## Exhibit B

### 12. Reason for rezoning the property:

The reason for the rezoning is to permit the two-phased development of the subject property. Phase I will include the construction of a new 6-story mixed use, affordable housing building within the southwest parcel of the subject property (“Thrive Exchange South”). Due to the subject property’s transit-served location, proposed 100% affordable housing building, and proposed C1-3 zoning district, the Applicant will seek i.) reduction in minimum lot area (MLA), ii.) increase in floor area ratio, iii.) building height increase and iv. parking reduction to zero. Phase II will include the construction of a mixed-use, affordable housing building within the northwest corner of the subject property (“Thrive Exchange North”). The proposed building will be of similar size and will contain similar uses and unit mixes as Thrive Exchange South.

### 13. Describe the proposed use of the property after the rezoning. Indicate the number of dwelling units; number of parking spaces; approximate square footage of any commercial space; and height of the proposed building.

The Applicant plans to develop Thrive Exchange South (*refer to #12 above*), in its initial phase of development. Thrive Exchange South will be developed with a new, 6-story mixed use, 43-unit affordable housing building which will consist of i. retail space (2,910 SF), office space (734 SF) in which Neighborhood Housing Services of Chicago will operate, a 43-space bike room and a lobby, within the first floor; ii. residential lounge, fitness center, roof deck and seven (7) dwelling units, within the second floor and iii. thirty-six (36) dwelling units within the third-sixth floors. The proposed height of the building is 74 feet, 4 inches.

The proposed transit-oriented development is located directly adjacent to the Cheltenham Metra Station and will not have any on-site parking, providing increased ridership for Metra and the CTA. As the Proposed Building is a 100% affordable housing building, the Applicant seeks to waive its residential parking requirement in accordance with Sec. 17-10-0102-B(5)(a) of the Chicago Zoning Ordinance.

The Applicant plans to develop Thrive Exchange North (*refer to #12 above*), in its second phase of development. Thrive Exchange North will be developed with a mixed-use building. 17. The Applicant acknowledges that it is the policy of the City to maximize opportunities for Minority and Women-owned Business Enterprises (“M/WBEs”) and city residents to compete for contracts and jobs on construction projects approved through the planned development process. To assist the city in promoting and tracking such M/WBE and city resident participation, an applicant for planned development approval shall provide information at three points in the city approval process. First, the applicant must submit to DPD, as part of its application for planned development approval, an M/WBE Participation Proposal. The M/WBE Participation Proposal must identify the applicant’s goals for participation of certified M/WBE firms in the design, engineering and construction of the project, and of city residents in the construction work. The city encourages goals of (i) 26% MBE and 6% WBE participation (measured against the total construction budget for the project or any phase thereof), and (ii) 50% city resident hiring (measured against the total construction work hours for the project or any phase thereof). The M/WBE Participation Proposal must include a description of the Applicant’s proposed outreach plan designed to inform M/WBEs and city residents of job and contracting opportunities. Second, at the time of the Applicant’s submission for Part II permit review for the project or any phase thereof, the Applicant must submit to DPD (a) updates (if any) to the Applicant’s preliminary outreach plan, (b) a description of the Applicant’s outreach efforts and evidence of such outreach, including, without limitation, copies of certified letters to M/WBE contractor associations and the ward office of the alderman in which the project is located and receipts thereof; (c) responses to the Applicant’s outreach efforts, and (d) updates (if any) to the applicant’s M/WBE and city resident participation goals. Third, prior to issuance of a Certificate of Occupancy for the project or any phase thereof, the Applicant must provide DPD with the actual level of M/WBE and city resident participation in the project or any phase thereof, and evidence of such participation. In addition to the foregoing, DPD may request such additional information as the department determines may be necessary or useful in evaluating the extent to which M/WBEs and city residents are informed of and utilized in planned development projects. All such information will be provided in a form acceptable to the Zoning Administrator. Subject: Thrive Exchange Support of Travel Demand Management Policy (TDM)

Dear Bill,

As you are aware, the City of Chicago does have transportation policies and initiatives aimed at promoting sustainable and efficient travel options. These may include measures such as improving public transit, supporting active transportation (walking and cycling), and reducing reliance on single-occupancy vehicles. I wanted to bring to your attention and highlight aspects of the Thrive Exchange project that align with such policies. The project embodies a pedestrian-friendly design, uses thoughtful site planning and street design, has zero vehicular parking, provides ample 1:1 bike parking and features inviting plazas adorned with seating and landscaping. These elements collectively contribute to the sustainable and vibrant urban environment practices set both by CDOT and the City of Chicago at large.

**Pedestrian-Friendly Design:** The project has been thoughtfully designed to prioritize the comfort and safety of pedestrians. The layout incorporates wide sidewalks, convenient crosswalks, and pedestrian-oriented amenities, promoting walkability and encouraging active transportation. By creating an inviting pedestrian experience, the project aims to enhance the vibrancy and livability of the surrounding community.

**Thoughtful Street Design:** The street bump outs, strategically designed along the curbside, create designated areas where car sharing vehicles can be conveniently parked. This arrangement not only promotes the use of car sharing services but also ensures that these vehicles do not disrupt the flow of traffic on the main road. By having these designated spaces, car sharing users can easily access and return vehicles without impeding the regular traffic patterns. This approach encourages sustainable transportation choices, reduces the reliance on private vehicles, and helps alleviate congestion on the main road, making our community more efficient, accessible, and conducive to multi-modal transportation options.

**Zero Vehicular Parking:** As part of our commitment to reducing traffic congestion and promoting sustainable transportation, our project does not include any parking facilities. This strategy encourages alternative transportation options and reduced reliance on private vehicles which therefore minimizes the environmental impact associated with automobile usage.

**1:1 Bike Parking:** Recognizing the growing popularity of cycling as a sustainable mode of transportation, the project has ensured ample bike parking provisions within the project. The 1:1 bike parking ratio ensures that residents and support staff have convenient and secure facilities to park their bicycles. This further supports the TDM goals by encouraging cycling as a viable transportation option and reducing reliance on fossil fuel-powered vehicles.

**Plaza Designs:** The project has incorporated beautifully landscaped plazas into the project's design. These open spaces will be decorated with lush greenery, creating a visually appealing and the project coming environment for residents, visitors, and the community at large. The inclusion of greenery supports sustainability, improves air quality, and provides a natural setting for social interaction and relaxation.

In conclusion, the Thrive Exchange project's pedestrian-friendly design, thoughtful site planning, incorporation of greenery in plazas, exclusion of a parking facility and provision of 1:1 bike parking aligns seamlessly with the Travel Demand Management practices. By prioritizing sustainable transportation and creating an inviting urban environment, the project aims to contribute positively to the community and promote a healthier, more vibrant Chicago.

If you have any questions or require further information, please do not hesitate to reach out. Thank you for your attention to these project highlights.
