million increase in the allowance for credit losses driven by commercial real estate office loans, as well as higher net charge-offs.

Noninterest expense increased driven by higher operating costs and personnel expense, partially offset by the impact of efficiency initiatives.

First nine months of 2023 vs. first nine months of 2022

Revenue increased driven by:
- higher net gains from trading activities driven by higher trading results across all asset classes;

- higher net interest income reflecting higher interest rates; and
- higher other noninterest income driven by higher foreign exchange revenue.

Provision for credit losses increased reflecting a $1.5 billion increase in the allowance for credit losses driven by commercial real estate office loans, as well as higher net charge-offs.

Noninterest expense increased driven by higher operating costs and personnel expense, partially offset by the impact of efficiency initiatives.

Third quarter 2023 vs. third quarter 2022

Total loans (average and period-end) decreased driven by lower originations.

Total trading-related assets (average and period-end) increased reflecting:
- increased volume of reverse repurchase agreements; and
- higher trading account securities driven by higher mortgage-backed securities;

partially offset by:
- lower trading-related derivative assets due to declines in derivative balances for commodities and equities.

Total deposits (average and period-end) increased driven by additions of deposits from new and existing customers.

First nine months of 2023 vs. first nine months of 2022

Total loans (average) decreased driven by lower originations.

Total trading-related assets (average) increased reflecting:

- increased volume of reverse repurchase agreements; and
- higher trading account securities driven by higher mortgage-backed securities;

partially offset by:

- lower trading-related derivative assets due to declines in derivative balances for commodities and equities.

Total deposits (average) decreased due to customer migration to higher yielding alternatives, partially offset by additions of deposits from new and existing customers.

Wealth and Investment Management provides personalized wealth management, brokerage, financial planning, lending, private banking, trust and fiduciary products and services to affluent, high-net worth and ultra-high-net worth clients. We operate through financial advisors in our brokerage and wealth offices, consumer bank branches, independent offices, and digitally through WellsTrade® and Intuitive Investor®. Table 6g and Table 6h provide additional information for Wealth and Investment Management (WIM).

NM- Not meaningful

Third quarter 2023 vs. third quarter 2022

Revenue increased driven by:

- higher investment advisory and other asset-based fees due to higher market valuations;

partially offset by:

- lower net interest income reflecting lower deposit and loan balances, partially offset by higher interest rates.

Noninterest expense increased driven by:

- higher personnel expense driven by higher revenue-related incentive compensation; and
- higher operating costs;

partially offset by:

- the impact of efficiency initiatives.

Total deposits (average and period-end) decreased due to customer migration to higher yielding alternatives.

First nine months of 2023 vs. first nine months of 2022

Revenue decreased driven by:

- lower investment advisory and other asset-based fees due to lower market valuations and net outflows of advisory assets;

partially offset by:

- higher net interest income reflecting higher interest rates, partially offset by lower deposit balances; and

- higher commissions and brokerage services fees due to higher service fee rates.

Provision for credit losses included a $57 million increase in the allowance for credit losses reflecting a less favorable economic outlook and portfolio credit normalization.

Noninterest expense increased driven by:
- higher operating costs;

partially offset by:
- lower personnel expense driven by lower revenue-related incentive compensation; and
- the impact of efficiency initiatives.

Total deposits (average) decreased due to customer migration to higher yielding alternatives.

WIM Advisory Assets In addition to transactional accounts, WIM offers advisory account relationships to brokerage customers. Fees from advisory accounts are based on a percentage of the market value of the assets as of the beginning of the quarter, which vary across the account types based on the distinct services provided, and are affected by investment performance as well as asset inflows and outflows. Advisory accounts include assets that are financial advisor-directed and separately managed by third-party managers as well as certain client-directed brokerage assets where we earn a fee for advisory and other services, but do not have investment discretion.

WIM also manages personal trust and other assets for high net worth clients, with fee income earned based on a percentage of the market value of these assets. Table 6h presents advisory assets activity by WIM line of business. Management believes that advisory assets is a useful metric because it allows management, investors, and others to assess how changes in asset amounts may impact the generation of certain asset-based fees.

For both third quarter 2023 and 2022, the average fee rate by account type ranged from 50 to 120 basis points.

(1) Inflows include new advisory account assets, contributions, dividends and interest.
(2) Outflows include closed advisory account assets, withdrawals and client management fees.
(3) Market impact reflects gains and losses on portfolio investments.
(4) Investment advice and other services are provided to the client, but decisions are made by the client and the fees earned are based on a percentage of the advisory account assets, not the number and size of transactions executed by the client.
(5) Professionally managed portfolios with fees earned based on respective strategies and as a percentage of certain client assets.
(6) Professional advisory portfolios managed by third-party asset managers. Fees are earned based on a percentage of certain client assets.
(7) Program with portfolios constructed of load-waived, no-load, and institutional share class mutual funds. Fees are earned based on a percentage of certain client assets.
(8) Discretionary and non-discretionary portfolios held in personal trusts, investment agency, or custody accounts with fees earned based on a percentage of client assets.

Corporate includes corporate treasury and enterprise functions, net of allocations (including funds transfer pricing, capital, liquidity and certain expenses), in support of the reportable operating segments, as well as our investment portfolio and venture capital and private equity investments. Corporate also includes certain lines of business that management has determined are no longer consistent with the long-term strategic goals of the Company as well as results for previously divested businesses. In third quarter 2023, we sold investments in certain private equity funds, which had a minimal impact to net income. Table 6i and Table 6j provide additional information for Corporate.

NM – Not meaningful
(1) Reflects results attributable to noncontrolling interests predominantly associated with the Company's consolidated venture capital investments.

Third quarter 2023 vs. third quarter 2022

Revenue decreased driven by:
- lower other noninterest income reflecting assumption changes related to the valuation of our Visa B common stock exposure; and
- lower venture capital revenue.

Noninterest expense decreased driven by lower operating losses due to lower expense for legal actions.

First nine months of 2023 vs. first nine months of 2022

Revenue increased driven by:
- higher net interest income reflecting higher interest rates;

partially offset by:
- lower unrealized and realized gains on nonmarketable equity securities from our venture capital and private equity investments, partially offset by lower impairment of equity securities and higher unrealized gains on marketable equity securities;
- lower other noninterest income reflecting assumption changes related to the valuation of our Visa B common stock exposure, as well as the change in fair value of liabilities associated with our reinsurance business, which was recognized as a result of our adoption of ASU 2018-12 in first quarter 2023. For additional information on our adoption of ASU 2018-12, see Note 1 (Summary of Significant Accounting Policies) to Financial Statements in this Report; and
- lower net gains from debt securities due to lower gains on sales of asset-based securities and municipal bonds in our investment portfolio as a result of decreased sales volumes.

Noninterest expense decreased driven by:
- lower operating losses due to lower expense for legal actions; and
- the impact of previously divested businesses.

Corporate includes our rail car leasing business, which had long-lived operating lease assets, net of accumulated depreciation, of $4.5 billion and $4.7 billion as of September 30, 2023, and December 31, 2022, respectively. The average age of our rail cars is 22 years and the rail cars are typically leased to customers under short-term leases of 3 to 5 years. Our four largest concentrations, which represented 67% of our rail car fleet as of September 30, 2023, were rail cars used for the transportation of cement/sand, agricultural grain, plastics, and coal products. We may incur impairment charges in the future based on changing economic and market conditions affecting the long-term demand and utility of specific types of rail cars. Our assumptions for impairment are sensitive to estimated utilization and rental rates as well as the estimated economic life of the leased asset. For additional information on the accounting for impairment of operating lease assets, see Note 1 (Summary of Significant Accounting Policies) and Note 8 (Leasing Activity) to Financial Statements in our 2022 Form 10-K.

Cash and due from banks, and interest-earning deposits with banks	**$ 194,653**	141,743	52,910	37				
Available-for-sale debt securities (1)	**115,005**	104,726	10,279	10				
Held-to-maturity debt securities (1)	**264,248**	297,530	(33,282)	(11)				
Equity securities	**15,496**	15,581	(85)	(1)				
Total loans	**9,036**	9,096	(60)	(1)				
Total assets	**641,455**	615,382	26,073	4				
Total deposits	**128,714**	34,993	93,721	268				

(1) In first quarter 2023, we reclassified HTM debt securities with a fair value of $23.2 billion to AFS debt securities in connection with the adoption of ASU 2022-01 – Derivatives and Hedging (Topic 815): *Fair Value Hedging – Portfolio Layer Method*. For additional information, see Note 1 (Summary of Significant Accounting Policies) to Financial Statements in this Report.

Third quarter 2023 vs. third quarter 2022

Total assets (average and period-end) increased reflecting an increase in cash and due from banks, and interest-earning deposits with banks that are managed by corporate treasury driven by an increase in issuances of certificates of deposit (CDs) and long-term debt.

Total deposits (average and period-end) increased driven by issuances of CDs.

First nine months of 2023 vs. first nine months of 2022

Total assets (average) decreased reflecting:
- a decrease in cash and due from banks, and interest-earning deposits with banks that are managed by corporate treasury as a result of an increase in loans originated in the operating segments and a decrease in deposits in the operating segments, partially offset by an increase in issuances of CDs and long-term debt; and
- sales of and net unrealized losses on AFS debt securities.

Total deposits (average) increased driven by issuances of CDs.

Balance Sheet Analysis

At September 30, 2023, our assets totaled $1.91 trillion, up $28.2 billion from December 31, 2022.

The following discussion provides additional information about the major components of our consolidated balance sheet. See the "Capital Management" section in this Report for information on changes in our equity.

Available-for-Sale and Held-to-Maturity Debt Securities

Table 7: Available-for-Sale and Held-to-Maturity Debt Securities

		September 30, 2023				December 31, 2022			
($ in millions)		Amortized cost, net (1)	Net unrealized gains (losses)	Fair value	Weighted average expected maturity (yrs)		Amortized cost, net (1)	Net unrealized gains (losses)	Fair value	Weighted average expected maturity (yrs)
Available-for-sale (2)	$	**137,265**	**(10,828)**	**126,437**	**5.3**	$	121,725	(8,131)	113,594	5.4
Held-to-maturity (3)		**267,214**	**(50,287)**	**216,927**	**8.7**		297,059	(41,538)	255,521	8.1
Total	$	**404,479**	**(61,115)**	**343,364**	**n/a**	$	418,784	(49,669)	369,115	n/a

(1) Represents amortized cost of the securities, net of the allowance for credit losses of $0 and $6 million related to available-for-sale debt securities and $87 million and $85 million related to held-to-maturity debt securities at September 30, 2023, and December 31, 2022, respectively.
(2) Available-for-sale debt securities are carried on our consolidated balance sheet at fair value.
(3) Held-to-maturity debt securities are carried on our consolidated balance sheet at amortized cost, net of the allowance for credit losses.

Table 7 presents a summary of our portfolio of investments in available-for-sale (AFS) and held-to-maturity (HTM) debt securities. See the "Balance Sheet Analysis – Available-for-Sale and Held-to-Maturity Debt Securities" section in our 2022 Form 10-K for information on our investment management objectives and practices and the "Risk Management – Asset/ Liability Management" section in this Report for information on liquidity and interest rate risk.

The amortized cost, net of the allowance for credit losses, of AFS and HTM debt securities decreased from December 31, 2022. Purchases of AFS and HTM debt securities were more than offset by portfolio runoff and sales of AFS debt securities.

In addition, we transferred AFS debt securities with a fair value of $3.7 billion to HTM debt securities in the first nine months of 2023 due to actions taken to reposition the overall portfolio for capital management purposes. Debt securities transferred from AFS to HTM in the first nine months of 2023 had $320 million of pre-tax unrealized losses at the time of the transfers.

Additionally, in first quarter 2023, we also reclassified HTM debt securities with an aggregate fair value of $23.2 billion and amortized cost of $23.9 billion to AFS debt securities in connection with the adoption of ASU 2022-01, Derivatives and Hedging (Topic 815): *Fair Value Hedging – Portfolio Layer Method.* For additional information on our adoption of ASU 2022-01, see Note 1 (Summary of Significant Accounting Policies) to Financial Statements in this Report.

The total net unrealized losses on AFS and HTM debt securities increased from December 31, 2022 due to changes in interest rates.

At September 30, 2023, 99% of the combined AFS and HTM debt securities portfolio was rated AA- or above. Ratings are based on external ratings where available and, where not available, based on internal credit grades. See Note 3 (Available-for-Sale and Held-to-Maturity Debt Securities) to Financial Statements in this Report for additional information on AFS and HTM debt securities, including a summary of debt securities by security type.

Loan Portfolios

Table 8 provides a summary of total outstanding loans by portfolio segment. Commercial loans decreased from December 31, 2022, due to decreases in both the commercial and industrial and commercial real estate loan portfolios as paydowns exceeded originations and advances. Consumer loans decreased from December 31, 2022, as increases in the credit card portfolio were more than offset by decreases in all other consumer loan portfolios, primarily the residential mortgage loan portfolio.

Table 8: Loan Portfolios

($ in millions)		**Sep 30, 2023**	Dec 31, 2022	$ Change	% Change
Commercial	**$**	**551,051**	557,516	(6,465)	(1)%
Consumer		**391,373**	398,355	(6,982)	(2)
Total loans	**$**	**942,424**	955,871	(13,447)	(1)

Average loan balances and a comparative detail of average loan balances is included in Table 1 under "Earnings Performance – Net Interest Income" earlier in this Report. Additional information on total loans outstanding by portfolio segment and class of financing receivable is included in the "Risk Management – Credit Risk Management" section in this Report. Period-end balances and other loan related information are in Note 5 (Loans and Related Allowance for Credit Losses) to Financial Statements in this Report.

See the "Balance Sheet Analysis – Loan Portfolios" section in our 2022 Form 10-K for additional information regarding contractual loan maturities and the distribution of loans to changes in interest rates.

Deposits

Deposits decreased from December 31, 2022, reflecting:

- customer migration to higher yielding alternatives; and
- consumer deposit outflows on consumer spending;

partially offset by:

- higher time deposits driven by issuances of certificates of deposit (CDs).

Table 9 provides additional information regarding deposit balances. Information regarding the impact of deposits on net interest income and a comparison of average deposit balances is provided in the "Earnings Performance – Net Interest Income" section and Table 1 earlier in this Report. In response to higher interest rates, our average deposit cost in third quarter 2023 increased to 1.36%, compared with 0.46% in fourth quarter 2022.

Table 9: Deposits

($ in millions)		**Sep 30, 2023**	**% of total deposits**		Dec 31, 2022	% of total deposits		$ Change	% Change

Off-Balance Sheet Arrangements

In the ordinary course of business, we engage in financial transactions that are not recorded on our consolidated balance sheet, or may be recorded on our consolidated balance sheet in amounts that are different from the full contract or notional amount of the transaction. Our off-balance sheet arrangements include unfunded credit commitments, transactions with unconsolidated entities, guarantees, commitments to purchase debt and equity securities, derivatives, and other commitments. These transactions are designed to (1) meet the financial needs of customers, (2) manage our credit, market or liquidity risks, and/or (3) diversify our funding sources.

Unfunded Credit Commitments

Unfunded credit commitments are legally binding agreements to lend to customers with terms covering usage of funds, contractual interest rates, expiration dates, and any required collateral. The maximum credit risk for these commitments will generally be lower than the contractual amount because these commitments may expire without being used or may be cancelled at the customer's request. Our credit risk monitoring activities include managing the amount of commitments, both to individual customers and in total, and the size and maturity structure of these commitments. For additional information, see Note 5 (Loans and Related Allowance for Credit Losses) to Financial Statements in this Report.

Transactions with Unconsolidated Entities

In the normal course of business, we enter into various types of on- and off-balance sheet transactions with special purpose entities (SPEs), which are corporations, trusts, limited liability companies or partnerships that are established for a limited purpose. Generally, SPEs are formed in connection with securitization transactions and are considered variable interest entities (VIEs). For additional information, see Note 13 (Securitizations and Variable Interest Entities) to Financial Statements in this Report.

Guarantees and Other Arrangements

Guarantees are contracts that contingently require us to make payments to a guaranteed party based on an event or a change in an underlying asset, liability, rate or index. Guarantees are generally in the form of standby and direct pay letters of credit, written options, recourse obligations, exchange and clearing house guarantees, indemnifications, and other types of similar arrangements. For additional information, see Note 14 (Guarantees and Other Commitments) to Financial Statements in this Report.

Commitments to Purchase Debt and Equity Securities

We enter into commitments to purchase securities under resale agreements. We also may enter into commitments to purchase debt and equity securities to provide capital for customers' funding, liquidity or other future needs. For additional information, see Note 14 (Guarantees and Other Commitments) to Financial Statements in this Report.

Derivatives

We use derivatives to manage exposure to market risk, including interest rate risk, credit risk and foreign currency risk, and to assist customers with their risk management objectives. Derivatives are recorded on our consolidated balance sheet at fair value, and volume can be measured in terms of the notional amount, which is generally not exchanged, but is used only as the basis on which interest and other payments are determined. The notional amount is not recorded on our consolidated balance sheet and is not, when viewed in isolation, a meaningful measure of the risk profile of the instruments. For additional information, see Note 11 (Derivatives) to Financial Statements in this Report.

Wells Fargo manages a variety of risks that can significantly affect our financial performance and our ability to meet the expectations of our customers, shareholders, regulators and other stakeholders.

For additional information about how we manage risk, see the "Risk Management" section in our 2022 Form 10-K. The discussion that follows supplements our discussion of the management of certain risks contained in the "Risk Management" section in our 2022 Form 10-K.

Credit Risk Management

We define credit risk as the risk of loss associated with a borrower or counterparty default (failure to meet obligations in accordance with agreed upon terms). Credit risk exists with many of the Company's assets and exposures such as debt security holdings, certain derivatives, and loans.

The Board's Risk Committee has primary oversight responsibility for credit risk. A Credit Subcommittee of the Risk Committee assists the Risk Committee in providing oversight of credit risk. At the management level, Corporate Credit Risk, which is part of Independent Risk Management, has oversight responsibility for credit risk. Corporate Credit Risk reports to the Chief Risk Officer and supports periodic reports related to credit risk provided to the Board's Risk Committee or its Credit Subcommittee.

Loan Portfolio Our loan portfolios represent the largest component of assets on our consolidated balance sheet for which we have credit risk. Table 10 presents our total loans outstanding by portfolio segment and class of financing receivable.

Table 10: Total Loans Outstanding by Portfolio Segment and Class of Financing Receivable

(in millions)	Sep 30, 2023	Dec 31, 2022
Commercial and industrial	$ 382,527	386,806
Commercial real estate	152,486	155,802
Lease financing	16,038	14,908
Total commercial	551,051	557,516
Residential mortgage	263,174	269,117
Credit card	49,851	46,293
Auto	49,865	53,669
Other consumer	28,483	29,276
Total consumer	391,373	398,355
Total loans	$ 942,424	955,871

We manage our credit risk by establishing what we believe are sound credit policies for underwriting new business, while monitoring and reviewing the performance of our existing loan portfolios. We employ various credit risk management and monitoring activities to mitigate risks associated with multiple risk factors affecting loans we hold including:

- Loan concentrations and related credit quality;
- Counterparty credit risk;
- Economic and market conditions;
- Legislative or regulatory mandates;
- Changes in interest rates;
- Merger and acquisition activities; and
- Reputation risk.

In addition, the Company will continue to integrate climate considerations into its credit risk management activities.

Our credit risk management oversight process is governed centrally, but provides for direct management and accountability by our lines of business. Our overall credit process includes comprehensive credit policies, disciplined credit underwriting, frequent and detailed risk measurement and modeling, extensive credit training programs, and a continual loan review and audit process.

A key to our credit risk management is adherence to a well-controlled underwriting process, which we believe is appropriate for the needs of our customers as well as investors who purchase the loans or securities collateralized by the loans.

Credit Quality Overview Table 11 provides credit quality trends.

Table 11: Credit Quality Overview

($ in millions)	Sep 30, 2023	Dec 31, 2022
Nonaccrual loans		
Commercial loans	$ 4,586	1,823
Consumer loans	3,416	3,803
Total nonaccrual loans	$ 8,002	5,626
Nonaccrual loans as a % of total loans	0.85%	0.59
Allowance for credit losses (ACL) for loans	$ 15,064	13,609
ACL for loans as a % of total loans	1.60%	1.42
	Quarter ended September 30,	
	2023	2022
Net loan charge-offs as a % of:

	Nine months ended September 30,	
	2023	2022
Average commercial loans	0.11%	—
Average consumer loans	0.60	0.36

Additional information on our loan portfolios and our credit quality trends follows.

Significant Loan Portfolio Reviews Our credit risk monitoring process is designed to enable early identification of developing risk and to support our determination of an appropriate allowance for credit losses. The following discussion provides additional characteristics and analysis of our significant portfolios. See Note 5 (Loans and Related Allowance for Credit Losses) to Financial Statements in this Report for more analysis and credit metric information for each of the following portfolios.

COMMERCIAL AND INDUSTRIAL LOANS AND LEASE FINANCING

For purposes of portfolio risk management, we aggregate commercial and industrial loans and lease financing according to market segmentation and standard industry codes. We generally subject commercial and industrial loans and lease financing to individual risk assessment using our internal borrower and collateral quality ratings. Our ratings are aligned to regulatory definitions of pass and criticized categories with criticized segmented among special mention, substandard, doubtful, and loss categories.

We had $13.9 billion of the commercial and industrial loans and lease financing portfolio internally classified as criticized in accordance with regulatory guidance at September 30, 2023, compared with $12.6 billion at December 31, 2022. The increase was driven by the technology, telecom and media, and retail industries, partially offset by the equipment, machinery and parts manufacturing industry.

The majority of our commercial and industrial loans and lease financing portfolio is secured by short-term assets, such as accounts receivable, inventory and debt securities, as well as long-lived assets, such as equipment and other business assets. Generally, the primary source of repayment for this portfolio is the operating cash flows of customers, with the collateral securing this portfolio representing a secondary source of repayment.

The portfolio decreased at September 30, 2023, compared with December 31, 2022, as a result of paydowns and decreased loan draws. Table 12 provides our commercial and industrial loans and lease financing by industry. The industry categories are based on the North American Industry Classification System.

Table 12: Commercial and Industrial Loans and Lease Financing by Industry

* Less than 1%.

(1) Total commitments consist of loans outstanding plus unfunded credit commitments, excluding issued letters of credit. Effective first quarter 2023, unfunded credit commitments exclude discretionary amounts where our approval or consent is required prior to any loan funding or commitment increase. Prior period balances have been revised to conform with the current period presentation. For additional information on issued letters of credit, see Note 14 (Guarantees and Other Commitments) to Financial Statements in this Report.

(2) No other single industry had total loans in excess of $3.0 billion at September 30, 2023, and $3.4 billion at December 31, 2022, respectively.

Table 12a provides further loan segmentation for our largest industry category, financials except banks. This category includes loans to investment firms, financial vehicles, nonbank creditors, rental and leasing companies, securities firms, and investment banks. These loans are generally secured and have features to help manage credit risk, such as structural credit enhancements, collateral eligibility requirements, contractual re-margining of collateral supporting the loans, and loan amounts limited to a percentage of the value of the underlying assets considering underlying credit risk, asset duration, and ongoing performance.

Table 12a: Financials Except Banks Industry Category

Total	**$ 10**	**147,362**	**16%**	**$ 234,838**	44	147,171	15%	$ 229,822

(1) Total commitments consist of loans outstanding plus unfunded credit commitments. Effective first quarter 2023, unfunded credit commitments exclude discretionary amounts where our approval or consent is required prior to any loan funding or commitment increase. Prior period balances have been revised to conform with the current period presentation. For additional information on issued letters of credit, see Note 14 (Guarantees and Other Commitments) to Financial Statements in this Report.
(2) Includes loans for subscription or capital calls and loans to prime brokerage customers and securities firms.
(3) Includes asset-based lending and leasing, including loans to special purpose entities, loans to commercial leasing entities, structured lending facilities to commercial loan managers, and also includes collateralized loan obligations (CLOs) in loan form, all of which were rated AA or above, of $7.7 billion and $7.8 billion at September 30, 2023, and December 31, 2022, respectively.
(4) Includes originators or servicers of financial assets collateralized by consumer loans such as auto loans and leases, and credit cards.
(5) Includes originators or servicers of financial assets collateralized by commercial or residential real estate loans.

Our commercial and industrial loans and lease financing portfolio included non-U.S. loans of $74.2 billion and $79.7 billion at September 30, 2023, and December 31, 2022, respectively. Significant industry concentrations of non-U.S. loans at September 30, 2023, and December 31, 2022, respectively, included:

- $41.6 billion and $45.7 billion in the financials except banks industry;
- $11.8 billion and $14.1 billion in the banks industry; and
- $1.7 billion and $1.2 billion in the oil, gas and pipelines industry.

COMMERCIAL REAL ESTATE (CRE) Our CRE loan portfolio is comprised of CRE mortgage and CRE construction loans. The total CRE loan portfolio decreased $3.3 billion from December 31, 2022, as paydowns exceeded originations and advances. The portfolio is diversified both geographically and by property type. The largest geographic concentrations of CRE loans are in California, New York, Florida, and Texas, which represented a combined 48% of the total CRE portfolio. The largest property type concentrations are apartments at 27% and office at 21% of the portfolio. Unfunded credit commitments were $8.2 billion and $8.8 billion at September 30, 2023, and December 31, 2022, respectively, for CRE mortgage loans and $14.6 billion and $20.7 billion, respectively, for CRE construction loans.

We generally subject CRE loans to individual risk assessment using our internal borrower and collateral quality ratings. We had $16.7 billion of CRE mortgage loans classified as criticized at September 30, 2023, compared with $11.3 billion at December 31, 2022, and $1.3 billion of CRE construction loans classified as criticized at September 30, 2023, compared with $1.1 billion at December 31, 2022. The increase in criticized CRE loans was predominantly driven by the office and apartments property types. The credit quality of the office property type continued to be adversely affected as weakened demand for office space continued to drive higher vacancy rates and deteriorating operating performance. We continue to closely monitor this portfolio. At September 30, 2023, nearly one-third of the CRE loans in the office property type had recourse to a guarantor, typically through a repayment guarantee, in addition to the related collateral. Loans in California and New York represented approximately 40% of the office property type at September 30, 2023.

Table 13 provides our CRE loans by state and property type.

* Less than 1%.

(1) Total commitments consist of loans outstanding plus unfunded credit commitments, excluding issued letters of credit. For additional information on issued letters of credit, see Note 14 (Guarantees and Other Commitments) to Financial Statements in this Report.

(2) Includes 40 states and non-U.S. loans. No state in Other had loans in excess of $4.3 billion and $4.1 billion at September 30, 2023, and December 31, 2022, respectively. Non-U.S. loans were $6.9 billion and $7.6 billion at September 30, 2023, and December 31, 2022, respectively.

(3) In second quarter 2023, we reclassified certain CRE loans to better align with regulatory reporting guidance, which resulted in a decrease in loans outstanding of approximately $2.0 billion to the office property type.

NON-U.S. LOANS Our classification of non-U.S. loans is based on whether the borrower's primary address is outside of the United States. At September 30, 2023, non-U.S. loans totaled $81.3 billion, representing approximately 9% of our total consolidated loans outstanding, compared with $87.5 billion, or approximately 9% of our total consolidated loans outstanding, at December 31, 2022. Non-U.S. loans were approximately 4% and 5% of our total consolidated assets at September 30, 2023, and December 31, 2022, respectively.

COUNTRY RISK EXPOSURE Our country risk monitoring process incorporates centralized monitoring of economic, political, social, legal, and transfer risks in countries where we do or plan to do business, along with frequent dialogue with our customers, counterparties and regulatory agencies. We establish exposure limits for each country through a centralized oversight process based on customer needs, and through consideration of the relevant and distinct risk of each country. We monitor exposures closely and adjust our country limits in response to changing conditions. We evaluate our individual country risk exposure based on our assessment of a borrower's ability to repay, which gives consideration for allowable transfers of risk, such as guarantees and collateral, and may be different from the reporting based on a borrower's primary address.

Our largest single country exposure outside the U.S. at September 30, 2023, was the United Kingdom, which totaled $28.4 billion, or approximately 1% of our total assets, and included $4.2 billion of sovereign claims. Our United Kingdom sovereign claims arise from deposits we have placed with the Bank of England pursuant to regulatory requirements in support of our London branch.

Table 14 provides information regarding our top 20 exposures by country (excluding the U.S.), based on our assessment of risk, which gives consideration to the country of any guarantors and/or underlying collateral. With respect to Table 14:

- Lending and deposits exposure includes outstanding loans, unfunded credit commitments (excluding discretionary amounts where our approval or consent is required prior to any loan funding or commitment increase), and deposits with non-U.S. banks. These balances are presented prior to the deduction of allowance for credit losses or collateral received under the terms of the credit agreements, if any.
- Securities exposure represents debt and equity securities of non-U.S. issuers. Long and short positions are netted, and net short positions are reflected as negative exposure.
- Derivatives and other exposure represents foreign exchange contracts, derivative contracts, securities resale agreements, and securities lending agreements.

(1) Total non-sovereign exposure comprised $42.4 billion exposure to financial institutions and $51.1 billion to non-financial corporations at September 30, 2023.

RESIDENTIAL MORTGAGE LOANS Our residential mortgage loan portfolio is comprised of 1–4 family first and junior lien mortgage loans. Residential mortgage – first lien loans comprised 96% of the total residential mortgage loan portfolio at September 30, 2023, compared with 95% at December 31, 2022.

The residential mortgage loan portfolio includes loans with adjustable-rate features. We monitor the risk of default as a result of interest rate increases on adjustable-rate mortgage (ARM) loans, which may be mitigated by product features that limit the amount of the increase in the contractual interest rate. The default risk of these loans is considered in our ACL for loans. ARM loans were 7% of total loans at both September 30, 2023, and December 31, 2022, with an initial reset date in 2025 or later for the majority of this portfolio at September 30, 2023. We do not offer option ARM products, nor do we offer variable-rate mortgage products with fixed payment amounts, commonly referred to within the financial services industry as negative amortizing mortgage loans.

The residential mortgage – junior lien portfolio consists of residential mortgage lines of credit and loans that are subordinate in rights to an existing lien on the same property. These lines and loans may have draw periods, interest-only payments, balloon payments, adjustable rates and similar features. The outstanding balance of residential mortgage lines of credit was $15.6 billion at September 30, 2023, compared with $18.3 billion at December 31, 2022. The unfunded credit commitments for these lines of credit totaled $30.1 billion at September 30, 2023, compared with $35.5 billion at December 31, 2022. For additional information on our residential loan portfolio, see the "Risk Management – Credit Risk Management – Residential Mortgage Loans" section in our 2022 Form 10-K.

We monitor changes in real estate values and underlying economic or market conditions for all geographic areas of our residential mortgage portfolio as part of our credit risk management process. Our periodic review of this portfolio includes original appraisals adjusted for the change in Home Price Index (HPI) or estimates from automated valuation models (AVMs) to support property values. For additional information about our use of appraisals and AVMs, see Note 5 (Loans and Related Allowance for Credit Losses) to Financial Statements in this Report and the "Risk Management – Credit Risk Management – Residential Mortgage Loans" section in our 2022 Form 10-K.

Part of our credit monitoring includes tracking delinquency, current Fair Isaac Corporation (FICO) credit scores and loan/combined loan to collateral values (LTV/CLTV) on the entire residential mortgage loan portfolio. CLTV represents the ratio of the total loan balance of first and junior lien mortgages (including unused line amounts for credit line products) to property collateral value. For additional information regarding credit quality indicators, see Note 5 (Loans and Related Allowance for Credit Losses) to Financial Statements in this Report.

We continue to modify residential mortgage loans to assist homeowners and other borrowers experiencing financial difficulties. For additional information on loan modifications, see Note 5 (Loans and Related Allowance for Credit Losses) to Financial Statements in this Report and the "Risk Management – Credit Risk Management – Residential Mortgage Loans" section in our 2022 Form 10-K.

Residential Mortgage – First Lien Portfolio Our residential mortgage – first lien portfolio decreased $4.1 billion from December 31, 2022, due to loan paydowns, partially offset by originations.

Table 15 shows certain delinquency and loss information for the residential mortgage – first lien portfolio and lists the top five states by outstanding balance.

Table 15: Residential Mortgage – First Lien Portfolio Performance

(1) Quarterly net charge-offs as a percentage of average respective loans are annualized.
(2) Our residential mortgage loans to borrowers in California are located predominantly within the larger metropolitan areas, with no single California metropolitan area consisting of more than 4% of total loans.
(3) Consists of 45 states; no state in Other had loans in excess of $7.5 billion and $7.7 billion at September 30, 2023, and December 31, 2022, respectively.
(4) Represents loans, substantially all of which were purchased from Government National Mortgage Association (GNMA) loan securitization pools, where the repayment of the loans is predominantly insured by the Federal Housing Administration (FHA) or guaranteed by the Department of Veterans Affairs (VA). For additional information on GNMA loan securitization pools, see the "Risk Management – Credit Risk Management – Mortgage Banking Activities" section in this Report.

Residential Mortgage – Junior Lien Portfolio Our residential mortgage – junior lien portfolio decreased $1.8 billion from December 31, 2022, driven by loan paydowns.

Table 16 shows certain delinquency and loss information for the residential mortgage – junior lien portfolio and lists the top five states by outstanding balance.

Total junior lien mortgage portfolio	**$ 11,496**	13,310	**1.22%**	1.38	**2.11**	2.27	**(0.24)**	(0.25)

(1) Quarterly net charge-offs as a percentage of average respective loans are annualized.
(2) Consists of 45 states; no state in Other had loans in excess of $680 million and $790 million at September 30, 2023, and December 31, 2022, respectively.

CREDIT CARD, AUTO, AND OTHER CONSUMER LOANS Table 17 shows the outstanding balance of our credit card, auto, and other consumer loan portfolios. For information regarding credit quality indicators for these portfolios, see Note 5 (Loans and Related Allowance for Credit Losses) to Financial Statements in this Report.

Table 17: Credit Card, Auto, and Other Consumer Loans

	September 30, 2023		December 31, 2022	
($ in millions)	**Outstanding balance**	**% of total loans**	Outstanding balance	% of total loans
Credit card	**$ 49,851**	**5.29%**	$ 46,293	4.84%
Auto	**49,865**	**5.29**	53,669	5.61
Other consumer (1)	**28,483**	**3.02**	29,276	3.06
Total	**$ 128,199**	**13.60%**	$ 129,238	13.51%

(1) Includes $18.3 billion and $19.4 billion at September 30, 2023, and December 31, 2022, respectively, of commercial and consumer securities-based loans originated by the WIM operating segment.

Credit Card The increase in the outstanding balance at September 30, 2023, compared with December 31, 2022, was primarily due to higher purchase volume and new account growth.

Auto The decrease in the outstanding balance at September 30, 2023, compared with December 31, 2022, was due to lower origination volumes reflecting credit tightening actions and continued price competition.

Other Consumer The decrease in the outstanding balance at September 30, 2023, compared with December 31, 2022, was due to a decline in securities-based lending.

NONPERFORMING ASSETS (NONACCRUAL LOANS AND FORECLOSED ASSETS) For information about when we generally place loans on nonaccrual status, see Note 1 (Summary of Significant Accounting Policies) to Financial Statements in our 2022 Form 10-K. Table 18 summarizes nonperforming assets (NPAs).

Table 18: Nonperforming Assets (Nonaccrual Loans and Foreclosed Assets)

($ in millions)		Sep 30, 2023	Dec 31, 2022
Nonaccrual loans:			
Commercial and industrial	$	638	746
Commercial real estate		3,863	958
Lease financing		85	119
Total commercial		4,586	1,823
Residential mortgage (1)		3,258	3,611
Auto		126	153
Other consumer		32	39
Total consumer		3,416	3,803
Total nonaccrual loans	$	8,002	5,626
As a percentage of total loans		0.85%	0.59
Foreclosed assets:			
Government insured/guaranteed (2)	$	14	22
Non-government insured/guaranteed		163	115
Total foreclosed assets		177	137
Total nonperforming assets	$	8,179	5,763
As a percentage of total loans		0.87%	0.60

(1) Residential mortgage loans predominantly insured by the FHA or guaranteed by the VA are not placed on nonaccrual status because they are insured or guaranteed.
(2) Consistent with regulatory reporting requirements, foreclosed real estate resulting from government insured/guaranteed loans are classified as nonperforming. Both principal and interest related to these foreclosed real estate assets are collectible because the loans were predominantly insured by the FHA or guaranteed by the VA. Receivables related to the foreclosure of certain government guaranteed real estate mortgage loans are excluded from this table and included in accounts receivable in Other assets. For additional information on the classification of certain government-guaranteed mortgage loans upon foreclosure, see Note 1 (Summary of Significant Accounting Policies) to Financial Statements in our 2022 Form 10-K.

Commercial nonaccrual loans increased $2.8 billion from December 31, 2022, driven by an increase in commercial real estate nonaccrual loans, predominantly within the office property type. For additional information on commercial nonaccrual loans, see the “Risk Management – Credit Risk Management – Commercial and Industrial Loans and Lease Financing” and “Risk Management – Credit Risk Management – Commercial Real Estate” sections in this Report.

Consumer nonaccrual loans decreased $387 million from December 31, 2022, due to lower residential mortgage nonaccrual loans.

Table 19 provides an analysis of the changes in nonaccrual loans. Typically, changes to nonaccrual loans period-over-period represent inflows for loans that are placed on nonaccrual status in accordance with our policies, offset by reductions for loans that are paid down, charged off, sold, foreclosed, or are no longer classified as nonaccrual as a result of continued performance and an improvement in the borrower's financial condition and loan repayment capabilities.

Table 19: Analysis of Changes in Nonaccrual Loans

	Quarter ended September 30,		Nine months ended September 30,	
(in millions)	**2023**	2022	**2023**	2022
Commercial nonaccrual loans				
Balance, beginning of period	**$ 3,429**	1,719	**$ 1,823**	2,376
Inflows	**2,001**	388	**4,808**	744
Outflows:				
Returned to accruing	**(87)**	(89)	**(294)**	(371)
Foreclosures	**(48)**	(1)	**(48)**	(20)
Charge-offs	**(208)**	(57)	**(538)**	(148)
Payments, sales and other	**(501)**	(257)	**(1,165)**	(878)
Total outflows	**(844)**	(404)	**(2,045)**	(1,417)
Balance, end of period	**4,586**	1,703	**4,586**	1,703
Consumer nonaccrual loans				
Balance, beginning of period	**3,457**	4,274	**3,803**	4,836
Inflows	**326**	374	**1,009**	1,376
Outflows:				
Returned to accruing	**(131)**	(496)	**(589)**	(1,411)
Foreclosures	**(26)**	(24)	**(77)**	(59)
Charge-offs	**(40)**	(55)	**(122)**	(199)
Payments, sales and other	**(170)**	(189)	**(608)**	(659)
Total outflows	**(367)**	(764)	**(1,396)**	(2,328)
Balance, end of period	**3,416**	3,884	**3,416**	3,884
Total nonaccrual loans	**$ 8,002**	5,587	**$ 8,002**	5,587

We considered the risk of losses on nonaccrual loans in developing our allowance for loan losses. We believe exposure to losses on nonaccrual loans is mitigated by the following factors at September 30, 2023:

- 99% of total commercial nonaccrual loans are secured, the majority of which are secured by real estate.
- 91% of commercial nonaccrual loans were current on interest and 76% of commercial nonaccrual loans were current on both principal and interest, but were on nonaccrual status because the full or timely collection of interest or principal had become uncertain.
- 99% of total consumer nonaccrual loans are secured, of which 95% are secured by real estate and 98% have a CLTV ratio of 80% or less.
- $515 million of the $658 million of consumer loans in bankruptcy or discharged in bankruptcy, and classified as nonaccrual, were current.

Table 20 provides a summary of foreclosed assets and an analysis of changes in foreclosed assets.

Table 20: Foreclosed Assets

(in millions)	**Sep 30, 2023**	Dec 31, 2022
Summary by loan segment		
Government insured/guaranteed	**$ 14**	22
Commercial	**118**	65
Consumer	**45**	50
Total foreclosed assets	**$ 177**	137

	Quarter ended September 30,		Nine months ended September 30,

Balance, end of period	**$ 177**	125	**$ 177**	125

(1) Foreclosed government insured/guaranteed loans are temporarily transferred to and held by us as servicer, until reimbursement is received from the FHA or the VA.
(2) Includes loans moved into foreclosed assets from nonaccrual status and repossessed autos.

TROUBLED DEBT RESTRUCTURINGS (TDRs) In January 2023, we adopted ASU 2022-02, which eliminated the accounting and reporting guidance for TDRs. For additional information, see Note 1 (Summary of Significant Accounting Policies) to Financial Statements in this Report.

At December 31, 2022, TDRs totaled $9.2 billion. The amount of our TDRs for COVID-related loan modification programs would have otherwise been higher without the TDR relief provided by the Coronavirus Aid, Relief, and Economic Security Act (CARES Act) and the *Interagency Statement on Loan Modifications and Reporting for Financial Institutions Working with Customers Affected by the Coronavirus (Revised)* (Interagency Statement). Customers who are unable to resume making their contractual loan payments upon exiting from these programs may require further assistance and may receive or be eligible to receive modifications. For additional information on customer accommodations, including loan modifications, in response to the COVID-19 pandemic, see Note 1 (Summary of Significant Accounting Policies) to Financial Statements in our 2022 Form 10-K.

NET CHARGE-OFFS Table 21 presents net loan charge-offs.

(1) Net loan charge-offs (recoveries) as a percentage of average loans are annualized.

The increase in commercial net loan charge-offs in third quarter 2023, compared with the same period a year ago, was driven by higher losses in our commercial and industrial and commercial real estate portfolios.

The increase in consumer net loan charge-offs in third quarter 2023, compared with the same period a year ago, was driven by higher losses in all consumer portfolios, primarily in our credit card portfolio.

ALLOWANCE FOR CREDIT LOSSES We maintain an allowance for credit losses (ACL) for loans, which is management's estimate of the expected lifetime credit losses in the loan portfolio and unfunded credit commitments, at the balance sheet date, excluding loans and unfunded credit commitments carried at fair value or held for sale. Additionally, we maintain an ACL for debt securities classified as either AFS or HTM, other financial assets measured at amortized cost, including deposits with banks, net investments in leases, and other off-balance sheet credit exposures.

The process for establishing the ACL for loans takes into consideration many factors, including historical and forecasted loss trends, loan-level credit quality ratings and loan grade-specific characteristics. The process involves subjective and complex judgments. In addition, we review a variety of credit metrics and trends. These credit metrics and trends, however, do not solely determine the amount of the allowance as we use several analytical tools. For additional information on our ACL, see the "Critical Accounting Policies – Allowance for Credit Losses" section and Note 1 (Summary of Significant Accounting Policies) to Financial Statements in our 2022 Form 10-K. For additional information on our ACL for loans, see Note 5 (Loans and Related Allowance for Credit Losses) to Financial Statements in this Report, and for additional information on our ACL for debt securities, see Note 3 (Available-for-Sale and Held-to-Maturity Debt Securities) to Financial Statements in this Report.

Table 22 presents the allocation of the ACL for loans by loan portfolio segment and class.

Table 22: Allocation of the ACL for Loans

($ in millions)	Sep 30, 2023 ACL	ACL as % of loan class	Loans as % of total loans	Dec 31, 2022 ACL	ACL as % of loan class	Loans as % of total loans
Commercial and industrial	**$ 4,269**	**1.12%**	**40**	$ 4,507	1.17%	40
Commercial real estate	**3,842**	**2.52**	**16**	2,231	1.43	16
Lease financing	**199**	**1.24**	**2**	218	1.46	2
Total commercial	**8,310**	**1.51**	**58**	6,956	1.25	58
Residential mortgage (1)	**718**	**0.27**	**28**	1,096	0.41	28
Credit card	**4,021**	**8.07**	**5**	3,567	7.71	5
Auto	**1,264**	**2.53**	**5**	1,380	2.57	6
Other consumer	**751**	**2.64**	**4**	610	2.08	3
Total consumer	**6,754**	**1.73**	**42**	6,653	1.67	42
Total	**$ 15,064**	**1.60%**	**100**	$ 13,609	1.42%	100

	Sep 30, 2023	Dec 31, 2022
Components:		
Allowance for loan losses	**$ 14,554**	12,985
Allowance for unfunded credit commitments	**510**	624
Allowance for credit losses	**$ 15,064**	13,609
Ratio of allowance for loan losses to total net loan charge-offs (2)	**4.32x**	8.08
Ratio of allowance for loan losses to total nonaccrual loans	**1.82**	2.31
Allowance for loan losses as a percentage of total loans	**1.54%**	1.36

(1) Includes negative allowance for expected recoveries of amounts previously charged off.
(2) Total net loan charge-offs are annualized for the quarter ended September 30, 2023.

The ratios for the allowance for loan losses and the ACL for loans presented in Table 22 may fluctuate from period to period due to such factors as the mix of loan types in the portfolio, borrower credit strength, and the value and marketability of collateral.

The ACL for loans increased $1.5 billion, or 11%, from December 31, 2022, reflecting increases for commercial real estate loans, primarily office loans, as well as for increases in credit card loan balances, partially offset by a decrease for residential mortgage loans related to the adoption of ASU 2022-02, Financial Instruments – Credit Losses (Topic 326): *Troubled Debt Restructurings and Vintage Disclosures*. For additional information on ASU 2022-02, see Note 1 (Summary of Significant Accounting Policies) to Financial Statements in this Report. The detail of the changes in the ACL for loans by portfolio segment (including charge-offs and recoveries by loan class) is included in Note 5 (Loans and Related Allowance for Credit Losses) to Financial Statements in this Report.

We consider multiple economic scenarios to develop our estimate of the ACL for loans, which generally include a base scenario, along with an optimistic (upside) and one or more pessimistic (downside) scenarios. We weighted the base scenario and the downside scenarios in our estimate of the ACL for loans at September 30, 2023. The base scenario assumed elevated inflation and economic contraction in the near term, reflecting declining property values and increased unemployment rates from historically low levels. The downside scenarios assumed a more substantial economic contraction due to declining property values, high inflation, and lower business and consumer confidence.

Additionally, we consider qualitative factors that represent the risk of limitations inherent in our processes and assumptions such as economic environmental factors, modeling assumptions and performance, and other subjective factors, including industry trends and emerging risk assessments.

The forecasted key economic variables used in our estimate of the ACL for loans at September 30, 2023, and June 30, 2023, are presented in Table 23.

Table 23: Forecasted Key Economic Variables

	4Q 2023	2Q 2024	4Q 2024
Weighted blend of economic scenarios:			
U.S. unemployment rate (1):			
September 30, 2023	**3.8%**	**4.6**	**5.6**
June 30, 2023	4.2	5.2	5.9
U.S. real GDP (2):			
September 30, 2023	**(0.5)**	**(1.5)**	**0.3**
June 30, 2023	(1.5)	(0.8)	1.0
Home price index (3):			
September 30, 2023	**(1.6)**	**(6.1)**	**(6.8)**
June 30, 2023	(4.3)	(5.9)	(6.4)
Commercial real estate asset prices (3):			
September 30, 2023	**(7.2)**	**(13.8)**	**(10.3)**
June 30, 2023	(12.4)	(12.6)	(7.2)

(1) Quarterly average.
(2) Percent change from the preceding period, seasonally adjusted annualized rate.
(3) Percent change year over year of national average; outlook differs by geography and property type.

Future amounts of the ACL for loans will be based on a variety of factors, including loan balance changes, portfolio credit quality and mix changes, and changes in general economic conditions and expectations (including for unemployment and real GDP), among other factors.

We believe the ACL for loans of $15.1 billion at September 30, 2023, was appropriate to cover expected credit losses, including unfunded credit commitments, at that date. The entire allowance is available to absorb credit losses from the total loan portfolio. The ACL for loans is subject to change and reflects existing factors as of the date of determination, including economic or market conditions and ongoing internal and external examination processes. Due to the sensitivity of the ACL for loans to changes in the economic and business environment, it is possible that we will incur incremental credit losses not anticipated as of the balance sheet date. Our process for determining the ACL is discussed in the "Critical Accounting Policies – Allowance for Credit Losses" section and Note 1 (Summary of Significant Accounting Policies) to Financial Statements in our 2022 Form 10-K.

MORTGAGE BANKING ACTIVITIES We sell residential and commercial mortgage loans to various parties. In connection with our sales and securitization of residential mortgage loans, we have established a mortgage repurchase liability. For information on our repurchase liability, see the "Risk Management – Credit Risk Management – Mortgage Banking Activities" section in our 2022 Form 10-K.

In addition to servicing loans in our portfolio, we act as servicer and/or master servicer of residential and commercial mortgage loans included in GSE mortgage securitizations, GNMA-guaranteed mortgage securitizations of FHA-insured/VA-guaranteed mortgages and private label mortgage securitizations, as well as for unsecuritized loans owned by institutional investors.

As a servicer, we are required to advance certain delinquent payments of principal and interest on mortgage loans we service. The amount and timing of reimbursement for advances of delinquent payments vary by investor and the applicable servicing agreements. See Note 6 (Mortgage Banking Activities) to Financial Statements in this Report for additional information about residential and commercial servicing rights, servicer advances and servicing fees.

In accordance with applicable servicing guidelines, upon transfer as servicer, we have the option to repurchase loans from certain loan securitizations, which generally becomes exercisable based on delinquency status such as when three scheduled loan payments are past due. When we have the unilateral option to repurchase a loan, we recognize the loan and a corresponding liability on our balance sheet regardless of our intent to repurchase the loan. We may repurchase these loans for cash and as a result, our total consolidated assets do not change.

Loans repurchased from GNMA securitization pools that regain current status or are otherwise modified in accordance with applicable servicing guidelines may be included in future GNMA loan securitization pools. At September 30, 2023, and December 31, 2022, these loans, which we have repurchased or have the unilateral option to repurchase, were $8.0 billion and $9.8 billion, respectively, which included $7.6 billion and $8.6 billion, respectively, in loans held for investment, with the remainder in loans held for sale. See Note 13 (Securitizations and Variable Interest Entities) to Financial Statements in this Report for additional information about our involvement with mortgage loan securitizations.

For additional information about the risks related to our servicing activities, see the "Risk Management – Credit Risk Management – Mortgage Banking Activities" section in our 2022 Form 10-K. For additional information on mortgage banking activities, see Note 6 (Mortgage Banking Activities) to Financial Statements in this Report.

Asset/Liability Management

Asset/liability management involves evaluating, monitoring and managing interest rate risk, market risk, liquidity and funding. For information on our oversight of asset/liability risks, see the "Risk Management – Asset/Liability Management" section in our 2022 Form 10-K.

INTEREST RATE RISK Interest rate risk is the risk that market fluctuations in interest rates, credit spreads, or foreign exchange can cause a loss of the Company's earnings and capital stemming from mismatches in the Company's asset and liability cash flows primarily arising from customer-related activities such as lending and deposit-taking. We are subject to interest rate risk because:

- assets and liabilities may mature or reprice at different times. If assets reprice faster than liabilities and interest rates are generally rising, earnings will initially increase or when interest rates are generally falling, earnings will initially decrease;
- assets and liabilities may reprice at the same time but by different amounts;
- short-term and long-term market interest rates may change by different amounts. For example, the shape of the yield curve may affect yield for new loans and funding costs differently;
- the remaining maturity for various assets or liabilities may shorten or lengthen as interest rates change. For example, if long-term mortgage interest rates increase sharply, mortgage-related products may pay down at a slower rate than anticipated, which could impact portfolio income; or
- interest rates may have a direct or indirect effect on loan demand, collateral values, credit losses, mortgage origination volume, and the fair value of MSRs and other financial instruments.

We assess interest rate risk by comparing outcomes under various net interest income simulations using many interest rate scenarios that differ in the direction of interest rate changes, the degree of change over time, the speed of change and the projected shape of the yield curve. These simulations require assumptions regarding drivers of earnings and balance sheet composition such as loan originations, prepayment rates on loans and debt securities, deposit flows and mix, as well as pricing strategies.

Our most recent simulations, as presented in Table 24, estimate net interest income sensitivity over the next 12 months using instantaneous movements across the yield curve with both lower and higher interest rates relative to our base scenario. Steeper and flatter scenarios measure non-parallel changes in the yield curve, with long-term interest rates defined as all tenors three years and longer and short-term interest rates defined as all tenors less than three years. Where applicable, U.S. dollar interest rates are floored at 0.00%. The following describes the simulation assumptions for the scenarios presented in Table 24:

- Simulations are dynamic and reflect anticipated changes to our assets and liabilities.
- Other macroeconomic variables that could be correlated with the changes in interest rates are held constant.
- Mortgage prepayment and origination assumptions vary across scenarios and reflect only the impact of the higher or lower interest rates.

- Our base scenario deposit forecast incorporates mix changes consistent with the base interest rate trajectory. Deposit mix is modeled to be the same in the base scenario and the alternative scenarios. In higher interest rate scenarios, customer deposit activity that shifts balances into higher yielding products could impact expected net interest income.
- The interest rate sensitivity of deposits is modeled using the historical behavior of our deposits portfolio and reflects the expectations of deposit products repricing as market interest rates change (referred to as deposit betas). Our actual experience in base and alternative scenarios may differ from expectations due to the lag or acceleration of deposit repricing, changes in consumer behavior, and other factors.
- We hold the size of the projected debt and equity securities portfolios constant across scenarios.

Table 24: Net Interest Income Sensitivity Over the Next 12 Months Using Instantaneous Movements

($ in billions)		Sep 30, 2023	Dec 31, 2022
Parallel shift:			
+100 bps shift in interest rates	$	**2.1**	2.3
-100 bps shift in interest rates		**(2.1)**	(1.7)
Steeper yield curve:			
+100 bps shift in long-term interest rates		**1.1**	0.8
-100 bps shift in short-term interest rates		**(1.1)**	(1.0)
Flatter yield curve:			
+100 bps shift in short-term interest rates		**1.0**	1.5
-100 bps shift in long-term interest rates		**(1.0)**	(0.7)

The changes in our interest rate sensitivity from December 31, 2022, to September 30, 2023, in Table 24 reflected updates to our base scenario, including expectations for balance sheet composition and interest rates. Our interest rate sensitivity indicates that we would expect to benefit from higher interest rates as our assets would reprice faster and to a greater degree than our liabilities, while in the case of lower interest rates, our assets would reprice downward and to a greater degree than our liabilities resulting in lower net interest income. The magnitude of the benefit, if any, from higher interest rates may vary from our simulations, including because future deposit pricing and balances may be different from our current expectations.

The sensitivity results above do not capture noninterest income or expense impacts. Our interest rate sensitive noninterest income and expense are impacted by mortgage banking activities that may have sensitivity impacts that move in the opposite direction of our net interest income. See the "Risk Management – Asset/Liability Management – Mortgage Banking Interest Rate and Market Risk" section in our 2022 Form 10-K for additional information.

Interest rate sensitive noninterest income is also impacted by changes in earnings credit for noninterest-bearing deposits that reduce treasury management deposit-related service fees on commercial accounts, and by trading assets. In addition, the impact to net interest income does not include the fair value changes of trading securities, which, along with the effects of related economic hedges, are recorded in noninterest income. In addition to changes in interest rates, net interest income and noninterest income from trading securities may be impacted by the actual composition of the trading portfolio. For additional information on our trading assets and liabilities, see Note 2 (Trading Activities) to Financial Statements in this Report.

We use the debt securities portfolio and exchange-traded and over-the-counter (OTC) interest rate derivatives to manage our interest rate exposures. As interest rates increase, changes in the fair value of AFS debt securities may negatively affect accumulated other comprehensive income (AOCI), which lowers the amount of our regulatory capital. AOCI also includes unrealized gains or losses related to the transfer of debt securities from AFS to HTM, which are subsequently amortized into earnings over the life of the security with no further impact from interest rate changes. See Note 1 (Summary of Significant Accounting Policies) and Note 3 (Available-for-Sale and Held-to-Maturity Debt Securities) to Financial Statements in this Report for additional information on the debt securities portfolios. We use derivatives for asset/liability management in the following main ways:

- to convert the cash flows from selected asset and/or liability instruments/portfolios including certain interest-earning deposits, commercial loans and long-term debt, from floating-rate payments to fixed-rate payments, or vice versa;
- to reduce AOCI sensitivity of our AFS debt securities portfolio; and
- to economically hedge our mortgage origination pipeline, funded mortgage loans, and MSRs.

Derivatives used to hedge our interest rate risk exposures are presented in Note 11 (Derivatives) to Financial Statements in this Report.

MORTGAGE BANKING INTEREST RATE AND MARKET RISK We originate and service mortgage loans, which subjects us to various risks, including market, interest rate, credit, and liquidity risks that can be substantial. Based on market conditions and other factors, we reduce credit and liquidity risks by selling or securitizing mortgage loans. We determine whether mortgage loans will be held for investment or held for sale at the time of commitment, but may change our intent to hold loans for investment or sale as part of our corporate asset/liability management activities. We may also retain securities in our investment portfolio at the time we securitize mortgage loans.

Changes in interest rates may impact mortgage banking noninterest income, including origination and servicing fees, and the fair value of our residential MSRs, LHFS, and derivative loan commitments (interest rate "locks") extended to mortgage applicants. Interest rate changes will generally impact our mortgage banking noninterest income on a lagging basis due to the time it takes for the market to reflect a shift in customer demand, as well as the time required for processing a new application, providing the commitment, and securitizing and selling the loan. The amount and timing of the impact will depend on the magnitude, speed and duration of the changes in interest rates. For additional information on mortgage banking, including key assumptions and the sensitivity of the fair value of MSRs, see the "Risk Management – Asset/Liability Management – Mortgage Banking Interest Rate and Market Risk" section and Note 6 (Mortgage Banking Activities), Note 14 (Derivatives), and Note 15 (Fair Values of Assets and Liabilities) to Financial Statements in our 2022 Form 10-K.

MARKET RISK Market risk is the risk of possible economic loss from adverse changes in market risk factors such as interest rates, credit spreads, foreign exchange rates, equity and commodity prices, and the risk of possible loss due to counterparty exposure. This applies to implied volatility risk, basis risk, and market liquidity risk. It includes price risk in the trading book, mortgage servicing rights and the hedge effectiveness risk associated with mortgage loans held at fair value, and impairment of private equity investments. For information on our oversight of market risk, see the "Risk Management – Asset/Liability Management – Market Risk" section in our 2022 Form 10-K.

MARKET RISK – TRADING ACTIVITIES We engage in trading activities to accommodate the investment and risk management activities of our customers and to execute economic hedging to manage certain balance sheet risks. These trading activities predominantly occur within our CIB businesses and, to a lesser extent, other businesses of the Company. Debt securities held for trading, equity securities held for trading, trading loans, and trading derivatives are financial instruments used in our trading activities, and all are carried at fair value. Income earned on the financial instruments used in our trading activities include net interest income, changes in fair value, and realized gains and losses. Net interest income earned from our trading activities is reflected in the interest income and interest expense components of our consolidated statement of income. Changes in fair value of the financial instruments used in our trading activities are reflected in net gains from trading activities. For additional information on the financial instruments used in our trading activities and the income from these trading activities, see Note 2 (Trading Activities) to Financial Statements in this Report.

Value-at-risk (VaR) is a statistical risk measure used to estimate the potential loss from adverse moves in the financial markets. The Company uses VaR metrics complemented with sensitivity analysis and stress testing in measuring and monitoring market risk. For additional information on our monitoring activities, sensitivity analysis and stress testing, see the "Risk Management – Asset/Liability Management – Market Risk – Trading Activities" section in our 2022 Form 10-K.

Trading VaR is the measure used to provide insight into the market risk exhibited by the Company's trading positions. The Company calculates Trading VaR for risk management purposes to establish and monitor line of business and Company-wide risk limits. Trading VaR is calculated based on all trading positions on our consolidated balance sheet.

Table 25 shows the Company's Trading General VaR by risk category. The decrease in average Company Trading General VaR for the quarter ended September 30, 2023, compared with the same period a year ago, was primarily driven by changes in portfolio composition.

Table 25: Trading 1-Day 99% General VaR by Risk Category

												Quarter ended
	September 30, 2023				June 30, 2023				September 30, 2022			
(in millions)	**Period end**	**Average**	**Low**	**High**	Period end	Average	Low	High	Period end	Average	Low	High
Company Trading General VaR Risk Categories												
Credit	**$ 35**	**41**	**31**	**52**	50	39	21	51	37	33	26	41
Interest rate	**24**	**35**	**20**	**53**	42	44	29	65	32	28	22	34
Equity	**22**	**20**	**17**	**25**	19	19	13	24	24	23	19	28
Commodity	**2**	**3**	**2**	**4**	4	4	3	6	6	6	4	9
Foreign exchange	**1**	**1**	**0**	**1**	1	1	0	4	1	1	1	2
Diversification benefit (1)	**(56)**	**(66)**			(78)	(72)			(64)	(54)		
Company Trading General VaR	**$ 28**	**34**			38	35			36	37		

(1) The period-end VaR was less than the sum of the VaR components described above due to portfolio diversification. The diversification effect arises because the risks are not perfectly correlated causing a portfolio of positions to usually be less risky than the sum of the risks of the positions alone. The diversification benefit is not meaningful for low and high metrics since they may occur on different days.

MARKET RISK – EQUITY SECURITIES We are directly and indirectly affected by changes in the equity markets. We make and manage equity investments in various businesses, such as start-up companies and emerging growth companies. We also invest in funds that make similar private equity investments. For additional information, see the "Risk Management – Asset/Liability Management – Market Risk – Equity Securities" section in our 2022 Form 10-K.

As part of our business to support our customers, we trade public equities, listed/over-the-counter equity derivatives, and convertible bonds. We have parameters that govern these activities. We also have marketable equity securities that include investments relating to our venture capital activities. For additional information, see Note 4 (Equity Securities) to Financial Statements in this Report.

Changes in equity market prices may also indirectly affect our net income by (1) the value of third-party assets under management and, hence, fee income, (2) borrowers whose ability to repay principal and/or interest may be affected by the stock market, or (3) brokerage activity, related commission income and other business activities. Each business line monitors and manages these indirect risks.

LIQUIDITY RISK AND FUNDING Liquidity risk is the risk arising from the inability of the Company to meet obligations when they come due, or roll over funds at a reasonable cost, without incurring heightened costs. In the ordinary course of business, we enter into contractual obligations that may require future cash payments, including funding for customer loan requests, customer deposit maturities and withdrawals, debt service, leases for premises and equipment, and other cash commitments. Liquidity risk also considers the stability of deposits, including the risk of losing uninsured or non-operational deposits. The objective of effective liquidity management is to ensure that we can meet our contractual obligations and other cash commitments efficiently under both normal operating conditions and under periods of Wells Fargo-specific and/or market stress.

To help achieve this objective, the Board establishes liquidity guidelines that require sufficient asset-based liquidity to cover potential funding requirements and to avoid over-dependence on volatile, less reliable funding markets. These guidelines are monitored on a monthly basis by the management-level Corporate Asset/Liability Committee and on a quarterly basis by the Board. These guidelines are established and monitored for both the Company and the Parent on a stand-alone basis so that the Parent is a source of strength for its banking subsidiaries. For additional information on liquidity risk and funding management, see the "Risk Management – Liquidity Risk and Funding" section in our 2022 Form 10-K.

Liquidity Standards We are subject to a rule issued by the FRB, OCC and FDIC that establishes a quantitative minimum liquidity requirement consistent with the liquidity coverage ratio (LCR) established by the Basel Committee on Banking Supervision (BCBS). The rule requires a covered banking organization to hold high-quality liquid assets (HQLA) in an amount equal to or greater than its projected net cash outflows during a 30-day stress period. Our HQLA under the rule predominantly consists of central bank deposits, government debt securities, and mortgage-backed securities of federal agencies. The LCR applies to the Company and to our insured depository institutions (IDIs) with total assets of $10 billion or more. In addition, rules issued by the FRB impose enhanced liquidity risk management standards on large bank holding companies (BHCs), such as Wells Fargo.

We are also subject to a rule issued by the FRB, OCC and FDIC that establishes a stable funding requirement, known as the net stable funding ratio (NSFR), which requires a covered banking organization, such as Wells Fargo, to maintain a minimum amount of stable funding, including common equity, long-term debt and most types of deposits, in relation to its assets, derivative exposures and commitments over a one-year horizon period. The NSFR applies to the Company and to our IDIs with total assets of $10 billion or more. As of September 30, 2023, we were compliant with the NSFR requirement.

Liquidity Coverage Ratio As of September 30, 2023, the Company, Wells Fargo Bank, N.A., and Wells Fargo National Bank West exceeded the minimum LCR requirement of 100%. Table 26 presents the Company's quarterly average values for the daily-calculated LCR and its components calculated pursuant to the LCR rule requirements. The LCR represents average HQLA divided by average projected net cash outflows, as each is defined under the LCR rule.

Table 26: Liquidity Coverage Ratio

		Average for quarter ended	
(in millions, except ratio)	**Sep 30, 2023**	Jun 30, 2023	Sep 30, 2022
HQLA (1):			
Eligible cash	$ **154,258**	121,126	125,576
Eligible securities (2)	**191,606**	227,955	238,678
Total HQLA	**345,864**	349,081	364,254
Projected net cash outflows (3)	**280,468**	283,609	296,495
LCR	**123%**	123	123

(1) Excludes excess HQLA at certain subsidiaries that are not transferable to other Wells Fargo entities.
(2) Net of applicable haircuts required under the LCR rule.
(3) Projected net cash outflows are calculated by applying a standardized set of outflow and inflow assumptions, defined by the LCR rule, to various exposures and liability types, such as deposits and unfunded loan commitments, which are prescribed based on a number of factors, including the type of customer and the nature of the account.

Liquidity Sources We maintain liquidity in the form of cash, interest-earning deposits with banks, and unencumbered high-quality, liquid debt securities. These assets make up our primary sources of liquidity. Our primary sources of liquidity are substantially the same in composition as HQLA under the LCR rule; however, our primary sources of liquidity will generally exceed HQLA calculated under the LCR rule due to the applicable haircuts to HQLA and the exclusion of excess HQLA at our subsidiary IDIs required under the LCR rule. Our primary sources of liquidity are presented in Table 27 at fair value, which also includes encumbered securities that are not included as available HQLA in the calculation of the LCR.

Table 27: Primary Sources of Liquidity

			September 30, 2023			December 31, 2022
(in millions)	**Total**	**Encumbered**	**Unencumbered**	Total	Encumbered	Unencumbered
Interest-earning deposits with banks (1)	$ **185,901**	**—**	**185,901**	124,561	—	124,561
Debt securities of U.S. Treasury and federal agencies	**48,347**	**10,649**	**37,698**	59,570	12,080	47,490
Federal agency mortgage-backed securities	**224,014**	**22,660**	**201,354**	230,881	34,151	196,730
Total	$ **458,262**	**33,309**	**424,953**	415,012	46,231	368,781

(1) Excludes time deposits, which are included in interest-earning deposits with banks in our consolidated balance sheet.

Our interest-earning deposits with banks are mainly on deposit with the Federal Reserve. We believe the debt securities included in Table 27 provide quick and reliable sources of liquidity through sales or by pledging to obtain financing, regardless of market conditions. Debt securities within our HTM portfolio are not intended for sale but may be pledged to obtain financing.

As of September 30, 2023, we had approximately $451.6 billion of available borrowing capacity at various Federal Home Loan Banks and the Federal Reserve Discount Window, based on collateral pledged. Although available, we do not view this borrowing capacity as a primary source of liquidity.

In addition, liquidity is also available through the sale or financing of other debt securities, including trading and/or AFS debt securities, as well as through the sale, securitization, or financing of loans, to the extent such debt securities and loans are not encumbered.

Funding Sources The Parent acts as a source of funding for the Company through the issuance of long-term debt and equity. WFC Holdings, LLC (the "IHC") is an intermediate holding company and subsidiary of the Parent, which provides funding support for the ongoing operational requirements of the Parent and certain of its direct and indirect subsidiaries. For additional information on the IHC, see the "Regulatory Matters – 'Living Will' Requirements and Related Matters" section in our 2023 Second Quarter Report on Form 10-Q. Additional subsidiary funding is provided by deposits, short-term borrowings and long-term debt.

Deposits have historically provided a sizable source of relatively low-cost funds. Deposits were 144% and 145% of total loans at September 30, 2023, and December 31, 2022, respectively.

Table 28 presents a summary of our short-term borrowings, which generally mature in less than 30 days. The balances of federal funds purchased and securities sold under agreements to repurchase may vary over time due to client activity, our own demand for financing, and our overall mix of liabilities. For additional information on the classification of our short-term borrowings, see Note 1 (Summary of Significant Accounting Policies) to Financial Statements in our 2022 Form 10-K. We pledge certain financial instruments that we own to collateralize repurchase agreements and other securities financings. For additional information, see the "Pledged Assets" section of Note 15 (Pledged Assets and Collateral) to Financial Statements in this Report.

Table 28: Short-Term Borrowings

(in millions)		Sep 30, 2023	Dec 31, 2022
Federal funds purchased and securities sold under agreements to repurchase	$	**80,889**	30,623
Other short-term borrowings (1)		**12,441**	20,522
Total	$	**93,330**	51,145

(1) Includes $0.0 billion and $7.0 billion of Federal Home Loan Bank (FHLB) advances at September 30, 2023, and December 31, 2022, respectively.

We access domestic and international capital markets for long-term funding through issuances of registered debt securities, private placements and asset-backed secured funding. We issue long-term debt in a variety of maturities and currencies to achieve cost-efficient funding and to maintain an appropriate maturity profile. Proceeds from securities issued were used for general corporate purposes unless otherwise specified in the applicable prospectus or prospectus supplement, and we expect the proceeds from securities issued in the future will be used for the same purposes. Depending on market conditions and our liquidity position, we may redeem or repurchase, and subsequently retire, our outstanding debt securities in privately negotiated or open market transactions, by tender offer, or otherwise. We issued $6.0 billion of long-term debt in October 2023. Table 29 provides the aggregate carrying value of long-term debt maturities (based on contractual payment dates) for the remainder of 2023 and the following years thereafter, as of September 30, 2023.

Table 29: Maturity of Long-Term Debt

Total long-term debt – Other consolidated subsidiaries		2	82	400	220	—	101	805
Total long-term debt	$	7,466	28,688	20,120	29,574	10,940	93,247	190,035

(1) Includes $36.0 billion of FHLB advances.
(2) Primarily relates to unfunded commitments for low-income housing tax credit (LIHTC) investments. For additional information, see Note 16 (Securitizations and Variable Interest Entities) to Financial Statements in our 2022 Form 10-K.

Credit Ratings Investors in the long-term capital markets, as well as other market participants, generally will consider, among other factors, a company's debt rating in making investment decisions. Rating agencies base their ratings on many quantitative and qualitative factors, including capital adequacy, liquidity, asset quality, business mix, the level and quality of earnings, and rating agency assumptions regarding the probability and extent of federal financial assistance or support for certain large financial institutions. Adverse changes in these factors could result in a reduction of our credit rating; however, our debt securities do not contain credit rating covenants.

There were no actions undertaken by the rating agencies with regard to our credit ratings during third quarter 2023.

See the "Risk Factors" section in our 2022 Form 10-K for additional information regarding our credit ratings and the potential impact a credit rating downgrade would have on our liquidity and operations as well as Note 11 (Derivatives) to Financial Statements in this Report for information regarding additional collateral and funding obligations required for certain derivative instruments in the event our credit ratings were to fall below investment grade.

The credit ratings of the Parent and Wells Fargo Bank, N.A., as of September 30, 2023, are presented in Table 30.

Table 30: Credit Ratings as of September 30, 2023

	Wells Fargo & Company		Wells Fargo Bank, N.A.	
	Senior debt	Short-term borrowings	Long-term deposits	Short-term borrowings
Moody's	A1	P-1	Aa1	P-1
S&P Global Ratings	BBB+	A-2	A+	A-1
Fitch Ratings	A+	F1	AA	F1+
DBRS Morningstar	AA (low)	R-1 (middle)	AA	R-1 (high)

Capital Management

We have an active program for managing capital through a comprehensive process for assessing the Company's overall capital adequacy. Our objective is to maintain capital at an amount commensurate with our risk profile and risk tolerance objectives, and to meet both regulatory and market expectations. We primarily fund our capital needs through the retention of earnings net of both dividends and share repurchases, as well as through the issuance of preferred stock and long- and short-term debt. Retained earnings at September 30, 2023, increased $11.3 billion from December 31, 2022, predominantly as a result of $15.7 billion of Wells Fargo net income, partially offset by $4.4 billion of common and preferred stock dividends. During the first nine months of 2023, we issued $1.0 billion of common stock, substantially all of which was issued in connection with employee compensation and benefits. In the first nine months of 2023, we repurchased 220 million shares of common stock at a cost of $9.6 billion. For additional information about capital planning, see the "Capital Planning and Stress Testing" section below.

In July 2023, we issued $1.725 billion of our Preferred Stock, Series EE. In September 2023, we redeemed all of our Preferred Stock, Series Q.

Regulatory Capital Requirements

The Company and each of our IDIs are subject to various regulatory capital adequacy requirements administered by the FRB and the OCC. Risk-based capital rules establish risk-adjusted ratios relating regulatory capital to different categories of assets and off-balance sheet exposures as discussed below.

RISK-BASED CAPITAL AND RISK-WEIGHTED ASSETS The Company is subject to rules issued by federal banking regulators to implement Basel III capital requirements for U.S. banking organizations. The rules contain two frameworks for calculating capital requirements, a Standardized Approach and an Advanced Approach applicable to certain institutions, including Wells Fargo, and we must calculate our risk-based capital ratios under both approaches. The Company is required to satisfy the risk-based capital ratio requirements to avoid restrictions on capital distributions and discretionary bonus payments.

On July 27, 2023, federal banking regulators issued a proposed rule that would impact the way in which risk-based capital requirements are determined for certain banks. The proposed rule would eliminate the current Advanced Approach and replace it with a new expanded risk-based approach for the measurement of risk-weighted assets, including more granular risk weights for credit risk, a new market risk framework, and a new standardized approach for measuring operational risk. The new requirements would be phased in over a three-year period beginning July 1, 2025. The Company expects a significant increase in its risk-weighted assets and a net increase in its capital requirements based on an assessment of the proposed rule. The Company is considering a range of potential actions to address the impact of the proposed rule, including balance sheet and capital optimization strategies.

Table 31 and Table 32 present the risk-based capital requirements applicable to the Company under the Standardized Approach and Advanced Approach, respectively, as of September 30, 2023.

Table 31: Risk-Based Capital Requirements – Standardized Approach

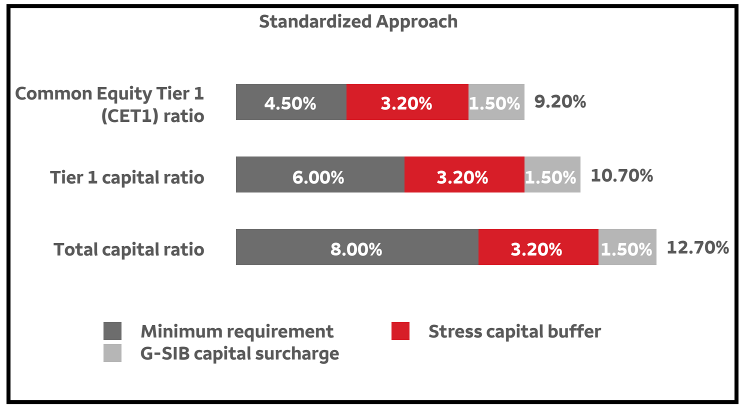

Table 32: Risk-Based Capital Requirements – Advanced Approach

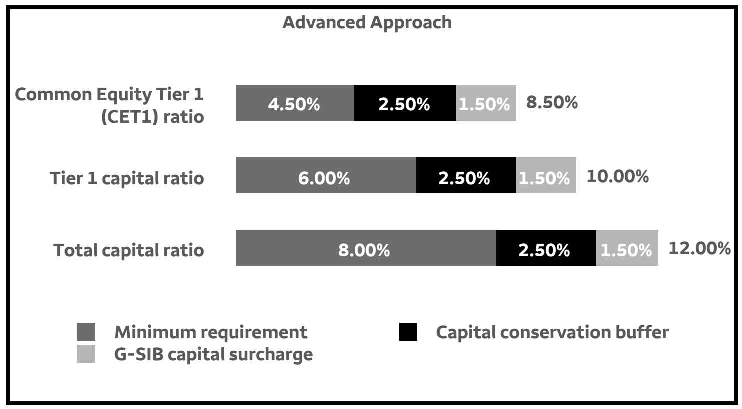

In addition to the risk-based capital requirements described in Table 31 and Table 32, if the FRB determines that a period of excessive credit growth is contributing to an increase in systemic risk, a countercyclical buffer of up to 2.50% could be added to the risk-based capital ratio requirements under federal banking regulations. The countercyclical buffer in effect at September 30, 2023, was 0.00%.

The capital conservation buffer is applicable to certain institutions, including Wells Fargo, under the Advanced Approach and is intended to absorb losses during times of economic or financial stress.

The stress capital buffer is calculated based on the decrease in a BHC's risk-based capital ratios under the severely adverse scenario in the FRB's annual supervisory stress test and related Comprehensive Capital Analysis and Review (CCAR), plus four quarters of planned common stock dividends. Because the stress capital buffer is calculated annually based on data that can differ over time, our stress capital buffer, and thus our risk-based capital ratio requirements under the Standardized Approach, are subject to change in future periods. Our stress capital buffer for the period October 1, 2022, through September 30, 2023, was 3.20%. Our stress capital buffer for the period October 1, 2023, through September 30, 2024, is 2.90%.

As a global systemically important bank (G-SIB), we are also subject to the FRB's rule implementing an additional capital surcharge between 1.00-4.50% on the risk-based capital ratio requirements of G-SIBs. Under the rule, we must annually calculate our surcharge under two methods and use the higher of the two surcharges. The first method (method one) considers our size, interconnectedness, cross-jurisdictional activity, substitutability, and complexity, consistent with the methodology developed by the BCBS and the Financial Stability Board (FSB). The second method (method two) uses similar inputs, but replaces substitutability with use of short-term wholesale funding and will generally result in higher surcharges than under method one. Because the G-SIB capital surcharge is calculated annually based on data that can differ over time, the amount of the surcharge is subject to change in future years. If our annual calculation results in a decrease to our G-SIB capital surcharge, the decrease takes effect the next calendar year. If our annual calculation results in an increase to our G-SIB capital surcharge, the increase takes effect in two calendar years. Our G-SIB capital surcharge will continue to be 1.50% in 2023. On July 27, 2023, the FRB issued a proposed rule that would impact the methodology used to calculate the G-SIB capital surcharge.

Under the risk-based capital rules, on-balance sheet assets and credit equivalent amounts of derivatives and off-balance sheet items are assigned to one of several broad risk categories according to the obligor, or, if relevant, the guarantor or the nature of any collateral. The aggregate dollar amount in each risk category is then multiplied by the risk weight associated with that category. The resulting weighted values from each of the risk categories are aggregated for determining total risk-weighted assets (RWAs).

The tables that follow provide information about our risk-based capital and related ratios as calculated under Basel III capital rules. Table 33 summarizes our CET1, Tier 1 capital, total capital, RWAs and capital ratios.

Table 33: Capital Components and Ratios

		Standardized Approach			Advanced Approach

Total qualifying capital under the Advanced Approach	(A)+(C)	$	**178,367**	177,258

(1) In first quarter 2023, we adopted ASU 2018-12. We adopted this ASU with retrospective application, which required revision of prior period financial statements. Prior period risk-based capital and certain other regulatory related metrics were not revised. For additional information, see Note 1 (Summary of Significant Accounting Policies) to Financial Statements in this Report.
(2) In third quarter 2023, we sold investments in certain private equity funds. As a result, we have removed the related goodwill and other intangible assets on investments in consolidated portfolio companies.
(3) Determined by applying the combined federal statutory rate and composite state income tax rates to the difference between book and tax basis of the respective goodwill and intangible assets at period-end.
(4) In second quarter 2020, the Company elected to apply a modified transition provision issued by federal banking regulators related to the impact of the current expected credit loss accounting standard (CECL) on regulatory capital. The rule permits certain banking organizations to exclude from regulatory capital the initial adoption impact of CECL, plus 25% of the cumulative changes in the allowance for credit losses (ACL) under CECL for each period until December 31, 2021, followed by a three-year phase-out period in which the benefit is reduced by 25% in year one, 50% in year two and 75% in year three.
(5) Differences between the approaches are driven by the qualifying amounts of ACL includable in Tier 2 capital. Under the Advanced Approach, eligible credit reserves represented by the amount of qualifying ACL in excess of expected credit losses (using regulatory definitions) is limited to 0.60% of Advanced credit RWAs, whereas the Standardized Approach includes ACL in Tier 2 capital up to 1.25% of Standardized credit RWAs. Under both approaches, any excess ACL is deducted from the respective total RWAs.

Table 35 provides the composition of our RWAs under the Standardized and Advanced Approaches.

Table 35: Risk-Weighted Assets

		Standardized Approach		Advanced Approach (1)	
(in millions)		Sep 30, 2023	Dec 31, 2022	Sep 30, 2023	Dec 31, 2022
Risk-weighted assets (RWAs):					
Credit risk	$	**1,192,380**	1,218,006	**766,120**	757,436
Market risk		**44,742**	41,883	**44,742**	41,883
Operational risk		**—**	—	**319,913**	312,988
Total RWAs	$	**1,237,122**	1,259,889	**1,130,775**	1,112,307

(1) RWAs calculated under the Advanced Approach utilize a risk-sensitive methodology, which relies upon the use of internal credit models based upon our experience with internal rating grades. Advanced Approach also includes an operational risk component, which reflects the risk of loss resulting from inadequate or failed internal processes, people and systems, or from external events.

Table 36 provides an analysis of changes in CET1.

Table 36: Analysis of Changes in Common Equity Tier 1

(in millions)		
Common Equity Tier 1 at December 31, 2022	$	133,527

RWAs at September 30, 2023	**$**	**1,237,122**	**1,130,775**

TANGIBLE COMMON EQUITY We also evaluate our business based on certain ratios that utilize tangible common equity. Tangible common equity is a non-GAAP financial measure and represents total equity less preferred equity, noncontrolling interests, goodwill, certain identifiable intangible assets (other than MSRs) and goodwill and other intangibles on investments in consolidated portfolio companies, net of applicable deferred taxes. The ratios are (i) tangible book value per common share, which represents tangible common equity divided by common shares outstanding; and (ii) return on average tangible common equity (ROTCE), which represents our annualized earnings as a percentage of tangible common equity. The methodology of determining tangible common equity may differ among companies. Management believes that tangible book value per common share and return on average tangible common equity, which utilize tangible common equity, are useful financial measures because they enable management, investors, and others to assess the Company's use of equity.

Table 38 provides a reconciliation of these non-GAAP financial measures to GAAP financial measures.

Table 38: Tangible Common Equity

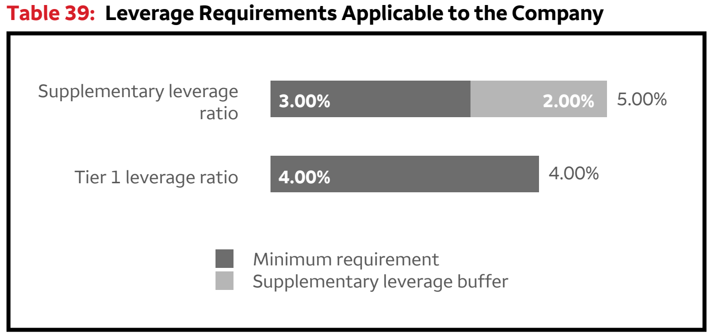
Return on average common stockholders' equity (ROE)	(D)/(A)	**N/A**	N/A	N/A	**13.28%**	11.45	8.14	**12.16%**	8.01
Return on average tangible common equity (ROTCE)	(D)/(B)	**N/A**	N/A	N/A	**15.92**	13.71	9.76	**14.56**	9.60

(1) In fourth quarter 2022, we redeemed all outstanding shares of our Employee Stock Ownership Plan (ESOP) Cumulative Convertible Preferred Stock in exchange for shares of the Company's common stock. For additional information, see Note 11 (Preferred Stock) to Financial Statements in our 2022 Form 10-K.
(2) In third quarter 2023, we sold investments in certain private equity funds. As a result, we have removed the related goodwill and other intangible assets on investments in consolidated portfolio companies.
(3) Determined by applying the combined federal statutory rate and composite state income tax rates to the difference between book and tax basis of the respective goodwill and intangible assets at period-end.

LEVERAGE REQUIREMENTS As a BHC, we are required to maintain a supplementary leverage ratio (SLR) to avoid restrictions on capital distributions and discretionary bonus payments and maintain a minimum Tier 1 leverage ratio. Table 39 presents the leverage requirements applicable to the Company as of September 30, 2023.

Table 39: Leverage Requirements Applicable to the Company



In addition, our IDIs are required to maintain an SLR of at least 6.00% to be considered well capitalized under applicable regulatory capital adequacy rules and maintain a minimum Tier 1 leverage ratio of 4.00%.

Table 40 presents information regarding the calculation and components of the Company's SLR and Tier 1 leverage ratio. At September 30, 2023, each of our IDIs exceeded their applicable SLR requirements.

Table 40: Leverage Ratios for the Company

($ in millions)			Quarter ended September 30, 2023
Tier 1 capital	(A)	$	155,219
Total average assets			1,892,002
Less: Goodwill and other permitted Tier 1 capital deductions (net of deferred tax liabilities)			27,209
Total adjusted average assets			1,864,793
Plus adjustments for off-balance sheet exposures:			
Derivatives (1)			54,367
Repo-style transactions (2)			4,022
Other (3)			315,842
Total off-balance sheet exposures			374,231
Total leverage exposure	(B)	$	2,239,024
Supplementary leverage ratio	(A)/(B)		6.93%
Tier 1 leverage ratio (4)			8.32%

(1) Adjustment represents derivatives and collateral netting exposures as defined for supplementary leverage ratio determination purposes.
(2) Adjustment represents counterparty credit risk for repo-style transactions where Wells Fargo & Company is the principal counterparty facing the client.
(3) Adjustment represents credit equivalent amounts of other off-balance sheet exposures not already included as derivatives and repo-style transactions exposures.
(4) The Tier 1 leverage ratio consists of Tier 1 capital divided by total average assets, excluding goodwill and certain other items as determined under the rule.

TOTAL LOSS ABSORBING CAPACITY As a G-SIB, we are required to have a minimum amount of equity and unsecured long-term debt for purposes of resolvability and resiliency, often referred to as Total Loss Absorbing Capacity (TLAC). U.S. G-SIBs are required to have a minimum amount of TLAC (consisting of CET1 capital and additional Tier 1 capital issued directly by the top-tier or covered BHC plus eligible external long-term debt) to avoid restrictions on capital distributions and discretionary bonus payments as well as a minimum amount of eligible unsecured long-term debt. The components used to calculate our minimum TLAC and eligible unsecured long-term debt requirements as of September 30, 2023, are presented in Table 41.

Table 41: Components Used to Calculate TLAC and Eligible Unsecured Long-Term Debt Requirements

TLAC requirement

Greater of:

18.00% of RWAs + TLAC buffer (equal to 2.50% of RWAs + method one G-SIB capital surcharge + any countercyclical buffer)	7.50% of total leverage exposure (the denominator of the SLR calculation) + External TLAC leverage buffer (equal to 2.00% of total leverage exposure)

Minimum amount of eligible unsecured long-term debt

Greater of:

6.00% of RWAs + Greater of method one and method two G-SIB capital surcharge	4.50% of total leverage exposure

In August 2023, the FRB proposed rules that would, among other things, modify the calculation of eligible long-term debt that counts towards the TLAC requirements, which would reduce our TLAC ratios.

Table 42 provides our TLAC and eligible unsecured long-term debt and related ratios.

Table 42: TLAC and Eligible Unsecured Long-Term Debt

				September 30, 2023
($ in millions)	TLAC (1)	Regulatory Minimum (2)	Eligible Unsecured Long-term Debt	Regulatory Minimum
Total eligible amount	$ 296,668		136,722	
Percentage of RWAs (3)	23.98%	21.50	11.05	7.50
Percentage of total leverage exposure	13.25	9.50	6.11	4.50

(1) TLAC ratios are calculated using the CECL transition provision issued by federal banking regulators.
(2) Represents the minimum required to avoid restrictions on capital distributions and discretionary bonus payments.
(3) Our minimum TLAC and eligible unsecured long-term debt requirements are calculated based on the greater of RWAs determined under the Standardized and Advanced Approaches.

OTHER REGULATORY CAPITAL AND LIQUIDITY MATTERS For information regarding the U.S. implementation of the Basel III LCR and NSFR, see the "Risk Management – Asset/ Liability Management – Liquidity Risk and Funding – Liquidity Standards" section in this Report.

Our principal U.S. broker-dealer subsidiaries, Wells Fargo Securities, LLC, and Wells Fargo Clearing Services, LLC, are subject to regulations to maintain minimum net capital requirements. As of September 30, 2023, these broker-dealer subsidiaries were in compliance with their respective regulatory minimum net capital requirements.

Capital Planning and Stress Testing

Our planned long-term capital structure is designed to meet regulatory and market expectations. We believe that our long-term targeted capital structure enables us to invest in and grow our business, satisfy our customers' financial needs in varying environments, access markets, and maintain flexibility to return capital to our shareholders. Our long-term targeted capital structure also considers capital levels sufficient to exceed capital requirements, including the G-SIB capital surcharge and the stress capital buffer, as well as potential changes to regulatory requirements for our capital ratios, planned capital actions, changes in our risk profile and other factors. Accordingly, our long-term target capital levels are set above their respective regulatory minimums plus buffers.

The FRB capital plan rule establishes capital planning and other requirements that govern capital distributions, including dividends and share repurchases, by certain BHCs, including Wells Fargo. The FRB assesses, among other things, the overall financial condition, risk profile, and capital adequacy of BHCs when evaluating their capital plans.

As part of the annual Comprehensive Capital Analysis and Review, the FRB generates a supervisory stress test. The FRB reviews the supervisory stress test results as required under the Dodd-Frank Act using a common set of capital actions for all large BHCs and also reviews the Company's proposed capital actions.

Federal banking regulators also require large BHCs and banks to conduct their own stress tests to evaluate whether the institution has sufficient capital to continue to operate during periods of adverse economic and financial conditions.

Securities Repurchases

From time to time the Board authorizes the Company to repurchase shares of our common stock. Although we announce when the Board authorizes share repurchases, we typically do not give any public notice before we repurchase our shares. Various factors determine the amount of our share repurchases, including our capital requirements, the number of shares we expect to issue for employee benefit plans and any acquisitions, market conditions (including the trading price of our stock), and regulatory and legal considerations, including under the FRB's capital plan rule. Due to the various factors that may impact the amount of our share repurchases and the fact that we tend to be in the market regularly to satisfy repurchase considerations under our capital plan, our share repurchases occur at various price levels. We may suspend share repurchase activity at any time.

At September 30, 2023, we had remaining Board authority to repurchase up to approximately $29 billion of common stock, subject to regulatory and legal conditions.

For additional information about share repurchases during third quarter 2023, see Part II, Item 2 in this Report.

Regulatory Matters

The U.S. financial services industry is subject to significant regulation and regulatory oversight initiatives. This regulation and oversight may continue to impact how U.S. financial services companies conduct business and may continue to result in increased regulatory compliance costs.

For a discussion of certain consent orders applicable to the Company, see the “Overview” section in this Report. For a discussion of other significant regulations and regulatory oversight initiatives that have affected or may affect our business, see the “Regulatory Matters” and “Risk Factors” sections in our 2022 Form 10-K and the “Regulatory Matters” section in our 2023 First and Second Quarter Reports on Form 10-Q.

Critical Accounting Policies

Our significant accounting policies (see Note 1 (Summary of Significant Accounting Policies) to Financial Statements in our 2022 Form 10-K) are fundamental to understanding our results of operations and financial condition because they require that we use estimates and assumptions that may affect the value of our assets or liabilities and financial results. Six of these policies are critical because they require management to make difficult, subjective and complex judgments about matters that are inherently uncertain and because it is likely that materially different amounts would be reported under different conditions or using different assumptions. These policies govern:

- the allowance for credit losses;
- the valuation of residential MSRs;
- the fair value of financial instruments;
- income taxes;
- liability for contingent litigation losses; and
- goodwill impairment.

Management has discussed these critical accounting policies and the related estimates and judgments with the Board's Audit Committee. For additional information on these policies, see the "Critical Accounting Policies" section and Note 1 (Summary of Significant Accounting Policies) to Financial Statements in our 2022 Form 10-K and Note 1 (Summary of Significant Accounting Policies) to Financial Statements in this Report.

Current Accounting Developments

Table 43 provides the significant accounting updates applicable to us that have been issued by the Financial Accounting Standards Board (FASB) but are not yet effective.

Table 43: Current Accounting Developments – Issued Standards

Description and Effective Date	Financial statement impact
Accounting Standards Update (ASU) 2023-02 – Investments – Equity Method and Joint Ventures (Topic 323): ***Accounting for Investments in Tax Credit Structures Using the Proportional Amortization Method***	
The Update, effective January 1, 2024 (with early adoption permitted), permits entities to elect to account for additional tax credit investments using the proportional amortization method. The Update requires a separate accounting policy election for each tax credit program. For any tax credit program where the proportional amortization method is elected, all investments within that program that meet eligibility criteria are required to apply the proportional amortization method. The Update also requires additional disclosures for any tax credit program where the proportional amortization method is elected.	The Update eliminates the low-income housing tax credit (LIHTC)-only scope limitation of the proportional amortization method and permits entities to account for all tax credit investments made primarily for the purpose of receiving income tax credits and income tax benefits using a consistent accounting method. Under the proportional amortization method, tax credit investments are carried at amortized cost and amortized in proportion to the income tax credits and income tax benefits received. The amortization of the investment and the related income tax credits and income tax benefits are recorded in income tax expense. The Update may be adopted on either a full retrospective or modified retrospective basis and early adoption is permitted. Upon adoption of the Update, we will identify our tax credit programs and make a separate accounting policy election as to whether to apply the proportional amortization method for each program. For any investments that will apply the proportional amortization method upon adoption of the Update, the cumulative effect of the difference between the current carrying value and the carrying value under the proportional amortization method will be recorded as an adjustment to the opening balance of retained earnings, the period of which is dependent upon which transition method is selected. We are currently evaluating the impact of the Update on our consolidated financial statements.

Other Accounting Developments

The following Update is applicable to us but is not expected to have a material impact on our consolidated financial statements:

- ASU 2022-03 – Fair Value Measurement (Topic 820): *Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions*

Forward-Looking Statements

This document contains forward-looking statements. In addition, we may make forward-looking statements in our other documents filed or furnished with the Securities and Exchange Commission, and our management may make forward-looking statements orally to analysts, investors, representatives of the media and others. Forward-looking statements can be identified by words such as “anticipates,” “intends,” “plans,” “seeks,” “believes,” “estimates,” “expects,” “target,” “projects,” “outlook,” “forecast,” “will,” “may,” “could,” “should,” “can” and similar references to future periods. In particular, forward-looking statements include, but are not limited to, statements we make about: (i) the future operating or financial performance of the Company, including our outlook for future growth; (ii) our expectations regarding noninterest expense and our efficiency ratio; (iii) future credit quality and performance, including our expectations regarding future loan losses, our allowance for credit losses, and the economic scenarios considered to develop the allowance; (iv) our expectations regarding net interest income and net interest margin; (v) loan growth or the reduction or mitigation of risk in our loan portfolios; (vi) future capital or liquidity levels, ratios or targets; (vii) our expectations regarding our mortgage business and any related commitments or exposures; (viii) the expected outcome and impact of legal, regulatory and legislative developments, as well as our expectations regarding compliance therewith; (ix) future common stock dividends, common share repurchases and other uses of capital; (x) our targeted range for return on assets, return on equity, and return on tangible common equity; (xi) expectations regarding our effective income tax rate; (xii) the outcome of contingencies, such as legal proceedings; (xiii) environmental, social and governance related goals or commitments; and (xiv) the Company’s plans, objectives and strategies.

Forward-looking statements are not based on historical facts but instead represent our current expectations and assumptions regarding our business, the economy and other future conditions. Because forward-looking statements relate to the future, they are subject to inherent uncertainties, risks and changes in circumstances that are difficult to predict. Our actual results may differ materially from those contemplated by the forward-looking statements. We caution you, therefore, against relying on any of these forward-looking statements. They are neither statements of historical fact nor guarantees or assurances of future performance. While there is no assurance that any list of risks and uncertainties or risk factors is complete, important factors that could cause actual results to differ materially from those in the forward-looking statements include the following, without limitation:

- current and future economic and market conditions, including the effects of declines in housing prices, high unemployment rates, declines in commercial real estate prices, U.S. fiscal debt, budget and tax matters, geopolitical matters (including the conflict in Ukraine), and any slowdown in global economic growth;
- the effect of the COVID-19 pandemic, including on our credit quality and business operations, as well as its impact on general economic and financial market conditions;
- our capital and liquidity requirements (including under regulatory capital standards, such as the Basel III capital standards) and our ability to generate capital internally or raise capital on favorable terms;
- current, pending or future legislation or regulation that could have a negative effect on our revenue and businesses, including rules and regulations relating to bank products and financial services;
- developments in our mortgage banking business, including any negative effects relating to our mortgage servicing, loan modification or foreclosure practices, and any changes in industry standards, regulatory or judicial requirements, or our strategic plans for the business;
- our ability to realize any efficiency ratio or expense target as part of our expense management initiatives, including as a result of business and economic cyclicality, seasonality, changes in our business composition and operating environment, growth in our businesses and/or acquisitions, and unexpected expenses relating to, among other things, litigation and regulatory matters;
- the effect of the current interest rate environment or changes in interest rates or in the level or composition of our assets or liabilities on our net interest income, net interest margin and our mortgage originations, mortgage servicing rights and mortgage loans held for sale;
- significant turbulence or a disruption in the capital or financial markets, which could result in, among other things, reduced investor demand for mortgage loans, a reduction in the availability of funding or increased funding costs, and declines in asset values and/or recognition of impairments of securities held in our debt securities and equity securities portfolios;
- the effect of a fall in stock market prices on our investment banking business and our fee income from our brokerage and wealth management businesses;
- negative effects from the retail banking sales practices matter and from instances where customers may have experienced financial harm, including on our legal, operational and compliance costs, our ability to engage in certain business activities or offer certain products or services, our ability to keep and attract customers, our ability to attract and retain qualified employees, and our reputation;
- regulatory matters, including the failure to resolve outstanding matters on a timely basis and the potential impact of new matters, litigation, or other legal actions, which may result in, among other things, additional costs, fines, penalties, restrictions on our business activities, reputational harm, or other adverse consequences;
- a failure in or breach of our operational or security systems or infrastructure, or those of our third-party vendors or other service providers, including as a result of cyber attacks;
- the effect of changes in the level of checking or savings account deposits on our funding costs and net interest margin;
- fiscal and monetary policies of the Federal Reserve Board;
- changes to U.S. tax guidance and regulations as well as the effect of discrete items on our effective income tax rate;
- our ability to develop and execute effective business plans and strategies; and
- the other risk factors and uncertainties described under “Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2022.

In addition to the above factors, we also caution that the amount and timing of any future common stock dividends or repurchases will depend on the earnings, cash requirements and financial condition of the Company, market conditions, capital requirements (including under Basel capital standards), common stock issuance requirements, applicable law and regulations (including federal securities laws and federal banking regulations), and other factors deemed relevant by the Company, and may be subject to regulatory approval or conditions.

For additional information about factors that could cause actual results to differ materially from our expectations, refer to our reports filed with the Securities and Exchange Commission, including the discussion under "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2022, as filed with the Securities and Exchange Commission and available on its website at www.sec.gov.[1]

Any forward-looking statement made by us speaks only as of the date on which it is made. Factors or events that could cause our actual results to differ may emerge from time to time, and it is not possible for us to predict all of them. We undertake no obligation to publicly update any forward-looking statement, whether as a result of new information, future developments or otherwise, except as may be required by law.

Forward-looking Non-GAAP Financial Measures. From time to time management may discuss forward-looking non-GAAP financial measures, such as forward-looking estimates or targets for return on average tangible common equity. We are unable to provide a reconciliation of forward-looking non-GAAP financial measures to their most directly comparable GAAP financial measures because we are unable to provide, without unreasonable effort, a meaningful or accurate calculation or estimation of amounts that would be necessary for the reconciliation due to the complexity and inherent difficulty in forecasting and quantifying future amounts or when they may occur. Such unavailable information could be significant to future results.

Risk Factors

An investment in the Company involves risk, including the possibility that the value of the investment could fall substantially and that dividends or other distributions on the investment could be reduced or eliminated. For a discussion of risk factors that could adversely affect our financial results and condition, and the value of, and return on, an investment in the Company, we refer you to the “Risk Factors” section in our 2022 Form 10-K.

Controls and Procedures

Disclosure Controls and Procedures

The Company's management evaluated the effectiveness, as of September 30, 2023, of the Company's disclosure controls and procedures. The Company's chief executive officer and chief financial officer participated in the evaluation. Based on this evaluation, the Company's chief executive officer and chief financial officer concluded that the Company's disclosure controls and procedures were effective as of September 30, 2023.

Internal Control Over Financial Reporting

Internal control over financial reporting is defined in Rule 13a-15(f) promulgated under the Securities Exchange Act of 1934 as a process designed by, or under the supervision of, the Company's principal executive and principal financial officers and effected by the Company's Board, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles (GAAP) and includes those policies and procedures that:

- pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of assets of the Company;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. No change occurred during third quarter 2023 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

(1) In first quarter 2023, we adopted ASU 2018-12 – Financial Services – Insurance (Topic 944): *Targeted Improvements to the Accounting for Long-Duration Contracts*. For additional information, see Note 1 (Summary of Significant Accounting Policies).

(2) Our consolidated assets at September 30, 2023, and December 31, 2022, include the following assets of certain variable interest entities (VIEs) that can only be used to settle the liabilities of those VIEs: Debt securities, $0 million and $71 million; Loans, $4.7 billion and $4.8 billion; All other assets, $288 million and $191 million; and Total assets, $5.0 billion and $5.1 billion, respectively.

(3) Our consolidated liabilities at September 30, 2023, and December 31, 2022, include $129 million and $201 million, respectively, of VIE liabilities for which the VIE creditors do not have recourse to Wells Fargo.

The accompanying notes are an integral part of these statements.

Notes to Financial Statements

-See the "Glossary of Acronyms" at the end of this Report for terms used throughout the Financial Statements and related Notes.

Note 1: Summary of Significant Accounting Policies

Wells Fargo & Company is a diversified financial services company. We provide banking, investment and mortgage products and services, as well as consumer and commercial finance, through banking locations and offices, the internet and other distribution channels to individuals, businesses and institutions in all 50 states, the District of Columbia, and in countries outside the U.S. When we refer to "Wells Fargo," "the Company," "we," "our" or "us," we mean Wells Fargo & Company and Subsidiaries (consolidated). Wells Fargo & Company (the Parent) is a financial holding company and a bank holding company. We also hold a majority interest in a real estate investment trust, which has publicly traded preferred stock outstanding.

Our accounting and reporting policies conform with U.S. generally accepted accounting principles (GAAP) and practices in the financial services industry. For discussion of our significant accounting policies, see Note 1 (Summary of Significant Accounting Policies) in our Annual Report on Form 10-K for the year ended December 31, 2022 (2022 Form 10-K). There were no material changes to these policies in the first nine months of 2023.

To prepare the financial statements in conformity with GAAP, management must make estimates based on assumptions about future economic and market conditions (for example, unemployment, market liquidity, real estate prices, etc.) that affect the reported amounts of assets and liabilities at the date of the financial statements, income and expenses during the reporting period and the related disclosures. Although our estimates contemplate current conditions and how we expect them to change in the future, it is reasonably possible that actual conditions could be worse than anticipated in those estimates, which could materially affect our results of operations and financial condition. Management has made significant estimates in several areas, including:

- allowance for credit losses (Note 5 (Loans and Related Allowance for Credit Losses));
- valuations of residential mortgage servicing rights (MSRs) (Note 6 (Mortgage Banking Activities) and Note 13 (Securitizations and Variable Interest Entities));
- valuations of financial instruments (Note 12 (Fair Values of Assets and Liabilities));
- liabilities for contingent litigation losses (Note 10 (Legal Actions));
- income taxes; and
- goodwill impairment (Note 7 (Intangible Assets and Other Assets)).

Actual results could differ from those estimates.

These unaudited interim financial statements reflect all adjustments that are, in the opinion of management, necessary for a fair statement of the results for the periods presented. These adjustments are of a normal recurring nature, unless otherwise disclosed in this Form 10-Q. The results of operations in the interim financial statements do not necessarily indicate the results that may be expected for the full year. The interim financial information should be read in conjunction with our 2022 Form 10-K.

Accounting Standards Adopted in 2023

In 2023, we adopted the following new accounting guidance:

- Accounting Standards Update (ASU) 2022-02, Financial Instruments – Credit Losses (Topic 326): *Troubled Debt Restructurings and Vintage Disclosures*
- ASU 2022-01, Derivatives and Hedging (Topic 815): *Fair Value Hedging – Portfolio Layer Method*
- ASU 2021-08, Business Combinations (Topic 805): *Accounting for Contract Assets and Contract Liabilities from Contracts with Customers*
- ASU 2018-12, Financial Services – Insurance (Topic 944): *Targeted Improvements to the Accounting for Long-Duration Contracts* and subsequent related updates

ASU 2022-02 eliminates the accounting and reporting for troubled debt restructurings (TDRs) by creditors and introduces new required disclosures for loan modifications made to borrowers experiencing financial difficulty. The new required disclosures include information about modifications granted to borrowers experiencing financial difficulty in the form of principal forgiveness, interest rate reductions, other-than-insignificant payment delays, term extensions, or a combination of these modifications. The ASU also requires new disclosures for the financial effects of these modifications and for loan performance in the twelve months following the modification. The Update also amends the guidance for vintage disclosures to require disclosure of current period gross charge-offs by year of origination. See Note 5 (Loans and Related Allowance for Credit Losses) for additional information related to the new disclosures for loan modifications to borrowers experiencing financial difficulty and for gross charge-offs by year of origination, which are provided on a prospective basis.

The Update eliminates the requirement to use a discounted cash flow (DCF) approach to measure the allowance for credit losses (ACL) for TDRs and instead allows for the use of a current expected credit loss approach for all loans. Under a current expected credit loss approach, the impact of loan modifications and the subsequent performance of modified loans, including defaults, is reflected in the historical loss data used to calculate expected lifetime credit losses. Upon adoption on January 1, 2023, we discontinued utilizing a DCF approach to measure credit impairment for consumer loans and certain commercial loans previously modified in a TDR and we removed the interest concession component recognized in the ACL. We elected to apply the modified-retrospective transition approach method, resulting in a cumulative effect adjustment to retained earnings upon adoption, which reflects the difference between the pre-modification and post-modification effective interest rates that would have been recognized over the remaining life of the loans as interest income. Upon adoption, we recognized a decrease in our ACL of $429 million, pre-tax, and an increase to our retained earnings of $323 million, after tax. We continue to use a DCF approach for certain non-accruing, non-collateral dependent commercial loans.

ASU 2022-01 establishes the portfolio layer method, which expands an entity's ability to achieve fair value hedge accounting for interest rate risk hedges of closed portfolios of financial assets. The Update also provides guidance on the accounting for hedged item basis adjustments under the portfolio layer method.

We adopted ASU 2022-01 on January 1, 2023 on a prospective basis. No cumulative effect adjustment to the opening balance of stockholders' equity was required upon adoption, as impacts to us were reflected prospectively. The portfolio layer method improves our ability to use derivatives to hedge interest rate risk exposures associated with portfolios of financial assets, such as fixed-rate available-for-sale (AFS) debt securities and loans. The Update allows us to hedge a larger proportion of these portfolios by expanding the number and type of derivatives permitted as eligible hedges, as well as by increasing the scope of eligible hedged items to include both prepayable and nonprepayable assets. Unlike other fair value hedging relationships where basis adjustments adjust the carrying amount of the individual hedged item, basis adjustments related to active portfolio layer method hedges are maintained at a portfolio level and not allocated to the individual assets in the portfolio.

Upon adoption, any election to designate portfolio layer method hedges is applied prospectively. Additionally, the Update permits a one-time reclassification of debt securities from held-to-maturity (HTM) to AFS classification as long as the securities are designated in a portfolio layer method hedge no later than 30 days after the adoption date.

In January 2023, we reclassified fixed-rate debt securities with an aggregate fair value of $23.2 billion and amortized cost of $23.9 billion from HTM to AFS and designated interest rate swaps with notional amounts of $20.1 billion as fair value hedges using the portfolio layer method. The transfer of debt securities was recorded at fair value and resulted in approximately $566 million of unrealized losses associated with AFS debt securities being recorded to other comprehensive income, net of deferred taxes.

See Note 3 (Available-for-Sale and Held-to-Maturity Debt Securities) for additional information about the Company's portfolio layer method hedge basis adjustments and HTM to AFS transfers in connection with adoption of the Update and Note 11 (Derivatives) for disclosures regarding our portfolio layer method hedging relationships.

ASU 2021-08 amends Accounting Standards Codification (ASC) 805 – Business Combinations to require entities to recognize and measure contract assets and contract liabilities in a business combination in accordance with ASC 606 – Revenue Recognition. Prior to ASU 2021-08, there was diversity in practice related to recognition treatment, and acquirers generally measured such items at acquisition date fair value. We adopted this Update prospectively on January 1, 2023. This Update did not have a material impact to our consolidated financial statements.

ASU 2018-12 changes the accounting for long-duration insurance contracts or contract features that provide benefits to the policyholder in addition to the policyholder's account value. These features, which the ASU defines as market risk benefits, protect the policyholder to some degree from capital markets risk and expose the insurer or reinsurer to that risk. The ASU requires all market risk benefits to be measured at fair value through earnings with changes in fair value attributable to our own credit risk recognized in other comprehensive income. We reinsure certain variable annuity products for a limited number of insurance clients with guaranteed minimum benefits which are accounted for as market risk benefits under the ASU. Our reinsurance business is no longer entering into new contracts.

We utilize a discounted cash flow model to value our market risk benefits. Market risk benefits are level 3 fair value liabilities because they are valued using significant unobservable inputs. The fair value of our market risk benefits is sensitive to changes in fixed income and equity markets, as well as policyholder behavior (e.g., withdrawals, lapses, utilization rate) and changes in mortality assumptions. Beginning first quarter 2023, we use derivative instruments, where feasible, to economically hedge the interest rate and equity markets volatility. The fair value of market risk benefits is measured at the contract level and is recognized in accrued expenses and other liabilities. We recognize changes in fair value for our market risk benefits, excluding the change in fair value related to our own credit risk, in noninterest income along with the changes in fair value of economic hedges. Changes in fair value attributable to our own credit risk are recorded in other comprehensive income. Upon adoption on January 1, 2023, as required under the ASU, we implemented the accounting changes for market risk benefits retrospectively, to the earliest period presented, which resulted in an after-tax cumulative effect adjustment to reduce retained earnings and accumulated other comprehensive income by $176 million and $44 million, respectively, as of January 1, 2022.

The ASU also requires more frequent updates for insurance assumptions, mandates the use of a standardized discount rate for traditional long-duration contracts, and simplifies the amortization of deferred acquisition costs. The accounting changes for the liability of future policyholder benefits for traditional long-duration contracts (included in accrued expenses and other liabilities) and deferred acquisition costs (included in other assets) did not have a material impact upon adoption.

Table 1.1 presents the impact of adoption to prior period financial statement line items within our consolidated statement of income and consolidated balance sheet for the three and nine months ended September 30, 2022, and as of December 31, 2022. These adjustments are also reflected in our consolidated statement of changes in equity and consolidated statement of cash flows.

Table 1.1: Impact of Adoption of ASU 2018-12

Supplemental Cash Flow Information

Significant noncash activities are presented in Table 1.3.

Table 1.3: Supplemental Cash Flow Information

	Nine months ended September 30,	
(in millions)	**2023**	2022
Available-for-sale debt securities purchased from securitization of LHFS	**$ —**	1,506
Held-to-maturity debt securities purchased from securitization of LHFS	**87**	732
Transfers from loans to LHFS	**968**	6,820
Transfers from available-for-sale debt securities to held-to-maturity debt securities	**3,687**	48,591
Transfers from held-to-maturity debt securities to available-for-sale debt securities (1)	**23,919**	—

(1) In first quarter 2023, we reclassified HTM debt securities to AFS debt securities in connection with the adoption of ASU 2022-01.

Subsequent Events

We have evaluated the effects of events that have occurred subsequent to September 30, 2023, and there have been no material events that would require recognition in our third quarter 2023 consolidated financial statements or disclosure in the Notes to the consolidated financial statements.

Note 2: Trading Activities

Table 2.1 presents a summary of our trading assets and liabilities measured at fair value through earnings.

Table 2.1: Trading Assets and Liabilities

(in millions)		Sep 30, 2023	Dec 31, 2022
Trading assets:			
Debt securities	$	**97,075**	86,155
Equity securities		**18,286**	26,910
Loans held for sale		**1,440**	1,466
Gross trading derivative assets		**84,295**	77,148
Netting (1)		**(63,502)**	(54,922)
Total trading derivative assets		**20,793**	22,226
Total trading assets		**137,594**	136,757
Trading liabilities:			
Short sale and other liabilities		**22,742**	20,304
Long-term debt		**1,875**	1,346
Gross trading derivative liabilities		**85,283**	77,698
Netting (1)		**(62,938)**	(59,232)
Total trading derivative liabilities		**22,345**	18,466
Total trading liabilities	$	**46,962**	40,116

(1) Represents balance sheet netting for trading derivative asset and liability balances, and trading portfolio level counterparty valuation adjustments.

Table 2.2 provides a summary of the net interest income earned from trading securities, and net gains and losses due to the realized and unrealized gains and losses from trading activities.

Net interest income also includes dividend income on trading securities and dividend expense on trading securities we have sold, but not yet purchased.

Table 2.2: Net Interest Income and Net Gains (Losses) from Trading Activities

		Quarter ended September 30,			Nine months ended September 30,	
(in millions)		**2023**	2022		**2023**	2022
Interest income:						
Debt securities	$	**1,056**	626	$	**2,747**	1,723

Less: Interest expense		**163**	153		**467**	443
Net interest income		**980**	591		**2,613**	1,677
Net gains (losses) from trading activities (1):						
Debt securities		**(2,935)**	(3,551)		**(2,033)**	(10,302)
Equity securities		**(388)**	(1,393)		**2,951**	(5,823)
Loans held for sale		**8**	3		**33**	13
Long-term debt		**6**	34		**(15)**	57
Derivatives (2)		**4,574**	5,807		**2,793**	17,619
Total net gains from trading activities		**1,265**	900		**3,729**	1,564
Total trading-related net interest and noninterest income	$	**2,245**	1,491	$	**6,342**	3,241

(1) Represents realized gains (losses) from our trading activities and unrealized gains (losses) due to changes in fair value of our trading positions.
(2) Excludes economic hedging of mortgage banking and asset/liability management activities, for which hedge results (realized and unrealized) are reported with the respective hedged activities.

Note 3: Available-for-Sale and Held-to-Maturity Debt Securities

Table 3.1 provides the amortized cost, net of the allowance for credit losses (ACL) for debt securities, and fair value by major categories of available-for-sale (AFS) debt securities, which are carried at fair value, and held-to-maturity (HTM) debt securities, which are carried at amortized cost, net of the ACL. The net unrealized gains (losses) for AFS debt securities are reported as a component of accumulated other comprehensive income (AOCI), net of the ACL and applicable income taxes. Information on debt securities held for trading is included in Note 2 (Trading Activities).

Outstanding balances exclude accrued interest receivable on AFS and HTM debt securities, which are included in other assets. See Note 7 (Intangible Assets and Other Assets) for additional information on accrued interest receivable. Amounts considered to be uncollectible are reversed through interest income. The interest income reversed in the third quarter and first nine months of both 2023 and 2022 was insignificant.

Table 3.1: Available-for-Sale and Held-to-Maturity Debt Securities Outstanding

(in millions)		Amortized cost, net (1)	Gross unrealized gains	Gross unrealized losses	Net unrealized gains (losses)	Fair value

Total	$	418,784	146	(49,815)	(49,669)	369,115

(1) Represents amortized cost of the securities, net of the ACL of $0 and $6 million related to AFS debt securities at September 30, 2023, and December 31, 2022, respectively, and $87 million and $85 million related to HTM debt securities at September 30, 2023, and December 31, 2022, respectively.
(2) Includes investments in tax-exempt preferred debt securities issued by investment funds or trusts that predominantly invest in tax-exempt municipal securities. The amortized cost, net of the ACL, and fair value of these types of securities, was $5.5 billion at September 30, 2023, and $5.1 billion at December 31, 2022.
(3) Predominantly consists of commercial mortgage-backed securities at both September 30, 2023, and December 31, 2022.
(4) Represents fair value hedge basis adjustments related to active portfolio layer method hedges of AFS debt securities, which are not allocated to individual securities in the portfolio. For additional information, see Note 11 (Derivatives).

Table 3.2 details the breakout of purchases of and transfers to HTM debt securities by major category of security. The table excludes the transfer of HTM debt securities with a fair value of $23.2 billion to AFS debt securities in first quarter 2023 in connection with the adoption of ASU 2022-01, Derivatives and Hedging (Topic 815): *Fair Value Hedging – Portfolio Layer Method*. For additional information, see Note 1 (Summary of Significant Accounting Policies).

Table 3.2: Held-to-Maturity Debt Securities Purchases and Transfers

	Quarter ended September 30,		Nine months ended September 30,	
(in millions)	**2023**	2022	**2023**	2022
Purchases of held-to-maturity debt securities (1):				
Securities of U.S. states and political subdivisions	**$ —**	—	**$ —**	843
Federal agency mortgage-backed securities	**—**	—	**4,225**	2,051
Non-agency mortgage-backed securities	**39**	39	**87**	198
Total purchases of held-to-maturity debt securities	**39**	39	**4,312**	3,092
Transfers from available-for-sale debt securities to held-to-maturity debt securities (2):				
Federal agency mortgage-backed securities	**—**	5,550	**3,687**	48,591
Total transfers from available-for-sale debt securities to held-to-maturity debt securities	**$ —**	5,550	**$ 3,687**	48,591

(1) Inclusive of securities purchased but not yet settled and noncash purchases from securitization of loans held for sale (LHFS).
(2) Represents fair value as of the date of the transfers. Debt securities transferred from available-for-sale to held-to-maturity had pre-tax unrealized losses recorded in AOCI of $0 and $320 million in the third quarter and first nine months of 2023, respectively, and $456 million and $4.3 billion in the third quarter and first nine months of 2022, respectively, at the time of the transfers.

Table 3.3 shows the composition of interest income, provision for credit losses, and gross realized gains and losses from sales and impairment write-downs included in earnings related to AFS and HTM debt securities (pre-tax).

Table 3.3: Income Statement Impacts for Available-for-Sale and Held-to-Maturity Debt Securities

	Quarter ended September 30,		Nine months ended September 30,	
(in millions)	**2023**	2022	**2023**	2022
Interest income (1):				
Available-for-sale	**$ 1,332**	777	**$ 3,918**	2,162
Held-to-maturity	**1,790**	1,640	**5,333**	4,423
Total interest income	**3,122**	2,417	**9,251**	6,585
Provision for credit losses:				
Available-for-sale	**8**	(2)	**(31)**	2
Held-to-maturity	**11**	13	**2**	(1)
Total provision for credit losses	**19**	11	**(29)**	1
Realized gains and losses (2):				
Gross realized gains	**28**	27	**34**	276
Gross realized losses	**(22)**	(21)	**(24)**	(125)
Net realized gains	**$ 6**	6	**$ 10**	151

(1) Excludes interest income from trading debt securities, which is disclosed in Note 2 (Trading Activities).
(2) Realized gains and losses relate to AFS debt securities. There were no realized gains or losses from HTM debt securities in all periods presented.

Credit Quality

We monitor credit quality of debt securities by evaluating various attributes and utilize such information in our evaluation of the appropriateness of the ACL for debt securities. The credit quality indicators that we most closely monitor include credit ratings and delinquency status and are based on information as of our financial statement date.

CREDIT RATINGS Credit ratings express opinions about the credit quality of a debt security. We determine the credit rating of a security according to the lowest credit rating made available by national recognized statistical rating organizations (NRSROs). Debt securities rated investment grade, that is those with ratings similar to BBB-/Baa3 or above, as defined by NRSROs, are generally considered by the rating agencies and market participants to be low credit risk. Conversely, debt securities rated below investment grade, labeled as “speculative grade” by the rating agencies, are considered to be distinctively higher credit risk than investment grade debt securities. For debt securities not rated by NRSROs, we determine an internal credit grade of the debt securities (used for credit risk management purposes) equivalent to the credit ratings assigned by major credit agencies. Substantially all of our debt securities were rated by NRSROs at September 30, 2023, and December 31, 2022.

Table 3.4 shows the percentage of fair value of AFS debt securities and amortized cost of HTM debt securities determined to be rated investment grade, inclusive of securities rated based on internal credit grades.

Table 3.4: Investment Grade Debt Securities

		Available-for-Sale		Held-to-Maturity
($ in millions)	Fair value	% investment grade	Amortized cost	% investment grade
September 30, 2023				
Total portfolio (1)	**$ 126,437**	**99%**	**$ 267,301**	**99%**
Breakdown by category:				
Securities of U.S. Treasury and federal agencies (2)	**$ 100,883**	**100%**	**$ 216,594**	**100%**
Securities of U.S. states and political subdivisions	**19,622**	**99**	**18,873**	**100**
Collateralized loan obligations (3)	**1,821**	**100**	**28,781**	**100**
All other debt securities (4)	**4,111**	**95**	**3,053**	**62**
December 31, 2022				
Total portfolio (1)	$ 113,594	99%	$ 297,144	99%
Breakdown by category:				
Securities of U.S. Treasury and federal agencies (2)	$ 93,422	100%	$ 233,169	100%
Securities of U.S. states and political subdivisions	10,445	99	31,000	100
Collateralized loan obligations (3)	3,981	100	29,972	100
All other debt securities (4)	5,746	89	3,003	63

(1) 99% were rated AA- and above at both September 30, 2023, and December 31, 2022.
(2) Includes federal agency mortgage-backed securities.
(3) 100% were rated AA- and above at both September 30, 2023, and December 31, 2022.
(4) Includes non-U.S. government, non-agency mortgage-backed, and all other debt securities.

DELINQUENCY STATUS AND NONACCRUAL DEBT SECURITIES Debt security issuers that are delinquent in payment of amounts due under contractual debt agreements have a higher probability of recognition of credit losses. As such, as part of our monitoring of the credit quality of the debt security portfolio, we consider whether debt securities we own are past due in payment of principal or interest payments and whether any securities have been placed into nonaccrual status.

Debt securities that are past due and still accruing or in nonaccrual status were insignificant at both September 30, 2023, and December 31, 2022. Net charge-offs on debt securities were insignificant in the third quarter and first nine months of both 2023 and 2022.

Purchased debt securities with credit deterioration (PCD) are not considered to be in nonaccrual status, as payments from issuers of these securities remain current. PCD securities were insignificant in the third quarter and first nine months of both 2023 and 2022.

Unrealized Losses of Available-for-Sale Debt Securities

Table 3.5 shows the gross unrealized losses and fair value of AFS debt securities by length of time those individual securities in each category have been in a continuous loss position. Debt securities on which we have recorded credit impairment are categorized as being “less than 12 months” or “12 months or more” in a continuous loss position based on the point in time that the fair value declined to below the amortized cost basis, net of allowance for credit losses.

Table 3.5: Gross Unrealized Losses and Fair Value – Available-for-Sale Debt Securities

	Less than 12 months		12 months or more		Total	
(in millions)	Gross unrealized losses (1)	Fair value	Gross unrealized losses (1)	Fair value	Gross unrealized losses (1)	Fair value
September 30, 2023						
Available-for-sale debt securities:						
Securities of U.S. Treasury and federal agencies	**$ (365)**	**13,072**	**(1,792)**	**32,149**	**(2,157)**	**45,221**
Securities of U.S. states and political subdivisions	**(827)**	**10,208**	**(530)**	**3,381**	**(1,357)**	**13,589**

December 31, 2022						
Available-for-sale debt securities:						
Securities of U.S. Treasury and federal agencies	$ (291)	9,870	(1,969)	27,899	(2,260)	37,769
Securities of U.S. states and political subdivisions	(72)	2,154	(461)	2,382	(533)	4,536
Federal agency mortgage-backed securities	(3,580)	39,563	(1,587)	8,481	(5,167)	48,044
Non-agency mortgage-backed securities	(43)	1,194	(97)	2,068	(140)	3,262
Collateralized loan obligations	(65)	3,195	(25)	786	(90)	3,981
Other debt securities	(31)	1,591	(17)	471	(48)	2,062
Total available-for-sale debt securities	$ (4,082)	57,567	(4,156)	42,087	(8,238)	99,654

(1) Excludes portfolio level basis adjustments.

We have assessed each debt security with gross unrealized losses included in the previous table for credit impairment. As part of that assessment we evaluated and concluded that we do not intend to sell any of the debt securities, and that it is more likely than not that we will not be required to sell, prior to recovery of the amortized cost basis. We evaluate, where necessary, whether credit impairment exists by comparing the present value of the expected cash flows to the debt securities' amortized cost basis. Credit impairment is recorded as an ACL for debt securities.

For descriptions of the factors we consider when analyzing debt securities for impairment as well as methodology and significant inputs used to measure credit losses, see Note 1 (Summary of Significant Accounting Policies) in our 2022 Form 10-K.

Contractual Maturities

Table 3.6 and Table 3.7 show the remaining contractual maturities, amortized cost, net of the ACL, fair value and weighted average effective yields of AFS and HTM debt securities, respectively. The remaining contractual principal maturities for mortgage-backed securities (MBS) do not consider prepayments. Remaining expected maturities will differ from contractual maturities because borrowers may have the right to prepay obligations before the underlying mortgages mature.

Table 3.6: Contractual Maturities – Available-for-Sale Debt Securities

Total equity securities not held for trading		**37,740**	37,504
Total equity securities	$	**56,026**	64,414

(1) Represents securities economically hedged with equity derivatives.
(2) Represents securities held as part of our customer accommodation trading activities. For additional information on these activities, see Note 2 (Trading Activities).
(3) See Note 13 (Securitizations and Variable Interest Entities) for information about tax credit investments.
(4) Represents nonmarketable equity securities accounted for under the measurement alternative, which were predominantly securities associated with our venture capital investments.
(5) Includes $3.5 billion of investments in Federal Reserve Bank stock at both September 30, 2023, and December 31, 2022, and $1.4 billion of investments in Federal Home Loan Bank stock at both September 30, 2023, and December 31, 2022.

Net Gains and Losses Not Held for Trading

Table 4.2 provides a summary of the net gains and losses from equity securities not held for trading, which excludes equity method adjustments for our share of the investee's earnings or losses that are recognized in other noninterest income. Gains and losses for securities held for trading are reported in net gains from trading and securities.

Table 4.2: Net Gains (Losses) from Equity Securities Not Held for Trading

	Quarter ended September 30,			Nine months ended September 30,		
(in millions)		**2023**	2022		**2023**	2022
Net gains (losses) from equity securities carried at fair value:

Gross unrealized losses from observable price changes	**(44)**	(14)
Impairment write-downs	**(3,550)**	(2,896)

Note 5: Loans and Related Allowance for Credit Losses

Table 5.1 presents total loans outstanding by portfolio segment and class of financing receivable. Outstanding balances include unearned income, net deferred loan fees or costs, and unamortized discounts and premiums. These amounts were less than 1% of our total loans outstanding at both September 30, 2023, and December 31, 2022.

Outstanding balances exclude accrued interest receivable on loans, except for certain revolving loans, such as credit card loans. See Note 7 (Intangible Assets and Other Assets) for additional information on accrued interest receivable. Amounts considered to be uncollectible are reversed through interest income. During the first nine months of 2023, we reversed accrued interest receivable of $31 million for our commercial portfolio segment and $188 million for our consumer portfolio segment, compared with $26 million and $100 million, respectively, for the same period a year ago.

Table 5.1: Loans Outstanding

(in millions)		Sep 30, 2023	Dec 31, 2022
Commercial and industrial	$	**382,527**	386,806
Commercial real estate		**152,486**	155,802
Lease financing		**16,038**	14,908
Total commercial		**551,051**	557,516
Residential mortgage		**263,174**	269,117
Credit card		**49,851**	46,293
Auto		**49,865**	53,669
Other consumer		**28,483**	29,276
Total consumer		**391,373**	398,355
Total loans	$	**942,424**	955,871

Our non-U.S. loans are reported by respective class of financing receivable in the table above. Substantially all of our non-U.S. loan portfolio is commercial loans. Table 5.2 presents total non-U.S. commercial loans outstanding by class of financing receivable.

Table 5.2: Non-U.S. Commercial Loans Outstanding

(in millions)		Sep 30, 2023	Dec 31, 2022
Commercial and industrial	$	**73,528**	78,981
Commercial real estate		**6,942**	7,619
Lease financing		**700**	670
Total non-U.S. commercial loans	$	**81,170**	87,270

Loan Purchases, Sales, and Transfers

Table 5.3 presents the proceeds paid or received for purchases and sales of loans and transfers from loans held for investment to mortgages/loans held for sale. The table excludes loans for which we have elected the fair value option and government insured/guaranteed residential mortgage – first lien loans because their loan activity normally does not impact the ACL.

Table 5.3: Loan Purchases, Sales, and Transfers

				2023			2022

Nine months ended September 30,							
Purchases	$	**1,067**	**306**	**1,373**	503	3	506
Sales and net transfers (to)/from LHFS		**(2,394)**	**(100)**	**(2,494)**	(2,097)	(1,141)	(3,238)

Unfunded Credit Commitments

Unfunded credit commitments are legally binding agreements to lend to customers with terms covering usage of funds, contractual interest rates, expiration dates, and any required collateral. Our commercial lending commitments include, but are not limited to, (i) commitments for working capital and general corporate purposes, (ii) financing to customers who warehouse financial assets secured by real estate, consumer, or corporate loans, (iii) financing that is expected to be syndicated or replaced with other forms of long-term financing, and (iv) commercial real estate lending. We also originate multipurpose lending commitments under which commercial customers have the option to draw on the facility in one of several forms, including the issuance of letters of credit, which reduces the unfunded commitment amounts of the facility.

The maximum credit risk for these commitments will generally be lower than the contractual amount because these commitments may expire without being used or may be cancelled at the customer's request. We may reduce or cancel lines of credit in accordance with the contracts and applicable law. Our credit risk monitoring activities include managing the amount of commitments, both to individual customers and in total, and the size and maturity structure of these commitments. We do not recognize an ACL for commitments that are unconditionally cancellable at our discretion.

We issue commercial letters of credit to assist customers in purchasing goods or services, typically for international trade. At September 30, 2023, and December 31, 2022, we had $1.4 billion and $1.8 billion, respectively, of outstanding issued commercial letters of credit. See Note 14 (Guarantees and Other Commitments) for additional information on issued standby letters of credit.

We may be a fronting bank, whereby we act as a representative for other lenders, and advance funds or provide for the issuance of letters of credit under syndicated loan or letter of credit agreements. Any advances are generally repaid in less than a week and would normally require default of both the customer and another lender to expose us to loss.

The contractual amount of our unfunded credit commitments, including unissued letters of credit, is summarized in Table 5.4. The table is presented net of commitments syndicated to others, including the fronting arrangements described above, and excludes issued letters of credit and discretionary amounts where our approval or consent is required prior to any loan funding or commitment increase.

Table 5.4: Unfunded Credit Commitments

(in millions)	Sep 30, 2023	Dec 31, 2022
Commercial and industrial (1)	**$ 390,642**	388,504
Commercial real estate	**22,785**	29,518
Total commercial	**413,427**	418,022
Residential mortgage (2)	**32,149**	39,155
Credit card	**159,611**	145,526
Other consumer (3)	**75,563**	69,244
Total consumer	**267,323**	253,925
Total unfunded credit commitments	**$ 680,750**	671,947

(1) Effective first quarter 2023, unfunded credit commitments exclude discretionary amounts where our approval or consent is required prior to any loan funding or commitment increase. Prior period balances have been revised to conform with the current period presentation.
(2) Includes lines of credit totaling $30.1 billion and $35.5 billion as of September 30, 2023, and December 31, 2022, respectively.
(3) Predominantly includes securities-based lines of credit.

Allowance for Credit Losses

Table 5.5 presents the allowance for credit losses (ACL) for loans, which consists of the allowance for loan losses and the allowance for unfunded credit commitments. The ACL for loans increased $1.5 billion from December 31, 2022, reflecting increases for commercial real estate loans, primarily office loans, as well as for increases in credit card loan balances, partially offset by a decrease for residential mortgage loans related to the adoption of ASU 2022-02, Financial Instruments – Credit Losses (Topic 326): *Troubled Debt Restructurings and Vintage Disclosures*.

(1) Prior to the adoption of ASU 2022–02, Financial Instruments – Credit Losses (Topic 326): *Troubled Debt Restructurings and Vintage Disclosures,* on January 1, 2023, loans with an allowance measured by discounting expected cash flows using the loan's effective interest rate over the remaining life of the loan recognized changes in allowance attributable to the passage of time as interest income.
(2) Represents the change in our allowance for credit losses for loans as a result of our adoption of ASU 2022–02. For additional information, see Note 1 (Summary of Significant Accounting Policies).

Credit Quality

We monitor credit quality by evaluating various attributes and utilize such information in our evaluation of the appropriateness of the ACL for loans. The following sections provide the credit quality indicators we most closely monitor. The credit quality indicators are generally based on information as of our financial statement date.

COMMERCIAL CREDIT QUALITY INDICATORS We manage a consistent process for assessing commercial loan credit quality. Commercial loans are generally subject to individual risk assessment using our internal borrower and collateral quality ratings, which is our primary credit quality indicator. Our ratings are aligned to regulatory definitions of pass and criticized categories with the criticized segmented among special mention, substandard, doubtful, and loss categories.

Table 5.7 provides the outstanding balances of our commercial loan portfolio by risk category and credit quality information by origination year for term loans. Revolving loans may convert to term loans as a result of a contractual provision in the original loan agreement or if modified for a borrower experiencing financial difficulty. At September 30, 2023, we had $519.2 billion and $31.9 billion of pass and criticized commercial loans, respectively. Gross charge-offs by loan class are included in the following table for the nine months ended September 30, 2023, which we monitor as part of our credit risk management practices; however, charge-offs are not a primary credit quality indicator for our loan portfolio.

Table 5.7: Commercial Loan Categories by Risk Categories and Vintage

CONSUMER CREDIT QUALITY INDICATORS We have various classes of consumer loans that present unique credit risks. Loan delinquency, Fair Isaac Corporation (FICO) credit scores and loan-to-value (LTV) for residential mortgage loans are the primary credit quality indicators that we monitor and utilize in our evaluation of the appropriateness of the ACL for the consumer loan portfolio segment. Gross charge-offs by loan class are included in the following tables for the nine months ended September 30, 2023, which we monitor as part of our credit risk management practices; however, charge-offs are not a primary credit quality indicator for our loan portfolio.

Many of our loss estimation techniques used for the ACL for loans rely on delinquency-based models; therefore, delinquency is an important indicator of credit quality in the establishment of our ACL for consumer loans. Credit quality information is provided with the year of origination for term loans. Revolving loans may convert to term loans as a result of a contractual provision in the original loan agreement or if modified for a borrower experiencing financial difficulty.

We obtain FICO scores at loan origination and the scores are generally updated at least quarterly, except in limited circumstances, including compliance with the Fair Credit Reporting Act (FCRA). FICO scores are not available for certain loan types or may not be required if we deem it unnecessary due to strong collateral and other borrower attributes.

Table 5.9 provides the outstanding balances of our residential mortgage loans by our primary credit quality indicators.

LTV refers to the ratio comparing the loan’s outstanding balance to the property’s collateral value. Combined LTV (CLTV) refers to the combination of first lien mortgage and junior lien mortgage (including unused line amounts for credit line products) ratios. We obtain LTVs and CLTVs using a cascade approach which first uses values provided by automated valuation models (AVMs) for the property. If an AVM is not available, then the value is estimated using the original appraised value adjusted by the change in Home Price Index (HPI) for the property location. If an HPI is not available, the original appraised value is used. The HPI value is normally the only method considered for high value properties, generally with an original value of $1 million or more, as the AVM values have proven less accurate for these properties. Generally, we obtain available LTVs and CLTVs on a quarterly basis. Certain loans do not have an LTV or CLTV due to a lack of industry data availability and portfolios acquired from or serviced by other institutions.

(1) Government insured or guaranteed loans represent loans whose repayments are predominantly insured by the Federal Housing Administration (FHA) or guaranteed by the Department of Veterans Affairs (VA). Loans insured/guaranteed by the FHA/VA and 90+ DPD totaled \$2.8 billion and \$3.2 billion at September 30, 2023, and December 31, 2022, respectively.
(2) Reflects total loan balances with LTV/CLTV amounts in excess of 100%. In the event of default, the loss content would generally be limited to only the amount in excess of 100% LTV/CLTV.

Table 5.10 provides the outstanding balances of our credit card loan portfolio by primary credit quality indicators.

The revolving loans converted to term loans in the credit card loan category represent credit card loans with modified terms that require payment over a specific term.

For the nine months ended September 30, 2023, we had gross charge-offs in the credit card portfolio of $1.3 billion for revolving loans and $68 million for revolving loans converted to term loans.

Total nonaccrual loans	$ **8,002**	5,626	**2,433**	2,629	**200**	286

(1) Nonaccrual loans may not have an allowance for credit losses if the loss expectations are zero given the related collateral value.

LOANS IN PROCESS OF FORECLOSURE Our recorded investment in consumer mortgage loans collateralized by residential real estate property that are in process of foreclosure was $904 million and $1.0 billion at September 30, 2023, and December 31, 2022, respectively, which included $716 million and $771 million, respectively, of loans that are government insured/guaranteed. Under the Consumer Financial Protection Bureau guidelines, we do not commence the foreclosure process on residential mortgage loans until after the loan is 120 days delinquent. Foreclosure procedures and timelines vary depending on whether the property address resides in a judicial or non-judicial state. Judicial states require the foreclosure to be processed through the state's courts while non-judicial states are processed without court intervention. Foreclosure timelines vary according to state law.

LOANS 90 DAYS OR MORE PAST DUE AND STILL ACCRUING Certain loans 90 days or more past due are still accruing, because they are (1) well-secured and in the process of collection or (2) residential mortgage or consumer loans exempt under regulatory rules from being classified as nonaccrual until later delinquency, usually 120 days past due.

Table 5.14 shows loans 90 days or more past due and still accruing by class for loans not government insured/guaranteed.

Table 5.14: Loans 90 Days or More Past Due and Still Accruing

(in millions)	**Sep 30, 2023**	Dec 31, 2022
Total:	$ **3,634**	4,340
Less: FHA insured/VA guaranteed (1)	**2,696**	3,005
Total, not government insured/guaranteed	$ **938**	1,335
By segment and class, not government insured/guaranteed:		
Commercial and industrial	$ **116**	583
Commercial real estate	**15**	134
Total commercial	**131**	717
Residential mortgage	**23**	28
Credit card	**648**	455
Auto	**99**	111
Other consumer	**37**	24
Total consumer	**807**	618
Total, not government insured/guaranteed	$ **938**	1,335

(1) Represents loans whose repayments are predominantly insured by the FHA or guaranteed by the VA.

LOAN MODIFICATIONS TO BORROWERS EXPERIENCING FINANCIAL DIFFICULTY We may agree to modify the contractual terms of a loan to a borrower experiencing financial difficulty.

Our commercial loan modifications may include principal forgiveness, interest rate reductions, payment delays, term extensions, or a combination of these modifications. Commercial loan term extensions have terms that vary based on the borrower's request and are evaluated by our credit teams on an individual basis.

Our consumer loan modifications vary based upon the loan product and the modification program offered to the borrower, and may include interest rate reductions, payment delays, term extensions, principal forbearance or forgiveness, or a combination of these modifications. Generally, our consumer loan modification programs modify the loan terms to achieve payment terms that are more affordable to the borrower and, as a result, increase the likelihood of full repayment of principal and interest.

Our residential mortgage loan modification programs may offer a short-term payment deferral based upon the borrower's demonstrated hardship, up to 12 months. If additional assistance is needed after 12 months, the borrower may request another loan modification. Modifications may also include a trial payment period of three months to determine if the borrower can perform in accordance with the proposed permanent loan modification terms. Loans in a trial payment period continue to advance through delinquency status and accrue interest according to their original terms. Loans in a trial payment period are excluded from our loan modification disclosures until the borrower has successfully completed the trial period and the loan modification is formally executed. Residential mortgage loans in a trial payment period totaled $115 million at September 30, 2023.

Credit card loan modifications result in a reduction in the credit card interest rate and may be offered on a short-term or long-term basis. A short-term interest rate reduction program reduces the borrower's interest rate for 12 months. A long-term interest rate reduction program provides a reduction of the interest rate over a fixed five-year term. During the modification period, the borrower's revolving charge privileges are revoked.

Auto loan modifications generally include insignificant (e.g., three months or less) payment deferrals over the loan term.

The following disclosures provide information on loan modifications granted to borrowers experiencing financial difficulty in the form of principal forgiveness, interest rate reductions, other-than-insignificant (e.g., greater than three months) payment delays, term extensions or a combination of these modifications, as well as the financial effects of these modifications, and loan performance in the twelve months following the modification. Loans that both modify and are paid off or charged-off during the period, resulting in an amortized cost balance of zero at the end of the period, are not included in the disclosures below. Additionally, where amortized cost balances are presented below, accrued interest receivable is excluded. See Note 7 (Intangible Assets and Other Assets) for additional information on accrued interest receivable. Borrowers experiencing financial difficulty with modified terms mandated by a bankruptcy court are considered contractually modified loans and are included in these disclosures. These disclosures do not include loans discharged by a bankruptcy court as the only concession, which were insignificant for the third quarter and first nine months of 2023.

Table 5.15 presents the amortized cost of modified commercial loans by class of financing receivable and by modification type.

Table 5.15: Commercial Loan Modifications

		Modification type (1)						
($ in millions)		Interest rate reduction	Payment delay	Term extension	Term extension & payment delay	All other modifications and combinations	Total	Modifications as a % of loan class
Quarter ended September 30, 2023								
Commercial and industrial	$	8	1	187	97	—	293	0.08%
Commercial real estate		—	—	335	—	—	335	0.22
Total commercial	$	8	1	522	97	—	628	0.12
Nine months ended September 30, 2023								
Commercial and industrial	$	14	19	280	101	1	415	0.11%
Commercial real estate		8	1	442	—	1	452	0.30
Total commercial	$	22	20	722	101	2	867	0.16

(1) There were no principal forgiveness modifications for the third quarter and first nine months of 2023.

Table 5.15a presents the financial effects of modifications made to commercial loans presented by class of financing receivable.

Table 5.15a: Financial Effects of Commercial Loan Modifications

	Weighted average interest rate reduction	Weighted average payments deferred (months)	Weighted average term extension (months)
Quarter ended September 30, 2023			
Commercial and industrial	15.28%	6	13
Commercial real estate	1.95	6	23
Nine months ended September 30, 2023			
Commercial and industrial	14.49%	5	13
Commercial real estate	3.54	13	21

Commercial loans that received a modification during the third quarter and first nine months of 2023, and subsequently defaulted were insignificant. Defaults that occur on commercial modifications are reported based on a payment default definition of 90 days past due.

Table 5.15b provides past due information for modified commercial loans. For loan modifications that include a payment deferral, payment performance is not included in the table below until the loan exits the deferral period and payments resume. The table also includes the amount of gross charge-offs that occurred during the third quarter and first nine months of 2023, inclusive of charge-offs to loans with no amortized cost remaining at period end.

Table 5.15b: Payment Performance of Commercial Loan Modifications

	By delinquency status					Gross charge-offs	
(in millions)		Current-29 days past due (DPD)	30-89 DPD	90+ DPD	Total	Quarter ended	Nine months ended
September 30, 2023							
Commercial and industrial	$	275	27	2	304	27	42
Commercial real estate		449	2	—	451	—	—
Total commercial	$	724	29	2	755	27	42

Table 5.16 presents the amortized cost of modified consumer loans by class of financing receivable and by modification type.

Table 5.16: Consumer Loan Modifications

	Modification type									
($ in millions)		Interest rate reduction	Payment delay (1)	Term extension	Interest rate reduction & term extension	Term extension & payment delay	Interest rate reduction, term extension & payment delay	All other modifications and combinations (2)	Total	Modifications as a % of loan class
Quarter ended September 30, 2023										
Residential mortgage	$	2	27	15	11	22	18	2	97	0.04%
Credit card		151	—	—	—	—	—	—	151	0.30
Auto		1	13	—	—	—	—	—	14	0.03
Other consumer		3	1	—	10	—	—	—	14	0.05
Total consumer	$	157	41	15	21	22	18	2	276	0.07
Nine months ended September 30, 2023										
Residential mortgage	$	10	433	55	34	73	68	5	678	0.26%
Credit card		348	—	—	—	—	—	—	348	0.70
Auto		2	19	—	—	—	—	—	21	0.04
Other consumer		8	2	—	22	—	—	—	32	0.11
Total consumer	$	368	454	55	56	73	68	5	1,079	0.28

(1) Includes residential mortgage loan modifications that defer a set amount of principal to the end of the loan term.
(2) Includes principal forgiveness and other combinations of modifications.

Table 5.16a presents the financial effects of modifications made to consumer loans by class of financing receivable.

Table 5.16a: Financial Effects of Consumer Loan Modifications (1)

	Weighted average interest rate reduction	Weighted average payments deferred (months)	Weighted average term extension (years)
Quarter ended September 30, 2023			
Residential mortgage (2)	1.68%	6	9.4
Credit card	21.79	N/A	N/A
Auto	4.21	6	N/A
Other consumer	8.12	6	1.9
Nine months ended September 30, 2023			
Residential mortgage (2)	1.60%	4	9.7
Credit card	21.41	N/A	N/A
Auto	4.02	6	N/A
Other consumer	10.10	5	2.4

(1) Principal forgiven was insignificant for the third quarter and first nine months of 2023.
(2) Excludes the financial effects of residential mortgage loans with a set amount of principal deferred to the end of the loan term. The weighted average period of principal deferred was 27.3 years and 27.0 years for the third quarter and first nine months of 2023, respectively.

Consumer loans that received a modification during the third quarter and first nine months of 2023, and subsequently defaulted during the respective period totaled $130 million and $251 million, respectively, and primarily related to payment delay modifications in the residential mortgage loan portfolio. Defaults that occur on consumer modifications are reported based on a payment default definition of 60 days past due.

Table 5.16b provides past due information for modified consumer loans. For loan modifications that include a payment delay, payment performance is not included in the table below until the loan exits the deferral period and payments resume. The table also includes the amount of gross charge-offs that occurred during the third quarter and first nine months of 2023, inclusive of charge-offs to loans with no amortized cost remaining at period end.

Table 5.16b: Payment Performance of Consumer Loan Modifications

		By delinquency status			Gross charge-offs	
(in millions)	Current-29 days past due (DPD)	30-89 DPD	90+ DPD	Total	Quarter ended	Nine months ended
September 30, 2023						
Residential mortgage (1)	$ 377	80	191	648	1	7
Credit card (2)	261	52	35	348	25	45
Auto	19	2	—	21	1	1
Other consumer	28	3	1	32	1	2
Total	$ 685	137	227	1,049	28	55

(1) Includes loans that were past due prior to entering a payment delay modification. Delinquency advancement is paused during the deferral period and resumes upon exit.
(2) Credit card loans that are past due at the time of the modification do not become current until they have three months of consecutive payment performance.

Commitments to lend additional funds on commercial loans that were modified during the nine months ended September 30, 2023, were $167 million, substantially all of which were in the commercial and industrial portfolio. Commitments to lend additional funds on consumer loans that were modified during the nine months ended September 30, 2023, were insignificant.

TROUBLED DEBT RESTRUCTURINGS (TDRs) In January 2023, we adopted ASU 2022-02, which eliminated the accounting and reporting guidance for TDRs. For additional information, see Note 1 (Summary of Significant Accounting Policies). The following disclosures present TDR information for the periods ended December 31, 2022, and September 30, 2022. When, for economic or legal reasons related to a borrower's financial difficulties, we grant a concession for other than an insignificant period of time to a borrower that we would not otherwise consider, the related loan is classified as a TDR, the balance of which totaled $9.2 billion at December 31, 2022. We do not consider loan resolutions such as foreclosure or short sale to be a TDR. In addition, COVID-19-related modifications are generally not classified as TDRs due to the relief under the CARES Act and the Interagency Statement. For additional information on the TDR relief, see Note 1 (Summary of Significant Accounting Policies) in our 2022 Form 10-K.

We may require some consumer borrowers experiencing financial difficulty to make trial payments, generally for a period of three to four months, according to the terms of a planned permanent modification, to determine if they can perform according to those terms. These arrangements represent trial modifications, which we classified and accounted for as TDRs through December 31, 2022, prior to the adoption of ASU 2022-02. While loans are in trial payment programs, their original terms are not considered modified and they continue to advance through delinquency status and accrue interest according to their original terms.

Commitments to lend additional funds on loans whose terms have been modified in a TDR amounted to $434 million at December 31, 2022.

Table 5.17 summarizes our TDR modifications by primary modification type and includes the financial effects of these modifications. For those loans that modify more than once, the table reflects each modification that occurred during the period. Loans that both modify and are paid off or written-off within the period, as well as changes in recorded investment during the period for loans modified in prior periods, are not included in the table.

Table 5.17: TDR Modifications

($ in millions)	Principal forgiveness	Interest rate reduction	Other concessions (2)	Total	Charge-offs (3)	Weighted average interest rate reduction	Recorded investment related to interest rate reduction (4)
	Primary modification type (1)				Financial effects of modifications		
Quarter ended September 30, 2022							
Commercial and industrial	$ 7	4	76	87	—	14.26%	$ 4
Commercial real estate	—	1	37	38	—	0.25	1
Lease financing	—	—	—	—	—	—	—
Total commercial	7	5	113	125	—	12.15	5
Residential mortgage	—	97	332	429	1	1.64	97
Credit card	—	82	—	82	—	20.45	82
Auto	—	2	8	10	2	3.87	2
Other consumer	—	6	1	7	1	11.46	5
Trial modifications (5)	—	—	—	—	—	—	—
Total consumer	—	187	341	528	4	10.27	186
Total	$ 7	192	454	653	4	10.31%	$ 191
Nine months ended September 30, 2022							
Commercial and industrial	$ 7	18	224	249	—	9.76%	$ 18
Commercial real estate	—	11	102	113	—	0.94	11
Lease financing	—	—	1	1	—	—	—
Total commercial	7	29	327	363	—	6.47	29
Residential mortgage	1	292	1,018	1,311	4	1.60	292
Credit card	—	215	—	215	—	19.66	215
Auto	1	6	56	63	13	4.44	6
Other consumer	—	13	2	15	1	11.37	12
Trial modifications (5)	—	—	252	252	—	—	—
Total consumer	2	526	1,328	1,856	18	9.27	525
Total	$ 9	555	1,655	2,219	18	9.12%	$ 554

(1) Amounts represent the recorded investment in loans after recognizing the effects of the TDR, if any. TDRs may have multiple types of concessions, but are presented only once in the first modification type based on the order presented in the table above. The reported amounts include loans remodified of $105 million for the quarter ended September 30, 2022, and $355 million for the first nine months of 2022.

(2) Other concessions include loans with payment (principal and/or interest) deferral, loans discharged in bankruptcy, loan renewals, term extensions and other interest and noninterest adjustments, but exclude modifications that also forgive principal and/or reduce the contractual interest rate. The reported amounts include loans that are new TDRs that may have COVID-19-related payment deferrals and exclude COVID-19-related payment deferrals on loans previously reported as TDRs given limited current financial effects other than payment deferral.

(3) Charge-offs include write-downs of the investment in the loan in the period it is contractually modified. The amount of charge-off will differ from the modification terms if the loan has been charged down prior to the modification based on our policies. In addition, there may be cases where we have a charge-off/down with no legal principal modification.

(4) Recorded investment related to interest rate reduction reflects the effect of reduced interest rates on loans with an interest rate concession as one of their concession types, which includes loans reported as a principal primary modification type that also have an interest rate concession.

(5) Trial modifications are granted a delay in payments due under the original terms during the trial payment period. However, these loans continue to advance through delinquency status and accrue interest according to their original terms. Any subsequent permanent modification generally includes interest rate related concessions; however, the exact concession type and resulting financial effect are usually not known until the loan is permanently modified. Trial modifications for the period are presented net of previously reported trial modifications that became permanent in the current period.

Table 5.18 summarizes permanent modification TDRs that defaulted during the period presented within 12 months of their permanent modification date. We are reporting these defaulted TDRs based on a payment default definition of 90 days past due for the commercial portfolio segment and 60 days past due for the consumer portfolio segment.

Table 5.18: Defaulted TDRs

(in millions)	Recorded investment of defaults September 30, 2022 Quarter ended	Nine months ended
Commercial and industrial	$ 1	53
Commercial real estate	3	13
Lease financing	—	—
Total commercial	4	66
Residential mortgage	36	94
Credit card	12	25
Auto	4	17
Other consumer	—	1
Total consumer	52	137
Total	$ 56	203

Note 6: Mortgage Banking Activities

Mortgage banking activities consist of residential and commercial mortgage originations, sales and servicing.

We apply the amortization method to commercial MSRs and apply the fair value method to residential MSRs. The amortized cost of commercial MSRs was $1.1 billion and $1.2 billion, with an estimated fair value of $1.9 billion and $2.3 billion, at September 30, 2023 and 2022, respectively. Table 6.1 presents the changes in MSRs measured using the fair value method.

Table 6.1: Analysis of Changes in Fair Value MSRs

	Quarter ended September 30,		Nine months ended September 30,	
(in millions)	**2023**	2022	**2023**	2022
Fair value, beginning of period	**$ 8,251**	9,163	**$ 9,310**	6,920
Originations/purchases	**36**	204	**131**	868
Sales and other (1)	**(51)**	1	**(650)**	(249)
Net additions	**(15)**	205	**(519)**	619
Changes in fair value:				
Due to valuation inputs or assumptions:				
Market interest rates (2)	**562**	760	**699**	3,408
Servicing and foreclosure costs	**(11)**	(8)	**(9)**	(20)
Discount rates	**(20)**	(44)	**(45)**	42
Prepayment estimates and other (3)	**(20)**	42	**(43)**	(207)
Net changes in valuation inputs or assumptions	**511**	750	**602**	3,223
Changes due to collection/realization of expected cash flows (4)	**(290)**	(290)	**(936)**	(934)
Total changes in fair value	**221**	460	**(334)**	2,289
Fair value, end of period	**$ 8,457**	9,828	**$ 8,457**	9,828

(1) In the first nine months of 2022, MSRs decreased $244 million due to the sale of interest-only strips in second quarter 2022 related to excess servicing cash flows from agency residential mortgage-backed securitizations.
(2) Includes prepayment rate changes due to changes in market interest rates. MSRs are economically hedged with derivative instruments to reduce exposure to changes in market interest rates.
(3) Represents other changes in valuation model inputs or assumptions, including prepayment rate estimation changes that are independent of mortgage interest rate changes.
(4) Represents the reduction in the MSR fair value for the cash flows expected to be collected during the period, net of income accreted due to the passage of time.

Table 6.2 provides key weighted-average assumptions used in the valuation of residential MSRs and sensitivity of the current fair value of residential MSRs to immediate adverse changes in those assumptions. Amounts for residential MSRs include purchased servicing rights as well as servicing rights resulting from the transfer of loans. See Note 12 (Fair Values of Assets and Liabilities) for additional information on key assumptions for residential MSRs.

Table 6.2: Assumptions and Sensitivity of Residential MSRs

($ in millions, except cost to service amounts)	**Sep 30, 2023**	Dec 31, 2022
Fair value of interests held	**$ 8,457**	9,310
Expected weighted-average life (in years)	**6.4**	6.3
Key assumptions:		
Prepayment rate assumption (1)	**8.5%**	9.4
Impact on fair value from 10% adverse change	**$ 244**	288
Impact on fair value from 25% adverse change	**586**	688
Discount rate assumption	**9.6%**	9.1
Impact on fair value from 100 basis point increase	**$ 340**	368
Impact on fair value from 200 basis point increase	**652**	707
Cost to service assumption ($ per loan)	**102**	102
Impact on fair value from 10% adverse change	**157**	171
Impact on fair value from 25% adverse change	**391**	427

(1) Includes a blend of prepayment speeds and expected defaults. Prepayment speeds are influenced by mortgage interest rates as well as our estimation of drivers of borrower behavior.

The sensitivities in the preceding table are hypothetical and caution should be exercised when relying on this data. Changes in value based on variations in assumptions generally cannot be extrapolated because the relationship of the change in the assumption to the change in value may not be linear. Also, the effect of a variation in a particular assumption on the value of the other interests held is calculated independently without changing any other assumptions. In reality, changes in one factor may result in changes in others, which might magnify or counteract the sensitivities.

We present the components of our managed servicing portfolio in Table 6.3 at unpaid principal balance for loans serviced and subserviced for others and at carrying value for owned loans serviced.

Table 6.3: Managed Servicing Portfolio

(in billions)		Sep 30, 2023	Dec 31, 2022
Residential mortgage servicing:			
Serviced and subserviced for others	$	592	681
Owned loans serviced		265	273
Total residential servicing		857	954
Commercial mortgage servicing:			
Serviced and subserviced for others		554	577
Owned loans serviced		129	133
Total commercial servicing		683	710
Total managed servicing portfolio	$	1,540	1,664
Total serviced for others, excluding subserviced for others	$	1,136	1,246
MSRs as a percentage of loans serviced for others		0.84%	0.84
Weighted average note rate (mortgage loans serviced for others)		4.47	4.30

At September 30, 2023, and December 31, 2022, we had servicer advances, net of an allowance for uncollectible amounts, of $1.9 billion and $2.5 billion, respectively. As the servicer of loans for others, we advance certain payments of principal, interest, taxes, insurance, and default-related expenses which are generally reimbursed within a short timeframe from cash flows from the trust, government-sponsored entities (GSEs), insurer or borrower.

The credit risk related to these advances is limited since the reimbursement is generally senior to cash payments to investors. We also advance payments of taxes and insurance for our owned loans which are collectible from the borrower. We maintain an allowance for uncollectible amounts for advances on loans serviced for others that may not be reimbursed if the payments were not made in accordance with applicable servicing agreements or if the insurance or servicing agreements contain limitations on reimbursements. Servicing advances on owned loans are written-off when deemed uncollectible.

Table 6.4 presents the components of mortgage banking noninterest income.

Table 6.4: Mortgage Banking Noninterest Income

			Quarter ended September 30,			Nine months ended September 30,	
(in millions)			2023	2022		2023	2022
Contractually specified servicing fees, late charges and ancillary fees		$	521	629	$	1,635	1,909
Unreimbursed servicing costs (1)			(34)	(35)		(112)	(116)
Amortization for commercial MSRs			(59)	(62)		(182)	(185)
Changes due to collection/realization of expected cash flows (2)	(A)		(290)	(290)		(936)	(934)
Net servicing fees			138	242		405	674
Changes in fair value of MSRs due to valuation inputs or assumptions (3)	(B)		511	750		602	3,223
Net derivative losses from economic hedges (4)			(569)	(863)		(715)	(3,489)
Market-related valuation changes to MSRs, net of hedge results			(58)	(113)		(113)	(266)
Total net servicing income			80	129		292	408
Net gains on mortgage loan originations/sales (5)			113	195		335	896
Total mortgage banking noninterest income		$	193	324	$	627	1,304
Total changes in fair value of MSRs carried at fair value	(A)+(B)	$	221	460	$	(334)	2,289

(1) Includes costs associated with foreclosures, unreimbursed interest advances to investors, other interest costs and transaction costs associated with sales of MSRs.
(2) Represents the reduction in the MSR fair value for the cash flows expected to be collected during the period, net of income accreted due to the passage of time.
(3) Refer to the analysis of changes in fair value MSRs presented in Table 6.1 in this Note for more detail.
(4) See Note 11 (Derivatives) for additional information on economic hedges.
(5) Includes net gains (losses) of $119 million and $169 million in the third quarter and first nine months of 2023, respectively, and $568 million and $2.6 billion in the third quarter and first nine months of 2022, respectively, related to derivatives used as economic hedges of mortgage loans held for sale and derivative loan commitments.

Note 7: Intangible Assets and Other Assets

Table 7.1 presents the gross carrying value of intangible assets and accumulated amortization.

Table 7.1: Intangible Assets

	September 30, 2023			December 31, 2022		
(in millions)	Gross carrying value	Accumulated amortization	Net carrying value	Gross carrying value	Accumulated amortization	Net carrying value
Amortized intangible assets:						
MSRs	$ 5,023	(3,954)	1,069	4,942	(3,772)	1,170
Customer relationship and other intangibles	773	(641)	132	754	(602)	152
Total amortized intangible assets	$ 5,796	(4,595)	1,201	5,696	(4,374)	1,322
Unamortized intangible assets:						
MSRs (carried at fair value)	$ 8,457			9,310		
Goodwill	25,174			25,173		

Table 7.2 provides the current year and estimated future amortization expense for amortized intangible assets. We based our projections of amortization expense shown below on existing asset balances at September 30, 2023. Future amortization expense may vary from these projections.

Table 7.2: Amortization Expense for Intangible Assets

(in millions)	Amortized MSRs	Customer relationship and other intangibles	Total
Nine months ended September 30, 2023 (actual)	$ 182	39	221
Estimate for the remainder of 2023	$ 57	13	70
Estimate for year ended December 31,			
2024	219	43	262
2025	190	35	225
2026	153	29	182
2027	121	2	123
2028	101	2	103

Table 7.3 shows the allocation of goodwill to our reportable operating segments.

Table 7.3: Goodwill

(in millions)	Consumer Banking and Lending	Commercial Banking	Corporate and Investment Banking	Wealth and Investment Management	Corporate	Consolidated Company
December 31, 2022	$ 16,418	2,931	5,375	344	105	25,173
Foreign currency translation	—	1	—	—	—	1
September 30, 2023	$ 16,418	2,932	5,375	344	105	25,174

Table 7.4 presents the components of other assets.

Table 7.4: Other Assets

(in millions)	Sep 30, 2023	Dec 31, 2022
Corporate/bank-owned life insurance (1)	$ 19,735	20,807
Accounts receivable (2)	28,340	23,646
Interest receivable:		
AFS and HTM debt securities	1,604	1,572
Loans	3,803	3,470
Trading and other	1,233	767
Operating lease assets (lessor)	5,477	5,790
Operating lease ROU assets (lessee)	3,567	3,837
Other (3)(4)	13,890	15,949
Total other assets	$ 77,649	75,838

(1) Corporate/bank-owned life insurance is recorded at cash surrender value.
(2) Primarily includes derivatives clearinghouse receivables, trade date receivables, and servicer advances, which are recorded at amortized cost.
(3) Primarily includes income tax receivables, prepaid expenses, foreclosed assets, and venture capital and private equity investments in consolidated portfolio companies.
(4) In first quarter 2023, we adopted ASU 2018-12 – Financial Services – Insurance (Topic 944): *Targeted Improvements to the Accounting for Long-Duration Contracts*. For additional information, see Note 1 (Summary of Significant Accounting Policies).

Note 8: Leasing Activity

The information below provides a summary of our leasing activities as a lessor and lessee. See Note 8 (Leasing Activity) in our 2022 Form 10-K for additional information about our leasing activities.

As a Lessor

Noninterest income on leases, included in Table 8.1, is included in other noninterest income on our consolidated statement of income. Lease expense, included in other noninterest expense on our consolidated statement of income, was $172 million and $186 million for the quarters ended September 30, 2023 and 2022, respectively, and $529 million and $559 million for the first nine months of 2023 and 2022, respectively.

Table 8.1: Leasing Revenue

	Quarter ended September 30,		Nine months ended September 30,	
(in millions)	**2023**	2022	**2023**	2022
Interest income on lease financing	**$ 188**	134	**$ 533**	438
Other lease revenue:				
Variable revenue on lease financing	**25**	28	**74**	85
Fixed revenue on operating leases	**241**	243	**735**	730
Variable revenue on operating leases	**9**	17	**33**	46
Other lease-related revenue (1)	**16**	34	**103**	121
Noninterest income on leases	**291**	322	**945**	982
Total leasing revenue	**$ 479**	456	**$ 1,478**	1,420

(1) Predominantly includes net gains (losses) on disposition of assets leased under operating leases or lease financings.

As a Lessee

Substantially all of our leases are operating leases. Table 8.2 presents balances for our operating leases.

Table 8.2: Operating Lease Right-of-Use (ROU) Assets and Lease Liabilities

(in millions)	**Sep 30, 2023**	Dec 31, 2022
ROU assets	**$ 3,567**	3,837
Lease liabilities	**4,170**	4,465

Table 8.3 provides the composition of our lease costs, which are predominantly included in occupancy expense.

Table 8.3: Lease Costs

	Quarter ended September 30,		Nine months ended September 30,	
(in millions)	**2023**	2022	**2023**	2022
Fixed lease expense – operating leases	**$ 248**	263	**$ 747**	769
Variable lease expense	**66**	67	**207**	210
Other (1)	**(12)**	(7)	**(38)**	(25)
Total lease costs	**$ 302**	323	**$ 916**	954

(1) Predominantly includes gains recognized from sale leaseback transactions and sublease rental income.

Note 9: Preferred Stock

We are authorized to issue 20 million shares of preferred stock, without par value. Outstanding preferred shares rank senior to common shares both as to the payment of dividends and liquidation preferences but have no general voting rights. All outstanding preferred stock with a liquidation preference value, except for Series L Preferred Stock, may be redeemed for the liquidation preference value, plus any accrued but unpaid dividends, on any dividend payment date on or after the earliest redemption date for that series. Additionally, these same series of preferred stock may be redeemed following a "regulatory capital treatment event", as described in the terms of each series. Capital actions, including redemptions of our preferred stock, may be subject to regulatory approval or conditions.

In addition, we are authorized to issue 4 million shares of preference stock, without par value. We have not issued any preference shares under this authorization. If issued, preference shares would be limited to one vote per share.

In July 2023, we issued $1.725 billion of our Preferred Stock, Series EE. In September 2023, we redeemed our Preferred Stock, Series Q, for a cost of $1.725 billion.

Table 9.1 summarizes information about our preferred stock.

Table 9.1: Preferred Stock

		September 30, 2023				December 31, 2022

(1) At the option of the holder, each share of Series L Preferred Stock may be converted at any time into 6.3814 shares of common stock, plus cash in lieu of fractional shares, subject to anti-dilution adjustments. If converted within 30 days of certain liquidation or change of control events, the holder may receive up to 16.5916 additional shares, or, at our option, receive an equivalent amount of cash in lieu of common stock. We may convert some or all of the Series L Preferred Stock into shares of common stock if the closing price of our common stock exceeds 130 percent of the conversion price of the Series L Preferred Stock for 20 trading days during any period of 30 consecutive trading days. We declared dividends of $74 million on Series L Preferred Stock for both quarters ended September 30, 2023, and September 30, 2022.

Note 10: Legal Actions

Wells Fargo and certain of our subsidiaries are involved in a number of judicial, regulatory, governmental, arbitration, and other proceedings or investigations concerning matters arising from the conduct of our business activities, and many of those proceedings and investigations expose Wells Fargo to potential financial loss or other adverse consequences. These proceedings and investigations include actions brought against Wells Fargo and/or our subsidiaries with respect to corporate-related matters and transactions in which Wells Fargo and/or our subsidiaries were involved. In addition, Wells Fargo and our subsidiaries may be requested to provide information to or otherwise cooperate with government authorities in the conduct of investigations of other persons or industry groups.

We establish accruals for legal actions when potential losses associated with the actions become probable and the costs can be reasonably estimated. For such accruals, we record the amount we consider to be the best estimate within a range of potential losses that are both probable and estimable; however, if we cannot determine a best estimate, then we record the low end of the range of those potential losses. There can be no assurance as to the ultimate outcome of legal actions, including the matters described below, and the actual costs of resolving legal actions may be substantially higher or lower than the amounts accrued for those actions.

ADVISORY ACCOUNT CASH SWEEP INVESTIGATION The United States Securities and Exchange Commission (SEC) has undertaken an investigation regarding the cash sweep options that the Company provides to investment advisory clients at account opening.

AUTOMOBILE LENDING MATTERS On April 20, 2018, the Company entered into consent orders with the Office of the Comptroller of the Currency (OCC) and the Consumer Financial Protection Bureau (CFPB) to resolve, among other things, investigations by the agencies into the Company's compliance risk management program and its past practices involving certain automobile collateral protection insurance (CPI) policies and certain mortgage interest rate lock extensions. Shareholders filed a putative securities fraud class action against the Company and its executive officers alleging material misstatements and omissions of CPI-related information in the Company's public disclosures. In January 2020, the court dismissed this action as to all defendants except the Company and a former executive officer and limited the action to two alleged misstatements. On September 26, 2023, the court granted final approval of an agreement pursuant to which the Company paid $300 million to resolve this action. Additionally, a number of other lawsuits were filed by non-governmental parties seeking damages or other remedies related to these CPI policies and related to the unused portion of guaranteed automobile protection (GAP) waiver or insurance agreements. As previously disclosed, the Company entered into various settlements to resolve these lawsuits, while others were dismissed. In addition, federal and state government agencies, including the CFPB, have undertaken formal or informal inquiries, investigations, or examinations regarding these and other issues related to the origination, servicing, and collection of consumer auto loans, including related insurance products. On December 20, 2022, the Company entered into a consent order with the CFPB to resolve the CFPB's investigations related to automobile lending, consumer deposit accounts, and mortgage lending. The consent order requires, among other things, remediation to customers and the payment of a $1.7 billion civil penalty to the CFPB. As previously disclosed, the Company entered into an agreement to resolve investigations by state attorneys general.

COMPANY 401(K) PLAN MATTERS Federal government agencies, including the United States Department of Labor (Department of Labor), have undertaken reviews of certain transactions associated with the Employee Stock Ownership Plan feature of the Company's 401(k) plan, including the manner in which the 401(k) plan purchased certain securities used in connection with the Company's contributions to the 401(k) plan. As previously disclosed, the Company entered into an agreement to resolve the Department of Labor's review. On September 26, 2022, participants in the Company's 401(k) plan filed a putative class action in the United States District Court for the District of Minnesota alleging that the Company violated the Employee Retirement Income Security Act of 1974 in connection with certain of these transactions.

CONSENT ORDER DISCLOSURE LITIGATION Wells Fargo shareholders brought a putative securities fraud class action in the United States District Court for the Southern District of New York alleging that the Company and certain of its current and former executive officers and directors made false or misleading statements regarding the Company's efforts to comply with the February 2018 consent order with the Federal Reserve Board and the April 2018 consent orders with the CFPB and OCC. On September 8, 2023, the court granted final approval of an agreement pursuant to which the Company paid $1.0 billion to resolve this action. Allegations related to the Company's efforts to comply with these three consent orders are also among the subjects of shareholder derivative lawsuits filed in California state and federal court.

HIRING PRACTICES MATTERS Government agencies, including the United States Department of Justice and the SEC, have undertaken formal or informal inquiries or investigations regarding the Company's hiring practices related to diversity. The United States Department of Justice has since closed its investigation without taking action. A putative securities fraud class action has also been filed in the United States District Court for the Northern District of California alleging that the Company and certain of its executive officers made false or misleading statements about the Company's hiring practices related to diversity. Allegations related to the Company's hiring practices related to diversity are also among the subjects of a shareholder derivative lawsuit pending in the United States District Court for the Northern District of California.

INTERCHANGE LITIGATION Plaintiffs representing a class of merchants have filed putative class actions, and individual merchants have filed individual actions, against Wells Fargo Bank, N.A., Wells Fargo & Company, Wachovia Bank, N.A., and Wachovia Corporation regarding the interchange fees associated with Visa and MasterCard payment card transactions. Visa, MasterCard, and several other banks and bank holding companies are also named as defendants in these actions. These actions have been consolidated in the United States District Court for the Eastern District of New York. The amended and consolidated complaint asserts claims against defendants based on alleged violations of federal and state antitrust laws and seeks damages as well as injunctive relief. Plaintiff merchants allege that Visa, MasterCard, and payment card issuing banks unlawfully colluded to set interchange rates. Plaintiffs also allege that enforcement of certain Visa and MasterCard rules and alleged tying and bundling of services offered to merchants are anticompetitive. Wells Fargo and Wachovia, along with other defendants and entities, are parties to Loss and Judgment Sharing Agreements, which provide that they, along with other entities, will share, based on a formula, in any losses from the Interchange Litigation. On July 13, 2012, Visa, MasterCard, and the financial institution defendants, including Wells Fargo, signed a memorandum of understanding with plaintiff merchants to resolve the consolidated class action and reached a separate settlement in principle of the consolidated individual actions. The settlement payments to be made by all defendants in the consolidated class and individual actions totaled approximately $6.6 billion before reductions applicable to certain merchants opting out of the settlement. The class settlement also provided for the distribution to class merchants of 10 basis points of default interchange across all credit rate categories for a period of eight consecutive months. The district court granted final approval of the settlement, which was appealed to the United States Court of Appeals for the Second Circuit by settlement objector merchants. Other merchants opted out of the settlement and are pursuing several individual actions. On June 30, 2016, the Second Circuit vacated the settlement agreement and reversed and remanded the consolidated action to the United States District Court for the Eastern District of New York for further proceedings. On November 23, 2016, prior class counsel filed a petition to the United States Supreme Court, seeking review of the reversal of the settlement by the Second Circuit, and the Supreme Court denied the petition on March 27, 2017. On November 30, 2016, the district court appointed lead class counsel for a damages class and an equitable relief class. The parties have entered into a settlement agreement to resolve the damages class claims pursuant to which defendants will pay a total of approximately $6.2 billion, which includes approximately $5.3 billion of funds remaining from the 2012 settlement and $900 million in additional funding. The Company's allocated responsibility for the additional funding is approximately $94.5 million. The court granted final approval of the settlement on December 13, 2019, which was appealed to the United States Court of Appeals for the Second Circuit by settlement objector merchants. On March 15, 2023, the Second Circuit affirmed the damages class settlement. On September 27, 2021, the district court granted the plaintiffs' motion for class certification in the equitable relief case. Several of the opt-out and direct action litigations have been settled while others remain pending.

RECORD-KEEPING INVESTIGATIONS The SEC and the United States Commodity Futures Trading Commission (CFTC) have undertaken investigations regarding the Company's compliance with records retention requirements relating to business communications sent over unapproved electronic messaging channels. In August 2023, the Company entered into agreements pursuant to which it paid $125 million to the SEC and $75 million to the CFTC in order to resolve their investigations.

RMBS TRUSTEE LITIGATION In December 2014, Phoenix Light SF Limited (Phoenix Light) and certain related entities filed a complaint in the United States District Court for the Southern District of New York alleging claims against Wells Fargo Bank, N.A., in its capacity as trustee for a number of residential mortgage-backed securities (RMBS) trusts. Complaints raising similar allegations have been filed by Commerzbank AG in the Southern District of New York, IKB International and IKB Deutsche Industriebank (together, IKB) in New York state court, and Park Royal I LLC and Park Royal II LLC in New York state court. In each case, the plaintiffs allege that Wells Fargo Bank, N.A., as trustee, caused losses to investors, and plaintiffs assert causes of action based upon, among other things, the trustee's alleged failure to notify and enforce repurchase obligations of mortgage loan sellers for purported breaches of representations and warranties, notify investors of alleged events of default, and abide by appropriate standards of care following alleged events of default. In July 2022, the district court dismissed Phoenix Light's claims and certain of the claims asserted by Commerzbank AG, and subsequently entered judgment in each case in favor of Wells Fargo Bank, N.A. In August 2022, Phoenix Light and Commerzbank AG each appealed the district court's decision to the United States Court of Appeals for the Second Circuit. Phoenix Light dismissed its appeal in May 2023, terminating its case. In October 2023, the Company reached an agreement in principle with IKB to resolve IKB's claims. The Company previously settled two class actions filed by institutional investors and an action filed by the National Credit Union Administration with similar allegations.

SEMINOLE TRIBE TRUSTEE LITIGATION The Seminole Tribe of Florida filed a complaint in Florida state court alleging that Wells Fargo, as trustee, charged excess fees in connection with the administration of a minor's trust and failed to invest the assets of the trust prudently. The complaint was later amended to include three individual current and former beneficiaries as plaintiffs and to remove the Tribe as a party to the case.

OUTLOOK As described above, the Company establishes accruals for legal actions when potential losses associated with the actions become probable and the costs can be reasonably estimated. The high end of the range of reasonably possible losses in excess of the Company's accrual for probable and estimable losses was approximately $1.6 billion as of September 30, 2023. The outcomes of legal actions are unpredictable and subject to significant uncertainties, and it is inherently difficult to determine whether any loss is probable or even possible. It is also inherently difficult to estimate the amount of any loss and there may be matters for which a loss is probable or reasonably possible but not currently estimable. Accordingly, actual losses may be in excess of the established accrual or the range of reasonably possible loss. Based on information currently available, advice of counsel, available insurance coverage, and established reserves, Wells Fargo believes that the eventual outcome of the actions against Wells Fargo and/or its subsidiaries will not, individually or in the aggregate, have a material adverse effect on Wells Fargo's consolidated financial condition. However, it is possible that the ultimate resolution of a matter, if unfavorable, may be material to Wells Fargo's results of operations for any particular period.

Note 11: Derivatives

We use derivatives to manage exposure to market risk, including interest rate risk, credit risk and foreign currency risk, and to assist customers with their risk management objectives. We designate certain derivatives as hedging instruments in qualifying hedge accounting relationships (fair value or cash flow hedges). Our remaining derivatives consist of economic hedges that do not qualify for hedge accounting and derivatives held for customer accommodation trading or other purposes. For additional information on our derivatives activities, see Note 14 (Derivatives) in our 2022 Form 10-K.

Table 11.1 presents the total notional or contractual amounts and fair values for our derivatives. Derivative transactions can be measured in terms of the notional amount, but this amount is not recorded on our consolidated balance sheet and is not, when viewed in isolation, a meaningful measure of the risk profile of the instruments. The notional amount is generally not exchanged, but is used only as the basis on which derivative cash flows are determined.

Table 11.1: Notional or Contractual Amounts and Fair Values of Derivatives

	September 30, 2023			December 31, 2022		
		Fair value			Fair value

(1) In first quarter 2023, we adopted ASU 2018-12 – Financial Services – Insurance (Topic 944): *Targeted Improvements to the Accounting for Long-Duration Contracts*. For additional information, see Note 1 (Summary of Significant Accounting Policies).

Balance Sheet Offsetting

We execute substantially all of our derivative transactions under master netting arrangements. Where legally enforceable, these master netting arrangements give the ability, in the event of default by the counterparty, to liquidate securities held as collateral and to offset receivables and payables with the same counterparty. We reflect all derivative balances and related cash collateral subject to enforceable master netting arrangements on a net basis on our consolidated balance sheet. We do not net non-cash collateral that we receive or pledge against derivative balances on our consolidated balance sheet.

For disclosure purposes, we present "Total Derivatives, net" which represents the aggregate of our net exposure to each counterparty after considering the balance sheet netting adjustments and any non-cash collateral. We manage derivative exposure by monitoring the credit risk associated with each counterparty using counterparty-specific credit risk limits, using master netting arrangements and obtaining collateral.

Table 11.2 provides information on the fair values of derivative assets and liabilities subject to enforceable master netting arrangements, the balance sheet netting adjustments and the resulting net fair value amount recorded on our consolidated balance sheet, as well as the non-cash collateral associated with such arrangements. In addition to the netting amounts included in the table, we also have balance sheet netting related to resale and repurchase agreements that are disclosed within Note 15 (Pledged Assets and Collateral).

(1) Represents amounts with counterparties subject to enforceable master netting arrangements that have been offset in our consolidated balance sheet, including portfolio level counterparty valuation adjustments related to customer accommodation and other trading derivatives. Counterparty valuation adjustments related to derivative assets were $284 million and $372 million and debit valuation adjustments related to derivative liabilities were $334 million and $331 million as of September 30, 2023, and December 31, 2022, respectively, and were primarily related to interest rate contracts.
(2) In first quarter 2023, we adopted ASU 2018-12 – Financial Services – Insurance (Topic 944): *Targeted Improvements to the Accounting for Long-Duration Contracts*. For additional information, see Note 1 (Summary of Significant Accounting Policies).

Fair Value and Cash Flow Hedges

For fair value hedges, we use interest rate swaps to convert certain of our fixed-rate long-term debt and time certificates of deposit to floating rates to hedge our exposure to interest rate risk. We also enter into cross-currency swaps, cross-currency interest rate swaps and forward contracts to hedge our exposure to foreign currency risk and interest rate risk associated with the issuance of non-U.S. dollar denominated long-term debt. We also enter into futures contracts, forward contracts, and swap contracts to hedge our exposure to the price risk of physical commodities included in Other Assets. In addition, we use interest rate swaps, cross-currency swaps, cross-currency interest rate swaps and forward contracts to hedge against changes in fair value of certain investments in available-for-sale (AFS) debt securities due to changes in interest rates, foreign currency rates, or both. For certain fair value hedges of interest rate risk, we use the portfolio layer method to hedge stated amounts of closed portfolios of AFS debt securities. For certain fair value hedges of foreign currency risk, changes in fair value of cross-currency swaps attributable to changes in cross-currency basis spreads are excluded from the assessment of hedge effectiveness and recorded in other comprehensive income (OCI). See Note 20 (Other Comprehensive Income) for the amounts recognized in other comprehensive income.

For cash flow hedges, we use interest rate swaps to hedge the variability in interest payments received on certain interest-earning deposits with banks and certain floating-rate commercial loans. We also use cross-currency swaps to hedge variability in interest payments on fixed-rate foreign currency-denominated long-term debt due to changes in foreign exchange rates.

We estimate $976 million pre-tax of deferred net losses related to cash flow hedges in OCI at September 30, 2023, will be reclassified into net interest income during the next twelve months. For cash flow hedges as of September 30, 2023, we are hedging our interest rate and foreign currency exposure to the variability of future cash flows for all forecasted transactions for a maximum of 9 years. For additional information on our accounting hedges, see Note 1 (Summary of Significant Accounting Policies) in our 2022 Form 10-K.

Table 11.3 and Table 11.4 show the net gains (losses) related to derivatives in cash flow and fair value hedging relationships, respectively.

Long-term debt		**(135,414)**	**17,896**	**—**	**—**
December 31, 2022					
Available-for-sale debt securities (4)	$	39,423	(3,859)	16,100	722
Other assets		1,663	38	—	—
Deposits		(41,687)	205	(10)	—
Long-term debt		(130,997)	13,862	(5)	—

(1) Does not include the carrying amount of hedged items where only foreign currency risk is the designated hedged risk. The carrying amount excluded $649 million and $739 million for available-for-sale debt securities as of September 30, 2023, and December 31, 2022, respectively. There was no carrying amount related to long-term debt at both September 30, 2023, and December 31, 2022.
(2) Represents the full carrying amount of the hedged asset or liability item as of the balance sheet date, except for circumstances in which only a portion of the asset or liability was designated as the hedged item in which case only the portion designated is presented.
(3) The balance includes $33 million and $749 million of debt securities and long-term debt cumulative basis adjustments, respectively, as of September 30, 2023, and $39 million and $334 million of debt securities and long-term debt cumulative basis adjustments, respectively, as of December 31, 2022, on terminated hedges whereby the hedged items have subsequently been re-designated into existing hedges.
(4) Carrying amount represents the amortized cost.
(5) The balance includes cumulative basis adjustments of $(280) million for hedged items currently designated as of September 30, 2023, related to certain AFS debt securities designated as the hedged item in a fair value hedge using the portfolio layer method. At September 30, 2023, the aggregated designated hedged items using the portfolio layer method had a carrying amount of $23.8 billion from closed portfolios of financial assets totaling $26.6 billion.

Derivatives Not Designated as Hedging Instruments

Derivatives not designated as hedging instruments include economic hedges and derivatives entered into for customer accommodation trading purposes.

We use economic hedge derivatives to manage our exposure to interest rate risk, equity price risk, foreign currency risk, and credit risk. We also use economic hedge derivatives to mitigate the periodic earnings volatility caused by mismatches between the changes in fair value of the hedged item and hedging instrument recognized on our fair value accounting hedges. Changes in the fair values of derivatives used to economically hedge the deferred compensation plan are reported in personnel expense.

For additional information on our derivatives activities, see Note 14 (Derivatives) in our 2022 Form 10-K.

Table 11.6 shows the net gains (losses), recognized by income statement lines, related to derivatives not designated as hedging instruments.

(1) Mortgage banking amounts for the third quarter and first nine months of 2023 are comprised of gains (losses) of $(569) million and $(715) million, respectively, related to derivatives used as economic hedges of MSRs measured at fair value offset by gains (losses) of $119 million and $169 million, respectively, related to derivatives used as economic hedges of mortgage loans held for sale and derivative loan commitments. The corresponding amounts for the third quarter and first nine months of 2022 are comprised of gains (losses) of $(863) million and $(3.5) billion, respectively, offset by gains (losses) of $568 million and $2.6 billion, respectively. For additional information on our mortgage banking interest contracts, see Note 6 (Mortgage Banking Activities).

(2) In first quarter 2023, we adopted ASU 2018-12 – Financial Services – Insurance (Topic 944): *Targeted Improvements to the Accounting for Long-Duration Contracts*. For additional information, see Note 1 (Summary of Significant Accounting Policies).

Credit Derivatives

Credit derivative contracts are arrangements whose value is derived from the transfer of credit risk of a reference asset or entity from one party (the purchaser of credit protection) to another party (the seller of credit protection). We generally use credit derivatives to assist customers with their risk management objectives by purchasing and selling credit protection on corporate debt obligations through the use of credit default swaps or through risk participation swaps to help manage counterparty exposure. We would be required to perform under the credit derivatives we sold in the event of default by the referenced obligors. Events of default include events such as bankruptcy, capital restructuring or lack of principal and/or interest payment.

Table 11.7 provides details of sold credit derivatives.

Table 11.7: Sold Credit Derivatives

		Notional amount
(in millions)	Protection sold	Protection sold – non-investment grade
September 30, 2023		
Credit default swaps	**$ 19,077**	**1,756**
Risk participation swaps	**6,677**	**6,429**
Total credit derivatives	**$ 25,754**	**8,185**
December 31, 2022		
Credit default swaps	$ 12,733	1,860
Risk participation swaps	6,728	6,518
Total credit derivatives	$ 19,461	8,378

Protection sold represents the estimated maximum exposure to loss that would be incurred if, upon an event of default, the value of our interests and any associated collateral declined to zero, and does not take into consideration any recovery value from the referenced obligation or offset from collateral held or any economic hedges.

The amounts under non-investment grade represent the notional amounts of those credit derivatives on which we have a higher risk of being required to perform under the terms of the credit derivative and are a function of the underlying assets.

We consider the credit risk to be low if the underlying assets under the credit derivative have an external rating that is investment grade. If an external rating is not available, we classify the credit derivative as non-investment grade.

Our maximum exposure to sold credit derivatives is managed through posted collateral and purchased credit derivatives with identical or similar reference positions in order to achieve our desired credit risk profile. The credit risk management is designed to provide an ability to recover a significant portion of any amounts that would be paid under sold credit derivatives.

Credit-Risk Contingent Features

Certain of our derivative contracts contain provisions whereby if the credit rating of our debt were to be downgraded by certain major credit rating agencies, the counterparty could demand additional collateral or require termination or replacement of derivative instruments in a net liability position. Table 11.8 illustrates our exposure to OTC bilateral derivative contracts with credit-risk contingent features, collateral we have posted, and the additional collateral we would be required to post if the credit rating of our debt was downgraded below investment grade.

Table 11.8: Credit-Risk Contingent Features

(in billions)	**Sep 30, 2023**	Dec 31, 2022
Net derivative liabilities with credit-risk contingent features	**$ 24.5**	20.7
Collateral posted	**21.0**	17.4
Additional collateral to be posted upon a below investment grade credit rating (1)	**3.5**	3.3

(1) Any credit rating below investment grade requires us to post the maximum amount of collateral.

Note 12: Fair Values of Assets and Liabilities

We use fair value measurements to record fair value adjustments to certain assets and liabilities and to fulfill fair value disclosure requirements. Assets and liabilities recorded at fair value on a recurring basis, such as derivatives, residential MSRs, and trading or AFS debt securities, are presented in Table 12.1 in this Note. Additionally, from time to time, we record fair value adjustments on a nonrecurring basis. These nonrecurring adjustments typically involve application of lower of cost or fair value (LOCOM) accounting, write-downs of individual assets or application of the measurement alternative for nonmarketable equity securities. Assets recorded at fair value on a nonrecurring basis are presented in Table 12.4 in this Note. We provide in Table 12.9 estimates of fair value for financial instruments that are not recorded at fair value, such as loans and debt liabilities carried at amortized cost.

See Note 1 (Summary of Significant Accounting Policies) in our 2022 Form 10-K for discussion of how we determine fair value. For descriptions of the valuation methodologies we use for assets and liabilities recorded at fair value on a recurring or nonrecurring basis, see Note 15 (Fair Values of Assets and Liabilities) in our 2022 Form 10-K.

FAIR VALUE HIERARCHY We classify our assets and liabilities recorded at fair value as either Level 1, 2, or 3 in the fair value hierarchy. The highest priority (Level 1) is assigned to valuations based on unadjusted quoted prices in active markets and the lowest priority (Level 3) is assigned to valuations based on significant unobservable inputs. See Note 1 (Summary of Significant Accounting Policies) in our 2022 Form 10-K for a detailed description of the fair value hierarchy.

In the determination of the classification of financial instruments in Level 2 or Level 3 of the fair value hierarchy, we consider all available information, including observable market data, indications of market liquidity and orderliness, and our understanding of the valuation techniques and significant inputs used. This determination is ultimately based upon the specific facts and circumstances of each instrument or instrument category and judgments are made regarding the significance of the unobservable inputs to the instruments' fair value measurement in its entirety. If unobservable inputs are considered significant, the instrument is classified as Level 3.

We do not classify nonmarketable equity securities in the fair value hierarchy if we use the non-published net asset value (NAV) per share (or its equivalent) as a practical expedient to measure fair value. Marketable equity securities with published NAVs are classified in the fair value hierarchy.

Assets and Liabilities Recorded at Fair Value on a Recurring Basis

Table 12.1 presents the balances of assets and liabilities recorded at fair value on a recurring basis.

Table 12.1: Fair Value on a Recurring Basis

	September 30, 2023				December 31, 2022

Other assets and liabilities (11)	(791)	302	—	—	—	—	—	(489)	302	(10)

(1) All amounts represent net gains (losses) included in net income except for AFS debt securities and other assets and liabilities which also included net gains (losses) in other comprehensive income. Net gains (losses) included in other comprehensive income for AFS debt securities were $(9) million and $(28) million for the third quarter and first nine months of 2023, respectively, and $(9) million and $(36) million for the third quarter and first nine months of 2022, respectively. Net gains (losses) included in other comprehensive income for other assets and liabilities were $(13) million and $(8) million for the third quarter and first nine months of 2023, respectively, and $1 million and $102 million for the third quarter and first nine months of 2022, respectively.
(2) Includes originations of mortgage servicing rights and loans held for sale.
(3) All assets and liabilities transferred into Level 3 were previously classified within Level 2.
(4) All assets and liabilities transferred out of Level 3 are classified as Level 2. During first quarter 2022, we transferred $8.9 billion of non-marketable equity securities and $1.4 billion of related economic hedging derivative assets (equity contracts) out of Level 3 due to our election to measure fair value of these instruments as a portfolio. Under this election, the unit of valuation is the portfolio-level, rather than each individual instrument. The unobservable inputs previously significant to the valuation of the instruments individually are no longer significant, as those unobservable inputs offset under the portfolio election.
(5) All amounts represent net unrealized gains (losses) related to assets and liabilities held at period end included in net income except for AFS debt securities and other assets and liabilities which also included net unrealized gains (losses) related to assets and liabilities held at period end in other comprehensive income. Net unrealized gains (losses) included in other comprehensive income for AFS debt securities were $(8) million and $(25) million for the third quarter and first nine months of 2023, respectively, and $0 for both the third quarter and first nine months of 2022. Net unrealized gains (losses) included in other comprehensive income for other assets and liabilities were $(13) million and $(8) million for the third quarter and first nine months of 2023, respectively, and $1 million and $102 million for the third quarter and first nine months of 2022, respectively.
(6) Included in net gains from trading and securities on our consolidated statement of income.
(7) Included in mortgage banking income on our consolidated statement of income.
(8) For additional information on the changes in mortgage servicing rights, see Note 6 (Mortgage Banking Activities).
(9) Included in mortgage banking income, net gains from trading and securities, and other noninterest income on our consolidated statement of income.
(10) Included in other noninterest income on our consolidated statement of income.
(11) In first quarter 2023, we adopted ASU 2018-12 – Financial Services – Insurance (Topic 944): *Targeted Improvements to the Accounting for Long-Duration Contracts*. For additional information, see Note 1 (Summary of Significant Accounting Policies).

Table 12.3 provides quantitative information about the valuation techniques and significant unobservable inputs used in the valuation of our Level 3 assets and liabilities measured at fair value on a recurring basis.

The significant unobservable inputs for Level 3 assets inherent in the fair values obtained from third-party vendors are not included in the table, as the specific inputs applied are not provided by the vendor (for additional information on vendor-developed valuations, see Note 15 (Fair Values of Assets and Liabilities) in our 2022 Form 10-K).

Weighted averages of inputs are calculated using outstanding unpaid principal balance for cash instruments, such as loans and securities, and notional amounts for derivative instruments.

Table 12.3: Valuation Techniques – Recurring Basis

Insignificant Level 3 liabilities, net of assets (3)	(138)							
Total Level 3 assets, net of liabilities	$ 6,620 (4)							

(1) The high end of the range of inputs is for servicing modified loans. For non-modified loans, the range is $52 - $170 at September 30, 2023, and $52 - $178 at December 31, 2022.
(2) Includes a blend of prepayment speeds and expected defaults. Prepayment speeds are influenced by mortgage interest rates as well as our estimation of drivers of borrower behavior.
(3) In first quarter 2023, we adopted ASU 2018-12 – Financial Services – Insurance (Topic 944): *Targeted Improvements to the Accounting for Long-Duration Contracts*. For additional information, see Note 1 (Summary of Significant Accounting Policies).
(4) Consists of total Level 3 assets of $10.3 billion and $11.5 billion and total Level 3 liabilities of $9.0 billion and $4.9 billion, before netting of derivative balances, at September 30, 2023, and December 31, 2022, respectively.

For additional information on the valuation techniques and significant unobservable inputs used in the valuation of our Level 3 assets and liabilities, including how changes in these inputs affect fair value estimates, see Note 15 (Fair Values of Assets and Liabilities) in our 2022 Form 10-K.

Assets and Liabilities Recorded at Fair Value on a Nonrecurring Basis

We may be required, from time to time, to measure certain assets at fair value on a nonrecurring basis in accordance with GAAP. These adjustments to fair value usually result from application of LOCOM accounting, write-downs of individual assets, or application of the measurement alternative for certain nonmarketable equity securities.

Table 12.4 provides the fair value hierarchy and fair value at the date of the nonrecurring fair value adjustment for all assets that were still held as of September 30, 2023, and December 31, 2022, and for which a nonrecurring fair value adjustment was recorded during the nine months ended September 30, 2023, and the year ended December 31, 2022.

Table 12.4: Fair Value on a Nonrecurring Basis

		September 30, 2023			December 31, 2022	
(in millions)	**Level 2**	**Level 3**	**Total**	Level 2	Level 3	Total
Loans held for sale (1)	**$ 383**	**346**	**729**	838	554	1,392
Loans:						
Commercial	**590**	**—**	**590**	285	—	285

Mortgage servicing rights (commercial)	**—**	4
Nonmarketable equity securities (1)	**(681)**	(357)
Other assets (2)	**(180)**	(319)
Total	**$ (1,773)**	(1,375)

(1) Includes impairment of nonmarketable equity securities and observable price changes related to nonmarketable equity securities accounted for under the measurement alternative.
(2) Includes impairment of operating lease ROU assets, valuation of physical commodities, valuation losses on foreclosed real estate and other collateral owned, and impairment of venture capital and private equity investments in consolidated portfolio companies.

Table 12.6 provides quantitative information about the valuation techniques and significant unobservable inputs used in the valuation of our Level 3 assets that are measured at fair value on a nonrecurring basis and determined using an internal model. The table is limited to financial instruments that had nonrecurring fair value adjustments during the periods presented. Weighted averages of inputs are calculated using outstanding unpaid principal balance for cash instruments, such as loans, and carrying value prior to the nonrecurring fair value measurement for nonmarketable equity securities and venture capital and private equity investments in consolidated portfolio companies.

Table 12.6: Valuation Techniques – Nonrecurring Basis

($ in millions)	Fair Value Level 3	Valuation Technique (1)	Significant Unobservable Input (1)	Range of Inputs Positive (Negative)			Weighted Average

	1,352	Market comparable pricing	Multiples	0.8x	-	18.7x	9.9x
Other assets (2)	234	Market comparable pricing	Multiples	6.4	-	8.0	7.1
Insignificant Level 3 assets	67						
Total	$ 3,743						

(1) See Note 15 (Fair Values of Assets and Liabilities) in our 2022 Form 10-K for additional information on the valuation technique(s) and significant unobservable inputs used in the valuation of Level 3 assets.
(2) Represents venture capital and private equity investments in consolidated portfolio companies.

Fair Value Option

The fair value option is an irrevocable election, generally only permitted upon initial recognition of financial assets or liabilities, to measure eligible financial instruments at fair value with changes in fair value reflected in earnings. We may elect the fair value option to align the measurement model with how the financial assets or liabilities are managed or to reduce complexity or accounting asymmetry. Following is a discussion of the portfolios for which we elected the fair value option. For additional information, including the basis for our fair value option elections, see Note 15 (Fair Values of Assets and Liabilities) in our 2022 Form 10-K.

Table 12.7 reflects differences between the fair value carrying amount of the assets and liabilities for which we have elected the fair value option and the contractual aggregate unpaid principal amount at maturity.

Table 12.7: Fair Value Option

			September 30, 2023			December 31, 2022
(in millions)	**Fair value carrying amount**	**Aggregate unpaid principal**	**Fair value carrying amount less aggregate unpaid principal**	Fair value carrying amount	Aggregate unpaid principal	Fair value carrying amount less aggregate unpaid principal
Loans held for sale (1)	**$ 2,879**	**3,166**	**(287)**	4,220	4,614	(394)
Long-term debt (2)	**(1,875)**	**(2,444)**	**569**	(1,346)	(1,775)	429

(1) Nonaccrual loans and loans 90 days or more past due and still accruing included in LHFS for which we have elected the fair value option were insignificant at September 30, 2023, and December 31, 2022.
(2) Includes zero coupon notes for which the aggregate unpaid principal amount reflects the contractual principal due at maturity.

Table 12.8 reflects amounts included in earnings related to initial measurement and subsequent changes in fair value, by income statement line item, for assets and liabilities for which the fair value option was elected. Amounts recorded in net interest income are excluded from the table below.

Table 12.8: Gains (Losses) on Changes in Fair Value Included in Earnings

			2023			2022
(in millions)	**Mortgage banking noninterest income**	**Net gains from trading and securities**	**Other noninterest income**	Mortgage banking noninterest income	Net gains from trading and securities	Other noninterest income
Quarter ended September 30,						
Loans held for sale	**$ 30**	**8**	**(44)**	(149)	3	—
Long-term debt	**—**	**10**	**—**	—	34	—
Nine months ended September 30,						
Loans held for sale	**$ 161**	**33**	**(48)**	(752)	13	—
Long-term debt	**—**	**(11)**	**—**	—	57	—

For performing loans, instrument-specific credit risk gains or losses are derived principally by determining the change in fair value of the loans due to changes in the observable or implied credit spread. Credit spread is the market yield on the loans less the relevant risk-free benchmark interest rate. For nonperforming loans, we attribute all changes in fair value to instrument-specific credit risk. For LHFS accounted for under the fair value option, instrument-specific credit gains or losses were insignificant during the third quarter and first nine months of both 2023 and 2022.

For long-term debt, instrument-specific credit risk gains or losses represent the impact of changes in fair value due to changes in our credit spread and are derived using observable secondary bond market information. These impacts are recorded within the debit valuation adjustments (DVA) in OCI. See Note 20 (Other Comprehensive Income) for additional information.

Disclosures about Fair Value of Financial Instruments

Table 12.9 presents a summary of fair value estimates for financial instruments that are not carried at fair value on a recurring basis. Some financial instruments are excluded from the scope of this table, such as certain insurance contracts, certain nonmarketable equity securities, and leases. This table also excludes assets and liabilities that are not financial instruments such as the value of the long-term relationships with our deposit, credit card and trust customers, MSRs, premises and equipment, goodwill and deferred taxes.

Loan commitments, standby letters of credit and commercial and similar letters of credit are not included in Table 12.9. A reasonable estimate of the fair value of these instruments is the carrying value of deferred fees plus the allowance for unfunded credit commitments, which totaled $602 million and $737 million at September 30, 2023, and December 31, 2022, respectively.

The total of the fair value calculations presented does not represent, and should not be construed to represent, the underlying fair value of the Company.

Table 12.9: Fair Value Estimates for Financial Instruments

Total financial liabilities	$	291,353	—	270,498	19,718	290,216

(1) Amounts consist of financial instruments for which carrying value approximates fair value.
(2) Excludes lease financing with a carrying amount of $15.8 billion and $14.7 billion at September 30, 2023, and December 31, 2022, respectively.
(3) Excludes deposit liabilities with no defined or contractual maturity of $1.2 trillion and $1.3 trillion at September 30, 2023, and December 31, 2022, respectively.
(4) Excludes obligations under finance leases of $20 million and $22 million at September 30, 2023, and December 31, 2022, respectively.

Note 13: Securitizations and Variable Interest Entities

Involvement with Variable Interest Entities (VIEs)

In the normal course of business, we enter into various types of on- and off-balance sheet transactions with special purpose entities (SPEs), which are corporations, trusts, limited liability companies or partnerships that are established for a limited purpose. SPEs are often formed in connection with securitization transactions whereby financial assets are transferred to an SPE. SPEs formed in connection with securitization transactions are generally considered variable interest entities (VIEs). The VIE may alter the risk profile of the asset by entering into derivative transactions or obtaining credit support, and issues various forms of interests in those assets to investors. When we transfer financial assets from our consolidated balance sheet to a VIE in connection with a securitization, we typically receive cash and sometimes other interests in the VIE as proceeds for the assets we transfer. In certain transactions with VIEs, we may retain the right to service the transferred assets and repurchase the transferred assets if the outstanding balance of the assets falls below the level at which the cost to service the assets exceed the benefits. In addition, we may purchase the right to service loans transferred to a VIE by a third party.

In connection with our securitization or other VIE activities, we have various forms of ongoing involvement with VIEs, which may include:

- underwriting securities issued by VIEs and subsequently making markets in those securities;
- providing credit enhancement on securities issued by VIEs through the use of letters of credit or financial guarantees;
- entering into other derivative contracts with VIEs;
- holding senior or subordinated interests in VIEs;
- acting as servicer or investment manager for VIEs;
- providing administrative or trustee services to VIEs; and
- providing seller financing to VIEs.

Loan Sales and Securitization Activity

We periodically transfer consumer and commercial loans and other types of financial assets in securitization and whole loan sale transactions.

MORTGAGE LOANS SOLD TO U.S. GOVERNMENT SPONSORED ENTITIES AND TRANSACTIONS WITH GINNIE MAE In the normal course of business we sell residential and commercial mortgage loans to government-sponsored entities (GSEs). These loans are generally transferred into securitizations sponsored by the GSEs, which provide certain credit guarantees to investors and servicers. We also transfer mortgage loans into securitization pools pursuant to Government National Mortgage Association (GNMA) guidelines which are insured by the Federal Housing Administration (FHA) or guaranteed by the Department of Veterans Affairs (VA). Mortgage loans eligible for securitization with the GSEs or GNMA are considered conforming loans. The GSEs or GNMA design the structure of these securitizations, sponsor the involved VIEs, and have power over the activities most significant to the VIE.

We account for loans transferred in conforming mortgage loan securitization transactions as sales and do not consolidate the VIEs as we are not the primary beneficiary. In exchange for the transfer of loans, we typically receive securities issued by the VIEs which we sell to third parties for cash or hold for investment purposes as HTM or AFS securities. We also retain servicing rights on the transferred loans. As a servicer, we retain the option to repurchase loans from certain loan securitizations, which becomes exercisable based on delinquency status such as when three scheduled loan payments are past due. When we have the unilateral option to repurchase a loan, we recognize the loan and a corresponding liability on our balance sheet regardless of our intent to repurchase the loan, and the loans remain pledged to the securitization. At September 30, 2023, and December 31, 2022, we recorded assets and related liabilities of $1.1 billion and $743 million, respectively, where we did not exercise our option to repurchase eligible loans. We repurchased loans of $49 million and $240 million, during the third quarter and first nine months of 2023, respectively, and $574 million and $2.1 billion during the third quarter and first nine months of 2022, respectively.

Upon transfers of loans, we also provide indemnification for losses incurred due to material breaches of contractual representations and warranties as well as other recourse arrangements. At September 30, 2023, and December 31, 2022, our liability for these repurchase and recourse arrangements was $185 million and $167 million, respectively, and the maximum exposure to loss was $13.5 billion and $13.8 billion at September 30, 2023 and December 31, 2022, respectively.

Substantially all residential servicing activity is related to assets transferred to GSE and GNMA securitizations. See Note 6 (Mortgage Banking Activities) for additional information about residential and commercial servicing rights, advances and servicing fees.

NONCONFORMING MORTGAGE LOAN SECURITIZATIONS In the normal course of business, we sell nonconforming mortgage loans in securitization transactions that we design and sponsor. Nonconforming mortgage loan securitizations do not involve a government credit guarantee, and accordingly, beneficial interest holders are subject to credit risk of the underlying assets held by the securitization VIE. We typically originate the transferred loans and account for the transfers as sales. We also typically retain the right to service the loans and may hold other beneficial interests issued by the VIE, such as debt securities held for investment purposes. Our servicing role related to nonconforming commercial mortgage loan securitizations is limited to primary or master servicer. We do not consolidate the VIE because the most significant decisions impacting the performance of the VIE are generally made by the special servicer or the controlling class security holder. For our residential nonconforming mortgage loan securitizations accounted for as sales, we either do not hold variable interests that we consider potentially significant or are not the primary servicer for a majority of the VIE assets.

WHOLE LOAN SALE TRANSACTIONS We may also sell whole loans to VIEs where we have continuing involvement in the form of financing. We account for these transfers as sales, and do not consolidate the VIEs as we do not have the power to direct the most significant activities of the VIEs.

Table 13.1 presents information about transfers of assets during the periods presented for which we recorded the transfers as sales and have continuing involvement with the transferred assets. In connection with these transfers, we received proceeds and recorded servicing assets and securities. Each of these interests are initially measured at fair value. Servicing rights are classified as Level 3 measurements, and generally securities are classified as Level 2. The majority of our transfers relate to residential mortgage securitizations with the GSEs or GNMA and generally result in no gain or loss because the loans are measured at fair value on a recurring basis. Additionally, we may transfer certain government insured loans that we previously repurchased. These loans are carried at the lower of cost or market, and we recognize gains on such transfers when the market value is greater than the carrying value of the loan when it is sold.

Table 13.1: Transfers with Continuing Involvement

		2023		2022
(in millions)	**Residential mortgages**	**Commercial mortgages**	Residential mortgages	Commercial mortgages
Quarter ended September 30,				
Assets sold	**$ 2,810**	**3,189**	14,447	3,061
Proceeds from transfer (1)	**2,810**	**3,243**	14,447	3,121
Net gains (losses) on sale	**—**	**54**	—	60
Continuing involvement (2):				
Servicing rights recognized	**$ 36**	**27**	193	32
Securities recognized (3)	**—**	**39**	—	39
Nine months ended September 30,				
Assets sold	**$ 11,188**	**6,488**	64,438	11,439
Proceeds from transfer (1)	**11,188**	**6,606**	64,490	11,629
Net gains (losses) on sale	**—**	**118**	52	190
Continuing involvement (2):				
Servicing rights recognized	**$ 129**	**61**	833	102
Securities recognized (3)	**—**	**87**	2,062	176

(1) Represents cash proceeds and the fair value of non-cash beneficial interests recognized at securitization settlement.
(2) Represents assets or liabilities recognized at securitization settlement date related to our continuing involvement in the transferred assets.
(3) Represents debt securities obtained at securitization settlement held for investment purposes that are classified as available-for-sale or held-to-maturity. In 2022, these predominantly related to agency securities. Excludes trading debt securities held temporarily for market-marking purposes, which are sold to third parties at or shortly after securitization settlement, of $1.3 billion and $5.0 billion during the third quarter and first nine months of 2023, respectively, and $3.0 billion and $13.3 billion during the third quarter and first nine months of 2022, respectively.

In the normal course of business, we purchase certain non-agency securities at initial securitization or subsequently in the secondary market, which we hold for investment. We also provide seller financing in the form of loans. We received cash flows of $58 million and $199 million during the third quarter and first nine months of 2023, respectively, and $95 million and $399 million, during the third quarter and first nine months of 2022, respectively, related to principal and interest payments on these securities and loans, which exclude cash flows related to trading activities.

Table 13.2 presents the key weighted-average assumptions we used to initially measure residential MSRs recognized during the periods presented.

Table 13.2: Residential MSRs – Assumptions at Securitization Date

	2023	2022
Quarter ended September 30,		
Prepayment rate (1)	**16.0%**	15.0
Discount rate	**9.9**	8.5
Cost to service ($ per loan)	**$ 131**	101
Nine months ended September 30,		
Prepayment rate (1)	**17.2%**	11.9
Discount rate	**9.7**	7.7
Cost to service ($ per loan)	**$ 171**	114

(1) Includes a blend of prepayment speeds and expected defaults. Prepayment speeds are influenced by mortgage interest rates as well as our estimation of drivers of borrower behavior.

See Note 12 (Fair Values of Assets and Liabilities) and Note 6 (Mortgage Banking Activities) for additional information on key assumptions for residential MSRs.

RESECURITIZATION ACTIVITIES We enter into resecuritization transactions as part of our trading activities to accommodate the investment and risk management activities of our customers. In resecuritization transactions, we transfer trading debt securities to VIEs in exchange for new beneficial interests that are sold to third parties at or shortly after securitization settlement. This activity is performed for customers seeking a specific return or risk profile. Substantially all of our transactions involve the resecuritization of conforming mortgage-backed securities issued by the GSEs or guaranteed by GNMA. We do not consolidate the resecuritization VIEs as we share in the decision-making power with third parties and do not hold significant economic interests in the VIEs other than for market-making activities. During the nine months ended September 30, 2023 and 2022, we transferred securities of $10.6 billion and $15.7 billion, respectively, to resecuritization VIEs, and retained securities of $284 million and $622 million, respectively. These amounts are not included in Table 13.1. Related total VIE assets were $111.9 billion and $112.0 billion at September 30, 2023, and December 31, 2022, respectively. As of September 30, 2023, and December 31, 2022, we held $1.1 billion and $793 million of securities, respectively.

Sold or Securitized Loans Serviced for Others

Table 13.3 presents information about loans that we have originated and sold or securitized in which we have ongoing involvement as servicer. For loans sold or securitized where servicing is our only form of continuing involvement, we generally experience a loss only if we were required to repurchase a delinquent loan or foreclosed asset due to a breach in representations and warranties associated with our loan sale or servicing contracts. Table 13.3 excludes mortgage loans sold to and held or securitized by GSEs or GNMA of $621.1 billion and $704.5 billion at September 30, 2023, and December 31, 2022, respectively. Delinquent loans include loans 90 days or more past due and loans in bankruptcy, regardless of delinquency status. Delinquent loans and foreclosed assets related to loans sold to and held or securitized by GSEs or GNMA were $3.4 billion and $4.6 billion at September 30, 2023, and December 31, 2022, respectively.

Table 13.3: Sold or Securitized Loans Serviced for Others

						Net charge-offs	
		Total loans		Delinquent loans and foreclosed assets (1)		Nine months ended September 30,	
(in millions)		**Sep 30, 2023**	Dec 31, 2022	**Sep 30, 2023**	Dec 31, 2022	**2023**	2022
Commercial	$	**66,232**	67,029	**899**	912	**89**	24
Residential		**8,591**	9,201	**415**	501	**12**	13
Total off-balance sheet sold or securitized loans	$	**74,823**	76,230	**1,314**	1,413	**101**	37

(1) Includes $184 million and $274 million of commercial foreclosed assets and $29 million and $25 million of residential foreclosed assets at September 30, 2023, and December 31, 2022, respectively.

Transactions with Unconsolidated VIEs

MORTGAGE LOAN SECURITIZATIONS Table 13.4 includes nonconforming mortgage loan securitizations where we originate and transfer the loans to the unconsolidated securitization VIEs that we sponsor. For additional information about these VIEs, see the "Loan Sales and Securitization Activity" section within this Note. Nonconforming mortgage loan securitizations also include commercial mortgage loan securitizations sponsored by third parties where we did not originate or transfer the loans but serve as master servicer and invest in securities that could be potentially significant to the VIE.

Conforming loan securitization and resecuritization transactions involving the GSEs and GNMA are excluded from Table 13.4 because we are not the sponsor or we do not have power over the activities most significant to the VIEs. Additionally, due to the nature of the guarantees provided by the GSEs and the FHA and VA, our credit risk associated with these VIEs is limited. For additional information about conforming mortgage loan securitizations and resecuritizations, see the "Loan Sales and Securitization Activity" and "Resecuritization Activities" sections within this Note.

COMMERCIAL REAL ESTATE LOANS We may transfer purchased industrial development bonds and GSE credit enhancements to VIEs in exchange for beneficial interests. We may also acquire such beneficial interests in transactions where we do not act as a transferor. We own all of the beneficial interests and may also service the underlying mortgages that serve as collateral to the bonds. The GSEs have the power to direct the servicing and workout activities of the VIE in the event of a default, therefore we do not have control over the key decisions of the VIEs.

OTHER VIE STRUCTURES We engage in various forms of structured finance arrangements with other VIEs, including asset-backed finance structures and other securitizations collateralized by asset classes other than mortgages. Collateral may include rental properties, asset-backed securities, student loans and mortgage loans. We may participate in structuring or marketing the arrangements as well as provide financing, service one or more of the underlying assets, or enter into derivatives with the VIEs. We may also receive fees for those services. We are not the primary beneficiary of these structures because we do not have power to direct the most significant activities of the VIEs.

Table 13.4 provides a summary of our exposure to the unconsolidated VIEs described above, which includes investments in securities, loans, guarantees, liquidity agreements, commitments and certain derivatives. We exclude certain transactions with unconsolidated VIEs when our continuing involvement is temporary or administrative in nature or insignificant in size.

In Table 13.4, "Total VIE assets" represents the remaining principal balance of assets held by unconsolidated VIEs using the most current information available. "Carrying value" is the amount in our consolidated balance sheet related to our involvement with the unconsolidated VIEs. "Maximum exposure to loss" is determined as the carrying value of our investment in the VIEs excluding the unconditional repurchase options that have not been exercised, plus the remaining undrawn liquidity and lending commitments, the notional amount of net written derivative contracts, and generally the notional amount of, or stressed loss estimate for, other commitments and guarantees.

Debt, guarantees and other commitments include amounts related to lending arrangements, liquidity agreements, and certain loss sharing obligations associated with loans originated, sold, and serviced under certain GSE programs.

"Maximum exposure to loss" represents estimated loss that would be incurred under severe, hypothetical circumstances, for which we believe the possibility is extremely remote, such as where the value of our interests and any associated collateral declines to zero, without any consideration of recovery or offset from any economic hedges. Accordingly, this disclosure is not an indication of expected loss.

Table 13.4: Unconsolidated VIEs

(in millions)	Total VIE assets	Loans	Debt securities (1)	Equity securities	All other assets (2)	Debt and other liabilities	Net assets
		Carrying value – asset (liability)					
September 30, 2023

(in millions)	Total VIE assets	Loans	Debt securities (1)	Equity securities	All other assets (2)	Debt and other liabilities	Net assets
		Carrying value – asset (liability)					
December 31, 2022							
Nonconforming mortgage loan securitizations	$ 154,464	—	2,420	—	617	(13)	3,024
Commercial real estate loans	5,627	5,611	—	—	16	—	5,627
Other	2,174	292	1	43	21	—	357
Total	$ 162,265	5,903	2,421	43	654	(13)	9,008
		Maximum exposure to loss					
		Loans	Debt securities (1)	Equity securities	All other assets (2)	Debt, guarantees, and other commitments	Total exposure
Nonconforming mortgage loan securitizations		$ —	2,420	—	617	13	3,050
Commercial real estate loans		5,611	—	—	16	705	6,332
Other		292	1	43	21	228	585
Total		$ 5,903	2,421	43	654	946	9,967

(1) Includes $234 million and $172 million of securities classified as trading at September 30, 2023, and December 31, 2022, respectively.
(2) All other assets includes mortgage servicing rights, derivative assets, and other assets (predominantly servicing advances).

INVOLVEMENT WITH TAX CREDIT VIES In addition to the unconsolidated VIEs in Table 13.4, we may invest in or provide funding to affordable housing, renewable energy or similar projects that are designed to generate a return primarily through the realization of federal tax credits and other tax benefits. The projects are typically managed by third-party sponsors who have the power over the VIE's assets, therefore, we do not consolidate the VIEs. The carrying value of our equity investments in tax credit VIEs was $18.7 billion at both September 30, 2023, and December 31, 2022. We also had loans to tax credit VIEs with a carrying value of $2.2 billion and $2.0 billion at September 30, 2023, and December 31, 2022, respectively.

Our maximum exposure to loss for tax credit VIEs at September 30, 2023, and December 31, 2022, was $29.3 billion and $28.0 billion, respectively. Our maximum exposure to loss included total unfunded equity and lending commitments of $8.4 billion and $7.3 billion at September 30, 2023, and December 31, 2022, respectively. See Note 14 (Guarantees and Other Commitments) for additional information about commitments to purchase equity securities.

Our affordable housing equity investments qualify for the low-income housing tax credit (LIHTC). For additional information on our LIHTC investments, see Note 16 (Securitizations and Variable Interest Entities) in our 2022 Form 10-K.

Consolidated VIEs

We consolidate VIEs where we are the primary beneficiary. We are the primary beneficiary of the following structure types:

COMMERCIAL AND INDUSTRIAL LOANS AND LEASES We may securitize dealer floor plan loans in a revolving master trust entity. As servicer and residual interest holder, we control the key decisions of the trust and consolidate the entity. The total VIE assets held by the master trust represent a majority of the total VIE assets presented for this category in Table 13.5. In a separate transaction structure, we may provide the majority of debt and equity financing to an SPE that engages in lending and leasing to specific vendors and service the underlying collateral.

OTHER VIE STRUCTURES Other VIEs relate to total return swaps and municipal tender option bond (MTOB) transactions.

Table 13.5 presents a summary of financial assets and liabilities of our consolidated VIEs. The carrying value represents assets and liabilities recorded on our consolidated balance sheet. "Total VIE assets" includes affiliate balances that are eliminated upon consolidation, and therefore in some instances will differ from the carrying value of assets.

On our consolidated balance sheet, we separately disclose (1) the consolidated assets of certain VIEs that can only be used to settle the liabilities of those VIEs, and (2) the consolidated liabilities of certain VIEs for which the VIE creditors do not have recourse to Wells Fargo.

Table 13.5: Transactions with Consolidated VIEs

(in millions)		Total VIE assets	Carrying value – asset (liability) Loans	Debt securities	All other assets (1)	Liabilities (2)
September 30, 2023						
Commercial and industrial loans and leases	**$**	**7,438**	**4,694**	**—**	**202**	**(129)**
Other		**86**	**—**	**—**	**86**	**—**
Total consolidated VIEs	**$**	**7,524**	**4,694**	**—**	**288**	**(129)**
December 31, 2022						
Commercial and industrial loans and leases	$	7,148	4,802	—	190	(129)
Other		72	—	71	1	(72)
Total consolidated VIEs	$	7,220	4,802	71	191	(201)

(1) All other assets includes cash and due from banks, and other assets.
(2) Liabilities include short-term borrowings, and accrued expenses and other liabilities.

Other Transactions

In addition to the transactions included in the previous tables, we have used wholly-owned trust preferred security VIEs to issue debt securities or preferred equity exclusively to third-party investors. As the sole assets of the VIEs are receivables from us, we do not consolidate the VIEs even though we own all of the voting equity shares of the VIEs, have fully guaranteed the obligations of the VIEs, and may have the right to redeem the third-party securities under certain circumstances. On our consolidated balance sheet, we reported the debt securities issued to the VIEs as long-term junior subordinated debt with a carrying value of $411 million and $401 million at September 30, 2023, and December 31, 2022, respectively.

Note 14: Guarantees and Other Commitments

Guarantees are contracts that contingently require us to make payments to a guaranteed party based on an event or a change in an underlying asset, liability, rate or index. For additional descriptions of our guarantees, see Note 17 (Guarantees and Other Commitments) in our 2022 Form 10-K. Table 14.1 shows carrying value and maximum exposure to loss on our guarantees.

Table 14.1: Guarantees – Carrying Value and Maximum Exposure to Loss

			Maximum exposure to loss					
(in millions)		Carrying value of obligation	Expires in one year or less	Expires after one year through three years	Expires after three years through five years	Expires after five years	Total	Non-investment grade
September 30, 2023								
Standby letters of credit (1)	**$**	**90**	**15,105**	**4,237**	**3,129**	**13**	**22,484**	**7,441**
Direct pay letters of credit (1)		**10**	**1,242**	**2,480**	**371**	**5**	**4,098**	**922**
Loans and LHFS sold with recourse (2)		**24**	**192**	**2,176**	**3,400**	**7,980**	**13,748**	**10,870**
Exchange and clearing house guarantees		**—**	**8,548**	**—**	**—**	**—**	**8,548**	**—**
Other guarantees and indemnifications (3)		**—**	**684**	**8**	**1**	**95**	**788**	**637**
Total guarantees	**$**	**124**	**25,771**	**8,901**	**6,901**	**8,093**	**49,666**	**19,870**
December 31, 2022								
Standby letters of credit (1)	$	112	14,014	4,694	3,058	53	21,819	7,071
Direct pay letters of credit (1)		13	1,593	2,734	465	5	4,797	1,283
Loans and LHFS sold with recourse (2)		16	322	1,078	3,408	8,906	13,714	11,399
Exchange and clearing house guarantees		—	4,623	—	—	—	4,623	—
Other guarantees and indemnifications (3)		—	548	1	10	201	760	515
Total guarantees	$	141	21,100	8,507	6,941	9,165	45,713	20,268

(1) Standby and direct pay letters of credit are reported net of syndications and participations.
(2) Represents recourse provided, predominantly to the GSEs, on loans sold under various programs and arrangements.
(3) Includes indemnifications provided to certain third-party clearing agents. Estimated maximum exposure to loss was $52 million and $157 million with related collateral of $558 million and $1.3 billion as of September 30, 2023, and December 31, 2022, respectively.

Maximum exposure to loss represents the estimated loss that would be incurred under an assumed hypothetical circumstance, despite what we believe is a remote possibility, where the value of our interests and any associated collateral declines to zero. Maximum exposure to loss estimates in Table 14.1 do not reflect economic hedges or collateral we could use to offset or recover losses we may incur under our guarantee agreements. Accordingly, these amounts are not an indication of expected loss. We believe the carrying value is more representative of our current exposure to loss than maximum exposure to loss. The carrying value represents the fair value of the guarantee, if any, and also includes an ACL for guarantees, if applicable. In determining the ACL for guarantees, we consider the credit risk of the related contingent obligation.

For our guarantees in Table 14.1, non-investment grade represents those guarantees on which we have a higher risk of performance under the terms of the guarantee, which is determined based on an external rating or an internal credit grade that is below investment grade.

WRITTEN OPTIONS We enter into written foreign currency options and over-the-counter written equity put options that are derivative contracts that have the characteristics of a guarantee. The fair value of written options represents our view of the probability that we will be required to perform under the contract. The fair value of these written options was an asset of $127 million and a liability of $15 million at September 30, 2023, and December 31, 2022, respectively. The fair value may be an asset as a result of deferred premiums on certain option trades. The maximum exposure to loss represents the notional value of these derivative contracts. At September 30, 2023, the maximum exposure to loss was $38.3 billion, with $35.4 billion expiring in three years or less compared with $23.4 billion and $21.3 billion, respectively, at December 31, 2022. See Note 11 (Derivatives) for additional information regarding written derivative contracts.

REPRESENTATIONS OR WARRANTIES We record a liability for mortgage loans that we expect to repurchase pursuant to various representations or warranties. See Note 13 (Securitizations and Variable Interest Entities) for further discussion and related amounts. Additionally, when we sell MSRs, we may provide indemnifications for losses incurred due to material breaches of contractual representations or warranties as well as other recourse arrangements. At September 30, 2023, our liability for these indemnification arrangements was $10 million and the maximum exposure to loss was $844 million, with $609 million expiring in three years or less.

MERCHANT PROCESSING SERVICES We provide debit and credit card transaction processing services through payment networks directly for merchants and as a sponsor for merchant processing servicers, including our joint venture with a third party that is accounted for as an equity method investment. In our role as the merchant acquiring bank, we have a potential obligation in connection with payment and delivery disputes between the merchant and the cardholder that are resolved in favor of the cardholder, referred to as a charge-back transaction. We estimate our potential maximum exposure to be the total merchant transaction volume processed in the preceding four months, which is generally the lifecycle for a charge-back transaction. As of September 30, 2023, our potential maximum exposure was approximately $780.0 billion, and related losses, including those from our joint venture entity, were insignificant.

GUARANTEES OF SUBSIDIARIES The Parent fully and unconditionally guarantees the payment of principal, interest, and any other amounts that may be due on securities that its 100% owned finance subsidiary, Wells Fargo Finance LLC, may issue. These securities are not guaranteed by any other subsidiary of the Parent. The guaranteed liabilities were $826 million and $948 million at September 30, 2023, and December 31, 2022, respectively. These guarantees rank on parity with all of the Parent's other unsecured and unsubordinated indebtedness.

OTHER COMMITMENTS We may enter into commitments to purchase debt and equity securities for various business or investment purposes. As of both September 30, 2023, and December 31, 2022, we had commitments to purchase debt securities of $100 million and commitments to purchase equity securities of $8.9 billion and $3.8 billion, respectively. As of September 30, 2023, our commitments to purchase equity securities predominantly included Federal Reserve Bank stock and renewable energy investments.

As part of maintaining our memberships in certain clearing organizations, we are required to stand ready to provide liquidity to sustain market clearing activity in the event unforeseen events occur or are deemed likely to occur. Certain of these obligations are guarantees of other members' performance and accordingly are included in Table 14.1 in Other guarantees and indemnifications.

We have commitments to enter into resale and securities borrowing agreements as well as repurchase and securities lending agreements with certain counterparties, including central clearing organizations. The amount of our unfunded contractual commitments for resale and securities borrowing agreements was $14.5 billion and $19.9 billion as of September 30, 2023, and December 31, 2022, respectively. The amount of our unfunded contractual commitments for repurchase and securities lending agreements was $3.8 billion and $1.6 billion as of September 30, 2023, and December 31, 2022, respectively.

Given the nature of these commitments, they are excluded from Table 5.4 (Unfunded Credit Commitments) in Note 5 (Loans and Related Allowance for Credit Losses).

Note 15: Pledged Assets and Collateral

Pledged Assets

Table 15.1 provides the carrying amount of on-balance sheet pledged assets as well as the fair value of other pledged collateral not recognized on our consolidated balance sheet, which we have received from third parties, have the right to repledge and have repledged. These amounts include assets pledged in transactions accounted for as secured borrowings, which are presented parenthetically on our consolidated balance sheet.

TRADING RELATED ACTIVITY Our trading businesses may pledge debt and equity securities in connection with securities sold under agreements to repurchase (repurchase agreements) and securities lending arrangements. The collateral that we pledge related to our trading activities may include our own collateral as well as collateral that we have received from third parties and have the right to repledge. Substantially all of the collateral we pledge related to trading activity is eligible to be repledged or sold by the secured party.

NON-TRADING RELATED ACTIVITY As part of our liquidity management strategy, we may pledge loans, debt securities, and other financial assets to secure trust and public deposits, borrowings and letters of credit from Federal Home Loan Banks (FHLBs) and the Board of Governors of the Federal Reserve System (FRB) and for other purposes as required or permitted by law or insurance statutory requirements. Substantially all of the non-trading activity pledged collateral is not eligible to be repledged or sold by the secured party.

VIE RELATED We pledge assets in connection with various types of transactions entered into with VIEs. These pledged assets can only be used to settle the liabilities of those entities.

We also have loans recorded on our consolidated balance sheet which represent certain delinquent loans that are eligible for repurchase from GNMA loan securitizations. See Note 13 (Securitizations and Variable Interest Entities) for additional information on consolidated VIE assets.

Table 15.1: Pledged Assets

(in millions)		Sep 30, 2023	Dec 31, 2022
Related to trading activities:			
Off-balance sheet repledged third-party owned debt and equity securities	$	61,231	38,191
Trading debt securities and other		59,183	28,284
Equity securities		2,428	1,477
Total pledged assets related to trading activities		122,842	67,952
Related to non-trading activities:			
Loans		410,663	344,000
Debt securities:			
Available-for-sale		64,014	50,538
Held-to-maturity		242,792	17,477
Equity securities		276	141
Total pledged assets related to non-trading activities		717,745	412,156
Related to VIEs:			
Consolidated VIE assets		4,982	5,064
Loans eligible for repurchase from GNMA securitizations		1,126	749
Total pledged assets related to VIEs		6,108	5,813
Total pledged assets	$	846,695	485,921

Securities and Other Collateralized Financing Activities

We enter into resale and repurchase agreements and securities borrowing and lending agreements (collectively, “securities financing activities”) typically to finance trading positions (including securities and derivatives), acquire securities to cover short trading positions, accommodate customers’ financing needs, and settle other securities obligations. These activities are conducted through our broker-dealer subsidiaries and, to a lesser extent, through other bank entities. Our securities financing activities primarily involve high-quality, liquid securities such as U.S. Treasury securities and government agency securities and, to a lesser extent, less liquid securities, including equity securities, corporate bonds and asset-backed securities. We account for these transactions as collateralized financings in which we typically receive or pledge securities as collateral. We believe these financing transactions generally do not have material credit risk given the collateral provided and the related monitoring processes. We also enter into resale agreements involving collateral other than securities, such as loans, as part of our commercial lending business activities.

OFFSETTING OF SECURITIES AND OTHER COLLATERALIZED FINANCING ACTIVITIES Table 15.2 presents resale and repurchase agreements subject to master repurchase agreements (MRA) and securities borrowing and lending agreements subject to master securities lending agreements (MSLA). Where legally enforceable, these master netting arrangements give the ability, in the event of default by the counterparty, to liquidate securities held as collateral and to offset receivables and payables with the same counterparty. Collateralized financings, and those with a single counterparty, are presented net on our consolidated balance sheet, provided certain criteria are met that permit balance sheet netting. The majority of transactions subject to these agreements do not meet those criteria and thus are not eligible for balance sheet netting.

Collateral we pledged consists of non-cash instruments, such as securities or loans, and is not netted on our consolidated balance sheet against the related liability. Collateral we received includes securities or loans and is not recognized on our consolidated balance sheet. Collateral pledged or received may be increased or decreased over time to maintain certain contractual thresholds, as the assets underlying each arrangement fluctuate in value. Generally, these agreements require collateral to exceed the asset or liability recognized on the balance sheet. The following table includes the amount of collateral pledged or received related to exposures subject to enforceable MRAs or MSLAs. While these agreements are typically over-collateralized, U.S. GAAP requires disclosure in this table to limit the reported amount of such collateral to the amount of the related recognized asset or liability for each counterparty.

In addition to the amounts included in Table 15.2, we also have balance sheet netting related to derivatives that is disclosed in Note 11 (Derivatives).

Table 15.2: Offsetting – Securities and Other Collateralized Financing Activities

(in millions)		Sep 30, 2023	Dec 31, 2022
Assets:			
Resale and securities borrowing agreements			
Gross amounts recognized	$	**114,518**	114,729
Gross amounts offset in consolidated balance sheet (1)		**(23,231)**	(24,464)
Net amounts in consolidated balance sheet (2)		**91,287**	90,265
Collateral not recognized in consolidated balance sheet (3)		**(90,555)**	(89,592)
Net amount (4)	$	**732**	673
Liabilities:			
Repurchase and securities lending agreements			
Gross amounts recognized	$	**104,106**	55,054
Gross amounts offset in consolidated balance sheet (1)		**(23,231)**	(24,464)
Net amounts in consolidated balance sheet (5)		**80,875**	30,590
Collateral pledged but not netted in consolidated balance sheet (6)		**(80,677)**	(30,383)
Net amount (4)	$	**198**	207

(1) Represents recognized amount of resale and repurchase agreements with counterparties subject to enforceable MRAs that have been offset in our consolidated balance sheet.
(2) Includes $70.3 billion and $68.0 billion classified on our consolidated balance sheet in federal funds sold and securities purchased under resale agreements at September 30, 2023, and December 31, 2022, respectively. Also includes $20.9 billion and $22.3 billion classified on our consolidated balance sheet in loans at September 30, 2023, and December 31, 2022, respectively.
(3) Represents the fair value of collateral we have received under enforceable MRAs or MSLAs, limited in the table above to the amount of the recognized asset due from each counterparty. At September 30, 2023, and December 31, 2022, we have received total collateral with a fair value of $140.7 billion and $136.6 billion, respectively, all of which we have the right to sell or repledge. These amounts include securities we have sold or repledged to others with a fair value of $71.8 billion and $59.1 billion at September 30, 2023, and December 31, 2022, respectively.
(4) Represents the amount of our exposure (assets) or obligation (liabilities) that is not collateralized and/or is not subject to an enforceable MRA or MSLA.
(5) Amount is classified in short-term borrowings on our consolidated balance sheet.
(6) Represents the fair value of collateral we have pledged, related to enforceable MRAs or MSLAs, limited in the table above to the amount of the recognized liability owed to each counterparty. At September 30, 2023, and December 31, 2022, we have pledged total collateral with a fair value of $106.5 billion and $56.3 billion, respectively, substantially all of which may be sold or repledged by the counterparty.

REPURCHASE AND SECURITIES LENDING AGREEMENTS Securities sold under repurchase agreements and securities lending arrangements are effectively short-term collateralized borrowings. In these transactions, we receive cash in exchange for transferring securities as collateral and recognize an obligation to reacquire the securities for cash at the transaction's maturity. These types of transactions create risks, including (1) the counterparty may fail to return the securities at maturity, (2) the fair value of the securities transferred may decline below the amount of our obligation to reacquire the securities, and therefore create an obligation for us to pledge additional amounts, and (3) the counterparty may accelerate the maturity on demand, requiring us to reacquire the security prior to contractual maturity. We attempt to mitigate these risks in various ways. Our collateral primarily consists of highly liquid securities. In addition, we underwrite and monitor the financial strength of our counterparties, monitor the fair value of collateral pledged relative to contractually required repurchase amounts, and monitor that our collateral is properly returned through the clearing and settlement process in advance of our cash repayment. Table 15.3 provides the gross amounts recognized on our consolidated balance sheet (before the effects of offsetting) of our liabilities for repurchase and securities lending agreements disaggregated by underlying collateral type.

Table 15.3: Gross Obligations by Underlying Collateral Type

(in millions)		Sep 30, 2023	Dec 31, 2022
Repurchase agreements:			
Securities of U.S. Treasury and federal agencies	$	**35,407**	27,857
Securities of U.S. States and political subdivisions		**386**	83
Federal agency mortgage-backed securities		**47,212**	8,386
Non-agency mortgage-backed securities		**1,605**	682
Corporate debt securities		**6,886**	6,541
Asset-backed securities		**2,606**	1,529
Equity securities		**1,478**	711
Other		**64**	300
Total repurchases		**95,644**	46,089
Securities lending arrangements:			
Securities of U.S. Treasury and federal agencies		**225**	278
Federal agency mortgage-backed securities		**5**	58
Corporate debt securities		**155**	206
Equity securities (1)		**8,055**	8,356
Other		**22**	67
Total securities lending		**8,462**	8,965
Total repurchases and securities lending	$	**104,106**	55,054

(1) Equity securities are generally exchange traded and represent collateral received from third parties that has been repledged. We received the collateral through either margin lending agreements or contemporaneous securities borrowing transactions with other counterparties.

Table 15.4 provides the contractual maturities of our gross obligations under repurchase and securities lending agreements.

Table 15.4: Contractual Maturities of Gross Obligations

December 31, 2022						
Repurchase agreements	$	36,251	734	2,884	6,220	46,089
Securities lending arrangements		8,965	—	—	—	8,965
Total repurchases and securities lending (1)	$	45,216	734	2,884	6,220	55,054

(1) Securities lending is executed under agreements that allow either party to terminate the transaction without notice, while repurchase agreements have a term structure to them that technically matures at a point in time. The overnight/continuous repurchase agreements require election of both parties to roll the trade rather than the election to terminate the arrangement as in securities lending.

Note 16: Operating Segments

Our management reporting is organized into four reportable operating segments: Consumer Banking and Lending; Commercial Banking; Corporate and Investment Banking; and Wealth and Investment Management. All other business activities that are not included in the reportable operating segments have been included in Corporate. We define our reportable operating segments by type of product and customer segment, and their results are based on our management reporting process. The management reporting process measures the performance of the reportable operating segments based on the Company's management structure, and the results are regularly reviewed with our Chief Executive Officer and relevant senior management. The management reporting process is based on U.S. GAAP and includes specific adjustments, such as funds transfer pricing for asset/liability management, shared revenue and expenses, and taxable-equivalent adjustments to consistently reflect income from taxable and tax-exempt sources, which allows management to assess performance consistently across the operating segments.

Consumer Banking and Lending offers diversified financial products and services for consumers and small businesses with annual sales generally up to $10 million. These financial products and services include checking and savings accounts, credit and debit cards as well as home, auto, personal, and small business lending.

Commercial Banking provides financial solutions to private, family owned and certain public companies. Products and services include banking and credit products across multiple industry sectors and municipalities, secured lending and lease products, and treasury management.

Corporate and Investment Banking delivers a suite of capital markets, banking, and financial products and services to corporate, commercial real estate, government and institutional clients globally. Products and services include corporate banking, investment banking, treasury management, commercial real estate lending and servicing, equity and fixed income solutions as well as sales, trading, and research capabilities.

Wealth and Investment Management provides personalized wealth management, brokerage, financial planning, lending, private banking, trust and fiduciary products and services to affluent, high-net worth and ultra-high-net worth clients. We operate through financial advisors in our brokerage and wealth offices, consumer bank branches, independent offices, and digitally through WellsTrade® and Intuitive Investor®.

Corporate includes corporate treasury and enterprise functions, net of allocations (including funds transfer pricing, capital, liquidity and certain expenses), in support of the reportable operating segments, as well as our investment portfolio and venture capital and private equity investments. Corporate also includes certain lines of business that management has determined are no longer consistent with the long-term strategic goals of the Company as well as results for previously divested businesses. In third quarter 2023, we sold investments in certain private equity funds, which had a minimal impact to net income.

Basis of Presentation

FUNDS TRANSFER PRICING Corporate treasury manages a funds transfer pricing methodology that considers interest rate risk, liquidity risk, and other product characteristics. Operating segments pay a funding charge for their assets and receive a funding credit for their deposits, both of which are included in net interest income. The net impact of the funding charges or credits is recognized in corporate treasury.

REVENUE AND EXPENSE SHARING When lines of business jointly serve customers, the line of business that is responsible for providing the product or service recognizes revenue or expense with a referral fee paid or an allocation of cost to the other line of business based on established internal revenue-sharing agreements.

When a line of business uses a service provided by another line of business or enterprise function (included in Corporate), expense is generally allocated based on the cost and use of the service provided.

TAXABLE-EQUIVALENT ADJUSTMENTS Taxable-equivalent adjustments related to tax-exempt income on certain loans and debt securities are included in net interest income, while taxable-equivalent adjustments related to income tax credits for low-income housing and renewable energy investments are included in noninterest income, in each case with corresponding impacts to income tax expense (benefit). Adjustments are included in Corporate, Commercial Banking, and Corporate and Investment Banking and are eliminated to reconcile to the Company's consolidated financial results.

Table 16.1 presents our results by operating segment.

(1) In first quarter 2023, we adopted ASU 2018-12 – Financial Services – Insurance (Topic 944): *Targeted Improvements to the Accounting for Long-Duration Contracts*. For additional information, see Note 1 (Summary of Significant Accounting Policies).

(2) Taxable-equivalent adjustments related to tax-exempt income on certain loans and debt securities are included in net interest income, while taxable-equivalent adjustments related to income tax credits for low-income housing and renewable energy investments are included in noninterest income, in each case with corresponding impacts to income tax expense (benefit). Adjustments are included in Corporate, Commercial Banking, and Corporate and Investment Banking and are eliminated to reconcile to the Company's consolidated financial results.

(3) Net interest income is interest earned on assets minus the interest paid on liabilities to fund those assets. Segment interest earned includes actual interest income on segment assets as well as a funding credit for their deposits. Segment interest paid on liabilities includes actual interest expense on segment liabilities as well as a funding charge for their assets.

Note 17: Revenue and Expenses

Revenue

Our revenue includes net interest income on financial instruments and noninterest income. Table 17.1 presents our revenue by operating segment. For additional description of our operating segments, including additional financial information and the underlying management accounting process, see Note 16 (Operating Segments). For a description of our revenue from contracts with customers, see Note 20 (Revenue and Expenses) in our 2022 Form 10-K.

(1) Taxable-equivalent adjustments related to tax-exempt income on certain loans and debt securities are included in net interest income, while taxable-equivalent adjustments related to income tax credits for low-income housing and renewable energy investments are included in noninterest income, in each case with corresponding impacts to income tax expense (benefit). Adjustments are included in Corporate, Commercial Banking, and Corporate and Investment Banking and are eliminated to reconcile to the Company's consolidated financial results.
(2) These revenue types are related to financial assets and liabilities, including loans, leases, securities and derivatives, with additional details included in other footnotes to our financial statements.
(3) We earned trailing commissions of $230 million and $684 million for the third quarter and first nine months of 2023, respectively, and $231 million and $747 million for the third quarter and first nine months of 2022, respectively.
(4) The cost of credit card rewards and rebates of $652 million and $1.9 billion for the third quarter and first nine months of 2023, respectively, and $577 million and $1.6 billion for the third quarter and first nine months of 2022, respectively, are presented net against the related revenue.
(5) In first quarter 2023, we adopted ASU 2018-12 – Financial Services – Insurance (Topic 944): *Targeted Improvements to the Accounting for Long-Duration Contracts*. For additional information, see Note 1 (Summary of Significant Accounting Policies).

Expenses

OPERATING LOSSES Operating losses consist of expenses related to:

- Legal actions such as litigation and regulatory matters. For additional information on legal actions, see Note 10 (Legal Actions);
- Customer remediation activities, which are associated with our efforts to identify areas or instances where customers may have experienced financial harm and provide remediation as appropriate. We have accrued for the probable and estimable costs related to our customer remediation activities, which amounts may change based on additional facts and information, as well as ongoing reviews and communications with our regulators; and
- Other business activities such as deposit overdraft losses, fraud losses, and isolated instances of customer redress.

Table 17.2 provides the components of our operating losses included in our consolidated statement of income.

Table 17.2: Operating Losses

($ in millions)	Quarter ended September 30, 2023	2022	Nine months ended September 30, 2023	2022
Legal actions	$ **175**	984	$ **115**	1,097
Customer remediation	**(30)**	978	**133**	1,615
Other	**184**	256	**580**	755
Total operating losses	$ **329**	2,218	$ **828**	3,467

Operating losses may have significant variability given the inherent and unpredictable nature of legal actions and customer remediation activities. The timing and determination of the amount of any associated losses for these matters depends on a variety of factors, some of which are outside of our control.

OTHER EXPENSES Regulatory Charges and Assessments expense, which is included in other noninterest expense, was $277 million and $849 million in the third quarter and first nine months of 2023, respectively, compared with $207 million and $640 million in the same periods a year ago, and primarily consisted of Federal Deposit Insurance Corporation (FDIC) deposit assessment expense.

In May 2023, the FDIC proposed a rule to recover by special assessment losses to the FDIC deposit insurance fund as a result of bank failures in the first half of 2023. Under the proposed rule, the FDIC would collect a special assessment based on a calculation using an insured depository institution's estimated amount of uninsured deposits. As currently proposed, the amount of our special assessment may be up to $1.8 billion (pre-tax). We expect to expense the entire amount upon the FDIC's finalization of the rule, which we expect to occur in fourth quarter 2023. The proposed rule may be changed prior to finalization and any changes may affect the timing or amount of the special assessment.

Note 18: Employee Benefits

Pension and Postretirement Plans

We sponsor a frozen noncontributory qualified defined benefit retirement plan, the Wells Fargo & Company Cash Balance Plan (Cash Balance Plan), which covers eligible employees of Wells Fargo. The Cash Balance Plan was frozen on July 1, 2009, and no new benefits accrue after that date. For additional information on our pension and postretirement plans, including plan assumptions, investment strategy and asset allocation, projected benefit payments, and valuation methodologies used for assets measured at fair value, see Note 1 (Summary of Significant Accounting Policies) and Note 21 (Employee Benefits) in our 2022 Form 10-K.

Table 18.1 presents the components of net periodic benefit cost. Service cost is reported in personnel expense and all other components of net periodic benefit cost are reported in other noninterest expense on our consolidated statement of income.

Table 18.1: Net Periodic Benefit Cost

(1) Substantially all of the amounts for fair value hedges are foreign exchange contracts.
(2) Substantially all of the amounts for cash flow hedges are interest rate contracts.
(3) In first quarter 2023, we adopted ASU 2018-12 – Financial Services – Insurance (Topic 944): *Targeted Improvements to the Accounting for Long-Duration Contracts*. For additional information, see Note 1 (Summary of Significant Accounting Policies).
(4) AOCI related to debt securities includes after-tax unrealized gains or losses associated with the transfer of securities from AFS to HTM of $3.6 billion at both September 30, 2023 and 2022, respectively. These amounts are subsequently amortized from AOCI into earnings over the same period as the related unamortized premiums and discounts.

Note 21: Regulatory Capital Requirements and Other Restrictions

Regulatory Capital Requirements

The Company and each of its subsidiary banks are subject to regulatory capital adequacy requirements promulgated by federal banking regulators. The FRB establishes capital requirements for the consolidated financial holding company, and the Office of the Comptroller of the Currency (OCC) has similar requirements for the Company's national banks, including Wells Fargo Bank, N.A. (the Bank).

Table 21.1 presents regulatory capital information for the Company and the Bank in accordance with Basel III capital requirements. We must calculate our risk-based capital ratios under both the Standardized and Advanced Approaches. The Standardized Approach applies assigned risk weights to broad risk categories, while the calculation of risk-weighted assets (RWAs) under the Advanced Approach differs by requiring applicable banks to utilize a risk-sensitive methodology, which relies upon the use of internal credit models, and includes an operational risk component.

At September 30, 2023, the Bank and our other insured depository institutions were considered well-capitalized under the requirements of the Federal Deposit Insurance Act.

Table 21.1: Regulatory Capital Information

	Wells Fargo & Company		Wells Fargo Bank, N.A.	
	September 30, 2023	December 31, 2022	**September 30, 2023**	December 31, 2022
Regulatory leverage:				
Total leverage exposure (1)	**$ 2,239,024**	2,224,789	**2,019,348**	2,058,568
Supplementary leverage ratio (1)	**6.93%**	6.86	**7.01**	6.83
Tier 1 leverage ratio (2)	**8.32**	8.26	**8.52**	8.34
Required minimum leverage:				
Supplementary leverage ratio	**5.00**	5.00	**6.00**	6.00
Tier 1 leverage ratio	**4.00**	4.00	**4.00**	4.00

* Denotes the binding ratio under the Standardized and Advanced Approaches at September 30, 2023.

(1) The supplementary leverage ratio consists of Tier 1 capital divided by total leverage exposure. Total leverage exposure consists of total average assets, less goodwill and other permitted Tier 1 capital deductions (net of deferred tax liabilities), plus certain off-balance sheet exposures.

(2) The Tier 1 leverage ratio consists of Tier 1 capital divided by total average assets, excluding goodwill and certain other items as determined under the rule.

At September 30, 2023, the Common Equity Tier 1 (CET1), Tier 1 and total capital ratio requirements for the Company included a global systemically important bank (G-SIB) surcharge of 1.50%. The G-SIB surcharge is not applicable to the Bank. In addition, the CET1, Tier 1 and total capital ratio requirements for the Company included a stress capital buffer of 3.20% under the Standardized Approach and a capital conservation buffer of 2.50% under the Advanced Approach. The capital ratio requirements for the Bank included a capital conservation buffer of 2.50% under both the Standardized and Advanced Approaches. The Company is required to maintain these risk-based capital ratios and to maintain a supplementary leverage ratio (SLR) of at least 5.00% (composed of a 3.00% minimum requirement plus a supplementary leverage buffer of 2.00%) to avoid restrictions on capital distributions and discretionary bonus payments. The Bank is required to maintain an SLR of at least 6.00% to be considered well-capitalized under applicable regulatory capital adequacy rules.

Capital Planning Requirements

The FRB's capital plan rule establishes capital planning and other requirements that govern capital distributions, including dividends and share repurchases, by certain large bank holding companies (BHCs), including Wells Fargo. The FRB conducts an annual Comprehensive Capital Analysis and Review exercise and has also published guidance regarding its supervisory expectations for capital planning, including capital policies regarding the process relating to common stock dividend and repurchase decisions in the FRB's SR Letter 15-18. The Parent's ability to make certain capital distributions is subject to the requirements of the capital plan rule and is also subject to the Parent meeting or exceeding certain regulatory capital minimums.

Loan and Dividend Restrictions

Federal law restricts the amount and the terms of both credit and non-credit transactions between a bank and its nonbank affiliates. Additionally, federal laws and regulations limit, and regulators can impose additional limitations on, the dividends that a national bank may pay.

Our nonbank subsidiaries are also limited by certain federal and state statutory provisions and regulations covering the amount of dividends that may be paid in any given year. In addition, under a Support Agreement dated June 28, 2017, as amended and restated on June 26, 2019, among Wells Fargo & Company, the parent holding company (Parent), WFC Holdings, LLC, an intermediate holding company and subsidiary of the Parent (IHC), the Bank, Wells Fargo Securities, LLC, Wells Fargo Clearing Services, LLC, and certain other subsidiaries of the Parent designated from time to time as material entities for resolution planning purposes or identified from time to time as related support entities in our resolution plan, the IHC may be restricted from making dividend payments to the Parent if certain liquidity and/or capital metrics fall below defined triggers or if the Parent's board of directors authorizes it to file a case under the U.S. Bankruptcy Code.

For additional information on loan and dividend restrictions, see Note 25 (Regulatory Capital Requirements and Other Restrictions) in our 2022 Form 10-K.

Cash Restrictions

Cash and cash equivalents may be restricted as to usage or withdrawal. Table 21.2 provides a summary of restrictions on cash and cash equivalents.

Table 21.2: Nature of Restrictions on Cash and Cash Equivalents

(in millions)		Sep 30, 2023	Dec 31, 2022
Reserve balance for non-U.S. central banks	$	**233**	238
Segregated for benefit of brokerage customers under federal and other brokerage regulations		**564**	898

Glossary of Acronyms

ACL	Allowance for credit losses	**HTM**	Held-to-maturity
AFS	Available-for-sale	**LCR**	Liquidity coverage ratio
AOCI	Accumulated other comprehensive income	**LHFS**	Loans held for sale
ARM	Adjustable-rate mortgage	**LIBOR**	London Interbank Offered Rate
ASC	Accounting Standards Codification	**LIHTC**	Low-income housing tax credit
ASU	Accounting Standards Update	**LOCOM**	Lower of cost or fair value
AVM	Automated valuation model	**LTV**	Loan-to-value
BCBS	Basel Committee on Banking Supervision	**MBS**	Mortgage-backed securities
BHC	Bank holding company	**MSR**	Mortgage servicing right
CCAR	Comprehensive Capital Analysis and Review	**NAV**	Net asset value
CD	Certificate of deposit	**NPA**	Nonperforming asset
CECL	Current expected credit loss	**NSFR**	Net stable funding ratio
CET1	Common Equity Tier 1	**OCC**	Office of the Comptroller of the Currency
CFPB	Consumer Financial Protection Bureau	**OCI**	Other comprehensive income
CLO	Collateralized loan obligation	**OTC**	Over-the-counter
CLTV	Combined loan-to-value	**PCD**	Purchased credit-deteriorated
CPI	Collateral protection insurance	**PTPP**	Pre-tax pre-provision profit
CRE	Commercial real estate	**RMBS**	Residential mortgage-backed securities
DPD	Days past due	**ROA**	Return on average assets
ESOP	Employee Stock Ownership Plan	**ROE**	Return on average equity
FASB	Financial Accounting Standards Board	**ROTCE**	Return on average tangible common equity
FDIC	Federal Deposit Insurance Corporation	**RWAs**	Risk-weighted assets
FHA	Federal Housing Administration	**SEC**	Securities and Exchange Commission
FHLB	Federal Home Loan Bank	**S&P**	Standard & Poor's Global Ratings
FHLMC	Federal Home Loan Mortgage Corporation	**SLR**	Supplementary leverage ratio
FICO	Fair Isaac Corporation (credit rating)	**SOFR**	Secured Overnight Financing Rate
FNMA	Federal National Mortgage Association	**SPE**	Special purpose entity
FRB	Board of Governors of the Federal Reserve System	**TDR**	Troubled debt restructuring
GAAP	Generally accepted accounting principles	**TLAC**	Total Loss Absorbing Capacity
GNMA	Government National Mortgage Association	**VA**	Department of Veterans Affairs
GSE	Government-sponsored entity	**VaR**	Value-at-Risk
G-SIB	Global systemically important bank	**VIE**	Variable interest entity
HQLA	High-quality liquid assets	**WIM**	Wealth and Investment Management

PART II – OTHER INFORMATION

Item 1. Legal Proceedings

Information in response to this item can be found in Note 10 (Legal Actions) to Financial Statements in this Report which information is incorporated by reference into this item.

Item 1A. Risk Factors

Information in response to this item can be found under the "Financial Review – Risk Factors" section in this Report which information is incorporated by reference into this item.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table shows Company repurchases of its common stock for each calendar month in the quarter ended September 30, 2023.

Calendar month	Total number of shares repurchased (1)	Weighted average price paid per share	Approximate dollar value of shares that may yet be repurchased under the authorization (in millions)
July	12,064,081	$ 45.80	$ 29,999
August	45,817	43.41	29,997
September	21,695,693	42.66	29,072
Total	33,805,591		

(1) All shares were repurchased under an authorization covering up to 500 million shares of common stock approved by the Board of Directors (Board) and publicly announced by the Company on January 15, 2021, or an authorization covering up to $30 billion of common stock approved by the Board and publicly announced by the Company on July 25, 2023. Unless modified or revoked by the Board, the authorization announced on July 25, 2023, does not expire and supersedes the prior share repurchase authority approved by the Board.

Item 5. Other Information

Trading Plans

During the three months ended September 30, 2023, no director or officer (as defined in Rule 16a-1(f) under the Exchange Act) of the Company adopted or terminated a "Rule 10b5-1 trading arrangement" or "non-Rule 10b5-1 trading arrangement," as each term is defined in Item 408(a) of Regulation S-K.

Item 6. Exhibits

A list of exhibits to this Form 10-Q is set forth below.

The Company's SEC file number is 001-2979. On and before November 2, 1998, the Company filed documents with the SEC under the name Norwest Corporation. The former Wells Fargo & Company filed documents under SEC file number 001-6214.

Exhibit Number	Description	Location
3(a)	Restated Certificate of Incorporation, as amended and in effect on the date hereof.	Filed herewith.
3(b)	By-Laws.	Incorporated by reference to Exhibit 3.1 to the Company's Current Report on Form 8-K filed June 29, 2023.
4(a)	See Exhibits 3(a) and 3(b).	
4(b)	The Company agrees to furnish upon request to the Commission a copy of each instrument defining the rights of holders of senior and subordinated debt of the Company.	
22	Subsidiary guarantors and issuers of guaranteed securities and affiliates whose securities collateralize securities of the registrant.	Incorporated by reference to Exhibit 22 to the Company's Quarterly Report on Form 10-Q for the quarter ended March 31, 2023.
31(a)	Certification of principal executive officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.	Filed herewith.
31(b)	Certification of principal financial officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.	Filed herewith.
32(a)	Certification of Periodic Financial Report by Chief Executive Officer Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 and 18 U.S.C. § 1350.	Furnished herewith.
32(b)	Certification of Periodic Financial Report by Chief Financial Officer Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 and 18 U.S.C. § 1350.	Furnished herewith.
101.INS	Inline XBRL Instance Document	The instance document does not appear in the interactive data file because its XBRL tags are embedded within the inline XBRL document.
101.SCH	Inline XBRL Taxonomy Extension Schema Document	Filed herewith.
101.CAL	Inline XBRL Taxonomy Extension Calculation Linkbase Document	Filed herewith.
101.DEF	Inline XBRL Taxonomy Extension Definitions Linkbase Document	Filed herewith.
101.LAB	Inline XBRL Taxonomy Extension Label Linkbase Document	Filed herewith.
101.PRE	Inline XBRL Taxonomy Extension Presentation Linkbase Document	Filed herewith.
104	Cover Page Interactive Data File	Formatted as Inline XBRL and contained in Exhibit 101.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this Report to be signed on its behalf by the undersigned, thereunto duly authorized.

FDIC Deposit Insurance Coverage Limits
Currently the FDIC insures the deposits of governmental accounts on a per Official Custodian basis as follows:

The aggregate balances in demand deposit accounts are insured up to $250,000 per Official Custodian; and
The aggregate balances in time and savings accounts are insured up to $250,000 per Official Custodian.

An Official Custodian is an officer, employee, or agent of a public unit having official custody of public funds and lawfully depositing the funds in an insured institution. In order to qualify as an Official Custodian, a person must have plenary authority – including control – over the funds. Control of public funds includes possession as well as the authority to establish accounts in insured depository institutions and to make deposits, withdrawals and disbursements.

PCI business objective

Increase resources to execute a strategic plan that strengthens Wells Fargo's community impact and repositions us as the "Bank of Doing" in Chicago.

PCI Mission Statement

We seek to strengthen historically marginalized communities by investing in pathways to economic advancement and generational wealth.

- Housing Access & Affordability
- Financial Health
- Small Business Growth
- Sustainability & Climate Resilience
- Community Engagement

PCI strategy – current state

National market investments

More than

$32.5m

invested in Chicago since 2018

Sustainability	2023 - Garfield Park Community Council $2.85M
Housing A & A | Sustainability	2022 - Elevate Chicago $3.15M
Small Business Growth	2021 – Open for Business $8.5M
Housing Access & Afford	2018 – NeighborhoodLIFT $18M

Community strategy – current state

Highlight: Austin placed-based investment strategy

2015 Wells Fargo joined key nonprofits to create a place-based strategy for Chicago's Austin Neighborhood.

2016 Wells Fargo-funded the Quality-of-Life Plan (QLP) developed and implemented by Local Initiatives Support Corporation (LISC) Chicago with ongoing execution participation by Community Relations.

2017 Austin Coming Together (ACT) assumed leadership and QLP work, focusing on connecting residents to community resources and facilitating collaborative action to create a thriving Austin community.

2020 Wells Fargo Foundation has invested $2MM+ through a dozen nonprofits to support direct resident services.

Key QLP commitments since 2016:

- ACT: $650,000 multi-year grant; in final year
- LISC Chicago: $600,000 in local grants
- Oak Park Regional Housing Center: $380,000 local grants
- Westside Health Authority: $300,000

Philanthropy & Community Impact

Other key 2023 grants and sponsorships

Garfield Park Community Council

Family Nature Park: $75,000 grant announced in September fund beautification of Family Nature Park and orchard.

HOME Initiative

Homeownership Fair: In July, Wells Fargo partnered with UnidosUS to launch multimillion-dollar Latino homeownership plan to help 4MM Latinos buy a home by 2030.

Small Business Bootcamp

Chicago Sky Cares: Wells Fargo to support Chicago Sky Cares' 2023 Beyond Basketball Small Business Bootcamp – a 4 –week boot camp in Oct. – Nov. focused on aiding and sustaining Black-owned businesses in Chicago

Financial Empowerment Week

Chicago Treasurer's Office: Wells Fargo sponsored *Building Wealth Today for Tomorrow* event in October including Financial Services Career Fair and Financial Empowerment Summit in October.

Coats For Kids

Operation Warm: Wells Fargo donated $30,000 to purchase more than 1,000 coats for Chicago Public School kids in marginalized communities. WF volunteers will come together in November to help fits the kids for their brand-new coats.

Philanthropy & Community Impact

Chicago volunteers at work

This year, Wells Fargo provided $7.5 million to Habitat for Humanity International and $1.45 million to Rebuilding Together to support local market projects. Chicagoland employees participated during the company's 'Welcome Home' initiative Sept. 1- Oct. 5 by volunteering on home building and repair projects with Chicago Habitat For Humanity and Rebuilding Together of Metro Chicago.

Table of Contents

Overall CRA Rating

Institution's CRA Rating: This institution is rated **Outstanding**

The following table indicates the performance level of Wells Fargo Bank, National Association (WFBNA) with respect to the Lending, Investment, and Service Tests:

	WFBNA Performance Tests		
Performance Levels	Lending Test*	Investment Test	Service Test
Outstanding	X		
High Satisfactory		X	X
Low Satisfactory			
Needs to Improve			
Substantial Noncompliance			

* The Lending Test is weighted more heavily than the Investment and Service Tests when arriving at an overall rating.

The major factors that support this rating include:

Lending Test

- WFBNA's lending levels reflect excellent responsiveness to the credit needs in the majority of assessment areas (AAs). In a majority of AAs, WFBNA's lending market share, as measured by its ranking or percentage, exceeds its ranking or percentage market share of deposits.
- WFBNA's geographic distribution and distribution by income of the borrower or revenue of the farm or business is good.
- The institution is a leader in making community development (CD) loans. WFBNA's volume and nature of CD lending has a significantly positive influence on the Lending Test performance. CD lending has a significantly positive influence on 23 of the 52 rating areas and a positive influence on 15 of the 52 rating areas.
- The institution makes significant use of innovative and/or flexible loan products to meet the AA's credit needs.

Investment Test

- WFBNA's performance, as measured primarily by volume of investments, is overall good. In 22 out of 52 of WFBNA's rating areas, the bank is a leader in providing CD Investments. In most rating areas, CD investments are good or adequate.

Service Test

- Retail delivery systems are accessible in a majority of the rating areas.
- In a majority of the rating areas, WFBNA provides banking services through a number of alternative delivery systems (ADS), including full-service ATMs, telephone, online banking, mobile banking, and a mobile payment platform.
- WFBNA's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in low- and moderate-income (LMI) geographies and to LMI individuals.
- Overall, hours do not vary in a way that inconveniences portions of the AAs, particularly LMI geographies. Branch hours are reasonably consistent across the AAs and any differences were reasonably explained.
- In 13 of 52 rating areas including some of the largest rating areas, the bank is a leader in providing CD services. In most other rating areas, CD services are good or adequate.

Description of Institution

WFBNA is an interstate financial institution headquartered in Sioux Falls, South Dakota. WFBNA conducts business within 35 states and 17 Multistate Metropolitan Statistical Areas (MMSA) including 88 full-scope (FS) AAs and 128 limited-scope (LS) AAs. WFBNA is a wholly-owned subsidiary of Wells Fargo & Company (WFC) headquartered in San Francisco, California. WFC is a diversified financial services company providing banking, insurance, investments, mortgage loans, and consumer finance largely through WFBNA. Based on asset size, WFC is the third largest bank holding company in the United States.

As of December 31, 2018, WFBNA has total assets of $1.7 trillion, deposits of $1.5 trillion, and tier 1 capital base of $143 billion. Included in the deposits are approximately $59.6 billion held in foreign offices. WFBNA's net loans and leases were $914 billion, representing 54.6 percent of total assets. Approximately 50 percent of the bank's domestic loan portfolio is comprised of real estate loans, which are predominately loans secured by 1-4 family residential properties. Commercial and industrial loans comprise 21 percent of the domestic loan portfolio, loans to individuals for household, family, and personal purposes comprise 12 percent of the domestic loan portfolio, and miscellaneous other loans and leases comprise the remaining 18 percent. At the request of WFBNA and in accordance with provisions of the CRA, this evaluation considers affiliate activities. Refer to Appendix A for a complete list of subsidiaries, affiliates, and products considered.

WFBNA is a full-service bank with over 5,600 branches and over 13,500 ATMs. WFBNA is the largest mortgage lender and servicer in the U.S. The bank offers a broad spectrum of financial products and services to consumers and businesses centered in retail and business banking, mortgage banking, trust services, and investment management. The bank's business strategy focuses on retail and wholesale banking with an emphasis on mortgage, small business, and CD lending. The bank, through its Wells Fargo Home Mortgage division, provides mortgage services to all 50 states through more than 718 mortgage stores, the WFBNA branch network, and the Internet.

There are no known legal, financial or other factors impeding the bank's ability to help meet the credit needs in its AAs.

WFBNA was rated "**Needs to Improve**" at the previous CRA evaluation dated September 30, 2012. In the 2012 Performance Evaluation (PE), the bank's overall performance under the Lending and Investment tests was rated Outstanding and under the Service test was rated High Satisfactory; however, the overall rating was lowered two rating levels from "Outstanding" to "Needs to Improve" due to numerous evidence of discriminatory or other illegal credit practices (DOICPs). The following DOICPs were considered and factored in the rating set out in the 2012 CRA PE:

- Fair Housing Act (FHA) and Equal Credit Opportunity Act (ECOA) violations regarding subprime mortgage loans.
- Unfair or Deceptive Acts and Practices (UDAP) violations regarding subprime loans.
- Unfair, Deceptive, or Abusive Acts and Practices (UDAAP) violations regarding Sales Practices.
- The Servicemembers Civil Relief Act (SCRA) violations for non-judicial foreclosures affecting service members.
- SCRA violations regarding motor vehicle loans.
- UDAP violations regarding debt cancellation products.
- UDAP violations regarding private student loans.

- Real Estate Settlement Procedures Act violations involving home mortgage transactions.
- FHA violations regarding home mortgage loans.
- FHA violations regarding real estate owned properties.

The above DOICPs which we considered in the 2012 CRA PE were not again considered in the current PE since no additional violations were discovered since the prior evaluation. Further actions taken or penalties issued by other regulatory enforcement entities since the issuance of the prior PE that were premised on conduct addressed in the above DOICP, but brought against a party other than the bank or citing violations other than a DOICP, were not considered in the current PE. Recent actions taken by the Department of Justice and Security Exchange Commission are premised on legal violations that are not typically included within the scope of DOICPs for purposes of CRA. Similarly, the OCC's recent action regarding the institution affiliated parties would not be included within the scope as it involved violations by individuals and not conduct by the bank. Refer to the 2012 CRA PE for additional details on the DOICP listed. Refer to the Discriminatory or Other Illegal Credit Practices Review section of this PE for details on other DOICPs considered during this CRA evaluation.

Scope of the Evaluation

Evaluation Period/Products Evaluated

The bank's CRA performance was evaluated using Large Institution CRA Examination Procedures. The evaluation considers home mortgage loan products reported under the Home Mortgage Disclosure Act (HMDA), small loans to businesses and small loans to farms, retail services, and qualified CD lending, investments, and services. Consumer loans do not represent a majority of the bank's CRA loan activity; therefore, this lending provided no material support for conclusions or ratings and is not presented. Loans reported pursuant to the HMDA and CRA data collection requirements for 2012-2018 were included in the review. The review included both loan originations and purchases. The evaluation period for the Lending Test is January 1, 2012 through December 31, 2018. The evaluation period for CD loans, investments, and services is January 1, 2013 through December 31, 2018. Please refer to Appendix A for information on the subsidiaries, affiliates, and products reviewed during this evaluation.

The evaluation period covers changes in demographics between the 2010 U.S. Census data and the 2015 American Community Survey (ACS) and requires data to be organized and analyzed based on the applicable census period. For the lending test, the bank's lending activity related to calendar years 2012-2016 was compared to the 2010 U.S. Census demographic data. The bank's lending activity for 2017-2018 was compared to the 2015 ACS. Refer to Appendix D for information regarding performance data for both evaluation periods: 2012-2016 and 2017-2018.

This evaluation relied on records provided by the bank, public loan and financial information, demographic data from the U.S. Census Bureau, Dun & Bradstreet (D&B), community contacts, and loan information reported under the HMDA and CRA. The scope of the evaluation is summarized in Appendix A, Summary of MMSA and State ratings is summarized in Appendix B, definitions and common abbreviations utilized in this evaluation are further defined in Appendix C, and Tables of Performance data are in Appendix D.

Data Integrity

Prior to the start of this evaluation, a statistical sample of HMDA and CRA loan files was selected and tested to determine the accuracy of the data. In addition, a sample of CD loans, investments, grants, and services were reviewed to ensure they met the regulatory definition for CD. OCC concluded that the HMDA and CRA loan data submitted by management could be relied upon for this evaluation. The bank strengthened its overall process for CD activities and a follow-up review concluded that CD loans, investments, grants, and services are reliable for this evaluation.

Selection of Areas for FS Review

WFBNA has defined 216 AAs within 35 states and 17 MMSAs. Each MMSA where the bank has offices received a FS review. In each state where the bank has an office, one or more AAs within that state was selected for a FS review. The FS AAs in each state represent a substantial majority of each state's lending and deposit activity. For purposes of this evaluation, bank delineated AAs located within the same metropolitan statistical area (MSA), MMSA, or combined statistical area (CSA) are combined and evaluated as a single AA. Similarly, bank delineated non-MSA AAs within the same state are combined and evaluated as a single area. These combined AAs may be evaluated as FS or LS.

Significant differences across portions of the combined non-MSA AAs, such as in demographics, economic conditions, competition, other performance context factors, or gaps in lending or CD activities, are described in the PE and considered when evaluating performance in the combined non-MSA area, if FS procedures are used. Similarly, narrative comments address performance at the MSA or MMSA level, even if the bank has defined two or more metropolitan divisions (MD) within the same MSA, or two or more MSAs within the same MMSA as separate AAs. Examiners may also present combined comments related to MSAs within a CSA. Refer to the "Scope" section under each State Rating section for details regarding how FS AAs were selected. Refer to appendix A, Scope of Examination, for a list of FS and LS AAs.

Ratings

The bank's overall rating is a blend of the state and MMSA ratings. State ratings are generally based on conclusions of the AA(s) in the state reviewed using FS evaluation procedures; however, LS AA ratings were also considered. For some of the states including Alaska, Florida, Idaho, Indiana, Minnesota, Montana, North Carolina, Ohio, South Carolina, Virginia, Wisconsin, and Wyoming, conclusions of LS AAs affected the rating either negatively or positively and are highlighted in the Conclusions for Areas Receiving LS Reviews section of each respective rated areas.

The State of California is the largest market in terms of lending at 21.8 percent, deposits at 20.3 percent, and branch distribution at 18.3 percent and accounts for the largest weight in the overall conclusions. Additionally, 12 other rated areas when combined with California represent the bank's most significant markets in terms of lending, deposits, and branch distribution. In order of significance, these rated areas are: Texas, Florida, New York MMSA, Washington MMSA, Georgia, Arizona, Philadelphia MMSA, Colorado, North Carolina, Minneapolis MMSA, Washington, and Virginia. These combined rated areas account for 76.3 percent of the bank's HMDA and CRA reportable loans during the evaluation period, 57.3 percent of the total allocated deposits, and 76.6 percent of the branch network.

The PE is presented in alphabetical order first by MMSA rated areas then by each state. MMSA and state ratings are based on performance in all applicable FS and LS bank AAs. Refer to the "Scope" section under each State and MMSA Rating section for details regarding how the areas were weighted in arriving at the respective ratings.

Description of Factors Considered Under Each Performance Test

Lending Test

Due to the changes in census data during the evaluation period, the bank's Lending Test performance was evaluated separately for 2012-2016 and 2017-2018. When arriving at overall conclusions, more weight was placed on the bank's lending performance in 2012-2016 than its performance in 2017-2018, as this was the time period of greatest significance to evaluate conclusions. The bank's lending in all AAs was evaluated. For the various loan products considered under the Lending Test, generally home mortgage loans received greater weighting than small loans to businesses in developing conclusions due to a higher volume of HMDA loans during the evaluation period. All home mortgage products (home purchase, home improvement, and home refinance) were reviewed with conclusions based on the aggregate of all home mortgage loans and consideration of performance context that is discussed in each applicable rating area section within the Lending Test. Small farm lending is not a primary product in any of the bank's AAs and the volume of small farm lending was minimal for most of the rated areas which precludes any meaningful analysis and conclusions. Small farm lending was reviewed and analyzed for all rated areas; however, only four rated areas (Fargo MMSA, Illinois, North Dakota, and South Dakota) had sufficient volume that contributed to those respective state's overall ratings. In these markets, small farm lending accounts for approximately 10 to 15 percent of the overall lending and is presented in the analysis. Please refer to the Lending Test in these following rated areas concerning small loans to farms.

In rating areas where there was a significant difference in weighting, it is noted under the Scope of the Evaluation section. The loan distribution analyses compared HMDA loans and loans to small businesses and small farms to demographic and aggregate data under the applicable lending test components. Aggregate data illustrates how the bank is performing relative to other lenders in the AA and provides context as to the reasonableness of the bank's performance. All peer aggregate lending data used in the analysis is from 2012-2017. Aggregate lending data for 2018 was not available.

Throughout all rating areas, as data was available, equal emphasis was given to the geographic and borrower distribution components of the Lending Test. The analysis of the distribution of loans to geographies with different income levels was given greater consideration to the bank's performance in moderate-income geographies when there were a limited number of owner-occupied housing units or businesses in the low-income geographies. For borrower distribution, consideration was given to the impact that income and poverty levels, housing costs, and saving for a down payment have on limiting homeownership opportunities of LMI individuals and families. Additionally, consideration was given to the impact of home affordability on LMI borrowers in higher cost areas when comparing the distribution of WFBNA mortgage loans to the demographics. In these higher cost markets, it is difficult for many LMI borrowers to afford a home as the area's median housing value is typically too high for conventional mortgage loan qualification. As such, more emphasis was placed on the bank's lending results to LMI borrowers relative to the aggregate's performance rather than demographic data.

For AAs comprised of contiguous MSAs that are part of a CSA, the analysis of the bank's performance was conducted at the MSA level. If there were no anomalies at the MSA level, the bank's performance is presented for AAs at the CSA level. For each FS review, economic information is separately detailed for each MSA area within a CSA AA. For the Lending Test, the analysis included both the number and dollar volume of CRA lending. The analysis of lending emphasized the number of loans rather than dollar volume because it is a better indicator of the number of businesses, individuals, and farms served. Lending performance by dollar volume is noted when there are anomalies.

The analysis considered the number and dollar volume of CD loans with emphasis placed on those loans that were particularly innovative, complex, or responsive to the needs of the AA. CD lending in an AA influenced the Lending Test rating either positively, neutrally, or negatively, to the extent of opportunity, responsiveness, and performance context. In situations where the bank's CD lending positively influenced the rating, it is described in the conclusions for the rating area. The dollar amount of CD loans was compared to the tier 1 capital allocated to the AAs to gain a common perspective regarding the volume of CD lending activity. Tier 1 capital was allocated to the rating areas and AAs based on the percentage of bank deposits in the AAs.

Investment Test

The analysis considered the volume of qualified investments made during the current evaluation period and qualified investments that were made prior to the current evaluation period and, for which, are still outstanding with emphasis placed on those investments that were particularly innovative, complex, or responsive to the needs of the AA. The amount of consideration given to the current and prior period investments is based on the responsiveness of the investments to the needs in the AAs.

The analysis compared the dollar amount of qualified investments made in the current evaluation period and prior evaluation periods to the tier 1 capital allocated to the AAs to gain a common perspective regarding the volume of investment activity. Tier 1 capital was allocated to the rating areas and AAs based on the percentage of bank deposits in each AA.

Service Test

Primary consideration was given to the bank's performance in delivering retail products and services to geographies and individuals of different income levels through the bank's distribution of branches. The analysis focused on branches located in LMI geographies but also considered branches identified by WFBNA as being within close proximity to LMI geographies that are reasonably likely to serve the LMI area based on circumstances such as the location of other services used by residents of the LMI area or transportation patterns. Through sampling, OCC verified and confirmed that these branches held deposit accounts of, and mortgage loans to individuals in adjacent LMI geographies. OCC also verified that there are no barriers or other impediments that would prevent a resident of the LMI geography from obtaining full use of the bordering branch's banking services. The analysis also evaluated the range of services and products offered by all of the bank's branches. Services and products offered at all branches are consistent throughout the branch network. The analysis specifically focused on any differences in branch hours and services in LMI geographies compared to those branches in close proximity to LMI geographies. OCC did not note any material differences in any AA. As such, branches within close proximity to LMI geographies and branches within LMI geographies were given equal consideration in the evaluation.

Where the bank opened or closed branches within an AA, the overall impact of the change was evaluated based on the census data that was in effect as of the date of the change. If no branches were opened or closed in an AA, the analysis did not include this performance element.

WFBNA offers traditional banking products including mortgage, consumer, small business, and small farm loans at all branch locations within the AAs. In 2016, the Wells Fargo EasyPay Pre-Paid Debit Card, a reloadable prepaid card that can be used to make purchases, withdraw cash, and pay bills became available in all markets. In addition, the bank provides banking services through a number of ADS, including full-service ATMs, telephone, online banking, mobile banking, and Zelle, an online and mobile payment platform. Zelle is also compatible with other 3rd party mobile payment platform applications such as Venmo and PushPay. These services are offered to all bank customers, are available throughout all of the bank's markets, and give customers flexibility in choosing services that fit their needs. Online and mobile banking has become an effective delivery method allowing customers to access their accounts anytime from any location with the right equipment. All ADS are available to customers 24 hours a day and enhance the overall accessibility of services.

The bank's record of providing CD services was evaluated in AAs that received FS reviews. The primary consideration of the analysis of CD services was the responsiveness to the needs of the community.

Community Contacts

The evaluation also reviewed and considered community contacts made during the evaluation period with community groups, local government representatives, realtors, and business leaders within the various AAs as well as community needs assessments conducted by the bank. Community contacts are utilized to ascertain the AA's credit needs, demographics, and economic conditions. During the course of the evaluation, community contacts are referenced in each AA that received a FS review.

The review of community contacts indicates that urban and rural areas continue to have various affordable housing, CD, and economic development needs that are not being met. Most of the contacts noted that the economy in their area has stabilized and/or is improving. Although unemployment rates in most areas have declined, they still remain fairly high in some of the AAs. Affordable housing was consistently noted by numerous community contacts as a credit need throughout the AAs. Community contacts involved with economic development indicated that flexible financing options for small businesses are important to creating additional job growth in communities. Small businesses were identified as a major factor in expanding employment opportunities in both urban and rural areas. Many contacts noted that small businesses have faced limited access to credit in recent years due to tightened lending standards. A number of contacts noted that demand for micro small business loans is very strong, but these loans are not generally available from banks. In addition, contacts identified needs for micro small business loans, small dollar consumer loans, affordable mortgage loans, and more flexible lending standards for small businesses.

Other Information

Assessment Areas – All AAs consisted of whole geographies and met the requirements of the regulation. The areas reasonably reflected the different trade areas that the bank's branches could service and did not arbitrarily exclude any LMI areas.

Lending Gap Analysis – OCC reviewed summary reports and maps, and analyzed home mortgage, small business, and small farm lending activity over the evaluation period to identify any gaps in the geographic distribution of loans in all FS AAs. OCC did not identify any unexplained conspicuous gaps in any AA reviewed.

Lending in Assessment Area **-** A substantial majority of the bank's loans are in its AAs. The bank originated and purchased, in aggregate, 83.5 percent by number and 86.8 percent by dollar volume of its total loans inside the bank's combined AAs during the evaluation period. This analysis is performed at the bank, rather than the AA, level. Loans made by affiliates were not considered in this analysis.

Table D - Lending Inside and Outside of the Assessment Area

	Number of Loans					**Dollar Amount of Loans $(000s)**

Due to rounding, totals may not equal 100.0

Innovative or flexible lending Programs - The bank offers several flexible loan products that addressed the needs of LMI borrowers and geographies and small businesses during the evaluation period. In those areas where these flexible loan programs were given positive consideration, it is noted within the Lending Test of the respective AA. The following programs offered throughout WFBNA's footprint are particularly responsive to the credit needs of its communities.

- *yourFirst* Mortgage℠ - The program was launched in May 2016 to address barriers to homeownership and encourages customer preparedness for homeownership by offering a $750 closing cost credit for customers who choose to complete homebuyer education. Since the launch in May 2016, the program has funded over 54,000 loans totaling $11.6 billion. Of the total volume, approximately 22.5 percent in 2016, 25.4 percent in 2017, and 29.2 percent in 2018 were originated to LMI borrowers and consistently ranked higher than the overall LMI lending rate in the industry. WFBNA continues to make enhancements to the product to improve the ability to create sustainable LMI homeowners. The program has features to assist customers with overcoming obstacles to purchasing a home including:
    - As little as 3 percent down payment required – less if the customer uses an approved Down Payment Assistance Program.

  - No requirements that a borrower be a first-time home buyer, purchase in specific census tracts, or meet a specific income limit to qualify.
  - Down payment assistance programs and monetary gifts may be used toward a down payment.
  - Alternative types of credit resources may be accepted – such as history of rent and utility payments.
  - HUD-approved homebuyer education or counseling is not required. However, customers who successfully complete education or counseling receive $750 credit for closing costs. Over 77 percent of all customers elect to complete counseling and receive this valuable benefit.
- *NeighborhoodLIFT*℠ **-** the program was launched in February 2012 in the wake of the housing crisis to help stabilize neighborhoods deeply affected by the foreclosure crisis through a commitment to home lending, homebuyer education, and homebuyer support. Today, the NeighborhoodLIFT program has evolved to help address affordability challenges for LMI homebuyers. The program requires an applicant who is approved and receives a down payment assistance grant of $7,500 to $15,000, depending on market areas, to complete eight hours of pre-purchase counseling and education from a U. S. Housing and Urban Development (HUD)-certified housing counseling agency. Homebuyers may obtain financing from any participating lender. Through the program, WFBNA has committed more than $430 million of down payment assistance, Local Initiative grants, housing counseling, and homebuyer support and education to create sustainable homeownership. During the evaluation period, WFBNA originated over 4,100 loans totaling $671 million under this program in the AAs. The NeighborhoodLIFT℠ program is also the single largest corporate philanthropic effort of its kind in WFBNA's history and is funded by the Wells Fargo Foundation. Key components of the NeighborhoodLIFT℠ effort provide support in three major areas:
  - Down payment assistance for first-time homebuyers and potential homebuyers ready to re-enter the market.
  - Locally designed Local Initiatives and LIFT the Block programs to meet local housing priorities that support community revitalization efforts.
  - Local outreach events designed to provide homebuyer education and support.
- Small Business® Diverse Community Capital Program (DCC) takes an innovative approach to address challenges diverse small business owners face when starting or growing their business. The DCC program was launched in 2015 with an initial, three-year, $75 million commitment to increase capital and technical assistance available to diverse small businesses that may not qualify for conventional bank loans. The DCC program is a collaboration between WFBNA and Opportunity Finance Network (OFN), a national network of Community Development Financial Institutions (CDFIs), to respond to issues identified in a national Gallup Survey that revealed that diverse small businesses were challenged accessing the credit they needed to launch or grow their business. Funds are used by CDFIs to increase lending to diverse-owned small businesses; provide educational resources and technical assistance they need to grow; and improve, create or add resources, materials, or programs to better serve their target market. As of December 2018, WFBNA fulfilled its $75 million commitment and 88 CDFIs have received DCC awards serving small businesses in 37 states. Awardee CDFIs serve both rural areas and urban centers. According to OFN, DCC awardees have closed more than 8,000 loans totaling $391 million to diverse small business clients. Diverse small businesses that received loans from awardee CDFIs have retained more than 21,000 jobs and created more than 15,000 jobs as a result of accessing the capital and development services they needed. WFBNA has pledged another $100 million to continue the program through 2020.

- For small businesses, the bank offers loans guaranteed by the U. S. Small Business Administration (SBA), including SBA 504, SBA 7a, SBA 503, and SBA Community Express loans and lines of credit. SBA loans have more flexible terms than conventional loans. During the evaluation period, WFBNA originated 687 SBA loans totaling $1.3 billion in its AAs.

Innovative or flexible Retail Service Programs - WFBNA offers several retail services across its AAs that address the needs of all of its customers including LMI individuals and small businesses. The following highlights some examples of the bank's programs:

- WFBNA's Online Mortgage Application was launched in early 2018 which combines Wells Fargo source data with a digital interface to create a "you know me" experience that is compelling for current Wells Fargo customers. When a Wells Fargo customer logs into the online mortgage application, the customer won't be asked to provide certain information that Wells Fargo already has in their database. The online mortgage application is integrated with the sales team, giving customers the option to engage with a specialist at any point during the process.
- In 2014, WFBNA introduced The Business Plan Tool and Competitive Intelligence Tool to deliver resources, guidance, and services for business owners. This tool offers useful guidance on topics such as writing a business plan, marketing a business, managing cash flow, and building credit to help business owners increase their knowledge and confidence. The site provides information about CDFIs that can be a source of external funding, when traditional bank financing is not available.
- WFBNA participates in the Volunteer Income Tax Assistance (VITA) to provide free tax preparation to LMI taxpayers, the elderly, and those with disabilities. IRS certified volunteers provide free basic income tax return preparation with electronic filing to qualified individuals. Receiving free tax preparation services and help accessing eligible tax credits such as the Earned Income Tax Credit can be life changing for LMI families. WFBNA actively participates in 68 VITA programs across the footprint through volunteer hours, grants, and financial education. During the exam period, WFBNA team members volunteered nearly 5,000 hours preparing tax returns and local markets provided numerous grants to support local VITA programs.
- Hands on Banking®/El futuro en tus manos® program is WFBNA's free, public, non-commercial, financial capability program offering a comprehensive suite of financial education courses designed for instructor-led group learning or self-paced individual use. The goal of the program is to be the relevant and timely resource of choice for educators and individuals to develop the financial capability to successfully navigate throughout life's financial ups and downs and succeed financially. The program has curriculum designed for specific audiences including: preparing young adults (9th grade – College age) for financial futures; small business owners who have been declined for business credit; addressing unique financial education needs of military personnel; and training to seniors on how to prevent and detect elder financial abuse. During the exam period, over 15,000 team members participated in the campaigns which yielded nearly 56,000 hours of Hands on Banking® training and reaching over 800,000 people through classes, workshops, and webinars.
- Wells Fargo de novo branches provide important face-to-face interactions to serve customers and help them meet their financial dreams and goals. WFBNA continues to add new locations in communities across the country serving the financial needs of its LMI residents and businesses. In 2017, WFBNA added two de novo LMI branches to its network. Nine additional LMI branches were opened in 2018 with four in California, two in Florida, one in Texas, and one in New York. These de novo LMI branches delivered much needed banking services to

underserved communities and in areas designated for redevelopment, closing a gap in coverage within the areas.

Community Development Initiatives - WFBNA makes significant use of innovative and/or complex CD investments and loans to support CD initiatives. For examples of the bank's CD initiatives, please see the conclusions in each rated area under CD activities. Below are the types of CD investment and loan vehicles that WFBNA uses, most of which are complex or innovative, and most often WFBNA serves in a leadership role to implement its CD activities.

- *Low Income Housing Tax Credit (LIHTC)* - WFBNA's primary vehicle for qualified CD investments and loans is LIHTCs. The LIHTC program was established as part of the Tax Reform Act of 1986. LIHTCs provide tax incentives to encourage individual and corporate investors to invest in the development, acquisition, and rehabilitation of affordable rental housing. They are an indirect federal subsidy that finances low-income housing. This allows investors to claim tax credits on their federal income tax returns. To qualify for the credit, a project must meet strict requirements to qualify as a low-income project. Developers are required to set aside at least 40 percent of the units for renters earning no more than 60 percent of the area median family income (MFI) (the 40/60 test), or 20 percent of the units for renters earning 50 percent or less of the area MFI (the 20/50 test). These units are subject to rent restrictions where the maximum permissible gross rent, including an allowance for utilities, must be less than 30 percent of imputed income based on the area MFI. State selection procedures for tax credit allocations often encourage developers to provide more than the minimum number of affordable units. Because these credits are only available for affordable rental units, many applications designate 100 percent of the units in properties as affordable. They also reserve some of the units for renters earning well below 50 percent of the area's MFI. During the evaluation period, WFBNA participated in over 690 new LIHTC offerings through direct investments and/or loan syndications. These investments, some of which benefited multiple AAs, totaled approximately $11.6 billion and were sponsored by federal, state, and local housing for profit and nonprofit agencies and groups. Additionally, WFBNA is still participating in 759 prior period LIHTC investments totaling approximately $1.2 billion.
- *Subordinate Debt (formerly known as Equity Equivalent Investments "EQ2")* – Due to an accounting change in 2018, this product was changed from an investment to a CD loan product. WFBNA has been a leading provider of Subordinate Debt to CDFIs and other nonprofit affordable housing developers around the country for two decades with long-term, low-rate, and unsecured instruments. Through WFBNA's funding, CDFIs provide innovative and flexible credit products that address affordable housing and CD needs in the bank's AAs. CDFIs help to promote healthy communities by providing early-stage credit, capital, and financial services to small businesses, affordable housing and community facility developers, community organizations, and other types of borrowers. CDFIs can leverage these instruments with senior debt to build their lending capacity. WFBNA, on average, provides approximately $40 million in subordinate debt on an annual basis and as of year-end 2018, the outstanding portfolio totals over $270 million to 215 CDFIs nationwide. Many of the subordinate debts provide for CD in areas where private investor funds are not available. Additionally, WFBNA funds have helped to facilitate additional CD investments from other parties.
- *New Markets Tax Credit (NMTC)* – WFBNA uses the NMTC programs to help meet the credit needs of the AAs. The NMTC program, authorized by the U.S. Treasury, incentivizes business and real estate investment in low-income communities through a federal tax credit. These tax credits help revitalize economically distressed and underserved communities. NMTC credits are a critical financing tool, filling gaps in development costs that may prevent projects from arising.

Through NMTC allocations, WFBNA reduces borrowing costs for nonprofits and entrepreneurs by offering below-market rate financing on more favorable credit terms than conventionally available and can help smaller community-focused projects such as child care centers, health care clinics, and community art centers secure funding and bring their much-needed services to low-income neighborhoods. Since the inception of its NMTC platform, Wells Fargo has invested over $3.5 billion in NMTC investments nationally. These investments have leveraged an estimated $4.3 billion in additional capital, much of which was sourced by new entrants into the NMTC industry, creating an estimated 30,000 permanent jobs and millions of square feet of mixed-use, commercial, and community-oriented space across the country. During the evaluation period, WFBNA participated in 128 new NMTC projects totaling $1.5 billion. Additionally, WFBNA is still participating in 22 prior period NMTC investments totaling approximately $278.3 million.

- *Mortgage Backed Security (MBS)* - MBSs provide ownership interest in a pool of single-family mortgages that act as the underlying asset of the security. The pools are comprised of loans originated entirely to LMI borrowers who reside in WFBNA's AAsDuring the evaluation period, WFBNA made over 1,300 MBS investments totaling $600 million. Additionally, there are still 949 prior period investments totaling $146 million on the bank's books.
- *The Homeownership Counseling Grant Program (HCGP)* – WFBNA has implemented this program to provide financial resources to local nonprofit housing organizations to create affordable and sustainable homeownership opportunities for LMI individuals. This grant program focuses on homebuyer counseling assistance that addresses unique financial circumstances and housing issues; homebuyer education that covers the home-buying process including how to maintain a home, budgeting, the importance of good credit, and other home buying related subjects; and foreclosure prevention counseling efforts designed to help families keep homes that are facing foreclosure and stabilize the overall housing market. During the evaluation period, WFBNA has provided over 1,200 grants totaling $11.7 million to nonprofit housing organizations throughout the bank's AAs.
- *The Priority Markets Program (PMP)* – WFBNA implemented the PMP to support projects, programs, and initiatives focused on neighborhood revitalization and help remove barriers to sustainable housing in LMI communities. Grant funds are used for costs associated with development or redevelopment of affordable housing and homebuyer subsidies, such as down payment/closing costs and homebuyer counseling. Funds are also used for renovation of foreclosed and/or abandoned properties for resale to LMI homebuyers. The Community Relations team identifies nonprofits with successful histories of supporting LMI communities that are responding to the needs in the community. Regional teams review the applications and select the projects that are most impactful and responsive to the needs in the market. During the evaluation period, WFBNA has provided 339 grants totaling $32.2 million to nonprofit organizations throughout the bank's AAs.

Discriminatory or Other Illegal Credit Practices Review

Pursuant to 12 C.F.R. §25.28(c) or §195.28(c), respectively, in determining a national bank's or federal savings association's (collectively, bank) CRA rating, the OCC considers evidence of discriminatory or other illegal credit practices in any geography by the bank, or in any assessment area by an affiliate whose loans have been considered as part of the bank's lending performance. As part of this evaluation process, the OCC consults with other federal agencies with responsibility for compliance with the relevant laws and regulations, including the U.S. Department of Justice, the U.S. Department of Housing and Urban Development, and the Bureau of Consumer Financial Protection, as applicable.

The OCC identified the following **public** information regarding non-compliance with the statutes and regulations prohibiting discriminatory or other illegal credit practices with respect to this institution:

- Evidence of unfair acts or practices, in violation of Section 5 of the Federal Trade Commission Act, 15 U.S.C. §45(a)(1). On April 20, 2018, WFBNA signed consent orders with the OCC and CFPB and agreed to pay $1 billion in civil money penalties to the agencies. As a result of the bank's mortgage interest rate lock extension (IRL) fee practices, customers were improperly charged mortgage interest rate extension fees when the bank should have borne those costs for mortgage loans that originated between September 2013 through March 2017. The bank's mortgage interest rate lock extension fee practices constituted unfair acts or practices in or affecting commerce in violation of the unfair acts or practices provision of Section 5 of the Federal Trade Commission Act, 15 U.S.C. § 45(a)(1), and were unsafe or unsound. Customer harm (the nature of the evidence) was material from a customer and monetary standpoint with the bank reimbursing approximately 111,000 borrowers to date totaling $100.8 million. WFBNA reimbursed any borrower, who paid a fee during the period and responded to the bank's notification of potential harm letters and reimbursed the borrower. The bank is assessing potential borrower harm pre-May 2012 to 2010 period. Bank management has committed to reimbursing any subsequently identified borrowers, similarly. Management has taken appropriate corrective actions to strengthen home lending compliance management including IRL control processes and audit oversight to prevent future violations of this nature. For further information, refer to the OCC's April 20, 2018 Compliance Consent Order AA-EC-2018-15.

- WFBNA violated UDAAP (12 USC 5531(c)(l) and 5536(a)(l)(B)). Certain employees in Texas knowingly arranged with loan closing agents to overcharge customers the difference between the amounts estimated on the good faith estimates (GFEs) and the actual closing costs. This violation involved customers who refinanced their previous home loans to improve the rate and term. The practice occurred from January 2009 through May 2013, a 53-month period. The practice, which was isolated to the state of Texas, affected approximately 27,300 accounts. The average amount overcharged was approximately $30 per loan. The total accounts affected during the CRA evaluation period (January 2012 through May 2013) is approximately 8,700 accounts. This practice was self-disclosed by the bank via an internal whistleblower reported incident. The bank remediated each customer affected by this unfair and deceptive practice in the amount of $50 for a total of $1.4 million. Management strengthened controls over this process by limiting the number of mortgage loan officers authorized to originate these loans, establishing a pre-closing second-level review of all such loans, and implementing post-funding quality assurance transactional testing.

The OCC does not have additional public information regarding non-compliance with statutes and regulations prohibiting discriminatory or other illegal credit practices with respect to this institution. In determining this institution's overall CRA rating, the **OCC has considered information that was made available to the OCC on a confidential basis** during the evaluation period.

The CRA performance rating was not lowered as a result of these findings. We considered the nature, extent, and strength of the evidence of the practices; the extent to which the institution had policies and procedures in place to prevent the practices; and the extent to which the institution has taken or has committed to take corrective action, including voluntary corrective action resulting from self-assessment; and other relevant information.

The OCC will consider any information that this institution engaged in discriminatory or other illegal credit practices, identified by or provided to the OCC before the end of the institution's next performance evaluation in that subsequent evaluation, even if the information concerns activities that occurred during the evaluation period addressed in this performance evaluation.

Multistate Metropolitan Statistical Area Rating

Augusta-Richmond County, GA-SC (Augusta MMSA AA)

CRA rating for the Augusta MMSA AA[1]: Satisfactory
The Lending Test is rated: High Satisfactory
The Investment Test is rated: Needs to Improve
The Service Test is rated: Low Satisfactory

The major factors that support this rating include:

- Good level of lending activity;
- Good geographic distribution of loans;
- Good borrower distribution of loans;
- Adequate level of CD loans;
- WFBNA's use of flexible products has a neutral impact on the Lending Test;
- Poor level of CD investments;
- Retail delivery systems are accessible to all portions of the AA; and
- Adequate CD services.

Description of Institution's Operations in Augusta MMSA AA

WFBNA delineated one AA within the Augusta MMSA AA and includes the Augusta-Richmond County, GA-SC MSA. Refer to Appendix A for a complete description of the AA. The Augusta MMSA AA represents the 37th largest rated area by deposits. WFBNA has $1.8 billion of deposits in the Augusta MMSA AA representing, 0.1 percent of adjusted deposits. In the Augusta MMSA AA, WFBNA ranked 1st out of 19 depository institutions with 21.7 percent market share. The 2nd and 3rd banks within the MMSA, in terms of deposits, are South State Bank with 15.8 percent and Bank of America with 11.4 percent market share. WFBNA operates 17 branches and 48 ATMs within the Augusta MMSA AA, representing 0.3 percent of the bank's branches and 0.3 percent of the bank's ATMs. In comparison to the percentage of deposits and branching network, the bank originated and purchased approximately $3.5 billion in loans or 0.2 percent of total bank loan originations and purchases during the evaluation period in the AA. The bank's primary loan products in the Augusta MMSA AA are home mortgage and small loans to businesses.

Demographic

The following table provides a summary of the demographics that include housing and business information for the Augusta MMSA AA. Table A indicates that the volume of owner-occupied units (OOUs) is very small in low-income census tracts (CT) and approximately 40 percent of families in the AA are LMI. The area's median housing value in the Augusta MMSA AA is 2.3 times the area's median income, but 2.9 times moderate-, and 4.7 times low-income, indicating a limited proportion of OOUs are affordable to LMI individuals. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

[1] This rating reflects performance within the multistate metropolitan statistical area. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

Table A – Demographic Information of the Assessment Area

Assessment Area: Augusta-Richmond County GA-SC (2016)

Due to rounding, totals may not equal 100.0
(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

According to the April 2018 Moody's Analytics report, Augusta's economy is among the fastest-growing economies in Georgia. Growth is broad-based but professional, business services, and construction are leading the way. Year-over-year job growth is twice the national average, and both goods producing and service providing industries are expanding at their fastest pace in more than three years. Thanks to booming Fort Gordon and growth at Plant Vogtle nuclear power plant, the job mix in the Augusta MMSA has improved over the past year with outsize gains in medium- and high-paying industries. Increased spending on cybersecurity has benefited the Augusta's economy. The $1.3 trillion omnibus bill, passed in March 2018, will raise spending by $80 billion above the caps set in the Budget Control Act of 2011. Consumer industries have been on a tear in the Augusta MMSA but will come off the boil as the expansion matures.

The outlook for the housing market is above average thanks largely to favorable demographics trends. Low inventory has been a hurdle nationally and Augusta is no exception. Home sales have slowed but a lack of supply is preserving upward pressure on prices.

The major economic drivers for the MMSA are federal government; Waste Treatment and Disposal; and Architectural, Engineering & Related services. The largest employers in the Augusta MMSA includes the U.S. Army Signal Center & Fort Gordon, Westinghouse Savannah River Co., and Georgia Regents University. According to the U.S. Bureau of Labor Statistics (BLS), the unemployment rate for the first quarter of 2018 was 4.8 percent and has decreased significantly from 9.1 percent at the beginning of the evaluation period. The unemployment rate in the AA was slightly higher than both the overall States of Georgia (4.1 percent) and South Carolina (3.4 percent).

Community Contact

The analysis takes into consideration comments provided by two community contacts that serve the bank's Augusta MMSA AA. One of the community contacts represents a government housing and community development corporation (CDC) and the other represents a rural CD agency in Burke County.

The economic development organization contact serves rural areas in the AA including Burke County. They noted that affordable housing was a need being met through their Single-Family Housing Mortgage Program, which serves households at 80 percent and below the average MFI. The program finances up to 100 percent of the loan and provides a down payment/closing costs subsidy up to 3 percent. Households above 80 percent of the area MFI were referred to local banks for the guarantee program. The contact indicated that there was no waiting list. However, the contact noted that credit was an issue. The county worked with other local agencies in Augusta to provide hands-on basic education, technical assistance, and homebuyer counseling. The contact mentioned that banks could become more involved with these programs as well as financing offered through the Central Savannah River Area Regional Commission. There is also a need in the AA for business lending in the form of business loans from $25,000 to $5 million through lending arrangements with the U.S. SBA, the U.S. Department of Commerce, and the U.S. Department of Agriculture.

The local government housing and CDC contact primarily represents LMI residents in the city of Augusta and Richmond County. The contact indicates there is not enough affordable housing in the AA for LMI and few housing options are affordable. Additionally, homelessness in Augusta is a growing issue. Hundreds of people in Augusta are living day-to-day without a home. There are over 700 people that are homeless in Augusta and that number is steadily increasing. There are few resources available in the area to help people that are homeless. A local non-profit shelter only houses about 200 people with no other options for the overflow of people needing shelter services. The contact mentioned there is a need for more grant programs and financial literacy programs for LMI people. The contact stated there is an opportunity for banks to provide loans to small businesses and more flexible loan terms and products for first time home-buyers that are purchasing homes in LMI communities.

The bank conducted research in the AA and identified community needs for affordable housing for LMI families, financial education, neighborhood revitalization/stabilization in both residential and commercial areas, small business assistance, and workforce development and job readiness to assist LMI individuals obtain employment.

Considering the information from the community contacts, bank management, and demographic and economic data, affordable housing and small business loans represent a primary credit need for the Augusta MMSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of population, OOUs, and small businesses coupled with limited home affordability for LMI individuals.
Small business loans, particularly those for start-up businesses and micro-loans are in high demand. The Augusta MMSA AA also has CD needs including economic development and volunteer support for financial literacy programs for first time homebuyers, foreclosure prevention assistance, and affordable

banking products including mortgage loans with low interest rates. There is also a need for grants to non-profits that serve LMI communities and individuals

Scope of Evaluation in Augusta MMSA AA

The rating for the Augusta MMSA AA is based on a FS evaluation of the bank's performance in the Augusta-Richmond County, GA-SC MSA. A limited portion of the bank's overall lending, investments, and services were conducted in the Augusta MMSA AA; therefore, the performance in the MMSA received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN AUGUSTA MMSA AA

LENDING TEST

The bank's performance under the Lending Test in the Augusta MMSA AA is rated High Satisfactory.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Augusta MMSA AA is good.

Lending Activity

Based on the tables below, lending levels reflect good responsiveness to the credit needs in the AA taking into account the number and dollar amount of home mortgage, small business, small farm, and CD loans originated or purchased. Lending levels were commensurate with the bank's significant capacity and market dominance.

Number of Loans					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Augusta MMSA	19,263	5,067	153	5	24,488

Dollar Volume of Loans (000's)					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Augusta MMSA	$3,185,894	$271,669	$7,771	$30,382	$32,195,716

WFBNA ranked first in deposits with 21.7 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 10.1 percent market share. Although WFBNA's HMDA market share is considerably lower than its deposit market share, lending competition was significantly stronger, reflected by the 378 lenders, than competition for deposits, where there were only 19 depository institutions. The 2nd and 3rd top lenders in this market were South State Bank with 5.2 percent market share and Queensborough National Bank with 4.6 percent market share.

In small loans to businesses, WFBNA ranked 4th with a market share of 7.6 percent. Although WFBNA's small business market share is considerably lower than its deposit market share, lending competition was significantly stronger, reflected by the 88 lenders, than competition for deposits, where there were only 19 depository institutions. The top three lenders were American Express with a market share of 19.1 percent, Citibank with a market share of 11.8 percent, and Georgia B&TC of Augusta with a 9.1 percent market share.

Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in its AA.

Home Mortgage Loans

Refer to Table O in the "MMSA" section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in low-income geographies approximates the aggregate distribution of loans and is significantly below the proportion of OOUs in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is well below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the "MMSA" section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is good.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for small business loans in LMI geographies substantially meets the aggregate distribution of loans in those geographies.
- The bank's performance in both periods is below the proportion of businesses located in LMI geographies.

Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and businesses of different sizes.

Home Mortgage Loans

Refer to Table P in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- There are homeownership affordability hurdles in the AA especially for low-income borrowers. As noted above, the area's median housing value is 4.7 times the income of low-income borrowers indicating a limited proportion of OOUs are affordable to low-income borrowers. Despite the affordability challenges, the bank's lending in both periods, 2012-2016 and 2017-2018, to LMI borrowers substantially meets the aggregate lending.
- The bank's overall home mortgage lending to low-income borrowers is significantly below the proportion of families and lending to moderate-income borrowers is below the proportion of families.

Small Loans to Businesses

Refer to Table R in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's originations and purchases of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue category is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is well below the percentage of small businesses located in the AA.

Community Development Lending

The institution has made an adequate level of CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The level of CD lending in the Augusta MMSA AA is adequate. WFBNA made five CD loans in its AA for a total of $30 million, which represents over 14.7 percent of tier 1 capital. Although the bank only originated five loans during the six-year time period, the loans represented a significant amount of tier 1 capital. CD lending performance has a neutral impact on the lending test rating. All CD loans were for the primary purpose of affordable housing, which is a critical CD need in the bank's AA.

Examples of CD loans in the AA include:

- In June 2016, WFBNA provided an $8.4 million loan for an LIHTC housing development located in Martinez, Georgia with 100 percent of the units restricted to tenants earning less than 60 percent of the area MFI.
- In August 2017, WFBNA provided a $28 million loan for a multifamily housing development, of which $10.1 million qualifies as CD lending. The development restricts 36 percent of the total number of units to tenants earning 80 percent or less of the area MFI. This development is located in a moderate-income census tract in Augusta, GA. The project consists of 20 efficiency units, 141 one-bedroom units, and 285 two-bedroom units with 36.1 percent of the actual rent rates below the 2017 Fair Market Rent for the area and 99.1 percent of the units are affordable to tenants earning between 36.4 and 55.8 percent of the 2017 area MFI of $62,000.

Product Innovation and Flexibility

The institution makes limited use of innovative and/or flexible lending programs in order to serve AA credit needs. Under the *your*FirstMortgage loan program, the bank has funded 41 loans totaling $4.2 million to LMI homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

INVESTMENT TEST

The bank's performance under the Investment Test in the Augusta MMSA AA is rated Needs to Improve.

Based on a FS review, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Augusta MMSA AA is poor.

Qualified Investments										
Assessment Area	Prior Period*		Current Period		Total				Unfunded Commitments**	
	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Augusta MMSA	16	$1,190	85	$3,842	101	100.0	$5,032	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

The institution has a poor level of qualified CD investments and grants, but not in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 2.4 percent of tier 1 capital allocated to the AA.

The institution exhibits adequate responsiveness to credit and community economic development needs identified in the AA, including affordable housing, community services, and revitalization/stabilization for LMI individuals and geographies. Over 86 percent of the dollar volume of the bank's current and prior period investment focused on affordable housing, which is a primary credit need in the AA. Additionally, the bank provided 74 grants totaling $862,000 to a variety of organizations that primarily support affordable housing and community services.

The institution occasionally uses innovative and/or complex investments to support CD initiatives. CD Investments involved a complex LIHTC investment where the bank acted in a leadership role with participations from federal, state, local housing agencies, and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In December 2014, WFBNA invested $37.5 million in a LIHTC fund for affordable housing development in South Carolina, of which $1.6 million directly benefited the AA by providing 24 affordable housing units restricted to tenants earning no more than 60 percent of the area MFI. This activity is responsive to the identified need for affordable housing.

- During the evaluation period, WFBNA provided four grants totaling $1.2 million as a part of the Small Business DCC program benefiting small businesses in the broader statewide of Georgia and South Carolina including the Augusta MMSA AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.
- During the evaluation timeframe, WFBNA provided three grants totaling $265,000 to three local housing organizations as a part of the PMP for affordable housing in the Augusta MMSA AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

SERVICE TEST

The institution's performance under the Service Test in the Augusta MMSA AA is rated Low Satisfactory.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Augusta MMSA AA is adequate.

Retail Banking Services

Service delivery systems are accessible to geographies and individuals of different income levels in the institution's AA.

Distribution of Branch Delivery System											
Assessment Area	Deposits	Branches						Population			
	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%)				% of Population within Each Geography*			
				Low	Mod	Mid	Upp	Low	Mod	Mid	Upp
Augusta MMSA	100.0	17	100.0	0.0	29.4	23.5	47.1	6.6	27.9	37.8	27.7

* May not add up to 100 percent due to geographies with unknown tract income level and rounding

Distribution of Branch Openings/Closings						
Assessment Area	# of Branch Openings	# of Branch Closings	Net change in Location of Branches (+ or -)			
			Low	Mod	Mid	Upp
Augusta MMSA	0	4	0	0	-2	-2

As of December 31, 2018, WFBNA operates 17 branches and 48 ATMs in the Augusta MMSA AA. All branches are full-service locations. The institution's branches include no branches in low-income geographies and five branches in moderate-income geographies. The branch distribution in low-income geographies is significantly below the percentage of the population in low-income geographies and the branch distribution in moderate-income geographies exceeds the percentage of the population in the AA.

When considering an additional three branches within close proximity to LMI geographies, the bank's distribution is near to demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed two branches in middle-income and two branches in upper-income geographies since the last evaluation. These branch closures did not negatively impact the distribution of branches relative to the population residing in LMI geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Thursday from 9:00 am to 5:00 pm and 9:00 am to 6:00 pm on Friday. Ten of 17 branches are also open on Saturdays from 9:00 to noon. All WFBNA services are available at all branches and all ADS discussed bank-wide are available in this AA.

Community Development Services

The institution provides an adequate level of CD services.

The level of CD services in the Augusta MMSA AA is adequate. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 110 CD service activities to 42 organizations since the last evaluation, logging a total of 263 qualified hours within this AA. All of the bank's assistance were to organizations that provide community services to LMI individuals and families. The following are examples of CD services provided in this AA:

- In April 2013, a WFBNA team member provided financial education at a school where, according to the National Center for Education Statistics (NCES), the free lunch program participation rate is 86.9 percent.
- A WFBNA team member served as a board member of a nonprofit organization that provides emergency shelter, support group counseling, referral services, outreach services, budgeting skills, and legal advocacy to victims of domestic violence in the east/central Georgia counties. According to the organization's Executive Director, over 82 percent of its clients are LMI individuals as they earn less than 80 percent of the area MFI.

Multistate Metropolitan Statistical Area Rating

Charlotte-Concord, NC-SC CSA (Charlotte MMSA AA)

CRA rating for the Charlotte MMSA AA[2]: Outstanding
The Lending Test is rated: High Satisfactory
The Investment Test is rated: Outstanding
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Excellent lending activity;
- Adequate distribution of loans by borrower profile;
- Adequate geographic distribution of loans;
- WFBNA is a leader in providing CD loans, which has a significant positive impact on the Lending Test;
- WFBNA's use of flexible products has a positive impact on the Lending Test;
- Excellent level of CD investments that are responsive to AA needs;
- Retail delivery systems are readily accessible to all portions of the AA; and
- WFBNA is a leader in providing CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in Charlotte MMSA AA

WFBNA delineated three AAs within the Charlotte-Concord, NC-SC CSA. Refer to Appendix A for a complete description of the AA. These areas were combined, analyzed, and presented at the CSA level with an AA name of Charlotte MMSA. WFBNA has $31.8 billion of deposits; however, a majority of the deposits are non-retail branch deposits. The non-retail branch deposits do not reflect traditional retail customer relationships, rather they are wholesale funds. These deposits do not reflect where any of WFBNA's customers are located, where they work, or where they conduct business. The adjusted deposits are $9.9 billion of retail deposits in the AA representing 0.8 percent of adjusted deposits. The Charlotte MMSA AA represents the 18th largest rated area in terms of deposits. In the Charlotte MMSA AA, WFBNA ranked second out of 40 depository institutions with 14.7 percent market share. The top bank within the MMSA in terms of deposits is Bank of America with 73.9 percent deposit market share. WFBNA operates 88 branches and 277 ATMs within the Charlotte MMSA AA, representing 1.6 percent of the bank's branches and 2.0 percent of the bank's ATMs. In the Charlotte MMSA, the bank originated and purchased $23.0 billion in loans, or 1.3 percent of total bank loan originations and purchases during the evaluation period. The bank's primary loan products in the Charlotte MMSA AA is home mortgage loans and small business loans.

Demographic Data

The following table provides a summary of the demographics that include housing and business information for the Charlotte MMSA AA. Table A shows that the volume of OOUs is very small in the

[2] This rating reflects performance within the multistate metropolitan statistical area. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

low-income tracts and nearly 39 percent of families in the AA are LMI. The area's median housing value in the Charlotte MMSA AA is 2.8 times the MSA median income but 3.6 times moderate- and 5.7 times low-income, indicating a limited proportion of OOUs are affordable to LMI residents. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Due to rounding, totals may not equal 100.0
(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

According to the August 2018 Moody's Analytics report, Charlotte's economic expansion is strong and steady. Healthcare, retail trade, and the public sector are providing the biggest boost to payrolls, while builders are finding it more difficult to hire. High wage jobs already account for an outsize share of payrolls in the Charlotte MMSA and the trend persists as new high paying jobs are being added at a faster clip than their mid- and low-wage counterparts. Strong demographics and rising wages are propelling housing demand, causing prices to appreciate at their fastest rate in several years. The area's economic drivers are healthcare, retail trade, and the public sector. Robust population gains and quality job growth will add fuel to an already-hot housing market as builders struggle to keep up.

Per Moody's, professional services and construction, along with other consumer-driven industries, will ensure job gains. Finance and business/professional services will remain vital to the economic success despite the recent slowdown in growth. Major area employers include Atrium Health, Wells Fargo, Bank of America, and Wal-Mart Stores. According to the U.S. BLS, the MSA unemployment rate as of August 2018 was 3.8 percent, down considerably from 9.3 percent at the beginning of the evaluation period. The MSA unemployment rate was slightly higher than the State of South Carolina at 3.7 percent and slightly lower than the State of North Carolina at 4.0 percent.

Community Contact

The analysis takes into consideration comments provided by two community contacts that serve the bank's Charlotte MMSA AA. One community contact is a community-based development agency and one is a nonprofit affordable housing agency.

The affordable housing agency contact serves various parts of the AA, but mainly the city of Charlotte and Mecklenburg County. The contact indicated that affordable housing is a significant need in the AA. According to the community contact, the Charlotte area has been growing rapidly for the past few years, driven mostly by the banking industry as well as a strong energy base (Duke Energy), government, and universities. The economy is strong for those at the high end of the income range ($75,000 and up), driving the increase in high end restaurants, shopping, luxury housing, etc. The population is approaching 1 million in the city and 2 million in the region. There is a strong millennial population and creative class which continues to draw people to the area. Many people come to the area without jobs, attracted by the lower cost of living than in other parts of the country and the draw of jobs in the banking industry.

The community contact indicates that the largest struggle in the Charlotte area has been the challenge of upward mobility. The area has been experiencing strong growth in the economy and in the luxury housing market but jobs and affordable housing for LMI remain a challenge. More and more of the lower rent housing keeps getting torn down and replaced with luxury projects, creating greater disparity. Affordable housing is becoming scarcer and more expensive, especially due to rising construction costs, rising interest rates, rising land costs, and the elimination of local tax credits. Average rents have increased from $800 a month to $1,050. Transportation remains an issue, although that is changing with the addition of a new light rail to the area, as well as Uber, which fills the gaps.

The community-based development contact serves the Dorchester county AA in South Carolina, including Summerville, Ridgeville, St. George, Reevesville, Harleysville, and North Charleston. The contact indicates that Dorchester County is growing at a 5 percent rate and the county population has doubled in the last 15 years. No major employers have left the area in the most recent years and in 2016, there were 500 new manufacturing jobs added and $275 million in investments made in the area. In 2015, there were 600 new manufacturing jobs added with $20 million in investments made in the area.

According to the contact, the main opportunity for credit related projects is with speculative financing for buildings 10,000 sq./ft. and up. The tri-county area has a lack of financing available for these types of speculative industrial and manufacturing buildings. However, there have been new commercial developments in the county as well as many new homes being built in the Southside and Summers Corner area. Additionally, the Oakbrook area, which was an older part of town, is in the process of being rehabilitated.

The bank conducted research in the AA and identified community needs for affordable housing for low-income families, financial education for the unbanked and underbanked, services to homeless veterans and families, and workforce development/job placement.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Charlotte MMSA_AA. Opportunity exists to originate these types of loans throughout the

AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals. The AA also has CD needs including affordable housing and economic development, including job training and financial literacy.

Scope of Evaluation in Charlotte MMSA AA

The rating for the Charlotte MMSA AA is based on a FS evaluation of the bank's performance in the Charlotte-Concord, NC-SC CSA. A limited portion of the bank's overall lending, investments, and services were conducted in the Charlotte MMSA AA; therefore, the performance in the AA received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN CHARLOTTE MMSA AA

LENDING TEST

The bank's performance under the Lending Test in the Charlotte MMSA AA is rated High Satisfactory.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Charlotte MMSA AA is good.

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to the credit needs in the AA taking into account the number and dollar amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Charlotte MMSA	92,965	36,814	389	84	130,252

Dollar Volume of Loans (000's)					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Charlotte MMSA	$20,884,803	$2,128,598	$15,631	$254,432	$23,283,464

WFBNA ranked second in deposits with 14.7 percent market share in the AA including non-retail deposits. In overall HMDA lending, WFBNA ranked first with 10.6 percent market share. There is strong competition as reflected by the 684 lenders and 40 depository institutions in the AA. The number two lender in the market was Movement Mortgage with a 6.3 percent market share.

In small loans to businesses, WFBNA ranked third with a market share of 9.8 percent. The top two lenders were American Express with a market share of 17.2 percent and Bank of America with a market share of 10.9 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits adequate geographic distribution of loans in its AA.

Home Mortgage Loans

Refer to Table O in the “MMSA” section of appendix D for the facts and data used to evaluate the geographic distribution of the bank’s home mortgage loan originations and purchases. The bank’s overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- The bank’s performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in LMI geographies is below the aggregate distribution of loans in those geographies.
- The proportion of loans in LMI geographies is well below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the “MMSA” section of appendix D for the facts and data used to evaluate the geographic distribution of the bank’s originations and purchases of small loans to businesses. The bank’s overall geographic distribution of small loans to businesses for this evaluation is excellent.

- For 2012-2016, the proportion of the bank’s small business loans in low-income geographies exceeds both the aggregate distribution of loans and the proportion of businesses located in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is below the proportion of businesses located in those geographies.
- The bank’s small business lending in 2017-2018 is slightly below the performance in 2012-2016.

Distribution of Loans by Income Level of the Borrower

The bank exhibits an adequate distribution of loans among individuals of different income levels and businesses of different sizes.

Home Mortgage Loans

Refer to Table P in the “MMSA” section of appendix D for the facts and data used to evaluate the borrower distribution of the institution’s home mortgage loan originations and purchases. The bank’s overall borrower distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- The Charlotte MMSA AA has homeownership affordability hurdles especially for LMI borrowers. As noted above, the area’s median housing value is 5.7 times the income of low-income borrowers and 3.6 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI individuals. Despite the affordability challenges, the bank's overall home mortgage lending to LMI borrowers in 2012-2016 substantially meets the aggregate distribution of loans to LMI borrowers.

- The bank's performance for lending to low-income borrowers is significantly below the proportion of families and lending to moderate-income borrowers is below the proportion of families.
- The bank's home mortgage lending in 2017-2018 is significantly below the performance in 2012-2016 and was a factor in the downgrade in the overall rating from good to adequate.

Small Loans to Businesses

Refer to Table R in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's originations and purchases of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Community Development Lending

The institution is a leader in making CD loans, when considering the significant level of non-retail branch deposits.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The level of CD lending in the Charlotte MMSA AA is excellent. WFBNA made 84 CD loans in its AA for a total of $254.4 million, which represents 22.9 percent of adjusted tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The majority (88.9 percent) of these loans (47 loans totaling $226.3 million) were for the primary purpose of affordable housing, which is a critical CD need in the bank's AA. Additionally, the bank extended 34 loans totaling $16.8 million for the primary purpose of community services, two loans totaling $2 million for the primary purpose of economic development, and one loan totaling $9.2 million for revitalization and stabilization of the AA.

Examples of CD loans in the AA include:

- In March 2014, WFBNA renewed a $3 million working capital line of credit to a nonprofit organization located in Charlotte, NC with a primary mission of rescuing women and children from abuse. In 1945, the organization transitioned to serving children with emotional and behavioral issues. They serve approximately 7,000 children annually between the ages of 5-18 with, or at risk for, serious emotional disturbances. According to the organization's VP of

Finance, it is estimated that 85 percent of the clients they serve are considered to be LMI individuals as they earn less than 80 percent of the area MFI.

- In March 2015, WFBNA provided a $41.8 million loan for the acquisition of ten LIHTC housing developments. The loan amount reported of $1.7 million is reflective of the proportional share that is associated with this development. This LIHTC development is located in a moderate-income census tract in Charlotte, North Carolina with 98 percent of the units restricted to tenants earning 60 percent of the area MFI.
- In September 2018, WFBNA refinanced a $33.8 million loan for an affordable housing development located in a moderate-income census tract in Charlotte. The development consists of 188 one-bedroom units and 268 two-bedroom units with 96.1 percent of the actual rent rates below the 2018 Fair Market Rent for the area and 99.4 percent of the units affordable to tenants earning between 34 and 75 percent of the 2018 area MFI of $71,300.

Product Innovation and Flexibility

The institution makes extensive use of innovative and/or flexible lending programs in order to serve AA credit needs. The bank held NeighborhoodLIFT events in the Charlotte MMSA AA in October 2013 and November 2018, with more than 500 potential homebuyers attending the events. Of the 500 in attendance, WFBNA originated 235 mortgage loans totaling $29 million. Under the *your*FirstMortgage loan program, the bank has funded 264 loans totaling $36.6 million to LMI homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding these programs.

INVESTMENT TEST

The bank's performance under the Investment Test in the Charlotte MMSA AA is rated Outstanding.

Based on a FS review, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Charlotte MMSA AA is excellent.

Qualified Investments										
Assessment Area	Prior Period*		Current Period		Total				Unfunded Commitments **	
	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Charlotte MMSA	28	$24,768	745	$91,667	773	100.0	$116,435	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 10.5 percent of adjusted tier 1 capital allocated to the AA.

The institution exhibits excellent responsiveness to credit and community economic development needs identified in the AA, including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 83 percent of the dollar volume of the bank's current and prior period investment focused on affordable housing, which is a primary credit need in the AA. Additionally, the bank provided 650 grants totaling $35.5 million to a variety of organizations that primarily support affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies.

The institution makes significant uses innovative and/or complex investments to support CD initiatives. CD Investments involved many complex LIHTC projects where the bank acted in a leadership role with participations from federal, state, local housing agencies, and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In November 2016, WFBNA provided a $9.2 million LIHTC investment for the construction of an 81-unit apartment complex located in Charlotte, North Carolina, with 100 percent of the units restricted to tenants earning between 30 and 60 percent of the area MFI. All of the units have rental assistance through HUD’s Rental Assistance Demonstration (RAD) program. HUD’s RAD program is HUD’s flagship program for the recapitalization of the public housing. WFBNA demonstrated multi-faceted support by providing both the construction loan ($4.5 million) and equity investment to support this affordable housing development. WFBNA demonstrates active involvement with this organization as evidenced by its long-term relationship that dates back to 2009. This activity is highly complex because it involves HUD's RAD program and additional financing from the City of Charlotte.
- In October 2013, WFBNA provided a $5.5 million grant to a housing partnership organization as part of the NeighborhoodLIFT Down Payment Assistance program. This organization promotes reinvestment in urban, suburban, and rural communities by local financial institutions working cooperatively with residents and local government. It provides funds to 235 organizations, monitors their progress, and provides financial support, technical assistance, and training for community-based revitalization efforts. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.
- During the evaluation period, WFBNA provided two grants totaling $265,000 to two housing organizations as a part of the PMP for affordable housing in the Charlotte MMSA AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

SERVICE TEST

The institution’s performance under the Service Test in the Charlotte MMSA AA is rated Outstanding.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the service test, the bank’s performance in the Charlotte MMSA AA is excellent.

Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the institution’s AA.

Distribution of Branch Delivery System											
Assessment Area	Deposits	Branches						Population			
	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%) *				% of Population within Each Geography *			
				Low	Mod	Mid	Upp	Low	Mod	Mid	Upp
Charlotte MMSA	100.0	88	100.0	12.5	25.0	22.7	37.5	7.0	25.5	36.3	30.9

* May not add up to 100 percent due to geographies with unknown tract income level and rounding. Population in census tracts with income unknown represent 0.3 percent and the bank's branches in these tracts represent 2.3 percent of total branches in the AA.

Distribution of Branch Openings/Closings							
Assessment Area	# of Branch Openings	# of Branch Closings	Net change in Location of Branches (+ or -)				
			Low	Mod	Mid	Upper	NA
Charlotte MMSA	1	10	0	-4	-3	-2	0

As of December 31, 2018, WFBNA operates 88 branches and 277 ATMs in the Charlotte MMSA AA. Of these branches, 82 are full-service locations and six are limited-service branches. The institution's branches include 11 branches in low-income geographies and 22 branches in moderate-income geographies. The branch distribution in low-income geographies exceeds the percentage of the population in low-income geographies and branch distribution in moderate-income geographies approximates the percentage of the population in moderate-income geographies in the AA. When considering an additional ten branches within close proximity to LMI geographies, the bank's distribution further exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank opened one branch in this AA. The bank closed four branches in moderate-income, three branches in middle-income, and three branches in upper-income geographies. The closure of branches in moderate-income geographies was to consolidate with other branches nearby and did not negatively impact the distribution of branches relative to the population residing in those geographies. The bank still maintains 33 active branches or 38 percent within LMI geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. While there are slight variations in opening and closing times, most branches are open Monday through Friday from 9:00 am to 5:00 pm and 9:00 am to 6:00 pm on Friday. Thirty branches are also open on Saturdays from 9:00 am to 1:00 pm. More than half of the branches open on Saturdays are located in LMI geographies. All WFBNA services are available at all branches and all ADS discussed bank-wide are available in this AA.

Community Development Services

The institution is a leader in providing CD services.

The level of CD services in the Charlotte MMSA AA is excellent. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 616 CD service activities to 143 organizations since the last evaluation, logging a total of 2,176 qualified hours within this AA. A majority (92 percent) of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing (6 percent) and revitalization or stabilization (2 percent). The bank's financial assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- Four WFBNA team members provided 123 hours of tax preparation through the VITA program. Refer to the comments in the institution Innovative or Flexible Retail Service Programs section of this public evaluation for additional details regarding this program.
- Four WFBNA team member provided 36 hours of Board service to two local affiliates of a self-help affordable housing developer and one team member provided eight hours of home-buyer education. This organization provides homeownership opportunities by building homes for and with eligible LMI individuals.

Multistate Metropolitan Statistical Area Rating

Chicago-Naperville, IL-IN CSA (Chicago MMSA AA)

CRA rating for the Chicago MMSA AA[3]: Satisfactory
The Lending Test is rated: Outstanding
The Investment Test is rated: Outstanding
The Service Test is rated: Needs to Improve

The major factors that support this rating include:

- Excellent level of lending activity;
- Good geographic distribution of loans;
- Good borrower distribution of loans;
- WFBNA is a leader in providing CD loans, which has a significant positive impact on the Lending Test.
- WFBNA's use of flexible products has a positive impact on the Lending Test;
- Excellent level of CD investments that are responsive to AA needs;
- Retail delivery systems are unreasonably inaccessible to portions of the AA; and
- WFBNA is a leader in providing CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in Chicago MMSA AA

WFBNA delineated two AAs within the Chicago-Naperville, IL-IN-WI CSA. Refer to Appendix A for a complete description of the AA. These areas were combined, analyzed, and presented at the CSA level with an AA name of Chicago MMSA. WFBNA has $8.2 billion of deposits in the Chicago MMSA AA, representing 0.6 percent of adjusted deposits. The Chicago MMSA AA represents the 21st largest rated area by deposits. In the Chicago MMSA AA, WFBNA ranked 12th out of 175 depository institutions with 2.2 percent market share. The top three banks within the MMSA in terms of deposits were JPMorgan Chase Bank with 22.3 percent, BMO Harris Bank with 12.7 percent, and Bank of America with 8.9 percent. All three banks have substantially larger branching networks. WFBNA operates only 11 branches and 10 ATMs within the Chicago MMSA AA, representing 0.2 percent of the bank's branches and 0.08 percent of the bank's ATMs. In comparison to the low percentage of deposits and branching network, the bank originated and purchased approximately $51 billion in loans, or 2.7 percent of total bank loan originations and purchases during the evaluation period. The bank's primary loan products in the Chicago MMSA AA is home mortgage loans and small loans to businesses.

Demographic Data

The following table provides a summary of the demographics that include housing and business information for the Chicago MMSA AA. Table A indicates that the volume of OOUs is very small in low-income CTs and over 38 percent of families in the AA are LMI. The area's median housing value in the Chicago MMSA AA is 3.3 times the MSA median income but 4.2 times moderate-, and 6.7 times

[3] This rating reflects performance within the multistate metropolitan statistical area. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

low-income, indicating a limited proportion of OOUs are affordable to LMI individuals. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

Assessment Area: Chicago-Naperville IL-IN CSA (2016)

Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #

Economic Data

Chicago-Naperville-Elgin, IL-WI MSA

According to the May 2018 Moody's Analytics report, the Chicago economy is maturing but underperforming the nation and other major metro areas and divisions. Slower job growth partly reflects a tighter labor market with job creation ahead of labor force gains and wage growth accelerating. The City of Chicago welcomed a record 55 million visitors in 2017. Vacationers and business travelers are flocking to the area's hotels, restaurants, recreation facilities, and entertainment venues, and tourism offerings are expanding on multiple fronts. The city is popular with tourists and the downtown job and real estate markets are flourishing but beyond the city center, the secular decline of manufacturing and quality of life issues are eroding the population base.

The apartment building boom has spread beyond Chicago's urban core to the suburbs while the single-family market is more of a mixed story. Sales of existing homes are rising, but new residential construction is struggling to make headway. With soft demand for new homes, builders are putting up just one-quarter as many units as they were before the recession and construction growth is uneven.

The major economic drivers for the MMSA are professional and business services, education and health services, and government. The largest employers in the Chicago MMSA includes Advocate Health Care System, Northwestern Memorial Healthcare, and University of Chicago. According to the U.S BLS, the unemployment rate for the second quarter of 2018 was 4.6 percent and has decreased significantly from 9.3 percent at the beginning of the evaluation period. The unemployment rate in the AA was slightly higher than the overall States of Illinois (3.7 percent).

Michigan City-La Porte, IN MSA

According to the October 2018 Moody's Analytics report, Michigan City MSA is in a protracted slump and is still in a recession having never recovered from the Great Recession. Payroll employment is 2 percent below where it began the decade and is the lowest since the mid-1980. The oversize factory sector has been a key source of job creation in Michigan City. Together, primary metals, industrial machinery and food processing account for 60 percent of factory jobs. Local government also faces a tough road ahead as the loss of residents undermines tax revenue.

The outlook for the housing market is bleak. Sales of existing homes have increased but at the level below the national and state averages. The major economic drivers for the MSA are government, retail trade, and education and health services. The largest employers in the Michigan City MSA includes La Porte Regional Health Systems, Blue Chip Hotel & Casino, and St. Anthony Memorial Health Center. According to the U.S. BLS, the unemployment rate for the fourth quarter of 2018 was 4.2 percent and has decreased significantly from 9.8 percent at the beginning of the evaluation period. The unemployment rate in the AA was slightly higher than the overall State of Indiana (3.2 percent).

Community Contact

The analysis takes into consideration comments provided by 14 community contacts that serve the bank's Chicago MMSA AA. Five of the community contacts represent affordable housing and fair housing policies in LMI areas. Three of the community contacts represent Economic Development Corporations in the AA. One community contact is a non-profit Community Development Financial Institution (CDFI). The remaining five community contacts provide a vast array of community development services targeted to LMI people and communities in the AA.

The long-standing source of living wage employment in the six county Chicago region, especially for people without college degrees and in some cases, without high school diplomas, was once dominated by manufacturing industries with several located in south suburban Cook County and in the City of Chicago. These types of industries have largely disappeared over the decades with few exceptions. Declining manufacturing jobs combined with mortgage crisis and loss of affordable housing due to gentrification has led to the displacement of LMI populations.

The CDFI contact serves eight locations in the AA where it has offices; the city of Chicago, South Suburban Cook County, and Elgin, IL. The community contact stated that the lending arm of the organization holds a disproportionate share of the single-family mortgage market in LMI communities. The interviewee cited the example of the Roseland neighborhood on the south side of Chicago, where in the past year the non-profit originated 15 of 35 home mortgages made in the community. The community contact stated that a nonprofit CDFI should not have a 43 percent market share of mortgages in the AA and indicates that banks are not lending in the area.

One contact stated that based on nationwide CRA data, small business lending by conventional banks has declined in the AA since the 2008-09 recession, especially for loans of less than $100K.

All five housing agency contacts serving various part of the AA noted a significant need for affordable housing. Community contacts noted that affordable housing remains the most difficult challenge for LMI families in the AA. Many have pretty decent credit scores but their income does not qualify them for a mortgage. The cost of single-family housing is high and LMI people have difficulty saving for a down payment and closing costs. What housing they do qualify for is in such poor repair that the scope of repairs makes them unaffordable, yet the communities near concentrations of low-wage jobs have a good mix of homes. Home values in LMI areas in the city of Chicago and in the south suburbs continue to lag, and comparable sales can be difficult to find as many sales in LMI neighborhoods continue to be for cash. One affordable housing community contact noted real estate developers are purchasing multi-family buildings in the assessment area and increasing rents making housing unaffordable to LMI people that live there. This has had a negative effect on LMI families and communities resulting in the displacement of LMI people from their communities and some end up in homeless shelters. The contact went on to state that banks should not receive CRA credit for financing multifamily buildings in LMI communities. The lack of ready, conventional financing by banks for home purchases suppresses home sales and depresses real estate values.

Considering the information from the community contacts, bank management, and demographic and economic data, affordable housing and small business loans represent the primary credit needs for the Chicago MMSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

Scope of Evaluation in Chicago MMSA AA

The rating for the Chicago MMSA AA is based on a FS evaluation of the bank's performance in the Chicago-Naperville, IL-IN-WI CSA. A limited portion of the bank's overall lending, investments, and services were conducted in the Chicago CSA AA; therefore, the performance in the MMSA received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN CHICAGO MMSA AA

LENDING TEST

The bank's performance under the Lending Test in the Chicago MMSA AA is rated Outstanding.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Chicago MMSA AA is excellent.

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to the credit needs in the AA taking into account the number and dollar amount of home mortgage, small business, small farm, and

CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Chicago MMSA	207,607	21,740	227	47	229,621

Dollar Volume of Loans (000's)					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Chicago MMSA	$49,713,871	$1,518,459	$31,122	$145,604	$51,409,056

WFBNA ranked 12th in deposits with 2.2 percent market share in the AA. In overall HMDA lending, WFBNA ranked second with 7.8 percent market share. There is strong competition as reflected by the 870 lenders and 175 depository institutions in the AA. The top lender in this market was JPMorgan Chase Bank with a 10.2 percent market share.

In small loans to businesses, WFBNA ranked 15th with a market share of 1.2 percent. The top three lenders were JPMorgan Chase Bank with a market share of 20.0 percent, American Express with a market share of 18.1 percent, and Citibank with a market share of 9.3 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in its AA.

Home Mortgage Loans

Refer to Table O in the "MMSA" section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- For 2012-2016, the proportion of home mortgage loans in LMI geographies substantially meets the aggregate distribution of loans in those geographies.
- The proportion of loans in low-income geographies is well below the proportion of OOUs and in moderate-income geographies is below the proportion of OOUs in those geographies.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the "MMSA" section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- For 2012-2016, the proportion of the bank's small business loans in LMI geographies exceeds the aggregate distribution of loans in those geographies.
- The proportion of loans in low-income geographies is below the proportion of businesses and in moderate-income geographies is near to the proportion of businesses located in those geographies.
- Based on the bank's small business lending in 2017-2018, the bank's small business lending is slightly below the combined performance in 2012-2016.

Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and businesses of different sizes.

Home Mortgage Loans

Refer to Table P in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's home mortgage loan originations and purchases. The bank's overall borrower's distribution of home mortgage loan originations and purchases for this evaluation is good.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 6.7 times the income of low-income borrowers and 4.2 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI individuals. Despite the affordability challenges, the bank's overall home mortgage lending in 2012-2016 period to LMI borrowers exceeds the aggregate lending.
- The bank's overall home mortgage lending to low-income borrowers is significantly below the proportion of families and lending to moderate-income borrowers is below the proportion of families.
- Based on the bank's home mortgage lending in 2017-2018, the bank's home mortgage lending is slightly less than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's originations and purchases of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For 2012-2016 and 2017-2018 time periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is well below the percentage of small businesses located in the AA.

Community Development Lending

The institution is a leader in making CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The level of CD lending in the Chicago MMSA AA is excellent. WFBNA made 47 CD loans in its AA for a total of $145 million, which represents over 15.7 percent of tier 1 capital. CD lending performance has a significantly positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. Thirty-nine loans totaling $128 million (83 percent) were for the primary purpose of affordable housing. Affordable housing is a critical CD need in the bank's Chicago CSA AA. Additionally, the bank extended seven CD loans for $6.4 million for the primary purpose of economic development as well as one CD loan totaling $10 million for revitalization and stabilization of the AA.

Examples of CD loans in the AA include:

- In March 2015, WFBNA provided a $25 million line of credit to a Tax Credit Investment Fund of which, $1.5 million directly benefits the AA by financing an affordable housing development located in Chicago, IL. The loan proceeds were used to bridge the gap between the receipt of capital contributions from investors and the payment of equity investments to operating partnerships that own LIHTC projects.
- In August 2018, WFBNA provided a $28 million loan for an affordable housing development located in Chicago, Illinois. The development consists of 32 efficiency units, 110 one-bedroom units, and 10 two-bedroom units with 100 percent of the total units restricted to tenants earning no more than 60 percent of area MFI. Rent are supported by a 20-year Section 8 HAP Contract that will go into effect at loan closing.
- In June 2018, WFBNA provided a $10 million line of credit for an organization that helps communities thrive by creating opportunities for low-income communities and people with disabilities. The organization is a mission-driven lender, real estate consultant, and developer and is the largest nonprofit CDFI in the Midwest. Funds were used to provide financing for nonprofit facilities in Illinois, including the Chicago MMSA AA. According to its website, as of March 2016, the purpose of the line of credit reflects the Community Development purpose of revitalization/stabilization.
- During the evaluation period, WFBNA provided three grants totaling $775,000 as a part of the Small Business DCC program benefiting small businesses in the Chicago MMSA AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

Product Innovation and Flexibility

The institution makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. The bank held a NeighborhoodLIFT event in the Chicago MMSA AA in August 2018 with more than 690 potential homebuyers attending the event and more than 190 homebuyers utilizing the down payment assistance ($15,000) to purchase a home. Of the 190, WFBNA originated 78 home mortgage loans totaling $11 million. Under the *your*FirstMortgage loan program the bank has funded 266 loans totaling $35 million to LMI homebuyers that qualified under this program.

Refer to the comments in the institution Innovative or Flexible Lending Practices section of this performance evaluation for additional details regarding these programs.

INVESTMENT TEST

The bank's performance under the Investment Test in the Chicago MMSA AA is rated Outstanding.

Based on a FS review, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Chicago MMSA AA is excellent.

Qualified Investments										
Assessment Area	Prior Period*		Current Period		Total				Unfunded Commitments**	
	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Chicago MMSA	3	$14,856	376	$294,474	379	100.0	$309,330	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 33.4 percent of adjusted tier 1 capital allocated to the AA.

The institution exhibits excellent responsiveness to credit and community economic development needs identified in the AA, including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 98 percent of the dollar volume of the bank's current and prior period investment focused on affordable housing which is a primary credit need in the AA. Additionally, the bank provided 343 grants totaling $15.5 million to a variety of organizations that primarily support affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies.

The institution makes significant uses of innovative and/or complex investments to support CD initiatives. CD Investments involved many complex LIHTC projects where the bank often acted in a leadership role with participations from federal, state, local housing agencies, and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In September 2013, WFBNA invested $65.9 million in a National Community Investment corporation of which $15.9 million was allocated to a development located in Chicago, Illinois that provides 75 affordable housing units restricted to tenants earning no more than 60 percent of the area MFI. This corporation is a nonprofit Chicago-based affiliate of the Local Initiatives Support Corporation and one of the nation's leading LIHTC syndicators of LIHTC. Since inception, they have played an integral role in creating affordable housing options, revitalizing communities, and strengthening local economies.
- In April 2015, WFBNA provided an $83 million investment for the acquisition and rehabilitation of a 628-unit LIHTC affordable housing development. This development is located in a low-income census tract in the Old Town section of Chicago, Illinois, and is comprised of 10 five-

story buildings covering an entire city block. The property was originally built in 1929 and is listed on the National Register of Historic Places, which qualifies this project for Historic Tax Credits. The development is designated for families earning up to 80 percent of the area MFI.

- WFBNA provided several grants totaling $775,000 through the Small Business DCC Program which takes an innovative approach to address challenges diverse small business owners face when starting or growing their business. The grants were made as a part of the DCC program benefiting small businesses in Chicago. Refer to the comments in the institution Innovative or Flexible Lending Practices section of this public evaluation for additional details regarding this program.

SERVICE TEST

The institution's performance under the Service Test in the Chicago MMSA AA is rated Needs to Improve.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Chicago MMSA AA is poor.

Retail Banking Services

Service delivery systems are unreasonably inaccessible to portions of the AA, particularly LMI geographies and/or individuals. The tables below are shown as of December 31, 2018 to be consistent with other rated areas. On November 30, 2018, the bank sold its only branch in a low-income geography to Flagstar Bank. The branch sale was part of a larger transaction where Flagstar Bank purchased 52 branches in Illinois, Indiana, Michigan, Ohio, and Wisconsin. The branch was re-branded as Flagstar branches upon closing of the transaction. Flagstar intends to keep all branches and retain all employees. Since the branch was in operation during the majority of the evaluation time period the branch is evaluated and included in the analysis below.

Distribution of Branch Delivery System											
	Deposits	Branches						Population			
Assessment Area	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%)				% of Population within Each Geography *			
				Low	Mod	Mid	Upp	Low	Mod	Mid	Upp
Chicago MMSA	100.0	11	100.0	0.0	0.0	36.4	63.6	10.0	23.5	31.6	34.6

* May not add up to 100 percent due to geographies with unknown tract income level and rounding. Population in census tracts with income unknown represent 0.3 percent in the AA

Distribution of Branch Openings/Closings							
Assessment Area	# of Branch Openings	# of Branch Closings	Net change in Location of Branches (+ or -)				
			Low	Mod	Mid	Upper	NA
Chicago MMSA AA	2	1	0	0	0	+1	0

As of November 30, 2018, WFBNA operated 12 branches and 10 ATMs in the Chicago MMSA AA. Of these branches, nine are full-service locations and three are limited-service branches. There is one branch in a low-income geography and no branches in moderate-income geographies. The branch distribution in low-income geographies is near to the percentage of the population in low-income geographies and branch distribution in moderate-income geographies is significantly below the percentage of the population in the moderate-income geographies in the AA. The bank operates one branch within close proximity to LMI geographies; however, the bank's branch distribution did not improve when compared to demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank opened two branches in upper-income geographies. The bank subsequently closed one of the new branches in an upper-income geography.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. While there are slight variations in opening and closing times, all branches are open Monday through Friday from 9:00 am to 5:00 pm with one branch opening at 8:00 am and seven branches closing at 6:00 pm. Seven of 12 branches are also open on Saturdays from 9:00 to 2:00 pm and one branch open from 9:00 am to noon. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Community Development Services

The institution is a leader in providing CD services.

The level of CD services in the Chicago MMSA AA is excellent. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 118 CD service activities to 34 organizations since the last evaluation, logging a total of 482 qualified hours within this AA. A majority (86 percent) of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing (13 percent) and economic development (1 percent). The bank's financial assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- A WFBNA team member provided 18 hours of Board service to an affordable housing organization that preserves affordable homeownership by repairing the homes of low-income elderly and disabled individuals ensuring their health and safety.
- Ten WFBNA team members provided financial education at a school, where according to the NCES, the free- and reduced-lunch program participation rate is 99.0 percent.

Multistate Metropolitan Statistical Area Rating

Columbus-Auburn-Opelika, GA-AL CSA (Columbus MMSA AA)

CRA rating for the Columbus MMSA AA[4]: Satisfactory
The Lending Test is rated: High Satisfactory
The Investment Test is rated: Needs to Improve
The Service Test is rated: High Satisfactory

The major factors that support this rating include:

- Excellent level of lending activity;
- Adequate geographic distribution of loans;
- Good borrower distribution of loans;
- Adequate level of CD loans;
- WFBNA's use of flexible products has a neutral impact on the Lending Test;
- Poor level of CD investments;
- Retail delivery systems are readily accessible to all portions of the AA; and
- Adequate CD services.

Description of Institution's Operations in Columbus MMSA AA

WFBNA delineated two AAs within the Columbus-Auburn-Opelika, GA-AL CSA. Refer to Appendix A for a complete description of the AA. These areas were combined, analyzed, and presented at the CSA level with an AA name of Columbus MMSA. The Columbus MMSA AA represents the 41th largest rated area in terms of deposits. WFBNA has $1.1 billion of deposits in the Columbus MMSA AA representing 0.1 percent of adjusted deposits. WFBNA ranked second with 9.3 percent market share out of 30 depository institutions in the AA. The top bank within the MMSA in terms of deposits was Synovus Bank with 49.9 percent market share. WFBNA operates 14 branches and 37 ATMs within the Columbus MMSA AA, representing 0.3 percent of the bank's branches and 0.3 percent of the bank's ATMs. In comparison to the percentage of deposits and branching network, the bank originated and purchased $2.4 billion in loans, or 0.1 percent of total loans originations and purchases during the evaluation period. The bank's primary loan products in the Columbus MMSA AA are home mortgage and small loans to businesses.

Demographic Data

The following table provides a summary of the demographics that include housing and business information for the Columbus MMSA AA. The table shows that the volume of OOUs is very small in low-income tracts and over 40 percent of families in the AA are LMI. The area's median housing value in the Columbus MMSA AA is 2.3 times the MSA median income but 2.8 times moderate-, and 4.6 times low-income, indicating a limited proportion of OOUs are affordable to LMI residents. Median

[4] This rating reflects performance within the multistate metropolitan statistical area. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Economic Data

Auburn-Opelika, AL MSA

According to the December 2018 Moody's Analytics report, Auburn's economy is on firmer ground. The metro area remains at risk of a recession, but recent data is very promising. Job growth over the last three to six months is flying well above the Alabama and U.S. rates and year ago growth of 2 percent is the fourth highest in the state.

Auburn is a college town, home to Auburn University. Auburn University creates a significant international presence within the community with 1,639 international students enrolled and 1,100 international employees. Many other foreign nationals live and work in the community with an estimated two of three residents from other parts of the country. Auburn's economy centers on Auburn University and providing university-affiliated services. Auburn University employs 4,300 people, or roughly one-quarter of the Auburn's total workforce. In addition, the federal and state government employs 2,400 Auburn residents in positions generally connected with the university. Some 8,500 employees are in service sector jobs. Auburn's industrial base is built around mid-size, high-tech manufacturing and research firms. Auburn has one industrial park and four technology parks where main areas of industrial focus are manufacturing of small engines, automotive wheels, fuel cells, plastic injection technology, and vehicle armor.

According to the U.S. BLS, the unemployment rate for the fourth quarter of 2018 was 3.7 percent and has decreased significantly from 6.8 percent at the beginning of the evaluation period. The unemployment rate in the AA was slightly higher than the overall State of Alabama (3.5 percent) during the same period.

Columbus, GA-AL MSA

According to the April 2018 Moody's Analytics report, the Columbus economy is making strides and edging closer to the middle of the pack among its Georgia peers. Construction and manufacturing are spearheading the robust gains with near six percent year-over-year increase in payrolls in the first quarter along with lifting goods-producing employment to its highest level since 2008. The rapid pace of factory job additions will not last as durable manufacturers employ more than half of the Columbus' factory workers. Fierce competition and demand fatigue could limit sales growth and hiring along with import tariffs on aluminum and steel as inputs in production are another hurdle in the outlook. Outside of leisure/hospitality and education/healthcare, private services are detracting from job growth.

The outlook for the housing market is worse than average in coming years with lagging demographics. With a better job mix and tightening labor market, bigger pay gains help make up for modest job growth and driving faster increases in labor income, which helped lift single-family existing-home sales to a 12-year high. Longer term, persistent outmigration of the young and educated will limit gains due to better job and wage alternatives in neighboring Auburn, AL and Atlanta, GA. Household formation and home sales are expected to fall in 2019. Low inventory has been a hurdle nationally and the Columbus MMSA is no exception. Home sales have slowed but a lack of supply is preserving upward pressure on prices.

The major economic drivers for the MMSA are defense, manufacturing, and financial services. The largest employers in the Columbus MMSA includes the U.S. Fort Benning, TSYS, AFLAC Inc., and Kia Motors Manufacturing. Earlier cutbacks at top employer Fort Benning is easing up and job prospects improved. According to the U.S. BLS, the unemployment rate for the first quarter of 2018 was 5.3 percent and decreased significantly from 9.2 percent at the beginning of the evaluation period. The unemployment rate in the AA was slightly higher than both the overall States of Georgia (3.7 percent) and Alabama (3.5 percent) during the same period.

Community Contact

The analysis takes into consideration comments provided by a community contact for the City of Auburn (Auburn) that serves the bank's Columbus MMSA AA. The contact represents a municipal Community Development Office.

The City of Auburn established a Community Development Block Grant (CDBG) in 2000 and utilizes the funds for a broad range of capital projects to preserve and develop a viable community, principally to benefit LMI residents. The CDBG program is a flexible program that provides communities with resources from the U.S. Department of Housing and Urban Development (HUD) to address a wide range of unique community development needs. The Community Development Division of Economic Development administers the daily operation of the CDBG program, including the provision of decent, safe, and sanitary housing by funding housing rehabilitation, constructing new affordable housing units, reconstructing units, and demolishing abandoned and dilapidated structures in residential areas. Auburn also uses CDBG funds to revitalize LMI residential areas by improving infrastructure and public facilities with resources allocated to local non-profit organizations to subsidize supportive services.

Federal programs, such as CDBG and Urban Development Action Grants allow Auburn to bring substandard houses up to standard and build new houses for first-time homeowners. The Community Development Division's efforts aid LMI citizens through a variety of programs, such as the Affordable Housing Program and mortgage subsidies from the Revolving Loan Fund (RLF). Auburn also funded the Northern Auburn Housing Development, an affordable housing developer. According to the City of Auburn representative, the economy has been good for the last twenty years and noted limited opportunities for local banks to assist apart from some helping with homeowner education.

Considering the information from the community contact, bank management, and demographic and economic data, affordable housing is the primary credit need of the AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for low-income individuals. The AA also has CD needs including small business and economic development as well as job training and financial education particularly for LMI individuals.

Scope of Evaluation in Columbus MMSA AA

The rating for the Columbus MMSA AA is based on a FS evaluation of the bank’s performance in the combined Columbus-Auburn-Opelika, GA-AL CSA. The Columbus MMSA AA represents a limited portion of the bank’s overall lending, investments, and services; therefore, the performance in the MMSA received less weight in determining the bank’s overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN COLUMBUS MMSA AA

LENDING TEST

The bank’s performance under the Lending Test in the Columbus MMSA AA is rated High Satisfactory.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the lending test, the bank’s performance in the Columbus MMSA AA is good.

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to the credit needs in the AA taking into account the number and dollar amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Columbus MMSA	12,619	3,528	59	2	16,208

Dollar Volume of Loans (000's)					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Columbus MMSA	$2,225,639	$173,749	$2,530	$12,409	$2,414,327

WFBNA ranked second in deposits with 9.3 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 9.0 percent market share. There is strong competition as reflected by the 345 lenders and 30 depository institutions in the AA. In terms of mortgage lending market share, the number two lender in the market was Renasant Bank with 6.6 percent.

In small loans to businesses, WFBNA ranked fourth with a market share of 6.9 percent. The top three lenders were American Express with a market share of 20.1 percent, Synovus Bank with a market share of 8.3 percent, and Citibank with a market share of 7.0 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits an adequate geographic distribution of loans in its AA.

Home Mortgage Loans

Refer to Table O in the "MMSA" section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in low-income geographies is well below the aggregate distribution of loans and is significantly below the proportion of OOUs in those geographies.
- The proportion of loans in moderate-income geographies is below the aggregate distribution of loans and is well below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the "MMSA" section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is good.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for small business loans in low-income geographies is below both the aggregate performance and the proportion of businesses located in those geographies.
- The proportion of loans in moderate-income geographies exceeds the aggregate distribution of loans and is near to the proportion of businesses located in those geographies.

Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and businesses of different sizes.

Home Mortgage Loans

Refer to Table P in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- The Columbus MMSA AA has homeownership affordability hurdles especially for low-income borrowers. As noted above, the area's median housing value is 4.6 times the income of low-income borrowers indicating a limited proportion of OOUs are affordable to low-income individuals. Despite the affordability challenges, the bank's overall home mortgage lending to LMI borrowers in both periods, 2012-2016 and 2017-2018, substantially meets the aggregate distribution of loans.
- The bank's performance for lending to low-income borrowers is significantly below the proportion of families and lending to moderate-income borrowers is below the proportion of families.

Small Loans to Businesses

Refer to Table R in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's originations and purchases of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is excellent.

- For the 2012-2016 period, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is near to the percentage of small businesses located in the AA.
- The bank's small business lending in 2017-2018 is slightly lower than the combined performance in 2012-2016.

Community Development Lending

The institution has made an adequate level of CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The level of CD lending in the Columbus MMSA AA is adequate. WFBNA made two CD loans totaling $12.4 million in its AA, which represents 10.5 percent of allocated tier 1 capital. Although the bank only originated two loans during the six-year time period, the loans represented a significant amount of tier 1 capital. Both CD loans were for the primary purpose of affordable housing, which is a critical CD need in the bank's AA.

Examples of CD loans in the AA include:

- In October 2018, WFBNA provided a $12.3 million loan for an affordable LIHTC housing development located in Phoenix City, Alabama with 98.8 percent of the units restricted to tenants earning no more than 60 percent of the area MFI.
- In April 2015, WFBNA renewed a $79,000 term loan for a multifamily housing development located in a moderate-income census tract in Columbus, GA. The development consists of 12 two-bedroom units with 100 percent of the actual rent rates below the 2015 Fair Market Rent for the area and 100 percent of the units affordable to tenants earning between 44 and 60 percent of the 2015 area MFI of $58,200.

Product Innovation and Flexibility

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank funded 21 loans totaling $1.9 million to LMI homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.

INVESTMENT TEST

The bank's performance under the Investment Test in the Columbus MMSA AA is rated Needs to Improve.

Based on a FS review, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Columbus MMSA AA is poor.

Qualified Investments										
Assessment Area	Prior Period*		Current Period		Total				Unfunded Commitments**	
	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Columbus MMSA	5	$322	66	$810	71	100.0	$1,132	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

The institution has a poor level of qualified CD investments and grants, but not in a leadership, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents only 1.0 percent of tier 1 capital allocated to the AA.

The institution exhibits poor responsiveness to credit and community economic development needs identified in the AA. There are opportunities available within the AA for the bank to provide CD investments; however, the bank opted to make a majority of the CD investment in smaller grants within the AA. The bank provided 65 grants totaling $750,000 to a variety of organizations that primarily support affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Of the total investments, the bank allocated 65 percent of the dollar volume of the bank's current and prior period investment for affordable housing, which is an identified credit need in the AA.

The institution rarely uses innovative and/or complex investments to support CD initiatives.

Examples of CD investments in the AA include:

- In May 2015, WFBNA provided a $4.8 million investment in a government single-family mortgage backed security, of which $59,200 directly benefits LMI borrowers in the AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.
- In October 2017, WFBNA provided two grants totaling $160,000 to two local housing organizations as part of the PMP for affordable housing in the Columbus MMSA AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

SERVICE TEST

The institution's performance under the Service Test in the Columbus MMSA AA is rated High Satisfactory.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Columbus MMSA AA is good.

Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the institution's AA.

Distribution of Branch Delivery System											
	Deposits	Branches						Population			
Assessment Area	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%)				% of Population within Each Geography*			
				Low	Mod	Mid	Upp	Low	Mod	Mid	Upp
Columbus MMSA	100.0	14	100.0	14.3	28.6	42.9	14.3	6.1	25.1	42.9	24.5

* May not add up to 100 percent due to geographies with unknown tract income level and rounding. Population in census tracts with income unknown represent 1.4 percent the AA.

Distribution of Branch Openings/Closings						
Assessment Area	# of Branch Openings	# of Branch Closings*	Net change in Location of Branches (+ or -)			
			Low	Mod	Mid	Upper
Columbus MMSA	0	-4	0	-1	-1	-1

* Net change may not add up to total # of branch closings due to geographies with unknown tract income level.

As of December 31, 2018, WFBNA operates 14 branches and 37 ATMs in the Columbus MMSA AA. All of these branches are full-service locations. There are 6 branches in the LMI geographies. The branch distribution in LMI geographies exceeds the percentage of the population in LMI CTs in the AA. When considering an additional five branches within close proximity to LMI geographies, the bank's distribution further exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed four branches including one in each of the moderate-income, middle-income, and upper-income geographies. An additional branch was closed in a geography with unknown tract income level. The bank did not open any new branches. The branch closure in the moderate-income geography did not negatively impact the distribution of branches relative to the population residing in LMI geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 6:00 pm. Nine of the 14 branches are open on Saturdays from 9:00 am to 1:00 pm. All WFBNA services are available at all branches and all ADS discussed bank-wide are available in this AA.

Community Development Services

The institution provides an adequate level of CD services.

The level of CD services in the Columbus MMSA AA is good. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 136 CD service activities to 40 organizations since the last evaluation, logging a total of 304 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing and economic development. The following are examples of CD services provided in this AA:

- A WFBNA team member provided 4 hours of financial education at a community organization that provides affordable housing in the Columbus region by developing, revitalizing, and managing contemporary housing communities.
- WFBNA team members provided 11 hours of financial education at a private, non-profit community action agency whose purpose is to reduce the cause and conditions of poverty. This agency provides opportunities and assistance to residents within an eight-county area of the lower Chattahoochee Valley including Chattahoochee, Clay, Harris, Muscogee, Quitman, Randolph, Stewart, and Talbot.

Multistate Metropolitan Statistical Area Rating

Davenport-Moline-Rock Island, IA-IL MSA (Davenport MMSA AA)

CRA rating for the Davenport MMSA AA[5]: Satisfactory
The Lending Test is rated: High Satisfactory
The Investment Test is rated: Needs to Improve
The Service Test is rated: High Satisfactory

The major factors that support this rating include:

- Adequate lending activity;
- Good distribution of loans by borrower profile;
- Good geographic distribution of loans;
- Poor level of CD loans;
- WFBNA's use of flexible products has a neutral impact on the Lending Test;
- Poor level of CD investments;
- Retail delivery systems are readily accessible to all portions of the AA; and
- Adequate CD services.

Description of Institution's Operations in Davenport MMSA AA

WFBNA delineated one AA within the Davenport MMSA AA and includes the Davenport-Moline-Rock Island, IA-IL MSA. Refer to Appendix A for a complete description of the AA. WFBNA has $1.3 billion of retail deposits in the Davenport MMSA AA representing 0.1 percent of adjusted deposits. The Davenport MMSA AA represents the 40th largest rated area in terms of deposits. In the Davenport MMSA AA, WFBNA ranked second out of 35 institutions with 15.5 percent market share. The top bank within the MMSA in terms of deposits is Quad City Bank and Trust Company with a slightly higher 15.6 percent deposits. WFBNA operates 12 branches and 18 ATMs within the Davenport MMSA AA, representing less than 0.1 percent of the bank's branches and less than 0.1 percent of the bank's ATMs. In the Davenport MMSA, the bank originated and purchased $1.4 billion in loans, or 0.1 percent of total loan originations and purchases during the evaluation period. The bank's primary loan products in the Davenport MMSA is home mortgage loans and small business loans.

Demographic Data

The following table provides a summary of the demographics that include housing and business information for the Davenport MMSA AA. The table shows that the volume of OOUs is very small in low-income tracts and over 38 percent of families in the AA are LMI. The area's median housing value in the Davenport MMSA AA is twice the MSA median income but 2.5 times moderate-, and four times low-income, indicating a limited proportion of OOUs are affordable to low-income residents. Median

[5] This rating reflects performance within the multistate metropolitan statistical area. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Due to rounding, totals may not equal 100.0
(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

According to the June 2018 Moody's Analytics report, Davenport's economy has lost the momentum it had at the start of 2018. Payroll employment has moved sideways this year and job growth over the last six months trails the state and national averages. Wage pressures are modest, and the housing market is not faring much better. Existing single-family home sales are flat, which is keeping a lid on new residential construction. Major area employers include John Deere, Rock Island Arsenal, and Genesis Health Systems.

Davenport will remain one of Iowa's weakest economies in 2019. Manufacturing will hold its own, while military spending will safeguard against federal government job losses. Longer term, poor population trends and a lack of secondary drivers will ensure Davenport is a perennial underperformer.

According to the U.S. BLS, the MSA unemployment rate as of June 2018 was 3.8 percent, down from 6.9 percent at the beginning of the evaluation period. The MSA unemployment rate was lower than the State of Illinois at 4.7 percent and higher than the State of Iowa at 2.6 percent during the same period.

Community Contact

The analysis takes into consideration comments provided by three community contacts that serve the bank's Davenport MMSA AA. One organization focuses on economic development, one organization provides community service, and one organization promotes the coordination of and building the capacity of housing development throughout Scott County.

The organization providing community service serves the City of Rock Island. The contact indicated that the community's biggest needs are to promote growth of residential areas and redevelopment of the City of Rock Island. There is a lot of older housing stock that needs to be rehabilitated.

The housing service organization in Scott County indicated that people in the City of Rock Island earning 60 percent of the area MFI are having a hard time finding rental housing. The area needs to promote entrepreneurship, small business advice, and low interest loans for small businesses. The area had an increase in the number of immigrants and refugees seeking services but are not aware of the services available.

Considering the information from the community contacts, bank management, and demographic and economic data, affordable housing and small business loans represent a primary credit need for the Davenport MMSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs coupled with limited home affordability for LMI individuals. The AA also has CD needs including affordable housing and economic development.

Scope of Evaluation in Davenport MMSA AA

The rating for the Davenport MMSA AA is based on a FS evaluation of the bank's performance in the Davenport-Moline-Rock Island IA-IL MSA AA. A limited portion of the bank's overall lending, investments, and services were conducted in the Davenport MMSA AA; therefore, the performance in the Davenport MMSA AA received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN DAVENPORT MMSA AA

LENDING TEST

The bank's performance under the Lending Test in the Davenport MMSA AA is rated High Satisfactory.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Davenport MMSA AA is good.

Lending Activity

Based on the tables below, lending levels reflect adequate responsiveness to the credit needs in the AA taking into account the number and dollar amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Davenport MMSA	8,368	3,333	226	12	11,939

Dollar Volume of Loans (000's)					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Davenport MMSA	$1,161,728	$233,842	$33,539	$2,635	$1,431,744

WFBNA ranked second in deposits with 15.6 percent market share in the AA. In overall HMDA lending, WFBNA ranked third with 5.2 percent market share. Although WFBNA's HMDA market share is lower than its deposit market share, lending competition was significantly stronger, reflected by the 273 lenders, than competition for deposits, where there were only 35 depository institutions. The top two lenders in the market were IH Mississippi Valley Credit Union with 9.8 percent market share and Vibrant Credit Union with 6.8 percent market share.

In small loans to businesses, WFBNA ranked fifth with a market share of 8.0 percent. The top three lenders were US Bank with a market share of 17.3 percent, American Express with a market share of 12.3 percent, and Capital One with a market share of 10.0 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in its AA.

Home Mortgage Loans

Refer to Table O in the "MMSA" section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- For 2012-2016, the proportion of home mortgage loans in LMI geographies substantially meets the aggregate distribution of loans.
- The proportion of loans in low-income geographies is well below the proportion of OOUs and in moderate-income geographies is below the proportion of OOUs in those geographies.
- The bank's home mortgage lending in 2017-2018 is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the "MMSA" section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is good.

- For both 2012-2016 and 2017-2018 periods, the proportion of the bank’s small business loans in low-income geographies substantially meets the aggregate distribution of loans and is near to the proportion of businesses located in those geographies.
- The proportion of loans in moderate-income geographies is below both the aggregate distribution of loans and the proportion of businesses located in those geographies.

Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and businesses of different sizes in its AA.

Home Mortgage Loans

Refer to Table P in the “MMSA” section of appendix D for the facts and data used to evaluate the borrower distribution of the institution’s home mortgage loan originations and purchases. The bank’s overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- The Davenport MMSA AA has homeownership affordability hurdles especially for low-income borrowers. As noted above, the area’s median housing value is four times the income of low-income borrowers indicating a limited proportion of OOUs are affordable to low-income borrowers. Despite the affordability challenges, the bank’s overall home mortgage lending to LMI borrowers in both 2012-2016 and 2017-2018 periods substantially meets the aggregate distribution of loans.
- The bank’s performance in lending to low-income borrowers is well below the proportion of families and lending to moderate-income borrowers exceeds the proportion of families.

Small Loans to Businesses

Refer to Table R in the “MMSA” section of appendix D for the facts and data used to evaluate the borrower distribution of the institution’s originations and purchases of small loans to businesses. The distribution of the bank’s originations and purchases of small loans to businesses by revenue is good.

- For 2012-2016, the percentage of small loans to businesses originated or purchased exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.
- The bank’s small business lending in 2017-2018 exceeds the performance in 2012-2016.

Community Development Lending

The institution has made a poor level of CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution’s level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The level of CD lending in the Davenport MMSA AA is poor. WFBNA made 12 CD loans in its AA for a total of $2.6 million, which represents 1.8 percent of allocated tier 1 capital. CD lending performance has a neutral impact on the lending test rating. None of the CD loans addressed affordable housing, which is a critical lending need in the AA. All CD loans were for the purpose of community services to LMI individuals.

Examples of CD loans in the AA include:

- In February 2016, WFBNA provided a $650,000 working capital line of credit and renewed the line of credit in March 2017 for a nonprofit social service provider that provides adoption services, foster care placement and mediation, counseling services, domestic abuse advocacy, and employee assistance programs. According to the organization's Controller, 95 percent of clients are considered LMI individuals as they earn less than 80 percent of the 2016 area MFI.
- In May 2015, WFBNA renewed a $100,000 working capital line of credit for a non-profit organization that creates fun recreational and learning experiences for children and young adults, including those with disabilities. The Chief Financial Officer of the organization stated that 51 percent of their clients are considered to be LMI individuals as they earn less than $55,200 annually, which is 80 percent of the 2015 area MFI.

Product Innovation and Flexibility

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program, the bank has funded 40 loans totaling $3.7 million to LMI homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.

INVESTMENT TEST

The bank’s performance under the Investment Test in the Davenport MMSA AA is rated Needs to Improve.

Based on a FS review, including the data in the table below and consideration of performance context discussed in the investment test, the bank’s performance in the Davenport MMSA AA is poor.

Qualified Investments										
Assessment Area	Prior Period*		Current Period		Total				Unfunded Commitments **	
	#	$(000’s)	#	$(000’s)	#	% of Total #	$(000’s)	% of Total $	#	$(000’s)
Davenport MMSA	13	$3,526	53	$1,360	66	100.0	$4,886	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

The institution has a poor level of qualified CD investments and grants, but not in a leadership, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 3.4 percent of tier 1 capital allocated to the AA.

The institution exhibits adequate responsiveness to credit and community economic development needs identified in the AA. Of the total investments, the bank allocated virtually all of the dollar volume of the bank's current and prior period investment for affordable housing, which is a primary credit need in the AA. Additionally, the bank provided 46 grants totaling $476,000 to a variety of organizations that primarily support affordable housing, community services, and economic development to assist LMI individuals and geographies.

The institution rarely uses innovative and/or complex investments to support CD initiatives. CD investments consisted of government mortgage-backed securities and grants.

Examples of CD investments in the AA include:

- In September 2016, WFBNA purchased a $15.7 million government single-family mortgage backed security, of which $173,835 directly benefits the AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.
- During the exam timeframe, WFBNA provided two grants totaling $100,000 to two housing organizations as a part of the PMP for affordable housing in the Davenport MMSA AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

SERVICE TEST

The institution's performance under the Service Test in the Davenport MMSA AA is rated High Satisfactory.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Davenport MMSA AA is good.

Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the institution's AA.

Distribution of Branch Delivery System											
Assessment Area	Deposits	Branches						Population			
	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%)				% of Population within Each Geography			
				Low	Mod	Mid	Upp	Low	Mod	Mid	Upp
Davenport MMSA	100.0	12	100.0	8.3	16.7	75.0	0.0	2.3	22.4	56.4	18.9

As of December 31, 2018, WFBNA operates 12 branches and 18 ATMs in the Davenport MMSA AA. All of these branches are full-service locations. There is one branch in a low-income geography and two branches in moderate-income geographies. The branch distribution in low-income geographies exceeds the percentage of the population in low-income geographies and branch distribution in moderate-income geographies is near to the percentage of the population in moderate-income geographies in the AA. When considering an additional two branches within close proximity to LMI geographies, the bank's distribution exceeds demographics.

Distribution of Branch Openings/Closings						
Assessment Area	# of Branch Openings	# of Branch Closings	Net change in Location of Branches (+ or -)			
			Low	Mod	Mid	Upp
Davenport MMSA	0	4	-1	0	-2	-1

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed four branches since the last evaluation. Of these branches, one was located in a low-income CT. This branch closure did not negatively impact the distribution of branches relative to the population residing in LMI geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 5:00 pm. Of the total branches, 11 are also open on Saturdays from 9:00 am to 12:00 pm. All WFBNA services are available at all branches and all ADS discussed bank-wide are available in this AA.

Community Development Services

The institution provides an adequate level of CD services.

The level of CD services in the Davenport MMSA AA is adequate. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 170 CD service activities to 27 organizations since the last evaluation, logging a total of 238 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing and economic development. The following are examples of CD services provided in this AA:

- A WFBNA team member provided 12 hours of Board service to a nonprofit housing organization that works in partnership with people in need to build decent and affordable housing.
- A WFBNA team member provided 24 hours of Board service to a local community organization that works to preserve affordable homeownership by repairing the homes of low-income elderly and disabled individuals.

Multistate Metropolitan Statistical Area Rating

Fargo-Wahpeton, ND-MN CSA (Fargo MMSA AA)

CRA rating for the Fargo MMSA AA[6]: Outstanding
The Lending Test is rated: Outstanding
The Investment Test is rated: Outstanding
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Good lending activity;
- Good geographic distribution of loans;
- Excellent borrower distribution of loans;
- WFBNA is a leader in providing CD loans, which has a significant positive impact on the Lending Test;
- WFBNA's use of flexible products has a neutral impact on the Lending Test;
- Excellent level of CD investments that are responsive to AA needs;
- Retail delivery systems are readily accessible to all portions of the AA; and
- Good level of CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in Fargo MMSA AA

WFBNA delineated two AAs within the Fargo-Wahpeton, ND-MN CSA. Refer to Appendix A for a complete description of the AA. These areas were combined, analyzed, and presented at the CSA level with an AA name of Fargo MMSA. WFBNA has $858 million of retail deposits in the Fargo MMSA AA representing 0.1 percent of adjusted deposits. The Fargo MMSA AA represents the 44th largest rated area in terms of deposits. In the Fargo MMSA AA, WFBNA ranked second out of 31 depository institutions with 10.5 percent market share. The top bank within the MMSA in terms of deposits is Bell Bank with 35.8 percent deposits. WFBNA operates seven branches and 11 ATMs within the Fargo MMSA AA, representing less than 0.1 percent of the bank's branches and less than 0.1 percent of the bank's ATMs. In the Fargo MMSA AA, the bank originated and purchased $1.8 billion in loans, or 0.1 percent of total bank loan originations and purchases during the evaluation period. The bank's primary loan products in the Fargo MMSA AA is home mortgage loans and small business loans.

Demographic Data

The following table provides a summary of the demographics that include housing and business information for the Fargo MMSA AA. Table A shows that the volume of tracts, population, OOUs, and farms is very small in the low-income tracts and close to 36 percent of families in the AA are LMI. The area's median housing value in the Fargo MMSA AA is twice the MSA median income, but 2.7 times

[6] This rating reflects performance within the multistate metropolitan statistical area. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

moderate-, and four times low-income, indicating a limited proportion of OOUs are affordable to low-income residents.

Source: 2010 U.S. Census and 2016 D&B Data
Due to rounding, totals may not equal 100.0
(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

According to the June 2018 Moody's Analytics report, Fargo economy's strength is its relatively low business costs and high housing affordability. The MSA has an exceptionally tight labor market, which will act as a limiter on the pace of job growth over the next few quarters of 2018. The increased competition for workers between Fargo and the nearby competitor, Minneapolis, will remain most evident in some of Fargo's most dynamic industries. Major area employers include Sanford Health, North Dakota State University, and Essentia Health.

Despite its industrial structure being more diverse than the rest of the state, Fargo is still heavily dependent on farmers and the agricultural industry in general. Though most of the statewide headlines have focused on the collapse of oil prices in recent years, North Dakota's farmers have been hurting as well, to the detriment of the MSA.

The housing market in the Fargo area is currently balanced. Total home sales decreased nearly 6 percent during the past year but remain higher than the prerecession peak in 2007. According to the U.S. BLS, Fargo's unemployment rate as of June 2018 was 2.6 percent, down from 3.5 percent at the beginning of the evaluation period. The MSA unemployment rate was lower than both the State of Minnesota and the State of North Dakota at 2.9 percent during the same period.

Community Contact

The analysis takes into consideration comments provided by a community contact serving the bank's Fargo MMSA AA in conjunction with this evaluation. The organization is with the city's planning & community development department that operates the community development programs. These programs include housing rehabilitation grants, a neighborhood rehabilitation program, a micro lending initiative to new Americans to start businesses, and a public art commission.

In the past five years, Fargo has become a resettlement community for refugees, which has been the biggest change in demographics. The biggest issue for low-income individuals in Fargo is homelessness. In the past ten years, the City of Fargo has created new homeless shelters and transitional housing, but homelessness still remains an issue in Fargo. Another issue is newcomer's trouble in accessing credit because they have poor or no credit history. This organization created the micro lending initiative to assist newcomers to find access to loans to start small businesses.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Fargo MMSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals. The AA also has CD needs for community services to assist with the homelessness.

Scope of Evaluation in Fargo MMSA AA

The rating for the Fargo MMSA AA is based on a FS evaluation of the bank's performance in the Fargo-Wahpeton, ND-MN CSA AA. A limited portion of the bank's overall lending, investments, and services were conducted in the Fargo MMSA AA; therefore, the performance in the Fargo MMSA AA received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN FARGO MMSA AA

LENDING TEST

The bank's performance under the Lending Test in the Fargo MMSA AA is rated Outstanding.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Fargo MMSA AA is excellent.

Lending Activity

Based on the tables below, lending levels reflect good responsiveness to the credit needs in the AA taking into account the number and dollar amount of home mortgage, small business, small farm, and

CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Fargo MMSA	7,187	3,097	1,401	19	11,704

Dollar Volume of Loans (000's)					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Fargo MMSA	$1,219,814	$335,339	$227,480	$20,682	$1,803,315

WFBNA ranked second in deposits with 10.5 percent market share in the AA. In overall HMDA lending, WFBNA ranked fourth with 6.4 percent market share. There is strong competition as reflected by the 182 lenders and 31 depository institutions in the AA. The top three lenders in the market were Gate City Bank with 15.4 percent market share, Bell State Bank & Trust with 9.3 percent market share, and US Bancorp with 8.4 percent market share.

In small loans to businesses, WFBNA ranked sixth with a market share of 5.9 percent. The top three lenders were US Bank with a market share of 18.0 percent, Bell Bank with a market share of 16.3 percent, and American Express with a market share of 10.3 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits good geographic distribution of loans in its AA.

Home Mortgage Loans

Refer to Table O in the "MMSA" section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- For both 2012-2016 and 2017-2018 periods, the proportion of home mortgage loans in LMI geographies substantially meets the aggregate distribution of loans in those geographies.
- The proportion of loans in low-income geographies exceeds the proportion of OOUs and in moderate-income geographies is below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the "MMSA" section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is good.

- For 2012-2016, the proportion of the bank's small business loans in low-income geographies is below both the aggregate distribution of loans and the proportion of businesses located in those geographies.
- The proportion of loans in moderate-income geographies exceeds both the aggregate distribution of loans and the proportion of businesses located in those geographies.
- The bank's small business lending in 2017-2018 is stronger than the performance in 2012-2016.

Small Loans to Farms

Refer to Table S in the "MMSA" section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to farms for this evaluation is poor.

- For both 2012-2016 and 2017-2018 periods, the proportion of the bank's small farm loans in LMI geographies is significantly below both the aggregate distribution of loans and the proportion of farms located in those geographies.

Distribution of Loans by Income Level of the Borrower

The bank exhibits an excellent distribution of loans among individuals of different income levels and businesses of different sizes.

Home Mortgage Loans

Refer to Table P in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The Fargo MMSA AA has homeownership affordability hurdles especially for low-income borrowers. As noted above, the area's median housing value is four times the income of low-income borrowers indicating a limited proportion of OOUs are affordable to low-income borrowers. Despite the affordability challenges, the bank's overall home mortgage lending to LMI borrowers in both 2012-2016 and 2017-2018 periods exceeds the aggregate distribution of loans.
- The bank's performance to low-income borrowers is well below the proportion of families and lending to moderate-income borrowers exceeds the proportion of families.

Small Loans to Businesses

Refer to Table R in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's originations and purchases of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the percentage of small loans to businesses originated or purchased exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is well below the percentage of small businesses located in the AA.

Small Loans to Farms

Refer to Table T in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's originations and purchases of small loans to farms. The distribution of the bank's originations and purchases of small loans to farms by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the percentage of small loans to farms originated or purchased exceeds the aggregate small farm lending data for farms with revenues of $1 million or less and is well below the percentage of small farms located in the AA.

Community Development Lending

The institution is a leader in making CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The level of CD lending in the Fargo MMSA AA is excellent. WFBNA made 19 CD loans in its AA for a total of $20.7 million, which represents 21.5 percent of allocated tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The majority of these loans were for the primary purpose of affordable housing, which is a critical CD need in the bank's AA. The bank made 10 loans totaling $15.9 million (76.8 percent) for the purpose of affordable housing. Additionally, the bank extended nine CD loans totaling $4.8 million for the primary purpose of community services to assist LMI individuals.

Examples of CD loans in the AA include:

- In September 2016, WFBNA provided a $3.6 million construction loan for a 39-unit low income affordable housing development located in a middle-income census tract in Fargo, North Dakota. The development is comprised of 33 one-bedroom units (of which three are accessible units) and six two-bedroom units (with three being accessible). All of the units are restricted to seniors age 55 years and above with income at or below 60 percent of area MFI.
- In April 2015, WFBNA renewed a $600,000 working capital line of credit for a non-profit organization that provides rehabilitative services to individuals to achieve social re-integration. According to the organization's Administrative Coordinator, an estimated 98 percent of clients served are considered to be LMI as they earn less than $59,040 annually (80 percent of the 2013 area MFI).

Product Innovation and Flexibility

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program, the bank has funded 42 loans totaling $6.6 million to LMI homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.

INVESTMENT TEST

The bank's performance under the Investment Test in the Fargo MMSA AA is rated Outstanding.

Based on a FS review, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Fargo MMSA AA is excellent.

Qualified Investments										
Assessment Area	Prior Period*		Current Period		Total				Unfunded Commitments **	
	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Fargo MMSA	1	$52	51	$20,063	52	100.0	$20,115	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 20.9 percent of tier 1 capital allocated to the AA.

The institution exhibits good responsiveness to credit and community economic development needs identified in the AA, including affordable housing, community services, and economic development for LMI individuals and geographies. Over 98 percent of the dollar volume of the bank's current and prior period investment focused on affordable housing, which is a primary credit need in the AA. Additionally, the bank provided 47 grants totaling $619,100 to a variety of organizations that primarily support affordable housing, community services, and economic development to LMI individuals.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved many complex LIHTC projects where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers.

Examples of CD investments in the AA include:

- In September 2015, WFBNA invested $3.8 million in a 30-unit LIHTC affordable housing development located in Fargo, North Dakota. The development consists of 24 one-bedroom units and six two-bedroom units. Five units will be fully accessible for individuals with disabilities. All of the units are affordable to individuals earning between 30 and 60 percent of the area MFI.

- In September 2018, WFBNA provided a $150,000 grant to a nonprofit organization that coordinates volunteers to preserve affordable homeownership by repairing the homes of low-income elderly and disabled individuals, providing them with a safe and healthy residence. According to the organization's Executive Director, 100 percent of its clients are LMI individuals as they earn less than 80 percent of the area MFI.
- During the exam timeframe, WFBNA provided two grants totaling $250,000 to two housing organizations as a part of the PMP for affordable housing in the Fargo MMSA AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

SERVICE TEST

The institution's performance under the Service Test in the Fargo MMSA AA is rated Outstanding.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Fargo MMSA AA is excellent.

Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the institution's AA.

Distribution of Branch Delivery System											
Assessment Area	Deposits	Branches						Population			
	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%)				% of Population within Each Geography*			
				Low	Mod	Mid	Upp	Low	Mod	Mid	Upp
Fargo MMSA	100.0	7	100.0	0.0	42.9	42.9	14.2	0.0	20.4	47.3	30.9

* May not add up to 100 percent due to geographies with unknown tract income level and rounding. Population in census tracts with income unknown represent 2.4 percent in the AA.

Distribution of Branch Openings/Closings						
Assessment Area	# of Branch Openings	# of Branch Closings	Net change in Location of Branches (+ or -)			
			Low	Mod	Mid	Upp
Fargo MMSA	0	3	-1	0	-2	0

As of December 31, 2018, WFBNA operates 7 branches and 11 ATMs in the Fargo MMSA AA. All of the branches are full-service locations. There are no low-income geographies in the AA. The branch distribution in moderate-income geographies significantly exceeds the percentage of the population in moderate-income CTs in the AA.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed three branches since the last evaluation. One of the branches was located in a previously designated low-income CT; however, as of the changes to census tract income designations resulting from the 2015 ACS, there are no longer any low-income geographies in the AA. As such, this branch closure did not negatively impact the distribution of branches or populations residing in the low-income geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 5:00 or 6:00 pm. Four branches are open on Saturdays from 9:00 am to 12:00 or 1:00 pm. All WFBNA services are available at all branches and all ADS discussed bank-wide are available in this AA.

Community Development Services

The institution provides a significant level of CD services.

The level of CD services in the Fargo MMSA AA is good. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 56 CD service activities to 12 organizations since the last evaluation, logging a total of 443 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing and economic development. The following are examples of CD services provided in this AA:

- Several WFBNA team members provided over 300 hours of Board service to a community organization that provides strategic leadership in community economic development policies, programs, and projects within the City of Wahpeton and greater Wahpeton area.
- A WFBNA team member provided 40 hours of Board service to a community organization that is an affiliate of a global organization that utilizes community-led solutions to identify and resolve community concerns with a primary focus on education, financial stability, and health.

Multistate Metropolitan Statistical Area Rating

Multistate Metropolitan Statistical Area Rating

Grand Forks, ND-MN MSA (Grand Forks MMSA AA)

CRA rating for the Grand Forks MMSA AA[7]: Outstanding
The Lending Test is rated: Outstanding
The Investment Test is rated: Outstanding
The Service Test is rated: Low Satisfactory

The major factors that support this rating include:

- Excellent lending activity;
- Good geographic distribution of loans;
- Excellent borrower distribution of loans;
- Good level of CD loans, which has a positive impact on the Lending Test;
- WFBNA's use of flexible products has a neutral impact on the Lending Test;
- Excellent level of CD investments that are responsive to AA needs;
- Retail delivery systems are reasonably accessible to all portions of the AA; and
- Poor level of CD services.

Description of Institution's Operations in Grand Forks MMSA AA

WFBNA delineated one AA within the Grand Forks MMSA AA. Refer to Appendix A for a complete description of the AA. WFBNA has $119.8 million of retail deposits in the Grand Forks MMSA AA representing less than 0.1 percent of adjusted deposits. The Grand Forks MMSA AA represents the 52th largest rated area in terms of deposits. In the Grand Forks MMSA AA, WFBNA ranked eighth out of 20 institutions with 4.2 percent market share. The top three depository institutions within the MMSA in terms of deposits market shares were Alerus Financial with 21.8 percent, Bremer Bank with 21.6 percent, and US Bank with 8.9 percent. WFBNA operates two branches and four ATMs within the Grand Forks MMSA AA, representing less than 0.1 percent of the bank's branches and less than 0.1 percent of the bank's ATMs. In the Grand Forks MMSA, the bank originated and purchased $415.6 million in loans or less than 0.1 percent of total bank loan originations and purchases during the evaluation period. The bank's primary loan products in the Grand Forks MMSA are home mortgage loans and small business loans.

Demographic Data

The following table provides a summary of the demographics that include housing and business information for the Grand Forks MMSA AA. Table A shows that the volume of tracts and OOUs is very small in the low-income tracts and close to 38 percent of families in the AA are LMI. The area's

[7] This rating reflects performance within the multistate metropolitan statistical area. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

median housing value in the Fargo MMSA AA is twice the MSA median income, but 2.5 times moderate-, and four times low-income, indicating a limited proportion of OOUs are affordable to low-income individuals. Median rents and the significant percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

Assessment Area: Grand Forks ND-MN MSA (2016)

Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #

Due to rounding, totals may not equal 100.0
(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

According to the June 2018 Moody's Analytics report, Grand Forks' economy is dependent on the public sector and agriculture. The public sector includes the University of North Dakota and Grand Forks Air Force base, which is a major advantage during an economic downturn and helped Grand Forks outperform much of the state during the oil bust of the past few years.

Despite the stability afforded by the public sector, Grand Forks' economy is still set to have a lot of volatility in its employment numbers due to the impact of the trade war on its agriculture sector and its high concentration of personal service jobs in its private services sector. Outside of the public sector no single industry carries more sway over the economy than agriculture. Farm incomes have been severely depressed over the past several years because of falling crop prices and a trade impacting North Dakota farmers given their interconnectivity with markets in Canada and China. Major area employers include University of North Dakota, Altru Health System, and Grand Forks Air Force Base.

Average home sale prices in Grand Forks have been relatively flat during the past several years and the amount of available housing stock has increased. The According to the U.S. BLS, Grand Forks' unemployment rate as of June 2018 was 2.9 percent, down from 4.3 percent at the beginning of the evaluation period. The MSA unemployment rate was comparable to both the State of Minnesota and North Dakota at 2.9 percent.

Community Contact

The analysis takes into consideration comments provided by two community contacts that serve the bank's Grand Forks MMSA AA. One organization is with a housing finance agency that offers affordable home financing to LMI families and ensures the continued availability of suitable rental housing for households of modest means. The other organization provides permanently affordable home ownership opportunities to LMI persons in Grand Forks MMSA AA using community land trusts.

The population of Grand Forks is growing due to a number of factors. These factors include: 1) skilled workers that serve the oil fields in northwest ND have moved to Grand Forks because housing near the oil fields is very scarce, 2) the number of students at the University of North Dakota has increased by more than 20 percent in the last 10 years, from 13,000 in 2006 to 16,000 students today, which increases the demand for rental housing, and 3) the Grand Forks refugee population from Bhutan and Somalia is growing. Grand Forks faces a critical need for affordable housing due to its growing population, relatively stagnant income, increased housing cost including rental cost, and new construction of apartments and single-family homes has not kept up with the increase in population.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing represents a primary credit need for the Grand Forks MMSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

Scope of Evaluation in Grand Forks MMSA AA

The rating for the Grand Forks MMSA AA is based on a FS evaluation of the bank's performance in the Grand Forks ND-MN MSA. A limited portion of the bank's overall lending, investments, and services were conducted in the Grand Forks MMSA AA; therefore, the performance in the Grand Forks MMSA AA received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN GRAND FORKS MMSA AA

LENDING TEST

The bank's performance under the Lending Test in the Grand Forks MMSA AA is rated Outstanding.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Grand Forks MMSA AA is excellent.

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to the credit needs in the AA taking into account the number and dollar amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Grand Forks MMSA	2,188	513	54	1	2,756

Dollar Volume of Loans (000's)					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Grand Forks MMSA	$374,483	$35,588	$5,514	$5,317	$420,902

WFBNA ranked eighth in deposits with 4.2 percent market share in the AA. In overall HMDA lending, WFBNA ranked second with 9.1 percent market share. There is strong competition as reflected by the 134 lenders and 20 depository institutions in the AA. The top lender in the market was Gate City Bank with a 12.7 percent market share.

In small loans to businesses, WFBNA ranked ninth with a market share of 3.9 percent. The top two lenders were US Bank with a market share of 19.1 percent and Bremer Bank with a market share of 12.6 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits good geographic distribution of loans in its AA.

Home Mortgage Loans

Refer to Table O in the "MMSA" section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- For both 2012-2016 and 2017-2018 periods, the proportion of home mortgage loans in low-income geographies is significantly below both the aggregate distribution of loans and the proportion of OOUs in those geographies. However, less weight was given to WFBNA's performance in low-income geographies because of the very small proportion of the bank's tracts, loans, and OOUs in low-income geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is near to the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the "MMSA" section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is adequate.

- For both 2012-2016 and 2017-2018 periods, the proportion of the bank's small business loans in low-income geographies is significantly below both the aggregate distribution of loans and the proportion of businesses located in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is near to the proportion of businesses located in those geographies.

Distribution of Loans by Income Level of the Borrower

The bank exhibits an excellent distribution of loans among individuals of different income levels and businesses of different sizes.

Home Mortgage Loans

Refer to Table P in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The Grand Forks MMSA AA has homeownership affordability hurdles especially for low-income borrowers. As noted above, the area's median housing value is four times the income of low-income borrowers indicating a limited proportion of OOUs are affordable to low-income borrowers. Despite the affordability challenges, the bank's overall home mortgage lending to LMI borrowers in 2012-2016 exceeds the aggregate distribution of loans.
- The bank's performance for lending to low-income borrowers is well below the proportion of families and lending to moderate-income borrowers exceeds the proportion of families.
- The bank's home mortgage lending in 2017-2018 is slightly below the performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's originations and purchases of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the percentage of small loans to businesses originated or purchased exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Community Development Lending

The institution has made a relatively high level of CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The level of CD lending in the Grand Forks MMSA AA is good. WFBNA made only one CD loan in its AA for $5.3 million, which represents 39.5 percent of allocated tier 1 capital. Although the bank only originated one loan during the six-year time period, the loan represented a significant amount of tier 1 capital due to its size. As such, CD lending performance has a positive impact on the lending test rating. The loan was for the purpose of affordable housing, which is a critical CD need in the bank's AA.

An example of a CD loan in the AA includes:

- In December 2017, WFBNA provided a $5.3 million construction loan for an affordable housing development located in Crookston, Minnesota. The development contains 12 two-bedroom units and 18 three-bedroom units, and all of the units are restricted to households with income at or below 60 percent of area MFI. Four units will be designated for long-term homeless.

Product Innovation and Flexibility

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program, the bank has funded 12 loans totaling $1.7 million to LMI homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.

INVESTMENT TEST

The bank's performance under the Investment Test in the Grand Forks MMSA AA is rated Outstanding.

Based on a FS review, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Grand Forks MMSA AA is excellent.

Qualified Investments										
Assessment Area	Prior Period*		Current Period		Total				Unfunded Commitments **	
	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Grand Forks MMSA	3	$553	9	$6,457	12	100.0	$7,010	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 52.1 percent of tier 1 capital allocated to the AA.

The institution exhibits excellent responsiveness to credit and community economic development needs identified in the AA, including affordable housing, community services, and economic development for LMI individuals and geographies. Over 98 percent of the dollar volume of the bank's current and prior period investment focused on affordable housing which is a primary credit need in the AA. Additionally, seven grants totaling $45,000 were made to a variety of organizations that primarily support affordable housing and community services.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved one new complex LIHTC project and three LIHTC investments from prior period where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased one government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In December 2017, WFBNA provided a $6.2 million investment for an affordable housing LIHTC development located in Crookston, Minnesota. The development consists of 12 two-bedroom units and 18 three-bedroom units, and all of the units are restricted to households with income at or below 50 percent of the area MFI. Four units will be designated for long-term homeless with supportive services provided. This activity is responsive to the identified need for affordable housing as well as the identified need for addressing homelessness. Wells Fargo also demonstrated multi-faceted support by providing both the construction loan in the amount of $5.3 million and equity investment to support this affordable housing development.
- In June 2015, WFBNA provided a $6.6 million investment in a government single-family mortgage backed security. The investment amount reported of $196,150 represents the allocation of a single property located within a LMI area in the AA from the pool of mortgages under this transaction. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

SERVICE TEST

The institution's performance under the Service Test in the Grand Forks MMSA AA is rated Low Satisfactory.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Grand Forks MMSA AA is adequate.

Retail Banking Services

Service delivery systems are reasonably accessible to geographies and individuals of different income levels in the institution's AA.

Distribution of Branch Delivery System											
Assessment Area	Deposits	Branches						Population			
	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%)				% of Population within Each Geography			
				Low	Mod	Mid	Upp	Low	Mod	Mid	Upp
Grand Forks MMSA	100.0	2	100.0	0.0	0.0	100.0	0.0	5.5	20.1	56.4	18.0

As of December 31, 2018, WFBNA operates two branches and four ATMs in the Grand Forks MMSA AA. Both of these branches are full-service locations. There are no branches in LMI geographies and the branch distribution in LMI geographies is significantly below the percentage of the population in LMI CTs in the AA. When considering one branch within close proximity to LMI geographies, the bank's distribution remains below demographics.

Distribution of Branch Openings/Closings						
Assessment Area	# of Branch Openings	# of Branch Closings	Net change in Location of Branches (+ or -)			
			Low	Mod	Mid	Upp
Grand Forks MMSA	0	0	0	0	0	0

The bank did not open or close any branches during the evaluation period.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 5:00 or 6:00 pm. One branch is also open on Saturdays from 9:00 am to 1:00 pm. All WFBNA services are available at all branches and all ADS discussed bank-wide are available in this AA.

Community Development Services

The institution provides a low level of CD services.

Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 39 CD service activities to two organizations since the last evaluation, logging a total of 35 qualified hours within this AA. A majority of the bank's assistance was to one organization that provides community services to LMI individuals and families. The other technical assistance was to an organization that targeted economic development within the AA. The following is an example of CD services provided in this AA:

- A WFBNA team member provided over 30 hours of financial education to an elementary school located in Grand Forks, ND. According to NCES, the free and reduced lunch program participation rate is 65 percent at this elementary school and the qualifying guidelines are at or below 80 percent of the area's MFI.

Multistate Metropolitan Statistical Area Rating

Logan, UT-ID (Logan MMSA AA)

CRA rating for the Logan MMSA AA[8]: Satisfactory
The Lending Test is rated: Outstanding
The Investment Test is rated: Needs to Improve
The Service Test is rated: High Satisfactory

The major factors that support this rating include:

- Good lending activity;
- Excellent geographic distribution
- Excellent borrower distribution of loans;
- Good level of CD loans, which has a positive impact on the Lending Test;
- WFBNA's use of flexible products has a neutral impact on the Lending Test;
- Poor level of CD investments;
- Retail delivery systems are readily accessible to all portions of the AA; and
- Poor level of CD services.

Description of Institution's Operations in Logan MMSA AA

WFBNA delineated one AA within the Logan, UT-ID MSA. Refer to Appendix A for a complete description of the AA. WFBNA has $316 million of deposits in the Logan MMSA AA representing 0.01 percent of adjusted deposits. The Logan MMSA AA represents the 49th largest rated area by deposits. In the Logan MMSA AA, WFBNA ranked 3rd out of 10 institutions with a 17.6 percent market share. The top two depository institutions within the MMSA were ZB National Association with 26.4 percent and Cache Valley with 21.2 percent market share. WFBNA operates 5 branches and 6 ATMs within the Logan MMSA AA, representing 0.1 percent of the bank's branches and 0.01 percent of the bank's ATMs. In comparison to the percentage of deposits and branching network, the bank originated and purchased approximately $656 million in loans or 0.0 percent of total bank loan originations and purchases during the evaluation period. The bank's primary loan products in the Logan MMSA AA are home mortgage and small loans to businesses.

Demographic

The following table provides a summary of the demographics that include housing and business information for the Logan MMSA AA. Table A shows that the volume of tracts and population is very small in the low-income tracts and there are also no OOUs within the low-income tracts. Additionally, thirty eight percent of families in the AA are LMI. The area's median housing value in the Logan MMSA AA is 3.2 times the MSA median income, but 4 times moderate-, and 6.4 times low-income, indicating a limited proportion of OOUs are affordable to LMI individuals.

---

[8] This rating reflects performance within the multistate metropolitan statistical area. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

Economic Data

According to the July 2018 Moody's Analytics report, Logan's economy is showing few signs of slowing. Payrolls grew at more than triple the rate of the nation in the second quarter, driven in large part by a surge in professional/business services. State government has served as the lone weakness with falling enrollment at Utah State University (USU) as the contributing factor. An improved job mix is powering average hourly earnings growth to its fastest pace in three years. With wages rising and homebuilders dialing back, it should come as no surprise that home values are appreciating at a near double-digit clip since last year.

Logan has a state university and other economic engines. Franklin County has two hospitals that have been expanded and improved over the last ten years. Logan Regional Hospital and Mountain Star Medical are the two largest hospitals in the region. Logan added a cancer wing so people no longer need to go to Salt Lake City.

The outlook for the housing market is above average thanks largely to favorable demographics trends. Low inventory has been a hurdle nationally, and the Logan MMSA is no exception. Home sales have slowed but a lack of supply is preserving upward pressure on prices.

The major economic drivers for the MMSA are Food Processing, Healthcare, and USU. The largest employers in the Logan MMSA includes Utah State University, Logan Regional Hospital, and Swift & Co. According to the U.S. BLS, the unemployment rate for the second quarter of 2018 was 2.5 percent and has decreased from 4.5 percent at the beginning of the evaluation period. The unemployment rate in the AA was similar to the overall State of Idaho (2.5 percent) and slightly lower than the overall State of Utah (3.5 percent).

Community Contact

The analysis takes into consideration comments provided by a community contact that serves the bank's Logan MMSA AA. The community contact was with a government rural development organization.

According to the community contact, the Logan MSA is located within the Cache Valley which runs north to south. Franklin County in Idaho is really part of Utah: culturally and economically. There is more economic activity in Utah. Many people from Idaho drive into Logan, UT to either shop or work. The drive is 30 minutes or about 30 miles.

The Cache Valley in both Utah and Idaho had been a concentrated dairy area. There remain two dairy processing plants in Logan, UT. However, with changes in the market, the number of dairy farmers has declined from about 100 to 17. Though the number of dairy farmers in Cache County has diminished, those that have remained are much larger. The dairy operations in Franklin County have remained smaller and more stable.

Smithfield, UT has seen a lot of residential growth because of its proximity to Logan which is the economic engine of the Valley. Richmond and Lewiston, UT have also seen population growth due to the number of multi-family rental properties being constructed. This kind of development has yet to cross the border into Idaho.

Since the financial crisis both single-family and multi-family housing development have bounced back, and manufacturing has expanded. Most of this development remains on the Utah side of the border. The Idaho side has not seen much growth in business because people are willing to drive to Logan.

According to the contact, there are several opportunities for banks to participate in community development, other credit-related projects, or financing programs for affordable housing. There are a couple neighborhood CDCs in Logan, Idaho Housing and Finance Association (state housing finance agency) that offers single and multi-family products, as well as economic development products.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Logan MMSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the zero volume of OOUs, small proportion of population and small businesses coupled with limited home affordability for LMI individuals. The AA also has CD needs for community services to assist with the homelessness.

Scope of Evaluation in Logan MMSA AA

The rating for the Logan MMSA AA is based on a FS evaluation of the bank's performance in the Logan, UT-ID MSA. A limited portion of the bank's overall lending, investments, and services were conducted in the Logan MMSA AA; therefore, the performance in the MMSA received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN LOGAN MMSA AA

LENDING TEST

The bank's performance under the Lending Test in the Logan MMSA AA is rated Outstanding.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Logan MMSA AA is excellent.

Lending Activity

Based on the tables below, lending levels reflect good responsiveness to the credit needs in the AA taking into account the number and dollar amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Logan MMSA	2,995	1,919	124	2	5,040

Dollar Volume of Loans (000's)					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Logan MMSA	$530,147	$121,262	$4,669	$5,244	$661,322

WFBNA ranked 3rd in deposits with 17.6 percent market share in the AA. In overall HMDA lending, WFBNA ranked fifth with 5.8 percent market share. Although WFBNA's HMDA market share is considerably lower than its deposit market share, lending competition was significantly stronger, reflected by the 170 lenders, than competition for deposits, where there were only 10 depository institutions. The top 3 lenders in this market were Guild Mortgage Company with 8.4 percent market share, Cache Valley Bank with 6.8 percent market share, and US Bancorp Family with a 6.4 percent market share.

In small loans to businesses, WFBNA ranked 5th with a market share of 8.9 percent. There is strong competition in the market with approximately 50 lenders within the AA. The top three lenders were Zions Bank with a market share of 22.9 percent, American Express with a market share of 17 percent, and JPMorgan Chase Bank with a market share of 10.3 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits an excellent geographic distribution of loans in its AA.

Home Mortgage Loans

Refer to Table O in the "MMSA" section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- For 2012-2016 period, there are no OOUs in low-income geographies so our assessment focused on the bank's performance in the moderate-income geographies.
- For 2012-2016, the proportion of loans in moderate-income geographies exceeds both the aggregate distribution of loans and the proportion of OOUs units in those geographies.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly lower than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the "MMSA" section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is good.

- For 2012-2016, the proportion of the bank's small business loans in low-income geographies exceeds the aggregate distribution of loans and is significantly below the proportion of businesses in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is near to the proportion of businesses located in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly below the combined performance in 2012-2016.

Distribution of Loans by Income Level of the Borrower

The bank exhibits an excellent distribution of loans among individuals of different income levels and businesses of different sizes.

Home Mortgage Loans

Refer to Table P in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's home mortgage loan originations and purchases. The bank's overall borrowers distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The Logan MMSA AA has homeownership affordability hurdles especially for LMI borrowers. As noted above, the area's median housing value is 6.4 times the income of low-income borrowers and 4 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI borrowers. Despite the affordability challenges, the bank's overall home mortgage lending to LMI borrowers in the 2012-2016 period exceeds the aggregate distribution of loans.

- The bank's performance for lending to low-income borrowers is well below the proportion of families and lending to moderate-income borrowers exceeds the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly lower than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's originations and purchases of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both the 2012-2016 and 2017-2018 periods, the percentage of small loans to businesses originated or purchased exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Community Development Lending

The institution has made a relatively high level of CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The level of CD lending in the Logan MMSA AA is good. WFBNA made only 2 CD loans in its AA for $5.2 million, which represents over 14.7 percent of tier 1 capital. Although the bank only originated two loans during the six-year time period, the loans represented a significant amount of tier 1 capital. As such, CD lending performance has a positive impact on the lending test rating. One CD loan was for the primary purpose of affordable housing which is a critical CD need in the bank's AA. The other CD loan was for economic development.

Examples of CD loans in the AA include:

- In December 2015, WFBNA provided a $4.3 million term loan in conjunction with the SBA's 504 Certified Development Company (CDC) program to assist in the purchase of an owner-occupied commercial real estate. The CDC program is a long-term financing tool for economic development within the community.
- In June 2016, WFBNA provided an extension of a $2.0 million loan for a multifamily housing development. The loan amount reported of $927,000 represents 47.1 percent of the total loan amount and is reflective of the proportional amount of the units that will provide below fair-market rent affordable housing. This development is located in a moderate-income census tract in Logan, Utah and consists of 36 two-bedroom units and 32 three-bedroom units with 47 percent of the asking rent rates below the 2016 Fair Market Rent for the area and 100 percent of the units are affordable to tenants earning between 52 percent and 60 percent of the 2016 area MFI of $57,700.

Product Innovation and Flexibility

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program, the bank has funded 3 loans totaling $344,000 to LMI homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.

INVESTMENT TEST

The bank's performance under the Investment Test in the Logan MMSA AA is rated Needs to Improve.

Based on a FS review, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Logan MMSA AA is poor.

Qualified Investments										
Assessment Area	Prior Period*		Current Period		Total				Unfunded Commitments **	
	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Logan MMSA	2	$407	26	$759	28	100.0	$1,166	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

The institution has a poor level of qualified CD investments and grants, but not in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 3.3 percent of tier 1 capital allocated to the AA.

The institution exhibits poor responsiveness to credit and community economic development needs identified in the AA. Of the total investments, the bank allocated over 97 percent of the dollar volume of the bank's current and prior period investment for affordable housing, which is a primary credit need in the AA. Additionally, the bank provided 25 grants totaling $183,000 to a variety of organizations that primarily support affordable housing and community services.

The institution rarely uses innovative and/or complex investments to support CD initiatives.

Examples of CD investments in the AA include:

- In December 2013, WFBNA provided a $5.3 million investment in a single-family mortgage backed security. The investment amount reported of $576,016 represents the allocation of property addresses located within LMI geographies from the pool of mortgages under this transaction. This mortgage-backed security is collateralized by the cash flows from loans insured or guaranteed by the Federal Housing Administration, Department of Veterans Affairs Home Loan Program for Veterans, Office of Public and Indian Housing, and the U.S. Department of Agriculture Rural Development.

- During the exam period, WFBNA provided 15 separate grants totaling $107,000 to an organization that creates quality affordable housing opportunities, enhances and stabilizes communities, and provides households with the skills to become self-sufficient. The organization's primary mission is to create independent living environments and to promote self-sufficiency for under-served markets such as very-low income families, the elderly, persons with disabilities, and homeowners facing foreclosures.

SERVICE TEST

The institution's performance under the Service Test in the Logan MMSA AA is rated High Satisfactory.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Logan MMSA AA is good.

Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the institution's AA.

Distribution of Branch Delivery System											
Assessment Area	Deposits	Branches						Population			
	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%)				% of Population within Each Geography			
				Low	Mod	Mid	Upp	Low	Mod	Mid	Upp
Logan MMSA	100.0	5	100.0	20.0	40.0	40.0	0.0	6.1	20.0	46.1	27.8

Distribution of Branch Openings/Closings						
Assessment Area	# of Branch Openings	# of Branch Closings	Net change in Location of Branches (+ or -)			
			Low	Mod	Mid	Upp
Logan MMSA	0	1	0	0	-1	0

As of December 31, 2018, WFBNA operates 5 branches and 6 ATMs in the Logan MMSA AA. All five branches are full-service locations. There is one branch in a low-income geography and 2 branches in moderate-income geographies. The branch distribution in LMI geographies significantly exceeds the percentage of the population in LMI CTs in the AA.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed one branch within a middle-income CT since the last evaluation.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Thursday from 9:00 am to 5:00 pm. On Fridays, two branches are open from 9:00 am to 5:00 pm and two are open from 9:00 am to 6:00 pm. One branch is open from 10:00 am to 7:00 pm Monday through Friday. Two branches are also open on Saturdays from 9:00 am to 2:00 pm and one branch is open from 10:00 am to 3:00 pm. All WFBNA services are available at all branches and all ADS discussed bank-wide are available in this AA.

Community Development Services

The institution provides a low level of CD services.

The level of CD services in the Logan MMSA AA is poor. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for four CD service activities to two organizations since the last evaluation, logging a total of 51 qualified hours within this AA. A majority of the bank's assistance was to an organization that provides affordable housing services to LMI individuals and families. The other activity was to a community organization that provides services to LMI individuals and families. The following is an example of a CD service provided in this AA:

- Two WFBNA team members provided 49 hours of Board activity services to a local community organization that helps to create quality affordable housing opportunities, to enhance and stabilize communities, and to provide households with the skills to become self-sufficient. The organization works to create independent living environments and to promote self-sufficiency for under-served markets such as very-low income families, the elderly, persons with disabilities, and homeowners facing foreclosures.

Multistate Metropolitan Statistical Area Rating

Memphis, TN-MS MSA (Memphis MMSA AA)

CRA rating for the Memphis MMSA AA[9]: Satisfactory
The Lending Test is rated: High Satisfactory
The Investment Test is rated: Low Satisfactory
The Service Test is rated: Low Satisfactory

The major factors that support this rating include:

- Excellent lending activity;
- Adequate geographic distribution of loans;
- Good borrower distribution of loans;
- Good level of CD loans, which has a positive impact on the Lending Test;
- WFBNA's use of flexible products has a neutral impact on the Lending Test;
- Adequate level of CD investments;
- Retail delivery systems are reasonably accessible to all portions of the AA; and
- Adequate CD services.

Description of Institution's Operations in Memphis MMSA AA

WFBNA delineated one AA within the Memphis, TN-MS MSA. Refer to Appendix A for a complete description of the AA. WFBNA has $511 million deposits in the Memphis MMSA AA, representing 0.04 percent of adjusted deposits and ranked 12th among 51 banks in the AA with 1.6 percent market share. The top three banks in terms of deposit market share within the MMSA were First Tennessee with 34.8 percent, Regions Bank with 14.2 percent, and SunTrust Bank with 7.4 percent. All three banks have larger branching networks than WFBNA. WFBNA operates 8 branches and 12 ATMs within the Memphis MMSA AA, representing just 0.1 percent of the bank's branches and 0.1 percent of the bank's ATMs. In the Memphis MMSA AA, the bank originated and purchased $6.2 billion in loans or 0.3 percent of total bank loan originations and purchases during the evaluation period. The bank's primary loan products in the Memphis MMSA AA are home mortgage loans and small loans to businesses.

Demographic Data

The following table provides a summary of the demographics that include housing and business information for the Memphis MMSA AA. Table A shows that over 39 percent of families in the AA are LMI. The area's median housing value in the Memphis MMSA AA is 2.5 times the MSA median income, but 3.1 times moderate-, and 4.9 times low-income, indicating a limited proportion of OOUs are affordable to low-income residents. Median rents and the significant percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

---

[9] This rating reflects performance within the multistate metropolitan statistical area. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

According to the August 2018 Moody's Analytics report, the Memphis economy is expanding at a steady pace in line with the nation overall. The major economic drivers for the Memphis MMSA are logistics, medical centers, and retirees. Memphis is a major transportation hub for the U.S, and home to FedEx Word Hub making the Memphis economy overly reliant on transportation and distribution. The largest economic sectors for employment are Education and Health Services, Professional and Business Services and Government. The top employers in the MMSA include FedEx Corp., Methodist Le Bonheur Healthcare, and Naval Support Activity Mid-South.

Hindering long term economic growth are the area's weak population trends and below-average educational attainment. The Memphis MMSA also suffers from high poverty and a high crime rate which make it difficult to attract and retain workers and discourages investment. Per Moody's, the poverty rate in Memphis is at 19.4 percent which is the highest in the State of Tennessee.

Median household incomes in Memphis are below the regional average but are rising at a strong pace due to a healthy labor market. Although low-wage positions dominate new job creation, average hourly earnings are rising as employers compete for talent. According to the U.S. BLS, the Memphis MMSA unemployment rate as of August 2018 was 4.2 percent, down considerably from 8.5 percent at the beginning of the evaluation. The MMSA unemployment rate is slightly below the State of Mississippi unemployment rate of 4.6 percent and slightly above the State of Tennessee unemployment rate of 3.7 percent.

Community Contact

The analysis takes into consideration comments provided by two community contacts that serve the bank's Memphis MMSA AA. The first community contact was with a community development organization in Memphis and the second contact was with an industrial development authority located in Mississippi.

The first organization contacted is a coalition of organizations and individuals that supports the development, revitalization, and redevelopment of economically sustainable neighborhoods throughout the Memphis region. According to the contact, the city's central geographic location has been strategic to its business development and that Memphis is the home of three Fortune 500 companies: FedEx, International Paper, and AutoZone.

The contact stated that local banks have been more flexible in responding to the need for small dollar mortgages (those under $50,000). Some of the banks in the AA are working with community development organizations to address this need. The contact stated that there are lots of opportunities for banks in this area since there are many solid houses with low property values in LMI and underserved neighborhoods in Memphis. The contact noted that one of the major challenges facing the AA is credit worthiness of potential LMI homebuyers who are dealing with financial issues related to medical and utility bills that have impaired their credit scores. The contact indicated that credit counseling was a definite need but there are not enough credit repair agencies to address the need since many of them had lost their funding from HUD during the recession. The contact indicated that banks could assist by providing operational support to the existing counseling organizations, as well as those that revamp their counseling services with funding through grants and donations.

The contact also mentioned the prevalence of blight in neighborhoods throughout the city, vacant lots and the need for subsidies to develop affordable single-family housing on the lots. The contact further indicated that the agency was working with the local government on potential incentives for this initiative, which could provide an opportunity for bank participation to help with funding. From an affordable multifamily housing perspective, the contact mentioned that Memphis does not receive a lot of funding from the State's tax credit program, the LIHTC or the NMTC programs as most the funding goes to the rural areas in Tennessee. Since the city's funding from HUD has dwindled, there has been very limited local funding as well. The contact indicated that the agency would be working collaboratively with some key stakeholders to explore the creation of a Housing Trust Fund to address affordable multifamily housing needs in Memphis, which could present another opportunity for bank participation.

The second contact described strong economic conditions in Marshall County, Mississippi. The contact stated that there is significant job growth in the area, which is attributed to the surge of industrial occupations in the last five years. The contact indicated that the availability of affordable housing needs improvement. According to the contact, the southern end of the county is predominately agriculture/rural, so there is a need for small farm and small business loans in the AA.

Considering the information from the community contacts and bank management as well as demographic and economic data, small business and affordable housing loans represent the primary credit needs for the Memphis MMSA AA. Small business loans, particularly those for start-up businesses and micro-loans are in high demand. Also, there is a need for financial literacy training for LMI individuals, economic development in the form of funds to revitalize and stabilize LMI neighborhoods and communities, job training and employment opportunities for LMI, and small dollar mortgage loans and grants/donations to non-profits serving LMI communities. Opportunities do exist to originate these types of loans throughout the AA including LMI areas.

Scope of Evaluation in Memphis MSA AA

The rating for the Memphis MMSA AA is based on a FS evaluation of the bank's performance in the combined Memphis, TN-MS MSA. A limited portion of the bank's overall lending, investments, and services were conducted in the Memphis MMSA AA; therefore, the performance in the MMSA received little weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN MEMPHIS MMSA AA

LENDING TEST

The bank's performance under the Lending Test in the Memphis MSA AA is rated High Satisfactory.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Memphis MMSA AA is good.

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to the credit needs in the AA taking into account the number and dollar amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Memphis MMSA	33,681	4,660	183	4	38,528

Dollar Volume of Loans (000's)					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Memphis MMSA	$5,923,602	$223,915	$6,339	$28,412	$6,182,268

WFBNA ranked 12th in deposits with 1.6 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 10.8 percent market share. There is strong competition as reflected by the

472 lenders and 51 depository institutions in the AA. The number two lender in the market was Quicken Loans with 3.9 percent market share.

In small loans to businesses, WFBNA ranked 13th out of 121 lenders with a market share of 2.3 percent. The top three lenders were American Express with a market share of 25.1 percent, followed by Capital One Bank with 8.4 percent, and Citibank with 7.6 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits an adequate geographic distribution of loans in its AA.

Home Mortgage Loans

Refer to Table O in the "MMSA" section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate**.**

- For 2012-2016, the combined proportion of home mortgage loans in low-income geographies substantially meets the aggregate distribution of loans and is significantly below the proportion of OOUs in those geographies.
- The proportion of loans in moderate-income geographies is below the aggregate distribution of loans and is significantly below the proportion of OOUs in those geographies.
- The bank's home mortgage lending in 2017-2018 is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the "MMSA" section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- For both 2012-2016 and 2017-2018 periods, the proportion of the bank's small business loans in LMI geographies exceeds the aggregate distribution of loans located in those geographies.
- The proportion of loans in low-income geographies is below the proportion of businesses and to moderate-income geographies is near to the proportion of businesses located in those geographies.

Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and businesses of different sizes.

Home Mortgage Loans

Refer to Table P in the “MMSA” section of appendix D for the facts and data used to evaluate the borrower distribution of the institution’s home mortgage loan originations and purchases. The bank’s overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- The Memphis MMSA AA has homeownership affordability hurdles especially for LMI borrowers. As noted above, the area’s median housing value is 4.9 times the income of low-income and 3.1 times the income of moderate-income borrowers indicating a limited proportion of OOU are affordable to LMI. Despite the affordability challenges, the bank’s overall home mortgage lending to LMI borrowers in 2012-2016 exceeds the aggregate distribution of loans.
- The bank’s lending to low-income borrowers is significantly below the proportion of families and lending to moderate-income borrowers is below the proportion of families.
- The bank’s home mortgage lending in 2017-2018 is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the “MMSA” section of appendix D for the facts and data used to evaluate the borrower distribution of the institution’s originations and purchases of small loans to businesses. The distribution of the bank’s originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the percentage of small loans to businesses originated or purchased substantially meets the aggregate small business lending data for businesses with revenues of $1 million or less and is well below the percentage of small businesses located in the AA.

Community Development Lending

The institution has made a relatively high level of CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution’s level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The level of CD lending in the Memphis MMSA AA is good. WFBNA made four CD loans in this AA for $28.4 million, which represents 49.5 percent of tier 1 capital. Although the bank only originated four loans during the six-year time period, the loans represented a significant amount of tier 1 capital. CD lending performance has a positive impact on the lending test rating. Three of the CD loan totaling $26.4 million (92 percent) were for the primary purpose of affordable housing which is an identified need in the AA. The bank originated one CD loan for the purpose of community service to assist LMI individuals.

Examples of CD loans in the AA include:

- In April 2015, WFBNA provided a $13.3 million loan for an affordable housing development in a moderate-income geography. The development consists of 253 units with 80 percent of rental rates below the 2015 Fair Market Rent for the area.
- In March 2018, WFBNA renewed a $2 million working capital line of credit to a non-profit organization with a mission of transforming public education in the Memphis area so that all young adults receive the education they need to be successful in college, leadership, and life. According to the organization, as of February 2017, 100 percent of its clients are LMI as they earn less than 80 percent of the area MFI.

Product Innovation and Flexibility

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program, the bank has funded 44 loans totaling $5.4 million to LMI homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.

INVESTMENT TEST

The bank's performance under the Investment Test in the Memphis MMSA AA is rated Low Satisfactory.

Based on a FS review, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Memphis MMSA AA is adequate.

Qualified Investments										
Assessment Area	Prior Period*		Current Period		Total				Unfunded Commitments**	
	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Memphis MMSA	1	$1,368	52	$1,052	53	100.0	$2,420	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

The institution has an adequate level of qualified CD investments and grants, although rarely in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 4.2 percent of tier 1 capital allocated to the AA.

The institution exhibits adequate responsiveness to credit and community economic development needs identified in the AA, including affordable housing, community services, revitalization/stabilization for LMI individuals and geographies. Over 87 percent of the dollar volume of the bank's current and prior period investment focused on affordable housing which is a primary credit need in the AA. Additionally, the bank provided 50 grants totaling $784,713 to a variety of organizations that primarily support affordable housing and community services.

The institution occasionally uses innovative and/or complex investments to support CD initiatives. CD investments consisted of several innovative grants noted below that support CD initiatives.

Examples of CD investments in the AA include:

- In May and June 2015, WFBNA provided two separate $4.8 and $2.9 million investment in government single-family mortgage backed securities, of which $112,830 and $154,267 directly benefits LMI borrowers in the AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.
- WFBNA provided several grants totaling $2.7 million as part of the Small Business DCC program benefiting small businesses in the broader statewide of Tennessee and Mississippi including the Memphis MMSA AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.
- During the exam timeframe, WFBNA provided two grants totaling $285,000 to two housing organizations as a part of the PMP for affordable housing in the Memphis MMSA AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

SERVICE TEST

The institution's performance under the Service Test in the Memphis MMSA AA is rated Low Satisfactory.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Memphis MMSA AA is adequate.

Retail Banking Services

Service delivery systems are reasonably accessible to geographies and individuals of different income levels in the institution's AA.

Distribution of Branch Delivery System											
Assessment Area	Deposits	Branches						Population			
	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%)				% of Population within Each Geography*			
				Low	Mod	Mid	Upp	Low	Mod	Mid	Upp
Memphis MMSA	100.0	8	100.0	12.5	12.5	12.5	62.5	16.1	21.4	24.6	37.4

* May not add up to 100 percent due to geographies with unknown tract income level and rounding. Population in census tracts with income unknown represent 0.5 percent in the AA.

Distribution of Branch Openings/Closings						
Assessment Area	# of Branch Openings	# of Branch Closings	Net change in Location of Branches (+ or -)			
			Low	Mod	Mid	Upp
Memphis MMSA	0	0	0	0	0	0

As of December 31, 2018, WFBNA operates eight branches and 12 ATMs in the Memphis MMSA AA. All of these branches are full-service locations. There is one branch within a low-income CT and one branch within a moderate-income CT. The branch distribution in low-income geographies is near to the percentage of the population in low-income geographies and branch distribution in moderate-income geographies is below the percentage of the population in moderate-income geographies in the AA.

The bank did not open or close any branches during the evaluation period.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Thursday from 9:00 am to 4:30 pm and Friday from 9:00 am to 6:00 pm. Four branches are also open on Saturdays from 9:00 am to 1:00 pm. All WFBNA services are available at all branches and all ADS discussed bank-wide are available in this AA.

Community Development Services

The institution provides an adequate level of CD services.

The level of CD services in the Memphis MMSA AA is adequate. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 45 CD service activities to 17 organizations since the last evaluation, logging a total of 105 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing. The following are examples of CD services provided in this AA:

- A WFBNA team member provided 19.5 hours of Board service to a community organization that works to provide affordable housing and rehabilitate local neighborhoods.
- WFBNA team members provided 81 hours of financial education to a number of schools located in Memphis, TN. According to the 2014-2015 NCES data, over 90 percent of students at these schools qualify for the federal free- and reduced-lunch program.

Multistate Metropolitan Statistical Area Rating

Minneapolis-St. Paul, MN-WI CSA (Minneapolis MMSA AA)

CRA rating for the Minneapolis MMSA AA[10]: Outstanding
The Lending Test is rated: Outstanding
The Investment Test is rated: Outstanding
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Good lending activity;
- Excellent distribution of loans by borrower profile;
- Good geographic distribution of loans;
- WFBNA is a leader in providing CD loans, which has a significant positive impact on the Lending Test;
- WFBNA's use of flexible products has a positive impact on the Lending Test;
- Excellent level of CD investments that are responsive to AA needs;
- Retail delivery systems are readily accessible to all portions of the AA; and
- WFBNA is a leader in providing CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in Minneapolis MMSA AA

WFBNA delineated five AAs within the Minneapolis-St. Paul, MN-WI CSA. Refer to Appendix A for a complete description of the AA. These areas were combined, analyzed, and presented at the CSA level with an AA name of Minneapolis MMSA. WFBNA has $67.4 billion of deposits; however, a majority of the deposits are non-retail branch deposits. The non-retail branch deposits do not reflect traditional retail customer relationships, rather they are wholesale funds. These deposits do not reflect where any of WFBNA's customers are located, where they work, or where they conduct business. The adjusted deposits are $24.7 billion of retail deposits in the Minneapolis MMSA AA representing 1.9 percent of adjusted deposits. The Minneapolis MMSA AA represents the 11th largest rated area in terms of deposits. In the Minneapolis MMSA AA, WFBNA ranked second out of 177 institutions with 34.9 percent market share. The top bank within the MMSA in terms of deposits is U.S. Bank with 36.3 percent deposits. WFBNA operates 107 branches and 506 ATMs within the Minneapolis MMSA AA, representing 1.9 percent of the bank's branches and 3.7 percent of the bank's ATMs. In the Minneapolis MMSA AA, the bank originated and purchased $49.6 billion in loans or 2.7 percent of total bank loan originations and purchases during the evaluation period. The bank's primary loan products in the Minneapolis MMSA AA is home mortgage loans and small business loans.

Demographic Data

The following table provides a summary of the demographics that include housing and business information for the Minneapolis MMSA AA. Table A shows that the volume of OOUs is very small in

[10] This rating reflects performance within the multistate metropolitan statistical area. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

the low-income tracts and over 36 percent of families in the AA are LMI. The area's median housing value in the Minneapolis MMSA AA is three times the highest MSA median income, but 3.9 times moderate-, and 6.2 times low-income, indicating a limited proportion of OOUs are affordable to LMI residents.

Table A – Demographic Information of the Assessment Area

Economic Data

Minneapolis-St. Paul-Bloomington MN-WI MSA

According to the August 2018 Moody's Analytics report, Minneapolis' expansion is back on track and the metro is again a top Midwest performer after stumbling the first part of the year. The three-year marathon of stellar healthcare job growth has come to an end, now that new capacity has satiated demand. Leisure/hospitality and business/professional services have stepped up hiring. However, the overly tight labor market, evidenced by the unemployment rate hitting an 18-year low of 2.7 percent, is keeping job gains in check. Growing worker shortages will be Minneapolis' main hurdle this year and the next. Meanwhile, house price appreciation is gradually accelerating and mirrors the U.S. average, while residential permits remain elevated.

Major area employers include Allina Health System, Target Corp., and University of Minnesota.

According to the U.S. BLS, Minneapolis's unemployment rate as of August 2018 was 2.7 percent, down from 5.5 percent at the beginning of the evaluation 2012. The MMSA unemployment rate was slightly higher than the State of Minnesota at 2.6 percent and slightly lower than the State of Wisconsin at 2.9 percent.

St. Cloud, MN MSA

According to the February 2019 Moody's Analytics report, St. Cloud's expansion picked up the pace in the second half of 2018 and the metro area is a top performer in Minnesota. The mix of job gains is healthy but healthcare has recently taken a back seat to manufacturing in net hiring. With the economy operating at capacity, St. Cloud can only add jobs as fast as it can add workers, and the recent downturn in the labor force to a more than one-year low is a concern. Firmer income trends and more new households are helping residential real estate. Home sales and prices are outperforming and there is more interest in rentals judging by the rise in multifamily starts. Housing is also generally less sensitive to interest rates because affordability is so high. A household earning the median income can afford to buy 220 percent of the median-priced home, which exceeds the statewide average by the most on record dating back to 1975. Despite the manufacturing headwind, consumer industries, including education/ healthcare, leisure/hospitality and retail, will account for the largest portion of job gains in the short term.

Major area employers include CentraCare Health System, St. Cloud State University, and St. Cloud VA Health Care System. According to the U.S. BLS, St. Cloud's unemployment rate as of the 4th quarter of 2018 was 3.1 percent, down from 5.6 percent at the beginning of the evaluation 2012. The MMSA unemployment rate was similar to the State of Minnesota at 3.2 percent and slightly higher than the State of Wisconsin at 2.8 percent during the same period.

Community Contact

The analysis takes into consideration comments provided by three community contacts serving the bank's Minneapolis MMSA AA in conjunction with this evaluation. Two representatives were from organizations that support affordable housing and one representative was from an economic development corporation assisting small businesses. One contact indicated that commercial real estate purchases, even though appraisals are getting back to pre-financial crisis levels, remain curtailed by conservative bank underwriting and lending practices. Bank credit committees are reviewing appraisals and coming up with lower valuations.

Another organization indicated that suburban poverty rates are increasing but was not sure whether the reason is due to declining wages or lack of high paying jobs. It is clear that wages continue to lag for moderate-income working people. A study from the City of Minneapolis on lending highlights racial disparities in getting a loan through banks and thrifts. In addition, it is expensive to buy and rehab a home in LMI areas. It remains difficult to do a decent rehabilitation in some LMI areas and recoup the investment.

One organization stated that there has been a push to do more affordable housing along transit lines as employers want to see transit housing to improve transit access to jobs. The much planned for western suburban light rail is currently held up by high wealth households unwilling to have it run through their neighborhoods.

All three organizations indicated that there are opportunities for participation by local financial institutions including providing funds for building mixed use affordable housing projects, senior housing projects, and working with non-profits that serve LMI families and communities.

The bank conducted research in the AA and identified community needs for affordable housing for low-income families and seniors; financial education; homebuyer assistance; and small business assistance.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business represents primary credit needs for the Minneapolis MMSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs coupled with limited home affordability for LMI individuals.

Scope of Evaluation in Minneapolis MMSA AA

The rating for the Minneapolis MMSA AA is based on a FS evaluation of the bank's performance in the Minneapolis-St. Paul, MN-WI CSA AA. The Minneapolis MMSA is the 11th largest rated area and along with 12 other rated areas represents the bank's most significant markets in terms of lending, deposit, and branch distribution; therefore, the performance in the Minneapolis MMSA AA contributed to the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN MINNEAPOLIS MMSA AA

LENDING TEST

The bank's performance under the Lending Test in the Minneapolis MMSA AA is rated Outstanding.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Minneapolis MMSA AA is excellent.

Lending Activity

Based on the tables below, lending levels reflect good responsiveness to the credit needs in the AA taking into account the number and dollar amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Minneapolis MMSA	210,331	86,242	1,627	126	298,326

Dollar Volume of Loans (000's)					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Minneapolis MMSA	$45,162,167	$4,303,064	$149,335	$593,626	$50,208,192

WFBNA ranked second in deposits with 34.9 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 12.2 percent market share. Although WFBNA's HMDA market share is considerably lower than its deposit market share, total deposits include a significant portion of non-retail deposits. In addition, lending competition was significantly stronger as reflected by the 710 lenders, than competition for deposits, where there were 177 depository institutions in the AA. The second and third lenders in the market were U.S. Bancorp with 8.5 percent market share and Chase Family with 5.0 percent market share.

In small loans to businesses, WFBNA ranked third with a market share of 14.5 percent. The top two lenders were U.S. Bank with a market share of 22.6 percent and American Express with a market share of 18.0 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits good geographic distribution of loans in its AA.

Home Mortgage Loans

Refer to Table O in the "MMSA" section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- For both 2012-2016 and 2017-2018 periods, the proportion of home mortgage loans in LMI geographies substantially meets the aggregate distribution of loans and is near to the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the "MMSA" section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- For 2012-2016, the proportion of the bank's small business loans in LMI geographies exceeds the aggregate distribution of loans in LMI geographies.
- The proportion of loans in low-income geographies is below the proportion of businesses and lending in moderate-income geographies is near to the proportion of businesses located in those geographies.
- The bank's small business lending in 2017-2018 is slightly below the combined performance in 2012-2016.

Distribution of Loans by Income Level of the Borrower

The bank exhibits an excellent distribution of loans among individuals of different income levels and businesses of different sizes.

Home Mortgage Loans

Refer to Table P in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The Minneapolis MMSA AA has homeownership affordability hurdles especially for LMI borrowers. As noted above, the area's median housing value is six times the income of low-income borrowers and 3.9 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI borrowers. Despite the affordability challenges, the bank's overall home mortgage lending to LMI borrowers in both 2012-2016 and 2017-2018 periods exceeds the aggregate distribution of loans.
- The bank's lending to low-income borrowers is below the proportion of families and lending to moderate-income borrowers exceeds the proportion of families.

Small Loans to Businesses

Refer to Table R in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's originations and purchases of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the percentage of small loans to businesses originated or purchased exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Community Development Lending

The institution is a leader in making CD loans when considering the significant level of non-retail branch deposits.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The level of CD lending in the Minneapolis MMSA AA is excellent. WFBNA made 126 CD loans in its AA for a total of $593.6 million, which represents 21.6 percent of allocated tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The majority of these loans were for the primary purpose of affordable housing, which is a critical CD need in the bank's AA. The bank made 51 loans totaling

$327.4 million (55.2 percent) for the purpose of affordable housing. Additionally, the bank extended 66 CD loans totaling $256.4 million for the primary purpose of community services.

Examples of CD loans in the AA include:

- In November 2018, WFBNA provided a $9.3 million construction loan for an affordable housing development located in Shakopee, Minnesota. The project consists of 10 one-bedroom units, 29 two-bedroom units, and 18 three-bedroom units with 100 percent of the total units targeted to families with income between 30 and 60 percent of area MFI. Of the total units, four will be reserved for persons with a serious and persistent mental illness, and another four units will be reserved for persons experiencing long-term homelessness, with supportive services provided.
- In December 2017, WFBNA renewed a $2 million term loan to a non-profit organization that brings people together, transforms lives, and creates a vital community where individuals and families can thrive. The organization offers 48 units of affordable housing as well as job training, counseling, financial services, wellness education, after-school activities, a neighborhood organization, health care screenings, a café, Messiah Lutheran Church, and more. The Vice President/Chief Family Services Officer estimated that 80 percent of the clients the organization serves would be considered LMI as they earn less than $67,120 annually (80 percent of the 2014 MFI for the Twin Cities MSA).

Product Innovation and Flexibility

The institution makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. The bank launched the NeighborhoodLIFT program in the Minneapolis MMSA AA in June 2016 and more than 280 potential homebuyers attended the event. Of the 280 in attendance, WFBNA originated 94 mortgage loans totaling $12.9 million. Under the *your*FirstMortgage loan program the bank has funded 1,017 loans totaling $176.6 million to LMI homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Practices section of this performance evaluation for additional details regarding these programs.

INVESTMENT TEST

The bank's performance under the Investment Test in the Minneapolis MMSA AA is rated Outstanding.

Based on a FS review, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Minneapolis MMSA AA is excellent.

Qualified Investments										
Assessment Area	Prior Period*		Current Period		Total				Unfunded Commitments **	
	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Minneapolis MMSA	58	$43,716	732	$302,117	790	100.0	$345,833	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investment dollar volume represents 12.5 percent of tier 1 capital allocated to the AA.

The institution exhibits excellent responsiveness to credit and community economic development needs identified in the AA, including affordable housing, community services, revitalization/stabilization for LMI individuals and geographies. Over 91 percent of the dollar volume of the bank's current and prior period investment focused on affordable housing which is a primary credit need in the AA. Additionally, the bank provided 658 grants totaling $35.8 million to a variety of organizations that primarily support affordable housing, community services, economic development, and revitalization/stabilization.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved many complex LIHTC projects and one investment under the SBA Small Business Investment Company (SBIC) program where the bank acted in a leadership role with participations from federal, state, local housing agencies, and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In January 2016, WFBNA provided a $30.8 million investment for a 640-unit LIHTC affordable housing development. This development is located in Minneapolis, Minnesota and is comprised of two nearly identical 21-story high-rise buildings containing 320 units each, with a total of 112 studio units, 416 1BR units and 112 2BR units. The buildings are located two blocks apart in a low-income census tract. Of the total units, 128 are reserved for households with incomes up to 50 percent of the area MFI, 474 units are reserved for up to 60 percent of the area MFI, and 38 units are market rate. Ten of the units will be targeted to long-term homeless households with support services provided. WFBNA's financing for this development is responsive to the identified need for affordable multifamily housing and addressing homelessness. WFBNA demonstrated multi-faceted support by providing both the construction loan ($19.8 million) and equity investment to support this affordable housing development. This activity was highly complex as there are multiple layers of funding involved, including financing from US Department of HUD, Minnesota Housing Finance Agency, Hennepin County, and the City of Minneapolis.
- In September 2013, WFBNA invested $8 million in a fund licensed by the SBA under the SBIC. Of this total investment, $6.0 million was targeted for investment in a company located in St. Paul, Minnesota. This organization specializes in providing growth capital to lower middle market businesses within Minneapolis including the AA through investments in subordinated debt and equity securities.
- During the exam timeframe, WFBNA provided several grants totaling $1.5 million as a part of the DCC program benefiting small businesses in the broader statewide of Minnesota including the Minneapolis MMSA AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

SERVICE TEST

The institution's performance under the Service Test in the Minneapolis MMSA is Outstanding.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Minneapolis MMSA AA is excellent.

Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the institution's AA.

Distribution of Branch Delivery System											
Assessment Area	Deposits	Branches						Population			
	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%)				% of Population within Each Geography *			
				Low	Mod	Mid	Upp	Low	Mod	Mid	Upp
Minneapolis MMSA	100.0	107	100.0	4.7	22.4	50.5	22.4	5.3	19.3	49.9	25.3

* May not add up to 100 percent due to geographies with unknown tract income level and rounding. Population in census tracts with income unknown represent 0.2 percent in the AA.

Distribution of Branch Openings/Closings							
Assessment Area	# of Branch Openings	# of Branch Closings	Net change in Location of Branches (+ or -)				
			Low	Mod	Mid	Upper	NA
Minneapolis MMSA	2	7	0	-1	-4	0	0

As of December 31, 2018, WFBNA operates 107 branches and 506 ATMs in the Minneapolis MMSA AA. Of these branches, 104 are full-service locations and three are limited-service branches. The institution's branches include five branches in low-income geographies and 24 branches in moderate-income geographies. The branch distribution in low-income geographies is near to the percentage of the population in low-income geographies and branches in moderate-income geographies exceeds the percentage of the population in moderate-income geographies in the AA. When considering an additional nine branches within close proximity to LMI geographies, the bank's distribution further exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank opened two branches in upper-income geographies. The bank closed one branch in a moderate-income, four branches in middle-income, and two branches in upper-income geographies. The closure of the branch in a moderate-income geography did not negatively impact the distribution of branches relative to the population residing in those geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. While there are slight variation of opening and closing times, most branches are open Monday through Friday from 9:00 am to 6:00 pm with one branch opening at 8:30 am and 22 branches closing between 5:00 pm and 5:30 pm. Of all branches, 92 branches are also open on Saturdays. All WFBNA services are available at all branches and all ADS discussed bank-wide are available in this AA.

Community Development Services

The institution is a leader in providing CD services.

The level of CD services in the Minneapolis MMSA AA is excellent. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 1,170 CD service activities to 132 organizations since the last evaluation, logging a total of 4,981 qualified hours within this AA. A majority (82 percent) of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing (13 percent), economic development (4 percent), and revitalization/stabilization (1 percent) distressed geographies within the AA. The bank's financial assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- A WFBNA team member provided 22 hours of board service and 13 other WFBNA team members provided 718 hours of tax preparation through the VITA program. Refer to the comments in the institution Innovative or Flexible Retail Service Programs section of this public evaluation for additional details regarding this program.
- Two WFBNA team members provided 321 hours of board service to a housing-related organization that promotes homeownership through the development and delivery of homebuyer and foreclosure prevention services. According to the organization, 80 percent of its clients are LMI individuals.
- Three WFBNA team members provided 107 hours of board service to an economic development organization that serves women-owned businesses. The mission of this organization is to help women attain economic self-sufficiency through the business development by providing micro-loans, working capital, education and ongoing consultation through all stages of business. LMI individuals represent approximately 65 percent of its clients.

Multistate Metropolitan Statistical Area Rating

Myrtle Beach-Conway, SC-NC CSA (Myrtle Beach MMSA AA)

CRA rating for the Myrtle Beach, Myrtle Beach MMSA AA[11]: Satisfactory
The Lending Test is rated: High Satisfactory
The Investment Test is rated: High Satisfactory
The Service Test is rated: Low Satisfactory

The major factors that support this rating include:

- Excellent lending activity;
- Good geographic distribution of loans;
- Good borrower distribution of loans;
- Adequate level of CD loans;
- WFBNA's use of flexible products has a neutral impact on the Lending Test;
- Good level of CD investments that are responsive to AA needs;
- Retail delivery systems are reasonably accessible to all portions of the AA; and
- Adequate CD services.

Description of Institution's Operations in Myrtle Beach MMSA AA

WFBNA delineated two AAs within the Myrtle Beach-Conway, SC-NC CSA. Refer to Appendix A for a complete description of the AA. These areas were combined, analyzed, and presented at the CSA level with an AA name of Myrtle Beach MMSA. The Myrtle Beach MMSA AA represents the 43rd largest rated area in terms of deposits. WFBNA has $967 million of deposits in the Myrtle Beach MMSA AA representing 0.1 percent of adjusted deposits. In the Myrtle Beach MMSA AA, WFBNA ranked third out of 26 institutions with 9.4 percent market share. The top two banks within the MMSA in terms of deposits, are BB&T with 21.1 percent deposits and Bank of America with 10.4 percent deposits. WFBNA operates 12 branches and 26 ATMs within the Myrtle Beach MMSA AA, representing 0.2 percent of the bank's branches and 0.2 percent of the bank's ATMs. In the Myrtle Beach MMSA, the bank originated and purchased $3.7 billion in loans or 0.2 percent of total bank loan originations and purchases during the evaluation period. The bank's primary loan products in the Myrtle Beach MMSA is home mortgage loans and small business loans.

Demographic Data

The following table provides a summary of the demographics that include housing and business information for the Myrtle Beach MMSA AA. Table A shows that the volume of tracts, population, and OOUs is very small in the low-income tracts and over 37 percent of families in the AA are LMI. The area's median housing value in the Myrtle Beach MMSA AA is four times the MSA median income, but 5 times moderate-, and 8 times low-income, indicating a limited proportion of OOUs are affordable to

[11] This rating reflects performance within the multistate metropolitan statistical area. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

low-income residents. Median rents and the significant percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Economic Data

According to the December 2018 Moody's Analytics report, Myrtle Beach's tourism-driven economy is taking a breather after an impressive run. An influx of retirees and visitors helped the metro area soar in 2016 and 2017 but weakening in consumer industries and government has taken the expansion down a notch. Thanks to outsize gains in housing-related industries and professional/business services, Myrtle Beach is still one of the state's top performers. Hiring is being constrained by the tight labor market. Expanding at its slowest rate in more than four years, the labor force is larger than a year ago, but just barely. Wage growth is picking up on cue with average hourly earnings up close to 4 percent year-over-year. Tourism will reign supreme over Myrtle Beach's economy and will benefit from strengthening growth in U.S. disposable personal income. Myrtle Beach ranks among the most tourist-dependent metro areas in the nation: Leisure/hospitality and retail account for nearly half of all jobs and a share of income that is three times higher than in the rest of the state and the nation. Although most visitors drive to the area, air travel is the choice of a larger number of visitors. Per Moody's, major area employers include Walmart Stores Inc., Coastal Carolina University, and Conway Medical Center.

Homes in the Myrtle Beach area are selling at a rapid pace. Compared to just a few years ago, property values are escalating at a very rapid rate. Inventory is low, interest rates are still low and buyers are relocating to the area which is driving prices up. Builders are developing and building at record paces and in turn buyers are waiting in line. Demand for new construction is strong which in turn helps with job growth and the economy. The current economic indicators are indicating that values will steadily rise and inventory will remain low. The low inventory is particularly difficult for first time home buyers as they try to gain a foot hold in the real estate market.

According to the U.S. BLS, the MSA unemployment rate as of April 2018 was 4.7 percent, down considerably from 10.5 percent at the beginning of the evaluation period. The MSA unemployment rate was higher than the State of North Carolina at 3.6 percent and State of South Caroline at 2.7 percent.

Community Contact

The analysis takes into consideration comments provided by two community contacts that serve the bank's Myrtle Beach MMSA AA. One of the community contacts represents an economic development corporation and the other represents a small business development in Horry and Georgetown counties.

The contact stated that economic development for businesses outside of tourism and health care is a significant focus to diversify the economy. Industries in advanced manufacturing, aerospace, marine, and technology will provide increased economic diversification, but these industries do not have the skilled labor to expand as compared to larger higher educated communities. A concerted effort to continue to attract high-paying companies and entrepreneurs will pay medium to long-term dividends for the community. The Myrtle Beach Regional Economic Development Corporation is trying to recruit more businesses with year-round employment opportunities through tax incentives, marketing of lower cost operating expenses, and lower cost of land.

Both contacts stated that small business owners need assistance with borrower education including credit scores and cost of credit, and micro loans between $5,000 and $50,000. The contacts also indicated that affordable housing is also a critical needs within the AA. WFBNA was noted as providing significant resources for small business owners including education, SBA lending and credit card loans to address these needs.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business lending represents a primary credit need for the Myrtle Beach MMSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of tracts, population, OOUs, and small businesses coupled with limited home affordability for LMI individuals.

Scope of Evaluation in Myrtle Beach MMSA AA

The rating for the Myrtle Beach MMSA AA is based on a FS evaluation of the bank's performance in the Myrtle Beach-Conway, SC-NC CSA. A limited portion of the bank's overall lending, investments, and services were conducted in the Myrtle Beach MMSA AA; therefore, the performance in the Myrtle Beach MMSA AA received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN MYRTLE BEACH MMSA AA

LENDING TEST

The bank's performance under the Lending Test in the Myrtle Beach MMSA AA is rated High Satisfactory.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Myrtle Beach MMSA AA is good.

Lending Activity

Based on the tables below, lending levels reflect an excellent responsiveness to the credit needs in the AA taking into account the number and dollar amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Myrtle Beach MMSA	19,169	4,080	84	11	23,344

Dollar Volume of Loans (000's)					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Myrtle Beach MMSA	$3,498,915	$236,892	8,475	$7,583	3,751,865

WFBNA ranked third in deposits with a 9.4 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with an 8.8 percent market share. There is strong competition as reflected by the 578 lenders and 26 depository institutions in the AA. The number two lender in the market was BB&T with a 6.3 percent market share.

In small loans to businesses, WFBNA ranked eighth with a market share of 5.6 percent. The top three lenders were American Express with a market share of 17.0 percent, the Conway National Bank with a market share of 10.0 percent, and BB&T with a market share of 9.2 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in its AA.

Home Mortgage Loans

Refer to Table O in the "MMSA" section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- For both 2012-2016 and 2017-2018 periods, the proportion of home mortgage loans in low-income geographies is well below the aggregate distribution of loans and is below the proportion of OOUs in those geographies. However, less weight was given to WFBNA's performance in low-income geographies because of the very small proportion of the bank's tracts, loans, and OOUs in low-income geographies.
- The proportion of loans in moderate-income geographies exceeds the aggregate distribution of loans and is well below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the "MMSA" section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- For 2012-2016, the proportion of the bank's small business loans in low-income geographies exceeds both the aggregate distribution of loans and the proportion of businesses in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is well below the proportion of businesses located in those geographies.
- Based on the bank's small business lending in 2017-2018, the bank's small business lending is slightly below the combined performance in 2012-2016.

Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and businesses of different sizes.

Home Mortgage Loans

Refer to Table P in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- The Myrtle Beach MMSA AA has homeownership affordability hurdles especially for LMI borrowers. As noted above, the area's median housing value is 8 times the income of low-income and 5 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI borrowers. Despite the affordability challenges, the bank's overall home mortgage lending to low-income borrowers in both 2012-2016 and 2017-2018 periods substantially meets the aggregate distribution of loans and exceeds the aggregate distribution of loans.
- The bank's lending to low-income borrowers is significantly below the proportion of families and lending to moderate-income borrowers is below the proportion of families.

Small Loans to Businesses

Refer to Table R in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's originations and purchases of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the percentage of small loans to businesses originated or purchased exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Community Development Lending

The institution has made an adequate level of CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The level of CD lending in the Myrtle Beach MMSA AA is adequate. WFBNA made 11 CD loans in its AA for a total of $7.6 million representing 7 percent of allocated tier 1 capital. CD lending performance has a neutral impact on the lending test rating. A substantial majority of these loans were for the primary purpose of affordable housing which is a critical CD need in the bank's AA. The bank made 8 loans totaling $7.3 million (96 percent) for the purpose of affordable housing. Additionally, the bank extended 3 CD loans totaling $300,000 for the primary purpose of community services to assist LMI individuals.

Examples of CD loans in the AA include:

- In September 2015, WFBNA provided a $2.4 million loan for a multifamily property in Myrtle Beach. Eighty-two percent of the units are restricted to tenants earning between 50 and 60 percent of the area MFI.
- In May 2017 WFBNA provided a $4.5 million loan to construct an affordable housing development located in Myrtle Beach. This LIHTC development has 100 percent of the units restricted to tenants earning between 50 and 60 percent of the area MFI.

Product Innovation and Flexibility

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 26 loans totaling $3.1 million to LMI homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.

INVESTMENT TEST

The bank's performance under the Investment Test in the Myrtle Beach MMSA AA is rated High

Satisfactory.

Based on a FS review, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Myrtle Beach MMSA AA is good.

Qualified Investments										
Assessment Area	Prior Period*		Current Period		Total				Unfunded Commitments **	
	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Myrtle Beach MMSA	2	$92	88	$9,848	90	100.0	$9,940	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

The institution has a significant level of qualified CD investments and grants, occasionally in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 9.2 percent of tier 1 capital allocated to the AA.

The institution exhibits good responsiveness to credit and community economic development needs identified in the AA, including affordable housing, community services, revitalization/stabilization for LMI individuals and geographies. Over 97 percent of the dollar volume of the bank's current and prior period investment focused on affordable housing which is a primary credit need in the AA. Additionally, the bank provided 82 grants totaling $649,110 to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved several complex LIHTC projects where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased several government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In May 2017, WFBNA invested $5.0 million for the construction of a 58-unit LIHTC affordable housing complex. This development is located in Myrtle Beach, South Carolina and all units are restricted to tenants earning between 50 and 60 percent of the area MFI. WFBNA's financing for this development is responsive to the identified need for affordable multifamily housing. WFBNA demonstrated multi-faceted support by providing both the construction loan ($4.5 million) and equity investment to support this affordable housing development.
- In 2015, WFBNA provided a $4.8 million investment in a government single-family mortgage backed security. The investment amount reported of $124,812 represents the allocation of a single property located in a LMI area within the AA from the pool of mortgages under this transaction. The government agency was chartered by Congress in 1970 with a public mission to stabilize the nation's residential mortgage markets and expand opportunities for homeownership

and affordable rental housing. Their statutory mission is to provide liquidity, stability and affordability to the U.S. housing market.

- During the exam timeframe, WFBNA provided two grants totaling $500,000 as a part of the Small Business DCC program benefiting small businesses in the broader statewide of South Carolina including the Myrtle Beach MMSA AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

SERVICE TEST

The institution's performance under the Service Test in the Myrtle Beach MMSA AA is rated Low Satisfactory.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Myrtle Beach MMSA AA is adequate.

Retail Banking Services

Service delivery systems are reasonably accessible to geographies and individuals of different income levels in the institution's AA.

Distribution of Branch Delivery System											
Assessment Area	Deposits	Branches						Population			
	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%)				% of Population within Each Geography*			
				Low	Mod	Mid	Upp	Low	Mod	Mid	Upp
Myrtle Beach MMSA	100.0	12	100.0	0.0	8.3	41.7	50.0	1.3	17.0	63.0	18.5

* May not add up to 100 percent due to geographies with unknown tract income level and rounding. Population in census tracts with income unknown represent 0.2 percent in the AA.

Distribution of Branch Openings/Closings						
Assessment Area	# of Branch Openings	# of Branch Closings	Net change in Location of Branches (+ or -)			
			Low	Mod	Mid	Upp
Myrtle Beach MMSA	0	1	0	0	0	-1

As of December 31, 2018, WFBNA operates 12 branches and 26 ATMs in the Myrtle Beach MMSA AA. Of these branches, 11 are full-service locations and one is a limited-service branch. There are no branches in the low-income geographies; however, the population is very low in the low-income geographies compared to total demographics. There is one branch within a moderate-income CT. The branch distribution in LMI geographies is well below the percentage of the population in LMI CTs in the AA. When considering one additional branch within close proximity to LMI geographies, the bank's branch distribution improves and is below demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed one branch within an upper-income CT since the last evaluation.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Thursday from 9:00 am to 5:00 pm and Friday from 9:00 am to 6:00 pm. Of the total branches, four are also open on Saturdays from 9:00 am to 2:00 pm. All WFBNA services are available at all branches and all ADS discussed bank-wide are available in this AA.

Community Development Services

The institution provides an adequate level of CD services.

The level of CD services in the Myrtle Beach MMSA AA is adequate. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 86 CD service activities to 19 organizations since the last evaluation, logging a total of 308 qualified hours within this AA. A substantial majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing which is an identified credit needs in the AA. The bank's assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- WFBNA team members provided 12.5 hours of financial education to a nonprofit housing organization that works in partnership with people in need to build decent and affordable housing.
- WFBNA team members provided 150.5 hours of tax preparation through the VITA program. Refer to the comments in the institution Innovative or Flexible Retail Service Programs section of this public evaluation for additional details regarding this program.

Multistate Metropolitan Statistical Area Rating

New York-Newark, NY-NJ-CT-PA CSA (New York MMSA AA)

CRA rating for the New York MMSA AA[12]: Outstanding
The Lending Test is rated: Outstanding
The Investment Test is rated: Outstanding
The Service Test is rated: High Satisfactory

The major factors that support this rating include:

- Excellent lending activity;
- Good geographic distribution of loans;
- Good borrower distribution of loans;
- WFBNA is a leader in providing CD loans, which has a significant positive impact on the Lending Test;
- WFBNA's use of flexible products has a positive impact on the Lending Test;
- Excellent level of CD investments that are responsive to AA needs;
- Retail delivery systems are accessible to all portions of the AA; and
- Good CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in New York MMSA AA

WFBNA delineated eight AAs within the New York-Newark, NY-NJ-CT-PA CSA. Refer to Appendix A for a complete description of the AA. These areas were combined, analyzed, and presented at the CSA level with an AA name of New York MMSA. WFBNA has $68.8 billion of deposits in the New York MMSA AA representing 5.4 percent of adjusted deposits. The New York MMSA AA represents the fourth largest rated area in terms of deposits. In the New York MMSA AA, WFBNA ranked eighth out of 254 depository institutions with 3.5 percent market share. The top three banks within the MMSA in terms of deposits, are JP Morgan Chase Bank with 30.3 percent deposits, Bank of America with 7.6 percent deposits, and Citibank with 6.0 percent deposits. WFBNA operates 419 branches and 736 ATMs within the New York MMSA AA, representing 7.5 percent of the bank's branches and 5.4 percent of the bank's ATMs. In comparison to the percentage of deposits and branching network, the bank originated and purchased $171.4 billion in loans or 8.9 percent of total bank loan originations and purchases during the evaluation period. The bank's primary loan products in the New York MMSA is home mortgage loans and small loans to businesses.

Demographic Data

The following table provides a summary of the demographics that include housing and business information for the New York MMSA AA. Table A shows that the volume of OOUs is very small in the low-income tracts and over 39 percent of families in the AA are LMI. The area's median housing

[12] This rating reflects performance within the multistate metropolitan statistical area. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

value in the New York MMSA AA is 4.4 times the MSA highest median income, but 5 times moderate-, and 8 times low-income, indicating a limited proportion of OOUs are affordable to LMI residents.

Table A – Demographic Information of the Assessment Area

Assessment Area: New York-Newark NY-NJ-CT-PA CSA (2016)

Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #
Geographies (Census Tracts)	5,484	10.9	21.9	33.5	32.1	1.6
Population by Geography	23,076,664	10.9	22.4	32.2	34.3	0.2
Housing Units by Geography	9,169,953	10.1	22.1	32.7	35.1	0.0
Owner-Occupied Units by Geography	4,698,488	2.6	13.8	37.9	45.8	0.0
Occupied Rental Units by Geography	3,654,001	19.3	32.2	26.3	22.1	0.0
Vacant Units by Geography	817,464	11.8	25.3	31.8	31.2	0.0

Due to rounding, totals may not equal 100.0
(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

Allentown-Bethlehem-Easton, PA-NJ MSA

According to the May 2018 Moody's Analytics report, Allentown's economy is in the expansion stage of the business cycle and faring better than previous thought. The area's economic drivers are medical centers and manufacturing. Per Moody's, healthcare is driving the area's expansion, thanks in part to a high and rising proportion of senior citizens. In the next five years, healthcare is expected to account for a quarter of net new jobs created in the MSA. Major area employers include Lehigh Valley Health Network, St. Luke's University Health Network and Air Products and Chemicals. The largest economic sector for employment is Education and Healthcare followed by Business and Professional Services and Retail Trade.

Despite a healthy labor market, the housing market has yet to capitalize on years of pent-up single-family housing demand. Long-lasting scars from the Great Recession are evident in households' unwillingness to invest in residential real estate. Housing starts are only on par with levels at the start of the decade and single-family permits have yet to pick up. However, houses in the Allentown area are relatively affordable, making the metro area attractive to first-time buyers. Beyond that, an improving labor market, accelerating wage growth, and faster rate of household formation will bolster demand and pave the way for more homebuilding and housing related jobs in the near term.

According to the U.S. BLS, the MSA unemployment rate as of May 2018 was 4.5 percent, down considerably from 8.5 percent at the beginning of the evaluation period. However, the MSA unemployment rate was above the State of Pennsylvania and New Jersey rates which were both at 3.9 percent during the same period.

Bridgeport-Stamford-Norwalk, CT MSA

According to the May 2018 Moody's Analytics report, the Bridgeport's economy is in a slump with steep job cuts occurring in both the private and public sectors. The only industries to record moderately strong growth are construction and transportation/warehousing. Despite the job losses, the unemployment rate has held steady due to a contracting labor force. According to the U.S. BLS, unemployment in the MSA was 4.2 percent, compared to 4.1 percent for the State of Connecticut. The area unemployment rate has come down considerably from 7.8 at the beginning of the evaluation period.

The area economy is driven by financial services, high tech, and defense spending. The largest economic sectors for employment are Education and Health Services, Professional and Business Services, and Retail Trade. The MSA's top employer, Sikorsky Aircraft Corp., is a large producer of helicopters for the defense industry. Other top employers include St. Vincent's Medical Center, and Stamford Hospital. The area is also known as a Global financial center and benefits from its proximity to NYC and a highly educated labor force. Bridgeport is dependent on its southern neighbor for jobs and personal income while its economy is in a lull with approximately one in eight area residents working in NYC. House prices are rising only slowly as the weak job market and lackluster population growth depress demand. Single-family construction is flat and multifamily building is at a multiyear low.

East Stroudsburg, PA MSA

According to the January 2018 Moody's Analytics report, the East Stroudsburg's economy is at risk of a recession. The labor market slowed substantially in 2017 after making small gains in 2015 and 2016. Both private and public sectors are weak and struggling to retain jobs. The area unemployment rate of 5.8 percent per the U.S. BLS, is considerably below the 9.7 percent at the beginning of the evaluation period. However, the MSA has the second highest unemployment rate in the State of Pennsylvania (3.9 percent overall) and is falling only because of a contracting labor force. The area's economic drivers are defense spending and tourism. East Stroudsburg benefits from its location near the Poconos Mountains which draws tourists year-round. The fastest job growth has been in the leisure/hospitality industry where one of five area workers is employed, which is almost twice the U.S. average. The area's largest employer, the Tobyhanna Army Depot benefits from increases in defense spending including pay increases for military personnel. Other major employers include Sonofi Pasteur and Pocono Medical Center. The largest economic sectors for employment are Leisure and Hospitality Services, Government, and Retail Trade.

Kingston, NY MSA

Per the May 2018 Moody's Analytics report, after growing strongly in 2017, the Kingston economy weakened in 2018. The area suffers from a declining population which has been a headwind for consumer-related industries. Major economic drivers are tourism and healthcare, which is being helped by the area's large senior population. Construction has been a dependable source of job growth, but the pace is expected to slow as the expansion matures and population losses are felt. Per the U.S. BLS, the unemployment rate was 4.5 percent in May 2018, down considerably from 8.3 percent at the beginning of the evaluation period. The unemployment rate though improved, still fares worse than the State of New York at 3.7 percent. The area's top employers are Health Alliance of the Hudson Valley and State University of New York at New Paltz. The largest economic sectors for employment are Government, Education and Health Services, and Retail Trade.

Construction will be a dependable source of job growth but the pace will slow as the expansion matures and population losses bite. Although nonresidential and residential construction are trending higher upside potential is limited. New industrial development will slow along with growth in manufacturing production, and the market for retail and office space will not tighten enough to warrant much new construction at higher interest rates. Prospects are more favorable for residential construction; single-family housing is modestly undervalued and affordability much higher than it is nationally or in New York City or its outer boroughs. Still, absent faster household formation, homebuilding will not reach its prerecession trend any time soon.

New Haven-Milford, CT MSA

Per the May 2018 Moody's Analytics report, the New Haven economy is in the recovery stage. New Haven is home to Yale, Quinnipiac, and Southern Connecticut State Universities and is thus heavily reliant on higher education. Per Moody's, net job creation over the last year has been minimal and the state's strained finances have driven public sector employment to a twenty-year low. New Haven's aging population and outflow of residents have led to a declining labor force. House price appreciation has picked up but builders remain hesitant to put up single-family housing given persistent out-migration. Healthcare is another important industry in New Haven and was the largest single contributor to job gains over the past year. Education and Health Services is by far the largest economic sector by employment, followed by Government, and Professional and Business Services. The area's largest employers are Yale New Haven Health System and Yale University. The MSA unemployment rate per the U.S. BLS was 4.8 percent in 2018 compared to 9.1 percent at the beginning of the evaluation period. However, the area unemployment rate is still above that of the State of Connecticut overall (4.1 percent).

New York-Newark-Jersey City, NY-NJ-PA MSA

According to the August 2018 Moody's Analytics report, New York's recent economic performance has not kept pace with the rest of the nation as job growth has been sluggish and wage gains haven't kept up with the national pace. New York is the financial capital of the U.S. and is heavily impacted by Wall Street and the performance of financial markets which have encountered recent turbulence. The major economic drivers are finance, medical centers and tourism. Major employers include, Northwell Health, JPMorgan Chase & Co., NYC Health and Hospitals Corp, University of Rochester, and Citibank, NA. The top economic sectors by employment are Education and Health Services, Government, and Professional and Business Services. The area has suffered from domestic out-migration for many years driven by high costs and an unfavorable industrial structure. In addition, elevated business costs push businesses out of state. On the upside, the area benefits from a skilled labor force and a fast-growing tech sector. High tech is primed for additional growth in NYC given the skilled workforce and the presence of tech giants. Per the U.S. BLS, unemployment in the MSA was 4.3 percent in August 2018 compared to 9.0 percent at the beginning of the evaluation period 2012.

After years of excessive construction in the ultra-luxury market, prices have declined. Transaction volume has declined in four straight quarters, according to the Real Estate Board of New York. Condo prices are falling and concessions by landlords are decreasing. With more units in the pipeline, downward price pressures will intensify and multifamily starts will remain depressed on the heels of their worst 12-month period since 2014. The metro division is also plagued by the effects of the new tax law. Limits on tax deductions for homeowners are weighing on northern New Jersey and Westchester County. Data from local realtors' associations show declining sales and homes spending longer on the market. This foreshadows intensifying downward price pressures as buyers and sellers adapt.

Trenton, NJ MSA

According to the May 2018 Moody's Analytics report, Trenton's expansion is regaining traction but soft spots remain. Year-ago growth in payroll employment exceeded the NJ and U.S. averages, driven by steady gains in state government and rapid expansion in logistics. Despite the tight labor market, income measures are far from stellar. Housing is another soft spot. Multi-family building has picked up over the past year, but single-family building is still languishing.

The economy is heavily dependent on public sector which is a strength but is under constant threat from NJ's fiscal problems. State government jobs have risen 3 percent on average in each of the past two years. Still the outlook is bleak. NJ's debt burden of $221 billion translates to $61,000 per taxpayer. Professional services will do the heavy lifting for Trenton over the next two years. Performance in finance will be mixed. Government is by far the largest economic sector by employment, followed by Education and Health Services, and Professional and Business Services. The area's largest employers are Bank of America, Princeton University, and Bristol-Myers Squibb. The MSA unemployment rate per the U.S. BLS was 4.0 percent in 2018 compared to 8.3 percent at the beginning of the evaluation period. The unemployment rate is similar to the State of New Jersey at 4.1 percent.

Community Contact

The analysis takes into consideration comments provided by ten community contacts that serve the bank's New York MMSA AA. Five of the ten community contacts represent affordable housing agencies, two represent Community Development organizations, and one is a non-profit legal service organization. In addition, two contacts represent Interagency CRA Group Meetings hosted by regulators with a combined 17 community advocates participating.

The New York MMSA is broad and diverse economically and demographically. New York City, the principal city in the MMSA, is the single largest regional urban economy in the country and is the most significant economic contributor to the AA. While there are huge pockets of very wealthy in New York and throughout the MMSA, there is also a significant number of LMI people and LMI communities in the AA. Additionally, nearly one in every 121 New Yorkers is currently homeless. LMI families with children make up three-quarters of the homeless shelter population in the AA.

The five housing agency contacts serve various parts of the AA and indicate an overwhelming need for affordable housing, including affordable senior housing and shelter solutions for the homeless. A significant portion of very low-income New Yorkers pay more than half their income in rent. While the city has been making strides towards creating and preserving affordable housing, there is a need to create or preserve 300,000 affordable housing units by 2026. One affordable housing contact commented there is also a lack of small affordable loan products, which has driven LMI consumers to rely more on payday lenders, rent to own, and other predatory lenders causing many consumers to end up in an endless debt cycle that ruins their credit. While another affordable housing community contact commented there is a need for basic (no fee) banking products and services. The contact discussed that while local institutions often collaborate with housing non-profits to fund programs and events, it is less common to receive funds in the form of grants and low-cost loans which is also a need in the AA. Other needs throughout the AA include small business lending and micro-loans to small businesses.

The analysis takes into consideration comments provided during an Interagency CRA Group Meeting with a group of six community organizations representing the Newark and Elizabeth, NJ areas of the AA. The organizations provide shelter services for homeless families, rental assistance, social service assistance to homeless people and individuals with disabilities, job training, and first-time home buyers program. One of the community contacts from an affordable housing agency in New Jersey described the economic conditions of the AA as improving, although at a slow pace. Despite the improving economy, the community contact indicated that the high cost of living and unemployment in the AA continue to strain the incomes of LMI families. Additionally, there are still some families awaiting Hurricane Sandy relief assistance to rebuild homes. One community advocate from a CDC in New Jersey mentioned that as a result of Superstorm Sandy, businesses of all sizes experienced a drop in critical working capital, even if they didn't have physical damage from the storm. Revenue losses from Superstorm Sandy were due to power outages, delayed supply deliveries, and lack of customers. To date, one non-profit in the AA has loaned $3.2 million to over 100 small businesses in 14 counties throughout New Jersey. Business owners have used the funds to pay off more expensive debt, purchase equipment and inventory, renovate or expand their locations, and support general working capital needs. The community advocate mentioned there is a strong need for loans to small business owners with low interest rates to finance the purchase, construct or improve of owner-occupied property, and/or to purchase major equipment.

The bank conducted research in the AA and identified community needs for affordable housing for low-income families, disaster recovery due to continued effects of Super Storm Sandy, financial education for the unbanked or underbanked residents; and small business assistance for small business owners.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing particularly for LMI families and the chronically homeless are primary credit needs of the AA. Additionally, small business loans and micro lending to small businesses are primary credit needs for the AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

Scope of Evaluation in New York MMSA AA

The rating for the New York MMSA AA is based on a FS evaluation of the bank's performance in the New York-Newark, NY-NJ-CT-PA CSA. The New York MMSA is the fourth largest rated area and along with 12 other rated areas represents the bank's most significant markets in terms of lending, deposit, and branch distribution; therefore, the performance in the New York MMSA AA contributed to the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN NEW YORK MMSA AA

LENDING TEST

The bank's performance under the Lending Test in the New York MMSA AA is rated Outstanding.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the New York MMSA AA is excellent.

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to the credit needs in the AA taking into account the number and dollar amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
New York MMSA	439,333	191,262	839	340	631,774

Dollar Volume of Loans (000's)					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
New York MMSA	$161,563,244	$9,815,285	$27,241	$5,185,314	$176,591,084

WFBNA ranked eighth in deposits with 3.5 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 10.3 percent market share. There is strong competition as reflected by the 1,059 lenders and 254 depository institutions in the AA. The number two lender in the market was Chase with a 6.4 percent market share.

In small loans to businesses, WFBNA ranked seventh with a market share of 3.1 percent. The top three lenders were American Express with a market share of 32.2 percent, JPMorgan Chase Bank with a market share of 15.4 percent, and Citibank with a market share of 6.8 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in its AA.

Home Mortgage Loans

Refer to Table O in the "MMSA" section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- For 2012-2016, the combined proportion of home mortgage loans in low-income geographies is below the aggregate distribution of loans and near to the proportion of OOUs in those geographies. However, less weight was given to WFBNA's performance in low-income geographies because of the very small proportion of OOUs in low-income geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and below the proportion of OOUs in those geographies.
- The bank's home mortgage lending in 2017-2018 is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the "MMSA" section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is adequate.

- For both 2012-2016 and 2017-2018 periods, the proportion of the bank's small business loans in low-income geographies is below both the aggregate distribution of loans and the proportion of businesses located in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is below the proportion of businesses located in those geographies.

Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and businesses of different sizes.

Home Mortgage Loans

Refer to Table P in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- The New York MMSA AA has significant homeownership affordability hurdles especially for LMI borrowers. As noted above, the area's median housing value is 8.9 times the income of low-income borrowers and 5.5 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI. Despite the affordability challenges, the bank's overall home mortgage lending in both 2012-2016 and 2017-2018 periods to low-income borrowers exceeds the aggregate distribution of loans and is significantly below the percentage of families.
- The bank's lending to moderate-income borrowers substantially meets the aggregate distribution of loans and is below the proportion of families.

Small Loans to Businesses

Refer to Table R in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's originations and purchases of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is well below the percentage of small businesses located in the AA.

Community Development Lending

The institution is a leader in making CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The level of CD lending in the New York MMSA AA is excellent. WFBNA made 340 CD loans in its AA for a total of $5.2 billion, which represents over 67 percent of allocated tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The majority of these loans were for the primary purpose of affordable housing which is a critical CD need in the bank's AA. The bank made 199 loans totaling $3.8 billion (73.1 percent) for the purpose of affordable housing. Additionally, the bank extended 90 CD loans totaling $464 million for the primary purpose of community services, 37 loans totaling $76 million for the primary purpose of economic development, and 14 CD loans totaling $814 million for revitalization and stabilization in the AA.

Examples of CD loans in the AA include:

- In May 2018, WFBNA provided a $470 million loan for an affordable housing development located in a moderate-income census tract in Brooklyn. The development consists of nearly 6,000 affordable units spread across 46 high-rise apartment buildings. Sixty percent of units are further subsidized under a long-term HAP contract and an additional 500 units have Section 8 vouchers. The activity was responsive to an identified need for affordable housing.
- In June 2017, WFBNA provided a $20 million loan extension for an affordable housing development in Midtown Manhattan which includes 36 affordable units. The building was financed under the City's Inclusionary Housing Program which mandates 30-year affordability to households at or below 80 percent of area MFI.
- In March 2013, WFBNA provided two loans totaling $5.8 million to fund the expansion of a small business in Edison, New Jersey. The loan was made in conjunction with the SBA's 504 CDC program. The activity was responsive to an identified need for access to capital for small businesses.
- In February 2016, WFBNA provided an $80 million construction loans for a mixed-development located in a moderate-income tract in downtown Stamford, Connecticut. The development includes retail, restaurants and 325 apartments located within walking distance of the Stamford Transportation Center. The City of Stamford's Master plan calls for retail, high-density residential, and transit-oriented development in the downtown area that continues to face significant challenges.
- In September 2015, WFBNA provided a $96 million construction loan for redevelopment of a vacant site located in a moderate-income tract in NYC which had sat vacant for four decades since the city demolished many of the area's tenement buildings through Urban Renewal. The development consists of mixed income housing and includes 59 affordable housing units restricted to tenants earning between 40 and 60 percent of the area MFI. The project was expected to create approximately 1,600 permanent jobs and 4,400 construction jobs. The activity was responsive to the identified need for affordable multifamily housing. The activity was also highly complex in that it involved multiple funding sources, NMTC, and several financial institutions.

Product Innovation and Flexibility

The institution makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. The bank launched the NeighborhoodLIFT program in the New York MMSA AA in November 2017 and more than 500 potential homebuyers attended the event. Of the 500 in attendance, WFBNA originated 144 mortgage loans totaling $49.4 million. Under the *your*FirstMortgage loan program the bank has funded 618 loans totaling $109.9 million to LMI homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding these programs.

INVESTMENT TEST

The bank's performance under the Investment Test in the New York MMSA AA is rated Outstanding.

Based on a FS review, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the New York MMSA AA is excellent.

Qualified Investments										
Assessment Area	Prior Period*		Current Period		Total				Unfunded Commitments **	
	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
New York MMSA	85	$150,819	1,908	$2,791,622	1,993	100.0	$2,942.441	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 38.0 percent of tier 1 capital allocated to the AA.

The institution exhibits excellent responsiveness to credit and community economic development needs identified in the AA, including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 96 percent of the dollar volume of the bank's current and prior period investment focused on affordable housing which is a primary credit need in the AA. Additionally, the bank provided over 1,700 grants totaling $49.8 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes extensive use of innovative and/or complex investments to support CD initiatives. CD Investments involved many complex LIHTC and NMTC projects where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In July 2013, WFBNA made a $276 million investment in an affordable housing fund offered by the New York City Housing Authority (NYCHA). All properties are located in New York City, New York, and are restricted to tenants earning 80 percent or less of the area MFI. This fund involves 14,465 public housing units in 155 buildings clustered in 13 distinct locations throughout New York City. Of the units, 12,219 are designated as LIHTC units and restricted to tenants earning 60 percent or less of the area MFI. The remaining 2,246 units are restricted to tenants earning 80 percent or less of the area MFI. NYCHA's mission is to increase opportunities for LMI individuals providing safe, affordable housing, and facilitating access to social and community services.
- In September 2017, WFBNA made a $6.0 million NMTC investment for the development of a new Federally Qualified Health Center (FQHC) in Bronx, NY. The FQHC is located in a low-income census tract and transformed an existing dilapidated medical/retail building into a new first-class medical facility. The new facility contains 10 new examination rooms, space for routine primary care, mammography, optometry, podiatry and mental health services and offer

high-quality health services to the residents of the surrounding low-income area with the potential to serve over 18,000 patients. Site staffing includes doctors, clinical support staff, and administrative/other staff. Staff FTEs in each category will increase annually to support enhanced operations and provide increased patient services over time.

- During the exam evaluation period, WFBNA provided 52 housing counseling grants totaling $314,700 through the HCGP benefiting local nonprofit housing organizations to create affordable and sustainable homeownership opportunities for LMI individuals in the New York MMSA AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.
- During the exam timeframe, WFBNA provided two grants totaling $450,000 through the Small Business DCC Program benefiting small businesses in the New York MMSA AA. Refer to the comments in the institution Innovative or Flexible Lending Practices section of this public evaluation for additional details regarding this program

SERVICE TEST

The institution's performance under the Service Test in the New York MMSA AA is rated High Satisfactory.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the New York MMSA AA is good.

Retail Banking Services

Service delivery systems are accessible geographies and individuals of different income levels in the institution's AA.

Distribution of Branch Delivery System											
	Deposits	Branches						Population			
Assessment Area	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%) *				% of Population within Each Geography *			
				Low	Mod	Mid	Upp	Low	Mod	Mid	Upp
New York MMSA	100.0	419	100.0	6.4	15.0	30.1	47.8	12.3	21.7	31.6	34.2

* May not add up to 100 percent due to geographies with unknown tract income level and rounding. Population in census tracts with income unknown represent 0.2 percent and the bank's branches in these tracts represent 0.7 percent of total branches in the AA.

Distribution of Branch Openings/Closings							
Assessment Area	# of Branch Openings	# of Branch Closings	Net change in Location of Branches (+ or -)				
			Low	Mod	Mid	Upper	NA
New York MMSA	13	37	0	-2	-4	-17	-1

As of December 31, 2018, WFBNA operates 419 branches and 736 ATMs in the New York MMSA AA. Of these branches, 410 are full-service locations and nine are limited-service branches. The institution's branches include 27 branches in low-income geographies and 63 branches in moderate-income geographies. The branch distribution in LMI geographies is below the percentage of the population in LMI geographies in the AA. When considering an additional 30 branches within close proximity to LMI geographies, the bank's distribution improves and is near to the demographics.

The institution's opening and closing of branches have not adversely affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank opened one branch in moderate-income, two branches in middle-income, and ten branches in upper-income geographies. The bank closed three branches in moderate-income, six branches in middle-income, 27 branches in upper-income geographies. The bank also closed one branch in a geography where income level is "NA" or unknown. The closure of branches in moderate-income geographies did not negatively impact the distribution of branches relative to the population residing in those geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. While there are slight variations in opening and closing times, all but three branches are open Monday through Friday from 9:00 am to 5:00 pm with a few branches opening as early as 8:30 am or as late as 10:00 am and a few closing as early as 4:00 pm or as late as 7:00 pm. One branch is only open on Wednesday between 9:00 am and noon. Of 419 branches, 345 are also open on Saturdays and one is open on Sunday. All WFBNA services are available at all branches and all ADS discussed bank-wide are available in this AA.

Community Development Services

The institution provides a relatively high level of CD services.

The level of CD services in the New York MMSA AA is good. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 1,849 CD service activities to 340 organizations since the last evaluation, logging a total of 5,728 qualified hours within this AA. The majority (85 percent) of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted economic development (9 percent), affordable housing (5 percent), and revitalization or stabilization (1 percent). The bank's financial assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- A WFBNA team member provided six hours of Board service and 63 team members provided 418 hours of financial education at the New Jersey charter school. According to the NCES, the free-and reduced-lunch program participation rate at the school is 88.3 percent.
- A WFBNA team member provided 47 hours of Board service and 251 hours of financial education to a community action committee organization. Five other team members provided an additional eight hours of financial literacy education or technical assistance. This organization provides a variety of services to low-income residents including housing counseling, financial education, and small business support.

- A WFBNA team member provide 125 hours of Board service to a business assistance corporation. This organization is a certified community development company and regulated by the SBA. The organization provides financing to small businesses to assist in job creation.
- A WFBNA team member provided 80 hours of Board service to a business assistance corporation. The organization's mission is to provide loan capital and business mentoring to small business owners that cannot access more conventional bank financing. The objective is to create jobs and foster community-wide economic development.

Multistate Metropolitan Statistical Area Rating

Omaha-Council Bluffs, NE-IA MSA (Omaha MMSA AA)

CRA rating for the Omaha MMSA AA[13]: Outstanding
The Lending Test is rated: Outstanding
The Investment Test is rated: Outstanding
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Excellent lending activity;
- Excellent distribution of loans by borrower profile;
- Adequate geographic distribution of loans;
- WFBNA is a leader in providing CD loans, which has a significant positive impact on the Lending Test;
- WFBNA's use of flexible products has a neutral impact on the Lending Test;
- Excellent level of CD investments that are responsive to AA needs;
- Retail delivery systems are readily accessible to all portions of the AA; and
- Good level of CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in Omaha MMSA AA

WFBNA delineated one AA within the Omaha-Council Bluff, NE-IA MSA. Refer to Appendix A for a complete description of the AA. WFBNA has $3.0 billion of retail deposits in the Omaha MMSA AA representing 0.2 percent of adjusted deposits. The Omaha MMSA AA represents the 30th largest rated area in terms of deposits. In the Omaha MMSA AA, WFBNA ranked third out of 71 institutions with 9.2 percent market share. The first and second banks within the MMSA in terms of deposits, are First National Bank of Omaha and Mutual of Omaha Bank with 28.8 percent and 16.0 percent deposits, respectively. WFBNA operates 20 branches and 42 ATMs within the Omaha MMSA AA, representing 0.4 percent of the bank's branches and 0.3 percent of the bank's ATMs. In the Omaha MMSA AA, the bank originated and purchased $7.2 billion in loans or 0.5 percent of total bank loan originations and purchases during the evaluation period. The bank's primary loan products in the Omaha MMSA AA are home mortgage loans and small business loans.

Demographic Data

The following table provides a summary of the demographics that include housing and business information for the Omaha MMSA AA. Table A shows that the volume of OOUs is small in the low-income tracts and close to 38 percent of families in the AA are LMI. The area's median housing value in the Omaha MMSA AA is twice the MSA median income, but 2.6 times moderate-, and four times low-income, indicating a limited proportion of OOUs are affordable to low-income residents. Median

[13] This rating reflects performance within the multistate metropolitan statistical area. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

rents and the significant percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Due to rounding, totals may not equal 100.0
(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

According to the June 2018 Moody's Analytics report, Omaha has entered the late-cycle phase of its expansion but there is no evidence the economy is overheating. Wage growth that is well above the state and U.S. averages has attracted job seekers, and firms quickly responded to an influx of new labor force entrants by stepping up their net hiring. Net hiring has notably improved in manufacturing, construction, and leisure/hospitality. Despite rising trade concerns, factories in Omaha are responding to stronger growth in manufacturing production by hiring workers at the fastest pace since data began in 1990. Commercial building will prove invaluable to maintaining payroll momentum through the end of next year.

Job gains in insurance and credit intermediation will slow, partly because of weakness in agriculture. The housing market is mixed as single-family starts are struggling but multifamily building is soaring. Major area employers include Nebraska Medical Center, Offutt Air Force Base, and University of Nebraska Medical Center.

According to the U.S. BLS, Omaha's unemployment rate as of June 2018 was 2.6 percent, down from 4.4 percent at the beginning of the evaluation period. The MMSA unemployment rate was the same as the State of Iowa at 2.6 percent and lower than the State of Nebraska at 3.0 percent during the same period.

Community Contact

The analysis takes into consideration comments provided by two community contacts that serve the bank's Omaha MMSA AA. Both organizations serve Pottawattamie County and the entire AA. One organization works with banks to offer affordable mortgage products to LMI individuals. The other organization administers a LIHTC program and provides other services to the AA focusing on revitalizing LMI neighborhoods.

The community contact stated that banks seem to be averse to extending mortgage credit to LMI borrowers and attributed that to the tightening of credit underwriting by financial institutions following the Great Recession. Many banks have yet to relax their tightened underwriting standards exacerbating access to affordable mortgage credit for LMI borrowers. Complicating this is the LMI borrowers' low credit scores. There are housing units affordable to LMI borrowers in price points between $120,000 to $160,000 in LMI census tracts; however, these units are typically older homes in need of some repair.

The contact also mentioned that while banks have seemingly tightened their mortgage underwriting criteria, they remained active in homebuyer assistance efforts to help LMI borrowers prepare for homeownership. The contact indicated that WFBNA is an active investor in their LIHTC program and often seek to provide related construction financing.

The bank conducted research in the AA and identified community needs for affordable housing for low-income families, homeless services such as permanent and supportive housing, small business assistance, and workforce development/job readiness.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing lending represents a primary credit need in the Omaha MMSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs coupled with limited home affordability for LMI individuals.

Scope of Evaluation in Omaha MMSA AA

The rating for the Omaha MMSA AA is based on a FS evaluation of the bank's performance in the Omaha-Council Bluffs, NE-IA MSA. A limited portion of the bank's overall lending, investments, and services were conducted in the Omaha MMSA AA; therefore, the performance in the Omaha MMSA AA received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN OMAHA MMSA AA

LENDING TEST

The bank's performance under the Lending Test in the Omaha MMSA AA is rated Outstanding.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Omaha MMSA AA is excellent.

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to the credit needs in the AA taking into account the number and dollar amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Omaha MMSA	37,992	9,177	269	32	47,470

Dollar Volume of Loans (000's)					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Omaha MMSA	$6,647,463	$505,678	$25,422	$128,812	$7,307,375

WFBNA ranked third in deposits with 9.2 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 11.1 percent market share. There is strong competition as reflected by the 375 lenders and 71 depository institutions in the AA. The second and third lenders in the market were First National Bank of Omaha with a 9.1 percent market share and U.S. Bancorp with a 6.4 percent market share.

In small loans to businesses, WFBNA ranked fifth with a market share of 8.5 percent. The top three lenders were American Express with a market share of 14.1 percent, U.S. Bank with a market share of 11.8 percent, and JPMorgan Chase Bank with a market share of 10.4 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits adequate geographic distribution of loans in its AA.

Home Mortgage Loans

Refer to Table O in the "MMSA" section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- For both 2012-2016 and 2017-2018 periods, the proportion of home mortgage loans in low-income geographies is below the aggregate distribution of loans and is significantly below the proportion of OOUs in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the "MMSA" section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is good.

- For both 2012-2016 and 2017-2018 periods, the proportion of the bank's small business loans in LMI geographies substantially meets the aggregate distribution of loans and is below the proportion of businesses located in LMI geographies.

Distribution of Loans by Income Level of the Borrower

The bank exhibits an excellent distribution of loans among individuals of different income levels and businesses of different sizes.

Home Mortgage Loans

Refer to Table P in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The Omaha MMSA AA has homeownership affordability hurdles especially for low-income borrowers. As noted above, the area's median housing value is four times the income of low-income borrowers indicating a limited proportion of OOUs are affordable to low-income borrowers. Despite the affordability challenges, the bank's overall home mortgage lending in 2012-2016 to low-income borrowers substantially meets the aggregate distribution of loans and is well below the proportion of families.
- The bank's home mortgage lending to moderate-income borrowers exceeds both the aggregate distribution of loans and the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's originations and purchases of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the percentage of small loans to businesses originated or purchased exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Community Development Lending

The institution is a leader in making CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The level of CD lending in the Omaha MMSA AA is excellent. WFBNA made 32 CD loans in its AA for a total of $128.8 million, which represents 38.1 percent of allocated tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The majority of these loans were for the primary purpose of affordable housing, which is a critical CD need in the bank's AA. The bank made 21 loans totaling $67.9 million (52.7 percent) for the purpose of affordable housing. Additionally, the bank extended 10 CD loans totaling $58 million for the primary purpose of community services.

Examples of CD loans in the AA include:

- In August 2016, WFBNA provided an $80 million line of credit for an affordable housing development located in Omaha, NE. The loan proceeds were used to bridge the gap between the receipt of capital contributions from investors and the payment of equity investments to operating partnerships that own LIHTC projects. The development specified that 100 percent of the units are restricted to tenants earning 60 percent or less of the area MFI.
- In June 2017, WFBNA renewed a $5.0 million line of credit to a non-profit organization that provides a life of possibilities for individuals with intellectual disabilities, offering vocational training, independent living skills training and assistance and supportive residential services. According to the organization's VP of Development, 95 percent of its clients are LMI individuals as they earn less than 80 percent of the area MFI.

Product Innovation and Flexibility

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 123 loans totaling $16.2 million to LMI homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.

INVESTMENT TEST

The bank's performance under the Investment Test in the Omaha MMSA AA is rated Outstanding.

Based on a FS review, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Omaha MMSA AA is excellent.

Qualified Investments										
Assessment Area	Prior Period*		Current Period		Total				Unfunded Commitments **	
	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Omaha MMSA	26	$28,820	221	$94,302	247	100.0	$123,122	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 34.4 percent of tier 1 capital allocated to the AA.

The institution exhibits excellent responsiveness to credit and community economic development needs identified in the AA, including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 82 percent of the dollar volume of the bank's current and prior period investment focused on affordable housing which is a primary credit need in the AA. Additionally, the bank provided over 194 grants totaling $3.5 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes extensive use of innovative and/or complex investments to support CD initiatives. CD Investments involved many complex projects where the bank often acted in a leadership role with participations from local and federal agencies and various housing and economic organizations.

Examples of CD investments in the AA include:

- In November 2015, WFBNA invested $8.8 million in a 62-unit LIHTC affordable housing development. This development is located in a middle-income area of Omaha, Nebraska and is made up of 8-two bedroom and one bath units and 54-three bedroom and two bath units targeting seniors 55 and older earning at or below 60 percent area MFI. WFBNA's financing for this development was responsive to the identified need for affordable multifamily housing. WFBNA also demonstrated multi-faceted support by providing the construction loan, equity investment, and the permanent loan ($7 million) to support this affordable housing development.
- In May 2017, WFBNA provided a grant totaling $195,000 through the Small Business DCC Program benefiting the State of Nebraska with a primary focus on North Omaha. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.
- During the exam timeframe, WFBNA provided three grants totaling $747,500 to a local housing organization through the PMP for affordable housing in the Omaha MMSA AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

SERVICE TEST

The institution's performance under the Service Test in the Omaha MMSA AA is rated Outstanding.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Omaha MMSA AA is excellent.

Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the institution's AA.

Distribution of Branch Delivery System											
	Deposits	Branches						Population			
Assessment Area	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%)				% of Population within Each Geography			
				Low	Mod	Mid	Upp	Low	Mod	Mid	Upp
Omaha MMSA	100.0	20	100.0	10.0	30.0	30.0	30.0	8.8	20.3	43.7	27.2

Distribution of Branch Openings/Closings						
Assessment Area	# of Branch Openings	# of Branch Closings	Net change in Location of Branches (+ or -)			
			Low	Mod	Mid	Upp
Omaha MMSA	0	0	0	0	0	0

As of December 31, 2018, WFBNA operates 20 branches and 42 ATMs in the Omaha MMSA AA. Of these branches, 16 are full-service locations and four are limited-service branches. There are two branches in low-income CTs and six branches in moderate-income CTs. The branch distribution in LMI geographies significantly exceeds the percentage of the population in LMI CTs in the AA.

The bank did not open or close any branches during the evaluation period.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 5:30 pm. Of the total branches, 16 are also open on Saturdays from 9:00 am to 1:00 pm. All WFBNA services are available at all branches and all ADS discussed bank-wide are available in this AA.

Community Development Services

The institution provides a relatively high level of CD services.

Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 183 CD service activities to 53 organizations since the last evaluation, logging a total of 793 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing and economic development. The bank's financial assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- A WFBNA team member provided 12 hours of Board activity and outreach to a nonprofit Community Development Financial Institution whose mission is to promote sustainable community development and quality of life in the Midwest by providing resources for the development of affordable housing.
- WFBNA team members provided 16 hours of financial education and outreach to a nonprofit organization that provides housing services ranging from homeless assistance to home ownership, foreclosure prevention, reverse mortgage counseling, financial management and individual development accounts.

Multistate Metropolitan Statistical Area Rating

Philadelphia-Reading-Camden, PA-NJ-DE CSA (Philadelphia MMSA AA)

CRA rating for the Philadelphia MMSA AA[14]: Outstanding
The Lending Test is rated: Outstanding
The Investment Test is rated: Outstanding
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Excellent level of lending activity;
- Good geographic distribution of loans;
- Excellent borrower distribution of loans;
- WFBNA is a leader in providing CD loans, which has a significant positive impact on the Lending Test;
- WFBNA's use of flexible products has a positive impact on the Lending Test;
- Excellent level of CD investments that are responsive to AA needs;
- Retail delivery systems are readily accessible to all portions of the AA; and
- Good CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in Philadelphia MMSA AA

WFBNA delineated five AAs within the Philadelphia-Reading-Camden, PA-NJ-DE-MD CSA. Refer to Appendix A for a complete description of the AA. These areas were combined, analyzed, and presented at the CSA level with an AA name of Philadelphia MMSA. WFBNA has $32.8 billion of deposits in the Philadelphia MMSA AA representing 2.6 percent of adjusted deposits. The Philadelphia MMSA AA represents the seventh largest rated area in terms of deposits. WFBNA ranked fourth out of 124 depository institutions in the market with 6.4 percent deposit market share. The top three banks within the MMSA in terms of deposits were Capital One with 24.3 percent, TD Bank with 23.6 percent, and Chase Bank with 8.3 percent market share. WFBNA operates 214 branches and 404 ATMs within the Philadelphia MMSA AA, representing 3.8 percent of the bank's branches and 3 percent of the bank's ATMs. In comparison to the percentage of deposits and branching network, the bank originated and purchased $56 billion in loans or 3.0 percent of total loan originations and purchases during the evaluation period. The bank's primary loan products in the Philadelphia MMSA AA are home mortgage and small loans to businesses.

Demographic

The following table provides a summary of the demographics that include housing and business information for the Philadelphia MMSA AA. Table A shows that the volume of OOUs is very small in the low-income tracts and close to 39 percent of families in the AA are LMI. The area's median housing

[14] This rating reflects performance within the multistate metropolitan statistical area. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

value in the Philadelphia MMSA AA is 2.4 times the MSA highest median income, but 3 times moderate-, and 4.9 times low-income, indicating a limited proportion of OOUs are affordable to LMI residents.

(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

Philadelphia-Camden-Wilmington, PA-NJ-DE-MD, MSA

According to the May 2018 Moody's Analytics report, the Philadelphia economy is still strong while in the late expansion stage of the business cycle. Job growth will slow as labor shortages grow more pronounced. In the long run, weak demographics, the city's overreliance on wage taxes, and an unfriendly business climate will constrain Philadelphia's prospects to below average. Job growth remains robust at 1.5 percent year-to-year, which pushed payrolls to their highest level since 1990.

Private services are the primary source of strength, with fast job gains in leisure/hospitality and healthcare/education. Strong job growth has pushed the unemployment rate down to a new post-recession low. Demand for housing is still booming, with year-to-year quality-adjusted single-family price growth outpacing the U.S. at 7.4 percent. Supply is responding, with both single-family and multifamily permitting at a healthy pace. Demand is stronger close to downtown, but in general housing markets are improving across Philadelphia, with prices up year-to-year in every submarket. The city's wage tax has been lowered, but this has not kept employers from relocating to the suburbs. A proposed tax on new construction would dampen investment needed in the area with many vacant and dilapidated buildings despite the recent boom.

Finance and business/professional services will remain vital to the economic success despite the recent slowdown in growth. Major area employers include the University of Pennsylvania Health System, Thomas Jefferson University & Health Services, and Comcast. According to the U.S. BLS, the unemployment rate for May 2018 was 5.3 percent, significantly decreasing from 10.0 percent at the beginning of the evaluation period. The unemployment rate in the AA was slightly higher than the overall State of Pennsylvania at 4.3 percent.

Reading, PA MSA

According to the January 2019 Moody's Analytics report, Reading's robust manufacturing industry is keeping the economy rolling. Thanks to above-average factory gains, year-ago job growth remains well above the Pennsylvania rate and on par with the U.S. rate. With 18 percent of its jobs in factories, Reading is in the 10 percent of metro areas with the highest factory dependence in the U.S. Reading's outsize primary metals and electrical equipment sectors serve the auto market. The auto industry is poised for another solid year and the forecast calls for above average gains in factory output and payrolls. Kutztown University will provide less support to growth because of weak demographic trends. Undergraduate enrollment in the public university has fallen each of the last six years. Kutztown account for about one in five jobs in state government, which has been flat during this time. Reading will struggle to add high paying jobs as its lucrative management core faces challenges. The top economic sectors by employment are government, education and health services, and retail trade. The area's largest employers are East Penn Manufacturing Co. Inc., Tower Health, and Carpenter Technology Corp.

The housing market is slowing and house price appreciation trails the national average by nearly 2 percent points. According to the U.S. BLS, the unemployment rate for the fourth quarter of 2018 was 4.2 percent, down significantly from 7.7 percent since the beginning of the evaluation period. The unemployment rate was similar to the State of Pennsylvania at 4.3 percent.

Atlantic City-Hammonton, NJ MSA

According to the May 2018 Moody's Analytics report, the Atlantic City economy is declining. Following a brief recovery starting in the second half of 2017, payroll employment fell in three of the first five months of 2018, with job losses in mainstay leisure and hospitality. Atlantic City's attempt to diversify its gaming industry is needed as traditional casinos fail to attract visitors. Casinos make up the top employers in the city, with Borgata Hotel Casino and Spa being the number one employer, the Hotel at Bally's Atlantic City in second place, and the Trump Hotel and Casino Resorts in third place. According to New Jersey's Division of Gaming Enforcement, casino revenues year to date through May are down 7 percent compared with the same period last year. Two new casinos in 2018 are emphasizing entertainment, not gambling as the Hard Rock Hotel and Casino and the Ocean Resort Casino are planning concerts and conventions to attract millennials and families. With the legalization of sports betting, casinos are using this opportunity to gain a near-term edge over regional competitors. The Borgata's sports betting parlor opened shortly after the Supreme Court's decision, making it one of only two places in the state that accepts legal sports bets.

The report forecasts an end to the city's healthcare industry lead over the state and region. Aggressive hiring since a large-scale expansion of state Medicaid tied to an outsize share of lower-income residents. However, there is now an oversupply of healthcare personnel in an area experiencing population losses the past four years, hurting demand for medical services and slowing healthcare hiring. Rising sea levels as a result of climate change are a threat to beachfront properties. According to the Moody's Analytics vulnerability index for sea level rise, the city ranks among the 50 most vulnerable counties in the U.S. due to its high population density, poverty rate, and large percentage of housing stock in FEMA-designated flood zones. Atlantic City invested in sea walls on parts of the boardwalk destroyed by Superstorm Sandy, but these efforts may not be sufficient if sea levels rise as much as the National Oceanic and Atmospheric Administration forecasts this century under a business-as-usual emissions scenario.

The housing market is doing better as prices have been rising for over a year thanks to a significant fall in foreclosure inventories. The share of sales that involve discounted distressed properties is finally falling. While single family construction has yet to take off, multifamily construction is at its highest level since the 1980s.

According to the U.S. BLS, the unemployment rate for 2018 was 6.3 percent and has decreased significantly from 12.7 percent at the beginning of the evaluation period. The unemployment rate was above the State of New Jersey at 4.1 percent.

Dover, DE MSA

According to the January 2019 Moody's Analytics report, Dover's expansion has lost momentum. Although year-ago employment growth is strong, employment has not risen in 2018. Losses in retail and hospitality in the second half of 2018 mean that these industries have given back all of their early 2018 gains. Dover's large public sector will provide few new jobs in the years ahead but be a source of stability for the economy because of Delaware's strong fiscal position. Dover is Delaware's capital and state government makes up 20 percent of employment in the metro area, a share that is more than five times the national average. A stress test of state budgets finds that Delaware is among the best prepared states for the next downturn, meaning lawmakers will not have to raise taxes, cut spending or eliminate jobs as dramatically to weather the next recession. The top economic sectors by employment are government, education and health services, and retail trade. The area's largest employers are Dover Air Force Base, Bayhealth Medical Center, and Perdue Farms.

Home sales are stuck in neutral, and house price appreciation trails the national average by nearly 2 percent points. According to the U.S. BLS, the unemployment rate for the fourth quarter of 2018 was 4.4 percent, down significantly from 7.9 percent since the beginning of the evaluation period. The unemployment rate was slightly above the State of Delaware at 3.8 percent.

Ocean City, NJ MSA

According to the January 2018 Moody's Analytics report, Ocean City's economy is still in recovery and improve slightly in 2018, but the outlook relies heavily on increased tourism spending since population losses will persist. Ocean City is a coastal resort town with large numbers of seasonal workers during peak summer season and slow employment in other industries do not absorb any meaningful share of workers after the summer with resulting high unemployment rate. Top employers include Morey Organization LLC, U.S. Coast Guard, and the Cape Regional Medical Center. The new tax law will hurt housing, and it will be the end of the decade before job and income indicators improve. Longer term, poor demographics will constrain prospects to below the U.S. average, but Ocean City will outshine peers such as Atlantic City. Affordability has taken a hit and will erode further in coming quarters as rates rise higher and income growth falls well short of that nationally. The correction in the stock market also threatens household wealth, reducing consumer appetite for second homes relied upon for almost two decades by the Ocean City housing market.

According to the U.S. BLS, the unemployment rate for the first month of 2018 was 9.1 percent, increasing slightly from 2017 at 8.8 percent but with a significant decline since the beginning of the evaluation period at 15.5 percent.

Community Contact

The analysis takes into consideration comments provided by two community contacts as well as an interagency CRA listening session involving various community organizations that serve the bank's Philadelphia MMSA AA. One of the two community contacts represents a community group serving the homeless and the other represents a consumer lender organization, providing homebuyer assistance, home mortgages, and small business loans within the AA. The listening session represented 19 community organizations in the AA, including local government and the US Department of HUD.

The community group organization primarily serves the Philadelphia MSA while also serving other states including D.C. The community group noted the need for funding and raising community awareness. Means for financial institutions to provide funding include donations, fundraising, and organizing drives to get the community involved, etc. The consumer lender organization serves eight counties in the Philadelphia MMSA AA, focusing on small business lending as well as consumer lending and improving client financial literacy. The contact noted populations in certain neighborhoods in the City of Philadelphia are growing because of recent immigrants from Africa, Asia, the Middle East, Mexico, and Vietnam. Philadelphia also has seen an influx of Puerto Ricans and Dominicans from New York City due to the high cost of living, though the contact stated the increases would not replace all those who left the AA since a population peak in the 1950 census. These immigrants often live in the U.S. for years before starting a business in order to accumulate start-up capital and they need additional money management services to understand the American financial system. The group cites the need for banks to provide small business and commercial real estate loans to new immigrants; support groups providing labor-intensive technical assistance, including financial counseling; and invest in renovation and revitalizing communities in the AA, specifically vacant residential properties and occupied housing owned by lower income senior citizens.

The community organization listening session identified key issues including affordable housing, home repair and improvement loan products, improving financial literacy and homeowner counseling availability, funding small businesses, and further engagement with bank products and services. The contact cited issues across the state of Pennsylvania with homeowner ability to obtain bank financing to fund home repairs as well as the need for more marketing and outreach to let homeowners become aware of assistance programs including foreclosure prevention assistance and more refinance opportunities. The session also noted that more banks are creating restrictive barriers for small businesses seeking credit and loan products to finance operations.

The bank conducted research in the AA and identified community needs for affordable housing for low-income families, financial education for the unbanked and underbanked, homebuyer assistance services to LMI families, and small business assistance to business owners.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing particularly for LMI families and the chronically homeless, are primary needs of the AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs coupled with limited home affordability for LMI individuals. Additionally, small business loans and micro lending to small businesses are credit needs for the AA.

Scope of Evaluation in Philadelphia MMSA AA

The rating for the Philadelphia MMSA AA is based on a FS evaluation of the bank's performance in the combined Philadelphia-Reading-Camden, PA-NJ-DE-MD CSA. The Philadelphia MMSA is the 7th largest rated area and along with 12 other rated areas represents the bank's most significant markets in terms of lending, deposit, and branch distribution; therefore, the performance in the Philadelphia MMSA AA contributed to the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN PHILADELPHIA MMSA AA

LENDING TEST

The bank's performance under the Lending Test in the Philadelphia MMSA AA is rated Outstanding.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Philadelphia MMSA AA is excellent.

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to the credit needs in the AA taking into account the number and dollar amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Philadelphia MMSA	227,423	77,895	522	156	305,996

Dollar Volume of Loans (000's)					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Philadelphia MMSA	$51,704,971	$4,233,897	$18,884	$923,678	$56,881,430

WFBNA ranked fourth in deposits with 6.4 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 11.3 percent market share. There is strong competition as reflected by the 834 lenders and 124 depository institutions in the AA. The 2nd and 3rd top lenders in this market were Quicken Family with a 3.7 percent market share and JPMorgan Chase Bank with a 3.2 percent market share.

In small loans to businesses, WFBNA ranked 4th with a 6.5 percent market share. There is strong competition for small loans to businesses as reflected by the 237 lenders in the AA. The top three lenders by volume were American Express with a market share of 23.6 percent, PNC Bank with a market share of 7.8 percent, and Capital One Bank with a 6.8 percent market share.

Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in its AA.

Home Mortgage Loans

Refer to Table O in the “MMSA” section of appendix D for the facts and data used to evaluate the geographic distribution of the bank’s home mortgage loan originations and purchases. The bank’s overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- The bank’s performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in low-income geographies exceeds the aggregate distribution of loans and is below the proportion of OOUs in those geographies.
- The proportion of loans in moderate-income geographies is below both the aggregate distribution of loans and the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the “MMSA” section of appendix D for the facts and data used to evaluate the geographic distribution of the bank’s originations and purchases of small loans to businesses. The bank’s overall geographic distribution of small loans to businesses for this evaluation is excellent.

- For 2012-2016, the proportion of the bank's small business loans in low-income geographies exceeds the aggregate distribution of loans and is below the proportion of businesses located in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is near to the proportion of businesses in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly below the combined performance in 2012-2016.

Distribution of Loans by Income Level of the Borrower

The bank exhibits an excellent distribution of loans among individuals of different income levels and businesses of different sizes.

Home Mortgage Loans

Refer to Table P in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The Philadelphia MMSA AA has homeownership affordability hurdles especially for LMI borrowers. As noted above, the area's median housing value is five times the income of low-income borrowers and 3 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI individuals. Despite the affordability challenges, the bank's overall home mortgage lending to low-income borrowers in 2012-2016 substantially meets the aggregate distribution of loans and lending to moderate-income borrowers exceeds the aggregate distribution of loans.
- The bank's performance with low-income borrowers is well below the proportion of families and lending to moderate-income borrowers is near to the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly less than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's originations and purchases of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Community Development Lending

The institution is a leader in making CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The level of CD lending in the Philadelphia MMSA AA is excellent. WFBNA made 156 CD loans in its AA for a total of $923.7 million, which represents over 25 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. A majority of CD loans were for the primary purpose of affordable housing, which is a critical CD need in the bank's AA. The bank made 73 loans totaling $472 million (51 percent) for the purpose of affordable housing. Other loan products include community services, economic development, and revitalization and stabilization within the community.

Examples of CD loans in the AA include:

- In April 2013, WFBNA renewed a $20 million working capital line of credit to a non-profit organization that primarily serves people with exceptional challenges, disabilities, and complex needs. The organization's goal is to advance the quality of life and standard of care for individuals with disabilities. According to the chief financial officer of the organization, an estimated 90 percent of its clients are considered to be LMI individuals as they earn less than $61,120 annually, which is 80 percent of the 2013 MFI for the MSA.
- In July 2017, WFBNA provided an $18 million construction loan for an affordable housing development located in Philadelphia, PA with 100 percent of the units restricted to tenants earning less than 60 percent of the area MFI.
- In July 2014, WFBNA provided a $9.5 million loan for a 165-unit Section 8 affordable housing development. This development is located in a moderate-income census tract in Newark, Delaware and consists of 33 one-bedroom units, 110 two-bedroom units, and 22 three-bedroom units subsidized under a project-based Section 8 program.

Product Innovation and Flexibility

The institution makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. The bank launched the NeighborhoodLIFT program in the Philadelphia MMSA AA in April 2016 and more than 450 homebuyers have utilized the down payment assistance to purchase a home. Of the 450 WFBNA originated 109 home mortgage loans totaling $12.5 million. Under the *your*FirstMortgage loan program the bank has funded 461 loans totaling $69 million to LMI homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Practices section of this performance evaluation for additional details regarding these programs.

INVESTMENT TEST

The bank's performance under the Investment Test in the Philadelphia MMSA AA is rated Outstanding.

Based on a FS review, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Philadelphia MMSA AA is excellent.

Qualified Investments										
Assessment Area	Prior Period*		Current Period		Total				Unfunded Commitments **	
	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Philadelphia MMSA	32	$48,436	968	$391,939	1,000	100.0	$440,375	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 12.0 percent of tier 1 capital allocated to the AA.

The institution exhibits excellent responsiveness to credit and community economic development needs identified in the AA, including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 92 percent of the dollar volume of the bank's current and prior period investment focused on affordable housing which is a primary credit need in the AA. Additionally, the bank provided over 883 grants totaling $31.9 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes extensive use of innovative and/or complex investments to support CD initiatives. CD Investments involved many complex LIHTC, NMTC, and state tax credit projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In December 2015, WFBNA provided a $10.7 million LIHTC investment for the development located in Upper Darby, Pennsylvania, with 100 percent of the units restricted to tenants earning between 20 and 60 percent of the area MFI. The housing project is an adaptive re-use of a vacant three-story building that was formerly used as a student social center for the St. Alice Catholic Parish campus. The building has been vacant since 2013 and will feature 53 one-bedroom units. It is a senior property for tenants ages 62 and older, with six accessible units and two-units for tenants with hearing and visual impairments. On-site supportive services will be available to all tenants and will include case management, health services, and recreational activities. This investment is responsive to the need for neighborhood stabilization as well as affordable housing. WFBNA also demonstrated multi-faceted support by providing the construction loan ($7 million) and equity investment to support this affordable housing development.
- In September 2016, WFBNA provided four local initiatives grants totaling $400,000 to several housing Partnership organizations to administer the NeighborhoodLIFT Down Payment

Assistance program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.

- During the exam timeframe, WFBNA provided three grants totaling $650,000 to several organizations through the Small Business DCC Program benefiting the broader state of Pennsylvania including the Philadelphia MMSA AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.
- During the exam timeframe, WFBNA provided six grants totaling $405,000 to several housing organizations through the PMP for affordable housing in the Philadelphia MMSA AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

SERVICE TEST

The institution's performance under the Service Test in the Philadelphia MMSA AA is rated Outstanding.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Philadelphia MMSA AA is excellent.

Retail Banking Services

Service delivery systems are readily accessible geographies and individuals of different income levels in the institution's AA.

Distribution of Branch Delivery System											
Assessment Area	Deposits	Branches						Population			
	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%) *				% of Population within Each Geography *			
				Low	Mod	Mid	Upp	Low	Mod	Mid	Upp
Philadelphia MMSA	100.0	214	100.0	6.1	14.5	37.4	42.0	7.2	21.4	40.5	30.6

* May not add up to 100 percent due to geographies with unknown tract income level and rounding. Population in census tracts with income unknown represent 0.3 percent in the AA.

Distribution of Branch Openings/Closings							
Assessment Area	# of Branch Openings	# of Branch Closings	Net change in Location of Branches (+ or -)				
			Low	Mod	Mid	Upper	NA
Philadelphia MMSA	1	14	-2	-5	-5	-1	0

As of December 31, 2018, WFBNA operates 214 branches and 404 ATMs in the Philadelphia MMSA AA. Of these branches, 208 are full-service locations and six are limited-service branches. The institution's branches include 13 branches in low-income geographies and 31 branches in moderate-income geographies. The branch distribution in low income geographies is near to the percentage of the population in low-income geographies and branch distribution in moderate-income geographies is below the percentage of the population in moderate-income geographies in the AA. When considering an additional 27 branches within close proximity to LMI geographies, the bank's distribution exceeds demographics.

The institution's opening and closing of branches have not adversely affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank opened one branch in an upper-income geography. The bank closed two branches low-income, five branches in moderate-income, five branches in middle-income, and one branch in upper-income geographies. The closure of branches in LMI geographies was to consolidate with other branches nearby and did not negatively impact the distribution of branches relative to the population residing in those geographies. The bank still maintains 44 active branches or 20 percent within LMI geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. While there are slight variations in opening and closing times, most branches are open Monday through Friday from 9:00 am to 5:00 pm and 9:00 am to 6:00 pm on Friday. A majority of the branches (150) are also open on Saturdays. All WFBNA services are available at all branches and all ADS discussed bank-wide are available in this AA.

Community Development Services

The institution provides a relatively high level of CD services.

Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 694 CD service activities to 162 organizations since the last evaluation, logging a total of 2,349 qualified hours within this AA. A majority (84 percent) of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted revitalization or stabilization (10 percent), affordable housing (4 percent), and economic development (2 percent). The bank's financial assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- One WFBNA team member provided 207 of Board service to an organization that provides financial literacy to school-age children. Twelve other WFBNA team members provided financial education at a local area school. According to the organization, 70.0 percent of students are from LMI households.
- Two WFBNA team members provided 124 hours of Board service to a community development financial institution that focuses on revitalizing distressed neighborhoods.

Multistate Metropolitan Statistical Area Rating

Portland-Vancouver-Salem, OR-WA CSA (Portland MMSA AA)

CRA rating for the Portland MMSA AA[15]: Outstanding
The Lending Test is rated: Outstanding
The Investment Test is rated: Outstanding
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Good lending activity;
- Excellent distribution of loans by borrower profile;
- Excellent geographic distribution of loans;
- WFBNA is a leader in providing CD loans, which has a significant positive impact on the Lending Test;
- WFBNA's use of flexible products has a positive impact on the Lending Test;
- Excellent level of CD investments that are responsive to AA needs;
- Retail delivery systems are readily accessible to all portions of the AA; and
- Good CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in Portland MMSA AA

WFBNA delineated four AAs within the Portland-Vancouver-Salem, OR-WA CSA. Refer to Appendix A for a complete description of the AA. These areas were combined, analyzed, and presented at the CSA level with an AA name of Portland MMSA. WFBNA has $10.7 billion of deposits in the Portland MMSA AA representing 0.8 percent of adjusted deposits. The Portland MMSA AA represents the 17th largest rated area in terms of deposits. In the Portland MMSA AA, WFBNA ranked 2nd out of 38 depository institutions with 17.9 percent market share. The top bank within the MMSA in terms of deposits is U.S. Bank with 21.1 percent market share. WFBNA operates 81 branches and 167 ATMs within the Portland MMSA AA, representing 1.4 percent of the bank's branches and 1.2 percent of the bank's ATMs. In comparison to the percentage of deposits and branching network, the bank originated and purchased approximately $29.8 billion in loans or 1.6 percent of total bank loan originations and purchases during the evaluation period. The bank's primary loan products in the Portland MMSA AA are home mortgage and small loans to businesses.

Demographic

The following table provides a summary of the demographics that include housing and business information for the Portland MMSA AA. Table A shows that the volume of population, census tracts, and OOUs is very small in the low-income tracts and close to 38 percent of families in the AA are LMI. The area's median housing value in the Portland MMSA AA is 4 times the highest MSA median

[15] This rating reflects performance within the multistate metropolitan statistical area. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

income, but 5 times moderate-, and 7.9 times low-income, indicating a limited proportion of OOUs are affordable to LMI residents.

Table A - Demographic Information of the Assessment Area

Assessment Area: Portland-Vancouver-Salem OR-WA (2016)

Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #

Economic Data

<u>Portland-Vancouver-Hillsboro, OR-WA MSA</u>

According to the August 2018 Moody's Analytics report, Portland's economy is still strong. Although labor shortages have impeded job growth, Portland has added workers at a faster pace than the West region and nation for the better part of the decade. The tightness in the job market is leading to a pickup in wage growth as firms face challenges attracting and retaining workers.

Technology will continue to be a major force in Portland's economic growth through the decade's end. Led by a dynamic startup culture and gains in existing information technology and biotech firms, as well as various research universities and tech incubators, Portland has numerous structural advantages that will secure a healthy pipeline for talent in the long run. These include its favorable location, high concentration of highly educated workers, and low business and living costs relative to those in Seattle and the Bay Area. However, in the near term, a rapidly tightening labor market will make it more difficult for tech firms to find qualified candidates. High-tech payrolls are up more than 2 percent from last year, more than in the rest of Oregon but well below the peak rate of 5 percent for the cycle hit back in 2015.

Despite layoffs at top employer Intel, which shed more than 11 percent of its workforce in 2016 as the company shifted from semiconductor manufacturing to cloud-computing, factories in Portland are adding jobs about two times as fast as those in the West and the U.S. Moreover, the industry has recouped all of the jobs lost during the Great Recession, a feat yet to be achieved by the state, region or nation. Diversity is key as Portland's products range from shoes and clothing made by Nike and Columbia Sportswear, to semiconductors produced by Intel, to craft beer made by Deschutes Brewery. Longer term, globalization and mechanization will reduce the need for factory labor, dragging on hiring and keeping industry payrolls below their mid-1990s peak.

The outlook for the housing market is above average thanks largely to favorable demographic trends. Portland's overheated single-family housing market has been aided by stronger income growth. Despite strong demand and constraints on supply, house price appreciation has slowed, dipping below the U.S. average for the first time since 2012. Eroding affordability is a key reason for the slowdown; since the start of 2015, the median existing single-family home has risen by one-third to just less than $400,000. Despite steep price gains, fewer single-family residences are being built as developers contend with shortages of labor, rising materials costs, and restrictions on land development. Developers increasingly are turning to multi-family housing. Last year they started 7,000 new multifamily units, the most since 1996, helping to arrest a 12-year slide in the rental vacancy rate.

The major economic drivers for the MMSA are the highly diversified economy, highly skilled workforce, and rising state and local tax revenues. The largest employers in the Portland MMSA includes the Intel Corp, Providence Health Systems, and Oregon Health and Science University. According to the U.S. BLS, the unemployment rate for the second quarter of 2018 was 3.9 percent, which has decreased significantly from 8.0 percent from the beginning of the evaluation period. The unemployment rate in the AA was slightly lower than both the overall States of Oregon (4.1 percent) and Washington (4.2 percent) during the same period.

Albany, OR MSA

According to the March 2019 Moody's Analytics report, Albany's economy is advancing at a slower rate as its expansion matures. After a stellar 2018, Albany has made the switch from mid- to late-cycle expansion, the last metro area in red-hot Oregon to do so. Worker shortages are responsible for weaker job creation. The crucial manufacturing industry has hit a roadblock after years of steady growth, and steep layoffs in the public sector are masking broad gains in private services. Retail, healthcare and transportation are adding workers much faster than their Oregon and U.S. counterparts. Albany's lead over the rest of the state and the U.S. in factory job growth will narrow significantly in coming quarters. Nearly one-fifth of Albany's workers are employed in manufacturing, which specializes in metals, wood products and paper. Producers of primary metals, which make up almost 30 percent of factory jobs, are benefiting less than expected from U.S. tariffs. The cornerstone agriculture industry will struggle because of tariffs and harsher immigration rules that restrict the supply of seasonal workers. Farm employment makes up 8 percent of Albany's total workforce, the highest share in Oregon and among the top 15 in the West region. Albany and the surrounding communities are major producers of grass seed, but other crops include strawberries and hazelnuts. Longer term, Albany will underperform because of its dependence on farming and high employment volatility. The lack of a dynamic driver in services is another obstacle, though big population gains create upside risk for consumer industries.

The housing market is mixed. Housing appreciation is below the state of Oregon and the U.S. The largest employers in Albany includes the Samaritan Health Services, ATI, and Hewlett-Packard. According to the U.S. BLS, the unemployment rate for the 4th quarter of 2018 was 4.5 percent, and has decreased significantly from 9.6 percent from the beginning of the evaluation period. The unemployment rate in the AA was slightly lower than the overall States of Oregon (4.3 percent during the same period.

Corvallis, OR MSA

According to the March 2018 Moody's Analytics report, Corvallis' expansion is in a late-cycle phase. Job growth has slowed and remains a step behind that in the rest of Oregon because of labor shortages. Employment in the large public sector is no longer rising, and job creation in private services outside of education/healthcare and business/professional services has ground to a halt. Oregon State University (OSU) and high tech has provided the foundation for growth in Corvallis. OSU's enrollment is up nearly 2 percent from the previous year, besting all public institutions in Oregon for the fourth year in a row. Even with past tuition increases and is projected to increase of 4 percent in the next academic year, demand is not wavering. Construction and high tech will benefit most from OSU's expansion. Payrolls in high-tech manufacturing, which accounts for more than half of all factory jobs and is dominated by Hewlett-Packard, will edge higher in coming quarters. Prospects for service-oriented tech industries such as software and computer systems are especially upbeat given the talent supplied by the university and favorable financing conditions for startups. Job growth in construction will slow only modestly this year thanks to support from residential and public investment. After rising almost 12 percent in 2017, construction employment is forecast to rise close to 10 percent this year, exceeding the Oregon and U.S. averages. A renewed boost in housing starts and projects commissioned by OSU point to higher construction outlays. Low inventories of unsold homes have plagued Corvallis for years, but new residential building finally picked up late in 2017 and will translate to more work under construction this year.

The largest employers in Corvallis includes OSU, Samaritan Health Services, and Hewlett-Packard. According to the U.S. BLS, the unemployment rate for the 1st quarter of 2018 was 3.3 percent, and has decreased from 5.9 percent from the beginning of the evaluation period. The unemployment rate in the AA was lower than the overall States of Oregon (4.5 percent) during the same period.

Salem, OR MSA

According to the July 2018 Moody's Analytics report, Salem's economy has slowed but the economy is still in good shape. Employment gains have decelerated sharply over the past year because of a fall in state and local government jobs. On the bright side, the private sector is advancing with net hiring in nearly all private industries outpacing that of the region and the nation. State government will remain a pillar of economic stability and a crucial source of income and spending gains despite few job additions. Salem is home to Oregon's state capital, which will continue to reap rewards as the booming tech industry around Portland's Silicon Forest lifts corporate tax collections and as lottery sales come in above expectations. Rapid household formation has been a boon for Salem's housing market. Rapid household formation paired with robust income growth is boosting the housing market and home prices are rising at the 10th fastest pace in the country and residential construction is soaring. The metro area is experiencing an influx of residents thanks to the booming tech industry in neighboring Portland. Job seekers have primarily flooded areas around Portland, but Salem is receiving some spillover because it is an attractive and cheaper alternative. As demand outpaces supply, house price growth will remain elevated, and this will give developers the confidence to build more homes and hire additional construction workers.

The largest employers in Salem includes the Salem Hospital, SuperMedia LLC, and Association of Salem Keizer Education Support. According to the U.S. BLS, the unemployment rate for the 2nd quarter of 2018 was 4.3 percent, and has decreased significantly from 9.8 percent from the beginning of the evaluation period. The unemployment rate in the AA was similar to the overall States of Oregon (4.3 percent) during the same period.

Community Contacts

The analysis takes into consideration comments provided by three community contacts in conjunction with this evaluation that serve the bank's Portland MMSA AA. One contact was with an affordable housing organization that provides financing and technical assistance for affordable housing development in the AA. The second contact was with a non-profit organization that strives to address the needs of the people primarily in the Salem MSA. The 3rd contact was with a development commission which primarily focuses on creating livable neighborhoods and high-quality jobs in LMI geographies within the Portland MSA.

According to the representative with the affordable housing organization, there are parts of the eastern Oregon economy that are on fire, and there are parts that are very stagnant. The contact specifically mentions that Crook, Jefferson, Hood River, Deschutes, and Morrow counties are all doing much better economically than the rest of the region and that Central eastern Oregon is doing well. The community contact commented that with respect to affordable housing, there are a lot of farm workers that are both transient and permanent in the AA. There are also a lot of retirees many of whom are on very small fixed incomes; and in certain areas like in Bend there is the retirement lifestyle migration that has increased housing costs and stressed the income capacity of long-term and elderly residents. The area has a very low vacancy rate and needs both market-rate housing and affordable housing development. According to the contact, the general lack of workforce housing in smaller cities in eastern Oregon whose economies have stabilized and begun to grow is also an issue that needs both more attention and resources. Businesses cannot hire people because people cannot find affordable housing in the AA.

The representative from the 2nd contact stated that the priority is to develop long-term strategies to lessen poverty by identifying solutions, delivery services, and moving individuals and families toward self-sufficiency. The interviewee stated that the Early Head Start program was their largest and serves over 800 children from LMI families. The contact stated that the need for financial education to LMI individuals for budgeting and financial planning is very important. The 3rd representative stated that one of the main reasons they exist is to provide financing for community development that banks generally will not do. Some of those needs are gap financing, smaller dollar business loans and loan programs for people with lower credit scores to help rebuild their credit (i.e. credit repair programs). The contact further stated that the larger banks are generally not looking to make loans under $250,000 to $500,000 and that they prefer to invest in NMTC.

The bank conducted research in the AA and identified community needs for affordable housing for low-income families, financial education for the unbanked and underbanked, services to homeless veterans and families, and workforce development/job placement.

Considering the information from the community contacts and bank management as well as demographic and economic data, small business lending, affordable housing, homeless services, and workforce development represent the primary needs for the Portland MMSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs coupled with limited home affordability for LMI individuals.

Scope of Evaluation in Portland MMSA AA

The rating for the Portland MMSA AA is based on a FS evaluation of the bank's performance in the combined Portland-Vancouver-Salem, OR-WA CSA. A limited portion of the bank's overall lending, investments, and services were conducted in the Portland MMSA AA; therefore, the performance in the MMSA received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN PORTLAND MMSA AA

LENDING TEST

The bank's performance under the Lending Test in the Portland MMSA AA is rated Outstanding.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Portland MMSA AA is excellent.

Lending Activity

Based on the tables below, lending levels reflect good responsiveness to the credit needs in the AA taking into account the number and dollar amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Portland MMSA	109,363	41,996	1,250	111	152,720

Dollar Volume of Loans (000's)					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Portland MMSA	$27,346,408	$2,442,602	$84,354	$665,028	$30,538,392

WFBNA ranked second in deposits with 17.9 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 9.6 percent market share. There is strong competition as reflected by the 601 lenders and 38 depository institutions in the AA. The 2nd and 3rd top lenders in this market were Guild Mortgage Company with a 4.38 percent market share and Quicken with a 3.96 percent market share.

In small loans to businesses, WFBNA ranked 6th with a market share of 8.9 percent. There is strong competition in the market with approximately 141 lenders. The top three lenders were US Bank with 18.3 percent market share, American Express with 12.7 percent market share, and JPMorgan Chase Bank with 9.2 percent market share.

Distribution of Loans by Income Level of the Geography

The bank exhibits an excellent geographic distribution of loans in its AA.

Home Mortgage Loans

Refer to Table O in the “MMSA” section of appendix D for the facts and data used to evaluate the geographic distribution of the bank’s home mortgage loan originations and purchases. The bank’s overall geographic distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The bank’s performance in 2012-2016 for home mortgage loans to LMI geographies substantially meets the aggregate distribution of loans in those geographies.
- The proportion of loans in low-income geographies exceeds the proportion of OOUs in those geographies and in moderate-income geographies is near to the proportion of OOUs in those geographies.
- Based on the bank’s performance in 2017-2018, the bank’s home mortgage lending is slightly less than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the “MMSA” section of appendix D for the facts and data used to evaluate the geographic distribution of the bank’s originations and purchases of small loans to businesses. The bank’s overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The bank’s performance in both 2012-2016 and 2017-2018 periods for small business loans in LMI geographies exceeds both the aggregate distribution of loans located in those geographies.
- The proportion of the bank’s small business loans in low-income geographies is near to the proportion of businesses and in moderate-income geographies exceeds the proportion of businesses located in those geographies.

Distribution of Loans by Income Level of the Borrower

The bank exhibits an excellent distribution of loans among individuals of different income levels and businesses of different sizes.

Home Mortgage Loans

Refer to Table P in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's home mortgage loan originations and purchases. The bank's overall borrowers distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The Portland MMSA AA has homeownership affordability hurdles especially for LMI borrowers. As noted above, the area's median housing value is 8 times the income of low-income and 5 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI individuals. Despite the affordability challenges, the bank's overall home mortgage lending to LMI borrowers in both periods, 2012-2016 and 2017-2018, exceeds the aggregate distribution of loans.
- The bank's lending to low-income borrowers is significantly below the proportion of families and lending to moderate-income borrowers is near to the proportion of families.

Small Loans to Businesses

Refer to Table R in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's originations and purchases of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Community Development Lending

The institution is a leader in making CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The level of CD lending in the Portland MMSA AA is excellent. WFBNA made 111 CD loans in its AA for a total of $665 million, which represents over 55 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The majority of these loans were for the primary purpose of affordable housing which is a critical CD need in the bank's AA. The bank made 73 loans totaling $508 million (76 percent) for the purpose of affordable housing. Additionally, the bank extended 30 CD loans totaling $48.4 million for the primary purpose of community services to assist LMI individuals, four loans totaling $8.3 million for the primary purpose of economic development, and four CD loan totaling $100 million for revitalization and stabilization of the AA.

Examples of CD loans in the AA include:

- In June 2013, WFBNA provided a $6.9 million LIHTC construction loan for the development of a 32-unit family apartment building and an adjacent addiction treatment facility located in a moderate-income census tract of Portland, Oregon. This development is a collaboration between two local nonprofit organizations providing affordable housing solutions to individuals and families throughout Multnomah County. The development will provide permanent apartment housing with supportive services and expand a culturally-focused residential treatment program. The development's 32 permanent apartments, which will be reserved for graduates of substance abuse treatment programs, represent Home Forward's first "dry" housing program. The development also is part of the agency's efforts to preserve public housing by replacing former single-family public housing homes with more cost-efficient apartments in multifamily buildings. This facility includes a 16-unit substance abuse treatment program, a community area, and the 32-unit family apartment building with income restrictions ranging from 30 to 60 percent of the area MFI. This activity is responsive to the identified need for affordable housing. WFBNA demonstrated multi-faceted support by providing both the construction loan and investment to support this affordable housing development and treatment center.
- In June 2018, WFBNA refinanced a $12.4 million loan for an affordable housing development under the Section 42 LIHTC program. The development has an extended use agreement in place requiring that 100 percent of the units be rented to tenants earning no more than 60 percent of the area MFI.
- In August 2017, WFBNA provided a $10 million construction loan for an affordable housing development located in Hillsboro, Oregon, with 100 percent of the units restricted to low-income tenants earning at or below 60 percent of the area MFI. Eight units will be subsidized with Section 8 rental assistance covered by a new 15-year HAP contract. The Section 8 program allows tenants to pay no more than 30 percent of their household income towards housing expenses.
- In July 2013, WFBNA renewed a $3.5 million working capital line of credit to a nonprofit organization based in Portland, Oregon. Their mission is to assist all low-income populations throughout Oregon and in areas of Washington State by increasing their economic self-sufficiency and community integration through microenterprise development and self-employment. According to information listed on the organization's website, the majority of their clients live at, or slightly above, the federal poverty line and below 80 percent of MFI. The average business revenue for their clients with full-time businesses is $66,685.

Product Innovation and Flexibility

The institution makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. The bank held a NeighborhoodLIFT event in the Portland MMSA AA in December 2013 and more than 700 potential homebuyers attended the event. Of the 700 in attendance, WFBNA originated 66 mortgage loans totaling $11.6 million. Under the *your*FirstMortgage loan program the bank has funded 76 loans totaling $16 million to LMI homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding these programs.

INVESTMENT TEST

The bank’s performance under the Investment Test in the Portland MMSA AA is rated Outstanding.

Based on a FS review, including the data in the table below and consideration of performance context discussed in the investment test, the bank’s performance in the Portland MMSA AA is excellent.

Qualified Investments										
Assessment Area	Prior Period*		Current Period		Total				Unfunded Commitments**	
	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Portland MMSA	17	$25,022	533	$257,633	550	100.0	$282,655	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 23.4 percent of tier 1 capital allocated to the AA.

The institution exhibits excellent responsiveness to credit and community economic development needs identified in the AA, including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 68 percent of the dollar volume of the bank's current and prior period investment focused on affordable housing which is a primary credit need in the AA. Additionally, the bank provided over 487 grants totaling $11.3 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes extensive use of innovative and/or complex investments to support CD initiatives. CD Investments involved many complex LIHTC and NTMC projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In April 2015, WFBNA provided a $21.9 million LIHTC investment for the rehabilitation of 259 units of existing affordable housing located in a moderate-income census tract in Portland, Oregon. All units are restricted to tenants earning less than 60 percent of the area MFI. The development is comprised of two existing affordable housing properties and require that all units be designated for 'elderly or disabled' households. WFBNA demonstrated multi-faceted support by providing both the construction loan and equity investment to support this affordable housing development.
- In December 2013, WFBNA provided a $4 million grant to a Neighborhood Reinvestment Corporation (NRC) to administer the NeighborhoodLIFT Down Payment Assistance program in Portland, OR. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.
- In May 2017, WFBNA provided a $200,000 grant to a Micro Enterprise Services of Oregon through the Small Business DCC Program benefiting the broader state of Washington and Oregon including the Portland MMSA AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.
- During the exam timeframe, WFBNA provided nine grants totaling $875,000 to several housing organizations through the PMP for affordable housing in the Portland MMSA AA. Refer to the

comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

SERVICE TEST

The institution's performance under the Service Test in the Portland MMSA AA is rated Outstanding.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Portland MMSA AA is excellent.

Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the institution's AA.

Distribution of Branch Delivery System											
Assessment Area	Deposits	Branches						Population			
	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%)				% of Population within Each Geography*			
				Low	Mod	Mid	Upp	Low	Mod	Mid	Upp
Portland MMSA	100.0	81	100.0	3.7	33.3	33.3	27.2	2.4	25.2	45.9	26.3

* May not add up to 100 percent due to geographies with unknown tract income level and rounding. Population in census tracts with income unknown represent 0.2 percent and the bank's branches in these tracts represent 2.5 percent of total branches in the AA.

Distribution of Branch Openings/Closings						
Assessment Area	# of Branch Openings	# of Branch Closings	Net change in Location of Branches (+ or -)			
			Low	Mod	Mid	Upp
Portland MMSA	1	13	0	-4	-5	-3

As of December 31, 2018, WFBNA operates 81 branches and 167 ATMs in the Portland MMSA AA. Of these branches, 80 are full-service locations and one is a limited-service branch. There are three branches in low-income geographies and 27 branches in moderate-income geographies. The branch distribution in LMI geographies exceeds the percentage of the population in LMI geographies in the AA. When considering an additional 13 branches within close proximity to LMI geographies, the bank's distribution further exceeds demographics.

The institution's opening and closing of branches have not adversely affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank opened one branch and closed 13 branches since the last evaluation. Four of the branch closures were located in moderate-income CTs. The closure of branches in moderate-income geographies was to consolidate with other branches nearby and did not negatively impact the distribution of branches relative to the population residing in those geographies. The bank still maintains 30 active branches or 37 percent within LMI geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 6:00 pm. Of the total branches, 72 are also open on Saturdays from 10:00 am to 2:00 pm. All WFBNA services are available at all branches and all ADS discussed bank-wide are available in this AA.

Community Development Services

The institution provides a relatively high level of CD services.

Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 587 CD service activities to 113 organizations since the last evaluation, logging a total of 1,525 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing and economic development. The bank's financial assistance is responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- A WFBNA team member provided 24 hours of Board service to a community organization that provides quality homeownership, financial education, and counseling services to promote financial security, housing stability, and homeownership within LMI communities.
- A WFBNA team member provided 36 hours of Board service to a community organization that provides education, counseling, and financial services to first-time LMI homebuyers in Multnomah (which includes Portland), Clackamas and Washington Counties.

Multistate Metropolitan Statistical Area Rating

Texarkana, TX-AR MSA (Texarkana MMSA AA)

CRA rating for the Texarkana MMSA AA[16]: Satisfactory
The Lending Test is rated: Low Satisfactory
The Investment Test is rated: Needs to Improve
The Service Test is rated: High Satisfactory

The major factors that support this rating include:

- Poor lending activity;
- Adequate distribution of loans by borrower profile;
- Good geographic distribution of loans;
- Adequate level of CD loans was originated;
- Poor level of CD investments;
- Retail delivery systems are readily accessible to all portions of the AA; and
- Good CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in Texarkana MMSA AA

WFBNA delineated one AA within the Texarkana, TX-AR MSA. Refer to Appendix A for a complete description of the AA. WFBNA has $682 million of retail deposits in the Texarkana MMSA AA representing 0.1 percent of adjusted deposits. Texarkana MMSA AA represents the 47th largest rated area in terms of deposits. In the Texarkana MMSA AA, WFBNA ranked first out of 16 institutions with a 27.4 percent deposit market share. The next bank within the MMSA in terms of deposits was Farmers Bank & Trust Company with 13.6 percent deposits. WFBNA operates two branches and six ATMs within the Texarkana MMSA AA, representing less than 0.1 percent of the bank's branches and less than 0.1 percent of the bank's ATMs. In the Texarkana MMSA AA, the bank originated and purchased $313 million in loans or less than 0.1 percent of total bank loan originations and purchases during the evaluation period. The bank's primary loan products in the Texarkana MMSA AA is home mortgage loans and small business loans.

Demographic Data

The following table provides a summary of the demographics that include housing and business information for the Texarkana MMSA AA. Table A below shows a very small volume of OOUs in the low-income tracts and over 39 percent of families in the AA are LMI. Median rents and the high percentage of families below poverty level suggest rental housing is unaffordable for many low-income residents.

[16] This rating reflects performance within the multistate metropolitan statistical area. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

Table A – Demographic Information of the Assessment Area

Economic Data

According to the January 2018 Moody's Analytics report, Texarkana's shaky economy has experienced a boost over the last few months. The metro area is one of just a handful in Texas at risk of a recession and, though it has made some progress during this business cycle, it has done so without ever fully taking off. Hundreds of layoffs to be enacted this year suggest it may take longer than expected to get the economy on a firmer footing. Almost all job growth in the near term will occur in private services. Professional and business services started bouncing back in 2017 and, were it not for the layoffs at Harte Hanks Call Center, business/professional services would have expanded at a steady growth rate of 3 percent this year, helped by low business costs and stronger domestic business investment. Major area employers include Red River Army Depot, Christus St. Michael Health System, and Cooper Tire & Rubber Company.

The tight labor market has helped lift average hourly earnings over the past year; however, they have only reversed one-third of the drop between 2014 and 2016. This is one reason why home sales and prices are disappointing. In fact, Texarkana ranks among the worst in the state in key housing metrics.

According to the U.S. BLS, Texarkana's unemployment rate as of January 2018 was 4.0 percent, down from 6.9 percent at the beginning of the evaluation period. The MMSA unemployment rate was slightly lower than both the State of Texas and State of Arkansas at 4.3 percent.

Community Contact

The analysis takes into consideration comments provided by a community contact in conjunction with this evaluation that serves the bank's Texarkana AA. The community contact represents a non-profit whose purpose is to educate and serve the AA in the areas of agriculture and family/consumer sciences.

The contact stated that the current economic condition is stable throughout the AA. The LMI neighborhoods are located in the northeast section of Bowie County. Texarkana has experienced a mild recession. The contact indicated that the biggest credit needs of the community were financing for residential real-estate and small businesses. The contact also indicated job creation was the biggest need in the county. One of the area's largest employers has laid off 400 workers in the past 12 months and plans to lay off an additional 400 employees next month. The contact mentioned that credit needs of the community were being met by the local financial institutions.

Considering the information from the community contact and bank management as well as demographics and economic data, affordable housing and small business financing, represent a primary credit need in the Texarkana MMSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs coupled with limited home affordability for LMI individuals.

Scope of Evaluation in Texarkana MMSA AA

The rating for the Texarkana MMSA AA is based on a FS evaluation of the bank's performance in the Texarkana, TX-AR MSA. A limited portion of the bank's overall lending, investments, and services were conducted in the Texarkana MMSA AA; therefore, the performance in the Texarkana MMSA AA received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN TEXARKANA MMSA AA

LENDING TEST

The bank's performance under the Lending Test in the Texarkana MMSA AA is rated Low Satisfactory.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Texarkana MMSA AA is adequate.

Lending Activity

Based on the tables below, lending levels reflect poor responsiveness to the credit needs in the AA taking into account the number and dollar amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Texarkana MMSA	1,989	717	61	2	2,769

Dollar Volume of Loans (000's)					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Texarkana MMSA	$271,019	$39,289	$2,695	$6,100	$319,103

WFBNA ranked first in deposits with 27.4 percent market share in the AA. In overall HMDA lending, WFBNA ranked fifth with 4.6 percent market share. Although WFBNA's HMDA market share is considerably lower than its deposit market share, lending competition was significantly stronger, reflected by the 181 lenders, than competition for deposits, where there were 16 depository institutions in the AA. The top three lenders in the market were Red River Employees FCU with 8.4 percent market share, State Bank of Dekalb with 7.0 percent market share, and Farmers Bank and Trust Company with 5.9 percent market share.

In small loans to businesses, WFBNA ranked tenth with a market share of 2.9 percent. The top three lenders were Farmers Bank & Trust Company with a market share of 14.4 percent, American Express with a market share of 12.8 percent, and Bancorp South with a market share of 12.6 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits good geographic distribution of loans in its AA.

Home Mortgage Loans

Refer to Table O in the "MMSA" section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- For both 2012-2016 and 2017-2018 periods, the proportion of home mortgage loans in low-income geographies substantially meets the aggregate distribution of loans and is significantly below the proportion of OOUs in those geographies.
- The proportion of loans in moderate-income geographies exceeds the aggregate distribution of loans and is below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the "MMSA" section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is good.

- For 2012-2016, the proportion of the bank's small business loans in LMI geographies exceeds the aggregate distribution of loans in LMI geographies.
- The proportion of loans in low-income geographies is near to the proportion of businesses in low-income geographies and in moderate-income geographies exceeds the proportion of businesses located in those geographies.
- The bank's small business lending in 2017-2018 is significantly below the performance in 2012-2016; therefore, the overall performance was downgraded from excellent to good.

Distribution of Loans by Income Level of the Borrower

The bank exhibits an adequate distribution of loans among individuals of different income levels and businesses of different sizes.

Home Mortgage Loans

Refer to Table P in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- For both 2012-2016 and 2017-2018 periods, the bank's overall home mortgage lending to low-income borrowers is below the aggregate distribution and is significantly below the proportion of families.
- The bank's overall home mortgage lending to moderate-income borrowers substantially meets the aggregate distribution of loans and is below the proportion of families.

Small Loans to Businesses

Refer to Table R in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's originations and purchases of small loans to businesses. Based on the data in Table R, the distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For 2012-2016 period, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.
- The bank's small business lending in 2017-2018 slightly exceeds the combined performance in 2012-2016.

Community Development Lending

The institution has made an adequate level of CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The level of CD lending in the Texarkana MMSA AA is adequate. WFBNA made two CD loans in its AA for a total of $6.1 million, which represents 8.0 percent of allocated tier 1 capital. CD lending performance had a neutral impact on the lending test rating. Both loans were for the primary purpose of affordable housing, which is a critical CD need in the bank's AA.

An example of CD loans in the AA includes:

- In October 2015, WFBNA provided a $4.4 million loan for a 150-unit Section 8 affordable housing development located in Texarkana, Texas. The project requires that 100 percent of the units rent restricted under a project-based Section 8 HAP contract to tenants earning between 50 and 60 percent of the area MFI.

- In November 2013, WFBNA provided a $1.7 million loan for a 124-unit affordable housing development located in Texarkana, Texas. The project requires that 100 percent of the units restricted to tenants earning between 30 to 60 percent of the area MFI. The project also specified that 30 units are reserved for public housing and 13 units are restricted for persons with disabilities.

Product Innovation and Flexibility

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 6 loans totaling $350,000 to LMI homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.

INVESTMENT TEST

The bank's performance under the Investment Test in the Texarkana MMSA AA is Needs to Improve.

Based on a FS review, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Texarkana MMSA AA is poor.

Qualified Investments										
Assessment Area	Prior Period*		Current Period		Total				Unfunded Commitments**	
	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Texarkana MMSA	3	$12,416	7	$27	10	100.0	$12,443	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

The institution has a poor level of qualified CD investments and grants, but not in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 16.2 percent of tier 1 capital allocated to the AA; however, a substantial majority of the investments were from prior period investments. Since the last evaluation, the bank's total investment was limited to 7 grants totaling $26,500 representing a low 0.1 percent of tier 1 capital. There are opportunities available within the AA for the bank to provide CD investments; however, the bank opted to provide grants since the last evaluation.

The institution exhibits poor responsiveness to credit and community economic development needs identified in the AA limiting to only several grants for community services to assist LMI individuals.

The institution rarely uses innovative and/or complex investments to support CD initiatives.

Example of a CD investment in the AA includes:

- This CD investment is from a prior period and remains outstanding during the evaluation. In June 2011, WFBNA invested $15.9 million in a LIHTC project located in a low-income census tract of Texarkana, Texas. The project consisted of 124 units leased to families with incomes at or below 60 percent of the area MFI. Additionally, 30 of the units will receive Public Housing Section 9 operating subsidies. The project is 24 two-story townhouse buildings, one community building, and a rehabilitated one-story learning center. This project is the third phase of a five-phase redevelopment effort undertaken by a local housing agency and local developers. As part of this plan, all physically obsolete and distressed rental units will be demolished and rebuilt.

SERVICE TEST

The institution's performance under the Service Test in the Texarkana MMSA AA is rated High Satisfactory.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Texarkana MMSA AA is good.

Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the institution's AA.

Distribution of Branch Delivery System											
	Deposits	Branches						Population			
Assessment Area	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%)				% of Population within Each Geography			
				Low	Mod	Mid	Upp	Low	Mod	Mid	Upp
Texarkana MMSA	100.0	2	100.0	0.0	50.0	50.0	0.0	1.4	19.7	57.6	21.3

Distribution of Branch Openings/Closings						
Assessment Area	# of Branch Openings	# of Branch Closings	Net change in Location of Branches (+ or -)			
			Low	Mod	Mid	Upp
Texarkana MMSA	0	5	0	-2	-3	0

As of December 31, 2018, WFBNA operates two branches and six ATMs in the Texarkana MMSA AA. Both branches are full-service locations. There are no branches in low-income geographies; however, the volume of population is very low in low-income geographies compared to total demographics. There is one branch in a moderate-income geography. The branch distribution in the moderate-income geography exceeds the percentage of the population in moderate-income geographies in the AA.

The institution's opening and closing of branches have not generally affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed five branches since the last evaluation. Two of these branches were located in moderate-income CTs. The closure of branches in moderate-income geographies was to consolidate with another branch nearby and did not negatively impact the distribution of branches relative to the population residing in those geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 6:00 pm, and Saturdays from 9:00 am to 12:00 pm. All WFBNA services are available at all branches and all ADS discussed bank-wide are available in this AA.

Community Development Services

The institution provides a relatively high level of CD services.

The level of CD services in the Texarkana MMSA AA is good. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 64 CD service activities to 10 organizations since the last evaluation, logging a total of 139.5 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide affordable housing and community services to LMI individuals and families. The bank's financial assistance is responsive to the identified needs in the AA particularly affordable housing. The following is an example of CD services provided in this AA:

- A WFBNA team member provided 100 hours of Board service to a nonprofit housing organization that works in partnership with people in need to build decent and affordable housing. The houses are sold to those in need at no profit and with no interest charged.

Multistate Metropolitan Statistical Area Rating

Washington-Baltimore-Arlington, DC-MD-VA CSA (Washington MMSA AA)

CRA rating for the Washington MMSA AA[17]: Outstanding
The Lending Test is rated: Outstanding
The Investment Test is rated: Outstanding
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Excellent level of lending activity;
- Good geographic distribution of loans;
- Excellent borrower distribution of loans;
- WFBNA is a leader in providing CD loans, which has a significant positive impact on the Lending Test;
- WFBNA's use of flexible products has a positive impact on the Lending Test;
- Excellent level of CD investments that are responsive to AA needs;
- Retail delivery systems are readily accessible to all portions of the AA; and
- Good level of CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in Washington MMSA AA

WFBNA delineated three AAs within the Washington-Baltimore-Arlington, DC-MD-VA CSA. Refer to Appendix A for a complete description of the AA. These areas were combined, analyzed, and presented at the CSA level with an AA name of Washington MMSA. WFBNA has $36.4 billion of deposits in the Washington MMSA AA representing 2.9 percent of adjusted deposits. The Washington MMSA AA represents the fifth largest rated area in terms of deposits. In the Washington MMSA AA, WFBNA ranked third out of 106 institutions with 11.0 percent market share. The top two banks within the MMSA in terms of deposits were Bank of America with 17.4 percent market share and E*TRADE Bank with 13.2 percent market share. WFBNA operates 220 branches and 411 ATMs within the Washington MMSA AA, representing 3.9 percent of the bank's branches and 3.0 percent of the bank's ATMs. In comparison to the percentage of deposits and branching network, the bank originated and purchased $126.6 billion in loans or 6.8 percent of total bank loan originations and purchases during the evaluation period. The bank's primary loan products in the Washington MMSA is home mortgage loans and small business loans.

Demographic Data

The following table provides a summary of the demographics that include housing and business information for the Washington MMSA AA. Table A indicates that the volume of OOUs is very small in low-income CTs and over 38 percent of families in the AA are LMI. The area's median housing value in the Washington MMSA AA is 3.6 times the highest MSA median income, but 4.5 times moderate-, and 7.2 times low-income, indicating a limited proportion of OOUs affordable to LMI.

[17] This rating reflects performance within the multistate metropolitan statistical area. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

Assessment Area: Washington-Baltimore-Arlington DC-MD-VA CSA (2016)

Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #

Due to rounding, totals may not equal 100.0
(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

Washington-Arlington-Alexandria, DC-VA-MD, MSA

According to the August 2018 Moody's Analytics report, the Washington economy is regaining momentum. The pace of job gains is picking back up and year-ago growth is beating the national average for the first time in a year. Improvements throughout private services, including finance and professional/business, are responsible for the progress. On the downside, sluggishness persists in the outsize public sector and goods-producing industries have been spinning their wheels for the past year and a half. Encouragingly, the unemployment rate is at a cycle low and the tight labor market is providing opportunities for those entering the workforce. However, the housing market still has work to do. House price appreciation continues to trail the nation and this has held back the pace of single-family building.

More federal spending will allow the public sector to reverse course and progress modestly in the year ahead. The Washington economy is among the most dependent metro areas nationally on federal government positions. The budget uncertainty made agencies leery to create jobs and pursue contracts. Fortunately, the recent budget deal will pave the way for more net hiring in the near term. In addition, the tech industry is well-positioned to propel the Washington area. Tech firms choose to invest here thanks to the abundant talent, high living standards, and proximity to the nation's capital. As a result, the concentration of tech jobs is more than twice than that nationally.

Major area employers include Naval Support Activity Washington, Joint Base Andrew-Naval Air Facility and MedStar Health. The largest economic sector for employment is Business and Professional Services followed by Government. According to the U.S. BLS, the MSA unemployment rate as of August 2018 was 3.5 percent, down from 5.9 percent at the beginning of the evaluation period. The MSA unemployment rate was slightly above the State of Virginia at 3.1 percent, and lower than the State of Maryland at 4.0 percent and the District of Columbia at 5.8 percent.

Baltimore-Columbia-Towson, MD MSA

According to the February 2019 Moody's Analytics report, the Baltimore economy is performing well. Led by healthcare, professional/business services, and transportation/warehousing, job growth is accelerating following a mid-2018 slump. The uptick warrants some skepticism, as it is not yet corroborated by the more comprehensive count from the Quarterly Census of Employment and Wages. Still, the pace of job growth combined with a dip in the labor force has sent the jobless rate to below 4 percent. The result has been accelerating wage growth as employers vie for workers. Average hourly earnings growth has gained an edge over the state and U.S. rates. Progress in the housing market is uneven. Multifamily starts are running well ahead of a year earlier, compensating for some weakness in single-family construction. House price gains have decelerated, according to the Case-Shiller index, and prices remain 9 percent below their pre-crash peak.

Healthcare will extend its lead during the next leg of the expansion, and a wave of modernization projects will elevate Baltimore's stature as one of the country's premier healthcare hubs. Among the top 25 metro areas and divisions, Baltimore will boast one of the fastest rates of healthcare job growth over the next year. The Johns Hopkins Health System and the University of Maryland Medical System are two of the five largest employers, and the industry directly employs more than 15 percent of workers. Both major healthcare systems have key modernization projects under way in the metro area. Johns Hopkins is in the approval process for a $470 million modernization of its Bayview campus, and the University of Maryland Medical System is in the early stages of upgrading the St. Joseph Medical Center in Towson. Johns Hopkins in particular is routinely ranked one of the best hospitals in the country and attracts patients from a much broader geographic area than most providers. Major area employers include Fort George G. Meade, Johns Hopkins University, and Aberdeen Proving Ground. The area economy is driven by Education and Health Services, Professional and Business Services and Government. According to the U.S. BLS, the MSA unemployment rate in December 2018 was 4.2 percent, down considerably from 7.2 percent at the beginning of the evaluation period. The unemployment rate was slightly above the State of Maryland at 4.0 percent during the same period.

Winchester, VA MSA

According to the December 2018 Moody's Analytics report, the Winchester economy kicked into a higher gear in 2018. Job growth picked up over the past year, and at 3 percent on an annual basis, the pace exceeds the Virginia and U.S. averages by more than a full percentage point. Powered by manufacturing and construction, goods-producing industries have rocketed higher, accounting for the entire pickup in net hiring. Over the next few years, strength in the DC metro area will generate positive economic spillover in Winchester, raising wages and consumer purchasing power. As a commuter haven for the DC metro area, Winchester greatly depends on the capital region. Amazon plans on hiring 25,000 employees with an average annual salary of $150,000. The inflow of high paying jobs will put increased pressure on the high cost of living in the DC metro area, pushing more workers to relocate to the more affordable bedroom communities such as Winchester. As a result, Winchester's population growth will outpace both the Virginia and U.S. rates over the medium term. The largest employers are the Winchester Medical Center, Navy Federal Credit Union, and Wal-Mart Stores, Inc. Home prices have steadily increased but not to the level back in 2007. According to the U.S. BLS, the MSA unemployment rate in 2018 was 3.0 percent, down considerably from 6.3 percent at the beginning of the evaluation period. The unemployment rate was similar to the State of Virginia at 3.1 percent.

Community Contact

The analysis takes into consideration comments provided by six community contacts that serve the bank's Washington MMSA AA. Two of the six community contacts were Interagency Listening Groups sponsored by regulators. There were 14 participants in the listening groups with discussions focused on housing issues, small businesses, and economic development in the AA. Two contacts represent an economic development agency and a non-profit agency. One of the contacts was made through a community needs assessment meeting sponsored by a large bank in the Baltimore, MD area. There were 13 participants that attended the needs assessment meeting representing local food banks, community lending and affordable housing. One of the community contacts is a non-profit community action and health service organization serving VA. The contacts indicate that there are significant CD needs across the CSA including access to credit and making banking services more available in LMI communities. Driven primarily by government affairs, the AA maintains a diversified economy. The seven participants of the CRA Listening Group who are community advocates for housing in the AA, mentioned affordable housing as a top priority in the area across all income levels, particularly for those with incomes less than 50 percent AMI.

One participant commented that demographics have shifted in the DC area and gentrification is causing changes in most neighborhoods in the AA with the effect of displacing LMI people. The participant mentioned that approximately 40 percent of the AA's lower-income neighborhoods experienced gentrification between 2000 and 2013, giving the city the greatest "intensity of gentrification" of any in the country. The AA also saw the most African American residents more than 20,000 displaced from their neighborhoods during that time, mostly by affluent, newcomers. Arlington County has a shortage of affordable homes and is working to address this need in the AA.

In Maryland, the non-profits in the AA serve Frederick County, and the CRA listening group was focused on the city of Baltimore. The economic development organization indicates that the economy in Arundel County is strong. According to the contact, affordable housing remains a significant need, especially given the high and rising cost of housing. The median price of a home in April 2016 was $355,000, up from $350,000 a year ago. There are some efforts to build more affordable housing in the AA but there are challenges. For example, the county needs a resolution passed by the county council in order to take advantage of tax credits and there is a significant level of opposition from residents. There are also not a lot of LMI areas, even though there are pockets of need. The contact mentioned that the organization has had good participation by the banks in the loan consortium. Most banks that have been asked to participate do. There are opportunities for banks in the areas to provide financing for revitalization.

The nonprofit in Frederick County commented that the population has been growing in the AA in recent years with newer residents from nearby Montgomery County and Washington, DC, where the cost of living is higher, coming to the area. The increase in population has led to increased demand for affordable rental housing units; however, there has not been enough development of new units to meet this growing need. Youth homelessness is an issue in the area and the percentage of public-school children who are homeless in the AA has increased in recent years due to a general lack of affordable housing and transitional housing for older youth.

Another contact commented that given the geographic size of the AA access to transportation is another need in the area, particularly for LMI households and individuals. The contact went on to state that the lack of transportation, or transportation options that are infrequent or inconvenient impacts not only access to services, but limits employment options for many in the community, particularly those that might not live in and around the downtown area. The contact also mentioned that there is also a need for career development and job training programs, particularly for young adults to help move them into jobs that will allow them to be financially self-supporting. In addition to growing, the population in the county is also aging which is creating a need for access to affordable medical services for LMI and the elderly.

The bank conducted research in the AA and identified community needs for affordable housing for low-income families, financial education for the unbanked and underbanked, neighborhood revitalization/stabilization, small business assistance for business owners, and workforce development/job placement.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing particularly for LMI families and the chronically homeless, are primary needs of the AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs coupled with limited home affordability for LMI individuals. Additionally, access to credit for start-ups, venture capital for micro loans, and lending in communities with revitalization initiatives are also credit needs in the AA.

Scope of Evaluation in Washington MMSA AA

The rating for the Washington MMSA AA is based on a FS evaluation of the bank's performance in the combined Washington-Baltimore-Arlington, DC-MD-VA-WV CSA. The Washington MMSA is the fifth largest rated area and along with 12 other rated areas represents the bank's most significant markets in terms of lending, deposit, and branch distribution. The Washington MMSA AA represents a sizeable portion of the bank's overall lending, investments, and services; therefore, the performance in the MMSA was weighted heavier in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN WASHINGTON MMSA AA

LENDING TEST

The bank's performance under the Lending Test in the Washington MMSA AA is rated Outstanding.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Washington MMSA AA is excellent.

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to the credit needs in the AA taking into account the number and dollar amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Washington MMSA	353,547	91,159	666	159	445,531

Dollar Volume of Loans (000's)					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Washington MMSA	$122,092,443	$4,546,725	$23,625	$1,356,013	$128,018,806

WFBNA ranked third in deposits with 11.3 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 9.2 percent market share. There is strong competition as reflected by the 841 lenders and 106 depository institutions in the AA. The number two lender in the market was SunTrust with a 4.6 percent market share.

In small loans to businesses, WFBNA ranked sixth with a market share of 5.8 percent. The top three lenders were American Express with a market share of 23.5 percent, Bank of America with a market share of 11.4 percent, and JPMorgan Chase Bank with a market share of 9.6 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in its AA.

Home Mortgage Loans

Refer to Table O in the "MMSA" section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in LMI geographies substantially meets the aggregate distribution of loans in those geographies.
- The proportion of loans in LMI geographies is below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the "MMSA" section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- For 2012-2016, the combined proportion of the bank's small business loans in low-income geographies exceeds the aggregate distribution of loans and is near to the proportion of businesses located in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is near to the proportion of businesses located in those geographies.
- The bank's small business lending in 2017-2018 is slightly below the combined performance in 2012-2016.

Distribution of Loans by Income Level of the Borrower

The bank exhibits an excellent distribution of loans among individuals of different income levels and businesses of different sizes.

Home Mortgage Loans

Refer to Table P in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 7.2 times the income of low-income borrowers and 4.5 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI individuals. Despite the affordability challenges, the bank's overall home mortgage lending to low-income borrowers in 2012-2016 exceeds the aggregate lending and is well below the proportion of families.
- The bank's overall home mortgage lending to moderate-income borrowers substantially meets the aggregate lending and is near to the proportion of families.
- Based on the bank's home mortgage lending in 2017-2018, the bank's home mortgage lending is slightly less than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the "MMSA" section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's originations and purchases of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Community Development Lending

The institution is a leader in making CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The level of CD lending in the Washington MMSA AA is excellent. WFBNA made 159 CD loans in its AA for a total of $1.4 billion, which represents 33 percent of allocated tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The majority of these loans were for the primary purpose of affordable housing which is a critical CD need in the bank's AA. The bank made 96 loans totaling $1.2 billion (85.7percent) for the purpose of affordable housing. Additionally, the bank extended 50 CD loans totaling $126 million for the primary purpose of community services, nine loans totaling $15 million for the primary purpose of economic development and four CD loans totaling $8 million for revitalization and stabilization of the AA.

Examples of CD loans in the AA include:

- In February 2013, WFBNA refinanced a $32 million term loan for a 495-unit affordable housing development. This development is located in a moderate-income census tract in Parkville, Maryland, and consists of 18 studio units, 213 one-bedroom units, 138 two-bedroom units and 126 three-bedroom units. All of the units have actual rental rates that are below 2013 Fair Market Rent and are affordable to tenants earning between 31.5 and 60.8 percent of the 2012 area's MFI of $85,600.
- In July 2014, WFBNA extended a $27.7 million loan for the acquisition and rehabilitation of an affordable housing project. This development is located in a low-income census tract in District Heights, Maryland and consists of 99 one-bedroom units, 429 two-bedroom units, 71 three-bedroom units with 99.5 percent of the actual rent rates below the 2014 Fair Market Rent for the area and 99.5 percent of the units affordable to tenants earning between 30.5 and 59.9 percent of the 2014 area MFI of $107,100.
- In December 2018, WFBNA provided a $250,000 working capital line of credit to an organization that helps medically underserved individuals to become full partners and informed advocates in managing their health. According to the Chief Executive Officer of the nonprofit, 87 percent of the clients served are considered to be LMI individuals earning less than $87,520 annually, which is 80 percent of the 2015 area MFI.
- In December 2017, WFBNA provided a $12.7 million loan for the rehabilitation of a LIHTC affordable housing development. This development is located in the Chinatown neighborhood of Washington, DC with 99.4 percent of the units restricted to seniors at 60 percent of the area MFI. The property was originally built in 1982 and consists of one ten-story, elevator serviced building with 152-units restricted to senior (62+) households plus one manager's unit. This property is a cultural landmark and one of the few remaining ethnic Chinese staples in Chinatown.

Product Innovation and Flexibility

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 476 loans totaling $105.9 million to LMI homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.

INVESTMENT TEST

The bank's performance under the Investment Test in the Washington MMSA AA is rated Outstanding.

Based on a FS review, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Washington MMSA AA is excellent.

Qualified Investments										
Assessment Area	Prior Period*		Current Period		Total				Unfunded Commitments **	
	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Washington MMSA	40	$31,768	1,248	$670,933	1,288	100.0	$702,701	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 17.2 percent of tier 1 capital allocated to the AA.

The institution exhibits excellent responsiveness to credit and community economic development needs identified in the AA, including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 84.9 percent of the dollar volume of the bank's current and prior period investment focused on affordable housing which is a primary credit need in the AA. Additionally, the bank provided over 1,119 grants totaling $64 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes extensive use of innovative and/or complex investments to support CD initiatives. CD Investments involved many complex LIHTC and NTMC projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In March 2013, WFBNA invested $11.5 million in the construction of a 90-unit LIHTC senior affordable housing development. This development is located in Washington, DC. All units are targeted to residents aged 55 years and older, with incomes at 60 percent or less of the area MFI. This investment is responsive to the need for affordable housing.
- In December 2016, WFBNA provided a $9.5 million NMTC investment in an education and healthcare facility. Located in Washington, D.C. the new 19,000 sf single story building provides a safe, nurturing childcare to approximately 100 additional infants, toddlers, and preschoolers whose families are living in crisis shelters or transitional housing. The expansion will more than double the organizations capacity to serve the D.C. area. The Center's mission is to provide homeless children with a nurturing educational environment, preparing children to enter kindergarten at area public schools, ready to learn; and to help homeless parents stabilize their home lives and become self-

sufficient. All of the clients served are LMI individuals. The project also has created over 38 new full-time employment opportunities.

- During the exam timeframe, WFBNA provided two grants totaling $672,488 to two local economic development organizations through the Small Business DCC Program benefiting small businesses in the Washington DC and Baltimore areas. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.
- During the exam timeframe, WFBNA provided 19 grants totaling $1.6 million to numerous local housing organizations through the PMP for affordable housing in the Washington MMSA AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

SERVICE TEST

The institution's performance under the Service Test in the Washington MMSA AA is rated Outstanding.

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Washington MMSA AA is excellent.

Retail Banking Services

Service delivery systems are readily accessible geographies and individuals of different income levels in the institution's AA.

Distribution of Branch Delivery System											
Assessment Area	Deposits	Branches						Population			
	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%) *				% of Population within Each Geography *			
				Low	Mod	Mid	Upp	Low	Mod	Mid	Upp
Washington MMSA	100.0	220	100.0	9.1	19.1	36.4	34.5	8.7	21.9	35.9	32.9

* May not add up to 100% due to geographies with unknown tract income level and rounding. Population in census tracts with income unknown represent 0.6 percent and the bank's branches in these tracts represent 0.9 percent of total branches in the AA.

Distribution of Branch Openings/Closings							
Assessment Area	# of Branch Openings	# of Branch Closings	Net change in Location of Branches (+ or -)				
			Low	Mod	Mid	Upper	NA
Washington MMSA	13	11	0	+1	-3	+4	0

As of December 31, 2018, WFBNA operates 220 branches and 411 ATMs in the Washington MMSA AA. Of these branches, 201 are full-service locations and 19 are limited-service branches. The institution's branches include 20 branches in low-income geographies and 42 branches in moderate-income geographies. The branch distribution in low-income geographies exceeds the percentage of the population in low-income geographies and branch distribution in moderate-income geographies is near to the percentage of the population in moderate-income geographies in the AA. When considering an additional 32 branches within close proximity to LMI geographies, the bank's distribution improves and exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank opened one branch in low-income, four in moderate-income, three branches in middle-income, and five branches in upper-income geographies. The bank closed one branch in low-income, three branches in moderate-income, six branches in middle-income, and one branch in upper-income geographies. The closure of branches in LMI geographies did not negatively impact the distribution of branches relative to the population residing in those geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Thursday from 9:00 am to 5:00 pm and 9:00 am to 6:00 pm on Friday. Six branches have differing hours, including three that operate Monday through Friday from 8:00 am to 5:00 pm; one that operates 11:00 am to 7:00 pm Monday through Friday; and one that operates 10:30 am to 1:30 pm Monday through Friday. Of the 209 branches, 140 are also open on Saturdays from 9:00 to 1:00 pm and one is open 10:00 am to 4:00 pm. All WFBNA services are available at all branches and all ADS discussed bank-wide are available in this AA.

Community Development Services

The institution provides a relative high level CD services.

The level of CD services in the Washington MMSA AA is good. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 698 CD service activities to 194 organizations since the last evaluation, logging a total of 2,843 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing and economic development. The bank's assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- Five WFBNA team members provided 125 hours of financial education to an organization that provides supportive services to help people secure permanent unsubsidized employment. This organization serves unemployed individuals that demonstrate a substantial need for employment assistance including basic skills deficiency, lack of education, documented substance abuse, homelessness, history of unstable employment, or previous incarceration.
- A WFBNA team member provided 126 hours of Board services and 17 hours of technical assistance or financial education at an organization that develops students to become engaged learners, critical thinkers, and active citizens. According to the organization, 100 percent of its clients are LMI individuals.
- A WFBNA team member provided 55 hours of technical assistance to an economic development organization that helps women who live in poverty build small businesses to create better lives for their families and the community by offering microloans, training, and support.
- A WFBNA team member provided 12 hours of Board services to a housing-related organization that facilitates permanent affordable housing opportunities by empowering people to live independently and providing public education and advocacy to bring individuals in need of housing together with housing partners. According to the organization's CEO, over 95 percent of its clients are LMI individuals.

State Rating

State of Alabama

CRA rating for the State of Alabama[18]: Satisfactory
The Lending Test is rated: High Satisfactory
The Investment Test is rated: Low Satisfactory
The Service Test is rated: High Satisfactory

The major factors that support this rating include:

- Excellent lending activity;
- Good geographic distribution of loans;
- Good borrower distribution of loans;
- Good level of CD loans was originated, which has a positive impact on the Lending Test;
- WFBNA's use of flexible products has a positive impact on the Lending Test;
- Adequate level of CD investments;
- Retail delivery systems are accessible to all portions of the AA; and
- WFBNA is a leader in providing CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in Alabama

WFBNA delineated ten AAs within Alabama including Birmingham-Hoover-Talladega, AL CSA (Birmingham CSA AA); Huntsville-Decatur-Albertville, AL CSA (Huntsville CSA AA); Mobile-Daphne-Fairhope, AL CSA (Mobile CSA AA); Anniston-Oxford-Jacksonville, AL MSA (Anniston MSA AA); Dothan-Enterprise-Ozark, AL CSA (Dothan CSA AA); Florence-Muscle Shoals, AL MSA (Florence MSA AA); Gadsden, AL MSA (Gadsden MSA AA); Montgomery, AL MSA (Montgomery MSA AA); Tuscaloosa, AL MSA (Tuscaloosa MSA AA), and AL Combined non-metropolitan AA (AL Combined NonMetro AA). The Birmingham CSA AA, Huntsville CSA AA, and Mobile CSA AA received FS reviews. These three areas accounted for the majority of the lending (69 percent) and deposits (70 percent) amongst the AAs in Alabama. Refer to Appendix A for a complete description of each AA. Alabama represents the 20th largest rated area by deposits. WFBNA has $8.3 billion deposits representing 0.7 percent of adjusted deposits in Alabama. WFBNA operates 109 branches and 185 ATMs in Alabama representing 2.0 percent of branches and 0.01 percent of the bank's ATMs. The bank originated or purchased $16.5 billion in loans or 0.9 percent of total reported loan originations and purchases during the evaluation period. The bank's primary loan products in Alabama are home mortgage loans and small loans to businesses.

Birmingham CSA AA

Within the Birmingham CSA AA, the bank had $4.0 billion deposits and ranked third amongst 59 depository institutions in the market with 9.7 percent market share. Regions Bank ranked first with a market share of 27.4 percent and Compass Bank ranked second with a market share of 21.0 percent. WFBNA operates 37 branches and 67 ATMs in the AA.

[18] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

Huntsville CSA AA

Within the Huntsville CSA AA, the bank had $836 million deposits and ranked third amongst 39 institutions in the market with 7.1 percent market share. Regions Bank and Compass Bank ranked second and third with 20.7 percent and 11.2 percent market share, respectively. WFBNA operates 12 branches and 23 ATMs in the AA.

Mobile CSA AA

Within the Mobile CSA AA, the bank had $1.0 billion deposits and ranked fourth amongst 30 institutions in the market with 9.0 percent market share. Regions Bank ranked first with 27.7 percent market share, Compass Bank ranked second with 11.8 percent, and PNC Bank ranked third with 9.8 percent. WFBNA operates 18 branches and 32 ATMs in the AA.

Demographic Data

Birmingham CSA AA

The following table provides a summary of the demographics that includes housing and business information for the Birmingham CSA AA. Table A indicates that the volume of OOUs is very small in low-income CTs and over 38 percent of families in the AA are LMI. The area's median housing value in the Birmingham CSA AA is 2.5 times the area's median income, but 3.1 times moderate-, and 4.9 times low-income, indicating a limited proportion of OOUs affordable to LMI. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

Economic Data

According to the August 2018 Moody's Analytics report, Birmingham's economy performed well in the first half of 2018 but the state is still making up for a lackluster 2017. Hiring among Birmingham manufacturers helped the state's labor market, but job growth in private services as well as education and healthcare, in particular, is behind the rest of the South and the nation. Income trends did improve due to bigger pay gains and firmer job growth. Birmingham will remain a below-average performer in long-term job and income growth because of weak demographics and automation in manufacturing. The Birmingham CSA AA held on to its early-2018 gains through the summer, narrowing the gap with the nation in year-over- year job growth. Birmingham's labor force recovered from the 2017 drop, reaching its highest since late 2011. Birmingham will soon make the leap from recovery to expansion, and by the end of 2018 payroll employment will finally surpass its prerecession level. Gains in financial services and construction will help grow the economy, but Birmingham will remain a below average near-term performer. In the long run, growth will trail the U.S. average because of sluggish population trends and an undereducated workforce that will hinder Birmingham's ability to grow its core industries. The single-family housing market is fair with gains in prices since 2012 exceeding those nationally and federal trade policies and defense spending will boost new homeownership and steel mill recovery.

The largest economic sectors for employment in the AA are Government, Education and Health Services, and Manufacturing, with Professional and Business Services. Major employers in the AA apart from the university include Regions Financial Corporation and Children's of Alabama. According to the U.S. BLS, the unemployment rate for the 2Q of 2018 was 3.9 percent, down from 6.9 percent at the beginning of the evaluation period. The AA unemployment rate was less than the overall state at 4.7 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by two community contacts pertaining to the Birmingham CSA AA in conjunction with this evaluation. One contact represented a small business development corporation serving the AA through one-on-one business counseling and educational training for small businesses. The other community contact represented a social services and educational organization for the Counties of Shelby and Chilton, both within the Birmingham CSA AA.

According to the first contact, Birmingham is having more community banks come back into the small business space after the recession with competitive lending only for high quality credit clients. The contact expressed larger regional banks were not as involved with the small business clients and felt the key priority or challenge in the State of Alabama is access to capital for small businesses. Recovery has been slow with businesses significantly impacted. In terms of volume, the contact noted approximately 200 new business start-ups each year. The contact discussed a large shortfall in financing for small businesses relative to the 2006 to 2007 period with the gap only half filled since 2018. The contact cited limited availability for small businesses, including only three CDFIs who do small business lending in the State of Alabama. The contact discussed the statewide economy as growing slower than the national average, with unemployment about one percent higher than the national average.

While the contact noted slow, net growth in employment largely tied to the automotive industry and strong exports and mostly confined to the urban areas such as Birmingham and Huntsville. The community contact cited no real growth in the huge rural areas, where unemployment is almost at 20 percent. Chilton, a rural county one hour south of Birmingham, has a lot of farming but not much manufacturing, and not much opportunity or growth. Other opportunities noted by the contact from the small business development organization for local financial institutions include small business education and technical assistance, particularly to micro lenders, and involvement in the State Small Business Credit Initiative program.

The second contact noted a number of pressing community needs in Chilton County specifically, including the need for quality jobs, affordable housing, housing rehab and repair, transportation, and quality education. The contact discussed old housing stock in need of repair in Chilton County along with unmet credit needs in the community to help those with low income and poor credit records. The contact noted the opportunity for financial institutions to provide needed financial education and grant funding to meet community development needs, including senior home improvement programs.

The bank conducted research in the AA and identified community needs for homeless services; financial education for the unbanked or underbanked; neighborhood revitalization/stabilization; and small business assistance.

Considering the information from the community contact and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Birmingham CSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs coupled with limited home affordability for LMI individuals.

Huntsville CSA AA

The following table provides a summary of the demographics that includes housing and business information for the Huntsville CSA AA. Table A indicates that the volume of OOUs is very small in low-income CTs and over 39 percent of families in the AA are LMI. The area's median housing value in the Huntsville CSA AA is 1.9 times the area's highest median income, but 2.4 times moderate-, and 3.9 times low-income, indicating a limited proportion of OOUs are affordable to LMI. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Economic Data

Huntsville, AL MSA

According to the April 2018 Moody's Analytics report, the Huntsville economy is in the late expansion stage of the business cycle and is an above-average performer with job growth exceeding both Alabama and U.S. averages. Huntsville's lead over the state and the U.S. will shrink in 2018 as firms struggle to find qualified workers in a tight labor market. Job gains in high-wage research, engineering and manufacturing will lift retail and housing. Over the long run, a high-quality workforce and solid population trends will enable Huntsville to perform better than Alabama and in line with the U.S. According to the U.S. BLS, the unemployment rate in second quarter of 2018 was 4.3 percent, down from 8.4 percent in 2012. The MSA unemployment rate compares favorably to the overall State of Alabama at 4.7 percent.

The largest sectors by employment are Professional and Business Services, Government, and Manufacturing. Major area employers include the U.S. Army/Redstone Arsenal, NASA, Huntsville Hospital, and Boeing. Federal military spending is resurgent and will aid the Huntsville economy. In the fourth quarter of 2017, U.S. military outlays were up more than 4 percent from a year earlier, the fastest pace since 2010 and the first-time military spending outpaced nonmilitary spending since 2012. The $1.3 trillion federal spending bill, enacted in March 2018, raises military spending by $80 billion above the limit set in the Budget Control Act of 2011, which will boost military construction and contracting activity.

Per Moody's, homeowner vacancy rates exceed both Alabama state and the nation along with declining single-family housing construction in the first quarter of 2018.

Decatur, AL MSA

According to the December 2018 Moody's Analytics report, Decatur's economy is strong. Job growth is the fastest since early 2012 and matches the state and national rates. The Moody's Analytics Business Cycle Index, which combines employment, factory output, homebuilding and house prices into one indicator, is keeping pace with Alabama and trailing the U.S. average by a smaller margin. The acceleration in hiring is due to an exceptional surge in the labor force compared with the flat trend for most of the decade. Construction jobs, meanwhile, has increased more substantially thanks to a pickup in housing activity. The favorable housing outlook rests on two assumptions: First, net migration will flip from a negative to a positive, resulting in the population increasing for the first time since 2011, second, more households will form and purchase homes thanks to renewed

The largest sectors by employment are Professional and Business Services, Government, and Manufacturing. Major area employers include the General Electric Co., Wayne Farms Prepared Foods, and Wayne Farms. According to the U.S. BLS, the unemployment rate in fourth quarter of 2018 was

3.3 percent, down significantly from 7.1 percent at the beginning of the evaluation period. The MSA unemployment rate was similar to the overall State of Alabama at 3.5 percent during the same period.

Community Contacts

The analysis takes into consideration comments provided by a community contact pertaining to the Huntsville CSA AA in conjunction with this evaluation. The contact represents a community development organization including financial literacy programs serving LMI individuals and families in Madison and Limestone Counties. The organization is a certified community housing development organization and receives some funding through grants from local financial institutions.

The contact described the Huntsville economy as a high-tech sector, with contractors providing services to military bases, as well as automobile manufacturers. The contact stated there are approximately 55,000 people in poverty in the area and some low-income neighborhoods in the northwest quadrant of the city, both a focus for the contact's organization. The contact stated financial institutions served the low-income areas in Huntsville well and did not express any concern over insufficient branches or ATMs in low-income areas.

Considering the information from the community contact, bank management, and demographic and economic data, affordable housing and small business loans represent a primary credit need for the Huntsville CSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs coupled with limited home affordability for LMI individuals.

Demographic Data

Mobile CSA AA

The following table provides a summary of the demographics that includes housing and business information for the Mobile CSA AA. Table A indicates that the volume of OOUs is very small in low-income CTs and over 39 percent of families in the AA are LMI. The area's median housing value in the Mobile CSA AA is 2.7 times the area's highest median income, but 3.4 times moderate-, and 5.4 times low-income, indicating a limited proportion of OOUs are affordable to LMI. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

Assessment Area: FS Mobile-Daphne-Fairhope AL CSA (2016)

Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #

Economic Data

Mobile, AL MSA

According to the April 2018 Moody's Analytics report, the Mobile economy is in the recovery stage of the business cycle and remains a weak economic performer in a weak state. The metro area is struggling to create jobs, with payroll employment growing at half the national average over the last two years. The public sector continues to weaken, with payrolls lingering near the lowest level in 25 years. According to the U.S. BLS, the unemployment rate in the second quarter of 2018 was 5.0 percent, down from 9.6 percent in 2012. The MSA unemployment rate is below the overall State of Alabama at 4.7 percent for the same period.

The largest sectors by employment are Education and Health Services, Government, and Professional and Business Services. Major employers include the USA Health System, Infirmary Health, and Austal. A tight state budget will crimp hiring at the University of South Alabama, with only Louisiana suffering a larger drop than Alabama in per student higher education state funding since the Great Recession. Medical services will stagnate as policy and funding uncertainties weigh on hiring needed to serve Mobile's aging population and the nearby retiree haven, Daphne-Fairhope. Budgeting and insurance impede medical service growth after the State of Alabama abandoned its Medicaid reform efforts. There is also concern around private insurance coverage in Alabama's poorer southern portions after Humana withdrew from the state's federal healthcare exchange, and funding questions around children's health insurance and federal cost-sharing subsidies. Mobile will get back on track in 2018, but job growth will fall short of that in Alabama and the U.S. Healthcare will provide less support and public education will struggle.

Shipbuilding and attendant services will benefit from greater military spending but longer term, weak demographics, including the out-migration of skilled youth, will cause Mobile to lag the U.S. Per Moody's, the president and Congress plan to add almost 80 vessels to the U.S. Navy, creating opportunities for the shipyards within the AA. The firm's military specialization and Navy contract will help insulate it from the steel and aluminum import tariffs, since its competitors would all face the same costs of compliance. The port authority also signed a $60 million investment plan to increase the Port of Alabama's accessibility to auto trade providing a favorable outlook to commercial port operations.

Per Moody's, housing price appreciation is below that of the nation overall. Single-family building is lagging, and although the pace of appreciation brought Mobile ahead of the state average, house prices are still 10 percent below their 2009 highs.

Daphne-Fairhope-Foley, AL MSA

According to the April 2019 Moody's Analytics report, the Daphne economy is performing well despite some recent slowing. Job growth has cooled over the past few months, but year-ago growth in payroll employment is a full percentage point above that in the rest of the state. Fueled by an increase in visitors and robust in-migration, consumer industries are leading the way forward. Leisure/hospitality will remain the chief driver in Daphne's economy. Consumer confidence has recovered from its swoon early in the year that was tied to the partial federal government shutdown and stock market decline, and households are more willing and able to spend. Aerospace holds the most promise in DAP with the merger between UTC Aerospace Systems and Rockwell Collins now complete. Collins Aerospace, which assembles wind turbines and jet engine covers, supplies the metro area with a much-needed source of well-paying manufacturing jobs.

The housing market is taking a breather following a strong 2018, with both new construction and price appreciation decelerating early in 2019.

The largest sectors by employment are Leisure and Hospital Services, Retail Trade, and Education and Health Services. Major area employers include Walmart Stores, Inc., Tanger Factory Outlet Center, and Quality Filters. According to the U.S. BLS, the unemployment rate in the fourth quarter of 2018 was 3.3 percent, down significantly from 6.6 percent at the beginning of the evaluation period. The MSA unemployment rate is similar to the overall State of Alabama at 3.5 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by a community contact pertaining to the Mobile CSA AA in conjunction with this evaluation. The contact represents a small business development corporation (SBDC) serving small business entrepreneurs within the AA. The SBDC is a statewide, inter-institutional program to enhance economic growth in Alabama by providing management and technical assistance to small businesses. A total of ten certified business counselors are available in 10 SBDs located at member university partners across the state. The SBDC Network specializes in one-on-one business counseling and educational training for small businesses. Programs of assistance are developed in response to small business needs and growth opportunities for expansion of the state's economy. The SBDC counsels 3000-3500 companies each year, including 400-500 that receive high impact in-depth counseling. There are approximately 200 new business start-ups each year. The contact indicated that the key priority/challenge in the AA is access to capital for small businesses. The recession 8 years ago significantly impacted the businesses in the AA and recovery has been slow. Based on a study conducted 3 years ago, there is approximately a $250 million shortfall of financing for small businesses relative to the 2006-2007 period. The financing gap has only been half filled to date. Alabama SBDC is focusing on the CDFI community. In certain areas, banks could be more proactive in terms of small business education and providing technical assistance, particularly to the micro lenders. Also, banks that are not part of the program should definitely apply to be a participant in the program.

Considering the information from the community contact and bank management as well as demographic and economic data, small business and affordable housing loans represent a primary credit need for the Mobile CSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs coupled with limited home affordability for LMI individuals.

Scope of Evaluation in Alabama

The rating for the State of Alabama is primarily based on FS evaluations of the bank's performance in the Birmingham CSA AA, Huntsville CSA AA, and the Mobile CSA AA; however, performance in each AA was considered. Conclusions where LS reviews affected the CRA Rating for the state are addressed within their respective tests. LS procedures were performed for the remaining seven AAs. A limited portion of the bank's overall lending, investments, and services were conducted in Alabama; therefore, the performance in Alabama received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN ALABAMA

LENDING TEST

The bank's performance under the Lending Test in Alabama is rated High Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Birmingham CSA AA is good and performance in both the Huntsville CSA and Mobile CSA AAs is excellent.

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State Loans	%State Deposits
Anniston MSA	1,640	594	22	1	2,257	1.9	3.3

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Birmingham CSA AA

WFBNA ranked third in deposits with 9.7 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 7.0 percent market share. There is strong competition as reflected by the 472 lenders and 59 depository institutions in the AA. The second and third top lenders in this market were Regions Bank with a 6.5 percent market share and Quicken Loans with a 4.3 percent market share.

In small loans to businesses, WFBNA ranked seventh with a market share of 5.5 percent. There is also strong competition as reflected by the 120 lenders in the AA. The top three lenders were American Express with a market share of 22.5 percent, Capital One with a market share of 7.0 percent, and Citibank with a market share of 6.5 percent.

Huntsville CSA AA

WFBNA ranked third in deposits with 7.1 percent market share in the AA. In overall HMDA lending, WFBNA ranked second with 8.0 percent market share. There is strong competition as reflected by the 358 lenders and 39 depository institutions in the AA. The top lender in the market is Redstone Federal Credit Union with 10.8 percent market share.

In small loans to businesses, WFBNA ranked sixth with a market share of 4.1 percent. There is also strong competition as reflected by the 83 lenders in the AA. The top three lenders were American Express with a market share of 19.7 percent, Citibank with a 7.1 percent, and Synchrony Bank with a 6.9 percent.

Mobile CSA AA

WFBNA ranked fourth in deposits with 9.0 percent market share in the AA. In overall HMDA lending, WFBNA ranked second with 6.5 percent market share. There is strong competition as reflected by the 476 lenders and 30 depository institutions in the AA. The top lender in the market is Regions Bank with 6.9 percent market share.

In small loans to businesses, WFBNA ranked fifth with a market share of 5.5 percent. There is also strong competition as reflected by the 104 lenders in the AA. The top three lenders were American Express with a market share of 19.2 percent, PNC Bank with 8.2 percent, and Capital One with 6.2 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in the FS AAs.

<u>Birmingham CSA AA</u>

Home Mortgage Loans

Refer to Table O in the State of Alabama section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in low-income geographies exceeds the aggregate distribution of loans and is significantly below the proportion of OOUs in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is significantly below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of Alabama section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is good.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for small business loans in low-income geographies substantially meets the aggregate distribution of loans and is near to the proportion of businesses located in those geographies.
- The proportion of loans in moderate-income geographies exceeds the aggregate distribution of loans and is below the proportion of businesses located in those geographies.in those geographies.

<u>Huntsville CSA AA</u>

Home Mortgage Loans

Refer to Table O in the State of Alabama section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- For 2012-2016, the proportion of home mortgage loans in low-income geographies is below the aggregate distribution of loans and is significantly below the proportion of OOUs in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is below the proportion of OOUs in those geographies.in those geographies
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of Alabama section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is good.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for small business loans in LMI geographies substantially meets the aggregate distribution of loans in those geographies.
- The proportion of loans in low-income geographies exceeds the proportion of businesses and to moderate-income geographies is below the proportion of businesses located in those geographies.

Mobile CSA AA

Home Mortgage Loans

Refer to Table O in the State of Alabama section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in low-income geographies exceeds the aggregate distribution of loans and is significantly below the proportion of OOUs in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is significantly below the proportion of OOUs in those geographies

Small Loans to Businesses

Refer to Table Q in the State of Alabama section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is good.

- For 2012-2016, the combined proportion of the bank's small business loans in low-income geographies is below both the aggregate distribution of loans and the proportion of businesses located in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is near to the proportion of businesses located in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly below the combined performance in 2012-2016.

Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

Birmingham CSA AA

Home Mortgage Loans

Refer to Table P in the State of Alabama section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 4.9 times the income of low-income and 3.1 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI. Because of the affordability challenges, the bank's overall home mortgage lending to low-income borrowers in both time periods, 2012-2016 and 2017-2018, is below the aggregate distribution of loans and is significantly below the proportion of families.
- The bank's overall home mortgage lending to moderate-income borrowers substantially meets the aggregate distribution of loans and is near to the proportion of families.

Small Loans to Businesses

Refer to Table R in the State of Alabama section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both periods, 2012-2016 and 2017-2018, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is near to the percentage of small businesses located in the AA.

Huntsville CSA AA

Home Mortgage Loans

Refer to Table P in the State of Alabama section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 3.9 times the income of low-income and 2.4 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI. Despite the affordability challenges, the bank's performance in 2012-2016 to LMI borrowers substantially meets the aggregate lending.

- The bank's overall home mortgage lending to low-income borrowers is well below the proportion of families and to moderate-income borrowers is near to the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Alabama section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Mobile CSA AA

Home Mortgage Loans

Refer to Table P in the State of Alabama section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 5.4 times the income of low-income and 3.4 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI. Despite the affordability challenges, the bank's performance in both time periods, 2012-2016 and 2017-2018, to LMI borrowers substantially meets the aggregate lending.
- The bank's overall home mortgage lending to low-income borrowers is significantly below the proportion of families and to moderate-income borrowers is below the proportion of families.

Small Loans to Businesses

Refer to Table R in the State of Alabama section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Community Development Lending

The institution has made an adequate level of CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

Birmingham CSA AA

The level of CD lending in the Birmingham CSA AA is poor. WFBNA made 20 CD loans in its AA for a total of $14.9 million, which represents only 3.4 percent of tier 1 capital. CD lending performance has a neutral impact on the lending test rating. The CD loans made had a limited responsiveness to the identified needs in the AA and focused on affordable housing, economic development, revitalization/stabilization, and community services for LMI individuals.

Examples of CD loans in the AA include:

- In July 2013, WFBNA provided a $5.3 million loan to purchase a 176-unit affordable housing building in a moderate-income census tract in Birmingham with 99.4 percent of the actual rent rates below the area's 2013 Fair Market Rents and affordable to LMI tenants.
- In July 2014, WFBNA provided a $1.2 million working capital line of credit for revitalization of a moderate-income area as part of a larger comprehensive plan developed by the city to create and connect multiple urban entertainment districts. The funds purpose was to create a children's museum to meet the crucial development needs of early learners.

Huntsville CSA AA

The level of CD lending in the Huntsville CSA AA is excellent. WFBNA made nine CD loans in its AA for a total of $14.3 million, which represents nearly 15.2 percent of allocated tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. All CD loans were responsive to the identified needs of affordable housing in the AA.

Examples of CD loans in the AA include:

- In December 2016, WFBNA provided a $4.5 million loan for a multifamily affordable housing development located in a low-income census tract in Huntsville, AL. The project consists of 100 one-bedroom units and 94 two-bedroom units with 98.4 percent of the actual rent rates below the 2016 Fair Market Rent for the area and 98.4 percent of the units affordable to tenants earning between 20 and 32 percent of the 2016 area MFI of $71,800.
- In July 2018, WFBNA provided a $6.5 million loan for an affordable housing development restricted to 100 percent of the tenants earning between 50 and 60 percent of the area MFI and the project also restricted to seniors aged 55 or older.

Mobile CSA AA

The level of CD lending in the Mobile CSA AA is excellent. WFBNA made ten CD loans in its AA for a total of $81.9 million, which represents nearly 71.5 percent of allocated tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified needs in the AA including affordable housing, economic development, revitalization/stabilization, and community services for LMI individuals. The bank made 5 CD loans totaling $11.8 million (14.4 percent) for the purpose of affordable housing. Additionally, the bank extended 4 CD loans totaling $9 million for the primary purpose of community services to LMI individuals and one CD loan totaling $61 million to revitalize and stabilize a distressed area within the AA.

Examples of CD loans in the AA include:

- In July 2014, WFBNA provided a $61 million loan for the construction of a retail development located in a moderate-income tract in Mobile, AL to revitalize the community by generating approximately 1,200 permanent jobs in addition to the construction jobs. The area is part of an improvement district that allows developers to issue bonds to finance public infrastructure.
- In March 2018, WFBNA renewed a $3.3 million working capital line of credit for a nonprofit organization specializing in affordable housing and community economic development activities for low-income and special needs families.

Product Innovation and Flexibility

Birmingham CSA AA

The institution makes extensive use of lending practices in order to serve AA credit needs. The bank launched the NeighborhoodLIFT program in the Birmingham CSA AA in April 2017 and more than 200 potential homebuyers attended the event and more than 150 homebuyers utilized the down payment assistance ($15,000) to purchase a home. Of the 150 WFBNA originated 49 home mortgage loans totaling $5.4 million. Under the *your*FirstMortgage loan program the bank has funded 76 loans totaling $9.1 million to LMI homebuyers that qualified under this program.

Huntsville CSA AA

The institution makes limited use of lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 37 loans totaling $3.5 million to LMI homebuyers that qualified under this program

Mobile CSA AA

The institution makes limited use of lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 29 loans totaling $2.7 million to LMI homebuyers that qualified under this program.

Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding these programs above.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Lending Test in the Dothan CSA, Florence MSA, Gadsden MSA Tuscaloosa MSA, and AL Combined NonMetro AAs is consistent with the bank's overall good performance under the Lending Test in the FS areas. The bank's performance in the Anniston MSA and Montgomery MSA AAs is stronger than the bank's overall performance due to excellent borrower distribution. Performance differences in the two LS AAs did not impact the overall Lending Test rating for the State of Alabama.

Refer to Tables O through T in the State of Alabama section of appendix D for the facts and data that support these conclusions.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of Alabama is rated Low Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Birmingham CSA is adequate and performance in the Huntsville CSA and Mobile CSA AAs is excellent.

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

<u>Birmingham CSA AA</u>

The institution has an adequate level of qualified CD investments and grants, although rarely in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 5.6 percent of tier 1 capital allocated to the AA.

The investments and grants reflect adequate responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 79 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 239 grants totaling $9.4 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution occasionally uses innovative and/or complex investments to support CD initiatives. CD Investments involved one complex LIHTC project where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In October 2018 WFBNA provided a $12.7 million investment for an LIHTC affordable housing development located in Phenix City, Alabama. The development restricts 98.8 percent of the units to tenants earning no more than 60 percent of the area MFI.
- During the exam timeframe, WFBNA provided two grants totaling $700,000 to two local economic development organizations through the Small Business DCC Program benefiting small businesses in the State of Alabama including the Birmingham CSA AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.
- In April and September 2017, WFBNA provided two local initiative grants totaling $35,000 to two housing Partnership organizations to administer the NeighborhoodLIFT Down Payment Assistance program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.

Huntsville CSA AA

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 37.5 percent of tier 1 capital allocated to the AA.

The investments and grants reflect excellent responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Approximately 33.8 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. The bank also allocated 65.3 percent of total investments to revitalize and stabilize a distressed area. Additionally, the bank provided 71 grants totaling $695,250 to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved several complex projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In July 2018, WFBNA provided a $7.3 million investment for a LIHTC affordable housing development located in Athens, Alabama, with 100 percent of the units restricted to tenants earning no more than 60 percent of the area MFI. This investment is responsive to the need for affordable housing. WFBNA also demonstrated multi-faceted support by providing the construction loan and equity investment to support this affordable housing development. This investment is also complex involving multiple parties.
- In May 2018, WFBNA provided a $23 million NMTC investment for the construction of a medical center located in Athens, Alabama. The project will be an outpatient medical facility with out-patient procedures scheduled for the 1st floor and doctor's office on the second and third floors. This distressed area has an MFI of less than 80 percent and an unemployment rate that is 1.5 times the national average.

<u>Mobile CSA AA</u>

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 39.4 percent of tier 1 capital allocated to the AA.

The investments and grants reflect excellent responsiveness to the needs identified in the AA including affordable housing, community services, and economic development for LMI individuals and geographies. Approximately 56.9 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 75 grants totaling $856,400 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved several complex projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers.

Examples of CD investments in the AA include:

- In July 2015, WFBNA invested $11.4 million in a LIHTC affordable housing complex located in Mobile, Alabama. The development consists of a newly constructed 70-unit Senior (55+) property. The unit mix includes 10 one-bedroom units, 60 two-bedroom units with 10 units restricted to tenants earning 50 percent of the area MFI and 60 units restricted to tenants earning 60 percent of the area MFI. This investment is responsive to the need for affordable housing.
- In October 2018, WFBNA provided an $11.1 million investment for a LIHTC affordable housing development located in Satsuma, Alabama, with 100 percent of the units restricted to tenants earning between 50 and 60 percent of the area MFI. The units are further restricted to tenants aged 62 years or older. This investment is responsive to the need for affordable housing.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Investment Test in the Tuscaloosa MSA is stronger than the bank's overall adequate performance due to higher volume of CD investments. The bank's performance in the Anniston MSA, Dothan CSA, Florence MSA, Gadsden MSA, Montgomery MSA, and AL Combined NonMetro AAs is weaker than the bank's overall adequate performance due primarily to lower volume of CD investments. Performance differences in the LS AAs did not impact the overall Investment Test rating for the State of Alabama.

SERVICE TEST

The bank's performance under the Service Test in Alabama is rated High Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Birmingham CSA, and Huntsville CSA AAs is excellent, and performance in the Mobile CSA AA is good.

Retail Banking Services

Service delivery systems are accessible to geographies and individuals of different income levels in the institution's AAs, particularly LMI geographies and/or LMI individuals.

<u>Birmingham CSA AA</u>

As of December 31, 2018, WFBNA operates 37 branches and 67 ATMs in the Birmingham CSA AA. Of these branches, 36 are full-service locations and one is a limited service branch. There are three branches in low-income geographies and eight branches in moderate-income geographies. The branch distribution in both LMI geographies exceeds the percentage of the population in LMI geographies in the AA. When considering an additional six branches within close proximity to LMI geographies, the bank's branch distribution further exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed one branch within a low-income geography since the last evaluation. The closure of a branch in a low-income geography did not negatively impact the distribution of branches relative to the population residing in those geographies.

Services and, where appropriate, business hours, do not vary in a way that inconveniences the various portions of the AA, particularly LMI geographies and/or individuals. The bank maintains standard business hours. Generally, branches are open Monday through Friday from 9:00 am to 6:00 pm. Sixteen of the 37 branches are also open on Saturdays from 9:00 am to 1:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

<u>Huntsville CSA AA</u>

As of December 31, 2018, WFBNA operates 12 branches and 23 ATMs in the Huntsville CSA_AA. All of these branches are full-service locations. There are two branches in low-income geographies and three branches in moderate-income geographies. The branch distribution in both LMI geographies significantly exceeds the percentage of the population in LMI CTs in the AA.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed three branches located in middle- and upper-income geographies.

Services and, where appropriate, business hours do not vary in a way that inconveniences the various sections of the AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 5:00 pm. Five of the 12 branches are also open on Saturdays from 9:00 am to 1:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Mobile CSA AA

As of December 31, 2018, WFBNA operates 18 branches and 32 ATMs in the Mobile CSA AA. All of these branches are full-service locations. There are no branches in low-income geographies and five branches in moderate-income geographies. The branch distribution in low-income geographies is significantly below the percentage of the population in low-income geographies and branch distribution in moderate-income geographies significantly exceeds the percentage of the population in moderate-income geographies in the AA. When considering an additional four branches within close proximity to LMI geographies, the bank's distribution improves and is near to demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed one branch located in a moderate-income geography. This closure did not negatively impact the distribution of branches relative to the population residing in that geography.

Services and, where appropriate, business hours do not vary in a way that inconveniences the various sections of the AA, particularly LMI geographies and/or individuals. The bank maintains standard business hours. Generally, branches are open Monday through Friday from 9:00 am to 5:00 pm. Six of the 12 branches are also open on Saturdays from 9:00 am to 1:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Community Development Services

The institution is a leader in providing CD services.

Birmingham CSA AA

The level of CD services in the Birmingham CSA AA is excellent. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 476 CD service activities to 100 organizations since the last evaluation, logging a total of 1,876 qualified hours within this AA. The majority (96 percent) of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing (3 percent), and economic development (1 percent). The bank's assistance provided was responsive to the identified need in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- Thirty-nine WFBNA team members provided 485 hours of financial expertise to an institute of learning where 71.3 percent of its students qualify for the federal free- and reduced-lunch (FRL) program.

- A WFBNA team member provided 22 hours of Board service to an affordable housing organization with a mission to stabilize urban neighborhoods within the city of Birmingham by increasing opportunities for homeownership, providing education for first-time homebuyers and helping existing homeowners remain in their homes. According to the organization's Executive Administrator, as of September 2014, 95 percent of its clients are LMI individuals as they earn less than 80 percent of the area MFI.

Huntsville CSA AA

The level of CD services in the Huntsville CSA AA is excellent. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 128 CD service activities to 30 organizations since the last evaluation, logging a total of 335 qualified hours within this AA. The majority (80 percent) of the bank’s assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing (20 percent). The bank’s assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- One WFBNA team member provided 105 hours of Board service and two team members provided 3 hours of financial education at an organization where 100 percent of its clients are LMI families and individuals. These clients earn less than 80 percent of the area MFI. The organization is a local affiliate of an international organization that provides social services such as hunger relief, housing, and homeless services, to help individuals and families overcome obstacles.
- Two WFBNA team members provided 30 hours of Board service at an organization where 100 percent of its clients are LMI families and individuals. The stated mission of this organization is to eliminate poverty and to make decent, affordable shelter for all people a matter of conscience. This is a nonprofit housing organization that works in partnership with people in need to build decent, affordable housing. The houses are sold to LMI families and individuals at no profit and with no interest charged.

Mobile CSA AA

The level of CD services in the Mobile CSA AA is adequate. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 88 CD service activities to 22 organizations since the last evaluation, logging a total of 229 qualified hours within this AA. All of the bank’s assistance was to organizations that provide community services to LMI individuals and families. The following are examples of CD services provided in this AA:

- Twelve WFBNA team members provided 46 hours of financial education at an organization where 100 percent of its clients are LMI families and individuals. According to the National Center for Education Statistics (NCES) the free/reduced lunch program participation rate at this institution of learning is 87.9 percent, and 80 percent of the area's MFI is in excess of 185 percent poverty.
- Eight WFBNA team members provided 43 hours of financial education at an organization where, according to the NCES, 88.5 percent of students qualify for FRL program.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank’s performance under the Service Test in the Anniston MSA, Montgomery MSA, and Tuscaloosa MSA AAs is consistent with the bank's overall good performance under the Service Test in the FS areas. The bank's performance in the Dothan CSA, Florence MSA, Gadsden, and AL Combined NonMetro AAs is stronger than the bank's overall performance due to higher percentage of branch distribution in LMI geographies. Performance differences in the four LS AAs did not impact the overall Service Test rating for the State of Alabama.

State Rating

State of Alaska

CRA rating for the State of (Alaska)[19]: Satisfactory
The Lending Test is rated: High Satisfactory
The Investment Test is rated: Low Satisfactory
The Service Test is rated: High Satisfactory

The major factors that support this rating include:

- Good lending activity;
- Excellent geographic distribution of loans;
- Adequate borrower distribution of loans;
- WFBNA is a leader in providing CD loans, which has a significant positive impact on the Lending Test;
- WFBNA's use of flexible products has a neutral impact on the Lending Test;
- Adequate level of CD investments;
- Retail delivery systems are accessible to all portion of the AA; and
- Good level of CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in Alaska

WFBNA delineated three AAs within Alaska including the Anchorage, AK MSA (Anchorage MSA AA), AK Combined non-metropolitan AA (AK Combined NonMetro AA), and Fairbanks, AK MSA (Fairbanks MSA AA). The Anchorage MSA AA and AK Combined NonMetro AA received FS reviews. The two areas accounted for the majority of the lending (91.9 percent) and deposits (92.6 percent) amongst the AAs in Alaska. Refer to Appendix A for a complete description of each AA. Alaska represents the 23th largest rated area by deposits. WFBNA has approximately $6 billion of deposits representing 0.5 percent of adjusted deposits in Alaska. WFBNA operates 44 branches and 117 ATMs within Alaska, representing 0.8 percent of the bank's branches and 0.9 percent of the bank's ATMs. The bank originated and purchased approximately $11.8 billion in loans or 0.6 percent of total reported loan originations and purchases during the evaluation period. The bank's primary loan products in the Alaska are home mortgage and small loans to businesses.

Anchorage MSA AA

Within the Anchorage MSA AA, the bank had $3.3 billion deposits and ranked first amongst four depository institutions in the market with 49.2 percent market share. First National Bank Alaska and Northrim Bank ranked second and third with 21.9 percent and 14.8 percent market share, respectively. WFBNA operates 16 branches and 67 ATMs in the AA.

---

[19] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

AK Combined NonMetro AA

Within the AK Combined NonMetro AA, the bank had $2.2 billion deposits and ranked first amongst seven depository institutions in the market with 57.4 percent market share. First National Bank Alaska and First Bank ranked second and third with 20.6 percent and 13.0 percent market share, respectively. WFBNA operates 24 branches and 37 ATMs in the AA.

Demographic Data

Anchorage MSA AA

The following Table provides a summary of the demographics that includes housing and business information for the Anchorage MSA AA. Table A shows that a very small proportion of tracts and population are located in low-income geographies. The volume of OOUs is even smaller in the low-income tracts and the proportion of OOUs in moderate-income geographies is much smaller than the proportion of population in those tracts. Additionally, over 37 percent of families in the AA are LMI. The area's median housing value is three times the median income but 6 times the income of low-income and 4 times to moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI within the AA. Median rents and the percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

According to the July 2018 Moody's Analytics report, the Anchorage economy is improving. After two years of contraction, non-farm payrolls are slowly digging out of a six-year low. The modest improvement is mostly due to gains in transportation and utilities. The major economic drivers in the Anchorage MSA are Natural Resources and Defense industries. The energy industry will no longer be a drag but will do little to promote growth. One in three energy jobs have been lost since 2015 but firmer oil prices have ended the slide. A shifting military focus toward the Asia-Pacific region has improved prospects for federal government and military employment. The Anchorage MSA is in the top tenth of all metro areas in terms of its dependence on military and federal government employment due to the presence of the area’s top employer joint base Elmendorf-Richardson. Tensions with North Korea and Russia have forced the U.S. to hold off on its planned troop reductions at the base, safeguarding civilian payrolls.

The outlook for the housing market is average thanks largely to favorable demographics trends. Residential real estate is also on the mend. Sales are no longer falling and prices have recovered from the brief downturn earlier

The largest employers in the Anchorage MSA include Fort Richardson, Elmendorf AFB, and Providence Health & Services. According to the U.S. BLS, the unemployment rate for the 2nd quarter of 2018 was 6.4 percent and has increased slightly from 6.1 percent at the beginning of the evaluation period. The unemployment rate in the AA was slightly less than the overall state at 6.7 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by two community contacts pertaining to the Anchorage MSA AA in conjunction with this evaluation. The contacts were with an economic development corporation and with a CRA Listening Session.

Community contacts commented that rural and urban needs are drastically different. For instance, there are large rural areas in the Anchorage MSA that have no banks or very limited access to banks. Other than pre-paid cards there is little in the way of financial services in some of the rural areas. Rural communities have difficulty getting banking services and mortgage loans and appraisals can be an issue. Anchorage is ranked the 16th most expensive housing market in the country. As such, there is a shortage of housing in the assessment area and there are not enough housing vouchers for affordable housing. Pressure on housing is caused by a pent-up demand and not enough construction to meet the need. As a result, housing is very expensive (the average home price is $366,500). Due to the housing shortage, rental units are also very expensive and unaffordable. This trend is expected to continue for the next few years. Some communities have dilapidated housing stock which is contributing to rising vacancies and an increased demand for affordable housing. The ability to meet the needs of LMI families and communities are declining in the assessment area. Community contacts stated demands for services in LMI communities are up but monetary resources are not available.

Contacts mentioned that other challenges in LMI communities in the AA is the large refugee population (from various countries) where English is not the first language. The Mountain View neighborhood census tract is the most diverse in the country with over 100 languages spoken. As a result, jobs are difficult to find for this workforce and non-profits are having difficulty finding their clients living wage jobs; many have to work multiple jobs to make ends meet. Those in the community that are unbanked have special credit needs.

The bank conducted research in the AA and identified community needs for affordable housing for LMI families; homeless services; and workforce development and job readiness to prepare for the aging population.

Considering the information from the community contact and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Anchorage MSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of tracts, population, OOUs, and small businesses coupled with limited home affordability for LMI individuals.

AK Combined NonMetro AA

The following Table provides a summary of the demographics that includes housing and business information for the AK Combined NonMetro AA. Table A shows a very small proportion of tracts and population are located in low-income geographies. The volume of OOUs is even smaller in the low-income tracts and over 38 percent of families in the AA are LMI. The area's median housing value is 2.8 times the median income but 5.7 times the income of low-income and 3.6 times to moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI. Median rents and the percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

Assessment Area: FS AK Combined Non-Metros (2016)

Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #

Economic Data

According to the July 2018 Moody's Analytics report, Alaska's economy is sending mixed signals. Non-farm payrolls are near an eight-year low as job cuts in office-using industries and government outweigh modest additions elsewhere. The major economic drivers within the AK Combined NonMetro AA are Natural Resources and Defense industries.

The outlook for the housing market is average thanks largely to favorable demographics trends. Residential real estate is also on the mend. Sales are no longer declining and prices have recovered from the brief downturn earlier.

According to the U.S. BLS, the unemployment rates for the second quarter of 2018 in the following Boroughs range from a low of 3.4 percent (Bristol Bay) to a high of 17.2 percent (Northwest Arctic) while the state average is 6.7 percent.

Community Contacts

The analysis takes into consideration comments provided by a recent community contact in conjunction with this evaluation that serves the AK Combined NonMetro AA.

The contact indicated there is a hardship to access cash, loan capital, and basic financial services. The contact commented that cash in ATM's is often depleted and banks have to fly in cash which is expensive, so at time the machines are empty for extended periods of time. This means that checks will sometimes float around the village several times by being endorsed over and over before it can finally be deposited. The Permanent Dividend reduction hit the AA very hard. The Alaska Permanent Fund is a state-owned investment fund established using oil revenues. It has, since 1982, paid out an annual dividend to every man, woman, and child living in Alaska. In 2015, with oil prices high, the dividend totaled $2,072 per person, or $8,288 for a family of four. But recently, the dividend was reduced $1,100 per person due to money being diverted to other needs in the state.

The contact mentioned that another significant challenge to LMI families in the rural areas is access to medical services. This is because transportation is very expensive in the rural areas of the AA and frequently air travel is the primary mode of transportation in the rural areas. Appraisals are still a challenge for financing homes in the AA. Construction is very expensive in rural and remote AK due to the cost to ship materials, labor, and weather. Seasonal or subsistence incomes are common and therefore need to be considered with lending underwriting and modified payment schedules for consumers; this is especially important in rural Alaska, i.e., seasonal payments, quarterly or annual, etc.

Considering the information from the community contact and bank management as well as demographic and economic data, affordable housing, affordable consumer lending products, access to financial literacy training and credit building products, and small business loans represent a primary credit and service need for the AK Combined NonMetro AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of tracts, population, OOUs, and small businesses coupled with limited home affordability for LMI individuals.

Scope of Evaluation in Alaska

The rating for the State of Alaska is primarily based on FS evaluations of the bank's performance in the Anchorage MSA and AK Combined NonMetro AAs; however, performance in each AA was considered. Conclusions where a LS review affected the CRA Rating for the state are addressed within their respective tests. LS procedures were performed for the Fairbanks MSA. A limited portion of the bank's overall lending, investments, and services were conducted in Alaska; therefore, the performance in Alaska received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN ALASKA

LENDING TEST

The bank's performance under the Lending Test in Alaska is rated High Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Anchorage MSA AA is excellent and performance in the AK Combined NonMetro AA is good.

Lending Activity

Based on the tables below, lending levels reflect good responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to the bank's significant capacity and market dominance.

Number of Loans*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State Loans	%State Deposits
Anchorage MSA	30,297	8,881	161	38	39,386	66.5	55.2
AK Combined NonMetro	8,233	6,209	553	23	15,018	25.4	37.4
Fairbanks MSA	3,210	1,574	28	0	4,812	8.1	7.4
Total	41,740	16,664	742	61	59,207	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Dollar Volume of Loans (000's)*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State* Loans	%State Deposits
Anchorage MSA	$7,968,051	$629,502	$9,760	$123,429	$8,730,742	72.7	55.2
AK Combined NonMetro	$1,847,133	$429,380	$74,271	$120,176	$2,470,960	20.6	37.4
Fairbanks MSA	$701,776	$107,302	$1,201	0	$810,279	6.7	7.4
Total	$10,516,960	$1,166,184	$85,232	$243,605	$12,011,981	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Anchorage MSA AA

WFBNA ranked first in deposits with 49.2 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 18.0 percent market share. Although WFBNA's HMDA market share is considerably lower than its deposit market share, lending competition was significantly stronger, reflected by the 166 lenders, than competition for deposits, where there were only 4 depository institutions. The 2nd and 3rd top lenders in this market was Alaska USA Federal CU with 13.5 percent market share and Alaska USA Mortgage with 13.0 percent market share.

In small loans to businesses, WFBNA ranked second with a market share of 15.1 percent; however, when compared by dollar volume the bank has a larger market share of 24.9 percent. Although WFBNA's small business market share is considerably lower than its deposit market share, lending competition was significant stronger, reflected by the 73 lenders, than competition for deposits, where there were only 4 depository institutions. The top lender by number was Bank of America with a market share of 32.5 percent

AK Combined NonMetro AA

WFBNA ranked first in deposits with 57.4 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 16.8 percent market share. Although WFBNA's HMDA market share is considerably lower than its deposit market share, lending competition was significantly stronger, reflected by the 121 lenders, than competition for deposits, where there were only 7 depository institutions. The 2nd and 3rd top lenders in this market was Alaska USA Federal CU with 16.7 percent market share and Alaska USA Mortgage CO with 15.7 percent market share.

In small loans to businesses, WFBNA ranked second with a market share of 24.8 percent; however, when compared by dollar volume the bank has a larger market share of 38.2 percent. Although WFBNA's small business market share is considerably lower than its deposit market share, lending competition was significant stronger, reflected by the 58 lenders, than competition for deposits, where there were only 7 depository institutions. The top lender by number was Bank of America with a market share of 32.2 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits an excellent geographic distribution of loans in the Anchorage MSA AA and an adequate geographic distribution of loans in the AK Combined NonMetro AA.

Anchorage MSA AA

Home Mortgage Loans

Refer to Table O in the State of Alaska section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The bank's performance in 2012-2016 for home mortgage loans in low-income geographies exceeds both the aggregate distribution of loans and the proportion of OOUs in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is near to the proportion of OOUs in those geographies.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly less than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of Alaska section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for small business loans in LMI geographies exceeds the aggregate performance in those geographies.
- The bank's performance in both periods for small business loans exceeds the proportion of businesses located in low-income geographies and is near to the proportion in moderate-income geographies.

<u>AK Combined NonMetro AA</u>

Home Mortgage Loans

Refer to Table O in the State of Alaska section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- For 2012-2016, the proportion of home mortgage loans in low-income geographies is significantly below to both the aggregate distribution of loans and the proportion of OOUs in those geographies. Less weight was given to the bank's performance in low-income geographies given the very small volume of tract, population, OOUs, and lending in low-income geographies.
- The proportion of loans in moderate-income geographies approximates the aggregate distribution of loans and is significantly below the proportion of OOUs in those geographies.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly less than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of Alaska section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is adequate.

- For 2012-2016, the combined proportion of the bank's small business loans in low-income geographies is below the aggregate distribution of loans and is significantly below the proportion of businesses located in those geographies.

- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is below the proportion of businesses located in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly lower than the combined performance in 2012-2016.

Distribution of Loans by Income Level of the Borrower

The bank exhibits an adequate distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution in its AAs.

<u>Anchorage MSA AA</u>

Home Mortgage Loans

Refer to Table P in the State of Alaska section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 6 times the income of low-income and 4 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI individuals. Because of the affordability challenges, the bank's performance in 2012-2016 to low-income borrowers is well below the aggregate lending and to moderate-income borrowers is below the aggregate lending.
- The bank's overall home mortgage lending to low-income borrowers is significantly below the proportion of families and to moderate-income borrowers is near the proportion of families reported in those geographies.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly higher than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Alaska section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For 2012-2016, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly higher than the combined performance in 2012-2016.

<u>AK Combined NonMetro AA</u>

Home Mortgage Loans

Refer to Table P in the State of Alaska section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 5.7 times the income of low-income and 3.6 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI individuals. Because of the affordability challenges, the bank's performance in 2012-2016 to low-income borrowers is well below the aggregate lending and to moderate-income borrowers is below the aggregate lending.
- The bank's overall home mortgage lending to low-income borrowers is significantly below the proportion of families and to moderate-income borrowers is below the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly higher than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Alaska section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is excellent.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is near to the percentage of small businesses located in the AA.

Community Development Lending

The institution is a leader in making CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

Anchorage MSA AA

The level of CD lending in the Anchorage MSA AA is excellent. WFBNA made 38 CD loans in its AA for a total of $123.4 million, which represents over 33 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified needs in the AA, including affordable housing, economic development, community services, and revitalization/stabilization.

Examples of CD loans in the AA include:

- In December 2016, WFBNA provided a $3.9 million line of credit to an affordable housing development located in Anchorage, AK with 100 percent of the units restricted to tenants earning 60 percent of the area MFI.
- During the exam evaluation timeframe, WFBNA provided four loans totaling $12 million to a housing organization that is a congressionally chartered nonprofit organization that focuses on

comprehensive approaches to affordable housing and community development. This activity is responsive to the identified need for affordable housing.

<u>AK Combined NonMetro AA</u>

The level of CD lending in the AK NonMetro AA is excellent. WFBNA made 23 CD loans in its AA for a total of $120 million, which represents over 47 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified needs in the AA, including affordable housing, economic development, community services, and revitalization/stabilization.

Examples of CD loans in the AA include:

- In October 2016, WFBNA provided a $50 million working capital line of credit for a health corporation that administers a comprehensive health care delivery system for 58 rural communities in southwest Alaska. The system includes community clinics, sub- regional clinics, a regional hospital, dental services, mental health services, substance abuse counseling and treatment, health promotion and disease prevention programs, and environmental health services. The organization is listed as a Federally Qualified Health Center, a community-based and patient directed organization that serve populations with limited access to health care. These include low-income populations, the uninsured, those with limited English proficiency, migrant and seasonal farm workers, individuals and families experiencing homelessness, and those living in public housing.
- In August 2014, WFBNA provided a $2.5 million working capital term loan for a regional housing authority which includes Kotzebue and 11 surrounding villages in Northwest Alaska. According to the organization, the housing authority was established to administer Low-Income and Low-Rent housing programs financed by HUD.

  .

Product Innovation and Flexibility

<u>Anchorage MSA AA</u>

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program, the bank has funded 65 loans totaling $13.8 million to LMI homebuyers that qualified under this program.

<u>AK Combined NonMetro AA</u>

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 31 loans totaling $6.1 million to LMI homebuyers that qualified under this program.

Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

Conclusions for Area Receiving a LS Review

Based on a LS review, the bank's performance under the Lending Test in the Fairbanks MSA AA is consistent with the bank's overall good performance under the Lending Test in the FS areas

Refer to Tables O through T in the State of Alaska section of appendix D for the facts and data that support these conclusions.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of Alaska is rated Low Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Anchorage MSA AA is excellent and performance in the AK Combined NonMetro AA is poor.

Qualified Investments										
Assessment Area	Prior Period*		Current Period		Total				Unfunded Commitments**	
	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Anchorage MSA	4	$31,793	243	$19,627	247	74.0	$51,420	97.7		
AK Combined NonMetro	4	$354	70	$533	74	22.2	$887	1.7		
Fairbanks MSA	1	$21	12	$304	13	3.9	$325	0.6		
Total	9	$32,168	325	$20,464	334	100.0	$52,632	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

Anchorage MSA AA

The institution has an excellent level of qualified CD investments and grants within the Anchorage MSA AA, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 13.9 percent of tier 1 capital allocated to the AA. Over 97.7 percent of the qualified investments in the state are within the Anchorage MSA AA.

The investments and grants reflect excellent responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 70.8 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 239 grants totaling $3 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved several complex LIHTC and NMTC projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased several government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In July 2015, WFBNA provided an $11.3 million LIHTC investment for the construction of a 52-unit multifamily family housing development located in Anchorage, Alaska. The development consists of 20 one-bedroom units, 17 two-bedroom units, 11 three-bedroom units, and 4 four-bedroom units. The subject will restrict 31 units at or below 50 percent of the area MFI and 10 units at or below 60 percent of the area MFI. There will also be 11 market-rate units with no rent or income restrictions. Eight units will be set-aside for tenants with Special Needs. The Partnership must also give a preference in all units to Homeless households. This activity is responsive to the identified need for affordable housing.
- During the exam timeframe, WFBNA provided four grants totaling $400,000 to four local housing organizations through the PMP for affordable housing in the Anchorage MSA AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

<u>AK Combined NonMetro AA</u>

The institution has a poor level of qualified CD investments and grants within the AK Combined NonMetro AA, but not in a leadership, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 0.3 percent of tier 1 capital allocated to the AA.

The investments and grants reflect a poor responsiveness to the needs identified in the AA. There are some opportunities available within the AA for the bank to provide CD investments; however, the bank opted to make a majority of the CD investment in smaller grants within the AA. The bank provided 69 grants totaling $435,100 to a variety of organizations that primarily support affordable housing and community services for LMI individuals and geographies.

The institution rarely uses innovative and/or complex investments to support CD initiatives.

Examples of CD investments in the AA include:

- In January 2014, WFBNA provided a $1.1 million investment in a government single-family mortgage backed security. The investment amount reported of $98,200 is a portion of the total investment amount and the underlying mortgages were made to LMI borrowers. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.
- In November 2014, WFBNA provided a $30,000 grant to an organization that assists students for the world of work by assisting in the development of life skills, work readiness skills, academic skills, and career awareness while maintaining the academic standards of Nome Public Schools, Bering Strait School District. According to the organization's Director, as of July 2014, 90 percent of its clients are LMI families as they earn less than 80 percent of the area MFI.

Conclusions for Area Receiving a LS Review

Based on a LS review, the bank's performance under the Investment Test in the Fairbank MSA AA is weaker than the bank's overall due to lower volume of CD investments; however, the performance did not impact the overall Investment Test rating for the State of Alaska.

SERVICE TEST

The bank's performance under the Service Test in Alaska is rated High Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on the FS reviews, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Anchorage MSA is excellent and the AK Combined NonMetro AAs is adequate.

Retail Banking Services

Service delivery systems are accessible to geographies and individuals of different income levels in the institution's AAs.

Distribution of Branch Delivery System											
Assessment Area	Deposits	Branches						Population			
	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%)*				% of Population within Each Geography*			
				Low	Mod	Mid	Upp	Low	Mod	Mid	Upp

Fairbanks MSA	0	1	0	-1	0	0

<u>Anchorage MSA AA</u>

As of December 31, 2018, WFBNA operates 16 branches and 67 ATMs in the Anchorage MSA AA. All of these branches are full-service locations. There are no branches in low-income geographies; however, the population is low compared to total demographics in the low-income geographies. The branch distribution in moderate-income geographies significantly exceeds the percentage of the population in moderate-income CTs in the AA. When considering an additional two branches within close proximity to LMI geographies, the bank's distribution exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed one branch within a middle-income geography since the last evaluation.

Services and, where appropriate, business hours do not vary in a way that inconveniences the various portions of the AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 10:00 am to 6:00 pm. Eight of the 16 branches are also open on Saturdays from 10:00 am to 6:00 pm, two from 10:00 am to 5:00 pm, and one from 10:00 am to 3:00 pm. All WFBNA services are available at all branches and all ADS discussed bank-wide are available in this AA.

<u>AK Combined NonMetro AA</u>

As of December 31, 2018, WFBNA operates 24 branches and 37 ATMs in the AK Combined NonMetro AA. All of these branches are full-service locations. There are no branches in the low-income geographies; however, the population is low compared to total demographics in the low-income geographies. The branch distribution in moderate-income geographies is significantly below the percentage of the population in moderate-income CTs in the AA. When considering six branches within close proximity to LMI geographies, the bank's distribution remains below demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed four branches located in middle- and upper-income geographies since the last evaluation.

Services and, where appropriate, business hours do not vary in a way that inconveniences the various sections of the AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 10:00 am to 6:00 pm. Seven of the 24 branches are also open on Saturdays. Of those, five open from 10:00 am to 5:00 pm and two from 10:00 am to 2:00 pm. All WFBNA services are available at all branches and all ADS discussed bank-wide are available in this AA.

Community Development Services

The institution provides a relatively high level of CD services.

<u>Anchorage MSA AA</u>

The level of CD services in the Anchorage MSA AA is excellent. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 410 CD service activities to 51 organizations since the last evaluation, logging a total of 1,143 qualified hours within this AA. A substantial majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing and economic development. The bank's assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- A WFBNA team member provided 89.5 hours of Board service and five team members provided 13 hours of financial education at a community organization that provides transitional housing and crisis counseling services to homeless, trafficked, and exploited youths throughout Alaska.
- A WFBNA member provided 28 hours of Board service to an organization that is administered through the Department of the Treasury to promote economic revitalization and community development in distressed urban, rural, and native communities. This organization encourages business development and also provides a full range of services to encourage homeownership, thereby enhancing the quality of life for all those communities and residents of the Region.

AK Combined NonMetro AA

The level of CD services in the AK Combined NonMetro AA is good. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 172 CD service activities to 30 organizations since the last evaluation, logging a total of 526 qualified hours within this AA. A substantial majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing and economic development. The bank's assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- Two WFBNA team members provided 88.5 hours of Board service to a food bank that provides an average of 1,895 meals each month. This organization is dedicated to eliminating hunger in Alaska by obtaining and providing food to partner agencies feeding the hungry, and through anti-hunger leadership.
- Five WFBNA team members provided 27 hours of financial education at an elementary school where 52.2 percent of the student population qualifies for the federal free- and reduced-lunch program.

Conclusion for Area Receiving a LS Review

Based on a LS review, the bank's performance under the Service Test in the Fairbanks MSA AA is higher than the bank's overall good performance under the Service Test in the FS areas due to a higher percentage of branch distribution in LMI geographies. Performance differences in the LS AA did not impact the overall rating for the state.

State Rating

State of Arizona

CRA rating for the State of Arizona[20]: Satisfactory
The Lending Test is rated: Outstanding
The Investment Test is rated: Needs to Improve
The Service Test is rated: High Satisfactory

The major factors that support this rating include:

- Good lending activity;
- Adequate geographic distribution of loans;
- Excellent distribution of loans by borrower profile;
- WFBNA is a leader in providing CD loans, which has a significant positive impact on the Lending Test;
- WFBNA's use of flexible products has a positive impact on the Lending Test;
- Poor level of CD investments;
- Retail delivery systems are accessible to all portions of the AA; and
- WFBNA is a leader in providing CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in Arizona

WFBNA delineated eight AAs within Arizona including the Phoenix-Mesa-Scottsdale, AZ MSA (Phoenix MSA AA); Tucson-Nogales, AZ CSA (Tucson CSA AA); Flagstaff, AZ MSA (Flagstaff MSA AA); Lake Havasu City-Kingman, AZ MSA (Lake Havasu MSA AA); Prescott, AZ MSA (Prescott MSA AA); Sierra Vista-Douglas, AZ MSA (Sierra Vista MSA AA);Yuma, AZ MSA (Yuma MSA AA); and AZ Combined non-metropolitan AA (AZ Combined NonMetro AA). Refer to Appendix A for a complete description of each AA. The Phoenix MSA AA and Tucson CSA AA received FS reviews. The two areas accounted for the majority of the lending (86 percent) and deposits (88 percent) amongst the AAs in Arizona. WFBNA has $30.6 billion deposits representing 2.4 percent of adjusted deposits in Arizona. Arizona represents the ninth largest rated area by deposits. WFBNA operates 227 branches and 575 ATMs in Arizona representing 4.0 percent of branches and 4.2 percent of the bank's ATMs. The bank originated or purchased $66.7 billion in loans or 3.5 percent of total reported loan originations and purchases during the evaluation period. The bank's primary loan products in Arizona are home mortgage loans and small loans to businesses.

<u>Phoenix MSA AA</u>

Within the Phoenix MSA AA, the bank had $22.2 billion deposits and ranked second amongst 61 depository institutions in the market with 22.0 percent market share. JPMorgan Chase ranked first with a market share of 23.7 percent and Bank of America ranked third with a market share of 19.8 percent. WFBNA operates 145 branches and 363 ATMs in the AA.

[20] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

Tucson CSA AA

Within the Tucson CSA AA, the bank had $4.6 billion deposits and ranked first amongst 20 institutions in the market with 27.7 percent market share. JPMorgan Chase and Bank of America ranked second and third with 24.9 percent and 17.6 percent market share, respectively. WFBNA operates 39 branches and 91 ATMs in the AA.

Demographic Data

Phoenix MSA AA

The following table provides a summary of the demographics that includes housing and business information for the Phoenix MSA AA. Table A indicates that the volume of OOUs is very small in low-income CTs and over 39 percent of families in the AA are LMI. The area's median housing value in the Phoenix MSA AA is four times the MSA median income, but five times moderate-, and 7.8 times low-income, indicating a limited proportion of OOUs are affordable to LMI. Median rents and the significant percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

Economic Data

According to the August 2018 Moody's Analytics report, the Phoenix economy is strong. The economy has performed better than the West region overall for most of the past decade and employers are adding jobs at nearly twice the national rate. Phoenix is a financial center which drives the economy along with retirees. The share of finance jobs in Phoenix is amongst the highest in the nation and back-office wages are also above-average. The area's favorable migration trends are driving other industries reliant on local demand including healthcare, hospitality, retail, and construction. Phoenix's large workforce, reasonable costs, and friendly business environment make it desirable for large-scale expansions and relocations.

The single-family housing market is strong with gains in prices and sales exceeding those nationally and robust demand spurring new construction.

The largest economic sectors for employment are Professional and Business Services, Education and Health Services, and Retail Trade. Major area employers include Banner Health System, Wal-Mart Stores Inc., Wells Fargo, and Arizona State University. According to the U.S. BLS, the unemployment rate in the third quarter of 2018 was 4.1 percent, down from 7.4 percent at the beginning of the evaluation period. The MSA unemployment rate compares favorably to the overall State of Arizona at 5.2 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by two community contacts pertaining to the Phoenix MSA AA in conjunction with this evaluation. The contacts represent a CDFI serving the AA and a local economic development organization.

According to one contact, Phoenix has a large wealth disparity. A number of wealthy middle-age or older residents, often white, have moved to Phoenix to run their businesses, finish their careers or retire. At the same time, there is a large population of young Hispanic residents that are struggling and underserved. Approximately one in three Hispanic residents in Phoenix is at or below the poverty line. The contact noted that affordable housing in the city center was an issue as low-income workers cannot afford the high-cost apartments being built and have had to move into the suburbs and commute for work.

The same contact felt that the large under-banked and un-banked population, largely low-income and Hispanic residents, was not being served by the banks in Phoenix. The contact was highly critical of large national banks in the market for not serving the local population by lending and investing locally and for allowing non-bank financial institutions such as check cashers and auto title lenders to thrive. The contact felt that decision-making at these institutions was not local and that local deposits should be invested in the local community.

Per another contact, local financial institutions have limitations but are doing a good job of participating. Banks have CRA goals and know how to meet them; however, they are not very creative in how they go about doing this. The contact would like banks to develop a relationship with CDFIs to provide a viable opportunity for a referral program. CDFIs have money to lend but are not aware of the opportunities out in the market. CDFIs could fill the gap with regards to creative and innovative CD opportunities.

The contact indicated that local financial institutions do an excellent job on what they can do. The larger banks are involved in some way, but the contact would expect more, for example, banks could educate small businesses on credit cards as they tend to use credit cards for short-term debt and pay for it over the long term. According to the contact, banks need more innovative products and services to help small businesses.

The bank conducted research in the AA and identified community needs for affordable housing serving LMI families, services to homeless veterans and families, job training and assistance with job placement, and Workforce Development/Job Readiness to assist individuals.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business lending represent a primary credit need for the Phoenix MSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs coupled with limited home affordability for LMI individuals.

Tucson CSA AA

The following table provides a summary of the demographics that includes housing and business information for the Tucson CSA AA. Table A below indicates that the volume of OOUs is very small in low-income CTs and over 39 percent of families in the AA are LMI. The area's median housing value in the Tucson CSA AA is 3.6 times the MSA median income, but 4.6 times moderate-, and 7.3 times low-income, indicating a limited proportion of OOUs are affordable to LMI. Median rents and the significant percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

Economic Data

According to the July 2018 Moody's Analytics report, the Tucson economy is in the recovery stage of the business cycle and is underperforming compared to other areas in Arizona and the West overall. In the past five years, Tucson has added jobs at one-third the state and regional rates and half the national rate.

The economy is driven by defense spending and also by retirees. The area's large healthcare, hospitality, and retail industries are underperforming, and the large public sector remains a drag on the economy. The largest sectors by employment are Government, Education and Health Services, and Professional and Business Services. Major employers include the University of Arizona, Raytheon Missile Systems, and Davis-Monthan Air Force Base. Given the presence of the Air Force Base and the University, Tucson's reliance on state and federal government positions is nearly twice that of the nation overall. The MSA is also heavily reliant on aerospace manufacturing with Raytheon Missile System divisional headquarters and factory located in Tucson. Aerospace employment has seen a 20 percent increase since 2015, and Raytheon plans to add another 2,000 workers at its new research and development and testing facilities in the second half of 2018. Aerospace positions pay nearly twice the state average and gains in the industry will provide a boost to the housing market and consumer industries.

Per Moody's, housing price appreciation is above that of the nation overall thanks to robust retiree demand; however, supply constraints remain due in part to weak homebuilding. According to the U.S. BLS, the unemployment rate in the third quarter of 2018 was 4.1 percent, down considerably from 7.4 percent at the beginning of the evaluation period. The MSA unemployment rate compares favorably to the overall State of Arizona at 5.2 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by an existing community contact pertaining to the Tucson CSA AA in conjunction with this evaluation. The contact represents an affordable housing organization serving the Pima County.

The contact mentioned that Tucson is still recovering from the recession and suffers from high unemployment and low wages. Small businesses are suffering and construction is slow to recover. The downtown area has been redeveloped but affordability is an issue. The recent bus strike has impacted the poorest residents of Tucson the most. As a result, there is a critical need for transportation and child care funds. Tucson has also been negatively affected by cuts in federal funding at a time when their needs actually increased. The contact noted that local banks could partner with non-profits through more favorable loan terms (lowered interest rates, waived fees, etc.), and extending lines of credit. Banks can provide relief to non-profits in the form of fee waivers and being more proactive in making charitable contributions. Banks should take time to develop relationships with non-profits and be more effective in meeting the actual needs of the community.

The contact specifically mentioned Wells Fargo as being a partner with their non-profit, along with other community organizations. The contact expressed that many of the large banks are happy meeting their CRA quotas rather than actually trying to make a difference in the community at the ground level.

Considering the information from the community contact and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Tucson CSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs coupled with limited home affordability for LMI individuals.

Scope of Evaluation in Arizona

The rating for the State of Arizona is primarily based on FS evaluations of the bank's performance in the Phoenix MSA and Tucson CSA AAs; however, performance in each AA was considered. Conclusions where a LS review affected the CRA Rating for the state are addressed within their respective tests. LS procedures were performed for the remaining six AAs. The State of Arizona is the ninth largest rated area and along with 12 other rated areas represents the bank's most significant markets in terms of lending, deposit, and branch distribution. Arizona represents a sizeable portion of the bank's overall lending, investments, and services; therefore, the performance in the state was weighted heavier in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN ARIZONA

LENDING TEST

The bank's performance under the Lending Test in Arizona is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in both the Phoenix MSA and Tucson CSA AAs is excellent.

Lending Activity

Based on the tables below, lending levels reflect a good responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State Loans	%State Deposits
Phoenix MSA	206,022	80,071	1,036	146	287,275	70.7	72.5

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Phoenix MSA AA

WFBNA ranked second in deposits with 22.0 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 8.9 percent market share. There is strong competition as reflected by the 841 lenders and 61 depository institutions in the AA. The second and third top lenders in this market were U.S. Bancorp with a 6.4 percent market share and JPMorgan Chase Bank with a 4.8 percent market share.

In small loans to businesses, WFBNA ranked fourth with a market share of 10.4 percent. The top three lenders were American Express with a market share of 17.0 percent, JPMorgan Chase Bank with a market share of 15.4 percent, and Citibank with a market share of 13.8 percent.

Tucson CSA AA

WFBNA ranked first in deposits with 27.7 percent market share in the AA. In overall HMDA lending, WFBNA ranked second with 10.8 percent market share. There is strong competition as reflected by the 467 lenders and 20 depository institutions in the AA. The top lender in the market was Nova Home Loans with 11.1 percent market share.

In small loans to businesses, WFBNA ranked fourth with a market share of 11.7 percent. The top three lenders were Citibank with a market share of 14.4 percent, American Express with a 13.9 percent, and JPMorgan Chase Bank with a 12.3 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits an adequate geographic distribution of loans in its AAs.

Phoenix MSA AA

Home Mortgage Loans

Refer to Table O in the State of Arizona section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in LMI geographies substantially meets the aggregate distribution of loans in those geographies.
- The proportion of loans in low-income geographies is significantly below the proportion of OOUs and in moderate-income is well below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of Arizona section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for small business loans in LMI geographies exceeds the aggregate distribution of loans located in those geographies.
- The combined proportion of the bank's small business loans in low-income geographies exceeds the proportion of businesses located and in moderate-income geographies is near to the proportion of businesses located in those geographies.

Tucson CSA AA

Home Mortgage Loans

Refer to Table O in the State of Arizona section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- For 2012-2016, the bank's performance for home mortgage loans in LMI geographies substantially meets the aggregate distribution of loans in those geographies.
- The proportion of loans in low-income geographies is significantly below the proportion of OOUs and in moderate-income is well below the proportion of OOUs in those geographies.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is higher than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of Arizona section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for small business loans in LMI geographies exceeds the aggregate distribution of loans located in those geographies.
- The combined proportion of the bank's small business loans in low-income geographies exceeds the proportion of businesses located and in moderate-income geographies is near to the proportion of businesses located in those geographies.

Distribution of Loans by Income Level of the Borrower

The bank exhibits an excellent distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

<u>Phoenix MSA AA</u>

Home Mortgage Loans

Refer to Table P in the State of Arizona section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The Phoenix MSA AA has homeownership affordability hurdles especially for LMI borrowers. As noted above, the area's median housing value is 7.8 times the income of low-income and 4.9 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI individuals. Despite the affordability challenges, the bank's overall home mortgage lending in both periods, 2012-2016 and 2017-2018, to LMI borrowers exceeds the aggregate distribution of loans.
- The bank's home mortgage lending to low-income borrowers is well below the proportion of families and to moderate-income borrowers is near to the proportion of families.

Small Loans to Businesses

Refer to Table R in the State of Arizona section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is excellent.

- For 2012-2016, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is near to the percentage of small businesses located in the AA.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly less than the combined performance in 2012-2016.

<u>Tucson CSA AA</u>

Home Mortgage Loans

Refer to Table P in the State of Arizona section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The Tucson CSA AA has homeownership affordability hurdles especially for LMI borrowers. As noted above, the area's median housing value is 7.3 times the income of low-income and 4.6 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI. Despite the affordability challenges, the bank's overall home mortgage lending in 2012-2016 to LMI borrowers exceeds the aggregate distribution of loans.
- The bank's home mortgage lending to low-income borrowers is well below the proportion of families and to moderate-income borrowers is below the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Arizona section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is excellent.

- For 2012-2016, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is near to the percentage of small businesses located in the AA.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly less than the combined performance in 2012-2016.

Community Development Lending

The institution is a leader in making CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

<u>Phoenix MSA AA</u>

The level of CD lending in the Phoenix MSA AA is excellent. WFBNA made 146 CD loans in its AA for a total of $740.3 million, which represents nearly 30 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified affordable housing and small business lending needs in the AA. The bank made 32 CD loans totaling $534 million (72 percent) for the purpose of affordable housing. Additionally, the bank extended 102 CD loans totaling $132 million for the primary purpose of community services to LMI individuals.

Examples of CD loans in the AA include:

- In August 2013, WFBNA provided a $3.2 million loan to purchase a vacant commercial building in a low-income tract in Phoenix. The City of Phoenix's Economic Development Strategic Plan identified a need to encourage adaptive reuse of existing buildings and develop strategic sites along the light rail corridor. The project addressed several key priorities of the city's plan including transit-oriented development and stabilizes the area with new jobs.

- In May 2014, WFBNA provided a $2.2 million loan to fund the construction of an emergency family shelter consisting of 16 temporary homeless shelter units and support services center located in downtown Mesa.
- In June 2018, WFBNA provided a $71.6 million loan for a multifamily housing development in a moderate-income census tract in Phoenix. The development consists of over 700 units of which 99 percent are affordable to tenants earning between 38 and 79 percent of the 2018 area MFI.

Tucson CSA AA

The level of CD lending in the Tucson AA is excellent. WFBNA made 60 CD loans in its AA for a total of $97.3 million, which represents nearly 19 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified affordable housing and small business lending needs in the AA. The bank made 12 CD loans totaling $55 million (56.7 percent) for the purpose of affordable housing. Additionally, the bank extended 43 CD loans totaling $31 million for the primary purpose of community services to LMI individuals.

Examples of CD loans in the AA include:

- In May 2018, WFBNA provided a $13.6 million loan for a multifamily housing development located in a moderate-income census tract in Tucson, Arizona. The project consists of 280 one-bedroom units and 24 two-bedroom units, with 64 percent of the actual rent rates below the 2018 Fair Market Rent for the area and 100 percent of the units affordable to tenants earning between 33 and 64 percent of the 2018 area MFI of $60,600.
- In March 2015, WFBNA provided a $3.5 million construction loan for an affordable housing development in downtown Tucson that consisted of 30 fully furnished single-room occupancy units. The project targets homeless veterans and has rent restrictions at 30 percent of the area MFI. In addition, the City of Tucson will provide rental assistance for the project for 15 years.
- In May 2013, WFBNA provided a $1.8 million increase to an existing $5.1 million loan to finance the construction of a certified mixed-use housing project. The project consisted of a seven-story mixed used property located in a low-income area and Empowerment Zone in Tucson. The transit oriented development will include office space, retail space, 24 apartment units, and a parking garage. The activity was expected to spur revitalization efforts in this low-income community.

Product Innovation and Flexibility

Phoenix MSA AA

The institution makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. The bank launched the NeighborhoodLIFT program in the Phoenix MSA AA in January 2016 and more than 200 potential homebuyers attended the event. Of the 200 in attendance, WFBNA originated 113 mortgage loans totaling $16 million. Under the yourFirstMortgage loan program the bank has funded 291 loans totaling $46.2 million to LMI homebuyers that qualified under this program.

Tucson CSA AA

The institution makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. The bank launched the NeighborhoodLIFT program in the Tucson CSA AA in September 2016 and more than 600 potential homebuyers attended the event. Of the 600 in attendance, WFBNA originated 70 mortgage loans totaling $6.4 million. Under the yourFirstMortgage loan program the bank has funded 37 loans totaling $4.3 million to LMI homebuyers that qualified under this program.

Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding the programs noted above.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Lending Test in the Prescott MSA AA is consistent with the bank's overall excellent performance under the Lending Test in the FS areas. The bank's performance in the Flagstaff MSA, Lake Havasu MSA. Sierra Vista MSA, Yuma MSA, and AZ Combined NonMetro AAs is good and slightly weaker than the bank's overall performance due primarily to lower volume of CD lending. Performance differences in the LS AAs did not impact the Lending Test rating for the State of Arizona.

Refer to Tables O through T in the State of Arizona section of appendix D for the facts and data that support these conclusions.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of Arizona is rated Needs to Improve.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the table below and consideration of performance context discussed in the lending test, the bank's performance in the Phoenix MSA is poor and performance in the Tucson CSA AA is excellent.

Qualified Investments										
	Prior Period*		Current Period		Total				Unfunded Commitments**	
Assessment Area	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Phoenix MSA	60	$29,481	664	$62,356	724	71.4	$91,837	47.3

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

<u>Phoenix MSA AA</u>

The institution has a poor level of qualified CD investments and grants, but not in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 3.7 percent of tier 1 capital allocated to the AA.

The investments and grants reflect adequate responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 72 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 540 grants totaling $14.4 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution occasionally uses innovative and/or complex investments to support CD initiatives. CD Investments involved several complex LIHTC projects where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In August 2016, WFCB invested $43 million in the Homestead Equity Fund XIII, a LIHTC fund. Of this total investment, $5.2 million was allocated to Landmark Senior Living. This development is located in Glendale, Arizona, with 48 units restricted to tenants earning no more than 60 percent of the area MFI. This limited partnership is operated and managed by National Equity Fund and is a nonprofit affiliate of the Local Initiatives Support Corporation and a leading syndicator of LIHTC. This investment is responsive to the need for affordable housing.
- In May 2017, WFBNA provided a grant totaling $300,000 to a statewide CDC through the Small Business DCC Program benefiting small businesses in the State of Arizona including the Phoenix MSA AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.
- In January 2016, WFBNA provided six local initiative grants totaling $700,000 to six local organizations to administer the NeighborhoodLIFT Down Payment Assistance program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.
- During the exam timeframe, WFBNA provided six grants totaling $780,000 to several housing organizations through the PMP for affordable housing in the Phoenix MSA AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

Tucson CSA AA

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 18.6 percent of tier 1 capital allocated to the AA.

The investments and grants reflect excellent responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 50.6 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 160 grants totaling $6.9 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved several complex LIHTC and NMTC projects where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In May 2017, WFBNA invested $20.3 million for the rehabilitation and construction of an 83-unit LIHTC affordable housing complex located in Tucson, Arizona. The development specifies that 100 percent of the units restricted to tenants earning between 40 and 60 percent of the area MFI. The project is a renovation of a vacant school in a very low-income census tract. This investment is responsive to the need for affordable housing. WFBNA also demonstrated multi-faceted support by providing a $17.3 million construction loan and equity investment to support this affordable housing development. This investment is also complex involving several parties.
- In July 2014, WFBNA invested $39 million in the Homestead Equity Fund XI, a LIHTC Credit fund. Of this total investment, $2.1 million was allocated to a development located in Tucson, Arizona, with units restricted to tenants earning no more than 60 percent of the area MFI.
- In February 2015, WFBNA provided a $100,000 grant to this organization for its Youth Development as part of the Tucson NeighborhoodLIFT Program Local Initiative program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Investment Test in the Flagstaff MSA, Lake Havasu City MSA, Prescott MSA, Sierra Vista MSA, and Yuma MSA AAs is consistent the bank's overall poor performance. The bank's performance in the AZ Combined NonMetro AA is stronger than the bank's overall poor performance due primarily to higher volume of CD investments. Performance differences in the LS AA did not impact the overall Investment Test rating for the State of Arizona.

SERVICE TEST

The bank's performance under the Service Test in Arizona is rated High Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Phoenix MSA AA and Tucson CSA AA is good.

Retail Banking Services

Service delivery systems are accessible to geographies and individuals of different income levels in the institution's AAs particularly LMI geographies and/or LMI individuals.

Phoenix MSA AA

As of December 31, 2018, WFBNA operates 145 branches and 363 ATMs in the Phoenix MSA AA. Of these branches, 143 are full-service locations and two are limited-service branches. There are 10 branches in the low-income geographies and 23 in moderate-income geographies. The branch distribution in LMI geographies is below the percentage of the population in LMI geographies in the AA. When considering an additional 29 branches within close proximity to LMI geographies, the bank's distribution is near to demographics.

The institution's opening and closing of branches have not adversely affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed two branches in low-income geographies and one in a moderate-income geography since the last evaluation. The closure of branches in LMI geographies was to consolidate with other branches nearby and did not negatively impact the distribution of branches relative to the population residing in those geographies. The bank still maintains 33 active branches or 22.5 percent within LMI geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AAs, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 6:00 pm, with 29 branches open until 7:00 pm. All except 11 branches are also open on Saturday from 9:00 am to 2:00 pm, 29 from 9:00 am to 5:00 pm, one from 9:00 am to 1:00 pm, and one from 9:00 am to 4:00 pm. All WFBNA services are available at all branches and all ADS discussed bank-wide are available in this AA.

Tucson CSA AA

As of December 31, 2018, WFBNA operates 39 branches and 91 ATMs in the Tucson CSA AA. Of these branches, 38 are full-service locations and one is a limited-service branch. There are no branches in the low-income geographies and 15 branches in moderate-income geographies. The branch distribution in low-income geographies is significantly below the percentage of the population and the branch distribution in moderate-income geographies exceeds the percentage of the population in moderate-income CTs in the AA. When considering an additional eight branches within close proximity to LMI geographies, the bank's distribution is near to demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed four branches since the last evaluation. One of the branch closings was located in moderate-income geography and the remaining closings were located in middle and upper-income geographies. The closure of branch in the moderate-income geography did not negatively impact the distribution of branches relative to the population residing in this geography.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AAs, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 6:00 pm, with five branches open until 7:00 pm. All except 5 branches are also open on Saturday from 9:00 am to 2:00 pm, with 3 branches open until 5:00 pm. All WFBNA services are available at all branches and all ADS discussed bank-wide are available in this AA.

Community Development Services

The institution is a leader in providing CD services.

Phoenix MSA AA

The level of CD services in the Phoenix MSA AA is excellent. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 714 CD service activities to 78 organizations since the last evaluation, logging a total of 3,239 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing and economic development. The bank's assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- A WFBNA team member provided 52 hours of Board service to a community organization that is certified by the US Department of Treasury to provide alternative financing programs anywhere in the state of Arizona. It serves a vehicle for institutions to meet community reinvestment and community development goals.
- Three WFBNA team members provided 73.5 hours of Board service to a community organization that is dedicated to helping community residents transform distressed neighborhoods into healthy and sustainable communities of choice and opportunity.

Tucson CSA AA

The level of CD services in the Tucson CSA AA is excellent. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 272 CD service activities to 19 organizations since the last evaluation, logging a total of 2,268 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing, economic development, and revitalization/stabilization. The bank's assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- A WFBNA team member provided 60 hours of Board service to a community organization that provides resources and expertise to address issues of behavioral health, housing, family and children's services, employment, crisis intervention, and community and cultural education within LMI communities.
- Three WFBNA team members provided 57 hours of financial outreach and Board services to a community organization that specializes in neighborhood preservation, infrastructure improvement and business development.

Conclusion for Areas Receiving LS Review

Based on LS reviews, the bank's performance under the Service Test in the Flagstaff MSA, Lake Havasu MSA, Prescott MSA, Sierra Vista MSA, Yuma MSA, and AZ Combined NonMetro AAs is stronger than the bank's overall good performance under the Service Test in the FS areas due primarily to a higher percentage of branch distribution in the LMI geographies. Performance differences in the LS AAs did not impact the overall Service Test rating for the State of Arizona.

State Rating

State of California

CRA rating for the State of California[21]: Outstanding
The Lending Test is rated: Outstanding
The Investment Test is rated: Outstanding
The Service Test is rated: High Satisfactory

The major factors that support this rating include:

- Excellent lending activity;
- Good distribution of loans by borrower profile;
- Good geographic distribution of loans;
- WFBNA is a leader in providing CD loans, which has a significant positive impact on the Lending Test;
- WFBNA's use of flexible products has a positive impact on the Lending Test;
- Excellent level of CD investments that are responsive to AA needs;
- Retail delivery systems are accessible to all portions of the AA; and
- WFBNA is a leader in providing CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in California

WFBNA delineated 15 AAs within California including the Los Angeles-Long Beach, CA CSA (Los Angeles CSA AA); Sacramento-Roseville, CA CSA (Sacramento CSA AA); San Diego-Carlsbad, CA MSA (San Diego MSA AA); San Jose-San Francisco-Oakland, CA CSA (San Jose CSA AA), Bakersfield, CA MSA (Bakersfield MSA AA); Chico, CA MSA (Chico MSA AA); El Centro, CA MSA (El Centro MSA AA); Fresno-Madera, CA CSA (Fresno CSA AA); Modesto-Merced, CA CSA (Modesto CSA AA); Redding-Red Bluff, CA CSA (Redding CSA AA); Salinas, CA MSA (Salinas MSA AA); San Luis Obispo-Paso Robles-Arroyo Grande, CA MSA (San Luis Obispo MSA AA); Santa Maria-Santa Barbara, CA MSA (Santa Maria MSA AA); Visalia-Porterville-Hanford, CA CSA (Visalia CSA AA); and the CA Combined Non-Metros AA (CA Combined NonMetro AA). The Los Angeles CSA AA, Sacramento CSA AA, San Diego MSA AA, and San Jose CSA AA received FS reviews. These four AAs accounted for the majority of the lending (88.5 percent) and deposits (93.4 percent) amongst the AAs in California. Refer to Appendix A for a complete description of each AA.

California represents the largest rated area by deposits. WFBNA has $258.3 billion deposits representing 20.3 percent of adjusted deposits in California. WFBNA operates 1,029 branches and 3,927 ATMs within California, representing 18 percent of the bank's branches and 29 percent of the bank's ATMs. The bank originated or purchased $538.4 billion in loans or 29.1 percent of total reported loan originations and purchases during the evaluation period in California. The bank's primary loan products in the State of California are home mortgage and small business loans.

[21] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

Los Angeles CSA AA

Within the Los Angeles CSA AA, the bank had $93.9 billion deposits and ranked second amongst 134 institutions in the market with 15.5 percent market share. Bank of America ranked first with 19.3 percent market share and JPMorgan Chase ranked third with 13.2 percent market share. WFBNA operates 460 branches and 1,762 ATMs in the Los Angeles CSA AA.

Sacramento CSA AA

Within the Sacramento CSA AA, the bank had $13.2 billion deposits and ranked first amongst 40 institutions in the market with 22.9 percent market share. U.S. Bank ranked second and Bank of America third with deposit market shares of 17.6 percent and 17.3 percent, respectively. WFBNA operates 78 branches and 260 ATMs in the Sacramento CSA AA.

San Diego MSA AA

Within the San Diego MSA, the bank had $20.2 billion deposits and ranked first amongst 53 institutions in the market with 22.6 percent market share. Bank of America ranked second and JP Morgan Chase third with deposit market shares of 15.5 percent and 14.0 percent, respectively. WFBNA operates 98 branches and 358 ATMs in the San Diego MSA AA.

San Jose CSA AA

Within the San Jose CSA, the bank had $113.8 billion deposits and ranked second amongst 89 institutions in the market with 20.6 percent market share. Bank of America ranked first with 26.4 percent market share and Silicon Valley Bank ranked third with 8.3 percent market share. WFBNA operates 278 branches and 1,164 ATMs in the San Jose CSA AA.

Demographic Data

Los Angeles CSA AA

The following table provides a summary of the demographics that includes housing and business information for the Los Angeles CSA AA. Table A indicates that the volume of OOUs is very small in low-income CTs and over 39 percent of families in the AA are LMI. The area's median housing value in the Los Angeles CSA AA is 5.8 times the area's highest median income, but 7.3 times moderate-, and 11.6 times low-income, indicating a limited proportion of OOUs are affordable to LMI individuals. Median rents and the high percentage of families below poverty level suggest rental housing may also be unaffordable for LMI residents.

Table A – Demographic Information of the Assessment Area

Economic Data

Anaheim-Santa Ana-Irvine, CA MD

According to the February 2019 Moody's Analytics report, the Anaheim economy is slowing with job growth below the national pace for the first time in over a decade. The housing market has softened leading construction to drop. On a positive note, the unemployment rate has leveled off at 3 percent which is at a 20-year low. The area economy is driven by healthcare, tourism, and high tech. Anaheim is a healthcare hub, home to one of the nation's top research hospitals, UC Irvine Medical Center. Healthcare has added 20 percent of net new jobs this decade, though most jobs gains are in low-paying social assistance. The area also benefits from a well-educated labor force thanks in part to the presence of UC Irvine. The University also ranks as one of the area's top employers along with Disneyland Resort, The Walt Disney Co., and St. Joseph Health. The largest employment sectors include Professional and Business Services, Education and Health Services, and Leisure and Hospitality Services.

The area economy's major weakness can be attributed to its own successes as strong demand for workers had resulted in increasingly unaffordable labor and real estate. Anaheim ranks fifth in Moody's Cost of Living Index, and home prices are 11 percent above their previous peak in 2006. The high costs of living and reduced standards of living have resulted in less people moving into Anaheim and more people leaving.

According to the U.S. BLS, the unemployment rate for Anaheim for the fourth quarter of 2018 was 2.9 percent and has decreased significantly from 6.6 percent at the beginning of the evaluation period. The unemployment rate in the AA was lower than the overall state at 4.1 percent for the same period.

Los Angeles-Long Beach-Glendale, CA MD

According to the May 2018 Moody's Analytics report, Los Angeles's job growth has fallen since 2016 and is now slightly below the national average. On a positive note, unemployment is at a record low and the quality of jobs being created has improved. The local economy is driven by federal government (non-defense) and defense. Los Angeles has benefitted from the recent increase in defense spending.

Northrup Grumman, an aerospace and defense technology company has a huge presence in Los Angeles and recently won a contract to produce the Air Force's next generation stealth bomber. Aecom, an engineering firm headquartered in Los Angeles, also recently won a contract from the Air Force. Los Angeles is also known as a major trade port handling half of all U.S maritime trade with China. As such, a potential trade war with China is a real threat to the Los Angeles economy. Higher education also drives the area economy as the area is home to two major universities, University of California Los Angeles and the University of Southern California, which are amongst the area's top employers. Other top employers include Kaiser Permanente and Northrup Grumman. The largest sectors by employment are Education and Health Services, Professional and Business Services and Government.

According to Moody's, there are 16 percent fewer homes listed for sale in 2018 than the year prior, underpinning above average price appreciation. The percent of houses for sale is below the State of California and well below the U.S. overall. Housing affordability is also a major concern in Los Angeles.

According to the U.S. BLS, the area unemployment rate is 4.4 percent compared to 10.9 percent at the beginning of the evaluation period. Though improved, the area unemployment rate is still above the State of California overall at 3.7 percent for the same period.

<u>Oxnard-Thousand Oaks-Ventura, CA MSA</u>

According to the July 2018 Moody's Analytics report, Oxnard's economy is improving. Rising hourly earnings are providing households with increased discretionary spending funds. The Oxnard economy is driven by high-tech and defense spending. There is a large military presence in the area with the Naval Base Ventura County being the area's largest employer by far. The recent increase in defense spending cap by Congress will benefit the area economy. Military personnel saw large pay increases in 2018 and can expect another large increase in 2019 which will boost demand in the retail and leisure/hospitality industries. Oxnard benefits from a high educational attainment and lower business costs than neighboring Los Angeles. The area's share of high-tech jobs including semiconductor and electronic components manufacturing is in the top 10 percent of U.S metro areas. Employment in this area is expected to increase further in the next two years as fiscal stimulus and rising wages bolster demand for tech goods. Other major area employers include Biotech Company Amgen Inc. and Bank of America. The largest employment sectors in Oxnard are Government, Education and Health Services, and Retail Trade.

The Oxnard labor market has contracted over the last year where the regional and U.S. labor forces have expanded. The area has suffered from weak migration patterns and the current immigration policy could reduce immigration and further restrict the labor supply. In Oxnard, a quarter of the population is immigrants, placing it in the top 10 percent of U.S. metro areas.

The housing market is steady. Price appreciation is slowing but single-family permits are increasing.

According to the U.S. BLS, the area unemployment rate is 4.0 percent which is the lowest for Oxnard since the early 90's when the series began. The unemployment rate is down from 9.1 percent at the beginning of the evaluation period and is lower than the State of California overall at 4.5 percent for the same period.

Riverside-San Bernardino-Ontario, CA MSA

According to the August 2018 Moody's Analytics report, the Riverside economy is thriving. The area added jobs at a faster rate than all of California with the exception of Stockton-Lodi over the last year. Personal income growth has outpaced the U.S. average since 2014, led by wage and salaries, though much of this increase is the result of job additions rather than average hourly pay. However, labor markets are tight and Riverside's unemployment rate is above the state and U.S. averages. Riverside has seen positive and increasing net migration as the area is an affordable bedroom community for Los Angeles and San Diego where housing prices are 15 to 25 percent higher.

The area economy is driven by logistics and defense. Army training center Fort Irwin and the U.S. Marine Corps. Air Ground Combat Center are both located in San Bernardino County and are amongst the top area employers. Other major employers are Stater Brothers Markets and Arrowhead Regional Medical Center. The area relies heavily on logistics where the number of workers in warehousing and transportation is more than twice the U.S. average. Since 2011, the area's share of jobs in logistics has risen three percentage points to 12 percent compared to less than a percentage point growth nationwide to approximately seven percent. E-commerce is the driving force in the logistics growth, led by Amazon which now employs more than 15,000 workers in Riverside.

According to the U.S. BLS, the current unemployment rate is 4.4 percent, down considerably from 11.5 percent at the beginning of the evaluation period. The unemployment rate in the AA is slightly higher than the State of California overall at 4.3 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by six community contacts pertaining to the Los Angeles CSA AA in conjunction with this evaluation. Three of the contacts are CDCs, one is a Small Business Economic Development Agency, one is a CDFI, and one is an Economic Development Corporation.

Los Angeles is the second largest city in the United States in terms of population and one of the largest in terms of area. It is the center of a five-county metropolitan area and has all of the advantages and problems of large urban areas. The community contacts collectively agree that affordable housing remains a significant need in the AA. The need for affordable housing is further compounded by an increase in the cost of rental accommodations in the AA making housing almost unaffordable for LMI people. While unemployment rates have decreased among cities in the AA, poverty rate is higher than the country and overall state. Additionally, the number of homeless people is at crisis level.

A contact from the CDC agency which serves the Vernon neighborhood in South Central Los Angeles indicated that the area has a concentration of poverty and unemployment. In addition, a large percentage of adults do not have a high school diploma. There is a need for affordable housing, small business and micro loans, financial literacy, credit score repair, and workforce development in the area.

Another contact from the Community Development agency that serves the city of Santa Ana area in Orange County also noted that their clients have bad credit history, are financially illiterate, and use payday lenders. The contact believes that there should be more bank products that meet the needs of LMI persons and that most banks are not willing to come out into LMI communities to market their products. Another contact representing LMI communities in downtown Los Angeles directly adjacent to skid row mentioned the following community needs: remittance services, construction loan financing, permanent loan financing, and equity investors for LIHTC projects and general operating support for CDCs in the area.

The contact from the Small Business Economic Development agency that serves Los Angeles, Ventura, and Santa Barbara Counties commented that the economy and market is improving and there is a significant increase in lending both on a quantitative and qualitative basis. Other economic trends include a reduction in unemployment, low interest rates, and an increase in access to capital by small business owners and entrepreneurs. The contact noted that some state policies were not always business friendly and that Los Angeles continues to struggle with the minimum wage issue, which will have an impact on small business owners.

The CDFI agency contact noted that while the economy is improving and banks are making loans, there are still underserved areas. Credit worthiness continues to be a problem as well. In an effort to help, the agency refers some borrowers to alternative means of financing, including crowd funding for example. The agency also provides banks with microloan program information. According to the contact, another missed opportunity of banks is start-ups. The agency also offers to put together a start-up loan package free of charge to ensure borrowers are ready for the financial portion of the loan process.

Since the financial crisis, there has been an increase in the number of bank mergers, which decreased the overall opportunity for funding sources and partners. This has been a problem in the low-income community and for the organizations that work to support them. There is a huge need for small business loans from $50,000 to $500,000.

The contacts indicated that banks could offer more affordable deposit products such as those that do not allow for overdrafts and subsequent fees. These products should be combined with financial education. The contact shared the example of a large bank who used to offer a “second chance” checking account and a secured credit card to help individuals build credit, but does not offer it anymore. Such affordable products are needed to help individuals and households get into the financial mainstream. In addition, banks should increase their participation in the micro lending segment by providing grants and investments in intermediaries for re-lending and technical assistance.

The bank conducted research in the AA and identified community needs for affordable housing for LMI families; financial education, products, and services for the unbanked and underbanked individuals; homeless services; small business assistance; workforce development and job readiness; development of healthy communities; and neighborhood revitalization/stabilization.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing, small business loans, small business assistance, and neighborhood revitalization/stabilization represent primary credit needs for the Los Angeles CSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals. Small business loans in amounts of $50,000 to $500,000 are in high demand. The Los Angeles CSA AA also has CD needs including affordable housing, community services, and economic development.

<u>Sacramento CSA AA</u>

The following table provides a summary of the demographics that includes housing and business information for the Sacramento CSA AA. Table A indicates that the volume of OOUs is very small in low-income CTs and over 38 percent of families in the AA are LMI. The area's median housing value in the Sacramento CSA AA is five times the area's highest median income, but 6.2 times moderate-, and ten times low-income, indicating a limited proportion of OOUs are affordable to LMI individuals.

Economic Data

Sacramento-Roseville-Arden-Arcade, CA MSA

According to the July 2018 Moody's Analytics report, Sacramento's expansion is slowing with job growth stalling, average hourly earnings flattening out, and homebuilding decelerating. Sacramento serves as the state capital which helps drive the economy along with higher education and high tech. UC Davis, which has seen steady enrollment growth provides the area with high-paying jobs and a highly skilled labor force. Sacramento is also a healthcare hub for the area and is home to one of the nation's top research hospitals, UC Davis Health System, which is also the area's largest employer. Other top employers include Kaiser Permanente, Sutter Health, and Dignity Health. The largest employment sector by far is Government, followed by Education and Health Services and Professional and Business Services.

Population growth in Sacramento is the highest it's been in the last decade and almost twice the statewide average. The area benefits from lower living and business costs relative to its Bay Area neighbors. In addition, the proximity to the Bay Area attracts investment in tech and agriculture.

Prices in the Sacramento real estate market have reached every end of the spectrum. The onset of the recession saw record lows, and recent appreciation rates all but erased the decline in prices. Sacramento real estate has appreciated by as much as 64.6 percent in the last three years. It wasn't until the end of last year that the pace of appreciation started to temper, and even then, it is still higher than the national average.

According to the U.S. BLS, the current unemployment rate is 3.9 percent, down considerably from 10.3 percent at the beginning of the evaluation period. The unemployment rate in the AA is lower than the State of California overall at 4.5 percent for the same period.

Yuba City, CA MSA

According to the July 2018 Moody's Analytics report, the Yuba City economy has hit a downturn with the public sector taking much of the blame. Recent layoffs have brought the unemployment rate back up above its 30-year low. The area economy is not particularly diverse and is driven by defense and agriculture. The largest employment sector by far is Government, followed by Education and Health Services and Retail Trade. The area is home to Beale Air Force Base (BAFB) which helps provide economic stability and reliable demand for consumer services. BAFB is also the largest employer in the area followed by Fremont-Rideout Health Group and Sunsweet Growers Inc. The agriculture industry has been hurt in recent years due to loss of revenues from higher tariffs and forest fires in the Central Valley.

The residential real estate market remains strong with year-over-year appreciation. Housing demand continues to be strong in Sacramento which created strong inward migration to Yuba City from the Sacramento area and added pressure to expand single family construction in the area.

According to the U.S. BLS, the current unemployment rate is 7.2 percent, down considerably from 16.3 percent at the beginning of the evaluation period. The unemployment rate in the AA is higher than the State of California overall at 4.5 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by four existing community contacts pertaining to the Sacramento CSA AA in conjunction with this evaluation. Two contacts represent affordable housing agencies that serve the Sacramento-Roseville area and rural areas in the state including the AA, one is an economic development corporation, and the other is a non-profit social service agency.

The affordable housing agencies indicated that the economy in Sacramento is growing. The two largest employers, state government and health care providers, tend to hire a diverse workforce. Affordable housing was once widely available in the AA. However, recent increases in housing prices and rental costs and people moving to Sacramento from San Francisco to escape high home prices and high rents are leaving the conventional and LMI housing markets stressed. This has resulted in limited available affordable housing inventory for purchase and declining rental vacancies in the AA.

Both contacts indicated that there are other factors that negatively impact affordable housing including:

- The California Redevelopment law was repealed by the state legislature leaving very little capacity for planning or funding for affordable housing.
- There is a significant challenge to serve those most in need in rural communities.

- Blight is no longer a condition for the application of tax increment financing. This has ended tax increment financing as a source of funding for affordable housing at the local level and has taken eliminated critically needed funds from LMI areas.
- For a number of years, government subsidies for affordable housing construction have been insufficient to meet the demand for affordable housing.
- Lack of affordable housing projects. There are only about three to four affordable housing projects starting each year in the AA. There are more banks that are interested in financing affordable housing then there are projects.

The social service agency is a food bank that serves the Sacramento County-North Sacramento-Oak Park areas of the AA. The contact indicated that the incidence of hunger and food insecurity has been increasing in Sacramento County. A survey of emergency food providers found that, on average, the number of clients being served at local food pantries increased by 20 percent.

The economic development corporation indicated that LMI communities lack the capacity to access capital, even though there is plenty of capital available under the right terms and conditions. Banks could help this need by providing technical assistance to small business owners and entrepreneurs.

The bank conducted research in the AA and identified community needs for affordable housing for LMI families; education for the unbanked and underbanked individuals; small business assistance; workforce development and job readiness; and development of healthy communities.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing, small business loans, and small business assistance represent primary credit needs for the Sacramento CSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

San Diego MSA AA

The following table provides a summary of the demographics that includes housing and business information for the San Diego MSA AA. Table A indicates that the volume of OOUs is very small in low-income CTs and 40 percent of families in the AA are LMI. The area's median housing value in the San Diego MSA AA is 6.7 times the area's median income, but 8.4 times moderate-, and 13.4 times low-income, indicating a limited proportion of OOUs are affordable to LMI individuals.

Economic Data

According to the August 2018 Moody's Analytics report, the San Diego economy is solid but has lost some steam. The area economy is driven by high tech and defense. Top employers include Marine Corps Base Camp Pendleton, UC San Diego, Naval Base San Diego, and Naval Base Coronado. San Diego's highly educated workforce, including abundant engineering talent, access to venture capital and lower costs than Silicon Valley spur tech firm expansion. San Diego is among the top recipients of venture capital funding and startups have been a steady source of new jobs. On the downside, layoffs at Qualcomm and other sectors have softened the job market recently.

San Diego is home to various military installations and military intelligence and unmanned aerial vehicles. Congress' recently approved defense budget includes the biggest active-duty pay raise in almost a decade, which will spur consumer demand for housing and consumer goods. Healthcare will also provide a boost to the economy providing a solid foundation of mid-wage jobs and lift consumption. San Diego is home to one of the nation's top research hospitals, UC San Diego Medical Center, which along with other local hospitals will benefit from increased National Institutes of Health funding and the availability of research grants.

Residential real estate is mixed. Over the last year, home prices are up about 8 percent, but home sales were down significantly in 2018.

According to the U.S. BLS, the current unemployment rate is 3.4 percent, down considerably from 9.1 percent at the beginning of the evaluation period. The unemployment rate in the AA is lower than the State of California overall at 4.3 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by a 2017 CRA Listening Session sponsored by several regulatory agencies in which 12 affordable housing, economic development, and community service organizations participated.

The contacts indicated that at the macro level things are improving in San Diego. However, there are neighborhoods in the AA that are not doing well and are having significant issues. These neighborhoods include City Heights, San Ysidro, South East San Diego, Diamond, Barrio Logan, Logan Heights, National City, and West Chula Vista. San Ysidro is home to almost 70,000 men, women, and children who live below the federal poverty level.

The contacts noted that while unemployment rate is low in the AA, certain groups have very high unemployment rates. These groups include many young adults that are not in school. There is a disconnect in skills between the unemployed and the employment opportunities in the AA. In addition, the U.S. immigration policies are having a negative economic impact. One nonprofit contact indicated that many legal residents have closed bank accounts because of fear of deportation or loss of legal status.

Several contacts mentioned that affordable housing is a significant issue and challenge due to high housing prices, limited affordable housing units, and investment purchasing by buyers paying cash. Contacts indicated that banks can address the issue by funding mixed used projects and provide financing (line of credit and acquisition funding) to these organizations to acquire and develop properties. In addition, there is a need for banks to capitalize CDFI loan pools that offer down payment and closing cost assistance to LMI and middle-income borrowers in high-coast markets, as many creditworthy borrowers cannot purchase homes even with down payment assistance due to high home prices. One contact specifically mentioned WFBNA's NeighborhoodLift program as being particularly helpful with providing closing cost assistance.

Contacts identified the following needs pertaining to small businesses and economic development:

- increase collaboration in referring and supporting small businesses.
- offer small business loan products that are competitive, affordable, sustainable, and transparent. One contact specifically mentioned WFBNA's startup financing in the form of line of credit with a streamlined process.
- provide technical assistance to businesses.
- invest in CDFIs to help them bring new products to market.
- provide capital and funding for nonprofits entities.
- engage with local minority chambers of commerce.

The bank conducted research in the AA and identified community needs for affordable housing for LMI families, financial education for the unbanked and underbanked; homeless services, small business assistance, and workforce development and job readiness.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing, small business loans, and small business assistance represent a primary credit need for the San Diego MSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

<u>San Jose CSA AA</u>

The following table provides a summary of the demographics that includes housing and business information for the San Jose CSA AA. Table A indicates that the volume of OOUs is very small in low-income CTs and over 39 percent of families in the AA are LMI. The area's median housing value in the San Jose CSA AA is 5.4 times the area's highest median income, but 6.7 times moderate-, and 10.8 times low-income, indicating a limited proportion of OOUs are affordable to LMI individuals.

(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

Napa, CA MSA

According to the July 2018 Moody's Analytics Report, the Napa economy has slowed. After outperforming California and the U.S. earlier this decade, the area has struggled to keep pace the last few years. Napa is fully employed with an unemployment rate near a historic low and wage growth is firming. The area also boasts the fifth and sixth highest hourly earnings and per capita income, respectively, in the state. Major employers include Napa State Hospital, St. Joseph Health Queen of the Valley and St. Helena Hospital. The largest employment sectors are Leisure and Hospitality Services, Manufacturing, and Government.

The area economy is driven by agriculture, tourism, and retirees. Winemaking anchors the economy and has been helped by strong domestic demand. Visitors to the area are typically affluent and wages for workers in tourism earn more than those elsewhere in the state and nationwide. On the downside, the area has a very high cost of living and migration trends are weak and worsening.

On the housing front, inventory is very low at affordable price points, where the pace of appreciation is strongest. Wine and tourism rely on low-wage workers and unless Napa takes steps to improve access to affordable housing, more workers will have to commute. To help increase supply, the city council has lowered or eliminated fees for housing units under 500 square feet.

According to the U.S. BLS, the current unemployment rate is 3.3 percent, down considerably from 8.4 percent at the beginning of the evaluation period. The unemployment rate in the AA is lower than the State of California overall at 4.5 percent for the same period.

Oakland-Hayward-Berkeley, CA MD

According to the April 2017 Moody's Analytics Report, the Oakland economy is expanding steadily. Unemployment in the area is lower than in the state and nation. Oakland has experienced a positive spillover effect from neighboring cities of San Francisco and San Jose. Affordability in these areas declined and caused companies to seek more affordable options like Oakland.

The pace of residential and commercial construction has increased to even higher levels as organizations and businesses like Tesla, Uber, the University of California, and Blue Shield have expanded or relocated to the area. The area's economy is diverse and benefits from various sectors.

The top three employers in the area are the University of California–Berkeley, Safeway Inc., and Kaiser Permanente. According to the U.S. BLS, the area unemployment rate for the first quarter of 2017 is 4.0 percent, down considerably from 7.3 percent at the beginning of the evaluation period. The unemployment rate in the AA is lower than the State of California overall at 4.7 percent for the same period.

San Francisco-Redwood City-South San Francisco, CA MD

According to the July 2018 Moody's Analytics report, the San Francisco economy has experienced slow growth. Job additions are average at best and income growth has been below the national average over the last year. The area unemployment rate at 2.2 percent is the 11^{th} lowest among U.S. metro areas, and average annual earnings are more than forty percent above the national average. San Francisco is the epicenter of technology innovation and technology firms are the driving force behind the area economy. Tech companies are investing heavily to maintain competitive advantages and develop the next generation of tech projects and services. Other economic drivers include finance and medical centers. The area's top employers are UC San Francisco, Genentech Inc., Wells Fargo Bank, and Oracle Corp. The largest employment sector by far is Professional and Business Services followed by Leisure and Hospitality Services and Education and Health Services.

As demand for workers has grown, labor and real estate have become increasingly unaffordable for businesses. There are shortages of labor and land in San Francisco. The area is in the top ten percent of metro areas in house price appreciation, and vacant office space is limited. As a result, a number of companies have either relocated or shifted hiring away from San Francisco. Excessive living costs also limit in-migration and push workers out of San Francisco.

According to the U.S. BLS, the current unemployment rate is 2.5 percent, down considerably from 6.6 percent at the beginning of the evaluation period. The unemployment rate in the AA is lower than the State of California overall at 4.5 percent for the same period.

San Jose-Sunnyvale-Santa Clara, CA MSA

According to the July 2018 Moody's Analytics report, the San Jose economy is at the forefront of the U.S. economic expansion. The strength of the economy is its technology industry, which is fueling high-wage job growth at a rate two times the national rate. The area's tech sector is anchored by some of the world's most valuable companies including Facebook, Apple, and Google.

The largest employment sectors are Professional and Business Services, Education and Health Services, and Manufacturing. The area is home to a number of tech-centered higher education institutions which provide a steady stream of highly skilled workers. Major employers include Apple Inc., Alphabet Inc., and Stanford University.

On the downside, the San Jose MSA suffers from high living and business costs. As tech firms grow and compete, the demand for labor and office space spur the job market and commercial real estate market. This has resulted in the biggest commercial construction boom since the dot-come bubble. In addition, San Jose has seen the second fastest rate of house price appreciation over the past two years.

According to the U.S. BLS, the current unemployment rate is 2.9 percent, down considerably from 8.0 percent at the beginning of the evaluation period. The unemployment rate in the AA is lower than the State of California overall at 4.5 percent for the same period.

San Rafael, CA MD

According to the July 2018 Moody's Analytics report, the San Rafael economy has slowed and job growth is on the lower end among metro areas in California. In addition, the labor force has declined pushing the jobless rate to the lowest level this century. The area economy is driven by high-tech and healthcare. Major employers include Kaiser Permanente, Marin General Hospital, and BioMarin Pharmaceutical. San Rafael's proximity to San Francisco allows it to benefit from spillover growth. A fifth of area residents commute to San Francisco to work bringing in much higher wages than they would earn in San Rafael.

The area experiences a very high cost of living with the median housing value at $1.14 million. As a result, a third of workers in San Rafael live elsewhere such as Oakland or Santa Rosa where housing is more affordable. Adding to the affordability issue, new home construction is at historical lows, and large-scale developments are unlikely due to local regulations.

According to the U.S. BLS, the unemployment rate is 2.5 percent, down from 6.3 percent at the beginning of the evaluation period. The unemployment rate in the AA is lower than the State of California overall at 4.5 percent for the same period.

Santa Cruz-Watsonville, CA MSA

According to the July 2018 Moody's Analytics report, the Santa Cruz economy is demonstrating strong upward trends and accelerated growth. Area payrolls and hourly earnings have grown faster than California and the U.S. overall. Employment growth is driven by state government and leisure/hospitality. Top employers are UC Santa Cruz, Seagate Technology, and Titan Corp. The largest employment sectors are Government, Education and Health Services, and Leisure and Hospitality Services.

Santa Cruz is a college town, home to UC Santa Cruz which is an important source of economic growth. First year student applications reached a record number for the fall 2018 semester and the university expects enrollment numbers to increase by more than 50 percent, or around ten thousand students, by 2040. Expansion and renovation projects on campus are expected to support construction payrolls. Other economic drivers include agriculture and tourism. On the agriculture front, farm incomes have declined steadily since their record high in 2014. Santa Cruz farmers, whose primary crop is strawberries, also face potential Chinese tariffs on imports of fresh fruits from the U.S.

House price appreciation is slowing, but strong demand for homes near Silicon Valley is keeping the pace above the state and U.S. averages. According to the U.S. BLS, the area unemployment rate is 5.2 percent, down from 11.8 percent at the beginning of the evaluation period. The unemployment rate in the AA is higher than the State of California overall at 4.5 percent for the same period.

Santa Rosa, CA MSA

According to the July 2018 Moody's Analytics report, Santa Rosa is reasserting itself as one of California's strongest mid-size economies. Job growth has been steady and in line with the strong California average. The economy is driven by agriculture and tourism. The area is home to world class wineries and craft breweries which are thriving as consumer demand has lifted sales. Top employers include Kaiser Permanente, Graton Resort & Casino, and St. Joseph Health System. The largest employment sectors are Education and Health Services, Government, and Leisure and Hospitality Services.

The area housing market is significantly constrained by supply but progress this year has been notable with permit issuances more than doubling. The recent Tubbs wildfire resulted in housing loss which only exacerbated the imbalance between supply and demand. The supply shortage has driven housing price increases at a double-digit rate. As housing affordability has declined, the area has experienced out migration of residents relocating to lower-cost areas.

According to the U.S. BLS, the area unemployment rate is 3.0 percent, down from 8.9 percent at the beginning of the evaluation period. The unemployment rate in the AA is lower than the State of California overall at 4.5 percent for the same period.

Stockton-Lodi, CA MSA

According to the March 2019 Moody's Analytics report, Stockton's payroll employment has fallen outright in the last three months because of losses in core transportation/warehousing and in manufacturing and business and professional services. The slump has lifted the unemployment rate from its low in late 2018 to just above 6 percent. More than one in seven workers are employed in transportation, wholesale trade, warehousing and storage. Near-term growth prospects for Stockton's food manufacturers are dim, but the sector will hold up better than average.

Apart from local government, which is benefiting from an influx of residents who are bolstering tax revenue, Stockton's housing sector is buoying the economy. Home prices have doubled since early 2012, and construction firms are hiring at above-average rates. Affordable real estate, especially compared with Oakland, have drawn in Bay Area commuters, resulting in above-average population growth.

Top employers include St. Joseph Medical Center, OG Packing Co., and San Joaquin General Hospital. According to the U.S. BLS, the area unemployment rate for the 4th quarter of 2018 is 6.0 percent, down from 12.3 percent at the beginning of the evaluation period. The unemployment rate in the AA is higher than the State of California overall at 4.1 percent for the same period.

Vallejo-Fairfield, CA MSA

According to the March 2019 Moody's Analytics report, Vallejo's employment growth in the outsize healthcare industry is no longer decelerating and exceeds the California and U.S. averages, but additions are still harder to come by than in previous years. Consumer industries are also struggling in the midst of recent hotel closures. Goods producers are not faring any better, with manufacturing and construction employment trending lower over the past few quarters. Hikes in federal defense spending enacted over the past two fiscal years will trickle down to Travis Air Force Base (AFB), breathing life into the expansion. Vallejo is more dependent on the military than the average western metro area, with Travis AFB employing 5 percent of the workforce and injecting $1.6 billion a year into the local economy.

House price appreciation is slowing, but strong demand for homes from Bay Area commuters is keeping the pace above the state and U.S. averages. San Francisco's rapidly rising living costs make Vallejo's real estate market look increasingly affordable. More commuters will encourage greater homebuilding in Vallejo, with single-family housing starts forecast to rise at an above-average rate over the coming year.

The largest employers in Vallejo include Travis AFB, Kaiser Permanente, and NorthBay Health Care. According to the U.S. BLS, the area unemployment rate for December 2018 is 4.0 percent, down from 9.1 percent at the beginning of the evaluation period. The unemployment rate in the AA is lower than the State of California overall at 4.1 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by two community contacts and a CRA Listening Session sponsored by several regulatory agencies pertaining to the San Jose CSA AA as part of this evaluation. The contacts represent a local government focused on affordable housing in the AA and a Community Loan Fund agency serving all of northern California including the AA. The CRA Listening Session was participated by a variety of community development organizations and local and regional governments to learn about economic conditions and challenges in the AA.

The local government contact indicated that community development needs and challenges vary across the AA. For instance, East San Jose is the most economically challenged. Even in "north" Counties, where residents are less wealthy than in southern part of the AA, housing is still very expensive. San Francisco has a huge homeless population. According to the Department of Homelessness and Supportive Housing, there are approximately 7,500 homeless people in San Francisco.

South Alameda County is riding the wave of Silicon Valley's challenges and success. However, North Alameda County has urban challenges such as affordability and crime. Throughout the AA, the sales of homes and commercial properties were from foreign investors paying with cash, which resulted in increasing real estate prices. This makes homeownership almost impossible for LMI individuals.

The contact indicated that there are opportunities for participation from banks in the AA. These opportunities include credit needs of small businesses for working capital, financial literacy education to underserved LMI focused on credit and money management, and affordable housing.

The Community Loan Fund represents all of northern California including the AA. The Business arm of the Community Loan Fund provides loans and assists nonprofits in managing their cash flow. The contact indicated that affordable housing development in California suffered a setback in 2012 as the state eliminated redevelopment agencies, which had been a primary source of funding. In addition, access to credit by start-ups and new businesses and health services are an unmet need in the community.

Participants in the CRA Listening Session indicate that many borrowers are still underwater, particularly borrowers in Vallejo, Daly City, and Hercules. It is harder for their clients to obtain modifications when needed, as the home affordable modification program has ended. One participant indicated that another wave of foreclosures will come because of the amount of speculation and the level of renter evictions. One participant indicated that the organization is seeing irresponsible mortgage products re-emerging and huge promotions for equity loans. Participants also indicated that commercial space is hard to find, which impacts small businesses in the AA.

The bank conducted research in the AA and identified community needs for affordable housing for LMI families, education programs for the unbanked and underbanked, homebuyer assistance to assist LMI individuals, homeless services, small business assistance, and workforce development and job readiness.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing, small business loans, and small business assistance represent a primary credit need for the San Jose CSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

Scope of Evaluation in California

The rating for the State of California is primarily based on FS evaluations of the bank's performance in the Los Angeles CSA, Sacramento CSA, San Diego MSA, and San Jose CSA AAs; however, performance in each AA was considered. Conclusions where a LS review affected the CRA Rating for the state are addressed within their respective tests. LS procedures were performed for the remaining 11 LS AAs. The State of California is the largest rated area and along with 12 other rated areas represents the bank's most significant markets in terms of lending, deposit, and branch distribution. California represents the largest portion of the bank's overall lending, investments, and services; therefore, the performance in California received the most weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN CALIFORNIA

LENDING TEST

The bank's performance under the Lending Test in California is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Los Angeles CSA, Sacramento CSA, San Diego MSA, and San Jose CSA AAs is excellent.

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State Loans	%State Deposits
Los Angeles CSA	514,840	412,124	1,890	632	929,486	43.8	36.4

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Los Angeles CSA AA

WFBNA ranked second in deposits with 15.5 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 9.1 percent market share. There is strong competition as reflected by the 941 lenders and 134 depository institutions in the AA. The second and third top lenders in this market were JPMorgan Chase Bank with 5.3 percent market share and Bank of America with 3.3 percent market share.

In small loans to businesses, WFBNA ranked fifth with 9.8 percent market share. The top lenders were American Express with 22.3 percent market share, followed by JPMorgan Chase Bank with 13.4 percent market share and Bank of America with 12.8 percent market share.

Sacramento CSA AA

WFBNA ranked first in deposits with 22.9 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 10.3 percent market share. There is strong competition as reflected by the 660 lenders and 40 depository institutions in the AA. The second and third top lenders in this market were Finance of America Family with 5.0 percent market share and Quicken Family with a 4.1 percent market share.

In small loans to businesses, WFBNA ranked fourth with 12.0 percent market share. The top lenders were American Express with 14.0 percent market share, followed by JPMorgan Chase Bank with 12.7 percent market share and Citibank with 12.4 percent market share.

San Diego MSA AA

WFBNA ranked first in deposits with 22.6 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 9.7 percent market share. There is strong competition as reflected by the 717 lenders and 53 depository institutions in the AA. The second and third top lenders in this market were JPMorgan Chase Bank with 5.8 percent market share and Caliber Home Loans with 3.6 percent market share.

In small loans to businesses, WFBNA ranked fourth with 11.0 percent market share. The top lenders were American Express with 18.7 percent market share, followed by JPMorgan Chase Bank with 14.5 percent market share and Citibank with 12.4 percent market share.

San Jose CSA AA

WFBNA ranked second in deposits with 20.6 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 12.4 percent market share. There is strong competition as reflected by the 773 lenders and 89 depository institutions in the AA. The second and third top lenders in this market were Chase family with 6.4 percent market share and Bank of America with 4.9 percent market share.

In small loans to businesses, WFBNA ranked fourth with 12.0 percent market share. The top lenders were American Express with 19.0 percent market share, followed by JPMorgan Chase Bank with 17.6 percent market share and Bank of America with 12.4 percent market share.

Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in its AAs.

Los Angeles CSA AA

Home Mortgage Loans

Refer to Table O in the State of California section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in low-income geographies is below both the aggregate distribution of loans and the proportion of OOUs in those geographies. However, less weight was given to WFBNA's performance in low-income geographies because of the very small proportion of the bank's loans and OOUs in low-income geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of California section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The bank's performance in 2012-2016 for small business loans in LMI geographies exceeds the aggregate distribution of loans in those geographies.
- The proportion of the bank's small business loans in low-income geographies is below proportion of businesses and in moderate-income geographies is near to the proportion of businesses located in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly less than the performance in 2012-2016.

<u>Sacramento CSA AA</u>

Home Mortgage Loans

Refer to Table O in the State of California section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- For the 2012-2016 period, the bank's home mortgage lending in LMI geographies substantially meets the aggregate distribution of loans in those geographies and is below the proportion of OOUs in those geographies.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is higher than the performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of California section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- For the 2012-2106 period, the bank's performance for small business loans in LMI geographies exceeds the aggregate distribution of loans in those geographies.
- The proportion of the bank's small business loans in low-income geographies exceeds and in moderate-income geographies is near to the proportion of businesses located in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly less than the performance in 2012-2016.

<u>San Diego MSA AA</u>

Home Mortgage Loans

Refer to Table O in the State of California section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- For the 2012-2016 period, the bank's home mortgage lending in LMI geographies is below to both the aggregate distribution of loans and the proportion of OOUs in those geographies.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is higher than the performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of California section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The bank's performance in 2012-2016 for small business loans in LMI geographies exceeds the aggregate distribution of loans in those geographies.
- The proportion of the bank's small business loans in low-income geographies exceeds and in moderate-income geographies is near to the proportion of businesses located in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly less than the performance in 2012-2016.

<u>San Jose CSA AA</u>

Home Mortgage Loans

Refer to Table O in the State of California section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- The bank's performance in both periods, 2012-2016 and 2017-2018, to home mortgage loans in low-income geographies is below the aggregate distribution of loans and near to the proportion of OOUs in those geographies. However, less weight was given to WFBNA's performance in low-income geographies because of the very small proportion of the bank's loans and OOUs in low-income geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of California section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The bank's performance in 2012-2016 for small business loans to LMI geographies exceeds the aggregate distribution of loans and near to the proportion of businesses located in those geographies.

- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly less than the performance in 2012-2016.

Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

Los Angeles CSA AA

Home Mortgage Loans

Refer to Table P in the State of California section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- There are significant homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 11.6 times the income of low-income and 7.3 times the income of moderate-income borrowers indicating that it is almost impossible for LMI borrowers to afford a home in the AA. Despite the affordability challenges, the bank's performance in both 2012-2016 and 2017-2018 periods to LMI borrowers exceeds the aggregate lending.
- The bank's lending to low-income borrowers is significantly below the proportion of families and lending to moderate-income borrowers is well below the proportion of families.

Small Loans to Businesses

Refer to Table R in the State of California section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is excellent.

- For 2012-2016, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is near to the percentage of small businesses located in the AA.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly lower than the performance in 2012-2016.

Sacramento CSA AA

Home Mortgage Loans

Refer to Table P in the State of California section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- There are significant homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is ten times the income of low-income and 6.2 times the income of moderate-income borrowers indicating that it is almost impossible for LMI borrowers to afford a home in the AA. Despite the affordability challenges, the bank's performance in both 2012-2016 and 2017-2018 periods to LMI borrowers exceeds the aggregate lending.
- The bank's lending to low-income borrowers is significantly below the proportion of families and lending to moderate-income borrowers is below the proportion of families.

Small Loans to Businesses

Refer to Table R in the State of California section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is excellent.

- For 2012-2016, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is near to the percentage of small businesses located in the AA.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly lower than the performance in 2012-2016.

- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly lower than the performance in 2012-2016.

Community Development Lending

The institution is a leader in making CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

Los Angeles CSA AA

The level of CD lending in the Los Angeles CSA AA is excellent. WFBNA made 632 CD loans in its

AA for a total of $3.3 billion, which represents 31.7 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified affordable housing and small business lending needs in the AA. The bank made 255 CD loans totaling $2.1 billion (62.5 percent) particularly responsive to the identified need for affordable housing. The bank also made 250 CD loans totaling $573.6 million for the purpose of economic development, which are responsive to the identified need for access to capital for small business and for small business assistance. Additionally, the bank made 123 CD loans totaling $272.3 million for the primary purpose of community services to assist LMI individuals and four CD loans totaling $407.4 million for neighborhood revitalization/stabilization.

Examples of CD loans in the AA include:

- In May 2017, WFBNA provided a $23.5 million LIHTC construction loan for a newly constructed LIHTC affordable housing development located in Los Angeles, California with 98.5 percent of the units restricted to families with incomes ranging from 30 to 60 percent of the area MFI. The developer provides affordable housing options throughout Southern California to fit the needs of low-income families, seniors and people with special needs. This activity is responsive to the identified need for affordable housing. WFBNA demonstrated multi-faceted support by providing both the construction loan and equity investment to support this affordable housing development enhancing the activities impact in the community. This activity is complex as it includes a $22 million direct purchase tax-exempt draw down bond issued by the Los Angeles Housing and Community Investment Department and $1.5 million taxable tail with interest, the tax-exempt bond is a non-bank qualified loan.
- In December 2013, WFBNA provided a $1.6 million loan to fund the expansion for a small business in conjunction with the SBA’s 504 CDC program, which is a long-term financing tool for economic development within a community. Based in Commerce, California, the small business is the real estate holding company that will purchase a 4-story building to replace one of the operating company’s retail furniture locations. The operating company is a retail furniture store offering affordable furniture with a majority of moderate-income families as customers.
- In March 2015, WFBNA provided a $257 million predevelopment loan for the construction of a commercial property. This development is located in a moderate-income census tract in the Hollywood submarket of Los Angeles, California. The development consists of a two-building, high quality office space and parking structure to be used as film studios. Because a large portion of Hollywood's local economy is dependent on the entertainment industry, this development will be an integral part of the evolution of Sunset Boulevard's commercial corridor. In an effort to stimulate business growth and increase employment opportunities, this project was included within the boundary of both the Los Angeles Enterprise Zone and Targeted Employment Area. According to the Los Angeles City Planning Department, the development will generate approximately 1,595 additional permanent jobs in this Historically Underutilized Business Zone. The building site is also located within the local redevelopment authority's project area.
- In March 2013, WFBNA renewed a $4 million working capital line of credit to nonprofit childcare and human services agency that has been at the forefront of helping thousands of families throughout the Los Angeles area break the cycle of poverty by providing its students and families with the tools to create a positive life foundation for academic and social success. Over 90 percent of clients served are considered to be LMI individuals as they earn less than $51,840 annually, which is 80 percent of the 2012 area MFI.

Sacramento CSA AA

The level of CD lending in the Sacramento CSA AA is excellent. WFBNA made 94 CD loans in its AA for a total of $362.5 million, which represents 24.5 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified affordable housing and small business lending needs in the AA. The bank made 51 CD loans totaling $330.1 million (91.2 percent) particularly responsive to the identified need for affordable housing. The bank also made 11 CD loans totaling $14.9 million for the purpose of economic development, which are responsive to the identified need for access to capital for small business and for small business assistance. Additionally, the bank made 32 CD loans totaling $17.5 million for the primary purpose of community services to assist LMI individuals.

Examples of CD loans in the AA include:

- In December 2014, WFBNA provided an $11.5 million loan as well as a $16.1 million investment for the construction of a 50-unit LIHTC development located in Rancho Cordova, California. The project was the first of a three-phase development for homeless veterans with 100 percent of the units restricted to homeless and disabled veterans earning between 20 and 30 percent of the area MFI. On-site supportive services will be provided to tenants free of charge by the Veterans Resource Center of America and will include case management, living skills classes, substance abuse programs and mental health services. This activity is responsive to the identified community credit need for affordable rental housing. WFBNA demonstrated multi-faceted support by providing both the construction loan and equity investment in support of this affordable housing development. This transaction is also complex due to multiple sources of funding including the City of Rancho Cordova and the State of California Department of Housing and Community Development.
- In August 2013, WFBNA provided a $6.7 million loan for a 104-unit LIHTC affordable housing development located in Roseville, California. The development requires that 100 percent of the units be restricted to tenants earning between 50 to 60 percent of the area MFI.
- In June 2015, WFBNA provided a $1.5 million working capital line of credit to a Federally Qualified Health Center (FQHC) that provides medical, social, clinical, and narcotic treatment and prevention services in the Sacramento area. According to its website in May 2013, FQHCs are community-based and patient-directed organizations that serve populations with limited access to health care. These include low-income populations, the uninsured, those with limited English proficiency, migrant and seasonal farm workers, individuals and families experiencing homelessness, and those living in public housing.
- In March 2016, WFBNA provided a $2.3 million SBA 504 bridge loan to this small business to purchase commercial real estate to expand their operations. This loan was made in conjunction with the SBA's 504 CDC program, which is a long-term financing tool for economic development within a community. The small business provides temporary registered nurses to acute care hospitals through the United States.

San Diego MSA AA

The level of CD lending in the San Diego MSA AA is excellent. WFBNA made 102 CD loans in its AA for a total of $460.4 million, which represents 20.3 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified affordable housing and small business lending needs in the AA. The bank made 46 CD loans totaling $383.7 million (83.3 percent) particularly responsive to the identified need for affordable housing. The bank also made 34 CD loans totaling $59.5 million for the purpose of economic development, which are responsive to the identified need for access to capital for small business and for small business assistance. Additionally, the bank made 22 CD loans totaling $17.1 million for the primary purpose of community services to assist LMI individuals.

Examples of CD loans in the AA include:

- In February 2016, WFBNA provided a $12.9 million construction loan for the development of a 60-unit LIHTC affordable housing complex located in San Diego, California. The development is restricted to tenants earning between 30 and 50 percent of the area MFI with 100 percent of the units restricted to special needs individuals age 55 years or older (homeless individuals, persons with chronic illnesses, or individuals with developmental or mental health disabilities). This activity is responsive to the identified community credit need for affordable housing. WFBNA also demonstrated multi-faceted support by providing both the construction loan and equity investment to support this affordable housing development.
- In January 2014, WFBNA provided a $5 million loan to fund the expansion of a small business in conjunction with the SBA's 504 CDC program, which is a long-term financing tool for economic development within a community. The small business makes soap and is based in Escondido, California.
- In January 2016, WFBNA provided a new $825,000 term loan for this multifamily housing development. This development is located in a moderate-income census tract in San Diego, CA and consists of three one-bedroom units, six two-bedroom units, and three three-bedroom units. Two units are rent restricted for Section 8. Of the remaining 10 market rent units, 100 percent have actual rent rates below the 2015 Fair Market Rent for the area, and 100 percent of the units are affordable to tenants earning between 43.8 and 74 percent of the 2015 area MFI of $73,000.
- In April 2017, WFBNA provided a $100,000 increase to an existing $500,000 line of credit for a total of $600,000 to a non-profit organization that provides treatment and education to those who abuse alcohol and other drugs and currently serves over 2,500 men, women, children, and youth each month throughout San Diego County. An estimated 90 percent of their clients are considered LMI as they earn less than 80 percent of the 2016 area MFI.

<u>San Jose CSA AA</u>

The level of CD lending in the San Jose CSA AA is excellent. WFBNA made 580 CD loans in its AA for a total of $3.3 billion, which represents 25.9 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified affordable housing and small business lending needs in the AA. The bank made 227 CD loans totaling $2.1 billion (63.9 percent) particularly responsive to the identified need for affordable housing. The bank also made 92 CD loans totaling $166.5 million for the purpose of economic development, which are responsive to the identified need for access to capital for small business and for small business assistance. Additionally, the bank made 250 CD loans totaling $197.5 million for the primary purpose of community services to LMI individuals and 11 CD loans totaling $830.8 million for neighborhood revitalization/stabilization.

Examples of CD loans in the AA include:

- In January 2015, WFBNA provided a $15 million construction loan for the development of an LIHTC affordable housing development located in San Francisco, California with 98 percent of the units restricted to tenants earning 50 percent or less of the area MFI. The development was further encumbered by a Section 8 HAP contract and HUD's Rental Assistance Demonstration (RAD) program. This activity is responsive to the identified community credit need for affordable rental housing. This organization has received multi-faceted support through loans and investments enhancing the activities impact in the community. This loan demonstrates several elements of complexity in that WFBNA is the junior participant ($15 million) in the Citibank construction loan totaling $41 million. This development, the first planned multiphase development in the City of San Francisco's HOPE SF public housing transformation program which was created to revitalize the City's most dilapidated public housing sites and transform them into mixed-income communities. The land was owned by the Housing Authority of the City and County of San Francisco and will be ground leased to the Partnership for $1 annually. The project is located in Bayview, a neighborhood in southeast San Francisco that has suffered from poverty and a lack of investment for decades. The subject has 26 units that will receive Section 8 and 54 units that will receive RAD subsidy via a project-based Section 8 contract and RAD Contract. The City and Housing authority (through its four loans) provided $28.6 million. The San Francisco Mayor's Office of Housing also provided a construction loan in the amount of $20.4 million.
- In October 2014, WFBNA provided a $19 million loan for a revitalized multifamily development. According to the City of Oakland's website, this 92-unit multifamily development is located within the City's West Oakland Specific Redevelopment plan. The purpose of the plan is to revitalize and rehabilitate vacant, underutilized, and blighted sites in an effort to attract industrial enterprises to provide jobs and services needed by the city of Oakland.
- In December 2017, WFBNA renewed a $350,000 line of credit for this non-profit organization that provides meal and nutrition program for seniors, low-income home energy assistance program, and weatherization program. Over 95 percent of its clients are LMI as they earn less than 80 percent of the area MFI.

Product Innovation and Flexibility

Los Angeles CSA AA

The institution makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. The bank launched the NeighborhoodLIFT program in the Los Angeles CSA AA in February 2019 and originated 137 mortgage loans totaling $45 million. Under the *your*FirstMortgage loan program the bank has funded 115 loans totaling $23.4 million to LMI homebuyers that qualified under this program.

Sacramento CSA AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 131 loans totaling $27.2 million to LMI homebuyers that qualified under this program.

San Diego MSA AA

The institution makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. The bank launched the NeighborhoodLIFT program in the San Diego MSA AA in March 2016 and more than 200 potential homebuyers attended the event. Of the 200 in attendance, WFBNA originated 110 mortgage loans totaling $26 million. Under the *your*FirstMortgage loan program the bank has funded 16 loans totaling $3.7 million to LMI homebuyers that qualified under this program.

San Jose CSA AA

The institution makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. The bank launched the NeighborhoodLIFT program in the San Jose CSA AA in November 2017 and more than 650 potential homebuyers attended the event. Of the 650 in attendance, WFBNA originated 161 mortgage loans totaling $52 million. Under the *your*FirstMortgage loan program the bank has funded 69 loans totaling $18.6 million to LMI homebuyers that qualified under this program.

Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding the programs noted above.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Lending Test in the Bakersfield MSA AA, Chico MSA AA, Fresno CSA AA, Modesto CSA AA, Salinas MSA AA, San Luis Obispo MSA AA, Santa Maria MSA AA, Visalia CSA AA, and CA Combined NonMetro AA is excellent and consistent with the bank's overall excellent performance under the Lending Test in the FS areas. The bank's performance under the Lending Test in the El Centro MSA AA and Redding CSA AA is good but weaker than the bank's overall excellent performance due primarily to lower CD lending activities. Performance in the two limited scope AAs did not affect the bank's overall rating for the state.

Refer to Tables O through T in the State of California section of appendix D for the facts and data that support these conclusions.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of California is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Los Angeles CSA, Sacramento CSA, San Diego MSA, and San Jose CSA AAs is excellent.

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

Los Angeles CSA AA

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 12.4 percent of tier 1 capital allocated to the AA.

The investments and grants reflect excellent responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 86.7 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 2,416 grants totaling $76 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved numerous complex projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In September 2018, WFBNA provided a $36 million LIHTC investment for an affordable housing development located in Los Angeles, California. This project will be the new construction of a 26-unit permanent supportive housing, transitional age youth, and rental development with 96 percent of the units restricted to transitional age youth households that are homeless or living in transitional housing at 30 percent or below the area MFI. All residents will be referred by the Youth Coordinates Entry System administered by the Los Angeles Homeless Services Authority. This investment is responsive to the need for affordable housing and homeless services.
- During the exam timeframe, WFBNA provided four grants totaling $1 million to several statewide CDC through the Small Business DCC Program benefiting small businesses in the small businesses within the Los Angeles CSA AA.
- During the exam timeframe, WFBNA provided 77 housing counseling grants totaling $918,000 to several local housing organizations serving the AA. These grants were provided through the bank’s HCGP to create affordable and sustainable homeownership opportunities for LMI individuals.
- During the exam timeframe, WFBNA provided 25 grants totaling $2.1 million to numerous housing organizations through the PMP for affordable housing in the Los Angeles CSA AA.
- Refer to the comments in the Community Development Initiatives section of this public evaluation for additional details regarding the three programs discussed above.

<u>Sacramento CSA AA</u>

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 12.6 percent of tier 1 capital allocated to the AA.

The investments and grants reflect excellent responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 94.6 percent of the bank’s CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 603 grants totaling $11.7 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved several complex projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In December 2014, WFBNA invested $16.1 million for the construction of a 50-unit LIHTC affordable housing development located in Rancho Cordova, California. The development requires 100 percent of the units be restricted to homeless and disabled veterans earning between 20 and 30 percent of the area MFI. On site supportive services will be provided to tenants free of charge by the Veterans Resource Center of America and will include case management, living skills classes, substance abuse programs and mental health services. According to its website, as of January 2015, the purpose of the organization is consistent with a valid Community Development purpose. This activity is responsive to the identified community credit need for affordable rental housing. WFBNA demonstrated multi-faceted support by providing both the construction loan ($11.5 million) and equity investment in support of this affordable housing development. This transaction is complex due to multiple sources of funding including the City of Rancho Cordova and the State of California Department of Housing and Community Development.
- In November 2016 WFBNA provided a $17.0 million LIHTC investment for a 56-unit LIHTC development located in Roseville, California. The development requires that 100 percent of the units restricted to tenants earning between 30 and 60 percent of the area MFI.

<u>San Diego MSA AA</u>

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 12.3 percent of tier 1 capital allocated to the AA.

The investments and grants reflect excellent responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 86.2 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 651 grants totaling $16.2 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved several complex projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In February 2016, WFBNA invested $12.4 million for the development of a 60-unit LIHTC housing complex located in San Diego, California. Units are restricted to tenants earning between 30 and 50 percent of the area MFI with 100 percent of the units restricted to special needs individuals age 55 years or older (homeless individuals, persons with chronic illnesses, or individuals with developmental or mental health disabilities). This investment is responsive to the need for affordable housing. WFBNA also demonstrated leadership and multi-faceted support by providing a $12.9 million construction loan and equity investment to support this affordable housing development. This investment is also complex involving multiple parties.

- In March 2016, WFBNA provided five grants totaling $450,000 to several housing organizations to administer the NeighborhoodLIFT Down Payment Assistance program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.
- During the exam timeframe, WFBNA provided 8 housing counseling grants totaling $203,000 to several local housing organizations serving the AA through the bank's HCGP which is designed to provide financial resources to local nonprofit housing organizations to create affordable and sustainable homeownership opportunities for LMI individuals.
- During the exam timeframe, WFBNA provided three grants totaling $800,000 to several statewide CDC through the Small Business DCC Program benefiting small businesses in the small businesses within the San Diego MSA AA.
- Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding the programs discussed above.

San Jose CSA AA

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 12.3 percent of tier 1 capital allocated to the AA.

The investments and grants reflect excellent responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 97 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 2,546 grants totaling $60.4 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved numerous complex projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In April 2013, WFBNA invested $21.4 million for the construction of a 92-unit LIHTC affordable housing development located in San Jose, California. The apartment serves the needs of seniors age 62 and older who earn at or below 50 percent of the area MFI. There are a total of 91 rent restricted units plus one manager's unit. Thirty-two of the units will be set aside for seniors who are both homeless and disabled and who earn 20 or less of the area MFI. The remaining 59 units are restricted to seniors earning 50 percent or less of the area MFI. The property will also have a 15-year Section 8 Housing Assistance Payment Contract with an automatic 15-year renewal that covers the 91 units. This investment is responsive to the need for affordable housing. This investment is also complex involving multiple parties.
- During the exam timeframe, WFBNA provided 33 housing counseling grants totaling $515,000 to several local housing organizations serving the AA through the bank's HCGP which is designed to provide financial resources to local nonprofit housing organizations to create affordable and sustainable homeownership opportunities for LMI individuals. Refer to the

comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.

- During the exam timeframe, WFBNA provided five grants totaling $1.6 million to several local small business organizations through the Small Business DCC Program benefiting small businesses in the small businesses within the San Jose CSA AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Investment Test in the Bakersfield MSA, Fresno CSA, Modesto CSA, Salinas MSA, San Luis Obispo MSA, Visalia CSA, and CA Combined NonMetro AAs is consistent the bank's overall excellent performance. The bank's performance in the Chico MSA, El Centro MSA, and Redding CSA AAs is weaker than the bank's overall performance due primarily to lower volume of CD investments. Performance differences in the LS AAs did not impact the overall Investment Test rating for the State of California.

SERVICE TEST

The bank's performance under the Service Test in California is rated High Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Sacramento CSA, and San Jose CSA AAs is excellent. Performance in the Los Angeles CSA and San Diego MSA AAs is good.

Retail Banking Services

Service delivery systems are accessible to geographies and individuals of different income levels in the institution's AAs, particularly LMI geographies and/or LMI individuals.

<u>Los Angeles CSA AA</u>

As of December 31, 2018, WFBNA operates 460 branches and 1,762 ATMs in the Los Angeles CSA AA. Of these branches, 448 are full-service locations and 12 are limited-service branches. There are 17 branches in low-income geographies and 98 branches moderate-income census tracts. The branch distribution in low-income census tracts is well below the percentage of the population in low-income geographies and the branch distribution in moderate-income geographies is near to the percentage of the population in moderate-income geographies in the AA. When considering an additional 48 branches within close proximity to LMI geographies, the bank's branch distribution is near to demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank opened three branches in low-income, seven branches in moderate-income, nine branches in middle-income, and 16 branches in upper-income geographies since the last evaluation. The bank closed one branch in low-income, five branches in middle-income, eight branches in middle-income, and 14 branches in upper-income geographies since the last evaluation. The closure of branches in LMI geographies did not negatively impact the distribution of branches relative to the population residing in those geographies and the closures were offset by the opening of additional branches in LMI geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. While there are slight variations in opening or closing times, branches are generally open Monday through Friday from 9:00 am to 6:00 pm. Of the total branches, including those in LMI geographies, 419 are also open on Saturdays and ten are open on Sundays. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Sacramento CSA AA

As of December 31, 2018, WFBNA operates 78 branches and 260 ATMs in the Sacramento CSA AA. Of these branches, 74 are full-service locations and four are limited-service branches. There are seven branches in the low-income geographies and 15 branches in moderate-income geographies. The branch distribution in low-income census tracts approximates the percentage of the population in low-income geographies and the branch distribution in moderate-income geographies is near to the percentage of the population in moderate-income geographies in the AA. When considering an additional 11 branches within close proximity to LMI geographies, the bank's branch distribution exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed one branch in a low-income geography and opened one branch in a moderate-income geography. The closure of the branch in a low-income geography did not negatively impact the distribution of branches relative to the population residing in those geographies and the closure is partly mitigated by the opening of a branch in a moderate-income geography.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. While there are slight variations in opening or closing times, generally, branches are open Monday through Friday from 9:00 am to 6:00 pm. Of the total branches, including branches in LMI geographies, 74 are also open on Saturdays and one is open on Sundays. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

San Diego MSA AA

As of December 31, 2018, WFBNA operates 98 branches and 358 ATMs in the San Diego MSA AA. Of these branches, 96 are full-service locations and two are limited-service branches. There are five branches in the low-income geographies and 14 branches in moderate-income geographies. The branch distribution in LMI geographies is below the percentage of the population in LMI geographies in the AA. When considering an additional 11 branches within close proximity to LMI geographies, the bank's branch distribution improves and approximates demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank opened one branch in a moderate-income geography and two branches in upper-income geographies. The bank closed two branches in moderate-income, two branches in middle-income, and two branches in upper-income geographies. The closure of branches in moderate-income geographies did not negatively impact the distribution of branches relative to the population residing in those geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. While there are slight variations in opening or closing times, generally, branches are open Monday through Friday from 9:00 am to 6:00 pm. Of the total branches, including branches in LMI geographies, 92 are also open on Saturdays. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

San Jose CSA AA

As of December 31, 2018, WFBNA operates 278 branches and 1,164 ATMs in the San Jose CSA AA. Of these branches, 269 are full-service locations and nine are limited-service branches. There are 22 branches in low-income geographies and 69 branches in moderate-income geographies. The branch distribution in low-income census tracts is near to the percentage of the population in low-income geographies. The branch distribution in moderate-income geographies exceeds the percentage of the population in moderate-income geographies in the AA. When considering an additional 24 branches within close proximity to LMI geographies, the bank's branch distribution further exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank opened one branch in low-income, four branches in moderate-income, two branches in middle-income, and seven branches in upper-income geographies. The bank closed three branches in low-income, two branches in moderate-income, five branches in middle-income, and five branches in upper-income geographies. The closure of branches in LMI geographies did not negatively impact the distribution of branches relative to the population residing in those geographies and the closure is partly mitigated by the opening of a branches in LMI geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. While there are slight variations in opening or closing times, generally, branches are open Monday through Friday from 9:00 am to 6:00 pm. Of the total branches, including branches in LMI geographies, 260 are also open on Saturdays and two are open on Sundays. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Community Development Services

The institution is a leader in providing CD services.

Los Angeles CSA AA

The level of CD services in the Los Angeles CSA AA is excellent. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 4,022 CD service activities to 716 organizations since the last evaluation, logging a total of 10,807 qualified hours within this AA. A majority (94 percent) of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing (3 percent) and economic development (3 percent). The bank's assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- One WFBNA team member provided eight hours of Board service and technical assistance to an organization dedicated to expanding economic opportunity in underserved communities through financial education and career services. Forty-seven WFBNA team members provided 258 hours of financial education to clients of the organization. According to the organization, all of its clients are LMI individuals.

The organization also provides a range of supportive services and enrichment programs designed to meet the needs its residents.
- Fourteen WFBNA team members provided 41 hours of board activity and financial education to a nonprofit organization that is an affiliate of a global organization that utilizes community-led solutions to identify and resolve community concerns with a primary focus on education,

financial stability, and health. According to the organization, as of December 2012, the majority of its clients are LMI individuals as they earn less than 80 percent of the area MFI.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Service Test in the Bakersfield MSA, Chico MSA and Fresno CSA AAs is consistent with the bank's overall performance under the Service Test in the FS areas. The performance in the El Centro MSA, Modesto CSA, Redding CSA, Salinas MSA, San Luis Obispo MSA, Santa Maria MSA, Visalia CSA, and CA Combined NonMetro AAs is stronger than the bank's overall performance due primarily to a higher percentage of branch distribution in LMI geographies. Performance differences in the LS AAs did not impact the overall Service Test rating for the State of California.

State Rating

State of Colorado

CRA rating for the State of (Colorado)[22]: Outstanding
The Lending Test is rated: Outstanding
The Investment Test is rated: Outstanding
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Good lending activity;
- Good geographic distribution of loans;
- Excellent borrower distribution of loans;
- WFBNA is a leader in providing CD loans, which has a significant positive impact on the Lending Test;
- WFBNA's use of flexible products has a positive impact on the Lending Test;
- Excellent level of CD investments that are responsive to AA needs;
- Retail delivery systems are readily accessible to all portions of the AA; and
- Good CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in Colorado

WFBNA delineated six AAs within Colorado including the Colorado Springs, CO MSA (Colorado Springs MSA AA); Denver-Aurora, CO CSA (Denver CSA AA); Fort Collins, CO MSA (Fort Collins MSA AA); Grand Junction, CO MSA (Grand Junction MSA AA); Pueblo-Canon City, CO CSA (Pueblo CSA AA); and CO Combined non-metropolitans (CO Combined NonMetro AA). The Colorado Springs MSA and Denver CSA AAs received FS reviews. These two areas accounted for the largest portion of the lending (79 percent) and deposits (84.5 percent) amongst the AAs in Utah. Refer to Appendix A for a complete description of each AA. Colorado represents the 8th largest rated area by deposits. WFBNA has $31 billion of deposits representing 2.5 percent of adjusted deposits. WFBNA operates 154 branches and 353 ATMs within Colorado, representing 2.7 percent of the bank's branches and 2.6 percent of the bank's ATMs. The bank originated and purchased approximately $67 billion in loans or 3.6 percent of total reported loan originations and purchases during the evaluation period. The bank's primary loan products in Colorado are home mortgage and small loans to businesses.

Colorado Springs MSA AA

Within the Colorado Springs MSA AA, the bank had $2 billion in deposits and ranked first amongst 38 financial institutions in the market with 24.9 percent market share. JPMorgan Chase Bank and US Bank ranked second and third with a market share of 12.9 percent and 11.5 percent, respectively. WFBNA operates 17 branch offices and 33 ATMs in the AA.

[22] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

Denver CSA AA

Within the Denver CSA AA, the bank had $ 24.5 billion in deposits and ranked first amongst 79 financial institutions in the market with 24.9 percent market share. US Bank and FirstBank ranked second and third with a market share of 13.9 percent and 13.2 percent, respectively. WFBNA operates 98 branch offices and 246 ATMs in the AA.

Demographic Data

Colorado Springs MSA AA

The following table provides a summary of the demographics that includes housing and business information for the Colorado Springs MSA AA. Table A indicates that the volume of OOUs is very small in low-income CTs and over 38 percent of families in the AA are LMI. The area's median housing value in the Colorado Springs MSA AA is 3.2 times the area's median income, but 4 times moderate-, and 6.6 times low-income, indicating a limited proportion of OOUs are affordable to LMI. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

Assessment Area: FS Colorado Springs CO MSA (2016)

Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #

Economic Data

According to the July 2018 Moody's Analytics report, Colorado Springs' economy is improving. Job growth has picked up since the beginning of the year, blowing past the Colorado average and more than doubling the national pace. Although professional services, construction and logistics are leading gains, nearly every major industry has added jobs over the past year. Recent job gains have been heavily concentrated in high-wage industries, and the average hourly wage is rising at its fastest pace in more than two years. The unemployment rate has edged lower since the start of 2018, even as the labor force has notched some of the fastest growth in the country. The area's defense industry already the backbone of the economy will expand further as the many bases increase troop levels. Prospects are further tilted to the upside because of a likely increase in Department of Defense investment in space operations.

The strong labor market and rapidly expanding population are keeping the housing market hot. Single-family price growth tops the Colorado average, and permits over the past three months have reached pre-recession levels. The outlook for the housing market looks favorably as relatively high housing affordability will attract workers priced out of Denver, increasing Colorado Spring's labor force and maintaining a healthy degree of slack in the labor market. Although house prices have been rising rapidly, the metro area remains one of the most affordable in the state. Ample land and a rapidly growing construction workforce have kept single-family construction climbing, and the multifamily market has also gained ground thanks to area's expanding millennial contingent. Lower housing costs will be a critical factor in retaining recent graduates of the University of Colorado-Colorado Springs and veterans transitioning out of the military.

The largest employers in the Colorado Springs MSA include Fort Carson, Peterson Air Force Base, and Schriever Air Force Base. According to the US BLS, the unemployment rate for the 2nd quarter of 2018 was 3.2 percent and has decreased significantly from 8.8 percent at the beginning of the evaluation period. The unemployment rate in the AA was similar to the overall state at 3.3 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by two community contacts that serve the bank's Colorado Springs MSA AA. One of the two community contacts represents an economic development corporation and the other represents a local community development agency.

The contacts stated that Colorado Springs' economy is flourishing and there has been solid improvement since the financial crisis. Unemployment rates are declining and average wages are slowly increasing; however, the AA has not rebounded as quickly as Denver or the national average. Since home prices in the AA are lower than Denver, an increasing percentage of people are moving to Colorado Springs from Denver increasing housing demand and thus raising prices. This has had an impact on making homeownership less affordable for LMI households. Tourism and government were the primary economic drivers for Colorado Springs. Government military bases in particular helped keep the economy more stable than if there was no presence. The area includes Fort Carson Army Base, Peterson and Schriever air force bases respectively, the Air Force Academy and Cheyenne Mountain.

The economic development agency contacted stated that significant opportunities are available for financial institutions to partner with community organizations in the AA. These include financing for affordable housing projects and funding for start-up businesses. The contact stated the banking climate in Colorado Springs and El Paso County is adequate; commenting that bankers in the AA are open to serving on boards. However, the contact also stated it would be helpful if more banks offered home loan programs that are designed to finance LMI persons and the AA would always like to have more grants and sponsorship dollars made available to non-profits that serve LMI communities in the AA.

The community contact also stated that 35 banks in El Paso County participate in some form of down payment assistance program for homebuyers. The contact commented that community banks can do more to assist in the financing of affordable housing projects.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing represents a primary credit need for the Colorado Springs MSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs coupled with limited home affordability for LMI individuals. The AA also has needs for small business loans.

Demographic Data

Denver CSA AA
