

## 2022 CHICAGO CLIMATE ACTION PLAN

The City of Chicago continues to work toward creating healthy, resilient, and sustainable communities across Chicago. This year, the City will update its climate goals to reduce carbon emissions while increasing household savings, advancing environmental justice, and improving community health.

With historic investments coming in 2022, **thanks for telling us what's most important to you and your community!**

1. The City of Chicago is committed to achieving **100% renewable energy** by 2035 for all electricity in homes and businesses. How important is it to you that the following are addressed in the renewable energy strategy?

	Not at all	Slightly	Fairly	Very
Keep energy costs from rising				
Improve access to back-up power during emergencies				
Improve rooftop and community solar developments within Chicago				
Make it easy for families and business to sign up for renewable energy				
Create jobs manufacturing and installing renewable energy equipment				

## 2022 CHICAGO CLIMATE ACTION PLAN

2. The following initiatives would both reduce carbon emissions and prioritize **household savings**. To increase **household savings**, how important is it to you that the following are prioritized in your neighborhood?

	Not at all	Slightly	Fairly	Very
Discounts on efficient appliances and lighting				
Discounts on smart thermostats				
Better network of protected bike lanes, shared bikes and e-scooters				
Community ownership of renewable energy infrastructure [i.e. solar panels]				
Better access to renewable energy				
Green job opportunities [jobs that help preserve or restore the environment]				
Engage you in the planning and implementation of these initiatives
