Re: Request for Information from Annual Appropriation Committee Hearing

Ref ID: 85-03 CONRAC facility update

The attached information is in response to questions posed at our department's hearing on October 5, 2015 to discuss the proposed 2016 budget.

Alderman Arena asked for update on the CONRAC facilities.

Construction on the O'Hare Intermodal Hub is well underway. This project is delivered by two major contracts. First, the CM@Risk is responsible for delivering the garage, quick turnaround area and guide way for the ATS extension. Currently, CM@Risk is performing site prep and demo, as well as construction of roadways that will connect Mannheim Road to the site of the facility to be used both for construction, namely delivery of the pre-cast in spring 2016, and access to the facility when it is complete. Caisson work will begin later this month.

Second, the design/build vendor responsible for installing the new train control system and guide way equipment on the ATS extension is well underway with design. In addition, the new 36 vehicles for the ATS system are under production.

It is anticipated the project will be complete in the fourth quarter of 2018.

As always, please let me know if you have any further questions.

Re: Request for Information from Annual Appropriation Committee Hearing

Ref ID: 85-05 ACDBE weighted participation

The attached information is in response to questions posed at our department's hearing on October 5, 2015 to discuss the proposed 2016 budget.

Alderman Villegas asked about considering a more weighted point scale for single entities that obtain more ACDBE participation.

CDA is confident the provision requiring that no single entity or its sub-lessee may own or operate more than 60% of a concessions category and the provision requiring 37% ACDBE participation will achieve the intent of maximizing ACDBE/local participation. Therefore, CDA does not believe that allowing greater weight for higher ACDBE participation is necessary.

As always, please let me know if you have any further questions.
