The following table provides a summary of the demographics that includes housing and business information for the Denver CSA AA. Table A indicates that the volume of OOUs is small in low-income CTs and over 38 percent of families in the AA are LMI. The area's median housing value in the Denver CSA AA is 3.1 times the area's median income, but 3.9 times moderate-, and 6.2 times low-income, indicating a limited proportion of OOUs are affordable to LMI. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

Assessment Area: FS Denver-Aurora CO CSA (2016)

Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #

Economic Data

Denver-Aurora-Lakewood, CO MSA

According to the August 2018 Moody's Analytics report, the Denver economy is strengthening. Job growth has risen above the top performing Mountain Census division average, and Denver's diverse economy is firing on all fronts. Top performers range from logistics to business/professional services and leisure/hospitality. Drag from the public sector has abated, and a rebound in the energy industry is providing added fuel. An extremely tight labor market makes rapid job growth especially notable. Firms are snapping up workers by hiking pay. Denver's average hourly earnings, second highest in the Mountain states, are rising rapidly. Major corporate relocations and expansions will supplement hometown startups to fuel growth across a wide range of industries.

The outlook for the housing market looks favorable as Denver's booming economy has driven up house prices and rents significantly faster than incomes, but the worst of the affordability crisis has passed. According to the FHFA House Price Index, prices in Denver have climbed 65 percent over the past five years, and affordability is at a multi-decade low. Rising prices spurred a rush of new single- and multi-family construction, and with those units now hitting the market, rents have stabilized and single-family inventory has risen to a three-year high, according to the Denver Metro Association of Realtors. As house values plateau and the tight labor market pushes faster wage growth, affordability will stabilize late this year and edge modestly higher in 2019.

The largest employers in the Denver MSA include HealthOne, University of Colorado Hospital, and Lockheed Martin. According to the BLS, the unemployment rate for the 3rd quarter of 2018 was 2.6 percent and has decreased significantly from 7.7 percent at the beginning of the evaluation period. The unemployment rate in the AA was lower than the overall state at 3.3 percent for the same period.

<u>Boulder, CO MSA</u>

According to the March 2019 Moody's Analytics report, Boulder has side stepped the slowdown in job growth afflicting much of Colorado and is adding jobs faster than the overall state. The rapid pace of net hiring is especially notable given Boulder's relatively mature business cycle and tight labor market. The outsize professional services industry is the largest driver behind recent gains, while construction and leisure/hospitality are also pitching in. Boulder's economy will reap rewards as the metro area remains a leader in tech. High tech is on a tear, as job growth in 2018 was faster than at any point during the current business cycle.

Rapid house price gains over the past four years have left Boulder's housing market severely overvalued, and prices will suffer a modest correction over the next three years. Median house price growth is gradually slowing but dollar gains over the past year were still among the highest in the country. Single family housing affordability ranks among the bottom 5 percent of metro areas nationally and is at a three-decade low.

The largest employers in the Boulder MSA include University of Colorado, GlobalFoundries, and Level 3 Communication LLC. According to the BLS, the unemployment rate for the 4th quarter of 2018 was 2.4 percent and has decreased significantly from 5.5 percent at the beginning of the evaluation period. The unemployment rate was lower than the overall state at 3.3 percent for the same period.

<u>Greeley, CO MSA</u>

According to the March 2019 Moody's Analytics report, Greely's oil rich economy continues to be strong. Although job growth has decelerated over the past year with slower gains in mining and construction, Greeley's economy is still adding jobs at near the fastest pace in the state. The recent rebound in energy prices will fuel further development of Greeley's shale oil fields but increased production will yield new energy jobs as companies have learned to operate more leanly.

Average hourly wage has shot up more than 10 percent over the past year to match the state's average. Residents have funneled wage gains into the housing market, where single family house price appreciation has remained above 10 percent even as builders obtained more housing permits.

The largest employers in the Greeley MSA include JBS, Banner Health System, and Vestas. According to the BLS, the unemployment rate for the 4th quarter of 2018 was 2.7 percent and has decreased significantly from 6.6 percent at the beginning of the evaluation period. The unemployment rate was lower than the overall state at 3.3 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by two community contacts that serve the bank's Denver CSA AA. The contacts were with representatives from an economic development corporation and a housing assistance corporation.

The economic development corporation seeks to connect businesses both large and small with the resources needed to launch a business in the area. The organization fosters relationships and facilitates connection between entrepreneurs and businesses and sources of financing. The organization's primary goal is to significant increase primary employment in the area. The contact stated that the median home price has been rising as have rental rates. Given the number of retail/service jobs in the areas, there is a general need for affordable housing construction. An aging population has also increased the demand for affordable housing. The contact also stated that there is a high level of opportunity for bank involvement in terms of financing small businesses. Given the cost of living, construction challenges in the area, and competition from larger financial institutions, there is less opportunity for home mortgage lending and lending to LMI borrowers.

The housing assistance organization is a non-profit organization with a mission to make housing and successful homeownership affordable to LMI Colorado residents. The organization offers down payment assistance, financial counseling services, and home buyer education programs to qualified borrowers throughout the Denver area. The contact stated that the Denver metro economy continues to improve. Although economic growth is favorable, home prices outpace income for LMI population making it more difficult for LMI families to afford housing. The contact further commented that the primary difficulty related to financial institutions is communication. More financial service education is needed. There are opportunities for financial institutions to support the community and work with this organization directly. Also, there are opportunities to work with LMI families including apartment development that will provide rental housing for LMI families.

The bank conducted research in the AA and identified community needs for affordable housing for LMI families, homeless services, small business assistance, transit oriented development, and workforce development and job readiness.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing represents a primary credit need for the Denver CSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals. The AA also has needs for small business loans.

Scope of Evaluation in Colorado

The rating for the State of Colorado is primarily based on FS evaluations of the bank's performance in the Colorado Springs MSA AA and Denver CSA AA; however, performance in each AA was considered. Conclusions where LS reviews affected the CRA Rating for the state are addressed within their respective tests. LS procedures were performed for the remaining four AAs. The State of Colorado is the 8th largest rated areas and along with 12 other rated areas represents the bank's most significant markets in terms of lending, deposit, and branch distribution. A modest portion of the bank's overall lending, investments, and services were conducted in Colorado; therefore, the performance in Colorado contributed to the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN COLORADO

LENDING TEST

The bank's performance under the Lending Test in Colorado is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Colorado Spring MSA and Denver CSA AAs is excellent.

Lending Activity

Based on the tables below, lending levels reflect good responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and community development relative to its capacity based on deposits, competition, and market presence.

Number of Loans*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State Loans	%State Deposits
Colorado Springs MSA	32,631	11,005	88	13	43,737	12.2	6.6
Denver CSA	150,452	87,384	856	135	238,827	66.7	77.9
Fort Collins MSA	13,359	8,104	182	5	21,650	6.1	3.8
Grand Junction MSA	7,405	4,202	152	6	11,765	3.3	2.7
Pueblo CSA	5,101	2,272	79	2	7,454	2.1	1.5

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

<u>Colorado Springs MSA AA</u>

WFBNA ranked first in deposits with 24.9 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 6.8 percent market share. There is strong competition as reflected by the 554 lenders and 38 depository institutions in the AA. The 2nd and 3rd top lenders in this market were ENT Credit Union with 6.4 percent market share and PennyMac Loan Services with 4.1 percent market share.

In small loans to businesses, WFBNA ranked fifth with a market share of 9.4 percent. There is strong competition as reflected by the 133 lenders in the AA. The top three lenders were US Bank with 21.5 percent market share, American Express with 12.4 percent market share, and Chase Bank with 11.4 percent market share.

<u>Denver CSA AA</u>

WFBNA ranked first in deposits with a 24.9 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 7.6 percent market share. There is strong competition as reflected by the 856 lenders and 79 depository institutions in the AA. The 2nd and 3rd top lenders in this market were Chase Bank with 5.7 percent market share and American Financial Corp with 4.0 percent market share.

In small loans to businesses, WFBNA ranked third with a market share of 11.5 percent. There is strong competition as reflected by the 199 lenders in the AA. The top two lenders were Chase Bank with 17.7 percent market share and American Express with 14.8 percent market share.

Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in both FS AAs.

Colorado Springs MSA AA

Home Mortgage Loans

Refer to Table O in the State of Colorado section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in LMI geographies substantially meets the aggregate distribution of loans in those geographies.
- The proportion of loans in LMI geographies is below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of Colorado section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for small business loans in LMI geographies exceeds both the aggregate performance and the proportion of businesses located in those geographies.

Denver CSA AA

Home Mortgage Loans

Refer to Table O in the State of Colorado section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in LMI geographies substantially meets the aggregate distribution of loans in those geographies.
- The proportion of loans in LMI geographies is below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of Colorado section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for small business loans in LMI geographies substantially meets the aggregate performance in those geographies.
- The banks performance for small business loans in LMI geographies exceeds the proportion of businesses located in those geographies.

Distribution of Loans by Income Level of the Borrower

The bank exhibits an excellent distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

Colorado Springs MSA AA

Home Mortgage Loans

Refer to Table P in the State of Colorado section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 6.6 times the income of low-income and 4.1 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI. Despite the affordability challenges, the bank's performance in 2012-2016 to low-income borrowers exceeds the aggregate lending and well below the proportion of families.
- The bank's lending to moderate-income borrowers substantially meets the aggregate distribution of loans and is near to the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Colorado section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Denver CSA AA

Home Mortgage Loans

Refer to Table P in the State of Colorado section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 6.2 times the income of low-income and 3.9 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI. Despite the affordability challenges, the bank's performance in 2012-2016 to LMI borrowers exceeds the aggregate lending.

- The bank's lending to low-income borrowers is well below the proportion of families and lending to moderate-income borrowers exceeds the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Colorado section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Community Development Lending

The institution is a leader in making CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

Colorado Springs MSA AA

The level of CD lending in the Colorado Springs MSA AA is excellent. WFBNA made 13 CD loans for a total of $44.5 million which represents 19.0 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified needs in the AA particularly affordable housing. The bank made 7 CD loans totaling $40.4 (90.8 percent) for the purpose of affordable housing. Additionally, the bank extended 4 CD loans totaling $1.7 million for the primary purpose of providing community services to LMI individuals and two CD loans totaling $2.5 million for the primary purpose of economic development.

Examples of CD loans in the AA include:

- In September 2013, WFBNA provided a $19.5 million loan for a 216-unit LIHTC affordable housing development located in Colorado Springs, Colorado. The project specifies that 214 of its 216 units must be restricted to tenants earning no more than 60 percent of the area MFI.
- In December 2016, WFBNA provided an $8.2 million loan for this multifamily housing development located in a low-income census tract in Colorado Springs, CO. The development consisted of 4 one-bedroom units and 146 two-bedroom units with 98 percent of the actual rent rates below the 2016 Fair Market Rent and affordable to tenants earning between 31 percent and 46 percent of the 2016 area MFI of $71,600.

Denver CSA AA

The level of CD lending in the Denver CSA AA is excellent. WFBNA made 135 CD loans for a total of $700 million which represents 25.5 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified needs in the AA particularly affordable housing and small businesses. The bank made 76 CD loans totaling $600 million (85.7 percent) for the purpose of affordable housing which is a critical need in the AA. Additionally, the bank extended 30 CD loans totaling $25 million for the primary purpose of providing community services to LMI individuals, 25 CD loans totaling $40.7 million for the primary purpose of economic development, and 4 CD loans totaling $34 million to revitalize and stabilize distressed areas within the AA.

Examples of CD loans in the AA include:

- In January 2013, WFBNA provided a $15.7 million term loan for the acquisition of a 300-unit affordable housing development located in a low-income census tract in Federal Heights, Colorado. The project consisted of 38 studio units, 158 one-bedroom units, and 104 two-bedroom units. The project requires that 79 percent of the units (239-units) must have actual rental rates that are below 2013 Fair Market Rent and are affordable to tenants earning between 30 and 51 percent of the 2012 area MFI of $79,300.
- In August 2014, WFBNA provided a $9.8 million construction loan for a development located in a low-income tract in Denver, Colorado. The project included all of the units restricted to tenants earning between 30 and 60 percent of the area MFI. This development consists of 48 one-bedroom units, 36 two-bedroom units and 11 three-bedroom units. All 95 units are designed for families.

Product Innovation and Flexibility

Colorado Springs MSA AA

The institution makes limited use of innovative or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 27 loans totaling $4.7 million to LMI homebuyers that qualified under this program.

Denver-Aurora AA

The institution makes extensive use of innovative or flexible lending practices in order to serve AA credit needs. The bank launched the NeighborhoodLIFT program in the Denver CSA AA in April 2014 and more than 600 potential homebuyers attended the event and more than 250 homebuyers utilized the down payment assistance ($15,000) to purchase a home. Of the 250, WFBNA originated 95 home mortgage loans totaling $14.6 million. Under the *your*FirstMortgage loan program the bank has funded 136 loans totaling $31.4 million to LMI homebuyers that qualified under this program.

Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding the programs noted above.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Lending Test in the Fort Collins MSA, Grand Junction MSA, Pueblo CSA, and CO Combined NonMetro AAs is consistent with the bank's overall excellent performance under the Lending Test in the FS areas.

Refer to Tables O through T in the State of Colorado section of appendix D for the facts and data that support these conclusions.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of Colorado is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Colorado Springs MSA AA is poor and performance in the Denver CSA AA is excellent.

Qualified Investments										
	Prior Period*		Current Period		Total				Unfunded Commitments **	
Assessment Area	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Colorado Springs MSA	1	$223	115	$5,800	116	7.3	$6,023	1.2		
Denver CSA	75	$39,317	1,030	$341,520	1,105	69.9	$380,837	73.7

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

<u>Colorado Springs MSA AA</u>

The institution has a poor level of qualified CD investments and grants, but not in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 2.6 percent of tier 1 capital allocated to the AA.

The investments and grants reflect poor responsiveness to the needs identified in the AA including affordable housing, community services, and revitalization/stabilization for LMI individuals and geographies. Over 91.3 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 113 grants totaling $691,983 to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution occasionally uses innovative and/or complex investments to support CD initiatives. CD Investments involved two complex projects where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers.

Example of CD investment in the AA include:

- In October 2015, WFBNA invested $40 million in a LIHTC fund. Of this total investment, $4.7 million was allocated to an affordable housing development located in Woodland Park, Colorado. The development specifies that 24 units restricted to tenants earning no more than 60 percent of the area MFI. This investment is responsive to the need for affordable housing and is also complex involving multiple parties.

Denver CSA AA

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 13.9 percent of tier 1 capital allocated to the AA.

The investments and grants reflect excellent responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 86.3 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 972 grants totaling $31.9 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved numerous complex LIHTC and NTMC projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In July 2016, WFBNA provided a $14.5 million LIHTC investment for the construction of an affordable housing development located in Denver, Colorado, with 99 percent of the units restricted to tenants earning between 30 and 60 percent of the area MFI. Additionally, this development meets the Priority 4 development goals of the Mayor's housing plan to increase critical needs and homeless housing and supports the goal of the City's ten-year plan to end homelessness. This activity is responsive to the identified need for affordable housing as well as the identified need for addressing homelessness. WFBNA also demonstrated multi-faceted support by providing both the construction loan ($3.4 million) and equity investment to support this affordable housing development. This activity is highly complex because it involves multiple funding sources (including US Bank), first and second mortgages, and local government agencies.

- In November 2017, WFBNA provided a $12 million NMTC for the construction of a mixed-use project located in Denver, Colorado that includes affordable housing, a non-profit healthcare center, garden, and community center. The development provides 176 units of affordable senior housing with a ground floor health clinic and a senior activity center. The clinic will be located in a medically underserved community and will create approximately 37 new full-time jobs. The Health Care Clinic will help fill the vacancy left by the hospital (St. Anthony's) when it moved out of the community to a suburban location. The surrounding community has a high population of Medicare and Medicaid patients who will be able to access primary healthcare at the clinic and have access to a larger medical network for specialized services. This activity is responsive to the identified need for affordable housing. This activity is highly complex involving multiple parties including the Denver Housing Authority and the Denver Office of Economic Development.
- During the exam timeframe, WFBNA provided seven grants totaling $757,500 to four housing organizations through the PMP for affordable housing in the Denver CSA AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Investment Test in the Fort Collins MSA, Grand Junction MSA, and Pueblo CSA AAs is consistent with the bank's overall excellent performance. The bank's performance in the CO Combined NonMetro AA is weaker than the bank's overall performance due primarily to a lower volume of CD investments. Performance differences in the LS AA did not impact the overall Investment Test rating for the State of Colorado.

SERVICE TEST

The bank's performance under the Service Test in Colorado is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Colorado Springs MSA and Denver CSA AAs is excellent.

Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the institution's AAs, particularly LMI geographies and/or LMI individuals.

Distribution of Branch Delivery System

Colorado Springs MSA AA

As of December 31, 2018, WFBNA operates 17 branches and 33 ATMs in the Colorado Springs MSA AA. Of these branches, 16 are full-service locations and one is a limited-service branch. There are three branches in low-income geographies and two branches in moderate-income geographies. The branch distribution in low-income geographies exceeds the percentage of population in low-income CTs and branch distribution in moderate-income geographies is below the percentage of the population in moderate-income CTs in the AA. When considering an additional three branches within close proximity to LMI geographies, the bank's branch distribution exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed one branch in a middle-income CT since the last evaluation.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Thursday from 9:00 am to 5:30 pm and Friday from 9:00 am to 5:30 or 6:00 pm. Of the total branches, 11 are also open on Saturday from 9:00 am to 1:00 pm, with three branches open until 2:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Denver CSA AA

As of December 31, 2018, WFBNA operates 98 branches and 246 ATMs in the Denver CSA AA. Of these branches, 93 are full-service locations and five are limited-service branches. There are six branches in low-income geographies and 26 branches in moderate-income geographies. The branch distribution in low-income geographies is near to the percentage of the population in low-income CTs and branch distribution in moderate-income geographies exceeds the percentage of the population in moderate-income geographies in the AA. When considering an additional 11 branches within close proximity to LMI geographies, the bank's distribution significantly exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank opened three branches and closed seven branches since the last evaluation. This resulted in a net loss of one branch in low-income CTs and two branches in moderate-income CTs. The closure of branches in moderate-income geographies was to consolidate with other branches nearby and did not negatively impact the distribution of branches relative to the population residing in those geographies. The bank still maintains 32 active branches or 32.6 percent within LMI geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Although hours vary by branch, generally, branches are open Monday through Friday between 6:00 am to 6:00 pm, with five branches open until 7:00 pm. Of the total branches, 61 are also open on Saturday from 9:00 am to 1:00 pm, with six branches open from 9:00 am to 2:00 pm and four branches open from 10:00 am 2:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Community Development Services

The institution provides a relatively high level of CD services.

Colorado Springs MSA AA

The level of CD services in the Colorado MSA AA is good. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 123 CD service activities to 29 organizations since the last evaluation, logging a total of 383.5 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing. The bank's assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- WFBNA team members provided 157.5 hours of financial education and outreach to a local community organization that utilizes community-led solutions to identify and resolve community concerns with a primary focus on education, financial stability, and health. A majority of the clients are LMI.

- A WFBNA team member provided 16 hours of Board service to a community organization that provides affordable and stable housing to communities within Colorado Springs.

Denver CSA AA

The level of CD services in the Denver CSA AA is good. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 452 CD service activities to 91 organizations since the last evaluation, logging a total of 1,730 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing and economic development. The bank's assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- A WFBNA team member provided 41 hours of Board service to a community housing authority that currently builds, owns, and manages 33 percent of the total inventory of affordable housing in Boulder, making a strong contribution to City Council's goal that 10 percent of all housing is permanently affordable.
- WFBNA team members provided 28 hours of Board service and outreach to a local community organization that oversees the construction of over "Self-Help" homes for households of LMI, farm worker housing and units of affordable multifamily housing across the state.

Conclusion for Areas AA Receiving LS Reviews

Based on LS reviews, the bank's performance under the Service Test in the Grand Junction MSA and CO Combined NonMetro AAs is consistent with the bank's overall excellent performance under the Service Test in the FS areas. The performance in the Fort Collins MSA and Pueblo CSA AAs is weaker than the bank's overall performance due primarily to a lower percentage of branch distribution in LMI geographies. Performance differences in the LS AAs did not impact the overall Service Test rating for the State of Colorado.

State Rating

State of Connecticut

CRA rating for the State of (Connecticut)[23]: Outstanding
The Lending Test is rated: Outstanding
The Investment Test is rated: Outstanding
The Service Test is rated: High Satisfactory

The major factors that support this rating include:

- Excellent lending activity;
- Excellent geographic distribution of loans;
- Excellent borrower distribution of loans;
- Good level of CD loans, which has a positive impact on the Lending Test;
- WFBNA's use of flexible products has a neutral impact on the Lending Test;
- Excellent level of CD investments that are responsive to AA needs;
- Retail delivery systems are readily accessible to all portions of the AA; and
- Adequate CD services.

Description of Institution's Operations in Connecticut

WFBNA delineated one AA within Connecticut which includes the Hartford-West Hartford-East Hartford, CT MSA (Hartford MSA AA). Refer to Appendix A for a complete description of the AA. The Hartford MSA AA received a FS review. Connecticut represents the 45th largest rated area by deposits. WFBNA has $721 million of deposits representing 0.1 percent of adjusted deposits in Connecticut. WFBNA ranked eleventh amongst 29 financial institutions in the market with 1.6 percent deposit market share. The top three financial institutions in terms of deposit market share include Bank of America with 43.8 percent, Webster Bank with 9.7 percent, and United Bank with 8.0 percent. WFBNA operates 7 branches and 9 ATMs within Connecticut representing 0.1 percent of the bank's branches and 0.2 percent of the bank's ATMs. The bank originated and purchased approximately $5.3 billion in loans or 0.3 percent of total reported loan originations and purchases during the evaluation period. The bank's primary loan products in Connecticut are home mortgage and small loans to businesses.

Demographic Data

The following table provides a summary of the demographics that includes housing and business information for the Hartford MSA AA. Table A indicates that the volume of OOUs in the low-income CTs is very small and over 38 percent of families in the AA are LMI. The area's median housing value in the Hartford MSA AA is 3.1 times the area's median income, but 3.9 times moderate-, and 6.3 times low-income, indicating a limited proportion of OOUs are affordable to LMI families. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

[23] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

Economic Data

According to the May 2018 Moody's Analytics report, Hartford's economy is in the recovery business cycle status with a well-educated workforce, above-average wages and lower living and business costs than in Boston and New York. However, the area has high exposure to state government, weak but improving demographics, sharp slowing in net out-migration and high energy costs relative to rest of nation.

Hartford has retaken the top spot in Connecticut. After languishing in 2016 and much of last year, payroll employment sprang to life late in 2017 and early in 2018 is nearing its prerecession peak. Year-ago job growth is the strongest since mid-2015 and just shy of the Northeast average. Despite the improvement, job growth is still slower and more concentrated than in most other large metro areas in the region. Professional/business services and manufacturing are the source of all the net new jobs created over the past year. Job losses in retail and government, and lackluster performance in financial services, are to blame for the narrow scope of payroll gains.

Hartford's insurance core finance industry will stabilize but will not add to job growth this year or in 2019. Industry payrolls have trended lower for the past year, as relatively high business costs have driven the outsourcing of lower-skill, back office work to cheaper areas of the country. Hartford's much larger insurance industry will expand as Travelers and Hartford will benefit from higher bond reinvestment rates, and the stalwarts should also be able to land new business and achieve higher rates on policy renewals following last year's hurricane season.

Weak state finances will remain a significant drag on Hartford's economy. The state capital has borne the brunt of large-scale cuts to state government payrolls. Meanwhile, UConn has seen appropriations slashed to 2004 levels, forcing a hiring freeze and cost-cutting measures. This has all come in addition to local government layoffs precipitated by cuts to municipal aid. The worst is over, thanks in part to stronger than expected capital gains tax revenue. The City of Hartford's fiscal footing has also improved as the state has taken over annual debt payments on the city's general obligation bonds, effectively diffusing the threat of bankruptcy. These factors will help slow the pace of layoffs, but public sector payrolls will not turn up until the next decade.

Housing is also lagging; prices are still nine percent below their prerecession peak and rising a paltry two percent year-over-year. The largest economic sectors for employment are insurance, Aerospace, and government. Major employers include Hartford Healthcare, Pratt & Whitney/United Technologies, and University of Connecticut. According to the U.S. BLS, the unemployment rate in the 2nd quarter of 2018 was 4.3 percent, down considerably from 8.2 percent at the beginning of the evaluation period. The unemployment rate in the AA was slightly higher than the overall state at 4.1 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by a community contact in conjunction with this evaluation that serves the bank's Hartford MSA AA. The community contact represents a statewide economic development agency that serves the AA. The community contact did not mention specific information related to economic conditions in the AA but commented that the city of Hartford is the largest urban center in Connecticut and has the 5th highest poverty level in the country.

The contact went on to state that there is limited access to credit for small businesses, contractors, restaurants, small stores and small commercial strips that operate in urban centers throughout the AA. The contact also commented that there are huge pockets of urban centers throughout the AA that are underserved. Lastly, the contact stated that local institutions have not satisfied the small business credit needs in urban areas of the AA.

Considering the information from the community contact and bank management as well as demographics and economic data, small business lending represents a primary need in the Hartford MSA AA. Small business loans, particularly those for start-up businesses and micro-loans are in high demand. The AA also has CD needs including affordable housing. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs coupled with limited home affordability for LMI individuals.

Scope of Evaluation in Connecticut

The rating for the State of Connecticut is based on FS evaluation of the bank's performance in the Hartford MSA AA. There are no LS AAs in Connecticut. A limited portion of the bank's overall lending, investments, and services were conducted in Connecticut; therefore, the performance in Connecticut received less weight in determining to the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN CONNECTICUT

LENDING TEST

The bank's performance under the Lending Test in Connecticut is rated Outstanding.

Conclusions for Area Receiving a FS Review

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Hartford MSA AA is excellent.

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State Loans	%State Deposits
Hartford MSA	23,857	5,648	42	7	29,554	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Dollar Volume of Loans (000's) *							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State Loans	%State Deposits
Hartford MSA	$5,014,289	$307,617	$1,339	$7,620	$5,330,865	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

WFBNA ranked eleventh in deposits with 1.6 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 6.8 percent market share. There is strong competition as reflected by the 438 lenders and 29 depository institutions in the AA. The 2nd and 3rd top lenders in this market were Quicken Loans with 4.3 percent market share and American Eagle FCU with 3.4 percent market share.

In small loans to businesses, WFBNA ranked tenth with a market share of 2.3 percent. There is strong competition as reflected by the 111 lenders in the AA. The top three lenders were American Express, FSB with 20.8 percent market share, US Bank with a 10.6 percent market share, and Bank of America with a 9.3 market share.

Distribution of Loans by Income Level of the Geography

The bank exhibits an excellent geographic distribution of loans in its AA.

Home Mortgage Loans

Refer to Table O in the State of Connecticut section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- For 2012-2016, the proportion of home mortgage loans in LMI geographies exceeds the aggregate distribution of loans in those geographies.
- The proportion of loans in LMI geographies is near to the proportion of OOUs in those geographies
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly less the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of Connecticut section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is good.

- For 2012-2016, the proportion of the bank's small business loans in low-income geographies exceeds the aggregate distribution of loans and is near to the proportion of businesses located in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is near to the proportion of businesses located in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly weaker than the combined performance in 2012-2016.

Distribution of Loans by Income Level of the Borrower

The bank exhibits an excellent distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

Home Mortgage Loans

Refer to Table P in the State of Connecticut section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The Hartford MSA AA has ownership affordability hurdles especially for LMI borrowers. As noted above, the area's median housing value is 6.3 times the income of low-income and 3.9 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI. Despite the affordability challenges, the bank's performance in 2012-2016 to LMI borrowers exceeds the aggregate lending.
- The bank's overall home mortgage lending to low-income borrowers is well below the proportion of families and to moderate-income borrowers exceeds the proportion of families.

- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly lower than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Connecticut section of appendix D for the facts and data used to evaluate

the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less substantially meets the aggregate small business lending data for businesses with revenues of $1 million or less and is well below the percentage of small businesses located in the AA.

Community Development Lending

The institution has made a relatively high level of CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The level of CD lending in the Hartford MSA AA is good. WFBNA made 7 CD loans in its AA for a total of $7.6 million, which represents 9.4 percent of tier 1 capital. CD lending performance has a positive impact on the lending test rating. The loans were responsive to the identified affordable housing needs in the AA. The bank made 5 CD loans totaling $5.6 million (73.9 percent) for the purpose of affordable housing. Additionally, the bank extended 2 CD loans totaling $2 million for the primary purpose of community services to LMI individuals.

Examples of CD loans in the AA include:

- In April 2016, WFBNA provided a $27.9 million construction loan to a non-profit organization that provides affordable housing to LMI individuals. The loan amount reported of $2.8 million is 9.9 percent of the total loan amount and reflective of the proportional amount that will provide affordable housing. This development is located in Simsbury, CT with 99 percentage of the units restricted to tenants earning 80 percent of the area MFI.
- In November 2013, WFBNA renewed a $1.0 million working capital line of credit to a nonprofit organization with a primary mission of ending hunger as a part of the overall community effort to alleviate poverty in Greater Hartford. This organization accomplishes this mission through increasing self-sufficiency for those in need, increasing engagement of the larger community, and improving food assistance. Over 95 percent of its clients are LMI individuals as they earn less than 80 percent of the area MFI.

Product Innovation and Flexibility

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 16 loans totaling $2.5 million to LMI homebuyers that qualified under this program. Refer to the comments in the institution

Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of Connecticut is rated Outstanding.

Conclusions for Area Receiving a FS Review

Based on a FS review, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Hartford MSA AA is excellent.

Qualified Investments										
Assessment Area	Prior Period*		Current Period		Total				Unfunded Commitments **	
	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Hartford MSA	1	$2,098	98	$22,432	99	100.0	$24,530	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

Hartford MSA AA

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 30.1 percent of tier 1 capital allocated to the AA.

The investments and grants reflect excellent responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 97.1 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 93 grants totaling $1.3 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved several complex LIHTC projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased several state tax credits for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In December 2015, WFBNA invested $50.1 million in a LIHTC fund. Of this total investment, $11.2 million was allocated to a development located in Vernon, Connecticut, with 83 units restricted to tenants earning no more than 60 percent of the area MFI. This activity is responsive to the identified need for affordable housing.
- In December 2013, WFBNA invested $117,531 in The Connecticut Neighborhood Assistance Act Tax Credit Program. The program provides community-based alcoholism prevention or treatment programs; neighborhood assistance; job training; education; community services;

crime prevention; construction or rehabilitation of dwelling units for families of LMI in the AA; funding for open space acquisitions; child day care facilities; child care services; and any other program which serves LMI families.

- In August 2015, WFBNA invested $95.5 million in the WFCIH Investment Fund III - Bank of America Tranche 2, a LIHTC fund. Of this total investment, $9.8 million was allocated to a development located in New Britain, Connecticut, with 70 units restricted to tenants earning no more than 60 percent of the area MFI. This activity is responsive to the identified need for affordable housing.

SERVICE TEST

The bank's performance under the Service Test in Connecticut is rated High Satisfactory.

Conclusions for Area Receiving a FS Review

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Hartford MSA AA is good.

Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the institution's AA, particularly LMI geographies and/or LMI individuals.

Distribution of Branch Delivery System											
	Deposits	Branches						Population			
Assessment Area	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%)				% of Population within Each Geography*

* May not add up to 100 percent due to geographies with unknown tract income level and rounding

Distribution of Branch Openings/Closings						
Assessment Area	# of Branch Openings	# of Branch Closings	Net change in Location of Branches (+ or -)			
			Low	Mod	Mid	Upp
Hartford MSA	0	1	0	0	-1	0

Hartford MSA AA

As of December 31, 2018, WFBNA operates seven branches and nine ATMs in the Hartford MSA AA. All of these branches are full-service locations. There is one branch in a low-income CT and one branch in a moderate-income CT. The branch distribution in LMI geographies exceeds the percentage of the population in LMI CTs in the AA.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed one branch since the last evaluation, within a middle-income CT.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 5:00 pm. All except one branch are open on Saturday from 9:00 am to 12:00 pm. All WFBNA services are available at all branches and all ADS discussed bank-wide are available in this AA.

Community Development Services

<u>Hartford MSA AA</u>

The institution provides an adequate level of CD services.

The level of CD services in the Hartford CSA AA is adequate. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 25 CD service activities to 13 organizations since the last evaluation, logging a total of 103 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted economic development.

The following are examples of CD services provided in this AA:

- A WFBNA team member provided 20 hours of Board service to a local community organization that works to strengthen neighborhood economies by providing flexible financial and technical support to small businesses, community organizations, via initiatives in targeted communities consisting of LMI business owners throughout Connecticut.
- A WFBNA team member provided 18 hours of financial education to a community organization that delivers educational programming focused on financial education, work readiness, and entrepreneurship to students from kindergarten through high school. According to the organization, as of May 2018, 68 percent of its clients are LMI individuals as they earn less than 80 percent of the area MFI.

State Rating

State of Delaware

CRA rating for the State of (Delaware)[24]: Satisfactory
The Lending Test is rated: High Satisfactory
The Investment Test is rated: Low Satisfactory
The Service Test is rated: Needs to Improve

The major factors that support this rating include:

- Excellent lending activity;
- Adequate geographic distribution of loans;
- Good borrower distribution of loans;
- Poor level of CD loans was originated;
- WFBNA's use of flexible products has a neutral impact on the Lending Test;
- Adequate level of CD investments;
- Retail delivery systems are unreasonably inaccessible to portions of the AA; and
- Very poor CD services.

Description of Institution's Operations in Delaware

WFBNA delineated one AA within Delaware which includes the Salisbury, DE MSA (Salisbury MSA AA). Refer to Appendix A for a complete description of the AA. The Salisbury MSA AA received a FS review. Delaware represents the 51th largest rated area by deposits. WFBNA has $199 million representing 0 percent of deposits in Delaware. WFBNA ranked 16th out of 24 institutions with a 0.3 percent market share. The top three banks in the AA in terms of deposits include Discover Bank with a market share of 89.4 percent, PNC Bank with a market share of 2.2 percent, and Manufacturers and Traders Trust with a market share of 1.7 percent. WFBNA operates 2 branches and 3 ATMs within Delaware, representing 0 percent of the bank's branches and 0 percent of the bank's ATMs. The bank originated and purchased approximately $2.9 billion in loans or 0.2 percent of total loan originations and purchases during the evaluation period. The bank's primary loan products in the Delaware are home mortgage and small loans to businesses.

Demographic Data

The following table provides a summary of the demographics that includes housing and business information for the Salisbury MSA AA. Table A indicates that there are no low-income CTs and over 39 percent of families in the AA are LMI. The area's median housing value in the Salisbury MSA AA is 5.2 times the area's median income e, but 6.6 times moderate-, and 10.5 times low-income, indicating a limited proportion of OOUs are affordable to LMI families. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

[24] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

Table A – Demographic Information of the Assessment Area

Assessment Area: Salisbury DE MSA (2016)

Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #

Due to rounding, totals may not equal 100.0
(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

According to the July 2018 Moody's Analytics report, the Salisbury economy is healthy but far from spectacular. Payroll employment is up so far this year, but only by enough to make up for the losses at the end of 2017. Retail and leisure/hospitality, which employ one-third of the workforce, have not added significantly to employment growth since early 2017. Education and healthcare are doing somewhat better, and a building boom is lifting construction payrolls, which are up by one-third from their 2012 low. Strong population gains are powering rapid workforce gains, limiting wage increases. Hourly earnings have risen since late 2017, but lag pay in the rest of Delaware and U.S. by a larger margin.

The strong population trends and a steady influx of visitors will lead to faster job growth in private services. At 1.5 percent, population growth last year was easily the fastest among northeast metro areas. Salisbury's coastal locale and low living costs will attract more migrants, particularly retiring baby boomers from elsewhere in the region. To meet the needs of a fast-growing and fast-graying population, healthcare facilities will expand. Citing blistering population gains, Beebe Healthcare is pursuing a $180 million expansion that will add an emergency room and cancer center. The attributes that draw migrants to the Salisbury MSA also attract tourists. Salisbury is within driving distance of several regional population centers, and it boasts an enviable waterfront landscape; Sussex and Worcester counties are flanked to the east by the Atlantic Ocean, while Somerset County opens up onto the iconic Chesapeake Bay. Tourism gains will ensure that local retailers, hotels and restaurants confidently raise headcounts.

The outlook for the housing market is good due to a fast-growing population. Amid robust household formation, home sales in the Salisbury MSA AA grew steadily throughout 2017. Affordability is below average, and with mortgage rates climbing, housing demand has suffered. Single-family housing starts have also retreated, but have doubled from their lowest level and have lagged the upturn in sales. Single-family housing is also undervalued, a plus for prices. In the five years since the market bottomed, prices are up 16 percent in the Salisbury MSA, compared with over 45 percent nationally. Strong net migration and job creation will lift demand for housing and fuel bigger gains in prices and construction in 2019.

The largest employers in the Salisbury MSA AA include Peninsula Regional Medical Center, Beebe Medical Center, and Salisbury University. According to the U.S. BLS, the unemployment rate for Salisbury was 4.8 percent compared to 3.7 percent for the State of Delaware. The area unemployment rate has come down considerably from 8.9 percent in 2012.

Community Contacts

The analysis takes into consideration comments provided by a community contact that serves the bank's Salisbury MSA AA. The community contact was a CRA listening session that included bank regulators and representatives from non-profit community organizations.

The listening session covered a number of topics including banks' involvement in community projects, local economy, areas in the community that are ignored, poverty and unemployment, local politics and wealth, lack of funding for small businesses, population growth and lack of jobs, minimum wage and unaffordable market rate housing, and education deficiency.

Considering the information from the community contact, bank management, and demographic and economic data, affordable housing loans represent a primary credit need for the Salisbury MSA AA. Small business loans, particularly those for start-up businesses and micro-loans are also in high demand. Opportunity exists to originate these types of loans throughout the AA including moderate-income areas. The Salisbury MSA AA also has CD needs including affordable housing, financial literacy training for LMI individuals, and small business owners and economic development.

Scope of Evaluation in Delaware

The rating for the State of Delaware is primarily based on FS evaluation of the bank's performance in the Salisbury MSA AA. A limited portion of the bank's overall lending, investments, and services were conducted in the State of Delaware; therefore, the performance in the state received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN DELAWARE

LENDING TEST

The bank's performance under the Lending Test in Delaware is rated High Satisfactory.

Conclusions for Area Receiving a FS Review

Based on FS review, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Salisbury MSA AA is good.

Lending Activity

Based on the tables below, lending levels reflect an excellent responsiveness to credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Salisbury MSA	11,506	1,214	24	1	12,745

Dollar Volume of Loans (000's)					
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total
Salisbury MSA	$2,898,675	$61,993	$1,219	$2,095	$2,963,982

WFBNA ranked 16th[st] in deposits with a 0.3 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 12.5 percent market share. There is strong competition as reflected by the 365 lenders and 24 depository institutions in the AA. The 2nd and 3rd top lenders in this market are NVR Mortgage with a 5.4 percent market share and Quicken with a 3.5 percent market share.

In small loans to businesses, WFBNA ranked eighth with a market share of 3.4 percent. There is strong competition in the market with approximately 76 lenders. The top three lenders were The American Express, FSB with a market share of 16.9 percent, PNC Bank with a market share of 13.6 percent, and Capital One Bank with a market share of 8.7 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits an adequate geographic distribution of loans in its AA.

Home Mortgage Loans

Refer to Table O in the State of Delaware section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- The AA contains no low-income tracts so our assessment focused on the bank's performance in moderate-income tracts.
- For 2012-2016, the proportion of loans in moderate-income geographies is below the aggregate distribution of loans and is well below the proportion of OOUs in those geographies.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of Delaware section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is poor.

- The AA contains no low-income tracts so our assessment focused on the bank's performance in moderate-income tracts.
- For 2012-2016, the proportion of loans in moderate-income geographies is below both the aggregate distribution of loans and the proportion of businesses in those geographies
- The bank's small business lending in 2017-2018 is very poor and significantly below the combined performance in 2012-2016. As such, the overall rating for this performance was lowered to poor.

Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

Home Mortgage Loans

Refer to Table P in the State of Delaware section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 10.5 times the income of low-income and 6.6 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI. Despite the affordability challenges, the bank's performance in 2012-2016 to low-income borrowers exceeds the aggregate lending and is significantly below the proportion of families.
- The bank's overall home mortgage lending to moderate-income borrowers substantially meets the aggregate distribution of loans and is well below the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly lower than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Delaware section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is well below the percentage of small businesses located in the AA.

Community Development Lending

The institution has made a low level of CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The level of CD lending in the Salisbury MSA AA is poor. WFBNA made only one CD loan in its AA for a total of $2 million, which represents 9.1 percent of tier 1 capital. CD lending performance has a neutral impact on the lending test rating. Although the loan represented a significant amount of tier 1 capital due to its size, the bank only originated one loan during the six-year time period. The loan was responsive to the identified affordable housing needs in the AA.

Example of a CD loan in the AA includes:

- In January 2016, WFBNA provided a $33 million line of credit to a Tax Credit Investment Fund. Of that total, $2.0 million was allocated to an affordable housing development located in Seaford, Delaware. The loan proceeds were used to bridge the gap between the receipt of capital contributions from investors and the payment of equity investments to operating partnerships that own the LIHTC projects.

Product Innovation and Flexibility

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 14 loans totaling $2.2 million to LMI homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of Delaware is rated Low Satisfactory.

Conclusions for Area Receiving a FS Review

Based on a FS review, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Salisbury MSA AA is adequate.

Qualified Investments										
Assessment Area	Prior Period*		Current Period		Total				Unfunded Commitments **	
	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Salisbury MSA	0	0	7	$2,228	7	100.0	$2,228	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

Salisbury MSA AA

The institution has an adequate level of qualified CD investments and grants, although rarely in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 9.9 percent of tier 1 capital allocated to the AA.

The investments and grants reflect adequate responsiveness to the needs identified in the AA including affordable housing. All of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 6 grants totaling $27,500 to organizations that primarily support affordable housing.

The institution rarely uses innovative and/or complex investments to support CD initiatives. CD Investments involved one complex project where the bank acted in a leadership role with participations from federal, state, local housing agency, and real estate developers.

Example of a CD investment in the AA includes:

- In December 2015, WFBNA invested $50.1 million in a LIHTC. Of this total investment, $2.0 million was allocated to a development located in Seaford, Delaware, with 17 units restricted to tenants earning no more than 60 percent of the area MFI. This activity is responsive to the identified need for affordable housing.

SERVICE TEST

The bank's performance under the Service Test in Delaware is rated Needs to Improve.

Conclusions for Area Receiving a FS Review

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Salisbury MSA AA is poor.

Retail Banking Services

Delivery systems are unreasonably inaccessible to portions of the AA, particularly LMI geographies and/or LMI individuals.

Distribution of Branch Delivery System											
Assessment Area	Deposits	Branches						Population			
	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%)				% of Population within Each Geography*			
				Low	Mod	Mid	Upp	Low	Mod	Mid	Upp
Salisbury MSA	100.0	2	100.0	0.0	0.0	0.0	100.0	0.0	10.1	76.4	13.5

* May not add up to 100 percent due to geographies with unknown tract income level and rounding

Distribution of Branch Openings/Closings						
Assessment Area	# of Branch Openings	# of Branch Closings	Net change in Location of Branches (+ or -)			
			Low	Mod	Mid	Upp
Salisbury MSA	0	0	0	0	0	0

<u>Salisbury MSA AA</u>

As of December 31, 2018, WFBNA operates two branches and three ATMs in the Salisbury MSA AA. Both of these branches are full-service locations. There are no branches in LMI geographies; therefore, the branch distribution in LMI geographies is significantly below the percentage of the population in moderate-income CTs in the AA. Additionally, there are no branches within close proximity to LMI geographies.

The bank did not open or close any branches during the evaluation period.

Services, including where appropriate, business hours, vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Thursday from 9:00 am to 6:00 pm, and Friday from 9:00 am to 6:00 pm. One branch is open on Saturday from 9:00 am to 2:00 pm. All WFBNA services are available at all branches and all ADS discussed bank-wide are available in this AA.

Community Development Services

<u>Salisbury MSA AA</u>

The institution provides few if any CD services.

The level of CD services in the Salisbury MSA AA is very poor. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for one CD service activity since the last evaluation, logging a total of two qualified hours within this AA. This activity consisted of a WFBNA team member providing two hours of financial education to an organization whose mission is to work towards the elimination of poverty and to lessen the effects of poverty on low-income people.

State Rating

State of Florida

CRA rating for the State of Florida[25]: Outstanding
The Lending Test is rated: Outstanding
The Investment Test is rated: High Satisfactory
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Excellent lending activity;
- Good distribution of loans by borrower profile;
- Good geographic distribution of loans;
- WFBNA is a leader in providing CD loans, which has a significant positive impact on the Lending Test;
- WFBNA's use of flexible products has a positive impact on the Lending Test;
- Good level of investments that are responsive to AA needs;
- Retail delivery systems are readily accessible to all portions of the AA; and
- WFBNA is a leader in providing CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in Florida

WFBNA delineated 17 AAs within Florida including the Miami-Fort Lauderdale-Port St. Lucie, FL CSA (Miami CSA AA), Orlando-Deltona-Daytona Beach, FL CSA (Orlando CSA AA), Tampa-St. Petersburg-Clearwater, FL MSA (Tampa MSA AA), Cape Coral-Fort Meyers-Naples, FL CSA (Cape Coral CSA AA), Crestview-Fort Walton Beach-Destin, FL MSA (Crestview MSA AA), Gainesville, FL MSA (Gainesville MSA AA), Homosassa Springs, FL MSA (Homosassa Springs MSA AA), Jacksonville, FL MSA (Jacksonville MSA AA), Lakeland-Winter Haven, FL MSA (Lakeland MSA AA), North Port-Sarasota, FL CSA (North Port CSA AA), Ocala, FL MSA (Ocala MSA AA), Palm Bay-Melbourne-Titusville, FL MSA (Palm Bay MSA AA), Panama City, FL MSA (Panama City MSA AA), Pensacola-Ferry Pass-Brent, FL MSA (Pensacola MSA AA), Sebring, FL MSA (Sebring MSA AA), Tallahassee, FL MSA (Tallahassee MSA AA), and FL Combined Non-Metros (FL Combined NonMetro AA). Refer to Appendix A for a complete description of each AA.

The Miami CSA, Orlando CSA, and Tampa MSA AAs received FS review. These areas accounted for the largest portion of the lending (65.5 percent) and deposits (72.2 percent) amongst the AAs in Florida. WFBNA has $79.4 billion of deposits in Florida representing 6.3 percent of adjusted deposits. Florida represents the second largest rated area in terms of deposits. WFBNA operates 588 branches and 1,168 ATMs within Florida, representing 10.5 percent of the bank's branches and 8.6 percent of the bank's ATMs. The bank originated and purchased approximately $115.8 billion in loans or 6.3 percent of total reported loan originations and purchases during the evaluation period. The bank's primary loan products in the Florida are home mortgage and small loans to businesses.

[25] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

Miami CSA AA

Within the Miami CSA AA, the bank had $37.6 billion deposits and ranked second amongst 96 financial institutions in the market with 15.0 percent market share. Bank of America ranked first with 17.5 percent market share. WFBNA operates 218 branches and 494 ATMs in the AA.

Orlando CSA AA

Within the Orlando CSA AA, the bank had $9.7 billion deposits and ranked third amongst 51 financial institutions in the market with 14.8 percent market share. SunTrust Bank and Bank of America ranked 1st and 2nd with 21.1 percent and 19.4 percent market share, respectively. WFBNA operates 79 branches and 144 ATMs in the AA.

Tampa MSA AA

Within the Tampa MSA AA, the bank had $9.9 billion deposits and ranked third amongst 56 financial institutions in the market with 11.7 percent market share. Raymond James Bank and Bank of America ranked 1st and 2nd with 23.1 percent and 16.6 market share, respectively. WFBNA operates 76 branches and 146 ATMs in the AA.

Demographic Data

Miami CSA AA

The following table provides a summary of the demographics that includes housing and business information for the Miami CSA AA. Table A indicates that the volume of OOUs is very small in low-income CTs and over 39 percent of families in the AA are LMI. The area's median housing value in the Miami CSA AA is four times the highest MSA median income, but five times moderate-, and eight times low-income, indicating a limited proportion of OOUs area affordable to LMI. Median rents and the significant percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

Miami-Fort Lauderdale-West Palm Beach, FL MSA

According to the August 2018 Moody's Analytics report, Miami's economy is slowing. The unemployment rate has declined one-half percentage point over the last three months after hovering near 4.8 percent for more than a year. The tightening job market has not yet boosted wages, which have not budged over the last year. Home price growth, which was less than half the U.S. rate at the start of the year, has closed to within a fraction of the nationwide pace.

Since Miami's wealthy sustain their lifestyle with nonwage income, the area's gross domestic product has increased even as wage growth stagnates. But since this income growth is not broad-based, its impact on the local economy will be limited mostly to the well-to-do enclaves flanking the central business district and in Miami Beach. The largest employers in Miami include University of Miami, Jackson Health System, and Publix Super Markets Inc.

According to the August 2018 Moody's Analytics report, Fort Lauderdale's economy is in the late stage of its expansion. The area's unemployment rate has trickled down just 0.3 percentage point over the last year. After tumbling in the spring, wages have increased back over the summer and now equal the high reached at the beginning of the year. However, the U.S. dollar will strengthen against most world currencies over the next two years as the Federal Reserve normalizes monetary policy. Tourism falters as a result of the stronger dollar, which disproportionately affects South Florida as it is the second most popular destination for overseas travelers, after New York.

According to the August 2018 Moody's Analytics report, even though West Palm Beach's unemployment rate is hovering just above the lowest rate ever recorded, average hourly wages over the last two years have not increased. In the last year, job growth has been especially weak in healthcare, which has shed a record number of positions.

Residential construction will surge in the Miami CSA AA because the rate of homebuilding in the region is unsustainably low. Among the 20 most populated metro areas in the U.S., South Florida ranks 8th in population growth and 15th in number of permits issued over the last five years.

According to the U.S. BLS, the unemployment rate for Miami MSA for the third quarter of 2018 was 4.5 percent and has significantly decreased from 8.3 percent at the beginning of the evaluation period. The unemployment rate for Fort Lauderdale and West Palm Beach was lower than Miami and also significantly decreased from the beginning of the evaluation period. The unemployment rate for the Miami MSA was higher than the overall state of Florida at 3.7 percent for the same period.

Port St Lucie, FL MSA

According to the December 2018 Moody's Analytics report, Port St. Lucie's total employment accelerated for the rest of the year, overtaking the robust Florida average by November 2018. Healthcare and consumer industries are contributing the bulk of net new jobs, powered by the large senior population and robust visitor arrivals. The tight labor market is lifting average hourly earnings. Healthcare will remain the area's primary growth engine, as the area has gained a reputation as a retiree haven, fueling robust in-migration.

The largest employers in Port St. Lucie include Martin Health System, Indian River State College, and Wal-Mart Stores Inc. The housing market is gaining momentum. Fueled by several years of above-average house price appreciation, single family construction is picking up.

According to the U.S. BLS, the unemployment rate for Port St. Lucie for the fourth quarter of 2018 was 4.2 percent and has significantly decreased from 10.1 percent at the beginning of the evaluation period. The unemployment rate for Port St. Lucie was higher than the overall state of Florida at 3.7 percent for the same period.

Sebastian-Vero Beach, FL MSA

According to the December 2018 Moody's Analytics report, Sebastian's labor market strengthened appreciably as 2018 progressed, and the area is keeping pace with fast-growing Florida in job growth after trailing it since late 2017. Key construction and healthcare industries are leading the way and have contributed nearly two-thirds of the net new jobs created since mid-2018. The tight labor market has caused average hourly earnings to surge, and wages are rising at a much faster pace than in the state and the nation.

The area will grow over the near term as favorable demographic trends and increased tourism power job growth in private services, and in healthcare and leisure/hospitality in particular. The largest employers in Sebastian include Indian River Medical Center, Publix Super Markets Inc., and Piper Aircraft Inc.

The housing market is mixed. Low inventories and affordability are weighing on sales, but housing starts are at a multiyear high and rising faster than elsewhere in Florida and the nation. Strong demand from rapid population growth and household formation will push home sales higher in 2019, and price appreciation will exceed the U.S. average by a comfortable margin.

According to the U.S. BLS, the unemployment rate for Sebastian for the fourth quarter of 2018 was 4.5 percent and has significantly decreased from 11 percent at the beginning of the evaluation period. The unemployment rate was higher than the overall state of Florida at 3.7 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by three community contacts that serve the bank's Miami CSA AA. One community contact is a community development corporation serving West Palm Beach that advocates fair and equal access to financial services/products and increased community investments for the AA. One community contact is a Community Needs Assessment (CNA) group sponsored by a large bank in the AA. The CNA group is comprised of nine participants representing various non-profit organizations that serve the AA. One community contact is a nonprofit community-based organization dedicated to building and supporting strong economies and diverse communities in Palm Beach County.

The community development corporation indicated that affordable housing continues to be a major concern in West Palm Beach, as the MSA has the largest share of house burdened families in the State for rental and owner-occupied housing. Strategies to provide and preserve affordable housing are imperative for the AA.

The nonprofit community-based organization contact indicated that West Palm Beach, Lake Worth, Boynton Beach, and Riviera Beach have low-income pockets. The unincorporated portions of Palm Beach County have high unemployment rates, a lack of job opportunities, and substandard housing conditions. In Palm Beach County, many areas have not recovered from the housing crisis. As a result, abandoned properties are very common in the AA. Local financial institutions need to work with non-profit organizations to address the growing need for affordable homes that match the wages of LMI workers.

The CNA group contact mentioned that twenty percent of the AA are low-income single parent households, who live in poverty due to lack of a solid paying job and affordable child care options. The most pressing needs for the AA are affordable housing, access to capital for small businesses and entrepreneurs, and access to employment opportunities. There is a need for soft skills training, especially for high school youth and college students, access to quality education, including vocational and entrepreneurship training, financial literacy, working space for artists, and long-term funding for the arts/ museums.

Considering the information from the community contact and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Miami CSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

<u>Orlando CSA AA</u>

The following table provides a summary of the demographics that includes housing and business information for the Orlando CSA AA. Table A shows a very small proportion of tracts and population are low-income. The volume of OOUs is even smaller in the low-income tracts and over 38 percent of families in the AA are LMI. The area’s median housing value in the Orlando CSA AA is four times the highest MSA median income, but five times moderate-, and eight times low-income, indicating a limited proportion of OOUs are affordable to LMI individuals. Median rents and the significant percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

Assessment Area: Orlando-Deltona-Daytona Beach FL CSA (2016)

Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #

Economic Data

Orlando-Kissimmee-Sanford FL MSA

According to the August 2018 Moody's Analytics report, Orlando's economy is at full employment. The jobless rate has hovered near 3.4 percent since the beginning of 2018 as the labor market has added jobs and employees at roughly the same rates. Steadiness in the labor market has spilled over to the housing market as the median sale price for single-family homes surged 9.8 percent over the prior year. This was the second biggest increase in the state.

Abundant jobs in tourism and retail have made Orlando the state's mecca for young adults, and this large cohort explains why wages and homeownership rank among the nation's lowest for major metro areas. The largest employers in Orlando include Walt Disney World Resort, Universal Orlando (Comcast), and Adventist Health System/Florida Hospital.

According to the U.S. BLS, the unemployment rate for the MSA for the third quarter of 2018 was 3.2 percent and has significantly decreased from 8.4 percent at the beginning of the evaluation period. The unemployment rate in the AA was lower than the overall state of Florida at 3.7 percent for the same period.

Deltona-Daytona Beach-Ormond Beach FL MSA

According to the December 2018 Moody's Analytics report, Daytona Beach's economy is taking a breather following several quarters of steady job gains. Total employment dipped at the end of 2018, dragging down year-ago growth to its lowest since the third quarter of 2018. A slowdown in education/healthcare is largely to blame.

Private services will be the MSA's primary growth engine. Moreover, robust population growth led by an influx of retiring baby boomers will keep demand for hospital and primary care services elevated, and health providers will hire with confidence and even expand infrastructure. The largest employers in the MSA include Halifax Medical Center, Publix Super Markets Inc., and Florida Hospital Ormond Memorial. Residential real estate market will remain in good shape. Homes in the MSA are more affordable than those statewide and in other retiree havens such as Naples, North Port, and Port St. Lucie.

According to the U.S. BLS, the unemployment rate for the MSA for the fourth quarter of 2018 was 3.8 percent and has significantly decreased from 9.6 percent at the beginning of the evaluation period. The unemployment rate in the AA was slightly higher than the overall state of Florida at 3.7 percent for the same period.

The Villages FL MSA

According to the December 2018 Moody's Analytics report, the Villages economy is improving. After a tumultuous 2018, job growth is once again accelerating and exceeds the Florida and U.S. averages. Employment in retail, leisure/hospitality, and healthcare, which together account for nearly half of all jobs in the metro area, is rising at a lofty 4 percent year-over-year following a lull earlier in 2018. Local government is the blemish on an otherwise spotless progress report. The industry has lost five percent of its workforce in the past year and is a substantial drag on the economy.

Seniors consume by far the most medical services of all age cohorts, which will help healthcare outperform. The largest employers in the MSA include Coleman Federal Prison, CFHA - The Villages Regional Medical Center, and Publix Super Markets Inc. Homebuilding has emerged from an earlier lull, and activity will pick up further in the coming year as demand holds firm.

According to the U.S. BLS, the unemployment rate for the MSA for the fourth quarter of 2018 was 5.3 percent and has significantly decreased from 10.6 percent at the beginning of the evaluation period. The unemployment rate in the AA was higher than the overall state of Florida at 3.7 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by two community contacts serving the bank's Orlando CSA AA in conjunction with this evaluation. One organization is a CDFI that makes CD loans through the NMTC programs to support CD projects by nonprofit organizations throughout Florida. The other organization is both a CDFI and a Community Development Enterprise certified by the U.S. Department of the Treasury. The organization is a non-traditional lender that specializes in providing loans to black, minority, and underserved small businesses in the Orlando MSA. In addition, the organization assists its business clients in building their management capacity by offering financial and technical assistance training.

One organization indicated that across the state there are not enough affordable rental housing units. Community credit needs include loans for affordable housing, both single family and multifamily. The contact noted that opportunities for participation in community programs include increasing bank partnerships with land trusts to retain affordable housing options, and nontraditional approaches to providing affordable housing loans.

Another organization indicated that community credit needs include loans to small businesses for general operations and financial education for small businesses. The organizations indicated that there is a variety of opportunities for participation by banks including participating in loan pools created by the CDFIs and providing technical assistance to small business owners.

The bank conducted research in the AA and identified community needs for quality rental housing for low-income families; services to homeless veterans and families covering job training and assistance with job placement; small business loans; and technical assistance for small businesses.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Orlando CSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

Tampa MSA AA

The following table provides a summary of the demographics that includes housing and business information for the Tampa MSA AA. Table A indicates that the volume of OOUs is very small in low-income CTs and over 39 percent of families in the AA are LMI. The area's median housing value in the Tampa MSA AA is three times median income, but four times moderate-, and six times low-income, indicating a limited proportion of OOUs are affordable to LMI. Median rents and the significant percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Source: 2010 U.S. Census and 2016 D&B Data
Due to rounding, totals may not equal 100.0
(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

According to the August 2018 Moody's Analytics report, the Tampa economy is strong. The area's jobless rate is within a fraction of the lowest point reached at the peak of the last expansion, and the tight labor market has helped wages grow nearly twice as fast as the national pace. The metro area's GDP will grow by a healthy 4 percent this year and 5 percent in 2019. The largest employers in Tampa include Publix Super Markets Inc., BayCare Health System, and HCA Holdings.

House price appreciation has exceeded the U.S. rate for 13 of the last 16 quarters, but homebuilding is weak. The housing crash hit the AA very hard and produced a large inventory of foreclosed properties that kept a lid on new construction and real estate sales.

According to the U.S. BLS, the unemployment rate for the Tampa MSA for the third quarter of 2018 was 3.5 percent and has significantly decreased from 8.2 percent at the beginning of the evaluation period. The unemployment rate in the AA was lower than the overall state of Florida at 3.7 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by four community contacts that serve the bank's Tampa MSA AA. One organization that focuses on affordable housing in the AA indicated that there is still a tremendous need for affordable multifamily housing in the area, particularly in non-metropolitan underserved communities. Demand for affordable housing has been exacerbated by the growing wealth gap, resulting in increased homelessness across the region and state. Banks have the opportunity to provide financing for affordable housing, community development and small business.

Three organizations offer various CD services including homeownership and foreclosure prevention, job training, and neighborhood revitalization and stabilization in LMI areas in Hillsborough and Pinellas Counties. The organizations indicated that the low-income communities adjacent to the Central Business Districts of West Tampa and South St. Petersburg are in need of revitalization. East Tampa and St. Petersburg have many neighborhoods that were plagued with dilapidated and overcrowded housing, high rates of poverty and unemployment, teen pregnancy, school dropouts/suspension, and drug abuse. In addition, access to capital continues to be a challenge for many small businesses in the area. Barriers include past personal credit challenges, lack of existing capital and assets, and lack of business credit.

There are a variety of opportunities for participation by banks including small business assistance, program funding for the non-profits serving the area, layered financing by banks for affordable housing development or neighborhood revitalization projects, portfolio lending with more flexible underwriting criteria that may not meet secondary market guidelines, and homebuyer education.

Considering the information from the community contacts, bank management, and demographic and economic data, affordable housing and small business loans represent a primary credit need for the Tampa MSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

Scope of Evaluation in Florida

The rating for the State of Florida is primarily based on FS evaluations of the bank's performance in the Miami CSA, Orlando CSA, and Tampa MSA AAs; however, performance in each AA was considered. Conclusions where a LS review affected the CRA Rating for the state are addressed within their respective tests. LS procedures were performed for the remaining 14 AAs. The State of Florida is the second largest rated area and along with 12 other rated areas represents the bank's most significant markets in terms of lending, deposit, and branch distribution. Florida represents a sizeable portion of the bank's overall lending, investments, and services; therefore, the performance in the state was weighted heavier in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN FLORIDA

LENDING TEST

The bank's performance under the Lending Test in Florida is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Miami CSA, Orlando CSA, and Tampa MSA AAs is excellent.

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased.

Number of Loans*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	% State Loans	% State Deposits

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only

Miami CSA AA

WFBNA ranked second in deposits with 15.0 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 9.9 percent market share. There is strong competition as reflected by the 1,206 lenders and 96 depository institutions in the AA. The next two lenders in this market were Quicken Family with 5.3 percent market share and Caliber Home Loans with 4.2 percent market share.

In small loans to businesses, WFBNA ranked sixth with a market share of 6.0 percent. The 3 top lenders in this market were American Express with 27.9 percent market share, Bank of America with 13.9 percent market share, and JPMorgan Chase Bank with 9.8 percent market share. There is strong competition as reflected by the 244 lenders and 96 depository institutions in the AA.

Orlando CSA AA

WFBNA ranked third in deposits with 14.8 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 8.5 percent market share. There is strong competition as reflected by the 933 lenders and 51 depository institutions in the AA. The next two lenders in this market were Quicken Family with a 5.1 percent market share and FBC Mortgage, LLC with a 3.6 percent market share.

In small loans to businesses, WFBNA ranked seventh with a market share of 5.7 percent. The top 3 lenders in this market were American Express with a 22.1 percent market share, Bank of America with an 11.0 percent market share, and JPMorgan Chase Bank with a 10.2 percent market share. There is strong competition as reflected by the 172 lenders and 51 depository institutions in the AA.

<u>Tampa MSA AA</u>

WFBNA ranked third in deposits with 11.7 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 8.2 percent market share. There is strong competition as reflected by the 948 lenders and 56 depository institutions in the AA. The next two lenders in this market were U.S. Bancorp with a 5.0 percent market share and Quicken Family with a 4.9 percent market share.

In small loans to businesses, WFBNA ranked sixth with a market share of 5.9 percent. There is strong competition as reflected by the 175 lenders and 56 depository institutions in the AA. The top 3 lenders in this market were American Express with a 21.0 percent market share, Bank of America with an 11.8 percent market share, and Citibank with a 9.3 percent market share.

Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in the Miami CSA, Orlando CSA, and Tampa MSA AAs.

<u>Miami CSA AA</u>

Home Mortgage Loans

Refer to Table O in the State of Florida section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. the bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- The bank's performance in both 2012-2016 and 2017-2018 periods for home mortgage loans in low-income geographies is below the aggregate distribution of loans and is significantly below the proportion of OOUs units in those geographies. However, less weight was given to WFBNA's performance in low-income geographies because of the very small proportion of the bank's loans and OOUs in low-income geographies.
- For both periods, the proportion of loans in moderate-income geographies is below the aggregate distribution of loans and is well below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of Florida section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The bank's performance in both 2012-2016 and 2017-2018 periods for small business loans in LMI geographies exceeds both the aggregate distribution of loans and the proportion of businesses located in those geographies.

<u>Orlando CSA AA</u>

Home Mortgage Loans

Refer to Table O in the State of Florida section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in low-income geographies exceeds the aggregate distribution of loans and is significantly below the proportion of OOUs in those geographies. Less weight was given to WFBNA's performance in low-income geographies because of the very small proportion of the bank's loans and OOUs in low-income geographies.
- The proportion of loans in moderate-income geographies is below both the aggregate distribution of loans and the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of Florida section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for small business loans in LMI geographies exceeds the aggregate distribution of loans in those geographies.
- The proportion of the bank's small business loans to low-income geographies exceeds the proportion of businesses and to moderate-income geographies is near to the proportion of businesses located in those geographies.

<u>Tampa MSA AA</u>

Home Mortgage Loans

Refer to Table O in the State of Florida section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in low-income geographies is well below both the aggregate distribution of loans and the proportion of OOUs in those geographies. Less weight was given to WFBNA's performance in low-income geographies because of the very small proportion of the bank's loans and OOUs in low-income geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is well below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of Florida section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for small business loans in LMI geographies substantially meets the aggregate distribution of loans in those geographies.
- The proportion of the bank's small business loans in low-income geographies exceeds and to moderate-income geographies is near to the proportion of businesses located in those geographies.

Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution in the Miami CSA, Orlando CSA, and Tampa MSA AAs.

Miami CSA AA

Home Mortgage Loans

Refer to Table P in the State of Florida section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- The Miami CSA AA has homeownership affordability hurdles especially for LMI borrowers. As noted above, the area's median housing value is 8 times the income of low-income and 5 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI. Despite the affordability challenges, the bank's overall home mortgage lending in 2012-2016 to LMI borrowers exceeds the aggregate distribution of loans.
- The bank's home mortgage lending to low-income borrowers is significantly below the proportion of families and lending to moderate-income borrowers is below the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Florida section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Orlando CSA AA

Home Mortgage Loans

Refer to Table P in the State of Florida section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- The Orlando CSA AA has homeownership affordability hurdles especially for LMI borrowers. As noted above, the area's median housing value is 8 times the income of low-income and 5 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI. Despite the affordability challenges, the bank's overall home mortgage lending in both 2012-2016 and 2017-2018 periods to LMI borrowers exceeds the aggregate distribution of loans.
- The bank's home mortgage lending to low-income borrowers is significantly below the proportion of families and lending to moderate-income borrowers is below the proportion of families.

Small Loans to Businesses

Refer to Table R in the State of Florida section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Tampa MSA AA

Home Mortgage Loans

Refer to Table P in the State of Florida section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- The Tampa MSA AA has homeownership affordability hurdles especially for LMI borrowers. As noted above, the area's median housing value is 6 times the income of low-income and 4 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI. Despite the affordability challenges, the bank's overall home mortgage lending in 2012-2016 to low-income borrowers exceeds the aggregate distribution of loans and is significantly below the proportion of families.
- The bank's home mortgage lending to moderate-income borrowers substantially meets the aggregate distribution of loans and is below the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Florida section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Community Development Lending

The institution is a leader in making CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

Miami CSA AA

The level of CD lending in the Miami CSA AA is excellent. WFBNA made 145 CD loans in its AA for a total of $885.6 million, which represents 20.9 percent of allocated tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified affordable housing and small business lending needs in the AA. The bank made 84 CD loans totaling $641.8 million (72.5 percent) for the purpose of affordable housing. Additionally, the bank extended 28 CD loans totaling $182.2 million for the primary purpose of community services to LMI individuals.

Examples of CD loans in the AA include:

- In May 2017, WFBNA provided a $75 million line of credit to an organization with a primary purpose of addressing issues affecting the health of all children, particularly those who are most vulnerable due to lack of insurance or access issues. Programs range from well child care, immunizations, to injury prevention and obesity, as well as to cultural adaptation to our health care system. Through the Health on Wheels program, the division has provided comprehensive medical care and education to 110,000 uninsured children in South Florida. Over 64 percent of the hospital's revenue was from Medicaid reimbursements.
- In October 2018, WFBNA provided a $22.7 million construction loan for an LIHTC affordable housing development located in North Miami Beach, Florida, with 97.7 percent of the units restricted to tenants earning between 30 and 60 percent of the area MFI.

Orlando CSA AA

The level of CD lending in the Orlando CSA AA is excellent. WFBNA made 55 CD loans in its AA for a total of $544.2 million, which represents 49.8 percent of allocated tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified affordable housing needs in the AA. The bank made 48 loans totaling $538.4 million (99 percent) for the purpose of affordable housing. Additionally, the bank extended five CD loans totaling $3 million for the primary purpose of community services to LMI individuals.

Examples of CD loans in the AA include:

- In February 2018, WFBNA provided a $23.4 million loan for an LIHTC affordable housing development located in Orlando, Florida, with 98 percent of the units restricted to tenants earning between 30 and 60 percent of the area MFI.
- In May 2018, WFBNA renewed a $500,000 working capital line of credit to a non-profit organization that serves as the lead agency in the privatization of foster care services. The agency develops and manages a comprehensive, community-based system of care for abused, neglected and abandoned children and their families. A majority of the clients are LMI families.

<u>Tampa MSA AA</u>

The level of CD lending in the Tampa MSA AA is excellent. WFBNA made 27 CD loans in its AA for a total of $124.4 million, which represents 11.2 percent of allocated tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified affordable housing needs in the AA. The bank made 14 loans totaling $60 million (52 percent) for the purpose of affordable housing. Additionally, the bank extended 10 CD loans totaling $43.8 million for the primary purpose of community services to LMI individuals.

Examples of CD loans in the AA include:

- In February 2018, WFBNA provided an $11 million loan for a multifamily housing development located in a low-income census tract in Tampa, FL. The development consists of 223 one-bedroom units, 18 two-bedroom units, with 100 percent of the average rent rates below the 2018 Fair Market Rent for the area and 100 percent of the units affordable to tenants earning between 41 and 53 percent of the 2017 area MFI of $59,800.
- In June 2015, WFBNA renewed a $12.9 million working capital line of credit to an organization licensed by the Florida Department of Children and Families for its drug and alcohol treatment and prevention programs. The CD loan had a primary purpose of community services to LMI individuals. All of its clients are LMI as they earn less than 80 percent of the area MFI.

Product Innovation and Flexibility

<u>Miami CSA AA</u>

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 140 loans totaling $19.6 million to LMI homebuyers that qualified under this program.

<u>Orlando CSA AA</u>

The institution makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. The bank launched the NeighborhoodLIFT program in the Orlando CSA AA in November 2018 and more than 500 potential homebuyers attended the event. Of the 500 in attendance, WFBNA originated 182 mortgage loans totaling $30 million. Under the *your*FirstMortgage loan program the bank has funded 185 loans totaling $26.9 million to LMI homebuyers that qualified under this program.

Tampa MSA AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 158 loans totaling $20.1 million to LMI homebuyers that qualified under this program.

Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding the programs noted above.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Lending Test in the Cape Coral CSA, Crestview MSA, Gainesville MSA, Jacksonville MSA, Lakeland MSA, Ocala MSA, Panama City MSA, Tallahassee MSA, and FL Combined NonMetro AAs is consistent with the bank's overall excellent performance under the Lending Test in the FS areas. Performance in the Homosassa Springs MSA, North Port CSA, Palm Bay MSA, Pensacola MSA, and Sebring MSA AAs is weaker than the bank's overall performance due primarily to lower or no volume of CD lending. Performance in these LS AAs did not affect the bank's overall rating for the state.

Refer to Tables O through T in the State of Florida section of appendix D for the facts and data that support these conclusions.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of Florida is rated High Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Miami CSA and Orlando CSA AAs is excellent. Performance in the Tampa MSA AA is adequate.

Qualified Investments

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

<u>Miami CSA AA</u>

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 14.7 percent of tier 1 capital allocated to the AA.

The investments and grants reflect excellent responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 97 percent of the bank’s CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 805 grants totaling $14.2 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved numerous complex LIHTC and NTMC projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In October 2015, WFBNA invested $12.9 million for the construction of a 121-unit LIHTC affordable housing development located in Miami Gardens, Florida. Units are restricted to tenants earning between 37 and 60 percent of the area MFI. This activity is responsive to the identified need for affordable housing. WFBNA demonstrated multi-faceted support by providing both the construction loan ($6 million) and equity investment in support of this affordable housing development.
- In October 2014, WFBNA made a $10 million NMTC investment for the development of four grocery stores in rural Oklahoma, Texas, and Virginia, as well as one metro market in Florida. Of this total investment, $4.2 million was allocated to the Lakewood, Florida location. This NMTC transaction will provide the majority of the financing needed to finance the development of four new supermarket stores in LMI communities as noted above. The four proposed stores should help to create an estimated 44 permanent jobs, 55 construction jobs, and provide new affordable fresh food options to approximately 83,000 low-income community residents.
- During the evaluation, WFBNA provided four grants totaling $1.6 million to several small business organizations through the Small Business DCC Program benefiting small businesses in Florida including the Miami CSA AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.
- During the evaluation, WFBNA provided 20 grants totaling $1.1 million to several housing organizations through the PMP for affordable housing in the Miami CSA AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

<u>Orlando CSA AA</u>

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 12.8 percent of tier 1 capital allocated to the AA.

The investments and grants reflect excellent responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 86.8 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 386 grants totaling $13 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved several complex projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In November 2016, WFBNA invested $22.4 million for the construction of a 120-unit LIHTC affordable housing complex located in Apopka, Florida. Units are restricted to tenants earning between 40 and 60 percent of the area MFI. This activity is responsive to the identified need for affordable housing. WFBNA demonstrated multi-faceted support by providing both the construction loan ($10 million) and equity investment in support of this affordable housing development.

- In August 2014, WFBNA invested $15.5 million for the construction of an 86-unit LIHTC affordable housing development located in Kissimmee, Florida. The development will be a newly constructed 86-unit project consisting of one 7-story concrete building. The property will target seniors age (55+), with nine units set aside for seniors earning 35 percent of area MFI and 77 units for seniors earning 60 percent of area MFI. This activity is responsive to the identified need for affordable housing.
- During the exam timeframe, WFBNA provided three grants totaling $250,000 to two housing organizations through the PMP for affordable housing in the Orlando CSA AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

<u>Tampa MSA AA</u>

The institution has an adequate level of qualified CD investments and grants, although rarely in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 5.7 percent of tier 1 capital allocated to the AA.

The investments and grants reflect good responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 80.9 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 360 grants totaling $5.2 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved several complex LIHTC and NMTC projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In October 2015, WFBNA invested $12.45 million for the rehabilitation and construction of a 95-unit LIHTC affordable housing development located in Tarpon Springs, Florida. All of the units are restricted to senior residents who will pay no more than 30 percent of their income towards housing. The renovation will provide safer and improved replacement housing for seniors making less than 60 percent of the Very Low Income as defined by HUD. This investment is responsive to the need for affordable housing. WFBNA also demonstrated leadership and multi-faceted support by providing a $3.5 million construction loan and equity investment to support this affordable housing development. This investment is also complex involving multiple parties.
- During the exam timeframe, WFBNA provided a $200,000 grant to a local small business corporation through the Small Business DCC Program benefiting small businesses in Florida including the Tampa MSA AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Investment Test in the Crestview MSA, Lakeland MSA, Panama City MSA, Pensacola MSA, Tallahassee MSA, and FL Combined NonMetro AAs is consistent the bank's overall excellent performance in the Investment Test in the FS areas. Performance in the Cape Coral CSA, Gainesville MSA, and Jacksonville MSA AAs is weaker than the bank's overall performance. In addition, performance in the Homosassa Springs MSA, North Port CSA, Ocala MSA, Palm Bay MSA, and Sebring MSA AAs is significant weaker and overall rated as poor. The weaker performance was primarily due to a lower percentage of CD investments. Performance differences in the LS AAs including the Tampa MSA AA did impact the overall Investment Test rating for the State of Florida. As such, the bank's overall Investment Test rating for the State of Florida was downgraded to High Satisfactory.

SERVICE TEST

The bank's performance under the Service Test in Florida is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Miami CSA and Orlando CSA AAs is excellent. Performance in the Tampa MSA AA is good.

Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the institution's AAs, particularly LMI geographies and/or LMI individuals.

Miami CSA AA

As of December 31, 2018, WFBNA operates 218 branches and 494 ATMs in the Miami CSA AA. Of these branches, 216 are full-service locations and two are limited-service branches. There are nine branches in low-income geographies and 63 branches moderate-income geographies. The branch distribution in low-income geographies is near to the percentage of the population in low-income geographies and the branch distribution in moderate-income geographies exceeds the percentage of the population in moderate-income geographies in the AA. When considering an additional 35 branches within close proximity to LMI geographies, the bank's branch distribution further exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank opened three branches in moderate-income, five branches in middle-income, and one branch in a geography where income is unknown since the last evaluation. The bank closed one branch in low-income, one branch in moderate-income, four branches in middle-income, and three branches in upper-income geographies since the last evaluation. The closure of branches in LMI geographies did not negatively impact the distribution of branches relative to the population residing in those geographies. The closures were partially offset by the opening of additional branches in LMI geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. While there are slight variations in opening or closing times, generally, branches are open Monday through Friday from 9:00 am to 5:00 pm. Of the total branches, including branches in LMI geographies, 171 are also open on Saturdays. All WFBNA services are available at all branches and all ADS discussed bank-wide are available in this AA.

Orlando CSA AA

As of December 31, 2018, WFBNA operates 79 branches and 144 ATMs in the Orlando CSA AA. Of these branches, 77 are full-service locations and two are limited-service branches. There are two branches in low-income geographies and 29 branches moderate-income geographies. The branch distribution in LMI geographies exceeds the percentage of the population in LMI geographies in the AA. When considering an additional nine branches within close proximity to LMI geographies, the bank's branch distribution further exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank opened one branch in moderate-income and one branch in upper-income geographies since the last evaluation. The bank closed one branch in moderate-income, four branches in middle-income, and two branches in upper-income geographies since the last evaluation. The closure of branches in moderate-income geographies did not negatively impact the distribution of branches relative to the population residing in those geographies and the closures were offset by the opening of additional branches in moderate-income geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. While there are slight variations in opening or closing times, generally, branches are open Monday through Friday from 9:00 am to 5:00 pm. Of the total branches, including branches in LMI geographies, 47 are also open on Saturdays. All WFBNA services are available at all branches and all ADS discussed bank-wide are available in this AA.

Tampa MSA AA

As of December 31, 2018, WFBNA operates 76 branches and 146 ATMs in the Tampa MSA AA. All of these branches are full-service locations. There are four branches in low-income geographies and 19 branches moderate-income geographies. The branch distribution in LMI geographies exceeds the percentage of the population in LMI geographies in the AA. When considering an additional eleven branches within close proximity to LMI geographies, the bank's branch distribution further exceeds demographics.

The institution's opening and closing of branches generally not adversely affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank did not open any branches in the AA since the last evaluation. The bank closed one branch in low-income, two branches in moderate-income, five branches in middle-income, and two branches in upper-income geographies since the last evaluation. The closure of branches in moderate-income geographies was to consolidate with other branches nearby and did not negatively impact the distribution of branches relative to the population residing in those geographies. The bank still maintains 23 active branches or 30.3 percent within LMI geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. While there are slight variations in opening or closing times, generally, branches are open Monday through Thursday from 9:00 am to 5:00 pm and Fridays from 9:00 am to 6:00 pm. Of the total branches, including branches in LMI geographies, 51 are also open on Saturdays. All WFBNA services are available at all branches and all ADS discussed bank-wide are available in this AA.

Community Development Services

The institution is a leader in providing CD services.

Miami CSA AA

The level of CD services in the Miami CSA AA is excellent. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 1,935 CD service activities to 460 organizations since the last evaluation, logging a total of 5,351 qualified hours within this AA. A majority (89 percent) of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing (5 percent), economic development (4 percent) and revitalization or stabilization (2 percent). The bank's assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- One WFBNA team member provided 142 hours of Board service and two WFBNA team members provided 10 hours of financial education to a local affiliate of an organization that supports positive youth development for children facing adversity through volunteer mentors. According to the organization, 75 percent of its clients are LMI.
- One WFBNA team member provided 99 hours of Board service and five WFBNA team members provided 32 hours of financial education to a local affiliate of an organization that provides financial education, work readiness skills, and entrepreneurship to students from kindergarten through high school. According to the organization, 63 percent of its student clients are LMI.
- A WFBNA team member provided 80 hours of technical expertise serving as a board member to a nonprofit organization that focuses on comprehensive community revitalization in areas of

public safety, housing, health and wellness, neighborhood beautification, feeding programs, seniors and other social services.

Orlando CSA AA

The level of CD services in the Orlando CSA AA is excellent. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 487 CD service activities to 146 organizations since the last evaluation, logging a total of 1,693 qualified hours within this AA. A majority (69 percent) of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing (18 percent), economic development (12 percent), and revitalization or stabilization (1 percent). The bank's assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- Two WFBNA team members provided 196 hours of Board service as well as technical assistance and financial education to a community development financial institution. The mission of the organization is to develop and promote black small businesses by providing loan capital, training, and education as well as provide an environment conducive to their development.
- One WFBNA team member provided 144 hours of Board service and technical assistance to a nonprofit organization dedicated to preserving affordable homeownership by repairing the homes of low-income elderly and disabled individuals. According to the organization, all of its clients are LMI.
- A WFBNA team member provided 34 hours of board service to an organization that develops and promotes diverse small businesses by providing capital, training, and education. This activity is responsive to the identified need for small business assistance, and Wells Fargo's support of this organization is multi-faceted as demonstrated by multiple services and an investment.

Tampa MSA AA

The level of CD services in the Tampa MSA AA is excellent. Bank records show that employees

provided their financial or job-specific expertise and/or technical assistance for 701 CD service activities to 158 organizations since the last evaluation, logging a total of 1,811 qualified hours within this AA. A majority (87 percent) of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted economic development (7 percent) and affordable housing (6 percent). The bank's assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- One WFBNA team member provided 81 hours of Board service and another team member provided three hours of financial education to an organization that provides shelter and services to victims of domestic violence and sexual assault. According to the organization, over 80 percent of its clients are LMI individuals.
- Two WFBNA team members provided 60 hours of Board service as well as technical assistance and financial education to an economic development organization that assists minority owned businesses to succeed. According to the organization, 80 percent of its clients are small businesses.

- A WFBNA team member provided 46 hours of board service for the Minority Enterprise Development Corporation of Tampa Bay, Inc. This organization works to insure the success of minority-owned small businesses in the Tampa Bay area.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Service Test in the Crestview MSA, Gainesville MSA, Lakeland MSA, North Port CSA, Ocala MSA, Palm Bay MSA, Pensacola MSA, Sebring MSA, Tallahassee MSA, and FL Combined NonMetro AAs is consistent with the bank's overall excellent performance under the Service Test in the FS areas. The bank's performance under the Service Test in the Cape Coral CSA, Homosassa Springs MSA, Jacksonville MSA, and Panama City MSA AAs is weaker than the bank's overall performance due primarily to a lower branch distribution in LMI geographies. Performance in the LS AAs did not impact the overall Service Test rating for the state.

STATE RATING

State of Georgia

CRA rating for the State of Georgia[26]: Outstanding
The Lending Test is rated: Outstanding
The Investment Test is rated: Low Satisfactory
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Excellent lending activity;
- Good geographic distribution of loans;
- Good borrower distribution of loans;
- WFBNA is a leader in providing CD loans, which has a significant positive impact on the Lending Test;
- WFBNA's use of flexible products has a positive impact on the Lending Test;
- Adequate level of CD investments;
- Retail delivery systems are readily accessible to all portions of the AA; and
- WFBNA is a leader in providing CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in Georgia

WFBNA delineated seven AAs within Georgia including the Atlanta-Athens-Clarke-Sandy Springs, GA CSA (Atlanta CSA AA); Savannah-Hinesville-Statesboro, GA CSA (Savannah CSA AA); Brunswick, GA MSA (Brunswick MSA AA); Chattanooga-Cleveland-Dalton, GA CSA (Chattanooga CSA AA); Macon-Bibb County-Warner Robins, GA CSA (Macon CSA AA); Rome, GA MSA (Rome MSA AA); and GA Combined non-metropolitan (GA Combined NonMetro AA). The Atlanta CSA and Savannah CSA AAs received FS reviews. The two areas accounted for the largest portion of the lending (92.4 percent) and deposits (95.8 percent) amongst the AAs in Georgia. Refer to Appendix A for a complete description of each AA. Georgia represents the 6th largest rated area by deposits. WFBNA has $34.7 billion deposits representing 2.7 percent of adjusted deposits in Georgia. WFBNA operates 226 branches and 658 ATMs in Georgia representing 4.0 percent of branches and 4.9 percent of the bank's ATMs. The bank originated or purchased $57.7 billion in loans or 3.1 percent of total reported loan originations and purchases during the evaluation period. The bank's primary loan products in Georgia are home mortgage loans and small loans to businesses.

Atlanta CSA AA

Within the Atlanta CSA AA, the bank had $31.8 billion in deposits and ranked second amongst 104 depository institutions in the market with 18.3 percent market share. The top depository institutions in terms of deposit market shares were SunTrust Bank in first with 26.9 percent and Bank of America in third with 18.1 percent. WFBNA operates 187 branches and 573 ATMs in the AA.

[26] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

Savannah CSA AA

Within the Savannah CSA AA, the bank had $1.4 billion in deposits and ranked second amongst 26 institutions in the market with 16.2 percent market share. SunTrust Bank and Bank of America ranked first and third with 22.9 percent and 12.4 percent market share, respectively. WFBNA operates 15 branches and 43 ATMs in the AA.

Demographic Data

Atlanta CSA AA

The following table provides a summary of the demographics that includes housing and business information for the Atlanta CSA AA. Table A indicates that the volume of OOUs is very small in the low-income CTs and almost 39 percent of families in the AA are LMI. The area's median housing value in the Atlanta CSA AA is 3 times the area's highest median income, but 3.8 times moderate-, and 6.1 times low-income, indicating a limited proportion of OOUs are affordable to LMI. Median rents and the moderate percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Economic Data

Athens-Clarke County, GA MSA

According to the April 2019 Moody's Analytics report, the Athens economy is strong. Annual job growth clocks in at nearly 4 percent which is among the fastest rates nationally. Nearly all industries are performing well. State government payrolls are the standout, responsible for nearly one-third of employment additions over the past year. Job gains are expected to slow as the labor market tightens. Labor market tightness is putting upward pressure on wages, as hourly earnings growth is picking up.

Major area employers include University of Georgia (UGA), St. Mary's Hospital, and Caterpillar. UGA remains a driving force of the economy as the swelling student body enabled consumer industries to ramp up hiring in recent years. The pace of in-migration is more than twice that of the South with an influx of new students, residents, and tourists sustaining growth in consumer-reliant industries. Still, laggard wage gains will hold back more significant net hiring. The recently approved $171 million expansion of Piedmont Athens Regional Medical Center will set the stage for healthcare to play a larger role in the economy as the renovation and expansion will enable the hospital to handle higher patient volumes.

Buoyed by the strength of the labor market and robust population gains, house price increases are exceeding those of the state and nation by a wide margin. According to the U.S. BLS, the unemployment rate in June of 2018 was 4.3 percent, down from 9.2 percent at the beginning of the evaluation period. The MSA unemployment rate is similar to the overall State of Georgia at 4.3 percent.

Atlanta-Sandy Springs-Roswell, GA MSA

According to the August 2018 Moody's Analytics report, the Atlanta economic expansion stabilized with job growth just above the U.S. average but behind the rate in the rebounding South after sliding for more than two years. Growth in office-using industries is underway led by business and professional services, recouping earlier office job losses and slowing in the economy but still less growth than top peer areas. New migrants will help ease worker shortages and bolster professional/business services, while higher incomes and business travelers will aid consumer industries. Longer term, an educated workforce, robust in-migration, and an airport with direct connections around the globe will enable this area to outperform the U.S. Strong income growth is lifting consumer industries and the housing market, though affordability is fast deteriorating.

Single-family housing is modestly overvalued and though affordability eroded significantly, it is still higher than nationally and household formation in Atlanta is about twice the U.S. rate. There is some risk of overbuilding in the high end of the multifamily market, but residential real estate is primed for solid growth. Major area employers include Delta Air Lines, Wal-Mart, and The Home Depot. According to the U.S. BLS, the unemployment rate in 2nd quarter of 2018 was 4.2 percent, down from 9.3 percent at the beginning of the evaluation period. The MSA unemployment rate is slightly lower than the overall State of Georgia at 4.3 percent.

Gainesville, GA MSA

According to the April 2019 Moody's Analytics report, the Gainesville timely labor force additions are helping the area retains its position as a top regional performer. Late-year workforce additions in 2018 are allowing employers to maintain a breakneck pace of hiring. Population-dependent industries, namely retail, leisure/hospitality and education/healthcare are contributing the most to Gainesville's success, with each handily outperforming their counterparts in Georgia and the U.S. Goods producers are expanding at a swift pace despite a stall in manufacturing. Manufacturing and medical centers are economic drivers in the area. Tariffs and trade policy concerns are weighing on the industry as Gainesville is the fourth most export-dependent area in Georgia behind the state's three coastal metro areas. Tariffs on poultry exports to China will hurt local food processors which employ just over half of all factory workers. Thus, even though domestic demand for poultry is breaking records, industrial production will grow more slowly in coming quarters and limit the need for labor. Healthcare will help pick up some of the slack from manufacturing and will be a key source of growth for Gainesville in the near and medium term. Though population growth in 2018 slowed to 1.4 percent, the pace exceeds the Georgia and U.S. averages and the local senior cohort is growing at a well above-average rate of near 5 percent per year.

Gainesville's proximity to Atlanta creates more opportunities for local job seekers including high-wage jobs and helps attract new households fueling strong demand for housing. Moody's reports nearly 24 percent of Gainesville residents work in Atlanta, and a lower cost of living in Gainesville could entice more to relocate. Major area employers include Northeast Georgia Health System, Fieldale Farms Corp., and Pilgrims Pride Poultry Co. According to the U.S. BLS, the unemployment rate in the 4th quarter of 2018 was 3.6 percent, down from 8.2 percent at the beginning of the evaluation period. The MSA unemployment rate is lower than the overall State of Georgia at 4.3 percent.

Community Contacts

The analysis takes into consideration comments provided by four community contacts that serve the bank's Atlanta CSA AA. One of the four community contacts represents a government public housing authority serving Newton County in the AA. One community contact is an economic development agency serving the city of Atlanta and Fulton County in the AA. Another contact is a housing agency serving the AA and one is a small business development agency serving 68 counties within the AA.

The community contact contacted from the economic development and the housing agencies commented that North Georgia and metro Atlanta's economic condition has generally improved, since the end of the financial crisis. The demographics for the metro are varied and are comprised of high, moderate, and low-income communities. The banking and credit needs of all citizens are generally met through a wide array of financial institutions and community development organizations in the AA. According to the contact, there is ample opportunity for local financial institutions to assist in the affordable housing programs offered by non-profits in the AA. The community contact from the public housing agency commented there is a critical need for affordable housing specifically single-family housing and multi-family rentals in the AA. The contact mentioned there is a year-long waiting list for people in need of affordable rental housing as well as a need for affordable homeownership opportunities for residents who were trying to move on. The contact mentioned several opportunities for bank participation beyond the current efforts including offering FHA loans to LMI first time homebuyers and volunteers to provide financial literacy training to LMI people in the AA.

The predominant housing problem facing LMI families and individuals is the housing cost burden. In Fulton County, households are paying more than 30 percent of their income toward their housing costs. Affordability is a critical issue for very low and low-income households. Affordable rental properties are critical to the stability of the community. Yet, at least one-third of current households cannot reasonably afford to purchase a home and almost one-fourth cannot afford to rent decent housing. Escalating land and construction costs have priced the LMI family out of the marketplace. Potential

LMI homebuyers often face the challenge of having enough cash at closing for the down payment and closing costs. Credit is also an issue for many who live paycheck to paycheck and lack budgeting skills. Many of the areas in the southern part of Fulton County experienced the greatest decline in home values. There is ample opportunity for small businesses and currently there is a high demand for SBA lending in the Atlanta Metro market.

The bank conducted research in the AA and identified community needs for affordable housing serving LMI families, financial education for the unbanked and underbanked individuals, small business assistance, and Workforce Development/Job Readiness to assist individuals.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business loans, particularly those for start-up businesses and micro-loans are in high demand, and represent a primary credit need for the Atlanta CSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals. There are also opportunities for financial institutions to perform more outreach to minority small business throughout about available lending programs in the assessment area.

Demographic Data

<u>Savannah CSA AA</u>

The following table provides a summary of the demographics that includes housing and business information for the Savannah CSA AA. Table A indicates that the volume of OOUs is very small in low-income CTs and over 38 percent of families in the AA are LMI. The area's median housing value in the Savannah CSA AA is 2.9 times the area's highest median income, but 3.7 times moderate-, and 5.9 times low-income, indicating a limited proportion of OOUs are affordable to LMI. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Economic Data

<u>Savannah, GA MSA</u>

According to the April 2018 Moody's Analytics report, the Savannah economy is advancing at the slowest pace since 2010 and growth has decelerated faster than in most other Georgia metro areas in the past year, despite a pickup at Savannah's factories and strong port activity. Services, especially brick-and-mortar retail, leisure/ hospitality and financial, have lost steam. Finding qualified workers is a greater hurdle now that the expansion is in a late-cycle phase. Savannah's port will become an even more important growth driver, but the outlook is not without downside risk. Larger ships arriving via the expanded Panama Canal have lifted cargo volumes by 9 percent since July. Construction of a rail terminal will make it possible to move large cargo to markets in the Midwest. Rail expansion will hurt trucking in Savannah, and the trade war with China could lead to declining port activity. About 8 percent of the port's shipments are commodities targeted by tariffs and a full-blown trade war would cost jobs and incomes. Savannah's factories are adding jobs at twice the U.S. pace, but Moody's predicts producers will struggle to maintain this edge with costly labor in a fully employed economy and aerospace payrolls accounting for more than half of Savannah's factory jobs are at risk with U.S. import tariffs on aluminum and steel.

Healthier household balance sheets and steady in-migration are aiding single-family housing. Sales are up and permits hit a cycle high in the first quarter. The economy is driven by the logistics, defense, and tourism. Major employers include Gulfstream Aerospace Corp., Memorial health University Medical Center, and Ft. Stewart/Hunter Army Airfield. According to the U.S. BLS, the unemployment rate in the second quarter of 2018 was 4.0 percent, down from 9.5 percent at the beginning of the evaluation period. The MSA unemployment rate is similar to the overall State of Georgia at 4.3 percent.

<u>Hinesville, GA MSA</u>

According to the April 2019 Moody's Analytics report, the Hinesville economy is improving and job growth is catching up to the state and national averages. Federal employment at Fort Stewart, the economy's bedrock, is relatively stable, goods-producing employment is trending up, and private services have made up the ground lost a year earlier. According to the Moody's Analytics Industrial Diversity Index, Hinesville is more dependent on a single employer than almost any other metro area in the U.S. While more job growth in higher-value-added industries is needed, Hinesville will have difficulty attracting such investment given its low educational attainment and fluctuating population. Longer term, poor industrial diversity, low per capita income, and a lack of dynamic drivers will keep Hinesville one of the South's underperformers.

The housing market has contributed more to growth in recent months. Single-family housing starts are at their highest point since 2015, and apartment construction is on the upswing. Major employers include Fort Stewart, SNF, and Liberty County Medical Center. According to the U.S. BLS, the unemployment rate in June of 2018 was 4.6 percent, down from 9.4 percent at the beginning of the evaluation period. The MSA unemployment rate is lower than the overall State of Georgia at 4.3 percent.

Community Contacts

The analysis takes into consideration comments provided by a recent community contact in conjunction with this evaluation that serves the bank's Savannah CSA AA. The community contact was with an affordable housing organization and the representative indicated that the overall short-term economic outlook for the AA is positive. The contact also revealed that there is a limited amount of affordable housing available for LMI families in the AA. The contact noted that there are needs for business lending and special purpose lending as it relates to providing affordable housing offered through the non-profit. The contact also stated that a shortage in the housing market continues to exist even with pre-crisis construction levels. The community contact also mentioned assistance is needed with mortgage servicing for loans originated by the non-profit and an outlet to sell portions of their mortgage portfolio to local financial institutions.

Considering the information from the community contacts and bank management as well as demographic and economic data, small business and affordable home mortgage loans represent a primary credit need for the Savannah CSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals. Furthermore, the Savannah CSA AA has CD needs including affordable housing and economic development.

Scope of Evaluation in Georgia

The rating for the State of Georgia is primarily based on FS evaluations of the bank's performance in the Atlanta CSA and Savannah CSA AAs; however, performance in each AA was considered. Conclusions where a LS review affected the CRA Rating for the state are addressed within their respective tests. LS procedures were performed for the Brunswick MSA AA, Chattanooga CSA AA, Macon CSA AA, Rome MSA AA, and the GA Combined NonMetro AA. The State of Georgia is the sixth largest rated area and along with 12 other rated areas represents the bank's most significant markets in terms of lending, deposit, and branch distribution. Georgia represents a sizeable portion of the bank's overall lending, investments, and services; therefore, the performance in the state was weighted more heavily in determining the bank's overall CRA.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN GEORGIA

LENDING TEST

The bank's performance under the Lending Test in Georgia is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Atlanta CSA is excellent and performance in the Savannah CSA AAs is good.

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and community development relative to its capacity based on deposits, competition, and market presence.

Number of Loans*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State Loans	%State Deposits
Atlanta CSA	213,719	101,987	859	119	316,684	86.4	91.7

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Atlanta CSA AA

WFBNA ranked second in deposits with 18.3 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 9.7 percent market share. There is strong competition as reflected by the 832 lenders and 104 depository institutions in the AA. The top second and third lenders in terms of market share were Quicken Loans with 5.3 percent and SunTrust Bank with 4.8 percent.

In small loans to businesses, WFBNA ranked third with a market share of 8.8 percent. There is also strong competition as reflected by the 207 lenders in the AA. The top two lenders in terms of market share were American Express with 28.0 percent and Bank of America with 10.0 percent.

<u>Savannah CSA AA</u>

WFBNA ranked second in deposits with 16.2 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 10.2 percent market share. There is strong competition as reflected by the 396 lenders and 26 depository institutions in the AA. The second and third lenders are PennyMac Loan Services with 5.0 percent market share and Quicken Loans with 4.5 percent market share.

In small loans to businesses, WFBNA ranked second with a market share of 7.7 percent. There is also strong competition as reflected by the 87 lenders in the AA. The top first and third lenders were American Express with a market share of 22.6 percent and Bank of America with a 7.1 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in the Atlanta CSA and Savannah CSA AAs.

<u>Atlanta CSA AA</u>

Home Mortgage Loans

Refer to Table O in the State of Georgia section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in LMI geographies substantially meets the aggregate distribution of loans in those geographies.
- The proportion of loans in low-income geographies is well below the proportion of OOUs and for moderate-income geographies is below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of Georgia section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is good.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for small business loans in LMI geographies substantially meets the aggregate distribution of loans and is below the proportion of businesses located in those geographies.

<u>Savannah CSA AA</u>

Home Mortgage Loans

Refer to Table O in the State of Georgia section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- For 2012-2016, the proportion of home mortgage loans in LMI geographies substantially meets the aggregate distribution of loans and is well below the proportion of OOUs in those geographies.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly higher than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of Georgia section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is good.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for small business loans in low-income geographies is below both the aggregate distribution of loans and the proportion of businesses located in those geographies.
- The bank's performance in moderate-income geographies exceeds both the aggregate distribution of loans and the proportion of businesses located in those geographies.

Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

<u>Atlanta CSA AA</u>

Home Mortgage Loans

Refer to Table P in the State of Georgia section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 6.1 times the income of low-income and 3.8 times the income of moderate-income borrowers, indicating a limited proportion of OOUs are affordable to LMI. Despite the affordability challenges, the bank's overall home mortgage lending to low-income borrowers in both periods, 2012-2016 and 2017-2018, exceeds the aggregate distribution of loans and is well below the proportion of families.
- The bank's overall home mortgage lending to moderate-income borrowers substantially meets the aggregate distribution of loans and is below the proportion of families.

Small Loans to Businesses

Refer to Table R in the State of Georgia section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Savannah CSA AA

Home Mortgage Loans

Refer to Table P in the State of Georgia section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 6 times the income of low-income and 3.7 times the income of moderate-income borrowers, indicating a limited proportion of OOUs are affordable to LMI. Despite the affordability challenges, the bank's overall home mortgage lending to low-income borrowers in both periods, 2012-2016 and 2017-2018, substantially meets the aggregate distribution of loans and is significantly below the proportion of families.
- The bank's overall home mortgage lending to moderate-income borrowers exceeds the aggregate distribution of loans and is below the proportion of families.

Small Loans to Businesses

Refer to Table R in the State of Georgia section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Community Development Lending

The institution is a leader in making CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

Atlanta CSA AA

The level of CD lending in the Atlanta CSA AA is excellent. WFBNA made 119 CD loans in its AA for a total of $1.1 billion, which represents 32.1 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified affordable housing and small business lending needs in the AA. The bank made 64 CD loans totaling $730 million (66.4 percent) particularly responsive to the identified need for affordable housing as well as 17 CD loans totaling $31.7 million for the purpose of economic development which are responsive to the identified need for access to capital for small business and for small business assistance. Additionally, the bank made 38 CD totaling $384.6 million for the primary purpose of community services to LMI individuals.

Examples of CD loans in the AA include:

- In July 2014 and renewed in November 2017, WFBNA provided a $125 million working capital line of credit to a nonprofit organization that provides social services such as hunger relief, housing, and homeless services, to help individuals and families overcome obstacles. All of its clients are LMI individuals as they earn less than 80 percent of the area MFI.
- In August 2018, WFBNA provided a $57.8 million loan for a multifamily housing development located in a moderate-income census tract in Marietta, GA. The development consists of 430 one-bedroom units, 250 two-bedroom units, and requires that 100 percent of the units available to tenants earning between 39.6 and 71.7 percent of the 2017 area MFI of $69,200.
- In December 2014, WFBNA provided a $5.3 million loan to fund the relocation of a small business. This loan was made in conjunction with the SBA's 504 CDC program, which is a long-term financing tool for economic development within a community.

Savannah CSA AA

The level of CD lending in the Savannah CSA AA is excellent. WFBNA made 22 CD loans in its AA for a total of $51.2 million, which represents 32.1 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified affordable housing needs in the AA. The bank made 9 CD loans totaling $40.5 million (79.0 percent) for the purpose of affordable housing which is a critical need in the AA. Additionally, the bank extended 13 CD loans totaling $10.8 million for the primary purpose of providing community services to LMI individuals.

Examples of CD loans in the AA include:

- In November 2018, WFBNA provided a $12.1 million loan for a multifamily housing development located in a moderate-income census tract in Savannah, GA. The development consists of 86 one-bedroom units, 91 two-bedroom units, with 100 percent of the units affordable to tenants earning between 44.2 and 77.1 percent of the 2018 area MFI of $65,200.
- In October 2014, WFBNA provided a $1.6 million community infrastructure term loan to an organization to finance the Head Start program. The private nonprofit agency provides a variety of programs and services to assist LMI residents of Savannah and Chatham County, as well as promoting cultural diversity throughout the city.

Product Innovation and Flexibility

Atlanta CSA AA

The institution makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. The bank launched the NeighborhoodLIFT program in the Atlanta CSA AA in May 2018 and nearly 500 potential homebuyers attended the event. Of the 500 in attendance, WFBNA originated 125 mortgage loans totaling $18.5 million. Under the *your*FirstMortgage loan program the bank has funded 501 loans totaling $70.9 million to LMI homebuyers that qualified under this program.

Savannah CSA AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 26 loans totaling $3.2 million to LMI homebuyers that qualified under this program.

Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding the programs noted above.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Lending Test in the Macon MSA AA is consistent with the bank's overall excellent performance under the Lending Test in the FS areas. The bank's performance in the Brunswick MSA, Chattanooga CSA, Rome MSA, and GA Combined NonMetro AAs is weaker than the bank's overall performance due primarily to a low level of CD lending. Performance differences in the LS AAs did not impact the Lending Test rating for the State of Georgia.

Refer to Tables O through T in the State of Georgia section of appendix D for the facts and data that support these conclusions.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of Georgia is rated Low Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Atlanta CSA and Savannah CSA AAs is adequate.

Qualified Investments										
	Prior Period*		Current Period		Total				Unfunded Commitments **	
Assessment Area	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Atlanta CSA	42	$15,538	983	$178,378	1,025	87.8	$193,916	74.8	4	$6,086

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

Atlanta CSA AA

The institution has an adequate level of qualified CD investments and grants, although rarely in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 5.4 percent of tier 1 capital allocated to the AA.

The investments and grants reflect adequate responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 88.9 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 768 grants totaling $22.6 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved several complex LIHTC projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In August 2013, WFBNA invested $28.4 million in a LIHTC fund. Of this total investment, $2.9 million was allocated to a development located in Marietta, Georgia, with 87 units restricted to tenants earning no more than 60 percent of the area MFI. This activity is responsive to the identified need for affordable housing.
- During the exam timeframe, WFBNA provided four grants totaling $351,600 to four housing organizations through the PMP for affordable housing in Georgia including the Atlanta CSA AA. Refer to the comments in the institution Community Development Initiatives Practices section of this public evaluation for additional details regarding this program.
- During the exam timeframe, WFBNA provided two grants totaling $700,000 to two small business organizations through the Small Business DCC Program benefiting small businesses in Georgia including the Atlanta CSA AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

Savannah CSA AA

The institution has an adequate level of qualified CD investments and grants, although rarely in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 8.5 percent of tier 1 capital allocated to the AA.

The investments and grants reflect adequate responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Only 37.7 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 58 grants totaling $805,000 to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution occasionally uses innovative and/or complex investments to support CD initiatives. CD Investments involved two complex projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers.

Examples of CD investments in the AA include:

- In November 2018, WFBNA invested $32.5 million in the National Equity Fund 2018, LP, a LIHTC fund. Of this total investment, $4.7 million was allocated to a development located in Savannah, Georgia, with 144 units restricted to tenants earning less than 60 percent of the area MFI. This activity is responsive to the identified need for affordable housing.
- In December 2013, WFBNA provided an $8.0 million NMTC investment in an education facility located in Savannah, Georgia to develop a new law school campus with NMTC proceeds specifically used to increase the opportunity for low-income students in the Southern Atlantic coastal region to study law. The law school strives to be considered “the school of opportunity” and will target students from the surrounding low-income communities and the part-time evening program will enable non-traditional students the opportunity to attend law school.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank’s performance under the Investment Test in the Brunswick MSA, Macon CSA, and GA Combined NonMetro AAs is stronger than the bank’s overall adequate performance in the Investment Test in the FS areas. The bank’s performance in the Chattanooga CSA and Rome MSA AAs is weaker than the bank’s overall performance. Performance differences in the LS AAs were primarily due to the volume of CD investments and did not impact the overall Investment Test rating for the State of Georgia.

SERVICE TEST

The bank’s performance under the Service Test in Georgia is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the service test, the bank’s performance in the Atlanta CSA AA is excellent and performance in the Savannah CSA AA is good.

Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the institution’s AAs, particularly LMI geographies and/or LMI individuals.

Distribution of Branch Delivery System

Atlanta CSA AA

As of December 31, 2018, WFBNA operates 187 branches and 573 ATMs in the Atlanta CSA AA. Of these branches, 183 are full-service locations and four are limited-service branches. There are 14 branches in the low-income geographies and 50 branches in moderate-income geographies. The branch distribution in LMI geographies exceeds the percentage of the population in LMI geographies in the AA. When considering an additional 21 branches within close proximity to LMI geographies, the bank's branch distribution further exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank opened three branches in middle-income and two branches in upper-income geographies since the last evaluation. The bank also opened one branch in a geography where income level of the census tract is unknown. The bank closed three branches in moderate-income, three branches in middle-income, and 14 branches in upper-income geographies since the last evaluation. The bank also closed one branch in a geography where income level of the census tract is unknown. The closure of branches in moderate-income geographies was to consolidate with other branches nearby and did not negatively impact the distribution of branches relative to the population residing in those geographies. The bank still maintains 54 active branches or 31.7 percent within LMI geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Thursday from 9:00 am to 5:00 pm and 9:00 am to 6:00 pm on Friday. Of total branches, 134 are also open on Saturday from 9:00 am to 1:00 pm. All WFBNA services are available at all branches and all ADS discussed bank-wide are available in this AA.

Savannah CSA AA

As of December 31, 2018, WFBNA operates 15 branches and 43 ATMs in the Savannah CSA AA. All of these branches are full-service locations. There are no branches in the low-income geographies and six branches in moderate-income geographies. The branch distribution in low-income geographies is significantly below the percentage of the population in low-income geographies and the branch distribution in moderate-income geographies significantly exceeds the percentage of the population in moderate-income geographies in the AA. When considering an additional six branches within close proximity to LMI geographies, the bank's branch distribution is near to demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank did not open any branches in the AA since the last evaluation. The bank closed one branch in moderate-income and one branch in upper-income geographies since the last evaluation. The closure of the one branch in a moderate-income geography did not negatively impact the distribution of branches relative to the population residing in moderate-income geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Thursday from 9:00 am to 5:00 pm and 9:00 am to 6:00 pm on Friday. Of total branches, eight are also open on Saturday from 9:00 am to 1:00 pm. All WFBNA services are available at all branches and all ADS discussed bank-wide are available in this AA.

Community Development Services

The institution is a leader in providing CD services.

Atlanta CSA AA

The level of CD services in the Atlanta CSA AA is excellent. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 1,243 CD service activities to 321 organizations since the last evaluation, logging a total of 5,073 qualified hours within this AA. A majority (99 percent) of the bank's assistance was to organizations that provide community services to LMI individuals and families and 1 percent to affordable housing organizations. The following are examples of CD services provided in this AA:

- One WFBNA team member provided 12 hours of Board service, technical assistance, and financial education and 126 team members provided 977 hours of financial education at a local affiliate of an organization that provides financial education, work readiness skills, and entrepreneurship to students from kindergarten through high school. According to the organization, 60 percent of its student clients are LMI.
- One WFBNA team member provided 150 Board service and technical assistance at an emergency services and housing assistance organization. According to the organization, all of its clients are LMI.

Savannah CSA AA

The level of CD services in the Savannah CSA AA is adequate. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 85 CD service activities to 31 organizations since the last evaluation, logging a total of 226 qualified hours within this AA. A substantial majority of the bank's assistance was to local schools that provide community services to LMI individuals and families. The following are examples of CD services provided in this AA:

- Five WFBNA team members provided 38 hours of financial education at an elementary school. According to the NCES, 64 percent of students qualify for the federal FRL program.
- Three WFBNA team members provided 12 hours of financial technical assistance to a nonprofit organization that provides vital humanitarian and social services to Savannah's homeless and special needs communities. The programs address shelter, long and short-term housing, healthcare, behavioral counseling, substance abuse, job and life skills training and employment assistance. According to the organization, all of its clients are LMI.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Service Test in the Chattanooga CSA, Rome MSA, and GA Combined NonMetro AAs is consistent with the bank's overall excellent performance under the Service Test in the FS areas. The performance in the Brunswick MSA and Macon CSA AAs is weaker than the overall performance. These two LS AAs have very poor branch distribution in LMI geographies but including branches near to LMI geographies elevated the overall branch distribution to adequate. Performance differences in the LS AAs did not impact the overall Service Test rating for the State of Georgia

State Rating

State of Idaho

CRA rating for the State of Idaho[27]: Satisfactory
The Lending Test is rated: High Satisfactory
The Investment Test is rated: Low Satisfactory
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Good lending activity;
- Good geographic distribution of loans;
- Good borrower distribution of loans;
- Adequate level of CD loans;
- WFBNA's use of flexible products has a positive impact on the Lending Test;
- Adequate level of CD investments;
- Retail delivery systems are readily accessible to all portions of the AA; and
- WFBNA provides a relatively high level of CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in Idaho

WFBNA delineated seven AAs within Idaho including the Boise City, ID MSA (Boise City MSA AA); Coeur d'Alene, ID MSA (Coeur d'Alene MSA AA); Idaho Falls-Rexburg-Blackfoot, ID CSA (Idaho Falls CSA AA); Lewiston, ID MSA (Lewiston MSA AA); Pocatello, ID MSA (Pocatello MSA AA); Twin Falls, ID MSA (Twin Falls MSA AA); and the ID Combined non-metropolitan AA (ID Combined NonMetro AA). The Boise City MSA AA and ID Combined NonMetro AA received FS reviews. Refer to Appendix A for a complete description of each AA. The two areas accounted for the largest portion of the lending (67 percent) and deposits (71 percent) amongst the AAs in Idaho. Idaho represents the 24th largest rated area by deposits. WFBNA has $5.6 billion deposits representing 0.4 percent of adjusted deposits in the State of Idaho. WFBNA operates 72 branches and 85 ATMs representing 1.3 percent of the bank's branches and 0.6 percent of the bank's ATMs. The bank originated and purchased $11.2 billion in loans or 0.6 percent of total reported loan originations and purchases in Idaho during the evaluation period. The bank's primary loan products in the State of Idaho are home mortgage loans and small business loans.

<u>Boise City MSA AA</u>

Within the Boise City MSA AA, WFBNA has $2.8 billion in deposits and ranked first amongst 20 depository institutions in the market with 25.3 percent market share. The second and third largest banks in terms of deposits were U.S. Bank with a market share of 22.6 percent and KeyBank with a market share of 11.2 percent. WFBNA operates 22 branches and 29 ATMs in the AA.

[27] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

ID Combined NonMetro AA

Within the ID Combined NonMetro AA, WFBNA has $1.1 billion in deposits and ranked first amongst 21 depository institutions in the market with 22.4 percent market share. The second and third largest banks in terms of deposits were U.S. Bank with 18.8 percent market share and D.L. Evans Bank with 9.6 percent market share. WFBNA operates 25 branches and 28 ATMs in the AA.

Demographic Data

Boise City MSA AA

The following table provides a summary of the demographics that includes housing and business information for the Boise City MSA AA. Table A shows a very small proportion of tracts and population are located within the low-income geographies. The volume of OOUs is even smaller in the low-income tracts and over 37 percent of families in the AA are LMI. The area's median housing value in the Boise MSA AA is 3.3 times the highest MSA median income, but 4.2 times moderate-, and 6.7 times low-income, indicating a limited proportion of OOUs are affordable to LMI. Median rents and the significant percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Economic Data

Per the July 2018 Moody's Analytics report, Boise is a top performer with payroll growth twice the U.S. average. Rapid population growth is spurring hiring in consumer driven industries including retail, leisure/hospitality, and personal service firms. Despite the favorable migration flows and above average labor force growth, workers remain scarce with the unemployment rate sitting at 2.7 percent, down from

7.1 percent at the beginning of the evaluation period. The unemployment rate is comparable to the state of Idaho overall at 2.5 percent during the same period.

Boise's economy is driven by high tech, manufacturing, and retirees. According to Moody's, Boise's tech sector will expand for the rest of the year but the pace of hiring will fall below average. Boise is home to semiconductor manufacturer Micron, which is the areas' second largest employer.

Boise has emerged as a dynamic startup scene for small tech firms due in part to below-average business costs compared to other tech hubs in the West. These will gradually become a more central source of employment. The area's other top employers are St. Luke's Health System and Boise State University. The top economic sectors by employment are a virtual tie between Professional and Business Services, Government, and Education and Health Services.

Home sales over the last year are up and prices have risen by about ten percent, approximately twice the national average. Housing supply is not keeping up with demand and according to HUD there are about ten potential buyers for every house built in Boise. The tight labor market is partly to blame but also the fact that Boise's house prices are 75 percent below the national average may deter some builders looking for larger profits.

Community Contacts

The analysis takes into consideration comments provided by two community contacts pertaining to the Boise City MSA AA in conjunction with this evaluation. The contacts represent an affordable housing organization and a small business development center.

Per the affordable housing contact, economic conditions in the MSA are healthy due to low unemployment, high job growth projections, and a relatively low cost of living. However, the Boise housing market is in short supply and over-priced. While the pace of new construction is said to have returned to pre-crisis levels, demand for new housing is still outweighing supply.

The contact mentioned that participation by financial institutions is mainly limited to homebuyer education seminars. Potential opportunities to partner with community organizations exist and include special purpose lending services offering full financing of down payments, home rehabilitation projects, and financial coaching and counseling services. The contact also noted a business need for access to credit to finance the purchase of property to support the growth in agriculture and manufacturing industries.

Per the small business development contact, the Boise economy is doing well and growing with year-over-year increases in jobs created, sales growth, and new start-up businesses. Lenders are taking more risk since the economy is good. There has been an increase in SBA lending activity in the area and more equity capital investing. The area is significantly less expensive in terms of housing than Seattle or California. There has been an influx of Californians moving to Idaho for more affordable housing. Per the contact, the housing market has reached its peak and he expects it will decline over the next several years.

Area banking and credit needs include equipment loans, loans for operational expense, and inventory loans. The contact mentioned that small businesses, which he indicated are usually unbankable, are always looking for operating funds. The contact also noted that banks could increase their collaboration with organizations that promote small business economic growth. He specifically mentioned the Boise Startup Week, which is an event filled with activities to help small businesses grow.

The bank conducted research in the AA and identified community needs for affordable housing for LMI families, financial education for the unbanked and underbanked, homebuyer assistance to assist LMI borrowers, and homeless services.

Considering the information from community contacts and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Boise City MSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of tracts, population, OOUs, and small businesses coupled with limited home affordability for LMI individuals.

ID Combined NonMetro AA

The following table provides a summary of the demographics that includes housing and business information for the ID Combined NonMetro AA. Table A indicates that there are no low-income CTs and over 38 percent of families in the AA are LMI. The area's median housing value in the ID Combined NonMetro AA is 4 times the area's median income, but 5 times moderate-, and 7.9 times low-income, indicating a limited proportion of OOUs are affordable to LMI families. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

Assessment Area: ID Combined Non-Metros (2016)

Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #

Economic Data

According to the July 2018 Moody's Analytics report, Idaho's economy is white hot pushing the state to the top of the stellar Mountain West. Year-over-year growth in payroll employment is the fastest in the nation, performing nearly two times the national average over the past three years. Job growth has been bolstered by strong performance in manufacturing, healthcare and construction. However, wage growth remains subdued as hourly earnings have risen more slowly than the national average over the last several years due to a weak job mix. Per Moody's, Idaho is home to the highest share of low-wage jobs in the country. The major economic driver in the ID Combined NonMetro AA is agriculture. The largest counties in the AA by population are Bonner and Latah Counties. Major employers in Bonner County include Coldwater Creek (mail order catalog), Bonner General Hospital, and Litehouse (food manufacturer). In Latah County, the University of Idaho is the area's major employer and economic driver.

Idaho benefits from above average population growth and net migration. The area's housing affordability in relation to the West Coast makes Idaho an attractive destination for workers and business investment.

According to the U.S. BLS, the unemployment rates for July 2018 in the following counties range from a low of 1.4 percent (Teton County) to a high of 5.3 percent (Clearwater County) while the overall state average was 2.5 percent during the same period.

Community Contacts

The analysis takes into consideration comments provided by a community contact with an organization providing community services including education, employment, healthcare, and housing assistance throughout the State of Idaho.

The contact noted that the primary industry of Magic Valley is agriculture or agriculture related businesses. However, the area continues to become more diversified. Large employers include Amalgamated Sugar, Cassia Regional Medical Center, and Glanbia Foods, among others. The contact mentioned small business start-up financing as a specific need, though he noted it was not an issue with the financial institutions but rather his clients that do not seek the financing, rather they rely on cash or credit cards to finance business operations. The contact mentioned that he is working to educate his clients about commercial financing. The contact also stated that his clients have commented that financial institutions are not willing to take the time to bridge the language barrier to fully assist them in the process. He further noted that they worked with one local bank and that other institutions had not expressed interest about getting involved with their organization.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the ID Combined NonMetro AA. Opportunity exists to originate these types of loans throughout the AA including moderate-income areas.

Scope of Evaluation in Idaho

The rating for the State of Idaho is primarily based on FS evaluations of the bank's performance in the Boise City MSA and ID Combined NonMetro AAs; however, performance in each AA was considered. Conclusions where a LS review affected the CRA Rating for the state are addressed within their respective tests. LS procedures were performed for the remaining five AAs. A limited portion of the bank's overall lending, investments, and services were conducted in Idaho; therefore, the performance in Idaho received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN IDAHO

LENDING TEST

The bank's performance under the Lending Test in Idaho is rated High Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in both Boise City MSA and the ID Combined NonMetro AAs is good.

Lending Activity

Based on the tables below, lending levels reflect good responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to the bank's significant capacity based on deposits and market dominance.

Number of Loans*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State Loans	%State Deposits
Boise City MSA	21,196	11,314	463	18	32,991	42.9	50.9
Coeur d'Alene MSA	8,211	2,819	47	3	11,080	14.4	9.3
Idaho Falls CSA	6,006	2,843	365	9	9,223	12.0	8.8

Total	$9,346,029	$1,607,783	$253,614	$78,664	$11,286,090	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.** The Twin Falls MSA AA is a new AA due to OMB Census changes. Twin Falls MSA lending volume includes 2017-2018 data only. Lending volume from 12-16 were included with the ID Combined NonMetro AA.

Boise City MSA AA

WFBNA ranked first in deposits with 25.3 percent market share in the AA. In overall HMDA lending, WFBNA ranked second with 6.7 percent market share. Although WFBNA's HMDA market share is considerably lower than its deposit market share, lending competition was significantly stronger, reflected by the 321 lenders, than competition for deposits, where there were 20 depository institutions in the AA. The top lender in the market is Idaho Central Credit Union with 9.2 percent market share and the third top lender is Fairway Independent Mortgage Corp. with 6.5 percent market share.

In small loans to businesses, WFBNA ranked fourth out of 91 lenders with a market share of 10.0 percent; however, by dollar volume of loans, WFBNA ranked first in small loans to businesses with a market share 15.1 percent. The top lenders are U.S. Bank with a market share of 14.6 percent, American Express with a market share of 11.8 percent, and Chase Bank with a market share of 11.2 percent.

ID Combined NonMetro AA

WFBNA ranked first in deposits with 22.4 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 9.0 percent market share. Although WFBNA's HMDA market share is considerably lower than its deposit market share, lending competition was significantly stronger, reflected by the 283 lenders, than competition for deposits, where there were 20 depository institutions in the AA. The second and third top lenders in this market are U.S Bank with a market share of 5.4 percent and Quicken Loans with a market share of 4.8 percent.

In small loans to businesses, WFBNA ranked second out of 71 lenders with a market share of 13.3 percent; however, by dollar volume of loans, WFBNA ranked first in small loans to businesses with a market share 20.4 percent. The top lender is U.S. Bank with a market share of 17.6 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in its AAs.

Boise City MSA AA

Home Mortgage Loans

Refer to Table O in the State of Idaho section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in low-income geographies is well below the aggregate distribution of loans and is significantly below the proportion of OOUs in those geographies. Less weight was given to the bank's performance in low-income geographies due to the very small volume of tract, population, OOUs, and lending in low-income geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of Idaho section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for small business loans in LMI geographies exceeds the aggregate performance and is near to the proportion of businesses located in those geographies.

<u>ID Combined NonMetro AA</u>

Home Mortgage Loans

Refer to Table O in the State of Idaho section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- The AA contains no low-income tracts so our assessment focused on the bank's performance in moderate-income tracts.
- The bank's performance in 2012-2016 for home mortgage loans in moderate-income geographies is below both the aggregate distribution of loans and the proportion of OOUs in those geographies.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly higher than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of Idaho section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The AA contains no low-income tracts so our assessment focused on the bank's performance in moderate-income tracts.
- The bank's performance in both periods, 2012-2016 and 2017-2018, for small business loans in LMI geographies exceeds the aggregate performance and is near to the proportion of businesses located in those geographies.

Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

Boise City MSA AA

Home Mortgage Loans

Refer to Table P in the State of Idaho section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- The Boise MSA AA has homeownership affordability hurdles especially for LMI borrowers. As noted above, the area's median housing value is 6.7 times the income of low-income and 4.2 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI. Despite the affordability challenges, the bank's overall home mortgage lending in 2012-2016 to low-income borrowers substantially meets the aggregate distribution of loans and is well below the proportion of families.
- The bank's overall home mortgage lending to moderate-income borrowers is below both the aggregate lending and the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Idaho section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is excellent.

- For 2012-2016 combined, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is near to the percentage of small businesses located in the AA.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly below the combined performance in 2012-2016.

ID Combined NonMetro AA

Home Mortgage Loans

Refer to Table P in the State of Idaho section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- The ID Combined NonMetro AA has homeownership affordability hurdles especially for LMI borrowers. As noted above, the area's median housing value is 7.9 times the income of low-income and five times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI. Despite the affordability challenges, the bank's overall home mortgage lending in 2012-2016 to low-income borrowers exceeds the aggregate distribution of loans and is significantly below the proportion of families.

- The bank's overall home mortgage lending to moderate-income borrowers is below the aggregate lending and is well below the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Idaho section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Community Development Lending

The institution made an adequate level of CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

<u>Boise City MSA AA</u>

The level of CD lending in the Boise City MSA AA is good. WFBNA made 18 CD loans in its AA for a total of $30.2 million, which represents nine percent of tier 1 capital. CD lending performance has a positive impact on the lending test rating. The loans were responsive to the identified affordable housing needs in the AA. The bank made 7 loans totaling $17 million (56.3 percent) for the purpose of affordable housing which is an identified credit needs in the AA. Additionally, the bank extended 11 CD loans totaling $13.2 million for the primary purpose of community services to LMI individuals.

Examples of CD loans in the AA include:

- In October 2017, WFBNA provided a $7.2 million construction loan for a development in Nampa, ID. The project consists of 50 units of which 45 are reserved for senior households with incomes ranging from 30 to 55 percent of the area MFI. The activity is responsive to an identified need for affordable housing.
- In October 2018, WFBNA provided a $4.7 million term loan to a nonprofit organization whose purpose is to preserve the area's affordable housing stock and facilitate development of new housing in underserved areas of the state. The activity is responsive to an identified need for affordable housing.
- In April 2017, WFBNA provided a $1.0 million increase to an existing $1.0 million working capital line of credit to a nonprofit organization providing residential treatment, group homes, adoption, and other services for troubled youth and adolescents.

ID Combined NonMetro AA

The level of CD lending in the ID Combined NonMetro AA is poor. WFBNA made four CD loans in its AA totaling $3.0 million, which represents 2.4 percent of tier 1 capital. CD lending performance has a neutral impact on the lending test rating. Two loans totaling approximately $1 million addressed affordable housing which is an identified credit needs in the AA. Two other CD loans were allocated to revitalizing and stabilizing a distressed area within the AA.

Examples of CD loans in the AA include:

- In March 2014, WFBNA provided a $1.0 million working capital line of credit to a medical center located in a remote rural underserved middle-income tract. The center is designated as a Critical Access Hospital providing essential services to the community including LMI individuals. WFBNA renewed the line of credit in May 2015.
- In June 2013, WFBNA provided a $17.9 million line of credit to a Tax Credit Investment Fund, of which $462,000 was allocated to an affordable housing project in Moscow, ID that includes 62 affordable housing units. The loan proceeds were used to fund the gap between the receipt of capital contributions from investors and the payment of equity investments.

Product Innovation and Flexibility

Boise City MSA AA

The institution makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. The bank launched the NeighborhoodLIFT program in the Boise MSA AA in June 2017 and more than 100 potential homebuyers attended the event. Of the 100 in attendance, WFBNA originated 66 mortgage loans totaling $8.6 million. Under the *your*FirstMortgage loan program the bank has funded 20 loans totaling $3.5 million to LMI homebuyers that qualified under this program.

ID Combined NonMetro AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 15 loans totaling $1.6 million to LMI homebuyers that qualified under this program.

Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding the programs listed above.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Lending Test in the Coeur d'Alene MSA and Pocatello MSA AAs is consistent with the bank's overall good performance under the Lending Test in the FS areas. The bank's performance in the Idaho Falls CSA and Lewiston MSA AAs is stronger due to a higher volume of CD lending and strong geographic distribution. Performance in the Twin Falls MSA AA is weaker due to poor geographic distribution. Performance in these LS AAs did not affect the bank's overall rating for the State of Idaho.

Refer to Tables O through T in the State of Idaho section of appendix D for the facts and data that support these conclusions.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of Idaho is rated Low Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Boise City MSA AA is adequate and performance in the ID Combined NonMetro AAs is poor.

Qualified Investments										
	Prior Period*		Current Period		Total				Unfunded Commitments**	
Assessment Area	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Boise City MSA	26	$4,796	163	$10,444	189	56.8	$15,240	13.4		
Coeur d'Alene MSA	4	$2,812	23	$3,163	27	8.1	$5,975	5.3		
Idaho Falls CSA	4	$1,420	18	$61,877	22	6.6	$63,297	55.8	2	$1,765

Total	38	$9,795	295	$103,608	333	100.0	$113,403	100.0	3	$2,696

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

<u>Boise City MSA AA</u>

The institution has an adequate level of qualified CD investments and grants, although rarely in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 4.8 percent of tier 1 capital allocated to the AA.

The investments and grants reflect adequate responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 94.6 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 141 grants totaling $1.6 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution occasionally uses of innovative and/or complex investments to support CD initiatives. CD Investments involved several LIHTC complex projects where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In August 2016, WFBNA invested $43 million in an LIHTC fund. Of the total investment, $3.6 million was allocated to a property located in Nampa, Idaho, with 22 units restricted to tenants earning no more than 60 percent of the area MFI. This activity is responsive to the identified need for affordable housing.
- In June 2017, WFBNA provided three grants totaling $80,000 to three local housing partnership organizations to administer the NeighborhoodLIFT Down Payment Assistance program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.
- In May 2016, WFBNA provided a $300,000 grant to a local CDC organization through the Small Business DCC Program benefiting small businesses in the State of Idaho including the Boise MSA AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

<u>ID Combined NonMetro AA</u>

The institution has a poor level of qualified CD investments and grants, but not in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 0.7 percent of tier 1 capital allocated to the AA.

The investments and grants reflect poor responsiveness to the needs identified in the AA including affordable housing. Virtually all of the bank's CD investments are from prior period and focused on affordable housing which is an identified credit need in the AA. There are opportunities available within the AA for the bank to provide CD investments; however, the bank opted to provide smaller grants within the AA. Since the last evaluation, the bank provided 28 grants totaling $182,000 to organizations that primarily support affordable housing and community services to LMI individuals.

The institution rarely uses innovative and/or complex investments to support CD initiatives.

Example of a CD investment in the AA includes:

- During the exam timeframe, WFBNA provided six grants totaling $30,000 to an organization for its Homes on the Move program. The organization's mission is to develop permanently affordable housing for LMI individuals and families and to work with all interested public and private parties towards this objective. All of its clients served are considered LMI.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Investment Test in the Coeur d'Alene MSA AA is consistent with the bank's overall adequate performance in the Investment Test in the FS areas. Performance in the Idaho Falls CSA, Pocatello MSA, and Twin Falls MSA AAs is stronger than the overall performance due primarily to higher volume of CD investments. Performance in the Lewiston MSA AA is weaker due to a low volume of CD investments. Stronger performance in the Idaho Falls CSA, Pocatello MSA, and Twin Falls MSA AAs contributed to the bank's overall adequate rating for the State of Idaho.

SERVICE TEST

The bank's performance under the Service Test in Idaho is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in both the Boise City MSA AA is excellent and performance in the ID Combined NonMetro AA is good.

Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the institution's AAs, particularly LMI geographies and/or individuals.

Distribution of Branch Delivery System

Boise City MSA AA

As of December 31, 2018, WFBNA operates 22 branches and 29 ATMs in the Boise City MSA AA. All of these branches are full-service locations. There are three branches in low-income geographies and nine branches in moderate-income geographies. The branch distribution in both LMI geographies exceeds the percentage of the population in LMI CTs in the AA. When considering an additional four branches that directly border LMI geographies, the bank's distribution further exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed one branch in a low-income geography CT and two branches in moderate-income geography CTs since the last evaluation. The closure of branches in LMI geographies was to consolidate with other branches nearby and did not negatively impact the distribution of branches relative to the population residing in those geographies. The bank still maintains 12 active branches or 45.5 percent within LMI geographies.

Services and, where appropriate, business hours do not vary in a way that inconveniences the various portions of the AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Thursday from 9:00 am to 5:00 pm, and from 9:00 am to 6:00 pm on Friday. Eighteen of the 22 branches are also open on Saturdays from 9:00 am to 2:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

ID Combined NonMetro AA

As of December 31, 2018, WFBNA operates 25 branches and 28 ATMs in the ID Combined NonMetro AA. All of these branches are full-service locations. There are no low-income CTs in the AA. There are two branches in moderate-income CTs in the AA. The branch distribution in moderate-income geographies exceeds the percentage of the population in moderate-income CTs in the AA.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed four branches in middle-income geography CTs and one branch in an upper-income geography CT since the last evaluation.

Services and, where appropriate, business hours do not vary in a way that inconveniences the various portions of the AA, particularly LMI and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 5:00 pm. Five of the 25 branches are also open on Saturdays with opening hours that vary between 9:00 am and 10:00 am, and close at either 1:00 pm or 2:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Community Development Services

The institution provides a relatively high level of CD services.

Boise City MSA AA

The level of CD services in the Boise City MSA AA is excellent. Bank records show that employees provided financial or job-specific expertise and/or technical assistance for 258 CD service activities to 26 organizations since the last evaluation, logging a total of 633 qualified hours within this AA. The majority (68 percent) of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing (31 percent) and economic development (1 percent). The bank's assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- One WFBNA team member provided 132 hours of Board service, and two WFBNA team members provided 17 hours of financial expertise to an organization that promotes safety, healing, and freedom from domestic and sexual abuse. Over 80 percent of its clients are LMI individuals or families who earn less than 80 percent of the area MFI.
- Two WFBNA team members provided 67 hours of Board service to an organization that provides a catalyst for the development and preservation of affordable housing throughout the state of Idaho.

ID Combined NonMetro AA

The level of CD services in the ID Combined NonMetro AA is adequate. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 86 CD service activities to 16 organizations since the last evaluation, logging a total of 174 qualified hours within this AA. The majority (71 percent) of the bank's assistance was to organizations that provide affordable housing to LMI individuals and families. Other activities targeted community services (29 percent). The bank's assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- One WFBNA team member provided 57 hours of Board service and 35 hours of financial expertise, together with a second WFBNA team member who provided technical expertise to a nonprofit housing organization that works in partnership with people in need of affordable housing. The houses are sold to LMI families and individuals at no profit and with no interest charged.
- One WFBNA team member provided nine hours of Board service and 13 hours of financial and technical expertise to an organization whose clients are LMI families and individuals. The mission of the organization is to create and preserve safe, inclusive, and affordable housing opportunities to those families and individuals.

Conclusion for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Service Test in the Coeur d'Alene MSA, Idaho Falls CSA, Lewiston MSA, and Twin Falls MSA AAs is stronger than the performance under the Service Test in the FS review areas due primarily to higher percentage of branch distribution in LMI geographies. Performance in the Pocatello MSA AA is weaker due to lower percentage of branch distribution in LMI geographies. Performance differences in the stronger LS AAs did impact the overall Service Test rating to Excellent for the State of Idaho.

State Rating

State of Illinois

CRA rating for the State of (Illinois)[28]: Satisfactory
The Lending Test is rated: Outstanding
The Investment Test is rated: Needs to Improve
The Service Test is rated: High Satisfactory

The major factors that support this rating include:

- Excellent lending activity;
- Excellent geographic distribution of loans;
- Excellent borrower distribution of loans;
- Very poor CD loan volume;
- Poor level of CD investments;
- Retail delivery systems are readily accessible to all portions of the AA; and
- Poor CD services.

Description of Institution's Operations in Illinois

WFBNA delineated one AA within Illinois which includes the IL Combined NonMetros (IL Combined NonMetro AA). Refer to Appendix A for a complete description of the AA. The IL Combined NonMetro AA received a FS review. Illinois represents the 50th largest rated area by deposits. WFBNA has $276.3 million of deposits representing 0.0 percent of adjusted deposits. WFBNA ranked third amongst 38 depository institutions in the market with 7.4 percent market share. Sauk Valley Bank & Trust Company and Midwest Bank ranked first and second with a market share of 8.4 percent and 7.7 percent, respectively. WFBNA operates 5 branches and 5 ATMs within Illinois, representing 0.1 percent of the bank's branches and 0.1 percent of the bank's ATMs. The bank originated and purchased approximately $293.8 million in loans or 0.0 percent of total reported loan originations and purchases during the evaluation period. The bank's primary loan products in Illinois are home mortgage and small loans to businesses.

Demographic Data

The following table provides a summary of the demographics that includes housing and business information for the IL Combined NonMetro AA. Table A indicates that the number of census tracts, population, OOUs, and farms is very small in low-income CTs and over 40 percent of families in the AA are LMI. The area's median housing value in the IL Combined NonMetro AA is 1.6 times the area's median income, but two times moderate-, and 3.2 times low-income, indicating a limited proportion of OOUs are affordable to low-income individuals. Median rents and the high percentage of families below poverty level suggest rental housing may also be unaffordable for some low-income residents.

[28] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

Table A - Demographic Information of the Assessment Area Assessment Area: IL Combined Non-Metros (2016)

Economic Data

According to the June 2018 Moody's Analytics report, Illinois' modest job growth amid a contracting labor force pulled the jobless rate down to 4.3 percent in May, matching the previous low reached in 2006. Average hourly earnings are benefiting from the labor market's increasing tightness and a favorable mix of job creation across wage tiers. Industrial employment has risen in nine of the past 12 months, recovering the net number of factory jobs lost during the 2015 commodities bust, and then some.

A developing trade war between the U.S. and its trading partners threatens to prematurely derail manufacturing's progress. Retaliatory tariffs on U.S. steel and auto exports are bad news for the State's manufacturing centers. In addition, the State's agricultural economy is highly exposed to targeted farm commodities such as pork products and to those under threat, including soybeans.

Slow and steady house price increases and rising home sales have yet to stir a pickup in single-family building.

The largest employers in the State include University of Illinois, Abbott Laboratories, and Advocate Health Care System. According to the U.S. BLS, the unemployment rates for the second quarter of 2018 in the following counties range from a low of 4.2 percent (Warren County) to a high of 6.2 percent (Fulton County) while the state average is 4.7 percent.

Community Contacts

The analysis takes into consideration comments provided by three community contacts that serve the bank's IL Combined NonMetro AA. One community contact represents an economic development agency serving several counties within the AA. One community contact is a local Chamber of Commerce serving the AA, and one contact is a rural development agency committed to helping improve the economy and quality of life in rural Illinois.

The economic development agency representative indicated that currently the economy is still pulling out of the effects of the recession. The contact noted some optimism that the retrenchment of the last few years has stabilized companies to the extent that they may now be interested in moving forward with expansion and the financing thereof. However, there are characteristics of rural southern Illinois that make it difficult to see any expansion of economic activity such as the loss of population and income.

The local chamber of Commerce contact indicated that opportunities for participation by local financial institutions include providing financial expertise and committee involvement. There is a great need for deeper participation by the chamber members including local community banks. The local economic development committee, which is part of the chamber, is looking for ways to strengthen business retention and expansion. As a result, there may be future needs for small business loans.

The rural development agency contact indicated that declining population and income have a greater impact on non-MSA counties than MSA counties, especially counties that are outside of commuter distance from economic and job creation centers. Low-income families represent a higher percentage of population in non-MSA counties, about 30 percent, than in MSA counties. It is important to utilize all agencies and their resources to address the need for affordable housing including USDA Rural Development, Illinois Housing Development Authority (IHDA), Community Action Agencies, Illinois Association of Community Action Agencies, and the Federal Home Loan Bank (FHLB).

In addition, the agencies should do more to inform lenders and homebuyers regarding various housing loan programs such USDA Rural Development housing guaranteed loan programs, down payment program offered by IHDA, and FHLB Mortgage Partnership Finance program. The contact indicated that banks do utilize the USDA guaranteed loan programs, but there is room for improvement, as the annual appropriation for the guarantee program is always under-subscribed.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the IL Combined NonMetro AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of tracts, population, OOUs and small farms coupled with limited home affordability for low-income individuals.

Scope of Evaluation in Illinois

The rating for the State of Illinois is primarily based on a FS evaluation of the bank's performance in the IL Combined NonMetro AA. A limited portion of the bank's overall lending, investments, and services were conducted in Illinois; therefore, the performance in Illinois received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN ILLINOIS

LENDING TEST

The bank's performance under the Lending Test in Illinois is rated Outstanding.

Conclusions for Area Receiving a FS Review

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the IL Combined NonMetro AA is excellent.

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State Loans	%State Deposits
IL Combined NonMetro	2,311	635	362	0	3,308	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Dollar Volume of Loans (000's) *							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State Loans	%State Deposits
IL Combined NonMetro	$193,260	$41,500	$59,054	$0	$293,814	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

WFBNA ranked third in deposits with a 7.4 percent market share in the AA. In overall HMDA lending, WFBNA ranked second with 8.1 percent market share. There is strong competition as reflected by the 206 lenders and 38 depository institutions in the AA. The top lender in this market is The Farmers and Mechanics Bank with 9.2 percent market share.

In small loans to businesses, WFBNA ranked fifth with market share of 5.8 percent. There is strong competition as reflected by the 50 lenders in the AA. The top three lenders were U.S. Bank with market share of 13.6 percent, American Express FSB with market share of 12.3 percent, and Capital One Bank with market share of 11.3 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits an excellent geographic distribution of loans in the IL Combined NonMetro AA.

Home Mortgage Loans

Refer to Table O in the State of Illinois section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in LMI geographies exceeds the aggregate distribution of loans in those geographies.
- The proportion of loans in low-income geographies is below the proportion of OOUs and in moderate-income geographies is near to the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of Illinois section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for small business loans in LMI geographies exceeds both the aggregate distribution of loans and the proportion of businesses located in those geographies.

Small Loans to Farms

Refer to Table S in the State of Illinois section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to farms. The bank's overall geographic distribution of small loans to farms for this evaluation is excellent.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for small farm loans in low-income geographies is significantly below both the aggregate distribution of loans and the proportion of farms located in those geographies. However, more weight was given to WFBNA's performance in moderate-income geographies because of the very small proportion of farms in low-income geographies.
- The bank's performance for small farm loans in moderate-income geographies exceeds both the aggregate distribution of loans and the proportion of farms located in those geographies.

Distribution of Loans by Income Level of the Borrower

The bank exhibits an excellent distribution of loans among individuals of different income levels and businesses and farms of different sizes, given the product lines offered by the institution.

Home Mortgage Loans

Refer to Table P in the State of Illinois section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- There are homeownership affordability hurdles in the AA especially for low-income borrowers. As noted above, the area's median housing value is 3.2 times the income of low-income borrowers indicating a limited proportion of OOUs are affordable to low-income borrowers. Despite the affordability challenges, the bank's performance in 2012-2016 to low-income borrowers exceeds the aggregate lending and is below the proportion of families.

- The bank’s performance to moderate-income borrowers substantially meets the aggregate lending and is near to the proportion of families.
- Based on the bank’s performance in 2017-2018, the bank’s home mortgage lending is slightly below the performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Illinois section of appendix D for the facts and data used to evaluate the borrower distribution of the bank’s origination and purchase of small loans to businesses. The distribution of the bank’s originations and purchases of small loans to businesses by revenue is excellent.

- For both 2012-2016 and 2017-2018 periods, the bank’s distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is near to the percentage of small businesses located in the AA.

Small Loans to Farms

Refer to Table T in the “MMSA” section of appendix D for the facts and data used to evaluate the borrower distribution of the institution’s originations and purchases of small loans to farms. The distribution of the bank’s originations and purchases of small loans to farms by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the percentage of small loans to farms originated or purchased exceeds the aggregate small farm lending data for farms with revenues of $1 million or less and is well below the percentage of small farms located in the AA.

Community Development Lending

The institution has made few if any CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution’s level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The level of CD lending in the IL Combined NonMetro AA is very poor. WFBNA did not make any CD loans.

Product Innovation and Flexibility

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 16 loans totaling $1.2 million to LMI homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

INVESTMENT TEST

The bank’s performance under the Investment Test in the State of Illinois is rated Needs to Improve.

Conclusions for Area Receiving a FS Review

Based on a FS review, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the IL Combined NonMetro AA is poor.

Qualified Investments										
Assessment Area	Prior Period*		Current Period		Total				Unfunded Commitments **	
	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
IL Combined NonMetro	4	$1,485	11	$11	17	100.0	$1,496	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

<u>IL Combined NonMetro AA</u>

The institution has a poor level of qualified CD investments and grants, but not in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 4.8 percent of Tier One Capital allocated to the AA.

The investments and grants reflect poor responsiveness to the needs identified in the AA. Virtually all of the bank's CD investments are from prior period and focused on affordable housing which is an identified credit need in the AA. There are opportunities within the AA for CD investments; however, the bank only provided 11 grants totaling $11,150 to organizations that primarily support community services to LMI individuals.

The institution rarely uses innovative and/or complex investments to support CD initiatives.

SERVICE TEST

The bank's performance under the Service Test in Illinois is rated High Satisfactory.

Conclusions for Area Receiving a FS Review

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the IL Combined NonMetro AA is good.

Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the institution's AA.

Distribution of Branch Delivery System											
Assessment Area	Deposits	Branches						Population			
	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%)				% of Population within Each Geography*

* May not add up to 100 percent due to geographies with unknown tract income level and rounding

Distribution of Branch Openings/Closings						
Assessment Area	# of Branch Openings	# of Branch Closings	Net change in Location of Branches (+ or -)			
			Low	Mod	Mid	Upp
IL Combined NonMetro	0	0	0	0	0	0

IL Combined NonMetro AA

As of December 31, 2018, WFBNA operates five branches and five ATMs in the IL Combined NonMetro AA. All of these branches are full service. There is one branch in a low-income CT and one branch in a moderate-income CT. The branch distribution in LMI geographies significantly exceeds the percentage of the population in LMI CTs in the AA. When considering one additional branch within close proximity to LMI geographies, the bank's distribution further exceeds demographics.

The bank did not open or close any branches during the evaluation period.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 5:00 pm, and Saturday from 9:00 am to 12:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Community Development Services

IL Combined NonMetro AA

The institution provides few if any CD services.

The level of CD services in the IL Combined NonMetro AA is poor. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for one CD service activity since the last evaluation, logging a total of five qualified hours within this AA. This activity consisted of a WFBNA team member providing five hours of financial education to a local elementary school, in which, according to 2014-2015 NCES data, 51.8 percent of students qualify for the FRL program.

State Rating

State of Indiana

CRA rating for the State of (Indiana)[29]: Satisfactory
The Lending Test is rated: Outstanding
The Investment Test is rated: Low Satisfactory
The Service Test is rated: Low Satisfactory

The major factors that support this rating include:

- Good lending activity;
- Good geographic distribution of loans;
- Excellent borrower distribution of loans;
- Adequate level of CD loans was originated;
- Lending performance in the LS AAs enhanced overall rating;
- WFBNA's use of flexible products has a positive impact on the Lending Test;
- Adequate level of CD investments;
- Retail delivery systems are reasonably accessible to portions of the AA; and
- WFBNA provides a relatively high level of CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in Indiana

WFBNA delineated four AAs within Indiana including the Fort Wayne-Huntington-Auburn, IN CSA (Fort Wayne CSA AA); IN Combined non-metropolitans (IN Combined NonMetro AA); Indianapolis-Carmel-Anderson, IN MSA (Indianapolis MSA AA); and South Bend-Elkhart-Mishawaka, IN CSA (South Bend CSA AA). The Fort Wayne and IN Combined NonMetro AAs received FS reviews. Refer to Appendix A for a complete description of each AA. The two areas accounted for the larger portion of the lending (48.9 percent) and deposits (74.6 percent) amongst the AAs in Indiana. Indiana represents the 28th largest rated area by deposits. WFBNA has $3.2 billion of deposits representing 0.3 percent of adjusted deposits. As a result of the divestiture of the bank's deposit operations in Indiana, the bank sold 31 branches to Flagstar. WFBNA now operates only a private bank and a business banking branch and no ATMs within Michigan, representing 0.0 percent of the bank's branches and 0.0 percent of the bank's ATMs. The bank originated and purchased approximately $6.3 billion in loans or 0.3 percent of total reported loan originations and purchases during the evaluation period. The bank's primary loan products in Indiana are home mortgage and small loans to businesses.

<u>Fort Wayne CSA AA</u>

Within the Fort Wayne CSA AA, the bank had $2.1 billion in deposits and ranked first amongst 33 depository institutions in the market with 20.0 percent market share. JPMorgan Chase Bank and Lake City Bank ranked second and third with a market share of 12.0 percent and 9.0 percent, respectively. On November 30, 2018, the bank sold and closed all 20 branches in this AA as part of a divestiture of the bank's deposit operations in Indiana.

[29] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

IN Combined NonMetro AA

Within the IN Combined NonMetro AA, the bank had $334 million in deposits and ranked second amongst 23 depository institutions in the market with 13.5 percent market share. Farmers State Bank ranked first with a 16.7 percent market share. On November 30, 2018, the bank sold and closed all 9 branches in this AA as part of a divestiture of the bank's deposit operations in Indiana.

Demographic Data

Fort Wayne CSA AA

The following table provides a summary of the demographics that includes housing and business information for the Fort Wayne CSA AA. Table A indicates that the volume of OOUs is very small in low-income CTs and over 37 percent of families in the AA are LMI. The area's median housing value in the Fort Wayne CSA AA is 1.9 times the area's median income, but 2.4 times moderate-, and 3.8 times low-income, indicating a limited proportion of OOUs are affordable to low-income individuals. Median rents and the high percentage of families below poverty level suggest rental housing may also be unaffordable for some low-income residents.

Table A – Demographic Information of the Assessment Area

Assessment Area: Fort Wayne-Huntington-Auburn IN CSA (2016)

Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #

Economic Data

According to the June 2018 Moody's Analytics report, Fort Wayne's expansion is improving. While production costs for the area's automakers and parts suppliers will rise because of new tariffs on imports of steel and aluminum, the impact will be modest since metal components account for little of the value added in motor vehicle production. Fort Wayne's General Motors plant is still producing plenty of Chevrolet Silverado and GMC Sierra pickup trucks, and local suppliers are trying their best to keep up. Having invested a combined $15 million to expand facilities, Fort Wayne's based parts makers Android Industries and Avancez have recently taken on 200 temporary employees, a sign of surging demand for their wares. Solid consumer confidence and gasoline prices will be more significant for local manufacturers than the escalating trade war. Despite a pickup in gas prices to a multiyear high, light trucks make up more than two-thirds of U.S. vehicle sales as consumers, who have accumulated wealth and are in the best position to earn higher wages so far this cycle, will keep demand firm even as the cost of borrowing increases. As a result, payrolls in transportation equipment and overall manufacturing will easily beat the state and U.S. averages.

The outlook for the housing market looks favorable as healthy population gains will grease the wheels of residential real estate. Population growth in Fort Wayne ramped up to 0.8 percent last year, which was well above the Indiana average and among the top 25 among Midwestern areas. Fort Wayne creates more residents than average, and its diverse economy and low living costs are drawing in new residents, resulting in positive net migration since 2014. Firm household formation will persist in the years ahead, lifting demand for residential real estate. Higher mortgage rates will sting, but with more households forming and single-family housing much more affordable than elsewhere and 10 percent undervalued, home sales and prices are forecast to fare better than average this year and in 2019.

The largest employers in the Fort Wayne CSA AA include Parkview Health Systems, Lutheran Health Network, and General Motors Truck Group. According to the U.S. BLS, the unemployment rate for the 2nd quarter of 2018 was 2.8 percent and has decreased significantly from 8.3 percent at the beginning of the evaluation period. The unemployment rate in the AA was lower than the overall state at 3.7 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by two existing community contacts that serve the bank's Fort Wayne CSA AA. The contacts were with representatives from a community action agency and a fair housing organization.

The community action representative stated that the primary purpose of the organization is helping communities, families, and individuals remove the causes and conditions of poverty and create sustainable communities. The organization serves the northeastern portion of Indiana. The contact stated that manufacturing is the primary industry in all of northeast Indiana. The manufacturing plants do not pay very much so people often will commute into the Fort Wayne area for employment. The contact stated that there is a need for affordable housing; however, banks have not been able to assist because the counties are having trouble attracting developers to the areas. The other primary need is workforce development particularly training for manufacturing jobs. There is also needs for small business loans.

The second contact is a housing community development organization dedicated to helping citizens of 17 Indiana counties. This organization enables clients to buy vacant homes, rehabilitate them to the comfortable and safe for individuals and families then sell them to qualified buyers. It also provides home buyer education to applicants that are pre-screened. The contact indicated that the Fort Wayne MSA has fared better economically than other portions of Indiana and has transitioned from recovery to self-sustaining expansion. Auto-related in Fort Wayne has benefited greatly from the current boom in

US auto sales. The contact stated that the area could benefit from additional financial education, more affordable housing, and down payment assistance. Local banks area involved but more is needed.

The bank conducted research in the AA and identified community needs for affordable housing for LMI families, homeless services, small business assistance, and workforce development and job readiness.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing represents a primary credit need for the Fort Wayne CSA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

<u>IN Combined Non-Metro AA</u>

The following table provides a summary of the demographics that includes housing and business information for the IN Combined NonMetro AA. Table A indicates that there are no low-income CTs and over 38 percent of families in the AA are LMI. The area's median housing value in the IN Combined NonMetro AA is 2.1 times the area's median income, but 2.6 times moderate-, and 4.2 times low-income, indicating a limited proportion of OOUs affordable to LMI families. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

Assessment Area: IN Combined Non-Metros (2016)

Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #

(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

According to the June's 2018 Moody's Analytics report, Indiana's economy is slowing. Employment is inching up, with gains somewhat stronger than earlier this year. Factory employment is rising steadily, transportation equipment manufacturers in particular have hit a stride, adding workers faster than those in every other Great Lakes state.

The outlook for the housing market is average thanks largely to favorable demographics trends. Residential real estate is also on the mend. Sales are no longer falling and prices have recovered from the brief downturn earlier.

Indiana's outsize manufacturing industry still has gas and, fortunately, the tariffs will have minimal impact in the short run. Transportation equipment manufacturing, which employs more than one-quarter of all Indiana factory workers, is seemingly unstoppable. Industry payrolls are at their highest since early 2006, the peak reached during the last expansion, whereas nationally they remain nearly 7 percent lower, with no prospect of a full recovery.

According to the U.S. BLS, the unemployment rates for the second quarter of 2018 in the following counties range from a low of 2.5 percent (LaGrange County) to a high of 4.0 percent (Miami) while the state average is 3.7 percent.

Community Contacts

The analysis takes into consideration comments provided by a community contact that serves the bank's IN Combined NonMetro AA. The community contact represents a government city council that serves the AA.

The City Council's main source of funding is tax revenue. The contact described the general area as a low industry with moderate unemployment and a good infrastructure with connections to both Cincinnati and Indianapolis. Most local residents work for Hillenbrand, UPS, or the county government. Otherwise, executives of larger companies in the greater area often commute to either Cincinnati or Indianapolis. The county is primarily serviced by three local banks and services are good.

The contact indicated that there are three business parks in the area that are "shovel ready" for utilities. The contact also stated that the local banks have always been open to service low income individuals, but no specific financing program was identified. The local banks have been in the community for years and the staff understands the dynamics of the local economy and the needs of residents and businesses.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business loans represent primary credit needs for the IN Combined NonMetro AA. Opportunity exists to originate these types of loans throughout the AA including moderate-income areas.

Scope of Evaluation in Indiana

The rating for the State of Indiana is primarily based on FS evaluations of the bank's performance in the Fort Wayne CSA and IN Combined NonMetro AAs; however, performance in each AA was considered. Conclusions where a LS review affected the CRA Rating for the state are addressed within their respective tests. LS procedures were performed for the Indianapolis MSA and South Bend CSA AAs. A limited portion of the bank's overall lending, investments, and services were conducted in Indiana; therefore, the performance in Indiana received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN INDIANA

LENDING TEST

The bank's performance under the Lending Test in Indiana is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Fort Wayne CSA AA is good and performance in the IN Combined NonMetro AA is excellent.

Lending Activity

Based on the tables below, lending levels reflect good responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State Loans	%State Deposits
Fort Wayne CSA	16,116	4,581	529	15	21,241	41.3	64.3
IN Combined NonMetro	2,450	991	460	3	3,904	7.6	10.3
Indianapolis MSA	15,698	1,849	3	9	17,560	34.2	14.3

Total	41,701	8,603	1,052	30	51,386	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Dollar Volume of Loans (000's)*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State* Loans	%State Deposits
Fort Wayne CSA	$2,046,788	$311,267	$63,767	$11,050	$2,432,872	37.8	64.3
IN Combined NonMetro	$250,615	$68,956	$60,472	$9,000	$389,043	6.0	10.3
Indianapolis MSA	$2,318,587	$153,706	$67,000	$54,268	$2,526,624	39.4	14.3
South Bend CSA	$974,696	$84,182	$7,429	$17,060	$1,083,367	16.8	11.1
Total	$5,590,686	$618,111	$131,731	$91,378	$6,431,906	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

<u>Fort Wayne CSA AA</u>

WFBNA ranked first in deposits with a 20.0 percent market share in the AA. In overall HMDA lending, WFBNA ranked second with 8.3 percent market share. There is strong competition as reflected by the

321 lenders and 33 depository institutions in the AA. The top lender in this market is RUOFF Mortgage with 10.0 percent market share.

In small loans to businesses, WFBNA ranked sixth with a market share of 6.6 percent. There is strong competition as reflected by the 100 lenders in the AA. The top three lenders were American Express FSB with a market share of 11 percent, Chase Bank with a market share of 11.1 percent, and PNC Bank with a market share of 10.1 percent.

<u>IN Combined NonMetro AA</u>

WFBNA ranked second in deposits with 13.5 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 6.2 percent market share. There is strong competition as reflected by the 245 lenders and 23 depository institutions in the AA. The 2nd and 3nd top lenders in this market were Farmers State Bank with a 5.4 percent market share and CrossRoads Bank with a 4.9 percent market share.

In small loans to businesses, WFBNA ranked fourth with a market share of 7.2 percent. There is strong competition as reflected by the 65 lenders in the AA. The top three lenders were US Bank with a market share of 13.5 percent, Capital One Bank with a market share of 11.3 percent, and American Express with a market share of 7.9 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in the Fort Wayne CSA AA and an excellent geographic distribution of loans in the IN Combined NonMetro AA.

<u>Fort Wayne CSA AA</u>

Home Mortgage Loans

Refer to Table O in the State of Indiana section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in LMI geographies exceeds the aggregate distribution of loans in those geographies.
- The proportion of loans in low-income geographies is significantly below the proportion of OOUs and in moderate-income is near to the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of Indiana section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is good.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for small business loans in LMI geographies substantially meets the aggregate performance and is near to the proportion of businesses located in those geographies.

IN Combined Non-Metro AA

Home Mortgage Loans

Refer to Table O in the State of Indiana section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The AA contains no low-income tracts so our assessment focused on the bank's performance in moderate-income tracts.
- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in moderate-income geographies exceeds both the aggregate distribution of loans and the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of Indiana section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is good.

- The AA contains no low-income tracts so our assessment focused on the bank's performance in moderate-income tracts.
- For 2012-2016, the proportion of loans in moderate-income geographies exceeds both the aggregate distribution of loans and the proportion of businesses in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is significantly less than the combined performance in 2012-2016. As such, the overall performance rating for small business loans was downgraded from excellent to good.

Distribution of Loans by Income Level of the Borrower

The bank exhibits an excellent distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

Fort Wayne CSA AA

Home Mortgage Loans

Refer to Table P in the State of Indiana section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- There are homeownership affordability hurdles in the AA especially for low-income borrowers. As noted above, the area's median housing value is 3.8 times the income of low-income borrowers indicating a limited proportion of OOUs are affordable to low-income borrowers. Despite the affordability challenges, the bank's performance in 2012-2016 to LMI borrowers exceeds the aggregate lending.

- The bank's performance to low-income borrowers is below the proportion of families and to moderate-income borrowers exceeds the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Indiana section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

IN Combined Non-Metro AA

Home Mortgage Loans

Refer to Table P in the State of Indiana section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- There are homeownership affordability hurdles in the AA especially for low-income borrowers. As noted above, the area's median housing value is 4.2 times the income of low-income borrowers indicating a limited proportion of OOUs are affordable to low-income borrowers. Despite the affordability challenges, the bank's performance in both periods, 2012-2016 and 2017-2018, to LMI borrowers exceeds the aggregate lending.
- The bank's performance with low-income borrowers is well below the proportion of families and to moderate-income borrowers exceeds the proportion of families.

Small Loans to Businesses

Refer to Table R in the State of Indiana section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is excellent.

- For 2012-2016, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is near to the percentage of small businesses located in the AA.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly lower than the combined performance in 2012-2016.

Community Development Lending

The institution has made a low level of CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

Fort Wayne CSA AA

The level of CD lending in the Fort Wayne CSA AA is poor. WFBNA made 15 CD loans for a total of $11 million which represents 4.7 percent of tier 1 capital. CD lending performance has a neutral impact on the lending test rating. None of the CD loans addressed affordable housing which is an identified credit need in the AA. All CD loans were for the purpose of providing community services to LMI individuals.

Examples of CD loans in the AA include:

- In January 2018, WFBNA renewed a $1 million working capital line of credit for a nonprofit organization serving Northeast Indiana, including the City of Fort Wayne. The organization's mission is to enable people experiencing developmental or economic challenges to achieve independence and inclusion by providing social, educational, residential, and work-related supports. Based on estimated information, over 90 percent of the clients they serve are considered to be LMI individuals as they earn less than $45,360 annually, which is 80 percent of the 2015 area MFI.
- In July 2016, WFBNA renewed an $850,000 working capital line of credit to nonprofit organization that provides employment, job training, and other community-based programs for people with disabilities, those who lack education or job experience, and others facing employment challenges. The purpose of the organization is consistent with a valid Community Development purpose and all of its clients are considered LMI individuals.

IN Combined Non-Metro AA

The level of CD lending in the IN Combined NonMetro AA is adequate. WFBNA made 3 CD loans in its AA for a total of $9 million, which represents over 23 percent of tier 1 capital. While the dollar volume was excellent, the number of CD loans was considered minimal and none of the CD loans addressed affordable housing which is an identified credit needs in the AA. CD lending performance has a neutral impact on the lending test rating. All CD loans were for the purpose of providing community services to LMI individuals.

Example of a CD loan in the AA includes:

- During the evaluation, WFBNA provided three separate lines of credit for a total of $9 million to a social service agency offering accredited and comprehensive residential, foster care, independent living, adoption, and home-based services. The organization serves families and children, from infants to youths of 21 years, irrespective of race or religious background. Youth are placed at this organization through state and county departments of child services and juvenile probation offices, through the Departments of Corrections and Education, and through private placement. According to its website, the organization licenses and supports foster homes throughout Indiana and their residential program is a long-term placement facility for children and youth who are wards of the court or county. In addition, all of their clients are LMI individuals.

Product Innovation and Flexibility

Fort Wayne CSA AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 136 loans totaling $11.5 million to LMI homebuyers that qualified under this program.

IN Combined NonMetro AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 10 loans totaling $591,000 to LMI homebuyers that qualified under this program.

Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Lending Test in the Indianapolis MSA and South Bend CSA AAs is excellent and stronger than the bank's overall good performance under the Lending Test in the FS areas due primarily to higher volume of CD lending and stronger borrower distribution performance. Strong performance in the LS AAs including the IN Combined NonMetro AA did impact the overall Lending Test rating for the State of Indiana. As such, the overall lending rating for the State of Indiana was enhanced to Outstanding.

Refer to Tables O through T in the State of Indiana section of appendix D for the facts and data that support these conclusions.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of Indiana is rated Low Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Fort Wayne CSA is good and performance in the IN Combined NonMetro AAs is poor.

Qualified Investments										
	Prior Period*		Current Period		Total				Unfunded Commitments**	
Assessment Area	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Fort Wayne CSA	18	$2,327	98	$19,864	116	63.7	$22,191	67.8		
IN Combined NonMetro	3	$167	11	$88	14	7.7	$255	0.8		

Indianapolis MSA	1	$1,581	22	$7,853	23	12.6	$9,434	28.8		
South Bend CSA	1	$33	28	$805	29	15.9	$838	2.6		
Total	23	$4,108	159	$28,610	182	100.0	$32,718	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

Fort Wayne CSA AA

The institution has a significant level of qualified CD investments and grants, occasionally in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 9.5 percent of tier 1 capital allocated to the AA.

The investments and grants reflect good responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 95.5 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 88 grants totaling $1.6 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution occasionally uses innovative and/or complex investments to support CD initiatives. CD Investments involved two complex LIHTC and NMTC projects where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In September 2016, WFBNA made a $17.2 million NMTC investment for a mixed-use development. This development is the first of a larger revitalization effort that is located in a low-income census tract in downtown Fort Wayne, Indiana. This first phase will be comprised of 13,000 square feet of retail space, 15,000 square feet of office space, and 124 mixed-income residential units, of which 26 will be reserved for households with income at or below 80 percent of the area MFI. According to the Community Benefits Agreement, 60 permanent full-time jobs will be created, along with 200+ construction jobs. This investment is responsive to the need for affordable housing and revitalizing and stabilizing a distressed area.
- During the exam timeframe, WFBNA provided three grants totaling $400,000 to a local housing organization through the PMP for affordable housing in the Fort Wayne CSA AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

IN Combined NonMetro AA

The institution has a poor level of qualified CD investments and grants, but not in a leadership position,

particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 0.7 percent of tier 1 capital allocated to the AA.

The investments and grants reflect poor responsiveness to the needs identified in the AA including affordable housing and community services. Virtually all of the bank's CD investments are from prior period and focused on affordable housing which is an identified credit need in the AA. There are opportunities for CD investments within the AA; however, the bank only provided 11 grants totaling $88,000 to several organizations that primarily support affordable housing and community services to LMI individuals.

The institution rarely uses innovative and/or complex investments to support CD initiatives.

Example of a CD investment in the AA includes:

- During the exam timeframe, WFBNA provided five grants totaling $65,000 to an organization that works in partnership with people in need to build decent and affordable housing. The houses are sold to those in need at no profit and with no interest charged. All of its clients are LMI as they earn less than 80 percent of the area MFI.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Investment Test in the Indianapolis MSA AA is stronger than the bank's overall average performance in the Investment Test in the FS areas due to higher volume of CD investments. Performance in the South Bend CSA AA is weaker than the bank's overall performance due to lower volume of CD investments. Performance differences in both LS AAs were neutral and did not impact the overall Investment Test rating for the State of Indiana.

SERVICE TEST

The bank's performance under the Service Test in Indiana is rated Low Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on the FS reviews, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Fort Wayne CSA AA adequate and performance in the IN Combined NonMetro AA is good.

Retail Banking Services

Service delivery systems are reasonably accessible to portions of the AAs, particularly LMI geographies and/or LMI individuals. The tables below are shown as of December 31, 2018 to be consistent with other rated areas. On November 30, 2018, the bank sold 31 branches, including three in low-income geographies and five in moderate-income geographies to Flagstar Bank. The branch sale was part of a larger transaction where Flagstar Bank purchased 52 branches in Indiana, Michigan, Ohio, and Wisconsin. With the exception of a private bank and a business banking branch, this sale resulted in a divestiture of the bank's deposit operations in Indiana. The branches were re-branded as Flagstar branches upon closing of the transaction. Flagstar intends to keep all branches and retain all employees. Since these branches were in operation during the majority of the evaluation time period these branches are evaluated and included in the analysis below.

Distribution of Branch Delivery System											
Assessment Area	Deposits	Branches						Population			
	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%)*				% of Population within Each Geography*

Fort Wayne CSA AA

As of November 30, 2018, WFBNA operated 19 branches and 19 ATMs in the Fort Wayne CSA AA. All of these branches are full-service locations. There is one branch in a low-income geography and 3 branches in moderate-income geographies. The branch distribution in low-income geographies is significantly below the percentage of the population in low-income geographies and performance in the moderate-income geographies exceeds the percentage of the population in the moderate-income geographies in the AA.

The institution’s opening and closing of branches have not adversely affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed one branch within a moderate-income geography during the evaluation period. The closure of one branch in a moderate-income geography did not negatively impact the distribution of branches relative to the population residing in those geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 5:00 pm, and Saturday from 9:00 am to 12:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

<u>IN Combined NonMetro AA</u>

As of November 30, 2018, WFBNA operated 8 branches and 8 ATMs in the AA. All of these branches are full-service locations. There are no designated low-income census tracts in the AA. There is one branch in a moderate-income geography and 7 branches in middle-income geographies. The branch distribution in moderate-income geographies exceeds the percentage of the population in moderate-income geographies in the AA.

The institution's opening and closing of branches have not adversely affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed one branch within a middle-income geography during the evaluation period. The closure did not negatively impact the distribution of branches relative to the population residing in those geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 5:00 pm, and Saturday from 9:00 am to 12:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Community Development Services

The institution provides a relatively high level of CD services.

<u>Fort Wayne CSA AA</u>

The level of CD services in the Fort Wayne CSA AA is excellent. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 484 CD service activities to 41 organizations since the last evaluation, logging a total of 1,314 qualified hours within this AA. The majority (80 percent) of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing (19 percent) and economic development. The bank's assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:
:

- One WFBNA team member provided 229 hours of Board service and 11 hours of financial expertise, and four team members provided 47 hours of financial and technical expertise at an organization where 90 percent of the clients served are considered to be LMI individuals, earning less than 80 percent of the 2015 area MFI. This organization is a comprehensive human and community development organization serving Northeast Indiana, including the City of Fort Wayne. Their mission is to enable people experiencing developmental or economic challenges to achieve independence and inclusion by providing social, educational, residential, and work-related support.
- Two WFBNA team members provided 80 hours of Board service, and two team members provided 37 hours of technical expertise at an organization where 100 percent of its clients are LMI individuals as they earn less than 80 percent of the area MFI. This organization is part of a nonprofit housing organization that works in partnership with people in need to build decent, affordable housing. The houses are sold to those in need at no profit and with no interest charged.

- A WFBNA team member provided 7 hours of tax preparation through the VITA program. Refer to the comments in the institution Innovative or Flexible Retail Service Programs section of this public evaluation for additional details regarding this program.

<u>IN Combined NonMetro AA</u>

The level of CD services in the IN Combined NonMetro AA is poor. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 24 CD service activities to four organizations since the last evaluation, logging a total of 27 qualified hours within this AA. All of the bank's assistance was to organizations primarily schools that provide community services to LMI individuals and families. The following is an example of a CD service provided in this AA:

- Two WFBNA team members provided 11 hours of financial expertise at an organization where 55 percent of students qualify for the FRL program.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Service Test in the Indianapolis MSA AA is weaker than the bank's overall adequate performance under the Service Test in the FS areas due to lower percentage of branch distribution in the LMI geographies. The bank's performance in the South Bend CSA AA is stronger than the bank's overall performance due to a higher percentage of branch distribution in LMI geographies. Performance differences in the LS AAs did not enhance the overall Service Test rating for the State of Indiana.

State Rating

State of Iowa

CRA rating for the State of Iowa[30]: Outstanding
The Lending Test is rated: Outstanding
The Investment Test is rated: Outstanding
The Service Test is rated: High Satisfactory

The major factors that support this rating include:

- Excellent lending activity;
- Good geographic distribution of loans;
- Good borrower distribution of loans;
- WFBNA provides a relatively high level of CD loans, which has a positive impact on the Lending Test;
- WFBNA's use of flexible products has a positive impact on the Lending Test;
- Excellent level of CD investments that are responsive to AA needs;
- Retail delivery systems are accessible to all portions of the AA; and
- WFBNA provides a high level of CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in Iowa

WFBNA delineated five AAs within Iowa including the Cedar Rapids-Iowa City, IA CSA (Cedar Rapids CSA AA); Des Moines-Ames-West Des Moines, IA CSA (Des Moines CSA AA); Sioux City, IA MSA (Sioux City MSA AA); Waterloo-Cedar Falls, IA MSA (Waterloo MSA AA); and IA Combined non-metropolitan (IA Combined NonMetro AA). The Cedar Rapids CSA AA and Des Moines CSA AA received FS reviews. Refer to Appendix A for a complete description of each AA. The two areas accounted for the largest portion of the lending (74.5 percent) and deposits (73.1 percent) amongst the AAs in Iowa. Iowa represents the 22nd largest rated area by deposits. WFBNA has $6.4 billion deposits representing 0.5 percent of adjusted deposits in Iowa. WFBNA operates 52 branches and 80 ATMs in Iowa representing 0.9 percent of branches and 0.6 percent of the bank's ATMs. The bank originated or purchased $10.1 billion in loans or 0.5 percent of total reported loan originations and purchases during the evaluation period. The bank's primary loan products in Iowa are home mortgage loans and small loans to businesses.

Cedar Rapids CSA AA

Within the Cedar Rapids CSA AA, the bank had $853.9 million in deposits and ranked fourth amongst 50 depository institutions in the market with 8.4 percent market share. The top three depository institutions in terms of deposit market shares were Hills Bank and Trust Company with 23.6 percent, US Bank with 10.9 percent, and Cedar Rapids Bank and Trust Company with 9.6 percent. WFBNA operates 11 branches and 9 ATMs in the AA.

[30] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

Des Moines CSA AA

Within the Des Moines CSA AA, the bank had $3.2 billion in deposits and ranked first amongst 58 institutions in the market with 15.0 percent market share. Bankers Trust Company and Principal Bank ranked second and third with 13.3 percent and 11.6 percent market share, respectively. WFBNA operates 18 branches and 44 ATMs in the AA.

Demographic Data

Cedar Rapids CSA AA

The following table provides a summary of the demographics that includes housing and business information for the Cedar Rapids CSA AA. Table A indicates that the volume of population and OOUs is very small in low-income CTs and over 37 percent of families in the AA are LMI. The area's median housing value in the Cedar Rapids CSA AA is 2.1 times the area's highest median income, but 2.6 times moderate-, and 4.1 times low-income, indicating a limited proportion of OOUs are affordable to LMI. Median rents and the moderate percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Economic Data

Cedar Rapids, IA MSA

According to the June 2018 Moody's Analytics report, the Cedar Rapids economy is one of Iowa's weakest this year. Job growth is deceptively strong; with payroll employment only up slightly year to date. The Rockwell-Collins-United Technologies merger creates upside potential for manufacturing in the medium term, and even further along, above-average demographics provide the tools to thrive as a national expansion effort paints a brighter picture for factory payrolls in Cedar Rapids, but a heavy reliance on manufacturing will limit Cedar Rapid's long-term economic potential.

Professional/business services accounts for the lion's share of job additions over the next two years. The largest economic sectors for employment are High-Tech and Logistics though Professional and Business services will supply a majority of job additions over the next two years. Major area employers include Rockwell Collins Inc., TransAmerica, and St. Luke's Hospital.

House price appreciation is at cycle highs with per capita permit issuance at the lowest level in three decades creating low housing supply. According to the U.S. BLS, the unemployment rate in the second quarter of 2018 was 3.0 percent, down from 5.2 percent at the beginning of the evaluation period. The MSA unemployment rate is slightly higher than the overall State of Iowa at 2.6 percent.

Iowa City, IA MSA

According to the October 2018 Moody's Analytics report, Iowa City's economy is performing well. Job growth is by no means robust but the pace has caught up to the state and regional averages. State government employment has flattened since 2017 as the University of Iowa trimmed headcount but the private sector has buoyed the labor market. Leisure/hospitality and goods production have been bright spots. Iowa City will strengthen slightly in the year ahead, matching Iowa and the Midwest in job and income growth. Favorable population trends will buoy healthcare and consumer-driven industries, offsetting slower gains in the public sector. Longer term, dependence on state government will keep Iowa City a merely average performer but it will also help insulate the area from economic downturns.

The multifamily housing market is red-hot thanks to the growing student population. Single-family house price appreciation has accelerated to the second fastest in Iowa but construction is lagging. Major area employers include University of Iowa, University of Iowa Hospital & Clinics, and Veterans Health Administration. According to the U.S. BLS, the unemployment rate in the third quarter of 2018 was 2.1 percent, down from 3.8 percent at the beginning of the evaluation period. The MSA unemployment rate is slightly lower than the overall State of Iowa at 2.6 percent.

Community Contacts

The analysis takes into consideration comments provided by four community contacts pertaining to the Cedar Rapids CSA AA in conjunction with this evaluation. The contacts represent two community development organizations and two local colleges.

According to one contact, Cedar Rapids attracts young professionals with a high wage threshold and many commuting in for work in primary industries such as electrical manufacturing, insurance and finance, food production, trucking and logistics, and information technology. The contact stated the agricultural economy is weak due to falling commodity prices with large corn processors and ethanol producers adversely affected. The contact also stated the housing industry is strong for both single- and multi-family dwellings but there is a significant need for rural housing development in communities around the area where there are less than 10,000 residents. The contact also noted the need for new small business lending programs, many of which need funding.

Another contact noted the age of housing stock in Cedar Rapids and specifically the gradual increase in new housing. Most of the homes built in Cedar Rapids, about 42 percent, were between 1950 and 1980, while an estimated 20 percent were pre-1950 and the remaining 38 percent built in 1980 or later. The contact noted home sales increased slightly from 2013 and 2014 along with a research survey conducted which consistently inventoried an increasing number of rental units throughout the Cedar Rapids area and a lower vacancy rate at 2.5 percent. This contact also noted small business struggles to gain loan funding though there are local support programs for small businesses.

One of the college contacts in Linn County discussed favorable overall economic conditions with a steadily increasing population, urban migration, and an increasing minority population. The contact noted the main credit need in Linn County is financial expertise for new homeowners as well as new farmers. Overall, the contact described a perception of active involvement in the community by financial institutions, particularly those in rural areas with those in urban areas more hesitant to work with lower credit individuals or those with criminal history.

The other college contact in Linn County described the area's resources and increase in new business starts, partly with the influx of funding after the 2008 floods in the area, but also that the area does not have a robust economy for existing small businesses. The flood in 2008 also affected affordable housing. The contact noted the flood destroyed 5,000 housing units in LMI areas. There is a new floodwall financed largely by state funds. The contact noted excellent involvement from banks and opportunities for involvement in Cedar Rapids including loan funds providing subordinated debt and loan guarantees as well as revolving loan funds targeted to minority, female-owned, veterans, and LMI individuals. The contact noted national banks lend and finance with the established business community, providing significant growth capital by providing commercial real estate and equipment financing on a larger scale and specifically in the post flood development projects.

Considering the information from the community contact and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Cedar Rapids CSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of tracts, OOUs, and small businesses coupled with limited home affordability for LMI individuals.

Demographic Data

Des Moines CSA AA

The following table provides a summary of the demographics that includes housing and business information for the Des Moines CSA AA. Table A indicates that the volume of OOUs is very small in low-income CTs and over 38 percent of families in the AA are LMI. The area's median housing value in the Des Moines CSA AA is 2.1 times the area's highest median income, but 2.6 times moderate-, and 4.2 times low-income, indicating a limited proportion of OOUSs are affordable to LMI. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Economic Data

<u>Des Moines-West Des Moines IA MSA</u>

According to the June 2018 Moody's Analytics report, the Des Moines economy is in the late expansion stage of the business cycle and solidified itself as one of the Midwest's most resilient economies. While faring well in the coming year, job additions will slow and wage pressures will build, especially in healthcare, construction, and knowledge-based industries. The labor market experienced year-over-year job growth climbing above the U.S. average in May to an 11-month high due to a surge in labor force entrants. Faster job growth traces back to bigger gains in professional/business services and leisure/hospitality. Construction is also a source of job growth and nonresidential building in particular will create jobs as construction ramps up for Apple's $1.3 billion data center and begins for the General Services Administration's new federal courthouse. Per Moody's home sales and prices will hold up better than elsewhere, but limited upside for housing late in the business cycle when mortgage rates are climbing means single-family construction in Des Moines will not perform as well this year or in 2019 as it did earlier in the expansion.

Job growth slowed elsewhere, including in manufacturing but Moody's reports 2018 and 2019 will be much closer to that nationally after lagging it in 2017. The economy is driven by the financial sector and the Iowa State Capital. Major employers include Wells Fargo, UnityPoint Health, and the Principal Financial Group. According to the U.S. BLS, the unemployment rate in the second quarter of 2018 was 2.5 percent, down from 5.1 percent at the beginning of the evaluation period. The MSA unemployment rate is similar to the overall State of Iowa at 2.6 percent.

Ames, IA MSA

According to the October 2018 Moody's Analytics report, Ames' economy has expanded faster than average for the last two years. Nonfarm job counts are at a historic high and growth accelerated sharply in the third quarter. The pace over the last year exceeds the state and U.S. averages. With the economy operating beyond capacity, firms are having difficulty finding workers and are bidding up the price of labor. Despite outshining Iowa and the U.S. year to date, Ames' dominant government sector will provide limited job gains in the short term but will insulate the economy against future economic downturns. Accounting for 29 percent of jobs in the metro area, the third highest nationwide after State College PA and College Station TX, state government is dominated by Iowa State University.

The outlook for the housing market looks favorably as positive demographic gains will lift the wheels of residential real estate. Major employers include Iowa State University, Iowa Department of Transportation, and Mary Greeley Medical Center. Unemployment is at its lowest in almost two decades and a full percentage point below the trough during the previous expansion. According to the U.S. BLS, the unemployment rate in the second third quarter of 2018 was 1.6 percent, down from 3.6 percent at the beginning of the evaluation period. The MSA unemployment rate is lower than the overall State of Iowa at 2.6 percent.

Community Contacts

The analysis takes into consideration comments provided by a community contact pertaining to the Des Moines CSA AA in conjunction with this evaluation. The contact represents a community improvement organization serving the Des Moines area.

The organization's mission is to empower and unite people to take control of their communities and taking action to address community needs. The interviewee discussed a micro small business program made available through a newly formed organization call Solidarity Micro Finance. This organization provides collateral-free small business loans with low interest to low-income women in the Des Moines market. They also provide each member with a no-fee savings account through Bankers Trust. Initial loans are made up to $1,000 with a six month pay back. Once the loan is paid back the consumer can apply for larger loans up to $2,500. The loans are for small businesses and microenterprises only. Current businesses include food, jewelry, clothes, cosmetics, and health products sales. Capital for the program is from local banks, local and national foundations and Whole Planet Foundation.

The contact stated that the economic conditions of Des Moines are improving but certain neighborhoods are suffering from years of disinvestment. Neighborhoods mention were Eagle Hill and King Irving that need investment to improve housing stock and the need for affordable banking services. Need for banks to be located in those neighborhoods. The contact further stated that banks not community organizations should be providing financial education and homebuyer education. The contact does not believe that nonprofit organization should be providing those services. The interviewee believes that banks should be making small dollar loans to consumers and that they should have to come up with a program to fund and then have someone maintain.

The bank conducted research in the AA and identified community needs for affordable housing for LMI families, homeless services, neighborhood revitalization/stabilization, small business assistance, and workforce development and job readiness.

Considering the information from the community contact and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Des Moines CSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

Scope of Evaluation in Iowa

The rating for the State of Iowa is primarily based on FS evaluations of the bank's performance in the Cedar Rapids CSA and Des Moines CSA AAs; however, performance in each AA was considered. Conclusions where a LS review affected the CRA Rating for the state are addressed within their respective tests. LS procedures were performed for the Sioux City MSA AA, Waterloo MSA AA, and the IA Combined NonMetro AA. A small portion of the bank's overall lending, investments, and services was conducted in Iowa; therefore, the performance in Iowa received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN IOWA

LENDING TEST

The bank's performance under the Lending Test in Iowa is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Cedar Rapids CSA AA is good and performance in the Des Moines CSA AA is excellent.

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State Loans	%State Deposits
Cedar Rapids CSA	7,606	2,873	375	3	10,857	14.4	13.4

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Cedar Rapids CSA AA

WFBNA ranked fourth in deposits with 8.4 percent market share in the AA. In overall HMDA lending, WFBNA ranked eighth with 2.3 percent market share. There is strong competition as reflected by the 273 lenders and 50 depository institutions in the AA. The top three lenders in terms of market share were the University of Iowa Community Credit Union with 23.2 percent, Hills Bank and Trust Company with 15.1 percent, and Collins Community Credit Union with 7.9 percent.

In small loans to businesses, WFBNA ranked sixth with a market share of 4.7 percent. There is also strong competition as reflected by the 69 lenders in the AA. The top three lenders in terms of market share were Hills Bank and Trust Company with 29.8 percent, U.S. Bank with 12.8 percent, and American Express with 10.7 percent.

Des Moines CSA AA

WFBNA ranked first in deposits with 11.5 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 11.5 percent market share. There is strong competition as reflected by the 386 lenders and 58 depository institutions in the AA. The second and third lenders are U.S. Bank with 5.7 percent market share and the University of Iowa Community Credit Union with 4.7 percent market share.

In small loans to businesses, WFBNA ranked third with a market share of 10.0 percent. There is also strong competition as reflected by the 95 lenders in the AA. The top two lenders were American Express with a market share of 14.9 percent and U.S. Bank with a 12.6 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits an excellent geographic distribution of loans in the Cedar Rapids CSA AA and an adequate geographic distribution of loans in the Des Moines CSA AA.

Cedar Rapids CSA AA

Home Mortgage Loans

Refer to Table O in the State of Iowa section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in LMI geographies exceeds the aggregate distribution of loans in those geographies.
- The proportion of loans in low-income geographies is well below the proportion of OOUs and for moderate-income geographies is near to the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of Iowa section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The bank's performance in 2012-2016 for small business loans in low-income geographies exceeds both the aggregate distribution of loans and the proportion of businesses located in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is below proportion of businesses located in those geographies.
- The bank's performance in 2017-2018 for small business lending is slightly below the combined performance in 2012-2016.

Des Moines CSA AA

Home Mortgage Loans

Refer to Table O in the State of Iowa section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- For 2012-2016, the proportion of home mortgage loans in low-income geographies is below the aggregate distribution of loans and is well below the proportion of OOUs in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is well below the proportion of OOUs in those geographies.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly higher than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of Iowa section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- For the 2012-2016 period, the bank's performance for small business loans in LMI geographies exceeds the aggregate distribution of loans in those geographies.
- The proportion of loans in low-income geographies is below proportion of businesses and to moderate-income geographies exceeds the proportion of businesses located in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly below the combined performance in 2012-2016.

Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

Cedar Rapids CSA AA

Home Mortgage Loans

Refer to Table P in the State of Iowa section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- There are homeownership affordability hurdles in the AA especially for low-income borrowers. As noted above, the area's median housing value is 4.1 times the income of low-income borrowers, indicating a limited proportion of OOUs are affordable to low-income borrowers. Because of affordability challenges, the bank's overall home mortgage lending to LMI borrowers in 2012-2016 is below the aggregate distribution of loans reported in those geographies.
- The bank's overall home mortgage lending to low-income borrowers is below the proportion of families and to moderate-income borrowers is near to the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly higher than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Iowa section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeded the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Des Moines CSA AA

Home Mortgage Loans

Refer to Table P in the State of Iowa section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- There are homeownership affordability hurdles in the AA especially for low-income borrowers. As noted above, the area's median housing value is 4.2 times the income of low-income borrowers indicating a limited proportion of OOUs are affordable to low-income borrowers. Despite the affordability challenges, the bank's performance in both periods, 2012-2016 and 2017-2018, to LMI borrowers substantially meets the aggregate lending.
- The bank's overall home mortgage lending to low-income borrowers is well below the proportion of families and to moderate-income borrowers exceeds the proportion of families.

Small Loans to Businesses

Refer to Table R in the State of Iowa section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Community Development Lending

The institution has made a relatively high level of CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

Cedar Rapids CSA AA

The level of CD lending in the Cedar Rapids CSA AA is adequate. WFBNA made 3 CD loans in its AA for a total of $11.6 million, which represents 12.1 percent of tier 1 capital. While the dollar volume was excellent, the number of CD loans was considered minimal given the six-year time period. CD lending performance has a neutral impact on the lending test rating. The loans were responsive to the identified needs for affordable housing and to revitalize and stabilize the community.

Examples of CD loans in the AA include:

- In August 2013, WFBNA provided a $3.8 million loan to fund the development of a 17-unit condominium building located in a moderate-income census tract of Cedar Rapids in Linn County. FEMA declared Linn County a designated disaster area in May 2008 due to severe storms, tornadoes, and flooding.
- In December 2017, WFBNA provided a $6.5 million construction loan for an affordable housing development located in Cedar Rapids, Iowa and comprised of nine one-bedroom units, 18 two-bedroom units, and 18 three-bedroom units. Of the 45 total units, 41 will be reserved for households with income between 30 and 60 percent of the area MFI. Five of the units will be supportive housing for persons experiencing homelessness.

Des Moines CSA AA

The level of CD lending in the Des Moines CSA AA is excellent. WFBNA made 16 CD loans in its AA for a total of $39 million, which represents 11 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The bank made 10 CD loans totaling $33 million (84.6 percent) for the purpose of affordable housing which is critical needs in the AA. Additionally, the bank extended 6 CD loans totaling $6.1 million for the primary purpose of providing community services to LMI individuals.

Examples of CD loans in the AA include:

- In September 2018, WFBNA provided a $4.8 million construction loan for a multifamily housing development located in Grimes, Iowa and consists of four one-bedroom units, 20 two-bedroom units and 10 three-bedroom units, with 88.2 percent of the total units restricted to tenants earning 60 percent or below the area MFI.
- In December 2018, WFBNA provided a $7.9 million construction loan for an affordable housing development located in Des Moines, Iowa and consist of 64 of its 72 units restricted to households earning between 30 and 60 percent of the area MFI.

Product Innovation and Flexibility

Cedar Rapids CSA AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 27 loans totaling $3.1 million to LMI homebuyers that qualified under this program.

Des Moines CSA AA

The institution makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. The bank launched the NeighborhoodLIFT program in the Des Moines CSA AA in September 2018 and more than 400 potential homebuyers attended the event and more than 220 homebuyers utilized the down payment assistance ($15,000) to purchase a home. Of the 220, WFBNA originated 177 home mortgage loans totaling $22.6 million. Under the *your*FirstMortgage loan program the bank has funded 219 loans totaling $27.7 million to LMI homebuyers that qualified under this program.

Refer to the comments in the institution Innovative or Flexible Lending Practices section of this public evaluation for additional details regarding the programs listed above.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Lending Test in the Waterloo MSA and IA Combined NonMetro AAs is consistent with the bank's overall excellent performance under the Lending Test in the FS areas. The bank's performance in the Sioux City MSA AA is weaker than the bank's overall performance due to a low volume of CD lending. Performance in this LS AA did not affect the bank's overall rating for the state.

Refer to Tables O through T in the State of Iowa section of appendix D for the facts and data that support these conclusions.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of Iowa is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Cedar Rapids CSA and Des Moines CSA AAs is excellent.

Qualified Investments										
	Prior Period*		Current Period		Total				Unfunded Commitments**	
Assessment Area	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Cedar Rapids CSA	10	$4,288	60	$15,733	70	12.8	$20,021	14.1		
Des Moines CSA	22	$22,790	341	$57,984	363	66.4	$80,774	57.1		
IA Combined NonMetro	2	$162	54	$18,144	56	10.2	$18,306	12.9		
Sioux City MSA	2	$445	33	$13,955	35	6.4	$14,400	10.2		
Waterloo MSA	4	$3,326	19	$4,720	23	4.2	$8,046	5.7		
Total	40	$31,011	507	$110,536	547	100.0	$141,547	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

<u>Cedar Rapids CSA AA</u>

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 20.9 percent of tier 1 capital allocated to the AA.

The investments and grants reflect excellent responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 98.5 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 57 grants totaling $571,050 to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution occasionally uses innovative and/or complex investments to support CD initiatives. CD Investments involved several complex LIHTC projects where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers.

Examples of CD investments in the AA include:

- In December 2017, WFBNA provided a $7.8 million investment for an LIHTC affordable housing development located in Cedar Rapids, Iowa and is comprised of nine one-bedroom units, 18 two-bedroom units, and 18 three-bedroom units. Of the 45 total units, 41 will be reserved for households with income between 30 and 60 percent of the area MFI. Five of the units will be supportive housing for persons experiencing homelessness. This investment is responsive to the need for affordable housing and assisting individuals with homelessness. WFBNA also demonstrated multi-faceted support by providing the construction loan ($6.5 million) and equity investment to support this affordable housing development.
- In October 2018, WFBNA invested $45 million in an LIHTC fund. Of this total investment, $4.4 million was allocated to the project located in North Liberty, Iowa, with 37 units restricted to tenants earning less than 60 percent of the area MFI. The 37 housing units reported are 100 percent of the total number of LMI units and reflective of WFBNA's percentage of the fund's investment into the property.
- During the exam timeframe, WFBNA provided two grants totaling $190,000 to a local housing organization through the PMP for affordable housing in the Cedar Rapids CSA AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

<u>Des Moines CSA AA</u>

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 22.7 percent of tier 1 capital allocated to the AA.

The investments and grants reflect excellent responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 88.5 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 327 grants totaling $15.9 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved several complex LIHTC projects where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In November 2015, WFBNA invested $7.9 million for the construction of a 62-unit LIHTC affordable housing development located in Pleasant Hill, Iowa. Of the 62 total units, 55 will be restricted to households with income up to 60 percent of the area MFI and the remaining seven units will be market rate. In addition, seven of the units in the development will be set aside for individuals with disabilities. All of the units are targeted to seniors aged 55 and up. This investment is responsive to the need for affordable housing and assisting individuals with homelessness. WFBNA also demonstrated multi-faceted support by providing the construction loan ($7.1 million) and equity investment to support this affordable housing development.

- In October 2016, WFBNA invested $46 million in an LIHTC fund. Of this total investment, $4.5 million was allocated to the development located in Des Moines, Iowa, with 27 units restricted to tenants earning no more than 60 percent of the area MFI.
- During the exam timeframe, WFBNA provided two grants totaling $190,000 to two local housing organizations through the PMP for affordable housing in the Des Moines CSA AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Investment Test in the Sioux City MSA and Waterloo MSA AAs is consistent with the bank's overall excellent performance in the Investment Test in the FS areas. Performance in the IA Combined NonMetro AA is overall good but is weaker than the bank's overall performance due to a lower volume of CD investments. Performance differences in the LS AA did not impact the overall Investment Test rating for the State of Iowa.

SERVICE TEST

The bank's performance under the Service Test in Iowa is rated High Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on the FS reviews, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in both the Cedar Rapids CSA is excellent and Des Moines CSA AAs is good.

Retail Banking Services

Service delivery systems are accessible to geographies and individuals of different income levels in the institution's AAs.

Distribution of Branch Delivery System											
	Deposits	Branches						Population			
Assessment Area	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%)*				% of Population within Each Geography*

Cedar Rapids CSA AA

As of December 31, 2018, WFBNA operates 11 branches and 9 ATMs in the Cedar Rapids CSA AA. All of these branches are full-service locations. There is one branch in a low-income geography and 4 branches in moderate-income geographies. The branch distribution in both LMI geographies significantly exceeds the percentage of the population in LMI CTs in the AA. When considering an additional two branches that directly border LMI geographies, the bank's distribution further exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed one branch within a moderate-income geography during the evaluation period. The closure of one branch in a moderate-income geography did not negatively impact the distribution of branches relative to the population residing in those geographies.

Services and, where appropriate, business hours do not vary in a way that inconveniences the various portions of the AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 5:00 pm. Of the total branches, eight of the 11 branches are also open on Saturdays from 9:00 am to 12:00 pm. Three of the eight branches are located in moderate-income geographies. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Des Moines CSA AA

As of December 31, 2018, WFBNA operates 18 branches and 44 ATMs in the Des Moines CSA AA. All of these branches are full-service locations. There are no branches in the low-income geographies and three branches in moderate-income geographies. The branch distribution in low-income geographies is significantly below the percentage of the population in low-income geographies and the branch distribution in moderate-income geographies is near to the percentage of the population in moderate-income CTs in the AA. When considering an additional four branches that directly border LMI geographies, the bank's distribution is near to demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank did not close any branches in LMI areas during the evaluation period. The bank closed four branches located in middle- and upper-income geographies.

Services and, where appropriate, business hours do not vary in a way that inconveniences the various sections of the AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 5:30 pm. Of the total branches, seventeen of the 19 branches are also open on Saturdays and from 9:00 am to 12:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Community Development Services

The institution provides a relatively high level of CD services.

Cedar Rapids CSA AA

The level of CD services in the Cedar Rapids CSA AA is good. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 141 CD service activities to 22 organizations since the last evaluation, logging a total of 331 qualified hours within this AA. The majority (70 percent) of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing (30 percent). The bank's assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- Four WFBNA team members provided 45 hour of financial education to an organization that utilizes community-led solutions to identify and resolve community concerns with a primary focus on education, financial stability, and health. All of its clients are LMI individuals as they earn less than 80 percent of the area MFI.
- A WFBNA team member provided 54 hours of Board service and four hours of technical expertise to a community shelter and transition services organization. This organization provides safe shelter to the homeless.

Des Moines CSA AA

The level of CD services in the Des Moines CSA AA is excellent. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 1,215 CD service activities to 23 organizations since the last evaluation, logging a total of 4,736 qualified hours within this AA. The majority (94 percent) of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted economic development (4 percent), and affordable housing (2 percent). The bank's assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- 37 WFBNA members provided 1,560 hour of financial education, three team members provided 40 hour of Board service, and 30 team members provided 12 hours of financial expertise at an organization that utilizes community-led solutions to identify and resolve community concerns with a primary focus on education, financial stability, and health. All of its clients are LMI individuals as they earn less than 80 percent of the area MFI.

- Two WFBNA team members provided 688 hour of Board service and eight team members provided 12 hours of financial expertise at an organization where 80 percent of its clients are LMI individuals earning less than 80 percent of the area MFI. This organization is an affiliate of a national organization that provides after-school programs for young people.
- Fifteen WFBNA team members provided over 300 hours of tax preparation through the VITA program. Refer to the comments in the institution Innovative or Flexible Retail Service Programs section of this public evaluation for additional details regarding this program.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Service Test in the Sioux City MSA and Waterloo MSA AAs is consistent with performance within the FS review areas. The performance in the IA Combined NonMetro AA is stronger than the overall performance due to a higher branch distribution in LMI geographies. Performance differences in the LS AAs did not impact the overall Service Test rating for the State of Iowa.

State Rating

State of Kansas

CRA rating for the State of Kansas[31]: Outstanding
The Lending Test is rated: Outstanding
The Investment Test is rated: Outstanding
The Service Test is rated: Low Satisfactory

The major factors that support this rating include:

- Excellent lending activity;
- Good geographic distribution of loans;
- Excellent borrower distribution of loans;
- Good level of CD loans, which has a positive impact on the Lending Test;
- WFBNA's use of flexible products has a neutral impact on the Lending Test;
- Excellent level of CD investments that are responsive to AA needs;
- Retail delivery systems are accessible to all portions of the AA; and
- Adequate CD services.

Description of Institution's Operations in Kansas

WFBNA delineated two AAs within Kansas including the Kansas City-Overland Park-Kansas City, KS CSA AA (Kansas City CSA AA) and the Wichita, KS MSA (Wichita MSA AA). The Kansas City CSA AA received a FS review. The area accounted for the largest portion of the lending (76.4 percent) and deposits (84.0 percent) in Kansas. Refer to Appendix A for a complete description of each AA. Kansas represents the 42nd largest rated area by deposits. WFBNA has $1.0 billion deposits representing 0.1 percent of adjusted deposits in Kansas. WFBNA operates 9 branches and 10 ATMs in Kansas representing 0.2 percent of branches and 0.1 percent of the bank's ATMs. The bank originated or purchased $8.8 billion in loans or 0.5 percent of total reported loan originations and purchases during the evaluation period. The bank's primary loan products in Kansas are home mortgage loans and small loans to businesses.

<u>Kansas City CSA AA</u>

Within the Kansas City CSA AA, the bank had $878 million in deposits and ranked sixth amongst 82 depository institutions in the market with 3.9 percent market share. The top three depository institutions in terms of deposit market shares were Capitol Federal Savings Bank with 10.5 percent, US Bank with 8.1 percent, and Commerce Bank with 7.6 percent. WFBNA operates 7 branches and 8 ATMs in the AA.

[31] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

Demographic Data

Kansas City CSA AA

The following table provides a summary of the demographics that includes housing and business information for the Kansas City CSA AA. Table A indicates that the volume of OOUs is very small in low-income CTs and over 31 percent of families in the AA are LMI. The area's median housing value in the Kansas City CSA AA is 2.7 times the area's highest median income, but 3.4 times moderate-, and 5.4 times low-income, indicating a limited proportion of OOUs are affordable to LMI. Median rents and the moderate percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

Assessment Area: Kansas City-Overland Park-Kansas City KS CSA(2016)

Due to rounding, totals may not equal 100.0
(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

According to the June 2018 Moody's Analytics report, Kansas City's economy is among the Midwest's large top performers. At 1.6 percent, annual job growth is stable, matching the U.S. rate and comfortably above the regional average. Kansas City is no longer expanding its large core of high-wage jobs, but a boom in logistics is fueling rapid mid-wage job growth. Strong population gains, triple those of the Midwest, are alleviating supply-side growth constraints and expanding the workforce, though wage growth settled down. Kansas will have trouble maintaining this momentum, and job growth will not pick up by enough to match the national average in coming quarters. Potential tariffs on agriculture and aerospace will overshadow gains from accelerating global demand. Kansas does not have another driver that could fill the void. The good news is that improving demographics increase the chances of landing one. Without one, Kansas will be a below average performer.

Price appreciation in Kansas City exceeded the U.S. rate for about five years, pushing single-family permitting and construction payrolls higher, in contrast to the rest of Missouri. Home sales slipped a bit along with affordability, but low inventories and more newly formed households willing and able to buy versus rent will support demand and prices. Moody's also reports single-family homes in Kansas City are no longer undervalued relative to rents and income.

Professional/business services account for the majority of job additions over the next two years. The largest economic sectors for employment are the Financial Center, High-Tech and Logistics. Major area employers include Cerner Corporation, HCA Midwest Health System, and the University of Kansas Hospital. According to the U.S. BLS, the unemployment rate in the second quarter of 2018 was 3.5 percent, down from 6.6 percent at the beginning of the evaluation period. The MSA unemployment rate is slightly less than the overall State of Kansas at 3.7 percent.

Community Contacts

The analysis takes into consideration comments provided by two community contacts that serve the bank's Kansas City CSA AA. One contact represents an affordable housing agency serving the AA and one community contact is a local Chamber of Commerce serving Olathe, Overland Park, Johnson County, and the Kansas City Metro area.

The community contact representing an affordable housing agency in the AA commented that home sales have rebounded and are near pre-recession levels and new home prices have increased due to construction cost mostly from rising prices of lumber and concrete. Existing home values are currently stable. However, the community contact also noted that wages are not keeping up with the higher costs making it more difficult for LMI consumers to purchase a home. Federal dollars in Home Funds through HUD are decreasing which negatively affects LMI clients wanting to purchase a home. The contact mentioned that the credit and banking needs of the community are being adequately addressed with qualifying credit. The contact stated that information from local businesses in the AA is that access to capital is not difficult to acquire from more than one financial institution. The contact mentioned that there is a wide variety of housing stock in the Olathe/Johnson county area and many individuals moving from the east/west coast may find this area to be much more affordable than the coasts.

The contact from the Chamber of Commerce commented that the AA is in an economic boom and mentioned that economic conditions in the AA have not been this great since the late 90's early 2000's. The contact went on to state that the AA has seen a major uptick in the economy in the past 3-5 years. The area's primary employers are Garmin, Farmers insurance, AIG, Local Medical Center, Sprint, and Honeywell. However, the community contact did not identify any credit related projects or financing programs. The community contact did state that more involvement of financial intuitions in the start-up/small business industry would be a plus, as startups or small businesses may not have the credit history needed to obtain credit.

The bank conducted research in the AA and identified community needs for affordable housing serving LMI families, Development of Healthy Community services to homeless veterans and families, and Neighborhood Revitalization/Stabilization.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business loans are in high demand and represent a primary credit need for the Kansas City CSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals. The AA also has CD needs including access to more bank branches, grants to non-profits to assist with needs including affordable housing, volunteers to serve on various committees at non-profits in the AA, grants to support homeless shelters for the needy and economic development opportunities in the AA.

Scope of Evaluation in Kansas

The rating for the State of Kansas is primarily based on a FS evaluation of the bank's performance in the Kansas City CSA AA; however, performance in the Wichita MSA AA was considered as well. Conclusions where a LS review affected the CRA Rating for the state are addressed within their respective tests. LS procedures were performed for the Wichita MSA AA. A small portion of the bank's overall lending, investments, and services were conducted in Kansas; therefore, the performance in Kansas received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN KANSAS

LENDING TEST

The bank's performance under the Lending Test in Kansas is rated Outstanding.

Conclusions for Area Receiving a FS Review

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Kansas City CSA AA is excellent.

Lending Activity

Based on the tables below, lending levels reflect an excellent responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State Loans	%State Deposits
Kansas City CSA	32,468	2,662	101	10	35,241	68.5	84.0
Wichita MSA	14,706	1,400	76	10	16,192	31.5	16.0
Total	47,174	4,062	177	20	51,433	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Dollar Volume of Loans (000's)*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State* Loans	%State Deposits
Kansas City CSA	$6,569,174	$180,439	$4,684	$17,277	$6,771,574	76.4	84.0
Wichita MSA	$1,981,017	$82,861	$3,526	$29,522	$2,096,926	23.6	16.0
Total	$8,550,191	$263,300	$8,210	$46,799	$8,868,500	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Kansas City CSA AA

WFBNA ranked sixth in deposits with 3.9 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 10.5 percent market share. There is strong competition as reflected by the 454 lenders and 82 depository institutions in the AA. The second and third lenders in terms of market share were Capitol Federal Savings Bank with 4.1 percent and Community America Credit Union with 3.7 percent.

In small loans to businesses, WFBNA ranked sixth with a market share of 4.7 percent. There is also strong competition as reflected by the 69 lenders in the AA. The top three lenders in terms of market share were Hills Bank and Trust Company with 29.8 percent, U.S. Bank with 12.8 percent, and American Express with 10.7 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in the Kansas City CSA AA.

Home Mortgage Loans

Refer to Table O in the State of Kansas section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- The bank's performance in 2012-2016 for home mortgage loans in low-income geographies exceeds the aggregate distribution of loans and is substantially below the proportion of OOUs in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is well below the proportion of OOUs in those geographies.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of Kansas section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The bank’s performance in 2012-2016 for small business loans in low-income geographies substantially meets the aggregate distribution of loans and is below the proportion of businesses located in those geographies.
- The proportion of loans in moderate-income geographies exceeds both the aggregate distribution of loans and the proportion of businesses located in those geographies.
- Based on the bank’s performance in 2017-2018, the bank’s small business lending is slightly below the combined performance in 2012-2016.

Distribution of Loans by Income Level of the Borrower

The bank exhibits an excellent distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

Home Mortgage Loans

Refer to Table P in the State of Kansas section of appendix D for the facts and data used to evaluate the borrower distribution of the bank’s home mortgage loan originations and purchases. The bank’s overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area’s median housing value is 5.4 times the income of low-income and 3.4 times the income of moderate-income borrowers, indicating a limited proportion of OOUs are affordable to LMI. Despite affordability challenges, the bank’s overall home mortgage lending to LMI borrowers in 2012-2016 exceeds the aggregate distribution of loans.
- The bank’s overall home mortgage lending to low-income borrowers is well below the proportion of families and to moderate-income borrowers exceeds the proportion of families.
- Based on the bank’s performance in 2017-2018, the bank’s home mortgage lending is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Kansas section of appendix D for the facts and data used to evaluate the borrower distribution of the bank’s origination and purchase of small loans to businesses. The distribution of the bank’s originations and purchases of small loans to businesses by revenue is good.

- For both periods, 2012-2016 and 2017-2018, the bank’s distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Community Development Lending

The institution has made a relatively high level of CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution’s level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The level of CD lending in the Kansas City CSA AA is good. WFBNA made 10 CD loans in its AA for a total of $17.3 million, which represents 17.6 percent of tier 1 capital. While the volume of CD loans was considered excellent and addressed affordable housing which is an identified credit needs in the AA, there were no CD loans addressing small businesses, community services, or to revitalize and stabilize the community which are also identified credit needs in the AA. As such, CD lending performance has a positive impact on the lending test rating.

Examples of CD loans in the AA include:

- In January 2017, WFBNA provided a $2.9 million loan for an affordable housing development. This Section 8 development is located in Olathe, Kansas, with 100 percent of the units operating under a Section 8 Housing Assistance Payment (HAP) contract.
- In April 2017, WFBNA provided an $11.2 million loan for an affordable housing development with $4.5 million of the loan amount reported, or 60 of the 149 units (40.3 percent), reflective of the proportional amount of the units restricted to tenants earning 80 percent or less of area MFI.

Product Innovation and Flexibility

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 41 loans totaling $5.9 million to LMI homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

Conclusions for Area Receiving a LS Review

Based on a LS review, the bank's performance under the Lending Test in the Wichita MSA AA is consistent with the bank's overall excellent performance under the Lending Test in the FS area.

Refer to Tables O through T in the State of Kansas section of appendix D for the facts and data that support these conclusions.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of Kansas is rated Outstanding.

Conclusions for Area Receiving a FS Review

Based on a FS review, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Kansas City CSA is excellent.

Qualified Investments										
	Prior Period*		Current Period		Total				Unfunded Commitments**	
Assessment Area	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Kansas City CSA	2	$3,048	22	$18,355	24	48.0	$21,403	44.0		
Wichita MSA	3	$1,949	23	$25,295	26	52.0	$27,244	56.0		
Total	5	$4,997	45	$43,650	50	100.0	$48,647	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

<u>Kansas City CSA AA</u>

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 21.9 percent of tier 1 capital allocated to the AA.

The investments and grants reflect excellent responsiveness to the needs identified in the AA including affordable housing and community services for LMI individuals and geographies. Over 99 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 10 grants totaling $199,425 to a variety of organizations that primarily support affordable housing and community services.

The institution occasionally uses innovative and/or complex investments to support CD initiatives. CD Investments involved several complex LIHTC projects where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased several government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In October 2016, WFBNA invested $46 million in an LIHTC fund. Of this total investment, $4 million was allocated to a development located in Paola, Kansas, with 42 units restricted to tenants earning no more than 60 percent of the area MFI. This investment is responsive to the need for affordable housing and assisting with individuals with homelessness.
- In December 2016, WFBNA provided a $250,000 grant to small business organization through the Small Business DCC Program benefiting small businesses in Eastern Kansas including Kansas City CSA AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.
- During the exam timeframe, WFBNA provided a $100,000 grant to a local housing organization through the PMP for affordable housing in the Kansas City CSA AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

Conclusions for Area Receiving a LS Review

Based on a LS review, the bank's performance under the Investment Test in the Wichita MSA

AA is consistent with the bank's overall excellent performance in the Investment Test in the FS area.

SERVICE TEST

The bank's performance under the Service Test in Kansas is rated Low Satisfactory.

Conclusions for Area Receiving a FS Reviews

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Kansas City CSA AA is adequate.

Retail Banking Services

Service delivery systems are accessible to geographies and individuals of different income levels in the institution's AAs, particularly LMI geographies and/or LMI individuals.

Distribution of Branch Delivery System											
	Deposits	Branches						Population			
Assessment Area	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%)				% of Population within Each Geography*			
				Low	Mod	Mid	Upp	Low	Mod	Mid	Upp
Kansas City CSA	84.7	7	77.8	0.0	14.3	42.9	42.9	7.3	14.3	34.7	43.5
Wichita MSA	15.3	2	22.2	0.0	50.0	50.0	0	7.7	22.8	38.6	30.9

* May not add up to 100 percent due to geographies with unknown tract income level and rounding.

	Distribution of Branch Openings/Closings					
Assessment Area	# of Branch Openings	# of Branch Closings	Net change in Location of Branches (+ or -)			
			Low	Mod	Mid	Upp
Kansas City CSA	1	0	0	0	0	+1
Wichita MSA	0	0	0	0	0	0

<u>Kansas City CSA AA</u>

As of December 31, 2018, WFBNA operates seven branches and eight ATMs in the Kansas City CSA AA. Of these branches, six are full-service locations and one is a limited-service branch. There are no branches in the low-income geographies and one in a moderate-income geography. The branch distribution in low-income geographies is significantly below the percentage of the population in low-income geographies and the branch distribution in moderate-income geographies approximates the percentage of the population in moderate-income geographies in the AA. When considering an additional two branches within close proximity to LMI geographies, the bank's distribution is near to demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank opened one branch in an upper-income geography and has not closed any branches since the last evaluation.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AAs, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 6:00 pm. Nine of the five branches are open on Saturday from 9:00 am to 2:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Community Development Services

Kansas City CSA AA

The institution provides an adequate level of CD services.

Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 59 CD service activities to 12 organizations since the last evaluation, logging a total of 110 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing which was responsive to the identified needs in the AA. The following are examples of CD services provided in this AA:

- A WFBNA team member provided 14 hours of financial education at a nonprofit housing organization that works in partnership with people in need to build decent and affordable housing. The houses are sold to those in need at no profit and with no interest charged.
- A WFBNA team member provided 36.3 hours or board service at a local community organization. As of January 2015, eighty percent of its clients are LMI as they earn less than 80 percent of the area MFI. The mission of the organization is centered on finding homes for abandoned, abused, neglected or orphaned children.

Conclusion for Area Receiving a LS Review

Based on a LS review, the bank's performance under the Service Test in the Wichita MSA AA is consistent with the bank's overall performance under the Service Test in the FS area and did not have an effect on the overall rating for the state.

State Rating

State of Michigan

CRA rating for the State of (Michigan)[32]: Outstanding
The Lending Test is rated: Outstanding
The Investment Test is rated: Outstanding
The Service Test is rated: Low Satisfactory

The major factors that support this rating include:

- Good lending activity;
- Excellent geographic distribution of loans;
- Excellent borrower distribution of loans;
- Good level of CD loans, which has a positive impact on the Lending Test;
- WFBNA's use of flexible products has a neutral impact on the Lending Test;
- Excellent level of CD investments that are responsive to AA needs;
- Retail delivery systems are reasonably accessible to portions of the AAs; and
- Poor CD services.

Description of Institution's Operations in Michigan

WFBNA delineated two AAs within Michigan including the Grand Rapids-Wyoming, MI MSA (Grand Rapids MSA AA) and the Northwestern MI non-metropolitan AA (MI Combined NonMetro). Refer to Appendix A for a complete description of each AA. Both AAs received FS reviews. Michigan represents the 35th largest rated area by deposits. WFBNA has $2.4 billion of deposits representing 0.2 percent of adjusted deposits. As a result of the divestiture of the bank's deposit operations in Michigan, the bank sold 14 branches to Flagstar. WFBNA now operates only a private limited branch office and no ATMs within Michigan, representing 0.0 percent of the bank's branches and 0.0 percent of the bank's ATMs. The bank originated and purchased approximately $3 billion in loans or 0.2 percent of total reported loan originations and purchases during the evaluation period. The bank's primary loan products in Michigan are home mortgage and small loans to businesses.

<u>Grand Rapids MSA AA</u>

Within the Grand Rapids MSA AA, the bank had $1.7 billion in deposits and ranked fifth amongst 31 depository institutions in the market with 8.0 percent market share. The top three in terms of market share are Fifth Third Bank with 20.5 percent, The Huntington National Bank with 11.2 percent, and JPMorgan Chase Bank with 9.0 percent. WFBNA operates one limited branch and no ATMs in the AA.

<u>MI Combined NonMetro AA</u>

Within the MI Combined NonMetro AA, the bank had $705 million deposits and ranked first amongst 18 depository institutions in the market with 18.6 percent market share. mBank and First Bank ranked

[32] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

second and third with 11.0 percent and 10.0 percent, respectively. Due to the sale of branches to Flagstar Bank, WFBNA currently does not operates any branch and ATM in the AA.

Demographic Data

Grand Rapids MSA AA

The following table provides a summary of the demographics that includes housing and business information for the Grand Rapids MSA AA. Table A indicates that the volume of OOUs is very small in low-income CTs and over 38 percent of families in the AA are LMI. The area's median housing value in the Grand Rapids MSA AA is 1.9 times the area's median income, but 2.4 times moderate-, and 3.8 times low-income, indicating a limited proportion of OOUs are affordable to low-income individuals. Median rents and the high percentage of families below poverty level suggest rental housing may also be unaffordable for some low-income residents.

Table A – Demographic Information of the Assessment Area

Assessment Area: Grand Rapids-Wyoming MI MSA (2016)

Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #

(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

According to the July 2018 Moody's Analytics report, Grand Rapids' economy is strong, maintaining its advantage over the region and the nation. Job growth accelerated in the second half of 2018. The robust performance of leisure/hospitality, construction and manufacturing is keeping Grand Rapids on firm footing despite some backtracking in such industries as healthcare and professional services. Industrial production is on an upward trajectory. With the unemployment rate at its lowest level since the late 1990s, industries that require skilled workers may be struggling to fill positions, and strong gains in earnings suggest upward wage pressures.

Grand Rapids' factory sector will struggle to build on recent job gains in 2019 and beyond as automation, digitization, and exposure to changes in trade policy will take a toll. Given the length of the expansion, payroll growth slowed in 2018 but remained impressive at more than 2 percent. Low business costs, a well-educated workforce, and proximity to Midwest transit hubs in Chicago and Detroit will help Grand Rapids safeguard many high-paying jobs, though.

The upswing in tourism will persist in 2019. The industry employs about one-tenth of the workforce, and the metro area's increasing reputation as a craft beer haven will draw visitors as downtown brewpubs and storefronts benefit from very strong consumer fundamentals.

The outlook for the housing market is good thanks largely to favorable demographics trends. Residential real estate is also on the mend. Sales are no longer falling and prices have recovered from the brief downturn earlier. The largest employers in the Grand Rapids MSA include Spectrum, Meijer Inc., and Mercy Health. According to the U.S. BLS, the unemployment rate for the 3rd quarter of 2018 was 3.3 percent and has decreased from 6.9 percent at the beginning of the evaluation period. The unemployment rate in the AA was slightly lower than the overall state at 4.1 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by two community contacts pertaining to organizations that provide community development and affordable housing within the Grand Rapids MSA AA in conjunction with this evaluation. Both contacts stated that there are significant opportunities for financial institutions to partner with community organizations in the Grand Rapids MSA. There is a need for small business loans (early start-ups). There are opportunities to participate with non-profit organizations through mentorships and counseling of small business owners and LMI individuals.

The city of Grand Rapids has done a good job of maintaining and improving its infrastructure, such as bus lines that extend into LMI neighborhoods. Furniture and automobile manufacturing traditionally have been the main industries here, but these have declined in recent years and giving rise to unemployment and physical decay primarily in the city. There is a very low supply of single-family homes for rent and this is putting pressure on affordability for sales and rentals. There is a need for rental rehab as the majority of the affordable rental units in the assessment area are substandard. Unfortunately, neighborhoods in the assessment area lost homes to foreclosures and have not quite rebounded.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Grand Rapids MSA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

<u>MI Combined NonMetro AA</u>

The following table provides a summary of the demographics that includes housing and business information for the MI Combined NonMetro AA. Table A indicates that there are no low-income CTs and over 36 percent of families in the AA are LMI. The area's median housing value in the MI Combined NonMetro AA is 2.1 times the area's median income, but 2.6 times moderate-, and 4.2 times low-income, indicating a limited proportion of OOUs are affordable to low-income families. Median

rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

Assessment Area: Northwestern MI Non-Metro (2016)

Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #

Due to rounding, totals may not equal 100.0
(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

According to the June 2018 Moody's Analytics report, Michigan's economy is strong and expanding at a faster clip, driven by solid gains in healthcare, construction, and professional/business services. However, the economy in the MI Combined NonMetro AA is trailing that of the state. The local economy has begun to recover and stabilize from the recession but the area faces obstacles to economic development. The most significant challenge facing the area is population decline. The area's primary industries are tourism, logging, and mining.

The outlook for the housing market is weak because of poor population trends and lack of household formation. Residential construction is depressed and will continue for the foreseeable future. According to the U.S. BLS, the unemployment rates for the second quarter of 2018 in the following counties range from a low of 3.9 percent (Dickinson County) to a high of 7.2 percent (Keweenaw County) while the state average is 4.1percent.

Community Contacts

The analysis takes into consideration comments provided by two community contacts pertaining to organizations that provide community services and small business lending within the Central and Upper Peninsula in Michigan in conjunction with this evaluation.

One organization serves Alger, Delta, Dickinson, Marquette, Menominee, and Schoolcraft counties. This organization works with local, regional, and state economic development corporations to facilitate development activities in its six-county region. Its planning activities focus on both comprehensive regional plans and specific plans relating to such areas as housing, industrial development, and healthcare. The second contact provides technical assistance to small businesses primarily through one-on-one business and financial planning assistance.

One of the contacts noted that the biggest credit needs in the area is gap funding for small businesses. The contact stated that start-up businesses do not have access to loans, as most local banks demand collateral to secure financing. The contact indicated that banks should find ways to extend loans to start-up businesses that do not have sufficient collateral. In general, the contact believes that banks in the region are responsive to the credit needs of small businesses either by making loans themselves or referring declined borrowers to a local SBDC for financing or for technical assistance.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business loans represent primary credit needs for the MI Combined NonMetro AA. Opportunity exists to originate these types of loans throughout the AA including moderate-income areas.

Scope of Evaluation in Michigan

The rating for the State of Michigan is primarily based on FS evaluations of the bank's performance in the Grand Rapids MSA and MI Combined NonMetro AAs; however, performance in each AA was considered. A limited portion of the bank's overall lending, investments, and services were conducted in Michigan; therefore, the performance in Michigan received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN MICHIGAN

LENDING TEST

The bank's performance under the Lending Test in Michigan is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in both the Grand Rapids MSA and MI Combined NonMetro AAs is excellent.

Lending Activity

Based on the tables below, lending levels reflect good responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State Loans	%State Deposits
Grand Rapids MSA	15,228	1,940	85	6	17,232	72.8	71.2
MI Combined NonMetro	4,258	2,106	79	7	6,450	27.2	28.8
Total	19,486	4,046	164	13	23,682	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Dollar Volume of Loans (000's)*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State* Loans	%State Deposits
Grand Rapids MSA	$2,266,741	$203,720	$4,703	$40,813	$2,515,977	81.2	71.2
MI Combined NonMetro	$462,076	$108,457	$6,046	$4,338	$580,917	18.8	28.8
Total	$2,728,817	$312,177	$10,749	$45,151	$3,096,894	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Grand Rapids MSA AA

WFBNA ranked fifth in deposits with 8.0 percent market share in the AA. In overall HMDA lending, WFBNA ranked fifth with 3.3 percent market share. There is strong competition as reflected by the 414 lenders and 31 depository institutions in the AA. The top three lenders in this market were Lake Michigan Credit Union with 15.2 percent market share, Fifth Third Bank with 10.1 percent market share, and Amerifirst Home Mortgage with 5.0 percent market share.

In small loans to businesses, WFBNA ranked 15th with a market share of 1.0 percent. There is strong competition in the market as reflected by the 92 lenders. The top three lenders were American Express with 13.3 percent, Chase Bank with 13.0 percent, and Capital One Bank with 9.1 percent.

MI Combined NonMetro AA

WFBNA ranked first in deposits with 18.6 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 12.9 percent market share. There is strong competition as reflected by the 209 lenders and 18 depository institutions in the AA. The 2nd and 3rd top lenders in this market were MBank 002 with 12.2 percent market share and River Valley Bank with 10.9 percent market share.

In small loans to businesses, WFBNA ranked third with a market share of 12.0 percent. The top two lenders were American Express with 12.8 percent market share and MBank with 12.4 percent market share.

Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in the Grand Rapids MSA AA and an excellent geographic distribution of loans in the MI Combined NonMetro AA.

Grand Rapids MSA AA

Home Mortgage Loans

Refer to Table O in the State of Michigan section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- For 2012-2016, the proportion of home mortgage loans in low-income geographies is below both the aggregate distribution of loans and the proportion of OOUs in those geographies. However, less weight was given to WFBNA's performance in low-income geographies because of the very small proportion of the bank's loans and OOUs in low-income geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and near to the proportion of OOUs in those geographies.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is higher than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of Michigan section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- For 2012-2016, the proportion of the bank's small business loans in LMI geographies exceeds both the aggregate distribution of loans and the proportion of businesses in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly lower than the combined performance in 2012-2016.

MI Combined NonMetro AA

Home Mortgage Loans

Refer to Table O in the State of Michigan section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The AA contains no low-income tracts so our assessment focused on the bank's performance in moderate-income tracts.
- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in moderate-income geographies exceeds the aggregate distribution of loans and is near to the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of Michigan section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The AA contains no low-income tracts so our assessment focused on the bank's performance in moderate-income tracts.
- For 2012-2016, the proportion of loans in moderate-income geographies exceeds the aggregate distribution of loans and is near to the proportion of businesses located in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly below the combined performance in 2012-2016.

Distribution of Loans by Income Level of the Borrower

The bank exhibits an excellent distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

Grand Rapids MSA AA

Home Mortgage Loans

Refer to Table P in the State of Michigan section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- There are homeownership affordability hurdles in the AA especially for low-income borrowers. As noted above, the area's median housing value is five times the income of low-income borrowers indicating a limited proportion of OOUs are affordable to low-income borrowers. Despite the affordability challenges, the bank's performance in 2012-2016 to LMI borrowers exceeds the aggregate lending.
- The bank's performance to low-income borrowers is below the proportion of families and to moderate-income borrowers exceeds the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Michigan section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is adequate.

- For 2012-2016, the bank's distribution of small loans to businesses with revenues of $1 million or less substantially meets the aggregate small business lending data for businesses with revenues of $1 million or less and is well below the percentage of small businesses located in the AA.
- The bank's performance in 2017-2018 was poor and attributed to the downgrade to the overall performance rating from good to adequate.

MI Combined NonMetro AA

Home Mortgage Loans

Refer to Table P in the State of Michigan section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- There are homeownership affordability hurdles in the AA especially for low-income borrowers. As noted above, the area's median housing value is 4.2 times the income of low-income borrowers indicating a limited proportion of OOUs are affordable to low-income borrowers. Despite the affordability challenges, the bank's performance in 2012-2016 to LMI borrowers substantially meets the aggregate lending.
- The bank's performance to low-income borrowers is well below the proportion of families and to moderate-income borrowers is below the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly better than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Michigan section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is excellent.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is near to the percentage of small businesses located in the AA.

Community Development Lending

The institution has made a relatively high level of CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

Grand Rapids MSA AA

The level of CD lending in the Grand Rapids MSA AA is excellent. WFBNA made 6 CD loans in its AA for approximately $41 million, which represents over 21 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified affordable housing needs in the AA. The bank made 5 loans totaling $40 million (98 percent) for the purpose of affordable housing which is an identified credit needs in the AA. Additionally, the bank extended one CD loan for the primary purpose economic development.

Examples of CD loans in the AA include:

- In March 2016, WFBNA provided a $7.66 million construction loan for an affordable housing development located in a moderate-income area of Grand Rapids, Michigan, and this loan financed the second of the two affordable phases of this development. This phase includes 22 affordable units on floors 5-7 with a unit mix of 10 one-bedroom units and 12 two-bedroom units. The units will be restricted to tenants earning between 30 to 60 percent of the area MFI.
- In March 2016, WFBNA provided a $1 million SBA 504 term loan to this small business to purchase a commercial property. This loan was made in conjunction with the SBA's 504 CDC program, which is a long-term financing tool for economic development within a community.
- In July 2014, WFBNA provided a $9.1 million loan for a 34-unit LIHTC affordable housing development located in a moderate-income census tract in Grand Rapids, Michigan. The project includes a 100 percent of the units restricted to tenants earning between 30 and 60 percent of the area MFI. This development consists of six one-bedroom units and 28 two-bedroom units. The project will be an adaptive reuse of the former City of Grand Rapids building permit office, which was built in 1956, and the developers will be seeking Green Policy Certification for the development.

MI Combined NonMetro AA

The level of CD lending in the MI Combined Non-Metro AA is adequate. WFBNA made 7 CD loans in its AA for approximately $4.3 million, which represents approximately 5.5 percent of tier 1 capital. CD lending performance has a neutral impact on the lending test rating. Five loans totaling approximately $1.3 million addressed affordable housing which is an identified credit needs in the AA. Two other CD loans were for the purpose of providing community services to LMI individuals

Examples of CD loans in the AA include:

- In December 2013, WFBNA renewed a $3 million working capital line of credit to an organization that is designated as a federally recognized Native American tribe that provides housing, education, health, and social services to its members. Over 75 percent of their members are LMI individuals earning less than $42,000 annually.
- In April 2014, WFBNA provided a $15.0 million line of credit to a Tax Credit Investment Fund. Of that total, $679,000 has been allocated to an affordable housing development located in Ishpeming, MI. The loan proceeds will be used to bridge the gap between the receipt of capital contributions from investors and the payment of equity investments to operating partnerships that own LIHTC projects.

Product Innovation and Flexibility

Grand Rapids MSA AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 7 loans totaling $740,000 to LMI homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

MI Combined NonMetro AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 38 loans totaling $2.6 million to LMI homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of Michigan is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Grand Rapids MSA and MI Combined NonMetro AAs is excellent.

Qualified Investments										
	Prior Period*		Current Period		Total				Unfunded Commitments**	
Assessment Area	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Grand Rapids MSA	3	$111	19	$82,357	22	35.5	$82,468	87.3		
MI Combined NonMetro	10	$7,522	30	$4,527	40	64.5	$12,049	12.7		
Total	13	$7,633	49	$86,884	62	100.0	$94,517	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

Grand Rapids MSA AA

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 42.2 percent of tier 1 capital allocated to the AA.

The investments and grants reflect excellent responsiveness to the needs identified in the AA including affordable housing, community services, and revitalization/stabilization for LMI individuals and geographies. Over 75.7 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 10 grants totaling $78,500 to several organizations that primarily support affordable housing and community services for LMI individuals.

The institution occasionally uses innovative and/or complex investments to support CD initiatives. CD Investments involved several complex LIHTC and NMTC projects where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers.

Examples of CD investments in the AA include:

- In March 2013, WFBNA invested $8.6 million in a LIHTC affordable housing development located in Grand Rapids, Michigan, with 100 percent of the units restricted to tenants earning between 30 to 60 percent of the area MFI. This development consists of 21 one-bedroom units and 16 two-bedroom units. This investment is responsive to the need for affordable housing.
- In November 2018, WFBNA invested $32.5 million in an LIHTC fund. Of this total investment, $1.1 million was allocated to a development located in Grand Rapids, Michigan, with 23 units restricted to tenants earning less than 60 percent of the area MFI. The 4 housing units reported are 16 percent of the total number of LMI units and reflective of Wells Fargo's percentage of the fund's investment into the property. This investment is responsive to the need for affordable housing.

MI Combined NonMetro AA

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 15.2 percent of tier 1 capital allocated to the AA.

The investments and grants reflect good responsiveness to the needs identified in the AA including affordable housing and community services for LMI individuals and geographies. Over 50 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 29 grants totaling $353,818 to a variety of organizations that primarily support affordable housing and community services.

The institution rarely uses innovative and/or complex investments to support CD initiatives. CD Investments involved one complex project where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers.

Example of a CD investment in the AA includes:

- In December 2013, WFBNA invested $25 million in an LIHTC fund. Of this total investment, $4.2 million was allocated to a development located in Ishpeming, Michigan. Funding was utilized to renovate the building into a mixed-use development which includes affordable housing and commercial space. The residential space features 24 spacious, energy efficient family apartments restricted to tenants earning no more than 60 percent of the area MFI while the commercial space is occupied by the YMCA Early Childhood Development program and Ishpeming Public Schools.

SERVICE TEST

The bank's performance under the Service Test in Michigan is rated Low Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Grand Rapids MSA AA is very poor and performance in the MI Combined NonMetro AA is good.

Retail Banking Services

Service delivery systems are reasonably accessible to portions of the AAs, particularly LMI geographies and/or LMI individuals. The tables below are shown as of December 31, 2018 to be consistent with other rated areas. On November 30, 2018, the bank sold 14 branches, including four in moderate-income geographies to Flagstar Bank. The branch sale was part of a larger transaction where Flagstar Bank purchased branches in Indiana, Michigan, Ohio, and Wisconsin. With the exception of a private bank, this sale resulted in a divestiture of the bank's deposit operations in Michigan. The branches were re-branded as Flagstar branches upon closing of the transaction. Flagstar intends to keep all branches and retain all employees. Since these branches operated during the majority of the evaluation time period these branches are evaluated and included in the analysis.

Distribution of Branch Delivery System											
Assessment Area	Deposits	Branches						Population			
	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%)*				% of Population within Each Geography*			
				Low	Mod	Mid	Upp	Low	Mod	Mid	Upp

MI Combined NonMetro	28.8	0	0	0	0	0	0	0.0	15.2	60.4	23.4

*May not add up to 100 percent due to geographies with unknown tract income level and rounding.

Distribution of Branch Openings/Closings						
Assessment Area	# of Branch Openings	# of Branch Closings	Net change in Location of Branches (+ or -)			
			Low	Mod	Mid	Upper
Grand Rapids MSA	0	0	0	0	0	0
MI Combined NonMetro	0	0	0	0	0	0

Grand Rapids MSA AA

As of December 31, 2018, WFBNA operates one limited service branch and no ATMs in the Grand Rapids MSA AA. The limited service branch is located in an upper-income geography. The bank's branch distribution in LMI geographies is significantly below the demographics.

The bank has not opened or closed branches during the evaluation period.

Services and, where appropriate, business hours do not vary in a way that inconveniences the various portions of the AA, particularly LMI geographies and/or individuals. This branch is open Monday through Friday from 8:00 am to 5:00 pm. The bank offers limited banking products at this branch.

MI Combined NonMetro AA

As of November 30, 2018, WFBNA operated 14 branches and 14 ATMs in the Grand Rapids MSA AA. All of these branches are full-service locations. There is no branch in a low-income geography and four branches in moderate-income geographies. The branch distribution in low-income geographies is significantly below the percentage of the population in low-income geographies and performance in the moderate-income geographies exceeds the percentage of the population in the moderate-income geographies in the AA.

The bank has not opened or closed branches during the evaluation period.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 5:00 pm, and Saturday from 9:00 am to 12:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Community Development Services

The institution provides a low level of CD services.

Grand Rapids MSA AA

The level of CD services in the Grand Rapids MSA AA is very poor. Bank records show that the bank provided no CD service activities since the last evaluation.

MI Combined NonMetro AA

The level of CD services in the MI Combined NonMetro AA is poor. Bank records show that employees provided financial or job-specific and/or technical assistance for 10 CD service activities to six organizations since the last evaluation, logging a total of 19 qualified hours within the AA. The majority (68 percent) of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing (32 percent). The following are examples of CD services provided in this AA:

- One WFBNA team member provided three hours of Board service and three hours of financial expertise at a nonprofit organization where 100 percent of its clients are LMI individuals as they earn less than 80 percent of the area MFI. This organization works in partnership with people in need to build affordable housing. The houses are sold to LMI individuals and families at no profit and with no interest charged.
- One WFBNA team member provided five hours of technical assistance at an institution of learning where 88 percent of students qualify for the federal FRL program.

State Rating

State of Minnesota

CRA rating for the State of Minnesota[33]: Outstanding
The Lending Test is rated: Outstanding
The Investment Test is rated: Outstanding
The Service Test is rated: High Satisfactory

The major factors that support this rating include:

- Excellent lending activity;
- Excellent geographic distribution of loans;
- Excellent borrower distribution of loans;
- Adequate level of CD loans;
- WFBNA's use of flexible products has a neutral impact on the Lending Test;
- Excellent level of CD investments that are responsive to AA needs;
- Retail delivery systems are accessible to all portions of the AA; and
- Adequate CD services.

Description of Institution's Operations in Minnesota

WFBNA delineated four AAs within Minnesota including the Duluth, MN MSA (Duluth MSA AA); MN Combined Non-Metros (MN Combined NonMetro AA); Mankato-New Ulm-North Mankato, MN CSA (Mankato CSA AA); and Rochester-Austin, MN CSA (Rochester CSA AA). The Duluth MSA AA and MN Combined NonMetro AA received FS reviews. The two areas accounted for the largest portion of the lending (64.6 percent) and deposits (61.7 percent) amongst the AAs in Minnesota. Refer to Appendix A for a complete description of each AA. Minnesota represents the 26th largest rated area by deposits. WFBNA has $4.7 billion deposits representing 0.4 percent of adjusted deposits in Minnesota. WFBNA operates 43 branches and 91 ATMs in Minnesota representing 0.8 percent of branches and 0.7 percent of the bank's ATMs. The bank originated or purchased $8.2 billion in loans or 0.4 percent of total reported loan originations and purchases during the evaluation period. The bank's primary loan products in Minnesota are home mortgage loans and small loans to businesses.

Duluth MSA AA

Within the Duluth MSA AA, the bank had $1.1 billion in deposits and ranked first amongst 24 depository institutions in the market with 29.5 percent market share. The top second and third depository institutions in terms of deposit market shares were U.S. Bank with 19.2 percent market share and Republic Bank with 7.9 percent market share. WFBNA operates 9 branches and 24 ATMs in the AA.

MN Combined NonMetro AA

Within the MN Combined NonMetro AA, the bank had $1.8 billion in deposits and ranked first amongst

[33] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

119 institutions in the market with 12.0 percent market share. Bremer Bank and U.S. Bank ranked second and third with 11.5 percent and 3.7 percent market share, respectively. WFBNA operates 22 branches and 42 ATMs in the AA.

Demographic Data

Duluth MSA AA

The following table provides a summary of the demographics that includes housing and business information for the Duluth MSA AA. Table A indicates that the volume of OOUs is very small in low-income CTs and almost 38 percent of families in the AA are LMI. The area's median housing value in the Duluth MSA AA is 2.5 times the area's median income, but 3.1 times moderate-, and 5.0 times low-income, indicating a limited proportion of OOUs are affordable to LMI. Moderate median rents and the higher percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

Assessment Area: Duluth MN MSA (2016)

Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #

(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

According to the June 2018 Moody's Analytics report, Duluth's economy is improving after nearly nine years of sluggish growth. The trade policy has renewed positive momentum in local natural resources and mining. Duluth's important iron ore mines recovered from the 2014 commodity bust and are operating near capacity. Industrial production is up more than 3 percent from a year ago, the strongest pace since 2012. Poor demographic trends and a lack of diversity will keep Duluth a below-average long-term performer. The healthcare industry will play a bigger role in Duluth short term thanks to major new investment. The share of residents age 50 or older is well above average and medical providers provide care to people living in surrounding rural areas. An inadequately educated and slowly growing workforce is the biggest long-term obstacle to growth, especially higher-value added service industries. Duluth lost residents the past three years and its population is roughly the same size as a decade ago. There is already a shortage of prime working-age residents, and the metro area's unusually large number of residents age 55 to 64 are retiring. Also, educational attainment is low despite the presence of the University of Minnesota Duluth. Graduates leave for the Twin Cities, where there are far more high-skill, high-wage service jobs.

After holding steady during the first half of the decade, home prices have risen 17 percent since the start of 2015, and single-family residential permits are higher than a year ago. Home sales and rental inventory is higher than the State of Minnesota and more aligned with the higher national rate. Major area employers include Essentia Health, St. Luke's University Health Network, and Miner's Inc. According to the U.S. BLS, the unemployment rate in the second quarter of 2018 was 3.8 percent, down from 6.6 percent at the beginning of the evaluation period. The MSA unemployment rate is higher than the overall State of Minnesota at 2.9 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by two community contacts that serve the bank's Duluth MSA AA. One of the two community contacts was a meeting between Community Development leaders and regulators from the OCC, FDIC, and the Federal Reserve to discuss affordable housing needs in the AA. The second community contact represents a Small Business Development agency that partners with entrepreneurs to stimulate growth of small businesses in the AA. The agency serves Aitkin, Carlton, Cass, Cook, Crow Wing, Itasca, Koochiching, Lake, Pine and St. Louis Counties in Minnesota and Douglas County in Wisconsin.

A primary area of need discussed between the regulators and the CD community contacts was affordable housing, including affordable housing for the workforce in the AA. As businesses recovered from the financial crisis, they are expanding and hiring new employees. With the lack of housing development in recent years, there is little available new construction in the AA to meet the need. According to the community contacts, both in new construction and rehabilitation, there is a gap between development costs and sales price, and there is lack of funding to cover that gap. There is a need for micro loans for small businesses as fewer than 10 percent of micro-loans issued to small businesses in the AA were in partnership with a bank. There is also a need for homebuyer workshops to assist LMI individuals with homeownership, more grants for down payment or closing cost assistance to LMI families and individuals, and technical assistance in the form of financial management and financial literacy education for first time homebuyers. Another need is for banks to partner with non-profits in LMI communities within the AA to ensure that funds are available to revitalize and stabilize LMI communities. The community contacts stated that there are strong relationships with banks and overall there has been successful collaboration on projects.

The Small Business Development agency stated that West Duluth has industrial areas with large numbers of vacancies. The City of Duluth has dedicated funds to address this issue through the Advance West program. Per the program, anyone that buys a building can get up to a $50,000 forgivable loan to cover any gap between the valuation and actual cost of rehabilitating the building. The business owner is required to open the business and create one or two jobs in the first year. In the past year, four projects were executed through the Advance West program. According to the community contact, there are many entrepreneurs, but a lack of access to working capital for small businesses in the AA. In addition to a lack of working capital, there is also a shortage of suitable locations for start-up businesses. The commercial retail space available in LMI areas of Duluth, for example, are in such distressed condition that it is cost prohibitive to restore them to a condition compliant with City codes. Commercial vacancies persist at a terrible rate in the Lake and Park neighborhoods bordering Downtown. Nevertheless, the contact stated prospects for employment and business development are on an upswing in Duluth. This is due to activist politicians who support reinvestment and productive public/private economic development partnerships.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Duluth MSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

Demographic Data

<u>MN Combined NonMetro AA</u>

The following table provides a summary of the demographics that includes housing and business information for the MN Combined NonMetro AA. Table A indicates that there are no low-income CTs and over 38 percent of families in the AA are LMI. The area's median housing value in the MN Combined NonMetro AA is 2.8 times the area's median income, but 3.5 times moderate-, and 5.6 times low-income, indicating a limited proportion of OOUs affordable to LMI individuals. The relatively high percentage of families below poverty level suggest rental housing may be unaffordable for many low-income residents as well.

Table A – Demographic Information of the Assessment Area

Assessment Area: MN Combined Non-Metros (2016)

Due to rounding, totals may not equal 100.0
(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

According to the June 2018 Moody's Analytics report, Minnesota transitioned into the late-cycle expansion, with job and income growth falling below the Midwest averages because of labor constraints. Even with the fastest labor force growth in the region, the unemployment rate hit an 18-year low. Anecdotal evidence indicates labor shortages across industries, which are starting to impede output. Wage pressures are developing and average hourly earnings are up almost 2 percent from a year ago. The healthcare industry will be the main driver behind job gains over the coming quarters thanks to a string of hospital and clinic expansions. The projects will support well-paying construction jobs, helping to accelerate job gains ahead of the U.S. average next year. Despite these expansions, healthcare job growth will slow over the coming years to a more sustainable pace, in line with the U.S. deceleration.

Minnesota's industrial production is hitting a new all-time high. Food and medical device producers are increasing headcounts to keep up with demand but worker shortages plague the industry since experienced baby boomers are starting to retire and younger workers are not stepping in. Payrolls in these industries will inch up, but companies will also invest in labor-saving technology. The state's large fabricated metal manufacturers are struggling because of higher steel prices resulting from the 25 percent tariff on imported steel. A full-fledged trade war with China would hurt the state since China is Minnesota's second largest trading partner and a quarter of Minnesota's exports are medical devices.

Housing conditions are mixed as house price growth slipped below the U.S. rate, but permitting picked up thanks to more multifamily construction. Major employers in the AA include the Mayo Clinic, Allina Health System, and Target Corp. According to the U.S. BLS, the unemployment rates for June 2018 in the following counties range from a low of 2.4 percent (Cook County) to a high of 6.1 percent (KooChiching County) while the overall state average was 2.9 percent during the same period.

Community Contacts

The analysis takes into consideration comments provided by a recent community contact in conjunction with this evaluation that serves the bank's MN Combined NonMetro AA. The contact is a housing organization serving the AA. The contact indicated that transportation and housing are a big issue in rural areas. Population in the region's rural communities grew because of new immigrants but they lack access to adequate transportation system to get to jobs, particularly in Southern Minnesota, where immigrant workers have been attracted to food processing industries.

The community contact commented that most of the decline in the downtown retail districts of rural communities is tied to the Farm Crisis of the 1980's. The loss of farm population and disposable income due to the disappearance of so many small family-owned farms were just enough to tip the balance in favor of disinvestment and decline in the AA. Housing development took a hit during the period and production sharply declined. Housing production, both single family and rental, improved during the 1990's and 2000's until the housing crisis. It had been keeping pace with population and employment needs. Since the housing crisis, it has been difficult to impossible to restart housing markets (single family or rental housing) in many rural communities in the State of Minnesota let alone in the non-metro areas in the AA. The average vacancy rate in rural counties in the State is 2.7 percent.

The community contact stated that housing production has picked up in the Twin Cities that it is similar to volume in 2002 but non-metro rural areas are struggling. Workers are looking for rentals because many of them are driving in from communities that may be as far as 100 miles away and owning homes further out. But there are serious shortages of rental units in the communities in which they work. Under this pressure, there are fewer affordable, senior, workforce, and even executive rental units in towns where the jobs are located. The lack of investment and development has nothing to do with the access to capital.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the MN Combined NonMetro AA. Furthermore, the AA has CD needs including affordable housing and economic development.

Scope of Evaluation in Minnesota

The rating for the State of Minnesota is primarily based on FS evaluations of the bank's performance in the Duluth MSA and MN Combined NonMetro AAs; however, performance in each AA was considered. Conclusions where a LS review affected the CRA Rating for the state are addressed within their respective tests. LS procedures were performed for the Mankato CSA AA and Rochester CSA AA. A small portion of the bank's overall lending, investments, and services were conducted in Minnesota; therefore, the performance in Minnesota received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN IOWA

LENDING TEST

The bank's performance under the Lending Test in Minnesota is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in both the Duluth MSA and MN Combined NonMetro AAs is excellent.

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CDloans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State Loans	%State Deposits
Duluth MSA	7,171	4,077	90	8	11,346	17.6	24.2
Mankato CSA	5,388	1,513	167	18	7,086	11.0	14.7
MN Combined NonMetro	19,941	8,286	2,083	14	30,324	47.0	37.5
Rochester CSA	11,112	3,966	623	10	15,711	24.4	23.6
Total	43,612	17,842	2,963	50	64,467	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Dollar Volume of Loans (000's)*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State* Loans	%State Deposits
Duluth MSA	$1,040,920	$215,780	$2,991	$1,338	$1,261,029	15.2	24.2
Mankato CSA	$814,343	$91,298	$18,379	$27,387	$951,407	11.5	14.7
MN Combined NonMetro	$3,105,983	$483,750	$247,154	$18,614	$3,855,501	46.6	37.5

Total	$6,803,445	$1,023,036	$350,380	$100,662	$8,277,523	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Duluth MSA AA

WFBNA ranked first in deposits with 29.5 percent market share in the AA. In overall HMDA lending, WFBNA ranked second with 9.6 percent market share. There is strong competition as reflected by the 276 lenders and 24 depository institutions in the AA. The top first and third lenders in terms of market share were U.S. Bank with 11.1 percent and North Shore Bank of Commerce with 8.6 percent market share.

In small loans to businesses, WFBNA ranked second with a market share of 16.9 percent. There is strong competition as reflected by the 58 lenders in the AA. The top first and third lenders in terms of market share were U.S. Bank with 26.2 percent and American Express with 12.1 percent.

MN Combined NonMetro AA

WFBNA ranked first in deposits with 12.0 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 9.5 percent market share. There is strong competition as reflected by the 484 lenders and 119 depository institutions in the AA. The second and third lenders are U.S. Bank with 8.0 percent market share and Bremer Bank with 4.2 percent market share.

In small loans to businesses, WFBNA ranked second with a market share of 11.4 percent. There is also strong competition as reflected by the 84 lenders in the AA. The top first and third lenders were U.S. Bank with 17.0 percent and Capital One with 11.2 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits an excellent geographic distribution of loans in the Duluth MSA AA and a good geographic distribution of loans in the MN Combined NonMetro AA.

Duluth MSA AA

Home Mortgage Loans

Refer to Table O in the State of Minnesota section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in low-income geographies is below the aggregate distribution of loans and exceeds the proportion of OOUs in those geographies.
- The proportion of loans in moderate-income geographies exceeds both the aggregate distribution of loans and the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of Minnesota section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- For the 2012-2016 period, the bank's performance for small business loans in low-income geographies substantially meets the aggregate distribution of loans and exceeds the proportion of businesses located in those geographies.
- The proportion of loans in moderate-income geographies exceeds both the aggregate distribution of loans and the proportion of businesses located in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly below the performance in 2012-2016.

MN Combined NonMetro AA

Home Mortgage Loans

Refer to Table O in the State of Minnesota section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- The AA contains no low-income tracts so our assessment focused on the bank's performance in moderate-income tracts.
- The bank's performance in 2012-2016 for home mortgage loans in moderate-income geographies substantially meets the aggregate distribution of loans and is below the proportion of OOUs in those geographies.

- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is higher than the performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of Minnesota section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is good.

- The AA contains no low-income tracts so our assessment focused on the bank's performance in moderate-income tracts.
- For both 2012-2016 and 2017-2018 periods, the bank's performance for small business loans in moderate-income geographies substantially meets the aggregate distribution of loans and is below the proportion of businesses located in those geographies.

Distribution of Loans by Income Level of the Borrower

The bank exhibits an excellent distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

<u>Duluth MSA AA</u>

Home Mortgage Loans

Refer to Table P in the State of Minnesota section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 5.0 times the income of low-income and 3.1 times the income of moderate-income borrowers, indicating a limited proportion of OOUs are affordable to LMI borrowers. Despite affordability challenges, the bank's overall home mortgage lending to LMI borrowers in both 2012-2016 and 2017-2018 periods exceeds the aggregate distribution of loans.
- The bank's overall home mortgage lending to low-income borrowers is well below the proportion of families and to moderate-income borrowers exceeds the proportion of families.

Small Loans to Businesses

Refer to Table R in the State of Minnesota section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is excellent.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is near to the percentage of small businesses located in the AA.

MN Combined NonMetro AA

Home Mortgage Loans

Refer to Table P in the State of Minnesota section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 5.6 times the income of low-income and 3.5 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI borrowers. Despite affordability challenges, the bank's performance in both 2012-2016 and 2017-2018 periods to low-income borrowers exceeds the aggregate lending and is significantly below the proportion of families.
- The bank's overall home mortgage lending to moderate-income borrowers substantially meets the aggregate lending and is near to the proportion of families.

Small Loans to Businesses

Refer to Table R in the State of Minnesota section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Community Development Lending

The institution has made an adequate level of CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

Duluth MSA AA

The level of CD lending in the Duluth MSA AA is poor. WFBNA made eight CD loans in its AA for a total of $1.3 million, which represents 1.1 percent of tier 1 capital. CD lending performance has a neutral impact on the lending test rating. The loans were responsive to the identified needs for affordable housing and community services.

Examples of CD loans in the AA include:

- In August 2013, WFBNA renewed a $100,000 working capital line of credit for an organization offering employment services to help LMI individuals obtain and maintain long-term

employment in their communities. Services offered include career exploration, skill assessments, job development, job placement, mentoring, training, and community access.
- In March 2017, WFBNA provided a $213,291 loan for a multifamily housing development located in a low-income census tract in Duluth, MN, of which $170,633 reported as affordable housing based on residential square footage being 50 percent of the mixed-use subject property located in Duluth, MN.

MN Combined NonMetro AA

The level of CD lending in the MN Combined NonMetro AA is excellent. WFBNA made 14 CD loans in its AA for a total of $18.6 million, which represents 9.4 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified needs in the AA, including affordable housing and economic development.

Examples of CD loans in the AA include:

- In August 2015, WFBNA provided a $5.3 million loan for a 36-unit LIHTC affordable housing development located in a middle-income area of Owatonna, Minnesota with nine one-bedroom units and 27 two-bedroom units. All of the units will be affordable to households with income between 30 and 60 percent of the area MFI. Four of the units will be designated for long-term homeless, and two units will be fully accessible.
- In September 2016, WFBNA renewed a $1.5 million working capital line of credit for a nonprofit organization providing capital resources and innovative ideas to assist small businesses and community development corporations throughout Minnesota and the Midwest.

Product Innovation and Flexibility

Duluth MSA AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 95 loans totaling $9.6 million to LMI homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

MN Combined NonMetro AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 144 loans totaling $15.5 million to LMI homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Lending Test in the Rochester CSA and Mankato CSA AAs is consistent with the bank's overall excellent performance under the Lending Test in the FS areas.

Refer to Tables O through T in the State of Minnesota section of appendix D for the facts and data that support these conclusions.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of Minnesota is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Duluth MSA is adequate and performance in the MN Combined NonMetro AAs is excellent.

Qualified Investments										
	Prior Period*		Current Period		Total				Unfunded Commitments**	
Assessment Area	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Duluth MSA	1	$489	49	$8,664	50	35.5	$9,153	6.5		
Mankato CSA	1	$4,340	16	$21,664	17	12.1	$26,004	18.6		
MN Combined NonMetro	8	$5,960	50	$49,391	58	41.1	$55,351	39.6		
Rochester CSA	2	$3,270	14	$46,104	16	11.3	$49,374	35.3		
Total	12	$14,059	129	$125,823	141	100.0	$139,882	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

<u>Duluth MSA AA</u>

The institution has an adequate level of qualified CD investments and grants, although rarely in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 7.2 percent of tier 1 capital allocated to the AA.

The investments and grants reflect adequate responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 96.1 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 39 grants totaling $756,500 to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution occasionally uses innovative and/or complex investments to support CD initiatives. CD Investments involved one complex project where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers.

Example of CD investments in the AA include:

- In October 2016, WFBNA invested $46 million in an LIHTC fund. Of this total investment, $6.5 million was allocated to a development located in Virginia, Minnesota, with 49 units restricted to tenants earning no more than 60 percent of the area MFI. This investment is responsive to the need for affordable housing and assisting with individuals with homelessness.
- During the exam timeframe, WFBNA provided two grants totaling $105,000 to a local housing organization through the PMP for affordable housing in the Duluth MSA AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

<u>MN Combined NonMetro AA</u>

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 28.0 percent of tier 1 capital allocated to the AA.

The investments and grants reflect excellent responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 29.2 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. The bank also allocated over 38.8 percent of total CD investments to revitalize and stabilize a highly distressed area within the AA. Additionally, the bank provided 44 grants totaling $541,300 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved several complex LIHTC and NMTC projects where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers.

Examples of CD investments in the AA include:

- In November 2015, WFBNA invested $7.9 million in a 62-unit LIHTC affordable housing development located in Pleasant Hill, Iowa. Of the 62 total units, 55 will be restricted to households with income up to 60 percent of the area MFI and the remaining seven units will be market rate. In addition, seven of the units in the development will be set aside for individuals with disabilities. All of the units are targeted to seniors aged 55 and up. This investment is responsive to the need for affordable housing and assisting with individuals with homelessness. WFBNA also demonstrated multi-faceted support by providing the construction loan ($7.1 million) and equity investment to support this affordable housing development.
- In June 2016, WFBNA made an $18 million NMTC investment for the expansion of a glass manufacturing facility. The facility is located in Owatonna, Minnesota, in an area designated as "Highly Distressed" by the 2006-2010 American Community Survey. The expansion enabled the manufacturer to better compete with domestic and international competitors, preserved 1,400 jobs, and created 40-50 new construction jobs, and at least 100 new permanent jobs within three

years. The expansion also ensured the preservation of a rural community that would have difficulty recreating the level of employment that this facility provides for residents, who likely would be forced to leave town to support their families.

- During the exam timeframe, WFBNA provided a $300,000 grant to a small business organization through the Small Business DCC Program benefiting the broader state of Minnesota including the MN Combined NonMetro AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Investment Test in the Mankato CSA and Rochester CSA AAs is consistent with the bank's overall excellent performance in the Investment Test in the FS areas.

SERVICE TEST

The bank's performance under the Service Test in Minnesota is rated High Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in both the Duluth MSA AA and the MN Combined NonMetro AA is good.

Retail Banking Services

Service delivery systems are accessible to geographies and individuals of different income levels in the institution's AAs.

Distribution of Branch Delivery System

<u>Duluth MSA AA</u>

As of December 31, 2018, WFBNA operates nine branches and 24 ATMs in the Duluth MSA AA. All of these branches are full-service locations. There are no branches in low-income geographies and three branches in moderate-income geographies. The branch distribution in low-income geographies is significantly below the percentage of the population in low-income CTs and branch distribution in moderate-income geographies exceeds the percentage of the population in moderate-income CTs in the AA. When considering an additional branch within close proximity to LMI geographies, the bank's distribution improves and is near to demographics.

The institution's opening and closing of branches have not adversely affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed one branch within a moderate-income geography and two branches within a middle-income geography since the last evaluation. The closure of a branch in a moderate-income geography did not negatively impact the distribution of branches relative to the population residing in those geographies.

Services and, where appropriate, business hours do not vary in a way that inconveniences the various portions of the AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 6:00 pm. Five of the nine branches are also open on Saturdays, with four branches are open from 9:00 am to 12:00 pm and one branch is open from 9:00 am to 2:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

<u>MN Combined NonMetro AA</u>

As of December 31, 2018, WFBNA operates 22 branches and 42 ATMs in the MN NonMetro AA. All of these branches are full-service locations. There are no low-income census tracts designated in the AA. There is one branch in a moderate-income geography. The branch distribution in moderate-income geographies significantly exceeds the percentage of the population in moderate-income CTs in the AA. When considering an additional two branch within close proximity to LMI geographies, the bank's distribution further exceeds demographics.

The bank's opening and closing of branches have not adversely affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed one branch within a moderate-income geography and five branches within a middle-income geography, since the last evaluation. The closure of a branch in a moderate-income geography did not negatively impact the distribution of branches relative to the population residing in those geographies.

Services and, where appropriate, business hours do not vary in a way that inconveniences the various portions of the AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 5:00 pm. Fourteen of the 22 branches are also open on Saturday, with 11 open from 9:00 am to 12:00 pm and two open from 9:00 am to 2:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Community Development Services

The institution provides an adequate level of CD services.

Duluth MSA AA

The level of CD services in the Duluth MSA AA is adequate. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 47 CD service activities to nine organizations since the last evaluation, logging a total of 131 qualified hours within this AA. The majority (67 percent) of the bank's assistance was to organizations that provide affordable housing to LMI individuals and families. The bank's assistance provided was responsive to the identified needs in the AA particularly affordable housing. Other activities targeted organizations that participate in activities to revitalize or stabilize LMI communities (18 percent), and organizations that provide community service (15 percent). The following are examples of CD services provided in this AA:

- One WFBNA team member provided 41 hours of Board service at an organization that invests in affordable housing and sustainable development to strengthen communities in the Greater Minnesota and ensure that LMI individuals and families have a safe, decent, affordable place to live.
- One WFBNA team member provided 24 hours of Board service at an organization that is dedicated to helping community residents transform distressed neighborhoods into healthy and sustainable communities of choice and opportunity. This organization supports affordable housing development and rehabilitation, redevelopment of historic properties, neighborhood planning, commercial corridor development, resident engagement, asset and income building strategies, foreclosure remediation, and educational initiatives.

MN Combined Non-Metros AA

The level of CD services in the MN Combined NonMetro AA is adequate. The institution provides an adequate level of CD services. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 66 CD service activities to 10 organizations since the last evaluation, logging a total of 98 qualified hours within this AA. The majority (71 percent) of the bank's assistance was to organizations that provide affordable housing to LMI individuals and families. The bank's assistance provided was responsive to the identified needs in the AA particularly affordable housing. Other activities targeted organizations that provide community service (29 percent). The following are examples of CD services provided in this AA:

- A WFBNA team member provided 43.5 hours of board service to a nonprofit organization that works in partnership with people in need to build decent, affordable housing. The houses are sold to those in need at no profit and with no interest charged.
- One WFBNA team member provided 13 hours of financial education at an organization where, according to the NCES, 52.4 percent of students qualify for the federal FRL program.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Service Test in the Rochester CSA AA is consistent with the bank's overall performance under the Service Test in the FS areas. Performance in the Mankato CSA AA is stronger than the overall performance due to a higher percentage of branch distribution in LMI geographies. Performance differences in the LS AA did not impact the overall Service Test rating for the State of Minnesota.

State Rating

State of Mississippi

CRA rating for the State of Mississippi[34]: Satisfactory
The Lending Test is rated: High Satisfactory
The Investment Test is rated: Outstanding
The Service Test is rated: High Satisfactory

The major factors that support this rating include:

- Excellent lending activity;
- Adequate geographic distribution of loans;
- Good borrower distribution of loans;
- Good level of CD loans, which has a positive impact on the Lending Test;
- WFBNA's use of flexible products has a neutral impact on the Lending Test;
- Excellent level of CD investments that are responsive to AA needs;
- Retail delivery systems are accessible to all portions of the AA; and
- Adequate CD services.

Description of Institution's Operations in Mississippi

WFBNA delineated three AAs within Mississippi including the Gulfport-Biloxi-Pascagoula, MS MSA (Gulfport MSA AA); Jackson, MS MSA (Jackson MSA AA); and Hattiesburg, MS MSA (Hattiesburg MSA AA). The Gulfport MSA AA and Jackson MSA AA received FS reviews. The two areas accounted for the largest portion of the lending (87 percent) and deposits (82.6 percent) amongst the AAs in Mississippi. Refer to Appendix A for a complete description of each AA. Mississippi represents the 46th largest rated area by deposits. WFBNA has $693.6 million deposits representing 0.1 percent of adjusted deposits in Mississippi. WFBNA operates 11 branches and 13 ATMs in Mississippi representing 0.2 percent of branches and 0.1 percent of the bank's ATMs. The bank originated or purchased $3.7 billion in loans or 0.2 percent of total reported loan originations and purchases during the evaluation period. The bank's primary loan products in Mississippi are home mortgage loans and small loans to businesses.

<u>Gulfport MSA AA</u>

Within the Gulfport MSA AA, the bank had $268.1 million in deposits and ranked eighth amongst 15 depository institutions in the market with 4.8 percent market share. The top three depository institutions in terms of deposit market shares were Hancock Whitney Bank with 42.8 percent, The Peoples Bank in Biloxi with 9.1 percent, and The First with 8.4 percent market share. WFBNA operates 5 branches and 5 ATMs in the AA.

<u>Jackson MSA AA</u>

Within the Jackson MSA AA, the bank had $304.4 million in deposits and ranked ninth amongst 28

[34] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

institutions in the market with 2.2 percent market share. The top three depository institutions in terms of deposit market shares were Trustmark National Bank with 31.6 percent, Regions Bank with 21.3 percent, and BankPlus with 11.7 percent market share. WFBNA operates 4 branches and 5 ATMs in the AA.

Demographic Data

Gulfport MSA AA

The following table provides a summary of the demographics that includes housing and business information for the Gulfport MSA AA. Table A indicates that the volume of population and OOUs is very small in low-income CTs and over 38 percent of families in the AA are LMI. The area's median housing value in the Gulfport MSA AA is 2.6 times the area's MFI, but 3.2 times moderate-, and 5.2 times low-income, indicating a limited proportion of OOUs are affordable to LMI. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Economic Data

According to the April 2018 Moody's Analytics report, Gulfport's economy is struggling. Manufacturing is improving and house prices are rising more quickly, but the labor market is struggling. After holding steady in 2017, payroll employment is slipping, recently falling below its year-ago level. The largest economic sectors for employment are Defense, Tourism, and Manufacturing. Major area employers include the Huntington Ingalls Industries, Keesler Air Force Base, and the Naval Construction Battalion Center. Manufacturers halted layoffs as production rebounded. With the jobless rate near its prerecession low, wages in Gulfport are rising, but the lack of job creation is holding income growth below the state and U.S. averages. More activity at the Huntington Ingalls shipyard in Gulfport will pave the way for renewed, albeit modest job creation in short order. Newly enacted tax cuts put more disposable income into the pockets of consumers in the South, favorably impacting travel and tourism though some tax savings will be affected by higher gasoline prices.

Home sales are down sharply, and low inventories, due in part to a lack of new single-family construction, are fueling faster house price appreciation. According to the U.S. BLS, the unemployment rate in the second quarter of 2018 was 4.9 percent, down from 8.7 percent at the beginning of the evaluation period. The MSA unemployment rate is higher than the overall State of Mississippi at 4.3 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by two community contacts that serve the bank's Gulfport MSA AA. One of the two community contacts represents a local government Economic Development Agency in the AA. The other community contact is a CDFI that supports economic development in the AA including small business development along with providing community services to LMI families in the AA.

The economic development agency serves the city of Pascagoula and Jackson County in the AA. The community contact stated that economic conditions are fair in the AA. The strong military presence (Keesler Air Force Base) stabilizes the AA economy. Employment opportunities are available in Gulfport from various industries including manufacturing, military, healthcare, and gaming.

The community contact also mentioned there is a need for more participation from banks with community development projects and in addressing the credit needs of small businesses. The vast majority of small business clients of the agency are a long way from being fundable, as most have serious credit challenges including low credit scores, collateral deficiencies, no down payment, and lack of assets.

The community contact from the CDFI in the AA mentioned that given the growth of the Hispanic community, Spanish translators would be helpful, especially as many of these individuals are open small businesses. Micro lending for small businesses would also be helpful along with smaller dollar loans to assist small businesses with starting a business. Affordable housing is also a challenge. While there are several non-profits assisting in this area, the contact works with several of those and knows affordable housing continues to be an ongoing issue for LMI families in the AA.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Gulfport MSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of population, OOUs, and small businesses coupled with limited home affordability for LMI individuals.

Demographic Data

<u>Jackson MSA AA</u>

The following table provides a summary of the demographics that includes housing and business information for the Jackson MSA AA. Table A indicates that the volume of OOUs is small in low-income CTs and 40 percent of families in the AA are LMI. The area's median housing value in the Jackson MSA AA is 2.2 times the area's median income, but 2.8 times moderate-, and 4.5 times low-income, indicating a limited proportion of OOUs are affordable to low-income individuals. Median rents and the very high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

Assessment Area: Jackson MS MSA (2016)

Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #

(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

According to the April 2018 Moody's Analytics report, Jackson's economy is stable. After impressively expanding in late 2017, job gains have cooled in 2018 and year-ago growth has slipped below Mississippi and U.S. averages. Weakness in the large public sector and cooling in private services, especially business/professional services and education/ healthcare, are to blame for a loss of momentum despite solid gains in manufacturing and construction. Increased output at the Nissan production facility in Jackson will help auto factory payrolls expand modestly this year and next. Demand is strong for the light trucks and SUVs that Nissan produces in Jackson. Moody's reports that the strengthening of national auto sales will allow for more activity at Nissan, but substantial job gains will be hard to come by given the contraction in government and weak and worsening migration trends. Net migration turned negative in 2012 and the loss of nearly 3,000 residents in 2017 was the largest on record dating back to 1991. Educational attainment is close to the U.S. average, but with only 25 percent of jobs created in Jackson in this decade in mid- and high-wage industries, compared with 60 percent nationally, there has been an outflow of skilled workers.

Tepid wage income gains are preventing meaningful progress in the housing market. Home sales are near a multi-decade low, and prices and housing starts are lower than a year ago. Major employers include the University of Mississippi Medical Center, Merit Health, and Nissan. According to the U.S. BLS, the unemployment rate in the second quarter of 2018 was 3.9 percent, down from 7.7 percent at the beginning of the evaluation period. The MSA unemployment rate is lower than the overall State of Mississippi at 4.3 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by two existing community contacts pertaining to the Jackson MSA AA in conjunction with this evaluation. The contacts represent a government housing agency and an economic development organization serving the Jackson area.

The housing agency contact indicated that most people commute to work but live outside the City of Jackson. The contact stated the area is predominantly LMI minority individuals though government, education, and healthcare make a strong economic foundation. The housing agency has a housing initiative for young professionals such as teachers, police, etc. as well as an initiative for facade improvement on local businesses as part of opportunities for participation by local financial institutions.

The economic development agency works to recruit new business to the state and retain and expand existing Mississippi industry and business. The agency also provides technical assistance to the state's entrepreneurs and small businessmen and women and oversees programs that support Mississippi's minority and women-owned businesses in addition to promoting local tourism. The contact discussed improving economic conditions in Jackson, including an increase in construction and particularly the suburbs surrounding Jackson. The contact noted blighted areas in West Jackson as well as other subdivisions in addition to barriers to accessing credit for entrepreneurs and small business owners. Barriers to small business credit include nonpayment of bills, inability to repay loan, low credit scores/credit issues, and the lack of a viable business model/plan, collateral and business experience. The contact feels banks focus on the entrepreneur ready for a loan, not those working to get to that point citing a need for financial education, credit counseling, and a microloan program to assist entrepreneurs and small business owners. Also, the contact stated as bankers are not entrepreneurs, there is a need for engagement and understanding on behalf of the bankers and opportunities for banks to be more involved in entrepreneurship education and training for entrepreneurs.

Considering the information from the community contact and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Jackson MSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

Scope of Evaluation in Mississippi

The rating for the State of Mississippi is primarily based on FS evaluations of the bank's performance in the Gulfport MSA and Jackson MSA AAs; however, performance in each AA was considered. Conclusions where a LS review affected the CRA Rating for the state are addressed within their respective tests. LS procedures were performed for the Hattiesburg MSA AA. A small portion of the bank's overall lending, investments, and services were conducted in Mississippi; therefore, the performance in Mississippi received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN MISSISSIPPI

LENDING TEST

The bank's performance under the Lending Test in Mississippi is rated High Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in both the Gulfport MSA and Jackson MSA AAs is good.

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State Loans	%State Deposits
Gulfport MSA	5,742	1,604	50	3	7,399	31.2	38.7
Hattiesburg MSA	2,424	604	43	5	3,076	13.0	17.5
Jackson MSA	11,050	2,066	85	11	13,212	55.8	43.8
Total	19,216	4,274	178	19	23,687	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Dollar Volume of Loans (000's)*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State* Loans	%State Deposits
Gulfport MSA	$902,567	$83,840	$761	$3,686	$990,854	26.2	38.7
Hattiesburg MSA	$493,393	$39,030	$2,586	$12,983	$547,992	14.5	17.5
Jackson MSA	$2,090,128	$103,499	$4,015	$38,874	$2,236,516	59.3	43.8
Total	$3,486,088	$226,369	$7,362	$55,543	$3,775,362	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

<u>Gulfport MSA AA</u>

WFBNA ranked eighth in deposits with 4.8 percent market share in the AA. In overall HMDA lending, WFBNA ranked second with 5.4 percent market share. There is strong competition as reflected by the 255 lenders and 15 depository institutions in the AA. The top first and third lenders in terms of market share were the Keesler Federal Credit Union with 6.0 percent market share and Quicken Family with 4.8 percent market share.

In small loans to businesses, WFBNA ranked tenth with a market share of 3.5 percent. There is strong competition reflected by the 83 lenders in the AA. The top three lenders in terms of market share were American Express with 17.9 percent, Hancock Whitney Bank with 13.6 percent, and Lake Forest Bank and Trust with 9.2 percent.

Jackson MSA AA

WFBNA ranked ninth in deposits with 2.2 percent market share in the AA. In overall HMDA lending, WFBNA ranked second with 8.5 percent market share. There is strong competition as reflected by the 282 lenders and 28 depository institutions in the AA. The first and third lenders are Trustmark National Bank with 12.5 percent market share and Bankplus with 7.5 percent market share.

In small loans to businesses, WFBNA ranked twelfth with a market share of 2.2 percent. There is also strong competition as reflected by the 85 lenders in the AA. The top three lenders are American Express with 22.3 percent market share, Trustmark National Bank with 9.3 percent, and Capital One Bank with 7.5 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits an adequate geographic distribution of loans in the Gulfport MSA AA and a poor geographic distribution of loans in the Jackson MSA AA.

Gulfport MSA AA

Home Mortgage Loans

Refer to Table O in the State of Mississippi section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- The bank's performance in 2012-2016 for home mortgage loans in low-income geographies is well below the aggregate distribution of loans and significantly below the proportion of OOUs in those geographies.
- The proportion of loans in moderate-income geographies is below the aggregate distribution of loans and is significantly below the proportion of OOUs in those geographies.
- The bank's performance in 2017-2018 is good and significantly exceeds the performance in 2012-2016. Therefore, the bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is upgraded from poor to adequate.

Small Loans to Businesses

Refer to Table Q in the State of Mississippi section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- For both 2012-2016 and 2017-2018 periods, the bank's performance for small business loans in low-income geographies exceeds the aggregate distribution of loans and is near to the proportion of businesses located in those geographies.

- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and exceeds the proportion of businesses located in those geographies.

Jackson MSA AA

Home Mortgage Loans

Refer to Table O in the State of Mississippi section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is poor.

- The bank's performance in both 2012-2016 and 2017-2018 periods for home mortgage loans in low-income geographies is significantly below both the aggregate distribution of loans and the proportion of OOUs in those geographies.
- The proportion of loans in moderate-income geographies is below the aggregate distribution of loans and is significantly below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of Mississippi section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is good.

- For both 2012-2016 and 2017-2018 periods, the bank's performance for small business loans in LMI geographies exceeds the aggregate distribution of loans and is below the proportion of businesses located in those geographies.

Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

Gulfport MSA AA

Home Mortgage Loans

Refer to Table P in the State of Mississippi section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. Based on the data in Table P, the bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 5.2 times the income of low-income and 3.2 times the income of moderate-income borrowers, indicating a limited proportion of OOUs are affordable to LMI borrowers. Despite affordability challenges, the bank's overall home mortgage lending to LMI borrowers in 2012-2016 substantially meets the aggregate distribution of loans.

- The bank's overall home mortgage lending to low-income borrowers is significantly below the proportion of families and to moderate-income borrowers is below the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Mississippi section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Jackson MSA AA

Home Mortgage Loans

Refer to Table P in the State of Mississippi section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 4.5 times the income of low-income and 2.8 times the income of moderate-income borrowers indicating a limited proportion of OOUs affordable to LMI borrowers. Because of the affordability challenges, the bank's performance in 2012-2016 to low-income borrowers is below the aggregate lending and is significantly below the proportion of families.
- The bank's overall home mortgage lending to moderate-income borrowers substantially meets the aggregate lending and is below the proportion of families.
- The bank's performance in 2017-2018 is poor and significantly below the performance in 2012-2016. Therefore, the bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is downgraded from good to adequate.

Small Loans to Businesses

Refer to Table R in the State of Mississippi section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Community Development Lending

The institution has made a relatively high level of CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

<u>Gulfport MSA AA</u>

The level of CD lending in the Gulfport MSA AA is adequate. WFBNA made three CD loans in its AA for a total of $3.7 million, which represents 12.2 percent of tier 1 capital. While the dollar volume was excellent, the number of CD loans was considered minimal and none of the CD loans addressed small businesses which is an identified credit need in the AA. CD lending performance has a neutral impact on the lending test rating. The loans were responsive to the identified need for affordable housing.

Examples of CD loans in the AA include:

- In June 2013, WFBNA provided a $17.9 million line of credit to a Tax Credit Investment Fund. Of that total, $969,464 was allocated to an affordable housing project located in Pass Christian, MS. The loan proceeds were used to bridge the gap between the receipt of capital contributions from investors and the payment of equity investments to operating partnerships that own LIHTC projects.
- In July 2018, WFBNA provided a $3.5 million loan for a 108-unit housing complex located in Long Beach, MS, of which $1.3 million (39.8 percent) qualifies and is reflective of the proportional amount of below fair-market rent affordable housing.

<u>Jackson MSA AA</u>

The level of CD lending in the Jackson MSA AA is excellent. WFBNA made 11 CD loans in its AA for a total of $38.9 million, which represents 113.7 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans that involved many complex projects where the bank often acted in a leadership role. Ten of the 11 CD loans totaling $38.9 million (99.9 percent) were for the purpose of affordable housing which is a critical need in the AA. The bank provided one CD loan for the primary purpose of providing community services to LMI individuals. None of the CD loans addressed small businesses which is an identified credit needs in the AA.

Examples of CD loans in the AA include:

- In July 2013, WFBNA provided a $4.4 million loan extension for a multifamily housing development located in Ridgeland, MS consisting of 84 one-bedroom units, and 96 two-bedroom units, with 75 percent of the units restricted to tenants earning between 60 percent and 80 percent of the area MFI.
- In February 2016, WFBNA provided a $6 million extension loan for the construction of a 50-unit LIHTC affordable housing development located in Jackson, MS with 98 percent of the units

restricted to tenants earning 60 percent of the area MFI with one manager's unit. This development consists of 50 three-bedroom townhomes.

Product Innovation and Flexibility

Gulfport MSA AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 11 loans totaling $883,000 to LMI homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

Jackson MSA AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 9 loans totaling $1.3million to LMI homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

Conclusions for Area Receiving a LS Review

Based on a LS review, the bank's performance under the Lending Test in the Hattiesburg MSA AA is consistent with the bank's overall good performance under the Lending Test in the FS areas.

Refer to Tables O through T in the State of Mississippi section of appendix D for the facts and data that support these conclusions.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of Mississippi is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Gulfport MSA and Jackson MSA AAs is excellent.

Qualified Investments										
	Prior Period*		Current Period		Total				Unfunded Commitments**	
Assessment Area	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Gulfport MSA	3	$2,256	55	$1,957	58	49.2	$4,213	18.1		
Hattiesburg MSA	1	$936	18	$10,624	19	16.1	$11,560	49.7		
Jackson MSA	1	$587	40	$6,901	41	34.7	$7,488	32.2		

Total	5	$3,779	113	$19,482	118	100.0	$23,261	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

Gulfport MSA AA

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 14.0 percent of tier 1 capital allocated to the AA.

The investments and grants reflect good responsiveness to the needs identified in the AA including affordable housing, community services, and revitalization/stabilization for LMI individuals and geographies. Over 96.7 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 53 grants totaling $367,425 to a variety of organizations that primarily support affordable housing, community services, and revitalization/stabilization.

The institution occasionally uses innovative and/or complex investments to support CD initiatives. CD Investments involved one complex project where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased one government mortgage-backed security for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In November 2018, WFBNA invested $32.5 million in an LIHTC fund. Of this total investment, $1.5 million was allocated to a development located in Gulfport, Mississippi, with 80 units restricted to tenants earning less than 60 percent of the area MFI. The 19 housing units reported are 23 percent of the total number of LMI units and reflective of Wells Fargo's percentage of the fund's investment into the property. This investment is responsive to the need for affordable housing.
- During the exam timeframe, WFBNA provided a $110,000 grant to a local housing organization through the PMP for affordable housing in the Gulfport MSA AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

Jackson MSA AA

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 21.9 percent of tier 1 capital allocated to the AA.

The investments and grants reflect excellent responsiveness to the needs identified in the AA including affordable housing and community services for LMI individuals and geographies. Over 91.9 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 35 grants totaling $1.3 million to a variety of organizations that primarily support affordable housing and community services.

The institution makes significant use of innovative and/or complex investments to support CD initiatives in this AA. CD investments involved several complex LIHTC projects where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased one government mortgage-backed security for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In October 2017, WFBNA invested $20.0 million in an LIHTC fund. Of this total investment, $1.6 million was allocated to a development located in Jackson, Mississippi, with 24 units restricted to tenants earning no more than 60 percent of the area MFI. This investment is responsive to the need for affordable housing.
- In December 2018, WFBNA provided a $1.1 million grant to an organization that primarily works to strengthen communities, build assets, and improve lives in economically distressed areas in the Jackson MSA AA by providing access to high quality financial products and related services.
- During the exam timeframe, WFBNA provided three grants totaling $2.6 million to several small business organizations through the Small Business DCC Program benefiting the broader state of Mississippi including the Jackson MSA AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

Conclusions for Area Receiving a LS Review

Based on a LS review, the bank's performance under the Investment Test in the Hattiesburg MSA AA is consistent with the bank's overall excellent performance in the Investment Test in the FS areas.

SERVICE TEST

The bank's performance under the Service Test in Mississippi is rated High Satisfactory

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Gulfport MSA AA is good and performance in the Jackson MSA AA is adequate.

Retail Banking Services

Service delivery systems are accessible to geographies and individuals of different income levels in the institution's AAs, particularly LMI geographies and/or individuals.

Distribution of Branch Delivery System											
Assessment Area	Deposits	Branches						Population			
	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%)*				% of Population within Each Geography*			
				Low	Mod	Mid	Upp	Low	Mod	Mid	Upp
Gulfport MSA	38.7	5	45.4	0.0	20.0	60.0	20.0	5.8	13.7	55.4	24.9

Gulfport MSA AA

As of December 31, 2018, WFBNA operates five branches and five ATMs in the Gulfport MSA AA. All branches are full-service locations. There are no branches in a low-income geography and one branch in a moderate-income geography. The branch distribution in low-income geographies is significantly below the percentage of the population in low-income geographies and branch distribution in moderate-income geographies significantly exceeds the percentage of the population in moderate-income CTs in the AA. When considering an additional two branches within close proximity to LMI geographies, the bank's distribution improves and exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed one branch located in middle-income geography.

Services and, where appropriate, business hours do not vary in a way that inconveniences the various portions of the AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 5:00 pm. One of the five branches is also open on Saturdays from 9:00 am to 1:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Jackson MSA AA

As of December 31, 2018, WFBNA operates four branches and five ATMs in the Jackson, MS MSA AA. Of these branches all are full-service locations. There are no branches in a low-income geography and one branch in a moderate-income geography. The branch distribution in low-income geographies is significantly below the percentage of the population in low-income geographies and branch distribution in moderate-income geographies approximates the percentage of the population in moderate-income CTs in the AA. When considering an additional branch within close proximity to LMI geographies, the bank's distribution is near to demographics.

The bank did not close any branches during the evaluation period. Therefore, the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals, has not been affected.

Services and, where appropriate, business hours do not vary in a way that inconveniences the various portions of the AA, particularly LMI geographies and/or individuals. All branches are open Monday through Thursday from 9:00 am to 5:00 pm. Two branches are open on Fridays from 9:00 am to 5:30 pm, and two are open from 9:00 am to 6:00 pm. One of the four branches are also open on Saturdays from 9:00 am to 1:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Community Development Services

The institution provides an adequate level of CD services.

Gulfport MSA AA

The level of CD services in the Gulfport MSA AA is adequate. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 26 CD service activities to 10 organizations since the last evaluation, logging a total of 57 qualified hours within this AA. All of the bank's assistance was to organizations that provide community services to LMI individuals and families. The following are examples of CD services provided in this AA:

- Two WFBNA team members provided 45 hours of financial education at an institution where 96 percent of the students qualify for the federal FRL program.
- Five WFBNA team members provided 12 hours of financial education at an institution where 100 percent of its clients are LMI families or individuals, earning less than 80 percent of the area MFI.

Jackson MSA AA

The level of CD services in the Jackson MSA AA is adequate. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 14 CD service activities to seven organizations since the last evaluation, logging a total of 44 qualified hours within this AA. All of the bank's assistance was to organizations that provide community services to LMI individuals and families. The following is an example of a CD service provided in this AA:

- Four WFBNA team members provided 16 hours of financial education at an institute of learning where the free/reduced lunch program participation rate is 83.1 percent.

Conclusions for Area Receiving a LS Review

Based on a LS review, the bank's performance under the Service Test in the Hattiesburg MSA AA is consistent with the bank's overall performance under the Service Test in the FS areas.

State Rating

State of Montana

CRA rating for the State of Montana[35]: Satisfactory
The Lending Test is rated: High Satisfactory
The Investment Test is rated: Needs to Improve
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Excellent lending activity;
- Good geographic distribution of loans;
- Good borrower distribution of loans;
- Adequate level of CD loans;
- WFBNA's use of flexible products has a neutral impact on the Lending Test;
- Performance in the LS AAs negatively impacted the Investment Test to Needs to Improve;
- Retail delivery systems are readily accessible to all portions of the AA;
- Adequate CD services; and
- Performance in the LS AAs elevated the Service Test to Outstanding.

Description of Institution's Operations in Montana

WFBNA delineated four AAs within Montana including the Billings, MT MSA (Billings MSA AA); Great Falls, MT MSA (Great Falls MSA AA); Missoula, MT MSA (Missoula MSA AA); and MT Combined non-metropolitan (MT Combined NonMetro AA). The Billings MSA and MT Combined NonMetro AAs received FS reviews. Refer to Appendix A for a complete description of each AA. The two areas accounted for the largest portion of the lending (82 percent) and deposits (80 percent) amongst the AAs in Montana. Montana represents the 31st largest rated area by deposits. WFBNA has $2.9 billion deposits representing 0.2 percent of adjusted deposits. WFBNA operates 34 branches and 53 ATMs within Montana, representing 0.6 percent of the bank's branches and 0.4 percent of the bank's ATMs. The bank originated and purchased $6.6 billion in loans or 0.4 percent of total reported loan originations and purchases during the evaluation period. The bank's primary loan products in the Montana rated area are home mortgage and loans to small businesses.

Billings MSA AA

WFBNA has $716 million deposits in the Billings MSA AA and ranked third amongst 11 financial institutions with 14.6 percent market share. The first and second largest banks in the MSA were First Interstate Bank with a market share of 26.0 percent and U.S. Bank with a 21.6 percent market share. WFBNA operates 5 branches and 11 ATMs in the AA.

MT Combined NonMetro AA

WFBNA has $1.6 billion deposits in the MT Combined NonMetro AA

[35] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

and ranked second amongst 38 financial institutions with 13.5 percent market share. The largest bank in the MSA was Glacier Bank with a market share of 25.0 percent. WFBNA operates 23 branches and 30 ATMs in the AA.

Demographic Data

Billings MSA AA

The following table provides a summary of the demographics that includes housing and business information for the Billings MSA AA. Table A shows a very small proportion of tracts and population are low-income. The volume of OOUs is even smaller in the low-income tracts and over 37 percent of families in the AA are LMI. The area's median housing value in the Billings MSA AA is 2.8 times the MSA median income, but 3.5 times moderate-, and 5.7 times low-income, indicating a limited proportion of OOUs are affordable to LMI. Median rents and the significant percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

Assessment Area: Billings MT MSA (2016)

Due to rounding, totals may not equal 100.0
(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

According to the July 2018 Moody's Analytics report, The Billings economy is stagnant. Area job growth remains behind the state's pace and is even farther behind other areas in the West. The economy is driven by tourism, medical centers, and energy & resources. Billings serves as an access point to Yellowstone National Park where visitor counts remain up. Within the MSA tourism is the leading job creator, however, most of these jobs are low paying leisure/hospitality positions. The largest employment sectors are Education and Health Services, Leisure and Hospitality Services and Retail

Trade. Major employers in Billings include Billings Clinic, St. Vincent Healthcare, and Stillwater Mining Co.

The area has seen steady population growth and favorable migration patterns. The share of the population over 65 is above average in Billings and expected to grow as retirees are drawn to the area for its scenery and affordable housing. Billings' share of seniors is increasing demand for healthcare employment. Additionally, the inflow of retirees is fueling household formation and in turn residential construction.

According to the U.S. BLS, the area unemployment rate was 3.5 percent down from 4.6 percent at the beginning of the evaluation period. The unemployment rate is comparable to the State of Montana at 3.3 percent during the same period.

Community Contacts

The analysis takes into consideration comments provided by a community contact with a Native American Development Corporation serving Billings and offering statewide programs as well.

The contact spoke of economic conditions in the Native American communities as distressed. Unemployment in these communities is significantly higher than the statewide average. Native communities are isolated, and lack infrastructure, economic opportunities and capital. Tribal leadership often focuses on addressing social issues and do not implement long term economic development strategies. The contact noted the large unbanked and underbanked population in Montana, which presents an opportunity for financial institutions. Low-income households have limited ability to access affordable small loans and banking accounts. There is a need for mortgage financing on the reservation. Per the contact, moderate- and middle-income households are often shut out of Indian Housing programs which typically serve low- and very low- income.

The contact noted that there are many opportunities for banks to engage and participate in community development activities including supporting financial education and literacy programs, investing in Native CDFIs, capitalizing revolving loan funds, and providing expertise and investment funding on CDFI endeavors. The contact mentioned WFBNA as being active in the community and specifically noted the bank's EQ2 investments. However, the contact felt that banks could do more, including more outreach with CDFIs and engaging native tribes.

Considering the information from the community contact and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Billings MSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

<u>MT Combined NonMetro AA</u>

The following table provides a summary of the demographics that includes housing and business information for the MT Combined NonMetro AA. Table A shows a very small proportion of tracts and population are low-income. The volume of OOUs is nonexistent in the low-income tracts and over 35 percent of families in the AA are LMI. The area's median housing value in the MT Combined MSA AA is 3.6 times the MSA median income, but 4.5 times moderate-, and 7.3 times low-income, indicating a limited proportion of OOUs are affordable to LMI. Median rents and the significant percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

Assessment Area: MT Combined Non-Metros (2016)

Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #
Geographies (Census Tracts)	132	1.5	14.4	62.1	20.5	1.5

Due to rounding, totals may not equal 100.0
(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

According to the July 2018 Moody's Analytics report, Montana's economy has cooled. Area job growth has not kept pace with the region, however, wage growth has advanced faster than the U.S. overall due in part to a favorable unemployment rate. The State of Montana unemployment rate dipped below four percent in 2018, the first time in this expansion phase. The area economy is driven by agriculture, tourism, and energy & resources. Steady visitor counts to Montana's tourist attractions have driven job gains in tourism and favorable macroeconomic trends will drive consistent growth in the coming years. Montana's farm economy on the other hand, faces uncertainty due to low cattle prices and trade tensions. In addition, farm incomes have dropped to a multiyear low due to droughts and forest fires that have weighed on farm output.

Flathead County is by far the largest county in the AA with a population of just over 100 thousand. The principal city in the county is Kalispell. Per the Kalispell Chamber of Commerce, healthcare is the county's largest industry. The Flathead Valley is also a year-round tourist destination which helps drive the area economy. The area is also home to hundreds of manufacturing and technology companies.

Home price appreciation has also been on the rise. State budget cuts will likely have a negative impact on the economy over the next couple of years, prompted by lower than expected income tax revenues, and a recent fire season was expensive, impacting the state's reserve funds. The state is projected to be one of the slowest-growth economies through the next decade. Top employers include various hospitals and clinics, University of Montana, Malmstrom Air Force Company, and Montana Air National Guard. According to the U.S. BLS, the unemployment rates for July 2018 in the following counties range from a low of 1.6 percent (Fallon County) to a high of 5.8 percent (Mineral County) while the overall state average was 3.3 percent during the same period.

Community Contacts

The analysis takes into consideration comments provided by two community contacts pertaining to the AA in conjunction with this evaluation. The first contact was held with a statewide organization that serves the institution's AA, with a focus on affordable housing, including housing education, second lien mortgages, new construction, affordable rental development, and housing assistance. The second contact was with a community organization knowledgeable about local business conditions.

The contact stated that while entry level and lower-paying jobs are available to residents, he noted a lack of higher-wage jobs, and indicated that affordable housing is a need in the AA. He also discussed challenges related to qualification for government homebuyer programs, which sometimes require property improvements that result in affordability challenges for low-income borrowers. The contact stated that they also work with banks to facilitate first lien home mortgage loans for their clients. While they also receive sufficient donations from banks, they would like to see a better understanding of products and services that they offer, which could in turn lead to more referrals by banks.

According to the second contact, economic conditions continue to improve after the recent economic downturn. The largest opportunity for financial institutions is centered in loans to small business owners, startup companies, and farm operations. The contact stated that local banks adequately provide financing opportunities to stimulate economic growth and promote emerging businesses within the surrounding areas. The contact did not identify any significant unmet needs, although he stated that the area understandably lacks certain financing options, such as venture capital resources. The contact also stated that local financial institutions are actively meeting the needs of the community and adequately provide financing opportunities to stimulate economic growth. The representative indicated that his experiences with lending institutions in the AA have been positive. Area financial institutions act as stewards of the community and are very supportive in community development activities.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing loans and small business lending represent a primary credit need in the AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of tracts, population, OOUs, and small businesses coupled with limited home affordability for LMI individuals.

Scope of Evaluation in Montana

The rating for the State of Montana is primarily based on FS evaluations of the bank's performance in the Billings MSA and MT Combined NonMetro AAs; however, performance in each AA was considered. Conclusions where a LS review affected the CRA Rating for the state are addressed within their respective tests. LS procedures were performed for the Great Falls MSA and Missoula MSA AAs. A limited portion of the bank's overall lending, investments, and services were conducted in Montana; therefore, the performance in Montana received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN MONTANA

LENDING TEST

The bank's performance under the Lending Test in Montana is rated High Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Billings and MT Combined NonMetro AAs is good.

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State Loans	%State Deposits
Billings MSA	5,874	2,499	272	3	8,648	19.7	25.0
Great Falls MSA	2,987	1,357	113	3	4,460	10.2	10.1

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Billings MSA AA

WFBNA ranked third in deposits with 14.6 percent market share in the AA. In overall HMDA lending, WFBNA ranked second with 8.6 percent market share. There is strong competition as reflected by the

149 lenders and 11 depository institutions in the AA. The top lender in this market was Stockman Bank of Montana with 11.3 percent market share.

In small loans to businesses, WFBNA ranked seventh out of 66 lenders with a market share of 7.2 percent. The top lender was American Express with a market share of 15.6 percent.

MT Combined NonMetro AA

WFBNA ranked second in deposits with 13.5 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 10.3 percent market share. There is strong competition as reflected by the 275 lenders and 38 depository institutions in the AA. The second and third top lenders in this market were Glacier Bank with 7.7 percent market share and First Interstate Bank with 6.4 percent market share.

In small loans to businesses, WFBNA ranked fifth out of 99 lenders with a market share of 8.2 percent. The top lender was American Express with a market share of 18.2 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in its AAs.

Billings MSA AA

Home Mortgage Loans

Refer to Table O in the State of Montana section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in low-income geographies is below the aggregate distribution of loans and exceeds the proportion of OOUs in those geographies. Less weight was given to the bank's performance in low-income geographies due to the very small volume of tract, population, OOUs, and lending in low-income geographies. Our assessment placed more weight on the bank's performance in moderate-income tracts.
- The proportion of loans in moderate-income geographies exceeds the aggregate distribution of loans and is below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of Montana section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is good.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for small business loans in low-income geographies is well below the aggregate performance and is below the proportion of businesses located in those geographies.

- The combined proportion of the bank's small business loans in moderate-income geographies exceeds both the aggregate distribution of loans and the proportion of businesses located in those geographies.

MT Combined NonMetro AA

Home Mortgage Loans

Refer to Table O in the State of Montana section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in low-income geographies is below the aggregate distribution of loans and exceeds the proportion of OOUs in those geographies. Less weight was given to the bank's performance in low-income geographies due to the very small volume of tract, population, OOUs, and lending in low-income geographies. Our assessment placed more weight on the bank's performance in moderate-income tracts.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of Montana section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for small business loans in LMI geographies exceeds the aggregate performance located in those geographies.
- The combined proportion of the bank's small business loans in low-income geographies is below the proportion of businesses and in moderate-income geographies exceeds the proportion of businesses located in those geographies.

Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

Billings MSA AA

Home Mortgage Loans

Refer to Table P in the State of Montana section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- The Billings MSA AA has homeownership affordability hurdles especially for LMI borrowers. As noted above, the area's median housing value is 5.7 times the income of low-income and 3.5 times the income of moderate-income borrowers indicating a limited proportion of OOUs affordable to LMI. Despite the affordability challenges, the bank's overall home mortgage lending in 2012-2016 to LMI borrowers substantially meets the aggregate distribution of loans.
- The bank's overall home mortgage lending to low-income borrowers is below the proportion of families and to moderate-income borrowers is near to the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is higher than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Montana section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

<u>MT Combined NonMetro AA</u>

Home Mortgage Loans

Refer to Table P in the State of Montana section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- The MT Combined NonMetro AA has homeownership affordability hurdles especially for LMI borrowers. As noted above, the area's median housing value is 6 times the income of low-income and 3.7 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI. Despite the affordability challenges, the bank's overall home mortgage lending in both periods, 2012-2016 and 2017-2018, to LMI borrowers exceeds the aggregate distribution of loans.
- The bank's overall home mortgage lending to low-income borrowers is significantly below the proportion of families and to moderate-income borrowers is below the proportion of families.

Small Loans to Businesses

Refer to Table R in the State of Montana section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Community Development Lending

The institution has made a low level of CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

Billings MSA AA

The level of CD lending in the Billings MSA AA is adequate. WFBNA made three CD loans in its AA for a total of $10.2 million, which represents 12.6 percent of tier 1 capital. While the dollar volume was excellent, the number of CD loans was considered minimal given the 6-year timeframe. CD lending performance has a neutral impact on the lending test rating. The bank made 2 CD loans totaling $9.8 million (96 percent) for the purpose of affordable housing which is critical needs in the AA. Additionally, the bank extended one CD loans for the primary purpose of providing community services to LMI individuals.

Examples of CD loans in the AA include:

- In November 2013, WFBNA provided a $2.5 million loan for a 62-unit LIHTC affordable housing development located in a moderate-income tract in Billings. All units are affordable to households earning less than 60 percent of the area MFI.
- In March 2017 WFBNA provided a $7.3 million loan for a 112-unit affordable housing development located in a middle-income tract in Billings. The property is encumbered by a Section 8 HAP contract which expires in 2027. All units are restricted to tenants earning less than 60 percent of the area MFI.

MT Combined NonMetro AA

The level of CD lending in the MT NonMetro AA is poor. WFBNA made six CD loans in its AA for a total of $4.6 million, which represents 2.6 percent of tier 1 capital. CD lending performance has a neutral impact on the lending test rating. Five loans totaling approximately $4.5 million (97.8 percent) addressed affordable housing which is an identified credit needs in the AA.

Examples of CD loans in the AA include:

- In May 2016, WFBNA provided a loan for a 72-unit multifamily mixed income apartment development in a moderate-income tract in Bozeman, MT of which 33 units are affordable. The allocated loan amount of $2.5 million is reflective of the proportion of units that are affordable (45.8 percent) to tenants earning 80 percent or less of the area MFI.
- In October 2013, WFBNA renewed a $100,000 working capital line of credit for a federally qualified healthcare center providing services in underserved communities.

Product Innovation and Flexibility

Billings MSA AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 8 loans totaling $1.2 million to LMI homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.

MT Combined NonMetro AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 46 loans totaling $5.3 million to LMI homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Lending Test in the Great Falls MSA and Missoula MSA AAs is consistent with the bank's overall good performance under the Lending Test in the FS areas.

Refer to Tables O through T in the State of Montana section of appendix D for the facts and data that support these conclusions.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of Montana is rated Needs to Improve.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Billings MSA and MT Combined NonMetro AAs is adequate.

Qualified Investments										
	Prior Period*		Current Period		Total				Unfunded Commitments**	
Assessment Area	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Billings MSA	9	$19,432	35	$910	44	26.0	$20,342	57.8		
Great Falls MSA	0	$0	30	$448	30	17.8	$448	1.3		

Missoula MSA	0	$0	38	$281	38	22.5	$281	0.8		
MT Combined NonMetro	10	$6,000	47	$8,096	57	33.7	$14,096	40.1		
Total	19	$25,432	150	$9,735	169	100.0	$35,167	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

Billings MSA AA

The institution has an adequate level of qualified CD investments and grants, although rarely in a leadership position, particularly those that are not routinely provided by private investors. Although the current and prior period investments dollar volume represents 25.3 percent of tier 1 capital allocated to the AA, a substantial majority of the bank's CD investments are from prior period.

The investments and grants reflect adequate responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. The bank has invested $1.7 million focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 32 grants totaling $367,425 to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution occasionally uses innovative and/or complex investments to support CD initiatives. CD Investments involved one complex project where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased several government mortgage-backed securities for the CD Investment portfolio.

Example of a CD investment in the AA includes:

- In June 2015, WFBNA provided a $12.7 million investment in a government single-family mortgage backed security. The investment amount reported of $401,315 represents the allocation of several property addresses from the pool of mortgages under this transaction. This government agency was chartered by Congress in 1970 with a public mission to stabilize the nation's residential mortgage markets and expand opportunities for homeownership and affordable rental housing. Their statutory mission is to provide liquidity, stability and affordability to the U.S. housing market.

MT Combined NonMetro AA

The institution has an adequate level of qualified CD investments and grants, although rarely in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 7.9 percent of tier 1 capital allocated to the AA.

The investments and grants reflect adequate responsiveness to the needs identified in the AA including affordable housing and community services for LMI individuals and geographies. Virtually all of the bank's CD investments focused on affordable housing which is an identified credit need in the AA.

Additionally, the bank provided 31 grants totaling $252,325 to a variety of organizations that primarily support affordable housing and community services.

The institution rarely uses innovative and/or complex investments to support CD initiatives. CD Investments involved one complex LIHTC project where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In March 2015, WFBNA invested $30 million in an LIHTC fund. Of this total investment, $5.5 million was allocated to a development located in Sidney, Montana, with 36 units restricted to tenants earning no more than 60 percent of the area MFI. This investment is responsive to the need for affordable housing.
- During the exam timeframe, WFBNA provided a $300,000 grant to a local small business organization through the Small Business DCC Program benefiting the broader state of Montana including the MT Combined NonMetro AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Investment Test in the Great Falls MSA and Missoula MSA AAs is weaker than the bank's overall adequate performance in the Investment Test in the FS areas due to a lower volume of CD investments. Performances differences in both LS AAs did impact the overall Investment Test rating for the State of Montana. As such, the bank's overall Investment Test rating for the State of Montana was downgraded to poor.

SERVICE TEST

The bank's performance under the Service Test in Montana is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Billings MSA AA is excellent and performance in the MT Combined NonMetro AA is good.

Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the institution's AAs.

Distribution of Branch Delivery System											
Assessment Area	Deposits	Branches						Population			
	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%)				% of Population within Each Geography*

Billings MSA AA

As of December 31, 2018, WFBNA operates five branches and 11 ATMs in the Billings MSA AA. All of these branches are full-service locations. There are no branches in low-income geographies and three branches in moderate-income geographies. The branch distribution in low-income geographies is significantly below the percentage of population in low-income and branch distribution in moderate-income geographies significantly exceeds the percentage of the population in moderate-income CTs in the AA. When considering an additional branch within close proximity to LMI geographies, the bank's branch distribution further exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed, one branch and also opened one branch within middle-income geographies during the evaluation period.

Services and, where appropriate, business hours do not vary in a way that inconveniences the various portions of the AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 5:00 pm. All five branches are also open on Saturday from 9:00 am to 2:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

MT Combined NonMetro AA

As of December 31, 2018, WFBNA operates 23 branches and 30 ATMs in the MT NonMetro AA. All of these branches are full-service locations. There is one branch in a low-income geography and three branches in moderate-income geographies. The branch distribution in low-income geographies exceeds the percentage of the population in low-income geographies and branch distribution in moderate-income geographies approximates the percentage of the population in moderate-income CTs in the AA. When considering an additional three branches within close proximity to LMI geographies, the bank's branch distribution further exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed one branch within a moderate-income geography during the evaluation period. The closure of the branch in a moderate-income geography did not negatively impact the distribution of branches relative to the population residing in that geography.

Services and, where appropriate, business hours do not vary in a way that inconveniences the various portions of the AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 5:00 pm. Six of the 23 branches are also open on Saturdays. Three branches are open from 9:00 am to 1:00 pm, two are open from 9:00 am to 12:00, and one is open from 9:00 am to 3:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Community Development Services

The institution provides an adequate level of CD services.

Billings MSA AA

The level of CD services in the Billings MSA AA is good. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 33 CD service activities to nine organizations since the last evaluation, logging a total of 85 qualified hours within this AA. The majority of the bank's assistance was to organizations that provide affordable housing to LMI individuals and families which is responsive to identified needs in the AA. Other activities targeted community service (25 percent), and economic development (21 percent). The following are examples of CD services provided in this AA:

- One WFBNA team member provided 43 hours of Board service at an organization where 100 percent of its clients are LMI families and individuals. This organization is a nonprofit housing organization that works in partnership with people in need to build decent, affordable housing. The houses are sold to those in need at no profit and with no interest charged.
- One WFBNA team member provided 15 hours of financial education and technical expertise at an organization with the purpose of Community Development. This organization is dedicated to educating entrepreneurs and helping small businesses start, grow, and succeed nationwide. It is a resource partner with the SBA and has been mentoring small business owners for more than forty years.

MT Combined NonMetro AA

The level of CD services in the MT Combined NonMetro AA is adequate. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 15 CD service activities to seven organizations since the last evaluation, logging a total of 78 qualified hours within this AA, all of which were targeted to assisting organizations that provide community services to LMI individuals and families. The following are examples of CD services provided in this AA:

- Two WFBNA team members provided 37 hours of technical assistance at an organization where 100 percent of its clients are LMI families and individuals. These clients earn less than 80 percent of the area MFI. The organization is a local affiliate of a global organization that utilizes community-led solutions to identify and resolve community concerns with a primary focus on education, financial stability, and health.
- One WFBNA team member provided 16 hours of technical assistance at an organization consisting of a nonprofit network of interfaith institutions that work together to end homelessness. The organization strives to empower homeless families with children to achieve self-sufficiency through partnerships, services, and advocacy.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Service Test in the Great Falls MSA and Missoula MSA AAs is stronger than the bank's overall good performance under the Service Test in the FS areas due to a higher percentage of branch distribution in LMI geographies. Performances differences in both LS AAs did impact the overall Service Test rating for the State of Montana. As such, the bank's overall Service Test rating for the State of Montana was upgraded to Outstanding.

State Rating

State of Nebraska

CRA rating for the State of (Nebraska)[36]: Outstanding
The Lending Test is rated: Outstanding
The Investment Test is rated: High Satisfactory
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Excellent lending activity;
- Good geographic distribution of loans;
- Excellent borrower distribution of loans;
- Good level of CD loans, which has a positive impact on the Lending Test;
- WFBNA's use of flexible products has a neutral impact on the Lending Test;
- Good level of CD investments that are responsive to AA needs;
- Retail delivery systems are readily accessible to all portions of the AA; and
- WFBNA is a leader in providing CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in Nebraska

WFBNA delineated three AAs within Nebraska including the Lincoln, NE MSA (Lincoln MSA AA), NE Combined non-metropolitans AA (NE Combined NonMetro AA), and Grand Island, NE MSA (Grand Island MSA AA). The Lincoln MSA and NE Combined NonMetro AAs received FS reviews. The two areas accounted for the largest portion of the lending (90 percent) and deposits (84 percent) amongst the AAs in Nebraska. Refer to Appendix A for a complete description of each AA. Nebraska represents the 36th largest rated area by deposits. WFBNA has $2.2 billion of deposits representing 0.2 percent of adjusted deposit. WFBNA operates 20 branches and 39 ATMs within Nebraska, representing 0.4 percent of the bank's branches and 0.3 percent of the bank's ATMs. The bank originated and purchased approximately $3.2 billion in loans or 0.2 percent of total reported loan originations and purchases during the evaluation period. The bank's primary loan products in Nebraska are home mortgage and small loans to businesses.

<u>Lincoln MSA AA</u>

Within the Lincoln MSA AA, the bank had $1.2 billion deposits and ranked second amongst 28 financial institutions in the market with 14.8 percent market share. Union Bank and Trust ranked first with a market share of 22.8 percent. WFBNA operates 8 branches and 20 ATMs in the AA.

<u>NE Combined NonMetro AA</u>

Within the NE Combined NonMetro AA, the bank had $632 million deposits and ranked second amongst 58 financial institutions in the market with a 9.0 percent market share. First National Bank of

[36] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

Omaha ranked first with a market share of 10.9 percent. WFBNA operates 10 branches and 14 ATMs in the AA.

Demographic Data

Lincoln MSA AA

The following table provides a summary of the demographics that includes housing and business information for the Lincoln MSA AA. Table A shows that the volume of OOUs is small in the low-income tracts and over 37 percent of families in the AA are LMI. The area's median housing value in the Lincoln MSA AA is 2.2 times the MSA median income, but 2.7 times moderate-, and 4.4 times low-income, indicating a limited proportion of OOUs are affordable to LMI. Median rents and the significant percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

Assessment Area: Lincoln NE MSA (2016)

Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #

(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

According to the June 2018 Moody's Analytics report, Lincoln has entered the late-cycle phase of its expansion, but there are no signs that the economy is overheating. With the jobless rate at its lowest since 2000, at about 2.5 percent, the tight labor market has suppressed total payroll growth too decidedly below the U.S. average as businesses struggle to find new candidates. However, some industries including construction, retail trade and financial activities have managed to sustain stronger job gains. Wage pressures have yet to develop; average hourly earnings growth lags well behind the national pace.

The University of Nebraska will continue to anchor Lincoln's economy. Directly employing nearly 5 percent of the workforce, the university is the metro area's largest employer. Its indirect effects on the labor market are much larger. Student enrollment has grown more than 13 percent in the past 10 years to a new high, but state funding is an impediment to further hiring and enrollment growth. The university's operating budget for fiscal 2018-2019 is virtually unchanged from the previous year despite increasing costs. Moreover, in response to an initial shortfall, the university was forced to cut a modest number of jobs and some program spending. Without the spending cuts, tuition would have risen by 8 percent, which would have almost certainly suppressed enrollment growth. Future state appropriations will play a critical role in keeping the student body, and a vital part of Lincoln's economy, growing.

As wage growth rebounds and disposable incomes rise through the end of the year, the Lincoln consumer will power hiring in consumer-driven industries such as retail trade and leisure/hospitality. The credit environment in Lincoln is healthy, with delinquency rates well below those of the state and the nation and recently reaching an all-time low. Stronger wage pressures will spur more consumer spending and hiring in consumer industries, but labor scarcity could be a headwind to widespread job gains in these industries.

The outlook for the housing market looks favorably as multifamily construction will cool in the medium term from its robust pace in recent years as demand is satiated, while the single-family market will remain on the upswing. Demand for single-family housing is ramping up faster than construction, as evidenced by house prices that are rising at about 8 percent on an annual basis. As single-family construction ramps up to meet demand, house prices will rise at a more moderate rate and single-family housing will become less overvalued. Construction has been one of Lincoln's fastest-growing industries.

The largest employers in the Lincoln MSA include the University of Nebraska, Bryan LGH Medical Center, and B&R stores. According to the U.S BLS, the unemployment rate for the 2nd quarter of 2018 was 2.5 percent and has decreased from 3.6 percent at the beginning of the evaluation period. The unemployment rate in the AA was lower than the overall state at 3.0 percent during the same period.

Community Contacts

The analysis takes into consideration comments provided by three community contacts that serve the Lincoln MSA AA. The contacts included representatives from a housing organization and a community-based development organization.

The contact from the housing organization stated they provide affordable housing to the residents of Lincoln, Nebraska. The contact indicated that there is a need for affordable housing development. According to the contact, there have not been any low-income housing developments in Lincoln since 2010. There is a need for banks to participate in affordable housing development. The only subsidy available comes from low-income tax credit program. There is a new community development initiative for the South Downtown area. They are seeking support for the community foundation in order to fund these projects. The East downtown area lost several older apartment complexes that provided LMI housing. These units were either replaced by retail and newer housing not designed for LMI individuals or the lot sits empty waiting for new development.

The housing organization is a home builder and mortgage lender for those in the community that would not qualify for a mortgage at a bank and takes on mortgages that would be too risky for a bank. Money for homes is generated from their retail store as well as from payments on previous mortgages, and via donations from participating banks. The program requires 100 percent capital up front; however, the organization does not charge any interest on their homes as their primary goal is to be able to provide an affordable mortgage to those who qualify for assistance. The organization serves Lancaster County, which is within the city limits of Lincoln. The contact indicated that they have established good working relationships with some of the financial institutions in the community. These institutions have supported affordable housing initiatives. The contact believes their relationships with the institutions are strong and plans to reach out to others for donations, grants, etc.

The community based organization is a community development group located in North Platte, NE that is geared mostly towards tobacco and substance abuse individuals and groups. All of the operations are funded through grants (both local and federal). Employment is North Platte is currently pretty shallow, especially working as a non-profit organization it is hard to find those wanting to work compared to a salary job. Overall, lots of employers throughout the community are having difficulty with staffing due to the community's population shrinking (last census recording the North Platte Population decreasing by 800). The community is also rather homogenous, not very diverse. However, there are progressive individuals in the community that are looking for a better balance in housing and community growth. The contact indicated that there are lots of opportunities for local financial institutions to become involved in community development activities.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing represent a primary credit need for the Lincoln MSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

NE Combined NonMetro AA

The following table provides a summary of the demographics that includes housing and business information for the NE Combined NonMetro AA. Table A indicates that there are no low-income CTs and over 34 percent of families in the AA are LMI. The area's median housing value in the NE Combined NonMetro AA is 2 times the area's median income, but 2.4 times moderate-, and 3.8 times low-income, indicating a limited proportion of OOUs are affordable to low-income families. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

Assessment Area: NE Combined Non-Metros (2016)

Economic Data

According to the June 2018 Moody's Analytics report, Nebraska has entered the late-cycle phase of its expansion. An uptick in work-force participation is helping to fuel stronger labor force growth, enabling businesses to step up their pace of net hiring. Although Nebraska has a high concentration of jobs in finance and insurance, professional/business services will be the primary catalyst for growth in office-using employment in eastern Nebraska through the decade's end. On top of cheap office space and commercial electricity, Nebraska has generous tax incentives specific to tech investments that are a big plus for energy-hungry data centers.

Nebraska benefits from above average population growth and net migration. The area's housing affordability in relation to the West Coast makes Nebraska an attractive destination for workers and business investment. According to the U.S. BLS, the unemployment rate as of June 2018 for the following counties range from a low of 2.2 percent (Buffalo County) to a high of 3.2 percent (Adams County) while the state average is 3.0 percent during the same period. All of the counties' unemployment rates have decreased slightly from the start of the evaluation period.

Community Contacts

The analysis takes into consideration comments provided by a community contact that serves the bank's NE Combined NonMetro AA. The community contacts represent a community-based development organization that serves the city of North Platte and Lincoln County.

The contact stated that the organization provides support to local businesses through marketing and support programs. Furthermore, the corporation supports economic development programs through business support and other incentive programs. The corporation owns a business park that is used to support local businesses. Primary source of funding is from membership. The community is always in need of housing development to improve the quality of low-income housing. Additionally, there are a number of downtown revitalization projects. One of these projects in particular includes a former movie theater that is being renovated for use as a movie theater/playhouse. There is also a backpack program that provides food for low-income children. All of these community development programs are opportunities for bank involvement.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing represent primary credit needs for the NE Combined NonMetro AA. Opportunity exists to originate these types of loans throughout the AA including moderate-income areas.

Scope of Evaluation in Nebraska

The rating for the State of Nebraska is primarily based on FS evaluations of the bank's performance in the Lincoln MSA and NE Combined NonMetro AAs; however, performance in each AA was considered. Conclusions where a LS review affected the CRA Rating for the state are addressed within their respective tests. LS procedures were performed for the Grand Island MSA AA. A limited portion of the bank's overall lending, investments, and services were conducted in Nebraska; therefore, the performance in Nebraska received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN NEBRASKA

LENDING TEST

The bank's performance under the Lending Test in Nebraska is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in both FS AAs is excellent.

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State Loans	%State Deposits
Lincoln NE MSA	12,111	3,413	86	12	15,622	60.0	55.4
NE Combined NonMetro	4,279	2,100	1,438	18	7,835	30.1	28.9
Grand Island MSA	1,749	664	165	2	2,580	9.9	15.7
Total	18,139	6,177	1,689	32	26,037	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Dollar Volume of Loans (000's)*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State* Loans	%State Deposits
Lincoln NE MSA	$1,845,293	$210,486	$5,834	$12,327	$2,073,940	64.0	55.4
NE Combined NonMetro	$505,049	$184,437	$203,749	$19,446	$912,681	28.1	28.9
Grand Island MSA	$191,694	$39,384	$21,553	$3,547	$256,178	7.9	15.7
Total	$2,542,036	$434,307	$231,136	$35,320	$3,242,799	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Lincoln MSA AA

WFBNA ranked second in deposits with 14.8 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 8.6 percent market share. There is strong competition as reflected by the 237 lenders and 28 depository institutions in the AA. The 2nd and 3rd top lenders in this market were US Bancorp with a 7.7 percent market share and Lincoln FSB with a 7.0 percent market share.

In small loans to businesses, WFBNA ranked eight with a market share of 5.3 percent. The top three lenders were Cornerstone Bank with an 11.5 percent market share, Pinnacle Bank with an 11.1 percent market share, and US Bank with a 9.1 percent market share.

NE Combined NonMetro AA

WFBNA ranked second in deposits with 9.0 percent market share in the AA. In overall HMDA lending, WFBNA ranked third with 8.6 percent market share. There is strong competition as reflected by the 188 lenders and 58 depository institutions in the AA. The top three lenders in this market were US Bancorp with a 12.0 percent market shares and First National Bank of Omaha with an 11.1 percent market share.

In small loans to businesses, WFBNA ranked fourth with a market share of 9.0 percent. The top three lenders were First National Bank of Omaha with a market share of 13.0 percent, US Bank with a market share of 10.8, and Capital One with a market share of 10.0 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in its AAs.

Lincoln MSA AA

Home Mortgage Loans

Refer to Table O in the State of Nebraska section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in low-income geographies is below the aggregate distribution of loans and is well below the proportion of OOUs in those geographies.
- The proportion of loans in moderate-income geographies exceeds the aggregate distribution of loans and is near to the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of Nebraska section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- For 2012-2016, the combined proportion of the bank's small business loans in low-income geographies exceeds both the aggregate distribution of loans and the proportion of businesses located in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is near to the proportion of businesses located in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly lower than the combined performance in 2012-2016.

NE Combined NonMetro AA

Home Mortgage Loans

Refer to Table O in the State of Nebraska section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The AA contains no low-income tracts so our assessment focused on the bank's performance in moderate-income tracts.
- The proportion of loans in moderate-income geographies exceeds both the aggregate distribution of loans and the proportion of OOUs in those geographies.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly lower than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of Nebraska section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The AA contains no low-income tracts so our assessment focused on the bank's performance in moderate-income tracts.
- The proportion of loans in moderate-income geographies exceeds both the aggregate distribution of loans and the proportion of businesses in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly less than the combined performance in 2012-2016.

Distribution of Loans by Income Level of the Borrower

The bank exhibits excellent distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

Lincoln MSA AA

Home Mortgage Loans

Refer to Table P in the State of Nebraska section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The Lincoln MSA AA has homeownership affordability hurdles especially for low-income borrowers. As noted above, the area's median housing value is 4.4 times the income of low-income borrowers indicating a limited proportion of OOUs are affordable to low-income borrowers. Despite the affordability challenges, the bank's overall home mortgage lending in both periods, 2012-2016 and 2017-2018, to LMI borrowers exceeds the aggregate distribution of loans.
- The bank's performance with low-income borrowers is well below the proportion of families and to moderate-income borrowers exceeds the proportion of families.

Small Loans to Businesses

Refer to Table R in the State of Nebraska section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is excellent.

- For 2012-2016 combined, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is near to the percentage of small businesses located in the AA.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly less than the combined performance in 2012-2016.

<u>NE Combined NonMetro AA</u>

Home Mortgage Loans

Refer to Table P in the State of Nebraska section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The NE Combined NonMetro has homeownership affordability hurdles especially for low-income borrowers. As noted above, the area's median housing value is 3.8 times the income of low-income borrowers indicating a limited proportion of OOUs are affordable to low-income borrowers. Despite the affordability challenges, the bank's overall home mortgage lending in both periods, 2012-2016 and 2017-2018, to low-income borrowers substantially meets the aggregate distribution of loans and is well below the proportion of families.
- The bank's overall home mortgage lending to moderate-income borrowers exceeds the aggregate lending and is near to the proportion of families.

Small Loans to Businesses

Refer to Table R in the State of Nebraska section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For 2012-2016 combined, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.
- Based on the bank's performance in 2017-2018, the bank's small business lending is higher than the combined performance in 2012-2016.

Community Development Lending

The institution has made a relatively high level of CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

Lincoln MSA AA

The level of CD lending in the Lincoln MSA AA is good. WFBNA made 12 CD loans in its AA for a total of $12.3 million, which represents 9.1 percent of tier 1 capital. CD lending performance has a positive impact on the lending test rating. Only one CD loan totaling $3.4 million was responsive to the identified affordable housing needs in the AA. The bank also extended 11 CD loans totaling $9 million for the primary purpose of community services to LMI individuals.

Examples of CD loans in the AA include:

- In April 2016, WFBNA renewed a $1.3 million working capital line of credit to a nonprofit organization that was founded to help children and adults with developmental disabilities gain skills, knowledge, and experience to function better in society. All of its clients served are considered LMI individuals as they earn less than $54,320 annually (80 percent of the 2013 area MFI).
- In December 2013, WFBNA provided a $3.4 million loan for a 56-unit LIHTC in Lincoln, Nebraska. The development specified that 80 percent of the units restricted to tenants earning 60 percent of the area MFI and 20 percent of units restricted to tenants earning 20 percent of the area MFI. This development consists of 12 one-bedroom units, 16 two-bedroom units, and 28 three-bedroom units.

NE Combined NonMetro AA

The level of CD lending in the NE NonMetro AA is excellent. WFBNA made 18 CD loans in its AA for a total of $19.4 million, which represents over 27 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified affordable housing needs in the AA. The bank made 14 loans totaling $18.2 million (93.8 percent) for the purpose of affordable housing which is an identified credit needs in the AA. Additionally, the bank extended 4 CD loans totaling $1.2 million for the primary purpose of community services to LMI individuals.

Examples of CD loans in the AA include:

- In August 2016, WFBNA provided an $80 million line of credit to a Tax Credit Investment Fund. Of that total, $2.7 million has been allocated to Eastside Estates, an affordable housing development located in Hastings, NE. The loan proceeds were used to bridge the gap between the receipt of capital contributions from investors and the payment of equity investments to operating partnerships that own LIHTC projects.
- In February 2015, WFBNA provided a $300,000 working capital line of credit to a non-profit organization that assists individuals with mental health and substance abuse. An estimated 95 percent of clients served are considered to be LMI individuals as they earn less than $45,600 annually (80 percent of the 2013 area MFI).

Product Innovation and Flexibility

Lincoln MSA AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 60 loans totaling $7.8 million to LMI homebuyers that qualified under this program.

NE Combined NonMetro AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 25 loans totaling $2.2 million to LMI homebuyers that qualified under this program.

Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

Conclusions for Area Receiving a LS Review

Based on a LS review, the bank's performance under the Lending Test in the Grand Island MSA AA is consistent with the bank's overall excellent performance under the Lending Test in the FS areas.

Refer to Tables O through T in the State of Nebraska section of appendix D for the facts and data that support these conclusions.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of Nebraska is rated High Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Lincoln MSA AA is good and performance in the NE Combined NonMetro AA is excellent.

Qualified Investments										
	Prior Period*		Current Period		Total				Unfunded Commitments**	
Assessment Area	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Lincoln MSA	7	$3,574	39	$8,044	46	32.8	$11,618	13.6		
NE Combined NonMetro	7	$3,553	61	$59,870	68	48.6	$63,423	74.2		
Grand Island MSA	10	$3,660	16	$6,751	26	18.6	$10,411	12.2		
Total	24	$10,787	116	$74,665	140	100.0	$85,452	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

<u>Lincoln MSA AA</u>

The institution has a significant level of qualified CD investments and grants, occasionally in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 8.6 percent of tier 1 capital allocated to the AA.

The investments and grants exhibit a good responsiveness to the needs identified in the AA including affordable housing and community services for LMI individuals and geographies. Over 96.9 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 37 grants totaling $474,950 to a variety of organizations that primarily support affordable housing and community services.

The institution occasionally uses of innovative and/or complex investments to support CD initiatives. CD Investments involved two complex LIHTC projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers.

Examples of CD investments in the AA include:

- In December 2013, WFBNA invested $5.5 million for the construction of a 56-unit LIHTC affordable housing development located in Lincoln, Nebraska. Eighty percent of the units (45) are restricted to households earning 60 percent of the area MFI, 11 will be market rate. This activity is responsive to the identified need for affordable housing. WFBNA also demonstrated multi-faceted support by providing both the construction loan ($3.4 million) and equity investment in support of this affordable housing development.
- In October 2016, WFBNA invested $46.0 million in an LIHTC fund. Of this total investment, $2.1 million was allocated to a development located in Waverly, Nebraska, with 15 units restricted to tenants earning no more than 60 percent of the area MFI. This activity is responsive to the identified need for affordable housing.

NE Combined NonMetro AA

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 89.4 percent of tier 1 capital allocated to the AA.

The investments and grants reflect excellent responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 60.5 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 50 grants totaling $387,000 to a variety of organizations that primarily support affordable housing and community services.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved several complex LIHTC and NMTC projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers.

Example of a CD investment in the AA includes:

- In November 2017, WFBNA invested $45 million in an LIHTC fund. Of this total investment, $7 million was allocated to a development located in Nebraska, with 37 units restricted to tenants earning no more than 60 percent of the area MFI. This activity is responsive to the identified need for affordable housing.

Conclusions for Area Receiving a LS Review

Based on a LS review, the bank's performance under the Investment Test in the Grand Island MSA AA is stronger than the bank's overall good performance in the Investment Test in the FS areas due to a higher volume of CD investments. Performance differences in the LS AA did not impact the overall Investment Test rating for the State of Nebraska.

SERVICE TEST

The bank's performance under the Service Test in Nebraska is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in both the Lincoln MSA and the NE Combined NonMetro AAs is excellent.

Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the institution's AAs.

Distribution of Branch Delivery System											
Assessment Area	Deposits	Branches						Population			
	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%)				% of Population within Each Geography*

<u>Lincoln MSA AA</u>

As of December 31, 2018, WFBNA operates 8 branches and 20 ATMs in the Lincoln MSA AA. All of these branches are full-service locations. There are no branches in low-income geographies and four branches in moderate-income geographies. The branch distribution in moderate-income geographies significant exceeds the percentage of the population in moderate-income CTs in the AA. When considering an additional two branches within close proximity to LMI geographies, the bank's branch distribution further exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed one branch in a low-income geography CT since the last evaluation. The closure of a branch in a low-income geography did not negatively impact the distribution of branches relative to the population residing in those geographies.

Services and, where appropriate, business hours do not vary in a way that inconveniences the various portions of the AA, particularly LMI geographies and/or individuals. All branches are open Monday through Friday from 9:00 am to 5:30 pm, and from 9:00 am to 1:00 pm on Saturday. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

NE Combined NonMetro AA

As of December 31, 2018, WFBNA operates 10 branches and 14 ATMs in the NE NonMetro AA. All of these branches are full-service locations. There are no low-income geographies in the AA. The branch distribution in moderate-income geographies significantly exceeds the percentage of the population in moderate-income CTs in the AA. When considering an additional two branches within close proximity to LMI geographies, the bank's branch distribution further exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed one branch in a moderate-income geography. The closure of a branch in a moderate-income geography did not negatively impact the distribution of branches relative to the population residing in those geographies.

Services and, where appropriate, business hours do not vary in a way that inconveniences the various portions of the AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 5:00 pm. Five of the 10 branches are also opened on Saturday. Four open from 9:00 am to 1:00 pm, and one from 9:00 am to 12:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Community Development Services

The institution is a leader in providing CD services.

Lincoln MSA AA

The level of CD services in the Lincoln MSA AA is excellent. Bank records show that employees provided financial or job-specific expertise and/or technical assistance for 122 CD service activities to 17 organizations since the last evaluation, logging a total of 432 qualified hours within this AA. The majority (77 percent) of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing (2 percent), economic development (12 percent), and community revitalization (9 percent). The bank's assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- Three WFBNA team members provided 79 hours of Board service, and one WFBNA team member provided 60 hours of technical expertise to an organization where 85 percent of its clients are LMI families and individuals, earning less than 80 percent of the area MFI. This organization utilizes community-led solutions to identify and resolve community concerns with a primary focus on education, financial stability, and health.
- One WFBNA team member provided 53 hours of Board service to an organization with the mission to provide capital, technical assistance, and training opportunities to small businesses in the State of Nebraska. This organization is certified under the U.S. Treasury Department's CDFI Fund.

NE Combined NonMetro AA

The level of CD services in the NE Combined NonMetro AA is excellent. Bank records show that employees provided financial or job-specific expertise and/or technical assistance for 103 CD service activities to 17 organizations since the last evaluation, logging a total of 219 qualified hours within this

AA. The majority of the bank’s assistance was to organizations that target affordable housing to LMI individuals and families which is responsive to identified need in the AA. Other activities targeted organizations that provide revitalization/stabilization (25 percent), and community services (25 percent) to LMI individuals. The following are examples of CD services provided in this AA:

- One WFBNA team member provided 30 hours of financial expertise to an organization where 91 percent of its clients are LMI individuals or families who earn less than 80 percent of the area MFI. This organization is an affiliate of Habitat for Humanity International that works in partnership with people in need to build decent and affordable housing. The houses area sold to those in need at no profit and with no interest charged.
- Two WFBNA team members provided 67 hours of Board service to an organization that provides a soup kitchen, and has a 90-bed facility that offers a program to help homeless men, women, and families overcome difficult times.

Conclusion for Area Receiving a LS Review

Based on a LS review, the bank’s performance under the Service Test in the Grand Island MSA AA is consistent with the performance within the FS areas.

State Rating

State of Nevada

CRA rating for the State of (Nevada)[37]: Outstanding
The Lending Test is rated: Outstanding
The Investment Test is rated: Low Satisfactory
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Excellent lending activity;
- Adequate geographic distribution of loans;
- Excellent borrower distribution of loans;
- WFBNA is a leader in providing CD loans, which has a significant positive impact on the Lending Test;
- WFBNA's use of flexible products has a positive impact on the Lending Test;
- Adequate level of CD investments;
- Retail delivery systems are readily accessible to all portions of the AA; and
- WFBNA is a leader in providing CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in Nevada

WFBNA delineated three AAs within Nevada including the Las Vegas-Henderson-Paradise, NV MSA (Las Vegas MSA AA), Reno-Carson City-Fernley, NV CSA (Reno CSA AA), and NV Non-Metro (NV Combined NonMetro AA). The Las Vegas MSA and Reno CSA AAs received FS reviews. These two areas accounted for the larger portion of the lending (95.4 percent) and deposits (97.6 percent) amongst the AAs in Nevada. Refer to Appendix A for a complete description of each AA. Nevada represents the 10th largest rated area by deposits. WFBNA has $25.4 billion of deposits representing 2.0 percent of adjusted deposits. WFBNA operates 107 branches and 327 ATMs within Nevada, representing 1.9 percent of the bank's branches and 2.4 percent of the bank's ATMs. The bank originated and purchased approximately $25.7 billion in loans or 1.4 percent of total reported loan originations and purchases during the evaluation period. The bank's primary loan products in Nevada are home mortgage and small loans to businesses.

Las Vegas MSA AA

Within the Las Vegas MSA AA, the bank had $19.5 billion in deposits and ranked second amongst 40 depository institutions in the market with 7.5 percent market share. Charles Schwab Bank and Bank of America ranked first and third with a market share of 73.6 percent and 5.3 percent, respectively. WFBNA operates 71 branches and 229 ATMs in the AA.

Reno CSA AA

Within the Reno CSA AA, the bank had $5.2 billion in deposits and ranked first amongst 18 depository

[37] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

institutions in the market with 41.0 percent market share. Bank of America and U.S. Bank ranked second and third with 18.9 percent and 10.7 percent market share, respectively. WFBNA operates 29 branches and 81 ATMs in the AA.

Demographic Data

Las Vegas MSA AA

The following table provides a summary of the demographics that includes housing and business information for the Las Vegas MSA AA. Table A indicates that the volume of OOUs is very small in low-income CTs and over 38 percent of families in the AA are LMI. The area's median housing value in the Las Vegas MSA AA is 4.0 times the area's median income, but five times moderate-, and 7.9 times low-income, indicating a limited proportion of OOUs are affordable to LMI individuals. Median rents and the high percentage of families below poverty level suggest rental housing may also be unaffordable for many low-income residents.

Economic Data

According to the July 2018 Moody's Analytics report, Las Vegas economy is strong. Leisure/hospitality and retail employment is perking back up following last year's lull, while manufacturing and logistics operations are starting to have a growing presence. The broadening jobs base and increased hiring in mid- and high-paying industries caused average hourly earnings to rise sharply in recent months.

Although tourist-related industries will remain in the driver's seat, Las Vegas will enjoy a boost from secondary industries as the job base broadens. Low business costs and proximity to nearby markets in California and Arizona are drawing distributors and manufacturers to the area.

Although economic fundamentals are strong, homebuilding has fallen over the past few months and the lean housing supply is pushing price growth further above the U.S. average.

Labor shortages once again appear to be limiting housing starts. The Greater Las Vegas Association of Realtors reports a less than two-month supply of homes for sale, well below what is considered a balanced market. Single-family homes are modestly overvalued, and affordability has eroded substantially in recent years as a result.

The largest employers in the Las Vegas MSA AA include MGM Resorts International, Caesars Entertainment Corp., and Station Casinos Inc. According to the U.S. BLS, the unemployment rate for the third quarter of 2018 was 4.9 percent and has decreased significantly from 11.3 percent at the beginning of the evaluation period. The unemployment rate in the AA was higher than the overall state at 4.7 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by three community contacts that serve the bank's Las Vegas MSA AA. One community contact represents a non-profit affordable housing agency in the AA and one community contact represents an economic development agency in Nye County. In addition, examiners participated in a CRA listening session with community-based organizations serving the AA.

The affordable housing agency community contact indicated that the economy in the AA has improved, but many people are still struggling. The Las Vegas MSA AA was one of the hardest hit areas during the housing collapse. Issues facing LMI individuals and families are not about jobs, but housing affordability. New affordable housing developments in the AA are encountering resistance from local residents, who are concerned that their areas and schools are already over-crowded and the stigma around low-income individuals and families. As a result, even though LMI individuals have jobs, they are unable to afford market rents or home prices.

The economic development agency contact indicated that north and east Las Vegas areas have seen the least benefit from the economic recovery. Both areas have large Hispanic populations. The cost of living is rising dramatically in the AA with rents rising faster than income. The median rent is now $900 in the AA making housing unaffordable for LMI individuals and seniors.

Participants from the CRA listening session commented that the population in the AA is somewhat transient. Although the economy in the AA is improving, it is somewhat fragile due to the core industry of hospitality and tourism. The homeless and working poor populations is growing in the AA. Small businesses have a lot of difficulty raising capital and obtaining small business loans. Some participants were concerned that the new labor laws will have a negative impact on small businesses and non-profit organizations. Although supportive services by non-profit organizations are needed to support the most vulnerable residents, the funding for these organizations is very limited. One participant mentioned that gentrification is also a concern in the AA. The revitalization of the downtown area with little affordable housing options is putting pressure on housing, posing real difficulties for LMI individuals. Developers have bought up much of the potential sites and only high-end housing has been built in the downtown.

As a result, workers with jobs in the local community can no longer afford to live in the area where they work. Another demographic trend in the AA is workforce displacement. New businesses are moving into the AA, but local residents do not benefit from the jobs created. One participant gave the example that Tesla is not required to hire locally even though the company received a huge tax incentive to move to the area.

The bank conducted research in the AA and identified community needs for affordable housing for LMI families, education, small business assistance, financial education, products, and services, and workforce development and job readiness.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Las Vegas MSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

Reno CSA AA

The following table provides a summary of the demographics that includes housing and business information for the Reno CSA AA. Table A indicates that the volume of OOUs is very small in low-income CTs and over 38 percent of families in the AA are LMI. The area's median housing value in the Reno CSA AA is 4.6 times the area's highest median income, but 5.8 times moderate-, and 9.2 times low-income, indicating a limited proportion of OOUs are affordable to LMI families. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

Economic Data

Carson City, NV MSA

According to the March 2019 Moody's Analytics report, Carson City's state government employment is improving. Healthcare and leisure/hospitality are getting back on track and unlike the national trend, retail trade is growing steadily. The jobless rate is trending lower, standing at 4.2 percent and just shy of its prerecession low. About one quarter of Carson City's workforce is employed in state government. State tax revenue growth is picking up, with revenues up 9 percent over fiscal 2018.

Healthcare, retail, and leisure/hospitality employ more than half of Carson City's private sector Workers. Healthcare will regain momentum over the next few years thanks to an above-average and rising share of retirees. Outside of healthcare, consumer industries will benefit from a wealthy senior population, proximity to Lake Tahoe, and greater discretionary spending thanks to the enduring expansion.

The housing market is performing well with price growth among the fastest in the West. Builders are taking notice with housing starts up significantly since 2016. Residential construction remains elevated in light of rising household formation, while existing-home sales reached a new post-recession high last year. The economic renaissance in neighboring Reno will lend support for housing in Carson City. Enticed by better job opportunities and higher pay, more than one in ten working residents commute to jobs in Reno. Although affordability has eroded in recent years, a limited supply of housing in Reno is pushing more families into Carson City. This will drive demand and homebuilding over the next few years.

The largest employers in Carson City include Carson Tahoe Hospital, Western Nevada Community College, and Fandango Casino. According to the U.S. BLS, the unemployment rate for Carson City for the fourth quarter of 2018 was 4.8 percent and has significantly decreased from 10.4 percent at the beginning of the evaluation period. The unemployment rate for Carson was higher than the overall state of Nevada at 4.3 percent for the same period.

Reno, NV MSA

According to the July 2018 Moody's Analytics report, Reno's economy is strong, outperforming Nevada and the West in nearly all key gauges. The metro area is cashing in on new manufacturing and distribution operations thanks to the buildup at and near Tesla's Giga factory.

Leisure/hospitality has paused following stronger growth at the start of the year, but other private services, notably professional/business services, are picking up the slack. A thriving job market and ballooning business investment are drawing more workers into the labor force, which has grown at triple the national pace for more than a year.

A sizzling job market and household formation that is twice the U.S. average will buoy the housing market. Demand for single-family housing is rising much faster than supply, lifting house prices as builders contend with labor shortages. Single-family housing starts will pick up in coming quarters following the midyear lull. More supply will cause price appreciation to slow, given that single-family homes are overvalued and are about 50 percent less affordable than the national average. New residents are gobbling up apartments, causing rents to spike in a market with a rental vacancy rate near zero. Multifamily construction will remain elevated.

The largest employers in Reno include University of Nevada-Reno, Renown Health, and Tesla Inc. According to the U.S. BLS, the unemployment rate for Reno for the third quarter of 2018 was 3.8 percent and has significantly decreased from 11.1 percent at the beginning of the evaluation period. The unemployment rate for Reno was lower than the overall state of Nevada at 4.7 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by two community contacts that serve the bank's Reno CSA AA. One community contact represents the local small business administration in the AA and one community contact represents an economic development agency that serves the AA.

The small business administration contact indicated that overall economic condition in the AA is improving. Nevada has been able to rebound from the recession and has begun to attract new industries and businesses. Due to the lower tax environment, less regulations, and close proximity, Californian businesses have been more attracted to Nevada as a place to conduct their operations. The contact identified the main industries as gaming, hospitality, mining, and an influx in light manufacturing. The housing stock is tremendously low and the organization is rushing to get new affordable housing on the market. The organization wanted more community banks in the area in an attempt to increase competition for the benefit of consumers. Financial institutions are in their "comfort zone" and should be more aggressive with their lending efforts.

The economic development agency indicated that there is significant business growth in the area with some larger companies such as Tesla and large distributors setting up their operation in the area. There is also a lot of entrepreneurial activity. Therefore, loans to small businesses have been very important to growth in the AA. The local economy was severely hit by the recession, and there are LMI neighborhoods and areas in the region that were disproportionately affected as far as unemployment goes.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Reno CSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

Scope of Evaluation in Nevada

The rating for the State of Nevada is primarily based on FS evaluations of the bank's performance in the Las Vegas MSA and Reno CSA AAs; however, performance in each AA was considered. Conclusions where a LS review affected the CRA Rating for the state are addressed within their respective tests. LS procedures were performed for the NV Combined NonMetro AA. The State of Nevada is the 10th largest rated area and along with 12 other rated areas represents the bank's most significant markets in terms of lending, deposit, and branch distribution. Nevada represents a sizeable portion of the bank's overall lending, investments, and services; therefore, the performance in the state was weighted more heavily in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN NEVADA

LENDING TEST

The bank's performance under the Lending Test in Nevada is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in both the Las Vegas MSA and Reno CSA AAs is excellent.

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans *							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	% State* Loans	% State Deposits
Las Vegas MSA	76,318	32,330	129	87	108,864	69.0	77.0
Reno CSA	25,668	15,788	199	22	41,677	26.4	20.6
NV Combined NonMetro	4,697	2,261	317	0	7,275	4.6	2.4
Total	106,683	50,379	645	109	157,816	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Dollar Volume of Loans (000's)*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	% State Loans	% State Deposits
Las Vegas MSA	$16,571,186	$1,190,581	$5,190	$579,101	$18,346,058	69.7	77.0
Reno CSA	$6,242,836	$755,282	$10,635	$75,810	$7,084,563	26.9	20.6

Total	$23,570,044	$2,054,640	$37,800	$654,911	$26,317,395	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

<u>Las Vegas MSA</u>

WFBNA ranked second in deposits with a 7.5 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 9.5 percent market share. There is strong competition as reflected by the 462 lenders and 40 depository institutions in the AA. The second and third lenders in this market were U.S. Bancorp Family with 7.4 percent market share and Quicken Family with 4.7 percent market share.

In small loans to businesses, WFBNA ranked fourth with market share of 9.7 percent. There is strong competition as reflected by the 153 lenders in the AA. The top three lenders were American Express FSB with market share of 21.7 percent, Bank of America with market share of 11.9 percent, and Chase Bank with market share of 11.1 percent.

Reno CSA AA

WFBNA ranked first in deposits with 41.0 percent market share in the AA. In overall HMDA lending, WFBNA ranked second with 9.9 percent market share. Although WFBNA's HMDA market share is considerably lower than its deposit market share, lending competition was significantly stronger, reflected by the 327 lenders, than competition for deposits, where there were only 18 depository institutions. The first and third top lenders in this market were Guild Mortgage Company with 11.3 percent market share and U.S. Bancorp Family with 8.3 percent market share.

In small loans to businesses, WFBNA ranked second with market share of 13.9 percent. There is strong competition as reflected by the 103 lenders in the AA. The first and third lenders were American Express with market share of 15.0 percent and Citibank with market share of 12.2 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits an adequate geographic distribution of loans in the Las Vegas MSA AA and a good geographic distribution of loans in the Reno CSA AA.

Las Vegas MSA AA

Home Mortgage Loans

Refer to Table O in the State of Nevada section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- The bank's home mortgage lending in 2012-2016 in low-income geographies is below the aggregate distribution of loans and is significantly below the proportion of OOUs in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is well below the proportion of OOUs in those geographies.
- The bank's home mortgage lending in 2017-2018 is higher than the performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of Nevada section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is good.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for small business loans in LMI geographies substantially meets the aggregate distribution of loans in those geographies.

- The proportion of loans in low-income geographies is well below the proportion of businesses and in moderate-income geographies is below the proportion of businesses located in those geographies.

Reno CSA AA

Home Mortgage Loans

Refer to Table O in the State of Nevada section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- The bank's home mortgage lending in both 2012-2016 and 2017-2018 periods in low-income geographies exceeds the aggregate distribution of loans and is well below the proportion of OOUs in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of Nevada section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The bank's performance in 2012-2016 for small business loans in LMI geographies exceeds the aggregate distribution of loans in those geographies.
- The proportion of loans in low-income geographies is below the proportion of businesses and in moderate-income geographies is near to the proportion of businesses located in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly less than the performance in 2012-2016.

Distribution of Loans by Income Level of the Borrower

The bank exhibits an excellent distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

Las Vegas MSA AA

Home Mortgage Loans

Refer to Table P in the State of Nevada section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 7.9 times the income of low-income and five times the income of moderate-income borrowers indicating a limited proportion of OOUs are

affordable to LMI. Despite the affordability challenges, the bank's performance in both 2012-2016 and 2017-2018 periods to LMI borrowers exceeds the aggregate lending.
- The bank's performance to low-income borrowers is well below the proportion of families and to moderate-income borrowers is near to the proportion of families.

Small Loans to Businesses

Refer to Table R in the State of Nevada section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is excellent.

- For 2012-2016, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is near to the percentage of small businesses located in the AA.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly lower than the performance in 2012-2016.

<u>Reno CSA AA</u>

Home Mortgage Loans

Refer to Table P in the State of Nevada section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 9.2 times the income of low-income and 5.8 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI. Despite the affordability challenges, the bank's performance in 2012-2016 to LMI borrowers exceeds the aggregate lending.
- The bank's performance to low-income borrowers is well below the proportion of families and to moderate-income borrowers is near to the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Nevada section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is excellent.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is near to the percentage of small businesses located in the AA.

Community Development Lending

The institution is a leader in making CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

Las Vegas MSA AA

The level of CD lending in the Las Vegas MSA AA is excellent. WFBNA made 87 CD loans for a total of $579.1 million which represents 26.4 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified affordable housing and small business lending needs in the AA. The bank made 66 CD loans totaling $562 million (97 percent) for the purpose of affordable housing. Additionally, the bank extended 12 CD loans totaling $6.2 million for the primary purpose of community services to LMI individuals, 7 CD loans totaling $9 million for economic development, and 2 CD loans totaling $2.2 million for the revitalizing and stabilizing a distressed area.

Examples of CD loans in the AA include:

- In January 2014, WFBNA renewed a $250,000 working capital line of credit and also increased it by $250,000, for a total of $500,000 to non-profit organization that works in partnership with people in need to build decent, affordable housing. The houses are sold to those in need at no profit and with no interest charged. All of its clients are LMI as they earn less than 80 percent of the area MFI.
- In August 2017, WFBNA provided a $28.7 million loan for a multifamily housing development located in a moderate-income census tract in Las Vegas, NV. The project consists of 119 one-bedroom units, 208 two-bedroom units, and 56 three-bedroom units with 88 percent of the actual rent rates below the 2017 Fair Market Rent for the area and 99 percent of the units affordable to tenants earning between 37 and 79 percent of the 2017 area MFI of $61,900.
- In December 2017, WFBNA provided a $2.2 million construction loan for a NMTC project located in a highly distressed low-income census tract of North Las Vegas, Nevada. This project is part of a new 32-acre development and is expected to create 39 permanent positions that will pay average wages higher than 115 percent of poverty guidelines for a family of four. The project will also implement training programs to improve prospective employees' basic skills, allowing them to perform at full capacity, as well as offering them the opportunity for career advancement and wage increases within the company.
- In August 2016, WFBNA provided a $20 million line of credit to a Tax Credit Investment Fund. Of that total, $818,000 has been allocated to an affordable housing development located in North Las Vegas, NV. The loan proceeds will be used to bridge the gap between the receipt of capital contributions from investors and the payment of equity investments to operating partnerships that own LIHTC projects.

Reno CSA AA

The level of CD lending in the Reno CSA AA is excellent. WFBNA made 22 CD loans in its AA for a total of $75.8 million, which represents 12.9 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified affordable housing and small business lending needs in the AA. The bank made 13 CD loans totaling $63.9 million (84 percent) for the purpose of affordable housing. Additionally, the bank extended 4 CD loans totaling $1.2 million for the primary purpose of community services to LMI individuals and 5 CD loans totaling $10.7 million for the purpose of economic development.

Examples of CD loans in the AA include:

- From 2014-2018, WFBNA provided four separate $300,000 working capital line of credit totaling $1.2 million to an organization that provides healthcare to LMI individuals. The organization was created in 2006 because of the realization that too many Nevadans were uninsured. Following the Shared Responsibility Model, the organization demonstrates how the entire community could join forces to reduce the number of uninsured Nevadans without overburdening any one group. According to the organization's website, the mission of Access to Healthcare Network is to increase access to primary and specialty health care services for LMI Nevada residents through shared responsibility and community-wide partnerships.
- In August 2018, WFBNA provided a $2.6 million line of credit for this affordable housing development located in Fernley, Nevada. The project requires that 100 percent of the units being restricted to tenants earning between 35 and 60 percent of the area MFI.
- In May 2017, WFBNA provided a $3.6 million SBA 504 bridge loan for a small business made in conjunction with the SBA's 504 CDC program, which is a long-term financing tool for economic development within a community.

Product Innovation and Flexibility

Las Vegas MSA AA

The institution makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. The bank launched the NeighborhoodLIFT program in the Las Vegas MSA AA in March 2017 and nearly 350 potential homebuyers attended the event. Of the 350 in attendance, WFBNA originated 171 mortgage loans totaling $27.5 million. Under the *your*FirstMortgage loan program the bank has funded 285 loans totaling $45.5 million to LMI homebuyers that qualified under this program.

Reno CSA AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 35 loans totaling $6.7 million to LMI homebuyers that qualified under this program.

Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding the programs noted above.

Conclusions for Area Receiving a LS Review

Based on a LS review, the bank’s performance under the Lending Test in the NV Combined NonMetro AA is weaker than the bank’s overall excellent performance under the Lending Test in the FS areas due to a low volume of CD lending. Performance difference in the LS AA did not impact the overall Lending Test rating for the State of Nevada.

Refer to Tables O through T in the State of Nevada section of appendix D for the facts and data that support these conclusions.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of Nevada is rated Low Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Las Vegas MSA AA is adequate and performance in the Reno CSA A is poor.

Qualified Investments										
	Prior Period*		Current Period		Total				Unfunded Commitments**	
Assessment Area	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Las Vegas MSA	45	$15,602	312	$131,347	357	68.1	$146,949	86.7		
Reno CSA	5	$1,940	159	$12,663	164	31.3	$14,603	8.6		
NV Combined NonMetro	1	$2,106	2	$5,781	3	0.6	$7,887	4.7		
Total	51	$19,648	473	$149,791	524	100.0	$169,439	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

<u>Las Vegas MSA AA</u>

The institution has an adequate level of qualified CD investments and grants, although rarely in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 6.7 percent of tier 1 capital allocated to the AA.

The investments and grants exhibit adequate responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 83.1 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 298 grants totaling $9.6 million to a variety of organizations that primarily support affordable housing, community services, economic development, and revitalization/stabilization.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved several complex LIHTC and NMTC projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased several government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In April 2016, WFBNA provided a $7.0 million LIHTC investment for the construction of an affordable housing development located in Las Vegas, Nevada. The development requires that 83 percent of the units restricted to tenants earning 40 percent or less of the area MFI. The remaining 10 units are market rate. This activity is responsive to the identified need for affordable housing. WFBNA also demonstrated multi-faceted support by providing both the construction loan ($6 million) and equity investment in support of this affordable housing development.
- During the exam timeframe, WFBNA provided three local initiatives grants totaling $150,000 to several housing Partnership organizations to administer the NeighborhoodLIFT Down Payment Assistance program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.
- During the exam timeframe, WFBNA provided two grants totaling $600,000 two small business organizations through the Small Business DCC Program benefiting small businesses in Nevada including the Las Vegas MSA AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

Reno CSA AA

The institution has a poor level of qualified CD investments and grants, but not in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 2.5 percent of tier 1 capital allocated to the AA.

The investments and grants reflect poor responsiveness to the needs identified in the AA including affordable housing, community services, and economic development for LMI individuals and geographies. Over 85.8 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 156 grants totaling $2.3 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution occasionally uses innovative and/or complex investments to support CD initiatives. CD Investments involved two complex LIHTC projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers.

Examples of CD investments in the AA include:

- In May 2015, WFBNA invested $7.4 million in a 45-unit LIHTC affordable housing development located in Sparks, Nevada. All of the units will be restricted to seniors with incomes at or below 45 percent area MFI, giving preference to veterans (16 units) and formerly homeless (5 units). The three-story building will include high efficiency heating and cooling equipment, EnergyStar appliances, low-E argon thermal pane windows, high R-value wall and attic insulation and automatic timer thermostat controls. This activity is responsive to the identified need for affordable housing. WFBNA also demonstrated multi-faceted support by providing both the construction loan ($5.8 million) and equity investment in support of this affordable housing development.

- In September 2015, WFBNA provided a $50,000 grant to a local housing organization through the PMP for affordable housing in Reno, NV. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

Conclusions for Area Receiving a LS Review

Based on a LS review, the bank's performance under the Investment Test in the NV Combined NonMetro AA is consistent with the bank's overall adequate performance in the Investment Test in the FS areas.

SERVICE TEST

The bank's performance under the Service Test in Nevada is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in both the Las Vegas MSA AA and Reno CSA AA is excellent.

Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the institution's AAs, particularly LMI geographies and/or LMI individuals.

Distribution of Branch Delivery System

Las Vegas MSA AA

As of December 31, 2018, WFBNA operates 71 branches and 229 ATMs in the Las Vegas MSA AA. All of these branches are full-service locations. There are four branches in low-income geographies and 18 branches in moderate-income geographies. The branch distribution in LMI geographies exceeds the percentage of the population in the LMI geographies in the AA. When considering an additional nine branches within close proximity to LMI geographies, the bank's branch distribution further exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank opened one branch and closed eight branches during the evaluation period. Five of the eight branches closed were in moderate-income geographies. The closure of branches in moderate-income geographies was to consolidate with other branches nearby and did not negatively impact the distribution of branches relative to the population residing in those geographies. The bank still maintains 22 active branches or 31.0 percent within LMI geographies.

Services and, where appropriate, business hours do not vary in a way that inconveniences the various portions of the AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Thursday from 9:00 am to 5:00 pm, and on Friday from 9:00 am to 6 pm. Seventy of the 71 branches are also open on Saturdays from 10:00 am to 2:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Reno CSA AA

As of December 31, 2018, WFBNA operates 29 branches and 81 ATMs in the Reno CSA AA. Of these branches, 27 are full-service locations and two offer limited services. The branch distribution in LMI geographies exceeds the percentage of the population in both LMI CTs in the AA. When considering an additional three branches within close proximity to LMI geographies, the bank's branch distribution further exceeds demographics.

The institution's opening and closing of branches branch closings have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank opened two branches and closed seven branches during the evaluation period. Three of the seven branches closed were in LMI geographies. The closure of branches in LMI geographies did not negatively impact the distribution of branches relative to the population residing in those geographies.

Services and, where appropriate, business hours do not vary in a way that inconveniences the various sections of the AA, particularly LMI geographies and/or individuals. The bank maintains standard business hours. Generally, branches are open Monday through Friday from 9:00 am to 5:30 pm. Seventeen of the 19 branches are also open on Saturday and from 9:00 am to 12:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Community Development Services

The institution is a leader in providing CD services.

Las Vegas MSA AA

The level of CD services in the Las Vegas MSA AA is excellent. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 428 CD service activities to 81 organizations since the last evaluation, logging a total of 1,593 qualified hours within this AA. The majority (94 percent) of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing (3.6 percent) and economic development (2.4 percent). The bank's assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- Twenty-seven WFBNA team members provided 234 hours of financial education services at an institute of learning where, according to the NCES, the free/reduced lunch program participation rate is 93.7 percent.
- A WFBNA team member provided 24 hours of Board service at a nonprofit organization that coordinates volunteers to preserve affordable homeownership by repairing the homes of low-income elderly and disabled individuals, providing them with a safe and healthy residence. All of its clients are low- to moderate-income as they earn less than 80 percent of the area MFI.

Reno CSA AA

The level of CD services in the Reno CSA AA is excellent. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 479 CD service activities to 36 organizations since the last evaluation, logging a total of 1,529 qualified hours within this AA. The majority (99 percent) of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted economic development (1 percent). The following are examples of CD services provided in this AA:

- Two WFBNA team members provided 218 hour of financial expertise, and one team member provided 140 hours of Board service at an organization that provides services to LMI women and their children suffering from chemical addiction, poverty, and domestic violence.
- Five WFBNA team members provided 329 hour of financial expertise at a Community Development organization that offers a program administered by the U.S. Department of Labor. The program helps young people ages 16 through 24 improve the quality of their lives through career technical and academic training.

Conclusion for Area Receiving a LS Review

Based on a LS review, the bank's performance under the Service Test in the NV Combined NonMetro AA is weaker than the bank's overall performance under the Service Test in the FS areas due to weaker branch distribution in LMI geographies. Performance in the LS AA did not impact the overall Service Test Rating for the State of Nevada.

State Rating

State of New Mexico

CRA rating for the State of New Mexico[38]: Satisfactory
The Lending Test is rated: High Satisfactory
The Investment Test is rated: Low Satisfactory
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Good lending activity;
- Good distribution of loans by borrower profile;
- Good geographic distribution of loans;
- Adequate level of CD loans originated;
- WFBNA's use of flexible products has a neutral impact on the Lending Test;
- Adequate level of CD investments;
- Retail delivery systems are readily accessible to all portions of the AA;
- WFBNA is a leader in providing CD services that are responsive to the needs of the bank's AA; and
- Performance in the LS AAs elevated the Service Test to Outstanding.

Description of Institution's Operations in New Mexico

WFBNA delineated four AAs within New Mexico including the Albuquerque-Santa Fe-Las Vegas, NM CSA (Albuquerque CSA AA); Farmington, NM MSA (Farmington MSA AA); Las Cruces, NM MSA (Las Cruces MSA AA); and NM Combined non-metropolitans (NM Combined NonMetro AA). The Albuquerque CSA AA received FS review. Refer to Appendix A for a complete description of each AA. This area accounted for the largest portion of the lending (62 percent) and deposits (71 percent) amongst the AAs in New Mexico. New Mexico represents the 19th largest rated area by deposits. WFBNA has $8.5 billion of deposits representing 0.7 percent of adjusted deposits. WFBNA operates 81 branches and 155 ATMs within New Mexico, representing 1.4 percent of the bank's branches and 1.1 percent of the bank's ATMs. The bank originated and purchased approximately $9.0 billion in loans or 0.5 percent of total reported loan originations and purchases during the evaluation period. The bank's primary loan products in the New Mexico are home mortgage and loans to small businesses.

<u>Albuquerque CSA AA</u>

Within the Albuquerque CSA AA, the bank had $6 billion deposits and ranked first amongst 24 depository institutions in the market with 31.2 percent market share. The 2nd and 3rd depository institutions in terms of deposit market share were Bank of America and BOKF with 18.4 percent and 8.4 percent, respectively. WFBNA operates 46 branches and 78 ATMs in the AA.

Demographic Data

The following table provides a summary of the demographics that includes housing and business

[38] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

information for the Albuquerque CSA AA. Table A shows that the volume of OOUs very small in the low-income tracts and over 39 percent of families in the AA are LMI. The area's median housing value in the Albuquerque CSA AA is 3.2 times the highest MSA median income, but 4 times moderate-, and 6.5 times low-income, indicating a limited proportion of OOUs are affordable to LMI residents. Median rents and the significant percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Economic Data

Albuquerque, NM MSA

According to the July 2018 Moody's Analytics report, Albuquerque has lost momentum over the past four months and wage growth has slowed since mid-2017. Albuquerque has a stable base of education/healthcare and scientific research jobs. The largest employers in Albuquerque include University of New Mexico, Kirtland Air Force Base, and Sandia National Laboratories. Albuquerque MSA is unlikely to be hurt by tariff escalation between the U.S., China, and Mexico.

The outlook for the housing market in Albuquerque remains cool with no surge in sales and construction, while the commercial real estate construction, mainly for retail structures, cannot alone provide enough impetus for total spending growth. Despite the flagging recovery, the labor market is tightening.

According to the U.S. BLS, the unemployment rate for the Albuquerque MSA for the 2nd quarter of 2018 was 4.9 percent and has significantly decreased from 7.1 percent at the beginning of the evaluation period. The unemployment rate in the AA was slightly lower than the overall state of New Mexico at 5.5 percent for the same period.

Santa Fe, NM MSA

According to the July 2018 Moody's Analytics report, job growth in Santa Fe has resumed after the slow decline in nonfarm employment in 2016-2017. Healthcare industries will add significantly to Santa Fe MSA's growth in coming years due to increased demand for healthcare by older families and a larger than average concentration of social assistance services. Santa Fe MSA counts on healthcare for a higher share of employment than nationally. Many of these workers are employed at CHRISTUS St. Vincent Regional Medical Center and Presbyterian Medical Group hospitals.

Strong household formation, helped by inflows of retirees, is buoying housing demand. Due to the tight market, single-family construction in the MSA has come to life, with permits three times higher than in 2016. Residential construction will stay elevated the next few years because of retiree inflows and low home turnover.

According to the U.S. BLS, the unemployment rate for Santa Fe MSA for the 2nd quarter of 2018 was 4.5 percent and has decreased from 5.8 percent at the beginning of the evaluation period. The unemployment rate in the AA was lower than the overall state of New Mexico at 5.5 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by two community contacts serving the bank's Albuquerque CSA in conjunction with this evaluation. One organization runs affordable housing programs in the county of Los Alamos. These programs include down payment assistance, housing projects that use low income housing tax credit, and interest free loans to improve homes. The other organization provides services to new entrepreneurs in Bernalillo, Valencia, Torrance, and Socorro counties covering consulting, business training, and loans.

The community contacts noted a significant need for affordable housing and small business loans. The current housing demand in the Los Alamos County is very high, with available inventory of houses at an all-time low. The contacts noted that banks are meeting the credit needs in the community.

The bank conducted research in the AA and identified community needs for affordable housing for LMI families, financial education for the unbanked and underbanked, job creation for LMI individuals, and small business assistance.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Albuquerque CSA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

Scope of Evaluation in New Mexico

The rating for the State of New Mexico is primarily based on FS evaluations of the bank's performance in the Albuquerque CSA AA; however, performance in each AA was considered. Conclusions where a

LS review affected the CRA Rating for the state are addressed within their respective tests. LS procedures were performed for the Farmington MSA AA, Las Cruces MSA AA, and NM Combined NonMetro AA. A limited portion of the bank's overall lending, investments, and services were conducted in New Mexico; therefore, the performance in New Mexico received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN NEW MEXICO

LENDING TEST

The bank's performance under the Lending Test in New Mexico is rated High Satisfactory.

Conclusions for Area Receiving a FS Review

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Albuquerque CSA AA is good.

Lending Activity

Based on the tables below, lending levels reflect good responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to the bank's significant capacity and market dominance.

Number of Loans*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State Loans	%State Deposits
Albuquerque-CSA	25,470	17,628	230	42	43,370	62.7	71.1
Farmington MSA	1,822	1,262	38	6	3,128	4.5	5.4
Las Cruces MSA	4,279	2,816	119	12	7,226	10.5	6.8
NM Combined NonMetro	9,695	5,186	514	18	15,413	22.3	16.7
Total	41,266	26,892	901	78	69,137	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Dollar Volume of Loans (000's)*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State* Loans	%State Deposits
Albuquerque CSA	$5,026,949	$1,078,865	$8,000	$31,311	$6,145,125	67.1	71.1
Farmington MSA	$297,079	$96,817	$1,868	$43,048	$438,812	4.8	5.4
Las Cruces MSA	$674,736	$142,741	$3,943	$24,711	$846,131	9.2	6.8

NM Combined NonMetro	$1,373,433	$281,717	$35,052	$36,100	$1,726,302	18.9	16.7
Total	$7,372,197	$1,600,140	$48,863	$135,170	$9,156,370	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

WFBNA ranked first in deposits with 31.3 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 7.5 percent market share. Although WFBNA's HMDA market share is considerably lower than its deposit market share, lending competition was significantly stronger, reflected by the 400 lenders, than competition for deposits, where there were 24 depository institutions in the AA. The 2nd and 3rd top lenders in this market were Academy Mortgage Corporation with 5.6 percent market share and Quicken Family with 5.0 percent market share.

In small loans to businesses, WFBNA ranked second with a market share of 13.1 percent. The top lender was American Express Bank with a market share of 17.8 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in its AA.

Home Mortgage Loans

Refer to Table O in the State of New Mexico section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- For 2012-2016, the proportion of home mortgage loans in low-income geographies is below both the aggregate distribution of loans and the proportion of OOUs in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is below the proportion of OOUs in those geographies
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of New Mexico section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- For both 2012-2016 and 2017-2018 periods, the proportion of the bank's small business loans in LMI geographies exceeds both the aggregate distribution of loans and the proportion of businesses located in those geographies.

Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

Home Mortgage Loans

Refer to Table P in the State of New Mexico section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- The Albuquerque CSA AA has homeownership affordability hurdles especially for LMI borrowers. As noted above, the area's median housing value is 6.5 times the income of low-income and 4 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI borrowers. Because of the affordability challenges, the bank's overall home mortgage lending in 2012-2016 to LMI borrowers is below the aggregate distribution of loans.
- The bank's performance to low-income borrowers is significantly below the proportion of families and lending to moderate-income borrowers is below the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of New Mexico section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is excellent.

- For 2012-2016, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is near to the percentage of small businesses located in the AA and
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly below the combined performance in 2012-2016.

Community Development Lending

The institution has made a low level of CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The level of CD lending in the Albuquerque CSA AA is adequate. WFBNA made 42 CD loans in its AA for a total of $31.3 million, which represents 4.6 percent of allocated tier 1 capital. CD lending performance had a neutral impact on the lending test rating. The loans were responsive to the identified affordable housing needs in the AA. The bank made 12 loans totaling $18 million (58 percent) for the purpose of affordable housing. Additionally, the bank extended 25 CD loans totaling $12.0 million for the primary purpose of community services to LMI individuals.

Examples of CD loans in the AA include:

- In November 2017, WFBNA provided a $10 million construction loan for the development of an affordable housing development located in Albuquerque, New Mexico. The development specified that 99 percent of the units are restricted to tenants earning between 30 and 60 percent of the area MFI. The units are further reserved for seniors aged 62 and over or disabled tenants of any age. WFBNA demonstrated multi-faceted support by providing both the construction loan and equity investment to support this affordable housing development.
- In September 2018, WFBNA renewed a $500,000 working capital line of credit to a nonprofit corporation that provides health care services to the underserved communities throughout the Southwest. This organization also provides services to the underserved area or population, offers a sliding fee scale, provides comprehensive services, have an ongoing quality assurance program, and have a governing board of directors.

Product Innovation and Flexibility

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 198 loans totaling $38.6 million to homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Lending Test in the Farmington MSA AA is consistent with the bank's overall good performance under the Lending Test in the FS area. The bank's performance under the Lending Test in the Las Cruces MSA and NM Combined Non-Metros AAs is excellent and stronger than the bank's overall performance under the Lending Test in the FS area. The bank's performance in these two LS AAs did not enhance the bank's overall rating for the state.

Although CD lending in the Albuquerque CSA AA was considered low, the bank made an excellent level of CD loans compared to tier 1 capital in all three LS areas.

Refer to Tables O through T in the State of New Mexico section of appendix D for the facts and data that support these conclusions.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of New Mexico is rated Low Satisfactory.

Conclusions for Area Receiving a FS Review

Based on a FS review, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Albuquerque CSA AA is adequate.

Qualified Investments										
	Prior Period*		Current Period		Total				Unfunded Commitments **	
Assessment Area	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Albuquerque CSA	5	$945	349	$37,408	354	81.6	$38,353	35.8		
Farmington MSA	2	$2,296	12	$11,052	14	3.2	$13,348	12.4		
Las Cruces MSA	0	$0	23	$2,737	23	5.3	$2,737	2.6		
NM Combined NonMetro	9	$7,594	34	$45,203	43	9.9	$52,797	49.2		
Total	16	$10,835	418	$96,400	434	100.0	$107,235	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

<u>Albuquerque CSA AA</u>

The institution has an adequate level of qualified CD investments and grants, although rarely in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 5.7 percent of tier 1 capital allocated to the AA.

The investments and grants exhibit adequate responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 63.2 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 337 grants totaling $5.1 million to a variety of organizations that primarily support affordable housing, community services, economic development, and revitalization/stabilization.

The institution occasionally uses innovative and/or complex investments to support CD initiatives. CD Investments involved several complex LIHTC and NTMC projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In November 2017, WFBNA provided an $11.7 million investment in an LIHTC affordable housing development located in Albuquerque, New Mexico, with 99 percent of the units restricted to tenants earning between 30 and 60 percent of the area MFI. The units are further reserved for seniors aged 62 and over or disabled tenants of any age. This activity is responsive to the identified need for affordable housing. WFBNA also demonstrated multi-faceted support by providing both the construction loan ($10 million) and equity investment in support of this affordable housing development.

- During the exam timeframe, WFBNA provided three grants totaling $1.1 million to three small business organizations through the Small Business DCC Program benefiting small businesses in New Mexico including the Albuquerque MSA AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.
- During the exam timeframe, WFBNA provided eight grants totaling $545,000 to two local housing organizations through the PMP for affordable housing in the Albuquerque CSA AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Investment Test in the Las Cruces MSA AA is consistent with the bank's overall adequate performance in the Investment Test in the FS area. The bank's performance in the Farmington MSA and NM Combined NonMetro AAs is stronger than the bank's overall performance due to a higher volume of CD investments. Performance differences in the LS AAs did not impact the overall Investment Test rating for the State of New Mexico.

SERVICE TEST

The institution's performance under the Service Test in the Albuquerque CSA AA is rated Outstanding.

Conclusions for Area Receiving a FS Review

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the service test, the institution's performance in the Albuquerque CSA AA is good.

Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the institution's AAs, particularly LMI geographies and/or LMI individuals.

Distribution of Branch Delivery System											
Assessment Area	Deposits	Branches						Population			
	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%)				% of Population within Each Geography*

Albuquerque CSA AA

As of December 31, 2018, WFBNA operates 46 branches and 78 ATMs in the Albuquerque CSA AA. Of these branches, 44 are full-service locations and two are limited-service branches. There are two branches in low-income geographies and 18 branches in moderate-income geographies. The branch distribution in low-income geographies is near to the percentage of the population in low-income CTs and branch distribution in moderate-income geographies significantly exceeds the percentage of the population in moderate-income CTs in the AA. When considering an additional four branches within close proximity to LMI geographies, the bank's distribution further exceeds demographics.

The institution's opening and closing of branches have generally not adversely affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed seven branches since the last evaluation. Three of these branches were located in moderate-income CTs. The closure of branches in moderate-income geographies was to consolidate with other branches nearby and did not negatively impact the distribution of branches relative to the population residing in those geographies. The bank still maintains 20 active branches or 43.3 percent within LMI geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Thursday from 9:00 am to 5:00 pm, with four branches open from 10:00 am to 7:00 pm. On Friday, most branches are open from 9:00 am to 5:00 or 6:00pm, with four branches open from 10:00 am to 7:00 pm. On Saturday, five branches are open from 9:00 am to 1:00 pm and four branches are open from 10:00 am to 5:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Community Development Services

The institution is a leader in providing CD services.

Albuquerque CSA AA

The level of CD services in the Albuquerque CSA AA is excellent. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 1,010 CD service activities to 87 organizations since the last evaluation, logging a total of 2,513 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing and economic development. The bank's assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- A WFBNA team member provided 30.5 hours of Board service to a community organization that is responsible for advising the City on policies and activities related to affordable housing.
- A WFBNA team member provided 87.5 hours of Board service to a nonprofit community development organization that helps low-income residents of the Santa Fe area gain access to capital, economic literacy and affordable housing so that they can improve the quality of their lives and become more economically self-sufficient. The organization is committed to helping residents of northern New Mexico find affordable housing by providing counseling, training, and financial assistance to first-time homeowners while working with banks and other housing agencies to obtain favorable mortgage financing.

Conclusion for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Service Test in the Farmington MSA AA, Las Cruces MSA AA, and NM Combined NonMetro AA is stronger than the bank's overall good performance under the Service Test in the FS area due to a higher rating in the changes in location. Performance differences in the LS AAs did impact the overall Service Test rating for the State of New Mexico. As such, the overall Service Test rating for the State of New Mexico was upgraded to Outstanding.

State Rating

State of North Carolina

CRA rating for the State of North Carolina[39]: Outstanding
The Lending Test is rated: Outstanding
The Investment Test is rated: Low Satisfactory
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Excellent lending activity;
- Good distribution of loans by borrower profile;
- Good geographic distribution of loans;
- WFBNA is a leader in providing CD loans, which has a significant positive impact on the Lending Test;
- WFBNA's use of flexible products has a positive impact on the Lending Test;
- Adequate level of CD investments;
- Retail delivery systems are readily accessible to all portions of the AA;
- WFBNA provides a relatively high level of CD services that are responsive to the needs of the bank's AA; and
- Performance in the LS AAs enhanced the overall Service Test Rating to Outstanding.

Description of Institution's Operations in North Carolina

WFBNA delineated 12 AAs within North Carolina including the Greensboro-Winston-Salem-High Point, NC CSA (Greensboro CSA AA); Raleigh-Durham-Chapel Hill, NC CSA (Raleigh CSA AA); NC Combined Non-Metros (NC Combined NonMetro AA); Asheville-Brevard, NC CSA (Asheville CSA AA); Fayetteville-Lumberton-Laurinburg, NC CSA (Fayetteville CSA AA); Goldsboro, NC MSA (Goldsboro MSA AA); Greenville-Washington, NC CSA (Greenville CSA AA); Hickory-Lenoir, NC CSA (Hickory CSA AA); Jacksonville, NC MSA (Jacksonville MSA AA); New Bern-Morehead City, NC CSA (New Bern CSA AA); Rocky Mount-Wilson-Roanoke Rapids, NC CSA (Rocky Mount CSA AA); and Wilmington, NC MSA (Wilmington MSA AA). Refer to Appendix A for a complete description of each AA. The Greensboro CSA AA, Raleigh CSA AA, and the NC Combined NonMetro AA received full scope reviews. These areas accounted for largest portion of the lending (64.6 percent) and deposits (74.2 percent) amongst the AAs in North Carolina.

WFBNA has $23.3 billion of deposits in North Carolina representing 1.8 percent of adjusted deposits. North Carolina represents the 12th largest rated area by deposits. WFBNA operates 224 branches and 476 ATMs within North Carolina, representing 4.0 percent of the bank's branches and 3.5 percent of the bank's ATMs. The bank originated and purchased approximately $46.9 billion in loans or 2.5 percent of total reported loan originations and purchases during the evaluation period. The bank's primary loan products in North Carolina are home mortgage and small loans to businesses.

[39] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

Greensboro CSA AA

Within the Greensboro CSA AA, the bank had $5.9 billion in deposits and ranked second amongst 28 financial institutions in the market with 12.0 percent market share. Branch Banking and Trust Company and Pinnacle Bank ranked first and third with market share of 57.8 and 4.9 percent, respectively. WFBNA operated 57 branch offices and 125 ATMs in the Greensboro CSA AA during the evaluation period.

Raleigh CSA AA

Within the Raleigh CSA AA, the bank had $9.6 billion in deposits and ranked first amongst 37 financial institution in the market with 22.1 percent market share. Pacific Western Bank and Branch Banking and Trust Company ranked second and third with market share of 14.0 and 13.3 percent, respectively. WFBNA operated 66 branch offices and 150 ATMs in the Raleigh CSA AA during the evaluation period.

NC Combined NonMetro AA

Within the NC Combined NonMetro AA, the bank had $1.8 billion in deposits and ranked second amongst 34 financial institution in the market with 15.6 percent market share. Branch Banking and Trust Company and PNC Bank ranked first and third with market share of 19.0 and 11.8 percent, respectively. WFBNA operated 33 branch offices and 43 ATMs in the NC Combined NonMetro AA during the evaluation period.

Demographic Data

Greensboro CSA AA

The following table provides a summary of the demographics that includes housing and business information for the Greensboro CSA AA. The Table shows that the volume of OOUs is very small in the low-income tracts and over 39 percent of families in the AA are LMI. The area's median housing value in the Greensboro CSA AA is 2.5 times the highest MSA median income, but three times moderate-, and five times low-income, indicating a limited proportion of OOUs are affordable to low-income borrowers. Median rents and the significant percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Economic Data

<u>Burlington, NC MSA</u>

According to the April 2019 Moody's Analytics report, Burlington's economy is struggling to create jobs. Construction employment is at a decade high, but an earlier uptick in factory payrolls has quickly phased out, and retail and leisure/hospitality are surprisingly weak given robust population growth. A well above average 60 percent of households earn less than $60,000 per year. With such a large chunk of the population hamstrung by low purchasing power, job growth in consumer services will, at best, match the State average.

On the upside, education/ healthcare is strong, along with industries situated downstream to manufacturing such as transportation. A graying U.S. population and an influx of retirees into North Carolina will pay dividends for healthcare diagnostics giant LabCorp (Burlington's largest employer), which is expanding its Burlington based operations and looking to diversify to gain footholds in other parts of the life sciences market.

Burlington's proximity to North Carolina's largest metro areas will create more opportunities for local job seekers and help attract new residents that will buoy housing and consumer services. The largest employers in the MSA are Laboratory Corp. of America, Cone Health Alamance Regional Medical Center, and Elon University. According to the U.S. BLS, the MSA unemployment rate as of the fourth quarter of 2018 was 3.9 percent, down from 7.2 percent at the beginning of the evaluation period. The unemployment rate in the AA was higher than the overall State of North Carolina at 3.7 percent for the same period.

<u>Greensboro-High Point, NC MSA</u>

According to the April 2019 Moody's Analytics report, the labor market in Greensboro has been mostly flat over the last two years. Year-over-year job growth has consistently trailed state and national averages throughout the expansion. Despite low living costs, Greensboro is struggling to attract residents because of a lack of dynamic growth industries and a share of low-wage jobs that is well above the state and national averages.

Bright spots are hard to find outside of transportation/warehousing, which has added significantly to payrolls over the last year. Thanks to low business costs, easy access to rail networks, and Piedmont Triad International Airport, the metro area is quickly becoming a magnet for companies looking to expand their distribution networks. Despite a recent slowdown, logistics payrolls account for an above-average share of total jobs and will be a major contributor to growth with several large projects in the pipeline.

Despite improving demographics, weakness in the labor market has carried over into housing as single-family permits have recovered only slowly and stand at barely half the level from the early 2000s. Price appreciation has also been sluggish with house prices just 10 percent above their prior peak despite a mild recessionary decline.

The largest employers in the MSA are Cone Health, Ralph Lauren Corp., and High Point Regional Hospital. According to the U.S. BLS, the MSA unemployment rate as of the fourth quarter of 2018 was 4.3 percent, down from 8.4 percent at the beginning of the evaluation period. The unemployment rate in the AA was higher than the overall State of North Carolina at 3.7 percent for the same period.

<u>Winston-Salem, NC MSA</u>

According to the April 2019 Moody's Analytics report, demand for workers in Winston-Salem is strong. Private employers are hiring at an accelerating rate with healthcare, leisure/hospitality, and professional/business services leading the way. The Wake Forest Innovation Quarter will provide new avenues for growth. The mixed-use incubator of research in biomedical science, information technology, clinical services, and advanced materials are generating new jobs, revitalizing downtown Winston-Salem, and the prospects for further development are strong. Strong in-migration and an above-average share of residents age 65 and older are boosting demand for healthcare and driving investment in the industry.

Despite the tightening labor market, average wage growth has been disappointing because of an unfavorable mix of job creation, as much of the rebound in job growth has been fueled by low-wage positions.

Steady population gains and an improving labor market has added fuel to an already-hot housing market as builders struggle to keep up. Households are forming at an above-average rate and consumers are financially in their best position in years, helping to release pent-up housing demand that has vaulted existing single-family home sales to near prerecession levels. Builders have responded by pushing single-family permitting to early-2000s levels. Even with increased supply, prices are appreciating more rapidly than the U.S. average. Young professionals are lending support to the multifamily housing market, but developers are testing its limits. Three large projects under construction will increase the number of available units in downtown by 25 percent when they open next year.

The largest employers in the MSA are Novant Health, Wake Forest University Baptist Medical Center, and BB&T. According to the U.S. BLS, the MSA unemployment rate as of the fourth quarter of 2018 was 3.9 percent, down from 7.7 percent at the beginning of the evaluation period. The unemployment rate in the AA was higher than the overall State of North Carolina at 3.7 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by two community contacts that serve the bank's Greensboro CSA AA. The community contacts are representatives from an economic and community development organizations that help entrepreneurs/small businesses of various sizes in the cities of Greensboro, High Point, and Winston Salem.

The contacts indicated that the local economy is improving with a diversified employment and industrial base, and the unemployment rate is trending downward. The local economy has historically been dependent on manufacturing, but it has been declining consistently, while lower-paying retail jobs have grown significantly. The area's major employers include numerous hospitals and health care facilities, United Parcel Service, Wells Fargo Bank, Walmart stores, manufacturers, local governments, and area universities and school systems.

There was noticeable development in areas that were hard hit by the 2008 housing market crash. Downtown businesses are prospering, and many of the older buildings are being renovated and turned into condos and multi-family housing.

The contacts indicated that there is a significant need for more small business loans in the area. Access to capital by small businesses has diminished due to increasing regulatory burden, as evidenced by the lack of community banks in the area. There are opportunities for financial institutions to provide capital in the form of small business loans and other credit-related projects to start-up businesses.

The bank conducted research in the AA and identified community needs for affordable housing for LMI families, small business assistance, workforce development and job readiness, homebuyer assistance, and financial education, products, and services.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Greensboro CSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

Raleigh CSA AA

The following table provides a summary of the demographics that includes housing and business information for the Raleigh CSA AA. The Table shows that the volume of OOUs is very small in the low-income tracts and over 39 percent of families in the AA are LMI. The area's median housing value in the Raleigh CSA AA is 2.9 times the highest MSA median income, but 3.5 times moderate-, and six times low-income, indicating a limited proportion of OOUs are affordable to low-income borrowers. Median rents and the significant percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

Assessment Area: Raleigh-Durham-Chapel Hill NC CSA (2016)

Economic Data

Durham-Chapel Hill, NC MSA

According to the April 2019 Moody's Analytics report, job creation in Durham has slowed sharply since mid-2018, and year-over-year growth in the first quarter was the weakest in more than seven years. Job losses in retail and fewer additions in healthcare are the main culprits.

Tech, life sciences, and other professional services will provide the biggest lift in the near term. Durham boasts an outsize tech cluster that attracts high-value business investment, and high-tech employment has surged over the last year.

Pharmaceutical production accounts for 20 percent of factory jobs in Durham. The depth of talent and an existing cluster of life sciences and related companies in the Research Triangle make Durham an ideal location for bio-manufacturers.

Robust population growth and a sturdy labor market has increased pressure on an already-hot housing market. Builders have responded aggressively, boosting single-family starts to level last reached in the early 2000s even as building activity nationally remains sluggish. As a result, construction employment growth is above average and will maintain momentum this year.

The largest employers in the MSA are Duke University & Health System, IBM Corp., and UNC - Chapel Hill. According to the U.S. BLS, the MSA unemployment rate as of the fourth quarter of 2018 was 3.6 percent, down from 6.3 percent at the beginning of the evaluation period. The unemployment rate in the AA was slightly lower than the overall State of North Carolina at 3.7 percent for the same period.

Raleigh, NC MSA

According to the April 2019 Moody's Analytics report, Raleigh's expansion is resuming after it stalled in the second half of 2018. Professional/business services have been the biggest boon to growth, accounting for nearly one in four net new jobs over the last year. Tech and the broader professional/business services industry hold the most promise for growth. Business costs are 12 percent below the U.S. average and much lower than those in other tech centers, giving Raleigh an edge in attracting tech startups and established companies alike.

The housing market is solid. Prices are 22 percent above their prior peak and single-family permits have returned to early-2000 levels even though the pace of building still lags that nationally.

The largest employers in the MSA are IBM Corporation, WakeMed Health & Hospitals, and North Carolina State University. According to the U.S. BLS, the MSA unemployment rate as of the fourth quarter of 2018 was 3.6 percent, down from 6.2 percent at the beginning of the evaluation period. The unemployment rate in the AA was slightly lower than the overall State of North Carolina at 3.7 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by three community contacts that serve the bank's Raleigh CSA AA. One community contact represents an affordable housing organization that serves the geographic boundaries in downtown Raleigh and the research triangle area which includes Wake and Orange Counties. One community contact provides affordable housing solutions throughout the State including the AA. The other one represents an economic and workforce development organization.

The community contacts indicated that the Raleigh-Durham area is rapidly growing and changing. As the area grows, it takes a workforce with many different income levels to support that growth, including low-paying workers, which leads to the need for affordable housing. There is some gentrification in Raleigh and housing costs in Durham are skyrocketing. Affordable housing is the critical credit need in the AA.

There are opportunities for financial institutions to provide capital for pre-development work for affordable housing projects, provide revolving lines of credit for affordable housing organizations to acquire land or rental housing properties, and a longer-term loan product to refinance LIHTC projects. There are also opportunities for financial institutions to provide financial literacy training to small business owners.

The bank conducted research in the AA and identified community needs for affordable housing for LMI families, homeless services, small business assistance, and neighborhood revitalization/stabilization.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing represents a primary credit need for the Raleigh CSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

<u>NC Combined NonMetro AA</u>

The following table provides a summary of the demographics that includes housing and business information for the NC Combined NonMetro AA. Table A shows that the number of tracts, population, OOUs, and businesses is very small in the low-income tracts and over 38 percent of families in the AA are LMI. The area's median housing value in the NC Combined NonMetro AA is 3.5 times the highest MSA median income, but 4.5 times moderate-, and seven times low-income, indicating a limited proportion of OOUs are affordable to LMI borrowers. Median rents and the significant percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A - Demographic Information of the Assessment Area

Assessment Area: NC Combined Non-Metros (2016)

Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #
Geographies (Census Tracts)	164	3.0	10.4	60.4	25.0	1.2

Due to rounding, totals may not equal 100.0
(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

According to the August 2018 Moody's Analytics report, North Carolina's economy is improving. Year-over-year job growth is the fastest since late 2016 and comfortably exceeds the South and U.S. averages. Net hiring is exceptionally broad-based with more than four-fifths of private industries adding to their headcounts. As a result, hourly pay is rising faster than elsewhere as firms are forced to hike wages to attract and retain qualified labor.

Professional/business and information services, which together employ many of NC's tech workers, will contribute one-quarter of the State's net new jobs over the next year, despite accounting for only about 15 percent of nonfarm payrolls. Although NC's manufacturers are on a firmer trajectory, it will not be long before factory job growth slows. Meanwhile, transportation and warehousing have grown significantly, with payrolls up more than 30 percent this decade.

Population and income growth that are above average and accelerating in NC will keep an already-hot housing market sizzling as builders struggle to keep up. Multifamily starts hit a three-decade high in the first quarter, consistent with the forecast for big construction job gains this year and next.

The largest employers in NC Combined NonMetro are Fort Bragg, Wal-Mart Stores Inc., and Atrium Health. According to the U.S. BLS, the unemployment rates for the third quarter of 2018 in the following counties range from a low of 3.5 percent (Watauga County) to a high of 5.3 percent (Bladen County) while the State average is 4.0 percent during the same period.

Community Contacts

The analysis takes into consideration comments provided by a recent community contact in conjunction with this evaluation that serves the bank's NC Combined NonMetro AA. The community contact is a government housing and community development agency that is involved in multiple efforts to find and develop affordable housing, educate and train low-income residents on building credit and wealth, and to assist in small business funding and incubation.

The contact indicated that the local economy is slowly improving. There is an increase in jobs within the local area and improvements to infrastructure. There have been recent projects to revitalize downtown areas. The contact indicated that there is a need for affordable housing within Wilkes County given that many of the new incoming workers are typically younger, who cannot afford the expensive housing. In addition, small businesses have trouble obtaining credit since they do not have the knowledge on how to qualify. There are opportunities for financial institutions to educate local small businesses regarding how to qualify for credit through seminars and outreach programs and credit for affordable housing within the AA.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the NC Combined NonMetro AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of population, OOUs, and small businesses coupled with limited home affordability for LMI individuals.

Scope of Evaluation in North Carolina

The rating for the State of North Carolina is based on FS evaluation of the bank's performance in the Greensboro CSA AA, Raleigh CSA AA, and NC Combined NonMetro AA; however, performance in each AA was considered. Conclusions where a LS review affected the CRA Rating for the state are addressed within their respective tests. LS procedures were performed for the Asheville CSA AA, Fayetteville CSA AA, Goldsboro MSA AA, Greenville CSA AA, Hickory CSA AA, Jacksonville MSA AA, New Bern CSA AA, Rocky Mount CSA AA, and Wilmington MSA AA. The State of North Carolina is the 12th largest rated area and along with 12 other rated areas represents the bank's most significant markets in terms of lending, deposit, and branch distribution. North Carolina represents a sizeable portion of the bank's overall lending, investments, and services; therefore, the performance in the state was weighted heavier in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN NORTH CAROLINA

LENDING TEST

The bank's performance under the Lending Test in North Carolina is rated Outstanding.

Conclusions for Areas receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Greensboro CSA and Raleigh CSA AAs is excellent and performance in the NC Combined NonMetro AA is good**.**

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans *							
Assessment Area	Home Mortgage	Small Business	Small Farm	CD	Total	% State* Loans	% State Deposits
Greensboro CSA	42,306	16,712	334	47	59,399	20.4	25.2
Raleigh CSA	77,920	26,488	350	48	104,806	36.0	41.3
NC Combined NonMetro	16,123	7,051	670	12	23,856	8.2	7.7
Asheville CSA	13,937	6,767	109	16	20,829	7.2	7.3
Fayetteville CSA	17,454	2,994	76	10	20,534	7.1	2.6
Goldsboro MSA	3,789	740	52	1	4,582	1.6	1.1
Greenville CSA	4,412	2,385	212	1	7,010	2.4	2.3

Total	$42,513,699	$4,217,876	$166,110	$490,230	$47,387,915	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Greensboro CSA AA

WFBNA ranked second in deposits with 12.0 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 9.4 percent market share. There is strong competition as reflected by the 497 lenders and 28 depository institutions in the AA. The second and third lenders in this market were State Employees' Credit Union and Quicken Family with 7.4 and 6.1 percent market share, respectively.

In small loans to businesses, WFBNA ranked third with a market share of 8.0 percent. The top two lenders in this market were American Express, FSB with 17.4 percent market share and Branch Banking and Trust Co. with 12.1 percent market share.

Raleigh CSA AA

WFBNA ranked first in deposits with 22.1 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 12.1 percent market share. Although WFBNA's HMDA market share is considerably lower than its deposit market share, lending competition was significantly stronger, reflected by the 620 lenders, than competition for deposits, where there were only 37 depository institutions. The second and third lenders in this market were State Employees' Credit Union and Quicken Family with 7.1 and 4.3 percent market share, respectively.

In small loans to businesses, WFBNA ranked third with a market share of 9.0 percent. The top two lenders in this market were American Express, FSB with 18.4 percent market share and Branch Banking and Trust Co. with 9.9 percent market share.

NC Combined NonMetro AA

WFBNA ranked second in deposits with 15.6 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 9.8 percent market share. There is strong competition as reflected by the 504 lenders and 34 depository institutions in the AA. The second and third lenders in this market were State Employees' Credit Union and BB&T Family with 9.7 and 5.4 percent market share, respectively.

In small loans to businesses, WFBNA ranked fourth with a market share of 8.6 percent. The top two lenders in this market were American Express, FSB with 13.5 percent market share and Branch Banking and Trust Co. with 13.2 percent market share.

Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in its AA.

<u>Greensboro CSA AA</u>

Home Mortgage Loans

Refer to Table O in the State of North Carolina section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- The bank's performance in both periods, 2012-2016 and 2017-2018, to home mortgage loans in low-income geographies exceeds the aggregate distribution of loans and is significantly below the proportion of OOUs in those geographies. However, less weight was given to WFBNA's performance in low-income geographies because of the very small proportion of the bank's loans and OOUs in low-income geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of North Carolina section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- For 2012-2016, the proportion of the bank's small business loans in low-income geographies exceeds the aggregate distribution of loans and is near to the proportion of businesses located in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is near to the proportion of businesses located in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly below the performance in 2012-2016.

<u>Raleigh CSA AA</u>

Home Mortgage Loans

Refer to Table O in the State of North Carolina section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- The bank's performance in 2012-2016 for home mortgage loans in low-income geographies is below the aggregate distribution of loans and is well below the proportion of OOUs in those geographies. However, less weight was given to WFBNA's performance in low-income geographies because of the very small proportion of the bank's loans and OOUs in low-income geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is below the proportion of OOUs in those geographies.

- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of North Carolina section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is good.

- For both 2012-2016 and 2017-2018 periods, the proportion of the bank's small business loans in low-income geographies substantially meets the aggregate distribution of loans and is well below the proportion of businesses located in those geographies.
- The proportion of loans in moderate-income geographies is below both the aggregate distribution of loans and the proportion of businesses located in those geographies.

<u>NC Combined NonMetro AA</u>

Home Mortgage Loans

Refer to Table O in the State of North Carolina section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is poor.

- The bank's performance in both periods, 2012-2016 and 2017-2018, to home mortgage loans in low-income geographies is well below the aggregate distribution of loans and is significantly below the proportion of OOUs in those geographies. However, less weight was given to WFBNA's performance in low-income geographies because of the very small proportion of the bank's loans and OOUs in low-income geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is significantly below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of North Carolina section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- For 2012-2016, the proportion of the bank's small business loans in low-income geographies substantially meets the aggregate distribution of loans and is below the proportion of businesses located in those geographies.
- The proportion of loans in moderate-income geographies exceeds both the aggregate distribution of loans and the proportion of businesses located in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly below the performance in 2012-2016.

Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

Greensboro CSA AA

Home Mortgage Loans

Refer to Table P in the State of North Carolina section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- The Greensboro CSA AA has homeownership affordability hurdles especially for low-income borrowers. As noted above, the area's median housing value is five times the income of low-income borrowers indicating a limited proportion of OOUs are affordable to low-income borrowers. Despite the affordability challenges, the bank's overall home mortgage lending in both 2012-2016 and 2017-2018 periods to LMI borrowers substantially meets the aggregate distribution of loans.
- The bank's home mortgage lending to low-income borrowers is significantly below the proportion of families and to moderate-income borrowers is below the proportion of families.

Small Loans to Businesses

Refer to Table R in the State of North Carolina section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Raleigh CSA AA

Home Mortgage Loans

Refer to Table P in the State of North Carolina section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The Raleigh CSA AA has homeownership affordability hurdles especially for low-income borrowers. As noted above, the area's median housing value is six times the income of low-income borrowers indicating a limited proportion of OOUs are affordable to low-income borrowers. Despite the affordability challenges, the bank's overall home mortgage lending in 2012-2016 to LMI borrowers exceeds the aggregate distribution of loans for LMI borrowers.

- The bank's home mortgage lending to low-income borrowers is well below the proportion of families and to moderate-income borrowers is near to the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of North Carolina section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

<u>NC Combined NonMetro AA</u>

Home Mortgage Loans

Refer to Table P in the State of North Carolina section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- The NC Combined NonMetro AA has homeownership affordability hurdles especially for LMI borrowers. As noted above, the area's median housing value is seven times the income of low-income and 4.5 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI borrowers. Despite the affordability challenges, the bank's overall home mortgage lending in 2012-2016 to low-income borrowers exceeds the aggregate distribution of loans and is significantly below the proportion of families.
- The bank's overall home mortgage lending to moderate-income borrowers substantially meets the aggregate distribution of loans and is well below the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of North Carolina section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Community Development Lending

The institution is a leader in making CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

Greensboro CSA AA

The level of CD lending in the Greensboro CSA AA is excellent. WFBNA made 47 CD loans in the Greensboro CSA AA for a total of $71.8 million, which represents 10.9 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified needs in the AA, including affordable housing and community services. The bank made 36 CD loans totaling $64.8 million (90 percent) for the purpose of affordable housing which is an identified credit needs within the AA. Additionally, the bank extended 11 CD loans totaling $7 million for the primary purpose of community services to assist LMI individuals within the AA.

Examples of CD loans in the AA include:

- In July 2014, WFBNA provided an $8.2 million loan to finance the acquisition of an affordable housing development located in a moderate-income census tract in Greensboro, NC. The project consists of 24 efficiency units, 48 one-bedroom units, 232 two-bedroom units with 99 percent of the actual rent rates below the area 2014 Fair Market Rents and 100 percent of the units affordable to tenants earning between 25 and 45 percent of the 2014 area MFI of $65,500.
- In May 2014, WFBNA provided a $1.2 million term loan to a non-profit organization for the renovation of a new headquarter. The building houses the organization's programs including a year-round homeless shelter, enough to house at least 30 people who are women or mothers with children. Additionally, the organization offers job training programs for these people.
- In July 2018, WFBNA provided a $1.1 million loan to a multifamily housing development located in a moderate-income census tract in Winston-Salem, NC. The development consists of 49 two-bedroom units, with 100 percent of the asking rent rates below the 2018 Fair Market Rent for the area and 100 percent of the units affordable to tenants earning between 26.8 and 37.1 percent of the 2018 area MFI of $62,000.

Raleigh CSA AA

The level of CD lending in the Raleigh CSA AA is excellent. WFBNA made 48 CD loans in the Raleigh CSA AA for a total of $261.4 million which represents 24.1 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating in the Raleigh CSA AA. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified needs in the AA, including affordable housing and community services. The bank made 37 CD loans totaling $196.8 million (75.3 percent) for the purpose of affordable housing which is an identified credit needs within the AA. Additionally, the bank extended 9 CD loans totaling $62 million for the primary purpose of community services to assist LMI individuals and 2 CD loans totaling $2 million for the purpose of economic development.

Examples of CD loans in the AA include:

- In August 2017, WFBNA provided a $57.0 million bridge loan for an organization to acquire two medical office buildings. The organization provides 90 percent of the indigent health care services in Wake County. Over 60 percent of its clients are LMI as they earn less than 80 percent of the area MFI.
- In April 2018, WFBNA provided a $20.8 million loan for a multifamily housing development located in a moderate-income census tract in Raleigh, NC. The project consists of 120 one-bedroom units, 128 two-bedroom units, 12 three-bedroom units with 52.7 percent of the actual rent rates below the 2016 Fair Market Rent for the area and 100 percent of the units affordable to tenants earning between 26.9 and 65.9 percent of the 2018 area MFI of $84,300.

<u>NC Combined NonMetro AA</u>

The level of CD lending in the NC Combined NonMetro AA is excellent. WFBNA made 12 CD loans in the AA for a total of $32.0 million which represents 15.8 percent of the allocated tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified needs in the AA, including affordable housing and community services. The bank made 8 CD loans totaling $26.5 million (82.8 percent) for the purpose of affordable housing which is an identified credit needs within the AA. Additionally, the bank extended 3 CD loans totaling $3 million for the primary purpose of community services to assist LMI individuals and 1 CD loans totaling $2.5 million for the purpose of revitalizing and stabilizing a distressed area with the AA.

Examples of CD loans in the AA include:

- In July 2013, WFBNA renewed a $1 million working capital line of credit to an organization that helps people with disabilities and special needs and their families to make choices to live more independently. All of its clients are LMI.
- In August 2016, WFBNA provided a $4 million construction loan for an affordable housing development located in Franklin, North Carolina. The project requires that 100 percent of the units restricted to tenants earning 60 percent of the area MFI.
- In March 2016, WFBNA provided a $15 million line of credit to a Tax Credit Investment Fund. Of that total, $552,000 has been allocated to an affordable housing development located in North Wilkesboro, NC. The loan proceeds were used to bridge the gap between the receipt of capital contributions from investors and the payment of equity investments to operating partnerships that own LIHTC projects.

Product Innovation and Flexibility

<u>Greensboro CSA AA</u>

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 161 loans totaling $16.9 million to LMI homebuyers that qualified under this program.

<u>Raleigh CSA AA</u>

The institution makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. The bank launched the NeighborhoodLIFT program in the Raleigh CSA AA in February 2017 and nearly 400 potential homebuyers attended the event. WFBNA originated 220 mortgage loans totaling $36.6 million. Under the *your*FirstMortgage loan program the bank has funded 362 loans totaling $59.7 million to LMI homebuyers that qualified under this program.

NC Combined NonMetro AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 37 loans totaling $3.6 million to LMI homebuyers that qualified under this program.

Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding the programs listed above.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Lending Test in the Asheville CSA, Hickory CSA, and Wilmington MSA AAs is consistent with the bank's overall excellent performance under the Lending Test in the FS areas. The bank's performance in the Fayetteville CSA, Goldsboro MSA, New Bern CSA AA, and Rocky Mount CSA AAs is good and weaker than the bank's overall excellent overall performance. Additionally, the bank's performance under the Lending Test in the Greenville CSA and Jacksonville MSA AAs is adequate and significantly weaker than the bank's overall performance. However, the weaker performance of these LS AAs did not affect the bank's overall excellent rating for the State.

Refer to Tables O through T in the State of North Carolina section of appendix D for the facts and data that support these conclusions.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of North Carolina is rated Low Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Greensboro CSA and Raleigh CSA is adequate, and performance in the NC Combined NonMetro AAs is good.

Qualified Investments										
	Prior Period*		Current Period		Total				Unfunded Commitments**

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

<u>Greensboro CSA AA</u>

The institution has an adequate level of qualified CD investments and grants, although rarely in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 7.7 percent of tier 1 capital allocated to the AA.

The investments and grants reflect adequate responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 77.8 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 271 grants totaling $6.1 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved numerous complex LIHTC and NMTC projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In December 2017, WFBNA provided a $4.5 million investment in a 56-unit LIHTC affordable housing complex development located in Graham, North Carolina. Units are restricted to tenants (age 55 plus) and earning at or below 60 percent of the area MFI. This activity is responsive to the identified need for affordable housing.

- In April 2016, WFBNA provided a $6.2 million NMTC investment for the finance of a redevelopment of a 45,000 square foot underutilized shopping center in Northeast Greensboro, NC. The development is located in a heavily distressed redevelopment zone. Constructed in 1970, the property served as a shopping center until anchor tenant Winn-Dixie moved out in 1998, leaving the complex largely vacant and the area without any reliable food source. Once completed, the development will consist of a mix of retail and service businesses, anchored by Family Dollar and Renaissance Community Co-op. Additional tenants include a City of Greensboro workforce development and youth leadership program office, an independent pharmacy, and a credit union branch. The project will create 30 jobs for LMI individuals and an estimated 100 construction-related jobs during the approximately 12-month renovation.
- During the exam timeframe, WFBNA provided four grants totaling $320,000 to four local housing organizations through the PMP for affordable housing in the Greensboro CSA AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

<u>Raleigh CSA AA</u>

The institution has an adequate level of qualified CD investments and grants, although rarely in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 7.0 percent of tier 1 capital allocated to the AA.

The investments and grants reflect adequate responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 70.4 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 435 grants totaling $14.1 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved numerous complex LIHTC and NMTC projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In September 2013, WFBNA invested $3.8 million in a 40-unit LIHTC affordable housing complex development located in Garner, North Carolina. Units are restricted to tenants earning between 30 and 60 percent of the area MFI. This activity is responsive to the identified need for affordable housing.
- In June 2017, WFBNA provided four local initiatives grants totaling $350,000 to several housing Partnership organizations to administer the NeighborhoodLIFT Down Payment Assistance program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.
- During the exam timeframe, WFBNA provided three grants totaling $1.4 million to several small business organizations through the Small Business DCC Program benefiting small businesses in North Carolina particularly in the Raleigh CSA AA. Refer to the comments in the institution

Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

NC Combined NonMetro AA

The institution has a significant level of qualified CD investments and grants, occasionally in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 11.4 percent of tier 1 capital allocated to the AA.

The investments and grants exhibit good responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 55.3 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 57 grants totaling $523,505 to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved numerous complex LIHTC and NMTC projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers.

Examples of CD investments in the AA include:

- In March 2014, WFBNA invested $5.9 million in a 72-unit LIHTC affordable housing complex development located in Boone, North Carolina. Units are restricted to tenants earning between 40 and 60 percent of the area MFI. This investment is responsive to the need for affordable housing.
- In March 2016, WFBNA invested $35.2 million in the Boston Capital Fund XLII, an LIHTC fund. Of this total investment, $3.4 million was allocated to a development located in North Wilkesboro, North Carolina, with 33 units restricted to tenants earning no more than 60 percent of the area MFI.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Investment Test in the Asheville CSA, Greenville CSA, Hickory CSA, and Jacksonville MSA AAs is consistent the bank's overall adequate performance in the Investment Test in the FS areas. The bank's performance in the Fayetteville CSA and Rocky Mount CSA AAs is stronger than the bank's overall performance due to a higher volume of CD investments. In addition, performance in the Goldsboro MSA, New Bern CSA, and Wilmington MSA AAs is weaker and overall rated as poor due to a lower volume of CD investments. Performance differences in the LS AAs with respect to stronger and weaker were neutral and did not impact the overall Investment Test rating for the State of North Carolina.

SERVICE TEST

The bank's performance under the Service Test in North Carolina is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Raleigh CSA AA is excellent and performance in the Greensboro CSA and NC Combined NonMetro AAs is good.

Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the institution's AAs, particularly LMI geographies and/or LMI individuals.

Greensboro CSA AA

As of December 31, 2018, WFBNA operates 57 branches and 125 ATMs in the Greensboro CSA AA. Of these branches, 51 are full-service locations and six are limited-service branches. There are 17 branches in the LMI geographies. The branch distribution in LMI geographies exceeds the percentage of the population in LMI CTs in the AA. When considering an additional 10 branches within close proximity to LMI geographies, the bank's distribution further exceeds demographics.

The institution's opening and closing of branches have not adversely affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed two branches in low-income geographies and two branches in moderate-income geographies since the last evaluation. The bank has not opened any new branches. The closure of branches in moderate-income geographies was to consolidate with other branches nearby and did not negatively impact the distribution of branches relative to the population residing in those geographies. The bank still maintains 17 active branches or 33.3 percent within LMI geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Thursday from 9:00 am to 5:00 pm and 9:00 am to 6:00 pm on Friday. Of total branches, 14 are also open on Saturdays from 9:00 am to 1:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Raleigh CSA AA

As of December 31, 2018, WFBNA operates 66 branches and 150 ATMs in the Raleigh CSA AA. Of these branches, 56 are full-service locations and 10 are limited-service branches. There are 15 branches in LMI geographies. The branch distribution in low-income geographies significant exceeds the population in low-income CTs and the branch distribution in moderate-income geographies is near to the percentage of the population in moderate-income CTs in the AA. When considering an additional nine branches within close proximity to LMI geographies, the bank's distribution further exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed five branches since the last evaluation. Two of the closings were located in moderate-income geographies. The closure of branches in moderate-income geographies did not negatively impact the distribution of branches relative to the population residing in those geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Thursday from 9:00 am to 5:00 pm, and on Friday from 9:00 am to 6:00 pm. Of the total branches, 32 are open on Saturdays from 9:00 am to 1:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

<u>NC Combined Non-Metro AA</u>

As of December 31, 2018, WFBNA operates 33 branches and 43 ATMs in the NC Combined Non-Metro AA. Of these branches, 27 are full-service locations and six are limited-service branches. There are no branches in the low-income geographies; however, the population in low-income geographies is very low compared to total demographics. There are four branches in the moderate geographies. The branch distribution in moderate-income geographies is near to the percentage of the population in moderate-income CTs in the AA. When considering an additional five branches within close proximity to LMI geographies, the bank's distribution significantly exceeds demographics.

The institution's opening and closing of branches has not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed five branches since the last evaluation. One of the closings was located in a moderate-income geography. The closure of branches in moderate-income geographies did not negatively impact the distribution of branches relative to the population residing in those geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Thursday from 9:00 am to 5:00 pm, and on Friday from 9:00 am to 6:00 pm. Of the total branches, three are open on Saturdays from 9:00 am to 1:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Community Development Services

The institution provides a relatively high level of CD services.

<u>Greensboro CSA AA</u>

The level of CD services in the Greensboro CSA AA is excellent. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 804 CD service activities to 114 organizations since the last evaluation, logging a total of 2,176 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing and economic development. The bank's assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- A WFBNA team member provided 51 hours of Board service to a local community organization that is an affiliate of a global organization that utilizes community-led solutions to identify and resolve community concerns with a primary focus on education, financial stability, and health. Over 93 percent of its clients are LMI individuals as they earn less than 80 percent of the area MFI.
- A WFBNA team member provided 160 hours of Board service to a nonprofit organization that serves people in need in the Greater Greensboro area through practical action such as a food bank, homeless shelter, and emergency financial assistance. All of its clients are LMI individuals as they earn less than 80 percent of the area MFI.
- Eleven WFBNA team members provided 257 hours of tax preparation through the VITA program. Refer to the comments in the institution Innovative or Flexible Retail Service Programs section of this public evaluation for additional details regarding this program.

Raleigh CSA AA

The level of CD services in the Raleigh CSA AA is good. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 376 CD service activities to 77 organizations since the last evaluation, logging a total of 880 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing and economic development. The bank's assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- A WFBNA team member provided 14.5 hours of Board service to a local community organization. This organization is a statewide nonprofit organization representing the interest of underdeveloped and underutilized sectors of the state's economic base. As of July 2012, 75 percent of its clients are LMI individuals as they earn less than 80 percent of the area MFI.
- A WFBNA team member provided 45 hours of board service for the North Carolina Housing Coalition. The Coalition serves LMI households throughout the state of North Carolina who need quality, accessible, and safe affordable housing.
- Two WFBNA team members provided 25 hours of tax preparation through the VITA program. Refer to the comments in the institution Innovative or Flexible Retail Service Programs section of this public evaluation for additional details regarding this program.

NC Combined NonMetro AA

The level of CD services in the NC Combined NonMetro AA is adequate. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 113 CD service activities to 53 organizations since the last evaluation, logging a total of 244 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing which is responsive to an identified need in the AA. The following are examples of CD services provided in this AA:

- WFBNA team members provided 26 hours of Board service to a nonprofit housing organization that works in partnership with people in need to build decent and affordable housing.

- A WFBNA employee provided seven hours of Board service to a community organization that utilizes community-led solutions to identify and resolve community concerns with a primary focus on education, financial stability, and health.
- A WFBNA employee provided 20 hours of Board service to a community organization that enables people in Watauga and Avery counties who are low-income, uninsured and have chronic illnesses to access needed medical care. The Migrant Farmworker Health Program provides access to quality, affordable, community-based, culturally appropriate, and comprehensive healthcare services for migrant and seasonal farmworkers and their families. No patient is turned away due to ability to pay. The program's vision is to build a regional healthcare system resulting in healthier individuals and enhanced quality of life while maintaining a standard of compassion, integrity and excellence.

Conclusion for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Service Test in the Asheville CSA, Fayetteville CSA, Goldsboro MSA, Greenville CSA, Hickory CSA, Jacksonville MSA, New Bern CSA and Wilmington MSA AAs is stronger than the bank's overall good performance under the Service Test in the FS areas due to a higher percentage of branch distribution in LMI geographies. Performance in the Rocky Mount CSA AA is weaker than the bank's overall performance. Performance differences in the LS AAs did impact the overall Service Test rating for the State of North Carolina. As such, the overall Service Test rating for the State of North Carolina upgraded to Outstanding.

State Rating

State of North Dakota

CRA rating for the State of North Dakota[40]: Satisfactory
The Lending Test is rated: High Satisfactory
The Investment Test is rated: Outstanding
The Service Test is rated: High Satisfactory

The major factors that support this rating include:

- Good lending activity;
- Adequate geographic distribution of loans;
- Good borrower distribution of loans;
- WFBNA is a leader in providing CD loans, which has a significant positive impact on the Lending Test;
- WFBNA's use of flexible products has a neutral impact on the Lending Test;
- Excellent level of CD investments that are responsive to AA needs;
- Retail delivery systems are accessible to all portions of the AA; and
- WFBNA provides a relatively high level of CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in North Dakota

WFBNA delineated two AAs within North Dakota including the Bismarck, ND MSA (Bismarck MSA AA) and ND Combined non-metropolitans (ND Combined NonMetro AA). Both AAs received FS reviews. Refer to Appendix A for a complete description of each AA. North Dakota represents the 39th largest rated area by deposits. WFBNA has $1.4 billion of deposits representing 0.1 percent of adjusted deposits. WFBNA operates 12 branches and 18 ATMs within North Dakota representing 0.2 percent of the bank's branches and 0.1 percent of the bank's ATMs. The bank originated and purchased approximately $2.2 billion in loans or 0.1 percent of total bank loan originations and purchases during the evaluation period. The bank's primary loan products in North Dakota are home mortgage and small loans to businesses.

Bismarck MSA AA

Within the Bismarck MSA AA, the bank had $738 million deposits and ranked first amongst 19 depository institutions in the market with 17.8 percent market share. Station Bank and BNC National Bank ranked second and third with a 15.1 percent and 10.0 percent, respectively. WFBNA operates 4 branches and 4 ATMs in the AA.

ND Combined NonMetro AA

Within the ND Combined NonMetro AA, the bank had $622 million deposits and ranked second amongst 36 depository institutions in the market with 8.1 percent market share. First Western Bank &

[40] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

Trust ranked first with a 10.6 percent market share. WFBNA operates 8 branches and 14 ATMs in the AA.

Demographic Data

Bismarck MSA AA

The following table provides a summary of the demographics that include housing and business information for the Bismarck MSA AA. Table A indicates that the volume of OOUs is small in LMI CTs and over 37 percent of families in the AA are LMI. The area's median housing value in the Bismarck MSA AA is 2 times the area's median income, but 2.5 times moderate-, and 4.1 times low-income, indicating a limited proportion of OOUs are affordable to LMI. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for some low-income residents.

Economic Data

According to the October's 2018 Moody's Analytics report, Bismarck's worst days are behind it but troubles remain. Higher oil prices are largely to thank with employment in mining and downstream industries such as transportation rising. Despite the tight labor market, average hourly earnings in private industries are not rising, held back by the continually slipping proportion of jobs in high paying industries. Lackluster income gains and a sharp slowing in the rate of household formation are weighting on housing demand and price appreciation. Increasing oil production will have positive effects on more than just mining. Bismarck is also home to many support services for drillers. These mid-wage office jobs will help support both income and employment growth. The transportation industry that brings Bakken crude to refineries farther south will also benefit.

The major economic drivers in the Bismarck MSA are Resources, Agriculture, and Logistics. The largest employers in the Bismarck MSA includes Sanford Health, CHI St. Alexius, and Bismarck State College. According to the U.S. BLS, the unemployment rate for the fourth quarter of 2018 was 2.8 percent and has decreased from 3.1 percent at the beginning of the evaluation period. The unemployment rate in the AA was slightly lower than the overall State of North Dakota (2.9 percent) for the same period.

Community Contact

The analysis takes into consideration comments provided by a community contact that serves the bank's Bismarck MSA AA. The community contact represents a state government housing agency.

The agency is a self-supporting state agency dedicated to making housing affordable for all North Dakotans. The agency offers affordable home financing to LMI families, ensures the continued availability of suitable rental housing for households of modest means, and focuses on providing for the housing needs of the state's growing communities.

The community contact described the current economic conditions as moderated but stronger compared to a decade prior. As the price of oil has decreased, there has been some decrease in economic activity. Non-oil related industries have a strong presence in the community along with agriculture. The community contact also indicated that there is demand for banking products in the community and the local financial institutions are doing a great job meeting the needs of the community. There are needs for affordable single family residential real estate. Since the economy has moderated some, there is a significant supply of higher value homes in the area. The pricing on these homes has come down but there is still a need for quality affordable homes for LMI families.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing represents a primary credit need for the Bismarck MSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

<u>ND Combined NonMetro AA</u>

The following table provides a summary of the demographics that include housing and business information for the ND Combined NonMetro AA. Table A shows no low-income CTs and indicates that the volume of population and OOUs in moderate-income geographies is small and over 34 percent of families in the AA are LMI. The area's median housing value in the ND Combined NonMetro AA is 1.7 times the area's median income, but 2.1times moderate-, and 3.3 times low-income, indicating a limited proportion of OOUs are affordable to LMI families. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for some low-income residents.

Table A – Demographic Information of the Assessment Area

Assessment Area: ND Combined Non-Metros (2016)

Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #

Economic Data

According to the June 2018 Moody's Analytics report, North Dakota's economy has stabilized following almost four years of oil fallout. Road restrictions hindered rig mobility in much of the state's oil producing region, limiting the amount of new drilling. The state has added more than 6,000 jobs in the last five months of 2018. Almost half of those jobs have come directly in the energy industry. The energy downturn may have grabbed most of the headlines, but North Dakota's farmers have been hurting as well, to the detriment of the statewide outlook. State farm incomes are at their lowest levels since the late 1980s.

The outlook for the housing market is average thanks largely to improving demographics trends. Residential real estate sales are no longer falling and prices have recovered from the brief downturn earlier.

According to the U.S. BLS, the unemployment rate as of October 2018 in the following counties range from a low of 1.3 percent (Bowman) to a high of 2.4 percent (Billings while the state average is 2.9 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by three community contacts that serve the bank's ND Combined NonMetro AA. One of the community contacts represents a federal program that focuses on preventing rural poverty, and two others represent non-profit agencies in the AA that provides various programs to support LMI households including affordable housing initiatives and job creation.

Two of the non-profits contacted cover the geographic boundaries of Williston and Minot counties in the AA. Both community contacts mentioned that the economic condition of the AA has changed significantly in the past five years. The contact commented that overall the community is flourishing. Growth has happened in just the last few years due to the oil boom. The oil income in the area has left many going from “rags to riches”. Due to the influx of monies and individuals moving into the area, the need has grown for professional workers such as doctors, lawyers, teachers, law enforcement, mental health professionals and truck drivers. The community has many retail restaurants as 30 new restaurants have opened in the last three years.

The contact also mentioned that Williston is home to the largest sunflower producer in the country. Small businesses are also doing well. There have been 45 new small businesses that have opened and flourished in the area since the boom. Financial institutions in the AA seem to work well with borrowers (no names of banks mentioned), taking the time to sit down with clients and provide helpful information. This contact did not provide any specific CD needs other than funding for local farmers.

The second contact stated that the influx of people has resulted in a shortage of housing which increased the cost of living significantly, including the cost to rent or purchase a home. The contact also stated that there was a major flood in Minot back in 2011, which had also brought a significant amount of people to the area as the flooded areas of the city were being rebuilt. There were several construction companies who came to Minot to build hotels, restaurants, apartment buildings, and affordable housing rental units during the last five years. Since 2014, oil prices have been decreasing which has caused some oil field companies to lay off workers and shut down operations. Due to this, the rental market prices have started to decrease but they still remain elevated. The housing market prices remain high and have not decreased much.

The third contact from Hillsboro mentioned that in recent years, farmers have been profitable, making it easier to repay borrowed funds. However, pricing has dropped on farm goods recently. The contact commented that farmers are also finding a hard time getting the funding they need. The community contact from Hillsboro also stated that if banks lowered their rates and extended the maturity of loans, this would make it more manageable for struggling farmers.

Considering the information from the community contact and bank management as well as demographics and economic data, loans to small business and start-ups in the AA including lending to small farms with flexible payment options and lower interest rates, represents a primary need in the ND Combined NonMetro AA. The area also has CD needs including affordable housing, funding help in the form of grants to non-profit organizations serving LMI people and communities, veteran housing support and economic development.

Scope of Evaluation in North Dakota

The rating for the State of North Dakota is primarily based on FS evaluations of the bank’s performance in the Bismarck MSA and ND Combined NonMetro AAs. A limited portion of the bank’s overall lending, investments, and services were conducted in North Dakota; therefore, the performance in North Dakota received less weight in determining the bank’s overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN NORTH DAKOTA

LENDING TEST

The bank's performance under the Lending Test in North Dakota is rated High Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Bismarck MSA and ND Combined NonMetro AAs is good.

Lending Activity

Based on the tables below, lending levels reflect good responsiveness to the credit needs in the AA taking into account the number and dollar amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State Loans	%State Deposits
Bismarck MSA	4,004	1,346	295	8	5,653	43.0	54.3
ND Combined NonMetro	3,980	2,192	1,316	10	7,498	57.0	45.7
Total	7,984	3,538	1,611	18	13,151	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only

Dollar Volume of Loans (000's)*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State* Loans	%State Deposits
Bismarck MSA	$823,753	$163,707	$22,317	$22,654	$1,032,431	45.1	54.3
ND Combined NonMetro	$840,372	$213,370	$178,126	$27,304	$1,259,172	54.9	45.7
Total	$1,664,125	$377,077	$200,443	$49,958	$2,291,603	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only

<u>Bismarck MSA AA</u>

WFBNA ranked first in deposits with 17.8 percent market share in the AA. In overall HMDA lending, WFBNA ranked second with 6.1 percent market share. There is strong competition as reflected by the 129 lenders and 19 depository institutions in the AA. The top lender in this market was Gate City Bank with 16.0 percent market share.

In small loans to businesses, WFBNA ranked fifth with a market share of 7.2 percent. There is strong competition in the market as reflected by the 48 lenders in the AA. The top three lenders were US Bank with a market share of 22.0 percent, American Express with a market share of 14.6 percent, and Capital One with a market share of 12.7 percent.

<u>ND Combined Non-Metro AA</u>

WFBNA ranked second in deposits with 8.1 percent market share in the AA. In overall HMDA lending, WFBNA ranked second with 6.4 percent market share. There is strong competition as reflected by the 183 lenders and 36 depository institutions in the AA. The top lender in this market was Gate City Bank with 12.8 percent market share.

In small loans to businesses, WFBNA ranked fourth with a market share of 7.0 percent. There is strong competition as reflected by the 71 lenders in the AA. The top three lenders were US Bank with a market share of 13.6 percent, American Express with a market share of 11.9 percent, and Capital One with a market share of 9.9 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits an adequate geographic distribution of loans in both the Bismarck MSA and ND Combined NonMetro AAs.

Bismarck MSA AA

Home Mortgage Loans

Refer to Table O in the State of North Dakota section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in low-income geographies is well below the aggregate distribution of loans and is significantly below the proportion of OOUs in those geographies.
- The proportion of loans in moderate-income geographies is below the aggregate distribution of loans and is well below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of North Dakota section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is good.

- For 2012-2016, the combined proportion of the bank's small business loans in low-income geographies exceeds both the aggregate distribution of loans and the proportion of businesses in those geographies.
- The proportion of loans in moderate-income geographies is well below the aggregate distribution of loans and is significantly below the proportion of businesses located in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is higher than the combined performance in 2012-2016.

Small Loans to Farms

Refer to Table S in the State of North Dakota section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to farms.

The bank’s overall geographic distribution of small loans to farms for this evaluation is adequate.

- For 2012-2016, the combined proportion of the bank’s small farm loans in low-income geographies is significantly below the aggregate distribution of loans and is well below the proportion of farms located in those geographies.
- The proportion of loans in moderate-income geographies exceeds the aggregate distribution of loans and was well below the proportion of farms located in those geographies.
- Based on the bank’s performance in 2017-2018, the bank’s small farm lending is slightly below the combined performance in 2012-2016.

<u>ND Combined NonMetro AA</u>

Home Mortgage Loans

Refer to Table O in the State of North Dakota section of appendix D for the facts and data used to evaluate the geographic distribution of the bank’s home mortgage loan originations and purchases. The bank’s overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- The AA contains no low-income tracts so our assessment focused on the bank’s performance in moderate-income tracts.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is below the proportion of OOUs in those geographies.
- Based on the bank’s performance in 2017-2018, the bank’s home mortgage lending is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of North Dakota section of appendix D for the facts and data used to evaluate the geographic distribution of the bank’s originations and purchases of small loans to businesses. The bank’s overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The AA contains no low-income tracts so our assessment focused on the bank’s performance in moderate-income tracts.
- The proportion of loans in both periods, 2012-2016 and 2017-2018, in moderate-income geographies exceeds both the aggregate distribution of loans and the proportion of businesses in those geographies.

Small Loans to Farms

Refer to Table S in the State of North Dakota section of appendix D for the facts and data used to evaluate the geographic distribution of the bank’s originations and purchases of small loans to farms. The bank’s overall geographic distribution of small loans to farms for this evaluation is good.

- The AA contains no low-income tracts so our assessment focused on the bank’s performance in moderate-income tracts.
- The proportion of loans in moderate-income geographies exceeds the aggregate distribution of loans and is well below the proportion of farms located in those geographies.

- Based on the bank's performance in 2017-2018, the bank's small farm lending is below the combined performance in 2012-2016.

Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and businesses and farms of different sizes, given the product lines offered by the institution.

Bismarck MSA AA

Home Mortgage Loans

Refer to Table P in the State of North Dakota section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's home mortgage loan originations and purchases. The bank's overall borrowers distribution of home mortgage loan originations and purchases for this evaluation is good.

- For 2012-2016 combined, the bank's performance with low-income borrowers is below the aggregate lending and is below the proportion of low-income families.
- The bank's overall home mortgage lending to moderate-income borrowers exceeds both the aggregate lending and the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is higher than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of North Dakota section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's originations and purchases of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is well below the percentage of small businesses located in the AA.

Small Loans to Farms

Refer to Table T in the State of North Dakota section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's originations and purchases of small loans to farms. The distribution of the bank's originations and purchases of small loans to farms by revenue is good.

- For 2012-2016 and 2017-2018 periods, the percentage of small loans to farms originated or purchased exceeds the aggregate small farm lending data for farms with revenues of $1 million or less and is well below the percentage of small farms located in the AA.

ND Combined NonMetro AA

Home Mortgage Loans

Refer to Table P in the State of North Dakota section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's home mortgage loan originations and purchases. The bank's overall borrowers distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- For 2012-2016, the bank's performance to low-income borrowers is below the aggregate lending and is significantly below the proportion of families.
- The bank's overall home mortgage lending to moderate-income borrowers substantially meets the aggregate lending and is below the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is higher compared to the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of North Dakota section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's originations and purchases of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is well below the percentage of small businesses located in the AA.

Small Loans to Farms

Refer to Table T in the North Dakota section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's originations and purchases of small loans to farms. The distribution of the bank's originations and purchases of small loans to farms by revenue is good.

- For 2012-2016 and 2017-2018 periods, the percentage of small loans to farms originated or purchased exceeds the aggregate small farm lending data for farms with revenues of $1 million or less and is well below the percentage of small farms located in the AA.

Community Development Lending

The institution is a leader in making CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

Bismarck MSA AA

The level of CD lending in the Bismarck MSA AA is excellent. WFBNA made 8 CD loans in its AA for a total of $22.6 million, which represents 27.3 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. All CD loans were for the primary purpose of affordable housing which is a critical CD need in the bank's Bismarck MSA AA.

Examples of CD loans in the AA include:

- In October 2013, WFBNA provided a $2.5 million loan renewal for a 47-unit affordable housing development. This development is located in Bismarck, ND. Forty-two units are restricted to tenants earning 60 percent or less of the area MFI and five of the units are restricted to tenants earning 30 percent or less of the area MFI. Thirteen units are one-bedroom, 25 are two-bedroom, and 9 are three-bedroom.
- In May 2014, WFBNA refinanced a $2.8 million loan for a 44-unit affordable housing development located in Bismarck, ND. The development is governed by a Land Use Restriction Agreement that requires 4 units to be leased to households at or below the 30 percent of the area MFI and 18 units leased to households at or below the 60 percent of the area MFI.

<u>ND Combined NonMetro AA</u>

The level of CD lending in the ND Combined NonMetro AA is excellent. WFBNA made 10 CD loans in its AA for a total of $27 million, which represents 27.3 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. A significant majority of the CD loans were for the primary purpose of affordable housing which is a critical CD need in the ND Combined NonMetro AA. The bank made one CD loan totaling $1 million for the primary purpose to community services to assist LMI individuals.

Examples of CD loans in the AA include:

- In November 2015, WFBNA provided a $4.4 million loan for a 35-unit low income affordable housing development located in a middle-income area of Minot, ND. The project consists of 8-one bedroom and one bath units, 3-two bedroom and 1 bath units, 17-two bedroom and two bath units, and 7-three bedroom and two bath units. All of the units were allocated to families with income up to 60 percent of the area MFI, and six of the units will be handicap accessible to target the physically disabled.
- In April 2014, WFBNA provided an extension on a $3.4 million construction loan for a 34-unit affordable housing development located in a moderate-income census tract of Minot, ND. This project consists of 12 one-bedroom units, 14 two-bedroom units and eight three-bedroom units, and will include gallery/exhibition space for tenants to display their art. Four units are restricted to tenants earning 30 percent of the area MFI, 16 units are restricted to 50 percent area MFI, and 12 units are restricted to 60 percent area MFI. Additionally, two units are market rate units, one of which is leased at rates affordable to tenants earning less than 40 percent of the area MFI.

Product Innovation and Flexibility

Bismarck MSA AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 9 loans totaling $1.3 million to LMI homebuyers that qualified under this program.

ND Combined NonMetro AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 20 loans totaling $2.6 million to LMI homebuyers that qualified under this program

Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of North Dakota is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Bismarck MSA and ND Combined NonMetro AAs is excellent.

Qualified Investments										
	Prior Period*		Current Period		Total				Unfunded Commitments **	
Assessment Area	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Bismarck MSA	12	$2,520	26	$13,221	38	63.3	$15,741	38.6		
ND Combined NonMetro	3	$1,740	19	$23,264	22	36.7	$25,004	61.4		
Total	15	$4,260	45	$36,485	60	100.0	$40,745	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

Bismarck MSA AA

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 19.0 percent of tier 1 capital allocated to the AA.

The investments and grants reflect excellent responsiveness to the needs identified in the AA including affordable housing and community services for LMI individuals and geographies. Virtually all of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 22 grants totaling $330,000 to a variety of organizations that primarily support affordable housing and community services.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved several complex projects where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In August 2016, WFBNA provided a $5.3 million investment for the construction of a 30-unit LIHTC affordable housing development located in the Downtown Renaissance Zone in Bismarck, North Dakota. The development consists of 18 one bedroom and one bath units, and 12 two bedroom and one bath units. The property will target seniors 55 and older, with eight units both income and rent restricted to households earning at or below 30 percent of the area MFI, and the remaining units income and rent restricted to households at or below 50 percent of the area MFI. Five of the units, four of which will be fully accessible, will target the frail elderly. This investment is responsive to the need for affordable housing. WFBNA also demonstrated multi-faceted support by providing both the construction loan ($4.4 million) and equity investment in support of this affordable housing development.
- In June 2015, WFBNA made a $1 million state tax credit investment in the North Dakota Housing Incentive Fund (HIF), offered by the North Dakota Housing Finance Agency (NDHFA). Funds will be used throughout North Dakota. Capitalized by contributions from state taxpayers, HIF is a means for developing affordable multi-family housing for essential service workers and households of modest means. According to NDHFA's Communications Coordinator, 51.5 percent of housing units created through HIF Fund II will be restricted to households earning 80 percent or less of the area MFI. NDHFA is a self-supporting state agency dedicated to making housing affordable for all North Dakotans. NDHFA offers affordable home financing to LMI families, ensures the continued availability of suitable rental housing for households of modest means, and focuses on providing for the housing needs of the state's growing communities.
- During the exam timeframe, WFBNA provided two grants totaling $130,000 to a local housing organization through the PMP for affordable housing in the Bismarck MSA AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

<u>ND Combined NonMetro AA</u>

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 35.8 percent of tier 1 capital allocated to the AA.

The investments and grants reflect excellent responsiveness to the needs identified in the AA including affordable housing and community services. Virtually all of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 15 grants totaling $56,550 to several organizations that primarily support affordable housing and community services to LMI individuals.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved several LIHTC complex projects where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers.

Examples of CD investments in the AA include:

- In June 2015, WFBNA invested $4.5 million in an LIHTC affordable housing development located in Jamestown, North Dakota, and is comprised of 14 one-bedroom units and 10 two-bedroom units. All of the units are targeted to seniors (age 55+) with annual income between 30 and 60 percent of the area MFI. Four of the units will be fully accessible for physically disabled individuals, with support services provided. This investment is responsive to the need for affordable housing.
- In November 2015, WFBNA invested $6.5 million in a 35-unit LIHTC affordable housing development located in a middle-income area of Minot, North Dakota. The development consists of 8-one bedroom and one bath units, 3-two bedroom and 1 bath units, 17-two bedroom and two bath units, and 7-three bedroom and two bath units. All of the units will be targeted to families with income up to 60 percent of the area MFI, and six of the units will be handicap accessible to target the physically disabled. This investment is responsive to the need for affordable housing.

SERVICE TEST

The bank's performance under the Service Test in North Dakota is rated High Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Bismarck MSA AA is excellent and performance in the ND Combined NonMetro AA is good.

Retail Banking Services

Service delivery systems are accessible to geographies and individuals of different income levels in the institution's AAs, particularly LMI geographies and/or LMI individuals.

Distribution of Branch Delivery System

ND Combined NonMetro	1	3	0	0	-2	0

Bismarck MSA AA

As of December 31, 2018, WFBNA operates four branches and four ATMs in the Bismarck MSA AA. Of these branches, three are full-service locations and one is a limited-service branch. There are no branches in the low-income geographies: however, the population is very low in the low-income geographies compared to total demographics. There are two branches in moderate-income CTs. The branch distribution in moderate-income geographies significantly exceeds the percentage of the population in moderate-income CTs in the AA.

The bank did not open or close any branches during the evaluation period.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 5:00 and 6:00 pm. Two branches are also open on Saturday from 9:00 am to 1:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

ND Combined NonMetro AA

As of December 31, 2018, WFBNA operates eight branches and 14 ATMs in the ND Combined Non-Metro AA. All of these branches are full-service locations. There are no low-income geographies in the AA. The branch distribution in moderate-income geographies significantly exceeds the percentage of the population in moderate-income CTs in the AA.

The institution’s opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank opened one branch and closed three branches all within middle-income geographies since the last evaluation. This branch closures did not negatively impact the distribution of branches relative to the population residing in those geographies

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 5:00 or 6:00 pm. Two branches are also open on Saturday from 9:00 am to 1:00 pm, and one branch is open from 9:00 am to 12:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Community Development Services

The institution provides an adequate level of CD services.

Bismarck MSA AA

The level of CD services in the Bismarck MSA AA is excellent. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 67 CD service activities to five organizations since the last evaluation, logging a total of 285.5 qualified hours within this AA. A majority of the bank's assistance was to affordable housing organizations which is responsive to an identified need in the AA. Other activities targeted organizations that provide community services to LMI individuals and families and economic development. The following are examples of CD services provided in this AA:

- A WFBNA team member provided 158 hours of Board service to a nonprofit organization that coordinates volunteers to preserve affordable homeownership by repairing the homes of low-income elderly and disabled individuals.
- A WFBNA team member provided 21.5 hours of Board service to a community organization that connects local families with temporary shelter and supportive resources that lead to self-sufficiency.

ND Combined NonMetro AA

The level of CD services in the ND Combined NonMetro AA is poor. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for five CD service activities to one organization since the last evaluation, logging a total of 10 qualified hours within this AA. These activities consisted of a WFBNA team member providing financial education to a local community development organization whose mission is to teach eligible young people the skills they need to become employable and independent and placing them in meaningful jobs or further education.

State Rating

State of Ohio

CRA rating for the State of Ohio[41]: Satisfactory
The Lending Test is rated: High Satisfactory
The Investment Test is rated: Needs to Improve
The Service Test is rated: Needs to Improve

The major factors that support this rating include:

- Poor lending activity;
- Good geographic distribution of loans;
- Good borrower distribution of loans;
- Adequate level of CD loans was originated;
- Poor level of CD investments;
- Retail delivery systems are unreasonably inaccessible to significant portions of the AA, particularly LMI geographies and/or LMI individuals; and
- Very poor CD services.

Description of Institution's Operations in Ohio

WFBNA delineated two AAs within Ohio including the Van Wert, OH Non-Metro (Van Wert NonMetro AA) and the Columbus OH, MSA (Columbus MSA AA). The Van Wert NonMetro AA received a FS review. Refer to Appendix A for a complete description of each AA. The Van Wert NonMetro AA accounts for the largest portion of deposits (76 percent) amongst the AAs in Ohio; however, lending is minimal. Ohio represents the 33rd largest rated area by deposits. WFBNA has $2.7 billion of deposits representing 0.2 percent of adjusted deposits. As a result of the divestiture of the bank's deposit operations in the Midwest including Ohio, WFBNA now operates only a private bank and no ATMs within Ohio, representing 0.0 percent of the bank's branches and 0.0 percent of the bank's ATMs. The bank originated and purchased approximately $4.1 billion in loans or 0.2 percent of total reported loan originations and purchases during the evaluation period. The bank's primary loan products in the State of Ohio are home mortgage and small loans to businesses.

<u>Van Wert NonMetro AA</u>

Within the Van Wert NonMetro AA, the bank had $2 billion in deposits and ranked first amongst eight financial institutions in the market with 82.0 percent market share. The Citizens National Bank of Bluffton and Van Wert Federal Saving Bank ranked second and third respectively with a market share of 3.6 percent each. WFBNA closed its branch office in the Van Wert AA during the evaluation period. WF does not operate any ATMs in the AA.

[41] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

Demographic Data

Van Wert NonMetro AA

The following table provides a summary of the demographics that includes housing and business information for the Van Wert NonMetro AA. Table A indicates that there are no low-income CTs and over 33 percent of families in the AA are LMI. The area's median housing value in the Van Wert NonMetro AA is 1.7 times the area's median income, but 3.4 times low-income, indicating a limited proportion of OOUs are affordable to low-income individuals. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for some low-income residents.

Table A – Demographic Information of the Assessment Area

Assessment Area: Van Wert OH Non-Metro (2016)

Due to rounding, totals may not equal 100.0
(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

According to the June's 2018 Moody's Analytics report, Ohio's economy is strong in the first half of 2018. Job growth surpasses that in the broader Midwest and has nearly caught up to that in the U.S. The gap between year ago growth in payroll employment in Ohio and the U.S. is the smallest it has been since late 2013. Much of the pickup can be traced to a turnaround in retail and business/professional services, which were shedding jobs toward the end of 2017 but are now expanding aggressively. Other standouts include construction and the public sector. As with the State of Ohio, the Van Wert AA's economy is driven by manufacturing. According to the Economic Development Office, Van Wert's major employers include the Eaton Corporation, Cooper Foods, and Federal-Mogul Corporation.

The outlook for the housing market is average thanks largely to favorable demographics trends. Residential real estate is also on the mend. House prices in Ohio are appreciating at their fastest pace since the late 1980s. According to the U.S. BLS, the unemployment rate for the AA for the first six months of 2018 remained at decade lows at 3.6 percent. The area unemployment rate compares favorably to the State of Ohio unemployment rate of 5.0 percent during the same period.

Community Contacts

The analysis takes into consideration comments provided by a community contact in conjunction with this evaluation that serves the bank's Van Wert NonMetro AA. The contact indicated an overall healthy local economy fueled by agriculture and automotive industries. Most of the farms are now mechanized and have reduced the need for manual labor. According to the contact, housing stock is older in the AA and makes it challenging to find quality affordable rental units. The contact mentioned; more families are contacting their agency through their emergency shelters. The contact also commented that the drug crisis is creating a larger homeless population in the AA. The contact stated there are significant opportunities for participation from banks in the assessment area and mentioned that Wells Fargo provides financial support and in-kind support through their "Wells Fargo at Work" financial literacy curriculum. The curriculum is taught over eight weeks and includes access to bankers on the phone, webinars, and on-line resources.

Considering the information from the community contact and bank management as well as demographics and economic data, affordable housing lending represent the primary credit needs for the Van Wert NonMetro AA. Opportunity exists to originate these types of loans throughout the AA including moderate-income areas. Additionally, grants to support shelters for the homeless represent another primary need for the AA.

Scope of Evaluation in Ohio

The rating for the State of Ohio is based on a FS evaluation of the bank's performance in the Van Wert NonMetro AA; however, performance in the Columbus MSA AA was considered as this AA accounted for a significant percentage of the bank's total lending and CD activities. A limited portion of the bank's overall lending, investments, and services were conducted in Ohio; therefore, the performance in Ohio received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN OHIO

LENDING TEST

The bank's performance under the Lending Test in Ohio is rated High Satisfactory.

Conclusions for Area receiving a FS Review

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Van Wert AA is good**.**

Lending Activity

Based on the tables below, lending levels reflect poor responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to the bank's capacity and market dominance based on deposits.

Number of Loans*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State Loans	%State Deposits
Van Wert NonMetro	322	186	134	0	642	2.7	76.0
Columbus MSA	21,136	1,820	14	7	22,977	97.3	24.0
Total	21,458	2,006	148	7	23,619	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Dollar Volume of Loans (000's) *							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State Loans	%State Deposits
Van Wert NonMetro	$2,006	$143,790	$15,203	$0	$160,999	3.8	76.0
Columbus MSA	$3,865,868	$135,560	$400	$22,262	$4,024,090	96.2	24.0
Total	$3,867,874	$279,350	$15,603	$22,262	$4,185,089	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

WFBNA ranked first in deposits with 82.0 percent market share in the AA. In overall HMDA lending, WFBNA ranked fourth with 5.4 percent market share. Although WFBNA's HMDA market share is considerably lower than its deposit market share, lending competition was significantly stronger, reflected by the 82 lenders, than competition for deposits, where there were only 8 depository institutions. The top 3 lenders in this market were the Citizens National Bank with 18.3 percent market share, Superior Credit Union with 9.4 percent market share, and First Fed Bank of the Midwest with 6.3 percent market share.

In small loans to businesses, WFBNA ranked sixth with a market share of 6.6 percent. The top three lenders were the Citizens National Bank with 19.2 percent market share, US Bank NA with 12.2 percent market share, and American Express, FSB with 10.8 percent market share.

Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in its AA.

Home Mortgage Loans

Refer to Table O in the State of Ohio section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- For 2012-2016, the AA contains no low-income tracts so our assessment focused on the bank's performance in moderate-income tracts.
- The bank's performance in 2012-2016 for home mortgage loans in moderate-income geographies substantially meets the aggregate distribution of loans and is below the proportion of OOUs in those geographies.

- For 2017-2018, the AA contains no LMI tracts so no performance was concluded.

Small Loans to Businesses

Refer to Table Q in the State of Ohio section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- For 2012-2016, the AA contains no low-income tracts so our assessment focused on the bank's performance in moderate-income tracts.
- The proportion of loans in moderate-income geographies exceeds both the aggregate distribution of loans and the proportion of businesses located in those geographies.
- For 2017-2018, the AA contains no LMI tracts so no performance was concluded.

Distribution of Loans by Income Level of the Borrower

The bank exhibits an excellent distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

Home Mortgage Loans

Refer to Table P in the State of Ohio section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 3.4 times the income of low-income indicating a limited proportion of OOUs affordable to low-income borrowers. Despite the affordability challenges, the bank's performance in 2012-2016 to low-income borrowers exceeds the aggregate lending and is near to the proportion of families.
- The bank's performance with moderate-income borrowers substantially meets the aggregate lending and exceeds the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Ohio section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both periods, 2012-2016 and 2017-2018, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Community Development Lending

The institution has made few if any CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The level of CD lending in the Van Wert NonMetro AA is very poor. WFBNA did not make any CD loans in the AA.

Product Innovation and Flexibility

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 3 loans totaling $183,000 to homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

Conclusions for Area Receiving a LS Review

Based on a LS review, the bank's performance under the Lending Test in the Columbus MSA AA is consistent with the bank's overall good performance under the Lending Test in the FS area. Although CD lending in the Van Wert MSA AA was very poor, the bank made an excellent level of CD loans compared to tier 1 capital in the Columbus MSA AA.

WFBNA made seven CD loans totaling $22.4 million in the Columbus MSA AA which represents 31 percent of tier 1 capital. The loans were responsive to the identified needs in the AA, including affordable housing and community services.

Refer to Tables O through T in the State of Ohio section of appendix D for the facts and data that support these conclusions.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of Ohio is rated Needs to Improve.

Conclusions for Area Receiving a FS Review

Based on a FS review, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Van Wert NonMetro AA is very poor.

Qualified Investments										
	Prior Period*		Current Period		Total				Unfunded Commitments**	
Assessment Area	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Van Wert NonMetro AA	0	$0	0	$0	0	0.0	$0	0.0		
Columbus MSA AA	0	$0	2	$1,554	2	100.0	$1,554	100.0		
Total	0	$0	2	$1,554	2	100.0	$1,554	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

Van Wert NonMetro AA

The institution has a few, if any, qualified CD investments and grants, particularly those that are not routinely provided by private investors. WFBNA reported no CD investments since the last examination.

The investments and grants reflect very poor responsiveness to the needs identified in the AA.

The institution does not use innovative and/or complex investments to support CD initiatives.

Conclusions for Area Receiving a LS Review

Based on a LS review, the bank's performance under the Investment Test in the Columbus MSA AA is stronger than the bank's overall very poor performance in the Investment Test in the FS area. Within this limited scope AA, WFBNA invested $27 million in a LIHTC fund where approximately $1.5 million were allocated to two development projects located in Columbus, Ohio. Both projects are reserved for tenants earning less than 60 percent of the area MFI. Performances differences in the Columbus MSA AA did impact the overall Investment Test rating for the State of Ohio. As such, the bank's overall Investment Test rating for the State of Ohio was upgraded to poor.

SERVICE TEST

The institution's performance under the Service Test in the Ohio is rated Needs to Improve.

Conclusions for Area Receiving a FS Review

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the service test, the institution's performance in the Van Wert NonMetro AA is poor.

Retail Banking Services

Delivery systems are unreasonably inaccessible to significant portions of the AA, particularly LMI geographies and/or LMI individuals. The tables below are shown as of December 31, 2018 to be consistent with other rated areas. On November 30, 2018, the bank sold a branch in a middle-income geography to Flagstar Bank. The branch sale was part of a larger transaction where Flagstar Bank purchased 52 branches in Indiana, Michigan, Ohio, and Wisconsin. With the exception of a private business banking branch, this sale resulted in a divestiture of the bank's deposit operations in Ohio. The branches were re-branded as Flagstar branches upon closing of the transaction. Flagstar intends to keep all branches and retain all employees. Since this branch operated during the majority of the evaluation time period the branch is evaluated and included in the analysis.

Distribution of Branch Delivery System											
Assessment Area	Deposits	Branches						Population			
	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%)				% of Population within Each Geography*			
				Low	Mod	Mid	Upp	Low	Mod	Mid	Upp
Van Wert NonMetro	76.0	0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	84.3	15.7
Columbus MSA	24.0	1	100.0	0.0	0.0	0.0	100.0	14.7	26.2	26.6	31.4

* May not add up to 100 percent due to geographies with unknown tract income level and rounding

Distribution of Branch Openings/Closings						
Assessment Area	# of Branch Openings	# of Branch Closings	Net change in Location of Branches (+ or -)			
			Low	Mod	Mid	Upp
Van Wert NonMetro	0	1	0	0	-1	0
Columbus MSA	0	0	0	0	0	0

<u>Van Wert NonMetro AA</u>

As of November 30, 2018, WFBNA operated a branch in the Van Wert NonMetro AA. The branch is a full-service location and located in a middle-income geography. There are no LMI geographies within the AA; therefore, the rating for branch distribution is considered neutral.

The institution's opening and closing of branches have generally not adversely affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed a branch during the evaluation period. This closure did not negatively impact the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals.

Community Development Services

<u>Van Wert NonMetro AA</u>

The institution provides few if any CD services.

The level of CD services in the Van Wert NonMetro AA is very poor. Bank records show that employees did not participate in any service activities since the last evaluation.

Conclusion for Area Receiving a LS Review

Based on a LS review, the bank's performance under the Service Test in the Columbus MSA AA is consistent with the bank's overall poor performance under the Service Test in the FS area.

State Rating

State of Oregon

CRA rating for the State of (Oregon)[42]: Outstanding
The Lending Test is rated: High Satisfactory
The Investment Test is rated: Outstanding
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Excellent lending activity;
- Good geographic distribution of loans;
- Good borrower distribution of loans;
- Good level of CD loans, which has a positive impact on the Lending Test;
- WFBNA's use of flexible products has a neutral impact on the Lending Test;
- Excellent level of CD investments that are responsive to AA needs;
- Retail delivery systems are readily accessible to all portions of the AA; and
- WFBNA provides a relatively high level of CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in Oregon

WFBNA delineated four AAs within Oregon including the Bend-Prineville, OR CSA (Bend CSA AA); Eugene, OR MSA (Eugene MSA AA); Medford-Grants Pass, OR CSA (Medford CSA AA), and OR Combined non-metropolitans (OR Combined NonMetro AA). The Bend CSA, Eugene MSA, and Medford CSA AAs received FS reviews. These three AAs accounted for the largest portion of the lending (73.5 percent) and deposits (67.7 percent) amongst the AAs in Oregon. Oregon represents the 32th largest rated area by deposits. WFBNA has $2.7 billion of deposits representing 0.2 percent of adjusted deposit. WFBNA operates 36 branches and 68 ATMs within Oregon, representing 0.6 percent of the bank's branches and 0.5 percent of the bank's ATMs. The bank originated and purchased approximately $9.4 billion in loans or 0.5 percent of total reported loan originations and purchases during the evaluation period. The bank's primary loan products in the Oregon are home mortgage and small loans to businesses.

Bend CSA AA

Within the Bend CSA AA, the bank had $631 million in deposits and ranked third amongst 9 financial institutions in the market with 17.0 percent market share. First Interstate Bank and US Bank ranked first and second with a market share of 25.4 percent and 19.9 percent, respectively. WFBNA operates 7 branch offices and 11 ATMs in the AA.

Eugene MSA AA

Within the Eugene MSA AA, the bank had $577 million in deposits and ranked fourth amongst 13

[42] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

financial institutions in the market with 10.9 percent market share. The top three financial institutions in terms of deposit market shares are US Bank, Umpqua Bank, and Columbia State Bank with 16.8 percent, 16.6 percent, and 14.3 percent, respectively. WFBNA operates 7 branch offices and 19 ATMs in the AA.

Medford CSA AA

Within the Medford CSA AA, the bank had $617.8 million in deposits and ranked fourth amongst 11 financial institutions in the market with 12.8 percent market share. The top three financial institutions in terms of deposit market shares are Umpqua Bank, JPMorgan Chase Bank, and US Bank with 18.6 percent, 14.9 percent, and 14.8 percent, respectively. WFBNA operates 8 branch offices and 14 ATMs in the AA.

Demographic Data

Bend CSA AA

The following table provides a summary of the demographics that includes housing and business information for the Bend CSA AA. Table A shows no low-income CTs and indicates that 36 percent of families in the AA are LMI. The area's median housing value in the Bend CSA AA is 5.1 times the area's median income, but 6.4 times moderate-, and 10.3 times low-income, indicating a limited proportion of OOUs are affordable to LMI families. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Economic Data

According to the June 2018 Moody's Analytics report, Bend's economy is strong and has outperformed Oregon and the U.S., as rapid labor force growth allows for stronger job gains. Bend has solidified its reputation as a hub for tech startups and will continue in the coming years. Although high tech accounts for a below-average share of jobs, industry payrolls have grown by about twice the rise statewide and nationwide. New tech companies find the Bend area more attractive than non-tech companies because of high living standards for high earners, a plethora of talent, financing that is readily available, and synergies that come with a tech-oriented workforce. High-tech and population-dependent industries will drive robust growth. A highly educated workforce, strong population trends, low costs, and a scenic location that attracts tourists will help keep the Bend's economy an above-average long-term performer.

The outlook for the housing market looks favorable as rapid household formation will bolster housing demand, encouraging more home building and hiring in construction. Bend has experienced an influx of residents over past years thanks to the statewide tech boom. Although job seekers have primarily flooded areas around Portland, Bend is an attractive and cheaper alternative. Housing supply has been slow to accommodate surging demand. Single-family housing permits remain well below their prerecession peak. As demand outstrips supply, house price growth will accelerate through the end of the year. According to the Federal Housing Finance Agency, house prices are climbing at their fastest rate since 2006. The almost 10 percent year-over-year rise places Bend in the top 50 metro areas for price appreciation.

The largest employers in the Bend CSA include St. Charles Medical Center, Sunriver Resort, and Central Oregon Community College. According to the U.S. BLS, the unemployment rate for the 2nd quarter of 2018 was 4.1 percent and has decreased significantly from 11.2 percent at the beginning of the evaluation period. The unemployment rate in the AA was similar to the overall state at 4.2 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by a community contact that serves the bank's Bend CSA AA. The contact represents a community action agency that provides services in 12 program areas including housing, weatherization, emergency services, food, head start, asset building, and lending. In 2016, the organization helped 59,000 individuals which is about 1 in 4 people in their service area. Their services are designed to assist people to become more independent and self-sufficient, while recognizing there is a continuum of support that all people need throughout their life. Their operating budget is about $20 million. Funding sources are split 3 ways between Federal, state, and private sources. They are currently also working on their CDFI certification so that they can expand their lending program (which currently provides down payment assistance, home preservation and microbusiness loans on a limited basis). The organization serves Crook, Deschutes, Jefferson Counties and the Warm Springs Reservation. They also serve some remote parts of adjacent counties (such as Lake County and La Pine).

The contact stated that the unemployment rate is very low, particularly in Deschutes County; however, this statistic masks issues such as the high number of folks who have dropped out of the labor force and stopped seeking employment. There is a rising senior population particularly in Crook County and cost of housing is rapidly rising. Bend is the 6th fastest growing housing cost market in the country. Median home price is $398 thousand compared to the median income of approximately $52 thousand. Rents are rapidly increasing as well. Bend and Prineville have the fastest rent appreciation respectively in the region. Overall, over 45 percent of renters are cost burdened as they pay over 30 percent of their incomes for housing. There is some good news in that tech and venture capital have entered the market and are creating some jobs in the manufacturing and tech industry. However, there is a mismatch between the current workforce skill level and these higher paid job opportunities. In terms of demographics, the two primary minority populations are Hispanic and Native American. These groups are disproportionately LMI and are concentrated in Jefferson Counties.

According to the contact, there are many opportunities for banks to participate in community development activities including volunteerism, loans, and investments. A real need for many area nonprofit organizations is for grant dollars. There are also opportunities to invest and/or lend to affordable housing projects which are critically needed. Consumers need affordable deposit accounts to avoid alternatives to payday loans. The contact also mentioned that banks could do more to reach the minority community by offering credit building classes, second chance checking type products to help folks get back into the banking mainstream.

Considering the information from the community contact and bank management as well as demographic and economic data, affordable housing represents a primary credit need for the Bend CSA AA. The AA also has needs for small business loans. Opportunity exists to originate these types of loans throughout the AA including moderate-income areas.

Demographic Data

Eugene MSA AA

The following table provides a summary of the demographics that includes housing and business information for the Eugene MSA AA. Table A indicates that the volume of population, tracts, and OOUs is very small in low-income CTs and over 39 percent of families in the AA are LMI. The area's median housing value in the Eugene MSA AA is 4.2 times the area's median income, but 5.3 times moderate-, and 8.4 times low-income, indicating a limited proportion of OOUs are affordable to LMI. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

Economic Data

According to the July 2018 Moody's Analytics report, the Eugene economy is strong as job growth has been accelerating and exceeding the state average pace in the process. Eugene will outperform the U.S. over the next two years but will lag Oregon and the West. The University of Oregon will provide stability and cultivate skilled workers that will propel growth in tech and other knowledge-based industries. Meanwhile, automation will limit hiring at factories as production rises. Longer term, Eugene will remain an above-average performer because of strong demographics.

The outlook for the housing market looks favorable as rapid household formation will bolster housing demand, encouraging more home-building and hiring in construction. Eugene has experienced an influx of residents over the past year thanks to the statewide tech boom. Although job seekers have primarily flooded areas around Portland, Eugene is an attractive, cheaper alternative. Housing supply has been slow to accommodate surging demand. Single-family housing permits remain well below their prerecession peak. As demand outstrips supply, house price growth will remain elevated. According to the Federal Housing Finance Agency, house prices are climbing at their fastest rate since 2006. The almost 10 percent year-over-year rise places Eugene among the 30 metro areas with the fastest-growing house prices in the country.

The largest employers in the Eugene MSA include PeaceHealth Corp, University of Oregon, and Espresso Prn. According to the U.S. BLS, the unemployment rate for the 2nd quarter of 2018 was 4.4 percent and has decreased significantly from 8.9 percent at the beginning of the evaluation period. The unemployment rate in the AA was similar to the overall state at 4.2 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by two community contacts that serve the bank's Eugene MSA AA. The contacts included representatives from an economic development corporation and the local Chamber of Commerce.

The economic development serves Lane County. The purpose of this local agency is to fulfill the vision of the County's Rural Prosperity Initiative, which was created to partner with rural communities to support their unique needs and efforts to build vibrant economies throughout rural Lane County. This agency provides a range of services to assist rural communities with an economic development strategy including connectivity, collaboration, technical assistance, marketing, and funding through their partners' organizations.

According to the contact, many rural communities and small towns are facing challenges, including affordable housing, rapid growth, declining rural, loss of farms, and working lands. Additionally, agricultural lending is cyclical and entitled to some degree of risk. However, the community is in need of lending to start-up wineries, breweries, and lending for expansion such as equipment purchase. The contact identified financial literacy programs as community credit need. Most people are not aware of the possibilities or opportunities available for them because in the countryside people lack technological tools such as the internet. In many cases, people do not have the information needed to make an informed decision.

The local Chamber of Commerce serves the cities of Eugene and Springfield, Oregon, located in Lane County. The mission of the Chamber of Commerce is to serve as a catalytic leader in creating a vibrant and diverse economy that drives economic opportunity and well-being. The Chamber provides visible and active leadership on economic issues. The Chamber is uniquely qualified to convene others and be a facilitative leader to address areas of economic importance. The Chamber champions the contributions of a vital economy to quality of life and actively educates the business and broader community on issues and opportunities important to their success. The Chamber consciously identifies where alignment exists and works to leverage that alignment. The Chamber believes benefits accrue to Eugene and to the greater area when any one part of the region succeeds economically. The Chamber champions, supports, and leads efforts to increase the economic health of the "greater Eugene/Springfield" region.

According to the contact, unemployment rates for Eugene have improved slightly from 2014 to 2015 but rose in July 2016 due to the seasonality effect from the University, which is the top employer for the area. Unemployment rates in the Eugene MSA AA are consistently less favorable compared to the rates for the State of Oregon and the rest of the nation.

The contact stated that the Eugene MSA has similar needs as other communities in various markets for small businesses. In particular, capital is always needed for financing small business start-ups and for working capital. The contact mentioned that gaps generally exist between the community credit needs of small businesses and funding provided by financial institutions are narrowed with the help of a variety of public sector tools and loan products. The organization is also responsible for enhancing community-wide awareness of the economic, educational, and business benefits of arts and culture.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business loans represent primary credit needs for the Eugene MSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of tracts, population, OOUs, and small businesses coupled with limited home affordability for LMI individuals.

Demographic Data

<u>Medford CSA AA</u>

The following table provides a summary of the demographics that includes housing and business information for the Medford CSA AA. Table A indicates that the volume of population, tracts, and OOUs is very small in low-income CTs and over 38 percent of families in the AA are LMI. The area's median housing value in the Medford CSA AA is 5.2 times the area's highest median income, but 6.5 times moderate-, and 10.3 times low-income, indicating a limited proportion of OOUs are affordable to LMI. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Due to rounding, totals may not equal 100.0
(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

<u>Medford, OR MSA</u>

According to the July 2018 Moody's Analytics report, Medford's economy is strong and will settle into a slower pattern of growth in 2019, and payrolls will expand at a pace more in tune with that of Oregon. The job market is turning it up a notch as Medford comfortably leads the Oregon, West region, and U.S. averages in job growth over the past year, and the pace in the first half of 2018 is even more impressive.

The outlook for the housing market looks favorable as housing will lend greater support late in the cycle despite shortages of labor and rising building materials costs. Improving net migration and faster population growth, along with a booming job market, have new households forming more quickly, and home sales are higher than a year earlier despite slippage nationwide. Resilient demand and low supply will spur faster house price appreciation and keep construction crews busy.

The largest employers in Medford include Asante Health System, Lithia Motors, and Harry and David Operations Corp. According to the U.S BLS, the unemployment rate for the 2nd quarter of 2018 was 4.6 percent and has decreased significantly from 11.1 percent at the beginning of the evaluation period. The unemployment rate in the AA was slightly higher than the overall state at 4.2 percent for the same period.

<u>Grants Pass, OR MSA</u>

According to the March 2019 Moody's Analytics report, Grants Pass has lost ground but continues to stretch its recovery. After motoring ahead in the second and third quarters of 2018, the economy has eased off the gas. Job growth still beats the U.S. average thanks to double-digit growth in manufacturing and the small information sector, which is expanding thanks to the statewide tech boom.

The housing market also has slowed considerably compared with the fast and furious price increases of the past two years. The slower growth can be partly attributed to the earlier concerted effort to increase multifamily housing units. Single-family housing permits have trended lower, and multifamily permits have seen only a few spikes over the past year.

The largest employers in Grants Pass include Three Rivers Community Hospital, Rogue Community College, and Master Brand Cabinet Company. According to the U.S BLS, the unemployment rate for the 4th quarter of 2018 was 5.6 percent and has decreased significantly from 11.1 percent at the beginning of the evaluation period. The unemployment rate in the AA was higher than the overall state at 4.3 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by two community contacts that serve the bank's Medford CSA AA. The contacts included representatives from a housing authority and a regional economic development corporation.

The housing authority serves Jackson County and is an independent agency established by the Jackson County Commissioners in 1969 to administer affordable housing programs. They are not part of the county government or federal government. The housing authority has grown to provide over 2,000 Housing Choice Vouchers and over 1,300 units of affordable rental housing throughout Southern Oregon and continues to grow to meet the ever-increasing demands for affordable housing.

The contact mentioned that the housing market in Jackson County was in good condition with single family housing in tight supply. The contact stated that employment had experienced a recent bump but overall the economy is strong. The contact also noted specific credit needs related to financing for small businesses, affordable single-family housing, and multi-family housing. The contact indicated that consumers and small businesses in the area have to go to larger cities for some specialty products but that access to larger markets was easily reachable to the community.

The economic development corporation's primary purpose is to help businesses prosper to advance economic opportunities compatible with community values. The organization has three objectives: business retention/expansion, primary recruiter of new businesses, and entrepreneurial business development. The contact indicated that the area used to be the plywood and pear capital of America but due to the changing economic environment, the area now focuses on specialized products such as wood products and novelty pears. The area also has a diverse hi-tech sector which has experienced recent growth. The contact further stated that there is less active lending to small businesses especially for start-ups and was not certain whether the lack of lending was due to insufficient demand or supply.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business loans represent primary credit needs for the Medford CSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of population, tracts, OOUs, and small businesses coupled with limited home affordability for LMI individuals.

Scope of Evaluation in Oregon

The rating for the State of Oregon is primarily based on FS evaluations of the bank's performance in the Bend CSA, Eugene MSA, and Medford CSA AAs; however, performance in each AA was considered. Conclusions where a LS review affected the CRA Rating for the state are addressed within their respective tests. LS procedures were performed for the OR Combined NonMetro AA. A limited portion of the bank's overall lending, investments, and services were conducted in Oregon; therefore, the performance in Oregon received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN OREGON

LENDING TEST

The bank's performance under the Lending Test in Oregon is rated High Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Bend MSA and Eugene MSA AAs is excellent and performance in the Medford CSA AA is good.

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State Loans	%State Deposits
Bend MSA	10,535	3,631	229	8	14,403	25.7	23.4
Eugene MSA	8,536	3,010	162	8	11,716	20.9	21.4
Medford CSA	8,225	3,752	153	0	12,130	21.7	22.9
OR Combined NonMetro	12,357	4,777	630	0	17,764	31.7	32.3
Total	39,653	15,170	1,174	16	56,013	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Dollar Volume of Loans (000's)*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State* Loans	%State Deposits
Bend MSA	$2,695,091	$190,877	$8,087	$21,875	$2,915,930	30.7	23.4
Eugene MSA	$1,853,440	$188,523	$13,145	$39,591	$2,094,699	22.1	21.4
Medford CSA	$1,755,850	$198,135	$6,592	0	$1,960,577	20.6	22.9
OR Combined NonMetro	$2,233,718	$240,199	$48,192	0	$2,522,029	26.6	32.3

Total	$8,538,099	$817,654	$76,016	$61,466	$9,493,235	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Bend CSA AA

WFBNA ranked third in deposits with 17.0 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 11.2 percent market share. There is strong competition as reflected by the 333 lenders and 9 depository institutions in the AA. The 2nd and 3rd lenders in this market were Caliber Home Loans and Quicken Family with 4.5 percent and 4.3 percent market share, respectively.

In small loans to businesses, WFBNA ranked fifth with a market share of 9.4 percent. There is strong competition as reflected by the 77 lenders in the AA. The top three lenders were US Bank with a market share of 15.5 percent, Bank of America with a market share of 12.5 percent, and JPMorgan Chase Bank with a market share of 10.8 percent.

Eugene MSA AA

WFBNA ranked fourth in deposits with a 10.9 percent market share in the AA. In overall HMDA lending, WFBNA ranked second with 6.2 percent market share. There is strong competition as reflected by the 303 lenders and 13 depository institutions in the AA. The top lender in this market was Finance of America Family with an 8.1 percent market share.

In small loans to businesses, WFBNA ranked seventh with a market share of 7.0 percent. The top lender was US Bank with a market share of 17 percent. There is strong competition as reflected by the 64 lenders in the AA. The top three lenders were US Bank with a market share of 16.7 percent, American Express with a market share of 11.4 percent, and Citibank with a market share of 10.8 percent.

Medford CSA AA

WFBNA ranked fourth in deposits with a 12.8 percent market share in the AA. In overall HMDA lending, WFBNA ranked third with a 7.3 percent market share. There is strong competition as reflected by the 297 lenders and 11 depository institutions in the AA. The top two lenders were Loan Depot with a market share of 9.6 percent and Guild Mortgage with a market share of 7.6 percent.

In small loans to businesses, WFBNA ranked sixth with a market share of 9.7 percent. The top lender was US Bank with a market share of 15 percent. There is strong competition as reflected by the 62 lenders in the AA. The top three lenders were US Bank with a market share of 14.7 percent, JPMorgan Chase Bank with a market share of 11.5 percent, and American Express with a market share of 11.4 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in all three FS AAs.

Bend CSA AA

Home Mortgage Loans

Refer to Table O in the State of Oregon section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- The AA contains no low-income tracts so our assessment focused on the bank's performance in moderate-income tracts.
- For 2012-2016, the bank's performance for home mortgage loans in moderate-income geographies substantially meets the aggregate distribution of loans and is below the proportion of OOUs in those geographies.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly less than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of Oregon section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The AA contains no low-income tracts so our assessment focused on the bank's performance in moderate-income tracts.
- The proportion of loans in moderate-income geographies exceeds the aggregate distribution of loans and is near to the proportion of businesses in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is less than the combined performance in 2012-2016.

<u>Eugene MSA AA</u>

Home Mortgage Loans

Refer to Table O in the State of Oregon section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- For 2012-2016, the bank's performance for home mortgage loans in LMI geographies substantially meets the aggregate distribution of loans and is near to the proportion of OOUs in those geographies.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is higher than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of Oregon section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for small business loans in LMI geographies exceeds both the aggregate performance and the proportion of businesses located in those geographies.

Medford CSA AA

Home Mortgage Loans

Refer to Table O in the State of Oregon section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- For 2012-2016, the bank's performance for home mortgage loans in low-income geographies exceeds both the aggregate distribution of loans and the proportion of OOUs in those geographies.
- The proportion of loans in moderate-income geographies is below both the aggregate distribution of loans and the proportion of OOUs in those geographies
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is higher than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of Oregon section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is good.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for small business loans in LMI geographies exceeds the aggregate performance located in those geographies.
- The proportion of loans in LMI geographies is below the proportion of businesses located in those geographies.

Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

Bend CSA AA

Home Mortgage Loans

Refer to Table P in the State of Oregon section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. Based on the data in Table P, the bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 10.3 times the income of low-income and 6.4 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI. Despite the affordability challenges, the bank's performance in both periods, 2012-2016 and 2017-2018, to LMI borrowers exceeds the aggregate lending.

- The bank's performance to low-income borrowers is significant below the proportion of families and to moderate-income borrowers is below the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Oregon section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both periods, 2012-2016 and 2017-2018, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Eugene MSA AA

Home Mortgage Loans

Refer to Table P in the State of Oregon section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 8.4 times the income of low-income and 5.3 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI. Despite the affordability challenges, the bank's performance in both periods, 2012-2016 and 2017-2018, to LMI borrowers exceeds the aggregate lending.
- The bank's performance to low-income borrowers is significant below the proportion of families and to moderate-income borrowers is below the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is higher than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Oregon section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both periods, 2012-2016 and 2017-2018, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Medford CSA AA

Home Mortgage Loans

Refer to Table P in the State of Oregon section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 10.3 times the income of low-income and 6.5 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI. Despite the affordability challenges, the bank's performance in both periods, 2012-2016 and 2017-2018, to LMI borrowers exceeds the aggregate lending.
- The bank's performance to low-income borrowers is significant below the proportion of families and to moderate-income borrowers is below the proportion of families.

Small Loans to Businesses

Refer to Table R in the State of Oregon section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For 2012-2016 combined, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Community Development Lending

The institution has made a significant level of CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

Bend CSA AA

The level of CD lending in the Bend CSA AA is excellent. WFBNA made 8 CD loans in its AA for a total of $21.8 million, which represents over 30 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified needs in the AA particularly affordable housing. The bank made 7 CD loans totaling $21.5 million (98 percent) for the purpose of affordable housing. Additionally, the bank extended one CD loan for the primary purpose of providing community services to LMI individuals.

Examples of CD loans in the AA include:

- In October 2017, WFBNA provided a $6 million construction loan for an affordable housing redevelopment of a recently closed elementary school into 29 units of affordable housing, located in Prineville, Oregon. As part of the renovation, classrooms will be converted to residential space, the cafeteria building will be converted into a Head Start Program facility and the gymnasium will be used as a community recreation center. These community spaces will be operated by Neighbor Impact and Crook County Parks and Recreation, respectively. The unit mix will consist of 2 studios, 8 one-bedroom units, 16 two-bedroom units, 2 three-bedroom units and a manager's unit. All units will be rent restricted to tenants earning 50 percent and below the area MFI. Four units will be set aside to serve persons with disabilities referred by the Department of Human Services (DHS) and three units will be set aside to serve victims of domestic violence referred by Saving Grace. Those 7 units will be covered by a 15-year Section 8 HAP contract. Services for this population will be provided by DHS and Saving Grace at no cost to the Partnership.

- In July 2016, WFBNA provided an $8.2 million section 8 construction loan for an 8-unit affordable housing development with 100 percent of the units restricted to seniors age 55+ covered with a Section 8 contract. The Subject development will include a medical office space to be located on the ground floor of Cook Crossing and sold upon completion to Mosaic Medical, a nonprofit health care provider located in Bend, Oregon.

Eugene MSA AA

The level of CD lending in the Eugene MSA AA is excellent. WFBNA made 8 CD loans in its AA for a total of $39.5 million, which represents over 61 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified needs in the AA particularly affordable housing. The bank made 6 CD loans totaling $24 million (60.8 percent) for the purpose of affordable housing. Additionally, the bank extended two CD loan for the primary purpose of providing community services to LMI individuals.

Examples of CD loans in the AA include:

- In August 2016, WFBNA provided a $20.0 million line of credit to a Tax Credit Investment Fund. Of that total, $378,000 has been allocated to an affordable housing development located in Prineville, OR. The loan proceeds were used to bridge the gap between the receipt of capital contributions from investors and the payment of equity investments to operating partnerships that own LIHTC projects.
- In August 2017, WFBNA provided a $4.6 million construction loan for an affordable housing development located in Springfield, Oregon. The project requires that 97 percent of the units be restricted to individuals and families earning at or below 50 percent of the area MFI. Of the 34 revenue producing units, eight units will be reserved for persons with developmental disabilities and will be receiving HUD Section 811 Project Rental Assistance.

Medford CSA AA

The institution has made no community development loans in the AA during the evaluation period. The level of CD lending in the Medford CSA AA is poor. There are opportunities available within the AA for the bank to provide CD loans.

Product Innovation and Flexibility

Bend CSA AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 4 loans totaling $714,000 to LMI homebuyers that qualified under this program.

Eugene MSA AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *you*rFirstMortgage loan program the bank has funded 3 loans totaling $448,000 to LMI homebuyers that qualified under this program.

Medford CSA AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *you*rFirstMortgage loan program the bank has funded 6 loans totaling $798,000 to LMI homebuyers that qualified under this program.

Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding the program above.

Conclusions for Area Receiving a LS Review

Based on a LS review, the bank's performance under the Lending Test in the OR Combined NonMetro AA is consistent with the bank's overall good performance under the Lending Test in the FS areas.

Refer to Tables O through T in the State of Oregon section of appendix D for the facts and data that support these conclusions.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of Oregon is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Bend MSA and Eugene MSA is excellent. Performance in the Medford CSA AA is adequate.

Qualified Investments										
	Prior Period*		Current Period		Total				Unfunded Commitments **	
Assessment Area	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Bend MSA	2	$161	51	$30,841	53	23.1	$31,002	23.5		
Eugene MSA	8	$4,676	68	$38,242	76	33.2	$42,918	32.5		
Medford CSA	2	$2,018	43	$928	45	19.7	$2,946	2.2		
OR Combined NonMetro	6	$20,246	49	$34,941	55	24.0	$55,187	41.8		
Total	18	$27,101	211	$104,952	229	100.0	$132,053	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

Bend MSA AA

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 43.7 percent of tier 1 capital allocated to the AA.

The investments and grants reflect excellent responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 85.7 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 42 grants totaling $263,500 to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved numerous complex LIHTC and NMTC projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased two government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In October 2017, WFBNA provided a $7.8 million LIHTC investment for the redevelopment of a recently closed elementary school into 29 units of affordable housing located in Prineville, Oregon. WFBNA also demonstrated multi-faceted support by providing both the construction loan ($6 million) and equity investment in support of this affordable housing development. This activity is responsive to the identified need for affordable housing and is complex involving multiple parties including government agencies, housing agencies, and developers.
- In December 2017, WFBNA invested $22.2 million in an LIHTC fund. Of this total investment, $3.9 million was allocated to a development located in Bend, Oregon, with 20 units restricted to tenants earning no more than 60 percent of the area MFI. This activity is responsive to the identified need for affordable housing

Eugene MSA AA

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 66.2 percent of tier 1 capital allocated to the AA.

The investments and grants reflect excellent responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 51.1 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 62 grants totaling $648,518 to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved several complex LIHTC and NMTC projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers.

Examples of CD investments in the AA include:

- In August 2015, WFBNA provided a $9.3 million LIHTC investment for a newly constructed 48-unit family community located in Eugene, Oregon. All of the project's 48 units are targeted for LIHTC tenants with incomes at 50 percent of the area MFIs. Due to the project receiving Oregon Housing Tax Credits, maximum MFI levels are further discounted to 46 percent of area MFI. The unit mix will consist of 16 one-bedroom units, 20 two-bedroom units, and 11 three-bedroom units. Five units will be set aside, on a best efforts basis, for homeless veterans. This activity is responsive to the identified need for affordable housing and addressing homelessness. The investment is also complex involving numerous parties.
- In December 2013, WFBNA made a $4 million NMTC investment to a nonprofit organization to finance the remodel of an existing building that the borrower recently purchased to consolidate operations. Located in Eugene, Oregon, the project is expected to generate approximately 93 construction jobs and seven permanent jobs. The project will be located in a highly distressed census tract with a 33.8 percent poverty rate. The organization serves families who are homeless or at risk of homelessness and adults who have a mental illness or a brain injury. This activity is responsive to the identified need for affordable housing and addressing homelessness.
- In May 2016, WFBNA provided a $250,000 grant to a local business organization through the Small Business DCC Program benefiting small businesses in Oregon including the Eugene MSA AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

Medford CSA AA

The institution has an adequate level of qualified CD investments and grants, although rarely in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 4.2 percent of tier 1 capital allocated to the AA.

The investments and grants reflect adequate responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 85.6 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 42 grants totaling $624,500 to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution occasionally uses innovative and/or complex investments to support CD initiatives. CD Investments involved one complex project where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers.

Examples of CD investments in the AA include:

- In May 2015, WFBNA provided an $8 million NMTC investment to an organization to fund the expansion of 10 separate Walgreens Pharmacies in underserved areas in the state of Oregon. Of the investment, $303,168 is allocated for the project located in this AA. This store is located in distressed area of Central Point, Oregon that has a 14.6 percent poverty rate and a 9.5 percent unemployment rate. The 10 Walgreens stores that are part of the proposed NMTC transaction served over 4,000 Medicare and Medicaid patients in the past year; approximately a third of these patients were in a medically underserved area. Walgreens also provides consultation for Medicare and Medicaid patients on the most affordable options to purchase their prescription drugs. The 10 stores provide approximately 400 consultations annually. The portfolio creates 19.5 new FTE positions (all located in qualified census tracts) and retains 172 existing positions.
- During the exam timeframe, WFBNA provided three grants totaling $275,000 to two housing organizations through the PMP for affordable housing in the Medford CSA AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

Conclusions for Area Receiving a LS Review

Based on a LS review, the bank's performance under the Investment Test in the OR Combined NonMetro AA is consistent with the bank's overall excellent performance in the Investment Test in the FS areas.

SERVICE TEST

The bank's performance under the Service Test in Oregon is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Bend MSA and Medford CSA AAs is excellent and performance in the Eugene MSA AA is good.

Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the institution's AAs, particularly LMI geographies and/or LMI individuals.

Distribution of Branch Delivery System

Bend CSA AA

As of December 31, 2018, WFBNA operates seven branches and 11 ATMs in the Bend CSA AA. Of these branches, six are full-service locations and one is a limited-service branch. There are no low-income geographies within the AA. There are five branches in moderate-income geographies. The branch distribution in moderate-income geographies significantly exceeds the percentage of the population in moderate-income CTs in the AA. When considering an additional branch within close proximity to LMI geographies, the bank's branch distribution further exceeds demographics.

The bank did not open or close branches during the evaluation period.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 6:00 pm. Of the total branches, five are open on Saturday from 9:00 am to 2:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Eugene MSA AA

As of December 31, 2018, WFBNA operates 7 branches and 19 ATMs in the Eugene MSA AA. All seven are full-service locations. There are no branches in the low-income geographies; however, the population is very low in the low-income geographies compared to total demographics. There are four branches in moderate-income geographies. The branch distribution in moderate-income geographies significantly exceeds the percentage of the population in moderate-income CTs in the AA. When considering an additional branch within close proximity to LMI geographies, the bank's distribution further exceeds demographics.

The institution's opening and closing of branches have not adversely affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed two branches since the last evaluation in moderate-income CTs. This closure did not negatively impact the distribution of branches relative to the population residing in those geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AAs, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 6:00 pm. All branches are open on Saturday from 10:00 am to 2:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Medford CSA AA

As of December 31, 2018, WFBNA operates eight branches and 14 ATMs in the Medford CSA AA. All eight are full-service locations. There is one branch in low-income geographies and two branches in moderate-income geographies. The branch distribution in LMI geographies significantly exceeds the percentage of the population in LMI CTs in the AA. When considering an additional two branches within close proximity to LMI geographies, the bank's distribution further exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed one branch since the last evaluation, in a middle-income CT. This closure did not negatively impact the distribution of branches relative to the population residing in those geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AAs, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 6:00 pm. All branches are open on Saturday from 10:00 am to 2:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Community Development Services

The institution provides a significant level of CD services.

Bend CSA AA

The level of CD services in the Bend CSA AA is good. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 42 CD service activities to six organizations since the last evaluation, logging a total of 168 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing which is responsive to identified need in the AA. The following are examples of CD services provided in this AA:

- WFBNA team members provided 29 hours of Board service and ongoing outreach to a nonprofit housing organization that works in partnership with people in need to build decent and affordable housing.
- A WFBNA team member provided 50 hours of Board service to a local medical organization that provides care for working adults in Deschutes County who do not make enough money to afford medical insurance or services. Their mission is to improve the health and wellness of the medically uninsured through the engagement of professionals, community partners and dedicated volunteers.

Eugene MSA AA

The level of CD services in the Eugene MSA AA is good. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 202 CD service activities to nine organizations since the last evaluation, logging a total of 316 qualified hours within this AA. A majority of the bank’s assistance was to organizations that provide community services to LMI individuals and families. The following are examples of CD services provided in this AA:

- A WFBNA team member provided 219 hours of Board service and ongoing outreach to a local community organization that provides necessities and comfort items to children who are in crisis due to neglect, abuse, poverty or homelessness.
- WFBNA team members provided 51 hours of financial education to a community organization that assists men and women from Lane County released from Oregon state correctional facilities and the Lane County Jail in making a successful reentry into the community.

Medford CSA AA

The level of CD services in the Medford CSA AA is good. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 113 CD service activities to 15 organizations since the last evaluation, logging a total of 342 qualified hours within this AA. A majority of the bank’s assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing and economic development. The bank’s assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- A WFBNA team member provided 53 hours of Board service and ongoing outreach to a nonprofit housing organization that works in partnership with people in need to build decent and affordable housing.
- WFBNA team members provided 72 hours of Board service and ongoing outreach to a community organization that works to provide food, housing, warmth, and other essential services to Jackson County's low-income children, families, seniors, and people with disabilities.

Conclusion for Area Receiving a LS Review

Based on a LS review, the bank’s performance under the Service Test in the OR Combined NonMetro AA is consistent with the bank’s overall excellent performance under the Service Test in the FS areas.

State Rating

State of Pennsylvania

CRA rating for the State of (Pennsylvania)[43]: Outstanding
The Lending Test is rated: Outstanding
The Investment Test is rated: High Satisfactory
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Excellent lending activity;
- Good geographic distribution of loans;
- Excellent borrower distribution of loans;
- Adequate level of CD loans was originated;
- WFBNA's use of flexible products has a neutral impact on the Lending Test;
- Good level of CD investments that are responsive to AA needs;
- Retail delivery systems are readily accessible to all portions of the AA; and
- WFBNA provides a relatively high level of CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in Pennsylvania

WFBNA delineated five AAs within Pennsylvania including the Harrisburg-York-Lebanon, PA CSA (Harrisburg CSA AA); Scranton-Wilkes-Barre-Hazleton, PA MSA (Scranton MSA AA); Lancaster, PA MSA (Lancaster MSA AA); Pittsburgh, PA MSA (Pittsburg MSA AA); and PA Combined Non-Metros (PA Combined Non-Metro AA). The Harrisburg CSA and Scranton MSA AAs received FS reviews. The two areas accounted for the larger portion of the lending (46.6 percent) and deposits (65.8 percent) amongst the AAs in Pennsylvania. Refer to Appendix A for a complete description of each AA. Pennsylvania represents the 25th largest rated area by deposits. WFBNA has $4.7 billion of deposits representing 0.4 percent of adjusted deposits. WFBNA operates 50 branches and 70 ATMs within Pennsylvania, representing 0.9 percent of the bank's branches and 0.5 percent of the bank's ATMs. The bank originated and purchased approximately $16.5 billion in loans or 0.9 percent of total reported loan originations and purchases during the evaluation period. The bank's primary loan products in Pennsylvania are home mortgage and small loans to businesses.

Harrisburg CSA AA

Within the Harrisburg CSA AA, the bank had $2.1 billion in deposits and ranked fourth amongst 29 depository institutions in the market with 8.8 percent market share. Manufacturers and Traders Trust Company and PNC Bank ranked first and second with a market share of 15.8 percent and 13.4 percent, respectively. WFBNA operates 21 branches and 24 ATMs in the AA.

Scranton MSA AA
Within the Scranton MSA AA, the bank had $1.1 billion in deposits and ranked second amongst 22

[43] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

depository institutions in the market with 8.3 percent market share. PNC Bank ranked first with a 27.6 percent market share. WFBNA operates 11 branches and 15 ATMs in the AA.

Demographic Data

Harrisburg CSA AA

The following table provides a summary of the demographics that includes housing and business information for the Harrisburg CSA AA. Table A indicates that the volume of OOUs is very small in low-income CTs and close to 37 percent of families in the AA are LMI. The area's median housing value in the Harrisburg CSA AA is 2.3 times the area's highest median income, but 2.9 times moderate-, and 4.7 times low-income, indicating a limited proportion of OOUs are affordable to many low-income individuals.

Table A - Demographic Information of the Assessment Area

Economic Data

Harrisburg-Carlisle, PA MSA

According to the May 2018 Moody's Analytics report, the Harrisburg economy is steady. State government payrolls have slid two percent over the past year, and after falling at the end of 2017, pivotal transportation/warehousing employment is one percent below its year-ago level. However, healthcare and construction have expanded payrolls at more than twice the U.S. average over the past six months.

The worst is over for the state government, but a poor fiscal situation is a source of downside risk.

Transportation/warehousing, Harrisburg's biggest single source of net new jobs since 2014 will settle into a pattern of slower growth. Productivity growth and automation will allow logistics firms to ship and store more goods with fewer new hires. Profitable health systems and an expanding population will ensure that healthcare, one of Harrisburg's fastest-growing industries over the last year, remains a key driver.

The housing market has improved but there is still room for growth. House price appreciation is accelerating in line with that of the state but single-family permits have barely budged this decade.

The largest employers in Harrisburg include Penn State Hershey Medical Center, Giant Food Stores, and Hershey Entertainment & Resorts. According to the U.S. BLS, the unemployment rate for the second quarter of 2018 was 3.8 percent and has decreased significantly from 6.9 percent at the beginning of the evaluation period. The unemployment rate in the AA was lower than the overall state at 3.9 percent for the same period.

Lebanon, PA MSA

According to the January 2019 Moody's Analytics report, Lebanon has experienced a slowdown in net hiring as its labor market has tightened. Job growth has dwindled from a well above-average 2.7 percent to 1.3 percent. Private services are in a funk, consistent with slower population growth, and education/healthcare payrolls are flat. On the upside, construction has been a driving force for job gains. Builders are adding jobs much faster than in other parts of the state.

The National Defense Authorization Act creates significant upside risk for the state's primary National Guard training facility, Fort Indiantown Gap, which will also benefit Lebanon. The housing market is stable but home price appreciation trails that in the state and U.S.

The largest employers in Lebanon include Sechler Family Foods, The Good Samaritan Hospital, and Fort Indiantown Gap. According to the U.S. BLS, the unemployment rate for the fourth quarter of 2018 was 3.9 percent and has decreased significantly from 6.7 percent at the beginning of the evaluation period. The unemployment rate in the AA was the same as the overall state at 3.9 percent for the same period.

York-Hanover, PA MSA

According to the May 2019 Moody's Analytics report, York's monthly job additions have declined and less reliable, leaving employment flat over the past year. Healthcare tapped the brakes early in 2018 and other private services are offering little support.

Manufacturing employment is backtracking after last year's impressive buildup and construction employment is barely budging. York is Pennsylvania's third most factory-dependent metro area behind Gettysburg and Reading, with two-fifths of factory jobs in metals, machinery and transportation equipment. Import tariffs have increased the price of steel mill products, raising input costs for manufacturers. However, a new opportunity for manufacturing employment has emerged from a $575 million Army contract awarded to BAE Systems for armored multipurpose vehicles. BAE Systems is adding hundreds of full-time jobs at its West Manchester Township plant in York County to meet demand.

The housing market remains uninspiring. Single-family housing starts have decelerated this year as house price appreciation trails that in the state and U.S.

The largest employers in York include Wellspan Medical Group, Utz Quality Foods Inc., and Rutter's Holdings Inc. According to the U.S. BLS, the unemployment rate for the fourth quarter of 2018 was 3.9 percent and has decreased significantly from 6.7 percent at the beginning of the evaluation period. The unemployment rate in the AA was the same as the overall state at 3.9 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by three community contacts that serve the bank's Harrisburg CSA AA. One community contact represents a local government Housing and Redevelopment Agency; one contact is a local Community Development Agency that serves the Cumberland, Dauphin, and Perry Counties; and one is a non-profit affordable housing agency located in Lebanon County.

The contacts indicated that the city of Harrisburg is experiencing growth and gentrification of its neighborhoods. A number of both homeowners and renters in the area are significantly cost burdened in covering their housing costs, that is, they are spending more than 30 percent of their gross monthly income on housing costs. Access to transportation is another issue facing the area. In many LMI communities, public transportation options are limited. There is an increase in homelessness in Cumberland, Dauphin, Perry, Lebanon, and York Counties. These Counties receive funding from the state for homeless services that is specifically targeted to homeless youth.

The contacts identified a number of needs in Cumberland, Dauphin, and Perry Counties including livable wage jobs, affordable housing, funding to rehabilitate substandard housing, and affordable quality child care services. There is also a need for support for family self-sufficiency programs to help break the cycle of generational poverty, and assistance transportation options as many low-income folks don't have access to transportation to get them to where the better paying jobs are.

The contacts noted that the most significant needs are innovative mortgage products that assist borrowers with lower credit scores to qualify for a mortgage loan and flexible credit products and micro loans for small businesses, particularly start-up businesses. General banking needs are being met, but there are limited opportunities for participation by banks in the AA through community development loans.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Harrisburg CSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

<u>Scranton MSA AA</u>

The following table provides a summary of the demographics that includes housing and business information for the Scranton MSA AA. Table A indicates that the number of census tracts, population, and OOUs is very small in low-income CTs and over 38 percent of families in the AA are LMI. The area's median housing value in the Scranton MSA AA is 2.2 times the area's median income, but 2.8 times moderate-, and 4.4 times low-income, indicating a limited proportion of OOUs are affordable to low-income families. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

Assessment Area: Scranton-Wilkes-Barre-Hazleton PA MSA (2016)

Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #

(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

According to the May 2018 Moody's Analytics report, private-sector job growth in Scranton over the last 12 months was stronger than it had been since 2005. Several well-paying industries, including professional services, manufacturing and transportation/warehousing, are advancing at a solid clip. The thinning pool of workers has pushed employers to raise wages, and average hourly earnings are benefiting from a favorable mix of job creation across wage tiers.

Government employment is still dwindling. Strengthening consumer demand will sustain growth in lower-paying industries such as hotels, restaurants and entertainment and stem the tide of retail job losses. Healthcare has been one of the metro area's strongest industries in recent years and will remain a reliable source of employment. Increased admissions and higher health plan membership have boosted Geisinger Health System's bottom line, and the network is expanding its clinical programs.

Single-family home prices have just about reached their pre-crash peak but it is an apartment building boom that is driving gains in residential construction.

The largest employers in Scranton include Tobyhanna Army Depot, Geisinger Health System, and Wyoming Valley Health Care System. According to the U.S. BLS, the unemployment rate for the second quarter of 2018 was 5.0 percent and has decreased significantly from 9.4 percent at the beginning of the evaluation period. The unemployment rate in the AA was higher than the overall state at 3.9 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by two community contacts that serve the bank's Scranton MSA AA. One contact represents an economic and community development and one contact represents an affordable housing organization that operates in the AA that provides a full range of technical and financial services to those seeking to create or preserve affordable housing.

The contacts indicated that strengths of the Scranton economy include its position as a major distribution hub for the region, large presence of education and healthcare facilities, and comparatively low cost of living. The City of Scranton is economically distressed, and the population has been slowly declining due to a lack of job opportunities. Individuals are also moving to Scranton from nearby larger cities such as New York City and Philadelphia in search of affordable housing. Many of the city's residents are elderly.

The contacts indicated that most of Scranton's housing stock consists of buildings constructed prior to the 1940's; therefore, home rehabilitation is a primary community need. Many of the city's residents are elderly. Almost half of renter households in the county are cost burdened, paying more than 30 percent of their income for rent. Further, among the very lowest income households, most are cost burdened. The occupancy rate among rental properties in the area is very high, which further exacerbates the shortage of affordable rental housing. Rental housing costs in the AA are higher than that of surrounding counties. Larger households in need of three to four bedrooms have difficulty finding housing, even with Housing Choice Vouchers. Further, accessible housing is limited for persons with physical disabilities.

The contacts noted that the primary credit needs in the AA are affordable housing, both rental and owner-occupied, and financing for LMI first-time homebuyers. Other critical needs include reducing the number of blighted properties in the AA and developing a holistic approach to address homelessness.

The second contact indicated that their organization has a number of programs and initiatives that welcome participation from financial institutions, including the Local Housing Investment Fund and Trust, a revolving loan fund that provides flexible, below market rate loans for affordable housing and mixed-use and/or mixed-income projects. The organization has received support from and has partnered with a number of area financial institutions. Fulton Bank, PNC Bank, Wells Fargo, and BB&T have been supporters of the organization through such activities as board service, lender partners and financial support. The contact indicated that affordable housing is a need in the AA.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing represents a primary credit need for the Scranton MSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

Scope of Evaluation in Pennsylvania

The rating for the State of Pennsylvania is primarily based on FS evaluations of the bank's performance in the Harrisburg CSA and Scranton MSA AAs; however, performance in each AA was considered. Conclusions where a LS review affected the CRA Rating for the state are addressed within their respective tests. LS procedures were performed for the Lancaster MSA, Pittsburg MSA, and PA Combined Non-Metro AAs. A limited portion of the bank's overall lending, investments, and services were conducted in Pennsylvania; therefore, the performance in Pennsylvania received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN PENNSYLVANIA

LENDING TEST

The bank's performance under the Lending Test in Pennsylvania is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Harrisburg CSA and Scranton MSA AAs is excellent.

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans *							
Assessment Area	Home Mortgage	Small Business	Small Farm	CD	Total	% State* Loans	% State Deposits
Harrisburg CSA	33,122	5,128	162	5	38,417	34.5	43.5
Scranton MSA	9,201	4,184	53	13	13,451	12.1	22.3
Lancaster MSA	15,996	3,553	112	15	19,676	17.6	19.0
Pittsburg MSA	30,659	3,285	6	3	33,953	30.4	6.6
PA Combined NonMetro	4,307	1,654	48	1	6,010	5.4	8.6
Total	93,285	17,804	381	37	111,507	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Dollar Volume of Loans (000's)*							
Assessment Area	Home Mortgage	Small Business	Small Farm	CD	Total	% State Loans	% State Deposits
Harrisburg CSA	$5,589,490	$308,858	$4,819	$15,400	$5,918,567	35.7	43.5
Scranton MSA	$1,214,547	$268,481	$1,972	$22,112	$1,507,112	9.1	22.3
Lancaster MSA	$2,686,365	$198,418	$4,126	$40,175	$2,929,084	17.6	19.0
Pittsburg MSA	$5,373,408	$260,462	$150	$9,034	$5,643,054	34.0	6.6

PA Combined NonMetro	$522,585	$75,651	$1,854	$504	$600,594	3.6	8.6
Total	$15,386,395	$1,111,870	$12,921	$87,225	$16,598,411	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Harrisburg CSA AA

WFBNA ranked fourth in deposits with 8.8 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 8.5 percent market share. There is strong competition as reflected by the 484 lenders and 29 depository institutions in the AA. The second and third lenders in this market were Members 1ST FCU with 6.5 percent market share and Quicken Family with 3.8 percent market share.

In small loans to businesses, WFBNA ranked ninth with market share of 3.7 percent. There is strong competition as reflected by the 106 lenders in the AA. The top three lenders were American Express FSB with market share of 15.6 percent, U.S. Bank with market share of 10.1 percent, and Capital One Bank with market share of 8.7 percent.

Scranton MSA AA

WFBNA ranked second in deposits with 8.3 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 7.3 percent market share. There is strong competition as reflected by the 304 lenders and 22 depository institutions in the AA. The second and third top lenders in this market were Quicken Family with a 5.4 percent market share and Residential Mortgage Services with a 4.6 percent market share.

In small loans to businesses, WFBNA ranked sixth with a market share of 5.0 percent. There is strong competition as reflected by the 88 lenders in the AA. The top three lenders were American Express with market share of 16.5 percent, PNC Bank with market share of 13.1 percent, and Capital One Bank with market share of 7.2 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in the Harrisburg CSA AA and an excellent geographic distribution of loans in the Scranton MSA AA.

Harrisburg CSA AA

Home Mortgage Loans

Refer to Table O in the State of Pennsylvania section of appendix D for the facts and data used to evaluate the geographic distribution of the bank’s home mortgage loan originations and purchases. The bank’s overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- The bank’s home mortgage lending in 2012-2016 in low-income geographies exceeds the aggregate distribution of loans and is significantly below the proportion of OOUs in those geographies.

- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is below the proportion of OOUs in those geographies.
- The bank's home mortgage lending in 2017-2018 exceeds the performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of Pennsylvania section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The bank's performance in in both periods, 2012-2016 and 2017-2018, for small business loans in LMI geographies exceeds the aggregate distribution of loans in those geographies.
- The proportion of loans in low-income geographies is near to the proportion of businesses and in moderate-income geographies is below the proportion of businesses located in those geographies.

Scranton MSA AA

Home Mortgage Loans

Refer to Table O in the State of Pennsylvania section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The bank's home mortgage lending in both 2012-2016 and 2017-2018 periods in low-income geographies exceeds both the aggregate distribution of loans and the proportion of OOUs in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and was below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of Pennsylvania section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is good.

- The bank's performance in 2012-2016 for small business loans in LMI geographies substantially meets the aggregate distribution of loans and is below the proportion of businesses in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly less than the performance in 2012-2016.

Distribution of Loans by Income Level of the Borrower

The bank exhibits an excellent distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

Harrisburg CSA AA

Home Mortgage Loans

Refer to Table P in the State of Pennsylvania section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- There are homeownership affordability hurdles in the AA especially for low-income borrowers. As noted above, the area's median housing value is 4.7 times the income of low-income borrowers indicating a limited proportion of OOUs are affordable to low-income borrowers. Despite the affordability challenges, the bank's performance in 2012-2016 to low-income borrowers substantially meets the aggregate lending and is well below the proportion of families.
- The bank's performance to moderate-income borrowers exceeds both the aggregate lending reported and the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Pennsylvania section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Scranton MSA AA

Home Mortgage Loans

Refer to Table P in the State of Pennsylvania section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- There are homeownership affordability hurdles in the AA especially for low-income borrowers. As noted above, the area's median housing value is 4.4 times the income of low-income borrowers indicating a limited proportion of OOUs are affordable to low-income borrowers. Because of the affordability challenges, the bank's performance in both periods, 2012-2016 and

2017-2018, to low-income borrowers is below the aggregate lending and is well below the proportion of families.

- The bank's performance to moderate-income borrowers substantially meets the aggregate lending and exceeds the proportion of families.

Small Loans to Businesses

Refer to Table R in the State of Pennsylvania section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Community Development Lending

The institution has made an adequate level of CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

<u>Harrisburg CSA AA</u>

The level of CD lending in the Harrisburg CSA AA is poor. WFBNA made five CD loans for a total of $15.4 million which represents 6.7 percent of tier 1 capital. CD lending performance had a neutral impact on the lending test rating. The loans were responsive to the identified affordable housing needs in the AA. The bank made one CD loan totaling $11.4 million (74 percent) for the purpose of affordable housing. Additionally, the bank extended four CD loans totaling $4 million for the primary purpose of community services to LMI individuals.

Examples of CD loans in the AA include:

- In June 2014, WFBNA provided an $11.4 million loan for a 216-unit Section 8 affordable housing complex. This development is located in a middle-income census tract in Hershey, Pennsylvania and consists of 198 one-bedroom units and 17 two-bedroom unit, subsidized under a project-based Section 8 program.
- In February 2017, WFBNA renewed a $1.5 million working line of credit to a federally qualified health center that is accessible and community-minded. The health center provides compassionate and comprehensive health services to people seeking accessible and affordable quality care. According to the U.S. Department of Health and Human Services website as of April 2016, the health center must serve an underserved area or population, offer a sliding fee scale, provide comprehensive services, have an ongoing quality assurance program, and have a governing board of directors.

Scranton MSA AA

The level of CD lending in the Scranton MSA AA is excellent. WFBNA made 13 CD loans in its AA for a total of $22.1 million, which represents 18.7 percent of tier 1 capital. CD lending performance had a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified affordable housing needs in the AA. The bank made one CD loan totaling $16.3 million (73.8 percent) for the purpose of affordable housing. Additionally, the bank extended 12 CD loans totaling $6 million for the primary purpose of community services to LMI individuals.

Examples of CD loans in the AA include:

- In January 2014, WFBNA provided a $16.3 million loan for a 58-unit LIHTC affordable housing development located in Scranton, Pennsylvania and consists of 52 one-bedroom units and 6 two-bedroom units, with 100 percent of the units restricted to seniors aged 62 and older earning between 20 to 60 percent of the area MFI.
- In March 2018, WFBNA renewed a $300,000 working capital line of credit to a non-profit organization that provides day care services for low-income families in Luzerne County. Over 75 percent of the organization's clients are considered to be LMI as they earn less than $46,560 annually (80 percent of the 2014 area MFI).

Product Innovation and Flexibility

Harrisburg CSA AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *you*rFirstMortgage loan program the bank has funded 79 loans totaling $10 million to LMI homebuyers that qualified under this program.

Scranton MSA AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 55 loans totaling $3.9 million to LMI homebuyers that qualified under this program.

Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding the program above.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank’s performance under the Lending Test in the Lancaster MSA AA is consistent with the bank’s overall excellent performance under the Lending test in the FS areas. Performance in the Pittsburg MSA and PA Combined Non-Metro AAs is weaker than the bank’s overall performance under the Lending Test due primarily to lower geographic distribution of loans. Performance differences in these two LS AAs did not impact the Lending Test rating for the State of Pennsylvania.

Refer to Tables O through T in the State of Pennsylvania section of appendix D for the facts and data that support these conclusions.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of Pennsylvania is rated High Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Harrisburg CSA is adequate and performance in the Scranton MSA AA is excellent.

Qualified Investments										
	Prior Period*		Current Period		Total				Unfunded Commitments**	
Assessment Area	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Harrisburg MSA	3	$15,466	64	$8,671	67	33.5	$24,137	28.6		
Scranton MSA	0	$0	78	$21,022	78	39.0	$21,022	25.0		
Lancaster MSA	0	$0	46	$26,467	46	23.0	$26,467	31.4		
Pittsburg MSA	0	$0	2	$12,500	2	1.0	$12,500	14.8		
PA Combined NonMetro	0	$0	7	$130	7	3.5	$130	0.2		
Total	3	$15,466	197	$68,790	200	100.0	$84,256	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

<u>Harrisburg MSA AA</u>

The institution has a significant level of qualified CD investments and grants, occasionally in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 10.5 percent of tier 1 capital allocated to the AA.

The investments and grants reflect good responsiveness to the needs identified in the AA including affordable housing, community services, and economic development for LMI individuals and geographies. Over 75.1 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 62 grants totaling $769,358 to a variety of organizations that primarily support affordable housing and community services.

The institution occasionally uses innovative and/or complex investments to support CD initiatives. CD Investments involved two complex projects where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers.

Example of CD investments in the AA include:

- In September 2017, WFBNA provided a $5.5 million NMTC investment for the development of a retail center anchored by a grocery store. The retail center is located in a moderate-income, highly distressed tract designated as a food desert by the USDA in Lebanon, PA.
- In November 2015, WFBNA provided a $2.4 million investment in a government bond for single-family mortgages. This underlying mortgage was made in Perry PA. Of the total 50 units, all units are restricted to tenants earning 60 percent or less of the area MFI. This government agency's mission is to provide funding to the housing market, help families and communities, and create value.

Scranton MSA AA

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 17.8 percent of tier 1 capital allocated to the AA.

The investments and grants reflect excellent responsiveness to the needs identified in the AA including affordable housing, community services, and economic development for LMI individuals. Over 96.8 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 76 grants totaling $977,250 to several organizations that primarily support affordable housing and community services to LMI individuals.

The institution occasionally uses innovative and/or complex investments to support CD initiatives. CD Investments involved two complex projects where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers.

Example of CD investments in the AA include:

- In October 2014, WFBNA invested $19.9 million for the development of a 58-unit LIHTC affordable housing complex. This LIHTC development is located in Scranton, Pennsylvania, with 100 percent of the units restricted to seniors aged 62 and older earning between 20 and 60 percent of the area MFI. This development consists of 52 one-bedroom units and 6 two-bedroom units. This investment is responsive to the need for affordable housing.
- In July 2015, WFBNA provided a $4.4 million investment in a government single-family mortgage backed security. The investment amount reported of $155,000 represents the allocation of a single property address from the pool of mortgages under this transaction. This agency was chartered by Congress in 1970 with a public mission to stabilize the nation's residential mortgage markets and expand opportunities for homeownership and affordable rental housing. Their statutory mission is to provide liquidity, stability and affordability to the U.S. housing market.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Investment Test in the Las PA Combined

NonMetro AA is weaker than the bank's overall good performance in the Investment Test in the FS areas due to a lower volume of CD investments. The bank's performance in the Lancaster MSA and Pittsburg MSA AAs is stronger than the bank's overall performance. Performance differences in the LS AAs with respect to weaker and stronger than the FS AAs were neutral and did not impact the overall Investment Test rating for the State of Pennsylvania.

SERVICE TEST

The institution's performance under the Service Test in the Pennsylvania is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the service test, the institution's performance in the Harrisburg CSA and Scranton MSA AAs is excellent.

Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the institution's AAs, particularly LMI geographies and/or LMI individuals.

Harrisburg CSA AA

As of December 31, 2018, WFBNA operates 21 branches and 24 ATMs in the Harrisburg CSA AA. All of these branches are full-service locations. There is one branch in a low-income geography and six branches in moderate-income geographies. The branch distribution in low-income geographies is near to the percentage of the population in low-income geographies and branch distribution in moderate-income geographies significantly exceeds the percentage of the population in the moderate-income geographies. When considering one additional branch within close proximity to LMI geographies, the bank's distribution exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed two branches during the evaluation period, in middle and upper-income CTs. These branch closures did not negatively impact the distribution of branches relative to the population residing in LMI geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Thursday from 9:00 am to 5:00 pm, and Friday from 9:00 am to 6:00 pm. with 5 branches open until 7:00 pm. Of the total branches, 18 are also open on Saturday from 9:00 am to 1:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Scranton MSA AA

As of December 31, 2018, WFBNA operates 11 branches and 15 ATMs in the Scranton MSA AA. All of these branches are full-service locations. There are no branches in low-income geographies; however, the population in low-income geographies is very low compared to total demographics. There are two branches in moderate-income geographies. The branch distribution in moderate-income geographies is near to the percentage of the population in moderate-income geographies in the AA. When considering one additional branch within close proximity to LMI geographies, the bank's distribution exceeds demographics.

The institution's opening and closing of branches has not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed four branches during the evaluation period, two of which were in moderate-income CTs. These branch closures did not negatively impact the distribution of branches relative to the population residing in LMI geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AAs, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Thursday from 9:00 am to 5:00 pm, and Friday from 9:00 am to 5:30 or 6:00 pm. with 5 branches open until 7:00 pm. Six branches are also open on Saturday from 9:00 am to 12:00 pm, and four branches are open until 1:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Community Development Services

The institution provides a relatively high level of CD services.

Harrisburg CSA AA

The level of CD services in the Harrisburg CSA AA is good. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 106 CD service activities to 19 organizations since the last evaluation, logging a total of 173.3 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing and economic development. The bank's assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- WFBNA team members provided 25.5 hours of Board service, outreach, and financial education to a community organization that provides services which address and promote fair housing (anti-discrimination) rights and other housing opportunities for those in need.
- A WFBNA team member provided 40.5 hours of Board service and ongoing outreach to a statewide community organization coalition that works to provide leadership and a common voice for policies, practices, and resources to ensure that all Pennsylvanians, especially those with low incomes, have access to safe, decent, and affordable homes.

Scranton MSA AA

The level of CD services in the Scranton MSA AA is good. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 109 CD service activities to 16 organizations since the last evaluation, logging a total of 362 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing and economic development. The bank's assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- A WFBNA team member provided 33 hours of Board service and outreach to a community organization that works to provide affordable housing to those in need.
- A WFBNA team member provided 47 hours of Board service and financial education to a community organization. This organization is a private, not-for-profit social service agency whose mission is to provide services and create opportunities to empower and build strong interdependent communities. This organization provides general advocacy, crisis intervention, HIV/AIDS prevention and education, and housing/homeless programs to community members.

Conclusion for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Service Test in the Lancaster MSA AA and PA Combined NonMetro AA is consistent with the bank's overall excellent performance under the Service Test in the FS areas. Performance in the Pittsburg MSA AA is weaker than the bank's overall performance due to a lower percentage of branch distribution in LMI geographies. The bank closed its only branch in the Pittsburg MSA AA. Performance differences in the LS AAs did not impact the overall Service Test rating for the State of Pennsylvania.

State Rating

State of South Carolina

CRA rating for the State of South Carolina[44]: Satisfactory
The Lending Test is rated: High Satisfactory
The Investment Test is rated: Needs to Improve
The Service Test is rated: High Satisfactory

The major factors that support this rating include:

- Good lending activity;
- Good geographic distribution of loans;
- Excellent distribution of loans by borrower profile;
- Good level of CD loans, which has a positive impact on the Lending Test;
- WFBNA's use of flexible products has a positive impact on the Lending Test;
- Lending performance in the LS AAs increased overall Lending Test rating to High Satisfactory;
- Poor level of CD investments;
- Performance in the LS AAs impacted overall Investment Test rating to Needs to Improve;
- Retail delivery systems are accessible to all portions of the AA; and
- WFBNA provides a relatively high level of CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in South Carolina

WFBNA delineated seven AAs within South Carolina including the Charleston-North Charleston, SC MSA (Charleston MSA AA); Columbia-Orangeburg-Newberry, SC CSA (Columbia CSA AA); Greenville-Spartanburg-Anderson, SC CSA (Greenville CSA AA); Florence, SC MSA (Florence MSA AA); Hilton Head Island-Bluffton-Beaufort, SC MSA (Hilton Head Island MSA AA); Sumter, SC MSA (Sumter MSA AA); and SC Combined Non-Metros (SC Combined NonMetro AA). The Charleston MSA AA, Columbia CSA AA, and the Greenville CSA AA received full scope reviews. These areas accounted for largest portion of the lending (84.2 percent) and deposits (88.4 percent) amongst the AAs in South Carolina. Refer to Appendix A for a complete description of each AA. South Carolina represents the 15th largest rated area by deposits. WFBNA has $14.8 billion of deposits representing 1.2 percent of adjusted deposits. WFBNA operates 107 branches and 292 ATMs in South Carolina representing 1.9 percent of branches and 2.2 percent of the bank's ATMs. The bank originated and purchased approximately $22.9 billion in loans or 1.2 percent of total reported loan originations and purchases during the evaluation period. The bank's primary loan products in South Carolina are home mortgage and small loans to businesses.

<u>Charleston MSA AA</u>

Within the Charleston MSA AA, the bank had $3.3 billion in deposits and ranked first amongst 32 financial institutions in the market with 23.5 percent market share. Bank of America, N.A and South

---

[44] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

State Bank ranked second and third with market shares of 15.8 and 12.8 percent, respectively. WFBNA operates 23 branch offices and 56 ATMs in the AA.

Columbia CSA AA

Within the Columbia CSA AA, the bank had $5.9 billion in deposits and ranked first amongst 28 financial institution in the market with a 28.0 percent market share. Bank of America N.A. and Branch Banking and Trust Company ranked second and third with market shares of 24.5 and 11.3 percent, respectively. WFBNA operates 26 branch offices and 65 ATMs in the Columbia CSA AA during the evaluation period.

Greenville CSA AA

Within the Greenville CSA AA the bank had $3.9 billion in deposits and ranked first amongst 41 financial institution in the market with a 15.5 percent market share. Bank of America N.A. and Branch Banking and Trust Company ranked second and third with market shares of 11.5 and 10.8 percent, respectively. WFBNA operates 35 branch offices and 115 ATMs in the Greenville CSA AA during the evaluation period.

Demographic Data

Charleston MSA AA

The following table provides a summary of the demographics that includes housing and business information for the Charleston MSA AA. Table A shows a very small number of OOUs in the low-income tracts and close to 39 percent of families in the AA are LMI. The area's median housing value in the Charleston MSA AA is 4.1 times the MSA median income, but 5.1 times moderate-, and 8.1 times low-income, indicating a limited proportion of OOUs are affordable to LMI borrowers. Median rents and the significant percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Economic Data

According to the April 2018 Moody's Analytics report, Charleston's economy is advancing more slowly as its expansion matures. Net hiring has picked up in recent months. The MSA is adding workers in a broad range of industries, with goods producers and healthcare leading the way, while business and professional services have been a source of weakness. Commercial aerospace and healthcare will be the top source of near-term job gains.

To keep pace with demand, Boeing is expected to boost monthly Dreamliner production from 12 to 14 planes later in 2018. The busier production schedule bolds well for employment in the near term, while the metro area's involvement in the design and production of Dreamliners will provide long-term stability. Healthcare is benefiting from several positive trends. Long-awaited investments in the auto industry will pay off later this year as hiring accelerates. Together, the two automakers (Volvo and Daimler) will add more than 6,000 high-wage jobs, bolstering housing and consumer industries

Housing remains on solid footing with price appreciation outpacing the national average. The largest employers in the MSA are Joint Base Charleston, Medical University of South Carolina, and Boeing Co. According to the U.S. BLS, the unemployment rate for the second quarter of 2018 was 3.6 percent and has decreased significantly from 7.5 percent at the beginning of the evaluation period. The unemployment rate in the AA was higher than the overall State of South Carolina at 2.7 percent for the same period.

Community Contact

The analysis takes into consideration comments provided by a community contact pertaining to the Charleston MSA AA in conjunction with this evaluation. The contact represents an economic development corporation serving the AA.

The organization's primary function is fostering economic prosperity in Dorchester County. The group's mission is to create an environment that supports new business growth and retention enabling companies to succeed for generations. The organization serves all of Dorchester County, including the following communities: Summerville, Ridgeville, St. George, Reevesville, Harleysville, and North Charleston. The contact indicated that Dorchester County is growing at a 5 percent rate, and the county population has doubled in the last 15 years. No major employers have left the area in recent years and several large manufacturing companies have relocated to the area bringing jobs and bolster investments to the area. The contact indicated that it's challenging for small business owners to expand their businesses due to tough lending standards.

The contact also noted that affordable housing was an issue as low-income workers cannot afford to buy a home and also the high-cost apartment rents. The contact noted that local banks could partner with non-profits through more favorable loan terms including lowered interest rates, waived fees, and extending lines of credit. Banks can provide relief to non-profits in the form of fee waivers and being more proactive in making charitable contributions. Banks should take time to develop relationships with non-profits and be more effective in meeting the actual needs of the community.

Considering the information from the community contact and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Charleston MSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

Columbia CSA AA

The following table provides a summary of the demographics that includes housing and business information for the Columbia CSA AA. Table A shows that the volume of OOUs in the low-income tracts is very small and over 39 percent of families in the AA are LMI. The area's median housing value in the Columbia CSA AA is 2.3 times the MSA median income, but 2.8 times moderate-, and 4.5 times low-income, indicating a limited proportion of OOUs are affordable to low-income borrowers. Median rents and the significant percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

According to the April 2018 Moody's Analytics report, Columbia's economy is on a declining trend. The fallout from the failed expansion project with the state-owned utility Santee-Cooper is estimated to cost approximately $9 billion and the loss of thousands of high-paying jobs.

Hardest hit by the canceled nuclear project, construction and professional/business services have started to recover. Consumer industries are also holding their own, though the outsize public sector is still shedding jobs. Healthcare will be a key source of new jobs as faster population growth forces healthcare providers to expand. A string of new investments will help Columbia to rebound. Trane, Hushi, and LulaRoe will invest millions in the region, creating thousands of new positions over the coming years, providing support to consumer industries and housing.

The largest employers in the MSA are Palmetto Health, Blue Cross & Blue Shield of South Carolina, and University of South Carolina. According to the U.S. BLS, the unemployment rate for the second quarter of 2018 was 4.1 percent and has decreased significantly from 8.0 percent at the beginning of the evaluation period. The unemployment rate in the AA was higher than the overall State of South Carolina at 2.7 percent for the same period.

Community Contact

The analysis takes into consideration comments provided by a recent community contact in conjunction with this evaluation that serves the bank's Columbia CSA AA. The community contact represents an affordable housing organization that provides affordable housing and first-time homebuyer counseling and assistance in the AA. The community contact noted a healthy local economy in non-rural areas of the AA.

The community contact indicated that affordable housing is a significant need in the AA. The University of South Carolina-Columbia, the largest university in the State, is located in the AA. The university is creating a rent crisis as all new rentals are at higher rents, and a large number of apartment complexes are converting to higher rate student housing and refusing to take affordable housing vouchers. In addition, as national banks have continued to consolidate, there are fewer banks in the AA to help with meeting credit and community development needs in the AA. There are opportunities for financial institutions to provide credit for affordable housing

The bank conducted research in the AA and identified community needs for affordable housing for LMI families, homeless services, and disaster recovery. FEMA declared the area as a major disaster.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing represents a primary credit need for the Columbia CSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

<u>Greenville CSA AA</u>

The following table provides a summary of the demographics that includes housing and business information for the Greenville CSA AA. Table A shows a very small number of OOUs in the low-income tracts and over 38 percent of families in the AA are LMI. The area's median housing value in the Greenville CSA AA is 2.3 times the highest MSA median income, but 2.8 times moderate-, and 4.6 times low-income, indicating a limited proportion of OOUs are affordable to low-income borrowers. Median rents and the significant percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Economic Data

Greenville-Anderson-Mauldin, SC MSA

According to the August 2018 Moody's Analytics report, Greenville's economy is thriving and strong bolstered by gains in consumer industries, construction, and the public sector, while critical professional/business services have struggled. Low business costs and a business-friendly environment have helped Greenville to attract millions in investments from firms such as General Electric and Milliken. Consumer industries are also benefiting from the metro area's increasing popularity as a tourist destination.

Greenville's real estate market is firing on all cylinders and builders are struggling to keep up. A strong economy, rising incomes, and above-average population growth are supporting strong home sales. As a result, house prices are rising faster than the national average. Higher house prices along with a limited supply of housing have ignited a flurry of construction. The forecast calls for home sales to remain hot in what is a modestly overpriced but still affordable market for single-family homes, which will provide further incentive for homebuilders to increase the rate of new construction.

The largest employers in the MSA are Greenville Health System, Michelin North America Inc., and BI-LO Supermarkets. According to the U.S. BLS, the unemployment rate for the third quarter of 2018 was 3.6 percent and has decreased significantly from 8.2 percent at the beginning of the evaluation period. The unemployment rate in the AA was slightly lower than the overall State of South Carolina at 3.7 percent for the same period.

Spartanburg, SC MSA

According to the April 2019 Moody's Analytics report, Spartanburg's critical auto industry sector and professional/business services are doing the heavy lifting, accounting for more than three-quarters of net jobs over the past six months. The favorable composition of job gains is helping to boost average hourly earnings, which are expanding at three times the national rate. Investments in the auto industry will power the economy in the coming quarters, though U.S.-China trade frictions still pose a serious threat to the outlook.

Consumer industries will be a key source of job gains in the coming years. In addition to demand from residents, consumer industries will benefit from the strength in business and leisure travel, which is bolstering demand for accommodations.

Favorable demographics coupled with a thriving auto industry sector and burgeoning port are helping to propel a tidal wave of construction. Strong population growth and above-average wage growth are helping to spur demand for homes, and a shortage of existing homes has ignited a wave of new-home construction pushing housing starts to record highs.

The largest employers in the MSA are BMW Manufacturing Corp., Spartanburg Regional Health Services, and Michelin North America. According to the U.S. BLS, the MSA unemployment rate as of the fourth quarter of 2018 was 3.5 percent, down from 8.0 percent at the beginning of the evaluation period. The unemployment rate in the AA was higher than the overall State of South Carolina at 3.3 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by three community contacts that serve the bank's Greenville CSA AA. One of the three community contacts represents a local Chamber of Commerce serving the AA. Two of the three community contacts are non-profits serving the AA and are focused on homeownership for LMI families and individuals in the AA.

The community contact from the Chamber of Commerce commented that the local economy has recovered from the 2008 recession and has continued to grow at a fast pace. The retail sector has grown especially fast. One concern for the area is that growth may occur faster than expected; creating a need to update infrastructure and other developments to maintain residents' quality of life. The affordable housing development has occurred across all income tracts. For example, new HUD development apartment complexes such as Pope Field Tower and Aberdeen Apartments were constructed to serve LMI areas. The contact stated that one of the community's primary issues is homelessness, and that there are ways for financial institutions to become more involved in helping with this issue. The contact stated, one of the best ways financial institutions can contribute is by donating to local groups who help the homeless, such as the Dream Center, or by helping to finance projects to create housing.

The two community contacts from the non-profit housing development agency serves LMI people in Cherokee and Spartanburg Counties in the AA. According to the contacts, local institutions could donate money and employees' time to work on the construction of new homes or rehab of older homes. The contact mentioned that a local community bank had funded a home rehab and provided employees to assist with the rehab. One of the contacts from the housing development agency mentioned that the local Wells Fargo bank donated a foreclosed home which the agency renovated and subsequently sold to a qualified LMI family. Both community contacts stated there is a significant need for affordable housing in the AA, mentioning that the local Housing Authority is working to upgrade and expand public housing facilities in the AA. In addition to affordable housing needs, the contact stated that much of the housing is need of repair. This situation is particularly critical for many older individuals who don't have the money to make the necessary repairs to their homes. According to the contacts, although there are a lot people who are living in substandard rental housing conditions, many of them don't have the necessary income stability to qualify for an affordable home developed and sponsored by the non-profit.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing is in high demand and represent a primary credit need for the Greenville CSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals. There are also opportunities for financial institutions to perform more outreach to minority small business throughout about available lending programs in the assessment area. Funding is also needed to rehab housing in the AA, outreach service for people that are homeless and down payment or closing cost assistance to first time LMI families/individuals.

Scope of Evaluation in South Carolina

The rating for the State of South Carolina is based on FS evaluations of the bank's performance in the Charleston MSA AA, Columbia CSA AA, and Greenville CSA AA; however, performance in each AA was considered. Conclusions where a LS review affected the CRA Rating for the state are addressed within their respective tests. LS procedures were performed for the Florence MSA AA, Hilton Head Island MSA AA, Sumter MSA AA, and SC Combined NonMetro AA. A limited portion of the bank's overall lending, investments, and services were conducted in South Carolina; therefore, the performance in South Carolina received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN SOUTH CAROLINA

LENDING TEST

The bank's performance under the Lending Test in South Carolina is rated High Satisfactory.

Conclusions for Areas receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Charleston MSA and Greenville CSA AAs is excellent and performance in the Columbia CSA AA is good.

Lending Activity

Based on the tables below, lending levels reflect good responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans *							
Assessment Area	Home Mortgage	Small Business	Small Farm	CD	Total	% State* Loans	% State Deposits
Charleston MSA	28,184	9,827	74	25	38,110	27.0	22.0
Columbia CSA	23,335	8,555	313	29	32,232	22.8	39.6
Greensville CSA	35,389	12,881	252	31	48,553	34.4	26.8
Florence MSA	3,014	1,601	57	7	4,679	3.3	3.9
Hilton Head Island MSA	10,426	2,451	16	4	12,897	9.1	4.9
Sumter MSA	1,639	915	36	5	2,595	1.8	1.3
SC Combined NonMetro	1,313	761	106	12	2,192	1.6	1.5
Total	103,300	36,991	854	113	141,258	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Dollar Volume of Loans (000's)*							
Assessment Area	Home Mortgage	Small Business	Small Farm	CD	Total	% State Loans	% State Deposits
Charleston MSA	$7,212,660	$627,271	$2,637	$150,739	$7,993,307	34.4	22.0

Total	$20,691,928	$2,138,643	$60,892	$362,487	$23,253,950	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Charleston MSA AA

WFBNA ranked first in deposits with 23.5 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 9.8 percent market share. Although WFBNA's HMDA market share is considerably lower than its deposit market share, lending competition was significantly stronger, reflected by the 505 lenders, than competition for deposits, where there were only 32 depository institutions. The second and third lenders in this market were Quicken Family and South State Bank with 4.0 and 3.2 percent market share, respectively.

In small loans to businesses, WFBNA ranked third with a market share of 8.7 percent. The top two lenders in this market were American Express, FSB with 26.5 percent market share and Bank of America with 10.1 percent market share.

Columbia CSA AA

WFBNA ranked first in deposits with 28.0 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 7.5 percent market share. Although WFBNA's HMDA market share is considerably lower than its deposit market share, lending competition was significantly stronger, reflected by the 414 lenders, than competition for deposits, where there were only 28 depository institutions. The second and third lenders in this market were Guild Mortgage Company and Ameris Bank with 6.7 and 4.6 percent market share, respectively.

In small loans to businesses, WFBNA ranked fifth with a market share of 7.7 percent. The top two lenders in this market were American Express, FSB with 19.4 percent market share and Bank of America with 7.8 percent market share.

Greenville CSA AA

WFBNA ranked first in deposits with 15.5 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 8.6 percent market share. There is strong competition as reflected by the 508 lenders and 41 depository institutions in the AA. The second and third lenders in this market were Quicken Family and Pennymac Loan Services with 5.6 and 3.8 percent market share, respectively.

In small loans to businesses, WFBNA ranked fifth with a market share of 6.9 percent. The top two lenders in this market were American Express, FSB with 18.4 percent market share and Citibank with 9.0 percent market share.

Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in its AAs.

Charleston MSA AA

Home Mortgage Loans

Refer to Table O in the State of South Carolina section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in low-income geographies is well below the aggregate distribution of loans and is significantly below the proportion of OOUs in those geographies.
- For both periods, the proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of South Carolina section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- For 2012-2016, the proportion of the bank's small business loans in LMI geographies exceeds the aggregate distribution of loans in those geographies.
- The proportion of loans in low-income geographies exceeds the proportion of businesses and in moderate-income geographies is below the proportion of businesses located in those geographies.

- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly below the performance in 2012-2016.

Columbia CSA AA

Home Mortgage Loans

Refer to Table O in the State of South Carolina section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- The bank's performance in 2012-2016 for home mortgage loans in low-income geographies exceeds the aggregate distribution of loans and is well below the proportion of OOUs in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is significantly below the proportion of OOUs in those geographies.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of South Carolina section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- For 2012-2016, the proportion of the bank's small business loans in low-income geographies exceeds the aggregate distribution of loans and is near to the proportion of businesses located in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is below the proportion of businesses located in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly below the performance in 2012-2016.

Greenville CSA AA

Home Mortgage Loans

Refer to Table O in the State of South Carolina section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in LMI geographies substantially meets the aggregate distribution of loans in those geographies.
- The proportion of loans in low-income geographies is significantly below the proportion of OOUs and in moderate-income geographies is below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of South Carolina section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- For 2012-2016, the proportion of the bank's small business loans in low-income geographies exceeds the aggregate distribution of loans and is near to the proportion of businesses located in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is below the proportion of businesses located in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly below the performance in 2012-2016.

Distribution of Loans by Income Level of the Borrower

The bank exhibits an excellent distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

Charleston MSA AA

Home Mortgage Loans

Refer to Table P in the State of South Carolina section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The Charleston MSA AA has homeownership affordability hurdles especially for LMI borrowers. As noted above, the area's median housing value is 8.1 times the income of low-income and 5.1 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI borrowers. Despite the affordability challenges, the bank's overall home mortgage lending in 2012-2016 to low-income borrowers exceeds the aggregate distribution of loans and is significantly below the proportion of families.
- The bank's overall home mortgage lending in 2012-2016 to moderate-income borrowers substantially meets the aggregate distribution of loans and is near to the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of South Carolina section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Columbia CSA AA

Home Mortgage Loans

Refer to Table P in the State of South Carolina section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The Columbia CSA AA has homeownership affordability hurdles especially for low-income borrowers. As noted above, the area's median housing value is 4.5 times the income of low-income borrowers indicating a limited proportion of OOUs are affordable to low-income borrowers. Despite the affordability challenges, the bank's overall home mortgage lending in 2012-2016 to low-income borrowers exceeds the aggregate distribution of loans and is well below the proportion of families.
- The bank's overall home mortgage lending in 2012-2016 to moderate-income borrowers substantially meets the aggregate distribution of loans and is near to the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of South Carolina section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Greenville CSA AA

Home Mortgage Loans

Refer to Table P in the State of South Carolina section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The Greenville CSA AA has homeownership affordability hurdles especially for low-income borrowers. As noted above, the area's median housing value is 4.6 times the income of low-income borrowers indicating a limited proportion of OOUs are affordable to low-income borrowers. Despite the affordability challenges, the bank's overall home mortgage lending in 2012-2016 to LMI borrowers exceeds the aggregate distribution of loans.

- The bank's overall home mortgage lending in 2012-2016 to low-income borrowers is significantly below the proportion of families and to moderate-income borrowers exceeds the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of South Carolina section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Community Development Lending

The institution has made a relatively high level of CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

Charleston MSA AA

The level of CD lending in the Charleston MSA AA is excellent. WFBNA made 25 CD loans in the Charleston MSA AA for a total of $150.7 million, which represents 41.1 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified needs in the AA, including affordable housing and community services. The bank made 16 CD loans totaling $44.6 million (30 percent) for the purpose of affordable housing. Additionally, the bank extended 7 CD loans totaling $7 million for the primary purpose of community services to LMI individuals and 2 CD loans totaling $99 million to revitalize and stabilize distressed areas within the AA.

Examples of CD loans in the AA include:

- In May 2015, WFBNA provided an $11.9 million loan to an organization for the acquisition and rehabilitation of a housing development. The development is located in a moderate-income census tract in Ladson, SC and consists of 88 two-bedroom units and 74 three-bedroom units, with 58 percent of the actual rent rates below the 2015 Fair Market Rent for the area. In addition, 100 percent of the units are affordable to tenants earning between 54.9 and 78.7 percent of the 2014 area MFI of $61,900.

- In September 2015, WFBNA provided a $68.8 million construction loan for a mixed-use project in a moderate-income census tract located in downtown Charleston, SC consisting of 226 apartments (15 percent affordable to tenants earning 80 percent of area MFI) office space and ground-floor retail. The project is the first phase of the long-term redevelopment of a 12-acre property in downtown Charleston. The project is part of revitalization of Historic King Street and is in line with the objectives of the City of Charleston's Downtown Plan that calls for infill development within this area. It states mixed land use is ideal including office, housing, affordable housing and retail. The developers have worked closely with the City of Charleston on the redevelopment plan and the Mayor of Charleston noted in his State of City report in 2014, that the first phase of Courier Square will transform a vacant parcel. The Mayor also described the project as pivotal.
- In October 2018, WFBNA provided a $1.9 million term loan to a nonprofit organization that strives to keep children safe from abuse, and when abuse occurs, works to heal these children and their families. Over 81 percent of its clients are LMI as they earn less than 80 percent of the area MFI.

<u>Columbia CSA AA</u>

The level of CD lending in the Columbia CSA AA is poor. WFBNA made 29 CD loans in the Columbia CSA AA for a total of $29.3 million which represents 4.4 percent of tier 1 capital. CD lending performance has a neutral impact on the lending test rating. The loans were responsive to the identified needs in the AA, including affordable housing and community services. The bank made 7 CD loans totaling $22.5 million (76.8 percent) for the purpose of affordable housing. Additionally, the bank extended 21 CD loans totaling $6 million for the primary purpose of community services to LMI individuals.

Examples of CD loans in the AA include:

- In February 2015, WFBNA provided a $5.4 million construction loan for an organization to build an LIHTC development located in Columbia, SC. This development consists of 28 one-bedroom units and 28 two-bedroom units, with 100 percent of the units restricted to tenants earning between 50 to 60 percent of the area MFI.
- In August 2017, WFBNA provided a $14.7 million term loan of which $3.2 million is used for below fair-market rent affordable housing development. This development is located in a moderate-income census tract in Columbia, SC and consists of 68 one-bedroom units, 110 two-bedroom units, and 50 three-bedroom units. All of the units are affordable to tenants earning between 47.5 and 54.9 percent of the 2017 area MFI of $67,000.

<u>Greenville CSA AA</u>

The level of CD lending in the Greenville CSA AA is excellent. WFBNA made 31 CD loans in the Greenville CSA AA for a total of $49.9 million which represents 11.2 percent of the allocated tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified needs in the AA, including affordable housing and community services. The bank made 12 CD loans totaling $30.8 million (61.7 percent) for the purpose of affordable housing. Additionally, the bank extended 9 CD loans totaling $19 million for the primary purpose of community services to LMI individuals.

Examples of CD loans in the AA include:

- In April 2014, WFBNA provided a $320,000 loan to an organization to finance the improvement of a thrift store that turns community donations and purchases into support for the homeless. The organization provides extensive services to individuals and families in the form of food, shelter, clothing, personal development, addiction recovery support, and residential and foster care for children. All of its clients are LMI as they earn less than 80 percent of the area MFI.
- In March 2015, WFBNA provided a $41.8 million loan for the acquisition of ten LIHTC housing developments. The loan amount reported of $5.2 million is reflective of the proportional share that is associated with this development. This LIHTC development is located in a low-income census tract in Greenville, SC with 100 percent of the units restricted to tenants earning 60 percent of the area MFI. The development consists of 46 one-bedroom units, 46 two-bedroom units, 64 three-bedroom units, and 44 four-bedroom units.

Product Innovation and Flexibility

Charleston MSA AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 71 loans totaling $11.6 million to LMI homebuyers that qualified under this program.

Columbia CSA AA

The institution makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. The bank launched the NeighborhoodLIFT program in the Columbia CSA AA in July 2016 and more than 250 potential homebuyers attended the event. WFBNA originated 45 mortgage loans totaling $4.9 million. Under the *you*rFirstMortgage loan program the bank has funded 82 loans totaling $9.2 million to LMI homebuyers that qualified under this program.

Greenville CSA AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the yourFirstMortgage loan program the bank has funded 92 loans totaling $10.1 million to LMI homebuyers that qualified under this program.

Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding the programs above.

Conclusions for Area Receiving LS Reviews

Based on LS reviews, the bank's performance under the Lending Test in the Florence MSA AA, Hilton Head Island MSA AA, Sumter MSA AA, and SC Combined NonMetro AA is good; however, the combined performance is weaker than the bank's overall excellent performance under the Lending test in the FS areas. In addition, the performance in one of the three FS AAs (Columbia CSA AA) is only good. Performance differences in the LS AAs including the Columbia CSA AA did impact the overall Lending Test rating for the State of South Carolina. As such, the overall lending rating for the State of South Carolina was downgraded to High Satisfactory.

Refer to Tables O through T in the State of South Carolina section of appendix D for the facts and data that support these conclusions.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of South Carolina is rated Needs to Improve.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the table below and consideration of performance context discussed in the investment test, the bank's performance in the Charleston MSA and Greenville CSA AAs is adequate. Performance in the Columbia CSA AA is poor.

Qualified Investments										
	Prior Period*		Current Period		Total				Unfunded Commitments**	
Assessment Area	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Charleston MSA	23	$2,420	160	$16,250	183	26.6	$18,670	18.7		
Columbia CSA	27	$4,708	155	$16,215	182	26.4	$20,923	20.9		
Greensville CSA	18	$13,334	196	$17,417	214	31.1	$30,751	30.8

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

<u>Charleston MSA AA</u>

The institution has an adequate level of qualified CD investments and grants, although rarely in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 5.1 percent of tier 1 capital allocated to the AA.

The investments and grants reflect adequate responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 92.7 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 146 grants totaling $2 million to a variety of organizations that primarily support affordable housing, community services, and economic development for LMI individuals and geographies.

The institution occasionally uses innovative and/or complex investments to support CD initiatives. CD Investments involved two complex projects where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In December 2013, WFBNA invested $7.3 million in a 56-unit LIHTC affordable housing development located in North Charleston, South Carolina. Units are restricted to tenants earning between 50 and 60 percent of the area MFI. This activity is responsive to the identified need for affordable housing. WFBNA demonstrated multi-faceted support by providing both the construction loan ($5.8 million) and equity investment in support of this affordable housing development.
- In December 2014, WFBNA invested $37.5 million in an LIHTC fund. Of this total investment, $5.2 million was allocated to a development located in Moncks Corner, South Carolina, with 40 units restricted to tenants earning no more than 60 percent of the area MFI. This activity is responsive to the identified need for affordable housing.
- In October 2017, WFBNA provided a $171,600 grant to a local organization through the PMP for affordable housing in Charleston, SC. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

<u>Columbia CSA AA</u>

The institution has a poor level of qualified CD investments and grants, but not in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 3.2 percent of tier 1 capital allocated to the AA.

The investments and grants reflect poor responsiveness to the needs identified in the AA. Over 89.6 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 139 grants totaling $6.3 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution occasionally uses innovative and/or complex investments to support CD initiatives. CD Investments involved one complex project where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In February 2015, WFBNA invested $6.7 million for a 56-unit LIHTC affordable housing development. This LIHTC development is located in Columbia, South Carolina, with 100 percent of the units restricted to tenants earning between 50 and 60 percent of the area MFI. This activity is responsive to the identified need for affordable housing. WFBNA also demonstrated multi-faceted support by providing both the construction loan ($5.4 million) and equity investment in support of this affordable housing development.
- During the exam timeframe, WFBNA provided three grants totaling $900,000 to several small business organizations through the Small Business DCC Program benefiting small businesses in

South Carolina particularly within the Columbia CSA AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.
- In July 2016, WFBNA provided a $100,000 local initiative grant to a housing Partnership organization to administer the NeighborhoodLIFT Down Payment Assistance program. The grant provided needed assistance in support of the organization's home repair programs. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.

Greenville CSA AA

The institution has an adequate level of qualified CD investments and grants, although rarely in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 6.9 percent of tier 1 capital allocated to the AA.

The investments and grants reflect adequate responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Only 30.3 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 176 grants totaling $3.3 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution occasionally uses innovative and/or complex investments to support CD initiatives. CD Investments involved several complex LIHTC and NMTC projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In October 2013, WFBNA made an $8.3 million NMTC investment for the construction of a new saw mill facility near Gaffney, South Carolina. The project site was once a brick manufacturing facility but the facility was forced to close operations due to economic difficulty. Located in a moderate-income census tract and designated as a state enterprise zone, the project is anticipated to generate approximately 20 permanent jobs. The unemployment rate in this area is 1.96 times the national average. The project supports the Cherokee County Development Board economic development plans and was awarded the State & Local Grants in support of the project.
- In June 2016, WFBNA invested $15 million in an LIHTC fund. Of this total investment, $2.0 million was allocated to a development located in Greenville, South Carolina, with 40 units restricted to tenants earning no more than 60 percent of the area MFI. This investment is responsive to the need for affordable housing.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Investment Test in the SC Combined NonMetro AA is consistent with the bank's overall adequate performance in the Investment Test in the FS areas. Performance in the Florence MSA and Sumter MSA AAs is stronger than the bank's overall performance due to higher volume of CD investments. The bank's performance in the Hilton Head MSA AA is weaker than the bank's overall performance due to lower volume of CD investments.

Performance differences in the Hilton Head MSA AA and the FS Columbia CSA AA did impact the overall Investment Test rating for the State of South Carolina. As such, the bank's overall Investment Test rating for the State of South Carolina was downgraded from Adequate to Needs to Improve.

SERVICE TEST

The bank's performance under the Service Test in South Carolina is rated High Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Charleston MSA and Greenville CSA AAs is excellent. Performance in the Columbia CSA AA is good.

Retail Banking Services

Service delivery systems are accessible to geographies and individuals of different income levels in the institution's AAs, particularly LMI geographies and/or LMI individuals.

Charleston MSA AA

As of December 31, 2018, WFBNA operates 23 branches and 56 ATMs in the Charleston MSA AA. Of these branches, 22 are full-service locations and one is a limited-service branch. There are three branches in low-income geographies and four in moderate-income geographies. The branch distribution in low-income geographies significantly exceeds the percentage of the population in low-income CTs in the AA and branch distribution in moderate-income geographies is near to the percentage of the population in moderate-income CTs. When considering an additional two branches within close proximity to LMI geographies, the bank's distribution further exceeds to demographics.

The institution's opening and closing of branches has not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed one branch in a low-income geography since the last evaluation. This closure did not negatively impact the distribution of branches relative to the population residing in LMI geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Thursday from 9:00 am to 5:00 pm and 9:00 am to 6:00 pm on Friday. Of total branches, nine are also open on Saturday from 9:00 am to 2:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Columbia CSA AA

As of December 31, 2018, WFBNA operates 26 branches and 65 ATMs in the Columbia CSA AA. Of these branches, 25 are full-service locations and one is a limited-service branch. There are two branches in low-income geographies and three branches in moderate-income geographies. The branch distribution in low-income geographies significantly exceeds the percentage of the population in low-income CTs in the AA and branch distribution in moderate-income CTs is well below the demographics in moderate-income CTs. When considering an additional six branches within close proximity to LMI geographies, the bank's distribution is near to demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed two branches in low-income geographies since the last evaluation. These closures did not negatively impact the distribution of branches relative to the population residing in LMI geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. The bank maintains standard business hours. Generally, branches are open Monday through Thursday from 9:00 am to 5:00 pm and 9:00 am to 6:00 pm on Friday. Of total branches, 12 are also open on Saturday from 9:00 am to 2:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Greenville CSA AA

As of December 31, 2018, WFBNA operates 35 branches and 115 ATMs in the Greenville CSA AA. Of these branches, 34 are full-service locations and one is a limited-service branch. There are six branches in low-income geographies and four in moderate-income geographies. The branch distribution in low-income geographies significantly exceeds the percentage of the population in low-income CTs in the AA and branch distribution in moderate-income geographies is below the percentage of the population in moderate-income CTs. When considering an additional seven branches within close proximity to LMI geographies, the bank's distribution exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed seven branches since the last evaluation. One of the branches closed was within a low-income CT. This closure did not negatively impact the distribution of branches relative to the population residing in LMI geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Thursday from 9:00 am to 5:00 pm and 9:00 am to 6:00 pm on Friday. Of total branches, 13 are also open on Saturday from 9:00 am to 1:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Community Development Services

The institution provides a relatively high level of CD services.

Charleston MSA AA

The level of CD services in the Charleston MSA AA is good. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 143 CD service activities to 24 organizations since the last evaluation, logging a total of 294 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing and economic development. The bank's assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- WFBNA team members provided 36 hours of Board service to a local nonprofit housing organization that works in partnership with people in need to build decent and affordable housing.
- A WFBNA team member provided 46 hours of financial education to a nonprofit organization that is dedicated to educating entrepreneurs and helping small businesses start, grow, and succeed nationwide. It is a resource partner with the SBA and has been mentoring small business owners for more than 40 years.

Columbia CSA AA

The level of CD services in the Columbia CSA AA is adequate. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 123 CD service activities to 31 organizations since the last evaluation, logging a total of 234 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing which is responsive to the identified need in the AA. The following are examples of CD services provided in this AA:

- A WFBNA team member provided 26 hours of Board service to a local community organization that creates and preserves the stock of affordable housing in the Central Midlands region of South Carolina through financing and technical assistance of affordable housing projects. Its focus is on projects serving LMI households.
- A WFBNA team member provided 14 hours of Board service to a community organization that provides permanent, quality, affordable multifamily housing to create safe, clean and well-maintained communities.

Greenville CSA AA

The level of CD services in the Greenville CSA AA is good. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 153 CD service activities to 43 organizations since the last evaluation, logging a total of 597 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing and economic development. The bank's assistance provided was responsive to the identified need in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- WFBNA team members provided 27 hours of financial education to a nonprofit housing organization that works in partnership with people in need to build decent and affordable housing.
- A WFBNA team member provided 51 hours of tax preparation through the VITA program. Refer to the comments in the institution Innovative or Flexible Retail Service Programs section of this public evaluation for additional details regarding this program.

Conclusion for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Service Test in the Hilton Head Island MSA AA is consistent to the bank's overall performance under the Service Test in the FS areas. Performance in the Florence MSA, Sumter MSA, and SC Combined NonMetro AAs is stronger than the bank's performance. Performance in the LS AAs did not enhance the bank's overall Service Test rating for the state.

State Rating

State of South Dakota

CRA rating for the State of South Dakota[45]: Outstanding
The Lending Test is rated: Outstanding
The Investment Test is rated: Outstanding
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Good lending activity;
- Excellent distribution of loans by borrower profile;
- Adequate geographic distribution of loans;
- WFBNA is a leader in providing CD loans, which has a significant positive impact on the Lending Test;
- WFBNA's use of flexible products has a positive impact on the Lending Test;
- Excellent level of CD investments that are responsive to AA needs;
- Retail delivery systems are readily accessible to all portions of the AA; and
- WFBNA provides a relatively high level of CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in South Dakota

WFBNA delineated three AAs within South Dakota including the Sioux Falls, SD MSA (Sioux Falls MSA AA); SD Combined Non-Metros (SD Combined NonMetro AA); and Rapid City-Spearfish, SD CSA (Rapid City CSA AA). The Sioux Falls MSA AA and SD Combined NonMetro AA received FS review. Refer to Appendix A for a complete description of each AA. These areas accounted for the largest portion of the lending (74.2 percent) and deposits (80.4 percent) amongst the AAs in South Dakota. WFBNA has $311.6 billion of deposits in South Dakota; however, a majority of the deposits are non-retail branch deposits. The non-retail branch deposits do not reflect traditional retail customer relationships, rather they are wholesale funds. These deposits do not reflect where any of WFBNA's customers are located, where they work, or where they conduct business. The adjusted deposits are $4.3 billion of retail deposits in South Dakota representing 0.3 percent of adjusted deposits. South Dakota represents the 29th largest rated area in terms of adjusted deposits. WFBNA operates 39 branches and 57 ATMs within South Dakota, representing less than 0.7 percent of the bank's branches and less than 0.1 percent of the bank's ATMs. The bank originated and purchased approximately $5.4 billion in loans or 0.3 percent of total reported loan originations and purchases during the evaluation period. The bank's primary loan products in the South Dakota are home mortgage and small loans to businesses.

<u>Sioux Falls MSA AA</u>

Within the Sioux Falls MSA AA, the bank had $309.2 billion deposits (including non-retail branch deposits) and ranked first amongst 37 financial institutions in the market with 52.9 percent market share. WFBNA operates 12 branches and 20 ATMs in the AA.

[45] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

SD Combined NonMetro AA

Within the SD NonMetro AA, the bank had $1.5 billion deposits and ranked first amongst 40 financial institutions in the market with 15.7 percent market share. WFBNA operates 22 branches and 24 ATMs in the AA.

Demographic Data

Sioux Falls MSA AA

The following table provides a summary of the demographics that includes housing and business information for the Sioux City MSA AA. Table A shows no tract, population, OOUs, businesses, and farms in the low-income tracts and over 36 percent of families in the AA are LMI. The area's median housing value in the Sioux Falls MSA AA is two times the MSA median income, but 2.7 times moderate-, and four times low-income, indicating a limited proportion of OOUs are affordable to many low-income residents.

Due to rounding, totals may not equal 100.0
(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

According to the February 2019 Moody's Analytics report, Sioux Falls' economy is improving. Wage growth is picking up because of the tight labor market, and a favorable job mix with strong gains in mid- and high-wage industries is lending additional support to hourly earnings, which are climbing at an above-average rate. Healthcare will account for one third of net new jobs over the next five years as well as a higher share of income gains. Stronger income gains and healthy household finances will extend gains in retail.

The largest employers in Sioux Falls include Sanford Health, Avera Health, and Smithfield Foods. Housing is slow to improve, single-family construction is moving sideways, and price appreciation is slowing.

According to the U.S. BLS, the unemployment rate for Sioux Falls MSA AA for the first quarter of 2019 was 2.0 percent and has decreased from 3.8 percent at the beginning of the evaluation period. The unemployment rate in the AA was lower than the overall state of South Dakota at 3.3 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by an existing community contact serving the bank's Sioux Falls MSA AA in conjunction with this evaluation. The organization stimulates economic development by creating a regional revolving loan fund in Clay, Lincoln, McCook, Minnehaha, Turner, and Union Counties. The organization also provides financing to individuals seeking to start or expand a business or purchase a home through the 502 Home Loan Partnership Program.

The community contact noted a significant need for low-income housing for the residents of the area. The contact noted that opportunities for participation in community programs are plentiful. Sioux Falls has a number of financial institutions, and there is no lack of banking products and services in the area.

Considering the information from the community contact and bank management as well as demographic and economic data, affordable housing represents a primary credit need for the Sioux Falls MSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by no tracts, population, OOUs, and small businesses coupled with limited home affordability for LMI individuals.

<u>SD Combined NonMetro AA</u>

The following table provides a summary of the demographics that includes housing and business information for the SD NonMetro AA. Table A shows a very small number of tracts and population in the low-income tracts, and very small volume of OOUs in the LMI tracts. In addition, over 35 percent of families in the AA are LMI. The area's median housing value in the SD Combined NonMetro AA is twice times the MSA median income, but 2.4 times moderate-, and four times low-income, indicating a limited proportion of OOUs are affordable to low-income residents. Median rents and the significant percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

Assessment Area: SD Combined Non-Metros (2016)

			Median Gross Rent			$502
			Families Below Poverty			9.0%

Source: 2010 U.S. Census and 2016 D&B Data
Due to rounding, totals may not equal 100.0
(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

According to the February 2019 Moody’s Analytics report, South Dakota’s economy is improving. Three-quarters of private industries are adding to payrolls, and job growth on a year-ago basis exceeds the U.S. average for the first time in three years. Exceptional weakness in agriculture will weigh on the economy this year. However, more residential and commercial building will drive above-average gains in construction in the near term. Overall, high housing affordability and job availability will attract domestic migrants to South Dakota.

According to the U.S. BLS, the unemployment rate as of December 2018 in the following counties range from a low of 2.6 percent (Beadle, Davison, Hughes, Tripp, and Yankton Counties) to a high of 6.2 percent (Todd County) while the state average is 3.3 percent.

Community Contacts

The analysis takes into consideration comments provided by four community contacts serving the bank’s SD Combined NonMetro AA in conjunction with this evaluation. Two organizations support small businesses in 22 Counties in South Dakota via technical assistance, loans, and a revolving loan fund in partnership with lending institutions. Two organizations support small farms in 20 Counties in Northeast South Dakota via agricultural loans, crop insurance, crop marketing assistance, agricultural education, and scholarships for students to study agriculture.

The community contacts noted a significant need for business loans to fund new commercial development projects and to assist businesses in starting up or expanding. The contacts noted that banks are meeting the credit needs in the community.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing, small business loans, and agricultural loans represent a primary credit need for the SD Combined NonMetro AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs, small farms, and small businesses coupled with limited home affordability for LMI individuals.

Scope of Evaluation in South Dakota

The rating for the State of South Dakota is primarily based on FS evaluations of the bank's performance in the Sioux Falls MSA AA and SD Combined NonMetro AA; however, performance in each AA was considered. Conclusions where a LS review affected the CRA Rating for the state are addressed within their respective tests. LS procedures were performed for the Rapid City CSA AA. A limited portion of the bank's overall lending, investments, and services were conducted in South Dakota; therefore, the performance in South Dakota received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN SOUTH DAKOTA

LENDING TEST

The bank's performance under the Lending Test in South Dakota is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Sioux Falls MSA AA and SD Combined NonMetro AA is excellent.

Lending Activity

Based on the tables below, lending levels reflect good responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on competition and market dominance based on deposits.

Number of Loans*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State Loans	%State Deposits
Sioux Falls MSA	11,087	4,414	499	32	16,032	40.9	45.1
SD Combined NonMetro	5,301	4,112	3,613	21	13,047	33.3	35.3
Rapid City CSA	6,119	3,539	424	10	10,092	25.8	19.6
Total	22,507	12,065	4,536	63	39,171	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Dollar Volume of Loans (000's)*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State* Loans	%State Deposits
Sioux Falls MSA	$1,874,278	$305,246	$52,392	$44,233	$2,276,149	41.8	45.1
SD Combined NonMetro	$741,256	$352,437	$607,377	$29,128	$1,730,198	31.7	35.3

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Sioux Falls MSA AA

WFBNA ranked first in deposits with 52.9 percent market share in the AA including non-retail deposits. In overall HMDA lending, WFBNA ranked third with 8.8 percent market share. Although WFBNA's HMDA market share is considerably lower than its deposit market share, this is primarily due to the majority of deposits are non-retail and also lending competition was significantly stronger, reflected by the 202 lenders, than competition for deposits, where there were 37 depository institutions in the AA. The 1st and 2nd top lenders in this market was Plains Commerce Bank with 11.9 percent market share and Franklin American Mortgage with 10.1 percent market share.

In small loans to businesses, WFBNA ranked third with a market share of 10.7 percent. The 1st and 2nd top lenders in this market were US Bank with 11.8 percent market share and The First NB in Sioux Falls with 11.3 percent market share.

SD Combined NonMetro AA

WFBNA ranked first in deposits with 15.7 percent market share in the AA. In overall HMDA lending, WFBNA ranked second with 7.6 percent market share. There is strong competition as reflected by the 190 lenders and 40 depository institutions in the AA. The top lender in this market was Franklin American Mortgage with 7.9 percent market share.

In small loans to businesses, WFBNA ranked first with a market share of 11.2 percent. The 2nd lender was Dacotah Bank with 9.4 percent market share.

Distribution of Loans by Income Level of the Geography

The bank exhibits an adequate geographic distribution of loans in the Sioux Falls MSA AA and good geographic distribution of loans in the SD Combined NonMetro AA.

Sioux Falls MSA AA

Home Mortgage Loans

Refer to Table O in the State of South Dakota section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- The AA contains no low-income tracts so our assessment focused on the bank's performance in moderate-income tracts.
- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in moderate-income geographies substantially meets the aggregate distribution of loans and is well below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of South Dakota section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is good.

- The AA contains no low-income tracts so our assessment focused on the bank's performance in moderate-income tracts.
- For 2012-2016, the proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is near to the proportion of businesses located in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly below the performance in 2012-2016.

Small Loans to Farms

Refer to Table S in the State of South Dakota section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's originations and purchases of small loans to farms. The bank's overall geographic distribution of small loans to farms for this evaluation is good.

- The AA contains no low-income tracts so our assessment focused on the bank's performance in moderate-income tracts.
- The bank's performance in both periods, 2012-2016 and 2017-2018, for small farm loans in moderate-income geographies substantially meets the aggregate distribution of loans and is significantly below the proportion of farms in those geographies.

<u>SD Combined NonMetro AA</u>

Home Mortgage Loans

Refer to Table O in the State of South Dakota section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- For 2012-2016, the proportion of home mortgage loans in LMI geographies exceeds the aggregate distribution of loans in LMI geographies.
- The proportion of loans in LMI geographies is well below the proportion of OOUs in those geographies.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of South Dakota section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is adequate.

- For 2012-2016, the proportion of the bank's small business loans in low-income geographies is significantly below both the aggregate distribution of loans and the proportion of businesses located in those geographies.
- The proportion of the bank's small business loans in moderate-income geographies exceeds both the aggregate distribution of loans and the proportion of businesses located in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending slightly exceeds the performance in 2012-2016.

Small Loans to Farms

Refer to Table S in the State of South Dakota section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's originations and purchases of small loans to farms. The bank's overall geographic distribution of small loans to farms for this evaluation is adequate.

- The AA contains no farms in low-income tracts so our assessment focused on the bank's performance in moderate-income tracts.
- For 2012-2016, the proportion of small farm loans in moderate-income geographies is significantly below the aggregate distribution of loans and exceeds the proportion of farms located in those geographies.
- The bank's small farm lending in 2017-2018 is stronger than the combined performance in 2012-2016.

Distribution of Loans by Income Level of the Borrower

The bank exhibits an excellent distribution of loans among individuals of different income levels and businesses and farms of different sizes, given the product lines offered by the institution.

<u>Sioux Falls MSA AA</u>

Home Mortgage Loans

Refer to Table P in the State of South Dakota section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The Sioux Falls MSA AA has homeownership affordability hurdles especially for low-income borrowers. As noted above, the area's median housing value is four times the income of low-income borrowers indicating a limited proportion of OOUs are affordable to low-income borrowers. Despite the affordability challenges, the bank's overall home mortgage lending to LMI borrowers in 2012-2016 exceeds the aggregate distribution of loans for LMI borrowers.

- The bank's overall home mortgage lending to low-income borrowers is well below the proportion of families and to moderate-income borrowers exceeds the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of South Dakota section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is excellent.

- For 2012-2016, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is near to the percentage of small businesses located in the AA.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly below the combined performance in 2012-2016.

Small Loans to Farms

Refer to Table T in the State of South Dakota section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's originations and purchases of small loans to farms. The distribution of the bank's originations and purchases of small loans to farms by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the percentage of small loans to farms originated or purchased substantially meets the aggregate small farm lending data for farms with revenues of $1 million or less and is well below the percentage of small farms located in the AA.

<u>SD Combined NonMetro AA</u>

Home Mortgage Loans

Refer to Table P in the State of South Dakota section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The SD Combined NonMetro AA has homeownership affordability hurdles especially for low-income borrowers. As noted above, the area's median housing value is four times the income of low-income borrowers indicating a limited proportion of OOUs are affordable to low-income borrowers. Despite the affordability challenges, the bank's overall home mortgage lending to LMI borrowers in both 2012-2016 and 2017-2018 periods exceeds the aggregate distribution of loans.
- The bank's overall home mortgage lending to low-income borrowers is significantly below the proportion of families and to moderate-income borrowers is near to the proportion of families.

Small Loans to Businesses

Refer to Table R in the State of South Dakota section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For 2012-2016, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.
- Based on the bank's performance in 2017-2018, the bank's small business lending exceeds the performance in 2012-2016.

Small Loans to Farms

Refer to Table T in the State of South Dakota section of appendix D for the facts and data used to evaluate the borrower distribution of the institution's originations and purchases of small loans to farms. The distribution of the bank's originations and purchases of small loans to farms by revenue is adequate.

- For 2012-2016, the percentage of small loans to farms originated or purchased is below the aggregate small farm lending data for farms with revenues of $1 million or less and is well below the percentage of small farms located in the AA.
- The bank's small farm lending in 2017-2018 exceeds the combined performance in 2012-2016.

Community Development Lending

The institution is a leader in making CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

<u>Sioux Falls MSA AA</u>

The level of CD lending in the Sioux Falls MSA AA is excellent. WFBNA made 32 CD loans in its AA for a total of $44.2 million, which represents 20.2 percent of allocated tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified affordable housing and small business lending needs in the AA. The bank originated 15 loans total of $33.6 million (76 percent) for the purpose of affordable housing. Additionally, the bank extended 11 CD loans totaling $7.3 million for the primary purpose of community services to assist LMI individuals.

Examples of CD loans in the AA include:

- In June 2017, WFBNA provided a $4.2 million construction loan for an affordable housing development. This 30-unit LIHTC development is located in Sioux Falls, SD. Nine of the units will be both income and rent restricted to households earning at or below 50 percent of the area MFI, the remaining 21 units will be income and rent restricted to households at or below 60 percent of the area MFI.
- In March 2018, WFBNA renewed a $1 million working capital line of credit for a non-profit organization that works to empower people of all ages to become healthier, self-sufficient,

productive members of their communities. The organization serve children, youth, adults and families with an array of prevention, education, employment, and care services. Over 90 percent of its clients are LMI individuals as they earn less than 80 percent of the area MFI.

SD Combined NonMetro AA

The level of CD lending in the SD NonMetro AA is excellent. WFBNA made 21 CD loans in its AA for a total of $29.1 million, which represents 17.0 percent of allocated tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified affordable housing needs in the AA. The bank originated 13 loans totaling $17.8 million (61.4 percent) for the purpose of affordable housing. Additionally, the bank extended six CD loans totaling $6.4 million for the primary purpose of community services to assist LMI individuals.

Examples of CD loans in the AA include:

- In May 2018, WFBNA renewed a $3 million working capital line of credit for a school that serves Lakota (Sioux) children and families since 1927. Over 67 percent of its clients are LMI as they earn less than 80 percent of the area MFI.
- In November 2015, WFBNA provided a $20 million line of credit to a Tax Credit Investment Fund. Of that total, $622,000 has been allocated to an affordable housing development located in Aberdeen, SD. The loan proceeds will be used to bridge the gap between the receipt of capital contributions from investors and the payment of equity investments to operating partnerships that own LIHTC projects.

Product Innovation and Flexibility

Sioux Falls MSA AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 40 loans totaling $5.8 million to LMI homebuyers that qualified under this program.

SD Combined NonMetro AA

The institution makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. The bank launched the NeighborhoodLIFT program in the AA in November 2017 and more than 200 potential homebuyers attended the event. WFBNA originated 14 mortgage loans totaling $1.9 million. Under the *your*FirstMortgage loan program, the bank has funded 23 loans totaling $2.4 million to LMI homebuyers that qualified under this program.

Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding the programs above.

Conclusions for Area Receiving a LS Review

Based on a LS review, the bank’s performance under the Lending Test in the Rapid City CSA AA is weaker than the bank’s overall excellent performance under the Lending Test in the FS areas due to lower performance in geographic distribution. Performance differences in the LS AA did not impact the Lending Test rating for the State of South Dakota.

Refer to Tables O through T in the State of South Dakota section of appendix D for the facts and data that support these conclusions.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of South Dakota is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the investment test, the bank's performance in the Sioux Falls MSA and SD Combined NonMetro AAs is excellent.

Qualified Investments										
	Prior Period*		Current Period		Total				Unfunded Commitments **	
Assessment Area	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Sioux Falls MSA	12	$2,771	94	$37,495	106	48.4	$40,266	49.1		
SD Combined NonMetro	3	$3,427	64	$19,684	67	30.6	$23,111	28.2		
Rapid City CSA	0	$0	46	$18,580	46	21.0	$18,580	22.7		
Total	15	$6,198	204	$75,759	219	100.0	$81,957	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

<u>Sioux Falls MSA AA</u>

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 18.4 percent of adjusted tier 1 capital allocated to the AA.

The investments and grants reflect excellent responsiveness to the needs identified in the AA including affordable housing and community services for LMI individuals and geographies. Over 97 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 84 grants totaling $2.3 million to a variety of organizations that primarily support affordable housing and community services.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved numerous complex LIHTC projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers.

Examples of CD investments in the AA include:

- In June 2017, WFBNA invested $4.9 million in a 30-unit affordable housing development located in Sioux Falls, South Dakota and will be targeted to families with children (95 percent of units) and to persons with physical disabilities (5 percent of units). Nine of the total units will be income and rent restricted to households earning at or below 50 percent of the area MFI and the remaining 21 units will be income and rent restricted to households earning at or below 60 percent of the area MFI. This activity is responsive to the identified need for affordable housing and is complex involving multiple parties including housing agencies and developers. WFBNA also demonstrated multi-faceted support by providing both the construction loan ($4.2 million) and equity investment in support of this affordable housing development.
- During the exam timeframe, WFBNA provided a $300,000 grant to a small business community fund through the Small Business DCC Program benefiting small businesses in the Cheyenne River Indian Reservation and statewide in South Dakota particularly within the Sioux Falls MSA AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.
- During the exam timeframe, WFBNA provided two grants totaling $256,000 to a local housing organization through the PMP for affordable housing in the Sioux Falls MSA AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

<u>SD Combined NonMetro AA</u>

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 13.5 percent of tier 1 capital allocated to the AA.

The investments and grants reflect excellent responsiveness to the needs identified in the AA including affordable housing and community services for LMI individuals and geographies. Virtually all of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 59 grants totaling $481,500 to a variety of organizations that primarily support affordable housing and community services.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved several complex LIHTC projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers.

Examples of CD investments in the AA include:

- In October 2015, WFBNA invested $40 million in an LIHTC fund. Of this total investment, $4.6 million was allocated to a development located in Aberdeen, South Dakota. The development requires that 40 units restricted to tenants earning no more than 60 percent of the area MFI. This activity is responsive to the identified need for affordable housing. The investment is also complex involving numerous parties.
- In October 2018, WFBNA provided a $4.2 million investment for an affordable housing development located in Yankton, South Dakota. This development is comprised of 22 one-bedroom units and 18 two-bedroom units, with 100 percent of the total units targeted to

households with income between 30 and 60 percent of the area MFI. This activity is responsive to the identified need for affordable housing.

Conclusions for Area Receiving a LS Review

Based on a LS review, the bank's performance under the Investment Test in the Rapid City CSA AA is consistent with the bank's overall excellent performance in the Investment Test in the FS areas.

SERVICE TEST

The institution's performance under the Service Test in South Dakota is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the service test, the institution's performance in the Sioux Falls MSA AA and SD Combined NonMetro is excellent.

Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the institution's AAs, particularly LMI geographies and/or LMI individuals.

Distribution of Branch Delivery System											
	Deposits	Branches						Population			
Assessment Area	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%)				% of Population within Each Geography*

Sioux Falls MSA AA

As of December 31, 2018, WFBNA operates 12 branches and 20 ATMs in the Sioux Falls MSA AA. All of these branches are full-service locations. There are no branches in low-income geographies; however, there are no low-income CTs or populations within the AA. There are five branches in moderate-income CTs. The branch distribution in moderate-income geographies significantly exceeds the percentage of the population in moderate-income CTs in the AA.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed two branches during the evaluation period. One of the branches was located in a moderate-income CT. This branch closure did not negatively impact the distribution of branches relative to the population residing in LMI geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 5:00 pm, with five branches open until 6:00 pm. Of the total branches, seven are also open on Saturday from 9:00 am to 12:00 and 1:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

SD Combined NonMetro AA

As of December 31, 2018, WFBNA operates 21 branches and 24 ATMs in the SD Combined Non-Metro AA. All of these branches are full-service locations. There are no branches in low-income geographies; however, the population is very low in the low-income geographies in the AA. There are eight branches located in moderate-income CTs. The branch distribution in moderate-income geographies significantly exceeds the percentage of the population in moderate-income CTs in the AA.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed two branches, both in middle-income CTs. This branch closure did not negatively impact the distribution of branches relative to the population residing in LMI geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 5:00 pm, with five branches open until 7:00 pm. Of the total branches, five are also open on Saturday from 9:00 am to 12:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Community Development Services

The institution provides a significant level of CD services.

Sioux Falls MSA AA

The level of CD services in the Sioux Falls MSA AA is excellent. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 649 CD service activities to 31 organizations since the last evaluation, logging a total of 2,042 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing and economic development. The bank's assistance provided was responsive to the identified need in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- WFBNA team members provided 199 hours of Board service, financial education, and outreach to a nonprofit housing organization that works in partnership with people in need to build decent and affordable housing.
- WFBNA team members provided 503.5 hours of Board service and ongoing outreach to a community organization that works to eliminate hunger in South Dakota.

<u>SD Combined NonMetro AA</u>

The level of CD services in the SD Combined NonMetro AA is good. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 99 CD service activities to 22 organizations since the last evaluation, logging a total of 307 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing which is responsive to identified need in the AA. The following are examples of CD services provided in this AA:

- A WFBNA team member provided 41 hours of Board service to a nonprofit housing organization that works to build decent and affordable housing.
- A WFBNA team member provided 13 hours of Board service to a community organization that utilizes community-led solutions to identify and resolve community concerns with a primary focus on education, financial stability, and health. Over 65 percent of its clients are LMI individuals as they earn less than 80 percent of the area MFI.

Conclusion for Areas Receiving a LS Review

Based on a LS review, the bank's performance under the Service Test in the Rapid City CSA AA is consistent with the bank's overall performance under the Service Test in the FS area.

State Rating

State of Tennessee

CRA rating for the State of Tennessee[46]: Satisfactory
The Lending Test is rated: Outstanding
The Investment Test is rated: Low Satisfactory
The Service Test is rated: Low Satisfactory

The major factors that support this rating include:

- Excellent lending activity;
- Good geographic distribution of loans;
- Excellent borrower distribution of loans;
- WFBNA is a leader in providing CD loans, which has a significant positive impact on the Lending Test;
- WFBNA's use of flexible products has a positive impact on the Lending Test;
- Adequate level of CD investments;
- Retail delivery systems are accessible to all portions of the AA; and
- Adequate CD services.

Description of Institution's Operations in Tennessee

WFBNA delineated one AA within Tennessee which includes the Nashville-Davidson-Murfreesboro-Franklin, TN MSA (Nashville MSA AA). Refer to Appendix A for a complete description of the AA. The Nashville MSA AA received a FS review. WFBNA has $1.8 billion deposits representing 0.1 percent of adjusted deposits in Tennessee, making it the 38th largest rated area by deposits. WFBNA ranked tenth with a 2.9 percent deposit market share in the Nashville MSA. The largest banks in the MSA in terms of deposits were Pinnacle Bank with a market share of 14.7 percent and Bank of America with a market share of 14.0 percent. WFBNA operates 12 branches and 12 ATMs in the State of Tennessee, representing 0.2 percent of the bank's branches and 0.09 percent of the bank's ATMs. The bank originated and purchased $13.3 billion in loans or 0.7 percent of total reported loan originations and purchases during the evaluation period in Tennessee. The bank's primary loan products in the State of Tennessee are home mortgage and small loans to businesses.

Demographic Data

The following table provides a summary of the demographics that includes housing and business information for the Nashville MSA AA. Table A indicates that the volume of OOUs in the low-income CTs is very small and over 38 percent of families in the AA are LMI. The area's median housing value in the Nashville MSA AA is 3 times the area's median income, but 3.7 times moderate-, and 6 times low-income, indicating a limited proportion of OOUs are affordable to LMI families. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

[46] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

Economic Data

According to the August 2018 Moody's Analytics report, the Nashville economy remains solid despite a slower pace of job additions. Although job growth has decreased from 2017, Nashville continues to add workers faster than the nation. The largest sectors by employment are Professional and Business Services and Education and Health Services. Major employers include Vanderbilt University Medical Center, hospital operator HCA Inc., and Nissan North America Inc.

Nashville is the capital of Tennessee which helps drive the economy along with tourism and manufacturing. Nashville has a favorable business-tax structure, which along with its central location and well-educated workforce make it attractive for businesses to locate and expand. The area has a booming tech scene which will help drive growth in the coming years. Numerous health-tech startups have already established in Nashville, attracting workers to the area with job opportunities. In the last five years high-tech employment has risen 25 percent in Nashville compared to 12 percent nationally.

Housing prices are rising rapidly as strong population growth and rising incomes drive up demand. At the same time, a shortage of labor and rising material costs are holding back homebuilding.

According to the U.S. BLS, the unemployment rate for Nashville MSA AA for the third quarter of 2018 was 2.7 percent and is amongst the lowest in the South and has decreased from 5.6 percent at the beginning of the evaluation period. The unemployment rate in the AA was lower than the overall state of Tennessee at 3.7 percent for the same period

Community Contacts

The analysis takes into consideration comments provided by two community contacts pertaining to the

Nashville MSA in conjunction with this evaluation. The contacts represent members of local government agencies.

One contact noted that the primary credit needs in Smith County are home, business, and small dollar consumer loans. Per the contact, new mortgage lending regulations have made it tougher for banks to meet credit needs; however, the banks in the area are willing to make loans to anyone that qualifies. The local banks are also willing to provide small business loans for most business ventures, if they are viable. In addition, most banks are willing to make small dollar consumer loans, but the general public seems to gravitate to payday lenders because their visibility and easy access. The contact noted that banks are very involved in the community by providing donations and volunteers for various community development organizations.

Primary credit needs as noted by the other contact include affordable housing, consumer loans and revitalization of certain downtown areas. There is also opportunity for banks to get involved through sponsorships and leadership on boards. This contact also felt that banks in the area were involved in the community.

Considering the information from the community contact and bank management as well as demographics and economic data, affordable housing and small business lending represents a primary need in the Nashville MSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

Scope of Evaluation in Tennessee

The rating for the State of Tennessee is based on a FS evaluation of the bank's performance in the Nashville MSA AA. There are no LS areas in the State of Tennessee. A limited portion of the bank's overall lending, investments, and services were conducted in Tennessee; therefore, the performance in Tennessee received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN TENNESSEE

LENDING TEST

The bank's performance under the Lending Test in Tennessee is rated Outstanding.

Conclusions for Area Receiving a FS Review

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Nashville MSA AA is excellent.

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD presence.

Number of Loans*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State Loans	%State Deposits
Nashville MSA	57,102	7,005	301	11	64,419	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Dollar Volume of Loans (000's)*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State* Loans	%State Deposits
Nashville MSA	$12,970,852	$339,637	$7,412	$115,549	$13,433,450	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

WFBNA ranked tenth in deposits with 2.9 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 8.1 percent market share. There is strong competition as reflected by over 700 lenders and 63 depository institutions in the AA. The second and third top lenders in the market were Quicken Loans with 3.7 percent market share and Franklin American Mortgage Co. with 3.4 percent market share.

In small loans to businesses, WFBNA ranked 12th with a market share of 1.8 percent. The top lenders were American Express with a market share of 19.7, Chase with a market share of 11.9 percent, and Bank of America with a market share of 7.6 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in its AA.

Home Mortgage Loans

Refer to Table O in the State of Tennessee section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in low-income geographies is below both the aggregate distribution of loans and the proportion of OOUs in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of Tennessee section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for small business loans in LMI geographies exceeds the aggregate performance in those geographies.

- The banks performance for small business loans exceeded the proportion of businesses located in low-income geographies and was near to the proportion in moderate-income geographies.

Distribution of Loans by Income Level of the Borrower

The bank exhibits an excellent distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

Home Mortgage Loans

Refer to Table P in the State of Tennessee section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- There Nashville MSA AA has ownership affordability hurdles especially for low-income borrowers. As noted above, the area's median housing value is 6 times the income of low-income borrowers indicating a limited proportion of OOUs are affordable to low-income borrowers. Despite the affordability challenges, the bank's performance in 2012-2016 to LMI borrowers exceeds the aggregate lending.
- The bank's overall home mortgage lending to low-income borrowers is well below the proportion of families and for moderate-income borrowers is near to the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly lower than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Tennessee section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For 2012-2016 combined, the bank's distribution of small loans to businesses with revenues of $1 million or less substantially meets the aggregate small business lending data for businesses with revenues of $1 million or less and is well below the percentage of small businesses located in the AA.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly less than the combined performance in 2012-2016.

Community Development Lending

The institution is a leader in making CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The level of CD lending in the Nashville MSA AA is excellent. WFBNA made 11 CD loans in its AA for a total of $116 million, which represents over 58 percent of allocated tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified affordable housing needs in the AA. The bank made 10 CD loans totaling $76 million (65.5 percent) for the purpose of affordable housing. Additionally, the bank extended one CD loans totaling $40 million for the primary purpose of revitalizing and stabilizing a distressed area within the AA.

Examples of CD loans in the AA include:

- In September 2014, WFBNA provided a $40 million construction loan for a housing development located in a moderate-income neighborhood. The area is part of a Redevelopment District designated by the City of Nashville. The revitalization of this project has been a top priority for Nashville city leaders and the project is expected to be a catalyst for development in the area.
- In February 2014, WFBNA provided a $5 million term loan for a 120-unit LIHTC affordable housing development in Smyrna, TN. All units are restricted to tenants earning between 50 to 60 percent of the area MFI.

Product Innovation and Flexibility

The institution makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. The bank launched the NeighborhoodLIFT program in the Nashville MSA AA in October 2017 and more than 300 potential homebuyers attended the event and more than 200 homebuyers utilized the down payment assistance ($15,000) to purchase a home. Of the 200 WFBNA originated 48 home mortgage loans totaling $8.8 million. Under the *your*FirstMortgage loan program the bank has funded 46 loans totaling $8.0 million to LMI homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding these programs.

INVESTMENT TEST

The bank’s performance under the Investment Test in the State of Tennessee is rated Low Satisfactory.

Conclusions for Area Receiving a FS Review

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the investment test, the bank’s performance in the Nashville MSA AA is adequate.

<table>
<tr><td colspan="11">Qualified Investments</td></tr>

</table>

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

Nashville MSA AA

The institution has an adequate level of qualified CD investments and grants, although rarely in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 5.7 percent of tier 1 capital allocated to the AA.

The investments and grants exhibit adequate responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 96 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 83 grants totaling $5.2 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution occasionally uses innovative and/or complex investments to support CD initiatives. CD Investments involved two complex LIHTC projects where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased several government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In December 2016, WFBNA provided a $4.1 million grant to an affordable housing organization. This is the allocated portion for Nashville, Tennessee. The organization's focus is to promote reinvestment in urban, suburban and rural communities by local financial institutions working cooperatively with residents and local government. The organization provides funds to over 235 organizations, monitors their progress, and provides financial support, technical assistance, and training for community-based revitalization efforts. Over 70 percent of its clients are LMI individuals as they earn less than 80 percent of the area MFI. This activity is responsive to the identified need for affordable housing.
- In March 2016, WFBNA invested $35.2 million in an LIHTC fund. Of this total investment, $1 million was allocated to a development located in Wheatland, Wyoming, with 6 units restricted to tenants earning no more than 60 percent of the area MFI. This activity is responsive to the identified need for affordable housing.
- During the exam timeframe, WFBNA provided three grants totaling $2.7 million to several small business organizations through the Small Business DCC Program benefiting small businesses in Tennessee including the Nashville MSA CSA AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.
- During the exam timeframe, WFBNA provided two local initiatives grants totaling $250,000 to two housing Partnership organizations to administer the NeighborhoodLIFT Down Payment Assistance program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.

SERVICE TEST

The bank's performance under the Service Test in Tennessee is rated Low Satisfactory.

Conclusions for Area Receiving a FS Review

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Nashville MSA AA is adequate.

Retail Banking Services

Service delivery systems are reasonably accessible to geographies and individuals of different income levels in the institution's AA, particularly LMI geographies and/or LMI individuals

Distribution of Branch Delivery System											
Assessment Area	Deposits	Branches						Population

Distribution of Branch Openings/Closings						
Assessment Area	# of Branch Openings	# of Branch Closings	Net change in Location of Branches (+ or -)			
			Low	Mod	Mid	Upp
Nashville MSA	0	0	0	0	0	0

As of December 31, 2018, WFBNA operates 12 branches and 12 ATMs in the Nashville MSA AA. Of these branches, 11 are full-service locations and one is a limited-service branch. There are no branches in the low-income geographies: however, the population in low-income geographies is low compared to total demographics. There is one branch in a moderate-income CT. The branch distribution in moderate-income geographies is well below the percentage of the population in moderate-income CTs in the AA. When considering an additional three branches within close proximity to LMI geographies, the bank's distribution remains below demographics.

The bank did not open or close any branches during the evaluation period.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 4:30 and 5:00 pm and Friday from 9:00 am to 6:00 pm. Five branches are also open on Saturday from 9:00 am to 1:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Community Development Services

The institution provides an adequate level of CD services.

The level of CD services in the Nashville MSA AA is adequate. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 68 CD service activities to 21 organizations since the last evaluation, logging a total of 207 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing which is responsive to an identified need in the AA. The following are examples of CD services provided in this AA:

- WFBNA team members provided 12 hours of Board service and ongoing outreach to a community organization whose sole effort is to provide affordable housing and rehabilitate neighborhoods.
- A WFBNA team member provided 39 hours of ongoing outreach to a community organization that utilizes community-led solutions to identify and resolve community concerns with a primary focus on education, financial stability, and health.

State Rating

State of Texas

CRA rating for the State of Texas[47]: Outstanding
The Lending Test is rated: Outstanding
The Investment Test is rated: High Satisfactory
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Excellent lending activity;
- Good geographic distribution of loans;
- Good borrower distribution of loans;
- WFBNA is a leader in providing CD loans, which has a significant positive impact on the Lending Test;
- WFBNA's use of flexible products has a positive impact on the Lending Test;
- Good level of CD investments that are responsive to AA needs;
- Retail delivery systems are readily accessible to all portions of the AA; and
- WFBNA is a leader in providing CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in Texas

WFBNA delineated 20 AAs within Texas including the Austin-Round Rock, TX MSA (Austin MSA AA); Dallas-Fort Worth, TX CSA (Dallas CSA AA); Houston-The Woodlands, TX CSA (Houston CSA AA); San Antonio-New Braunfels, TX MSA (San Antonio MSA AA); Amarillo-Borger, TX CSA (Amarillo CSA AA); Beaumont-Port Arthur, TX MSA (Beaumont MSA AA); Brownsville-Harlingen-Raymondville, TX CSA (Brownsville CSA AA); College Station-Bryan, TX MSA (College Station MSA AA); Corpus Christi-Kingsville-Alice, TX CSA (Corpus Christi CSA AA); El Paso, TX MSA (El Paso MSA AA); Killeen-Temple, TX MSA (Killeen MSA AA); Laredo, TX MSA (Laredo MSA AA); Lubbock, TX MSA (Lubbock MSA AA); McAllen-Edinburg-Mission, TX MSA (McAllen MSA AA); Midland-Odessa, TX CSA (Midland CSA AA); San Angelo, TX MSA (San Angelo MSA AA); Victoria-Port Lavaca, TX CSA (Victoria CSA AA); Waco, TX MSA (Waco MSA AA); Wichita Falls, TX MSA (Wichita Falls MSA AA); and TX Combined Non-Metros (TX Combined NonMetro AA).

The Austin MSA AA, Dallas CSA AA, Houston CSA AA, and San Antonio MSA AA received full scope reviews. These areas accounted for the majority of the lending (82.6 percent) and deposits (81.5 percent) amongst the AAs in Texas. Refer to Appendix A for a complete description of each AA. Texas represents the 3rd largest rated area by deposits. WFBNA has $72.5 billion of deposits representing 5.7 percent of adjusted deposits. WFBNA operates 608 branches and 1,194 ATMs in Texas representing 10.9 percent of branches and 8.8 percent of the bank's ATMs. The bank originated and purchased approximately $154.6 billion in loans or 8.3 percent of total reported loan originations and purchases during the evaluation period. The bank's primary loan products in Texas are home mortgage and small loans to businesses.

[47] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

Austin MSA AA

Within the Austin MSA AA, the bank had $8.3 billion in deposits and ranked first amongst 67 financial institutions in the market with a 19.6 percent market share. Bank of America and JPMorgan Chase Bank ranked second and third with market shares of 18.2 and 18.0 percent, respectively. WFBNA operates 66 branch offices and 113 ATMs in the AA.

Dallas CSA AA

Within the Dallas CSA AA, the bank had $19.7 billion in deposits and ranked third amongst 167 financial institutions in the market with a 7.1 percent market share. Bank of America and JPMorgan Chase Bank ranked first and second with a market share of 28.6 and 21.8, respectively. WFBNA operates 171 branch offices and 360 ATMs in the AA.

Houston CSA AA

Within the Houston CSA AA, the bank had $26.6 billion in deposits and ranked second amongst 102 financial institutions in the market with a 10.8 percent market share. JPMorgan Chase Bank ranked first with a market share of 41.7 percent. WFBNA operates 185 branch offices and 353 ATMs in the AA.

San Antonio MSA AA

Within the San Antonio MSA AA, the bank had $4.5 billion in deposits and ranked third amongst 61 financial institutions in the market with a 4.0 percent market share. USAA Federal Savings Bank and Frost Bank ranked first and second with a market share of 65.8 and 7.5 percent, respectively. WFBNA operates 48 branch offices and 87 ATMs in the AA.

Demographic Data

Austin MSA AA

The following table provides a summary of the demographics that includes housing and business information for the Austin MSA AA. Table A indicates that the volume of OOUs is small in low-income CTs and over 39 percent of families in the AA are LMI. The area’s median housing value in the Austin MSA AA is 2.9 times the area’s median income, but 3.6 times moderate-, and 5.7 times low-income, indicating a limited proportion of OOUs are affordable to LMI. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Economic Data

According to the January 2019 Moody's Analytics report, the Austin economy has accelerated in recent months, and job growth has been twice the national average over the past year. Most major industries have shared in the gains, with construction leading the way. However, federal and state payrolls have been flat, as workers left to take higher-paying jobs in the private sector.

The expansion of the tech industry will drive growth in 2019. In December, Apple announced that it will invest $1 billion in a new corporate campus, with an initial goal of hiring up to 5,000 and potentially as many as 15,000. The new jobs will be well-paying positions in engineering, research and development, operations, finance, sales and customer support.

Homebuilding is strong though home prices are decelerating. Home sales are on a record pace, and new single-family permits are in the vicinity of the peak of the 2006 boom. Multifamily permits are also elevated and close to their 2012 peak. As a result, total permits are at a 30-year high. Demand for workers in the building trades has construction employment up at a double-digit pace year over year. The extra supply on the market has slowed the growth in house prices, though. Whereas the pace was twice the national average, it is now below the national rate. Further, past price increases have reduced affordability in some parts of the metro area, another weight on price appreciation. Still, the inflow of well-paid professionals and population growth triple the national average will keep demand for housing strong over the coming year.

The AA's major employers are the University of Texas at Austin, Dell Inc., and Seton Healthcare Network. The Austin economy is driven by education, technology, and health care. According to the U.S. BLS, the unemployment rate for the 4Q of 2018 remained at decade lows at 3.0 percent, down from

5.7 percent at the beginning of the evaluation period. The AA unemployment rate was less than the overall state at 3.5 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by four community contacts that serve the bank's Austin MSA AA. The contacts were representatives from an economic development corporation, an affordable housing corporation, an economic development administration, and a revitalization authority.

The economic development organization is a department within the City of Lockhart for the purpose of creating and retaining jobs in the area through business expansions and recruitment. This organization has various resources available to incentivize new business investment in the community, including tax abatements, sales tax rebate, tax exempt financing, and development assistance packages to help fund development cost. The contact mentioned that the greatest need for the area is jobs and skilled training. He indicated that the local colleges have supported training programs to develop skills needed by larger employers. He also mentioned the need for more affordable housing units and more variety in housing options as there is a supply shortage of affordable housing. There is a need for new housing developments. The lack of housing has made it difficult to attract new teachers. He said that the school district has identified a specific need for 14 housing units. He thinks an apartment complex and/or affordable housing units could address this concern.

The affordable housing corporation is a non-profit organization that was created at the direction of Texas Legislature to serve as a self-sustaining and statewide affordable housing provider. The organization targets the housing need of low-income families and other underserved populations who do not has acceptable housing options through conventional financial channels. This organization provides mortgage loans and down payment assistance grants to eligible home buyers through several programs funded by the state to assist LMI families. The contact stated affordable housing is a critical needs but lenders have reported that poor credit in an issue for many LMI families.

The economic development administration is tasked with promoting economic development through business entities and municipalities. The organization provides information and economic data to help facilitate development opportunities. They do not work directly with banks but help entities understand that banks can be a partner in many projects. The contact stated that most markets in the central Texas region has been doing well for the past several years but the Austin, Texas market is strong. Unemployment is low at 4.9 percent and RE values are increasing. Land costs are significant, causing many projects to experience higher costs associated with RE taxes when it comes to affordability for LMI individuals (a significant detriment to affordability). Technology sector has been a contributing factor to population growth, providing higher paying employment opportunities. There are many opportunities for banks to get involved in commercial projects including multifamily. The contact indicated a need for small business financing and education for business entrepreneurs to better understand finances.

The revitalization authority's mission is to engage in commercial, residential and cultural development that promotes community well-being, while respecting the people, institutions and history of East Austin and other underserved communities. Travis County and the City of Austin are booming, with a net of 110 people moving there daily. The historic "music capital trend" has changed, and there is a lot of wealth coming from the high-tech industry. Austin fared well during the last recession and the current economy is pretty much “exploding” in central Austin. The contact indicated that there have been contributions from Wells Fargo dealing with Historic Restorations.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Austin MSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

Dallas CSA AA

The following table provides a summary of the demographics that includes housing and business information for the Dallas CSA AA. Table A indicates that the volume of OOUs is small in low-income CTs and over 39 percent of families in the AA are LMI. The area’s median housing value in the Dallas CSA AA is 2.4 times the area’s median income, but 3 times moderate-, and 4.8 times low-income, indicating a limited proportion of OOUs are affordable to LMI. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

According to the August 2018 Moody’s Analytics report, Dallas’ economy is in the late expansion phase. Dallas’s vigorous advance is undiminished, with job growth more than twice the national pace over the past year. Essentially all industries have shared in the outsize gains, led by construction and core professional services. Now that the huge, high-profile corporate relocations of recent years by Toyota, Liberty Mutual, State Farm, and others are complete, demand will increase for a wide variety of related services such as accounting, legal, financial and architecture. Professional services employment is up more than 4 percent over the past year, more than twice the national pace. One effect has been that upwards of 20 major nonresidential construction projects are either under way or planned, and most are on a pre-lease basis.

The large concentration of technology-related businesses will attract new employers and lead to gains at local universities. Although Austin is the better-known high-tech hub of Texas, Dallas has twice as many such jobs, and growth in this category has recently accelerated to 3 percent year over year. The presence of companies such as AT&T and Texas Instruments drives steady demand for a well-educated information technology workforce as well as expansion of local higher education to meet the need. Enrollment at the Dallas branch of the University of Texas grew 5.9 percent in 2017, the biggest percentage gain among public universities surveyed by Axiometrics.

Homebuilding has helped lift the wider economy in previous years. Total new permits are already well above their peak prior to the Great Recession, a milestone achieved by very few other metro areas. The mix is evenly distributed, as those for single-family homes have risen closer to their prerecession peak, while those for multifamily remain near the 30-year high reached in 2015. This level of activity has kept builders busy, and construction employment has risen nearly 9 percent over the past year.

The area's top employers are Wal-Mart Stores Inc., AT&T, and Baylor Scott & White Health. According to the U.S. BLS, the unemployment rate for the 2nd quarter of 2018 was at 3.5 down from 6.6 percent at the beginning of the evaluation period. The AA unemployment rate was less than the overall state at 4.7 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by four community contacts that serve the bank's Dallas CSA AA. The contacts were representatives from an economic development corporation, a homeownership center, a minority business development agency, and a community organization.

The economic development corporation was formed after the passage of a $.005 sales tax proposition and primarily works to attract new businesses and serve the needs of current businesses, industries, and citizens in Kaufman County, an area within the Dallas CSA AA. According to the community contact, the industrial incentive program is one of the most aggressive in the state of Texas providing assistance in the form of low interest loans, grants, infrastructure improvements, and land purchase. The community is the eight fastest growing County in the state of Texas. There are lots of new retail, industrial, and housing developments. The local economy is growing rapidly and the banks all over the county are very involved in the growth and the development opportunities. The area has a diversified economic base which include General commerce, Industrial manufacturing, Retail and wholesale trade activity, Distribution, Commuters, Services, Federal, state, and local governments, and mental health services. The contact indicated that there needs to be more affordable housing project with a price point between $125,000 to $150,000 and very little down payments. There are opportunities for local banks to participate in financing the purchase of these homes while the home builders can also provide funding for home buyers. The contact also indicated that the majority of the businesses in the locality are small business with more small businesses being attracted to the community. Providing funding to the existing and new small businesses to assist with working capital is an opportunity that local banks can continue to tap into to help sustain the economic and developmental growth in the area.

The homeownership center is an organization dedicated to improving the lives of Texans through asset-building and job creation. The mission is to further the economic development of Texas by promoting and assisting in the growth and development of small business concerns and in the development of affordable housing to LMI families. The organization operates statewide and also serves the Dallas CSA AA. The contact indicated that the Dallas area has a low unemployment rate and is also experiencing an increase in small business job growth. The area's housing market continues to experience strong sales growth as housing supply declines and sale prices increase. The contact stated that poor or delinquent credit has been a routine problems for their clients. Most have credit reports in the high 500 to low 600 credit score. Affordable housing stock is not readily available and less than 500 units are "move-in" ready. There is a need for loan products that combines home improvements and purchase in one loan closing.

The minority business development agency assists minority-owned businesses retain and create jobs, obtain procurement contracts and financing for working capital and asset acquisition. The organization operates in the Dallas and Fort Worth area and is funded by the US Department of Commerce Minority Business Development Agency. The contact indicated that the economic conditions are competitive and the minority business community was significantly impacted by the recession and the slowdown in business conditions. The economy continues to impact small business owners. The contact also indicated that working capital availability is the biggest need for small businesses. Working capital is the lifeblood that allows a small business to grow.

The community organization is a nonprofit and HUD certified Community Development Corporation that provides the community home buyer counseling prior to home purchase and post home buyer training. The organization's mission is to provide sustainable, affordable, and quality housing while revitalizing Dallas communities. The vision is that all the communities are safe, vibrant, and productive neighborhoods which contribute to the quality of life in Dallas. The contact stated that the organization's impact on the community has been the provision of affordable housing for LMI individuals by way of 109 housing units since 2002. Record home price appreciation has eroded housing affordability in the metroplex. According to the National Association of Home Builders/Wells Fargo's Housing Opportunity Indexes, Dallas was the least affordable major metro area in the state, with about 50 percent of homes sold during fourth quarter 2016 considered affordable for the median-income family. Fort Worth remained more affordable relative to Dallas and the nation, with 64 percent of homes sold in the fourth quarter viewed as affordable. Home affordability has been declining in the metroplex since early 2013. The contact stated that there is a great deal of opportunity for bank involvement, whether it be financing LMI affordable housing (maybe First Time Home Buyer programs), gap funding, or grants and donations for the purpose of funding operating costs and program costs associated with financial literacy programs and Home Buyer Training seminars. Financial institutions just need to seek it out.

The bank conducted research in the AA and identified community needs for affordable housing for LMI families, financial education for the unbanked or underbanked homeless services, neighborhood revitalization/stabilization, small business assistance, and workforce development and job readiness.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Dallas CSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

Houston CSA AA

The following table provides a summary of the demographics that includes housing and business information for the Houston CSA AA. Table A indicates that the volume of OOUs is small in low-income CTs and over 40 percent of families in the AA are LMI. The area's median housing value in the Houston CSA AA is 2.4 times the area's median income, but 3 times moderate-, and 4.8 times low-income, indicating a limited proportion of OOUs are affordable to LMI. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

Assessment Area: Houston-The Woodlands TX CSA (2016)

Economic Data

According to the August 2018 Moody's Analytics report, the Houston economy has strengthened significantly since the fall of 2017 after several weak years. The local Purchasing Managers' Index has continuously signaled expansion since October 2017. Job growth is now well above the national average and comparable with high-fliers Dallas and Austin. All major industries are sharing in the gains, with professional services and construction the runaway leaders. As a result, high-wage employment has risen at double the national pace over the past year.

The uptrend in oil prices from the range of $45 per barrel this time last year to the $70 range will boost exploration statewide. Active drill rigs in Texas are already up 15 percent over the past year. In turn, demand for related professional services, equipment and supplies will rise. Professional services, including technical and engineering, have risen 8.7 percent over the past year, a multiple of the national rate. Growth in manufacturing employment has also outpaced the national average, though not by as much.

Residential construction will increase. Most recently, new multifamily permits have begun to recover from their downturn in 2015 and 2016 after the oil price collapse. One driver is that mining employment is rising again, as the transient nature of jobs in that industry tends to cause employees to rent. With respect to new permits for single-family units, a significant increase occurred from September to February after Hurricane Harvey destroyed thousands of houses in August. Although they have come back down somewhat since, the pace is still nearly as high as in mid-2007, just before the Great Recession. Moreover, although house prices are still increasing at a below-average rate, they have begun to accelerate, encouraging developers. Solid job growth and still-low interest rates will add to demand.

The AA's major employers are Memorial Hermann Health System, the University of Texas Health Science Center, and Schlumberger Ltd. According to the U.S. BLS, the unemployment rate for the 2Q of 2018 was 4.4 percent, down from 6.6 percent at the beginning of the evaluation period. The AA unemployment rate was less than the overall state at 4.7 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by four community contacts that serve the bank's Houston CSA AA. The contacts were representatives from a housing department, an affordable housing organization, a community redevelopment corporation, and a small business development center.

The housing department is primarily responsible for the administration, coordination, and management of the Community Development Bank Block Grant (CDBG) and Investment Partnership Program. The organization is responsible for the development of a five-year strategy assessing the non-housing and housing community development needs of the city. All CDBG funds must be used to provide a benefit to LMI persons, eliminate a slum or blight condition, and meet an urgent community development need. The contact stated that the current economic conditions are good with real estate sales doing well; however, credit programs and the lack of income are the two major limitations to homeownership. Other fees such as flood insurance and wind/storm insurance increase the cost of construction and ownership. A second or buy-down program is needed to bring down the sales price to $100,000 - $110,000 range. There are lots of older homes that need rehab and acquisition program.

The affordable housing organization serves the Houston metropolitan area and is committed to developing affordable housing and economic opportunities in the area. The organization has created several programs to assist with homeownership. The Houston economy is good. The oil and gas industry is driving most of the Houston economy; however, with oil prices decreasing some energy companies have experienced major layoffs. The contact indicated that most of the clients that come into this organization have a banking relationship with an area bank or credit union. Poor credit is a major problem, thus the reason that the organization created the homebuyer club which offers free financial workshop for persons with credit issues. The contact indicated that there are opportunities for banks to provide affordable mortgage loan products and to provide loans to replace aging housing stock. There is also a need for affordable rental units and single-family housing. In addition, small businesses support the neighborhood and create jobs and technical assistance and small dollar funding is needed to support the area's small businesses.

The community redevelopment corporation offers multiple affordable housing programs including home buyer education for first-time homebuyers, foreclosure prevention, loan modification, disaster recovery, rental assistance, and rent-to-own programs. This organization serves the Southeast Houston area. The contact stated that Houston is a great place to live and jobs are available for those who want to work and are trained; however, there is a large LMI population with multiple needs especially for affordable housing. Credit programs are a huge challenge. Many clients have broken rental leases, creating credit problems. A significant number of people in the financial literacy and first-time home buyer classes don't have bank accounts. The contact also stated that there is a need for construction and rebab loans to help rebuild a whole community that was flooded and needs to be demolished and rebuilt.

The small business development center was established in 2004 and provides technical assistance to economic development corporations and assists in the development of new business start-up, job creation, and capital injection. The organization primarily serves the Southern Houston area. The contact indicated that general financing for small business is needed. Also, micro lending for agriculture and farming is limited. There has been some small business lending, construction on the investment side but overall banks should seek out these small business opportunities.

The bank conducted research in the AA and identified community needs for affordable housing for LMI families, financial education for the unbanked or underbanked homeless services, and workforce development and job readiness.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Houston CSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

San Antonio MSA AA

The following table provides a summary of the demographics that includes housing and business information for the San Antonio MSA AA. Table A indicates that the volume of OOUs is small in low-income CTs and over 39 percent of families in the AA are LMI. The area's median housing value in the San Antonio MSA AA is 2.4 times the area's median income, but 3 times moderate-, and 4.7 times low-income, indicating a limited proportion of OOUs are affordable to LMI. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Economic Data

According to the May 2018 Moody's Analytics report, the San Antonio economy is in the late expansion phase of the business cycle. Job growth in San Antonio has been moderately above the national rate. However, the pace has been uneven, with construction and distribution expanding much faster than average and most other industries underperforming. Federal civilian employment, which is correlated with military activities in areas such as San Antonio has declined over the past year.

The substantial jump in defense spending enacted in March will boost the local economy over the coming year. At 66,000, San Antonio has among the largest active-duty populations in the country. Nationally, the number of airmen will rise by one percent, a positive for Lackland AFB, the home of Air Force basic training. Prior to the legislation, the number of active-duty recruits had already risen by nearly a third in the past two years, the biggest increase since the Vietnam era. One result is that Air Education and Training Command is planning to build and modernize a number of dormitories and training complexes. Further, the number of soldiers in the Army is set to increase by two percent nationally. However, although the Army, Navy, and Air Force all train combat medics at Fort Sam Houston, it is uncertain whether that mission will receive some of the additional funding.

Homebuilding will advance over the coming year. House prices are up 6.8 percent year-over-year, a bit faster than the national average and an important signal to the market. Construction employment is already up at a double-digit pace over the past year, mainly because some San Antonio companies hired workers locally for Gulf Coast reconstruction projects. Still, in San Antonio itself, new permits for single-family homes have risen to their highest point since the recession. Because that point is below the pace of 20 years ago, there is substantial room for further gains. Moreover, the number of new multifamily permits remains elevated. As prices have risen, affordability has begun to decline. However, it remains above the Texas average and well above such costly areas as Austin and Dallas.

Major employers in the AA include the Joint Base San Antonio, H-E-B, and USAA. According to the U.S. BLS, the unemployment rate for the 2Q of 2018 was 3.3 percent, down from 6.3 percent at the beginning of the evaluation period. The AA unemployment rate was similar to the overall state at 3.6 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by two community contacts that serve the bank's San Antonio MSA AA. The contacts were with representatives from housing organizations.

The first contact stated that the mission of the organization is to provide credit and services to small businesses and entrepreneurs who do not have access to loans from commercial sources and to provide leadership and innovation to the micro-lending industry. The organization is a designated community development financial institution working in neighborhoods to provide affordable, responsible credit, create and sustain jobs, and to stabilize communities. The organization currently operates in 8 states including Texas. The contact stated that the San Antonio economy is stable and the ten largest employers are concentrated in either the public sector or in health care. The contact stated that the lack of credit and/or multiple credit problems use to be an issue for this organization. Now that the organization has the staff and resources to provide technical assistance, banking and credit needs are not a big issue. Funding to create a patient capital loan pool to help small business grow and build their assets is needed. A patient capital loan pool would also help LiftFund to be more self-sustainable.

The second housing organization is an ecumenical, Christian organization working in partnership with God's people in need to build modest, decent, and affordable homes without interest or profit. The organization works with low-income families who would not otherwise be able to afford a home. This organization operates three centers in San Antonio. The contact stated that a family with two full-time worker earning the minimum wage cannot afford the local fair-market rent for a two-bedroom apartment in San Antonio. In addition to affordable housing, the contact indicated that the affordable rent for LMI families is also a need in the area. More than 6,800 poor San Antonio renter households live in physically deficient housing while over 150,000 people have an unmet housing need.

The bank conducted research in the AA and identified community needs for affordable housing for LMI families, financial education for the unbanked or underbanked homeless services, and small business assistance.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the San Antonio CSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

Scope of Evaluation in Texas

The rating for the State of Texas is based on FS evaluations of the bank's performance in the Austin MSA, Dallas CSA, Houston CSA, and San Antonio MSA AAs; however, performance in each AA was considered. Conclusions where LS reviews affected the CRA Rating for the state are addressed within their respective tests. LS procedures were performed for the remaining 16 AAs. The State of Texas is the 3rd largest rated area and along with 12 other rated areas represents the bank's most significant markets in terms of lending, deposit, and branch distribution. Texas represents a sizeable portion of the bank's overall lending, investments, and services; therefore, the performance in the state was weighted heavier in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN TEXAS

LENDING TEST

The bank's performance under the Lending Test in Texas is rated Outstanding.

Conclusions for Areas receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Austin MSA AA, Dallas MSA, Houston CSA, and San Antonia MSA AAs is excellent.

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans*

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Austin MSA AA

WFBNA ranked first in deposits with 19.6 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 12.2 percent market share. There is strong competition as reflected by the 747 lenders and 67 depository institutions in the AA. The second and third lenders in this market were the JP Morgan Chase Bank and University Federal Credit Union with 5.1 and 3.1 percent market share, respectively.

In small loans to businesses, WFBNA ranked third with a market share of 8.6 percent. There is strong competition as reflected by the 181 lenders in the AA. The top two lenders were American Express with 19.8 percent market share and JPMorgan Chase Bank with 19.2 percent market share.

Dallas CSA AA

WFBNA ranked third in deposits with 7.1 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 11.7 percent market share. There is strong competition as reflected by the 980 lenders and 167 depository institutions in the AA. The 2nd and 3rd top lenders in this market were the JPMorgan Chase Bank and the Quicken Family 5.0 and 3.6 percent market share, respectively.

In small loans to businesses, WFBNA ranked sixth with a market share of 6.2 percent. There is strong competition as reflected by the 236 lenders in the AA. The top three lenders were American Express, JPMorgan Chase Bank, and Bank of America with market shares of 19.6 percent, 14.7 percent, and 9.2 percent, respectively.

Houston CSA AA

WFBNA ranked second in deposits with 10.8 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 11.0 percent market share. There is strong competition as reflected by the 886 lenders and 102 depository institutions in the AA. The 2nd and 3rd lenders in this market were JPMorgan Chase Bank and Quicken Family with a 5.5 and 4.3 percent market share, respectively.

In small loans to businesses, WFBNA ranked fourth with a market share of 6.8 percent. There is strong competition as reflected by the 217 lenders in the AA. The top three lenders were American Express, JPMorgan Chase Bank, and Bank of America with market shares of 21.8 percent, 17.3 percent, and 7.8 percent, respectively.

San Antonio MSA AA

WFBNA ranked third in deposits with 4.0 percent market share in the AA. In overall HMDA lending, WFBNA ranked first 8.4 percent market share. There is strong competition as reflected by the 691 lenders and 61 depository institutions in the AA. The 2nd and 3rd top lenders in this market were the Randolph-Brooks FCU and PennyMac Loan Services LLC with 5.1 percent and 3.8 percent market share, respectively.

In small loans to businesses, WFBNA ranked fourth with a market share of 7.0 percent. There is strong competition as reflected by the 164 lenders in the AA. The top three lenders were American Express, FSB, JPMorgan Chase Bank, and Bank of America with market shares of19.5 percent, 13.2 percent, and 8.7 percent, respectively.

Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in the FS AAs.

Austin MSA AA

Home Mortgage Loans

Refer to Table O in the State of Texas section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- For 2012-2016, the proportion of home mortgage loans in low-income geographies substantially meets the aggregate distribution of loans and below the proportion of OOUs in those geographies.
- The proportion of loans in moderate-income geographies is below both the aggregate distribution of loans and the proportion of OOUs in those geographies
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is higher than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of Texas section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for small business loans in low-income geographies exceeds both the aggregate distribution of loans and the proportion of businesses located in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is near to the proportion of businesses located in those geographies.

<u>Dallas CSA AA</u>

Home Mortgage Loans

Refer to Table O in the State of Texas section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in low-income geographies is below the aggregate distribution of loans and is significantly below the proportion of OOUs in those geographies. Less weight was given to the bank's performance in low-income geographies due to the very small volume OOUs and lending in low-income geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is well below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of Texas section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- For 2012-2016, the combined proportion of the bank's small business loans in low-income geographies substantially meets the aggregate distribution of loans and is near to the proportion of the businesses located in those geographies.
- The proportion of loans in moderate-income geographies exceeds both the aggregate distribution of loans and the proportion of businesses located in those geographies.

- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly below the combined performance in 2012-2016.

Houston CSA AA

Home Mortgage Loans

Refer to Table O in the State of Texas section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in LMI geographies is below the aggregate distribution of loans and substantially below the proportion of OOUs in those geographies. Less weight was given to the bank's performance in low-income geographies due to the very small volume OOUs and lending in low-income geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is significantly below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of Texas section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- For 2012-2016, the proportion of the bank's small business loans in low-income geographies substantial meets the aggregate distribution of loans and is near to the proportion of the businesses located in those geographies.
- The proportion of loans in moderate-income geographies exceeds the aggregate distribution of loans and is near to the proportion of businesses located in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly below the combined performance in 2012-2016.

San Antonio MSA AA

Home Mortgage Loans

Refer to Table O in the State of Texas section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in LMI geographies substantially meets the aggregate distribution of loans in those geographies.
- The proportion of loans in LMI geographies is significantly below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of Texas section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- For 2012-2016, the proportion of the bank's small business loans in low-income geographies exceeds both the aggregate distribution of loans and the proportion of the businesses located in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is near to the proportion of businesses located in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly below than the combined performance in 2012-2016.

Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

<u>Austin MSA AA</u>

Home Mortgage Loans

Refer to Table P in the State of Texas section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 5.7 times the income of low-income and 3.6 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI. Despite the affordability challenges, the bank's performance in both periods, 2012-2016 and 2017-2018, to LMI borrowers exceeds the aggregate lending.
- The bank's performance to low-income borrowers is significantly below the proportion of families and lending to moderate-income borrowers is below the proportion of families.

Small Loans to Businesses

Refer to Table R in the State of Texas section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Dallas CSA AA

Home Mortgage Loans

Refer to Table P in the State of Texas section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 4.8 times the income of low-income and 3 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI. Despite the affordability challenges, the bank's performance in both periods, 2012-2016 and 2017-2018, to LMI borrowers exceeds the aggregate lending.
- The bank's performance with low-income borrowers is significantly below the proportion of families and lending to moderate-income borrowers is below the proportion of families.

Small Loans to Businesses

Refer to Table R in the State of Texas section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Houston CSA AA

Home Mortgage Loans

Refer to Table P in the State of Texas section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- For 2012-2016, the bank's lending to LMI borrowers exceeds the aggregate lending.
- The bank's overall home mortgage lending to low-income borrowers is significantly below the proportion of families and lending to moderate-income borrowers is below the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Texas section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

San Antonio MSA AA

Home Mortgage Loans

Refer to Table P in the State of Texas section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- For 2012-2016, the bank's lending to LMI borrowers exceeds the aggregate lending.
- The bank's overall home mortgage lending to low-income borrowers is significantly below the proportion of families and lending to moderate-income borrowers is well below the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Texas section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is well below the percentage of small businesses located in the AA.

Community Development Lending

The institution is a leader in making CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

Austin MSA AA

The level of CD lending in the Austin MSA AA is excellent. WFBNA made 48 CD loans for a total of $299 million which represents 32.1 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified needs in the AA particularly affordable housing. The bank made 41 CD totaling $291 million (97 percent) for the purpose of affordable housing. Additionally, the bank extended CD loans for the primary purpose of providing community services to LMI individuals, economic development, and revitalization/stabilization LMI geographies.

Examples of CD loans in the AA include:

- In May 2013, WFBNA provided a $26.5 million loan for a 351-unit affordable housing complex. This development is located in a moderate-income census tract in Pflugerville, Texas, and consists of 26 studio units, 117 one-bedroom units, 176 two-bedroom units, and 32 three-bedroom units; with 91.7 percent of the contract rent rates below the area's fair market rents and are affordable to tenants earning between 34.8 and 65.6 percent of the area MFI.
- In July 2016, WFBNA provided a $15.0 million construction loan for an LIHTC affordable housing development. This LIHTC development is in Austin, Texas, with 100 percent of the units restricted to tenants earning between 30 and 60 percent of the area MFI.

Dallas CSA AA

The level of CD lending in the Dallas CSA AA is excellent. WFBNA made 117 CD loans for a total of $715 million which represents 32.1 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified needs in the AA particularly affordable housing. The bank made 95 CD totaling $521 million (72.8 percent) for the purpose of affordable housing. Additionally, the bank extended CD loans for the primary purpose of providing community services to LMI individuals, economic development, and revitalization/stabilization LMI geographies

Examples of CD loans in the Dallas CSA AA include:

- In May 2016, WFBNA provided a $3.0 million working capital line of credit to an affordable multi-family entity that works in partnership with people in need to build decent and affordable housing. The houses are sold to those in need at no profit and with no interest charged. The qualification process requires that applicants must earn between 30 and 80 percent of area MFI as determined annually by HUD. This activity is responsive to the identified need for affordable housing.
- In May 2018, WFBNA provided a 25 percent participation in a $9.9 million construction loan for a charter school. The loan amount reported of $2.5 million represents WFBNA’s proportional share of the total commitment. The school is in a low-income census tract of Dallas, Texas. It is estimated that 90 percent of the student population will qualify for the free/reduced lunch program. This is based on the free/reduced lunch statistics from surrounding schools in the area as well as the typical student demographics of other charter schools in the Dallas area.
- In October 2017, WFBNA provided a $24.0 million loan for an affordable housing development located in Fort Worth, Texas, with 100 percent of the units restricted under a Section 8 HAP Contract to tenants earning between 40 to 60 percent of the area MFI. The property is further restricted to tenants at least 62 years of age.

Houston CSA AA

The level of CD lending in the Houston CSA AA is excellent. WFBNA made 68 CD loans for a total of $519 million which represents 17.3 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified needs in the AA particularly affordable housing. The bank made 42 CD totaling $258 million loans (49.7 percent) for the purpose of affordable housing. Additionally, the bank extended CD loans for the primary purpose of providing community services to LMI individuals, economic development, and revitalization/stabilization LMI geographies.

Examples of CD loans in the Houston CSA AA include:

- In November 2015, WFBNA provided a $4.7 million loan for the construction of an LIHTC development located is in Houston, Texas, with 4 units restricted to tenants earning 50 percent of the area MFI and 60 units operating under a HUD Project Rental Assistance Contract with tenants paying 30 percent of their income toward rent and further reserved for seniors aged 62 and over. This activity is responsive to the identified need for affordable housing.
- In March 2017, WFBNA provided a $250,000 working capital line of credit for a community service nonprofit organization that helps women in crisis regain their self-esteem and dignity, empowering them to return to society as productive, self-sufficient individuals. All of its clients are LMI individuals as they earn less than 80 percent of the area MFI. This statement is based on actual data provided during the grant application process.
- In November 2014, WFBNA provided a $21 million term loan for a 428-unit housing development located in a moderate-income census tract in Houston, TX. The project consists of 304 one-bedroom units, 100 two-bedroom units, 24 three-bedroom units with 79.9 percent of the actual rent rates below the 2014 Fair Market Rent for the area and 99.7 percent of the units affordable to tenants earning between 29.5 and 74.7 percent of the 2014 area MFI.

<u>San Antonio MSA AA</u>

The level of CD lending in the San Antonio MSA AA is excellent. WFBNA made 48 CD loans for a total of $186 million which represents 37.0 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified needs in the AA particularly affordable housing. The bank made 36 CD totaling $169 million loans (89.4 percent) for the purpose of affordable housing. Additionally, the bank extended CD loans for the primary purpose of providing community services to LMI individuals, economic development, and revitalization/stabilization LMI geographies.

Examples of CD loans in the San Antonio MSA AA include:

- In August 2013, WFBNA provided a $7.7 million construction loan for an 80-unit LIHTC affordable housing development located in New Braunfels, Texas. The project includes 88.8 percent of the units restricted to tenants earning between 30 and 60 percent of the area MFI. This development will consist of 24 one-bedroom units, 32 two-bedroom units and 24 three-bedroom units. In addition, four of the units will be set aside for persons with special or mobility needs, and two units will be accessible to residents with vision or hearing impairment.
- In September 2016, WFBNA provided a $6 million loan for this multifamily housing development located in a moderate-income census tract in San Antonio, TX and consists of 32 one-bedroom units, 60 two-bedroom units, and 12 three-bedroom units with 97.1 percent of the

actual rent rates below the 2016 Fair Market Rent for the area and 100 percent of the units affordable to tenants earning between 32 and 69 percent of the 2016 area MFI.

Product Innovation and Flexibility

Austin MSA AA

The institution makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. The bank launched the NeighborhoodLIFT program in the Austin MSA AA in August 2016 and more than 250 potential homebuyers attended the event and more than 200 homebuyers utilized the down payment assistance ($15,000) to purchase a home. Of the 200, WFBNA originated 25 home mortgage loans totaling $4.4 million. Under the *your*FirstMortgage loan program the bank has funded 54 loans totaling $9.6 million to LMI homebuyers that qualified under this program.

Dallas CSA AA

The institution makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. The bank launched the NeighborhoodLIFT program in the Dallas CSA AA in February 2014 and more than 600 potential homebuyers attended the event and more than 250 homebuyers utilized the down payment assistance ($15,000) to purchase a home. Of the 250, WFBNA originated 134 home mortgage loans totaling $11 million. Under the *your*FirstMortgage loan program the bank has funded 293 loans totaling $39.5 million to LMI homebuyers that qualified under this program.

Houston CSA AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 210 loans totaling $27.6 million to LMI homebuyers that qualified under this program.

San Antonio MSA AA

The institution makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. The bank launched the NeighborhoodLIFT program in the San Antonio MSA AA in January 2015 and more than 700 potential homebuyers attended the event and more than 270 homebuyers utilized the down payment assistance ($15,000) to purchase a home. Of the 270, WFBNA originated 165 home mortgage loans totaling $16 million. Under the yourFirstMortgage loan program the bank has funded 51 loans totaling $6.4 million to LMI homebuyers that qualified under this program.

Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding the programs listed above.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank’s performance under the Lending Test in the Corpus Christi CSA, El Paso MSA, Wichita Falls MSA, and the TX Combined NonMetro AAs is consistent with the bank’s overall excellent performance under the Lending Test in the FS areas. The bank’s performance in the remaining 12 AAs is weaker than the bank’s overall performance under the Lending Test in the FS areas. Performance differences in the weaker LS AAs did not impact the overall Lending Test rating for the state.

Refer to Tables O through T in the State of Texas section of appendix D for the facts and data that support these conclusions.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of Texas is rated High Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the investment test, the bank's performance in the Austin MSA and San Antonio MSA AA is excellent. Performance in the Dallas MSA AA is good and performance in the Houston CSA AAs is adequate.

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

Austin MSA AA

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 14.2 percent of tier 1 capital allocated to the AA.

The investments and grants reflect excellent responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 97.6 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 227 grants totaling $8.4 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved numerous complex LIHTC projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In July 2016, WFBNA provided a $17 million LIHTC investment in an affordable housing development located in Austin, Texas, with 100 percent of the units restricted to tenants earning between 30 and 60 percent of the area MFI. This activity is responsive to the identified need for affordable housing. WFBNA demonstrated multi-faceted support by providing both the construction loan ($15 million) and equity investment to support this affordable housing development as well as multiple grants and services in support of the organization. This investment is also complex with multiple government agencies and various organizations.
- In August 2016, WFBNA provided two grants totaling $45,000 to two organizations to administer the NeighborhoodLIFT Down Payment Assistance program. The organizations provide revitalization work in the Austin area that includes repairing homes in LMI neighborhoods and school grounds of predominately minority and low-income schools. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.
- During the exam timeframe, WFBNA provided eight grants totaling $440,000 to three local housing organizations through the PMP for affordable housing in the Austin MSA AA. Refer to

the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

Dallas MSA AA

The institution has a significant level of qualified CD investments and grants, occasionally in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 9.6 percent of tier 1 capital allocated to the AA.

The investments and grants reflect good responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 68.2 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 474 grants totaling $13.5 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved numerous complex LIHTC and NMTC projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In May 2014, WFBNA invested $15.6 million for the construction of a 98-unit LIHTC affordable housing complex. This development is located in Dallas, Texas with 75 units restricted to tenants earning between 30 and 60 percent of the area MFI, and 23 market rate units. This activity is responsive to the identified community credit need for affordable housing.
- In August 2015, WFBNA invested $15 million in a licensed Small Business Investment Company (SBIC). Of this total investment, $9.4 million was allocated to a manufacturer of food ingredients used by food manufacturers, food service operators, and quick service restaurants. This investment is to a licensed fund of the SBA under the SBIC program, thus making it automatically approved as a CRA-qualified investment.
- During the exam timeframe, WFBNA provided 13 grants totaling $1.7 million to four local housing organizations through the PMP for affordable housing in the Dallas MSA AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

Houston CSA AA

The institution has an adequate level of qualified CD investments and grants, although rarely in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 5.1 percent of tier 1 capital allocated to the AA.

The investments and grants reflect adequate responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 86.5 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 403 grants totaling $10.1 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved several complex LIHTC and NMTC projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In September 2013, WFBNA invested $100.4 million in an LIHTC fund. Of this total investment, $18.2 million was allocated to a development located in Pasadena, Texas, with 159 units restricted to tenants earning no more than 60 percent of the area MFI. This investment is responsive to the need for affordable housing. This investment is also complex involving multiple parties.
- In July 2017, WFBNA provided a $10.5 million NMTC investment for a public charter school located in Houston, Texas. In support of the project, the school received approximately $4.7 million Community Development Block Grant financing from the City of Houston. The land was acquired in April 2016 through a $4.7 million grant provided by City of Houston with the restriction that the land be used as a school for persons at least 51 percent of whom must be members of low-income families for five years after completion date. The new academy is estimated to provide education and increased access to healthy foods to 150 low-income persons, in addition to the current 150 existing beneficiaries. It will create 15 new full-time employment positions as well as retain 17 full-time positions, 90 percent of which are to be held by low-income persons, and also provide 60 construction jobs. The project site is located in a “Severely Distressed” census tract per the 2006-2010 ACS as well as a Federally Designated Food Desert. The NMTC subsidiary will provide gap financing needed to complete the Project. Construction came to a stop at the end of 2016 due to a need for additional funding. Without the NMTC financing the Project would have been delayed further and Lawson Academy would have had to cut aspects of the Project from the budget, thus reducing the ultimate community benefit to the low-income communities it serves. WFBNA demonstrated leadership in this development.
- During the exam timeframe, WFBNA provided two grants totaling $650,000 to two statewide CDC through the Small Business DCC Program benefiting small businesses within the State of Texas particularly the Houston CSA AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.
- During the exam timeframe, WFBNA provided 11 grants totaling $1.4 million to several local housing organization through the PMP for affordable housing in the Houston area. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

<u>San Antonio MSA AA</u>

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 23.1 percent of tier 1 capital allocated to the AA.

The investments and grants reflect excellent responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 87 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 144 grants totaling $9.6 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved numerous complex LIHTC and NMTC projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In September 2015, WFBNA provided a $3.1 million investment for the construction of an LIHTC affordable housing development. This LIHTC development is located in San Antonio, Texas, with 56 of the 57 units restricted to tenants earning between 30 and 50 percent of the area MFI. Of the 56 rent restricted units, 48 will be further reserved for seniors aged 62 and above. They will also receive rental assistance in the form of a HUD Project Rental Assistance Contract. This investment is responsive to the need for affordable housing. This investment is also complex involving multiple parties. WFBNA demonstrated multi-faceted support by providing both the construction loan ($4 million) and equity investment to support this affordable housing development.
- During the exam timeframe, WFBNA provided six housing counseling grants totaling $42,322 to several local housing organizations serving the AA. These grants were provided through the bank's HCGP which is designed to provide financial resources to local nonprofit housing organizations to create affordable and sustainable homeownership opportunities for LMI individuals. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.
- In January 2015, WFBNA provided three local initiative grants totaling $225,000 to several housing organizations to administer the NeighborhoodLIFT Down Payment Assistance program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Investment Test in the Kileen MSA AA is consistent the bank's overall good performance. The bank's performance in the College Station MSA, Laredo MSA, Lubbock MSA, Midland CSA, San Angelo, Victoria CSA, and TX Combined NonMetro AAs is weaker than the bank's overall performance due primarily to lower CD investments. Collectively these weaker LS AAs account for less than 9 percent of total deposits. The bank's performance in the Amarillo CSA, Beaumont MSA, Brownsville CSA, Corpus Christi CSA, El Paso MSA, McAllen MSA, Waco MSA, and Wichita Falls MSA AAs is stronger than the bank's overall performance. Performance differences in the stronger LS AAs also did not impact the overall Investment Test rating for the State of Texas.

SERVICE TEST

The bank's performance under the Service Test in Texas is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Austin MSA, Dallas CSA, Houston CSA, and San Antonio MSA AAs is excellent.

Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the institution's AAs, particularly LMI geographies and/or LMI individuals.

<u>Austin MSA AA</u>

As of December 31, 2018, WFBNA operates 66 branches and 113 ATMs in the Austin MSA AA. Of these branches, 62 are full-service locations and four are limited-service branches. There are seven branches in the low-income geographies and eight branches in moderate-income geographies. The branch distribution in low-income geographies exceeds the percentage of the population in low-income geographies and the branch distribution in moderate-income geographies is below the percentage of the population in moderate-income geographies in the AA. When considering an additional ten branches within close proximity to LMI geographies, the bank's branch distribution improves and exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank opened one branch in a geography where the census tract income level is unknown since the last evaluation. The bank closed one branch each in low-, moderate-, and middle-income geographies and two branches in upper-income geographies since the last evaluation. The closure of branches in LMI geographies did not materially impact the distribution of branches relative to the population residing in those geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. While there are slight variations in opening or closing times, generally, branches are open Monday through Friday from 9:00 am to 5:00 pm. Of total branches, including branches in LMI geographies, 55 branches are also open on Saturdays and one branch is open on Sundays. All WFBNA services are available at the full-service branches and all delivery systems discussed bank-wide are available in this AA.

Dallas CSA AA

As of December 31, 2018, WFBNA operates 171 branches and 360 ATMs in the Dallas CSA AA. Of these branches, 165 are full-service locations and six are limited-service branches. There are 15 branches in low-income geographies and 38 branches in moderate-income geographies. The branch distribution in low-income geographies is near to the percentage of the population in low-income geographies and the branch distribution in moderate-income geographies approximates the percentage of the population in moderate-income geographies in the AA. When considering an additional 20 branches within close proximity to LMI geographies, the bank's branch distribution improves and exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank opened three branches in moderate-income geographies and one branch in an upper-income geography since the last evaluation. The bank closed three branches in low-income, three branches in moderate-income, six branches in middle-income, and four branches in upper-income geographies since the last evaluation. The closure of branches in LMI geographies was to consolidate with other branches nearby and did not negatively impact the distribution of branches relative to the population residing in those geographies. The bank still maintains 53 active branches or 31.0 percent within LMI geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. While there are slight variations in opening or closing times, generally, branches are open Monday through Thursday from 9:00 am to 5:00 pm and from 9:00 am to 6:00 pm on Friday. Of the total branches, including branches in LMI geographies, 163 branches are also open on Saturdays. All WFBNA services are available at the full-service branches and all delivery systems discussed bank-wide are available in this AA.

Houston CSA AA

As of December 31, 2018, WFBNA operates 185 branches and 353 ATMs in the Houston CSA AA. Of these branches, 181 are full-service locations and four are limited-service branches. There are 20 branches in low-income geographies and 32 branches in moderate-income geographies. The branch distribution in low-income geographies approximates the percentage of the population in low-income geographies and the branch distribution in moderate-income geographies is below the percentage of the population in moderate-income geographies in the AA. When considering an additional 12 branches within close proximity to LMI geographies, the bank's branch distribution improves and exceeds demographics.

The institution's opening and closing of branches have not adversely affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank opened five branches in upper-income geographies since the last evaluation. The bank closed two branches in low-income, four branches in moderate-income, five branches in middle-income, and eight branches in upper-income geographies since the last evaluation. The closure of branches in moderate-income geographies was to consolidate with other branches nearby and did not negatively impact the distribution of branches relative to the population residing in those geographies. The bank still maintains 52 active branches or 28.1 percent within LMI geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. While there are slight variations in opening or closing times, generally, branches are open Monday through Thursday from 9:00 am to 5:00 pm and Friday from 9:00 am to 6:00 pm. Of the total branches, including branches in LMI geographies, 175 branches are also open on Saturdays. All WFBNA services are available at the full-service branches and all delivery systems discussed bank-wide are available in this AA.

San Antonio MSA AA

As of December 31, 2018, WFBNA operates 48 branches and 87 ATMs in the San Antonio MSA AA. Of these branches, 46 are full-service locations and two are limited-service branches. There are five branches in low-income geographies and eleven branches in moderate-income geographies. The branch distribution in low-income geographies exceeds the percentage of the population in low-income geographies and the branch distribution in moderate-income geographies is near to the percentage of the population in moderate-income geographies in the AA. When considering an additional two branches within close proximity to LMI geographies, the bank's branch distribution improves and exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank did not open any branches in the AA since the last evaluation. The bank closed one branch in moderate-income, two branches in middle-income, and one branch in upper-income geographies since the last evaluation. The closure of branches in moderate-income geographies did not materially impact the distribution of branches relative to the population residing in those geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. While there are slight variations in opening or closing times, generally, branches are open Monday through Thursday from 9:00 am to 5:00 pm and Friday from 9:00 am to 6:00 pm. Of total branches, including branches in LMI geographies, 45 branches are also opened on Saturdays. All WFBNA services are available at the full-service branches and all delivery systems discussed bank-wide are available in this AA.

Community Development Services

The institution is a leader in providing CD services.

Austin MSA AA

The level of CD services in the Austin MSA AA is excellent. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 616 CD service activities to 53 organizations since the last evaluation, logging a total of 2,191 qualified hours within this AA. A majority (61 percent) of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing (36 percent) and economic development (3 percent). The bank's assistance provided was responsive to the identified need in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- One WFBNA team member provided 372 hours of board service, technical assistance, and financial education at an organization that provides services to low-income, primarily Latino families with a focus on enhancing parenting skills, promoting long-term educational success for children, and breaking the family's trans-generational cycle of poverty. Eighteen WFBNA team members provided 36 hours of financial education to clients of the organization.
- One WFBNA team member provided six hours of Board service and nine WFBNA team members provided 366 hours financial education and technical assistance at a nonprofit affordable housing organization that provides affordable housing and ongoing financial coaching to low-income residents. All of its clients are LMI.
- One WFBNA team member served on the board of directors for a community capital corporation, providing 69.5 board service hours. This organization provides loan and investment products, development services, and other related activities to CDFIs, community based non-profit organizations and similar organizations, and to the LMI households they serve.

Dallas CSA AA

The level of CD services in the Dallas CSA AA is excellent. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 1,103 CD service activities to 137 organizations since the last evaluation, logging a total of 4,184 qualified hours within this AA. A majority (84 percent) of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing (8 percent) and economic development (8 percent). The bank's assistance provided was responsive to the identified need in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- Two WFBNA team members provided 198 hours of board service to local affiliates of a self-help affordable housing developer. Two team members provided 14 hours of technical assistance and financial education. This organization provides homeownership opportunities by building homes for, and with eligible LMI individuals.
- One WFBNA team member provided 132 hours on the board of directors for a nonprofit housing organization that works in partnership with people in need to build decent and affordable housing. The houses are sold to those in need at no profit and with no interest charged.
- Thirty-seven WFBNA team members provided 290 hours of financial education at an elementary school. According to the NCES, 69 percent of students qualify for the federal FRL program.

Houston CSA AA

The level of CD services in the Houston CSA AA is excellent. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 1,079 CD service activities to 128 organizations since the last evaluation, logging a total of 4,091 qualified hours within this AA. A majority (91 percent) of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing (8 percent) and revitalization or stabilization (1 percent). The bank's assistance provided was responsive to the identified need in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- Two WFBNA team members provided 177 hours of board service and technical assistance to local affiliates of a self-help affordable housing developer. Four team members provided 23 hours of financial education to clients of the organization. This organization provides homeownership opportunities by building homes for, and with eligible LMI individuals.
- One WFBNA team member served on the Board of a Coalition for the Homeless providing 77 board service hours. This Coalition leads the development and implementation of community strategies to prevent and end homelessness. The Coalition drives collaboration among over 200 homeless service providers, the City, County, Housing Authorities, and private stakeholders to create a homeless service system that meets the needs of Houston's most vulnerable citizens, the homeless. The ultimate goal: a system that achieves decreases in new, length of, and returns to homelessness.
- Twenty-two WFBNA team members provided 550 hours of technical assistance and financial education at a community service organization that coordinates resources, education, and connections within underserved neighborhoods. All of its clients are LMI.

San Antonio MSA AA

The level of CD services in the Birmingham CSA AA is excellent. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 358 CD service activities to 75 organizations since the last evaluation, logging a total of 1,447 qualified hours within this AA. A majority (96 percent) of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted economic development (3 percent) and affordable housing (1 percent). The bank's assistance provided was responsive to the identified need in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- Twenty-eight WFBNA team members provided 834 hours of technical assistance and financial education as part of the VITA program that provides tax preparation and related financial services to individuals and families of limited means. Refer to the comments in the institution Innovative or Flexible Service Programs section of this public evaluation for additional details regarding this program.
- One WFBNA team member provided 53 hours of Board service and two team members provided ten hours of technical assistance at a local food bank. The food bank provides food and grocery products to the hungry. All of its clients are LMI.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Service Test in the Amarillo CSA, Beaumont MSA, Brownsville CSA, College Station MSA, Corpus Christi CSA, El Paso MSA, Laredo MSA, Lubbock MSA, McAllen MSA, Midland CSA, San Angelo MSA, Victoria CSA, Waco MSA, Wichita Falls MSA, and TX Combined NonMetro AAs is consistent with the bank's overall excellent performance under the Service Test in the FS areas. Branches near-to LMI geographies elevate overall branch distribution in each of the AAs from adequate or good to excellent similar to the FS AAs. The bank's performance under the Service Test in the Killeen MSA AA is weaker than the bank's overall performance. The Killeen MSA AA has poor branch distribution that is not mitigated by near-to branches. Performance in this AA did not impact the overall Service Test rating.

State Rating

State of Utah

CRA rating for the State of (Utah)[48]: Outstanding
The Lending Test is rated: Outstanding
The Investment Test is rated: Low Satisfactory
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Excellent lending activity;
- Excellent geographic distribution of loans;
- Excellent borrower distribution of loans;
- WFBNA is a leader in providing CD loans, which has a significant positive impact on the Lending Test;
- WFBNA's use of flexible products has a positive impact on the Lending
- Adequate level of CD investments;
- Retail delivery systems are readily accessible to all portions of the AA; and
- WFBNA provides a relatively high level of CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in Utah

WFBNA delineated three AAs within Utah including the Salt Lake City-Provo-Orem, UT CSA (Salt Lake City CSA AA), St. George, UT MSA (St. George MSA AA), and UT Combined non-metropolitan (UT Combined NonMetro AA). The Salt Lake City CSA AA received a FS review. Refer to Appendix A for a complete description of each AA. Salt Lake City CSA AA accounted for the largest portion of the lending (87.5 percent) and deposits (90.6 percent) amongst the AAs in Utah. Utah represents the 16th largest rated area by deposits. WFBNA has $12 billion of deposits representing 1.0 percent of adjusted deposits. WFBNA operates 95 branches and 133 ATMs within Utah, representing 1.7 percent of the bank's branches and 0.9 percent of the bank's ATMs. The bank originated and purchased approximately $30 billion in loans or 1.6 percent of total reported loan originations and purchases during the evaluation period. The bank's primary loan products in the Utah loan products home mortgage and small loans to businesses.

<u>Salt Lake City CSA AA</u>

Within the Salt Lake City CSA AA, the bank has $11 billion deposits and ranked 10th amongst 40 depository institutions in the market with 2.1 percent market share. The top three depository institutions in terms of deposit market share are: Morgan Stanley Bank with 22.8 percent, Ally Bank with 19.4 percent, and American Express with 13.0 percent. WFBNA operates 74 branches and 99 ATMs in the AA.

[48] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

Demographic Data

The following table provides a summary of the demographics that includes housing and business information for the Salt Lake City CSA AA. Table A indicates that the volume of OOUs is very small in low-income CTs and over 36 percent of families in the AA are LMI. The area's median housing value in the Salt Lake City CSA AA is 3.6 times the highest MSA median income, but 4.6 times moderate-, and 7.3 times low-income, indicating a limited proportion of OOUs are affordable to LMI. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Economic Data

Salt Lake City, UT MSA

According to the July 2018 Moody's Analytics report, Salt Lake City's spot as a top economy in the West is secure, but as the late-cycle expansion matures, cracks are emerging. Worker shortages appear to be slowing the pace of hiring, though it remains above national and regional averages. Salt Lake City's knowledge-based industries, exceptionally talented workforce, ability to attract capital, and stable state finances will guide the metro area during the next leg of its economic expansion. Longer term, a business-friendly environment and low-cost structure coupled with favorable demographics will ensure that it remains among the top performers in the West and the U.S.

The outlook for the housing market looks favorably as the strong labor market and robust population gains are fueling faster household formation and supporting the real estate market. Prices have been climbing faster than nationally since mid-2015 and are up almost 10 percent over the last year.

The largest employers in the Salt Lake City CSA AA include the University of Utah, Intermountain Health Care Inc., and Wal-Mart Stores, Inc. According to the U.S. BLS, the unemployment rate for the 2nd quarter of 2018 was 2.9 percent and has decreased from 5.3 percent at the beginning of the evaluation period. The unemployment rate in the AA was slightly less than the overall state at 3.5 percent for the same period.

Ogden-Clearfield, UT MSA

According to the November 2018 Moody's Analytics report, Ogden's economy is in the mature phrase of its expansion. Worker shortages appear to be applying the brakes to the economy and driving wage growth to accelerate at a well above average rate. Construction payrolls have declined dramatically over the past year, but manufacturing has reenergized, adding 1,100 jobs since midyear and accounting for two-fifths of the rise in nonfarm employment. The outlook for Ogden's large defense-dependent concentration will help insulate the economy against softening in the private sector. Increased defense spending will benefit Hill Air Force Base, especially as the Pentagon shifts its focus to the Asia-Pacific region. The base, which is the largest single-site employer in Utah, has an economic impact of $3 billion annually in the metro area and accounts for 7 percent of employment.

Worker shortages are constraining residential and commercial construction in Ogden, though strong population growth skewed toward younger demographics promises to improve current challenges. Indicative of heady demand, existing-home prices are appreciating at a double-digit pace which is twice the national rate.

The largest employers in the Ogden MSA include the Hill Air force Base, Department of Treasury, and McKay-Dee Hospital Center. According to the U.S. BLS, the unemployment rate for the 3rd quarter of 2018 was 3.1 percent and has decreased from 5.5 percent at the beginning of the evaluation period. The unemployment rate in the AA was slightly less than the overall state at 3.5 percent for the same period.

Provo-Orem, UT MSA

According to the November 2018 Moody's Analytics report, Provo's economy is on a roll and boasts one of the strongest economies in the West. The labor market is strong. Although the household and establishment surveys show a slowdown in job growth this year, the Quarterly Census of Employment and Wages paints a significantly brighter picture. Consistent with an aging expansion, Provo has more job openings than workers to fill them, and as a result the jobless rate has held steady at less than 2.9 percent over the last year. The tight job market is sustaining above-average wage growth as firms compete to attract and retain quality labor. Provo's high-tech industry anchors the metro area's upbeat forecast. The metro area is one of the top tech hubs in the West, with a diverse cluster ranging from aerospace to software publishing.

Increased state spending will fortify Utah Valley University. The school is a stable source of growth for Provo and provides a deep talent pool that helps nurture gains in tech and other knowledge-based industries. While tech will shoulder much of the load as Provo's expansion matures, consumer services will also chip in. Leisure/hospitality and retail are booming. Indicative of high demand, existing-home prices are appreciating at a double-digit pace which is twice the national rate.

The largest employers in the Provo-Orem MSA include the Brigham Young University, Utah Valley Regional Medical Center, and Utah Valley University. According to the U.S. BLS, the unemployment rate for the 3rd quarter of 2018 was 2.8 percent and has decreased from 5.0 percent at the beginning of the evaluation period. The unemployment rate in the AA was slightly less than the overall state at 3.5 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by three community contacts that serve the bank's Salt Lake City CSA AA. One of the three contacts is a CDFI, one is a non-profit organization designed to assist LMI individuals and families move from crisis to control by creating a long term action plan for financial security. The third community contact was a CRA roundtable sponsored by the OCC that included five community organizations from the AA representing affordable housing, community development, a financial and technical support organization that provides support to small businesses and a provider of various social programs targeted to LMI individuals and families in the AA.

The CDFI contact indicates that one barrier seems to be challenging is that banks' small business credit standards are still too rigorous leaving many businesses unable to qualify for credit financing. However, some businesses are getting loans but those who seem to need it most are the ones who just cannot seem to qualify for conventional bank financing. The community contact also mentioned that a high level of bankruptcy has exacerbated the circumstance; Utah is ranked number 5 out of 50 states in 2014. Prior to the recession many small businesses depended on home equity for access to capital or used it as collateral for capital. Given the improvement in housing prices, the ability for small businesses to tap home equity as a source of small business capital is beginning to claw back after significantly being impacted during the recession. The community contact stated that during the recession, credit scores were negatively affected but she is witnessing marginal increases in her clientele's credit scores.

According to the community contact, Utah was ranked 12th in the country for bankruptcy filings and in the top 10 for home foreclosures. The contact indicated the need for loan capital for new start-ups as well as existing small businesses in the AA. A significant number of the organization's clients are business start-ups having little collateral and low credit scores. The roughly 40 percent left over represent existing businesses seeking growth and expansion potential and need small business loans in amounts between $1,000 - $25,000.

The non-profit organization provides social services to LMI individuals and families in the entire state with a focus on Salt Lake City and Salt Lake County. The community contact indicated that since the Great Recession, the unemployment rate is low. However, underemployed remains an issue. While many LMI people are employed, they are not earning enough. Predatory lending is a challenge and many of the organizations clients have gotten one or more payday loan or other predatory lending products. There is a growing homeless population as social service programs dwindle, and the resources available to assist the homeless continue to disappear in the AA. The community contact expressed concern about bank mergers which has the impact of eliminating banks in the AA, leaving a void in funding that other banks have not replaced.

The five nonprofit organizations provide an array of programs to small businesses and LMI individuals and families throughout the AA. These service and programs target affordable housing in the AA, community development, financial and technical support to small businesses. The contacts indicate that the most significant needs in the AA are affordable housing and solutions for the chronic homeless many who are veterans.

The bank conducted research in the AA and identified community needs for affordable housing for LMI families; financial education, products, and services for the unbanked or underbanked; neighborhood revitalization and stabilization; and small business assistance due to business closures and layoffs.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Salt Lake City CSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

Scope of Evaluation in Utah

The rating for the State of Utah is primarily based on FS evaluations of the bank's performance in the Salt Lake City CSA AA; however, performance in each AA was considered. Conclusions where a LS review affected the CRA Rating for the state are addressed within their respective tests. LS procedures were performed for the St. George MSA and the UT Combined NonMetro AAs. A limited portion of the bank's overall lending, investments, and services were conducted in Utah; therefore, the performance in Utah received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN UTAH

LENDING TEST

The bank's performance under the Lending Test in Utah is rated Outstanding.

Conclusions for Area Receiving a FS Review

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Salt Lake City CSA AA is excellent.

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to AA credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State Loans	%State Deposits
Salt Lake City CSA	103,360	38,856	448	99	142,763	87.5	90.6
St. George MSA	6,965	3,416	40	3	10,424	6.3	4.5
UT Combined NonMetro	6,202	3,384	470	2	10,058	6.2	4.9
Total	116,527	45,656	958	104	163,245	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Dollar Volume of Loans (000's)*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State* Loans	%State Deposits
Salt Lake City CSA	$24,822,117	$2,339,007	$20,575	$283,758	$27,465,457	90.3	90.6
St. George MSA	$1,494,427	$188,727	$2,331	$10,074	$1695,559	5.6	4.5
UT Combined NonMetro	$1,018,402	$194,582	$30,168	$1,650	$1,244,802	4.1	4.9
Total	$27,334,946	$2,722,316	$53,074	$295,482	$30,405,818	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

<u>Salt Lake City CSA AA</u>

WFBNA ranked tenth in deposits with a 2.0 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 9.4 percent market share. There is strong competition as reflected by the 460 lenders and 49 depository institutions in the AA. The 2nd and 3rd top lenders in this market were Academy Mortgage Corp. with a 4.9 percent market share and Citywide Home Loans with a 4.4 percent market share.

In small loans to businesses, WFBNA ranked fourth with a market share of 8.9 percent. There is strong competition as reflected by the 146 lenders. The top 3 lenders in market share were American Express with 24.8 percent, ZB, N.A. with 14.3 percent; and Chase Bank with 11.8 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits an excellent geographic distribution of loans in its AA.

<u>Salt Lake City CSA AA</u>

Home Mortgage Loans

Refer to Table O in the State of Utah section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- For 2012-2016, the proportion of loans in LMI geographies exceeds the aggregate distribution of loans in those geographies.
- The proportion of loans in low-income geographies exceeds the proportion of OOUs and in moderate-income geographies it is near to the proportion of OOUs in those geographies.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is weaker than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of Utah section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The bank's performance in both 2012-2016 and 2017-2018 periods for small business loans in LMI geographies exceeds both the aggregate distribution of loans and the proportion of businesses located in those geographies.

Distribution of Loans by Income Level of the Borrower

The bank exhibits an excellent distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

<u>Salt Lake City CSA AA</u>

Home Mortgage Loans

Refer to Table P in the State of Utah section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 7.3 times the income of low-income and 4.6 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI. Despite the affordability challenges, the bank's overall home mortgage lending in 2012-2016 to low-income borrowers exceeds the aggregate distribution of loans and is well below the proportion of families.
- The bank's overall home mortgage lending to moderate-income borrowers substantially meets the aggregate distribution of loans and exceeds the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is weaker than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Oregon section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good**.**

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Community Development Lending

Salt Lake City CSA AA

The institution is a leader in making CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The level of CD lending in the Salt Lake City CSA AA is excellent. WFBNA made 99 CD loans in its AA for a total of $283.7 million, which represents over 22 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified affordable housing and small business lending needs in the AA. The bank made 36 CD loans totaling $154 million (54.4 percent) for the purpose of affordable housing. Additionally, the bank extended CD loans for the primary purpose of providing community services to LMI individuals, economic development, and revitalization/stabilization LMI geographies.

Examples of CD loans in the AA include:

- In December 2018, WFBNA provided a $1.4 million loan for a multifamily affordable housing development located in a moderate-income census tract in Salt Lake City, UT. The property is subject to the rent control city ordinances and has three Section 8 units and 141 fair market rent units. This development consists of 72 one-bedroom (1 is Section 8) units, 72 two-bedroom (2 are Section 8) units, with 97 percent of the actual rent rates below the 2018 Fair Market Rent for the area and 97 percent of the units affordable to tenants earning between 31.6 and 42.7 percent of the 2018 area MFI.
- In January 2016, WFBNA provided an $8.1 million loan for the construction of an affordable housing development in a low-income area. This development is located in Midvale, Utah, with 100 percent of the 102-units restricted to tenants earning between 25 and 50 percent of the area MFI. Additionally, 24 units will have special needs set asides including eight units for domestic violence victims, five for transitional homeless, and 11 wheelchair accessible units for people with disabilities.

Product Innovation and Flexibility

The institution makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. The bank launched the NeighborhoodLIFT program in the Salt Lake City CSA AA in December 2014 and more than 400 potential homebuyers attended the event and more than 200 homebuyers utilized the down payment assistance ($15,000) to purchase a home. Of the 200 WFBNA originated 49 home mortgage loans totaling $7.6 million. Under the *your*FirstMortgage loan program the bank has funded 70 loans totaling $13.7 million to LMI homebuyers that qualified under this program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding these programs.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Lending Test in the St. George MSA AA is consistent with the bank's overall excellent performance under the Lending Test in the FS area. Performance in the UT Combined NonMetro AA is weaker than the overall performance due to lower volume of CD lending. Performance in the UT Combined NonMetro AA did not affect the bank's overall rating for the state.

Refer to Tables O through T in the State of Utah section of appendix D for the facts and data that support these conclusions.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of Utah is rated Low Satisfactory.

Conclusions for Area Receiving a FS Review

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the investment test, the bank's performance in the Salt Lake City CSA AA is adequate.

Qualified Investments										
	Prior Period*		Current Period		Total				Unfunded Commitments**	
Assessment Area	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Salt Lake City CSA	45	$16,133	462	$65,005	507	92.9	$81,138	99.0		
St. George MSA	0	$0	12	$78	12	2.2	$78	0.1		
UT Combined NonMetro	1	$594	26	$166	27	4.9	$760	0.9		
Total	46	$16,727	500	$65,249	546	100.0	$81,976	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

Salt Lake City CSA AA

The institution has an adequate level of qualified CD investments and grants, although rarely in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 6.6 percent of tier 1 capital allocated to the AA.

The investments and grants exhibit adequate responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 66.1 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 435 grants totaling $8.1 million to a variety of organizations that primarily support affordable housing, community services, economic development, and revitalization/stabilization.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved several complex LIHTC projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In November 2015, WFBNA provided an $8.4 million LIHTC Direct investment for a development located in Provo, Utah, with 81.4 percent of the units restricted to tenants earning between 25 and 50 percent of the area MFI. Ten units will have special needs set asides including three units for domestic violence victims, two for veterans, and five for transitional homeless. All of these set-asides are on best effort's basis and the tenant must be able to pay rent. This activity is responsive to the identified need for affordable housing and addressing homelessness. WFBNA also demonstrated multi-faceted support by providing both the construction loan ($8.2 million) and equity investment in support of this affordable housing development.
- In January 2015, WFBNA provided a $3.4 million grant to the NeighborhoodLIFT Down Payment Assistance Program in Salt Lake City, UT. The grant provided needed assistance in support of affordable housing and neighborhood revitalization within the State of Utah including the Salt Lake City CSA AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.
- During the exam timeframe, WFBNA provided four grants totaling $312,500 to a local housing organization through the PMP for affordable housing in the Salt Lake City CSA AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Investment Test in the St. George MSA and UT Combined NonMetro AAs is weaker than the bank's overall adequate performance in the Investment Test in the FS area due to lower volume of CD investments. Performance differences in the weaker LS AAs did not impact the overall Investment Test rating for the State of Utah.

SERVICE TEST

The bank's performance under the Service Test in Utah is rated Outstanding.

Conclusions for Area Receiving a FS Review

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Salt Lake City CSA AA is excellent.

Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the institution's AAs, particularly LMI geographies and/or LMI individuals.

Distribution of Branch Delivery System											
Assessment Area	Deposits	Branches						Population			
	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%)*				% of Population within Each Geography*			
				Low	Mod	Mid	Upp	Low	Mod	Mid	Upp

Salt Lake City CSA AA

As of December 31, 2018, WFBNA operates 74 branches and 108 ATMs in the Salt Lake City CSA AA. All branches are full-service locations. There are six branches in low-income geographies and 23 branches in moderate-income geographies. The branch distribution in LMI geographies significantly exceeds the percentage of the population in LMI CTs in the AA.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals . The bank closed 14 branches since the last evaluation. Of these closures, two were located in low-income CTs and five were located in moderate-income CTs. The closure of branches in LMI geographies was to consolidate with other branches nearby and did not negatively impact the distribution of branches relative to the population residing in those geographies. The bank still maintains 29 active branches or 39.2 percent within LMI geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 6:00 pm. Five branches are open until 7:00 pm. Of the total branches, 52 are open on Saturday from 9:00 am to 2:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Community Development Services

The institution provides a relatively high level of CD services.

Salt Lake City CSA AA

The level of CD services in the Salt Lake City CSA AA is good. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 587 CD service activities to 100 organizations since the last evaluation, logging a total of 1,908 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing and economic development. The bank's assistance provided was responsive to the identified need in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- A WFBNA team member provided 63 hours of Board service to a community organization that works to promote economic development within Salt Lake City.
- A WFBNA team member provided 19 hours of financial education to a local community organization that develops sustainable and affordable housing, revitalizes neighborhoods and communities, and promotes self-sufficiency through home ownership.
- A WFBNA team member served on the board of directors for a Coalition for Personal Financial Literacy providing 71.5 board service hours. This Coalition was organized in September 2000 and became an official National Coalition affiliate in February of 2001 and consists of individuals and organizations that brings together leaders from business, government, and educators.
- Five WFBNA team members provided 50 hours of tax preparation through the VITA program. Refer to the comments in the institution Innovative or Flexible Retail Service Programs section of this public evaluation for additional details regarding this program.

Conclusion for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Service Test in the St. George MSA AA and UT Combined NonMetro AA is consistent with the bank's overall excellent performance under the Service Test in the FS area. Branch distribution in the St. George MSA AA is below the percentage of the population in LMI geographies; however, considering additional branches that directly border LMI geographies and serve LMI individuals, the bank's distribution exceeds the population.

State Rating

State of Virginia

CRA rating for the State of Virginia[49]: Satisfactory
The Lending Test is rated: High Satisfactory
The Investment Test is rated: Low Satisfactory
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Excellent lending activity;
- Good geographic distribution of loans;
- Excellent borrower distribution of loans;
- A good level of CD loans, which has a positive impact on the Lending Test;
- WFBNA's use of flexible products has a neutral impact on the Lending Test;
- Lending performance in the LS AAs weakened overall Lending Test rating;
- Adequate level of CD investments;
- Retail delivery systems are readily accessible to all portions of the AA;
- Adequate level of CD services; and
- Service performance in the LS AAs enhanced overall Service Test rating.

Description of Institution's Operations in Virginia

WFBNA delineated nine AAs within Virginia including the Richmond, VA MSA (Richmond MSA AA); Roanoke, VA MSA (Roanoke MSA AA); Virginia Beach-Norfolk-Newport News, VA MSA (Virginia Beach MSA AA); Blacksburg-Christiansburg-Radford, VA MSA (Blacksburg MSA AA); Charlottesville, VA MSA (Charlottesville MSA AA); Harrisonburg-Staunton-Waynesboro, VA CSA (Harrisonburg CSA AA); Kingsport-Bristol, VA MSA (Kingsport MSA AA), Lynchburg, VA MSA (Lynchburg MSA AA); and VA Combined Non-Metros (VA Combined NonMetro AA). The Richmond MSA, Roanoke MSA, and Virginia Beach MSA AAs received full scope reviews. These areas accounted for the largest portion of the lending (79.0 percent) and deposits (74.6 percent) amongst the AAs in Virginia. Refer to Appendix A for a complete description of each AA. Virginia represents the 13th largest rated area by deposits. WFBNA has $18.0 billion of deposits representing 1.4 percent of adjusted deposits. WFBNA operates 165 branches and 321 ATMs within Virginia, representing 3.0 percent of the bank's branches and 2.4 percent of the bank's ATMs. The bank originated and purchased approximately $38.1 billion in loans or 2.1 percent of total reported loan originations and purchases during the evaluation period. The bank's primary loan products in Virginia are home mortgage and small loans to businesses.

<u>Richmond MSA AA</u>

Within the Richmond MSA AA, the bank had $6.8 billion in deposits and ranked third amongst 29

[49] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

financial institutions in the market with 6.3 percent market share. Capital One Bank N.A. and Bank of America, N.A ranked first and second with a market share of 64.9 and 13.2 percent, respectively. WFBNA operates 57 branch offices and 116 ATMs in the AA.

Roanoke MSA AA

Within the Roanoke MSA AA the bank had $1.8 billion in deposits and ranked first amongst 18 financial institution in the market with a 24.8 percent market share. SunTrust Bank and BB&T ranked second and third with market shares of 19.2 and 12.2 percent, respectively. WFBNA operates 9 branch offices and 23 ATMs in the AA.

Virginia Beach MSA AA

Within the Virginia Beach MSA AA the bank had $4.8 billion in deposits and ranked second amongst 24 financial institution in the market with a 19.1 percent market share. Towne Bank ranked first with a market share of 22.3. WFBNA operates 44 branch offices and 99 ATMs in the AA.

Demographic Data

Richmond, MSA AA

The following table provides a summary of the demographics that includes housing and business information for the Richmond MSA AA. Table A indicates that the volume of OOUs is very small in low-income CTs and over 38 percent of families in the AA are LMI. The area's median housing value in the Richmond MSA AA is 3.2 times the area's median income, but 4 times moderate-, and 6.4 times low-income, indicating a limited proportion of OOUs are affordable to LMI. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

Economic Data

According to the August 2018 Moody's Analytics report, the Richmond economy is in a late expansion phase. Richmond is struggling to shift into a higher gear. Yet, the pace of job growth, while slower than in the rest of Virginia and the U.S., is tentatively improving thanks primarily to professional/business services and healthcare. Transportation/warehousing is playing a key supporting role. Average hourly earnings growth has lagged the U.S. average since mid-2017 but is close to catching up. Not only has the mix of job creation improved, but also the decline in the jobless rate is accelerating.

A talented workforce, high living standards, and a lower cost of doing business vis-à-vis the DC area will keep white-collar industries in the driver's seat in the Richmond MSA AA. Science Applications International Corporation will create IT jobs in downtown Richmond thanks to a contract with the Virginia Information Technologies Agency, the state's IT arm. UDig, a business technology consulting firm, is expanding its IT headquarters operations in Henrico County, leading to net new jobs. Finally, West Creek Financial, which provides consumer financing services for retailers, is adding a second office in Henrico County, creating about 100 positions. The additions will not move the needle on the economy, but their impact will be significant because they pay high wages and will contribute to consumption growth.

Healthcare will be a key source of investment in private and public structures. The Virginia Commonwealth University (VCU) will build a 16-story outpatient facility by mid-2020. VCU is also building a new College of Health Professions and has partnered with Sheltering Arms to construct a rehabilitation hospital in Goochland County. A BetterMed urgent care center will occupy an exterior parcel at the redeveloped Regency Mall. Some of these construction projects such as the Southside Emergency Care Center in Colonial Heights are coming on line. Growing healthcare demand is also bleeding into office industries.

It wasn't long ago that Richmond, Virginia was heralded as one of the hottest housing markets in 2014. Subsequently, housing prices in the capital of Virginia have persisted to increase at a steady pace for nearly four years, up approximately 3 percent annually since 2010. The positive trend may be attributed to the region's thriving job sector. The Richmond housing market experienced the same increased rate of appreciation as the rest of the country. Home values are rising more slowly than they were earlier this year, when 12-month gains were averaging nearly double their current pace. However, like the rest of the country, price growth has tempered in the Richmond housing market.

The area's major employers are Capital One Financial Corp., Fort Lee, and VCU Health System. According to the U.S. BLS, the unemployment rate for the first six months of 2018 remained at decade lows at 3.4 percent and has decreased from 6.6 percent at the beginning of the evaluation period. The unemployment rate in the AA is similar to the overall state at 3.5 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by an existing community contact that serves the bank's Richmond MSA AA. The contact is with an affordable housing organization that serves the greater Richmond area and has served more than 10,000 people. The organization provides rental and homeownership development, as well as support services, including youth programs, early childhood and parent education, social services, financial and career development services, and access to computer technology and health and wellness services. One of the primary focuses is on building, renovating or restoring high-quality, and affordable, well-located properties.

The contact indicated that affordable housing is a significant need in the Richmond area. An additional 20,000 units are needed in the region by 2030 to meet the demand. According to the contact, changes at federal level will result in some reductions or eliminations of some programs, and with interest rates and construction costs going up, subsidies going down, and outside investors coming in, there is a need for larger, more sophisticated CD partners in the assessment area.

The community contact mentioned there are unfavorable or ineffective policies and diminished funding from public and private resources to meet affordable housing demands for LMI individuals and families in the assessment area. Workforce development is also a primary need in the Richmond MSA AA. An alternative to building or preserving affordable housing is to help increase incomes, figure out pathways for LMI individuals to get gainful employment at a living wage which will provide people more choices around where to live, work, send their kids to school, etc. The contact also mentioned that banks have not been that responsive with respect to grant funding with grants in the range of $10,000 t0 $25,000.

The bank conducted research in the AA and identified community needs for affordable housing for LMI families, homeless services, neighborhood revitalization and stabilization, and workforce development and job readiness.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing represents a primary credit need for the Richmond MSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals. The AA also has CD needs for small business.

Roanoke MSA AA

The following table provides a summary of the demographics that includes housing and business information for the Roanoke MSA AA. Table A indicates that the volume of OOUs is very small in low-income CTs and over 38 percent of families in the AA are LMI. The area's median housing value in the Roanoke MSA AA is 2.9 times the area's median income, but 3.6 times moderate-, and 5.8 times low-income, indicating a limited proportion of OOUs are affordable to LMI. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Table A – Demographic Information of the Assessment Area

Economic Data

According to the April 2018 Moody's Analytics report, the Roanoke economy is in a recovery phase. The establishment survey of employment grossly overestimated the job market's health in 2017. Benchmark revisions reveal that nonfarm payrolls fell 0.9 percent instead of rising by 1.2 percent. No Virginia metro area suffered a larger downgrade than the Roanoke MSA AA, which has become the state's worst performer. It is making progress though, albeit barely. After languishing for two years, payroll employment has revived some in early 2018 due to a resurgence in consumer industries.

If demography is destiny, then Roanoke will be a chronic underperformer. The metro area was one of the state's slowest growers last year. After the Great Recession, natural population changes went from reliably positive to negative or negligible. Domestic net migration, meanwhile, has become erratic. Though domestic net migration rose in 2017, it barely made up for the massive outflow of domestic residents in the prior year. The upshot is that the working-age population has shrunk, which is the most fundamental constraint to job growth. There is little reason to believe Roanoke will reverse its demographic woes. The metro area will struggle to attract working-age in-migrants and businesses seeking a low-cost alternative to Washington DC, Richmond, and Virginia Beach. Roanoke's costs of living and doing business, as well as its talent pool, are either on par with or less competitive than those of nearby Blacksburg and Lynchburg.

The largest employers in the Roanoke MSA AA include the Roanoke Memorial Community Hospital, Kroger, and Wells Fargo Bank. The unemployment rate for the first three months of 2018 was 3.3 percent and has decreased from 6.1 percent at the beginning of the evaluation period. The unemployment rate in the AA is similar to the overall state at 3.5 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by an existing community contact pertaining to the Roanoke MSA AA in conjunction with this evaluation. The contact represents an economic development organization that primarily serves as a point of contact for businesses looking to relocate and expand.

According to the contact, CRA opportunities include financing for affordable housing projects, financial literacy programs for start-ups, and flexible innovative financing for small businesses. The area has experienced positive job growth and the trend is expected to continue. Job growth is the result of a rise in company expansions and relocations, largely in the servicing and manufacturing industry. The area is economically diverse in terms of local industries including medical/health care, food services and recreational. Economic weaknesses include the small size of the assessment area and limited air services from the local airport. More people are now homeless in the Roanoke area compared to a year ago, but the problem is still better than it was in 2012. According to the Blue Ridge Interagency Council on Homelessness, families were hit the hardest. The survey showed there are now 27 percent more family members who are homeless compared to a year ago. Other studies show there are far more families in need than the council's survey reflects. The council's findings don't include people who are staying with friends or other family members, or people staying in hotels. In just one example, Roanoke City Schools included those families in their count and found that there are nearly 500 homeless students in the school district.

Considering the information from the community contact and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Roanoke MSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

Virginia Beach MSA AA

The following table provides a summary of the demographics that includes housing and business information for the Virginia Beach MSA AA. Table A indicates that the volume of OOUs is very small in low-income CTs and over 37 percent of families in the AA are LMI. The area's median housing value in the Virginia Beach MSA AA is 3.7 times the area's median income, but 4.7 times moderate-, and 7.6 times low-income, indicating a limited proportion of OOUs are affordable to LMI. Median rents and the high percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Economic Data

According to the August 2018 Moody's Analytics report, the Virginia Beach economy is in a late expansion phase. Virginia Beach is reviving but remains a regional and national underachiever. Nevertheless, total employment has broken free from a yearlong spell of sluggishness, finally rising past its prerecession peak in April. Leisure/hospitality is leading the charge. Manufacturers are playing a key support role thanks to the federal defense stimulus that is under way after passage of the fiscal 2018 omnibus bill. Single-family homebuilding seems to have taken its cue from an improving job market. Trend growth in single-family permits has picked up to an above-average pace.

A loosening federal defense contract under the Bipartisan Budget Act of 2018 will be a boon for the Virginia Beach MSA AA. Department of Defense outlays on personnel and contracts for purchases of goods and services made up 16 percent of gross metro product in fiscal 2016, compared with 2 percent nationally. The commonwealth is partnering with Newport News Shipbuilding to support the creation of 2,000 jobs in the next five years. The company's shipyard was recently tapped to perform a mid-life overhaul of the USS John C. Stennis aircraft carrier. BAE Systems Norfolk Ship Repair will perform maintenance, modernization and repair on the USS Cole destroyer. MI Technical Solutions is expanding its IT and cybersecurity operations in the City of Chesapeake because of rising demand from the U.S. Navy.

Virginia Beach will continue to benefit from rising domestic travel to the area thanks to its beachfront attractions. Hotel room demand is outpacing supply across most of the area, forcing hotel operators to expand capacity. Near term outlook for domestic travel to the area is positive.

The AA's major employers are Huntington Ingalls Industries Inc. (Military shipbuilding), Sentra Healthcare, and Wal-Mart Stores Inc. The unemployment rate for the six months ending July of 2018 is at 3.6 percent and has decreased from 6.8 percent at the beginning of the evaluation period. The unemployment rate in the AA is similar to the overall state at 3.5 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by two community contacts pertaining to the Virginia Beach MSA AA in conjunction with this evaluation. One contact represents an economic development organization that primarily bring large commercial or industrial companies to the surrounding areas. The second contact represents a small business organization that primarily serves as the advocate for the retention and growth in small businesses for the surrounding areas.

The contact stated that the current economic conditions in the Virginia Beach MSA AA stable to improving. The area's economic activity continues to be dominated primarily by agriculture. The area produces primarily peanuts and soybeans. However, the area is focusing on its abundance of undeveloped land, its proximity to the Port of Hampton Roads and its extensive road network to lure large multinational businesses to the area. The contact stated that he believed the area will continue to grow at a modest to moderate pace. According to the second contact, the current economic conditions are favorable. The City of Virginia Beach experienced significant growth from 2001-2007 before being adversely impacted by the "Great Recession" which lasted until approximately 2012. Since 2012, the Pembroke Strategic Growth area has experienced significant growth. The area has experienced numerous development and redevelopment activities. In addition to projects by local developers, there has been a recent influx in outside investors completing larger scale development activities. The contact also indicated that the most common form of development is mixed use and condo/townhouses.

Both contacts stated that there are numerous opportunities for bank involvement in the local economy. However, there is fierce competition amongst financial institutions of all sizes for business. The large and multinational banks continue to cherry pick the larger projects offering very competitive rates. The community and regional banks are very active in the middle market and small community banks and credit unions are active in the retail market. The small financial institutions are meeting the retail credit needs of the local economy. Developers continue to build large multi-use and townhouse developments financed by the larger institutions and home purchasers continue to acquire the newly built stock using financing from the smaller community banks and credit unions. Competition in the market is fierce.

There are opportunities for all credit unions and banks to participate in lending activity in the area. The perception of the local financial institutions is very good. Financial institutions must have a personal relationship with someone to obtain their businesses. Larger banks work on a different level and community banks are competing to fill the niche left behind.

Considering the information from the community contact and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Virginia Beach MSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

Scope of Evaluation in Virginia

The rating for the State of Virginia is based on FS evaluations of the bank's performance in the Richmond MSA, the Roanoke MSA, and the Virginia Beach MSA AAs; however, performance in each AA was considered. Conclusions where a LS review affected the CRA Rating for the state are addressed within their respective tests. LS procedures were performed for the remaining six AAs. The State of Virginia is the 13th largest rated area and along with 12 other rated areas represents the bank's most significant markets in terms of lending, deposit, and branch distribution. Virginia represents a sizeable portion of the bank's overall lending, investments, and services; therefore, the performance in the state was weighted heavier in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN VIRGINIA

LENDING TEST

The bank's performance under the Lending Test in Virginia is rated High Satisfactory.

Conclusions for Areas receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Richmond MSA and Virginia Beach MSA AAs is excellent and performance in the Roanoke MSA AA is good.

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State Loans	%State Deposits
Richmond MSA	50,362	20,760	192	27	71,341	33.6	37.9
Roanoke MSA	9,281	2,545	52	10	11,888	5.6	9.9
Virginia Beach MSA	68,870	15,354	168	41	84,433	39.8	26.8
Blacksburg MSA	4,303	1,105	47	2	5,457	2.6	2.8

Total	$35,398,366	$2,693,577	$50,237	$316,146	$38,458,326	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

<u>Richmond MSA AA</u>

WFBNA ranked third in deposits with 6.3 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 10.1 percent market share. There is strong competition as reflected by the

502 lenders and 29 depository institutions in the AA. The 2nd and third lenders in this market were the SunTrust and Quicken Family of lenders with 4.5 and 4.2 percent market share, respectively.

In small loans to businesses, WFBNA ranked second with a market share of 11.0 percent. The top lender was American Express, FSB with 19.1 percent market share.

Roanoke MSA AA

WFBNA ranked first in deposits with 24.8 percent market share in the AA. In overall HMDA lending, WFBNA ranked second with 9.4 percent market share. There is strong competition as reflected by the 316 lenders and 18 depository institutions in the AA. The top lender in this market was Atlantic Bay Mortgage Group with 11.4 percent market share.

In small loans to businesses, WFBNA ranked seventh with a market share of 5.9 percent. The top three lenders were American Express, FSB with 15.5 percent market share, BB&T with 9.8 percent, and SunTrust Bank with 9.4 percent market share.

Virginia Beach MSA AA

WFBNA ranked second in deposits with 19.1 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 9.6 percent market share. There is strong competition as reflected by the 491 lenders and 24 depository institutions in the AA. The 2nd and 3rd top lenders in this market were Atlantic Bay Mortgage Group, LLC and the Navy Federal Credit Union with 7.9 and 7.5 percent market share, respectively.

In small loans to businesses, WFBNA ranked third with a market share of 7.8 percent. The top two lenders were the American Express, FSB, and Citibank N.A. with 20.8 and 9.2 percent market share, respectively.

Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in the Richmond MSA and Virginia Beach MSA AAs and an adequate geographic distribution of loans in the Roanoke MSA AA.

Richmond MSA AA

Home Mortgage Loans

Refer to Table O in the State of Virginia section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in LMI geographies substantially meets the aggregate distribution of loans in those geographies.
- The proportion of loans in low-income geographies is well below the proportion of OOUs and in moderate-income geographies is below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of Virginia section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- For 2012-2016, the combined proportion of the bank's small business loans in low-income geographies exceeds both the aggregate distribution of loans and the proportion of the businesses located in those geographies.
- The proportion of loans in moderate-income geographies substantially meets the aggregate distribution of loans and is below the proportion of businesses located in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly lower than the combined performance in 2012-2016.

<u>Roanoke MSA AA</u>

Home Mortgage Loans

Refer to Table O in the State of Virginia section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- For 2012-2016, the proportion of home mortgage loans in low-income geographies is well below both the aggregate distribution of loans and the proportion of OOUs in those geographies. Less weight was given to the bank's performance in low-income geographies due to the very small volume OOUs and lending in low-income geographies.
- The proportion of loans in moderate-income geographies is below both the aggregate distribution of loans and the proportion of OOUs in those geographies.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of Virginia section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- For 2012-2016, the combined proportion of the bank's small business loans in LMI geographies substantially meets the aggregate distribution of loans in those geographies.
- The proportion of loans in LMI geographies exceeds the proportion of businesses located in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly below the combined performance in 2012-2016.

Virginia Beach MSA AA

Home Mortgage Loans

Refer to Table O in the State of Virginia section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in LMI geographies substantially meets the aggregate distribution of loans.
- The proportion of loans in low-income geographies is below the proportion of OOUs and to moderate-income geographies is near to the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of Virginia section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is good.

- For 2012-2016, the proportion of the bank's small business loans in low-income geographies is below both the aggregate distribution of loans and the proportion of the businesses located in those geographies.
- The proportion of loans in moderate-income geographies exceeds the aggregate distribution of loans and is near to the proportion of businesses located in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is higher than the combined performance in 2012-2016.

Distribution of Loans by Income Level of the Borrower

The bank exhibits an excellent distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

Richmond MSA AA

Home Mortgage Loans

Refer to Table P in the State of Virginia section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 6.4 times the income of low-income and 4 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI. Despite the affordability challenges, the bank's performance in both periods, 2012-2016 and 2017-2018, to LMI borrowers exceeds the aggregate lending.
- The bank's performance to low-income borrowers is well below the proportion of families and for moderate-income borrowers exceeds the proportion of families.

Small Loans to Businesses

Refer to Table R in the State of Virginia section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

<u>Roanoke MSA AA</u>

Home Mortgage Loans

Refer to Table P in the State of Virginia section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 5.8 times the income of low-income and 3.6 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI. Despite the affordability challenges, the bank's performance in 2012-2016 to LMI borrowers substantially meets the aggregate lending.
- The bank's lending to low-income borrowers is well below the proportion of families and lending to moderate-income borrowers exceeds the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Virginia section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

<u>Virginia Beach MSA AA</u>

Home Mortgage Loans

Refer to Table P in the State of Virginia section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 7.6 times the income of low-income and 4.7 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI. Despite the affordability challenges, the bank's performance in both periods, 2012-2016 and 2017-2018, to LMI borrowers exceeds the aggregate lending reported.
- The bank's lending to low-income borrowers is significantly below the proportion of families and lending to moderate-income borrowers is near to the proportion of families.

Small Loans to Businesses

Refer to Table R in the State of Virginia section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Community Development Lending

The institution has made a relatively high level of CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

<u>Richmond MSA AA</u>

The level of CD lending in the Richmond MSA AA is excellent. WFBNA made 27 CD loans for a total of $86.9 million, which represents 11.4 percent of tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified affordable housing and small business lending needs in the AA. The bank made 13 CD loans totaling $45.8 million (52.7 percent) for the purpose of affordable housing. Additionally, the bank extended 9 CD loans totaling $9.5 million for the primary purpose of community services to LMI individuals, 4 CD loans totaling $31.5 million to revitalize and stabilize distressed areas, and one CD loan totaling $190,000 for the purpose of economic development.

Examples of CD loans in the state include:

- In May 2016, WFBNA renewed a $3.5 million working capital line of credit to an organization that primarily revitalizes and stabilizes projects within the AA. This entity offers innovative, flexible financial products, technical assistance designed to support housing and community development ventures, increase jobs, and build sustainable communities in low-income and underserved markets.
- In March 2018, WFBNA provided a $6.8 million loan for a multifamily affordable housing development. This development is located in a low-income census tract in Petersburg, VA and

consists of 49 one-bedroom units, 124 two-bedroom units, 27 three-bedroom units with 100 percent of the actual rent rates below the 2016 Fair Market Rent for the area and 100 percent of the units affordable to tenants earning between 20.3 and 41.9 percent of the 2017 area MFI.

Roanoke MSA AA

The level of CD lending in the Roanoke MSA AA is poor. WFBNA made 10 CD loans in the Roanoke MSA AA for a total of $2.1 million which represents only 1.0 percent of tier 1 capital. CD lending performance has a neutral impact on the lending test rating. The loans had a limited responsiveness to the identified needs in the AA and focused solely on community services. There are opportunities available within the AA for the bank to provide CD lending.

Examples of CD loans in the AA include:

- In August 2017, WFBNA renewed a $50,000 working capital line of credit for a non-profit organization whose mission is to provide educational enrichment and outdoor activities to less fortunate children, primarily those residing in public housing communities in the City of Roanoke. Founded in 1978, the nonprofit's overall goals are to equip young people from low-income families with the skills and self-confidence necessary to contend with and overcome barriers they face daily; build self-confidence and leadership skills; and encourage academic success. Over 95 percent of clients are considered to be LMI individuals as they earn less than $49,600 annually, which is 80 percent of the 2015 MFI.
- In August 2018, WFBNA renewed a $300,000 working capital line of credit for a non-profit nursing facility that provides long term care of its residents and has a 45-bed capacity. It is in downtown Salem, VA and focuses on the oldest segment of the population (geriatric residents) which is an area that many assisted living and nursing facilities do not focus exclusively on. Most facilities that have residents in their 80's and 90's are integrated with much younger residents which inhibits programming and activities that the geriatric community needs. The organization provides intermediate nursing home care which serves approximately 56 percent Medicaid patients.

Virginia Beach MSA AA

The level of CD lending in the Virginia Beach MSA AA is excellent. WFBNA made 41 CD loans in the Virginia Beach MSA AA for a total of $204 million which represents 37.6 percent of the allocated tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified needs in the AA, including affordable housing and community services. The bank made 35 CD loans totaling $190 million (93 percent) for the purpose of affordable housing. Additionally, the bank extended 6 CD loans totaling $13.5 million for the primary purpose of community services to LMI individuals.

Examples of CD loans in the Virginia Beach MSA AA include:

- In November 2016, WFBNA provided a $14.2 million loan for a multifamily housing development located in a moderate-income census tract in Virginia Beach, VA. The project consists of 29 one-bedroom units, 104 two-bedroom units, and 80 three-bedroom units with 100 percent of the actual rent rates below the 2016 Fair Market Rent for the area and 100 percent of the units affordable to tenants earning between 39 and 66 percent of the 2016 area MFI.

- In April 2014, WFBNA provided a $2.5 million working capital line of credit to an organization that supports people with disabilities to live a productive and fulfilling lives. The organization serves over 1,100 people with disabilities in employment, day support, community living, and early childhood programs. The organization's service area includes the Virginia Peninsula, Middle Peninsula, and the Southside and have offices in Hampton, Gloucester, and Norfolk. Through success in government contracts, they have created jobs for over 250 people with disabilities across the country. All of its clients are LMI individuals as they earn less than 80 percent of the area MFI.

Product Innovation and Flexibility

Richmond MSA AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 76 loans totaling $12.9 million to LMI homebuyers that qualified under this program.

Roanoke MSA AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 17 loans totaling $2.2 million to LMI homebuyers that qualified under this program.

Virginia Beach MSA AA

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 107 loans totaling $17.1 million to LMI homebuyers that qualified under this program.

Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding the program listed above.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Lending Test in all six LS AAs is good and weaker than the bank's overall excellent performance under the Lending Test in the FS areas due primarily to lower volume of CD lending. Additionally, the performance in the FS Roanoke MSA AA is only good and weaker than the bank's overall excellent performance under the Lending Test in the other two FS areas. Performance differences in the LS AAs including the Roanoke MSA AA did impact the overall Lending Test rating for the State of Virginia. As such, the overall Lending Test rating for the State of Virginia was downgraded to High Satisfactory.

Refer to Tables O through T in the State of Virginia section of appendix D for the facts and data that support these conclusions.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of Virginia is rated Low Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the investment test, the bank's performance in the Richmond MSA AA is adequate, performance in the Roanoke MSA AA is poor, and performance in the Virginia Beach MSA is excellent.

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

<u>Richmond MSA AA</u>

The institution has an adequate level of qualified CD investments and grants, although rarely in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 4.4 percent of tier 1 capital allocated to the AA.

The investments and grants reflect adequate responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Only 48.6 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 270 grants totaling $4.8 million to a variety of organizations that primarily support affordable housing, community services, and economic development for LMI individuals and geographies.

The institution occasionally uses innovative and/or complex investments to support CD initiatives. CD Investments involved two complex NMTC and LIHTC projects where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In June 2016, WFBNA invested $15 million in an LIHTC fund. Of this total investment, $1 million was allocated to a development located in Richmond, Virginia, with units restricted to tenants earning no more than 60 percent of the area MFI. This activity is responsive to the identified need for affordable housing.
- In April 2013, WFBNA made a $12.8 million NMTC investment for the development of a new public library. The property is located in a low-income census tract of Petersburg, Virginia and designated as a state enterprise zone. The project is anticipated to generate approximately 50 construction jobs and 22 permanent jobs.
- During the exam timeframe, WFBNA provided 11 grants totaling $740,000 to several housing organizations through the PMP for affordable housing in the Richmond MSA AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

<u>Roanoke MSA AA</u>

The institution has a poor level of qualified CD investments and grants, but not in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 1.2 percent of tier 1 capital allocated to the AA.

The investments and grants reflect poor responsiveness to the needs identified in the AA. Over 85.3 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 52 grants totaling $498,000 to a variety of organizations that primarily support affordable housing and community services.

The institution rarely uses innovative and/or complex investments to support CD initiatives. CD Investments involved one complex project where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers.

Example of CD a investment in the AA includes:

- In August 2013, WFBNA invested $28.9 million in an LIHTC fund. Of this total investment, $2.0 million was allocated to a development located in Roanoke, Virginia, with 244 units restricted to tenants earning no more than 60 percent of the area MFI. This activity is responsive to the identified need for affordable housing.

Virginia Beach MSA AA

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 23.4 percent of tier 1 capital allocated to the AA.

The investments and grants reflect excellent responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Virtually all of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 168 grants totaling $2.1 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved several complex LIHTC projects where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In April 2016, WFBNA invested $9.8 million for the rehabilitation of an 84-unit LIHTC affordable housing complex located in Norfolk, Virginia. Units are restricted to tenants earning between 40 and 60 percent of the area MFI. This investment is responsive to the need for affordable housing.
- In December 2018, WFBNA provided a $22.1 million LIHTC investment for an affordable housing development located in Norfolk, VA, with 100 percent of the units restricted to tenants earning between 50 and 60 percent of the area MFI. This investment is responsive to the need for affordable housing.
- In October 2014, WFBNA provided a $100,000 grant to a local organization through the PMP for affordable housing in Virginia Beach, VA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Investment Test in the Harrisonburg CSA AA is stronger than the bank's overall adequate performance in the Investment Test in the FS areas due primarily to higher volume of CD investments. The bank's performance in the Blacksburg MSA, Charlottesville MSA, Kingsport MSA, Lynchburg MSA and the VA Combined NonMetro AAs is weaker than the bank's overall performance due primarily to a lower volume of CD investments. Performance differences in the LS AAs did not impact the overall Investment Test rating for the State of Virginia.

SERVICE TEST

The bank's performance under the Service Test in Virginia is rated Outstanding.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Richmond MSA AA is excellent and performance in the Roanoke MSA and Virginia Beach MSA AAs is good.

Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the institution's AAs, particularly LMI geographies and/or LMI individuals.

Richmond MSA AA

As of December 31, 2018, WFBNA operates 57 branches and 116 ATMs in the Richmond MSA AA. Of these branches, 56 are full-service locations and one is a limited-service branch. There are four branches in low-income geographies and 15 branches in moderate-income geographies. The branch distribution in low-income geographies is near to the percentage of the population in low-income CTs and branch distribution in moderate-income geographies exceeds the percentage of the population in moderate-income CTs n the AA. When considering an additional five branches within close proximity to LMI geographies, the bank's distribution improves and exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed five branches since the last evaluation. Of these five branches, three were located in moderate-income geographies. The closure of branches in moderate-income geographies was to consolidate with other branches nearby and did not negatively impact the distribution of branches relative to the population residing in those geographies. The bank still maintains 19 active branches or 38.2 percent within LMI geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Thursday from 9:00 am to 5:00 pm, and on Friday from 9:00 am to 6:00 pm. Of the total branches, 38 are open on Saturday from 9:00 am to 1:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Roanoke MSA AA

As of December 31, 2018, WFBNA operates nine branches and 23 ATMs in the Roanoke MSA AA. All nine branches are full-service locations. There are no branches in the low-income geographies; however, the population is very low in low-income geographies. There is one branch in a moderate-income geography. The branch distribution in moderate-income geographies is below the percentage of the population in moderate-income geographies in the AA. When considering an additional three branches within close proximity to LMI geographies, the bank's distribution is near to demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed one branch, within a middle-income CT, since the last evaluation.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Thursday from 9:00 am to 5:00 pm, and on Friday from 9:00 am to 6:00 pm. Of the total branches, five are open on Saturday from 9:00 am to 1:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Virginia Beach MSA AA

As of December 31, 2018, WFBNA operates 44 branches and 99 ATMs in the Virginia Beach MSA AA. All branches are full-service locations. There are three branches in low-income geographies and nine branches in moderate-income geographies. The branch distribution in low-income geographies exceeds the percentage of the population in low-income CTs and branch distribution in moderate-income geographies is near to the percentage of the population in moderate-income CTs in the AA. When considering an additional 10 branches within close proximity to LMI geographies, the bank's distribution improves and exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed seven branches since the last evaluation. Of these seven branches, three were located in moderate-income geographies. The closure of branches in moderate-income geographies was to consolidate with other branches nearby and did not negatively impact the distribution of branches relative to the population residing in those geographies. The bank still maintains 12 active branches or 27.3 percent within LMI geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Thursday from 9:00 am to 5:00 pm, and on Friday from 9:00 am to 6:00 pm. Of the total branches, 25 are open on Saturday from 9:00 am to 1:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Community Development Services

The institution provides an adequate level of CD services.

Richmond MSA AA

The level of CD services in the Richmond MSA AA is good. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 197 CD service activities to 58 organizations since the last evaluation, logging a total of 838 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing and economic development. The bank's assistance provided was responsive to the identified need in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- A WFBNA team member provided 25 hours of financial education to a community organization that works to remove barriers to homeownership by partnering with community organizations and governmental entities to provide down payment assistance, financial literacy education, pre-purchase homebuyer education, and one-on-one housing counseling.
- WFBNA team members provided 41 hours of Board service and outreach to a nonprofit community development corporation that provides innovative solutions to the affordable housing market for 22 years.
- A WFBNA team member provided 6 hours of Board service to a local CDFI dedicated to helping community residents transform distressed neighborhoods into healthy and sustainable communities of choice and opportunity. Over 75 percent of the organization's clients are considered LMI individuals.

Roanoke MSA AA

The level of CD services in the Roanoke MSA AA is adequate. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 86 CD service activities to 18 organizations since the last evaluation, logging a total of 211 qualified hours within this AA. A substantial majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other limited activities were targeted to affordable housing and economic development. The following are examples of CD services provided in this AA:

- WFBNA team members provided 65 hours of Board service and outreach to a community organization that utilizes community-led solutions to identify and resolve community concerns with a primary focus on education, financial stability, and health.
- WFBNA team members provided 59 hours of Board service and financial education to a grassroots organization offering programs to help people that are suffering physically, psychologically, socially, and spiritually. The programs are holistic and involve the elements of personal responsibility, self-determination, and an internal transformation of values and vision resulting in a restoration of self-respect. All of its clients are LMI individuals as they earn less than 80 percent of the area MFI.

Virginia Beach MSA AA

The level of CD services in the CSA AA is adequate. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 95 CD service activities to 39 organizations since the last evaluation, logging a total of 258 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other limited activities were targeted affordable housing and economic development. The following are examples of CD services provided in this AA:

- A WFBNA team member provided 12 hours of Board service to a community organization that promotes commercial and industrial growth throughout Virginia and Eastern North Carolina. This organization serves as a resource for small businesses in need of permanent financing to acquire fixed assets. It is also certified by the U.S. SBA to provide permanent financing through the SBA 504 Loan program.
- WFBNA team members provided five hours of financial education to a local community organization that works to implement an integrated workforce development strategy, systems and activities designed to increase the employment, retention and earnings of citizens of the Virginia Peninsula. The goal of the organization is to successfully support, develop, and operate a workforce development program serving in-school and out-of-school youth, unemployed and underemployed residents of the Virginia Peninsula.

Conclusion for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance in the Blacksburg MSA AA is consistent with the bank's overall good performance under the Service Test in the FS areas. The bank's performance in the Charlottesville MSA, Harrisonburg CSA, Kingsport MSA, Lynchburg MSA, and VA Combined NonMetro AAs is stronger than the bank's overall performance due primarily to higher percentage of branch distribution in LMI geographies. Performance differences in the LS AAs including the Richmond MSA AA did impact the overall Service Test rating for the State of Virginia. As such, the overall Service Test rating was upgraded to Outstanding.

State Rating

State of Washington

CRA rating for the State of Washington[50]: Outstanding
The Lending Test is rated: Outstanding
The Investment Test is rated: Outstanding
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Excellent lending activity;
- Good distribution of loans by borrower profile;
- Good geographic distribution of loans;
- WFBNA is a leader in providing CD loans, which has a significant positive impact on the Lending Test;
- WFBNA's use of flexible products has a positive impact on the Lending Test;
- Excellent level of CD investments that are responsive to AA needs;
- Retail delivery systems are readily accessible to all portions of the AA; and
- WFBNA provides a relatively high level of CD services that are responsive to the needs of the bank's AA.

Description of Institution's Operations in Washington

WFBNA delineated seven AAs within Washington including the Seattle-Tacoma, WA CSA (Seattle CSA AA); Bellingham, WA MSA (Bellingham MSA AA); Kennewick-Richland, WA MSA (Kennewick MSA AA); Spokane-Spokane Valley, WA MSA (Spokane MSA AA); Wenatchee, WA MSA (Wenatchee MSA AA); Yakima, WA MSA (Yakima MSA AA); and WA Combined non-metropolitan (WA Combined NonMetro AA). The Seattle CSA AA, which accounted for the majority of the lending (79 percent) and deposits (87 percent) amongst the AAs in Washington, received a FS review. Refer to Appendix A for a complete description of each AA. Washington represents the 14th largest rated area by deposits. WFBNA has $17.7 billion deposits representing 1.4 percent of adjusted deposits in Washington. WFBNA operates 136 branches and 234 ATMs within Washington, representing 2.4 percent of the bank's branches and 1.7 percent of the bank's ATMs. The bank originated or purchased $64.8 billion in loans or 3.4 percent of total reported loan originations and purchases during the evaluation period in Washington. The bank's primary loan products in the State of Washington are home mortgage and loans to small businesses.

<u>Seattle CSA AA</u>

Within the Seattle CSA AA, the bank has $15.4 billion deposits and ranked second amongst 58 institutions in the market with 12.7 percent market share. Bank of America ranked first with 25.3 percent market share and JPMorgan Chase ranked third with 12.3 percent market share. WFBNA operates 108 branches and 195 ATMs in the Seattle CSA AA.

[50] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

Demographic Data

The following table provides a summary of the demographics that includes housing and business information for the Seattle CSA AA. Table A shows that the volume of OOUs very small in the low-income tracts and over 37 percent of families in the AA are LMI. The area's median housing value in the Seattle CSA AA is 4.3 times the highest MSA median income, but 5.3 times moderate-, and 8.5 times low-income, indicating a limited proportion of OOUs are affordable to LMI residents. Median rents and the significant percentage of families below poverty level suggest rental housing is also unaffordable for many low-income residents.

Economic Data

Seattle-Tacoma-Bellevue, WA MSA

According to the August 2018 Moody's Analytics report, Seattle is in the late expansion phase of the business cycle. The Seattle economy is driven by manufacturing, high tech, and logistics. Seattle is home to tech giants Amazon and Microsoft, which are the area's largest employers after Boeing Co. The rise of the tech giants has brought job and income gains, attracted new residents and stabilized the economy amid layoffs at Boeing. The recent surge in information industry jobs increased high tech's share of Seattle's total employment, which is more than three times higher than the U.S. overall. However, Seattle's leading industry is expected to slow as tech firms open satellite offices in lower-cost tech hubs in the South Mountain West and consumer spending slows. In addition, escalating trade tensions between the U.S. and China are a growing concern for the aerospace industry. China is the largest market for new Boeing jets, most of which are produced at Seattle area facilities, and the imposition of additional Chinese tariffs is expected to hurt sales. The trade war could also put Seattle based tech firms at risk as China and Southeast Asia are critical markets to the growth of Microsoft and Amazon.

Per Moody's, despite rapid wage increases, double-digit house price appreciation has put a dent in housing affordability and further declines could put homeownership out of reach for workers in non-tech industries. Per the U.S. BLS, Seattle's unemployment rate in the 2Q of 2018 is 3.5 percent down from 6.6 percent at the beginning of the evaluation period. The area unemployment rate compares favorably to the State of Washington unemployment rate of 4.2 percent during the same period.

Bremerton-Silverdale, WA MSA

According to the March 2019 Moody's Analytics report, Bremerton's economy is coming off its best year of the expansion, and the job market has been in good shape. Payroll employment rose close to 3 percent last year, outpacing the lofty Washington average. Led by federal additions at Naval Base Kitsap, public sector payrolls have broken out of their holding pattern, but private industries are setting Bremerton apart. Naval Shipyard will anchor the economy long term, but too few candidates and greater threats to federal funding for expansion at the base and shipyard mean job additions this year will fall short of those in 2018. In terms of employment, Bremerton is more dependent on the federal government than any other area in the country.

Housing price appreciation is similar to the state overall and slightly above that of the nation thanks to robust demand; however, supply constraints remain due in part to weak homebuilding. The largest employers in the Bremerton MSA include the Naval Base Kitsap, Harrison Medical Center, and Naval Undersea Warfare Center. According to the U.S. BLS, the unemployment rate for the 4nd quarter of 2018 was 4.6 percent and has decreased from 7.2 percent at the beginning of the evaluation period. The unemployment rate in the AA was slightly less than the overall state at 4.8 percent for the same period.

Mount Vernon-Anacortes, WA MSA

According to the March 2019 Moody's Analytics report, the Mount Vernon economy is rapidly strengthening. Employment growth of near 4 percent at an annual rate over the last six months easily beats the state and national averages. J ob gains are broad based, but the main drivers are government, construction, and manufacturing. Local government employment provides an anchor for the Mount Vernon economy and recent job gains bode well for the future. Two factors explain government's outsize role in Mount Vernon's labor market. First, the Port of Anacortes, a major distribution facility for local manufacturers, is publicly operated and its employees are considered local government workers. The port benefited from an uptick in global manufacturing last year. Second, the two casinos on Native American tribal lands in Mount Vernon are also counted under local government.

Housing inventories are low, but new supply will help rebalance Mount Vernon's housing market in the coming years. Housing starts have recently begun to exceed the rate of household formation, a trend that is expected to persist into next year. Housing affordability has fallen in recent years as single-family house price appreciation has outstripped income growth, but the completion of more new homes will begin to temper house price gains as inventories increase.

The largest employers in the Mount Vernon MSA include Skagit Valley Health, Skagit Horticulture LLC, and Janicki Industries. According to the U.S. BLS, the unemployment rate for the 4nd quarter of 2018 was 4.8 percent and has decreased from 8.6 percent at the beginning of the evaluation period. The unemployment rate in the AA was slightly less than the overall state at 4.8 percent for the same period.

Olympia-Tumwater, WA MSA

According to the March 2019 Moody's Analytics report, Olympia's economy is steady. Job growth has slowed only slightly, and the year-ago rate of 2.9 percent is in the top 20 regional because worker shortages are being remedied. Olympia's performance has remained closely linked to the health of the state budget. State government employs one in five workers locally, the third highest share in the region, and state tax revenues are struggling to keep pace with spending. Tacoma's Joint Base Lewis-McChord employs around 4,000 of Olympia's residents and a military-friendly administration and budget will pay dividends to Olympia through job and income growth. Leisure/hospitality, retail and healthcare has remained Olympia's fastest growing industries but their contribution to growth will diminish in the years ahead.

Per Moody's, housing price appreciation is similar to the state and the nation overall thanks to robust demand. The largest employers in the Olympia MSA include Xerox Business Services LLC, Nisqually Red Wind Casino Corp., and Evergreen State College. According to the U.S. BLS, the unemployment rate for the 4nd quarter of 2018 was 4.7 percent and has decreased from 7.5 percent at the beginning of the evaluation period. The unemployment rate in the AA was slightly less than the overall state at 4.8 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by two community contacts pertaining to the Seattle CSA AA in conjunction with this evaluation. The contacts represent a CDFI/CDC serving Seattle/King County and an affordable housing organization serving the entire state of Washington.

The CDFI/CDC has historically focused on housing development and homeownership counseling. Post-recession, the organization has seen investors come in at a high rate disrupting the fabric of the of local minority and LMI neighborhoods. Per the contact, rising prices have made homeownership impossible for LMI families in Seattle. The organization is shifting its mission to focus on neighborhood preservation to maintain and enhance the character of communities primarily in South Seattle/King County while preserving diversity and increasing economic opportunities for all. The contact commented there is very low unemployment in the AA and because of this there is an influx of people moving to the area for jobs. As a result, this has put an extreme pressure on the infrastructure of the AA which has increased traffic conditions, limited the availability of affordable housing and other services and is causing a significant threat of displacement for low-income people. The need for equitable transit oriented development is high so that some of the congestion and housing issues can be addressed for all income levels. The contact also mentioned the current housing crisis, citing a recent housing study finding 36 percent of households in Washington are cost-burdened and 15 percent are severely cost-burdened. Housing demand is so high in the MSA that it is impossible to meet the need.

The contact indicated a number of needs and/or opportunities for bank involvement including EQ2 financing, long term loans and lines of credit for nonprofits, and affordable portfolio residential loan products for first time homebuyers and LMI.

The affordable housing's mission is to serve as a catalyst for affordable housing creation and preservation. The organization makes permanent loans for affordable rental housing with funding from member banks and also develops subsidized projects utilizing tax credits. The organization funds projects that banks will not fund on their own such as those in perceived riskier markets (e.g. rural). The contact noted the affordable housing crisis occurring in Washington, also citing the recent study mentioned by the first contact. An effort underway to address the housing issues is Transit Oriented Development. The organization has funded several projects and would like to do more. The contact mentioned that another big problem for Seattle is homelessness. The organization has completed a number of projects that include permanent supportive housing including some for youth and Veterans specifically.

According to the contact, there is room and opportunity for every financial institution to participate in the market. They have worked on economic development projects that have LIHTC on the top units and commercial space on the first floor. Banks can become members and participate in this type of development and can also provide construction financing. Banks can participate in funding housing and services for the homeless. Banks can also support financial education to improve the financial capability of LMI households. The contact noted that a number of banks are working with non-profits on financial education initiatives designed to help consumers avoid payday lenders and other predatory-type financial services.

The bank conducted research in the AA and identified community needs for affordable housing serving LMI families, Development of Healthy Community services to homeless veterans and families, education programs for the unbanked and underbanked, and Neighborhood Revitalization/Stabilization.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing lending represent the primary credit need for the Seattle CSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals. The Seattle CSA AA also need down-payment assistance for LMI first time homebuyers and more grants and donations to non-profits that provide CD services to LMI communities and people that are homeless. Other CD needs in the AA include financial education initiatives designed to help LMI individuals avoid payday lenders and predatory type financial services.

Scope of Evaluation in Washington

The rating for the State of Washington is primarily based on a FS evaluation of the bank's performance in the Seattle CSA AA; however, performance in each AA was considered. Conclusions where a LS review affected the CRA Rating for the state are addressed within their respective tests. LS procedures were performed for the Bellingham MSA, Kennewick MSA, Spokane MSA, Wenatchee MSA, Yakima MSA, and the WA Combined NonMetro AAs. The State of Washington represents a limited portion of the bank's overall lending, investments, and services; therefore, the performance in the state received limited weighting in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN WASHINGTON

LENDING TEST

The bank's performance under the Lending Test in Washington is rated Outstanding.

Conclusions for Area Receiving a FS Review

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Seattle CSA AA is excellent.

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	%State Loans	%State Deposits
Seattle CSA	159,750	49,951	527	126	210,354	79.2	87.1
Bellingham MSA	5,351	2,164	48	8	7,571	2.9	1.8
Kennewick MSA	9,101	943	86	8	10,138	3.8	0.4
Spokane MSA	15,856	4,013	229	26	20,124	7.6	4.3
Wenatchee MSA	3.174	1,022	139	1	4,336	1.6	2.1
Yakima MSA	4,205	1,423	191	7	5,826	2.2	1.5
WA Combined Non MSA	4,533	2,287	287	0	7,107	2.7	2.8
Total	201,970	61,803	1,507	176	265,456	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Dollar Volume of Loans (000's)*							
Assessment Area	Home Mortgage	Small Business	Small Farm	CD	Total	%State* Loans	%State Deposits
Seattle CSA	$52,641,350	$2,877,198	$46,034	$837,782	$56,402,364	85.6	87.1

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

<u>Seattle CSA AA</u>

WFBNA ranked second in deposits with 12.7 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 8.6 percent market share. There is strong competition as reflected by the 633 lenders and 58 depository institutions in the AA. The second and third top lenders in this market were Caliber Home Loans with 4.9 percent market share and Homestreet Bank with 4.7 percent market share.

In small loans to businesses, WFBNA ranked sixth with a market share of 6.8 percent. The top lenders were Bank of America with a market share of 32.5 percent, followed by American Express (14.6 percent) and Chase (11.4 percent). By total dollar amount, WFBNA ranked third with a market share of 9.9 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in its AA.

Home Mortgage Loans

Refer to Table O in the State of Washington section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- For 2012-2016, the proportion of home mortgage loans in LMI geographies substantially meets the aggregate distribution of loans and is near to the proportion of OOUs in those geographies.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of Washington section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The bank's performance in 2012-2016 for small business loans in LMI geographies exceeds the aggregate distribution of loans located in those geographies.
- The combined proportion of the bank's small business loans in low-income geographies exceeds the proportion of businesses located and to moderate-income geographies is near to the proportion of businesses located in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly below the combined performance in 2012-2016.

Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

Home Mortgage Loans

Refer to Table P in the State of Washington section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 8.5 times the income of low-income and 5.3 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI. Despite the affordability challenges, the bank's overall home mortgage lending in 2012-2016 to low-income borrowers exceeds the aggregate distribution of loans and is significantly below the proportion of families.
- The bank's overall home mortgage lending to moderate-income borrowers substantially meets the aggregate distribution of loans and is below the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly less than the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Washington section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is excellent.

- For 2012-2016, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is near to the percentage of small businesses located in the AA.

- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly less than the combined performance in 2012-2016.

Community Development Lending

The institution is a leader in making CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The level of CD lending in the Seattle CSA AA is excellent. WFBNA made 126 CD loans in its AA for a total of $838 million, which represents over 48 percent of allocated tier 1 capital. CD lending performance has a significant positive impact on the lending test rating. The institution makes significant use of innovative and/or complex CD loans and involved many complex projects where the bank often acted in a leadership role. The loans were responsive to the identified needs in the AA, including affordable housing and community services including activities related to healthy communities and education. During the evaluation period, WFBNA made 51 affordable housing CD loans totaling $662 million and 54 community service loans totaling $142 million.

Examples of CD loans in the AA include:

- In October 2016, WFBNA provided a $50.2 million loan for a multifamily housing development located in a moderate-income census tract in Lakewood, WA. The project consists of 193 one-bedroom units, 240 two-bedroom units, 89 three-bedroom units with 71 percent of the actual rent rates below the 2016 Fair Market Rent for the area and 97 percent of the units affordable to tenants earning between 32 and 79 percent of the 2016 area MFI.
- In March 2015, WFBNA provided a $1 million working capital line of credit to a nonprofit organization that helps low-income students become college-ready and earn their degrees. The activity is responsive to an identified need for education specifically, reducing financial barriers to post-secondary education programs.
- In October 2014, WFBNA renewed a $500,000 working capital line of credit to an organization that provides a variety of services including helping people meet their basic food needs; assisting homeless individuals secure permanent housing; assist youth and adults acquire job search skills, gain employment and retain jobs; and assist LMI people access to homeownership. Over 93 percent of its clients are LMI individuals as they earn less than 80 percent of the area MFI.

Product Innovation and Flexibility

The institution makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. The bank launched the NeighborhoodLIFT program in the Seattle CSA AA in July 2016 and more than 100 potential homebuyers attended the event. Of the 100 in attendance, WFBNA originated 95 mortgage loans totaling $23.6 million. Under the *your*FirstMortgage loan program the bank has funded 191 loans totaling $44.6 million to LMI homebuyers that qualified under this program.

Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding these programs.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Lending Test in the Bellingham MSA, Kennewick MSA, Spokane MSA, and Yakima MSA AAs is consistent with the bank's overall excellent performance under the Lending Test in the FS area. The bank's performance in the Wenatchee MSA and WA Combined NonMetro AAs is weaker than the overall performance due primarily to a lower volume of CD lending. Performance differences in the two LS AAs did not impact the Lending Test rating for the State of Washington.

Refer to Tables O through T in the State of Washington section of appendix D for the facts and data that support these conclusions.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of Washington is rated Outstanding.

Conclusions for Area Receiving a FS Review

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the investment test, the bank's performance in the Seattle CSA AA is excellent.

Qualified Investments										
	Prior Period*		Current Period		Total				Unfunded Commitments**	
Assessment Area	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
Seattle CSA	35	$14,826	530	$204,229	565	83.0	$219,055	59.1		
Bellingham MSA	0	$0	17	$23,838	17	2.5	$23,838	6.4		
Kennewick MSA	1	$3,286	11	$12,855	12	1.8	$16,141	4.4		
Spokane MSA	8	$1,278	37	$82,616	45	6.6	$83,894	22.7

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

<u>Seattle CSA AA</u>

The institution has an excellent level of qualified CD investments and grants, often in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 12.6 percent of tier 1 capital allocated to the AA.

The investments and grants exhibit excellent responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 83.4 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 485 grants totaling $12.5 million to a variety of organizations that primarily support affordable housing, community services, economic development, and revitalization/stabilization.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved numerous complex LIHTC and NMTC projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In September 2014, WFBNA invested $15.3 million for the construction of a 97-unit LIHTC affordable housing development located in Seattle, Washington. All 97 units are rent restricted to tenants earning 30 percent of the area MFI with a homeless designation. The goal of the project is to promote housing success for the most vulnerable chronically homeless adults. Housing success will be measured primarily through housing longevity as well as clinical and social stabilization and changes in the quality of residents' lives. This activity is responsive to the identified need for affordable housing and addressing homelessness. WFBNA also demonstrated multi-faceted support by providing both the construction loan ($12.3 million) and equity investment in support of this affordable housing development.
- In July 2016, WFBNA provided six local initiative grants totaling $530,000 to several housing organizations to administer the NeighborhoodLIFT Down Payment Assistance program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.
- During the exam timeframe, WFBNA provided three grants totaling $690,000 to several small business organizations through the Small Business DCC Program benefiting small businesses in the State of Washington particularly within the Seattle CSA AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.
- During the exam timeframe, WFBNA provided five grants totaling $450,000 to several housing organizations through the PMP for affordable housing in the Seattle CSA AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Investment Test in the Bellingham MSA, Kennewick MSA, Spokane MSA, Wenatchee MSA, Yakima MSA, and WA Combined NonMetro AAs is consistent with the bank's overall excellent performance in the Investment Test in the FS area.

SERVICE TEST

The bank's performance under the Service Test in Washington is rated Outstanding.

Conclusions for Area Receiving a FS Review

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Seattle MSA AA is excellent.

Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the institution's AAs, particularly LMI geographies and/or LMI individuals.

Distribution of Branch Delivery System

Seattle MSA AA

As of December 31, 2018, WFBNA operates 108 branches and 195 ATMs in the Seattle MSA AA. Of these branches, 106 are full-service locations and two are limited-service branches. There are eight branches in low-income geographies and 26 in moderate-income geographies. The branch distribution in LMI geographies significantly exceeds the percentage of the population in LMI geographies in the AA. When considering an additional 14 branches within close proximity to LMI geographies, the bank's branch distribution further exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank opened two branches in moderate-income geographies, four branches in middle-income geographies, and two branches in upper-income geographies since the last evaluation. The bank closed two branches in low-income, three branches in moderate-income, five branches in middle-income, and two branches in upper-income geographies since the last evaluation. The closure of branches in LMI geographies was to consolidate with other branches nearby and did not negatively impact the distribution of branches relative to the population residing in those geographies. The bank still maintains 34 active branches or 31.3 percent within LMI geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 5:00 pm. Of the total branches, 86 are open on Saturday from 10:00 am to 2:00 pm. WFBNA services are available at the full-service branches and all delivery systems discussed bank-wide are available in this AA.

Community Development Services

The institution provides a significant level of CD services.

Seattle MSA AA

The level of CD services in the Seattle MSA AA is good. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 909 CD service activities to 79 organizations since the last evaluation, logging a total of 3,201 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing and economic development. The bank's assistance provided was responsive to the identified needs in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- A WFBNA team member provided 162 hours of Board service to a nonprofit housing organization that works in partnership with people in need to build decent and affordable housing. All of its clients are LMI individuals as they earn less than 80 percent of the area MFI. The houses are sold to those in need at no profit and with no interest charged.
- A WFBNA team member provided 119 hours of board services for a local nonprofit organization that provides after-school programs for young people located in LMI geographies.
- One WFBNA team member provided 19 hours of tax preparation through the VITA program. Refer to the comments in the institution Innovative or Flexible Retail Service Programs section of this public evaluation for additional details regarding this program.

Conclusion for Areas Receiving LS Review

Based on LS reviews, the bank's performance under the Service Test in the Bellingham MSA, Kennewick MSA, Wenatchee MSA AA, Yakima MSA AA, and WA Combined NonMetro AAs is consistent with the bank's overall performance under the Service Test in the FS area. Branches near-to LMI geographies elevate overall branch distribution in the Kennewick MSA AA from adequate to excellent. The bank's performance in the Spokane MSA AA is weaker than the bank's overall performance. Performance in this AA did not impact the overall Service Test rating.

State Rating

State of Wisconsin

CRA rating for the State of Wisconsin[51]: Satisfactory
The Lending Test is rated: High Satisfactory
The Investment Test is rated: High Satisfactory
The Service Test is rated: High Satisfactory

The major factors that support this rating include:

- Excellent lending activity;
- Excellent distribution of loans by borrower profile;
- Good geographic distribution of loans;
- Adequate level of CD loans was originated;
- WFBNA's use of flexible products has a positive impact on the Lending Test;
- Adequate level of CD investments;
- Investment performance in the LS AAs enhanced overall Investment Test rating.
- Retail delivery systems are readily accessible to all portions of the AA; and
- Adequate CD services.

Description of Institution's Operations in Wisconsin

WFBNA delineated 10 AAs within Wisconsin including the Green Bay, WI MSA (Green Bay MSA AA); Madison-Janesville-Beloit, WI CSA (Madison CSA AA); Milwaukee-Racine-Waukesha, WI CSA (Milwaukee CSA AA); Appleton-Oshkosh-Neenah, WI CSA (Appleton CSA AA); Eau Claire, WI MSA (Eau Claire MSA AA); Fond du Lac, WI MSA (Fond du Lac MSA AA); La Crosse-Onalaska, WI MSA (La Crosse MSA AA); Sheboygan, WI MSA (Sheboygan MSA AA); Wausau, WI MSA (Wausau MSA AA); and WI Combined Non-Metros (WI Combined NonMetro AA). The Green Bay MSA, Madison CSA, and Milwaukee CSA AAs received FS review. These areas accounted for the largest portion of the lending (76.2 percent) and deposits (70.8 percent) amongst the AAs in Wisconsin. WFBNA has $4.4 billion of deposits in Wisconsin representing 0.3 percent of adjusted deposits. Wisconsin represents the 27th largest rated area in terms of deposits. WFBNA operates 45 branches and 59 ATMs within Wisconsin, representing 0.8 percent of the bank's branches and 0.4 percent of the bank's ATMs. The bank originated and purchased approximately $16.9 billion in loans or 0.9 percent of total reported loan originations and purchases during the evaluation period. The bank's primary loan products in the Wisconsin are home mortgage and small loans to businesses.

<u>Green Bay MSA AA</u>

Within the Green Bay MSA AA, the bank had $462.6 million deposits and ranked fourth amongst 21 financial institutions in the market with 5.9 percent market share. WFBNA operates five branches and 8 ATMs in the AA.

[51] This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

Madison CSA AA

Within the Madison CSA AA, the bank had $599.3 million deposits and ranked 11th amongst 55 financial institutions in the market with 2.5 percent market share. WFBNA operates eight branches and nine ATMs in the AA.

Milwaukee CSA AA

Within the Milwaukee CSA AA, the bank had $2.0 billion deposits and ranked fifth amongst 49 financial institutions in the market with 3.1 percent market share. WFBNA operates 14 branches and 19 ATMs in the AA.

Demographic Data

Green Bay MSA AA

The following table provides a summary of the demographics that includes housing and business information for the Green Bay MSA AA. Table A shows a very small proportion of tracts and population are low-income. The volume of OOUs is even smaller in the low-income tracts and over 37 percent of families in the AA are LMI. The area's median housing value in the Green Bay MSA AA is 2.4 times the MSA median income, but three times moderate-, and five times low-income, indicating a limited proportion of OOUs are affordable to low-income residents.

(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

According to the June 2018 Moody's Analytics report, Green Bay's job market is tight and firms are struggling to fill positions at all skill levels. Industry payrolls are on their steepest uninterrupted climb since the 1990s, with growth outpacing the state and U.S. averages. Job cuts were concentrated entirely in private services, where payrolls are now flat year over year. Consumer fundamentals are favorable and the forecast calls for above-average job growth in retail and leisure/hospitality in Green Bay over the next two years.

The largest employers in Green Bay include Humana Inc., Bellin Health, and Oneida Tribe of Indians of Wisconsin. One of Green Bay's strength is housing but prices are significantly undervalued.

According to the U.S. BLS, the unemployment rate for Green Bay for the second quarter of 2018 was 2.6 percent and has significantly decreased from 6.8 percent at the beginning of the evaluation period. The unemployment rate for Green Bay was lower than the overall state of Wisconsin at 3.5 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by three community contacts serving the bank's Green Bay MSA AA in conjunction with this evaluation. One organization provides housing counseling to first time homebuyers in southeast Wisconsin. The other organizations provide technical assistance to small businesses.

The contact from the housing organization indicated that the economy and housing market for the areas have been improving. Overall, the housing stock is older and many people buying a home in the AA should expect to make repairs, often to basic systems in the home. The organization indicated that opportunities for banks to lend to first-time LMI homebuyers include making loans with flexible underwriting criteria and terms and combining home purchase and improvement loans.

The other organizations indicated that community credit needs include mentoring entrepreneurs and assisting firms that are not bankable such as start-up firms.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business assistance represent a primary credit need for the Green Bay MSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of population, tracts, OOUs, and small businesses coupled with limited home affordability for LMI individuals.

Madison CSA AA

The following table provides a summary of the demographics that includes housing and business information for the Madison CSA AA. Table A indicates that the volume of OOUs is very small in low-income CTs and over 36 percent of families in the AA are LMI. The area's median housing value in the Madison CSA AA is three times the highest MSA median income, but four times moderate-, and six times low-income, indicating a limited proportion of OOUs are affordable to LMI individuals.

(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

<u>Madison, WI MSA</u>

According to the June 2018 Moody's Analytics report, the Madison economy is in good shape despite giving up some of its large first quarter job gains in April and May. The jobless rate is falling and at 2.1 percent is the lowest since 2000. Firms are having difficulty filling positions at all skill levels, and average hourly earnings growth far outpaces the U.S. rate.

Expansion projects at the University of Wisconsin-Madison will be a boon to construction payrolls. Healthcare payrolls have resumed their ascent following short-lived weakness in late 2017, and the outlook is positive. Health services demand will swell along with the senior population, which is expanding faster than anywhere else in the State. The largest employers in the MSA include University of Wisconsin-Madison, Epic Systems, and UW Hospital & Clinics Authority.

Residential real estate is picking up. Builders have taken note of strong house price increases and single-family housing starts are rising. According to the U.S. BLS, the unemployment rate for the MSA for the second quarter of 2018 was 2.1 percent and has significantly decreased from 5.2 percent at the beginning of the evaluation period. The unemployment rate in the AA was lower than the overall state of Wisconsin at 3.5 percent for the same period.

<u>Janesville-Beloit, WI MSA</u>

According to the October 2018 Moody's Analytics report, Janesville's payroll employment grew much more slowly in the second quarter before declining in the third quarter. Nonfarm employment is flat year over year. Manufacturers are no longer adding workers, but cutbacks this year are concentrated in government and private services and wholesale and retail trade in particular.

Expansions in healthcare will help support private services and re-energize the MSA's recovery. After failing to make headway in the first half of 2018, healthcare payrolls rose nearly 6 percent at an annual rate in the third quarter, the strongest in three years. Improving population trends, and more specifically a large and growing senior cohort, the biggest consumers of medical care, are boosting healthcare demand. In addition, investments in nuclear medical technology will bring high-paying, knowledge-intensive positions to the MSA. The largest employers in the MSA include Mercyhealth, Beloit Health System, and Grainger Inc.

Janesville's housing market is better positioned to withstand the recent jump in mortgage rates. For one, single-family housing is fairly valued, and though bigger price gains and higher mortgage rates have eroded affordability, housing is within the reach of more households in the MSA than those statewide and nationwide. Second, household formation, the key determinant of demand, is poised to accelerate thanks to improving migration trends.

According to the U.S. BLS, the unemployment rate for the MSA for the fourth quarter of 2018 was 3.1 percent and has significantly decreased from 8.3 percent at the beginning of the evaluation period. The unemployment rate in the AA was higher than the overall state of Wisconsin at 2.4 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by three community contacts serving the bank's Madison CSA AA in conjunction with this evaluation. One organization is a CDFI that provides low-cost financing to organizations for affordable housing, economic development, and social services. Another organization works with nonprofit organizations and state and local governments to develop and manage programs that promote affordable housing. The other organization organizes economic activities in the Greater Beloit area, focusing on industrial and commercial development, marketing, and job training.

The contacts indicated that Madison does not have high wages for nonskilled workers, while housing process are skyrocketing. Another organization indicated that Madison has produced the bulk of the jobs in Wisconsin over the last twelve months and projected to have robust job growth in the near term. After the last housing crisis, the area had a high inventory of available housing for rent or sale. The AA is seeing huge increases in home prices and even larger increases in rents, but incomes for LMI individuals have only increased by one percent.

The organizations indicated that there is a variety of opportunities for participation by banks including first time homeownership outreach, alternative financing models for housing, and participating in loan pools created by the CDFIs.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Madison CSA AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of OOUs and small businesses coupled with limited home affordability for LMI individuals.

Milwaukee CSA AA

The following table provides a summary of the demographics that includes housing and business information for the Milwaukee CSA AA. Table A indicates that close to 39 percent of families in the AA are LMI. The area's median housing value in the Milwaukee CSA AA is three times the highest MSA median income, but four times moderate-, and six times low-income, indicating a limited proportion of OOUs are affordable to LMI individuals.

Table A – Demographic Information of the Assessment Area

Source: 2010 U.S. Census and 2016 D&B Data
Due to rounding, totals may not equal 100.0
(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

Milwaukee-Waukesha-West Allis, WI MSA

According to the June 2018 Moody's Analytics report, Milwaukee's job growth is improving. At 3 percent, unemployment is near its 1998 record low. Firms are hiking wages and pay gains and more jobs are propelling wage income higher. Factories are more than making up for a mediocre 2017, adding jobs faster than the U.S. and near 3 percent year over year for the first time since 2012, but producers face challenges ahead. Business/professional services will build on recent above-average job gains. Expansion in high tech will also help ease the sting of slowing growth manufacturing sector. The largest employers in the MSA include Aurora Health Care Inc., Ascension Wisconsin, and Froedtert Health.

Residential real estate has picked up. Single-family housing starts are climbing, but supply is not keeping pace with demand.

According to the U.S. BLS, the unemployment rate for Milwaukee for the third quarter of 2018 was 3.0 percent and has significantly decreased from 7.4 percent at the beginning of the evaluation period. The unemployment rate in the AA was lower than the overall state of Wisconsin at 3.5 percent for the same period.

Racine, WI MSA

According to the October 2018 Moody's Analytics report, Racine's factory-dependent economy is in better shape than it was a year earlier, despite a recent slowdown in the labor market. The important manufacturing sector is performing well with output just shy of its previous peak and rising faster than the State and national averages. The massive investment by Foxconn to build a new manufacturing campus in Racine will bring thousands of new jobs and help other parts of the MSA's economy.

An influx of residents and a higher concentration of seniors will support hiring at medical centers, enabling job growth in healthcare and social assistance to best the U.S. rate for the first time since 2008. The largest employers in the MSA include All Saints Health Care System, S. C. Johnson & Son Inc., and CNH America LLC.

Stronger home sales have powered robust price appreciation, which is near a decade high. Contractors are responding by ramping up construction, with housing starts at their highest since 2009.

According to the U.S. BLS, the unemployment rate for Racine for the fourth quarter of 2018 was 3.5 percent and has significantly decreased from 8.4 percent at the beginning of the evaluation period. The unemployment rate in the AA was higher than the overall state of Wisconsin at 2.4 percent for the same period.

Community Contacts

The analysis takes into consideration comments provided by two community contacts serving the bank's Milwaukee CSA AA in conjunction with this evaluation. One organization is a small business development corporation that is part of a statewide network that supports business owners with no-cost business consulting and educational programs. The other organization is a foundation that focuses on strengthening neighborhoods and increasing economic opportunities in the areas served.

One contact indicated that zip code 53206 in the City of Milwaukee has historically experienced high levels of disinvestment, high unemployment levels, high crime levels, and high concentrations of African American populations. As a result, in part, there is a general lack of small business financing for new or existing small businesses in LMI areas in Milwaukee. Both contacts indicated that there are far too few neighborhood Community Development Corporations with high capacity to serve communities that have been disinvested. The other organization indicated that the city of La Crosse has the highest per capita poverty rate in the State of Wisconsin and certain low-income census tracts have depressed housing values and sales.

There is a variety of opportunities for participation by banks to serve the LMI tracts such as making loans under the SBA 504 program and small business lending in areas designated by the SBA as Historically Underutilized Business zones.

The bank conducted research in the AA and identified community needs for affordable housing, neighborhood revitalization/stabilization, technical assistance for small businesses, and workforce development.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing and small business loans represent a primary credit need for the Milwaukee CSA AA. The AA also has CD needs including affordable housing. Opportunity exists to originate these types of loans throughout the AA including LMI areas.

Scope of Evaluation in Wisconsin

The rating for the State of Wisconsin is primarily based on FS evaluations of the bank's performance in the Green Bay MSA AA, Madison CSA AA, and Milwaukee CSA AA; however, performance in each AA was considered. Conclusions where a LS review affected the CRA Rating for the state are addressed within their respective tests. LS procedures were performed for the remaining seven AAs. A limited portion of the bank's overall lending, investments, and services were conducted in Wisconsin; therefore, the performance in Wisconsin received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN WISCONSIN

LENDING TEST

The bank's performance under the Lending Test in Wisconsin is rated High Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the Green Bay MSA AA is excellent and performance in the Madison CSA and Milwaukee CSA AAs is good.

Lending Activity

Based on the tables below, lending levels reflect excellent responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased. Lending levels were commensurate with the bank's significant capacity and market dominance.

Number of Loans *							
Assessment Area	Home Mortgage	Small Business	Small Farm	CD	Total	% State* Loans	% State Deposits
Green Bay MSA	8,114	2,115	69	1	10,299	9.8	10.6

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only

<u>Green Bay MSA AA</u>

WFBNA ranked fourth in deposits with 5.9 percent market share in the AA. In overall HMDA lending, WFBNA ranked fourth with 5.7 percent market share. There is strong competition as reflected by the 277 lenders and 21 depository institutions in the AA. The top three lenders in this market were Capital Credit Union with 7.2 percent market share, Associated Bank with 6.9 percent market share, and Fox Communities Credit Union with 5.9 percent market share.

In small loans to businesses, WFBNA ranked sixth with a market share of 6.3 percent. There is strong competition as reflected by the 64 lenders and 21 depository institutions in the AA. The top three lenders in this market were U.S. Bank with 19.7 percent market share, American Express with 10.7 percent market share, and JPMorgan Chase Bank U.S.A with 10.3 percent market share.

Madison CSA AA

WFBNA ranked 11th in deposits with 2.5 percent market share in the AA. In overall HMDA lending, WFBNA ranked fourth with 4.6 percent market share. There is strong competition as reflected by the 409 lenders and 55 depository institutions in the AA. The top three lenders in this market were Summit Credit Union with 14.4 percent market share, University of Wisconsin Credit with 9.6 percent market share, and Fairway Independent Mortgage Corp. with 6.2 percent market share.

In small loans to businesses, WFBNA ranked sixth with a market share of 3.5 percent. The top three lenders in this market were U.S. Bank with 19.7 percent market share, American Express with 16.5 percent market share, and JPMorgan Chase Bank with 13.5 percent market share. There is strong competition as reflected by the 97 lenders and 55 depository institutions in the AA.

Milwaukee CSA AA

WFBNA ranked fifth in deposits with 3.1 percent market share in the AA. In overall HMDA lending, WFBNA ranked first with 8.8 percent market share. There is strong competition as reflected by the 492 lenders and 49 depository institutions in the AA. The next three lenders in this market were Landmark Credit Union with 7.8 percent market share, JPMorgan Chase Bank with 5.6 percent market share, and Associated Bank with 3.7 percent market share.

In small loans to businesses, WFBNA ranked seventh with a market share of 2.9 percent. There is strong competition as reflected by the 119 lenders and 49 depository institutions in the AA. The top three lenders in this market were U.S. Bank with 22.6 percent market share, American Express with 12.9 percent market share, and JPMorgan Chase Bank U.S.A with 12.2 percent market share.

Distribution of Loans by Income Level of the Geography

The bank exhibits a good geographic distribution of loans in its AA.

Green Bay MSA AA

Home Mortgage Loans

Refer to Table O in the State of Wisconsin section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The bank's performance in both periods, 2012-2016 and 2017-2018, to home mortgage loans in low-income geographies substantially meets the aggregate distribution of loans and is near to the proportion of OOUs in those geographies.
- The proportion of loans in moderate-income geographies exceeds the aggregate distribution of loans and is near to the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of Wisconsin section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is excellent.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for small business loans in LMI geographies exceeds both the aggregate distribution of loans and the proportion of businesses located in those geographies.

Madison CSA AA

Home Mortgage Loans

Refer to Table O in the State of Wisconsin section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is good.

- For 2012-2016, the proportion of home mortgage loans in low-income geographies exceeds the aggregate distribution of loans and is below the proportion of OOUs in those geographies.
- The proportion of home mortgage loans in moderate-income geographies substantially meets the aggregate distribution of loans and is below the proportion of OOUs in those geographies.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the combined performance in 2012-2016.

Small Loans to Businesses

Refer to Table Q in the State of Wisconsin section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is adequate.

- For 2012-2016, the proportion of the bank's small business loans in low-income geographies exceeds the aggregate distribution of loans and is below the proportion of businesses located in those geographies.
- The proportion of loans in moderate-income geographies is below both the aggregate distribution of loans and the proportion of businesses located in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending is significantly below the combined performance in 2012-2016.

Milwaukee CSA AA

Home Mortgage Loans

Refer to Table O in the State of Wisconsin section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for home mortgage loans in low-income geographies is below the aggregate distribution of loans and is significantly below the proportion of OOUs in those geographies.
- The proportion of loans in moderate-income geographies exceeds the aggregate distribution of loans and is below the proportion of OOUs in those geographies.

Small Loans to Businesses

Refer to Table Q in the State of Wisconsin section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is good.

- The bank's performance in 2012-2016 for small business loans in LMI geographies exceeds the aggregate distribution of loans in those geographies.
- The proportion of the bank's small business loans in low-income geographies is well below and to moderate-income geographies is near to the proportion of businesses located in those geographies.
- Based on the bank's performance in 2017-2018, the bank's small business lending exceeds the performance in 2012-2016.

Distribution of Loans by Income Level of the Borrower

The bank exhibits an excellent distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

<u>Green Bay MSA AA</u>

Home Mortgage Loans

Refer to Table P in the State of Wisconsin section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The Green Bay MSA AA has homeownership affordability hurdles especially for LMI borrowers. As noted above, the area's median housing value is 5 times the income of low-income borrowers indicating a limited proportion of OOUs are affordable to low-income borrowers. Despite the affordability challenges, the bank's overall home mortgage lending in both 2012-2016 and 2017-2018 periods to LMI borrowers exceeds the aggregate distribution of loans.
- The bank's home mortgage lending to low-income borrowers is well below the proportion of families and to moderate-income borrowers exceeds the proportion of families.

Small Loans to Businesses

Refer to Table R in the State of Wisconsin section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Madison CSA AA

Home Mortgage Loans

Refer to Table P in the State of Wisconsin section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The Madison CSA AA has homeownership affordability hurdles especially for low-income borrowers. As noted above, the area's median housing value is 6 times the income of low-income borrowers indicating a limited proportion of OOUs are affordable to low-income borrowers. Despite the affordability challenges, the bank's overall home mortgage lending in 2012-2016 to low-income borrowers substantially meets the aggregate distribution of loans and is well below the proportion of families.
- The bank's home mortgage lending to moderate-income borrowers exceeds both the aggregate distribution of loans and the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Wisconsin section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is below the percentage of small businesses located in the AA.

Milwaukee CSA AA

Home Mortgage Loans

Refer to Table P in the State of Wisconsin section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is excellent.

- The Milwaukee CSA AA has homeownership affordability hurdles especially for LMI borrowers. As noted above, the area's median housing value is 6 times the income of low-income and 4 times the income of moderate-income borrowers indicating a limited proportion of

OOUs are affordable to LMI. Despite the affordability challenges, the bank's overall home mortgage lending in 2012-2016 to LMI borrowers exceeds the aggregate distribution of loans.

- The bank's home mortgage lending to low-income borrowers is significantly below the proportion of families and to moderate-income borrowers exceeds the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending is slightly below the performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Wisconsin section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is good.

- For both 2012-2016 and 2017-2018 periods, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is well below the percentage of small businesses located in the AA.

Community Development Lending

The institution has made an adequate level of CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

<u>Green Bay MSA AA</u>

The level of CD lending in the Green Bay MSA AA is poor. WFBNA made one CD loan for $249 thousand in its AA, which represents 0.5 percent of allocated tier 1 capital. CD lending performance has a neutral impact on the lending test rating. The loan was responsive to the identified affordable housing needs in the AA. There are opportunities available within the AA for the bank to provide CD lending.

<u>Madison CSA AA</u>

The level of CD lending in the Madison CSA AA is adequate. WFBNA made four CD loans in its AA for a total of $11.6 million, which represents 17.2 percent of tier 1 capital. Although the dollar volume of CD lending is significant compared to Tier 1, the number of loans was minimal given the six-year time period. CD lending performance has a positive impact on the lending test rating. The loans were responsive to the identified affordable housing needs in the AA. The bank made three loans totaling $1.9 million for the purpose of affordable housing. Additionally, the bank extended one loan for $9.7 million for the purpose of community services to assist LMI individuals.

Examples of CD loans in the AA include:

- In May 2014, WFBNA provided a $9.7 million term loan for a nonprofit organization that provides food, clothing, furniture, shelter, and guidance for people in need in the greater Madison area. The purpose of the organization is consistent with a valid Community Development purpose.

- In July 2014, WFBNA renewed a $1.3 million term loan to an organization that was formed to plan, develop, acquire, and lease affordable housing rental units primarily for the benefit of LMI individuals and to engage in other activities to create, promote and retain affordable housing in Dane County area. The purpose of the organization is consistent with a valid Community Development purpose.

<u>Milwaukee CSA AA</u>

The level of CD lending in the Milwaukee CSA AA is adequate. WFBNA made nine CD loans in its AA for a total of $17.2 million, which represents 7.6 percent of tier 1 capital. CD lending performance has a neutral impact on the lending test rating. The loans were responsive to the identified affordable housing needs in the AA. The bank made seven loans for the purpose of affordable housing for a total of $15.2 million. Additionally, the bank extended two loans totaling $2 million for the purpose of community services and economic development.

Examples of CD loans in the AA include:

- In September 2013, WFBNA provided an extension on an $11 million loan, and increased it by $2.6 million, for an affordable housing development. This development is made up of 15 buildings on two primary properties in Milwaukee, Wisconsin. One of the properties is located in a low-income census tract and contains 150 units. The other property is located in a middle-income census tract and contains 140 units. Of the apartments located in the low-income census tract, all of the units have projected rent rates between 15.3 and 18.5 percent below the area's 2013 fair market rents and are affordable to tenants earning between 38.5 and 51.0 percent of the 2013 area MFI.
- In December 2014, WFBNA provided a $1.4 million SBA 504 loan to fund the expansion of a small business located in New Berlin, Wisconsin. This loan was made in conjunction with the SBA’s 504 Certified Development Company program, which is a long-term financing tool for economic development within a community.

Product Innovation and Flexibility

<u>Green Bay MSA AA</u>

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 50 loans totaling $5.6 million to LMI homebuyers that qualified under this program.

<u>Madison CSA AA</u>

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 27 loans totaling $4.3 million to LMI homebuyers that qualified under this program.

<u>Milwaukee CSA AA</u>

The institution makes extensive use of innovative and/or flexible lending practices in order to serve AA credit needs. The bank launched the NeighborhoodLIFT program in the Milwaukee CSA AA in May 2014 and more than 600 potential homebuyers attended the event. Of the 600 in attendance, WFBNA originated 95 mortgage loans totaling $8 million. Under the *your*FirstMortgage loan program the bank has funded 82 loans totaling $9.5 million to LMI homebuyers that qualified under this program.

Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding the programs noted above.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Lending Test in the Eau Claire MSA, Fond du lac MSA, La Crosse MSA, Wausau MSA, and WI Combined NonMetro AAs is consistent with the bank's overall good performance under the Lending Test in the FS areas. The bank's performance under the Lending Test in the Appleton MSA and Sheboygan MSA AAs is stronger than the bank's overall performance; however, the performance in these limited scope AAs did not affect the bank's overall rating for the state.

Refer to Tables O through T in the State of Wisconsin section of appendix D for the facts and data that support these conclusions.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of Wisconsin is rated High Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the investment test, the bank's performance in the Green Bay MSA and Madison CSA AAs is adequate. Performance in the Milwaukee CSA AA is good.

Qualified Investments										
	Prior Period*		Current Period		Total				Unfunded Commitments**	
Assessment Area	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.

** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

Green Bay MSA AA

The institution has an adequate level of qualified CD investments and grants, although rarely in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 6.1 percent of tier 1 capital allocated to the AA; however, 83 percent of the CD investment are from a prior LIHTC investment.

The investments and grants reflect adequate responsiveness to the needs identified in the AA including affordable housing and community services for LMI individuals and geographies. Over 96.9 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 25 grants totaling $143,000 to a variety of organizations that primarily support affordable housing and community services for LMI individuals and geographies.

The institution rarely uses innovative and/or complex investments to support CD initiatives. Since the last evaluation, the bank purchased three government mortgage-backed securities for the CD Investment portfolio.

Example of CD a investment in the AA includes:

- In May 2015, WFBNA provided a $2.8 million investment in a government single-family mortgage backed security. The investment amounts reported of $131,797 represents the allocation of a single property address from the pool of mortgages under this transaction. The government agency was chartered by Congress in 1970 with a public mission to stabilize the nation's residential mortgage markets and expand opportunities for homeownership and affordable rental housing. Their statutory mission is to provide liquidity, stability, and affordability to the U.S. housing market.

Madison CSA AA

The institution has an adequate level of qualified CD investments and grants, although rarely in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 6.3 percent of tier 1 capital allocated to the AA; however, 83 percent of the CD investment are from a prior LIHTC investment.

The investments and grants reflect adequate responsiveness to the needs identified in the AA including affordable housing and community services for LMI individuals and geographies. Over 97.3 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 34 grants totaling $315,000 to a variety of organizations that primarily support affordable housing and community services for LMI individuals and geographies.

The institution rarely uses innovative and/or complex investments to support CD initiatives. Since the last evaluation, the bank purchased two government mortgage-backed securities for the CD Investment portfolio.

Example of CD a investment in the AA includes:

- In June 2015, WFBNA provided a $6.6 million investment in a government single-family mortgage backed security. The investment amount reported of $158,500 represents the allocation of a single property address from the pool of mortgages under this transaction. This government agency's mission is to provide funding to the housing market, help families and communities, and create value.

Milwaukee CSA AA

The institution has a significant level of qualified CD investments and grants, occasionally in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 9.6 percent of tier 1 capital allocated to the AA.

The investments and grants reflect good responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 89.8 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 217 grants totaling $8.3 million to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution makes significant use of innovative and/or complex investments to support CD initiatives. CD Investments involved several complex LIHTC projects where the bank acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Additionally, the bank purchased numerous government mortgage-backed securities for the CD Investment portfolio.

Examples of CD investments in the AA include:

- In November 2014, WFBNA invested $31.7 million in a LIHTC fund. Of this total investment, $1.7 million was allocated to a development located in Milwaukee, Wisconsin, with units restricted to tenants earning no more than 60 percent of the area MFI. This investment is responsive to the need for affordable housing.
- In May 2014, WFBNA provided a $4 million grant to the Neighborhood Reinvestment Corporation for its NeighborWorks/NeighborhoodLIFT Down Payment Assistance Program in Milwaukee, WI. Also, in May 2014, WFBNA provided a $500,000 Local Initiatives grant to nonprofit organization in Milwaukee to administer the NeighborhoodLIFT Down Payment Assistance program. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this performance evaluation for additional details regarding this program.
- In May 2016, WFBNA provided two grants totaling $500,000 to two statewide CDC through the Small Business DCC Program benefiting small businesses within the State of Wisconsin particularly the Milwaukee CSA AA. Refer to the comments in the institution Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Investment Test in the Sheboygan MSA AA is weaker than the bank's overall adequate performance in the Investment Test in the FS areas. The bank's performance in the Appleton CSA, Eau Claire MSA, Fond du Lac MSA, La Crosse MSA, Wausau MSA, and WI Combined NonMetro AAs is overall excellent and stronger than the bank's overall performance due primarily to higher volume of CD investments. Performance differences in the stronger LS AAs did impact the overall Investment Test rating. As such, the bank's overall Investment Test rating for the State of Wisconsin was upgraded to High Satisfactory.

SERVICE TEST

The bank's performance under the Service Test in Wisconsin is rated High Satisfactory.

Conclusions for Areas Receiving FS Reviews

Based on FS reviews, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the Green Bay MSA AA is good, performance in the Madison CSA AA is adequate, and performance in the Milwaukee CSA AA is excellent.

Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the institution's AAs, particularly LMI geographies and/or LMI individuals. On November 30, 2018, the bank sold 4 branches, including two in moderate-income and two in middle-income geographies to Flagstar Bank. The branch sale was part of a larger transaction where Flagstar Bank purchased 52 branches in Indiana, Michigan, Ohio, and Wisconsin. This sale resulted in a divestiture of the bank's deposit operations in Wisconsin. The branches were re-branded as Flagstar branches upon closing of the transaction. Flagstar intends to keep all branches and retain all employees.

Green Bay MSA AA

As of December 31, 2018, WFBNA operates five branches and eight ATMs in the Green Bay MSA AA. Of these branches, four are full-service locations and one is a limited-service branch. There are no branches in low-income geographies; however, the population is very low in the low-income geographies compared to total demographics. There is one branch in a moderate-income geography. The branch distribution in moderate-income geographies is below the percentage of the population in moderate-income geographies in the AA. When considering an additional two branches within close proximity to LMI geographies, the bank's distribution is near to demographics.

The bank did not open or close any branches during the evaluation period.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 5:00 or 6:00 pm. All branches are open on Saturday from 9:00 am to 2:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Madison CSA AA

As of December 31, 2018, WFBNA operates eight branches and nine ATMs in the Madison CSA AA. Of these branches, seven are full-service locations and one is a limited-service branch. There are no branches in low-income geographies; however, the population is very low compared to total demographics. There are three branches in moderate-income geographies. The branch distribution in moderate-income geographies exceeds the percentage of the population in moderate-income CTs in the AA.

The bank did not open or close any branches during the evaluation period.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 5:00 or 6:00 pm. Of the total branches, four are open on Saturday from 9:00 am to 2:00 pm. All branches are open on Saturday from 9:00 am to 2:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Milwaukee CSA AA

As of December 31, 2018, WFBNA operates 14 branches and 19 ATMs in the Madison CSA AA. All 14 branches are full-service locations. There is one branch in a low-income geography and four branches in moderate-income geographies. The branch distribution in low-income geographies is well below the percentage of the population in low-income geographies and branch distribution in moderate-income significantly exceeds the population in moderate-income geographies in the AA. When considering an additional two branches within close proximity to LMI geographies, the bank's distribution improves and exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed one branch in a middle-income CT since the last evaluation. This closure did not negatively impact the distribution of branches relative to the population residing in that geography.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 6:00 pm. Of the total branches, 13 are open on Saturday from 9:00 am to 2:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Community Development Services

The institution provides an adequate level of CD services.

Green Bay MSA AA

The level of CD services in the Green Bay MSA AA is very poor. Bank records show that there were no CD service activities completed since the last evaluation.

Madison CSA AA

The level of CD services in the Madison CSA AA is poor. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for four CD service activities to four organizations since the last evaluation, logging a total of 15 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities were for economic development. The following is an example of CD service provided in this AA:

- A WFBNA team member provided eight hours of financial education to a community organization that delivers educational programming focused on financial education, work readiness, and entrepreneurship to students from kindergarten through high school. Over 95 percent of its clients are LMI as they earn less than 80 percent of the area MFI.

Milwaukee CSA AA

The level of CD services in the Milwaukee CSA is excellent. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 190 CD service activities to 32 organizations since the last evaluation, logging a total of 639 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. Other activities targeted affordable housing and economic development. The bank's assistance provided was responsive to the identified need in the AA particularly affordable housing. The following are examples of CD services provided in this AA:

- A WFBNA member provided 54 hours of Board service to a nonprofit housing organization that works in partnership with people in need to build decent and affordable housing.
- WFBNA team members provided 69 hours of financial education and outreach to a community organization that promotes affordable homeownership for low-income families, reducing community blight, neighborhood deterioration, and poverty.
- A WFBNA member provided 8 hours of ongoing outreach to an economic development corporation that provides business and financial education along with access to capital and financial products for entrepreneurs, business owners and individuals. Over 67 percent of its clients are LMI individuals as they earn less than 80 percent of the area MFI.

Conclusion for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Service Test in the Eau Claire MSA and La Crosse MSA AAs is consistent with the bank's overall good performance under the Service Test in the FS areas. The bank's performance in the Sheboygan MSA and Appleton CSA AAs is stronger than the bank's overall performance. The bank's performance in the Fond du Lac MSA, Wausau MSA, and WI Combined NonMetro AAs is weaker than the bank's overall performance. Performance differences in these LS AAs did not impact the overall Service Test rating for the State of Wisconsin.

State Rating

State of Wyoming

CRA rating for the State of (Wyoming)[52]: Satisfactory
The Lending Test is rated: High Satisfactory
The Investment Test is rated: High Satisfactory
The Service Test is rated: Outstanding

The major factors that support this rating include:

- Good lending activity;
- Adequate geographic distribution of loans;
- Good borrower distribution of loans;
- Poor level of CD lending;
- WFBNA's use of flexible products has a positive impact on the Lending Test;
- Adequate level of CD investments;
- Investment performance in the LS AAs enhanced overall Investment Test rating.
- Retail delivery systems are readily accessible to all portions of the AA;
- Adequate CD services; and
- Service performance in the LS AAs enhanced overall Service Test rating.

Description of Institution's Operations in Wyoming

WFBNA delineated three AAs within Wyoming including the WY Combined Non-Metros (WY Combined Non-Metro AA); Casper, WY MSA (Casper MSA AA); and Cheyenne, WY MSA (Cheyenne MSA AA). The WY Combined Non-Metro AA received FS reviews. This area accounted for the larger portion of the lending (58.3 percent) and deposits (67.1 percent) amongst the AAs in Wyoming. Refer to Appendix A for a complete description of each AA. Wyoming represents the 34th largest rated area by deposits. WFBNA has $2.7 billion of deposits representing 0.2 percent of adjusted deposits. WFBNA operates 22 branches and 35 ATMs within Wyoming, representing 0.4 percent of the bank's branches and 0.3 percent of the bank's ATMs. The bank originated and purchased approximately $3.8 billion in loans or 0.2 percent of total reported loan originations and purchases during the evaluation period. The bank's primary loan products in Wyoming are home mortgage and small loans to businesses.

<u>WY Combined Non-Metro AA</u>

Within the WY Combined Non-Metro AA, the bank had $1.8 billion in deposits and ranked first amongst 34 depository institutions in the market with 18.9 percent market share. First Interstate Bank and Glacier Bank ranked second and third with a market share of 16.0 percent and 9.3 percent, respectively. WFBNA operates 17 branches and 29 ATMs in the AA.

52 This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within the multistate metropolitan statistical area.

Demographic Data

The following table provides a summary of the demographics that includes housing and business information for the WY Combined Non-Metro AA. Table A indicates that there are no OOUs in low-income CTs. In addition, the number of census tracts, population, and businesses is very small in low-income CTs and over 36 percent of families in the AA are LMI. The area's median housing value in the WY Combined NonMetro AA is 3.6 times the area's median income, but 4.5 times moderate-, and 7.1 times low-income, indicating a limited proportion of OOUs are affordable to LMI individuals.

Table A – Demographic Information of the Assessment Area

Assessment Area: WY Combined Non-Metros (2016)

Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #
Geographies (Census Tracts)	69	1.4	17.4	62.3	18.8	0.0
Population by Geography	316,947	0.9	14.3	62.8	21.9	0.0
Housing Units by Geography	143,525	0.3	15.6	61.4	22.7	0.0
Owner-Occupied Units by Geography	83,985	0.0	14.2	64.7	21.1	0.0
Occupied Rental Units by Geography	36,187	0.9	21.1	60.4	17.5	0.0
Vacant Units by Geography	23,353	0.5	12.2	50.9	36.3	0.0

Household Distribution by Income Level	120,172	22.6	15.8	18.5	43.1	0.0
Median Family Income Non-MSAs - WY		$67,040	Median Housing Value			$239,267
			Median Gross Rent			$710
			Families Below Poverty Level			6.4%

Source: 2010 U.S. Census and 2016 D&B Data
Due to rounding, totals may not equal 100.0
(*) The NA category consists of geographies that have not been assigned an income classification.

Economic Data

According to the July 2018 Moody's Analytics report, Wyoming's economy is slowly improving. Total employment has expanded by 3,000 since the end of last year. Average hourly earnings are also closing the gap with the U.S., thanks to more mid- and high-wage job additions. Goods producers are getting back on their feet; the active rig count is generally increasing, and industrial production is nearing its 2007 peak.

The outlook for goods and services with significant ties to mining industries is mixed. After three years of decline, employment in heavy and civil engineering construction, such as roads and other infrastructure for oil and gas drillers, has stabilized. Fewer residents and more tourists will split performance among Wyoming consumer industries. Although total personal income is now back to pre-bust levels, two years of steep population loss and a measured turnaround will limit consumer spending and weigh on retailers. Conversely, leisure/hospitality has already bounced back and will closely trail the regional and national averages over the next few quarters as more tourists flock to Wyoming's popular national parks.

The housing market is making unsteady progress. After a solid performance in the first quarter, housing starts plunged in the second. Fortunately, house price appreciation is accelerating.

The largest employers in the WY Combined NonMetro AA include the University of Wyoming, Wal-Mart Stores Inc., and F.E. Warren Air Force Base. According to the U.S. BLS, the unemployment rates for the third quarter of 2018 in the following counties range from a low of 3.0 percent (Teton County) to a high of 5.2 percent (Fremont County) while the state average is 3.8 percent.

Community Contacts

The analysis takes into consideration comments provided by a recent community contact in conjunction with this evaluation that serves the bank's WY Combined NonMetro AA. The community contact is a statewide agency that provides affordable housing opportunities across Wyoming for both multifamily and single-family housing projects along with small business finance.

According to the community contact, affordable housing is a significant issue in the AA. This is due to high rental rates compared to family income. Rental rates are comparable to those being sought in larger markets such as Denver, making it extremely challenging for LMI individuals. In addition, the transient nature of military renters allows rental property owners to continue to increase rents.

The contact indicated that while banks and other creditors such as credit unions didn't tighten their underwriting criteria, the secondary market selling requirements has made it difficult to entice lenders to participate in lending or investing in the non-profit housing agency. Therefore, the non-profit housing agency's capital began to dry up even though there was demand for its affordable housing projects.

Considering the information from the community contacts and bank management as well as demographic and economic data, affordable housing represents a primary credit need for the WY Combined NonMetro AA. Opportunity exists to originate these types of loans throughout the AA; however, it is limited in the low-income geographies as reflected by the small proportion of tracts, population, no OOUs, and small businesses coupled with limited home affordability for LMI individuals.

Scope of Evaluation in Wyoming

The rating for the State of Wyoming is primarily based on a FS evaluation of the bank's performance in the WY Combined Non-Metro AA; however, performance in each AA was considered. Conclusions where a LS review affected the CRA Rating for the state are addressed within their respective tests. LS procedures were performed for the Casper MSA and Cheyenne MSA AAs. A limited portion of the bank's overall lending, investments, and services were conducted in Wyoming; therefore, the performance in Wyoming received less weight in determining the bank's overall CRA Rating.

CONCLUSIONS WITH RESPECT TO PERFORMANCE TESTS IN WYOMING

LENDING TEST

The bank's performance under the Lending Test in Wyoming is rated High Satisfactory.

Conclusions for Area Receiving a FS Review

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the lending test, the bank's performance in the WY Combined Non-Metro AA is good.

Lending Activity

Based on the tables below, lending levels reflect good responsiveness to the credit needs in its AAs taking into account the number and amount of home mortgage, small business, small farm, and CD loans originated or purchased relative to its capacity based on deposits, competition, and market presence.

Number of Loans *							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	% State* Loans	% State Deposits
WY Combined NonMetro	8,158	5,144	372	4	13,678	58.3	67.1
Casper MSA	2,273	1,276	33	1	3,583	15.3	14.7
Cheyenne MSA	3,738	2,370	76	7	6,191	26.4	18.2
Total	14,169	8,790	481	12	23,452	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

Dollar Volume of Loans (000's)*							
Assessment Area	Home Mortgage	Small Business	Small Farm	Community Development	Total	% State Loans	% State Deposits
WY Combined NonMetro	$1,997,108	$333,466	$27,102	$2,128	$2,359,804	61.4	67.1
Casper MSA	$489,385	$109,358	$3,548	$2,065	$604,356	15.8	14.7
Cheyenne MSA	$772,739	$79,135	$5,247	$19,856	$876,977	22.8	18.2
Total	$3,259,232	$521,959	$35,897	$24,049	$3,841,137	100.0	100.0

*The tables present the data for all assessment areas. The narrative below addresses performance in FS areas only.

WFBNA ranked first in deposits with 18.9 percent market share in the AA. In overall HMDA lending, WFBNA ranked second with 7.9 percent market share. There is strong competition as reflected by the 265 lenders and 34 depository institutions in the AA. The first and third lenders in this market were First Interstate Bank with 8.8 percent market share and Quicken Family with 5.7 percent market share.

In small loans to businesses, WFBNA ranked second with market share of 10.4 percent. There is strong competition as reflected by the 79 lenders in the AA. The first and third lenders were American Express FSB with market share of 18.3 percent and First Interstate Bank with market share of 10.3 percent.

Distribution of Loans by Income Level of the Geography

The bank exhibits an adequate geographic distribution of loans in the WY Combined NonMetro AA.

Home Mortgage Loans

Refer to Table O in the State of Wyoming section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases. The bank's overall geographic distribution of home mortgage loan originations and purchases for this evaluation is adequate.

- The AA contains no OOUs in the low-income tracts so our assessment focused on the bank's performance in moderate-income tracts.
- For 2012-2016, the proportion of home mortgage loans in moderate-income geographies is well below the aggregate distribution of loans and is significantly below the proportion of OOUs in those geographies.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending exceeds the performance in 2012-2016. As such, the overall performance rating for home mortgage loans was upgraded from poor to adequate.

Small Loans to Businesses

Refer to Table Q in the State of Wyoming section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to businesses. The bank's overall geographic distribution of small loans to businesses for this evaluation is good.

- The bank's performance in both periods, 2012-2016 and 2017-2018, for small business loans in low-income geographies is significantly below both the aggregate distribution of loans and the proportion of businesses located in those geographies. Less weight was given to the bank's performance in low-income geographies due to the very small volume of businesses and lending in low-income geographies.
- The bank's performance for small business loans in moderate-income geographies substantially meets the aggregate distribution of loans and is below the proportion of businesses located in those geographies.

Distribution of Loans by Income Level of the Borrower

The bank exhibits a good distribution of loans among individuals of different income levels and businesses of different sizes, given the product lines offered by the institution.

Home Mortgage Loans

Refer to Table P in the State of Wyoming section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases. The bank's overall borrower distribution of home mortgage loan originations and purchases for this evaluation is good.

- There are homeownership affordability hurdles in the AA especially for LMI borrowers. As noted above, the area's median housing value is 7.1 times the income of low-income and 4.5 times the income of moderate-income borrowers indicating a limited proportion of OOUs are affordable to LMI. Because of the affordability challenges, the bank's performance in 2012-2016 to low-income borrowers is below the aggregate lending and is significantly below the proportion of families.

- The bank's performance to moderate-income borrowers substantially meets the aggregate lending and is below the proportion of families.
- Based on the bank's performance in 2017-2018, the bank's home mortgage lending exceeds the performance in 2012-2016.

Small Loans to Businesses

Refer to Table R in the State of Wyoming section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's origination and purchase of small loans to businesses. The distribution of the bank's originations and purchases of small loans to businesses by revenue is excellent.

- For 2012-2016, the bank's distribution of small loans to businesses with revenues of $1 million or less exceeds the aggregate small business lending data for businesses with revenues of $1 million or less and is near to the percentage of small businesses located in the AA.
- Based on the bank's performance in 2017-2018, the bank's small business lending is slightly lower than the performance in 2012-2016.

Community Development Lending

The institution has made few if any CD loans.

The Lending Activity Tables, shown above, set forth the information and data used to evaluate the institution's level of CD lending. These tables include all CD loans, including multifamily loans that also qualify as CD loans.

The level of CD lending in the WY Combined NonMetro AA is poor. WFBNA made four CD loans for a total of $2.1 million which represents 1.1 percent of tier 1 capital. CD lending performance had a neutral impact on the lending test rating. All CD loans were for affordable housing to LMI individuals which is an identified credit needs in the AA.

Examples of CD loans in the AA include:

- In February 2015, WFBNA provided an $885,000 term loan for a multifamily housing development located in an underserved middle-income census tract in Laramie, WY. The development consists of 4 one-bedroom units and 32 two-bedroom units with 97.2 percent of the units are affordable to tenants earning between 25.5 and 38.9 percent of the 2015 area MFI.
- In March 2016, WFBNA provided a $15 million line of credit to a Tax Credit Investment Fund. Of that total, $253,000 has been allocated to an affordable housing development located in Wheatland, WY. The loan proceeds were used to bridge the gap between the receipt of capital contributions from investors and the payment of equity investments to operating partnerships that own LIHTC projects.

Product Innovation and Flexibility

The institution makes limited use of innovative and/or flexible lending practices in order to serve AA credit needs. Under the *your*FirstMortgage loan program the bank has funded 41 loans totaling $6.3 million to LMI homebuyers that qualified under this program. Refer to the comments in the institution

Innovative or Flexible Lending Programs section of this public evaluation for additional details regarding this program.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Lending Test in the Cheyenne MSA AAs is consistent with than the bank's overall good performance under the Lending Test in the FS area. The bank's performance in the Casper MSA AA is weaker than the bank's overall performance under the Lending Test. Performance differences in this LS AA did not impact the Lending Test rating for the state of Wyoming

Refer to Tables O through T in the State of Wyoming section of appendix D for the facts and data that support these conclusions.

INVESTMENT TEST

The bank's performance under the Investment Test in the State of Wyoming is rated High Satisfactory.

Conclusions for Area Receiving a FS Review

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the investment test, the bank's performance in the WY Combined NonMetro AA is adequate.

Qualified Investments										
	Prior Period*		Current Period		Total				Unfunded Commitments **	
Assessment Area	#	$(000's)	#	$(000's)	#	% of Total #	$(000's)	% of Total $	#	$(000's)
WY Combined NonMetro	8	$3,442	52	$7,747	60	45.8	$11,189	29.9		
Casper MSA	3	$3,644	41	$8,637	44	33.6	$12,281	32.8		
Cheyenne MSA	1	$42	26	$13,950	27	20.6	$13,992	37.3		
Total	12	$7,128	119	$30,334	131	100.0	$37,462	100.0		

* Prior Period Investments' means investments made in a previous evaluation period that are outstanding as of the examination date.
** Unfunded Commitments' means legally binding investment commitments that are tracked and recorded by the institution's financial reporting system.

WY Combined NonMetro AA

The institution has an adequate level of qualified CD investments and grants, although rarely in a leadership position, particularly those that are not routinely provided by private investors. The current and prior period investments dollar volume represents 5.6 percent of tier 1 capital allocated to the AA.

The investments and grants exhibit adequate responsiveness to the needs identified in the AA including affordable housing, community services, economic development, and revitalization/stabilization for LMI individuals and geographies. Over 82 percent of the bank's CD investments focused on affordable housing which is an identified credit need in the AA. Additionally, the bank provided 48 grants totaling $880,400 to a variety of organizations that primarily support affordable housing, community services, and economic development.

The institution occasionally uses innovative and/or complex investments to support CD initiatives. CD Investments involved several complex LIHTC and NMTC projects where the bank often acted in a leadership role with participations from federal, state, and local housing agencies and real estate developers. Examples of CD investments in the AA include:

- In March 2016, WFBNA invested $35.2 million in an LIHTC fund. Of this total investment, $1 million was allocated to a development located in Wheatland, Wyoming, with 6 units restricted to tenants earning no more than 60 percent of the area MFI. This activity is responsive to the identified need for affordable housing.
- In September 2017, WFBNA made a $1.8 million NMTC investment for the development of a fiber optic broadband network. There is very little access to broadband services within the Wind River Reservation, and the area is considered an underserved/unserved area as defined by the Federal Communication Commission. Broadband infrastructure development is integral to the development of a self-sustaining diversified tribal economy, and is one of the tribe's primary goals. According to the 2006-2010 American Community Survey, the project site is located in a "Highly Distressed" census tract, and the poverty rate is 20.5 percent. It's estimated that the project will create 3.5 full-time jobs.
- In October 2017, WFBNA provided a $405,000 grant to a local housing organization through the PMP for affordable housing in the WY Combined NonMetro AA. Refer to the comments in the institution Community Development Initiatives section of this public evaluation for additional details regarding this program.

Conclusions for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Investment Test in the Casper MSA and Cheyenne MSA AAs is stronger than the bank's overall adequate performance in the Investment Test in the FS area due primarily to higher volume of CD investments. Performance differences in the LS AAs did impact the overall Investment Test rating for the State of Wyoming. As such, the bank's overall Investment Test rating for the State of Wyoming was upgraded to High Satisfactory.

SERVICE TEST

The bank's performance under the Service Test in Wyoming is rated Outstanding.

Conclusions for Area Receiving a FS Review

Based on a FS review, including the data in the tables below and consideration of performance context discussed in the service test, the bank's performance in the WY Combined Non-Metro AA is good.

Retail Banking Services

Service delivery systems are readily accessible to geographies and individuals of different income levels in the institution's AAs, particularly LMI geographies and/or LMI individuals.

Distribution of Branch Delivery System											
Assessment Area	Deposits	Branches						Population			
	% of Rated Area Deposits in AA	# of BANK Branches	% of Rated Area Branches in AA	Location of Branches by Income of Geographies (%)*				% of Population within Each Geography*			
				Low	Mod	Mid	Upp	Low	Mod	Mid	Upp
WY Combined NonMetro	67.1	17	77.3	5.9	11.8	58.8	23.5	1.5	10.1	67.6	20.8
Casper MSA	14.6	3	13.6	50.0	25.0	25.0	0.0	5.7	11.3	68.4	14.5
Cheyenne MSA	18.3	2	9.1	0.0	50.0	50.0	0.0	0.0	27.4	51.1	21.5

* May not add up to 100 percent due to geographies with unknown tract income level and rounding.

Distribution of Branch Openings/Closings						
Assessment Area	# of Branch Openings	# of Branch Closings	Net change in Location of Branches (+ or -)			
			Low	Mod	Mid	Upp
WY Combined NonMetro	0	3	0	-1	-2	0
Casper MSA	0	0	0	0	0	0
Cheyenne MSA	0	0	0	0	0	0

<u>WY Combined NonMetro AA</u>

As of December 31, 2018, WFBNA operates 17 branches and 29 ATMs in the WY Combined NonMetro AA. All branches are full-service locations. There is one branch in a low-income geography and two branches in moderate-income geographies. The branch distribution in LMI geographies significantly exceeds the percentage of the population in LMI CTs in the AA. When considering an additional two branches within close proximity to LMI geographies, the bank's branch distribution further exceeds demographics.

The institution's opening and closing of branches have not affected the accessibility of its delivery systems, particularly in LMI geographies and/or to LMI individuals. The bank closed three branches since the last evaluation. One branch was located in a moderate-income census tract. This branch closure did not negatively impact the distribution of branches relative to the population residing in LMI geographies.

Services, including where appropriate, business hours, do not vary in a way that inconveniences the various portions of its AA, particularly LMI geographies and/or individuals. Generally, branches are open Monday through Friday from 9:00 am to 5:00 pm. Of the total branches, six are open on Saturday from 9:00 am to 1:00 pm and five are open from 9:00 am to 12:00 pm. All WFBNA services are available at all branches and all delivery systems discussed bank-wide are available in this AA.

Community Development Services

The institution provides an adequate level of CD services.

WY Combined NonMetro AA

The level of CD services in the WY Combined NonMetro AA is adequate. Bank records show that employees provided their financial or job-specific expertise and/or technical assistance for 155 CD service activities to eight organizations since the last evaluation, logging a total of 242 qualified hours within this AA. A majority of the bank's assistance was to organizations that provide community services to LMI individuals and families. One activity targeted economic development. The following are examples of CD services provided in this AA:

- WFBNA team members provided 147 hours of financial education to a community organization that provides career technical training and education program for low-income young people ages 16 through 24.
- A WFBNA team member provided 68 hours of Board service to a local community organization that works to provide meals for the homeless.

Conclusion for Areas Receiving LS Reviews

Based on LS reviews, the bank's performance under the Service Test in the Casper MSA and Cheyenne MSA AAs is stronger than the bank's overall performance under the Service Test in the FS area due to a higher percentage of branch distribution in LMI geographies. Performance differences in the LS AAs did impact the overall Service Test rating for the State of Wyoming. As such, the overall Service Test rating for the State of Wyoming was upgraded to Outstanding.

Appendix A: Scope of Examination

The following table identifies the time period covered in this evaluation, affiliate activities that were reviewed, and loan products considered. The table also reflects the MSAs and non-MSAs that received comprehensive examination review, designated by the term "full-scope," and those that received a less comprehensive review, designated by the term "limited-scope".

(*) The Lending Test is weighted more heavily than the Investment and Service Tests in the overall rating.

Appendix C: Definitions and Common Abbreviations

The following terms and abbreviations are used in this performance evaluation, including the CRA tables. The definitions are intended to provide the reader with a general understanding of the terms, not a strict legal definition.

Affiliate: Any company that controls, is controlled by, or is under common control with another company. A company is under common control with another company if the same company directly or indirectly controls both companies. For example, a bank subsidiary is controlled by the bank and is, therefore, an affiliate.

Aggregate Lending (Aggt.): The number of loans originated and purchased by all reporting lenders (HMDA or CRA) in specified income categories as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the state/assessment area.

Census Tract (CT): A small, relatively permanent statistical subdivision of a county delineated by a local committee of census data users for the purpose of presenting data. Census tracts nest within counties, and their boundaries normally follow visible features, but may follow legal geography boundaries and other non-visible features in some instances, Census tracts ideally contain about 4,000 people and 1,600 housing units.

Combined Statistical Area (CSA): A geographic entity consisting of two or more adjacent Core Based Statistical Areas with employment interchange measures of at least 15. An employment interchange measure is a measure of ties between two adjacent entities. The employment interchange measure is the sum of the percentage of workers living in the smaller entity who work in the larger entity and the percentage of employment in the smaller entity that is accounted for by workers who reside in the larger entity.

Community Development (CD): Affordable housing (including multifamily rental housing) for low- or moderate-income individuals; community services targeted to low- or moderate-income individuals; activities that promote economic development by financing businesses or farms that meet Small Business Administration Development Company or Small Business Investment Company programs size eligibility standards or have gross annual revenues of $1 million or less; or activities that revitalize or stabilize low- or moderate-income geographies, distressed or underserved nonmetropolitan middle-income geographies, or designated disaster areas.

Community Reinvestment Act (CRA): the statute that requires the OCC to evaluate a bank's record of meeting the credit needs of its entire community, including LMI areas, consistent with the safe and sound operation of the bank, and to take this record into account when evaluating certain corporate applications filed by the bank.

Consumer Loan(s): A loan(s) to one or more individuals for household, family, or other personal expenditures. A consumer loan does not include a home mortgage, small business, or small farm loan. This definition includes the following categories: motor vehicle loans, credit card loans, other secured consumer loans, and other unsecured consumer loans.

Family: Includes a householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption. The number of family households always equals the number of families; however, a family household may also include non-relatives living with the family. Families are classified by type as either a married-couple family or other family, which is further classified into ‘male householder’ (a family with a male householder’ and no wife present) or ‘female householder’ (a family with a female householder and no husband present).

Full-Scope Review: Performance under the Lending, Investment, and Service Tests is analyzed considering performance context, quantitative factors (e.g., geographic distribution, borrower distribution, and total number and dollar amount of investments), and qualitative factors (e.g., innovativeness, complexity, and responsiveness).

Geography: A census tract delineated by the United States Bureau of the Census in the most recent decennial census.

Home Mortgage Disclosure Act (HMDA): The statute that requires certain mortgage lenders that conduct business or have banking offices in a metropolitan statistical area to file annual summary reports of their mortgage lending activity. The reports include such data as the race, gender, and the income of applicants, the amount of loan requested, the disposition of the application (e.g., approved, denied, and withdrawn), the lien status of the collateral, any requests for preapproval, and loans for manufactured housing.

Home Mortgage Loans: A closed-end mortgage loan or an open-end line of credit as these terms are defined under §1003.2 of this title, and that is not an excluded transaction under §1003.3(c)(1) through (10) and (13) of this title.

Household: Includes all persons occupying a housing unit. Persons not living in households are classified as living in group quarters. In 100 percent tabulations, the count of households always equals the count of occupied housing units.

Limited-Scope Review: Performance under the Lending, Investment, and Service Tests is analyzed using only quantitative factors (e.g., geographic distribution, borrower distribution, total number and dollar amount of investments, and branch distribution).

Low-Income Individual: Individual income that is less than 50 percent of the area median income.

Low Income Geography: A census tract with a median family income that is less than 50 percent.

Market Share: The number of loans originated and purchased by the institution as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the state/assessment area.

Median Family Income (MFI): The median income determined by the U.S. Census Bureau every five years and used to determine the income level category of geographies. The median is the point at which half of the families have income above, and half below, a range of incomes. Also, the median income determined by the Federal Financial Institutions Examination Council (FFIEC) annually that is used to determine the income level category of individuals. For any given area, the median is the point at which half of the families have income above, and half below, a range of incomes.

Metropolitan Division: As defined by Office of Management and Budget, a county or group of counties within a Core Based Statistical Area that contains an urbanized population of at least 2.5 million. A Metropolitan Division consists of one or more main/secondary counties that represent an employment center or centers, plus adjacent counties associated with the main/secondary county or counties through commuting ties.

Metropolitan Statistical Area: An area, defined by the Office of Management and Budget, as a core based statistical area associated with at least one urbanized area that has a population of at least 50,000. The Metropolitan Statistical Area comprises the central county or counties containing the core, plus adjacent outlying counties having a high degree of social and economic integration with the central county or counties as measured through commuting.

Middle-Income: Individual income that is at least 80 percent and less than 120 percent of the area median income, or a median family income that is at least 80 percent and less than 120 percent, in the case of a geography

Moderate-Income: Individual income that is at least 50 percent and less than 80 percent of the area median income, or a median family income that is at least 50 percent and less than 80 percent, in the case of a geography.

Multifamily: Refers to a residential structure that contains five or more units**.**

MMSA (state): Any multistate metropolitan statistical area or multistate combined statistical area, as defined by the Office of Management and Budget.

Owner-Occupied Units: Includes units occupied by the owner or co-owner, even if the unit has not been fully paid for or is mortgaged.

Qualified Investment: A qualified investment is defined as any lawful investment, deposit, membership share, or grant that has as its primary purpose community development.

Rating Area: A rated area is a state or multi-state metropolitan statistical area. For an institution with domestic branches in only one state, the institution's CRA rating would be the state rating. If an institution maintains domestic branches in more than one state, the institution will receive a rating for each state in which those branches are located. If an institution maintains domestic branches in two or more states within a multi-state metropolitan statistical area, the institution will receive a rating for the multi-state metropolitan statistical area.

Small Loan(s) to Business(es): A loan included in 'loans to small businesses' as defined in the Consolidated Report of Condition and Income (Call Report) instructions. These loans have original amounts of $1 million or less and typically are either secured by nonfarm or nonresidential real estate or are classified as commercial and industrial loans.

Small Loan(s) to Farm(s): A loan included in 'loans to small farms' as defined in the instructions for preparation of the Consolidated Report of Condition and Income (Call Report). These loans have original amounts of $500,000 or less and are either secured by farmland, or are classified as loans to finance agricultural production and other loans to farmers.

Tier 1 Capital: The total of common shareholders' equity, perpetual preferred shareholders' equity with non-cumulative dividends, retained earnings and minority interests in the equity accounts of consolidated subsidiaries.

Upper-Income: Individual income that is at least 120 percent of the area median income, or a median family income that is at least 120 percent, in the case of a geography.

Appendix D: Tables of Performance Data

Content of Standardized Tables

A separate set of tables is provided for each state. All multistate metropolitan statistical areas, if applicable, are presented in one set of tables. References to the "bank" include activities of any affiliates that the bank provided for consideration (refer to appendix A: Scope of the Examination). For purposes of reviewing the Lending Test tables, the following are applicable: (1) purchased loans are treated the same as originations; and (2) "aggregate" is the percentage of the aggregate number of reportable loans originated and purchased by all HMDA or CRA reporting lenders in the MMSA/assessment area. Deposit data are compiled by the FDIC and are available as of June 30th of each year. Tables without data are not included in this PE.

The following is a listing and brief description of the tables included in each set:

Table O. **Assessment Area Distribution of Home Mortgage Loans by Income Category of the Geography** - Compares the percentage distribution of the number of loans originated and purchased by the bank in low-, moderate-, middle-, and upper-income geographies to the percentage distribution of owner-occupied housing units throughout those geographies. The table also presents aggregate peer data for the years the data is available.

Table P. **Assessment Area Distribution of Home Mortgage Loans by Income Category of the Borrower** - Compares the percentage distribution of the number of loans originated and purchased by the bank to low-, moderate-, middle-, and upper-income borrowers to the percentage distribution of families by income level in each MMSA/assessment area. The table also presents aggregate peer data for the years the data is available.

Table Q. **Assessment Area Distribution of Loans to Small Businesses by Income Category of the Geography** - The percentage distribution of the number of small loans (less than or equal to $1 million) to businesses that were originated and purchased by the bank in low-, moderate-, middle-, and upper-income geographies compared to the percentage distribution of businesses (regardless of revenue size) in those geographies. Because aggregate small business data are not available for geographic areas smaller than counties, it may be necessary to compare bank loan data to aggregate data from geographic areas larger than the bank's assessment area.

Table R. **Assessment Area Distribution of Loans to Small Businesses by Gross Annual Revenue** - Compares the percentage distribution of the number of small loans (loans less than or equal to $1 million) originated and purchased by the bank to businesses with revenues of $1 million or less to: 1) the percentage distribution of businesses with revenues of greater than $1 million; and, 2) the percentage distribution of businesses for which revenues are not available. The table also presents aggregate peer small business data for the years the data is available.

Table S. **Assessment Area Distribution of Loans to Farms by Income Category of the Geography** - The percentage distribution of the number of small loans (less than or equal to $500,000) to farms originated and purchased by the bank in low-, moderate-, middle-, and upper-income geographies compared to the percentage distribution of farms (regardless of revenue size) throughout those geographies. Because aggregate small farm data are not available for geographic areas smaller than counties, it may be necessary to use geographic areas larger than the bank's assessment area.

Table T. **Assessment Area Distribution of Loans to Farms by Gross Annual Revenues -** Compares the percentage distribution of the number of small loans (loans less than or equal to $500 thousand) originated and purchased by the bank to farms with revenues of $1 million or less to: 1) the percentage distribution of farms with revenues of greater than $1 million; and, 2) the percentage distribution of farms for which revenues are not available. The table also presents aggregate peer small farm data for the years the data is available.

ITEM 1. BUSINESS

Wells Fargo & Company is a corporation organized under the laws of Delaware and a financial holding company and a bank holding company registered under the Bank Holding Company Act of 1956, as amended (BHC Act). Its principal business is to act as a holding company for its subsidiaries. References in this report to "the Parent" mean the holding company. References to "we," "our," "us" or "the Company" mean the holding company and its subsidiaries that are consolidated for financial reporting purposes.

At December 31, 2022, we had assets of approximately $1.9 trillion, loans of $955.9 billion, deposits of $1.4 trillion and stockholders' equity of $180 billion. Based on assets, we were the fourth largest bank holding company in the United States. At December 31, 2022, Wells Fargo Bank, N.A. was the Company's principal subsidiary with assets of $1.7 trillion, or 91% of the Company's assets.

Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports, are available for free at www.wellsfargo.com/about/investor-relations/filings as soon as reasonably practicable after they are electronically filed with or furnished to the Securities and Exchange Commission (SEC). They are also available for free on the SEC's website at www.sec.gov[1].

DESCRIPTION OF BUSINESS

General

We are a leading financial services company that provides a diversified set of banking, investment and mortgage products and services, as well as consumer and commercial finance, through banking locations and offices, the internet (www.wellsfargo.com) and other distribution channels to individuals, businesses and institutions in all 50 states, the District of Columbia and in countries outside the U.S. We provide consumer financial products and services including checking and savings accounts, credit and debit cards, and auto, mortgage and home equity, and small business lending. In addition, we offer financial planning, private banking, investment management, and fiduciary services. We also provide financial solutions to businesses through products and services including traditional commercial loans and lines of credit, letters of credit, asset-based lending, trade financing, treasury management, and investment banking services.

As of December 31, 2022, we had four reportable operating segments for management reporting purposes: Consumer Banking and Lending; Commercial Banking; Corporate and Investment Banking; and Wealth and Investment Management. The 2022 Annual Report to Shareholders includes financial information and descriptions of these operating segments.

Human Capital

Our people are what set Wells Fargo apart and are critical to our success. Wells Fargo continues to invest in our employees by offering market competitive compensation, career-development opportunities, a broad array of benefits, and strong work-life programs.

[1] We do not control this website. Wells Fargo has provided this link for your convenience, but does not endorse and is not responsible for the content, links, privacy policy, or security policy of this website.

We have set common expectations for everyone at the Company. These expectations guide how we lead ourselves, collaborate with our colleagues, and make decisions. The following expectations apply to everyone at Wells Fargo, at every level, and in every role:

- Embrace candor
- Do what's right
- Be great at execution
- Learn and grow
- Champion diversity and inclusion
- Build high-performing teams (for managers)

At December 31, 2022, we had approximately 238,000 active employees, with approximately 81% of employees based in the United States.

Compensation and benefits. Wells Fargo's compensation program is linked to performance management and is designed to promote prudent risk management and reinforce its culture and operating standards. The compensation principles include:

- *Pay for performance*: Compensation is linked to company, line of business, and individual performance, including meeting regulatory expectations and creating long-term value consistent with the interests of shareholders.
- *Promote effective risk management*: Compensation promotes effective risk management and discourages imprudent or excessive risk-taking.
- *Attract and retain talent*: People are one of Wells Fargo's competitive advantages; therefore, compensation helps attract, motivate, and retain people with the skills, talent, and experience to drive superior long-term company performance.

In addition, we provide all eligible full- and part-time employees (and their eligible dependents, as applicable) with a comprehensive set of benefits designed to protect their physical and financial health and to help them make the most of their financial future.

Pay Equity Review. Wells Fargo is committed to fair and equitable compensation practices and, since 2015, has conducted an annual pay equity review through engagement with a third-party expert. The review analyzes employee compensation by taking into account gender, race, and ethnicity and factors such as role, tenure, and geography. The review process can include compensation adjustments in the event we identify gaps. The 2022 review, modified for adjustments as described, showed that women at Wells Fargo earn more than 99 cents for every $1 earned by their male peers, and U.S. employees that are racially/ethnically diverse earn more than 99 cents for every $1 earned by their Caucasian/white peers.

Promoting Diversity, Equity and Inclusion. Meeting the increasingly diverse needs of Wells Fargo's global customer base is critical to our Company's long-term growth and success. Wells Fargo values and promotes diversity, equity and inclusion (DE&I) in every aspect of our business. We are dedicated to recruitment and career development practices that support our employees and promote diversity in our workforce at all levels of our Company, including leadership positions. We have a strong record of recruiting, promoting, and rewarding women and racially/ethnically diverse employees at all levels of our Company, including a goal to increase diverse representation in leadership roles. Our Head of Diverse Segments, Representation and

Inclusion reports directly to our CEO and leads our DE&I efforts, with responsibility for driving a Company-wide DE&I strategy.

As of December 31, 2022, our global workforce was 52% female and 48% male, and our U.S. workforce was 55% female and 45% male. Our U.S. workforce was 54% Caucasian/white and 46% racially/ethnically diverse.

Employee training and development. We invest heavily in coaching and training for employees and managers. We believe that when our employees feel properly supported, engaged, and confident in their skills, they are more effective and can provide an even better customer experience. During 2022, we invested approximately $200 million in a variety of employee learning and development programs, including functional training, regulatory compliance, leadership and professional development, early talent development programs, and tuition reimbursement.

Work-life programs and the COVID-19 Pandemic. Wells Fargo offers many benefits, programs, and work arrangements intended to provide employees with flexibility and work-life balance. In March 2022, Wells Fargo began its Return to Office program for employees who had been working from home during the COVID-19 pandemic. Wells Fargo believes the Company benefits from employees seeing each other on a regular basis. When together, it is easier to build relationships, get in-the-moment coaching, identify career opportunities, and brainstorm ideas. Ultimately, when employees work together we believe they learn more about the customers and communities the Company serves and how to serve them better. With this in mind, Wells Fargo's approach emphasizes spending time together in the office, and also provides flexible work options for employees in certain jobs. For example, employees in certain non-customer-facing roles have flexibility to have up to two days a week of remote work, and spend a minimum of three days a week in the office. Expectations for other roles, including customer-facing, operations, technology, and non-U.S. based employees, vary by business need.

The health and safety of employees also remains a priority. All employees globally may take up to four hours of paid time away for each COVID-19 vaccine appointment (including boosters). U.S. employees are additionally eligible to receive free COVID-19 test kits from Wells Fargo or through their medical plan, at no additional cost.

Competition

The financial services industry is highly competitive. Our subsidiaries compete with financial services providers such as banks, savings and loan associations, credit unions, finance companies, mortgage banking companies, insurance companies, investment banks and mutual fund companies. They also face increased competition from nonbank institutions such as brokerage houses, private equity firms and online lending companies, as well as from financial services subsidiaries of commercial and manufacturing companies. Many of these competitors enjoy fewer regulatory constraints and some may have lower cost structures.

Securities firms and insurance companies that elect to become financial holding companies may acquire banks and other financial institutions. Combinations of this type could significantly change the competitive environment in which we conduct business. The financial services industry is also likely to become more competitive as further technological advances enable more companies to provide financial services. These technological advances may diminish the importance of depository institutions and other financial intermediaries in the transfer of funds between parties.

REGULATION AND SUPERVISION

We describe below, and in Note 25 (Regulatory Capital Requirements and Other Restrictions) to Financial Statements included in the 2022 Annual Report to Shareholders, the material elements of the regulatory framework applicable to us. Banking statutes, regulations and policies are continually under review by Congress and state legislatures and federal and state regulatory agencies, as well as non-U.S. governments and financial regulators, and a change in them, including changes in how they are interpreted or implemented, could have a material effect on our business. The regulatory framework applicable to depository institutions and bank holding companies (BHCs) is intended to protect depositors, federal deposit insurance funds, consumers and the banking system as a whole, and not necessarily investors in bank holding companies such as the Company.

Statutes, regulations and policies could restrict our ability to diversify into other areas of financial services, make acquisitions, and pay dividends on our capital stock. They may also require us to provide financial support to one or more of our subsidiary banks, maintain capital balances in excess of amounts desired by management, and pay higher deposit insurance premiums as a result of assessments or a general deterioration in the financial condition of depository institutions. See the “Regulatory Matters” and “Risk Factors” sections in the 2022 Annual Report to Shareholders for additional information.

General

Parent Bank Holding Company. As a BHC, the Parent is subject to regulation under the BHC Act and to inspection, examination and supervision by its primary regulator, the Board of Governors of the Federal Reserve System (Federal Reserve Board or FRB). The Parent is also subject to the disclosure and regulatory requirements of the Securities Act of 1933, as amended, and the Securities Exchange Act of 1934, as amended, both as administered by the SEC. As a company with securities listed on the New York Stock Exchange (NYSE), the Parent is subject to the rules of the NYSE for listed companies.

Subsidiary Banks. Our subsidiary national banks, and their subsidiaries, are subject to regulation and examination primarily by the Office of the Comptroller of the Currency (OCC) and also by the Federal Deposit Insurance Corporation (FDIC), the FRB, the Consumer Financial Protection Bureau (CFPB), the SEC and the Commodities Futures Trading Commission (CFTC). The non-U.S. branches and representative offices of our subsidiary national banks are subject to regulation and examination by their respective financial regulators as well as by the OCC and the FRB. Non-U.S. subsidiaries of our national bank subsidiaries may be subject to the laws and regulations of the countries in which they conduct business.

Nonbank Subsidiaries. Many of our nonbank subsidiaries are also subject to regulation by the FRB and other applicable federal and state agencies. Our insurance subsidiaries are subject to regulation by applicable state insurance regulatory agencies, as well as the FRB. Our brokerage subsidiaries are regulated by the SEC, the Financial Industry Regulatory Authority (FINRA) and, in some cases, the CFTC and the Municipal Securities Rulemaking Board, and state securities regulators. Our other nonbank subsidiaries may be subject to the laws and regulations of the federal government and/or the various states as well as non-U.S. countries in which they conduct business or operate.

Parent Bank Holding Company Activities

"Financial in Nature" Requirement. We became a financial holding company effective March 13, 2000. We continue to maintain our status as a BHC for purposes of various FRB regulations. As a BHC that has elected to be treated as a financial holding company pursuant to the BHC Act, we may affiliate with securities firms and insurance companies and engage in other activities that are financial in nature or incidental or complementary to activities that are financial in nature. "Financial in nature" activities include securities underwriting, dealing, and market making; sponsoring mutual funds and investment companies; insurance underwriting and agency; merchant banking; and activities that the FRB, in consultation with the Secretary of the U.S. Treasury, determines to be financial in nature or incidental to such financial activity. "Complementary activities" are activities that the FRB determines upon application to be complementary to a financial activity and do not pose a safety and soundness risk.

FRB approval is generally not required for us to acquire a company (other than a BHC, bank or savings association) engaged in activities that are financial in nature or incidental to activities that are financial in nature, as determined by the FRB. Prior notice to the FRB may be required, however, if the company to be acquired has total consolidated assets of $10 billion or more. Prior FRB approval is required before we may acquire the beneficial ownership or control of more than 5% of the voting shares or substantially all of the assets of a BHC, bank or savings association. In addition, the FRB has implemented a final rule under the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) that also prohibits our ability to merge, acquire all or substantially all of the assets of, or acquire control of another company if our total resulting consolidated liabilities would exceed 10% of the aggregate consolidated liabilities of all financial companies.

Because we are a financial holding company, if any of our subsidiary banks receives a rating under the Community Reinvestment Act of 1977, as amended (CRA), of less than satisfactory, we will be prohibited, until the rating is raised to satisfactory or better, from engaging in new activities or acquiring companies other than BHCs, banks or savings associations, except that we could engage in new activities, or acquire companies engaged in activities, that are closely related to banking under the BHC Act. CRA performance is also taken into account by regulators in reviewing applications to establish bank branches. In addition, if the FRB finds that the Company or any one of our subsidiary banks is not well capitalized or well managed, we would be required to enter into an agreement with the FRB to comply with all applicable capital and management requirements and which may contain additional limitations or conditions. Until corrected, we could be prohibited from engaging in any new activity or acquiring companies engaged in activities that are not closely related to banking under the BHC Act without prior FRB approval. If we fail to correct any such condition within a prescribed period, the FRB could order us to divest our banking subsidiaries or, in the alternative, to cease engaging in activities other than those closely related to banking under the BHC Act.

Interstate Banking. Under the Riegle-Neal Interstate Banking and Branching Act (Riegle-Neal Act), a BHC may acquire banks in states other than its home state, subject to any state requirement that the bank has been organized and operating for a minimum period of time, not to exceed five years, and the requirement that the BHC not control, prior to or following the proposed acquisition, more than 10% of the total amount of deposits of insured depository institutions nationwide or, unless the acquisition is the bank holding company's initial entry into the state, more than 30% of such deposits in the state (or such lesser or greater amount set by the state). The Riegle-Neal Act also authorizes banks to merge across state lines, subject to the same deposit limits noted above, thereby creating interstate branches. Banks are also permitted to acquire and to establish new branches in other states.

Regulatory Approval. In determining whether to approve a proposed bank acquisition, federal banking regulators will consider, among other factors, the effect of the acquisition on competition, financial condition, and future prospects including current and projected capital ratios and levels, the competence, experience, and integrity of management and record of compliance with laws and regulations, the convenience and needs of the communities to be served, including the acquiring institution's record of compliance under the CRA, the effectiveness of the acquiring institution in combating money laundering activities and the risk to the stability of the United States banking system.

Dividend Restrictions

The Parent is a legal entity separate and distinct from its subsidiary banks and other subsidiaries. A significant source of funds to pay dividends on our common and preferred stock and principal and interest on our debt is dividends from the Parent's subsidiaries. Various federal and state statutory provisions and regulations limit the amount of dividends the Parent's subsidiary banks and certain other subsidiaries may pay without regulatory approval. Federal banking regulators have the authority to prohibit the Parent's subsidiary banks from engaging in unsafe or unsound practices in conducting their businesses. The payment of dividends, depending on the financial condition of the bank in question, could be deemed an unsafe or unsound practice. The ability of the Parent's subsidiary banks to pay dividends in the future is currently, and could be further, influenced by bank regulatory policies and capital requirements. For information about the restrictions applicable to the Parent's subsidiary banks, see Note 25 (Regulatory Capital Requirements and Other Restrictions) to Financial Statements included in the 2022 Annual Report to Shareholders.

Furthermore, under a Support Agreement dated June 28, 2017, as amended and restated on June 26, 2019 (the "Support Agreement"), among the Parent, WFC Holdings, LLC, an intermediate holding company and subsidiary of the Parent (the "IHC"), Wells Fargo Bank, N.A., Wells Fargo Securities, LLC, Wells Fargo Clearing Services, LLC, and certain other subsidiaries of the Parent designated from time to time as material entities for resolution planning purposes or identified from time to time as related support entities in our resolution plan, the IHC may be restricted from making dividend payments to the Parent if certain liquidity and/or capital metrics fall below defined triggers, or if the Parent's board of directors authorizes it to file a case under the U.S. Bankruptcy Code. Any such restriction could materially and adversely impact the Parent's liquidity and its ability to satisfy its debt and other obligations, as well as its ability to make dividend payments on its common and preferred stock. See the "Regulatory Matters" and "Risk Factors" sections of the 2022 Annual Report to Shareholders for additional information on the Support Agreement.

In addition to these restrictions on the ability of our subsidiary banks to pay dividends to us, the FRB requires large BHCs, including Wells Fargo, to submit annual capital plans describing planned capital distributions, such as the payment of dividends. Large BHCs, like Wells Fargo, and their insured depository institutions also must comply with various capital requirements, including the reforms known as Basel III, as well as rules that require leverage and supplementary leverage ratio requirements. We are also subject to the FRB's rule implementing an additional capital surcharge on those U.S. banking organizations, such as the Company, that are designated as global systemically important banks (G-SIBs). The failure to meet any of these requirements could result in limitations or restrictions on our ability to make capital distributions.

In addition, the FRB's enhanced supervision regulations for large BHCs, like Wells Fargo, impose capital distribution restrictions, including on the payment of dividends, upon the occurrence of capital, stress test, risk management, or liquidity risk management triggers. For more information on regulations or arrangements that may impose capital distribution restrictions on the Company and its subsidiaries, see the "Capital Management," "Regulatory Matters" and "Risk Factors" sections of the 2022 Annual Report to Shareholders.

Holding Company Structure

Transfer of Funds from Subsidiary Banks. The Parent's subsidiary banks are subject to restrictions under federal law that limit the transfer of funds or other assets from such subsidiaries to the Parent and its nonbank subsidiaries (including affiliates) in so-called "covered transactions." In general, covered transactions include loans and other extensions of credit, investments and asset purchases, as well as certain other transactions involving the transfer of value from a subsidiary bank to an affiliate or for the benefit of an affiliate. Unless an exemption applies, covered transactions by a subsidiary bank with a single affiliate are limited to 10% of the subsidiary bank's capital and surplus and, with respect to all covered transactions with affiliates in the aggregate, to 20% of the subsidiary bank's capital and surplus. Also, loans and extensions of credit to affiliates generally must be secured by qualifying collateral. A bank's transactions with its nonbank affiliates are also generally required to be on arm's length terms. The Company is also subject to lending limits and qualitative requirements on loans to executive officers, directors and principal shareholders of the Parent and its subsidiary banks.

Source of Strength. The FRB has a policy that a BHC is expected to act as a source of financial and managerial strength to each of its subsidiary banks and, under appropriate circumstances, to commit resources to support each such subsidiary bank. This support may be required at times when the BHC may not have the resources to provide the support.

The OCC may order an assessment of the Parent if the capital of one of its national bank subsidiaries were to become impaired. If the Parent failed to pay the assessment within three months, the OCC could order the sale of the Parent's stock in the national bank to cover the deficiency.

Depositor Preference. In the event of the "liquidation or other resolution" of an insured depository institution, the claims of deposits payable in the United States (including the claims of the FDIC as subrogee of insured depositors) and certain claims for administrative expenses of the FDIC as a receiver will have priority over other general unsecured claims against the institution. If an insured depository institution fails, claims of insured and uninsured U.S. depositors, along with claims of the FDIC, will have priority in payment ahead of unsecured creditors, including the Parent, and depositors whose deposits are solely payable at such insured depository institution's non-U.S. offices.

Liability of Commonly Controlled Institutions. The Company's subsidiaries include banks in the U.S., such as Wells Fargo Bank, N.A., that are insured by the FDIC. Under the Federal Deposit Insurance Act, insured depository institutions can be held liable for any loss incurred, or reasonably expected to be incurred, by the FDIC due to the default of an insured depository institution controlled by the same BHC, and for any assistance provided by the FDIC to an insured depository institution that is in danger of default and that is controlled by the same BHC. "Default" means generally the appointment of a conservator or receiver. "In danger of default" means generally the existence of certain conditions indicating that a default is likely to occur in the absence of regulatory assistance.

Dodd-Frank Act

The Dodd-Frank Act and the numerous rules to implement its provisions have resulted in enhanced regulation and supervision of large BHCs, such as Wells Fargo. This includes, among other things, rules to promote financial stability and prevent or mitigate the risks that may arise from the material distress or failure of a large BHC; enhance consumer protections; prohibit proprietary trading; and implement enhanced prudential requirements for large BHCs regarding risk-based capital and leverage, risk and liquidity management, stress testing, and recovery and resolution planning. The Dodd-Frank Act, including current and future rules implementing its provisions and the interpretation of those rules, has affected, and we expect will continue to affect, most of our businesses in some way, either directly through regulation of specific activities or indirectly through regulation of concentration risks, capital or liquidity. For more information about the Dodd-Frank Act and its effect on our business, see the "Regulatory Matters" and "Risk Factors" sections of the 2022 Annual Report to Shareholders.

Capital and Liquidity Requirements and Capital Planning

The Company and each of our insured depository institutions are subject to various regulatory capital adequacy and liquidity requirements administered by federal banking regulators. The capital rules, among other things, establish required minimum ratios relating capital to different categories of assets and exposures. Federal banking regulators have also imposed a leverage ratio and supplementary leverage ratio on large BHCs, like Wells Fargo, and their insured depository institutions, as well as a liquidity coverage ratio and a net stable funding ratio. The FRB has also finalized rules to address the amount of equity and unsecured long-term debt a G-SIB must hold to improve its resolvability and resiliency, often referred to as total loss absorbing capacity.

From time to time, federal banking regulators propose changes and amendments to, and issue interpretations of, risk-based capital requirements and related reporting instructions. In addition, the FRB closely monitors capital levels of the institutions it supervises and may require such institutions to modify capital levels based on FRB determinations. Such determinations, proposals or interpretations could, if implemented in the future, affect our reported capital ratios and net risk-adjusted assets.

As an additional means to identify problems in the financial management of depository institutions, the Federal Deposit Insurance Act (FDI Act) requires federal banking regulators to establish certain non-capital safety and soundness standards for institutions for which they are the primary federal regulator. The standards relate generally to operations and management, asset quality, interest rate exposure, executive compensation and risk management. Federal banking regulators are authorized to take action against institutions that fail to meet such standards.

The FDI Act requires federal banking regulators to take "prompt corrective action" with respect to FDIC-insured depository institutions that do not meet minimum capital requirements. A depository institution's treatment for purposes of the prompt corrective action provisions will depend upon how its capital levels compare to various capital measures and certain other factors, as established by regulation.

In addition, the FRB's capital plan rule establishes capital planning and other requirements that govern capital distributions, including dividends and share repurchases, by certain BHCs, including Wells Fargo. Federal banking regulators also require stress tests to evaluate whether an institution has sufficient capital to continue to operate during periods of adverse economic and financial conditions.

For more information on our capital requirements and planning, see the "Capital Management" section of the 2022 Annual Report to Shareholders.

Deposit Insurance Assessments

The Company's subsidiaries include banks, such as Wells Fargo Bank, N.A., that are insured by the FDIC. Through the Deposit Insurance Fund (DIF) maintained by the FDIC, the FDIC insures the deposits of our insured banks up to prescribed limits for each depositor and funds the DIF through assessments on member banks. To maintain the DIF, member institutions are assessed an insurance premium based on an assessment base and an assessment rate.

The FDIC has adopted a comprehensive, long-range plan for DIF management, targeting a designated reserve ratio of 2%. For the year ended December 31, 2022, the Company's FDIC deposit insurance assessments totaled $679 million.

The FDIC may terminate a depository institution's deposit insurance upon a finding that the institution's financial condition is unsafe or unsound or that the institution or its directors have engaged in unsafe or unsound practices or have violated any applicable law, regulation, order or condition enacted or imposed by the institution's regulatory agency. The termination of deposit insurance for one or more of our bank subsidiaries could have a material adverse effect on our earnings, depending on the collective size of the particular banks involved.

Fiscal and Monetary Policies

Our business and earnings are affected significantly by the fiscal and monetary policies of the federal government and its agencies. We are particularly affected by the monetary policies of the FRB, which regulates the supply of money and credit in the United States. Among the instruments of monetary policy available to the FRB are (a) conducting open market operations in United States government securities, (b) changing the discount rates of borrowings of depository institutions, (c) imposing or changing reserve requirements against depository institutions' deposits, and (d) imposing or changing reserve requirements against certain borrowings by banks and their affiliates. These methods are used in varying degrees and combinations to directly affect the availability of bank loans and deposits, as well as the interest rates charged on loans and paid on deposits. The policies of the FRB may have a material effect on our business, results of operations and financial condition.

Privacy Provisions of the Gramm-Leach-Bliley Act and Restrictions on Affiliate Marketing

Federal banking regulators, as required under the Gramm-Leach-Bliley Act (the GLB Act), have adopted rules limiting the ability of banks and other financial institutions to disclose nonpublic information about consumers to nonaffiliated third parties. The rules require disclosure of privacy policies to consumers and, in some circumstances, allow consumers to prevent disclosure of certain personal information to nonaffiliated third parties. The privacy provisions of the GLB Act affect how consumer information is transmitted through diversified financial services companies and conveyed to outside vendors. Federal financial regulators have issued regulations under the Fair and Accurate Credit Transactions Act that have the effect of increasing the length of the waiting period, after privacy disclosures are provided to new customers, before information can be shared among different affiliated companies for the purpose of marketing products and services by those affiliated companies.

Sarbanes-Oxley Act of 2002

The Sarbanes-Oxley Act of 2002 (Sarbanes-Oxley) implemented a broad range of corporate governance and accounting measures to increase corporate responsibility, to provide for enhanced penalties for accounting and auditing improprieties at publicly traded companies, and to protect investors by improving the accuracy and reliability of disclosures under federal securities laws. We are subject to Sarbanes-Oxley because we are required to file periodic reports with the SEC under the Securities Exchange Act of 1934. Among other things, Sarbanes-Oxley and/or its implementing regulations established membership requirements and additional responsibilities for our audit committee, imposed restrictions on the relationship between us and our outside auditors (including restrictions on the types of non-audit services our auditors may provide to us), imposed additional responsibilities for our external financial statements on our chief executive officer and chief financial officer, expanded the disclosure requirements for our corporate insiders, required our management to evaluate our disclosure controls and procedures and our internal control over financial reporting, and required our independent registered public accounting firm to issue a report on our internal control over financial reporting.

USA PATRIOT Act

The Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (USA PATRIOT Act) is intended to strengthen the ability of U.S. law enforcement agencies and intelligence communities to work together to combat terrorism on a variety of fronts. The USA PATRIOT Act has significant implications for depository institutions, brokers, dealers and other businesses involved in the transfer of money. The USA PATRIOT Act requires the implementation of policies and procedures relating to anti-money laundering, economic sanctions, suspicious activities, and currency transaction reporting and due diligence on customers. The USA PATRIOT Act also requires federal banking regulators to evaluate the effectiveness of an applicant in combating money laundering in determining whether to approve a proposed bank acquisition.

Future Legislation or Regulation

Economic, market and political conditions during the past several years have led to a significant amount of legislation and regulation in the U.S. and abroad affecting the financial services industry, as well as heightened expectations and scrutiny of financial services companies from banking regulators. Further legislative changes and additional regulations may change our operating environment in substantial and unpredictable ways. Such legislation and regulations could increase our cost of doing business, affect our compensation structure, restrict or expand the activities in which we may engage or affect the competitive balance among banks, savings associations, credit unions, and other financial institutions. We cannot predict whether future legislative proposals will be enacted and, if enacted, the effect that they, or any implementing regulations, would have on our business, results of operations or financial condition.

ADDITIONAL INFORMATION

Additional information in response to this Item 1 can be found in the 2022 Annual Report to Shareholders under "Financial Review" and under "Financial Statements." That information is incorporated into this item by reference.

ITEM 1A. RISK FACTORS

Information in response to this Item 1A can be found in this report under Item 1 and in the 2022 Annual Report to Shareholders under "Financial Review – Risk Factors." That information is incorporated into this item by reference.

ITEM 1B. UNRESOLVED STAFF COMMENTS

Not applicable.

ITEM 2. PROPERTIES

December 31, 2022	Approximate square footage (in millions)
We occupy properties in:	
United States	
San Francisco-Oakland-Berkeley, CA metro area	
420 Montgomery Street (corporate headquarters)	0.4
All other San Francisco metro area locations	2.8
Total San Francisco, CA metro area	3.2
Top 10 other U.S. locations:	
Charlotte-Concord-Gastonia, NC-SC	7.0
Minneapolis-St. Paul-Bloomington, MN-WI	4.4
New York-Newark-Jersey City, NY-NJ-PA	3.1
Los Angeles-Long Beach-Anaheim, CA	2.9
Des Moines-West Des Moines, IA	2.9
Phoenix-Mesa-Chandler, AZ	2.9
St. Louis, MO-IL	2.2

United Kingdom	0.3
All other international locations	0.3
Total International	5.4
Total square footage of property occupied for business operations (1)	70.7

(1) In addition to the total square footage of property occupied, Wells Fargo held 2.8 million square feet of real estate as of December 31, 2022, that was vacant pending disposition, leased to retail tenants or leased-to-term by third-party office tenants.

As of December 31, 2022, we provided a diversified set of banking, investment and mortgage products and services, as well as consumer and commercial finance, through banking locations and offices under ownership and lease agreements. The locations and offices occupied by the Company are used across all of our reportable operating segments and for corporate purposes. We continue to evaluate our owned and leased properties and may determine from time to time that certain of our properties are no longer necessary for our operations. There is no assurance that we will be able to dispose of any excess properties or that we will not incur charges in connection with such dispositions, which could be material to our operating results in a given period.

ITEM 3. LEGAL PROCEEDINGS

Information in response to this Item 3 can be found in the 2022 Annual Report to Shareholders under "Financial Statements – Notes to Financial Statements – Note 13 (Legal Actions)." That information is incorporated into this item by reference.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

MARKET INFORMATION

The Company's common stock is listed on the NYSE (symbol "WFC"). The "Stock Performance" section of the 2022 Annual Report to Shareholders provides stockholder return comparisons and is incorporated herein by reference. At February 10, 2023, there were 231,886 holders of record of the Company's common stock.

DIVIDENDS

The dividend restrictions discussions in the "Regulation and Supervision – Dividend Restrictions" section under Item 1 of this report and in the 2022 Annual Report to Shareholders under "Financial Statements – Notes to Financial Statements – Note 25 (Regulatory Capital Requirements and Other Restrictions)" are incorporated into this item by reference.

REPURCHASES OF EQUITY SECURITIES

In January 2021, our Board of Directors authorized the repurchase of up to 500 million shares of our common stock. At December 31, 2022, we had remaining Board authority to repurchase approximately 250 million shares of common stock, subject to regulatory and legal conditions. The authorizations cover shares repurchased to meet employee benefit plan requirements. The Company maintains a variety of retirement plans for its employees and typically is a net issuer of shares of common stock to these plans. From time to time, it also purchases shares of common stock from these plans to accommodate employee preferences. Share repurchases are subtracted from the Company's repurchase authority without offset for share issuances. Shares may be repurchased from the different benefit plans or in the open market, subject to regulatory approval.

The amount and timing of stock repurchases will be based on various factors, including our capital requirements, the number of shares we expect to issue for employee benefit plans and acquisitions, market conditions (including the trading price of our stock), and regulatory and legal considerations. See the "Capital Management" section in the 2022 Annual Report to Shareholders for additional information about our common stock repurchases.

The following table shows Company repurchases of its common stock for each calendar month in the quarter ended December 31, 2022. In fourth quarter 2022, common stock repurchases were limited to repurchases in connection with the Wells Fargo & Company Stock Purchase Plan and the Company's deferred compensation plans.

Calendar month	Total number of shares repurchased (1)	Weighted-average price paid per share	Maximum number of shares that may yet be repurchased under the authorization
October	52,876	$ 43.67	250,466,216
November	43,423	46.77	250,422,793
December	32,959	42.94	250,389,834
Total	129,258		

(1) All shares were repurchased under an authorization covering up to 500 million shares of common stock approved by the Board of Directors and publicly announced by the Company on January 15, 2021. Unless modified or revoked by the Board, this authorization does not expire.

ITEM 6. [RESERVED]

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Information in response to this Item 7 can be found in the 2022 Annual Report to Shareholders under "Financial Review." That information is incorporated into this item by reference.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Information in response to this Item 7A can be found in the 2022 Annual Report to Shareholders under "Financial Review – Risk Management – Asset/Liability Management." That information is incorporated into this item by reference.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Information in response to this Item 8 can be found in the 2022 Annual Report to Shareholders under "Financial Statements," under "Notes to Financial Statements" and under "Quarterly Financial Data." That information is incorporated into this item by reference.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

ITEM 9A. CONTROLS AND PROCEDURES

Information in response to this Item 9A can be found in the 2022 Annual Report to Shareholders under "Controls and Procedures." That information is incorporated into this item by reference.

ITEM 9B. OTHER INFORMATION

Not applicable.

ITEM 9C. DISCLOSURE REGARDING FOREIGN JURISDICTIONS THAT PREVENT INSPECTIONS

Not applicable.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

INFORMATION ABOUT OUR EXECUTIVE OFFICERS

Muneera S. Carr (age 54)

Executive Vice President, Chief Accounting Officer and Controller since March 2020;
Executive Vice President and Controller from January 2020 to March 2020;
Executive Vice President from February 2013 to October 2019 and Chief Financial Officer from January 2018 to October 2019 at Comerica, Incorporated, a financial services company;
Chief Accounting Officer at Comerica Incorporated from July 2010 to January 2018.
Ms. Carr has served with the Company for 3 years.

William M. Daley (age 74)

Vice Chairman of Public Affairs since November 2019;
Vice Chairman and a member of the Executive Committee at Bank of New York Mellon, a financial services company, from June 2019 to October 2019;
Managing Partner at Argentiere Capital, an investment management firm, from May 2014 to June 2019.
Mr. Daley has served with the Company for 3 years.

Kristy Fercho (age 56)

Senior Executive Vice President, Head of Diverse Segments, Representation and Inclusion and Head of Home Lending since October 2022;

Mr. Williams has served with the Company for 2 years.

There is no family relationship between any of the Company's executive officers or directors. All executive officers serve at the pleasure of the Board of Directors.

AUDIT COMMITTEE INFORMATION

The Audit Committee is a standing audit committee of the Board of Directors established in accordance with Section 3(a)(58)(A) of the Securities Exchange Act of 1934. The Committee has four members: Mark A. Chancy, Theodore F. Craver, Jr. (Chair), CeCelia G. Morken, and Ronald L. Sargent. Each member is independent, as independence for audit committee members is defined by NYSE rules. The Board of Directors has determined, in its business judgment, that each member of the Audit Committee is financially literate, as required by NYSE rules, and that Messrs. Chancy, Craver, Jr., and Sargent each qualifies as an "audit committee financial expert" as defined by SEC regulations.

CODE OF ETHICS AND BUSINESS CONDUCT

The Company's Code of Ethics and Business Conduct applicable to employees (including executive officers) as well as directors, the Company's corporate governance guidelines, and the charters for the Audit, Governance and Nominating, Human Resources, Corporate Responsibility, Finance, and Risk Committees are available at www.wellsfargo.com/about/corporate/governance.

ADDITIONAL INFORMATION

Additional information with respect to our directors, executive officers, and corporate governance in response to this Item 10 will be in the Company's 2023 Proxy Statement and is incorporated into this item by reference.

ITEM 11. EXECUTIVE COMPENSATION

Information with respect to our executive officer and director compensation and with respect to the Human Resources Committee of the Board of Directors in response to this Item 11 will be in the Company's 2023 Proxy Statement and is incorporated into this item by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

EQUITY COMPENSATION PLAN INFORMATION

The following table provides information about our equity compensation plans in effect on December 31, 2022, separately aggregated for plans approved by shareholders and for plans not approved by shareholders. A description of the material features of each equity compensation plan not approved by shareholders follows the table. All outstanding awards relate to shares of our common stock. Information is as of December 31, 2022, unless otherwise indicated.

Equity Compensation Plan Information

Plan category	(a) # of shares to be issued upon exercise of outstanding options, warrants and rights		(b) Weighted-average exercise price of outstanding options, warrants and rights (1)	(c) # of shares remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))	
Equity compensation plans approved by security holders	60,458,799	(2)	$ 0.00	131,346,845	(3)
Equity compensation plans not approved by security holders	5,259,807	(4)	NA	3,089,783	(5)
Total	65,718,606		0.00	134,436,628	

(1) Does not reflect restricted share rights (RSRs), restricted share units (RSUs), performance share awards or deferred compensation benefits because they have no exercise price.
(2) For the Wells Fargo & Company 2022 Long-Term Incentive Plan (2022 LTIP) and its predecessor the Long-Term Incentive Compensation Plan (LTICP), consists of 53,237,143 shares subject to RSRs, and a maximum of 5,731,327 performance shares. For the Supplemental 401(k) Plan, consists of 1,126,379 shares issuable upon distribution of benefits. For the Directors Stock Compensation and Deferral Plan (Directors Plan), consists of 228,946 shares issuable upon distribution of deferred stock awards, and 135,004 shares issuable upon distribution of deferred compensation benefits.
(3) We could have issued the number of shares of our common stock indicated in the table below captioned “Plans approved by security holders” pursuant to any of the award types listed for the plan or, if indicated for the plan, pursuant to distributions of deferred compensation benefits. No information is provided for the LTICP because no future awards will be made under this plan.
(4) This consists of shares of common stock issuable upon distribution of deferred compensation benefits and 617 shares issuable upon distribution related to the Norwest Corporation Directors’ Formula Stock Award Plan.
(5) We could have issued the number of shares of our common stock indicated in the table below captioned “Plans not approved by security holders” pursuant to distributions of deferred compensation benefits. No information is provided for the Norwest Corporation Directors’ Formula Stock Award Plan because no future awards or deferrals will be made under this plan and because column (a) reflects all shares issuable under those plans upon exercise or distribution of outstanding awards or deferred compensation benefits.

Plans approved by security holders	# of shares remaining available for future issuance under equity compensation plans (excluding # of shares to be issued upon exercise of outstanding options, warrants and rights)	Award types
2022 LTIP	129,493,577	Stock, restricted stock, RSRs, performance shares, performance units
Supplemental 401(k) Plan	1,723,509	Deferral distribution
Directors Plan	129,759	Stock options, deferral distribution
Total	131,346,845	

Plans not approved by security holders	# of shares remaining available for future issuance under equity compensation plans	Award types
Deferred Compensation Plan	2,942,642	Deferral distribution
Non-Qualified Deferred Compensation Plan for Independent Contractors	147,141	Deferral distribution
Total	3,089,783	

Material Features of Equity Compensation Plans Not Approved by Shareholders

Deferred Compensation Plan. Under the Deferred Compensation Plan, eligible employees may defer receipt of salary, bonuses and certain other compensation subject to the terms of the plan. Deferral elections are irrevocable once made except for limited re-deferral opportunities. We treat amounts deferred by a participant as if invested in the earnings options selected by the participant, and determine the deferred compensation benefit payable to the participant based on the performance of those earnings options. The plan offers a number of earnings options, including one based on our common stock with dividends reinvested. We generally distribute amounts allocated to the common stock option in shares of common stock. Participants have no direct interest in any of the earnings options and are general unsecured creditors of the Company with respect to their deferred compensation benefits under the plan.

Non-Qualified Deferred Compensation Plan for Independent Contractors. Under the Non-Qualified Deferred Compensation Plan for Independent Contractors participants who performed qualifying investment or other financial services for participating affiliates as independent contractors were able to defer all or part of their eligible compensation payable to them by the affiliate subject to the terms of the plan. Deferral elections were irrevocable once made. Amounts deferred by a participant were treated as if invested in the earnings options selected by the participant, which determine the deferred compensation benefit payable to the participant. The plan offered a number of earnings options, including one based on our common stock with dividends reinvested. We generally distribute amounts allocated to the common stock option in shares of common stock. No future deferrals may be made under this plan and participants may no longer reallocate their existing account balances under the plan among different investment options. Shares remaining available for issuance under the plan consist of shares issuable as a result of amounts credited to participant accounts denominated in our common stock to reflect cash dividends paid on the common stock. The plan is sponsored by a wholly owned subsidiary, WF Deferred Compensation Holdings, Inc. We have guaranteed its obligations under the plan. Participants have no direct interest in any of the earnings options and are general unsecured creditors of the plan sponsor and the Company with respect to their deferred compensation benefits under the plan.

Norwest Corporation Directors' Formula Stock Award Plan. Under the Norwest Corporation Directors' Formula Stock Award Plan we awarded shares of common stock to non-employee directors. The plan allowed participants to defer receipt of all or a portion of their awards, with dividends reinvested, until a future year or years as selected by the participants subject to the terms of the plan. Participants can elect one time to defer commencement of distribution of their deferral accounts if the election is made sufficiently in advance of the original distribution commencement date and the new distribution commencement date is sufficiently beyond the original distribution commencement date. Participants have no direct interest in the shares deferred under the plan and are general unsecured creditors of the Company with respect to payment of their deferred stock awards under the plan. No future stock awards or deferrals may be made under this plan.

ADDITIONAL INFORMATION

Additional information with respect to security ownership of certain beneficial owners of our common stock and the security ownership of our management in response to this Item 12 will be in the Company's 2023 Proxy Statement and is incorporated into this item by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Information with respect to certain relationships and related transactions and director independence in response to this Item 13 will be in the Company's 2023 Proxy Statement and is incorporated into this item by reference.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Information with respect to principal accountant fees and services in response to this Item 14 will be in the Company's 2023 Proxy Statement and is incorporated into this item by reference.

PART IV

ITEM 15. EXHIBIT AND FINANCIAL STATEMENT SCHEDULES

1. FINANCIAL STATEMENTS

The Company's consolidated financial statements, including the Notes thereto, and the report of the independent registered public accounting firm thereon, are set forth in the 2022 Annual Report to Shareholders, and are incorporated into this item by reference.

2. FINANCIAL STATEMENT SCHEDULES

All financial statement schedules for the Company have been included in the consolidated financial statements or the related footnotes, or are either inapplicable or not required.

3. **EXHIBITS**

A list of exhibits to this Form 10-K is set forth below. Shareholders may obtain a copy of any of the following exhibits, upon payment of a reasonable fee, by writing to Wells Fargo & Company, Office of the Corporate Secretary, MAC J0193-610, 30 Hudson Yards, 61st Floor, New York, New York 10001.
